Kew* 1928, 391. 1928

(Bark decoction given in fever; bark extract in dysentery. Root decoction given in irregular bleeding during menstruation.)

in India: golmatra

Canthium horridum Blume (*Canthium horridum* Benth., nom. illeg.; *Canthium pauciflorum* Blanco; *Canthium zizyphinum* Wall., nom. nud.; *Dondisia horrida* (Blume) Korth.; *Hyptianthera rhamnoides* Zoll. & Moritz; *Plectronia horrida* (Blume) K. Schum., nom. illeg.; *Plectronia horrida* (Blume) Benth. & Hook.f. ex Kurz)

China, Malaysia.

See *Catalogus* ... 45. 1823, *Fl. Filip.* 165. 1837, *Ned. Kruidk. Arch.* 2(2): 236. 1851 [Nederlandsch Kruidkundig Archief. Verslagen en Mededelingen der Nederlandsche Botanische Vereeniging.], *Flora Hongkongensis* 159. 1861, *Journal of the Asiatic Society of Bengal* 46(2): 153. 1877, *Adansonia* 12: 197. 1878, *Die Natürlichen Pflanzenfamilien* 4(4): 92. 1891

(Roots decoction as a postpartum remedy.)

Malay names: kayu bulang, ubat luka

Canthium rheedei DC. (*Canthium amarum* Oken; *Canthium rheedei* var. *minus* Thwaites; *Plectronia rheedei* (DC.) Bedd.; *Plectronia rheedei* Bedd.)

India, Sri Lanka. Armed shrubs, ovate leaves, yellowish green flowers

See *Prodr.* (DC.) 4: 474. 1830, *Allg. Naturgesch.* 3(2): 853. 1841, *Enum. Pl. Zeyl.*: 153. 1859, *Fl. Sylv. S. India*: 134–135. 1872

(Root decoction anthelmintic.)

in India: bidani-geli, kaarachedi, kare, karemullu, tsjerou-kara

Cantua Juss. ex Lam. Polemoniaceae

From a Peruvian name, *ccantu*, for *Cantua buxifolia* Lam.; see *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 603. 1785, *Genera Plantarum* [Jussieu] 136. 1789 and *American Fern Journal* 49(1): 10–24. 1959, Margaret A. Towle, *The Ethnobotany of Pre-Columbian Peru* 79. Aldine Publishing Company, Chicago 1961, *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/2): 112–131. 1967, *American Journal of Botany* 85(6): 741–752. 1998.

Cantua buxifolia Juss. ex Lam. (*Cantua alutacea* Infantes; *Cantua buxifolia* Lam.; *Cantua buxifolia* var. *lanceolata* Brand; *Cantua buxifolia* var. *ovata* Brand; *Cantua dependens* Pers.; *Cantua lanceolata* Peter; *Cantua ovata* Cav.; *Cantua theifolia* D. Don; *Cantua tomentosa* Cav.; *Cantua uniflora* Pers.; *Periphragmos dependens* Ruiz & Pav.; *Periphragmos uniflorus* Ruiz & Pav.)

Peru. Shrub, red pink yellow tubular flowers, calyx connate, seeds with marginal wing

See *Encycl.* (Lamarck) 1(2): 603. 1785, *Icones et Descriptiones Plantarum*, quae aut sponte ... [Cavanilles] 4: 43, t. 363. 1797, *Flora Peruviana* 2: 18, t. 133. 1799, *Synopsis Plantarum* (Persoon) 1: 187. 1805, *Edinb. Phil. Journ.* 7: 289. 1822, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(3a): 45. 1891 and *Pflanzenr.* (Engler) 4, Fam. 250: 22. 1907, *Lilloa* 31: 88. 1962, *Journal of Ethnopharmacology* 97: 337–350. 2005

(Flowers infusion astringent, against diarrhea, cough, rheumatism, liver and eyes complaints. Veterinary medicine, branches and flowers infusion for diarrhea. Magic, a symbol of unity, to bring good luck, ceremonial, offerings, superstitious practices.)

in English: magic flower, magic-flower-of-the-Incas, magic tree, Peruvian magic tree, sacred-flower-of-the-Incas

in Peru: cantu, cantuta, ccantu, ccantus, ccantut, ccantutay, ccelmo, flor del Inca, jantu, jinllo, kantu, kantuta, khantuta, la flor sagrada de los Incas, qantu, qantuta

Cantua pyrifolia Juss. ex Lam. (*Cantua loxensis* Willd.; *Cantua loxensis* Willd. ex Roem. & Schult.; *Cantua ochroleuca* Brand; *Cantua peruviana* J.F. Gmel.; *Cantua pyrifolia* Juss.)

South America.

See *Encyclopédie Méthodique, Botanique* 1: 603. 1783, *Systema Naturae* ... editio decima tertia, aucta, reformata 2(1): 347. 1791, *Ann. Mus. Natl. Hist. Nat.* iii. (1804) 117. 1804, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 4: 369. 1819 and *Das Pflanzenreich* (Engler) 4, Fam. 250: 23. 1907

(Infusion used as a laxative.)

Cantua quercifolia Juss.

Ecuador, Peru. Shrub or small trees, suffrutex, white flowers

See *Annales du muséum national d'histoire naturelle* 3: 118. 1804

(Analgesic, tonic, a remedy for malaria, sore knees.)

in Peru: dormidero, pepiso

Caperonia A. St.-Hil. Euphorbiaceae

For the apothecary Caperoni, see *Histoire des plantes les plus remarquables du Brésil* ... 244–245. 1826 and *Fieldiana, Bot.* 24(6): 25–170. 1949, *Field Mus. Nat. Hist., Bot. Stuttgart 1993; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933)

India. Small value for grazing, nodes densely bearded, panicle contracted

See *Fodder Grasses N. India* 88. 1888, *Monographiae Phanerogamarum* 6: 492. 1889, *Journal of the Bombay Natural History Society* 6: 71. 1891, *The Flora of British India* 7(21): 180. 1897 [1896] and *Hooker's Icones Plantarum* 31(4): t. 3085. 1922, *J. Bomb. Nat. Hist. Soc.* 32: 420. 1928, *Indian Forester* 77: 752. 1951, *Boissiera*. 9: 154. 1960, *Bulletin of the Botanical Department*. 20(1–4): 135. 1978[1979]

(Essential oil with antibacterial efficacy, for rheumatism. Leaves paste applied on the wounds, boils, scorpion stings. Stem bark decoction against snakebite.)

in India: rohis

Capirona Spruce Rubiaceae

A vernacular name, see *Fl. Ecuador* 50: 1–112. 1994.

Capirona decorticans Spruce (*Capirona duckei* Huber, nom. nud.; *Capirona huberiana* Ducke; *Capirona leiophloea* Benoist; *Capirona surinamensis* Bremek.; *Capirona wurdackii* Steyerf.; *Condaminea macrophylla* Poepp., nom. inval.; *Loretoa peruviana* Standley; *Monadelphanthus floridus* H. Karst.)

Tropical America. Fruit edible

See *J. Proc. Linn. Soc., Bot.* 3: 200. 1859, *Flora de Colombia* 1: 67, t. 33. 1860 and *Boletim do Museu Paraense de Historia Natural e Ethnographia* 3: 185. 1913, *Bull. Mus. Natl. Hist. Nat.* (Paris) 27: 367. 1921, *Arch. Jard. Bot. Rio de Janeiro* 3: 257. 1922, *Recueil Trav. Bot. Neerl.* 1934, xxxi. 261. 1934, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 11(5): 222. 1936, *Mem. New York Bot. Gard.* 10(5): 190, f. 69. 1963[1964], *Acta Amaz.* 15: 50, 52. 1985, *Journal of Ethnopharmacology* 114(2): 254–259. 2007

(Leishmanicidal. For skin diseases, psoriasis, fungal infections, diabetes and wounds.)

in Bolivia: batahua, guayabochi

in Peru: capirona, capirona de altura, capirona negra, capirona negra de altura, kshi muna, madera de hierro, meta-guais, meta-guayo, pau-mulato

Capparicordis H.H. Iltis & X. Cornejo Capparaceae

See *Botanical Journal of the Linnean Society* [London] 145: 209–218. 2004, *Brittonia* 59(3): 245–254. 2007, *Harvard Papers in Botany* 13(1): 103–116, 117–120. 2008.

Capparicordis crotonoides (Kunth) H.H. Iltis & X. Cornejo (*Capparis cordata* Ruiz & Pav. ex DC.; *Capparis cordata* Ruiz & Pav. ex E.A. López, nom. illeg.; *Capparis crotonoides* Kunth; *Capparis sidaefolia* Ruiz & Pav. ex DC.; *Colicodendron crotonoides* (Kunth) Hutch.; *Quadrella crotonoides* (Kunth) J. Presl; *Quadrella sidaefolia* (Ruiz & Pav. ex DC.) J. Presl)

Peru, Ecuador west of the Andes. Xerophytic shrubs or small trees, stellate pubescence

See *Nova Genera et Species Plantarum* (quarto ed.) 5: 95, pl. 437. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 251–252. 1824 and *Anales del Instituto Botánico A. J. Cavanilles* 16: 386–387. 1958, *The Genera of Flowering Plants* 2: 309. 1967, *Brittonia* 59(3): 248–249, 251, f. 2A-I. 2007

(Used to cure rheumatism, hot water extract given as oral application to human adult for neuritis.)

Capparicordis tweediana (Eichler) H.H. Iltis & X. Cornejo (*Capparis tweediana* Eichler; *Colicodendron tweedianum* (Eichler) Hutch.)

Argentina to Bolivia and Paraguay east of the Andes. Xerophytic shrubs or small trees, stellate pubescence, corolla yellow-green or yellow, unripe fruit boiled in water administered orally to human adult as a food

See *Flora Brasiliensis* 13(1): 273–274. 1865 and *The Genera of Flowering Plants* 2: 309. 1967, *Brittonia* 59(3): 251, f. 1A-F, 3A-H. 2007

(Leaf decoction taken for cough, also with mate tea for sore eyes. Fresh chewed leaves applied externally to furuncles.)

Capparidastrum Hutch.

Capparidaceae (Capparaceae)

Resembling *Capparis*, see *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 984–1006. 1938, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 566–584. 2001, *Ceiba* 44(2): 105–268. 2003 [2005], *Harvard Papers in Botany* 11(1): 17–18. 2006, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007, *Harvard Pap. Bot.* 13(2): 229–236. 2008.

Capparidastrum frondosum (Jacq.) X. Cornejo & H.H. Iltis (*Capparidastrum baducca* (L.) Hutch.; *Capparidastrum elegans* (Mart.) Hutch.; *Capparis baducca* L.; *Capparis elegans* Mart.; *Capparis frondosa* Jacq.; *Capparis stenophylla* Standl.; *Uterveria frondosa* (Jacq.) Bertol.)

Neotropics.

See *Species Plantarum* 1: 504. 1753, *Enumeratio Systematica Plantarum* 24. 1760, *Select. Stirp. Amer. Hist.*, t. 104. 1763, *Sylva Telluriana* 109. 1838, *Flora* 22(Beibl. 1): 24. 1839, *Novi Commentarii Academiae Scientiarum Instituti Bononiensis* 2: 8. 1839 and *Journal of the Washington Academy of Sciences* 13(20): 437. 1923, *The Genera of Flowering Plants* 2: 310. 1967, *Taxon* 42: 658, fig. 1. 1993, *Harvard Papers in Botany* 13(2): 232–233. 2008

(Irritant.)

Capparidastrum sola (J.F. Macbr.) X. Cornejo & H.H. Iltis (*Capparidastrum solum* (J.F. Macbr.) Cornejo & Iltis; *Capparis acutifolia* J.F. Macbr., nom. illeg. hom., non Sweet; *Capparis sola* J.F. Macbr.; *Capparis sola* var. *longiracemosa* Dugand)

South America. Shrub or undershrub

See *Enumeratio Systematica Plantarum* 24. 1760, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 248–249. 1824, *Hortus Britannicus* 585. 1830, *Flora Brasiliensis* 13(1): 269, 278. 1865 and *Candollea* 5: 358–359. 1934, *Caldasia* 7: 110–111. 1955, *The Genera of Flowering Plants* 2: 310. 1967, *Willdenowia* 34: 261. 2004

(Arrow poison.)

Capparis L. Capparaceae (Capparidaceae)

Greek *kapparis* or *kappari* (Theophrastus, *HP.* 6.5.2; Dioscorides 2.173), used for the caper plant and its fruit; possibly from Greek *kapros* ‘wild boar, provided with tusks; penis’, Arabic *kafara* ‘to be hairy, villous’; Latin *capparis* for the caper bush and the fruit of the caper bush, the caper; see Carl Linnaeus, *Species Plantarum* 1: 503–504. 1753, *Genera Plantarum* Ed. 5. 222. 1754, *Genera Plantarum* 242–243. 1789 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 984–1006. 1938, *Fieldiana, Bot.* 24(4): 380–397. 1946, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 566–584. 2001, *Ceiba* 44(2): 105–268. 2003 [2005], *Botanical Journal of the Linnean Society* [London] 145: 209–218. 2004, *Annals of the Missouri Botanical Garden* 93: 122–149. 2006, *Brittonia* 59(3): 245–254. 2007, *Harvard Papers in Botany* 13(1): 103–116, 117–120. 2008, *Harvard Papers in Botany* 13(2): 229–236. 2008.

Capparis angulata Ruiz & Pav. ex DC. (*Capparis angulata* Ruiz & Pav.; *Capparis angulata* Ruiz & Pav. ex E.A. López, nom. illeg. hom.; *Capparis gaudichaudiana* Eichler; *Capparis scabrida* Kunth; *Colicodendron scabridum* (Kunth) Hutch.)

South America. Tree or shrub, flowers dark yellowish-green

See *Nova Genera et Species Plantarum* (quarto ed.) 5(20): 95. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 253. 1824, *The Botany of the Voyage of H.M.S. ~Herald~* 78. 1852, *Flora Brasiliensis* 13(1): 273. 1865 and *Anales del Instituto Botánico A. J. Cavanilles* 16: 383, tab. 431. 1958, *The Genera of Flowering Plants* 2: 309. 1967

(Dried bark used orally as a pulmonary antihemorrhagic, hot water extract used against allergies and to regulate blood pressure.)

in Ecuador: sapote, zapote

Capparis assamica Hook. f. & Thomson

India, China. Shrub, without stipular spines or sometimes with ascending spines, white petals, red globose fruit

See *The Flora of British India* 1: 177. 1872

(Extract of dried leaves and roots mixed together with fresh leaves of *Artemisia vulgaris* taken for headache and body pain.)

in China: zong xu shan gan

in India: mantori

Capparis avicennifolia Kunth (*Beautempsia avicennifolia* (Kunth) Gaudich., as *avicenniaefolia*; *Capparis ovalifolia* Ruiz & Pav. ex DC.; *Capparis ovalifolia* Ruiz & Pav. ex E.A. López, nom. illeg.; *Colicodendron avicenniaefolium* Seem.; *Colicodendron avicennifolium* Seem.)

South America. Shrub or tree, leathery leaves, flowers greenish-white

See *Nova Genera et Species Plantarum* (quarto ed.) 5: 94. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 253. 1824, *Bot. Voy. Herald* 78. 1852, *Voy. Bonite, Bot.* 4: 38. 1866 and *Anales del Instituto Botánico A. J. Cavanilles* 16: 384. 1958

(Leaves and fruits toxic, produce dizziness and hallucinations. Hot water extract of fruit taken against neuritis and to treat rheumatism.)

in Peru: guayabito de gentil

Capparis bariensis Pierre ex Gagnep.

Vietnam.

See *Bulletin de la Société Botanique de France* 55: 209. 1908

(Root decoction taken to facilitate menstruation.)

Capparis brassii DC. (*Capparis gueinzii* Sond.; *Capparis thonningii* Schumach.)

South Africa, Togo. Woody liana, orange reddish fruits

See *Species Plantarum* 1: 503–504. 1753, *Prodr.* (DC.) 1: 248. 1824

(Used for chest complaints, expectoration of blood.)

in South Africa: uMabusana

Capparis cartilaginea Decne. (*Capparis galeata* Fresen.; *Capparis inermis* Forssk.; *Capparis spinosa* L. var. *galeata* (Fresen.) Hook.f. & Thomson)

Egypt. Shrub, pink white flowers, sharp recurved thorns

See *Annales des Sciences Naturelles; Botanique, sér.* 2, 3: 273. 1835 and *Fl. Afr. Nord* 12: 120. 1965, *Taxon* 52(2): 308–309. 2003, *Taxon* 54(2): 530. 2005

(Leaf used as antidote. Magic.)

in Kenya: lokapilak

Capparis cynophallophora L. (*Capparis cynophallophora* subsp. *isthmensis* (Eichler) H.H. Iltis; *Capparis isthmensis* Eichler; *Capparis jamaicensis* Jacq.; *Quadrella cynophallophora* (L.) Hutch.; *Quadrella isthmensis* (Eichler) Hutch.; *Quadrella jamaicensis* (Jacq.) J. Presl; *Uterveria cynophallophora* (L.) Bertol.; *Uterveria cynophallophora* Bertol.)

Tropical America, Costa Rica, Panama. Small tree, sweet scented white flowers mostly solitary or in short cymes, fruit a long pod with swellings marking the position of large developed brownish seeds

See *Species Plantarum* 1: 504. 1753, *Systema Naturae*, Editio Decima 1071. 1759, *Enumeratio Systematica Plantarum* 23. 1760, *Novi Commentarii Academiae Scientiarum Instituti Bononiensis* 2: 8–10. 1839, *Novi Commentarii Academiae Scientiarum Instituti Bononiensis* 4: 15. 1840, *Flora Brasiliensis* 13(1): 269–270. 1865 and *The Genera of Flowering Plants* 2: 309, in obs. 1967, *Fl. Lesser Antilles* 4(1): 296. 1988

(Hot water extract of roots taken as an emmenagogue.)

in English: black-willow, Jamaica caper, Jamaican caper, Jamaican caper tree, mustard tree

Capparis decidua (Forssk.) Edgew. (*Capparis aphylla* Hayne ex Roth; *Capparis aphylla* Roth; *Capparis decidua* Pax; *Capparis decidua* Edgew.; *Capparis sodada* R. Br.; *Sodada decidua* Forssk.)

Pakistan, Northern Africa, India, Arabia. Many-branched shrub or small tree, leafless green crooked spiny branches, flowers orange red, fruit and buds of young shoots edible raw, fodder for camels

See *Flora Aegyptiaco-Arabica* 81. 1775, *Nov. pl. sp.* 238. 1821, *Species Plantarum*. Editio sexta 238. 1831–1833, *Journal of the Linnean Society, Botany (J. Proc. Linn. Soc., Bot.)* 6: 184. 1862, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 2. (1891) 231. 1891 and *Blumea* 12: 424–425. 1965, *Bulletin of Indian Medicine* 159–160. 1973, *Journal of Biological Sciences* 7(3): 544–548, 582–584. 2007

(Used in Ayurveda, Unani and Sidha. Whole plant antifertility, acrid, stimulant, laxative, cooling, tonic, antidote, counter-irritant, in cough and asthma, to treat bruises, boils and indolent ulcers. Hot water extract of dried aerial parts diuretic, anthelmintic, analgesic, diaphoretic, abortifacient, antidiabetic, emetic, antiinflammatory, astringent, stomachic, laxative, antidote; young twigs chewed for strengthening gums and relieving toothache. Crushed young buds juice dropped in each ear for earache; young branches to treat ear infection; tender young shoots to relieve back pain. Wood ash to relieve pain of the digestive tract, blood in the stools. Bark diaphoretic, used in cough and asthma; fresh bark and shoots to treat gum disease and tooth decay; bark and flowers healing wounds. Roots, fruits and flowers febrifuge, antiinflammatory, vermifuge, for jaundice, chronic pains, arthritis, rheumatism. Fruits in cardiac troubles, abdominal pain, rheumatism, indigestion. Root bark astringent, anti-inflammatory, in rheumatism, dropsy. Veterinary medicine, antiinflammatory.)

in English: caper berry, caper plant, wild caper

in Sahara: ignine

in India: ab karir, apatra, bergesodab, cattiputpam, cattira-coputpam, chippuri, cinaikaravi, cinaikaravicceti, cippuri, ciracukkilam, cirakakoli, cirakatantai, cirakkoli, ciratci, cutakkini, enugadanta, granthila, gudhapatra, hanbag, kaareela, kabra, kachia phal, kachra, kair, kantaki, karad, karaka, kareera, kareeuppina gida, karel, karel-ka-tel, karer, kari uppigida, kari uppina gida, karia, karil, karimulli, karimullu, kario, karir, karira, karirah, kariram, kariramu, karirmula, karu, karyal, kataphala, kebir, keda, kelal, kentikam, ker, kera, keraa, kerdo, kerro, kiabara, kiruli, krakara, krakatha, krishashakha, kulaladondai, kulaladontai, kuraka, kuraram, kurel, kurrel, lete, mar vidahika, margh, marubharuha, maruruhu, marupurukam, mriduphala, mumudatu, naepathi, naevatho, nepati, nevati, nigudhapatra, nishpatra,

in Pakistan: kaledo, kaledok, kaler, karar

in Tibet: ka ri ra, rgya sna lu, rgya sne u, u bo ka, u po ta ka, u po ta ki la

Capparis deserti (Zohary) Täckh. & Boulos (*Capparis spinosa* var. *deserti* Zohary)

Egypt.

See *Bulletin of the Research Council of Israel, Section D, Botany* 8: 54. 1960, *Publications from the Cairo University Herbarium* 5: 14. 1972 [1974]

(Leaf decoction taken as antirheumatic and leaves infusion taken for arteriosclerosis; leaves used externally for scurvy, toothache, rheumatism.)

Capparis diffusa Ridl.

Malesia.

See *Journal of the Straits Branch of the Royal Asiatic Society* 59: 68. 1911

(Used in Ayurveda and Sidha.)

in India: kala, karamarda

Capparis divaricata Lam.

India. Shrub, crooked thorns

See *Encycl.* (Lamarck) 1(2): 606. 1785

(Used in Sidha. Veterinary medicine, for trypanosomiasis, bark extract pounded with leaves of *Erythrina variegata*, ginger, garlic and turmeric in goat's milk and given orally.)

in India: ambaravalli, ambaravalli, badaraeni, bhandero, boodari, budaroni, guda reni, rem, remidi, remmani, revadi, thu'raddai, thu'raddi, totla, totte, tottulla, turatti

Capparis diversifolia Wight & Arn. (*Capparis diversifolia* Sessé & Moc., nom. illeg.)

India.

See *Prodromus Florae Peninsulae Indiae Orientalis* 27. 1834, *Flora Mexicana*. 130. 1894

(Leaves and flowers consumed with milk for headache.)

in India: vaarithumbaipatchilai

Capparis elaeagnoides Gilg

South Africa, Tanzania.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 248. 1824 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 215. 1903, *Kew Bulletin* 16: 81. 1962

(Infusion of dried root administered orally to treat sleeping sickness.)

Capparis erythrocarpos Isert

Tanzania, Ghana. Armed vine, spiny liana, climbing shrub, straggling, with spiny hooks, curved spines, papery leaves, green flowers, red ridged fruit

See *Ges. Naturf. Freunde zu Berlin neue Schrift*. ix. (1789) 334. t. 9. 1789

(Pieces of roots placed by making incision on the breasts to provoke milk secretion.)

Capparis fascicularis DC. var. *elaegnoides* (Gilg) DeWolf

East Africa. Shrub, very thorny, scrambling, leaves elliptic shortly stalked, flowers white or cream clustered at the base of the leaves, fruits orange when ripe

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 248. 1824 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 215. 1903, *Kew Bulletin* 16: 81. 1962

(Roots and leaves poisonous, vomiting and purging followed by death.)

in East Africa: akatono, akatungu, kerda, kiptablelet, lubisu, lubisu lugosha, lugve, luwisu, mukamira, obutungutungu, olaturude, omukwatangwe

in South Africa: caper tree, Transvaal caper

Capparis fascicularis DC. var. *fascicularis* (*Capparis flanaganii* Gilg & Ben.; *Capparis rudatisii* Gilg & Ben.; *Capparis transvaalensis* Schinz; *Capparis transvaalensis* var. *calvescens* (Gilg & Ben.) Marais)

East Africa, Ghana. Shrub, woody climber, sprawling, spreading, very thorny, with hooked spines, scrambling, flowers pale greenish cream

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 248. 1824

(Root decoction taken to treat gastrointestinal problems and stomachache.)

in South Africa: caper tree, Transvaal caper

in Tanzania: maji ya gagulo

Capparis flexuosa (L.) L. (*Capparis cynophallophora* L., nom. illeg.; *Capparis didymobotrys* Ruiz & Pav.; *Capparis didymobotrys* Ruiz & Pav. ex DC.; *Capparis didymobotrys* Ruiz & Pav. ex E.A. López, nom. illeg.; *Capparis eucalyptifolia* O.L. Haught; *Capparis flexuosa* L.; *Capparis flexuosa* Blume ex Hassk.; *Capparis flexuosa* Vell., nom. illeg.; *Capparis guayaquilensis* Kunth; *Capparis isthmensis* Eichler; *Capparis lanceolata* Ruiz & Pav. ex E.A. López, nom. illeg.; *Capparis lanceolata* Ruiz & Pav. ex DC.; *Capparis mollis* Kunth; *Capparis polyantha* Triana &

Planch.; *Capparis sinclairii* Benth.; *Morisonia flexuosa* L.; *Quadrella cynophallophora* (L.) Hutch.)

Central and South America. Tree, white scented clustered flowers, fruit somewhat segmented

See *Systema Naturae*, Editio Decima 1071. 1759, *Plantarum Jamaicaensium Pugillus* 14. 1759, *Species Plantarum*, Editio Secunda 1: 722. 1762, *Nova Genera et Species Plantarum* (quarto ed.) 5: 88–89. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 253. 1824, *Florae Fluminensis* 230. 1829, *Novi Commentarii Academiae Scientiarum Instituti Bononiensis* 2: 9. 1839, *The botany of the voyage of H.M.S. Sulphur* 65, t. 27. 1844, *Annales des Sciences Naturelles; Botanique*, sér. 6, 17: 76. 1862, *Flora Brasiliensis* 13(1): 269–270. 1865 and *J. Bot.* (London) 52: 142. 1914, *Tropical Woods* 20: 31. 1929, *Anales del Instituto Botánico A. J. (Hot water extract of bark taken as an emmenagogue; water extract of root used as an emmenagogue; water extract of dried wood taken for abdominal pain.)

in English: bay-leaved caper, caper tree, limber caper

Capparis floribunda Wight (*Capparis floribunda* Lepr. ex Walp.; *Capparis oligostema* Hayata)

India.

See *Illustrations of Indian Botany* 1: 35, pl. 14. 1838, *Repertorium Botanices Systematicae* (Walpers) 1: 197. 1842–1847 and *Icon. Pl. Formosan.* 3: 22–23. 1913

(Fresh leaves heated and applied on boils and bisters.)

in China: shao rui shan gan

Capparis galeata Fresen.

Egypt. Shrub, fresh fruit eaten

See *Museum Senckenbergianum* 2: 111. 1837, *The Flora of British India* 1: 173. 1872

(Fruit eaten against fever, headache, rheumatism, used externally as a cold remedy. Flowers eaten for toothache. Hot water extract of leaf taken as an emmenagogue.)

Capparis grandiflora Wall. ex Hook. f. & Thomson

India.

See *The Flora of British India* 1: 174. 1872

(Bark and leaves infusion taken for swellings.)

in India: totlamullu

Capparis grandis L.f. (*Capparis bisperma* Roxb.; *Capparis grandis* Russ. ex Wall.)

India, Burma. Tender fruits used as vegetable

See *Supplementum Plantarum* 263. 1782 [1781 publ. Apr 1782], *Numer. List* [Wallich] n. 7001. 1828–1849

(Used in Sidha. Fresh leaves cooked and eaten as a vegetable soup for skin eruptions. Leaves crushed and the juicy pulp applied for insect bite. Dried bark and leaf infusion administered orally for swellings and eruptions; dried stem bark powder given for increasing appetite.)

in India: antera, aridonda, avagudu, baevapi, duddupi, dudduppi, dudippi, dudupi, ghuti, goolee, guli, gullem chettu, gullenguli, gulli, haro-kairio, kaldero, kandel, katarni, kauntel, kautel, mudakothan, mudkondai, nakkulijan, nakkulincan, nalluppi, nalluti, oridonda, pachenda, pachonda, pachovand, pachunda, padanbor, pandanbor, puchunda, punchunda, ragot, ragota, raygutti, regguti, regutthi, regutti, remide, revadi, shuda-thoratti, shudathoratti, torate, torati, totla, totte, tottulla, turatta, uppi, vatareni

Capparis heyneana Wall. ex Wight & Arn. (*Capparis heyneana* Wall., nom. nud.)

India.

See *A Numerical List of dried specimens of plants* in the East India Company's Museum: collected under the superintendence of Dr. Wallich of the Company's botanic garden at Calcutta. n. 6985. London 1828–1849, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 25. 1834

(Stomachic, astringent.)

in India: ran-mamdaru

Capparis himalayensis Jafri (*Capparis spinosa* L. var. *himalayensis* (Jafri) Jacobs)

India. Young leaves and flower buds cooked as vegetable, fruits edible

See *Species Plantarum* 1: 503. 1753 and *Kew Bull.* 4: 299. 1949, *Pakistan Journal of Forestry* 6: 197, pl. 1, f. 1B. 1956, *Blumea* 12(3): 419–420. 1965

(Fruits paste applied over wounds and inflammations.)

in China: zhua jia shan gan

in India: chetup, kabra

Capparis indica (L.) Druce (*Breynia indica* L.; *Capparis amygdalina* Lam.; *Capparis breynia* Kunth, nom. illeg.; *Capparis breynia* L.; *Capparis breynia* Jacq. ex Hemsl., nom. inval.; *Capparis indica* Druce; *Capparis indica* (L.) Fawc. & Rendle; *Linnaeobreynia indica* (L.) Hutch.; *Pseudocroton tinctorius* Müll.Arg.; *Quadrella indica* (L.) H.H. Iltis & X. Cornejo)

Neotropics, Nicaragua. See also *Quadrella indica*

See *Prodr. Fasc. Rar. Pl.*, 13, t. ad p. 13. 1739, *Species Plantarum* 1: 503. 1753, *Systema Naturae*, Editio Decima 2: 1071. 1759, *Encyclopédie Méthodique, Botanique* 1: 608. 1785, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 5: 97. 1821, *Prir. (Hot water extract of fruits and hot water extract of roots administered orally against menstrual complaints.)

in English: black witty, white willow

Capparis kirkii Oliv.

Tanzania.

See *Flora of Tropical Africa* [Oliver et al.] 1: 98. 1868

(Dried root used to clean the nipples before nursing, powdered roots of *Capparis kirkii*, *Ximenia* sp. and *Pentanisia* sp. applied externally with saliva.)

Capparis micracantha DC. (*Capparis liangii* Merr. & Chun; *Capparis micracantha* Teijsm. ex Miq.; *Capparis myrioneura* Hallier f.; *Capparis odorata* Blanco)

Myanmar, Thailand, Malaysia. Shrub or small tree, drooping branches, straight or slightly curved thorns, white petals with yellow base, berry strongly smelling when ripe, slimy sweet pulp

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 247. 1824 and *Lingnan Sci. J.* 5: 83. 1927, *Sunyatsenia* 2(1): 29–30. 1934

(Roots decoction in stomachache and as a uterine tonic after childbirth; hot water extract of roots taken as a diuretic, anti-pyretic. Decoction of dried leaf and root taken for asthma. For swellings, pound the leaves and fruit with salt and turmeric, and poultice. Stem crushed with water applied topically to relieve pain and swellings. Whole plant hot water extract for asthma and chest pain.)

in Cambodia: kanchoen bai dach

in China: xiao ci shan gan

in Indonesia: balung, kledung, sanek

in Laos: say sou

in Malaysia: kaju tuju, melada

in Philippines: halubagat-kahoi, salimbagat, salimomo, tarabtab

in Thailand: chingchee, kradaat khaao, nuat maeo daeng

in Vietnam: b[uf]ng ch[ef], c[as]p gai nh[or]

Capparis micrantha A. Rich.

Abyssinia.

See *Tentamen Florae Abyssinicae* ... 1: 31. 1847

(Antitumour.)

Capparis moonii Wight

Sri Lanka. Woody vine, creamy, anthers light orange, fruit greenish orange

See *Illustrations of Indian Botany* 1: 35. 1840–1850

(Used in Ayurveda.)

in India: aadsenda, adonda, bandiraroveldi, mullu kathari, mullu katthari balli, mullukarti, mullukathari, mullukat-tari, rudanti, rudanti phal, rudrvanti, tatla, totte, tottulla, udipi, vaghathi

Capparis olacifolia Hook. f. & Thomson

India, Nepal, Tropical Himalaya. Climbing shrubs, unarmed or with short straight stipular spines, flowers in axillary rows, white oblanceolate petals, red globose fruits

See *The Flora of British India* 1: 178. 1872

(Bruised leaves put externally as poultice in gout.)

in China: zang dong nan shan gan

in India: dieng sia, hais, jhenokung, kotahar, naski, osaro, simbri, sopada

Capparis ovata Desf. (*Capparis ovata* M. Bieb.)

Europe.

See *Fl. Atlant.* 1: 404. 1798, *Flora Taurico-Caucasica* 2: 1. 1808, *Fl. Alger.* 82. 1888 and *Ann. Missouri Bot. Gard.* 93(1): 137. 2006

(Leaf and stem decoction used externally for indolent ulcer and toothache; decoction administered orally for arthralgia.)

Capparis pedunculosa Wall. ex Wight & Arn. (*Capparis pedunculosa* Wall.)

India.

See *A Numerical List of dried specimens of plants* [Wallich] ... n. 6999. London 1828–1849, *Prodromus Florae Peninsulae Indiae Orientalis* 27. 1834

(Used in Sidha.)

in India: alantal, amantalam, appaimaricam, civappukkat-tiri, karuncurai, siru-vashuthunai

Capparis pyrifolia Lam. (*Capparis acuminata* Willd.; *Capparis pyrifolia* Wight & Arn.)

Thailand, Indonesia. A shrub, sometimes climbing, leaves oblong or ovate-oblong, thorns straight or slightly curved upwards, petals very thin pubescent on both surfaces, flowers white-tinged pale yellow or green, filaments white, berry globular shiny black, in the lowlands and hills in dry locations, teak forest

See *Encycl.* (Lamarck) 1(2): 606. 1785, *Prodr. Fl. Ind. Orient.* 1: 25. 1834

(The wood used for biliousness, stomachache and giddiness. Leaves used as a remedy for headache.)

in Indonesia: gagahan, kaloang-kaloangan, sanek

in Malaysia: kaju tujuh

in Thailand: kinkhee, maengso, naam haang nokkaling

in Vietnam: c[as]p c[os] m[ur]i, ta cha

Capparis rheedei DC. (*Capparis brevispina* var. *rheedii* (DC.) Thwaites; *Capparis heyneana* Wall. ex Wight & Arn.)

India. Shrub, solitary axillary bluish flowers, berry ovoid

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 246. 1824, *Prodromus Florae Peninsulae Indiae Orientalis* 25. 1834, *Enumeratio Plantarum Zeylaniae* 15. 1858 and *J. Econ. Taxon. Bot.* 33(1): 242–2009

(Leaves juice, mixed with the dung of wild boar, given as an antiarthritic ointment. Leaves and flowers infusion purgative; leaves and fruits made into a paste consumed for cold and one-side headache. Fruit taken with milk a sedative of passion.)

in India: vempudampatchilai

Capparis rosea Oliv. (*Capparis carvalhoana* Gilg; *Capparis rosea* (Klotzsch) Oliv.; *Petersia rosea* Klotzsch)

Tropical Africa.

See *Fl. Trop. Afr.* [Oliver et al.] 1: 99. 1868

(Carminative.)

Capparis roxburghii DC. (*Capparis bisperma* Wight ex Hook.f.)

India. Scandent shrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 247–248. 1824, *Fl. Brit. India* [J.D. Hooker] 1: 176. 1872

(Used in Ayurveda and Sidha.)

in India: abooba, agooba, aguba, chittigara, mudakothan, otai, rudanti

Capparis sepiaria L. (*Capparis citrifolia* sensu Arwidss.; *Capparis corymbosa* Lam.; *Capparis corymbosa* sensu Oliv.; *Capparis corymbosa* Roxb., nom. illeg.; *Capparis flexicaulis* Hance; *Capparis glauca* Wall. ex Hook. f. & Thomson; *Capparis sepiaria* Wall.)

SE Asia, India, Sri Lanka, China. Treelet, woody vine, scandent, many-branched shrub, scrambling, stout, zigzag twigs, thorns short recurved, flowers sweetly-scented with light spicy odor, petals white, filaments white, berry globose

See *Systema Naturae*, Editio Decima 2: 1071. 1759, *Encyclopédie Méthodique, Botanique* 1(2): 605–606. 1785, *Flora Indica* or Descriptions of Indian plants 2(2): 569. 1824,

Journal of Botany, British and Foreign 16(188): 225. 1878 and *Blumea* 12: 489. 1965

(Used in Ayurveda and Sidha. Plant febrifuge, alterative, tonic, for skin diseases; decoction used externally for swellings. Fruit eaten for typhoid fever. Hot water extract of dried root bark taken as a purgative, a diuretic and for gingivitis; decoction of bark and root antiinflammatory. Root poultice for itching around anus; root juice drops in nostrils for headache; root paste with opium applied on swelling of eyes; root extract in the treatment of ear ache; root crushed along with ginger and asafoetida, and the paste applied externally to cure mumps, wounds, scratches. Powdered seeds antidote. Contact therapy, root piece stuck on the lock of hair of pregnant woman for inducing abortion. Veterinary medicine, leaves febrifuge.)

in China: qing pi ci

***Capsicum baccatum* L.**

South America. Perennial, bright yellow fruits nearly globose

See *Mantissa Plantarum* 1: 47. 1767, *Revisio Generum Plantarum* 2: 449. 1891, *Annual Report of the Missouri Botanical Garden* 1898: 99–101. 1898 and *Feddes Repertorium* 72: 173. 1966

(The oil in the fruits will cause a blistering rash in many individuals. Antihemorrhoidal, antirheumatic, antimicrobial, tonic, digestive, irritant, rubefacient, sialagogue. Insect repellent. Veterinary medicine.)

***Capsicum fastigiatum* Blume**

East Indies, Africa.

See *Bijdragen tot de Flora van Nederlandsch Indie* 13: 705. 1826

(Used in Sidha. Stimulant, astringent, rubefacient, carminative, antimicrobial, for cholera, diarrhea, dyspepsia.)

in English: Cayenne pepper, chili

in India: cimai milakay, kantari, mirepakaya, miriyapukaya, peymilakay, ucimilakay

Malay name: chili

***Capsicum frutescens* L.** (*Capsicum annuum* L.; *Capsicum frutescens* Rodsch.; *Capsicum longum* A. DC.; *Capsicum longum* Bouton ex Dunal; *Capsicum minimum* Roxb.)

India. Shrubby perennial, herb, greenish-white flowers, erect fruiting pedicels, fruit eaten

See *Species Plantarum* 1: 189. 1753, *Catalogus plantarum horti botanici monspeliensis* 86. 1813, *Flora Brasiliensis* 10: 147. 1846, *Prodr.* (DC.) 13(1): 414. 1852

(Used in Ayurveda, Unani and Sidha. Fruits poisonous, vesicants and irritants if eaten in quantity. Fruits carminative, pungent, irritant, acrid, spasmolytic, stimulant, antimicrobial, febrifuge, diaphoretic, digestive, antiseptic, stomachic, externally as a rubefacient, antirheumatic, counter-irritant and antiseptic; fruit paste mixed with boiled cow milk used for chest disorders and pain; dried powdered consumed for gastric complaints. Leaves crushed on palm and inhaled for headache; for boils, pound young leaves of *Derris elliptica*

with leaves of *Capsicum frutescens* and apply as a poultice. Stem bark of *Allanblackia floribunda* mixed with *Capsicum frutescens* or *Solanum anguivi* used for the treatment of cough. Veterinary medicine, leaf paste applied on wounds of fowls; bark of *Elaeocarpus serratus* pounded with fruits of *Capsicum frutescens* given orally as a tonic. Religious and supernatural beliefs, used in a kind of magical treatment for warding off troubles of stomach, to prevent drunkenness and to drive out evil spirits; to find out if a stranger has evil intention. Veterinary medicine, pounded leaves applied on wounds of poultry, birds.)

Capsicum pubescens Ruiz & Pav. (*Brachistus lanceaeifolius* Miers; *Capsicum guatemalense* Bitter; *Capsicum lanceaeifolium* Kuntze; *Capsicum lanceifolium* (Miers) Kuntze; *Capsicum violaceum* Kunth; *Capsicum violaceum* Desf.)

Peru, Guatemala. Herb or climbing shrub

See *Flora Peruviana* 2: 30. 1799, *Tableau de l'École de Botanique* 70. 1804, *Nova Genera et Species Plantarum*

(quarto ed.) 3: 49. 1818, *Annals and Magazine of Natural History* 2: 267. 1849, *Revisio Generum Plantarum* 2: 450. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 20: 377. 1924

(Antihemorrhoidal, antimicrobial, antirheumatic, antiseptic, digestive, irritant, rubefacient, tonic.)

in English: Apple chilli, chilli manzana, locoto, rocoto

in Indonesia: cabe bendot, cabe dieng, cabe gondol

Caragana Fabr. Fabaceae (Galegeae)

From *qaraqan*, a Mongolian name for *Caragana arbore-scens*, see *Enumeratio Methodica Plantarum* 421. 1763 and *Acta Scientiarum Naturalium Universitatis Nei Menggu* 24(6): 633–635. 1993.

Caragana aegacanthoides (Parker) L.B. Chaudhary & S.K. Srivastava (*Astragalus aegacanthoides* R. Parker)

India, Himalaya. Perennial non-climbing herb

See *Indian Forester* 49: 78, t. 5. 1923, *For. Fl. Kumaun* 158. 1927, *Biologia* 7(1 & 2): 61. 1961, *Legum. India* 84. 1992, *South Asia Legum.: Checkl.* 221. 2003, *Taiwania* 52(1): 25–48. 2007

(Roots used for burns, boils, skin diseases.)

Caragana brevispina Benth.

Nepal. Perennial non-climbing shrub, multi-stemmed, flowers yellow turning coral with age, leaves or flower buds cooked as vegetable

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 198. [1833] 1839[–1840] and *Taxon* 29: 355–357. 1980

(Plant decoction taken for joint ache. Ceremonial, the flowers.)

in India: shuroo

in Nepal: jomosing, sabalo

Caragana sukiensis C.K. Schneid. (*Caragana hoplites* Dunn; *Caragana nepalensis* Kitam.)

India, Nepal. Perennial non-climbing shrub

See *Illustriertes Handbuch der Laubholzkunde* 2: 99. 1907, *Bulletin de l'Herbier Boissier, sér. 2, 7*: 313. 1907, *Acta Phytotaxonomica et Geobotanica* 15: 132. 1954, *Taxon* 28: 627–628. 1979

(Root paste applied to treat cuts, wounds and dislocation of bone.)

in China: ni bo er jin ji er

in Nepal: pakchar

Caraipa Aublet Calophyllaceae (Clusiaceae, Guttiferae)

A native name for *Caraipa parvifolia* Aublet, called *caraipé* by the Garipons, French Guiana, see *Histoire des plantes de la Guiane Française* 1: 561, t. 223, f. 1. 1775 and *Botanical Museum Leaflets—Harvard University* 29(1): 49–50. 1983.

Caraipa densifolia Mart. (*Caraipa laxiflora* Benth.; *Caraipa variabilis* Cambess.)

Brazil, Colombia.

See *Nova Genera et Species Plantarum ...* 1: 105, pl. 65, f. 6–11. 1824, *Mémoires du Muséum d'Histoire Naturelle* 16: 416. 1828, *London Journal of Botany* 2: 364. 1843, *Flora Brasiliensis* 12(1): 323. 1886 and *J. Nat. Prod.* 46(1): 118–122. 1983, *Food and Chemical Toxicology* 48(6): 1597–1606. 2010

(Sap applied as antifungal, for skin diseases.)

in Colombia: kar-pat', ma-wan-he-te

Caraipa grandifolia Mart. (*Caraipa glabrata* Mart.; *Caraipa lacerdae* Barb. Rodr.; *Caraipa paraensis* Huber)

Brazilian Amazon.

See *Nova Genera et Species Plantarum ...* (Martius) 1: 105. 1826, Rodrigues Joao Barbosa (1842–1909), *O tama-koaré*, especies novas da ordem das ternstroemiaceas, Manáos, Impresso na typographia do Jornal do Amazonas, 1887 and *Boletim do Museu Paraense de Historia Natural e Ethnographia* 3: 432. 1902, *Memoirs of the New York Botanical Garden* 29: 121. 1978, *Mem. Inst. Oswaldo Cruz.* 101(3): 287–290. 2006

(Antibacterial and cytotoxic, crushed leaves applied on skin diseases, herpes, mange, rashes, itching.)

Caraipa parvielliptica Cuatrec.

Colombia.

See *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 8: 64. 1950

(Crushed leaves applied on skin diseases, sores of the mucous membrane of the mouth, rashes, itching.)

Carallia Roxb. Rhizophoraceae

Karalli (*karu* 'forests' and *alli* 'shining', referring to the leaves) is a Telugu (a Dravidian language spoken in south-eastern India, in an area north of Madras and running inland to Bellary) name in Andhra Pradesh for one species; see *Fl. Cochinch.* 1: 296. 1790, *Genera Nova Madagascariensia* 24. 1806, William Roxburgh, *Plants of the Coast of Coromandel* 3: 8, t. 211. 1811, *Flind. Voy.* ii. 549. 1814, *Hort. Malab.* 31. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 294. 1828 and *Flora Malesiana* ser. 1(54): 445–493. 1958, *Adansonia*, n.s. 2: 122–128. 1962, *Acta Phytotax. Geobot.* 48: 15–21. 1997, *J. Trop. & Subtrop. Bot.* 6(1): 40–46. 1998.

Carallia brachiata (Lour.) Merr. (*Barraldeia madagascariensis* DC.; *Carallia baraldeia* Arn.; *Carallia barraldeia* Wight & Arn., nom. illeg.; *Carallia brachiata* Merr.; *Carallia integerrima* DC.; *Carallia lanceaefolia* Roxb.; *Carallia lucida* Roxb.; *Carallia lucida* Roxb. ex Kurz; *Carallia madagascariensis* Tul.; *Carallia madagascariensis* (DC.) Tul.; *Carallia scortechinii* King; *Carallia sinensis* Arn.; *Carallia spinulosa* Ridl.; *Diatoma brachiata* Lour.; *Eugenia cupulifera* H. Perrier; *Petalotoma brachiata* (Lour.) DC.)

Tropical Asia, India, Madagascar. Shrub or small canopy tree, many-branched, inner bark yellow with prominent rays, twigs swollen at nodes, horizontal opposite branches, coriaceous opposite leaves with margins very finely toothed, large stipules often covered by resin, flowers in cymes, green cupuliform calyx, white corolla and yellow anthers, pink-red to black globose fleshy berry, seed covered by an orange aril, ripe fruits eaten

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 732. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 33, 295. 1828, *Nov. Act. Ac. Caes. Leop.-Car.* 18: 334. 1836, *Ann. Nat. Hist.* 1(5): 370–371. 1838, *Ann. Sci. Nat., Bot.* sér. 4, 4: 117, t. 6. 1856 and *Philippine Journal of Science* 15(3): 249. 1919, *J. Straits Branch Roy. Asiat. Soc.* 82: 184. 1920, *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 4(2): 190. 1952, *Fitoterapia* 75(7–8): 785–788. 2004, Ling, S.K. et al. "Lipoxygenase and hyaluronidase inhibitory activities of constituents from *Phyllagathis rotundifolia* and *Carallia brachiata*." *Malaysian Journal of Science* 24(1): 247–252. 2005, *PTR. Phytotherapy research* 20(6): 458–461. 2006

(Used in Sidha. Leaves and bark antibacterial, antioxidant, to treat septic poisoning, septicemia, scabies and itch; bark antiinflammatory, used for treating oral ulcers, inflammation of the throat and stomatitis.)

in English: carallia, carallia tree, corkwood, corkybark, freshwater mangrove, Indian carallia

in Madagascar: amparimamy, farimamy, fatsikahidambo, tamenaky

in Burma: maniauga, manioga

in Cambodia: tromeng

in China: zhu jie shu

in Malaya: false kelat, kesinga, meransi, mesinga, siseh puyoh, sisek puyu

in Nepal: kathe kera

Carallia suffruticosa Ridl.

Cambodia, Laos, Vietnam, Malaysia. Tree, slender, small yellow flowers, red fruits, rare, endangered

See *Journal of the Straits Branch of the Royal Asiatic Society* 61: 6. 1912

(Leaves paste applied to boils and to reduce fever; leaves decoction taken to expel worms from the intestines. Pound the leaves and extract the juice, use this as a postpartum remedy.)

in Malaya: sireh puyoh, sisek puyu, tulang daeng

Caralluma R. Br. Asclepiadaceae (Apocynaceae)

Possibly from Arabic *qarh al-luhum*, or *car-allum*, a Telugu name in Andhra Pradesh for *Caralluma adscendens* or *Stapelia adscendens* Roxburgh, see *On the Asclepiadeae* 14. 1810, *Mem. Wern. Nat. Hist. Soc.* 1: 25. 1811 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 13: 1–224. 1985, *Monogr. Syst. Bot. Missouri Bot. Gard.* 51: i–ix, 1–267. 1994.

Caralluma adscendens (Roxb.) Haw. (*Caralluma adscendens* Haw.; *Caralluma adscendens* (Roxb.) R. Br.; *Caralluma dalzielii* N.E. Br.; *Caralluma subulata* (Forssk.) Decne.; *Stapelia adscendens* Roxb.; *Stapelia subulata* Forssk.)

India. Herb, very variable, fleshy almost leafless stems, deep purple-brown or yellowish white flowers, slender follicles, cooked plant eaten as vegetable

See *Plants of the Coast of Coromandel* 1: 28–29, t. 30. 1795, *Memoirs of the Wernerian Natural History Society* 1: 25. 1810, *Synopsis plantarum succulentarum ...* 47. 1812 and *Taxon* 30: 696. 1981, *Journal of Pharmacy Research* 2(7): 1228–1229. 2009

(Antiinflammatory, antipyretic, antinociceptive, antifungal, antidote and anthelmintic, used in treatment of rheumatism, diabetes, leprosy, tumor, fungal diseases, snake, scorpion bite. Young stem ground with onion and tamarind and made into a paste used to cure digestive problems.)

in India: kaarallamu, kundelu kammulu, kundethi komulu, maakada singi, mangana kodu, pachaipuli, thavite chettu, vajra che bajji

Caralluma attenuata Wight (*Caralluma adscendens* var. *attenuata* (Wight) Gravely & Mayur.)

India. Herb, stem used as vegetable

See *Icones Plantarum Indiae Orientalis* [Wight] 4: 15–16, t. 1268. 1848 and *Bulletin of the Madras Government Museum* 4(1): 13. 1931, *Proc. Indian Sci. Congr. Assoc.* (III, C) 67: 57. 1980, *Taxon* 30: 696. 1981, *Bradleya* 8: 11. 1990,

Fitoterapia 74(3): 274–279. 2003, *J. Herbal Pharmacother.* 4(1): 35–40. 2004

(Leaves for diabetes, hypoglycemic, antihyperglycemic.)

in India: ekkyan, makadsing

Caralluma dalzielii N.E. Br. (*Otanema latifolia* Raf.)

Nigeria.

See *New Fl.* (Rafinesque) iv. 61. 1826 and *Bulletin of Miscellaneous Information Kew* 1912: 280. 1912, *Taxon* 26: 557–565. 1977, *Journal of Ethnopharmacology* 92: 233–244. 2004

(Latex considered toxic. Stem antiinflammatory, tonic, antipyretic, antiemetic, analgesic, aphrodisiac, antinociceptive, antifungal, antidote and anthelmintic, used in treatment of rheumatism, earache, otitis, diabetes, leprosy, fungal diseases, snake and scorpion bite. Magic, against bad spell.)

in Ivory Coast: dudumosu, horba ya kalé, mbolla, myebzoya

in Mali: sukulaga

in Niger: hudda sardzé, tobey bargan

in Senegal: burinaney, burnéné

Caralluma dummeri (N.E. Br.) White & Sloane (*Angolluma dummeri* (N.E. Br.) Plowes; *Orbea dummeri* (N.E. Br.) Bruyns; *Pachycymbium dummeri* (N.E. Br.) M.G. Gilbert; *Stapelia dummeri* N.E. Br.)

East Africa.

See *Synopsis plantarum succulentarum ...* 37. 1812 and *Gardener's Chronicle & Agricultural Gazette* 61: 132. 1917, *Journal of the Cactus and Succulent Society of America* 12: 82. 1940, *Excelsa, Taxon. Ser.* 1: 69. 1978, *Cact. Succ. J. New South Wales* 17: 63. 1990, *Bradleya*; Yearbook of the British Cactus and Succulent Society 8: 22. 1990, *Excelsa* 16: 110. 1993, *Aloe* 37(4): 74. 2000

(For chest pain, drink stems decoction with fresh milk or chew. Sap applied for wounds. Magic.)

in Kenya: lochen

Caralluma edulis (Edgew.) Benth. ex Hook.f. (*Boucerosia edulis* Edgew.; *Boucerosia stocksiana* Boiss.; *Caralluma edulis* A. Chev., Hutch. & Dalziel; *Caralluma edulis* A. Chev. ex Hutch. & Dalziel, nom. illeg.; *Caralluma edulis* A. Chev., nom. nud.; *Caralluma edulis* (Edgew.) Benth.; *Caralluma edulis* (Edgew.) Chev.; *Caralluma vittata* N.E. Br., non Wickens; *Caudanthera edulis* (Edgew.) Meve & Liede; *Cryptolluma edulis* (Edgew.) Plowes)

West Africa, India. herb, slightly succulent, slender, many-branched, eaten as a salad green or boiled vegetable

See *Journal of the Linnean Society, Botany* 6: 205, t. 1. 1862, *Genera Plantarum* 2: 782. 1876, *The Flora of British India* [J.D. Hooker] 4(10): 76. 1883 and *Fl. Trop. Afr.* [Oliver et al.] 4(1.3): 483. 1903, *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 440. 1920, *Flora of West Tropical Africa* [Hutchinson & Dalziel] 2: 65. 1931, *Bulletin of the Madras Government Museum* n.s. Nat. Hist. Sect. 4(1): 8. 1931, *Haseltonia* 3: 57–58, figs. 1 & 11. 1995, *Plant Systematics and Evolution* 234(1–4): 201. 2002

(Used in Ayurveda. Tonic, antiinflammatory, antipyretic, antinociceptive, antifungal, antidote and anthelmintic, used in treatment of rheumatism, diabetes, leprosy, tumor, fungal diseases, snake, scorpion bite.)

in India: dugdha, dugdhapashana, dugdhika, kshirakshava, kshiri, kshirini, pimpa, uttamphalini, yugmaphalottama

in Pakistan: apitak

Caralluma fimbriata Wall. (*Caralluma adscendens* var. *fimbriata* (Wall.) Gravely & Mayur.)

Burma, India. Tender succulent, spines covering the angled stems, star-shaped fleshy foul-smelling flowers, eaten raw or cooked, famine food

See *Plantae Asiaticae Rariores* 1: 7, t. 8. 1829 and *Bulletin of the Madras Government Museum* 4(1): 13. 1931, *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Bradleya* 8: 11. 1990, *Chem. Biodivers.* 5(2): 239–250. 2008

(Eaten to suppress appetite, to enhance endurance.)

in India: kallimudayan, karallamu, kullee mooliyan, makad shenguli, ranshabar, shindala makadi, vajira che baji, yugmaphalottama

Caralluma longidens N.E. Br. (*Caralluma mouretii* A. Chev.; *Spiralluma longidens* (N.E. Br.) Plowes; *Spiralluma mouretii* (A. Chev.) Plowes)

Sudan, Egypt.

See *Gardener's Chronicle & Agricultural Gazette* 2: 369. 1892 and *Revue de Botanique Appliquée et d'Agriculture Tropicale* 14: 270. 1934, *Journ. Agric. Trop. et Bot. Appl.*, (J.A.T.B.A.) 19: 259–399. 1972, *Haseltonia* 3: 53–54, f.1. 1995

(Lactogenic.)

in Niger: haba haba

Caralluma russelliana (Courbon ex Brongn.) Cufod. (*Boucerosia russelliana* Courbon ex Brongn.)

Ethiopia.

See *Bull. Soc. Bot. France* 7: 900. 1863 [1860 publ. 1863] and *Bull. Jard. Bot. État Bruxelles* 31(Suppl.): 718. 1961, *Bull. Jard. Bot. Natl. Belg.* 39(Suppl.): 30, basion. cit. 1969, *Phytochemistry* 68(10): 1459–1463. 2007

(Antiinflammatory.)

Caralluma somalica N.E. Br. (*Desmidorchis somalica* (N.E. Br.) Plowes)

Somalia. Stinking flowers

See *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1829: 31, 39. 1832, *Bulletin of Miscellaneous Information Kew* 1895: 264. 1895 and *Taxon* 26: 557–565. 1997, *Haseltonia* 3: 59. 1995

(Sap applied to wounds. Magic, to protect animals.)

in Kenya: lokosurio

Caralluma speciosa (N.E. Br.) N.E. Br. (*Caralluma codonoides* K. Schum.; *Caralluma foetida* E.A. Bruce; *Caralluma oxyodonta* Chiov.; *Desmidorchis foetida* (E.A. Bruce) Plowes; *Desmidorchis speciosus* (N.E. Br.) Plowes; *Sarcocodon speciosus* N.E. Br.)

Somalia.

See *Journal of the Linnean Society, Botany* 17: 170. 1878, *Bulletin of Miscellaneous Information Kew* 1895: 264. 1895 and *Hooker's Icones Plantarum* 34: t. 3371. 1939, *Haseltonia* 3: 58–59. 1995, *Journal of Ethnobiology and Ethnomedicine* 4: 10. 2008

(Antiinflammatory, emetic, antipyretic, antinociceptive, wound healing, antifungal, antidote and anthelmintic, used in treatment of rheumatism, open wounds, diabetes, leprosy, tumor, fungal diseases, snake, scorpion bite.)

Caralluma tuberculata N.E. Br. (*Apteranthes tuberculata* (N.E. Br.) Meve & Liede; *Borealluma tuberculata* (N.E. Br.) Plowes)

Pakistan. Eaten raw as a vegetable

See *Bulletin of Miscellaneous Information Kew* 1895: 264. 1895 and *Taxon* 30: 76–77. 1981, *Haseltonia* 3: 63, f. 26. 1995, *Plant Systematics and Evolution* 234(1–4): 199. 2002

(Powder of the ground plant used to treat fever, vermifuge, to counteract snakebite and scorpion and insect stings.)

in Pakistan: apitak, aputak, boteri, marmootak, marmut, pamanghi, sapmoi

Caralluma umbellata Haw. (*Boucerosia umbellata* (Haw.) Wight & Arnott; *Boucerosia umbellata* Wight & Arn.; *Desmidorchis umbellata* (Wight & Arn.) Kuntze; *Desmidorchis umbellata* (Haw.) Kuntze; *Desmidorchis umbellata* (Wight & Arn.) M.R. Almeida; *Desmidorchis umbellata* (Haw.) M.R. Almeida; *Desmidorchis umbellata* (Haw.) Decne.; *Desmidorchis umbellata* (Wight & Arn.) Decne.; *Stapelia umbellata* (Haw.) Roxb.)

India. Perennial fleshy angular herb, succulent, well branched, leaf scars spine-like, deep red flowers in terminal umbels, cylindrical follicles

See *Synopsis plantarum succulentarum ...* 47. 1812, *Plants of the Coast of Coromandel* 3: 36. 1819, *Contributions to the Botany of India* 34. 1834, *Annales des Sciences Naturelles*;

Botanique, sér. 2, 9: 266. 1838, *Revisio Generum Plantarum* 2: 418. 1891 and *Taxon* 30: 696. 1981, *Flora of Maharashtra State* 3A: 242. 2001

(Antiinflammatory, antipyretic, antinociceptive, antifungal, antidote and anthelmintic, astringent, used in treatment of rheumatism, diarrhea, diabetes, leprosy, tumor, fungal diseases, paralysis, snake, scorpion bite; plant roasted made into a paste and applied for indigestion. Veterinary medicine, stem extract given orally to stop diarrhea.)

in India: anaikkallimulaiyan, chirukalli, eluman, elumanpuli, hucchu bangte, kallimullian, kalmulaiyaan, kundelu kommulu, kundetikommulu, kundina kommulu, molanakodu, yerumai kalli, yerumaikannai mulliyaam

Carapa Aublet Meliaceae

Caraipe is a vernacular South American name for *Carapa guianensis* Aublet; see J.B.C. Fusée Aublet (1720–1778), *Histoire des Plantes de la Guiane Française*. 32, t. 387. 1775 and João Geraldo Kuhlmann (1882–1958), “As mais úteis plantas da rica flora brasileira - a acuhuba e a andiroba.” *Chacaras e Quintaes*. 33(5): 406–408. São Paulo 1926, Eurico Teixeira da Fonseca, “Plantas medicinais brasileiras.” *R. Flora Medicinal*. 5(11): 625–636 and 5(12): 689–698. Rio de Janeiro 1939, Amaro Henrique de Souza, “Andiroba, *Carapa Guyanensis* Aub.” *Chacaras e Quintaes*. 77(4): 423–425. São Paulo 1948, *Flora Neotropica* 28: 1–470. 1981, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007, *Botanical Journal of the Linnean Society* 165: 186–221. 2011.

Carapa grandiflora Sprague

Tropical Africa. Uganda. Tree, rounded pink-white flowers, brown valved fruits

See *Journal of the Linnean Society, Botany* 37: 507. 1906 [1904–1906 publ. 1906]

(Insecticides, arachnicides.)

in Burundi: umushwaati

Carapa guianensis Aubl. (*Amapa guinaensis* (Aubl.) Steud., nom. nud.; *Carapa latifolia* Willd. ex C. DC., nom. nud.; *Carapa macrocarpa* Ducke; *Carapa nicaraguensis* C. DC.; *Carapa slateri* Standl.; *Granatum guianense* (Aubl.) Kuntze; *Granatum nicaraguense* (C. DC.) Kuntze; *Guarea mucronulata* C. DC.; *Persoonia guareoides* Willd.; *Xylocarpus carapa* Spreng.)

French Guiana, Brazil. Tree, dense crown, large spreading many-branched panicle, white or creamy white flowers, staminal tube orange-tipped, brown woody four-cornered nut

See *Mantissa Plantarum* 2: 150. 1771, *Histoire des plantes de la Guiane Française* 2(Suppl.): 32, t. 387. 1775, *Der Naturforscher* 20: 2. 1784, *Transactions of the Linnean Society of London* 4: 215. 1798, *Species Plantarum*. Editio quarta 2: 331. 1799, *Nomenclator Botanicus* 69.

1821, *Systema Vegetabilium*, editio decima sexta 2: 213. 1825, *Monographiae Phanerogamarum* 1: 717–718. 1878, *Annales de la Société Botanique de Lyon* 7: 132. 1880, *Revisio Generum Plantarum* 1: 110. 1891 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 499. 1917, *Archivos do Jardim Botânico do Rio de Janeiro* 3: 191. 1922, *Tropical Woods* 10: 48. 1927, *Journal of the American Mosquito Control Association* 22(4): 699–701. 2006

(Bark decoction taken for diarrhea. Oil analgesic, antimalarial, emollient, febrifuge, antiinflammatory, insect repellent, larvicidal, antiparasitic, vermifuge, wound healer, antiallergic, antibacterial, for insect bites and stings, wounds, diabetes, diarrhea, digestion, arthritis, rheumatism, colds, skin parasites, acne, bruises, psoriasis, dermatitis, heat rash, itch, leprosy, skin cancer, herpes. Seed oil rubbed on sore feet, in hair for lice; drunk for flu and fever.)

in English: andiroba oil, bastard mahogany, Brazilian mahogany, crabwood, Demerara mahogany

in Tropical America: andiroba, angiroba, andiroba-saruba, carapa, carapá, cedro macho, figueroa, iandirova, jandi roba, jandiroba (= bitter oil), karaba, krapa, nandiroba, nhandiroba, requia, tallicona, tangare, y-andiroba, yandiroba

in Ghana: asokoru, osuabise, osuobise

Carapa procera DC. (*Carapa guineensis* Sweet ex A. Juss.; *Carapa guineensis* Sweet; *Carapa gummiflua* C. DC.; *Carapa microcarpa* A. Chev.; *Carapa surinamensis* Miq.; *Carapa touloucouna* Guillem. ex Perr.; *Carapa velutina* C. DC.; *Granatum procerum* (DC.) Kuntze; *Granatum surinamensis* (Miq.) Kuntze; *Trichilia procera* Forsyth, nom. nud.)

Senegal, Niger. Tree, pachycaulous, slash with sticky red sap, leaves in huge terminal spirals, leaflets with extra floral nectaries at tips, young leaves with nectaries at end of rachis and at end of each leaflet, flowers scented, large lax panicles among leaves, each inflorescence subtended by one scale, round brown valved fruits, gorillas eat leaves and fruit

See *The Civil and Natural History of Jamaica* in Three Parts 278. 1756, *Histoire des plantes de la Guiane Française* 2(Suppl.): 32, t. 387. 1775, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 626. 1824, *Mémoires du Muséum d'Histoire Naturelle* 19: 242. 1830, *Florae Senegambiae Tentamen* 1: 128. 1831, *Natuurkundige Verhandelingen van de Hollandsche Maatschappij der Wetenschappen te Haarlem* 7: 75, t. 19. 1850, *Annales de la Société Botanique de Lyon* 7: 132. 1880, *Revisio Generum Plantarum* 1: 110. 1891 and *Bulletin de la Société Botanique de France* 54 Mém. 8: 2. 1907, *Les Végétaux Utiles de l'Afrique Tropicale Française* 5: 191. 1909, *Journal of Ethnopharmacology* 8: 257–263, 265–277. 1983, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Acta Leidensia* 59(1–2): 377–382. 1990, *Journal of Ethnopharmacology* 112(1): 122–126. 2007, *Journal of Ethnopharmacology* 114: 44–53. 2007, *Journal of Reproduction and Contraception* 19(3): 161–166. 2008, *Journal of Ethnopharmacology* 116(3): 495–500. 2008

(Seeds or oil antiinflammatory, antibacterial, antiparasitic, anthelmintic, vermifuge, purgative, sedative, insect repellent, stimulant, used for treating sores, edema, burns, ulcers, skin diseases, wounds, bruises, insect bites, arthritis, rheumatism, rheumatic pains, child's respiratory diseases, coughs, bronchitis, convulsions, ear infections, ringworms. Roots or bark decoction for malaria, dysmenorrhea, painful menstruation and fever. Stem bark antiseptic, antibacterial; stem with leaves for arthritis, malaria, jaundice; leaves decoction for menstrual problems, internal parasitism, stomachache. Veterinary medicine, anthelmintic, vermifuge, purgative. Ceremonial, magic, to protect a newborn baby against evils.)

in English: Brazilian mahogany, British Guiana mahogany, crabwood, kunda oil tree, monkey cola, tallicoona oil tree

in Tropical America: andiroba, asoroa, asorowa, kaapa, kelaba, keraba, kraba, krappa

in Cameroon: engang, nanga, ngan, nganga, godjo

in Central African Republic: gojo, gozo, gozon, mongodjo, mongozo

in Congo: bobondo, bokolo, boru, bula nima, bulanima, ekala mbomo, ekara nguti, fisi, futi, gozau, gozon, kala mbomo, kisoloko, kooyo, mbili manganga, mbolu, mbukulu, mbukulu okoto, mbuluku, mobemba, mofesi, monangu, mubaba, mubila nkumi, mukala mbomo, mukukubi, mungulu, ngodjo, nkayapub, okoto, osiele, sesemu baketi, sesemu ya baketi, woso

in Gabon: engang, ngan

in Ghana: krabise, krabisi, krupi, krupia, kwaku bise

in Guinea: gbon, gobi, goobi, kobi, kobii, kora

in Ivory Coast: akaumassé, alla, allahia, balou, bibi-abé, boukounou, dona, elakoumi, gboui, kangasakié, kobi, kokoué, kondou, kouloupia, koundou, likpogré, lipogoré, loukrou, niamalango, soroua, sorowa, touloucouna, wéwé

in Liberia: chu say dor kohn, kowi, toon kor doh

in Mali: kobi, tulukuna, tulunkuna

in Nigeria: abo oganwo, agogo, ebegogo, ebogogo, efu iya, egogo, irere, njinku, nkpaku, nkpi, obi, obi ojidi, ogidi

in Senegal: bukunum, kané, kola amarga, kola amorgozo, kola malgos, mucaca mumbi, pada di kola, psamé, si foré, si hebay, si känd, siti, tifuri sikan, touloucouna, tulukuna, tulukuna

Carapichea Aubl. Rubiaceae

See *Systema Naturae*, Editio Decima 2: 929, 1122, 1364. 1759, *Histoire des plantes de la Guiane Française* 1: 100, 167, pl. 39, 64. 1775, *Nova genera et species plantarum seu Prodromus* 3, 45. 1788 and *Monogr. (For liver and kidneys ailments.)

in Ecuador: guarmi-berros

Cardamine bulbosa (Schreb. ex Muhl.) Britton, Sterns & Poggenb. (*Arabis bulbosa* Schreb.; *Arabis bulbosa* Schreb. ex Muhl.; *Arabis rhomboidea* Pers.; *Cardamine bulbosa* Britton, Sterns & Poggenb.; *Cardamine rhomboidea* Durand; *Cardamine rhomboidea* (Pers.) DC.; *Cardamine rhomboidea* DC.; *Dentaria rhomboidea* (Pers.) Greene; *Dentaria rhomboidea* Greene; *Dracamine bulbosa* Nieuwl.; *Dracamine bulbosa* (Schreb. ex Muhl.) Nieuwl.)

North America. Perennial herb

See *Transactions of the American Philosophical Society* 3: 174. 1793, *Synopsis Plantarum* [Persoon] 2: 204. 1807, *Regni Vegetabilis Systema Naturale* [Candolle] 2: 246. 1821, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 4. 1888, *Pittonia* 3(15D): 124. 1896 and *Amer. Midl. Naturalist* 4(1–2): 40. 1915, *Rhodora* 78: 329–419. 1976, *Taxon* 31: 120–126. 1982, *Sida* 13: 241–250. 1988

(Poisonous roots.)

in English: bulbous bittercress, spring-cress

Cardamine concatenata (Michx.) O. Schwarz (*Cardamine laciniata* (Muhl. ex Willd.) Alph. Wood; *Cardamine laciniata* Wood; *Cardamine laciniata* F.Muell.; *Cardamine laciniata* Steud.; *Dentaria concatenata* Michx.; *Dentaria concatenata* Michx. var. *coalescens* Fernald; *Dentaria laciniata* Muhl.; *Dentaria laciniata* Muhl. ex Willd.; *Dentaria laciniata* Muhl. ex Willd. var. *integra* (O.E. Schulz) Fernald; *Dentaria laciniata* var. *integra* Fernald; *Rorippa laciniata* (Steud.) L.A. Johnson; *Rorippa laciniata* (F. Muell.) L.A.S. Johnson)

North America. Perennial herb, roots toothed, lanceolate 3-palmate leaves, flowers borne in terminal cluster

See *Species Plantarum*. Editio quarta 3(1): 479. 1800[1801], *Flora Boreali-Americana* (Michaux) 2: 30. 1803, *Nomenclator Botanicus*. [Steudel], Editio secunda 1: 281. 1840, *Trans. Phil. Soc. Vict.* 1: 34. 1855, *The American Botanist and Florist* 38. 1870 and *Rhodora* 10: 84. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 46(1155–1167): 188. 1939, *Contributions from the New South Wales National Herbarium* 3: 97. 1962

(Hallucinogen. Analgesic, heart tonic, stomachic, for headache, heart palpitations, colds, gastrointestinal

disorders. Ceremonial, ritual, love charm, divination, spiritual, emotional.)

in English: cut-leaf toothwort, cutleaf toothwort

Cardamine diphylla (Michx.) Alph. Wood (*Dentaria bifolia* Stokes; *Dentaria diphylla* Michx.; *Dentaria incisa* Small; *Dentaria incisa* Eames, nom. illeg.; *Dentaria incisifolia* Eames)

North America. Perennial herb, food

See *Species Plantarum* 2: 653–654. 1753, *Flora Boreali-Americana* (Michaux) 2: 30. 1803, *A Botanical Materia Medica* 3: 443. 1812, *The American Botanist and Florist* 37. 1870 and *Flora of the Southeastern United States* [Small] 480–481, 1331. 1903, *Rhodora* 5(57): 216. 1903, *Manual of the Flora of the Northern States and Canada* [Britton] (ed. 2) 1066. 1905

(Analgesic, sedative, stomachic, tonic, carminative, for cold, headache, heart disease, flu, hoarseness, fevers, sore throat, chest pain, swellings, gastrointestinal disorders, tuberculosis, venereal disease. Ceremonial, ritual, love charm, divination, spiritual, emotional.)

in English: crinkle root, pepper root, pepperwort, toothwort

Cardamine douglassii Britt. (*Arabis douglasii* Torr.; *Arabis douglassii* Torr., nom. inval.; *Arabis rhomboidea* Pers. var. *purpurea* Torr.; *Cardamine bulbosa* Britton, Sterns & Poggenb. var. *purpurea* Britton, Sterns & Poggenb.; *Cardamine douglasii* Britton; *Cardamine rhomboidea* fo. *purpurea* (Torr.) Naturalist* 4: 40. 1915, *Rhodora* 78: 329–419. 1976

(Antidote.)

in English: limestone bittercress, purple cress

Cardamine flexuosa With. (*Barbarea arisanensis* (Hayata) S.S. Ying; *Cardamine arisanensis* Hayata; *Cardamine debilis* D. Don, nom. illeg.; *Cardamine flexuosa* subsp. *debilis* O.E. Schulz; *Cardamine flexuosa* var. *debilis* (O.E. Schulz) T.Y. Cheo & R.C. Fang; *Cardamine flexuosa* var. *occulata* (Hornem.) O.E. Schulz; *Cardamine flexuosa* var.

ovatifolia T.Y. Cheo & R.C. Fang; *Cardamine hirsuta* auct. non L.; *Cardamine hirsuta* subsp. *flexuosa* (With.) Hook. f.; *Cardamine hirsuta* var. *flaccida* Franch.; *Cardamine hirsuta* var. *omeiensis* T.Y. Cheo & R.C. Fang; *Cardamine hirsuta* var. *sylvatica* (Link) Hook. f. & T. Anderson; *Cardamine occulata* Hornem.; *Cardamine scutata* subsp. *flexuosa* (With.) H. Hara; *Cardamine sylvatica* Link; *Cardamine zollingeri* Turcz.; *Nasturtium obliquum* Zoll.)

Eurasia, India. Short-lived herb, ascending, weak, racemose inflorescence, rachis flexuose, white flowers, erect petals, cylindrical yellow siliqua, seeds arranged in a single row, tender leaves eaten by cattle

See *Regni Vegetabilis Systema Naturale* 2: 265. 1821, *Prodromus Florae Nepalensis* 201. 1825, *Fl. Brit. India* 1: 138. 1875 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32(4): 478. 1903, *Icones Plantarum Formosanarum nec non et Contributiones ad Floram Formosanam*. 3: 20, f. 7. 1913, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 6: 23. 1980, *Harvard Pap. Bot.* 9(2): 257–296. 2005

(Stem chewed to relieve toothache.)

Cardamine hirsuta L. (*Cardamine hirsuta* A. Chev., nom. illeg.; *Cardamine hirsuta* Pall. ex DC., nom. illeg.; *Cardamine hirsuta* Oed.; *Cardamine hirsuta* var. *formosana* Hayata)

Europe, North America. Herb, low, weedy, stem arises from basal rosette of leaves, flowers in racemes, petals white, erect linear siliques with 2 deciduous valves, used as a vegetable, leaves and flowers raw or cooked, species not known to be poisonous, can be very invasive

See *Species Plantarum* 2: 655. 1753, *Regni Vegetabilis Systema Naturale* 2: 256, 259–260. 1821 and *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 2: 459. 1902, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 30–31. 1911, *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Cytologia* 40: 727–734. 1975, *Norwegian Journal of Botany* 22: 71–76. 1975, *Fl. Taiwan* 2: 686. 1976, *Botaniska Notiser* 129: 123–130. 1976, *Bot. Zhurn.* 64(8): 1099–1110. 1979, *Taxon* 31: 583–587. 1982, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Willdenowia* 13: 101–106. 1983, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Folia Geobotanica et Phytotaxonomica* 25: 381–388. 1990

(Stomachic, diuretic, stimulant.)

in English: common bitter cress, hairy bitter cress, hairy bittercress, hairy wood-cress, hoary bittercress, pepperweed, shotweed, small bittercress, snapweed

in Italian: billeri primaticcio

Cardamine impatiens L. (*Cardamine basisagittata* W.T. Wang; *Cardamine dasycarpa* M. Bieb.; *Cardamine*

glaphyropoda O.E. Schulz; *Cardamine glaphyropoda* var. *crenata* T.Y. Cheo & R.C. Fang; *Cardamine impatiens* subsp. *elongata* O.E. Schulz; *Cardamine impatiens* var. *angustifolia* O.E. Schulz; *Cardamine impatiens* var. *dasycarpa* (M. Bieb.) T.Y. Cheo & R.C. Fang; *Cardamine impatiens* var. *eriocarpa* DC.; *Cardamine impatiens* var. *fumaria* H. Léveillé; *Cardamine impatiens* var. *microphylla* O.E. Schulz; *Cardamine impatiens* var. *obtusifolia* Knaf; *Cardamine impatiens* var. *obtusifolia* Knaf ex O.E. Schulz; *Cardamine impatiens* var. *pilosa* O.E. Schulz; *Cardamine nakaiana* H. Léveillé; *Cardamine senanensis* Franchet & Savatier)

Europe. Herb, numerous finely divided leaves, invasive, leaves and young shoots raw or cooked used as a vegetable

See *Species Plantarum* 2: 655. 1753, *Flora Taurico-Caucasica* 3: 437. 1819, *Flora* 29: 294. 1864 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32(4): 459–460. 1903, *Acta Horti Gothoburgensis* 1(4): 159–160. 1924, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 23: 1–23. 1974, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 26: 1–42. 1978, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 6: 21. 1980, *Botaniceskij Žurnal SSSR* 69(4): 511–517. 1984, *Acta Botanica Yunnanica* 9(1): 10–11, pl. 3, f. 4–5. 1987, *Botaničeskij Žurnal* (Moscow & Leningrad) 73: 290–293. 1988, *Flora Mediterranea* 9: 331–339. 1999

(Leaves antirheumatic, diuretic and stimulant; juice of plant given in fever.)

in English: bushy rock-cress, narrow-leaf bittercress, narrowleaf bittercress

in China: tan lie sui mi ji, tan lie sui mi qi

in India: ban laiyya, nari

Cardamine maxima (Nutt.) Alph. Wood (*Cardamine* × *maxima* A. Wood; *Cardamine anomala* (Eames) K. Schum.; *Cardamine maxima* Wood; *Dentaria anomala* Eames; *Dentaria maxima* Nutt.)

North America. Perennial herb, food

See *The Genera of North American Plants* [Nuttall]. 2: 66. 1818, *The American Botanist and Florist* 38. 1870 and *Rhodora* 5(57): 217–218. 1903, *Just's botanischer Jahresbericht*. 31(1[5]): 830. 1904

(Roots stomachic, for gastrointestinal disorders.)

in English: large toothwort

Cardamine nasturtioides Bert. (*Cardamine bonariensis* Pers.; *Cardamine nasturtioides* Cambess.; *Cardamine nasturtioides* Schur; *Cardamine nasturtioides* D. Don; *Nasturtium nasturtioides* Herter; *Nasturtium nasturtioides* (Cambess.) Herter; *Rorippa hilariana* (Walp.) Cabrera)

Chile.

See *Prodromus Florae Nepalensis* 201. 1825, *Flora Brasiliae Meridionalis* (A. St.-Hil.) (quarto ed.) 1: 89. 1829, *Repertorium Botanices Systematicae*. 1: 137. 1842, *Enum. Pl. Transsilyv.* 48. 1866 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 32: 467. 1925, *Estud. Bot. Reg. Uruguay* 5: 21. 1928, *Manual de la Flora de los Alrededores de Buenos Aires* 231. 1953

(For tumor, ulcers, kidney inflammations.)

in Ecuador: berro, berros

Cardamine ovata Benth. (*Cardamine lehmannii* Hieron.; *Cardamine ovata* subsp. *lehmannii* (Hieron.) O.E. Schulz; *Cardamine ovata* var. *bracteata* O.E. Schulz; *Cardamine ovata* var. *eriocarpa* O.E. Schulz)

Colombia.

See *Plantas Hartwegianas imprimis Mexicanas* 158–159. 1845, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20 (Beibl. 19): 19. 1895 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32: 412–413. 1903

(Infusion diuretic.)

Cardamine papuana O.E. Schulz

Papua New Guinea. Leaves with a pungent taste

See *Species Plantarum* 2: 655. 1753 and *Bot. Jahrb. Syst.* 55: 271. 1918

(Squeezed leaves onto a tooth cavity to relieve toothache; heated leaves rubbed onto sores, used to treat sores, boils, cuts, tropical ulcers. Fresh leaf juice antimicrobial, antioxidant and antiinflammatory.)

in Papua New Guinea: kalanevuda, tiligibe, wanggilolo

Cardamine pratensis L. (*Dracamine pratensis* (L.) Nieuwl.)

North America.

See *Species Plantarum* 2: 656. 1753 and *American Midland Naturalist* 4(1–2): 40. 1915, *Cornell University Agricultural Experiment Station Memoir* 291: 8. 1949, *Bot. Žurn.* (Moscow & Leningrad). 61(7): 963–969. 1976, *Feddes Repert.* 100: 92. 1989, *Pl. Syst. Evol.* 200: 141–159. 1996

(Depurative, diuretic, for epilepsy, scurvy.)

in English: cuckoo bitter-cress, cuckoo flower, lady's smock, meadow cress, spinks

in China: cao dian sui mi qi

Cardamine scaposa Franchet (*Cardamine denudata* O.E. Schulz)

China. Herb, erect, perennial, scapose, slender rhizomes, racemes terminal, petals white, smooth linear fruit, brown wingless seeds

See *Plantae Davidianae ex Sinarum Imperio* 1: 33. 1884 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36(5, Beibl. 82): 46. 1905

(Antiinflammatory.)

in China: luo jing sui mi ji, luo jing sui mi qi

Cardamine scutata Thunb. (*Cardamine angulata* var. *kamtschatica* Regel; *Cardamine autumnalis* Koidz.; *Cardamine baishanensis* P.Y. Fu; *Cardamine dentipetala* Matsum.; *Cardamine drakeana* H. Boissieu; *Cardamine flexuosa* subsp. *regeliana* (Miq.) Franch. & Sav. ex O.E. Schulz; *Cardamine flexuosa* var. *kamtschatica* (Regel) Matsum.; *Cardamine flexuosa* var. *manshurica* Kom.; *Cardamine flexuosa* var. *regeliana* (Miq.) Kom.; *Cardamine flexuosa* var. *scutata* (Thunb.) O.E. Schulz; *Cardamine hirsuta* var. *latifolia* Maxim.; *Cardamine hirsuta* var. *regeliana* (Miq.) Maxim.; *Cardamine hirsuta* var. *rotundiloba* Hayata; *Cardamine regeliana* Miq.; *Cardamine regeliana* var. *manshurica* (Kom.) Kitag.; *Cardamine scutata* subsp. *regeliana* (Miq.) H. Hara; *Cardamine scutata* var. *longiloba* P.Y. Fu; *Cardamine scutata* var. *rotundiloba* (Hayata) T.S. Liu & S.S. Ying; *Cardamine sylvatica* var. *regeliana* (Miq.) Franch. & Sav.; *Cardamine taquetii* H. Lév.; *Cardamine taquetii* H. Lév. & Vaniot; *Cardamine zhejiangensis* T.Y. Cheo & R.C. Fang; *Cardamine zhejiangensis* var. *huangshanensis* D.C. Zhang)

Japan. Small erect herb, small white flowers, brown minute seeds

See *Transactions of the Linnean Society of London* 2: 339. 1794, *Annales Museum Botanicum Lugduno-Batavi* 2: 73. 1865, *Botanical Magazine* 13: 73. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32(4): 476–477. 1903, *Repertorium Specierum Novarum Regni Vegetabilis* 8: 259. 1910, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 31. 1911, *Flora of Japan* 447. 1925, *Journal of the Faculty of Science: University of Tokyo, Botany* 6: 59. 1952, *Cytologia* 40: 727–734. 1975, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 6: 24, f. 5. 1980, *Flora Plantarum Herbacearum Chinae Boreali-Orientalis* 4: 109, 116, f. 61, 67. 1980

(Leaves in skin diseases, and also seeds.)

in China: yuan chi sui mi qi

Cardamine tangutorum O.E. Schulz

China. Herb, erect, perennial, creeping rhizomes, racemes, purple petals, linear fruits, swampy meadows, ditches

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32(2–3): 360–361. 1903, *Acta Botanica Boreali-Occidentalia Sinica* 16(3): 310–318. 1996

(Antiinflammatory.)

in China: tang gu sui mi ji, tang gu sui mi qi

Cardamine trichocarpa Hochst. ex A. Rich. (*Cardamine talamontiana* Chiov.)

Central and eastern Africa, Tanzania. Herb, prostrate, erect or ascending, inflorescence a terminal densely flowered stalked raceme, linear fruit green-yellow, leaves boiled and eaten as a vegetable, leaves fodder for goats and rabbits, in mountainous areas

See *Flora Sicula* (Presl) 92. 1826, *Tentamen Florae Abyssinicae* ... 1: 18. 1847 and *Annali di Botanica* 9: 51. 1911, *Botaniska Notiser* 129: 123–130. 1976, *Taxon* 31: 773. 1982, *Opera Botanica* 121: 159–172. 1993

(Useful to treat kwashiorkor. Crushed leaves used as a dressing on wounds to improve healing, and also a good bath for babies.)

in Tanzania: kisegeu cha nghujini

Cardiocrinum (Endl.) Lindley Liliaceae

Greek *kardia* ‘heart’ and *krinon* ‘a lily’, an allusion to the cordate leaves, see *Species Plantarum* 1: 302–303. 1753, *Veg. Kingd.*, ed. 2.: 205. 1847 and *Flora of Bhutan* 3(1): 1–456. Royal Botanic Garden, Edinburgh. 1994, *Flora of China* 24: 1–431. Missouri Botanical Garden Press, St. Louis. 2000, *Contributions from the United States National Herbarium* 45: 1–590. 2003, Singh, N.P. & Sanjappa, M. (eds.) *Alliaceae, Liliaceae, Trilliaceae & Uvulariaceae*. Fascicles of *Flora of India* 23: 1–134. Botanical Survey of India, New Delhi. 2006, *Journal of Ethnopharmacology* 117(2): 362–377. 2008.

Cardiocrinum giganteum (Wall.) Makino (*Cardiocrinum giganteum* Makino; *Lilium giganteum* Wall.)

E. Asia, Himalayas, Nepal, India. Bulb, perennial, monocarpic, erect, offset bulbs, heavily scented flowers

See *Tentamen Florae Nepalensis Illustratae* 1: 21–23, pl. 12–13. 1824, *Bot. Mag.* (Tokyo) 27(318): 125–126. 1913

(Bulbs diuretic, tonic, for cough, fever, injuries. Leaves applied to wounds and bruises, fresh leaves pounded and used as a cooling poultice. Root paste applied to treat dislocated bones.)

in English: giant Himalayan lily, giant lily, Himalayan lily

in China: da bai he

in India: giotia, giotira

in Nepal: bhogati

Cardiocrinum giganteum (Wall.) Makino var. *yunnanense* (Leichtlin ex Elwes) Stearn (*Lilium giganteum* var. *yunnanense* Leichtlin ex Elwes; *Lilium mirabile* Franch.)

China. Bulbous, perennial, erect, hollow, offset bulbs, fragrant flowers creamy-white with red-purple midveins

See *Journal de Botanique* (Morot) 6(17–18): 310–311. 1892 and *Botanical Magazine* 27: 126. 1913, *Gardener's chronicle*, ser. 3 60: 49, f. 18. 1916, *Gardener's chronicle*, ser. 3 124: 4. 1948

(Tonic, starch from the bulb.)

in English: Yunnan cardiocrinum

in China: bai he qi, pai ho ch'i, yun nan da bai he, yun nan ta pai ho

Cardiopteris Wallich ex Royle Cardiopteridaceae (Olacaceae, Icacinaceae)

Greek *kardia* 'heart' and *pteris* 'fern', *pteron* 'wing', referring to the fruit, see *Illustrations of the Botany ... of the Himalayan Mountains ...* 136. 1834, *Rumphia* 3: 205, 207. 1847, *Pl. Jav. Rar.* 246. 1852.

Cardiopteris moluccana Blume (*Cardiopteris lobata* var. *moluccana* (Blume) Mast.; *Cardiopteris rumphii* var. *blumeana* Baill.; *Cardiopteris rumphii* var. *intermedia* Baill.)

SE Asia, Malesia. Herb, vine, climbing, twining, white milky latex, leaves spirally arranged, flowers in panicles, forest edges, in secondary vegetation

See *Adansonia* 10: 280–281. 1872, *Fl. Brit. India* 1: 597. 1875

(Stem sap used to treat asthma and other respiratory problems; a stem decoction for hepatitis. Leaves for headache.)

in Papua New Guinea: duman, qacac, zafengang

Cardiospermum L. Sapindaceae

Greek *kardia* 'heart' and *sperma* 'a seed', referring to the shape of the seed or to a heart-shaped spot on the seeds; see Carl Linnaeus (1707–1778), *Species Plantarum*. 1: 366–367. 1753, *Genera Plantarum*. Ed. 5. 171. 1754 and *Fieldiana, Bot.* 24(6): 234–273. 1949, *Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 291–391. 1956, *Monogr. Syst. Bot. Missouri Bot. Gard.* 13: 1–224. 1985, *AAU Reports* 24: 1–241. 1990.

Cardiospermum canescens Wall. (*Cardiospermum clematideum* A. Rich.; *Cardiospermum corindum* sensu Trimen; *Cardiospermum corindum* L.f. *canescens* (Wall.) Radlk.; *Cardiospermum oblongum* A. Rich.)

SE Asia, India, Sri Lanka. Annual herb, scandent, climber, many-branched

See *Sp. Pl.*, ed. 2. 1: 526. 1762, *Plantae Asiaticae Rariores* (Wallich) 1: 14, t. 14. 1829, *Tentamen Florae Abyssinicae ...* 1: 100–101. 1847 and *Fl. Tamilnadu* 1: 83. 1983

(Leaf paste used orally to cure jaundice, insect repellent.)

in India: boodahcarathega, buddakaakarathige, bud-dakakarathige, chinnabuddaboosara, chinnabuddabusara,

cinnabuddabusara, dodda bekkina budde balli, kattu modak-kathai, pedde budda

Cardiospermum grandiflorum Sw. (*Cardiospermum barbicaule* Baker; *Cardiospermum caillei* A. Chev., Hutch. & Dalziel; *Cardiospermum caillei* A. Chev.; *Cardiospermum elegans* Kunth; *Cardiospermum grandiflorum* fo. *elegans* (Kunth) Radlk.; *Cardiospermum grandiflorum* forma *genuinum* Radlk.; *Cardiospermum grandiflorum* fo. *hirsutum* (Willd.) Radlk.; *Cardiospermum grandiflorum* var. *elegans* (Kunth) Hiern; *Cardiospermum grandiflorum* var. *hirsutum* Hiern; *Cardiospermum grandiflorum* var. *hirsutum* (Willd.) Hiern; *Cardiospermum hirsutum* Willd.; *Cardiospermum hispidum* Kunth)

Tropical Africa, Ghana. Herbaceous climber, fragrant creamy-white flowers, lantern-shaped fruits

See *Nova Genera et Species Plantarum seu Prodrum* (Swartz) 64. 1788, *Nova Genera et Species Plantarum* (quarto ed.) 5: 99–101, t. 439. 1821, *Flora of Tropical Africa* [Oliver et al.] 1: 418. 1868, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 8 (Heft III): 260. 1878 and *Explor. Bot. Afrique Occ. Franc.* i. 148. 1920, *Economic Botany* 30(4): 395–407. 1976, *Phytotherapy Research* 10(2): 167–169. 1996

(Poisonous, cyanogenic. Leaves and stem purgative, antifungal, febrifuge, analgesic, spasmogenic, abortifacient, emetic, diuretic, laxative, for skin diseases, itch, scabies, sore, swellings, gout, dropsy, stomach troubles, eye treatments. Magic, ceremonial.)

in English: balloon vine, black winter cherry, bladder creeper, heartseed, heartseed vine

in Sierra Leone: gbafo-yamba, jikevie, kiogange, kukbobo, kukui, ma-foi-ma-bana

in Yoruba: ako ejinrin, atugun, ikuuku erin, irowo, saworo

Cardiospermum halicacabum L. (*Cardiospermum acuminatum* Miq.; *Cardiospermum corindum* auct. non Linnaeus; *Cardiospermum corindum* L.; *Cardiospermum corindum* fo. *molle* (Kunth) Radlk.; *Cardiospermum corindum* fo. *molle* Radlk.; *Cardiospermum halicacabum* var. *microcarpum* (Kunth) Blume; *Cardiospermum luridum* Blume; *Cardiospermum microcarpum* Kunth; *Cardiospermum molle* Kunth; *Cardiospermum pumilum* Blume; *Cardiospermum truncatum* A. Rich.; *Corindum halicacabum* (L.) Medik.; *Corindum halicacabum* Medik.) (Latin *halicacabus* for a plant called *vesicaria* (Plinius), Greek *halikakabos*.)

Tropical Africa and Asia, Amazonian Ecuador. More or less hairy vine, herbaceous, slender, climbing, lianescent, trailing, leaves compound, flowers yellowish white subtended by curled thin bracts, green papery inflated triangular fruits, dark seeds, eaten as a vegetable, an edible oil can be obtained from the seed

See *Species Plantarum* 1: 366–367. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Species Plantarum*, Editio Secunda 1: 526. 1762, *Ueber einige künstliche Geschlechter aus der Malvenfamilie, denn der Klasse der Monadelphien* 110. (Flowers febrifuge, for dizziness, blood purifier, for stimulating liver function.)

in English: false boneset, musk thistle, nodding plumeless thistle, nodding thistle, plumeless thistle, Scotch thistle

Carduus nyassanus (S. Moore) R.E. Fr. (*Carduus leptacanthus* var. *nyassanus* S. Moore; *Carduus leptacanthus* var. *steudneri* Engl.; *Carduus nyassanus* R.E. Fr.; *Carduus steudneri* (Engl.) R.E. Fr.)

Tropical Africa, Malawi. Herb, biennial or perennial, erect, spiny, sweet scented flowers purple-white with brown hairs, food for mountain gorillas

See *Über die Hochgebirgsflora des tropischen Afrika* 450. 1892 and *Journal of the Linnean Society, Botany* 37: 326. 1906, *Acta Horti Bergiani* 8: 23, 25, 27, t. 3. 1923, *Mitt. Bot. Staatss. Münch.* 5: 158. 1963, *Fl. Rwanda* 3: 696. 1985, *Journal of Ethnopharmacology* 112(1): 55–70. 2007

(Leaves for abscesses, tachycardia, pain; leaves and roots decoction analgesic, antiemetic, for pregnant women.

Veterinary medicine, for snakebite, to prevent abortion. Magic, against bad spirits.)

in Burundi: igihandambwa

in Congo: ikigembegembe, mugabudasumikwa, mwigembyegembye

in Rwanda: ikigéembégéembe, umugabudásuumírwa

Cardwellia F. Muell. Proteaceae

After the Right Honorable Edward T. Cardwell, 1813–1886, between 1864–1866 was Her Majesty's Secretary of State for the Colonies, in 1874 raised to peerage as Viscount Cardwell of Ellerbeck. See *Genera Plantarum* 78. 1789, Ferdinand von Mueller, *Fragmenta Phytographiae Australiae*. 5(31): 23, 24, 38, 73. 1865, [Cardwell and Darling], *The Crisis. Despatches of Mr. Cardwell and Sir Charles Darling*. Melbourne 1866, [Edward Cardwell], *Mr. Secretary Cardwell and the Right of Petition*. (Correspondence between the London Committee of the Northern Association of New Zealand and the Right Hon. E. Cardwell, afterwards Viscount Cardwell, Secretary of State for the Colonies.) [1866] and Sir Robert Biddulph, *Lord Cardwell at the War Office*. A history of his administration, 1868–1874. London 1904, H.G. Turner, *A History of the Colony of Victoria*. Melbourne 1904.

Cardwellia sublimis F. Muell.

Australia, northeast Queensland. Canopy tree, aluminum accumulator

(Cyanogenic, irritant, dermatitis.)

in English: bull-oak, bull silky oak, golden spangle-wood, golden spanglewood, lacewood, northern bull-oak, northern silky oak, oongaary, silky oak

Carex L. Cyperaceae

Latin classical name *carex*, *icis* (Vergilius) for a sedge, reed-grass or rush; see Carl Linnaeus, *Species Plantarum*. 972. 1753, *Genera Plantarum*. Ed. 5. 420. 1754 and *Acta Biol. Cracov.*, Ser. Bot. 22: 37–69. 1980, *Bot. Zhurn.* 65(1): 51–59. 1980, *Bot. Zhurn.* 65(5): 651–659. 1980, *Ann. Bot. Fenn.* 17: 91–123. 1980, *Rhodora* 83: 461–464. 1981, *Acta Bot. (Antibacterial.)

in English: small-head bog sedge, sparse-flowered sedge, thin-flowered sedge

in China: xi hua tai cao

Carex xerantica L.H. Bailey (*Carex foenea* Willd. var. *xerantica* (L.H. Bailey) Kük.)

North America.

See *Bot. Gaz.* 17(5): 151. 1892 and *Pflanzenr.*, IV, 20(38): 205. 1909

(Emollient.)

in English: dry sedge, white-scaled sedge, whitescale sedge

Careya Roxburgh Lecythydaceae (Barringtoniaceae)

Dedicated to the British plant collector Rev. William Carey, 1761–1834 (Serampore, India), Baptist missionary, orientalist, 1794 in India, founded the Botanic Garden at Serampore (generally known as Dr. Carey's Garden!), 1823 Fellow of the Linnean Society. See William Roxburgh (1751–1815), *Plants of the Coast of Coromandel*. 3: 13, t. 217, 218. 1811, *Dictionnaire classique d'histoire naturelle* 9: 259. 1825,

William Roxburgh, *Flora Indica*; or descriptions of Indian plants, etc. [Edited by William Carey] Serampore 1832, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845 and Samuel Pearce Carey, *William Carey, D.D., Fellow of Linnean Society*. London [1934], H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 143. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 110. 1965, Isaac Henry Burkill (1870–1965), *Chapters on the History of Botany in India*. Delhi 1965, R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992.

Careya arborea Roxb. (*Barringtonia arborea* (Roxb.) F. Muell.; *Careya arborea* Roxb. & Roxb.)

India. Tree, deciduous, black flaky bark, white wood, leaves clustered at the apex of branches, yellowish white-green flowers, red purple stamens, fleshy fibrous capsular fruit, persistent calyx, ripe fruits eaten

See *Pl. Corom.* 3: 14, t. 218. 1811, *Hortus Bengalensis*, or a catalogue ... 52. 1814, *Flora Indica* ii. 636, 638. 1832, *Fragmenta Phytographiae Australiae* (Mueller) 5(39): 184. 1866 and *Fitoterapia* 74(1–2): 116–118. 2003, *Bangladesh J. Pharmacol.* 3: 36–43. 2008

(Used in Ayurveda and Sidha. Stembark antimicrobial, hepatoprotective, demulcent, sedative, tonic and antidepressant, CNS depressant, antidiarrheal, antiinflammatory, antioxidant, antipyretic, analgesic, astringent, anthelmintic, leech repellent, fish poison, antivenin, for colds, coughs, tumors, liver disorders; bark paste applied all over the body of children as a tonic and a stimulant and for healthy growth; fibrous bark applied for body swellings; bark pounded in water, the red decoction given to cure diarrhea, dysentery, and also for washing the eyes for eye complaints; bark rubbed on legs to repel leeches; pounded bark and root in water used in stomach disorders; flowers and bark juice given with honey as demulcent and in cough and colds; bark and fruits astringent, demulcent. Flower taken as tonic after delivery; dried calyx to cure colds and coughs; fruits and flowers in dysentery, indigestion, colic, flatulence, worms. Fruit pulp in cholera; fruits as botanical pesticides for fungal infection; fruit believed to be a snake repellent. Veterinary medicine, bark crushed with curd and administered orally for debility in cattle; fruit infusion in fever and dysentery, for bloated stomach in cattle or when cattle stop feeding. Fresh root bark, stem bark, dried leaf powder or roots used as fish poison. Medico-religious beliefs, ritual, effective in curing eczema; contact therapy, stem fibre tied to the waist to cure diarrhea in infants.)

in English: Ceylon oak, patana oak, slow match tree, tummy wood, wild guava

in Burma: sangawn-gmawt

(Used in Ayurveda, Unani and Sidha. Milky sap caustic, allergic reaction, dermatitis, rhinitis, asthma, anaphylaxis, severe inflammation of the eye. Milky juice for skin diseases, horny excrescence, for inducing abortion. Leaves, roots and seeds pesticide, against insects, fungi. Fresh fruits carminative, astringent, diuretic, antiseptic, stomachic, taken in dysentery; green fruit on ringworm; green papaya used as contraceptive and abortifacient, unripened fruit taken before three months of pregnancy; latex from fruit applied over scorpion bite. Leaves decoction taken for malaria; crushed leaves used externally for headaches, cuts and a swollen groin; leaves and seeds for the treatment of amebiasis and as an anthelmintic. Seeds oxytotic, antiinflammatory, anthelmintic, analgesic, stomachic and antifungal; immature seeds swallowed to treat diarrhea. Extract from boiled stem bark given in urinary troubles; inner bark decoction drunk for toothache; stem bark paste applied to boils, cuts and wounds. Fresh roots rubefacient, analgesic, poultice of roots used for centipede bites, wounds, snakebite. Leaves, roots and seedlings used as a vermifuge. Magico-religious beliefs, superstitions, plantation of the plant near the house is restricted.)

in English: common papaya, melon tree, papau, papaya, paw-paw, tree melon

in Arabic: fafy, pawpaw

African names: anbah hindi, babaya, babog fruta bomba, etighi-mbakara, gwandu, ibepe, okworo-beke, papayu, sayinbo

in Burkina Faso: mandé, nassara krou, papai

in Congo: ipapayo, malulo, mapapayo, mululo

in Ivory Coast: m'bomou, manguiè iri, oflè, oloko

in Mali: manayi, maye

in Nigeria: gbebere, gonda, gwadda, gwanda, gwauda, ibepe, ibepe dudu, isigun, ojo, sheyinbo, shigun, sigu

in Senegal: papayo

in Tanzania: ebabayo, mgosi, mpapaya

in West Africa: an papai, fakai laa

in Burma: thimbaw

in Cambodia: doeum lahong, lhong

in China: fan kua (= foreign melon), fan mu gua, mu kua, shu kua, wan shou kuo (= longevity fruit)

in India: aanabahe-hindi, akka thangi hannu, amba-hindi, amita, amritobonda, anda karbhooja, andakharbuja, apapaya-pazham, arand kharbuza, arandkharbuza, awathabi, bapaipundoo, bappangaayi, bappangayi, bappayi, bappayya, barangi, bobbasi, booppamkaya, boppaayi, boppai, boppasa, boppayi, boppayi-hannu, boppayi-pandu, boppayya, boppe, brahmairandah, chakma, chirbhita, chirbita, cittamukkkicam, cittamukkkikamaram, conkarikam, conkarikamaram, erandachirbhata, erandachirbhita, erandakarakati, erandakarkati, goppe, goppe hannu, goppen, kaniyamanakku, kapalam, kaplam, kappalam, kariyamanakku, karmmati, karmmos, karmmosu, karmmusu, karmosu, karpakkini, karpakkinimaram, karumusa, karutha, kogiagiula, lan fut, madana anapa chettu, madana-anapakaya, madanaanapa, madananaba, madhukarkati, madhurnakam, madhurnakamu, mangchupi-alau, maniyamanakku, mewa, nalikadala, nam-chapi, nuh-nun, nuhnun, omitta, ommal, pacalai, pangi, papaaya, papajamaram, papal, papay, papaya, papeeta, papaya, papita, papita desi, papitha, papiya, pappai, pappaiya, pappali, pappali-pazham, pappalikaimaram, pappalippal, pappangaye, pappangayi, pappay, pappaya, pappaya-pazham, pappayam, pappayambalam, pappayampazham, pappayi, pappayi-pazham, pappita, parangi, parangi chakke, parangi hannu, parangi hannu mara, parangi mara, parangiyanamanakku, parankiyamanakku, parinda, parindhi, paringi, pasalai, pepiya, peragi, perinji, pharangi-hannu, piranji, popai, popaiya, popaiyab, popaiyah, poppaya, poppayi, poppoia, puppali pullum, thing-fang-hma, thingfanghama, thingfanghana, umbalay

in Indonesia: asawa, bala, betik, botik, embetik, gedang, ghedang, hango, kabaleo, kalailu, kaliki nikanre, kaliki rianre, kalilki, kalujawa, kampaja, kapala, kapalay, kapaya, kasi, katela gantung, kates, katuka, kaut, ketes, manjan, menam, muku jawa, muu jawa, nikanre, padu, palaki, pancene, panya, papae, papaen, papaino, papaipapaya, papau, papaya, pastelo, patuka, paya, pepaya, papayu, peute, pisang, pisang patuka, pisang pelo, punti kayu, ralempaya, sampain, sempawa, si kailo, siberani, sumoyori, tangan-tangan, tapaya, tele, unit jawa

in Japan: manjui, papaia

in Laos: hounng

in Lepcha: mayaapaot

in Malaysia: beteh, betek, betik, ketalah, ketelah, papaw

in Nepal: mewa

in Papua New Guinea: bambusi, kowai, loku, mamioko, papae, pawpau, pawpaw, popo, tapeka, wayoye

in Philippines: apayas, capaya, kapaya, kapayas, lapaya, papaya, papayas, papaye, papyas, pawpaw, tapayas

in Thailand: kuai-la, lo-ko, loko, ma kuai thet, ma-la-ko, mak-hung, ma-te, malakor, taeng-ton

in Vietnam: du du

in Hawaii: he'i, mikana, milikana

in Paraguay: namona

Carissa L. Apocynaceae

In Sanskrit *kryshina* means dark blue or black, because of the ripe fruits; the shrub is called *krishnaphala*; in Malayam it is called *karimulla*, possibly from *kari* 'dark, black' and *mullu* 'thorny, thorns', referring to the fruits and thorns; see C. Linnaeus, *Systema Naturae*. ed. 12. 2: 135, 189. Vindobonae [Wien] 1767–1770, *Mantissa Plantarum*. 1: 7, 52. Holmiae [Stockholm] 1767 [-1771] and George H.M. Lawrence, "The cultivated species of *Carissa*." *Baileya*. 7(3): 87–90. 1959, *Cytologia* 42: 723–729. 1977, *Taxon* 28: 636–637. 1979, *Taxon* 30: 508–509, 855–856. 1981, *Monogr. Syst. Bot. (Used in Ayurveda and Sidha. Diuretic, purgative, antiviral, antibacterial, antiplasmodial, febrifuge, hypotensive, antioxidant, cardiogenic. Branches and leaves decoction used for breast cancer, headache, chest pains, rheumatism, syphilis, dysentery, rabies; leaves decoction for fever. Leaves, root and latex aphrodisiac, tonic, for toothache. Boiled root extract drunk for chest pain, indigestion, diarrhea, typhoid fever, nose bleeding, lower abdominal pains in pregnant mothers, headache and fever in children; root decoction of *Plumbago zeylanica* with bark of *Oroxylum indicum* and roots of *Carissa congesta* given for jaundice; bark decoction of *Hymenodictyon orixense* with barks of *Sterculia urens* and *Madhuca longifolia* var. *latifolia* and root of *Carissa congesta* given as analgesic and to facilitate delivery; roots decoction used as a painkiller, to increase lactation in women and to treat malaria in children; roots boiled and taken with soup to strengthen bones, for general fitness and for gonorrhoea, to treat hepatitis and rheumatoid arthritis; root juice of *Carissa inermis* put into the nose to cure hemicrania, headache; roots also act as a repellent in the case of snakes and insects. Exhibited remarkable anti-herpes simplex virus activity. Veterinary medicine, roots ground and put into the wounds of cattle to kill worms; stem bark for ephemeral fevers; stem bark of *Deccania pubescens* ground with those of *Carissa spinarum*, *Chloroxylon swietenia* and tubers of *Withania somnifera* given in anthrax.)

in English: Arabian num-num, Bengal currant, Christ's thorn, conkerberry, Egyptian carissa, simple-spined carissa, spiny carissa

in Angola: mungongono, ngongono, njingongono, omunyon-golo, uyangolo

Carissa tetramera (Sacleux) Stapf (*Arduina tetramera* Sacleux; *Carissa tetramera* Stapf)

Zimbabwe, Kenya, Tanzania, Mozambique. Multi-stemmed shrub or tree, spines usually forking, strongly scented white

flowers in terminal clusters or in the axils of the spines, red to purple-black edible fruit

See *J. Bot.* (Morot) 7: 312. 1893 and *Fl. Trop. Afr.* [Oliver et al.] 4(1.1): 91. 1902

(Roots boiled and taken with soup to strengthen bones, for general fitness, gonorrhoea; boiled root extract drunk for chest pain, fever in children, indigestion, headache, lower abdominal pains in pregnant mothers.)

in English: sand forest num-num, sand num-num

in Kenya: gurura, mtandambo, mzambiribiri

in Southern Africa: uQondo

in Swaziland: lucondvo, umVusankunzi

in Tanzania: mkalakala

Carludovica Ruiz & Pav. Cyclanthaceae

Named in honor of Charles IV of Spain (1748–1819) and his wife Maria Luisa (1751–1819), the Queen; see *Flora Peruviana, et Chilensis Prodromus* 146, t. 31. 1794 and *Field Mus. Nat. Hist., Bot. Ser.* 13(1/3): 421–428. 1936, *Acta Horti Berg.* 17: 40. 1954, *Acta Horti Berg.* 18: 1–428. 1958, *Botanical Museum Leaflets—Harvard University* 19(9): 183–189. 1961, *Fl. Ecuador* 1: 1–48. 1973.

Carludovica palmata Ruiz & Pav. (*Carludovica gigantea* Kuntze; *Carludovica humilis* (Wawra & Bermann) Kuntze, nom. illeg.; *Carludovica incisa* H. Wendl.; *Carludovica jamaicensis* Lodd. ex Fawcett & Harris, nom. nud.; *Carludovica palmata* Griseb.; *Carludovica palmata* var. *humilis* Wawra & Bermann; *Carludovica serrata* Hort.; *Carludovica serrata* Wawra & Bermann; *Ludovia palmata* Pers.; *Ludovia palmata* (Ruiz & Pav.) Pers.; *Salmia jamaicensis* Steud., nom. nud.; *Salmia palmata* (Ruiz & Pav.) Willd.; *Salmia palmata* Willd.)

Mexico, Bolivia. Palm-like plant, unopened leaf buds and the fruits are edible

See *Systema Vegetabilium Florae Peruviana et Chilensis* 291–292. 1798, *Synopsis Plantarum* (Persoon) 2(2): 576. 1807, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 399, 401. 1811, *Dictionnaire classique d'histoire naturelle* 5: 221–222. 1824, *Nomenclator Botanicus* ed. 2, 2: 501. 1841, *Index Palmarum* 67. 1854, *Abh. Königl. Ges. Wiss. Göttingen* 7: 259. 1857, *Flora Brasiliensis* 233. 1881, *Wiener Ill. Gart.-Zeitung* 10: 76. 1885, *Revisio Generum Plantarum* 2: 737–738. 1891 and *Bulletin of the Botanical Dept., Jamaica* n.s. 9: 145. 1902, *Lexikon Generum Phanerogamarum* 496. 1903, *Acta Horti Berg.* 18(1): 127–131. 1958, *Economic Botany* 46(3): 233–240. 1992

(For skin diseases, bruises, stings, sores.)

in English: hat palm, iraca palm, Panama hat palm

in Latin America: alagua, bombanaje, jipi japa, paja toquilla, toquilla, yaco sisa, yaco caspi

Carmona Cav. Boraginaceae

Named for the Spanish painter Bruno S. Carmona, from 1754 to 1756 companion of the Swedish botanist and explorer Pehr Loeffling [Löfving] (1729–1756) on his travels in northern South America. See *The Civil and Natural History of Jamaica* in Three Parts 168, pl. 16, f. 1. 1756, *Icones et Descriptiones Plantarum, quae aut sponte ...* [Cavanilles] 5: 22. 1799, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 509. 1845, Miguel Colmeiro y Penido (1816–1901), *La Botánica y los Botánicos de la Península Hispano-Lusitana*. Estudios bibliograficos y biograficos. Madrid 1858, P. Loeffling *Iter hispanicum*. Stockholm 1758, and *Plantae americanae*. [Facsimile ed. of botanical part edited by Stig Rydén] Madrid 1957, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 396. 1965, *Ann. Missouri Bot. Gard.* 76(4): 1050–1076. 1989, *Taiwania* 43: 124. 1998. Some confusion with genus *Ehretia*, *Carmona* is sometimes placed in the family Cordiaceae, most authors have included *Carmona* in *Ehretia*.

Carmona microphylla (Lam.) G. Don (*Carmona heterophylla* Cav.; *Carmona microphylla* G. Don; *Carmona retusa* (Vahl) Masam.; *Cordia retusa* Vahl; *Ehretia buxifolia* Roxburgh; *Ehretia buxifolia* var. *latisejala* Gagnepain; *Ehretia buxifolia* var. *microphylla* (Lam.) DC.; *Ehretia dentata* Courchet; *Ehretia heterophylla* Spreng.; *Ehretia microphylla* Lam.; *Ehretia monopyrena* (Vahl) Gottschling & Hilger; *Ehretia retusa* Vahl)

India, SE Asia. Tree or shrub, undershrub, many-branched, leaves white-glandular above, small green glossy leaves, small white or slightly reddish flowers, red fleshy fruits

See *Encycl. Meth.* 1: 425. 1783, *Symbolae Botanicæ, ...* 2: 42. 1791, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 425. 1792, *Plants of the Coast of Coromandel* 1: 42, pl. 57. 1795, *Icon*. [Cavanilles] v. 22. t. 23. 1799, *A General History of the Dichlamydeous Plants* 4: 391. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 509. 1845 and *Flore Générale de l'Indo-Chine* 4: 206. 1914, *Transactions of the Natural History Society of Taiwan* 30: 61. 1940 [Transactions of the Natural History Society of Formosa.], *Fitoterapia* 68(1): 85–86. 1997, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 123: 263. 2001, *Journal of Ethnopharmacology* 92(1): 53–56. 2004

(Used in Sidha. Antidote, febrifuge, tonic, for cough, colic, fevers, stomachache. Leaves antiinflammatory, antifungal, antibacterial, antiallergic, alterative, febrifuge, infusion against diarrhea, dysentery and cough, antidote against plant-based poisoning and viper bite; decoction for cough and stomachache; dried leaves stomachic and pectic. Leaves used a substitute for betel leaves. Veterinary medicine.)

in English: Fujian tea, Fukien tea, Fukien tea tree, Philippine tea, scorpionbush, small leaf carmona, wild tea

in China: ji ji shu

in India: baapanaburi, bapana buri, bapanaburi, barranki, boote, bupanaburi, buri, bute, chepaku, eleadike soppu, enne budige, ennebutige, doddakalla, doddakavale, gulpole, guvva aaku, karuvingi, kattu-vellilai, kattu vetrilai, kattuvellilai, kattuverrilai, kattuvettilai, kodikarai, korakkuvethalai, kujjikoronda, kurangu vethilai, kuruviccai, kuruvicci, kuruvichchi, kuruvincal, kuruvinci, kuruvingi, malaiverrilai, marutkarai, mete, munamuntha, nakkatoka, narasakkuchi, numae munta, nomu chettu, pala, piccaka, pichaka, pichakaburi, pisniki, pitta, pitta pisinika, pittapisunakaayi, veralchedi, yenne bootige, yenne budiga

in Indonesia: kinangan, pinaan, serut lanang

in Japan: fuku-man-gi, fukumangi

in Philippines: alangit, alangit mara mara, alangitngit, baling-saa, buntatai, buyo-buyo, cha, chaang-bundok, chaang-gubat, chang-gubat, gari, icha-nga-atap, icha-ti-bakir, itsa, kalamoga, kalimomog, kalimumog, mangit, mara-mara, maratia, mura-mara, palupo, putputai, santing, tsa, tsaang gubat

in Thailand: chaa, chaa yeepuni, khoi cheen

in Vietnam: b[uf]m r[uj]n, c[uf]m r[uj]n, kim li[ee]n

Carnegiea Britton & Rose Cactaceae

For the American (b. in Scotland) philanthropist Andrew Carnegie, 1835–1919, steel industrialist; see *Allg. Gartenzeitung* (Otto & Dietrich) 6: 142. 1838, *Cact. Gen. Sp. Nov.* 6. 1839 and *Journal of the New York Botanical Garden* 9(107): 187–188, f. 32, pl. 48–52. 1908, *Pflanzenr.* IV. 101 (Heft 49): 36. 1911, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, California 1997, Gibson, A.C. and K.E. Horak. “Systematic anatomy and phylogeny of Mexican columnar cacti.” *Ann. Missouri Bot. Gard.* 65: 999–1057. 1978, *Ecology* 61: 1–7. 1980, *Vegetatio* 78: 125–140. 1988, *Bradleya*; Yearbook of the British Cactus and Succulent Society 10: 18. 1992, *Haseltonia* 6: 32–41. 1998.

Carnegiea gigantea (Engelmann) Britton & Rose (*Carnegiea gigantea* (Engelm.) Britton & Rose; *Cereus giganteus* Engelmann; *Pilocereus engelmannii* Lem.; *Pilocereus giganteus* Lemaire ex Foerst.-Ruempl.; *Pilocereus giganteus* (Engelmann) Rümpler; *Pilocereus giganteus* Rümpler)

North America. Perennial, tall thick fluted columnar stem, trunk and stems have stout spines clustered on their ribs, shallow root system, very slow growth, night-blooming creamy-white flowers with yellow centers, sweet nectar, bright-red pulpy flesh of the tasty fruits edible, can be fertilized only by cross-pollination, great capacity to store water

See *The Gardeners Dictionary ... Abridged ... fourth edition 1754, Not. Milit. Recon., 158. 1848, American*

Journal of Science, and Arts, ser. 2, 14(42): 336–337. 1852, *L'illustration horticole* 9 (Misc.): 97. 1862, *Handbuch der Cacteenkunde* 662, fig. 88. 1885 and *Contr. U.S. Natl. Herb.* 12: 415, 420. 1909

(Fresh slice for rheumatism and aching parts of the body. Alkaloids present. Ceremonial, psychoactive.)

in North America: Arizona-giant, giant cactus, giant saguaro, saguaro, saguaro cactus, sahuaro

Carpesium L. Asteraceae

Greek *karpesion* ‘an aromatic wood, an aromatic plant, a species of *Valeriana*’; see Carl Linnaeus, *Species Plantarum*. 2: 859. 1753, *Genera Plantarum*. Ed. 5. 369. 1754 and H. Genast, *Etymologisches Wörterbuch der Botanischen Pflanzennamen*. 130. Basel 1996.

Carpesium abrotanoides L. (*Carpesium thunbergianum* Siebold & Zucc.)

China, India.

See *Species Plantarum* 2: 860. 1753, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 187. 1846 and *J. Hokkaido Univ. Educ.*, Sect. 2B 35: 31–42. 1984, *J. Jap. Bot.* 66: 26–34. 1991, *Invest. Stud. Nat.* 12: 48–65. 1992

(Seeds diuretic.)

in India: wotiangel

Carpesium cernuum L.

Himalaya, China, India.

See *Species Plantarum* 2: 859–860. 1753 and *Nucleus* 18: 6–19. 1975, *Fitologija* 31: 71–74. 1986, *J. Jap. Bot.* 66: 26–34. 1991

(Herb astringent and anthelmintic. Seeds diuretic and laxative.)

in India: wotiangel

Carphephorus Cass. Asteraceae

Greek *karphe* ‘dry up, wither’, *karphe* ‘any small dry body’, *karphe* ‘hay’ and *phoros* ‘bearing, carrying’; Latin *carphos* and Greek *karphe* for a plant, *faenum Graecum*, goat’s thorn, fenugreek (Plinius), see *Bull. Sci. Soc. Philom. Paris* 1816: 198. 1816, *Dictionnaire des Sciences Naturelles* 16: 10. 1820, *Proc. Amer. Acad. Arts* 8: 632. 1873, *Bull. Calif. Acad. Sci.* 1: 179. 1885 and *Bulletin of the Torrey Botanical Club* 51(9): 392. 1924.

Carphephorus odoratissimus (J.F. Gmel.) H.J.-C. Hebert (*Chrysocoma odoratissima* J.F. Gmel.; *Liatris odoratissima* (J.F. Gmel.) Michx.; *Liatris odoratissima* (J.F. Gmel.) Willd., nom. illeg., non *Liatris odoratissima* (J.F. Gmel.)

Michx.; *Trilisa odoratissima* (J.F. Gmel.) Cass.) (*Trilisa* (Cass.) Cass., probably an anagram of the genus *Liatris* Gaertner ex Schreber.)

North America. Herb, rhizome not tuberous, radical leaves obovate-spatulate, stem leaves oblong and clasping, flower-heads in a panicle or corymb

See *Species Plantarum* 2: 840. 1753, *Genera Plantarum* 2: 542. 1791, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 1204. 1792, *Flora Boreali-Americana* 2: 93. 1803, *Species Plantarum*. Editio quarta 3(3): 1637. 1803, *Bull. Sci. Soc. Philom. Paris* 1816: 198. 1816, *Bull. Sci. Soc. Philom. Paris* 1818: 140. 1818, *Dictionnaire des Sciences Naturelles* 16: 10. 1820 and *Rhodora* 70(784): 483. 1968

(Coumarin-like can be toxic when used at high doses for a long period. Herb stimulant, aphrodisiac, diuretic, fungicidal, demulcent, febrifuge, diaphoretic, applied locally for sore throats and gonorrhoea, a tonic in treating malaria.)

in English: deers tongue, vanilla leaf, wild vanilla

Carpinus L. Corylaceae (Betulaceae, Carpinaceae)

From the classical Latin name for hornbeam, *carpinus*, *i*, Akkadian *karru* 'mountain range', *karu* 'embankment' and *pinnu*, Hebrew *pinna* 'pinnacle, pillar', see *Sp. Pl.* 2: 998. 1753 and *Fieldiana, Bot.* 24(3): 359–369. 1952, *Fl. Reipubl. Popularis Sin.* 21: 70, 84. 1979, *Fl. Veracruz* 20: 1–20. 1981, *Fl. Yunnan.* 5: 182. 1991, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 402–403. 2001, *Ceiba* 44(2): 105–268. 2003 [2005].

Carpinus caroliniana Walter (*Carpinus americana* Michaux; *Carpinus americana* var. *tropicalis* Donn. Sm.; *Carpinus betulus* var. *virginiana* Marshall; *Carpinus caroliniana* subsp. *virginiana* (Marshall) Furlow; *Carpinus caroliniana* var. *tropicalis* (Donn. Sm.) Standl.; *Carpinus caroliniana* var. *virginiana* (Marshall) Fernald; *Carpinus caroliniana* var. *virginiana* Fernald; *Carpinus tropicalis* (Donn. Sm.) Lundell; *Carpinus tropicalis* subsp. *tropicalis*)

North America. Tree or shrub, perennial

See *Arbustrum Americanum* 25. 1785, *Fl. Carol.* [Walter] 236. 1788, *Flora Boreali-Americana* (Michaux) 2: 201. 1803, *Botanical Gazette* 15(2): 28. 1890, *Bulletin of the Torrey Botanical Club* 20(2): 43. 1893 and *Contributions from the United States National Herbarium* 23(1): 169. 1920, *Rhodora* 37(444): 425. 1935, *Lloydia* 2(2): 79–80. 1939, *Systematic Botany* 12(3): 416–434. 1987

(Bark astringent, tonic, antiperiodic, to treat cloudy urine, itch, diarrhea, constipation, fever, loss of appetite, to facilitate childbirth.)

in English: American hornbeam, blue beech, hornbeam, ironwood, muscle-wood, water beech

Carpobrotus N.E. Br. Aizoaceae (Mesembryanthemaceae)

Greek *karpobrotos* 'with edible fruits' (the Old Testament, *Deuteronomium* 20.20), *karpos* 'fruit' and *broteos, brotos* 'edible', *brotus* 'food' (*brosko, bibrosko, bibroskein* 'to eat, to devour'); see N.E. Brown, in *The Gardeners' Chronicle*. Ser. 3, 78: 433. (Nov.) 1925, *Gen. S. Afr. Fl.* pl. 249. 1926, *Flora of Australia* 19–62. 1984, Harold Norman Moldenke & Alma L. Moldenke, *Plants of the Bible*. New York 1986, *Contribution, Boletim Herbage* 15: 76–107. 1993, *Fl. Ecuador* 55: 14–27. 1996.

Carpobrotus acinaciformis L. Bolus (*Carpobrotus acinaciformis* (L.) L. Bolus; *Carpobrotus concavus* L. Bolus; *Carpobrotus vanzijliae* L. Bolus)

South Africa. Mat-like succulent perennial, trailing stems, robust short greyish green curved scimitar-shaped leaves, magenta-pink-purple flowers, tasty edible fruits

See *Flowering Plants of South Africa* 7: sub pl. 247. 1927

(Fresh leaf juice diuretic, antiseptic, antimicrobial, used externally as a mouthwash, gargle, lotion and antiseptic wash; leaf juice styptic, applied to sores or burn/scald wounds. Preparations of the fruit taken internally for the treatment of tuberculosis and other pulmonary infections, applied to the skin or used as a mouthwash, gargle. Preparations of both leaf and fruit taken internally to treat heart conditions and used as a mouthwash or gargle for sore throat and sores in the mouth.)

in English: Hottentot fig, sour fig

in South Africa: elandsvy, ghaukum, ghoenavy, ghounavy, goenavy, gouna, Hotnotsvy, strandvy, suurvy

Carpobrotus chilensis (Molina) N.E. Br. (*Mesembryanthemum aequilaterale* Willd., nom. illeg.; *Mesembryanthemum aequilaterale* Haw.; *Mesembryanthemum aequilaterale* var. *chiloense* Haw. ex Salm-Dyck; *Mesembryanthemum aequilaterum* Haw.; *Mesembryanthemum chilense* Molina)

Chile. Decumbent branches, triangular leaves, bright purple flowers, sweet yellowish fruit

See *Systema Plantarum* 2: 1051. 1799, *Miscellanea Naturalia* 77. 1803, *Saggio sulla Storia Naturale del Chili* 133. 1810 and *Journal of Botany, British and Foreign* 66(791): 324. 1928, *Transactions and Proceedings of the Royal Society of South Australia* 56: 40. 1932

(Leaf sap taken as a soothing agent against burns or stings.)

in English: sea fig

Carpobrotus dimidiatus (Haw.) L. Bolus (*Carpobrotus dimidiatus* L. Bolus; *Mesembryanthemum dimidiatum* Haw.; *Mesembryanthemum juritzii* L. Bolus)

South Africa. Trailing succulent, creeping, robust, winged branches, fleshy three-angled leaves, petals reddish violet, edible fruits with slimy sourish pulp

See *Notes Mesembryanthemum* [H.M.L. Bolus] 3: 235. 1950

(Leaf juice for sore throat, oral and vaginal thrush, skin problems, sores, rashes, digestive troubles, diarrhea and dysentery, for dressing burns. Fruit laxative.)

in English: Natal sour fig

in South Africa: ikhambi lamabulawo, Natalse suurvy, strandvy, umgongozi

Carpobrotus edulis (L.) N.E. Br. (*Carpobrotus edulis* N.E. Br.; *Carpobrotus edulis* (L.) L. Bolus; *Mesembryanthemum edule* L.; *Mesembryanthemum edule* var. *flavum* (L.) Moss, nom. illeg.)

South Africa. Succulent, robust, trailing, perennial, rooting at nodes, winged branches, fleshy three-angled leaves, yellow solitary flowers, edible fleshy indehiscent fragrant fruits with a strong astringent salty sour taste, seeds embedded in the sticky sweet jelly-like mucilage

See *Syst. Nat.*, ed. 10. 2: 1060. 1759 and *Gen. S. Afr. Fl. Pl.* 249. 1926, *Flowering Plants of South Africa* 7: pl. 247. 1927, *Journal of Ethnopharmacology* 76(1): 87–91. 2001

(Fruit eaten for constipation, diabetes; fruit infusion taken during pregnancy. Leaf juice astringent, antibacterial, mildly antiseptic, to treat diarrhea, dysentery, stomachache, a gargle to relieve laryngitis, sore throat, mouth infections, a soothing cure for blue-bottle stings/jellyfish stings, itch, spider bites, burns, bruises, cuts, sunburn, ringworm, eczema, dermatitis, herpes, cold sores, cracked lips, allergies.)

in English: Cape fig, highway ice plant, Hotnotsfig, Hottentot fig, pigface, sour fig

in South Africa: ghaukum, ghoenavy, ghounavy, gouna, Hotnotsvy, Hottentotsvy, ikhambi-lamabulawo, Kaapsevy, Natal dune vygie, perdevy, rankvy, strandvy, suurvy, umgongozi, vyerank, wilde vijg

Carpobrotus mellei L. Bolus

South Africa, Western Cape. Pink or purple flowers, narrow small leaves and a small club-shaped fruit

See *Annals of the Bolus Herbarium* 4: 109. 1927, *African Journal of Biotechnology* 5(13): 1289–1293. 2006

(Dried leaves antimicrobial.)

in English: mountain sour fig

in South Africa: berg-rankvy, berg-suurvy

Carpobrotus muirii L. Bolus (for the Scottish (b. Castle Douglas) naturalist John Muir, 1874–1947 (d. Riversdale, C.P., South Africa), physician, plant collector at the Cape, his wife née Susanna Steyn; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 256. Cape Town

1981, Stafleu and Cowan, *Taxonomic Literature*. 3: 658. 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 506. London 1994, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997.)

South Africa, Western Cape. Purple, pink or white flowers, almost straight reddish green leaves, similar to *Carpobrotus deliciosus*

See *Annals of the Bolus Herbarium* 4: 109. 1927, *Phytomedicine* 10(5): 434–439. 2003

(Leaf juice astringent, antimicrobial, antiseptic, to treat chronic infections.)

in English: dwarf sour fig

in South Africa: dwergsuurvy

Carpobrotus quadrifidus L. Bolus

South Africa. Succulent, straight grey leaves, large violet-pink, pale pink or white flowers

See *S. African Gard.* 18: 279. 1928, *Notes Mesembr.* Pt. 2, 15. 1928, *Phytomedicine* 10(5): 434–439. 2003

(Antimicrobial, antiseptic, to treat chronic infections.)

in English: West Coast sour fig

in South Africa: elandsvy, Weskus suurvy

Carpodinus R. Br. ex G. Don Apocynaceae

Greek *karpos* ‘fruit’ and *dineo* ‘twist, to turn round’, see *Trans. Hort. Soc.* v. (1823) 455. 1823, *A General History of the Dichlamydeous Plants* 4: 71, 101. 1837.

Carpodinus rufescens De Wild. (*Landolphia rufescens* (De Wild.) Pichon)

Tropical Africa.

See *Notices sur des Plantes Utiles ou Intéressantes de la Flore du Congo* 2: 241. 1908, *Mémoires de l’Institut Français d’Afrique Noire* (Monogr. Landolph.) 35: 161. 1953

(Roots and leaves for malaria and fevers.)

Carpolobia G. Don Polygalaceae

From the Greek *karpos* ‘fruit’ and *lobos* ‘a pod, lobe’, see *A General History of the Dichlamydeous Plants* 1: 370. 1831 and *The Known Plants of Liberia* 578. 1906, *Nat. Malgache* 9: 176. 1957, *Taxon* 28: 636–637. 1979, *Enum. Pl. Fleurs Afrique Trop.* 1: 1–249. 1991, *J. Nat. Prod.*, 65(4): 553–557. 2002.

Carpolobia alba G. Don (*Carpolobia delvauxii* E.M.A. Petit; *Carpolobia glabrescens* Hutch. & Dalziel)

Tropical Africa. Shrub or small tree, lower petals white, upper petals purple, fruits green or orange

See *Flora of Tropical Africa* 1: 135. 1868 and *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1: 99. 1927, *Kew Bulletin* 1928, 26. 1928, *Bulletin du Jardin Botanique de l'État* 25: 335. 1955

(Bark for arthritis, rheumatism; leaves for stomachache. Saponins. Cattle stick.)

in English: Hausa stick, poor man's candle

in Cameroon: essa, fesha, nyerem-mbe, okah, sanda

in Guinea: bontanhe

in Liberia: pleehn

in Sierra Leone: bofi, borokofunjambe, fofi, fufu, fuvwe, gibofoyo, luxure

Carpolobia lutea G. Don

Cameroon, Ghana. Shrub or small tree, white petals, lower petals with purple marks, shiny orange-yellow pendulous fruit with sweet whitish pulp, fruits said to be edible

See *Gen. Hist.* 1: 370. 1831 and *Taxon* 28: 636–637. 1979, *Journal of Pharmacy & Bioresources* 2(2): 116–119. 2005, *Journal of Ethnopharmacology* 111(3): 619–624. 2007, *Journal of Ethnopharmacology* 122(3): 439–444. 2009, *African Journal of Biotechnology* 8(1): 12–19. 2009

(Roots and fruits general tonic, antimicrobial, antiplasmodial, gastroprotective, anti-diarrheal, anti-ulcerogenic, treatment of peptic ulcer, infectious diseases, cough, indigestion, pains. Saponins. Cattle stick.)

in English: Hausa stick

in Cameroon: essa, fesha, inta, nyerem-mbe, okah, sanda

in Ghana: kinkin

Carpotroche Endl. Flacourtiaceae (Achariaceae)

Greek *karpos* 'fruit' and *trochos* 'a wheel', see *Histoire des plantes de la Guiane Française* 2: 921–922, t. 352. 1775, *Stirpes Novae aut Minus Cognitae* 3: 59. 1786, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 255. 1824, *Genera Plantarum* [Endlicher] 918. 1839 and *Economic Botany* 26(3): 221–237. 1972, *Economic Botany* 47(4): 358–370. 1993.

Carpotroche brasiliensis (Raddi) Endl. (*Carpotroche brasiliensis* (Raddi) A. Gray, isonym; *Carpotroche brasiliensis* Endl.; *Mayna brasiliensis* Raddi)

Brazil. Tree, white-yellow fragrant flowers

See *Quar. Piant. Brasil Nuov.* (Mem. Moderna 18): 402) 23, f. 1a-b. 1820, *United States Exploring Expedition ... Atlas. Botany. Phanerogamia* 1: 72. 1854 and *Journal of the American Chemical Society* 60: 614–617. 1938, *Brazilian J. Med. Biol. Res.*, 38(7): 1095–1103. 2005, *Journal of Ethnopharmacology* 105(1–2): 137–147. 2006

(Antiinflammatory, analgesic, parasitocidal, anti-leprotic, anti-nociceptive, antibiotic, antifungal, for asthma, arthritis, leprosy, immune inflammatory diseases, rheumatoid arthritis.)

in English: chaulmoogra oil

in South America: canudeiro, mata-piolho, papo de anjo, pau de anjo, pau de cachimbo, pau de cotia, pau de lepra, ruchuchu, same, sapucainha, sawe, yarayará, warabash

Carpotroche grandiflora Spruce ex Benth. (*Carpotroche amazonica* Mart. ex Eichler; *Carpotroche amazonica* Mart.; *Carpotroche grandiflora* Spruce ex Eichler; *Carpotroche mollis* J.F. Macbr.; *Mayna amazonica* J.F. Macbr.; *Mayna amazonica* (Mart. ex Eichler) J.F. Macbr.; *Mayna grandiflora* (Spruce ex Benth.) R.E. Schult.; *Mayna grandiflora* (Spruce ex Eichler) R.E. Schult.; *Mayna toxica* R.E. Schult.)

Brazil, Peru. Treelet, white flowers, green fruit

See *Histoire des plantes de la Guiane Française* 2: 921–922, t. 352. 1775, *Journal of the Proceedings of the Linnean Society* 5(Suppl. 2): 81. 1861, *Flora Brasiliensis* (Martius) 13(1): 437. 1871 and *Publications of the Field Museum of Natural History, Botanical Series* 13(4/1): 16. 1941, *Botanical Museum Leaflets* 15: 69. 1951

(Dried powdered seeds used as vermifuge. Antiinflammatory, for asthma; bark used as a caustic. The *kapukiri*, a substance that comes from rotten leaves, something that has decomposed from a living thing in order to give strength to other lives, produced by the *huairacaspi*, *Carpotroche grandiflora*, evil shamans use it to bring harm. Used as a bait to poison armadillos.)

in English: babado fruit, comona fruit, cotia fruit, leprosy fruit, monkey fruit

Carthamus L. Asteraceae

Arabian *quartom*, *qurtum* or *qurtom* 'to paint', in allusion to the colours of the flowers or to a dye extracted from *Carthamus tinctorius* L.; see Yuhanna ibn Sarabiyun [Joannes Serapion], *Liber aggregatus in medicinis simplicibus*. Venetijs, 1479, Carl Linnaeus, *Species Plantarum*. 2: 830–831. 1753, *Genera Plantarum*. Ed. 5. 361. 1754, *Synopsis plantarum in flora gallica descriptarum*. 1806, *Annales du Muséum National d'Histoire Naturelle* 16: 158. 1810, Candolle, Augustin Pyramus de (1778–1841), *Botanicon gallicum*; seu *Synopsis plantarum in Flora gallica descriptarum*. Paris, Desray, 1828–1830 [Ed. 2. Ex herbariis et schedis candollianis propriisque digestum a J.E. Duby.] and Serapiom, *El libro agregà de Serapiom*. A cura di G. Ineichen. Venezia-Roma 1962–1966, G.B. Pellegrini, *Gli arabismi nelle lingue neolatine con speciale riguardo all'Italia*. Brescia 1972, *Amer. J. Bot.* 63: 771–782. 1976, *Nucleus* 19: 8–12. 1976, *Acta Botanica Neerlandica* 26: 239–249. 1977, *Taxon* 29: 726–727. 1980, *J. Palynol.* 16: 85–105. 1980, *Journal of Cytology and Genetics* 31(2): 139–144. 1996, *Botanical Journal of the*

Linnean Society 134: 425–438. 2000, *Botanical Journal of the Linnaean Society* 147: 375–383. 2005.

Carthamus lanatus L. (*Carthamus lanatus* subsp. *turkestanicus* Hanelt; *Carthamus lanatus* subsp. *turkestanicus* Hamet; *Carthamus tauricus* M. Bieb.; *Kentrophyllum lanatum* (L.) DC.; *Kentrophyllum lanatum* (DC.) Duby; *Kentrophyllum lanatum* DC. & Duby; *Kentrophyllum tauricum* (M. Bieb.) C.A. Mey.; *Kentrophyllum tauricum* C.A. Mey.)

China, India, Himalaya.

See *Species Plantarum* 2: 830. 1753, *Flora Taurico-Caucasica* 2: 285. 1808, *Verz. Pfl. Casp. Meer.* (C.A. von Meyer). 66. 1831 and *Amer. J. Bot.* 63: 771–782. 1976, *Taxon* 25: 483–500. 1976, *Taxon* 26: 577–585. 1976, *Nucleus* 19: 8–12. 1976, *Candollea* 48(2): 437–448. 1993, *Bot. J. Linn. Soc.* 134: 425–438. 2000

(Plant extract applied to the eyes to cure conjunctivitis.)

in English: distaff thistle, saffron thistle, woolly distaff thistle, woolly safflower, woolly star thistle

in South Africa: disseldoring, makdissel, woldissel, wol-lerige verfbloem

Carthamus oxyacantha M. Bieb. (*Carthamus oxyacanthus* M. Bieb.)

India. Spiny-leaved annual herb, many-branched, florets orange-yellow, achene obovate or elliptic, noxious pernicious weed, not eaten by livestock

See *Flora Taurico-Caucasica* 2: 283. 1808

(Plant diuretic, plant or flowers decoction anthelmintic for children. Seed oil a dressing for bad ulcers, itch, joint pains, liver diseases.)

in English: carthamus, jeweled distaff thistle, wild safflower

in India: guladaud, kaadu kusabi gida, mullu shaavanthi

Carthamus tinctorius L.

India, Middle East, China. Annual herb, many-branched, erect, glabrous, spiny, stiff, flowers orange-red solitary terminal, fruit a white achene 4-angled, pungent odour, seeds yield edible oil, flowers used for extracting a red pigment used as dye

See *Species Plantarum* 2: 830–831. 1753 and *Journal of Cytology and Genetic* 7–8: 17–23. 1973, *Fl. Iran.* 139b: 434. 1980, *Proceedings of the Indian Science Congress Association* 68(Sect. vi): 87. 1981, *Crop Science* (Madison) 22: 809–811. 1982, *Cell and Chromosome Research* 7: 26–28. 1984, *Acta Botanica Boreali-Occidentalia Sinica* 5: 149–154. 1985, *Journal of Wuhan Botanical Research* 3(4): 459–460. 1985, *Acta Botanica Boreali-Occidentalia Sinica* 7: 246–251. 1987, *Iranian Journal of Botany* 4: 189–196. 1989, *Journal of the Indian Botanical Society* 68: 395–396. 1990, *Journal of Medicinal and Aromatic Plant Sciences* 19: 734–744. 1997, *Chemical and Pharmaceutical Bulletin* 45(12): 1910–1914.

1997, *The American Journal of Chinese Medicine* 30(1): 95–108. 2002, *Life Sci.* 76: 191–200. 2004, *Journal of Enzyme Inhibition and Medicinal Chemistry* 23(4): 543–548. 2008

(Used in Ayurveda, Unani and Sidha. Roots antiinflammatory. Leaf used for women's problems. Seeds laxative, analgesic, diaphoretic, local anesthetics, abortifacient, anti-thrombotic, widely used to improve blood circulation, useful for the treatment of diseases associated with elevated bone loss; oil applied to treat scabies; fresh seed juice given as diuretic. Flowers used to treat blood disorders, lung and skin diseases, for fevers, jaundice, swelling, male sterility, rheumatism, bronchitis, dysmenorrhea, amenorrhea, measles, angina pectoris, injuries, to induce labor, and as a wash after confinement.)

in English: American saffron, bastard saffron, cultivated safflower, dyer's saffron, false saffron, Mexican saffron, safflower, safflowers, saffron thistle

in Tanzania: alizeti ya miba, kartamu

in China: hong hua, honghua, huang lan, hung hua, hung lan hua, yao hua

in India: agni-sikha, agnishikha, agnisikha, akkinicekaram, araniyakukampam, ayattira, ayattiracceti, barre, cantirakam, cantirikam, centirikkam, centirukkam, centirukku, centurakam, centurukkai, centurukkam, centurukku, chendurakam, cilacayacceti, cilacayam, cusumbha, gramyakunkuma, hab qurtum, irattakam, kadaya, kajirah, kamalottara, kamalottaram, kamlottama, kar, kar ke bijun ki giri, karadayi, karadi, karar-ke-bij, kararhi, kardai, kardi, karh, karrah, kasakdanah, kasdi, kasembar, kasube, kasumba, kazhirah, kentakakkoli, kentakakkolicceti, khasakdanah, khazirah, kooshumba chettu, kooslambha, koosumbha, kucumpa, kukkutashikha, kuntumanikkacceti, kuntumanikkam, kurdi, kurthum, kurtum, kusam phool, kusamba, kusambabijam, kusambe, kusambi-bija, kusamphul, kusbo, kushibe, kushumba, kushumba-virai, kushumlei, kusibe, kusmbe chettu, kussum, kusubbi, kusube, kusube enne kaalu, kusubeegida, kusubi, kusum, kusum phool, kusuma, kusuma chettu, kusumba, kusumba-vittulu, kusumbah, kusumbai, kusumbar, kusumbavirai, kusumbe, kusumbha, kusumbah, kusumbhi, kusume, kusume kaalu, kusumphul, kusumphool naya, kuyimpu, lohita, maghz-i-qurtum, maghz tukhm qurtum, maharajana, muasfir, padmottara, paicacattumpili, paicacattumpilicceti, papaka, phool kusum, pita, qirtum, qurtum, rakta, roghan-i-qurtum, roghan-i-usfar, sadhi, sendoorkum, sendurakam, sendurgam, sendurkam, sendurukkai, senturakam, tukhm kar, tukhme qartum, tumpuravali, usfar, vanishikha, vasraranjana

in Japan: beni-bana, benibana, kûkwa

Malayan name: bunga kasumba, kesumba

in Nepal: kusum

in Thailand: dok kham, kham, kham foi, kham yong

in Tibetan: balpo gurgum, le brgan rtsi, le ra na tsi

Carum L. Apiaceae (Umbelliferae)

From *Caryae (Karuai)*, town of Laconia near the Arcadian border, Dioscorides used *karo, karon* for caraway; see Carl Linnaeus, *Species Plantarum*. 263. 1753, *Genera Plantarum*. Ed. 5. 127. 1754 and *Botaničeskij Žurnal* (Moscow & Leningrad). 61(1): 93–99. 1976, *Taxon* 26: 443–452. 1977, *Acta Biol. Cracov.*, Ser. Bot. 21: 31–63. 1978, *Lagascalia* 7: 163–172. 1978, *Taxon* 28: 400–401. 1979, *Taxon* 29: 543. 1980, *Taxon* 30: 857–860. 1981, *Int. Organ. Pl. Biosyst. Newsl.* (Zürich). 23: 11–12. 1994, *Cytologia* 61: 19–25. 1996, *Opera Bot.* 137: 1–42. 1999.

Carum bulbocastanum W.D.J. Koch (*Bunium persicum* (Boiss.) Fedts.)

India. Small herb, solitary pale blue flowers, fragrant black seeds

See *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 12(1): 121. 1824 and *Indian Journal of Pharmacy* 27(6): 176–178. 1965

(Used in Ayurveda, Unani and Sidha. Seeds astringent, febrifuge, cardiac stimulant, for chronic fever, puerperal fever, edema, diseases of the digestive system, flatulence, dyspepsia, diarrhea, vomiting, diseases of the eyes, and as a galactagogue for nursing mothers; seeds decoction given in postpartum period, as it is said to stimulate uterine contractions.)

in English: black caraway

in India: cimaiccirakam, jarana, jiraa siyaah, jiraka, jiraka dvyam, kaashmira jirak, kalajira, kalajirah, kmoon-armani, karavi, kasmira jiraka, kasmirajiraka, kavarcirakam, kevalika, krishna jiraka, krsnajaji, krsnajiraka, nilakana, pilappushiragam, pilappuccirakam, pilappucirakam, pilavucirakam, piriyaacirakam, piriyaakam, seema jeelahara, shah-zerah, she-mai-shiragam, shiajira, shimayi-shombu, siyajira, vantisodhini, zeera, zira, zira siah

Carum buriaticum Turczaninow (*Bunium buriaticum* (Turczaninow) Drude; *Carum angustissimum* Kitagawa; *Carum buriaticum* f. *angustissimum* (Kitagawa) H. Wolff; *Carum buriaticum* fo. *angustissimum* (Kitag.) Shan & F.T. Pu; *Carum curvatum* C.B. Clarke ex H. Wolff; *Carum furcatum* H. Wolff; *Carum pseudoburiaticum* H. Wolff)

China, Mongolia. Herb, petals white

See *Species Plantarum* 1: 243. 1753, *Bull. Soc. Imp. Naturalistes Moscou* 17(4): 713. 1844, *Die Natürlichen Pflanzenfamilien* 3(8): 194. 1898 and *Repertorium Specierum Novarum Regni Vegetabilis* 27(9–15): 183. 1929, *Repertorium Specierum Novarum Regni Vegetabilis* 27(734–740): 187–188. 1929, *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 302–303. 1930, *Journal of Japanese Botany* 20(6–7): 311. 1944, *Flora Reipublicae Popularis Sinicae* 55(2): 28. 1985

(Seeds ground, mixed with butter and made into a paste used as an analgesic against headache.)

in China: tian ge lü zi

Carum carvi L. (*Carum carvi* f. *rubriflorum* H. Wolff; *Carum carvi* var. *gracile* (Lindley) H. Wolff; *Carum gracile* Lindley; *Carum gracile* Boiss.; *Carum rosellum* Woronow)

Mediterranean, Eurasia. Herb, annual or perennial, annual or biennial, glabrous, erect, terete, hollow, branching in upper part, strong thick fleshy taproot, compound alternate leaves, inflorescence a compound umbel terminal, bracts and bracteoles absent or few, flowers bisexual, calyx absent, petals with short inflexed apex, styles recurved, stigma capitate, fruit a schizocarp splitting into 2 mericarps, roots cooked as vegetable, weed

See *Sp. Pl.* 1: 263. 1753, *Flora Taurico-Caucasica* 1: 211. 1808, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 284. 1821, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 232. 1835, *Fl. Orient.* [Boissier] Suppl. 258, in syn. 1888 [Oct 1888] and *Acta Horti Gothoburgensis* 2(7): 306. 1926, *Das Pflanzenreich* IV 228(Heft 90): 148. 1927, *Regnum Veg.* 127: 30. 1993

(Used in Ayurveda, Unani and Sidha. Whole plant used in gonorrhoea. Seeds and oil expectorant, digestive, antiseptic, diuretic, astringent, anthelmintic, galactagogue, antibacterial, antifungal, carminative, stomachic, antispasmodic, antimicrobial, emmenagogue, for dyspepsia, bloating, stomach disorders, fullness, nausea, giddiness, headache, cold, cough, fever, rheumatism, scabies, high blood pressure, eye diseases, also promotes the onset of menstruation. Fruit and oil carminative, tonic and stomachic. Consumption of caraway enhances lactation of breast-feeding women. Parasiticide.)

in English: caraway, caraway seed, common caraway, kummel, seedcake

in Bhutan: go-snyod

in China: ge lü zi, zang hui xiang

in India: appakacacompuceti, appakacam, asita jiraka, asitajiraka, bahugandha, bhedanika, bhedini, cimai compu, cimai peruncirakam, cimaiccirakam, cimaiccompu, cimavitai, go-nyod, gonyod, gonyorog, go-snyod, hridya, jangi dhanika, jarana, jeerka, jeero, jira, jiraa, jiraka, kaaravi, kaashmira jiraka, kala zira, kalajeera, kalajiraka, kalam-esi, kalazera, kalazira, kalazird, kmoon, kmoon-roomi, karamjiragam, karavi, karawiyah, karimjeerakam, karuncirakam, karunjiraka, kekku vitai, kekkuvirai, kekkuvitai, keturuvirai, kosnyot, krishna, krishna jiraka, krishnajaji, krishnajeeraka, krishnajiraka, krsnajiraka, kumblik, malaic-compu, mashmirajiraka, mita zerah, nila, nilakana, omum, patu, pilappu-chirakam, prithvikaa, raka, ruchya, sa-jire, seema jeeraka, seemai sompu, semai seeragam, shahajire, shahjeera, shahjeera asli, shahjeera badkashani, shahjeera khar, shahjira, shia-jira, shiajira, shimai-shembu, shimai-shiragam, shimaisapu, shimayi-shombu, shingoo, shodhana, shyah jeera, sima-jilakara, simaishembu, siya jeera, siyah jeera asli, siyah jeera kashmiri, siyah-jira, sugandha, sugandha udgaar, sushavi, syah zira, syahajira, udgarashodhini,

in English: common bluebeard

in China: lan xiang cao

Caryopteris nepetifolia (Bentham) Maximowicz (*Caryopteris nepetaefolia* (Benth.) Maxim.; *Caryopteris nepetifolia* Maximowicz; *Caryopteris nepetifolia* f. *brevipes* C.Y. Wu & H.W. Li; *Schnabelia nepetifolia* (Benth.) P.D. Cantino; *Schnabelia nepetifolium* (Benth.) P.D. Cantino; *Teucrium nepetifolium* Bentham)

China. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 580. 1848, *Bull. Acad. Imp. Sci. Saint-Petersbourg* 23(2): 390. 1877 and *Anzeiger der Akademie der Wissenschaften in Wien. Mathematische-naturwissenschaftliche Klasse. Wien* 58: 92. 1924, *Acta Phytotaxonomica Sinica* 1(1): 22, pl. 6. 1951, *Fl. Yunnanica* 1: 483. 1977, *Syst. Bot.* 23(3): 381. 1998 (publ. 1999)

(Astringent, tonic.)

in English: one-flowered bluebeard

in China: dan hua you

Caryopteris terniflora Maximowicz (*Caryopteris terniflora* f. *brevipedunculata* P'ei & S.L. Chen; *Schnabelia terniflora* (Maxim.) P.D. Cantino)

China.

See *Bull. Soc. Imp. Naturalistes Moscou* 54(1): 40. 1879 and *Fl. Reipubl. Popul. Sin.* 65(1): 213. 1982, *Syst. Bot.* 23: 382. 1998 (publ. 1999), *Chinese Chemical Letters* 15(12): 1445–1447, 2004, *Pharmazie* 60(7): 551–553. 2005

(Antibacterial and antitumour, antipyretic, detoxicant, expectorant, antiinflammatory, used for cold, scrofula and rheumatism.)

in English: three-flowered bluebeard

in China: san hua you

Caryota L. Arecaceae (Palmae)

Greek *karyon* 'nut, any kind of nut', *karyotos* 'date-palm, date, *Phoenix dactylifera*', *karyotis*, *karyotidos* is an ancient

name used by Dioscorides and applied to the date, Latin *caryota* and *caryotis* for a kind of nut-shaped date; see Carl Linnaeus, *Species Plantarum* 2: 1189. 1753, *Genera Plantarum*. Ed. 5. 497. 1754, *Historia Naturalis Palmarum* 3: 195. 1838, *Flora van Nederlandsch Indië* 3: 41. 1855 and *Bull. Bot. Soc. Bengal.* 32: 59–62. 1978, *Plant Systematics and Evolution* 189: 83–122. 1994, *Botanica Acta* 110: 79–89. 1997, Pooma, R. (ed.) *A Preliminary Check-list of Threatened Plants in Thailand*: 1–193. National Park, Wildlife and Plant Conservation Department, Bangkok 2005, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. Royal Botanic Gardens, Kew. 2005.

Caryota maxima Blume ex Mart. (*Caryota aequatorialis* Ridl.; *Caryota aequatorialis* (Becc.) Ridl.; *Caryota furfuracea* var. *caudata* Blume; *Caryota furfuracea* var. *furcata* Blume; *Caryota macrantha* Burret; *Caryota obtusa* var. *aequatorialis* Becc.; *Caryota rumphiana* var. *javanica* Becc.; *Caryota rumphiana* var. *oxyodonta* Becc.; *Caryota rumphiana* var. *philippinensis* Becc.)

China, Thailand.

See *Hist. Nat. Palm.* 3: 195. 1838, *Hist. Nat. Palm.* 3(ed. 2): 195. 1845, *Malesia* 1: 74. 1877, *Fl. Brit. India* 6: 423. 1892 and *Philipp. J. Sci.* 14: 337. 1919, *Fl. Malay Penins.* 5: 20. 1925, *Notizbl. Bot. Gart. Berlin-Dahlem* 15: 197. 1940

(Irritant crystals present in the plant tissues.)

Caryota mitis Lour. (*Caryota furfuracea* Blume ex Mart.; *Caryota furfuracea* Blume; *Caryota griffithii* Becc.; *Caryota griffithii* var. *selebica* Becc.; *Caryota javanica* Osbeck; *Caryota javanica* Zipp. ex Miq., nom. illeg.; *Caryota nana* Linden; *Caryota nana* Wall.; *Caryota propinqua* Blume; *Caryota propinqua* Blume ex Mart.; *Caryota sobolifera* Wall.; *Caryota sobolifera* Wall. ex Mart.; *Caryota sobolifera* Wall., nom. nud.; *Caryota speciosa* Linden; *Drymophloeus zippellii* Hassk.; *Thuessinkia speciosa* Korth.)

SE Asia, Vietnam. Stems solitary or clustered, conspicuous nodal rings, leaves bipinnate, scurfy axillary pendulous spadix, unisexual flowers in threes, tiny creamy flowers in tassel-like clusters, inflorescences a dense mass of hanging spikes bearing flowers in a spiral, red bluish-black round fruits, seeds edible after cooking

See *Species Plantarum* 2: 1189. 1753, *Flora Cochinchinensis* 2: 569–570. 1790, *Hist. Nat. Palm.* 3: 194. t. 107. f. 2. 1838, *A Numerical List of Dried Specimens* n. 8594, 8595. 1848, *Fl. Ned. Ind.* 3: 41. 1855 and *Interpr. Rumph. Herb. Amboin.* 47. 1917, *Bulletin of the Botanical Society of Bengal* 32: 59–62. 1978, *Toxicol. Appl. Pharmacol.* 48(2): 287–92. 1979

(Stinging crystals, raphides, needle-shaped crystals of calcium oxalate. Pericarp irritant to the skin, may cause burning, severe pain and swelling of the lips, buccal cavity and throat, redness and swelling of the eyes. Soft fibers at the base of the leaf sheath used for the cauterization of wounds. Fruit juice, mixed with bamboo hairs and extract of toad considered a potent poison. Ceremonial, flowers and stem center

presented to God during worship; fruits, flowers and leaves used to decorate huts in certain ceremonies.)

in English: Burmese fishtail palm, clustered fishtail palm, clustering fishtail palm, fishtail palm, many-stemmed fishtail palm, tufted fishtail palm

in India: mari supari, mei-hle, meihle, phoroto

in Japan: kabu-dachi-kujaku-yashi

Malayan names: beredin, beridin, bredin, dudok, ibul, kabong, langkap, meredin, pinang, tukas, tukus

in Philippines: bato, pugahan

in Brazil: palmeira-rabo-de-peixe

Caryota urens L. (*Caryota urens* Jacq.; *Caryota urens* Blanco)

India, Sri Lanka. Solitary trunk, arching and pendulous leaves, greenish cream flowers, fruit dark red, powdered inner pith eaten, fleshy toddy famine food

See *Species Plantarum* 2: 1189. 1753, *Fragmenta Botanica.* 20. t. 12. f. 1. 1800–1809, *Fl. Filip.* [F.M. Blanco] 740. 1837 and *Taxon* 28: 70. 1979

(Used in Ayurveda and Sidha. The fruits contain irritant needle-like crystals, if eaten can cause stomatitis and dermatitis. Nuts acrid, cooling, useful to reduce thirst and fatigue; crushed nuts applied to the forehead in headache. Fresh toddy laxative, used in seminal weakness, urinary disorders and jaundice. Stem for increasing lactation. Toddy an auspicious alcoholic beverage; pounded root of *Flemingia nana* added in toddy of *Caryota urens* to enhance its intoxicating properties. A decoction of bark of *Croton roxburghii* N.P. Balakr. (*Croton persimilis* Müll.Arg.) with roots of *Caryota urens* given as purgative.)

in English: bastard sago, caryota, ceylon piassava, fish-tail palm, ghat-palm, hill palm, jaggery palm, kittool, kit-tul, kitul tree, Malabar sago palm, sago palm, toddy fishtail palm, toddy palm, wine palm

in Brazil: banda de sargento, palmeira-rabo-de-peixe, palmeira-toddy

in Mexico: palma cola de pescado

in India: adam, anapa, anapana, anapanna, anapanne, anap-pana, ardhi-sopari, ardhimpari, ardhisupari, ataku, atakumaram, atam, bagane, bagani, bagani mara, bagini, bagni, baina, baine, bainemara, baini, bakini, ban-khajur, baro-flawar, bauree, bayne, beina, benkhajur, berli, berlomad, berlomada, berlomhar, bherawa, bherlamuda, bherlimad, bhiralimada, bhirlimahad, bhyni, binay, birli, birlomad, bugani, byree, calopam, catapalam, catapalamaram, chang-kraum, chirugu, chirugu chettu, chundapana, chuntap-pana, chuntappana, cirugu, citalam, cuntappana, dhoajavriksha, dirgha, erimpana, gukatad, ind, indu, irambanai, irampana, irampanae, irampanai, irampanze, iran-pana, jeeluga, jeeluga chettu, jiluga, jilugu, jilugujattu, jirugu chettu, jirugudu

peruviana.], Govaerts, R. (2003). *World Checklist of Selected Plant Families Database* in ACCESS. The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Thevetia peruviana*.], *Southeast Asian J. Trop. Med. Public Health*. 36 Suppl 4: 167–175. 2005

(Used in Ayurveda and Sidha. Poisonous, extremely toxic, all parts. Sap and seeds deadly poisonous to domestic animals. Latex reported to be irritant and vesicant in some individuals; milky juice highly toxic on account of its cardiac glycoside content, cardenolides are naturally occurring plant toxins which act primarily on the heart; latex applied directly on wounds, mumps, piles, muscle pain, swellings and cuts. Stem juice useful in diabetes. Kernel used in external application for skin infections; a decoction of crushed raw fruits in water used to wash boils. Bark a powerful antiperiodic and febrifuge. Molluscicidal, larvicidal, antifungal, piscicidal. An arrow or ordeal poison. Ceremonial, flowers used for religious worships, for ceremonial sacrifice.)

in English: be-still tree, bestill nut, exile oil tree, exile tree, lucky bean, lucky nut, milk bush, milk tree, thevetia, trumpet flower, yellow oleander

in India: ashvaha, bija-mara, cempon, cemponmaram, cimai-alari, cimaiyalari cuttavacikam, cuttavacikamaram, gohai phul, hapusha, kanai, kaner, kaniari, kappatakam, kappatakamaran, karavirah, kolka-phul, kolkaphul, manjaalari, marang kanaili, paccha ganneru, pacchaganneru, pachaarali, pachaganeru, pachaiyalari, pachchaarali, pachchai-alari, pachchaganeru, pachcha-ganneru, pila kaner, pili-kaner, piv-ala-kanher, sangupoo, sherani, tankarali, tankaralimaram, thivati, tiruvacci, tiruvaccippu, tiruvatci, tittiravam, tittiramaram, ucimiliraiceti

in Mexico: acitz, campanilla, chirca, naranjo amarillo, narciso amarillo, yoyote

in South America: ahoahai mirim, ahoui guacu, akits, amancay, amankay, árbol de Panamá, bellaco caspi, bellaquillo, camé, cabalonga, campanilla amarilla, cega-olho, chapéu de Napoleão, chilca, chilindrón, chirca, chirrto, cruceta real, ischacapa, jorro-jorro, lechero, louro rosa, maichil, maichill, narciso amarillo, siaticapájaro bobo, suche

in Venezuela: lengua de gato, retama

Casearia Jacq. Salicaceae (Flacourtiaceae)

After the Dutch clergyman Johannes Casarius, 1642–1678, missionary, church minister of Dutch East India Company and joint author (he wrote the Latin version) of the first two volumes of the Rheede's *Hortus Indicus Malabaricus* ... adornatus per ... J. Casarium, etc. 1678–1679. See *Civ. Nat. Hist. Jamaica* 249. 1756, Nicolaus Joseph von Jacquin, *Enumeratio systematica plantarum, quas in insulis Caribaeis* ... 4, 21. 1760, *Histoire Physique, Politique et Naturelle de l'Île de Cuba* ... *Botanique*. — *Plantes Vasculaires* 10: 33. 1845, Justus Carl Hasskarl (1811–1894), *Horti malabarici Rheedeani clavis*

locupletissima. (Antivenom. Spiny spurs.)

in English: thorn prickly, wild coffee

Casearia borneensis Merr.

Indonesia. Understory tree, red bark

See *Journal of the Straits Branch of the Royal Asiatic Society* 86: 333. 1922

(Red thin stem decoction drunk to relieve stomachache, fatigue and diarrhea. Leaves and bark decoction as a wash to treat toothache. Astringent fruit eaten to treat stomachache.)

in Indonesia: durie, sata

Casearia esculenta Roxb. (*Casearia ovata* Willd.; *Casearia ovata* (Lam.) Willd.; *Casearia ovata* Wall.; *Casearia ovata* Roxb.; *Casearia zeylanica* Thwaites; *Casearia zeylanica* (Gaertn.) Thwaites; *Guidonia esculenta* Baill.; *Guidonia esculenta* (Roxb.) Baill.)

India. Tree, glabrous leaves, axillary yellowish flowers, globose capsules, red aril, edible curry from leaves and shoots

See *Encyclopédie Méthodique, Botanique* 1: 148. 1783, *Species Plantarum* ed. 4 [Willdenow] 2(1): 629. 1799, *Hort. Bengal.* 90. 1814, *Numer. List* [Wallich] n. 7192 E. 1832, *Flora Indica* or Descriptions of Indian plants. Vol 2 2: 420, 422. 1832, *Enum. Pl. (Used in Ayurveda. Roots hypoglycemic, astringent, cathartic, antiperoxidative and antioxidant; root decoction in liver troubles, diabetes, piles, indigestion; root extract a remedy for diabetes mellitus.)

in English: wild cowrie fruit

in India: allehaniche, ana-vinga, bhurigandha, bhutagandha, bol duiagrang, cerukannan, cherukannan, daitya, dieng soh lormaw, divya, dodda haniche, doddahanice, doddahanise, ekanaathana baeru, ekanaayakana gida, gandhadhya, gandhakuti, gandhini, ghandhamadini, gutti, hillange, hillangi, hillechinch, hillehanice, hillehanige, hillehanise, kadala-zhinjill, kakkai-palai, kakkai-pilai, kilar, kolayayili, konda jungara, kondajunguru, kondapragara, kondadzunguru, kotai aili, kottar kovai, kottargovai, kottarkovai, kraun-araung, kulkulta, kundajungura, kuti, kutti, malampavata, malampavatta, malampavetta, mori, mura, muramansi, pannimuranga, pannimurangam, pate, puragandhavati, saptarangi, saptacakra, saptarangi, satagan, surabhi, svanamulah, talaparni, talaparnika, tsjerakanneli, vellakannan, vellakunnan, vellakunnam, venjanduvar

Casearia graveolens Dalzell (*Casearia graveolens* var. *lintsangensis* S.Y. Bao)

India, China. Shrub or small tree, edible oil from the seeds

See *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 107. 1852 and *Acta Botanica Yunnanica* 5(4): 378. 1983, *Drug Development Research* 19(1): 1–12. 1990

(Anticancer and antiviral. Roots paste applied to treat piles, the juice given for jaundice. Crushed stem bark, unripe fruit and leaves as fish poison.)

in China: xiang wei jiao gu cui

in India: anavananni, anavinga, bhokara, bhokoda, bokara, cerukannan, chilhi, chilla, chirakonna hanice, girivudi, hanise, kidihi, killangi konje, kirambara, kirchi, kirmira, mando, mori, phempri, pimpari, saptrangi, vaasanga, vasanga, veska

in Nepal: sano dedri

Casearia grewiaefolia Vent. (*Casearia grewiifolia* Vent.; *Casearia hexagona* Decne.; *Casearia laurina* Blume; *Casearia leucolepis* Turcz.)

India. Shrub or small deciduous tree, grey smooth bark, leaves with margins finely toothed covered with short translucent dashes, bright yellow fleshy fruits splitting into 3 sections

See *J. Econ. Taxon. Bot.* 16(3): 717. 1992, *World Journal of Microbiology and Biotechnology* 20(3): 265–272. 2004

(Leaf extract given in dysentery, anti-malarial, anti-tuberculosis, anti-viral activity, cytotoxic. Crushed leaves of *Casearia grewiaefolia* and *Tamarindus indica* for swollen pancreas, pounded into paste and applied on the affected area.)

in India: kill tuong

in Sabah: salokdan

in Thailand: kruai paa

Casearia nigrescens Tul. (*Casearia amplissima* Tul.; *Casearia elliptica* Willd., nom. illeg.; *Casearia elliptica* Tul., nom. illeg.; *Casearia elliptica* Klotzsch, nom. nud.; *Casearia elliptica* fo. *elongata* H. Perrier; *Casearia elliptica* var. *macrocarpa* H. Perrier; *Casearia nigrescens* var. *onivensis* H. Perrier; *Casearia nigrescens* var. *ovata* H. Perrier; *Casearia nigrescens* var. *subtrinervia* H. Perrier; *Guidonia amplissima* (Tul.) Baill.; *Guidonia elliptica* (Tul.) Baill.; *Guidonia nigrescens* (Tul.) Baill.)

India, Madagascar. Shrub, small tree, branchlets tomentose, simple lanceolate alternate leaves, greenish yellow flowers in clusters, globose capsule

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Species Plantarum*. Editio quarta [Willdenow] 2: 628–629. 1799, *Reisen in Britisch-Guiana* [Ri. Schomburgk] 3: 1167. 1849 [1848 publ. 7–10 Mar 1849], *Annales des Sciences Naturelles; Botanique*, sér. 5, 9: 326–329. 1868, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 567. 1886 and *Mémoires du Muséum National d'Histoire Naturelle* 13: 272–273. 1940, *Bull. Jard. Bot. Belg.* 41: 397–426. 1971

(Used in Ayurveda. Intake of juice fruits with seeds is poisonous. Diuretic, hypotensive, spasmolytic, antiviral. Powdered bark soaked in water and applied on edema and snakebite. Fruits given in headache. Root juice given for dysentery. Seeds oil rubbed for sprain. Veterinary medicine, bark extract used for cattle and goats to control dysentery. Crushed or powdered fruits used as fish poison.)

in India: banjani, bheri, bili ubbina, bir churchu, biri, bogara, chilaka duddi, chilaka dudduga, chilakaya, chilata, chilla, chillak, chillaka, churchu, churchu daru, dantpada, gidugudu, gilagudu, girugudu, gotlu, gurugudu, haniche, hanise, hillangi, hlingi, kaalamisvari, kaalmaesara, kaami mosara, kadichai, kadiche, kal-karai, kampilaka, kanmesaram, kanubisiri, kanuvisiri, khaakara, khokra, konje, lenga, lenjo, mankurkur, modagi, mojal, monja, naai kadichchaan, pisiki, reede, vasang

in Nepal: thulo dedri

Casearia tomentosa Roxb. (*Anavinga lanceolata* Lam.; *Casearia elliptica* Willd.)

India.

See *Familles des Plantes* 2: 448. 1763, *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 148. 1783, *Nova Genera et Species Plantarum seu Prodrromus* 68. 1788, *Species Plantarum*. Editio quarta [Willdenow] 2(1): 628–629. 1799, *Hort. Bengal.* 90. 1814, *Flora Indica*; or descriptions of Indian Plants 2: 421. 1832

(Used in Sidha. Stem bark powder used in fever; powdered stem bark given with milk to cure spermatorrhea; stem bark juice applied to cure ringworm. Root bark tonic, in anemia. Veterinary medicine. Crushed stem bark and fruits as fish poison.)

in India: anakkarana, anavananni, anavinga, annakara, bedsi, bir churchu, biri, chalakasavara, chilla, churchu daru, gamgudu, gidugam, gidugum, gilugudu, giridi, girugudu, goela, gurugudu, hanchey, hanice, hlingi, jidumu, kakoli, kal-amesara, kalamisvari, kamimesara, karajari, karei, katiccai, kona, konje, kottukkovai, kutti, lainja, massei, men, modgi, modi, mojal, monja, pimpla, pisiki, svarnmul, tsjerou-kanneli, vaparkonne, vappunnakannan, vasanga, veska, wasa

Casearia vareca Roxb.

India. Shrubs or small trees, oblong leaves closely serrate, grey flowers in dense axillary inflorescences, orange-yellow oval fruits, young shoots and leaves eaten cooked

See *Hort. Bengal.* 33. 1814, *Flora Indica* or Descriptions of Indian plants. 2(2): 418. 1832, *FBI* 2: 593. 1879

(Young stem poultice applied on blistering spots. Leaves infusion as a bath in fever. Fruit juice anthelmintic, anticancer, for earache.)

in India: akraun-araung, bon-jhalukia, chhagladoi, chhikramarg, dieng soh rang, han-anglaung-chu, sikraguli, sikrai, tauwm-akraun, tihau-akraun-araung

Casimiroa La Llave & Lex. Rutaceae

For the Spanish botanist Casimiro Gómez de Ortega, 1740–1818, Madrid Botanical Garden 1771–1801, sent plants to Banks, his writings include *Tratado de la naturaleza y virtudes de la cicuta*. Madrid 1763, *Tabulae Botanicae*. Matriti 1773. See *Novorum Vegetabilium Descriptiones* [La Llave & Lexarza] 2: 2. 1825, *Proceedings of the American Academy of Arts and Sciences* 25: 144. 1890 and G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. 1: 172. 1904, *Fieldiana, Bot.* 24(5): 398–425. 1946, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 33 and 2: 62. 1965, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 759. 1993.

Casimiroa sapota Oerst. (*Casimiroa edulis* La Llave & Lex.; *Casimiroa sapota* fo. *ovandoensis* Martínez)

Mexico, Central America. Tree, fast growing, rough brown bark, leaves palmately compound, small flowers in bunches, hanging edible waxy fruit apple-shaped

See *Novorum Vegetabilium Descriptiones* 2: 2. 1825, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1857: 187. 1857 and *Anales del instituto de biología de la universidad nacional de México* 22(1): 72–73, f. 30. 1951, *Ceiba* 44(2): 105–268. 2003 [2005]

(Leaves infusion sedative. The seeds used to induce sleep. Fruit for gastritis and boils. Bark piscicide.)

in English: Mexican apple, white zapote

in Latin America: ajachel, cochitzápotl, guia, matasán, mata-sano, quia, tzápotl, urata, zapote blanco, zapote dormilón

Cassia L. Fabaceae (Caesalpinaceae, Cassieae)

From the ancient Greek name *kasia* (Herodotus, Theophrastus), or *kassia* of Semitic origin, used by Dioscorides and Strabo; akin to the Hebrew *qase'ah*, *qesi'ah* or *quetsiah* or *quetsi'oth* the Latin *casia*, *ae* (rarely *cassia*) was a shrub or a tree more or less aromatic and fragrant (Vergilius, Ovidius, Plinius); see Carl Linnaeus (1707–1778), *Species Plantarum*. 1: 376–380. 1753, *Genera Plantarum*. Ed. 5. 178. 1754, *Flora Brasiliensis* 15(2): 83, 92. 1870 and *Annals of the Missouri Botanical Garden* 38(1): 1–94. 1951, de Wit, H.C.D. “A revision of the genus *Cassia* (Caesalp.) as occurring in Malaysia.” *Webbia* 11: 197–292. 1956, *Taxon* 30(1):10. 1981, *Taxon* 37: 975, 1988, *Taxon* 42: 689. 1993.

Cassia abbreviata Oliv. (*Cassia afrofitula* Brenan)

Tropical Africa. Perennial non-climbing tree, many-branched shrub or small tree, rounded crown, cracked bark, leaves compound, inflorescence a terminal lax raceme, golden yellow strongly scented flowers, woody cylindrical pendulous dehiscent pods, seeds embedded in pulp, found in coastal areas, in dry bushland, in *Acacia-Commiphora* bushland

See *Flora of Tropical Africa* 2: 271. 1871

(Toxins. Powdered stem bark applied to abscesses; stem bark decoction as a purgative and to cure malaria and diarrhea. Root and bark used for stomach disorders and syphilis. Roots purgative, stomachic, aphrodisiac, abortifacient and vermifuge, a decoction for chest complaints, blackwater fever, gastrointestinal disorders, stomachache, bilharzia, schistosomiasis, venereal diseases, gonorrhoea, pneumonia, malaria, snakebites.)

in English: cloth-of-gold, heart wood, long pod cassia, long-tail cassia, Sjambok pod

in East Africa: limulimuli, malandesi, mbaraka, mulimuli

in Southern Africa: muJaja, muNemenembe, muRemberembe, muVeneka, muZhazha

in Tanzania: mbaraka, mkakatika, mkwezenge, mulumba

Cassia abbreviata Oliv. subsp. *beareana* (Holmes) Brenan (*Cassia beareana* Holmes) (the subspecies named after Dr O'Sullivan Beare from the London Pharmaceutical Society.)

Botswana, Mozambique, South Africa. Perennial non-climbing tree, shrubby, leaves with short erect hairs, yellow flowers sweetly fragrant

See *Fl. Pl. Africa* 46: t. 1819 and *Pharm. J.* 68: 42. 1902, *Kew Bulletin* 13(2): 232. 1958

(Roots used for stomach problems, fever, headache, toothache, also as abortifacient, aphrodisiac.)

in English: cloth-of-gold, long-tail cassia, Sjambok pod

in Southern Africa: kersboom, peulbos, Sambokpeul; nnu-manyama (Eastern Transvaal); monenepe (Mangwato dialect, Botswana); monenepe (North and north east Transvaal); muluma-nama, munembe-nembe (Venda); nshashanyana, nlembelembe (Kalanga: Northern Transvaal); mokwankusha, sifonkola (Kololo: Barotseland)

in Somalia: rabai, urme

in Tanzania: mzungaze

Cassia afrofitula Brenan (*Cassia beareana* sensu R.O. Williams; *Cassia fistula* sensu Brenan; *Senna petersiana* (Bolle) Lock)

Mozambique, Tanzania. Perennial non-climbing tree or shrub

See *Kew Bulletin* 13(2): 236–239. 1958

(Roots purgative, stomachic, aphrodisiac, abortifacient and vermifuge; boiled roots for stomach ailments, chest complaints, blackwater fever, gastrointestinal disorders, stomachache, bilharzia, schistosomiasis, venereal diseases, gonorrhoea, pneumonia, malaria, snakebites.)

in Madagascar: tsiambaravatsy

Cassia angolensis Hiern (*Cassia angolensis* Welw. ex Hiern)

Mozambique, South Africa. Perennial non-climbing tree, inflorescence an axillary raceme, golden-yellow flowers, cylindrical indehiscent pod

See *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853—61* 1: 291. 1896

(Root decoction drunk for venereal diseases; fresh leaves eaten as a cough remedy.)

***Cassia arereh* Del.**

Nigeria. Perennial non-climbing tree

(Crushed pods used to stupefy fish.)

See Delile, Alire Raffeneau. *Centurie de plantes d'Afrique du voyage à Méroé* recueillies par M. Caillaud. Paris, 1826

in Nigeria: malga (Hausa); tjabi maibe (Fulani)

***Cassia burtii* Baker f.**

Mozambique, Tanzania. Perennial non-climbing tree or shrub, aromatic, white flowers

See *Journal of Botany, British and Foreign* 73: 80. 1935

(Roots purgative, stomachic, aphrodisiac, abortifacient and vermifuge; boiled roots for stomach ailments and syphilis.)

in Tanzania: mkunde-kunde

***Cassia fikifiki* Aubrév. & Pellegr.**

Ivory Coast.

See *Bulletin de la Société Botanique de France* 104: 496. 1958

(Dry powdered bark sprinkled on wounds to promote healing; bark decoction for washing leprosy patients. Stem bark and roots decoction drunk to treat river blindness, onchocerciasis, stomachache.)

***Cassia fistula* L. (*Bactrylobium fistula* (L.) Willd.; *Bactrylobium fistula* Willd.; *Cassia bonplandiana* DC.; *Cassia excelsa* Kunth, nom. illeg., non *Cassia excelsa* Schrad.; *Cassia excelsa* Schrad.; *Cassia fistula* Herb. ex Oliv.; *Cassia fistula* Schimper ex Oliv., nom. inval.; *Cassia fistuloides* Collad.; *Cassia rhombifolia* Roxb.; *Cathartocarpus excelsus* G. Don; *Cathartocarpus fistula* (L.) Pers.; *Cathartocarpus fistula* Pers.; *Cathartocarpus fistuloides* (Collad.) G. Don; *Cathartocarpus fistuloides* G. Don; *Cathartocarpus rhombifolius* G. Don)**

Sri Lanka, India. Perennial non-climbing canopy tree, deciduous or semi-deciduous, cylindrical bole, branches spreading, young twigs glabrous, leaves palmately compound, leathery leaflets slightly glaucous below, fragrant bright yellow flowers in drooping racemes, petals broadly ovate, black glabrous indehiscent cylindrical pods, seeds embedded in a black sweetish pulp, cooked flowers eaten as vegetable, bark a source of red dye, bark contains tannin, in open forest and grassland

See *Species Plantarum* 1: 376–380. 1753, *Syn. Pl.* (Persoon) 1: 459. 1805, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... [Willdenow] 439–440. 1809, *Hortus Bengalensis*, or a catalogue ... 31. 1814, *Histoire Naturelle et Médicale des Casses* 87, t. 1. 1816, *Göttingische gelehrte Anzeigen unter der Aufsicht der Königl...* 1: 717. 1821, *Nova Genera et Species Plantarum* (quarto ed.) 6: 339. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 490. 1825, *Hort. Brit.* [Loudon] 167. 1830, *A General History of the Dichlamydeous Plants* 2: 453. 1832, *Flora of Tropical Africa* [Oliver et al.] 2: 271. 1871 and *Fl. W. Pakistan* 54: 12. 1973, *Mem. New York Bot. Gard.* 35(1): 14, 16. 1982, *Proceedings of the Indian Academy of Sciences* 48: 397–404. 1982, *Plant Systematics and Evolution* 153: 223–227. 1986, *Journal of Cytology and Genetics* 23: 183–189. 1988, *Kromosomo* 54: 1787–1792. 1989, *Journal of Cytology and Genetics* 28: 1–5. 1993, *Ethnobotany* 16: 139–140. 2004

(Used in Ayurveda, Unani and Sidha. Leaves hypoglycemic, antifungal, antibacterial, purgative, anthelmintic, disinfectant, used in malaria, fever, hyperglycemia, allergy, ringworm, blood poisoning, inflammation and dysentery; fried leaves eaten with rice to cure syphilis and muscular pain; tender leaves paste applied to cure eczema and skin diseases, and also between the toes to cure wounds. Roots astringent, febrifuge, purgative; root juice given to treat snakebite, fever and cold; root decoction along with roots of *Ricinus communis* given for rheumatism, rheumatoid arthritis. Roots, bark and pulp of the fruit and seeds used as a laxative. Fruit cathartic, antidote, laxative, applied in rheumatism; ash of ripe fruits along with honey given for whooping cough; endosperm eaten to cure diabetes; fruit pulp decoction anti-diabetic, used in liver disorders, for toothache; fruit infusion for kidney problems, the dissolution of kidney stones and for relieving constipation. Seeds used in constipation, indigestion and jaundice; seeds powder given as antidiabetic; paste of seeds put on tongue of children to quench thirst. Broken bones and tropical ulcers bandaged with bark scrapings and leaf sap; stem bark mixed with cow's milk applied to boils; dried fruits of *Toddalia asiatica* mixed with stem bark of *Cassia fistula*, ground and the powder given in scabies. Heartwood applied as an anthelmintic. Twigs of the plant along with *Ziziphus oenoplia* branches used to prevent the elephant's disturbance; young shoots made as curry and given for ringworm. Veterinary medicine, fruit pulp mixed with *Brassica* oil, with powdered turmeric, given orally to the cattle for cough, cold and stomach troubles; fumes of wood of *Dalbergia latifolia* and pods of *Cassia fistula* applied to head of cattle against fevers; fruits infusion given to cattle for bloated stomach; fruit pulp given to cattle to kill intestinal worms and in indigestion; bark decoction mixed with garlic and powdered pepper and given to cattle as purgative; powdered bark along with water given to goats with diarrhea; bark extract of *Cratogeomys magna* along with leaves of *Cassia fistula*, seeds of *Ocimum basilicum*, butter and salt are pounded and given orally in tympany; leaves applied to heal wounds on shoulders of cattle caused by the yoke.

Cassia javanica L. (*Cassia agnes* (de Wit) Brenan; *Cassia bacillus* Gaertn.; *Cassia bartonii* F.M. Bailey; *Cassia javanica* Sieber ex Benth.; *Cassia javanica* Vell.; *Cassia megalantha* Decne.; *Cathartocarpus javanicus* Pers.)

SE Asia. Perennial non-climbing tree, small tree, deciduous or semi-deciduous, smooth or armed, leaflets elliptical-ovate to oblong, inflorescence a raceme or panicle, flowers dark pink to red, anthers and stamens bright yellow, cylindrical glabrous black fruits, seeds embedded in a flat disk, a very polymorphic species

See *Species Plantarum* 1: 376–380. 1753, *De Fructibus et Seminibus Plantarum*... 2: 313. 1791, *Syn. Pl.* 1: 459. 1805, *Hort. Bengal.* 31. 1814, *Florae Fluminensis* 168. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 336. 1832, *Transactions of the Linnean Society of London* 27: 517. 1871 and *Natural History Bulletin of the Siam Society* 25(3–4): 205. 1974, *Recent Res. Pl. Sci. (New Delhi)* 7: 252–260. 1979, *Proceedings of the Indian Academy of Sciences* 48: 397–404. 1982, *Flora of the Lesser Antilles, Leeward and Windward Islands (Dicotyledoneae—Part 1)* 4: 334–538. 1988, *Descriptive Flora of Puerto Rico and Adjacent Islands: Spermatophyta* 2: 1–481. 1988, *Journal of Cytology and Genetics* 28: 1–5. 1993

(For constipation eat the leaves with food. Ripe pods and seeds used as a laxative; bark and seeds used as antipyretics. Against itch pound the bark and apply it.)

in English: apple-blossom cassia, apple-blossom shower, Javanese cassia, pink and white shower, pink cassia, pink shower, rainbow shower

in Cambodia: bô prùk'

in Indonesia: bobondelan, boking-boking, trengguli

in Laos: khoun loy

in Malaysia: bebusok, bereksa, berekseh, busok-busok, dendulang merah, dulang, dulang-dulang, kayu busok, saga, trenggoeli

in Philippines: anchoan, angsoan, antsoan, apostola, bagiroro, balayong, cana fistula, dulauen, duyong, fugayong, kilkil, narang-dauel, pistula, tindalo, tualing-bakulau

in Thailand: chaiaphruk, kalalphruk, lak khoei lak kluea

in Vietnam: b[uf] c[aj]p, bo cap dong, mu[oof]ng b[of] c[aj]p

Cassia javanica L. subsp. *nodosa* (Roxb.) K. Larsen & S.S. Larsen (*Cassia agnes* (de Wit) Brenan; *Cassia javanica* var. *agnes* de Wit; *Cassia javanica* L. var. *indochinensis* Gagnep.; *Cassia nodosa* Roxb.; *Cassia nodosa* Buch.-Ham. ex Roxb.)

SE Asia, Vietnam. Perennial non-climbing tree, low growing, deciduous or semi-deciduous, spreading, smooth or armed, inner bark reddish-brown with fetid smell, white pinkish flowers in axillary clusters behind leaves, slender cylindrical pod, circular seeds

See *Hort. Bengal.* 31. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 336. 1832 and *Observationes Botanicae* 2(2): 158. 1913, *Webbia* 11: 220–222, f. 1. 1955, *Kew Bulletin* 13(1): 180. 1958, *Natural History Bulletin of the Siam Society* 25(3–4): 205. 1974, *Acta Bot. Austro Sin.* 7: 26–39, pl.1. 1991, *Nordic Journal of Botany* 13(4): 403. 1993

(For constipation eat the leaves with food. Ripe pods and seeds used as a laxative, purgative; bark and seeds used as antipyretics. Against itch pound the bark and apply it.)

in English: cassie rose, Javanese cassia, joint wood, pink cassia, pink and white shower, pink mohur, pink shower, rainbow shower, white shower

in China: jie jia jue ming, shen huang dou

in Malaysia: busok-busok

Cassia mannii Oliv.

Gabon, Sudan and Uganda. Tree, slash orange, leaflets not distinctly emarginate, margin of the leaflets pubescent, white or pink petals, fruits and leaves eaten by gorillas, very similar to *Cassia angolensis*

See *Flora of Tropical Africa* 2: 272. 1871

(Bark infusion taken to cure bronchial problems. Crushed seeds to treat neuralgia.)

in Central African Republic: etembele, etebele ti bye, mokete

in Zaire: checheche, ndugu ya tafa, tchetsetche

Cassia moschata Kunth (*Cassia moschata* Benth.; *Cathartocarpus moschatus* (Kunth) G. Don)

West Indies. Perennial non-climbing tree, spreading crown, dark-brown rod-like seed pods

See *Synopsis Plantarum* 1: 459. 1805, *Nova Genera et Species Plantarum* (folio ed.) 6: 266. 1824, *A General History of the Dichlamydeous Plants* 2: 453. 1832, *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 75. 1840 and *Memoirs of the New York Botanical Garden* 35: 32–33. 1982

(Purgative.)

in English: bronze shower

in Central America: cañafistola sabanera, cañafistula

Cassia sieberiana DC. (*Cassia kotschyana* Oliv.; *Cassia sieberiana* DC.)

Tropical Africa. Perennial non-climbing tree, shrub, twisted trunk, leaves pinnately compound, elliptic leaflets, pendulous racemes, large golden yellow flowers, cylindrical pods indehiscent

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 489–490. 1825, *Fl. Trop. Afr.* [Oliver et al.] 2: 271. 1871 and *Bull. Mus. Natl. Hist. Nat.*, B, *Adansonia*. 4: 461–472. 1981, *Journal of Ethnopharmacology* 8: 257–263, 265–277.

1983, *Journal of Ethnopharmacology* 77: 5–9. 2001, *Journal of Ethnopharmacology* 97: 327–336. 2005

(Leaves febrifuge, laxative, cholagogue, diuretic, tonic. Powder from the dried ripe fruits used in sexual asthenia. Roots washed, cut into pieces, put in a bottle of water, the yellow liquid useful for stomach problems. Crushed pods used to stupefy fish.)

in English: African laburnum

in Congo: musama, ratu

in Guinea: bangboua, gbangba, sambasintch-andje, sindia, sindja, sindya, sindyan

in Ivory Coast: aloui yassoua, alui iasouai, bédélé, démené, esila, gnama, goma fadabi, guientrou, i sandiani, kohodi, kombissaka, kombresaka, koumbrissaka, linto, malgahi, naoublé, naoulobo, oulou nou faka, padwou doubi, pangouélé, sendian, sin'guian, sinda, sindian, sindjan, sinla, tiopon, woulou nou faka

in Kenya: mzangaye

in Mali: bamba, bang boua, dieisse, gamba fadahi, pèlpèlmun'gu, poupougou, shinanga, signan, sindia, sindian, sinesan, sinja, sinjan, sinsan, sinzan

in Niger: gama – houda, malga, sinsan, sisangahi

in Nigeria: apagban, aridan tooro, aridan-toro, gama fada, gamma fada, ifo, kuhwa, malga, malgahi, marga, sireih

in Senegal: бага, boland, bosse, bu saet, bu sensent buseit, endgi, gama fadahi, golo, ka seit, kaseit, malgothi, samba sin-njan, sambasindi, seden, sedendi, selo, selum, side, sinan, sindia, sindian, sindo, singuian, sinnia, tineravi

in Sierra Leone: a kon-korot, gba gba, gbangba, gbangbei

in Sudan: sendigine, sindian, sinnia

in Togo: gati, gatigati, mikéli, panpagunu, tschamanu

in Zimbabwe: munzungu

Cassine L. Celastraceae

After a Florida Indian name for *Cassine glauca* or for *Ilex vomitoria*; see Carl Linnaeus, *Species Plantarum* 1: 268. 1753, *Genera Plantarum*. Ed. 5. 129. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 163. Ansbach 1852 and Virgil J. Vogel, *American Indian Medicine*. 539. [Index] University of Oklahoma Press 1977, *Taxon* 44: 611–612. 1995, *South African Journal of Botany* 63: 146–157. 1997. Some confusion with the genus *Elaeodendron*.

Cassine albens Kosterm. (*Cassine albens* (Retz.) Kosterm.)

India.

The Gardens' Bulletin Singapore 39: 178. 1987 [1986 publ. 1987]

(Stem bark as fish poison.)

in India: bhutyapalas

Cassine buchananii Loes. (*Elaeodendron buchananii* (Loes.) Loes.)

Tropical Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 551. 1893 and *Journal of Ethnopharmacology* 25(3): 339–359. 1989

(Very toxic plant. Bark on wounds. Powdered roots applied on wounds, used also for venereal diseases. Leaf chewed, juice for diarrhea and dysentery; leaves decoction for cough. For onychomycosis crushed fruit applied on the affected site. Veterinary medicine.)

in Kenya: saunet, saonet

in Rwanda: umusabanyana

in Tanzania: mhakumo, mnenekanda

Cassine crocea (Thunb.) Kuntze (*Cassine crocea* C. Presl; *Cassine crocea* Kuntze; *Cassine papillosa* (Hochst.) Kuntze; *Crocoxylon croceum* (Thunb.) N. Robson; *Elaeodendron capense* Ecklon & Zeyher; *Elaeodendron croceum* (Thunb.) DC.; *Elaeodendron croceum* DC.; *Elaeodendron papillosum* Hochst.; *Ilex crocea* Thunb.; *Salacia zeyheri* Planch. & Harv.) (the specific epithet from the Latin *croceus*, a, um 'saffron-colored, yellow')

South Africa. Shrub or small tree, evergreen, small greenish flowers in axillary clusters, fleshy fruits

See *Flora Capensis* 1: 577. 1813, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 11. 1825, *Flora* 27: 305. 1844, *Abhandlungen der königlichen Böhmischen Gesellschaft der Wissenschaften* ser. 5, 3: 467. 1845, *Botanische Bemerkungen* (C. Presl): 37. [Jan-Apr 1846], *Revisio Generum Plantarum* 1: 114. 1891 and *Boletim da Sociedade Broteriana*, ser. 2 39: 41. 1965

(Most parts of the plants are poisonous. Magic, ritual, the bark.)

in English: common saffron, saffron cassine, saffron wood, small-leaved saffron, yellow wood

in Southern Africa: Duka, fynblaarsaffraan, geelhout, gewone saffraan, muKute, saffraan, umBomvane (= red), umBovana, umbovani, umGugutu, umKukutu, umkulu

Cassine glauca Kuntze (*Cassine glauca* (Rottb.) Kuntze; *Elaeodendron glaucum* (Rottb.) Pers. *Elaeodendron glaucum* (Vahl) Pers.; *Elaeodendron glaucum* Pers.; *Elaeodendron glaucum* Szyszyl., nom. illeg.)

India. Evergreen unarmed tree, greenish flowers in axillary cymes

See *Revisio Generum Plantarum* 1: 114. 1891 and *J. Econ. Taxon. Bot.* 27(4): 894–896. 2003

(Used in Ayurveda and Sidha. A decoction of leaves, bark and seeds is poisonous. Paste of bark taken orally against snake-bite and also rubbed over the affected parts; fresh extract of stem bark and leaves applied on cuts and wounds. Leaves as snuff; cooked leaves eaten for gastritis; leaves to control wound maggots. Stems and leaf juice dropped into nose to cure headache. Roots astringent, for dysentery, also antidote for snakebite and all poisonous bites; powdered roots fumigation as mosquito repellent. Veterinary medicine, to heal wounds as a result of defective castration. Magic, ritual, a twig on person or in house wards off the evil spirits; mature stems used as a tool to tie cattle and it is believed that cattle are protected from ghosts, and supposed to bring good health and working against black magic.)

in India: alan, alan bhutalan, aran, asitamuskaka, bayamaka, beera, bhootha keshi, bhoothaankusamu, bhoothapala, bhuskat, bhut zad, bhutan-kusamu, bhutikes, bhutkes, bhutphal, bhutyakes, bhutyapalas (bhut = ghost), bilur, burkas, buscut, buskut, butapala, butkus, butyakalas, ciluppai, ciluppaimaram, ciri, dhebri, hekkaralu, irkuli, jamrasi, jangle, kaalamokha, kanaire, kanguni, kanneer, kannilu, kanniramaram, kannire, kanniru, kannivamaram, kannurmara, karikkuvakai, karkkavam karuneerakam, karukkuvu, karukkuvacci, karuvali, karvaliyu, keeri, khavalli, khiri, kondgaidh, krsnamuskaka, kurukuvu, malkakni, mamar, mirgu, mookaarthi, mookarika, mookurichi, mukkarika, mukkaritte, mukkarive, mukkarki, mukkathri, mulkangni, muskaka, neradi, nerasi, nerdi, neringa, neurjar, neurjer, niraja, niraja maanu, nirija, niuri, noorijia, noridi, pigavi, selluppaimaram, sillupamaram, tamruj, veeri, wellia-tagera

Cassine matabelica (Loes.) Steedman (*Cassine matabelicum* (Loes.) Steedman; *Elaeodendron capense* sensu O.B. Mill.; *Elaeodendron matabelicum* Loes.)

South Africa. Tree, drooping, small cream to greenish flowers in dense axillary heads

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 61. 1907, *Descr. Trees S. Rhodesia* 41. 1933

(The plant may have toxic properties.)

in English: condiment saffron

in Southern Africa: speserysaffraan

Cassine peragua L. (*Cassine capensis* L.; *Cassine capensis* var. *colpoon* (L.) DC.; *Cassine colpoon* (L.) Thunb.; *Cassine aethiopica* auct.; *Cassine kraussiana* Bernh.; *Cassine kraussiana* Hochst.; *Cassine kraussiana* Bernh. ex Harv. & Sond.; *Elaeodendron kraussianum* (Bernh.) Sim) (peragua = from Paraguay, incorrectly spelled by Linnaeus)

South Africa. Evergreen shrub or tree, saffron-coloured trunk, rounded crown, tough thick leathery shiny dark green leaves, small white fragrant flowers in loose branching clusters, bird-attracting fleshy fruits

See *Hort. Eltham*. 2: 315, t. 236, f. 305. 1732, *Species Plantarum* 1: 268. 1753, *Mantissa Plantarum Altera* 220. 1771, *Prodromus Plantarum Capensium*, ... 52. 1794, *Flora* 27(1): 305. 1844, *Flora Capensis* 1: 466. 1860 and *Taxon* 41: 559–560. 1992, *Flowering Plants of Africa* 55: 70–74, t. 2133. 1997

(Leaves reported to be toxic. Bark for pulmonary troubles.)

in English: bastard saffron, bastard saffronwood, Cape saffron, false saffron, forest spoonwood

in Southern Africa: bastersaffraan, bastersaffron, boslepelhout, iKhukhuzi, lepelhout, umBofanyamagone, umKhukhuze

Cassine transvaalensis (Burt Davy) Codd (*Cassine transvaalensis* Codd; *Crocoxydon transvaalense* (Burt Davy) N. Robson; *Elaeodendron croceum* var. *triandrum* Dinter; *Elaeodendron croceum* var. *heterophyllum* Loes.; *Pseudocassine transvaalensis* (Burt Davy) Bredell; *Salacia transvaalensis* Burt Davy)

South Africa. Shrub or small tree, many-branched, small greenish white flowers in stalked axillary clusters, leaves browsed by game and stock

See *Bulletin of Miscellaneous Information Kew* 1921: 51. 1921, *South African Journal of Science* 33: 330. 1937, *Boletim da Sociedade Broteriana*, ser. 2 39: 41. 1965, *Bothalia* ix. 124. 1966, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of the South Africa Veterinary Association* 72: 189–196. 2001

(Root infusion laxative, diuretic, for stomachache, diarrhea, cough, venereal diseases; decoction of barks and roots laxative; roots powder stomachic and laxative. Veterinary medicine, bark for diarrhea, dysentery.)

in English: Transvaal saffron

in Southern Africa: dikulukhazi, iNgwavuma (a Zululand district is named after the tree, in KwaZulu-Natal), iNqotha, lepelhout, majelemane, monamane, monomani, mukuvhazwihi, mulumapamana, oupitjie, shimapana, Transvaalsaffraan, umGugudo

Cassiope D. Don Ericaceae

Cassiope or Cassiopea, mother of Andromeda, see *Edinburgh New Philosophical Journal* 17(33): 157–158. 1834 and *American Midland Naturalist* 40(2): 493–495, f. 1. 1948, *Botanical Journal of the Linnean Society* 64: 37. 1971.

Cassiope fastigiata (Wall.) D. Don (*Andromeda fastigiata* Wall.)

India, Himalaya. Aromatic plant, leaves used for making *namkeen* tea

See *Species Plantarum* 1: 393–394. 1753, *Asiatic Researches* 13: 394. 1820, *Edinburgh New Philosophical Journal* 17: 157–158. 1834

(Plant's smoke used to ease respiration. Leafy twigs ground into a paste and applied on burns. Ceremonial, ritual, whole plant as incense.)

in India: phalu tsa, tolashang

Cassytha L. Lauraceae

Greek *kassyō*, *kassyein* 'to sew, to patch, to warp'; Latin *cassis*, *is* (*casses*, *ium*) means web, hunting-net, spider's web; Akkadian *kasitu* 'binding', *kasû* 'to join, to tie objects together'; the stems and the leaves are herbaceous, the plant is a parasite and has a typical intricate interlacing of the stems; see Carl Linnaeus, *Species Plantarum*. 1: 35–36. 1753, Lindley, John (1799–1865), *Nixus plantarum*, Londini: apud Ridgway et filios, 1833 and *Fieldiana*, *Bot.* 24(4): 302–344. 1946, *Flore de Madagascar et des Comores* 81: 1–86. 1950.

Cassytha filiformis L. (*Calodium cochinchinense* Lour.; *Cassytha americana* Nees; *Cassytha aphylla* (Forssk.) Raeusch.; *Cassytha aphylla* Raeusch.; *Cassytha brasiliensis* Mart. ex Nees; *Cassytha cuscutiformis* F. Muell.; *Cassytha cuscutiformis* Meisn.; *Cassytha dissitiflora* Meisn.; *Cassytha filiformis* Jacq., nom. illeg., non *Cassytha filiformis* L.; *Cassytha filiformis* Mill., nom. illeg., non *Cassytha filiformis* L.; *Cassytha filiformis* Thunb., nom. illeg., non *Cassytha filiformis* L.; *Cassytha guineensis* Schumach.; *Cassytha guineensis* Schumach. & Thonn.; *Cassytha guineensis* Thonn. ex Schumach.; *Cassytha guineensis* var. *livingstonii* Meisn.; *Cassytha paradoxae* Proctor; *Cassytha senegalensis* A. Chev.; *Cassytha zeylanica* Gaertn.; *Nectandra cuneata* Griseb.; *Ocotea cuneata* Urb.; *Ocotea cuneata* Mez; *Ocotea cuneata* (Nees) J.F. Macbr.; *Ocotea cuneata* M. Gómez; *Ocotea cuneata* (Griseb.) M. Gómez; *Volutella aphylla* Forssk.) (*Nectandra* Rol. ex Rottb. Lauraceae, Greek *nektar* 'nectar' and *andros* 'man, male, stamen'.)

Pantropical. A perennial, orange, twining parasitic or hemiparasitic plant, clinging parasitic habit, stems filiform, many-branched, leaves spirally arranged reduced to tiny scales, inflorescence an axillary short spike, flowers small, petals white or yellowish, fruit a globose drupe, fleshy perianth, harmful to the host

See *Species Plantarum* 1: 35–36. 1753, *Selectarum Stirpium Americanarum Historia* ... 115, t. 79. 1763, *The Gardeners Dictionary*: ... eighth edition. 1768, *Flora Aegyptiaco-Arabica* 84. 1775, *Histoire des plantes de la Guiane Française* 2: 781, pl. 310. 1775, *Descr. Rar. Pl. Surin.* [Rottbøll] 11. 1776, *Flora Cochinchinensis* 247. 1790, *Prodromus Plantarum Capensium*, ... 78. 1794, *Nomencl. Bot.* [Raeusch.] ed. 3, 116. 1797, *Beskrivelse af Guineiske planter* 199–200. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 219–220. 1828, *Systema Laurinarum* 644, 648. 1836, *Memoirs of the American Academy of Arts and Science*, new series 8: 188. 1861, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 8–11: 145. 1870, *Diccionario botánico de los nombres vulgares cubanos y*

puerto-riqueños 30. 1889 and *Bot. Jahrb. Syst.* 30(1, Beibl. 67): 17. 1901, *Symb. Antill.* (Urban). 4(2): 246. 1905, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 11: 18. 1931, *Notulae Systematicae*. *Herbier du Museum de Paris* 8: 67–128. 1939, *Taxon* 28: 269. 1979, *J. Adelaide Bot. Gard.* 3: 229. 1981, *Annals of the Missouri Botanical Garden* 68: 222–223. 1981, *Journal of Ethnobiology* 3(2): 149–156. December 1983, *Moscosea* 2(1): 20. 1983

(Used in Ayurveda and Sidha. Whole plant astringent, tonic, diuretic, anti-trypanosomal, hair tonic, laxative, febrifuge, uterotonic, vermifuge, antidote, antiparasitic, stomachic, for cough, venereal diseases, suppression of lactation after stillbirth; whole plant crushed with sugar taken for curing chronic ulcers; whole plant crushed with turmeric applied for body pains and rheumatism. Because of the Doctrine of the signatures, stem powdered and mixed with *Sesamum* oil used as a hair tonic. Love potion, the vine. Veterinary medicine, tender twigs extract given for liver troubles; for bone fracture, plant pounded in human urine and bandaged over the affected part; plant decoction given to treat diarrhea; plant given to increase milk yield.)

in English: dodder-laurel, false dodder, love vine, seashore dodder, woe vine

in Brunei: akar janjang

in China: wu gen teng, wu ye teng

in India: aakaasha balli, aakasha balli, aakashaballi, aakasha-valli, acatagabulli, acatsja-valli, acatsjavalli, aiyapala, akacavalli, akasa balli, akasaballi, akasavalli, akasavela, akasbel, akash bel, akashaballi, akashavalli, akashavuli, akasvalli (akas, the sky; valli, a climber), akaya valli, alarntapu, amaraballi, amaravallari, amaravalli, amaravela, amarbaela, amarbeli, amarvela, ammayarkoonthal, amrtavalli, anantai, ananti, anantikkoti, antaravallitige, antharavallithige, anthrapachya, aral, astimu, bangaru teega, beelu balli, beeluballi, beluballi, calantirati, canaki, cankutam, cavuttumananci, curai, cure, daarada balli, emanatanki, erumaikkorran, erumaikkottan, haadaragithi balli, inci, incikakkoti, indiravalli, intiravalli, irumpacceti, itumpakakkoti, itumpakam, janivaara balli, karukkutaiyalmuli, karulananki, khavalli, kodikkottan, korran, kothan, koththan, kotikkorran, kottan, kottankoti, kunacali, mangana udidaara, mativalli, mudeludantiburu, mulacci, nalil, nandei, nantai, nattai, nelil, nellilkoti, nimtecan, nipattia, nooluthige, notiyatipputu, nuli, nulikkoti, nulu, nulutega, ovaiyarkoonthal, paachi teega, paachi theega, paachithige, pachatige, pachi teega, pachiteega, pachitiga, pachitige, pachungottan, pacitige, pacunkorran, pacunkottan, parsi tivva, paunchtiga, punchatige, seethammaavaari jadaalu, seethammapogunoolu, seethammavaarupogulu, sitammapogunulu, sitammavarupogulu, tega, tirkki, tudakkarupan, tumbi, tumpi, tumpu, tumpukkoti, tutakkaruppan, utaiyavalitam, vacaki, vancimalikkoti, vancimalitali, vinmativalli, viranakkopini, visnupari, viti

in Indonesia: akar pengalasan, sangga langit, tali puteri, tali putri

in Japan: suna-zuru

in Okinawa: niinashi-kanda

Malayan name: chemar batu, chemar hantu

in Philippines: barutbarut, kaduad-kawaran, malabohok

in Thailand: chong naang khlee, khiang kham, khueang kham khok

in Vietnam: d[aa]y t[ow] xanh, t[ow] h[oo]f[ng] xanh

in Hawaii: kauna'oa pehu, kauna'oa malolo, kauna'oa uka, kaunoa, malolo, pololo

in Brazil: cipó-de-chumbo

in Rodrigues Isl.: liane jaune, liane sans fin

in Southern Africa: nooienshaar, vrouehaar; luangalala (Venda)

Castanea Miller Fagaceae

Latin *castanea* and Greek *kastanon*, *kastana* for the chestnut and the chestnut tree; see Pietro Bubani, *Flora Virgiliana*. 33–34. Bologna 1870.

Castanea dentata (Marshall) Borkhausen (*Castanea americana* (Michx.) Raf.; *Castanea sativa* var. *americana* (Michx.) Sarg.; *Castanea sativa* var. *pendulifolia* Lavallée; *Castanea vesca* var. *americana* Michx.; *Castanea vesca* var. *denuda* Alph.Wood; *Castanea vulgaris* var. *americana* (Michx.) A. DC.; *Fagus castanea* var. *dentata* Marshall; *Fagus dentata* Marshall)

Canada, North America. Perennial tree

See *Species Plantarum* 2: 997–998. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1: (278). 1754, *Arbust. Amer.* 46–47. 1785, *Theoretisches-praktisches Handbuch der Forstbotanik und Forsttechnologie* 1: 741. 1800, *Fl. Bor.-Amer.* 2: 193. 1803, *Fl. Ludov.*: 134. 1817, *Prodr.* 16(2): 114. 1864

(Leaves decoction to treat whooping cough, heart trouble, rheumatism, colds; leaves infusion stomachic, for whooping cough; wood powder for chafed skin. Bark infusion to stop bleeding after childbirth. Insecticide. Veterinary medicine, bark for worms.)

in English: American chestnut, chestnut

Castanea mollissima Blume (*Castanea bungeana* Blume; *Castanea duclouxii* Dode; *Castanea fargesii* Dode; *Castanea formosana* (Hayata) Hayata; *Castanea hupehensis* Dode; *Castanea mollissima* var. *pendula* X.Y. Zhou & Z.D. Zhou; *Castanea sativa* var. *bungeana* (Blume) Pamp.; *Castanea sativa* var. *formosana* Hayata; *Castanea sativa* var. *mollissima* (Blume) Pamp.; *Castanea sinensis* Perr.; *Castanea vulgaris* var. *yunnanensis* Franch.)

China. Deciduous tree, spreading, round-topped, kernels edible, very rich in tannin

See *Museum Botanicum* 1(18): 284, 286. 1851 and *Bull. Soc. Dendrol. France* 1908: 150–151. 1908, *Nuovo Giornale Botanico Italiano*, new series 17(2): 250. 1910, *Icon. Pl. Formosan.* 6(Suppl.): 71. 1917, *J. Jiangxi Agric. Univ.* 1982(1): 7. 1982, *J. Asian Natural Prod. Res.* 3(2): 89–93. 2001

(Kernels antidote, astringent, stomachic, antiinflammatory, styptic, anti-diarrhea and analgesic, to treat gastroenteritis, bronchitis, nausea and regurgitation; decoction for diarrhea, dysentery.)

in English: Chinese chestnut

in China: li zi, pan li

in Japan: shina-kuri

Castanea pumila (L.) Miller (*Castanea alnifolia* Nuttall; *Castanea alnifolia* subsp. *floridana* (Sarg.) A.E. Murray; *Castanea alnifolia* var. *floridana* Sargent; *Castanea alnifolia* var. *pubescens* Nutt.; *Castanea ashei* (Sudw.) Sudw.; *Castanea ashei* (Sudw.) Sudw. ex Ashe; *Castanea chincapin* K. Koch; *Castanea floridana* (Sargent) Ashe; *Castanea floridana* var. *angustifolia* (Ashe) Ashe; *Castanea floridana* var. *arcuata* (Ashe) Ashe; *Castanea floridana* var. *margaretta* (Ashe) Ashe; *Castanea margaretta* (Ashe) Ashe; *Castanea margaretta* var. *angustifolia* Ashe; *Castanea margaretta* var. *arcuata* Ashe; *Castanea nana* Muhl.; *Castanea paucispina* Ashe; *Castanea pumila* subsp. *ashei* (Sudw.) DC.; *Castanea pumila* var. *pumila*; *Fagus nana* Du Roi ex Steud.; *Fagus pumila* L.; *Fagus pumila* var. *serotina* Walter)

North America. Perennial tree or shrub

See *Species Plantarum* 998. 1753, *Gard. Dict.*, ed. 8. *Castanea* no. 2. 1768 and *Bull. Torrey Bot. Club* 49: 265–267. 1922, *Bull. Torrey Bot. Club* 50: 359. 1923, *J. Elisha Mitchell Sci. Soc.* 40: 46. 1924, *Quart. Charleston Mus.* 1: 30. 1925, *J. Elisha Mitchell Sci. Soc.* 41: 268. 1926, *Kalmia* 12: 19. 1982

(Roots decoction taken for stomach troubles. Leaves used to relieve headaches and as a wash for chills and cold sweats; preparations from unspecified parts of the plants were used to treat fever blisters.)

in North America: Allegheny chinkapin, Allegheny chinquapin, chinkapin, chinquapin, dwarf chestnut

Castanea sativa Mill. (*Fagus castanea* L.; *Castanea castanea* (L.) H. Karst., nom. inval.; *Castanea prolifera* (K. Koch) Hickel; *Castanea sativa* Skan, nom. illeg.; *Castanea sativa* f. *discolor* Vuk.; *Castanea sativa* var. *hamulata* A. Camus; *Castanea sativa* var. *microcarpa* Lavialle; *Castanea sativa* var. *prolifera* K. Koch; *Castanea sativa* var. *spicata* Husn.; *Castanea vesca* Gaertn.; *Castanea vulgaris* Lam., nom. superfl.; *Fagus procera* Salisb., nom. illeg.)

Iran. Edible fruits, cattle and goats feed on the fruit

See *The Gardeners Dictionary*: ... eighth edition no. 1. 1768, *Prodr. Stirp. Chap. Allerton*: 391. 1796, *Dendrologie* 2(2): 21. 1873, *Journal of the Linnean Society, Botany* 26(178): 525. 1899 and *Verh. Zool.-Bot. Ges. Wien* 133: 301–318. 1996

(Used in Sidha. Bark useful in dislocated joints. Catkins infusion antiinflammatory, astringent, tonic, expectorant, in the treatment of vascular disorders. Seeds oil applied in rheumatism. Veterinary medicine, fruits and seeds medicinal for horses; fruits given to horses in colic.)

in English: common chestnut, congo stick, Eurasian chestnut, european chestnut, Spanish chestnut, sweet chestnut

in China: chui li, li, pan li, shan li

in India: kaskottai, mitha khanor, poo, soh oh keh

Castanola Llanos Connaraceae

See *Species Plantarum* 2: 675. 1753, *Linnaea* 23: 437–438. 1850, *Memorias, Real Academia de Ciencias Exactas, Físicas y Naturales de Madrid* 2: 503. 1859.

Castanola paradoxa (Gilg) Schellenb. ex Hutch. & Dalziel (*Agelaea brevipaniculata* Cummins; *Agelaea fragrans* Gilg; *Agelaea paradoxa* Gilg; *Castanola paradoxa* G. Schellenb.)

Tropical Africa. Shrub, lianescent, woody vine, fragrant flowers, yellow-orange aril at the base of the seeds

See *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(3): 65, f. 35. 1888, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 209. 1896, *Bulletin of Miscellaneous Information Kew* 1898: 73. 1898 and *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1: 516. 1928

(Stem and leaves for mouth infections. Leaves laxative, tonic.)

in Zaire: anamjenje

Castanopsis (D. Don) Spach Fagaceae

Resembling the genus *Castanea* Miller, see *The Gardeners Dictionary* ... Abridged ... fourth edition 1: 1754, *Prodromus Florae Nepalensis* 56. 1825, *Histoire Naturelle des Végétaux* 11: 142, 185. 1841 and *Journal of Japanese Botany* 5(5): 19, 23. 1928, *Acta Botanica Taiwanica* 1: 1. 1947.

Castanopsis indica (Roxb. ex Lindl.) A. DC. (*Castanea indica* Roxburgh ex Lindl.; *Castanea indica* Roxb., nom. illeg.; *Castanopsis indica* A. DC.; *Castanopsis macrostachya* Hu; *Castanopsis sinensis* A. Chev., nom. illeg.; *Castanopsis subacuminata* Hayata; *Quercus acutissima* subsp. *roxburghii* (Endl.) A. Camus; *Quercus acutissima* var. *roxburghii* (Endl.) Schottky; *Quercus dubia* Lindl. ex Wall., nom. inval.; *Quercus dubia* Lindl.; *Quercus dubia* L., nom. inval.; *Quercus indica* Drake; *Quercus indica* (Roxburgh ex Lindl.) Drake; *Quercus*

prinodes Voigt; *Quercus prinoides* Willd.; *Quercus prinoides* Raf.; *Quercus roxburghii* Endl.; *Quercus serrata* Roxb., nom. illeg.; *Quercus serrata* Thunb.; *Quercus serrata* Murray; *Quercus serrata* var. *roxburghii* (Endl.) A. DC.)

Nepal, India, Himalaya, China. Tree, greyish-yellow wood, ovate-oblong leaves, ripe involucre densely covered with spines, ovoid nuts, kernels eaten fresh or fried

See *Species Plantarum* 2: 994–997. 1753, *Pl. Surin.* 15. 1775, *Syst. Veg.*, ed. 14 (J.A. Murray). 858. 1784, *Fl. Jap.* (Thunberg) 176. 1784, *Sp. Pl.*, ed. 4 [Willdenow] 4(1): 440. 1805, *Hort. Bengal.* 68. 1814, *Plantae Asiaticae Rariores* 2: 5. 1830, *Numer. List* [Wallich] n. 2786. 1830, *Fl. Ind.* ed. 1832, 3: 541, 641, 643. 1832, *Gen. Pl.* [Endlicher] Suppl. iv. II. 28. 1848, *Journal of Botany, British and Foreign* 1: 182. 1863, *Journal de Botanique* (Morot) 4(8): 153. 1890 and *Bot. Jahrb. Syst.* 47: 639. 1912, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam.* 3: 189–190. 1913, *Bulletin Economique (de l'Indochine)* 20: 875. 1918, *Acta Phytotaxonomica Sinica* 1(1): 105. 1951, *Taxon* 29(5–6): 604. 1980

(Plant resin to treat diarrhea. Bark and kernels pounded and mixed with water and the filtrate given in dysentery. Pounded mixture of kernels of *Castanopsis indica* with flower of *Dillenia indica* and flowers of *Musa balbisiana* given in blood dysentery. To eat large quantities of kernels can cause constipation. Magic, ceremonial, a piece of stem tied on the wrist of babies to protect from evil spirits; plant regarded as sacred, flowering twigs used in ceremonies of worship.)

in Bhutan: sokey

in China: yin du zhui

in India: chhakkhu-khokrak, dalne katus, dhalne-katus, phang-rang-araung, phaung-araung, sohstap

in Nepal: aule katus, berkap, dalne katus, dhalay katus, kya-kar polo

Castanopsis javanica (Blume) A. DC. (*Castanea javanica* (Blume) Blume; *Fagus javanica* Blume; *Quercus javanica* (Blume) Drake)

Malay Peninsula.

See *Flora* 7: 295. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 525. 1826, *Journal of Botany, British and Foreign* 1: 182. 1863, *Journal de Botanique* (Morot) 4: 153. 1890

(Seeds aperient.)

Malayan name: berangan gajah

Castanopsis purpurella (Miq.) N.P. Balakr. (*Castanea purpurella* Miq.)

India.

See *Flora van Nederlandsch Indie*, Eerste Bijvoegsel 352. 1861 and *Bulletin of Miscellaneous Information Kew* 1938:

105. 1938, Balakrishnan, N. P. (1935–), *Flora of Jowai and vicinity, Meghalaya: A Contribution towards a Detailed Knowledge of the Flora of the Northeastern Region of India* 2: 458. Howrath, 1981–1983

(Leaves decoction given in bronchitis and cough. Seeds eaten for potency.)

in India: chhakhu

Castanopsis tribuloides (Sm.) A. DC. (*Balanoplis tribuloides* (Sm.) Raf.; *Balanoplis tribuloides* Raf.; *Castanea microcarpa* Lindl. ex Wall., nom. inval.; *Castanea tribuloides* Wall.; *Castanea tribuloides* (Sm.) Lindl.; *Castanea tribuloides* Lindl.; *Castanopsis tribuloides* A. DC.; *Quercus acuta* Thunb.; *Quercus acuta* Raf.; *Quercus acuta* Siebold ex Blume; *Quercus acuta* Buch.-Ham. ex Wall., nom. inval.; *Quercus armata* Roxb.; *Quercus armata* D. Don; *Quercus caudata* Lindl.; *Quercus caudata* Lindl. ex Wall., nom. inval.; *Quercus loureiroi* Hance; *Quercus tribuloides* Sm.)

India. Tree, variable leaves, acorn covered with sharp spines, fruit densely spiny

See *Fl. Jap.* (Thunberg) 175. 1784, *Syst. Veg.*, ed. 14 (J.A. Murray). 858. 1784, *Hort. Bengal.* 104. 1814, *The Cyclopaedia*; or, universal dictionary of arts, ... [Rees] 29: n. 13. 1819, *Prodr. Fl. Nepal.* 56. 1825, *Plantae Asiaticae Rariores* 6: 102. 1830, *Numer. List* [Wallich] n. 2765 B, 2787, 3735. 1831, *Mus. Bot.* 1(19): 290. 1851 [Nov 1850 publ. early 1851], *J. Bot.* 1: 182. 1863, *Alsographia Americana* 29. 1838, *Journal of Botany, British and Foreign* 1(6): 182. 1863, *J. Linn. Soc., Bot.* 10: 201. 1868 [1869 publ. 1868]

(Dried stem peels decoction for cough, indigestion and goiter; cut stem juice used in mouth infection and tongue troubles.)

in Bhutan: sokey

in China: ni li zhui

in India: bol phalak, dieng sninglong, dieng sohot, haraiching, phul hingori, ricoh, thingsia

in Nepal: musre katus, musure katus, patle katus

Castanospermum A. Cunn. ex Hook. Fabaceae (Sophoreae)

Greek *kastanon*, *kastana* and *sperma* 'seed', referring to the shape of the seed; in *Hooker's Botanical Miscellany*. 1: 241. 1830, related to *Angylocalyx* and *Xanthocercis*.

Castanospermum australe A. Cunn. & C. Fraser (*Castanospermum australe* A. Cunn. ex Mudie)

Australia, Queensland. Perennial non-climbing tree, evergreen, finely fissured grey bark, dense rounded canopy, strong extensive root system, large glossy compound leaves, orange-red flowers in short sprays from older woody branches, thick hard cylindrical pods, nectar produced by the flowers attracts birds, bats and butterflies

Castanospermum A. Cunn. ex Hook. Fabaceae (Sophoreae)

See *Botanical Miscellany* 1: 241, pl. 51. 1830 and *Phytochemistry* 31(8): 2805–2807. 1992, *J. Nat. Prod.* 61(3): 397–400. 1998

(Toxins, leaves and seeds may be toxic to livestock and humans. Pods astringent. Seeds have been shown to have anti-HIV, antihyperglycemic, anticancer properties. Insecticide, analgesic.)

in English: Australian chestnut, bean tree, black bean, black bean tree, Moreton Bay chestnut

Castilleja Mutis ex L.f. Orobanchaceae (Scrophulariaceae)

Named for the Spanish botanist Domingo Castillejo, see *Species Plantarum* 602. 1753, *Supplementum Plantarum* 47–48, 293. 1782 [1781 publ. Apr 1782], *The Genera of North American Plants* 2: 54–58. 1818, *Linnaea* 8(Litt.-Ber.): 5. 1833, *Bulletin of the California Academy of Sciences* 1(4A): 182. 1886[1885] and *Fl. Rocky Mts.* 788. 1917, *Contributions from the Dudley Herbarium* 1: 175. 1933, *Ill. Fl. Pacific States* 3: 821. 1951, *Brittonia* 22: 20–21. 1970, *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *Syst. Bot.* 16(4): 644–666. 1991, *Novon* 2(3): 185–189. 1992, *Ann. Missouri Bot. Gard.* 80: 974–986. 1993, *Phytologia* 76: 409. 1994, *Fieldiana, Bot.*, n.s. 41: 1–69. 2000, *Bol. Soc. Bot. México* 69: 101–121. 2001, *Phytologia* 90(1): 63–82. 2008, *Syst. Bot.* 34(1): 182–197. 2009.

Castilleja affinis Hook. & Arn. (*Castilleja affinis* Hook. & Arn. subsp. *insularis* (Eastw.) Munz; *Castilleja affinis* Hook. & Arn. var. *contentiosa* (J.F. Macbr.) Bacig.; *Castilleja californica* Abrams; *Castilleja douglasii* Benth.; *Castilleja douglasii* Benth. subsp. *insularis* (Eastw.) Pennell; *Castilleja inflata* Pennell; *Castilleja wightii* Elmer; *Castilleja wightii* Elmer subsp. *anacapensis* (Dunkle) Pennell; *Castilleja wightii* Elmer subsp. *inflata* (Pennell) Munz; *Castilleja wightii* Elmer subsp. *rubra* Pennell)

North America. Perennial

See *The Botany of Captain Beechey's Voyage* 154. 1833 and *Bol. Soc. Bot. México* 69: 101–121. 2001

(Disinfectant, applied to infected sores.)

in English: coast Indian paintbrush, Indian paintbrush

Castilleja angustifolia (Nutt.) G. Don (*Castilleja angustifolia* A. Gray, nom. illeg.; *Castilleja angustifolia* (Nutt.) G. Don var. *bradburii* (Nutt.) Fernald; *Euchroma angustifolia* Nutt.)

North America. Perennial

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 46. 1834, *A General History of the Dichlamydeous Plants* 4: 616. 1838, *Report on the United States and Mexican Boundary Survey*, ... 2(1): 118. 1858

(Whole plant infusion taken for stomach troubles, to regulate menstruation and as an abortifacient.)

in English: desert Indian paintbrush, Northwestern Indian paintbrush

Castilleja applegatei Fernald subsp. ***martinii*** (Abrams) T.I. Chuang & Heckard (*Castilleja clokeyi* Pennell; *Castilleja gyroloba* Pennell; *Castilleja martinii* Abrams; *Castilleja martinii* Abrams var. *clokeyi* (Pennell) N.H. Holmgren; *Castilleja roseana* Eastw.)

North America. Perennial

See *Erythea* 6(5): 49–50. 1898 and *Bull. S. Calif. Acad. Sci.* 1(6): 69. 1902, *Novon* 2(3): 186. 1992

in English: wavyleaf Indian paintbrush

Castilleja coccinea (L.) Spreng. (*Bartsia coccinea* L.; *Castilleja coccinea* Spreng.; *Castilleja coccinea* Douglas; *Castilleja ludoviciana* Pennell; *Euchroma coccinea* (L.) Nutt.)

North America. Annual

See *Species Plantarum* 602. 1753, *Systema Vegetabilium*, editio decima sexta 2: 775. 1825, *Botanical Register*; consisting of coloured ... 14: t. 1136. 1828

(Poisonous infusion. Flower infusion taken for colds. Love charm.)

in English: bloody warrior, election posies, Indian paintbrush, painted-cup, scarlet Indian paintbrush, scarlet paintbrush, wickaawee

Castilleja densiflora (Benth.) T.I. Chuang & Heckard (*Orthocarpus densiflorus* Benth.; *Orthocarpus densiflorus* Benth. var. *noctuinus* (Eastw.) J.T. Howell; *Orthocarpus noctuinus* Eastw.)

North America. Annual

See *Scrophularineae Indicae* 13. 1835 and *Bulletin of the Torrey Botanical Club* 32(4): 211. 1905, *Leaflets of Western Botany* 5(6): 107. 1948, *Systematic Botany* 16(4): 656. 1991

(Ceremonial, the flowers.)

in English: denseflower Indian paintbrush

Castilleja exserta (A. Heller) T.I. Chuang & Heckard (*Castilleja exserta* Eastw. & C.F. Baker, nom. nud.; *Orthocarpus exsertus* A. Heller; *Orthocarpus purpurascens* Benth.; *Orthocarpus purpurascens* Benth. var. *pallidus* D.D. Keck; *Orthocarpus purpurascens* Benth. var. *palmeri* A. Gray)

North America. Annual

See *Scrophularineae Indicae* 13. 1835, *Synoptical Flora of North America* 2(1): 300. 1878 and *West American Plants* 3: 4. 1904, *Muhlenbergia*; a journal of botany 1(5): 109–110. 1904, *Proceedings of the California Academy of Sciences*, Series 4, 16(17): 544–545. 1927, *Systematic Botany* 16(4): 657. 1991

(Ceremonial, the flowers.)

in English: exserted Indian paintbrush

Castilleja hispida Benth. (*Castilleja angustifolia* subsp. *hispida* (Benth.) Piper & Beattie; *Castilleja angustifolia* (Nutt.) G. Don var. *hispida* (Benth.) Fernald; *Castilleja hispida* Benth. subsp. *abbreviata* (Fernald) Pennell)

North America. Perennial

See *Flora Boreali-Americana* 2: 105. 1838, *Erythea* 6(5): 47. 1898 and *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 29: 18–22. 1998

(For skin diseases.)

in English: harsh Indian paintbrush

Castilleja integra A. Gray (*Castilleja elongata* Pennell)

North America. Perennial

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 119. 1859

(Leaves for burns, easy labor, stomach troubles, blood purifier.)

in English: wholeleaf Indian paintbrush

Castilleja linariifolia Benth. (*Castilleja linariaefolia* Benth.; *Castilleja linariifolia* Benth. var. *omnipubescens* (Pennell) Clokey; *Castilleja linearis* Rydb.; *Castilleja trainii* Edwin)

North America. Perennial

See *Prodr.* (DC.) 10: 532. 1846 and *Proc. Acad. Nat. Sci. Philadelphia* 89: 424. 1938, *Madroño* 8: 61. 1945

(Plant or root decoction used as a contraceptive, blood purifier, physic, emetic, analgesic, for venereal diseases, excessive menstrual discharge, menstrual difficulties, stomachaches. Ceremonial.)

in English: Wyoming Indian paintbrush

Castilleja lineata Greene

North America. Perennial

See *Pittonia* 4(22C): 151. 1900

(Crushed dried leaves infusion drunk for stomachaches.)

in English: marshmeadow Indian paintbrush

Castilleja miniata Douglas ex Hook. (*Castilleja confusa* Greene; *Castilleja gracillima* Rydb.; *Castilleja inconstans* Standl.; *Castilleja oblongifolia* A. Gray; *Castilleja pallida* Kunth; *Castilleja pallida* (L.) Spreng. var. *miniata* (Douglas ex Hook.) A. Gray; *Castilleja uliginosa* Eastw.)

North America. Perennial

See *Sp. Pl.* 2: 602. 1753, *Syn. Pl.* (Kunth) 2: 100. 1823, *Syst. Veg.* (ed. 16) [Sprengel] 2: 774. 1825, *Flora Boreali-Americana* 2: 106. 1838, *American Journal of Science, and Arts* II, 34: 337. 1862 and *Taxon* 58(3): 978. 2009

(Whole plant decoction diuretic, cathartic, purgative, for sore eyes, kidney trouble, lame back, for bleeding stiff lungs. Seeds decoction for coughs. Magic, protection, witchcraft medicine.)

in English: giant red Indian paintbrush, scarlet Indian paintbrush

Castilleja minor A. Gray (*Castilleja exilis* A. Nelson; *Castilleja minor* (A. Gray) A. Gray)

North America. Perennial or annual

See *Bot. California* [W.H. Brewer] i. 573. 1876

(Diuretic, cathartic, purgative.)

in English: lesser Indian paintbrush

Castilleja minor A. Gray var. *spiralis* (Jeps.) J.M. Egger (*Castilleja minor* subsp. *spiralis* (Jeps.) T.I. Chuang & Heckard; *Castilleja spiralis* Jeps.; *Castilleja stenantha* A. Gray; *Castilleja stenantha* subsp. *spiralis* (Jeps.) Munz)

North America. Annual

See *Bot. California* [W.H. Brewer] i. 573. 1876 and *A Flora of Western Middle California* 412. 1901, *Aliso* 4(1): 98. 1958, *Phytologia* 90(1): 74. 2008

(Decoction of leaves used as a wash for sores.)

in English: lesser Indian paintbrush

Castilleja parviflora Bong. (*Castilleja peirsonii* Eastw.)

North America. Perennial

See *Mémoires de l'Académie Impériale des Sciences de St.-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(2): 158. 1832

(Roots antihemorrhagic, used for bowel troubles, vaginal bleeding.)

in English: mountain Indian paintbrush, smallflower Indian paintbrush

Castilleja thompsonii Pennell (*Castilleja villicaulis* Pennell & Ownbey)

North America. Perennial

See *Proceedings of the American Academy of Arts and Sciences* 99(7): 178–179. 1947

(Antiseptic, for open cuts, wounds.)

in English: Thompson's Indian paintbrush

Casuarina L. Casuarinaceae

From the Malay *kasuari*, common name for the Australian bird *Casuarinus*, the cassowary, in allusion to the long feathers of the bird and the drooping branches and twigs of the plant; see C. Linnaeus, *Amoenitates academicae*. 4: 123,

143. 1759, *A Voyage to Terra Australis* 2: 571. 1814, Lindley, John (1799–1865), *Nixus Plantarum* 167. Londini, 1833, *Allgemeine Gartenzeitung* 9: 163. 1841, Lehmann, Johann Georg Christian (1792–1860), *Plantae Preissianae sive Enumeratio plantarum quas in Australasia occidentali et meridionali-occidentali annis 1838–1841 / collegit Ludovicus Preiss. Partim ab aliis partim a se ipso determinatas descriptas illustratas edidit Christianus Lehmann. Hamburgi, 1844–47* and *Fieldiana, Bot.* 24(3): 227–228. 1952, *Flora of Australia* 3: 191, 194. 1989, *Novon* 9(4): 549. 1999, *Monogr. Syst. Bot. Missouri Bot. Gard.* 1: 592–593. 2001.

Casuarina equisetifolia L. (*Casuarina equisetifolia* J.R. & G. Forster; *Casuarina equisetifolia* L. ex J.R. & G. Forster; *Casuarina equisetifolia* Blanco; *Casuarina litorea* L.; *Casuarina litorea* L. ex Fosberg & Sachet, nom. illeg.; *Casuarina littorea* L.; *Casuarina littorea* Oken)

East Africa. Coastal tree, fast growing, thin branches, leaves minute scales, terminal inflorescences, male flowers in spikes, heads of female flowers with red stigmas, dense clusters of prickly fruit cone-like, winged wind-dispersed seeds, timber, bark contains tannin, roots nodules contain nitrogen-fixing bacteria, pollination by wind, a pioneer seashore tree

See *Herb. Amboin.* 3: t. 57. 1743, *Amoenitates academicae...* 4: 143. 1759, *Characteres Generum Plantarum* [second edition] 104, pl. 52. 1775, *Fl. Filip.* [F.M. Blanco] 661. 1837, *Allg. Naturgesch.* iii. (1) 354. 1841 and *Journ. Arn. Arb.* xxxi. 273. 1950, *Smithsonian Contributions to Botany* 24: 4. 1975, *Taxon* 29: 499–500. 1980, Chen Te-chao. *Casuarinaceae*. In: Tseng Yung-chien, ed., *Fl. Reipubl. Popularis Sin.* 20(1): 1–5. 1982, *Regnum Veg.* 127: 31. 1993

(Used in Sidha. Plant antifungal, molliscicidal, hypoglycemic, cytotoxic, antiviral. Leaves for dysentery, diarrhea, sprue, stomach disorders and toothache. Bark astringent, inner bark scraped and mixed with water to drink for dysentery and diarrhea; inner bark juice as a sedative; bark infusion orally for ulcers, constipation and stomachache. Roots to treat dysentery, diarrhea and stomachache; twigs decoction for treating swellings; powdered bark used for facial pimples.)

in English: Australian pine, beach she-oak, beefwood, bloodwood, bull oak, casuarina, coast she-oak, coast sheoak, coastal beefwood, common ironwood, horsetail tree, ironwood, mile tree, river she-oak, sheoak, sheoke, South Sea ironwood, swamp she oak, whistling pine

in East Africa: moinga, mvinje (Swahili)

in South Africa: bewerasieboom

in Hawaii: paina

in Burma (Myanmar): tin-yu

in Cambodia: snga:w

in China: mu ma huang

in India: cabaku, caboku, cabuku, catatari, catatarimaram, cattutai, cattutaivirutcam, cauku, cavokku, cavukku,

cavukkumaram, cavuku, chabuku, chavokku, chavuka, chavuku, chola, chowku, chulamaram, civacivamaram, civamaram, civavarci, cola, colaimaram, gali, jangli-jhau, jangli-saroo, janglisaru, jhaw, karcuramatitam, karcuramatitamaram, karrati, kasriike, kattati, kesariike, kettivanci, kettivancimaram, korata, panas, phiramgi-saro, sabako, sampirani, saravina, sarau, saravu, sarova, sarpuhala, sarugu, sarugudu, saruku, sarve, sarve mara, sarviku, savukku, savukku maram, savukkumaram, serva, sowku, sura, surgu, suru, tsavukumanu, uromacakkari, uromacakkaram, utirppakam, utirppakamaram

in Indonesia: cemara laut, eru

in Japan: tokiwa-gyoryû, moku-maô

in Laos: pè:k namz, sôn th'ale:

in Malaysia: aru, chemara laut, common ru, eru, kayu ru, ru, ru laut

in Okinawa: makumowo

in the Philippines: agoho, aro-o

in Thailand: son-thale

in Vietnam: c[aa]y phi lao

Catabrosa P. Beauv. Poaceae (Gramineae)

Greek *katabibrosko*, *katabibroskein* 'eat up, devour', *kato*, *kata* 'below, downward, down from' and *broskein*, *brosko*, *bibrosko* 'to eat, to devour', *katabrosis* 'eating up, devouring', used as fodder for cattle and goats or referring to the glumes, related to *Colpodium* Trin., containing HCN-glucoside, type *Catabrosa aquatica* (L.) P. Beauv., see *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 97. Paris 1812, *Fundamenta Agrostographiae* 119, t. 7. 1820, *Flora Orientalis* 5: 578. 1884 and *Darwiniana* 23(1): 179–188. 1981 [*Catabrosa* P. Beauv. y *Phippsia* R. Brown (Gramineae) en America del Sur.], R.R. Mill, "Eremopoa, Nephelochloa, Catabrosella, Colpodium, Hyalopoa, Catabrosa, Paracolpodium." in P.H. Davis (ed.), *Flora of Turkey and the East Aegean Islands* 9: 486–501. 1985, *American Journal of Botany* 81(1): 119–126. 1994, *Contributions from the United States National Herbarium* 48: 228–230. 2003.

Catabrosa aquatica (L.) P. Beauv. (*Aira aquatica* L.; *Catabrosa aquatica* subsp. *pseudairoides* (Herrm.) Tzvelev; *Catabrosa aquatica* var. *uniflora* S.F. Gray; *Catapodium aquaticum* Trin. ex Willk. & Lange; *Colpodium aquaticum* (L.) Trinius; *Diarrhena aquatica* (L.) Raspail; *Festuca airoides* (Koeler) Mutel, nom. illeg., non *Festuca airoides* Lam.; *Festuca albifolia* Reverd.; *Festuca lenensis* Drob. subsp. *albifolia* (Reverd.) Tzvelev; *Glyceria airoides* (Koeler) Reichb.; *Glyceria airoides* (Nutt.) Fries, nom. illeg., non *Glyceria*

airoides (Koeler) Reichb.; *Glyceria aquatica* (L.) J. Presl & C. Presl; *Glyceria catabrosa* Klett & Richt.; *Glyceria dulcis* (Salisb.) Holmb.; *Hydrochloa airoides* (Koeler) Hartm.; *Melica aquatica* (L.) Loisel.; *Molinia aquatica* (L.) Wibel; *Poa airoides* Koeler; *Poa aquatica* L.; *Poa dulcis* Salisb.; *Poa pseudairoides* Herrm.)

North temperate. Species variable, creeping, leaf sheaths open, open inflorescence very lax, panicle pyramidal or oblong, glumes unequal to nearly equal, lemmas truncate and erose at the apex, palatable, weed species, grows in moist meadows and along lakeshores or streambanks

See *Species Plantarum* 1: 64, 66–70, 73–76. 1753, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 20. 1796, *Primitiae Florae Werthemensis* 116. 1799, *Descriptio Graminum in Gallia et Germania* 194. 1802, *Prodromus Florae Novae Hollandiae* 179. 1810, *Mémoires de la Société Impériale des Naturalistes de Moscou* 3, t. 13. 1812, *Essai d'une Nouvelle Agrostographie* 97, 135, 142, 149, 157, 160, 162, 165, pl. 19. 1812, *Genera Graminum* 5. 1819, *Flora Cechica* 25. 1819, *A Natural Arrangement of British Plants* 2: 133. 1821, *Annales des Sciences Naturelles, Botanique* 5: 447. 1825, *Flora Gallica*, éd. 2, 1: 59. 1828, *Flora der Phanerogamischen Gewächse der Umgegend von Leipzig* 96. 1830, *Mémoires de l'Académie Impériale des Sciences de St.-Petersbourg. (Plant decoction taken as a stimulant, tonic. Ceremonial, magico-religious beliefs, medicine, burned as incense.)

in English: brookgrass, water hairgrass, water whorl grass, water whorlgrass, waterhair, whorlgrass

Catalpa Scop. Bignoniaceae

A North American Indian name, *catawba* or *kathulpa*; *Catawba* is the name of a tribe of North American Indians, along the Catawba River (the Wateree), South Carolina; *catawba* is also an American red grape and a dry white wine made from it; see *Familles des Plantes* 2: 199, 546. 1763, *Introductio ad Historiam Naturalem* 170. 1777, *Princ. Somiol.* 27. 1814 and *Journal of the New York Botanical Garden* 19: 8. 1918, *Nanjing Techn. Coll. Forest. Prod.* 1980(1): 123. 1980.

Catalpa ovata G. Don (*Bignonia catalpa* Thunberg; *Bignonia catalpa* L.; *Catalpa catalpa* (L.) H. Karst.; *Catalpa henryi* Dode; *Catalpa kaempferi* Siebold & Zuccarini)

China.

See *Species Plantarum* 2: 622. 1753, *A General History of the Dichlamydeous Plants* 4: 230. 1837, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 142. 1846 and *Bulletin de la Société Dendrologique de France* 1907: 199. 1907

(Fruits diuretic.)

in English: Chinese catalpa, Chinese catawba

in China: chio ch'iu, zi, zi bai pi

in Japan: ki-sasage

Catasetum Rich. ex Kunth Orchidaceae

Greek *kato*, *kata* 'below, downward' and Latin *seta* 'bristle', an allusion to the horned column or to the column appendages or to the antennas of the staminate flowers.

Catasetum fimbriatum (C. Morren) Lindl. (*Catasetum cogniauxii* L. Linden; *Catasetum fimbriatum* (E. Morren) Lindl. & Paxton; *Catasetum fimbriatum* subsp. *fissum* Rchb. f.; *Catasetum fimbriatum* var. *aurantiacum* Porsch; *Catasetum fimbriatum* var. *brevipetalum* Porsch; *Catasetum fimbriatum* var. *fissum* Rchb.f.; *Catasetum fimbriatum* var. *inconstans* (Hoehne) Mansf.; *Catasetum fimbriatum* var. *micranthum* Porsch; *Catasetum fimbriatum* var. *morrenianum* Mansf.; *Catasetum fimbriatum* var. *ornithorrhynchum* (Porsch) Mansf.; *Catasetum fimbriatum* var. *platypterum* Rchb.f.; *Catasetum fimbriatum* var. *subtropicale* Hauman; *Catasetum fimbriatum* var. *viridulum* Rchb.f.; *Catasetum inconstans* Hoehne; *Catasetum ornithorrhynchus* Porsch; *Catasetum pflanzii* Schltr.; *Catasetum wredeanum* Schltr.; *Myanthus fimbriatus* E. Morren)

S. Trop. America.

See *Synopsis Plantarum* 1: 330–331. 1822, *Edwards's Botanical Register* 18: sub t. 1538. 1832, *Annales de la Société Royale d'Agriculture et de Botanique de Gand: Journal d'Horticulture et des Sciences Accessoires* 4: 453, t. 231. 1848, *Paxton's Fl. Kl.* 79: 127. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 11: 45. 1912, *Comissão de Linhas Telegraficas, Botanica* 5: 57. 1915, *Orchis. Monatschrift der Deutschen Gesellschaft für Orchideenkunde* 9: 14. 1915, *Anales Mus. Nac. Hist. Nat. Buenos Aires* 29: 379. 1917, *Repert. Spec. Nov. Regni Veg.* 31: 108–109. 1932, *Icon. Pl. Trop. Fasc.* 6: 501–600. 1982

(A sterilizer, the pseudobulb is boiled in water with the rhizome of *Typha latifolia*.)

Catha Forssk. ex Schreber Celastraceae

From the Arabian name *qat* or *khat*; see *Fl. Aegypt. Arab.* 63. 1775, *Introductio ad Historiam Naturalem* 228. 1777, Johann Christian Daniel von Schreber, *Genera Plantarum*. 147. 1789 and *The East African Agricultural Journal* 13: 98–102. 1947.

Catha edulis (Vahl) Endlicher (*Catha edulis* Forssk. ex Endl., nom. illeg.; *Catha edulis* Forssk.; *Catha edulis* (Vahl) Forssk. ex Endl.; *Catha forskalii* A. Rich. nom. illegit.; *Catha inermis* J.F. Gmelin, nom. illegit.; *Celastrus edulis* Vahl; *Celastrus edulis* (Forssk.) Vahl; *Dillonia abyssinica* Sacleux; *Methyscophyllum glaucum* Eckl. & Zeyh.; *Trigonotheca serrata* Hochst.)

Arabia, East Africa to the Cape. Shrub or tree, highly polymorphic, small white cream flowers in stalked clusters in axillary cymes, fruit splitting into 3 valves, seeds reddish brown with a small brown papery wing at the base, leaves aromatic and astringent, savanna, riverine forests, *Combretum* wooded grassland, in moist montane forests, *Olea* and *Juniperus* forests, evergreen forests

See *Species Plantarum* 1: 196–197. 1753, *Flora Aegyptiaco-Arabica* 63. 1775, *Symbolae Botanicae, ...* 1: 21. 1790, *A Voyage to Terra Australis* 2: 554. 1814, *Enchiridion Botanicum* 575. 1841 and *Fitoterapia* 4: 291–300. 1991

(A narcotic drug. Khat is primarily used as a masticatory. Khat chewing causes gastrointestinal disturbances, chronic elevation of the blood pressure and cardiac arrhythmias; excess use of khat may induce symptoms of hallucination, intoxication or poisoning and, in extreme cases, insanity; khat corrosive to the mouth wall. Leaves stimulant, antidepressant. Roots and bark boiled in tea or soup as a remedy for gonorrhoea. Bark stimulant. Ritual, ceremonial, an important plant during wedding ceremonies.)

in English: Abyssinia kat, Abyssinian tea, African salad, African tea, Arabian tea, Boesmans tea, Bushman's tea, Chirinda redwood, flower of paradise, four of paradise, khat, Somali tea

in Arabic: khat

African names: m'mke, mandama, mfeike, msuruti, msuvuti, mulungi, mutsawhare, muzaramashawa, taksin

in Eastern Africa: kitandwe, liss, lutandwe, mamiraa, meongi, miraa, miungi, msuruti, muandama, muirungu, muraa, murungu, mutabungwa, mwandama, ngongo, olmeraa, omunyaga, tumayot, tumeyondet

in Ethiopia: cat (Amharinya, Guragenya and Tigrinya); cata (Kembatinya); cati, gofa, jima' (Orominya); catiyya (Welaytinya)

in Kenya: cati, chat, chati, emairugi, kat, khat, mailungi, mairungi, mamiraa, miirungi, miraa, miungi, muirungi, muraa, olmeraa, qat, tomoiyot, tumayot

in Southern Africa: boesmanstee; umHlwazi, umHlawazi (Zulu); iGqwaka (Xhosa); lwani, luthadzi (Venda); muT-sawhare, muTsawhari, muZaramashawa (Shona)

in Tanzania: mira, miraa, mlonge, muhulo, murungu

Catharanthus G. Don f. Apocynaceae

Greek *katharos* 'pure' and *anthos* 'flower'; see G. Don (1798–1856), *A general history of the dichlamydeous plants* 4: 71, 94–95. 1831–1838, *Genera Plantarum* 583. 1838 and *Flora of the Southeastern United States* 935. 1903, Plaizier, A.C. "A revision of *Catharanthus roseus* (L.) G. Don (Apocynaceae)." *Mededelingen Landbouwhogeschool* 81(9): 1–12. 1981, *Wageningen Agric. Univ. Pap.* 96(3): 9–46. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Darwiniana* 47(1): 140–184. 2009.

Catharanthus pusillus (Murray) G. Don (*Catharanthus pusillus* G. Don; *Lochnera pusilla* (Murray) K. Schum.; *Lochnera pusilla* K. Schum.; *Vinca parviflora* Retz.; *Vinca pusilla* Murray) (genus *Lochnera* dedicated to the German botanist Michael Friedrich Lochner (Lochnerus) von Hummelstein, 1662–1720, physician, his writings include *Heptas Dissertationum variarum ad historiam naturalem ... illustrandam conscriptarum*. [Nuremberg? 1720? 1712–1716], *De Acriviola ejusque novis speciebus flore pleno et Peruviana foliis quinquefidis brevis commentatio*. [Nuremberg? 1715?], *Resp. De Nymphomania*, etc. Altdorffii [1684], *Festum Tithenidiorum Dianae Corythalliae a metricibus Spartanis celebratum*, commentario ... dilucidatum, etc. [Nuremberg 1717], *Disquisitio ad locum Plutarchi* etc. [Nuremberg? 1719?], *Mungos animalculum et radix descripta*. Noribergae 1715 and *Memoria Fehriana*. [A panegyric on J.M. Fehr.] [Nuremberg?] 1695.)

Indian Subcontinent. Small herb, white axillary solitary or paired sessile flowers, black seeds

See *Species Plantarum* 1: 209. 1753, *Novi Commentarii Societatis Regiae Scientiarum Göttingensis* 3(1772): 66, t. 2. 1773, *Observationes Botanicae* (Retzius) 2: 14. 1781, *Gen. Hist.* 4: 95. 1836, *Nat. Pflanzenfam.* [Engler & Prantl] iv. 2 (1895) 145. 1895

(Used in Sidha. Whole plant toxic, reported to cause cattle poisoning, causing temporary blindness or madness, with rashes all over the body. Latex and seeds poisonous. Leaves extract against fever. For lumbago, a decoction of the dried plant boiled in oil is rubbed on the loins.)

in India: barmasi, bhuinim, bili kaasi kanigalu, billa gan-neru, chetthai, cupa-vela, erri mirapa, gaddipoolu, gulvidi, kanupoolaku, kapavila, milagaipoondu, milakayc cakkalatti, mukuthipoo, nani (jangli) barmasi, paalaich, ran-kel, suk-banda, sukka bommi, tiloni, yerri mirapa

Catharanthus roseus (L.) G. Don (*Ammocallis rosea* (L.) Small; *Catharanthus roseus* var. *albus* G. Don; *Catharanthus roseus* var. *angustus* Bakh. f.; *Catharanthus roseus* var. *nanus* Markgr.; *Hottonia littoralis* Lour.; *Lachnea rosea* (L.) Rchb.; *Lochnera rosea* (L.) Rchb. ex Endl.; *Lochnera rosea* (L.) Rchb. ex K. Schum., nom. illeg., non *Lochnera rosea* (L.) Rchb. ex Endl.; *Lochnera rosea* var. *alba* (G. Don) Hubbard; *Lochnera rosea* var. *angusta* Steenis; *Lochnera rosea* var. *flava* Tsiang; *Pervinca rosea* (L.) Moench; *Pervinca rosea* (L.) Gaterau; *Vinca guilelmi-waldemarii* Klotzsch; *Vinca rosea* L.; *Vinca rosea* var. *alba* (G. Don) Sweet; *Vinca speciosa* Salisb., nom. superfl.)

Madagascar. Small shrub or undershrub, perennial, profusely branched, milky latex, leaves opposite, flowers in upper leaf axils, fruits follicular, tiny seeds

See *Species Plantarum* 1: 145–146, 209. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Systema Naturae*, Editio Decima 2: 944. 1759, *Species Plantarum*, Editio Secunda 514. 1762, *Flora Cochinchinensis* 105. 1790, *Methodus Plantas Horti Botanici ...* 463. 1794, *Prodr. Stirp. Chap. Allerton* 147. 1796, *Consp. Regn. Clinical Toxicol.* 42(5): 667–671. 2004, *Ethnobotany* 16: 139–140. 2004, *Darwiniana* 43(1–4): 90–191. 2005, *Scripta Botanica Belgica* 35: 1–438. 2006, Leveque, D., Jehl, F. "Molecular pharmacokinetics of *Catharanthus* (vinca) alkaloids." *J. Clin. Pharmacol.* 47(5): 579–588. 2007

(Used in Ayurveda. Source of the alkaloids vincristine and vinblastine, used in cancer chemotherapy. Milky juice poisonous, acrid, purgative, highly toxic, hallucinogen, irritant. Decoction of all parts used in the treatment of malaria, skin diseases, Hodgkin's disease, diarrhea, hypertension, menopause and diabetes. Leaves, stem and roots laxative, antidiabetic, antiinflammatory, for rheumatism, maniac syndrome, diabetes; leaves decoction taken for high blood pressure; leaf paste applied on boils and blisters. Root infusion abortifacient and emmenagogue; roots for toothache. Latex applied

on scabies, wasp sting and any insect sting; in blood dysentery a drop of milky juice in a cup of water; a drop of latex to women as galactagogue; leaf juice as eye drop in conjunctivitis. Leaves eaten for stomachache and diarrhea. Ritual, flowers used for religious worships, offered to God.)

in English: all day flower, Cape periwinkle, Cayenne jasmine, Madagascan periwinkle, Madagascar periwinkle, never done, old maid, periwinkle, pink periwinkle, ram goat, red periwinkle, rose periwinkle, rosy-flowered Indian periwinkle, vinca

in Madagascar: arivotambelona, befala, felabaratra, felatananamba, heladolo, rivotambelona, salotra, tonga, tongatse, tsimatirinina, tsingevika, vonenina

in Rodrigues Isl.: chaponière blanc, chaponière rouge, pervenche sauvage

in Sierra Leone: flawah

in South Africa: begraafplaasblom, maandrosie, soldatenblom

in China: chang chun hua

in India: banappuvu, barmasi, baro-masiya, batla hoo, bili kaasi kanigalu, billa ganneru, billaganneru, boa, brindabani phool, chirabasanta, ganeshana hoo, kempu kaayi kanagilu, kempu kaasi kanigalu, khumbairagi, kum tluang, kumtluang, nayantara, nayantora, nithyakalyani, nityakalyani, paldairu chedy, pimancho, sada bahar, sada mallige, sada sawagan, sada suhagni, sadaa mallige, sadabahar, sadampuspa, sada-phool, sadaphuli, sadapushpi, savanari, shadaphul, simjengaba, sudukattu mallikai, thuruku mallige, usamalari

in Indonesia: bunga sedodu, bunga tembaga, kembang bogor, kembang suri cina, kembang tembaga, tapok doru

in Japan: nichinichi-sô

Malay names: rumput jalang, tahi anjing, tahi ayam

in Nepal: sadabahar

in Papua New Guinea: falava, falawa, palwa theresia, pua na purpur

in the Philippines: amnias, atai-bia, atay-bia, chichirica, chichiricha, kumintang, laurel, rosas-sa-baibai, San Pedro, San Vicente, sanda, sirsirika, tsitsirika

in Vietnam: bong dua, hoa hai dang, phac pot dong

in Hawaii: kihapai

in Tonga: lolie, valeti

in Dominica: kaka poul

in Guatemala: chatilla

Catoferia (Benth.) Benth. Lamiaceae (Labiatae)

Greek *kato*, *kata* 'below, downward' and Latin *fero* 'to bear', see *Edwards's Botanical Register* 15: t. 1300. 1830,

Prodromus Systematis Naturalis Regni Vegetabilis (DC.) 12: 53. 1848, *Genera Plantarum* [Bentham & Hooker f.] 2(2): 1163, 1173–1174. 1876, *Biologia Centrali-Americana; ... Botany ...* 2(13): 541. 1882, *Nat. Pflanzenfam.* [Engler & Prantl] 4, Abt. 3a: 374. 1897 and *Repert. Spec. Nov. Regni Veg. Beih.* 85: 320. 1937.

Catoferia capitata (Benth.) Hemsl. (*Orthosiphon capitatus* Benth.)

Mexico. Herbaceous shrub, fresh leaves strongly smelling, white-purple flowers

See *Labiata. Gen. Spec.* 29. 1832, *Biol. Cent.-Amer., Bot.* 2: 541. 1882

(Aromatic leaves infusion drunk to relieve backache.)

in English: cats' whisker herb

in Indonesia: udu bulu pak nyao

Catostemma Benth. Bombacaceae (Malvaceae)

From the Greek *kato*, *kata* 'below, downward' and *stemma* 'wreath, garland, chaplet, crown', see *London Journal of Botany* 2: 365. 1843 and *Bull. Mus. Natl. Hist. Nat.* (Paris) 25: 387. 1919.

Catostemma fragrans Benth. (*Catostemma macrosperma* (Sagot ex Benoist) Lemée; *Guenetia macrosperma* Sagot; *Guenetia macrosperma* Sagot ex Benoist)

French Guiana.

See *London Journal of Botany* 2: 365. 1843 and *Bulletin du Muséum d'Histoire Naturelle* 25: 387. 1919, *Flore de la Guayane Française* 3: 631. 1954

(Bark used in dressing yaws.)

Catunaregam Wolf Rubiaceae

Catu-naregam is a Malayalam name used in Kerala for a species of *Randia*, from *katu* 'forest' and *naregam* 'citrus', see *Genera Plantarum* 75. 1776 and *Kew Bulletin* 36: 493–557. 1981, *Plant Systematics and Evolution* 149: 89–118. 1985, Turner, I.M. "A catalogue of the Vascular Plants of Malaya." *Gardens' Bulletin. Singapore* 47: 347–655. 1995 (publ. 1997), Govaerts, R. *World Checklist of Seed Plants* 3(1, 2a & 2b): 1–1532. Continental Publishing, Deurne. 1999.

Catunaregam longispina (Link) Tirveng. (*Gardenia longispina* (Link) Sweet; *Posoqueria longispina* Link; *Randia longispina* (Link) DC.)

Himalaya.

See *Enum. Pl.* 1: 225. 1821, *Hort. Brit.*: 197. 1826, *Prodr.* 4: 386. 1830 and *Edinburgh J. Bot.* 53(1): 95. 1996

(Fruit for fish poisoning.)

Catunaregam nilotica (Stapf) Tirveng. (*Lachnosiphonium niloticum* (Stapf) Dandy; *Randia nilotica* Stapf; *Xeromphis nilotica* (Stapf) Keay)

Tanzania. Tree or shrub, fleshy fruits

See *J. Linn. Soc., Bot.* 37: 519. 1906 [1904–1906 publ. 1906], *Fl. Pl. Anglo-Egyptian Sudan* (F.W. Andrews) 2: 441, f. 159. 1952, *Bull. Jard. Bot. État* 28: 39. 1958, *Bull. Mus. Nation. Hist. Nat.* (Paris) 3e Sér., no. 521, *Bot.* 35: 8, 21. 1978, *Taxon* 27(5–6): 515. 1978 (publ. 1979), *Kew Bull.* 36: 493–557. 1981

(Fruits and roots emetic, poison antidote, a poultice for body ache, muscular pains, rheumatism. Root bark decoction taken as an aphrodisiac and for infertility; boiled roots to treat yellow fever. Fruit emetic, used as fish poison.)

in Kenya: kwanarya

in Tanzania: mbigima, mtutuma, oloisa

Catunaregam nutans (Roxb.) Tirveng. (*Catunaregam nutans* (DC.) Tirveng.; *Gardenia nutans* Roxb.; *Gardenia nutans* (Roxb.) Sweet; *Posoqueria nutans* Roxb. ex Roxb.; *Posoqueria nutans* Roxb.; *Randia nutans* DC.; *Randia nutans* (Roxb.) DC.)

India.

See *Hort. Bengal.* 15. 1814, *Fl. Ind.* ed. Carey & Wall. 2: 565. 1824, *Hortus Britannicus*. [Sweet] 197. 1826, *Prodr.* (DC.) 4: 386. 1830, *Fl. Ind.*, ed. Carey, i.714. 1832 and *Nordic J. Bot.* 3(4): 456. 1983

(Rootstock juice used in jaundice.)

in India: jom lakhuti

Catunaregam spinosa (Thunb.) Tirveng. (*Canthium chinense* Pers.; *Canthium coronatum* Lam.; *Catunaregam spinosa* subsp. *taylorii* (S. Moore) Verdc.; *Gardenia dumetorum* Retz.; *Gardenia dumosa* Salisb.; *Gardenia floribunda* Roxb., nom. nud.; *Gardenia glabra* R. India, Himalaya. Leafy stems, slender roots, acuminate glabrous sessile leaves, white flowers, white lip with a yellowish base, capsule

See *Fl. Ind.*, ed. Carey & Wall. 1: 20. 1820 and *Bot. Tidsskr.* 60: 170. 1964

(Crushed leaves applied on the head in vertigo.)

in India: lung-aithing

Caulophyllum Michaux Berberidaceae (Leonticaceae)

Greek *kaulos* 'stalk, stem' and *phyllon* 'a leaf', see *Flora Boreali-Americana* 1: 204–205, pl. 21. 1803.

Caulophyllum robustum Maxim. (*Caulophyllum thalictroides* (L.) Michx.; *Caulophyllum thalictroides* Regel, nom. illeg.; *Caulophyllum thalictroides* subsp. *robustum* (Maxim.) Kitam.; *Caulophyllum thalictroides* subsp. *robustum* (Maxim.) M. Hiroe; *Leontice robusta* (Maxim.) Diels; *Leontice thalictroides* Linnaeus)

North America, China. Perennial herb with erect simple stem, the plant is extremely bitter and is not usually ingested by livestock, roasted seeds have been used as a coffee substitute

See *Species Plantarum* 1: 312–313. 1753, *Fl. Bor.-Amer.* 1: 204. 1803, *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg*

15: 223. 1857, *Primitiae Florae Amurensis* 33. 1859 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 337. 1900, *Acta Phytotaxonomica et Geobotanica* 20: 202. 1962, *J. Korean Res. Inst. Ewha Women's Univ.* 11: 455–478. 1967, *Komarov Lectures*. 20: 47–61. 1973, *Taxon* 31: 120–126. 1982, *J. Hokkaido Univ. Educ., Sect. 2B* 35: 97–111. 1985, Lampe and McCann. *AMA Handbook of Poisonous and Injurious Plants*. American Medical Assoc., Chicago. 1985, M.R. Gilmore, *Uses of plants by the Indians* ... 31. 1991

(The plant has poisoning potential, handling powdered root can cause irritation of mucous membranes; raw seeds and roots, low toxicity if eaten. Root to treat rheumatism, toothaches, profuse menstruation, indigestion and stomach cramps, genitourinary disfunction, gallstones and fever, as an aid in childbirth. Root decoction given for fevers.)

in English: blue cohosh, blue ginseng, papoose root, squaw root, yellow ginseng

in North America: zhu-nakada-tanga-maka (Omaha-Ponca)

Cautleya (Benth.) Hook.f. Zingiberaceae

After Sir Proby Thomas Cautley, 1802–1871, naturalist, author of *The Ganges Canal*. London 1863; see *Exotic Botany* 2: 97, pl. 108. 1806, *Ill. Bot. Himal. Mts.*: 361. 1839, *Genera Plantarum* 3: 641. 1883, *Botanical Magazine* 114: t. 6991. 1888, *Fl. Brit. India* 6: 208. 1890 and *Journal of Botany, British and Foreign* 70(12): 328. 1932, *Notes Roy. Bot. Gard. Edinburgh* 31: 218. 1972, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 76. Berlin & Hamburg 1989.

Cautleya gracilis (Sm.) Dandy (*Cautleya lutea* Royle; *Cautleya gracilis* var. *gracilior* (K. Schum.) Sanjappa; *Cautleya gracilis* var. *robusta* (K. Schum.) Sanjappa; *Cautleya lutea* (Royle) Hook.f.; *Cautleya lutea* (Royle) Royle ex Hook.f.; *Cautleya lutea* Hook.f.; *Cautleya lutea* var. *gracilior* K. Schum.; *Cautleya lutea* var. *robusta* K. Schum.; *Roscoea elatior* Sm.; *Roscoea gracilis* Sm.; *Roscoea lutea* Royle; *Roscoea lutea* Hassk.; *Roscoea lutea* (Blanco) Hassk., nom. illeg.)

China, Himalaya, India.

See *Transactions of the Linnean Society of London* 13(2): 460. 1822, *Flora de Filipinas* 4. 1837, *Illustrations of the Botany ... of the Himalayan Mountains* ... [Royle] 361, t. 89, f. 2. 1839, *Flora* 47: 21. 1864, *Botanical Magazine* 114: t. 6991. 1888 and *Pflanzenr.*, IV, 46: 124–125. 1904, *J. Bot.* 70(12): 328. 1932, *Cytologia* 44: 233–240. 1979, *Fl. Ind. Enum.*, *Monocot.*: 291. 1989

(Rhizome infusion taken for gas troubles, flatulence, colic, stomachache, hepatomegaly; rhizome eaten raw to relieve colic and stomachache.)

in China: ju yao jiang

in India: pale

Cavanillesia Ruíz & Pav. Bombacaceae

Named for the Spanish botanist Antonio José Cavanilles, 1745–1804, clergyman, plant collector, see E. Alvarez López, “Cavanilles. Ensayo biográfico-crítico.” *Anales Jard. Bot. Madrid*. 6(1): 1–64. 1946, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 324. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 69. 1972, Juan Vernet, in *D.S.B.* 3: 154–155. 1981, Frans A. Stafleu and Erik A. Menega, *Taxonomic literature. Supplement III*. 466–468. 1995.

Cavanillesia platanifolia (Bonpl.) Kunth (*Pourretia platanifolia* Bonpl.)

South America.

See *Flora Peruviana, et Chilensis Prodrumus* 97. 1794, *Species Plantarum*. Editio quarta 3: 844. 1800, *Plantae Aequinoctiales* 2: 162–164, t. 133. 1809[1817], *Nova Genera et Species Plantarum* (quarto ed.) 5: 306. 1821[1823] and *Field Mus. Nat. Hist., Bot.* Ser. 13(3A/2): 477–478, 593–622. 1965

(Infusion of the bark for underweight.)

in Central America: cuipo, kwibo, pretino, quipo

Cavea W.W. Sm. & J. Small Asteraceae

See *Annales du muséum national d'histoire naturelle* 16: 156, 198–203, pl. 10–13. 1810 and *Transactions of the Botanical Society of Edinburgh* 27(2): 119, pl. 5. 1917.

Cavea tanguensis (J.R. Drumm.) W.W. Sm. & J. Small (*Cavea tanguensis* W.W.Sm. & Small; *Saussurea tanguensis* J.R. Drumm.)

India, Bhutan, China.

See *Bulletin of Miscellaneous Information Kew* 1910(3): 78. 1910, *Transactions of the Botanical Society of Edinburgh* 27(2): 119–120, pl. 5. 1917

(Aerial parts used in wounds, cuts and fevers.)

Cavendishia Lindley Ericaceae

Named for Cavendish, Lord William George Spencer, 6th Duke of Devonshire, 1790–1858 (d. Derbyshire), a promoter of gardening, 1838–1858 President of the Royal Horticultural Society of London; see *Familles des Plantes* 2: 164, 538. 1763, *Edwards's Botanical Register* 21: pl. 1791. 1835, *Genera Plantarum* 4(3): 88. 1850, *Linnaea* 24: 14–15, 22–23, 30–32. 1851 and Ernest Nemes and William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827–1927*. 31–32. [1931], M. Hadfield et al., *British Gardeners: a Biographical Dictionary*. 117–118. London, 1980, *Fl. Neotrop.* 35: 49, 52, 68, 76. 95, 99, 115, 187, 205, 233. 1983, F. Boerner & G. Kunkel, *Taschenwörterbuch der*

botanischen Pflanzennamen. 4. Aufl. 76. 1989, *Am. J. Bot.* 86: 17–31. 1999, *Am. J. Bot.* 89: 327–336. 2002, *Mycorrhiza*. 13(5): 257–264. 2003, *New Phytol.* 169(2): 355–365. 2006. Some suggested an origin from the circumnavigator Thomas Candi (also Candish, Cavendish), c. 1555–1592, the second Englishman who sailed around the globe, see John Dunmore, *Who's Who in Pacific Navigation*. 52–53. Honolulu 1991.

Cavendishia bracteata (Ruíz & Pav. ex A. St.-Hil.) Hoerold (*Cavendishia acuminata* (Hook.) Hemsl.; *Cavendishia beckmanniana* Hoerold; *Cavendishia benthamiana* (Klotzsch) Hoerold; *Cavendishia campii* A.C. Sm.; *Cavendishia chiapensis* Brandege; *Cavendishia cordata* (Klotzsch) Hoerold; *Cavendishia cordifolia* (Kunth) Hoerold; *Cavendishia costaricensis* Hoerold; *Cavendishia crassifolia* (Benth.) South America.

See *New Flora and Botany of North America ...* 4: 100. 1836[1838], *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 144–145. 1874, *Abh. Ges. Wiss. Goett.* 24: 135. 1879, *Revisio Generum Plantarum* 1: 255. 1891

(Roots decoction used for regulating fertility.)

in Paraguay: tajuja

Caylusea A. St.-Hil. Resedaceae

Caylusea abyssinica Fisch. & C.A. Mey.

Tanzania. An erect or short-lived perennial herb, stems with a few rough hairs on the angles, very small white flowers in long dense terminal heads, an open star-like cluster of small woody fruits, persistent calyx, tiny rough seeds, tender leaves and stems eaten as vegetable, fodder for goats and rabbits, secondary grassland, disturbed places, waste places, riversides

See *Deuxième Mémoire sur les Résédacées* 29. 1837, *Index Seminum [St. Petersburg]* 7: 43. 1840

(Boiled leaves used to treat stomach pains and to eliminate intestinal worms.)

in Tanzania: lukalifya, mkalifya

Cayratia A.L. Juss. Vitaceae

Possibly from some vernacular name, perhaps Indian; see A.L. de Jussieu, in *Dictionnaire des Sciences Naturelles*. ed. 2. [F. Cuvier] 10: 103. 1818, *Dict. Class. Hist. Nat.* [Bory] iv. 46. 1823.

Cayratia auriculata (Roxb.) Gamble (*Cayratia auriculata* (Roxb.) Suess.; *Cayratia auriculata* (Roxb.) Suess. & Suess.; *Cayratia auriculata* Gamble; *Cissus auriculata* Roxb.; *Cyphostemma auriculata* (Roxb.) Singh & Shetty; *Cyphostemma auriculatum* (Roxb.) P. Singh & B.V. Shetty; *Vitis auriculata* (Roxb.) Wall.)

India.

See *Flora Indica*; or descriptions of Indian Plants 1: 430. 1820, *A Numerical List of Dried Specimens* [Wallich] n. 6031. 1831–1832 and *Flora of the Presidency of Madras* 1: 237. 1918, *Mitt. Bot. Staatssamml. München* i. 352. 1953, *Die natürlichen Pflanzenfamilien, Zweite Auflage* [Engler & Prantl] 20d: 281. 1953, *Taxon* 35: 596. 1986, *Journal of Ethnopharmacology* 121(3): 456–461. 2009

(Tuberous root applied for arthritis, astringent, febrifuge.)

in India: earghatta yelae balli, iguthi veeleya balli, jangli-ka-chorni, koluvel, koorapalleru, pallagumodi, pullagummadi

Cayratia carnososa (Lam.) Gagnep. (*Cayratia carnososa* Gagnep.; *Cissus carnososa* Lam.; *Vitis carnososa* (Lam.) Wall.; *Vitis trifolia* L.)

India.

See *Species Plantarum* 1: 203. 1753, *Encyclopédie Méthodique, Botanique* 1: 31. 1783, *A Numerical List of Dried Specimens* 206: 6018. 1832 and *Notulae Systematicae*. *Herbier du Museum de Paris* 1: 347. 1911

(Used in Ayurveda. Ground leaves applied to boils and swellings. Root paste applied externally on boils and pimples. Veterinary medicine, leaf paste to treat sores and ulcers on the necks of bullocks.)

in India: amal bel, amal lata, amalbel, amalved, amarcakoti, ambatvel, atyاملaparni, corivalli, dukaria, gandirah, gidardrak, goale lata, gutt, kattuperanta, kattuppirandai, khat-khatumbo, ramcana, sarbarival, vatakkoti

Cayratia gracilis (Guill. & Perr.) Suess. (*Cayratia gracilis* (Guill. & Perrott.) Suess. & Suess.; *Cissus gracilis* Guill. & Perr.; *Vitis gracilis* Baker; *Vitis gracilis* (Guill. & Perr.) Baker; *Vitis gracilis* Wall.)

Tropical Africa.

See *Fl. Ind.*, ed. Carey & Wall. ii. 477. 1824, *Florae Senegambiae Tentamen* 1: 134. 1831, *Flora of Tropical Africa* [Oliver et al.] 1: 404. 1868 and *Mitteilungen der Botanischen Staatssammlung München* 1: 352. 1953, *Nat. Pflanzenfam.*, ed. 2 [Engler & Prantl] xx d. 278. 1953

(Roots as cough sedative, antipyretic.)

Cayratia japonica (Thunb.) Gagnep. (*Causonia japonica* (Thunb.) Raf.; *Causonis japonica* (Thunb.) Raf.; *Causonis japonica* Raf.; *Cayratia japonica* Gagnep.; *Cissus japonica* Willd.; *Cissus japonica* (Thunb.) Japan, southern China, SE Asia. Climber, usually evergreen, ridged, hairy tuber small or absent, mucilaginous roots, leaves usually 5-foliolate, inflorescence axillary, greenish-white to yellowish small flowers, berry subglobose purplish-blue to black, a variable species

See *Fl. Jap.* (Thunberg) 104. 1784, *Syst. Veg.* Editio decima quarta (J.A. Murray). 244. 1784, *Symb. Bot.* (Vahl) 3: 19. 1794, *Sp. Pl.*, ed. 4 [Willdenow] 1(2): 659. 1798, *Medical Flora* 2: 122. 1830, *Sylva Telluriana* 87. 1838 and *Notul. Syst.* (Paris) 1: 349. 1911, *Philippine Journal of Science* C13(3): 145. 1918, *Fl. Siam. Enum.* i. 310. 1926

(Reported to be slightly poisonous; pounded leaves emetic. Boiled leaves, together with onion and lime, applied to the head for violent headache; leaves rubbed on the stomach to relieve constipation; pounded leaves put on scorpion stings and centipede bites. Dried and powdered flowers used for fever. Aerial parts applied for fever and malaria. Stem bark used as an antidote, also mixed with bark of *Dioscorea pentaphylla*.)

in English: sorrel vine

in China: wu lian mei

in India: kithot, kitohot, niak riariang

in Indonesia: dudugan

in Malaysia: charek merah, lakum, pokok riang hutan

in Vietnam: v[as]c nh[aa]j

Cayratia mollissima (Wallich) Gagnep. (*Cayratia mollissima* Wall.)

Thailand, Malaysia and the Philippines. Climber, usually evergreen, stiffly hairy, leaves 3-foliolate, corymb axillary wide-spreading, flowers small dull bluish-green, white to pinkish ovoid berry with crystals, commonly along forest margins

See *Notulae Systematicae.* Herbarium du Museum de Paris 1: 345. 1911, *Beitr. Biol. Pflanzen* 68: 51–71. 1994

(Fruits used to poultice swellings and aches, also rubbed on the belly, for pain in labor. An infusion of the leaves applied as a cooling lotion.)

in Malaysia: akar sebenkak, kesakitan burong, lakom gajah

in Vietnam: v[as]c l[oo]ng m[ee]f

Cayratia novemfolia Burkill ex Suess. (*Cayratia novemfolia* (Wallich) Burkill; *Cayratia novemfolia* Herb. Kew. ex Burkill)

SE Asia.

See *Die natürlichen Pflanzenfamilien*, Zweite Auflage 20d: 280. 1953

(A decoction of the leaves used as a cooling lotion in fevers, and the leaves may be oiled, heated and applied to boils or for dropsy.)

Cayratia pedata (Lam.) Juss. ex Gagnep. (*Cayratia longzhouensis* W.T. Wang; *Cayratia pedata* Gagnep.; *Cissus pedata* Naves ex Fern.-Vill.; *Cayratia pedata* (Lour.) Juss.; *Cissus pedata* Lam.; *Columella pedata* Lour.; *Lagenula pedata* Lour.; *Vitis pedata* (Lam.) Wallich ex Wight; *Vitis pedata* Vahl ex Wall.)

India. Climber, small green flowers, fodder

See *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 31. 1783, *Flora Cochinchinensis* 65, 86, 88. 1790, *Numer. List* [Wallich] n. 6027. 1831–1832, *Cat. Ind. Pl.* 26. 1833, *Nov. App.* 50. 1880 and *Notulae Systematicae.* Herbarium du Museum de Paris 1: 346. 1911, *Curr. Sci.* 49: 37–38. 1980, *Guihaia* 8(2): 115. 1988, *Ethnobotanical Leaflets* 13: 1003–1016. 2009

(Used in Ayurveda and Sidha. Leaves astringent, refrigerant, for labor pains, ulcers, burning wounds; a decoction to treat uterine troubles, labor pains; leaves crushed and applied for scabies. Dried seeds made into a paste applied on wounds. Veterinary medicine, the juice from crushed leaves to get relief from body heat and white discharge.)

in China: niao zu wu lian mei

in India: alaci, amarccakkoti, belutta-tsjon-valli, corivalli, edaakulamandulamaari, edakula mandulamari, edakulamandulam ari, elilaippirantai, erukala sani, ghorpadvel, goalilata, godhapadi, ghotapadvela, gorpavel, gumaditige, gummadi tiga, gummadithige, gummaditige, iynthilaikodi, kaade pathige, kaama pathige balli, kaamapatige balli, kaaniyamu, kaanniyaapathige, kalalai kodi, kattup pirantai, kattuperandai, kattuppirandai, kitamatti, kitanaman, naralai, naralai-kodi, nasagummadi, pannikkodi, pannikodi, pulimaada, sarbarivel, suvaha, thigegummadi, tiripatakam, tripadi, veluttasorivalli

Cayratia trifolia (L.) Domin (*Cayratia carnososa* (Lam.) Gagnep.; *Cayratia carnososa* Gagnep.; *Cayratia trifolia* Domin; *Cissus carnososa* Lamarck; *Cissus trifolia* (L.) K. Ceanothus L. Rhamnaceae

From a Greek name for a spiny plant, *keanonos* or *keanothos*, applied by Theophrastus (*HP*. 4.10.6) to a corn-thistle,

Carduus arvensis; see Carl Linnaeus, *Species Plantarum*. 1: 195. 1753 and *Genera Plantarum*. Ed. 5. 90. 1754, *Prodr.* (DC.) 2: 29. 1825.

Ceanothus americanus L. (*Ceanothus americanus* Mill.; *Ceanothus americanus* var. *intermedius* (Pursh) Torr. & A. Gray; *Ceanothus americanus* var. *pitcheri* Torr. & A. Gray; *Ceanothus intermedius* Pursh; *Ceanothus intermedius* Hook.; *Ceanothus* × *intermedius* Hort. ex Koehne)

North America. Perennial shrub, subshrub

See *Species Plantarum* 1: 195–196. 1753, *Fig. Pl. Gard. Dict.* 1: t. 86. 1760, *Fl. Amer. Sept.* (Pursh) i. 167. 1813, *Fl. N. Amer.* (Torr. & A. Gray) 1: 264. 1838, *Deutsche Dendrol.* (1893) 396. 1893

(Plant decoction for diarrhea, diabetes. Root and bark astringent. Powdered bark applied to open sores caused by venereal disease. Root decoction abortifacient, used for venereal disease, snakebite, cough, a wash for injured legs or feet; root infusion laxative, taken for bowel complaints, constipation, stomach troubles, pulmonary troubles, colds.)

in English: Jersey tea ceanothus, mountain-sweet, New Jersey tea, red-root, wild snowball

Ceanothus fendleri A. Gray (*Ceanothus fendleri* var. *venosus* Trel.; *Ceanothus fendleri* var. *viridis* M.E. Jones; *Ceanothus fendleri* A. Gray var. *viridis* A. Gray ex Trel, nom. inval.; *Ceanothus subsericeus* Rydb.)

North America. Perennial shrub

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 29. 1849, *Proc. Calif. Acad. Sci.* ser. 2, 1: 111. 1888, *Syn. Fl. N. Amer.* 1(1.2): 413. 1897 and *Bull. Torrey Bot. Club* 31: 564. 1904

(Leaves chewed for sore mouth. Infusion sedative. Ceremonial, leaves and stems used as an emetic.)

in English: Fendler’s ceanothus

Ceanothus griseus (Trel.) McMinn (*Ceanothus griseus* (Trel. ex B.L. Robins.) McMinn; *Ceanothus griseus* var. *horizontalis* McMinn; *Ceanothus thyrsiflorus* Eschsch. var. *griseus* Trel.; *Ceanothus thyrsiflorus* var. *griseus* Trel. ex B.L. Rob.)

North America. Perennial shrub

See *Mém. Acad. Imp. Sci. St. Pétersbourg Hist. Acad.* 10: 285. 1826, *Synoptical Flora of North America* 1(1[2]): 415–416. 1897 and *Ceanothus* 210, 212, fig. 11a. 1942

(Ceremonial, flowers used in dance wreathes.)

in English: carmel ceanothus

Ceanothus herbaceus Raf. (*Ceanothus americanus* L. var. *herbaceus* (Raf.) Torr. & A. Gray; *Ceanothus herbaceus* var. *pubescens* (Torr. & A. Gray ex S. Watson) Shinnery; *Ceanothus ovatus* Desf.; *Ceanothus ovatus* Hort. ex Lindl.; *Ceanothus ovatus* auct. non Desf.; *Ceanothus ovatus* f. *pubescens* (S. Watson) Soper; *Ceanothus ovatus* Desf. var.

pubescens Torr. & A. Gray ex S. Watson; *Ceanothus ovatus* var. *pubescens* S. Watson; *Ceanothus ovatus* var. *pubescens* Torr. & A. Gray ex S. Watson; *Ceanothus pubescens* (Torr. & A. Gray ex S. Watson) Rydb. ex Small

North America. Perennial shrub

See *Medical Repository*, ser. 2, 5: 360. 1808, *A Flora of North America*: containing ... (Torr. & A. Gray) 1(2): 264. 1838, *Edwards's Bot. Reg.* 26: t. 20. 1840 and *Rhodora* 43: 83. 1941, *Field & Lab.* 19: 33. 1951

(Root decoction taken as a cough remedy.)

in English: Jersey tea

Ceanothus integerrimus Hook. & Arn. (*Ceanothus andersonii* Parry; *Ceanothus californicus* Kellogg; *Ceanothus californicus* Kell. ex K. Brandeg.; *Ceanothus integerrimus* var. *californicus* L.D. Benson; *Ceanothus integerrimus* var. *californicus* G.T. Benson; *Ceanothus integerrimus* var. *californicus* (Kellogg) G.T. Benson; *Ceanothus integerrimus* var. *macrothyrsus* (Torr.) G.T. Benson; *Ceanothus integerrimus* var. *puberulus* (Greene) Abrams; *Ceanothus integerrimus* var. *puberulus* Abrams)

North America. Perennial shrub

See *Species Plantarum* 1: 195–196. 1753, *The Botany of Captain Beechey's Voyage* 329. 1838, *Proc. Davenport Acad. Nat. Sci.* 5: 172. 1889, *Proc. Calif. Acad. Sci.* ser. 2, 4: 181, 183. 1894 and *Bull. New York Bot. Gard.* 6: 409. 1910, *Contr. Dudley Herb.* 2: 120–121. 1930, *Phytologia* 64: 390–398. 1988

(An infusion of the bark used as a tonic.)

in English: deer-brush, deerbush

Ceanothus leucodermis Greene

North America. Perennial shrub

See *Bulletin of Miscellaneous Information Kew* 1895(97): 15. 1895

(Leaves decoction a wash for itch, poison oak. Berries decoction a wash for itch, sores.)

in English: chaparral whitethorn

Ceanothus oliganthus Nutt. (*Ceanothus divaricatus* Nutt.; *Ceanothus divaricatus* Bol.; *Ceanothus hirsutus* Nutt.; *Ceanothus oliganthus* var. *hirsutus* K. Brandege; *Ceanothus oliganthus* var. *oliganthus*; *Ceanothus oliganthus* var. *orcuttii* (Parry) Jeps.; *Ceanothus oliganthus* Nutt. var. *orcuttii* (Parry) Trel. ex Jeps.; *Ceanothus orcuttii* Parry)

North America. Perennial shrub

See *A Flora of North America*: containing ... (Torr. & A. Gray) 1(2): 266. 1838, *Proc. Calif. Acad. Sci.* ser. 2, 4: 197. 1894 and *Man. Fl. Pl. Calif.* [Jepson] [4]: 621. 1925

(Magico-religious beliefs, trees used for protection from lightning.)

in English: California-lilac, explorer's bush, hairy ceanothus

Ceanothus sanguineus Pursh (*Ceanothus oregonus* Nutt.; *Ceanothus oregonus* Nutt. ex K. Brandeg.; *Ceanothus sanguineus* Nutt.)

North America. Perennial shrub

See *Flora Americae Septentrionalis*; or, ... 1: 167. 1813, *The Genera of North American Plants* [Nuttall] 1: 153. 1818, *Fl. N. Amer.* (Torr. & A. Gray) 1: 265–266. 1838, *Proc. Calif. Acad. Sci.* ser. 2, 4: 180. 1894

(Poultice of dried, powdered bark applied to burns, sores or wounds.)

in English: red-stem ceanothus, redstem ceanothus, wild lilac

Ceanothus thyrsiflorus Eschsch. (*Ceanothus thyrsiflorus* var. *repens* McMinn)

North America. Perennial shrub or small tree

See *Mémoires de l'Académie Impériale des Sciences de St. Pétersbourg. Avec l'Histoire de l'Académie* 10: 285. 1826 and *Ceanothus* 212. 1942

(Decoction of leaves and twigs used to wash newborn babies. Ceremonial, flowers used in dance wreathes.)

in English: blue-blossom, blueblossom, blue-brush

Ceanothus velutinus Douglas ex Hook. (*Ceanothus velutinus* Douglas; *Ceanothus velutinus* var. *velutinus*)

North America. Perennial shrub

See *Flora Boreali-Americana* (Hooker) 1(3): 125, t. 45. 1831

(Leaves infusion taken for coughs, fevers, broken bones; infusion of leaves and twigs used for diarrhea, arthritis; leaves poultice applied to burns and sores. Plant decoction taken for influenza, arthritis. Decoction of plant tops with leaves used for skin diseases, rash, sores and eczema, dull pains; branch decoction a wash for rheumatism. Insecticide, smoke from plant used to kill bedbugs. Ceremonial medicine, used as a cleansing solution in the sweat-house.)

in English: buckbrush, snowbrush ceanothus

Ceanothus velutinus Douglas ex Hook. var. *velutinus*

North America. Perennial shrub or tree

See *Flora Boreali-Americana* (Hooker) 1(3): 125, t. 45. 1831

(Leaves infusion taken for coughs, fevers, broken bones; infusion of leaves and twigs used for diarrhea, arthritis; leaves poultice applied to burns and sores. Plant decoction taken for influenza, arthritis. Decoction of plant tops with leaves used for skin diseases, rash, sores and eczema, dull pains; branch decoction a wash for rheumatism. Insecticide, smoke from

plant used to kill bedbugs. Ceremonial medicine, used as a cleansing solution in the sweathouse.)

in English: buckbrush, snowbrush ceanothus

Cecropia Loefl. Cecropiaceae

Named for Cecrops (Ke-), in Greek legend the first King of Attica; Cecropia was the citadel of Athens, see *Iter Hispanicum* 272. 1758, *Systema Naturae*, Editio Decima 2: 1286. 1759 and *Fieldiana*, Bot. 24(4): 10–58. 1946, *Fieldiana*, Bot. 40: 94–215. 1977, *J. Pl. Res.* 108: 313–326. 1995, *Ceiba* 42(1): 1–71. 2001 [2002], *Ceiba* 44(2): 105–268. 2003 [2005]. Young plants of some species have irritant hairs.

Cecropia glaziovi Snethl. (*Cecropia macranthera* Warb. ex Snethl.; *Cecropia macranthera* Warb. ex Glaz.)

Brazil.

See *Bull. Soc. Bot. France* 59(Mém. 3g): 645, nomen. 1913 [1912 publ. 1913], *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 357–358. 1923, *Fl. Neotrop.* 94: 86. 2005

(Cardiotonic, diuretic, hypotensive/antihypertensive, anti-inflammatory, anti-asthmatic, bronchodilator, antiulcer, anti-acid secretion and antidepressant-like activities.)

Cecropia obtusifolia Bertol. (*Ambaiba costaricensis* Kuntze; *Ambaiba hemsleyana* Kuntze; *Ambaiba mexicana* (Hemsl.) Kuntze; *Ambaiba mexicana* Kuntze; *Cecropia alvarezii* Cuatrec.; *Cecropia amphichlora* Standl. & L.O. in East Africa: kafamba, kifampa (Luganda), msufi (Swahili)

in Gabon: bantan, bouma, doum, m'foum, mfouma, mfoume, moufouma, nkouma, odoum, odouma, ogouma

in Ghana: agù, agù, aloe, atepre, ayigbe ogbedei, ayigne ogbedei, bagbasse, bahun, botu, botu-kisemto, botu-kocholemotu botu, bubumbu, bufo, bufo-sogbum, bufu, danta, ekile, eloe, enya, enyaa, enyena, enyenna, epia, evu, ewu, gbang, gomusdschiade, gomuschiere, gonga, gongu, goni, gumbihi, guna, gung, gunga, gunguma-gumdi, gungumli, gungvale, huti, igboa, ju, juna, kakiliyà, kakre, kantong, kekyafu, kilentirekpembi, kolombolu, komu, kpong, kpugbum, loe-ti, nye, nyina, odanta-pu, ofu, ofua, ofwho, ofwu, oguwé, onya, onyaa, onya-hene, onya-kene, onyai, onyina, rimi, skpe, tubumbum, tupungbing, ubombe, umfobille, vu, vule, vuti, wu, wudese, wuti, yigbum

in Ivory Coast: adabo, ague, agué, akuondi, allotegué, angbo, anié, bana, bana-bandan, bana iri, bana yiri, banatan, bantan, bantignei, bantiguehi, dangué, dje, diò, djò, egna, egnié, eguien, eguina, eguna, enia, enianga, eniangua, enieme, eniémé, enivé, enya, enyam'gua, enyan'gua, etchui, gbe, gbi, ghê, gna, gniè, gnien, go, gô, gué, guê, guima, mboba, molongué, muong, nga'chie, n'gneke, n'goue, n'gué, nguéhié,

nyè, oba, sérigné, tiô, tiu, ton'go, ton'ko, tongo, tonko, toonko, tshui, tshyo, won

in Niger: bantiguéhi, forgo

in Nigeria: abdugar rimi, afalafase, agwu, agwugu, ahe, akha, akpu, akpu ogwu, akpu udelè, akpu-ugu, alhawami, araba, arabà, aru-muum, asisagha, bantaaje, bantahi, boju, bokum, eegun, eegun owu eegun, egun, egungun, egungun ogun, gandido, gbe-sie, gbée, gbie-li, gehi, gyehi, isaghai, konngo, kuci, lembuburu, mbom, ogbungun, ogungbologha, ogungun, ohahen, okha, okho, owu eegun, rimi, rimi, rini, rum, taamu, teka, tom, u-muum, ukem akabi, ukim, ukum, vambè; rimi (Hausa); kuchi (Nupe); bantahi (Fula); tom (Kanuri); rum (Shuwa Arabic); vambe (Tiv); araba, ogungun (Yoruba); okha (Edo); okhakhen (Urhobo); akpu (Igbo); afalafase (Ijaw); ukem (Efik); bokum (Boki); ukim (Ibibio)

in Upper Volta: banan, banda, bantan, bantignei, belon, gunga, pi, rimi

in W. Africa: aguehe, banan, bantam, bantang, benten, blo, bonetan, bouma, shinge

Ceiba trichistandra (A. Gray) Bakh. (*Eriodendron trichistandrum* A. Gray)

South America, Pacific coast of Ecuador and Peru. Tree, flowers dark red outside, young plants with spines

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 479. 1824, *United States Exploring Expedition* 1: 182. 1854 and *Bulletin du Jardin Botanique de Buitenzorg* 6: 196. 1924 (Astringent.)

in Peru: ceibo, tunshu

Ceiba ventricosa (Nees & Mart.) Ravenna (*Bombax ventricosa* Arruda, nom. nud.; *Ceiba incana* (A. Robyns) Ravenna; *Chorisia incana* A. Robyns; *Chorisia ventricosa* Nees & Mart.) (*Chorisia* Kunth, for Ludwig (Louis) Choris, 1795–1828, botanical artist and traveller, 1823–1826 with the Russian navigator Otto von Kotzebue (1787–1846) on his expedition round the world, wrote *Voyage pittoresque autour du monde*. Paris 1822 and *Vues et paysages des régions équinoxiales*. Paris 1826.)

Brazil. Trees, prickly stem, digitate leaves

See *Travels in Brazil* 489. 1816, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 11: 102, T. 9. 1823 and *Annals of the Missouri Botanical Garden* 54(2): 184–185, f. 1. 1967, *Onira* 3(15): 47. 1998

(For skin diseases, antiinflammatory.)

Celastrus L. Celastraceae

Greek name *kelastron*, *kelastrós*, applied by Theophrastus (*HP*. 3.4.5, 4.1.3, etc.) to the holly, *Ilex aquifolium*; see Carl

Linnaeus, *Species Plantarum*. 1: 196–197. 1753, *Genera Plantarum*. Ed. 5. 91. 1754, *Genera Plantarum* 1: 359, 365. 1862, *Bulletin de l'Académie Impériale des Sciences de Saint-Pétersbourg* 27: 455. 1881 and *Plantae Wilsonianae* 2(2): 355. 1915, *Fieldiana, Bot.* 24(6): 201–218. 1949, *Flora Reipublicae Popularis Sinicae* 45(3): 103, 125. 1999.

Celastrus monospermoides Loes.

Borneo. Climber

See *Hort. Bengal.* 18. 1814, *Fl. Ind.*, ed. Carey & Wall., ii. 394. 1824, *Fl. Ind.*, ed. Carey, i. 625. 1832 and *Nova Guinea* 8: 280. 1910

(Pounded young twigs applied to extract thorns from the affected parts.)

in Sarawak: va rub, wa rub

Celastrus orbiculatus Thunberg (*Celastrus articulatus* Thunberg; *Celastrus articulatus* var. *pubescens* Makino; *Celastrus jeholensis* Nakai; *Celastrus oblongifolius* Hayata; *Celastrus orbiculatus* Thunb. ex A. Murray; *Celastrus orbiculatus* Thunberg f. *major* Ives; *Celastrus tartarinowii* Ruprecht)

China.

See *Species Plantarum* 1: 196–197. 1753, *Flora Japonica*, ... 97. 1784, *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Pétersbourg* 15: 357. 1857 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 58–59. 1913, *Report of the First Scientific Expedition to Manchoukou* 4(1): 6, pl. 1. 1933, *Botanical Magazine* 7: 102. 1983, *J. Nat. Prod.* 65(1): 89–91. 2002, *Fitoterapia* 76(2): 273–275. 2005, *Journal of Ethnopharmacology* 117(1): 175–177. 2008

(Fruits antiinflammatory, tranquilizer, antioxidant, antiphlogistic, antitumor, cytotoxic, antirheumatic, depurative, tonic, for headache, toothache, snakebites.)

in English: oriental bittersweet

in China: nan she teng

Celastrus paniculatus Willd. (*Celastrus australis* Harv. & F. Muell. ex F. Muell.; *Celastrus australis* F. Muell.; *Celastrus australis* Harv. & F. Muell.; *Celastrus dependens* Wallich; *Celastrus euphlebiphyllus* (Hayata) Makino & Nemoto; *Celastrus euphlebiphyllus* (Hayata) Kanehira; *Celastrus multiflorus* Lam.; *Celastrus multiflorus* Roxburgh, non Lam.; *Celastrus paniculatus* subsp. *multiflorus* (Roxburgh) D. Hou; *Celastrus paniculatus* subsp. *multiflorus* Ding Hou; *Celastrus paniculatus* subsp. *serratus* D. Hou; *Celastrus paniculatus* subsp. *serratus* (Blanco) Ding Hou; *Diosma serrata* Blanco; *Euonymus euphlebiphyllus* Hayata)

India, Burma (Myanmar), China. Shrub, scandent, straggling, climbing, deciduous, usually dioecious, unarmed, leaves spirally arranged, inflorescence an axillary or terminal panicle, pale greenish unisexual flowers, calyx campanulate persistent, fruit a capsule loculicidally 3-valved, seed enveloped

by a fleshy orange to crimson aril, young flowers and young fruits used as a vegetable

See *Encyclopédie Méthodique, Botanique* 1: 661. 1785, *Species Plantarum*. Editio quarta 1: 1125. 1797, *Flora Indica*; or descriptions of Indian Plants 2: 389. 1824, *Numer. List* [Wallich] n. 4302. 1831 and *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 5: 15–16. 1915, *Fl. Japan.*, ed. 2 (Makino & Nemoto) 678. 1931, *Formosan trees indigenous to the Island* (revised) 2: 383, f. 340. 1936, *Annals of the Missouri Botanical Garden* 42: 231. 1955, *J. Cytol. Genet.* 19: 115–117. 1984, Ahmad, F. “Preliminary screening of methanolic extracts of *Celastrus paniculatus* and *Tecomella undulata* for analgesic and anti-inflammatory activities.” *Journal of Ethnopharmacology* 42(3): 193–198. 1994

(Used in Ayurveda, Unani and Sidha. Plant analgesic, anti-tuberculosis, antidiysenteric, antidote, insecticidal, cytotoxic, antiinflammatory, insect antifeedant, diaphoretic, stimulant; whole plant for blood clotting and skin diseases. Infusion of leaves mixed with juice of *Centella asiatica* and taken as nervine tonic; crushed leaves applied as a poultice to the sores caused by a species of *Schinus*. Leaves and roots pounded and used as a poultice to relieve headache. Leaf sap an antidote for opium poisoning. Root antimalarial and antipyretic; a mixture of water extract of roots of *Celastrus paniculatus*, *Helicteres isora*, *Imperata cylindrica* and *Rhynchosia minima* given as an antidote for snake poison; root and black peppers made into a paste and given for spermatorrhea, leucorrhoea and piles; root chewed for oral ulcer; root juice for the treatment of diabetes; root paste or bark paste applied on forehead to cure boils in children; roots and seeds made into a paste applied externally in body ache and joint pain. Stem bark antidiysenteric, a decoction of the stem a diuretic in the treatment of kidney disorders; bark juice mixed with bark juice of *Saurauia napaulensis* given to relieve indigestion; bark decoction used for abortion. Seed oil antidiabetic, antituberculosis, for lumbago, rheumatism, gout, sciatica, eczema, itching, skin rashes, bodyache, as a hair tonic and to relieve earache and stomachache; seeds boiled in edible oil and applied on affected part to cure arthritis; seeds said to stimulate intellectual powers and sharpen memory. Many pharmacological studies deal with its effects on the central nervous system, and the tranquilizing property of the alkaloidal fractions of the oil. Ceremonial, worship, garland of fruit branch offered to Lord Ganpati. Veterinary medicine, roots for amebiasis.)

in China: deng you teng

in India: agnibhasa, agnidipta, agnimasha, akuntimatam, alavana, amruta, avega, ceruppunna, gangonge, gangundakai, joytishmati, jvavel, jyotishmati (jyotish, light possessing, and mati, memory), kakundan, kangali, kangammana balli, kangani, kangonge, kanguni, kari ganne, kari gavane, kariganne, karigonne, karkangan veil, khunjri, kijri, kuijeri, kuijeri malkigani, kujri, kurji, mal kangani, mal-kangni, mal-kangni-ke-binj, mal-kankni, mala-erikaia, malkagani,

malkagni, malkangani, malkangi, malkangni, malkankani, malkanki, malkankni, malkigani, manotige, mungani, munjani, naakupunnuveru, palulavam, papdi, peng, peng, penglotha, pengu loto, pengumaal, ping kanda, thimma teega, vadangul, vakuntimatam, vakuntumatam, val, valukai, valulavai, valulavam, valuzhuva, yapatam, yarpatam, yatukam

in Vietnam: d[aa]y s[aw]ng m[as]u

Celastrus rosthornianus Loesener (*Celastrus loeseneri* Rehder & E.H. Wilson; *Celastrus reticulatus* C.H. Wang)

China.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 445–446, pl. 5, f. F-H. 1900, *Plantae Wilsonianae* 2(2): 350–351. 1915, *Contributions from the Botanical Survey of Northwestern China*. Wukung, China 1(1): 68. 1939, *Flora Tsinlingensis* 1(3): 213. 1981

(Root bark can be used as medicine to cure the injury by snake and tumour, bark and leaf used as pesticide.)

in China: duan geng nan she teng

Celastrus scandens L.

North America. Perennial woody vine, alternate simple deciduous leaves, flowers in elongated clusters, red seeds

See *Species Plantarum* 1: 196. 1753 and M.R. Gilmore, *Uses of Plants by the Indians* ... 50. 1991, *Regnum Veg.* 127: 31. 1993

(Poisonous. Plant, seeds and berries reputed toxic, can cause low toxicity if eaten.)

in English: American bittersweet, bitter-sweet, climbing bittersweet, false bittersweet, shrubby bittersweet, snake-food, staff vine, waxwork

in North America: zuzecha-ta-wote (Dakota)

Celmisia Cass. Asteraceae

After Celmisios, son of the Greek nymph Alciope; see A.H.G. de Cassini (1781–1832), in *Bull. Sci. Soc. Philom. Paris*. 1817: 32. 1817, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 7: 356. 1817, *Nova Genera et Species Plantarum* (folio ed.) 4: 70. 1820[1818], *Dictionnaire des Sciences Naturelles*. ed. 2. [F. Cuvier] 37: 259. 1825, *Genera Plantarum* 2: 280. 1873 and *Contributions from the Gray Herbarium of Harvard University* 188: 85. 1960, *Ciencias* (Mexico) 21: 21. 1961.

***Celmisia spectabilis* Hook. f.**

New Zealand. Sub-alpines, narrow stiffly erect furrowed leaves, leaves from a central rosette, leaves underside covered with silky white-cream hairs, single white daisy-like flowers

See *Botany of the Antarctic Voyage ...Volume 1. Flora Antarctica*. 1: 35. 1844 and *New Zealand J. Bot.* 22(1): 146. 1984

(Leaves sap to heal abscesses in the mouth.)

in English: cotton plant, horse daisy, shepherd's daisy

Maori name: tikumu

Celosia L. Amaranthaceae

Greek *kelos* 'splendid', *keloo* 'burnt, bloodspot', *keleos* 'burning', referring to the colours of the flowers; see Carl Linnaeus, *Species Plantarum* 1: 205–206. 1753, *Genera Plantarum*. Ed. 5. 96. 1754, Du Petit-Thouars, Aubert Aubert (1758–1831), *Histoire des Végétaux Recueillis dans les Isles Australes d'Afrique* 53, t. 16. Paris, 1805 [Voyage dans les isles australes d'Afrique. Partie botanique.] and *Fieldiana, Bot.* 24(4): 143–174. 1946, *Botanical Journal of the Linnean Society* 66(2): 127–141. 1973, *Hooker's Icones Plantarum* 38: 1–123. 1975, *Nigerian Journal of Botany* 3: 1–24. 1990, *Plant Systematics and Evolution* 182: 253–257. 1992.

***Celosia argentea* L.** (*Amaranthus purpureus* Nieuwl.; *Celosia argentea* (L.) Voss; *Celosia argentea* forma *crystata* (L.) Schinz; *Celosia argentea* var. *crystata* (Linnaeus) Kuntze; *Celosia argentea* var. *crystata* (L.) Voss; *Celosia coccinea* L.; *Celosia cristata* L.; *Celosia debilis* S. Moore; *Celosia margaritacea* L.; *Celosia marilandica* Retz.; *Celosia pallida* Salisb.; *Celosia pyramidalis* Burm.; *Celosia swinhoei* Hemsley)

Pantropical, Africa. Annual herb, erect, glabrous, terrestrial, more or less branching, leaves variable, terminal spikes of crowded and imbricate flowers pinkish white, ovary ovoid, capsule ellipsoid, black subreniform shining flat seeds, tender leaves used as vegetables, a weed, *Celosia cristata* L. usually regarded as a cultivated form of *Celosia argentea*

See *Species Plantarum* 1: 205–206. 1753, *Species Plantarum* 2: 989–991. 1753, *Species Plantarum*, Editio Secunda 2: 297. 1763, *Fl. Ind.* 65. 1768, *Obs. Bot.* 3: 27. 1783, *Prodr. Stirp. Chap. Allerton* 145. 1796, *Revisio Generum Plantarum* 2: 541. 1891, *Journal of the Linnean Society, Botany* 26(176): 318. 1891 and *Amer. Midl. Nat.* 3: 279. 1914, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 16c: 29. 1934, *Fl. W. Pakistan* 71: 5. 1974, *Taxon* 27: 375–392. 1978, *Flora of Ecuador* 28: 1–138. 1987, *Journal of Shandong College of Traditional Chinese Medicine* 12: 55–57. 1988, *Planta Medica* 63(3): 216–219. 1997, *Biological and Pharmaceutical Bulletin* 21(11): 1154–1159. 1998, *Phytochemistry* 58: 159–165. 2001

(Used in Ayurveda and Sidha. Dried plant powder used for menstrual irregularities. Flowers and seeds in diarrhea,

urinary troubles and excessive menstrual discharge; seeds, roots and leaves for urinary disorders and stomach complaints. Root paste applied all over the body as febrifuge, to cure fever with shivering; root juice cooling. Seeds with antimetastatic and immunomodulating properties, used for eye troubles, acute conjunctivitis, uveitis, keratitis, diarrhea, blood diseases, mouth sores; inflorescence for epistaxis, diarrhea, hemorrhoidal bleeding, leucorrhea, functional uterine bleeding, hematuria. Leaves antipyretic, mild laxative, antihepatotoxic, aphrodisiac, pounded with lime applied on fresh cuts, backache and wounds, also used as cosmetic substances for skin depigmentation; leaves eaten for digestion. Veterinary medicine, for goats and sheep, root extract mixed with *Tamarindus* fruit given orally in hydrogen cyanide poisoning.)

in English: celosia, cock's comb, common cock's comb, feather cock's comb, Lagos spinach, quail grass, red fox, soko

in Tanzania: funga-mizinga, mfungu, songoro-malidadi

in Yoruba: efo odo, soko yokoto, sokoto

in Bangladesh: soo-non bom

East Africa. Deciduous tree, rough leaves, very small flowers with sepals only, rounded small fleshy fruit, in forest, in high rainfall areas, dry or moist evergreen forest, in riverine forest

See *Flora Indica* ... nec non Prodr. Florae Capensis 31. 1768, *Flora* 28(6): 87. 1844, *Journal of the Linnean Society, Botany* 22: 521. 1886 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 3: 22. 1900, *Flora of Tropical Africa* 6(2): 4. 1916

in English: African elm, camdeboo, camdeboo stinkwood, cannibal stinkwood, white stinkwood

in East Africa: akansisa, chepkeleliet, nyasiat, murundu

in Southern Africa: camdeboostinkhout, inDwandwazane, kamdeboostinkhout, kannabasstinkhout, kanniedoodboom, kumtuna, lesika, modutu, mogatakomo, mohatlagomo, mpopano, muGuru, mumvumvu, muRima, muSetaderere, Ndwandwazane, uMoyawovungu (= stormy wind), umVumvu, uSinga lwesalukazi (= old woman sinew), waterboom, witgatboom, witgatstinkhout, witstinkhout

Celtis australis L. (*Celtis australis* A. Rich.)

S. Europe. Tree, leaves coriaceous, edible fruits, yellow fruits eaten by birds

See *Species Plantarum* 2: 1043. 1753, *Prodr. Stirp. Chap. Allerton* 175. 1796 and *Fl. Iran.* 142: 12. 1979, *Taxon* 30: 843. 1981, *Stud. Bot. Univ. Salamanca* 6: 169–171. 1987, *J. Cytol. Genet.* 23: 219–228. 1988, *Fl. Medit.* 16: 431–442. 2006

(All parts of the plant used in leprosy. Fruits astringent, stomachic, used in the treatment of amenorrhea, heavy menstrual and intermenstrual bleeding, colic, diarrhea, dysentery and peptic ulcers.)

in English: European nettle tree, hack-berry, lote tree, Mediterranean hackberry, nettle tree

in India: ankor, bremji, khaak, kharak, kharik, kharika, khirak, khirik, khirk, koo

in Nepal: khare

Celtis eriocarpa Decne. (*Celtis australis* var. *eriocarpa* (Decne.) Hook. f.)

India.

See *Voyage dans l'Inde* 4: 150. 1844, *The Flora of British India* 5: 482. 1888

(Leaves galactagogue.)

in India: khaik

Celtis hildebrandii E. Soepadmo

British Solomon Is., Moluccas. Tree, buttressed, ripe fruits fleshy bluish black, in primary and secondary forest

See *Fl. Males.* 8: 63. 1977

(Leaves chewed and the sap swallowed to treat internal pain, sore throat, laryngitis, and to prevent miscarriage.)

in Papua New Guinea: titka

Celtis mildbraedii Engl. (*Celtis bequaertii* De Wild.; *Celtis compressa* A. Chev.; *Celtis dubia* De Wild.; *Celtis frankisiae* N.E. Br.; *Celtis soyauxii* Engl.; *Celtis usambarensis* Engl.) (the species honors the German botanist Gottfried Wilhelm Johannes Mildbraed (1879–1954), author of *Stylidiaceae*. 1908, and with Franz Otto Koch *Die Banane. Ihre Kultur und Verarbeitung*. Berlin 1926; see J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 489. 1965)

Tropical Africa. Tree, flowers cream to light green

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 309. 1909

(Bark febrifuge, analgesic. Leaves vermifuge.)

in English: Natal elm, Natal white stinkwood, red-fruited white-stinkwood

in Angola: hongolo, kebende-kaxikelela, kikéte, mongolo

in Cameroon: gombe

in Central African Republic: balzé, balze, ngombe

in Comoros: sari hompi mena

in Congo: angwabele, edou, kalulu, keyombo, mbeko mpembe, menubana, mokalong, mokongi, nongambe

in Gabon: nkar

in Ivory Coast: asan, ba, be, mgua, nangbouté, nangbué, pa, péri, pô, tongo

in Nigeria: akpula, iragidi, ita-gidi, ohia naleghe

in Southern Africa: Natalse Witstinkhout; uZinhlu (Zulu)

Celtis occidentalis Linnaeus (*Celtis occidentalis* var. *canina* (Rafinesque) Sargent; *Celtis occidentalis* var. *crassifolia* (Lamarck) A. Gray; *Celtis occidentalis* var. *pumila* (Pursh) A. Gray; *Celtis pumila* Pursh; *Celtis pumila* var. *deamii* Sargent)

North America. This is a highly variable species

See *Species Plantarum* 2: 1044. 1753

(Decoction from the bark as an aid in menses and to treat sore throat.)

in English: beaver wood, hackberry, raccoon food

in North America: yamnumnugapi (Dakota), gube (Omaha-Ponca), wake-warutsh (Winnebago), kaapsit (Pawnee), mico-coulier occidental, bois inconnu

Celtis philippensis Blanco (*Celtis brownii* Rendle; *Celtis collinsae* Craib; *Celtis insularis* Rendle; *Celtis mauritiana* Planch.; *Celtis pacifica* Planch.; *Celtis prantlii* auct. - mult., non Priemer ex Engl., sensu stricto; *Celtis prantlii* Priemer ex Engl. forma *parviflora* Hauman; *Celtis prantlii* Engl.; *Celtis rendleana* G. Taylor; *Celtis scotellioides* A. Chev.; *Celtis scotellioides* A. Chev.; *Celtis strychnoides* Planch.; *Celtis wightii* Planch.)

Tropical Africa. Tree, shrubby, stinking, low spreading crown, seed oil edible

See *Flora de Filipinas* 197. 1837, *Annales des Sciences Naturelles, Botanique* sér. 3, 10: 306–308. 1848 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 3: 23. 1900, *Journal of Botany, British and Foreign* 53: 297. 1915, *Kew Bulletin* 1918: 370. 1918, *Fl. Madagasc.* 54: 1–15. 1952, *Flora Malesiana: Series I: Spermatophyta* 8(2): 62. 1977

(Used in Sidha. Roots astringent, for diarrhea. Leaf sap for parasitic infections. Ceremonial, ordeal-poisons.)

in China: da guo you po

in Cameroon: bang, bege, béwégé, bwege, odu amuk

in Ivory Coast: kolohonfe

Sci.* 37: 298. 1963, *Regnum Veg.* 127: 31. 1993, *Economic Botany* 51(3): 212–237. 1997, *Rheedea* 10(2): 153–155. 2000

(Anti-malarial use (with leaves of *Persea americana* or leaves of *Lippia schomburgkiana*), tea for kidney problems, an infusion is drunk as a febrifuge in the West Indies. Spines from this plant are very irritating.)

in English: bur grass, burgrass, burr grass, common sandbur, cram cram, hedge-hog grass, hedgehog dogtail, hedgehog grass, Mossman burr grass, Mossman River grass, sand-bur, sand burr, sandbur, southern burgrass, southern sandbur, southern sandbur grass, southern sandspur

in Spanish: abrojo, cadillo, cadillo bravo, cadillo tigre, caricillo, espolón, guisaso

in Belize: espina, muul

in Brazil: carrapicho

in Caribbean: herbe collante, herbe piquante, herbe rude, zèb kolan, zèb pikan, zèb rid

in Cuba: guizazo

in Ecuador: guagran casha, guagran espino, rabo de zorro, selemo

in Mexico: abrojo, cadillo, cardo, ch'ohool, guechi nate, guechi-na-ta, huizapol, huizapul, k'iith, k'iith toom, mozote, muul, ojo de arriera, ojo de hormiga, pega ropa, pegarropa, perro, rosetilla, rosetilla grande, t'oyol, t'oyol toom, t'oxol, zacahuitzli

in Pacific: cram-cram (New Caledonia), mosie vihilango

in Hawaii: 'ume'alu, mau'u kuku

in New Guinea: hmalbru

in India: argana, dhaman

in Thailand: yaa khee khrok, yaa kheekhrok, ya khi khrok, yaa khikhrok, ya son krachap, yaa son krachap

Cenchrus palmeri Vasey

America, Mexico.

See *Proceedings of the California Academy of Sciences, Series 2*, 2: 211. 1889

(Troublesome prickly spiny burrs contaminate wool and their spines damage skin.)

Cenchrus prieurii (Kunth) Maire (*Cenchrus hystrix* Fig. & De Not.; *Cenchrus macrostachyus* Hochst. ex Steud.; *Pennisetum breviflorum* Steud.; *Pennisetum prieurii* Kunth)

(after the French botanist F.M.R. Leprieur, 1799–1869, a dispenser in the French Navy, between 1824–29 in Senegambia, in 1829 returned to France and began his *Flora* continued by [Jean Baptiste] Antoine Guillemin (1796–1842), George Samuel Perrottet (1793–1870) and Achille Richard (1794–1852) as *Florae Senegambiae tentamen*. Paris (Treuttel et Wurtz), London 1830–1833; see Joseph Vallot (1854–1925), “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 168–238. Paris 1882 and G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. London 1904, R.W.J. Keay, “Botanical Collectors in West Africa prior to 1860.” in *Comptes Rendus A.E.T.F.A.T.* 55–68. Lisbon 1962, John H. Barnhart, *Biographical Notes upon Botanists*. Boston 1965, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 49. 1971.)

India, Africa. Annual, sometimes perennial, decumbent or tufted, erect to ascending, famine food, grains eaten by humans, good grazing for camels, seeds eaten raw, palatable fodder before anthesis, grows on sand dunes and sandy soils, sandy waste places, desert habitats

See *Révision des Graminées* 2: 411. 1831, *Memorie della Reale Accademia delle Scienze di Torino*, ser. 2, 14: 382. 1854, *Synopsis Plantarum Glumacearum* 1: 107, 109. 1854 and *Bulletin du Muséum d'Histoire Naturelle, sér. 2* 3: 523. 1931

(Veterinary medicine, leaves to cure wounds in cattle.)

in French: cram cram

in Arabic: gasba, heskanit, initi, tilimit

in Mali: heskanit, koolumo ana, tawajjaq, uazedj, wadjak, wajjag, wesedj

in Mauritania: gasba, initi, tilimit

in Niger: dani, âni, diger, k'arangya hanfoka, k'arangya kûra, kébbé buru, mali alyia (for the seeds), ngibbi bulduyè, tawajjaq, tawajjag, wadjâk, wajjag

in Nigeria: karangiyar, karangiyar hanfoka, karangiyar kura

in Senegal: kébbé buru

in India: dhamnio, lambio-bhurat, lambio-bhurut

Cenchrus prieurii (Kunth) Maire var. *scabra* Bhandari

India, Rajasthan. Indeterminate species

See *Fl. Indian Desert* 395. 1978

(Veterinary medicine, leaves to cure wounds in cattle.)

in India: dhamnio, lambio-bhurat, lambio-bhurut

Cenocentrum Gagnepain Malvaceae

From the Greek *kenos* 'empty' and *kentron* 'spur', see *Notulae Systematicae*. *Herbier du Muséum de Paris* 1: 78. 1909.

Cenocentrum tonkinense Gagnep. (*Hibiscus wangianus* S.Y. Hu)

China, SE Asia. Branched herb, straight or star-like hairs, large lobed leaves covered with straight short stinging hairs

See *Notulae Systematicae*. *Herbier du Muséum de Paris* 1(3): 79. 1909, *Flora of China* Family 153: 55, pl. 20, f. 7. 1955, small flowers and fruits borne in leaf axils

(Itching and irritation caused by hairs.)

Centaurea L. Asteraceae

Latin *centaureum* or *centaureion* for centaur, Greek *kentaureion* 'centaurea', ancient name used by Theophrastus, *HP*. 3.3.6; probably from the Sanskrit *cona* 'red' and *tara* 'tree', Persian *dar* 'plant'; *kentauros*, *kentauron* 'centaur', from *ken-teo* 'to pierce, to sting, to be wounded' (or from *genos* 'people, nation', *gennaō* 'to generate'?) and *tauros* 'bull' (Sanskrit *sthaurin* 'tough horse, stallion', *sthaura* 'strength, force'); see Carl Linnaeus, *Species Plantarum*. 2: 826, 909–919. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition 1754, *Genera Plantarum*. Ed. 5. 389. 1754, *Familles des Plantes* 2: 117, 512. 1763, *Synopsis Plantarum* 2: 481, 488. 1807, *Annales du muséum national d'histoire naturelle* 16: 157. 1810, *Dictionnaire des Sciences Naturelles* 50: 247–248, 253. 1827, *Synopsis Generum Compositarum* 8. 1832, *Linnaea* 24: 422. 1851 and *Bot. Gaz.* 37: 219–222. 1904, *American Midland Naturalist* 5(3): 71. 1917, *Taxon* 25: 483–500. 1976, *Acta Biol. Cracov., Ser. Bot.* 19: 107–148. 1976, *Inform. Bot. Ital.* 10: 267–277. 1978, *Amer. J. Bot.* 66: 173–178. 1979, *Taxon* 28: 408. 1979, *Lagascalia* 9: 115–130. 1979, *Flore de l'Iran* [Parsa] 10: 163. 1980, *Lagascalia* 9: 249–284. 1980, *Rev. Biol.* 33 (5): 552–554. 1980, *Taxon* 29: 715. 1980, *Taxon* 30: 698–699. 1981, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Int. Organ. Pl. Biosyst. Newsl.* (Zurich). 18/19: 6–8. 1992, *Candollea* 48(2): 437–448. 1993, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Willdenowia* 24: 219–248, 249–254. 1994, *Cytologia* 60: 341–346. 1995, *Fl. Medit.* 6: 328–333. 1996, *Lagascalia* 19(1/2): 891–892, 894, 897. 1997, *Bot. J. Linn. Soc.* 125: 343–349. 1997, *Fl. Medit.* 8: 273–280. 1998, *Bocconeia* 11: 117–169. 1999, *Opera Bot.* 137: 1–42. 1999, *Taxon* 50: 1201. 2001. The Centaurs were mythological creatures, half horse and half man, Chiron was the wisest of them, he cured a wound in his foot caused by the arrows of Hercules.

Centaurea alexandrina Hutch. & Dalziel (*Centaurea alexandrina* Delile)

Tropical Africa.

See Delile, Alire Raffeneau, *Flore d'Égypte*. Explication des planches. Histoire des plantes cultivées. Mémoire sur les plantes qui croissent spontanément dans ce pays. Planches. [Paris, 1812–1817] [Florae Aegyptiacae illustratio], *Flora of West Tropical Africa* 2: 176. 1931

(Leaves purgative, for labor pains.)

Centaurea americana Nutt. (*Centaurea mexicana* DC.; *Centaurea nuttallii* Spreng.; *Plectocephalus americanus* (Nutt.) D. Don)

North America. Annual

See *Journal of the Academy of Natural Sciences of Philadelphia* 2(1): 117–118. 1821, *Systema Vegetabilium*, editio decima sexta 4(Suppl.): 298. 1827, *The British Flower Garden*, ... series 2 pl. 51. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 575. 1838

(Poultice of leaves applied to skin sores.)

in English: American knapweed, American star-thistle, basket flower, thornless thistle

Centaurea behen L. (*Centaurea behen* Lam.; *Centaurea behen* DC.; *Centaureum behen* (L.) K. Koch; *Rhaponticum behen* (L.) Ratier)

India, Turkmenistan.

See *Sp. Pl.* 2: 914. 1753, *Encycl.* (Lamarck) 1(2): 665. 1785, *Pharm. Franç.* 121. 1827, *Prodr.* (DC.) 6: 567. 1838 [1837 publ. early Jan 1838], *Linnaea* 24: 418. 1851 and *Taxon* 31(1): 72. 1982

(Used in Unani.)

in India: behman safaid, behman safaid mim kofia, behman safaid nim kofta, behman safaid nimkofta

Centaurea benedicta (Linnaeus) Linnaeus (*Carbeni benedicta* (L.) Benth.; *Cnicus benedictus* L.)

North America.

See *Sp. Pl.* 2: 826. 1753, *Sp. Pl.* Editio Secunda 2: 1296. 1763, *Genera Plantarum* 2(1): 482. 1873 and *Kew Bull.* 22: 138. 1968

(Leaves, stems, and flowers all used for digestive and liver ailments.)

in North America: blessed thistle, chardon bénit

Centaurea cyanus L. (*Centaurea cyanocephala* Vellozo; *Centaurea cyanocephala* Velen.; *Centaurea pulchra* DC.; *Centaurea segetalis* Salisbury; *Centaurea umbrosa* Lacaita, nom. illeg.; *Centaurea umbrosa* Huet & Reuter; *Centaurea umbrosa* Huet ex Reut.; *Cyanus segetum* Hill; *Jacea segetum* (Hill) Lamarck; *Jacea segetum* Lam.; *Leucacantha cyanus* (L.) Nieuwl. & Lunell; *Leucacantha cyanus* Nieuwl. & Lunell)

Europe.

See *Species Plantarum* 2: 911. 1753, *The Vegetable System* 4: 29. 1762, *Flore Française* (Lamarck) 2: 54. 1779 [1778 publ. after 21 Mar 1779], *Prodr. Stirp. Chap. Allerton* 207. 1796, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 578. 1837, *Flora Bulgarica* 309, 312. 1891 and *American Midland Naturalist* 5(3): 71. 1917

(Bruised leaves used as a salve for sores.)

in English: bachelor's button, blue bottle, blue centaurea, cornflower

in Mexico: centaurea, pinceles; cabezuela (Durango)

in South Africa: bloucentaurea, bloukoringblommetjie, koringblom

in China: shi che ju

in Japan: ya-guruma-giku

Centaurea depressa M. Bieb. (*Cyanus depressus* Soják)

India.

See *Flora Taurico-Caucasica* 2: 346. 1808 and *Rev. Biol.* 33 (5): 552–554. 1980, *Iran. J. Bot.* 4: 189–196. 1989, *Cell Chromosome Res.* 18(1): 16–33. 1995, *Bot. J. Linn. Soc.* 125: 343–349. 1997, *Iran. J. Bot.* 12(1): 81–86. 2006

(Whole plant decoction taken against chest pain, fever, headache, stomach disorders, cold and cough.)

in India: vashaka

Centaurea iberica Trevir. ex Spreng. (*Calcitrapa iberica* (Trevir. ex Spreng.) Schur; *Centaurea iberica* Spreng.; *Leucantha iberica* (Trevir. ex Spreng.) Á. Löve & D. Löve)

North America, Europe.

See *Systema Vegetabilium*, editio decima sexta 3: 406. 1826, *Enumeratio Plantarum Transsilvaniae* 409. 1866 and *Botaniska Notiser* 114(1): 44. 1961

(Ash of the heads made into a paste and applied for eczema.)

in English: Iberian star-thistle

in India: krets

Centaurea melitensis L. (*Calcitrapa patibilcensis* Kunth)

Malta. Annual, biennial

See *Species Plantarum* 2: 917. 1753, *Nova Genera et Species Plantarum* (folio ed.) 4: 18–19. 1820[1818]

(Plant used for the kidneys.)

in English: cockspur, cockspur thistle, Malta centaurea, Malta star-thistle, Malta thistle, Maltese cockspur, Maltese star-thistle, Maltese thistle, Napa thistle, saucy Jack, yellow star thistle

in South Africa: koringdissel, luserndissel, Malta-centaurea, Malta-dissel, vaaljakob

Centaurea perrottetii DC. (*Centaurea sparmannii* DC.)

Senegal, Gambia. Erect, scabrous, branched, involucrel bracts terminating in pale yellowish prickles, flower-heads purple

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 598. 1838 and *Kew Bull.* 22: 107–140. 1968, *Compositae Newslett.* 20/21: 12–15. 1992

(Root and fruit febrifuge. Whole plant bitter, anti-malarial, stomachic, emetic, purgative.)

in Nigeria: dayi

Centaurea praecox Oliv. & Hiern (*Centaurea goetzeana* O. Hoffm.; *Centaurea rhizocephala* Oliv. & Hiern; *Centaurea rhizocephala* Trautv.; *Centaurea tisserantii* Philipson)

Ghana, Mali, Nigeria. Erect branched herb, perennial woody rootstock, flowers in prickly heads, florets reddish-purple, fodder

See *Flora of Tropical Africa* 3: 438. 1877 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 441. 1902, *Journal of Botany, British and Foreign* 77: 87, 231. 1939

(Whole plant bitter, anti-malarial, stomachic, emetic, purgative. Veterinary medicine, powdered leaves for intestinal worms in sheep and applied to the wounds.)

Centaurea solstitialis Linnaeus

North America. A serious weed pest

See *Sp. Pl.* 2: 917. 1753 and Cordy, D.R. “*Centaurea* species and equine nigropallidal encephalomalacia.” Pages 327–336 in Keeler, R.F., Van Kampen, K.R., James, L.F., eds. *Effects of Poisonous Plants on Livestock*. Academic Press, New York, N.Y., USA. 1978, Panter, K.E. “Toxicity of knapweed in horses.” *Wash. State Univ. Knapweed* 4(3): 2. 1990

(Used in Unani. Poisonous to horses; when ingested over a prolonged period it causes a neurological disorder called equine nigropallidal encephalomalacia, or “chewing disease.” Although its bitter taste and spiny heads usually deter grazing animals, horses sometimes will seek it out.)

in English: Barnaby star-thistle, Barnaby's thistle, European weed, golden star thistle, knapweed, St. Barnaby's thistle, yellow centaurea, yellow cockspur, yellow star thistle

in India: barham dandi

in South Africa: geelcentaurea, skaapdissel, vaaljakob

in North America: centaure du solstice

Centaurium Hill Gentianaceae

Kentauros, *kentauron* ‘centaur’, the Centaurs were mythological creatures, half horse and half man, represented as inhabiting Mount Pelion in Thessaly, are said to have been the offspring of Ixion and a cloud; see John Hill (1716–1775), *The British herbal*. 62. London 1756 and *Watsonia* 11: 33–43. 1976, *Taxon* 29: 718–720. 1980, *Taxon* 30: 829–842. 1981, *Taxon* 53(3): 719–740. 2004.

Centaurium cachenlahuen (Molina) B.L. Rob. (*Erythraea cachenlahuen* (Molina) Roem. & Schult.; *Gentiana cachenlahuen* Molina)

Chile. Annual herb

See *Species Plantarum* 1: 227–232. 1753, *Saggio sulla Storia Naturale del Chili* ... 147. 1782, *Systema Vegetabilium* 4: 167. 1819 and *Proceedings of the American Academy of Arts and Sciences* 45(17): 396. 1910

(Plant decoction taken for blood disorders and hypertension, used to fight loss of appetite, stomach pain and fever.)

in Chile: cachanlahue, canchanlahue

Centaurium centaurioides Rolla Rao & Hemadri (*Centaurium roxburghii* (D. Don) Druce; *Erythraea roxburghii* D. Don)

India.

See *Journal of the Bombay Natural History Society* 67: 357. 1970

(Stomachic.)

in India: kaadu kempu jeerige

Centaurium erythraea Raf. (*Centaurium minus* Moench; *Centaurium minus* subsp. *austriacum* (Ronniger) O. Schwarz; *Centaurium umbellatum* Gilib., nom. illeg.; *Centaurium umbellatum* subsp. *austriacum* Ronniger; *Erythraea capitata* Willd. ex Roem. & Schult.; *Erythraea centaurium* sensu J. Black; *Erythraea lomae* Gilg)

Europe.

See *Species Plantarum* 1: 229–230. 1753, Gilibert, Jean Emmanuel (1741–1814), *Caroli Linnæi ... Systema plantarum Europae*. Coloniae-Allobrogum, 1785–1787 [t. I. Nomenclator linnæanus. *Flora lithuanica inchoata*; seu, Enumeratio plantarum quas circa Grodnam collegit & determinavit J.-E. Gilibert.], *Methodus Plantas Horti Botanici* ... [Moench] 349. 1794, *Danmarks og Holsteens Flora* 2: 75–77. 1800, *Systema Vegetabilium* 4: 168. 1819 and *Contributions from the United States National Herbarium* 11: 449. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 2(16–17): 34. 1906, *Mitteilungen der Naturwissenschaftlichen Vereines für Steiermark* 52: 315. 1916, (*Report*) *Botanical Society and Exchange Club of the British Isles* 4: 613. 1917, *Bot. J. Linn. Soc.* 65: 229, 232. 1972, *Feddes Repertorium* 85(7–8): 438. 1974

(Cholagogue, diaphoretic, digestive, emetic, febrifuge, stomachic, tonic, bitter; applied to wounds and sores.)

in English: bitter herb, centaury, common centaury, European centaury

Centaurium meyeri Druce (*Centaurium pulchellum* (Sw.) Druce subsp. *meyeri* Tzvelev; *Erythraea meyeri* Bunge)

India. Annual or biennial, erect, flowers pink or white in cymes, minute seeds

See *Flora Altaica* 1: 220. 1829, *Flora of Berkshire* 342. 1897 and *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 26/27: 13–14. 1997

(Whole plant powerfully bitter. Roots used in jaundice.)

in India: gima, girmi, jangi, kadavinai, kariatu, kurunai, luntak

Centaurium roxburghii Druce (*Centaurium roxburghii* (Don) Druce; *Erythraea roxburghii* G. Don)

India.

See (*Report*) *Botanical Society and Exchange Club of the British Isles* 1916: 614. 1917

(Plant powerfully bitter, febrifuge.)

in India: barik charayatah, charayatak, gima, girmi

Centaurium spicatum (L.) E. Jansen (*Centaurium spicatum* (L.) Fernald; *Centaurium spicatum* (L.) Fritsch.; *Centaurium spicatum* (L.) Fritsch ex Janch.)

Europe.

See *Mitteilungen des Naturwissenschaftlichen Vereins der Universität Wien* 5: 97. 1907, *Rhodora* 10(111): 54. 1908

(Stomachic, astringent, for dysentery and diarrhea.)

in English: spicate centaury, spike centaury

Centella L. Apiaceae (Umbelliferae)

Possibly from the Latin *cento, onis* ‘patch-work’ or *centum* ‘a hundred’ or *centrum* ‘the centre’, Greek *kentron* ‘patchwork, a prickle, a sharp point’, or Greek *kenteo* ‘to prick, torture, torment, sting, spur, pierce’; see *Systema Naturae*, Editio Decima 2: 1269, 1380. 1759, C. Linnaeus, *Species Plantarum*, Editio Secunda 2: 1393. 1763, *Kongl. Vetenskaps Academiens Nya Handlingar* 8: 300–303. 1787, *Flora Cochinchinensis* 175. 1790 and Daniel F. Austin, “The Indiscriminate Vector: Human Distribution of *Dichondra micrantha* (Convolvulaceae).” *Economic Botany*. 52(1): 88–106. 1998, *Harvard Pap. Bot.* 9(2): 257–296. 2005.

Gen. Pl.* 1: 326. 1891 and *Bot. Mag.* (Tokyo) xxiv. 121. 1910

(Used in Ayurveda and Unani. Plant paste applied for sprain and on swollen gums in toothache; plant infusion in eye troubles; plant juice as a gargle for throat infection, diphtheria. Leaves expectorant, carminative, emetic; paste of leaves applied in skin diseases, toothache. Induces sneezing, dry leaf powder used for influenza, nasal congestion, coughs, colds, headache. Snuff of seeds and leaves used in cold. Flower heads paste applied to treat swellings and inflammation of the skin. Seeds vermifuge.)

in English: spreading sneezeweed

in China: e bu shi cao

in India: afkar, chhikika, chhikka, chhikkani, chhikni, chikani, chikkana, chikkani, chikkika, ghranadukhada, ghranadukhada, hachuti, hansia bon, kruranasa, ksavaka, ksavakah, kshavaka, kshavakrita, ksutkari, kumra, kumur, kurei, naakashikani, nagdowana, nak chhikni, nakh chhikni, nakashikani, nakasinkani, nakchhikni, nakchikni, nakkchikni, narasinkani, pachittie, sanvedanapatu, shikani, tiksna, tikshna, tittarokani, tummarpuntu, ugra, ugragandha, vawkpui-thal, vawkpuithal

in Japan: to-kin-sô, hana-hiro-sô

in Nepal: chhiunke jhaar

in Philippines: harangan, pisik

in Tibetan: ksa ba ka

Centotheca Desv. Poaceae (Gramineae)

Greek *kenteo* 'to prick, torture, torment, sting, spur, pierce' and *theke* 'a case, sheath', alluding to the prickly glumes, to the spines on the lemma, to prickly hairs within the spikelet on the upper lemmas, type *Centotheca lappacea* (L.) Desv. see *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Journ. de Bot.* 1: 70.

1813, *Flora Indica*; or descriptions of Indian plants, by the late William Roxburgh, ... edited by William Carey, D.D. to which are added descriptions of plants more recently discovered by Nathaniel Wallich... 2 vols. Serampore 1820–1824, *J. Linn. Soc. Bot.* 19: 31. 1881 and *Mat. Fl. Malay Pen.* 3: 122. 1907, *Philippine Journal of Science Bot.* 11: 2. 1916, *Amer. J. (Plant decoction taken for vaginal bleeding.)

in English: barbed grass

Fijian names: bitubitu, luna

Samoan name: sefa

in Sierra Leone: kulagbi, nana, naragbadi, nolomingkodena, suisexe

in Indonesia: jobuk, jukut kidang, karetet lempad, suket lorodan

in Malaysia: pampopoi, rumput darah, rumput lilit kain, rumput temaga

in Papua New Guinea: kuang

in the Philippines: andu-dukot aridekdiket, baylu patong

in Thailand: khon moi mae mai, khon moi maemaai, lek phai, niao ma, nieo maa, ya enieo, yaa ee nieo, ya i niao, yaa i nieo, ya khon moi maemai

in Vietnam: co' móc

Centranthera R. Br. Scrophulariaceae

From the Greek *kentron* (*kenteo* 'to prick, torture, torment, sting, spur') 'a spur, point' and *anthos* 'a flower' or *anthera* 'anther', referring to the spurred anthers; see Robert Brown, *Prodromus florum Novae Hollandiae*. 438. 1810.

Centranthera cochinchinensis (Loureiro) Merrill (*Digitalis cochinchinensis* Lour.)

Southeast Asia, Australia. Erect annual herb, threatened, branched, scabrous, bracts leaf-like, corolla pink or mauve, capsule enclosed in the greatly enlarged calyx

See *Species Plantarum* 2: 621–622. 1753, *Fl. Cochinch.* 2: 278, 378. 1790, *Prodr. Fl. Nepal.* 88. 1825 and *Trans. Amer. Philos. Soc.*, n.s. 24(2): 353. 1935, *Bulletin of the Torrey Botanical Club* 64(9): 594. 1937, *J. Jap. Bot.* 17: 397. 1941, *50th Anniv. Vol. Bot. Gard. Calcutta* 56. 1942, *Enum. Spermat. Japon.* 1: 246. 1948, *Flora of New South Wales*. 3: 582–583. UNSW Press, Sydney 1992

(For skin diseases.)

in China: hu ma cao, xi nan hu ma cao

Centranthera grandiflora Wall. ex Benth. (*Razumovia grandiflora* (Wall. ex Benth.) Merr.)

India.

See *Scrophularineae Indicae* 50. 1835 and *Bulletin of the Torrey Botanical Club* 64(9): 590. 1937

(Crushed roots antiseptic, antibacterial.)

in China: da hua hu ma cao

in India: phlang stem

Centranthera indica (L.) Gamble (*Centranthera hispida* R. Br.; *Centranthera nepalensis* D. Don; *Rhinanthus indica* L.)

India. Erect herb, stout, bristly, solitary axillary rose funnel-shaped flowers

See *Bangladesh J. Plant Taxon.* 13(2): 139–154. 2006

(Antiinflammatory.)

in India: corosinam, undir kani

Centranthera nepalensis D. Don (*Centranthera cochinchinensis* (Loureiro) Merrill var. *nepalensis* (D. Don) Merr.; *Centranthera hispida* R. Brown; *Razumovia cochinchinensis* (Louriero) Merrill var. *nepalensis* (D. Don) Merrill)

Nepal, Himalaya. Corolla pale purple-red to nearly white yellowish

See *Mant. Prima Fl. Hal.* 45. 1807, *Prodromus Florae Nepalensis* 88. 1825

(Plant juice applied to cuts and wounds.)

in China: xi nan hu ma cao

in Nepal: dhamura ghans

Centratherum Cass. Asteraceae

From the Greek *kentron* ‘a spur, prickle’ and *ather* ‘barb, spine, chaff, prickle, awn’, the pappus is bristly; see A.H.G. de Cassini, in *Bull. Sci. Soc. Philom. Paris.* 31. 1817, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 7: 384. 1817, *Nova Genera et Species Plantarum* (folio ed.) [H.B.K.] 4: 24–25. 1820.

Centratherum anthelmintica Willd. (*Centratherum anthelminticum* (L.) Kuntze; *Centratherum anthelminticum* (Willd.) Kuntze; *Centratherum anthelminticum* Kuntze)

India.

See *Cell and Chromosome Research* 7: 26–28. 1984, *Journal of Cytology and Genetics* 22: 162–163. 1987, *Journal of Cytology and Genetics* 24: 96–105. 1989

(Used in Ayurveda, Unani and Sidha. Seeds anthelmintic, digestive, stomachic, tonic, diuretic, in asthma, skin diseases; powdered seeds given in malaria and fever; bruised seeds grounded in a paste with lime juice and used against pediculi in the head and body; dried seeds infusion given to children suffering from chronic bronchitis. *Holigarna arnotiana*, *Ocimum gratissimum* L., *Allophylus cobbe* (L.) Raeusch. and *Centratherum anthelmintica* used as antiseptic in treating cuts and wounds. Roots emmenagogue.)

in India: adavi-jilakarra, adavijilakara, adavijilakarra, adavijilakatta, agnibija, aranyajiraka, aranyajirakah, atavijiraka, avalguja, babchi, bakshi, bakshie, banajeeraa, bapchie, braka, brhatpali, buckshi, garitikamma, ghora jeera, hakuch, ihanyali, jangli jeera, kaadu jeerige, kaadu-jirige, kaal jeerige, kaalijeeri, kaattu seerakam, kadu jeeren, kadu karelen, kadujeera, kadujirige, kahi jeerige, kalajira, kalajirakam, kalajirige, kalenjeeri, kalenjiri, kali jeeri, kali zeeri, kali ziri, kalijhiri, kalijiri, kaliziri, kalyzeery, kymoonbarry, kana, kananajiraka, karalye, karijirige, karizeri, kattu cirakam, kattuchiragam, kattujirakam, kattusiragam, krishna shadaevi, krishnaphala, kshudrapatra, nela vavili, nela-vaavili, nelavavili, neychitti, nir nochi, nirnochi, putiphali,

puvankuruntala, ranachajire, ranachejeere, sahadevi, sittilai, soafpaj, somaraaja, somaraji, somraj, somraji, tiktajirakah, vakuchi, vakushi, vanajiraka, vanajirakah, vanya jiraka, vanyajira, vapchi, vishakantakamulu

Centroplacus Pierre Pandaceae (Centroplacaceae, Euphorbiaceae, Flacourtiaceae)

From the Greek *kentron* ‘a spur, prickle’ and *plax, plakos* ‘a plain, any thing flat and broad’, see *Bulletin Mensuel de la Société Linnéenne de Paris* (sér. 2) 11: 114–115. 1899 and *Botanical Review* 71: 48. 2005.

Centroplacus glaucinus Pierre (*Microdesmis paniculata* Pax)

Cameroon, Gabon. Tree, tiny triangular stipules, inflorescence an axillary panicle, seeds aril orange-red

See *Bot. Jahrb. Syst.* 28(1): 25. 1899, *Bulletin Mensuel de la Société Linnéenne de Paris* (sér. 2) 11: 114–115. 1899 and *Journal of Ethnopharmacology* 41: 193–200. 1994

(Leaf decoction taken to treat schizophrenia, madness, hysteria, nervous disorders.)

Centropogon C. Presl Campanulaceae

From the Greek *kentron* ‘a spur, prickle’ and *pogon* ‘beard’, referring to the fringed stigma, see *Pl. Bras. Icon. Descr.* ii. 104. tt. 169–177 (nec t. 168). 1831, *Prodr. Monogr. Lobel.*: 48. 1836, *Plantas Hartwegianas imprimis Mexicanas* 77. 1841, *Flore des Serres et des Jardins de Paris* 6: 16. 1850, *Genera Plantarum* [Bentham & Hooker f.] 2(2): 547. 1876, *Annalen des K. (Used in Ayurveda. Leaves powder for boils, inflammations, skin irritations, also as antsnake venom and counter-irritant. Immunologically active polysaccharides.)

in English: blue wiss, butterfly pea, climbing centrosema, cowitch, snake plant

in Nigeria: abosa

in Latin America: bejuco de chivo, bejuco de juventud, campanilla, caracucha, choncho, choreque de culebra, choreque negro, chorque, conchitas, cunha, flor de conchitas, flor de pito, flor de pito blanco, frijol cuchillo, jequirana, jetirana, patinho

in China: ju ban dou

in India: kattupayar, mudgaparni

Cephalomanes C. Presl Hymenophyllaceae

From the Greek *kephale* ‘head’ and *manes* ‘a cup, a kind of cup’; see *Hymenophyllaceae*. 17, t. v. 1844.

Cephalomanes javanicum (Blume) Bosch (*Cephalomanes javanicum* var. *sumatranum* (Alderw.) K. Iwats.; *Cephalomanes laciniatum* (Roxb.) De Vol; *Cephalomanes sumatranum* (Alderw.) Copel.; *Trichomanes asplenioides* C. Presl, nom. illeg.; *Trichomanes asplenioides* Sw.; *Trichomanes javanicum* Blume; *Trichomanes javanicum* Brack., nom. illeg.; *Trichomanes javanicum* var. *asplenioides* (C. Presl) C. Chr.; *Trichomanes laciniatum* Roxb.; *Trichomanes sumatranum* Alderw.)

India.

See *Nova Genera et Species Plantarum seu Prodrum* 136. 1788, *Enumeratio Plantarum Javae* fasc. 2: 224. 1828, *Hymenophyllaceae* 37–38. 1843, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 4: 518. 1844, *Narrative of the United States Exploring Expedition* 16: 261. 1845, *Hymenophyllaceae Javanicae* 30–31, pl. 22. 1861 and *Index Filicum* fasc. 10: 635. 1906, *Bulletin du Jardin Botanique de Buitenzorg* 18: 4. 1908, *Philippine Journal of Science* 67(1): 67. 1938, *Flora of Taiwan* 1: 98. 1975, *Journal of the Faculty of Science: University of Tokyo, Botany* 13(5): 549. 1985

(Dried fern smoked to cure headache.)

Cephalorrhynchus Boiss. Asteraceae

From the Greek *kephale* ‘head’ and *rhynchos* ‘horn, beak, snout’, see *Diagnoses plantarum orientalium novarum*, ser. 1, 1(4): 28. 1844.

Cephalorrhynchus macrorhizus (Royle) Tuisl (*Cicerbita macrorhiza* (Royle) Beauverd; *Lactuca macrorhiza* (Royle) Hook. f.; *Mulgedium macrorhizum* Royle) (*Cicerbita* Wallroth, the Italian or Latin name.)

Nepal. Erect or diffuse herbs, leaves very variable, violet to blue or purple heads solitary or paniced terminating the branches, flat achenes elliptic-lanceolate narrowed into whitish pale beak

See *Species Plantarum* 2: 795–796. 1753, *Schedulae Criticae* 1: 433. 1822, *Dictionnaire des Sciences Naturelles* [Second edition] 33: 296–300. 1824, *Illustrations of the Botany ... of the Himalayan Mountains ...* 251, pl. 61. 1835, *The Flora of British India* 3(8): 408. 1881 and *Bulletin de la Société Botanique de Genève* 2: 113, 134. 1910, *Annalen des Naturhistorischen Museums in Wien* 72: 618. 1968

(Fresh leaves juice for indigestion and headache. Plant powder mixed with powders of *Swertia pedicellata* and *Picris hieracioides* made into capsule taken to treat fever. Veterinary medicine, increasing lactation in cattle.)

in India: karatu

in Nepal: chyate

Cephalostachyum Munro Poaceae

From the Greek *kephale* ‘head’ and *stachys* ‘a spike’, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829, *Deutsch. Fl.* 6: 6. 1846, *Notulae ad Plantas Asiaticas* 3: 64. 1851, *Transactions of the Linnean Society of London* 26(1): 138–139, 143, t. 3. 1868, *Forest Flora of British Burma* 2: 566. 1877, *Annals of the Royal Botanic Garden, Calcutta*. 7(26): 107, t. 94. 1896 and A. Camus, “Le genre *Cephalostachyum* a Madagascar.” *Bulletin de la Société Botanique de France* 72: 84–88. 1925, *Taxon* 6(7): 201. 1957, F.A. McClure, “Genera of bamboos native to the New World (Gramineae: Bambusoideae).” *Smithsonian Contributions to Botany* 9: 1–148. 1973, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, *Flora of India*, Series 4, 281–282. Calcutta 1989, *Edin. J. Bot.* 51: 29. 1994, *Plant Resources of South-East Asia* 7: 1–191. 1995, *Flora Reipublicae Popularis Sinicae* 9(1): i-xxvi, 1–761. 1996, C.M.A. Stapleton, D.Z. Li & N. Jia-Ron, “A new combination in *Cephalostachyum* with notes on names in *Neomicrocalamus* (Gramineae-Bambusoideae).” *Kew Bulletin* 52(3): 699–702. 1997, *Contributions from the United States National Herbarium* 39: 36. 2000.

Cephalostachyum capitatum Munro (*Bambusa capitata* Wall. & Griff., not *Bambusa capitata* Trinius, not *Bambusa capitata* Willd. ex Ruprecht; *Schizostachyum capitatum*

(Munro) R.B. Majumdar; *Schizostachyum capitatum* (Trin.) Rupr.; *Schizostachyum capitatum* Rupr.; *Schizostachyum munroi* S. Kumar & P. Singh)

Bhutan, Sikkim, India. Internodes smooth, culms nodes glabrous, culm sheaths smooth, leaves used as fodder, stems used for building purposes and arrows, seeds used as food in time of scarcity

See *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3(1): 626–627. 1835, *Bambuseae* 46–47, t. 17, f. 46. 1839, *A Numerical List of Dried Specimens* 8913. 1849, *Transactions of the Linnean Society of London* 26(1): 139. 1868 and *Fl. Ind. Enumerat.-Monocot.* 281. 1989, *J. Indian Bot. Soc.* 70(1–4): 423. 1991

(Stimulant.)

in Bhutan: dulloo bans, dullu bans, payong, pishima

in India: gobia, gopi, payang, rawngal, silli

Cephalostachyum pergracile Munro (*Oxytenanthera aliena* McClure; *Schizostachyum pergracile* (Munro) R.B. Majumdar)

Myanmar (Burma). Tufted, sympodial, deciduous, growing in large stands, inflorescence drooping, young shoots bitter and edible, internode of a 1-year-old culm used for cooking glutinous rice, found in mixed deciduous forests, hills

See *Transactions of the Linnean Society of London* 26(1): 141. 1868 and *Lingnan University Science Bulletin* 9: 39. 1940, *Economic Botany* 11: 235–243. 1957, *The Indian Forester* 102: 579–595. 1976, *Fl. Ind. Enumerat.-Monocot.* 282. 1989

(Young buds crushed and the extract given for expelling intestinal worms in children.)

in English: tinwa bamboo

in Burma: tinwa

in India: ehechi, kodo bans, latang, madang, vedur

in Laos: khauz hla:m

in Thailand: khaao laam, khao lam, khui paang, khui pang, mai-pang, paang, pang, phai-khaolam, phai-khaolarm, wa blo, waa blo, wa phlong, waa phlong

Cephalostachyum virgatum (Munro) Kurz (*Cephalostachyum virgatum* Kurz; *Melocanna virgata* Munro; *Schizostachyum virgatum* (Munro) H.B. Naithani & Bennet)

Myanmar. Culm top slightly drooping, thin-walled, manifold branching at lower portion of culm, branches spreading horizontally, young culm pruinose, sheath auricles like narrow stripe, sheath blade narrow-lanceolate erect or turned outside down, leaves lanceolate, inflorescence borne on leafless branch, several to many groups of slender pseudospikelets at each node, culms used for matting, handles, household

utensils, in ware weaving used as rafters or strips, found growing in evergreen forests, some taxonomic problem for this plant

See *Transactions of the Linnean Society of London* 26(1): 133. 1868, Kurz, Sulpiz (1834–1878), *Preliminary report on the forest and other vegetation of Pegu* App. A. p. cxxxvii.; App. B. 94, in clavi. Calcutta: Lewis, 1875, *Forest Flora of British Burma* 2: 564–565. 1877 and *Indian Forester* 117(1): 68. 1991

(Vermifuge, anthelmintic.)

in Myanmar: waba

in Thailand: pai hia, phai hia, phai hiae

Cephalostigma A. DC. Campanulaceae

From the Greek *kephale* 'a head' and *stigma*, referring to the shape of the stigma; see *Novae Plantarum Species* 399. 1821, Alphonse Louis Pierre Pyramus de Candolle (1806–1893), *Monographie des Campanulées*. 117. Paris 1830 and *Symbolae Botanicae Upsaliensis* 21(1): 1–223. 1975, *Fl. Madagasc.* 187: 1–25. 1978.

Cephalostigma perrottetii A. DC. (*Cephalostigma perrottetii* Hook.f.; *Wahlenbergia perrottetii* (A. DC.) Thulin)

Tropical Africa, Nigeria. Herb, fragrant, lemon-scented

See *Monographie des Campanulées* 118. 1830, *J. Proc. Linn. Soc., Bot.* 7: 204. 1864 and *Symbolae Botanicae Upsaliensis* 21(1): 199. 1975

(Leaves analgesic, febrifuge.)

Cephalotaxus Siebold & Zucc. ex Endl. Cephalotaxaceae

From the Greek *kephale* 'a head' plus *Taxus* 'yew', referring to the appearance of the tree, see *Genera Plantarum* 2: 27. 1842, Endlicher, Istvan Laszlo (1804–1849), *Synopsis Coniferarum* 238. Sangalli, Apud Scheitlin & Zollikofer, 1847.

Cephalotaxus mannii Hook.f. (*Cephalotaxus griffithii* Hook.f.; *Cephalotaxus griffithii* Oliv., nom. illeg.; *Cephalotaxus hainanensis* H.L. Li)

China, India.

See *Icones Plantarum* 16, pl. 1523. 1886 [1886–1887 publ. Apr 1886], *The Flora of British India* [J.D. Hooker] 5(15): 648. 1888, *Hooker's Icones Plantarum* 20: t. 1933. 1890 [1891 publ. Oct 1890]

(Alkaloids, bark antiviral, for influenza, Newcastle disease, Japanese B encephalitis.)

in China: fei', hai nan cu, hai nan cu fei

Cephalotaxus sinensis (Rehder & E.H. Wilson) H.L. Li (*Cephalotaxus drupacea* Siebold & Zuccarini var. *sinensis* Rehder & E. H. Wilson; *Cephalotaxus drupacea* var. *sinensis* f. *globosa* Rehder & E.H. Wilson; *Cephalotaxus harringtonii* (Knight ex J. Forbes) K. Koch var. *sinensis* (Rehder & E.H. Wilson) Rehder; *Cephalotaxus sinensis* f. *globosa* (Rehder & E.H. Wilson) H.L. Li)

China.

See *Plantae Wilsonianae* 2(1): 3–4. 1914, *Journal of the Arnold Arboretum* 22: 571. 1941, *Lloydia* 16: 162. 1953 [1954], Cheng Wan-chün, Fu Li-kuo & Chao Chi-son. *Cephalotaxaceae*. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 423–436. 1978, *Acta Bot. Sin.* 37(2): 159–161. 1995

(Alkaloids, to treat leukemia and lymphosarcoma.)

in English: Chinese plum yew, plum yew

in China: cu fei, tu xiang fei

Cerastium L. Caryophyllaceae

Greek *kerastis*, *kerastes* ‘horned’, *keras* ‘horned’, *keras* ‘a horn’, the capsules are horn shaped; see Carl Linnaeus, *Species Plantarum*. 1: 437–440. 1753, *Genera Plantarum*. Ed. 5. 199. 1754 and *Fieldiana, Bot.* 24(4): 217–239. 1946, *Naturalia monspeliensia. Série Botanique*. 29: 1–64. 1979, *Taxon* 29: 729. 1980, *Bot. Zhurn.* 65(1): 51–59. 1980, *Bot. Zhurn.* 66(3): 380–387. 1981.

Cerastium arvense L. (*Cerastium arvense* Cham. & Schltldl., nom. illeg.; *Cerastium arvense* fo. *oblongifolium* (Torr.) Pennell; *Cerastium arvense* subsp. *arvense*; *Cerastium arvense* var. *arvense*; *Cerastium arvense* var. *arvensiforme* (Wedd.) In: Yü Te-tsun, ed., *Fl. Reipubl. Popularis Sin.* 36: 1–443; 37: 1–516; 38: 1–133. 1974, 1985, 1986

(Antifungal.)

in China: yu li

Ceratophala Moench Ranunculaceae

From the Greek *keras*, *keratos* 'a horn' and *kephale* 'head'.

Ceratophala testiculata (Crantz) Roth (*Ceratophala falcata* auct. non (L.) Pers.; *Ceratophala falcata* (L.) Pers. var. *orthoceras* (DC.) Aitch. & Hemsl. ex W.T. Wang & Tamura; *Ceratophala orthoceras* DC.; *Ceratophala reflexa* Steven; *Ceratophalus orthoceras* DC.; *Ceratophalus testiculatus* (Crantz) Roth; *Ranunculus falcatus* auct. non L.; *Ranunculus testiculatus* Crantz)

Europe. Annual herb

See *Species Plantarum* 1: 548–556. 1753, *Stirpium Austriarum Fasciculus* 2: 97. 1763, *Methodus Plantas Horti Botanici ...* 218. 1794, *Syn. Pl.* 1: 341. 1805, *Regni Vegetabilis Systema Naturale* 1: 231. 1818 [1817], *Enumeratio Plantarum Phaenogamarum in Germania* 1(1): 1014. 1827 and Olsen, J.D., Anderson, T.E., Murphy, J.C., Madsen, G. "Bur buttercup poisoning of sheep." *J. Am. Vet. Med. Assoc.*, 183: 538–543. 1983, Cusick, A.W. "Bur buttercup (*Ceratophalus testiculatus*: Ranunculaceae): a poisonous plant newly established in Ohio." *Mich. Bot.*, 28: 33–35. 1989, *Flora Mediterranea* 2: 258–264. 1992, *Flora of China* 6: 438. 2001

(This plant is considered highly toxic, contains ranunculin; this chemical changes into a toxic chemical when the plant is crushed; crushing the plant releases an enzyme that changes ranunculin, a glycoside, to protoanemonin, a highly irritant, yellow, volatile oil; this chemical is unstable and changes to nontoxic anemonin or volatilizes upon drying, leaving nontoxic plant material. Sheep have been poisoned and have died after ingesting aboveground plant material.)

in English: bur buttercup, curvseed butterwort

in China: jiao guo mao gen

Ceratonia L. Fabaceae (Caesalpiniaaceae, Cassieae, Leguminosae)

From *keratonia*, *keronia*, *keratea* Greek names for the carob-tree, *Ceratonia siliqua*, *keration* 'carat', referring to the shape of the fruit, a pod or siliqua; see Carl Linnaeus, *Species Plantarum*. 2: 1026. 1753, *Genera Plantarum*. Ed. 5. 450. 1754, Link, Johann Heinrich Friedrich (1767–1851), *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 2: 135. Berlin, 1829–1833 and G.B. Pellegrini, *Gli Arabismi Nelle Lingue Neolatine con Speciale Riguardo all'Italia*. Brescia 1972, *Kew Bull.* 35: 261–271. 1980, *Ann. Missouri Bot. Gard.* 68: 551–557. 1981, Harold Norman Moldenke & Alma L. Moldenke, *Plants of the Bible*. New York 1986.

Ceratonia siliqua L.

Mediterranean. Perennial non-climbing tree

See *Species Plantarum* 2: 1026. 1753 and *Fl. Libya* 60: 5. 1978, *Fitoterapia* 73(7–8): 674–684. 2002, *Journal of Medicinal Plants Research* 3(5): 424–428. 2009

(Pods used as astringent, antiproliferative, demulcent, emollient, purgative, expectorant, antioxidant, prescribed in cough and asthma; husk astringent, pectoral.)

in English: algarroba bean, carob, carob tree, locust-bean, locust tree, St. John's bread

in Arabic: kharnub, kharroub, kharrouba

in China: chang jiao dou

in India: kharnub

in Italian: carruba, carrubo

Ceratophyllum L. Ceratophyllaceae

From the Greek *keras*, *keratos* 'a horn' and *phyllon* 'a leaf', referring to the divisions of the leaves; see Carl Linnaeus, *Species Plantarum*. 2: 992. 1753, *Genera Plantarum*. Ed. 5. 428. 1754 and *Fieldiana, Bot.* 24(4): 242–243. 1946, *Fl. Zambesiaca* 9(6): 124–128. 1991, *Fl. Ecuador* 70: 27–29. 2003.

Ceratophyllum demersum L. (*Ceratophyllum demersum* var. *commune* A. Gray, nom. inval.; *Dichotophyllum demersum* (L.) Moench)

Cosmopolitan. Perennial, aquatic herb, submerged, long floating branches, small axillary flowers, fruits strongly warted armed with three horns, biofertiliser

See *Sp. Pl.* 2: 992. 1753, *Methodus*: 345. 1794 and *Fl. W. Pakistan* 70: 4. 1974, Kuan Ke-chien. *Ceratophyllaceae. Fl. Reipubl. Popularis Sin.* 27: 15–19. 1979, *Flora Zambesiaca* 9(6): 124–128. 1991

(Used in Ayurveda. Plant juice febrifuge, astringent, cooling, bitter, laxative, antipyretic, antiperiodic, a treatment for biliousness, jaundice, fever, ulcers, scorpion stings. Liniments made from the leaves used to treat dermatitis, elephantiasis, fever and sunburn.)

in English: cool water brush, coontail, hornwort

in China: jin yu zao shu, jin yu zao ke

in India: ambuchamar, ambutala, araka, hathaparni, haval, honaal, jalaja, jalakesa, jalakesha, jalakuntala, jalamandapi, jalanali, jalanchana, jalanili, jalaprishtaja, jalashuka, ka, karimpayal, kavara, manjula, nasu, neeti sambraani, saivala, saivalah, salilakundala, sevar, shaiwal, shaiwar, sheoyala, sheshana, shevala, shivala, sivara, souvala

Ceratophyllum demersum L. var. ***demersum*** (*Ceratophyllum aquaticum* H.C. Watson; *Ceratophyllum asperum* Lam., nom. illeg.; *Ceratophyllum cornutum* Rich.; *Ceratophyllum demersum* forma *demersum*; *Ceratophyllum demersum* forma *missionis* (Wight & Arn.) Wilmot-Dear; *Ceratophyllum demersum* f. *papillosum* Wilmot-Dear; *Ceratophyllum demersum* subvar. *tricornis* Nyman; *Ceratophyllum demersum* var. *inflatum* R.E. Fr.; *Ceratophyllum demersum* var. *oxyacanthum* (Cham.) K. Schum.; *Ceratophyllum demersum* var. *tricornis* Van Haes.; *Ceratophyllum gibbum* Laforet ex Nyman; *Ceratophyllum indicum* Willd. ex Cham.; *Ceratophyllum missionis* Wight & Arn.; *Ceratophyllum oxyacanthum* Cham.; *Ceratophyllum tricornis* Dumort., nom. illeg.; *Ceratophyllum tricuspdatum* Dumort.; *Ceratophyllum tuberculatum* Cham.; *Ceratophyllum verticillatum* Roxb.; *Ceratophyllum vulgare* Schleid., nom. illeg.)

Cosmopolitan.

See *Sp. Pl.* 2: 992. 1753, *Linnaea* 4: 504, t. 5 fig. 6b. 6d. 1829, *Linnaea* 11: 540. 1837, *Consp. Fl. Eur.*: 251. 1879, *Fl. Bras.* 3, 3: 748. 1894 and *Schwed. Rhod.-Kongo Exped.* 1: 41. 1914, *Kew Bulletin* 40: 261. 1985

(Antiinflammatory, antiseptic, febrifuge.)

Ceratopteris Brongniart Parkeriaceae (Pteridaceae)

Greek *keras*, *keratos* 'a horn' and *pteris* 'fern', referring to the foliage and to the appearance of this fern; see Adolphe Théodore Brongniart (1801–1876), in *Bulletin des Sciences, par la Société Philomatique de Paris*. 186. Paris, 1821 and *Fl. Trop. E. Africa* 1–4. 1999, *Bangladesh J. Plant Taxon.* 16(1): 47–56. 2009.

Ceratopteris pteridoides (Hooker) Hieronymous (*Ceratopteris lockhartii* (Hook. & Grev.) Kunze; *Ceratopteris parkeri* (Hook.) J. Sm.; *Ceratopteris parkeria* J. Smith; *Ceratopteris pteridoides* Underw.; *Parkeria lockhartii* Hook. & Grev.; *Parkeria pteridoides* Hooker)

China. Aquatic fern, young fronds used as a vegetable

See *Exot. Flora* 2: 147, pl. 147. 1825, *Icones Filicum* 1: t. 97. 1828, *Journal of Botany, being a second series of the Botanical Miscellany* 4: 70. 1842, *Linnaea* 23: 241. 1850 and *Bot. Jahrb. Syst.* 34(5): 561. 1905, *Brittonia* 26: 156. 1974

(Rhizomes and fronds used for fetal toxins and accumulation of phlegm.)

in English: floating fern

in Bangladesh: pani shak

in China: cu geng shui jue

Ceratopteris thalictroides (L.) Brongniart (*Acrostichum siliquosum* L.; *Acrostichum thalictroides* L.; *Belvisia siliquosa* (L.) Mirb.; *Ceratopteris cornuta* (P. Beauv.) Malaysia, China. Stout, fleshy, brittle, tufted fern, emergent or free-floating, rhizomes erect, uncurled young fronds eaten, green manure

See *Sp. Pl.* 2: 1070. 1753, *Journal für die Botanik* 1800(2): 65. 1801, *Histoire Naturelle des Végétaux*, Classés par Familles 5: 473. 1802, *Flore d'Oware* 1: 63. 1804, *Bull. Sci. Soc. Philom. Paris*, sér. 3, 8: 186. 1821, *Narrative of a Journey to the Shores of the Polar Sea* 767. 1823, *Exot. Fl.* 2: 147. 1825, *Mémoires de la Société Linnéenne de Paris* 6: 292. 1827 and *Philippine Journal of Science* 56(2): 107. 1935, *Webbia* 12: 645–704. 1957, *Ethnobotanical Leaflets* 11: 6–10. 2007

(Plant paste applied on cuts and wounds to check bleeding. Fronds as a tonic and for skin complaints. Tonic and styptic, rhizomes and fronds; for skin complaints, pound the leaves

and poultice; leaf powder along with turmeric applied to unhealed wounds, ulcers; fresh leaves extract taken to treat stomach disorders.)

in English: floating water fern, water fern, water-sprite

in China: shui jue

in Bangladesh: pani shak

in India: anneetha, churuli, panighas

in Japan: mizu-warabi (= water *Pteridium aquilinum*)

Malay name: paku roman

in the Philippines: pakong roman, pakong sungai, pakong tubig

in Thailand: phak-kha-kheit

Ceratostigma Bunge Plumbaginaceae

Greek *keras*, *keratos* 'a horn' and *stigma* 'stigma, mark, spot', referring to the excrescence on the stigma of the flowers, see *Enum. Pl. Chin. Bor.* 55. 1833.

Ceratostigma minus Stapf ex Prain (*Ceratostigma minus* fo. *lasaense* Peng)

China.

See *Journal of Botany, British and Foreign* 44(1): 7. 1907, *Guihaia* 3(4): 291. 1983, *Chin. Chem. Lett.*, 9(7): 647–649. 1998

(Antiinflammatory.)

in English: creeping ceratostigma

in China: xiao lan xue hua

Ceratostigma willmottianum Stapf

China.

See *Bot. Mag.* 140: t. 8591. 1914, *Zhongguo Zhong Yao Za Zhi*. [*China Journal of Chinese Materia Medica.*] 29(9): 882–886. 2004

(Antiviral, against *Herpes simplex* virus type 1 (HSV-1) in vitro. Plant used in Bach flower remedies.)

in English: shrubby plumbago, Willmott ceratostigma

in China: min jiang lan xue hua

Ceratotheca Endl. Pedaliaceae

Greek *keras*, *keratos* 'a horn' and *theke* 'a case', alluding to the horned fruit, see *Linnaea* 7: 5, t. 1, 2. 1832.

Ceratotheca sesamoides Endl. (*Ceratotheca melanosperma* Hochst. ex Bernh.; *Ceratotheca sesamoides* forma *latifolia* Engl.; *Ceratotheca sesamoides* var. *baoulensis* A. Chev., nom. nud.; *Ceratotheca sesamoides* var. *grandiflora* Berhaut;

Ceratotheca sesamoides var. *melanoptera* A. DC.; *Sesamum heudelotii* Stapf)

Senegambia, Guinea. Herb, hairy, prostrate to erect, woody-based, creeping, spreading, root a taproot quite swollen, each plant produces many branches from single root, fragrant, glandular, sticky, mucilaginous leaves lanceolate with broad base, calyx tinged purple, hairy capsules appressed flattened with two horns, shiny black seeds contain some oil, leaves eaten cooked, used during famine period, young capsules eaten, camel food, a weed of cultivation, in waste ground, sandy brown soil, in cultivated millet field

See *Species Plantarum* 2: 634. 1753, *Linnaea* 7: 5–8, f. 1–2. 1832, *Linnaea* 16: 32. 1842 and *Flora of Tropical Africa* [Oliver et al.] 4(2.3): 552. 1906, *Exploration Botanique de l'Afrique Occidentale Française* ... 489–490. 1920, *African Journal of Biotechnology* 5(19): 1785–1788. 2006, *Journal of Ethnopharmacology* 116(1): 43–48. 2008

(Plant for food poisoning; root for eye problems. Leaves antiviral, astringent, for diarrhea and dysentery, eaten as a vegetable act as a laxative; used to ease childbirth, easy delivery of childbirth, placed in vagina; soothes infant's diaper rashes, and smear on infants; leaves soaked in warm water and used as a lubricant by women during labor in order to hasten childbirth, the resulting slippery liquid applied on the walls of the birth canal to facilitate passage of the baby. Veterinary medicine.)

Ceratotheca triloba (Bernh.) E. Mey. (*Ceratotheca lamiifolia* (Engl.) Engl.; *Ceratotheca lamiifolia* Engl.; *Ceratotheca triloba* (Bernh.) E. Mey. ex Hook. f.; *Ceratotheca triloba*

Hook.f.; *Ceratotheca triloba* (Bernh.) Hook.f.; *Ceratotheca triloba* E. Mey. ex Bernh.; *Sporledera triloba* Bernh.)

South Africa. Herb, erect, softly pubescent, leaves whitish below, corolla pale lilac to white with darker purple spots and stripes inside throat

See *Linnaea* 7: 5. 1832, *Linnaea* 16: 29, 41–42. 1842, *Botanical Magazine* 114: t. 6974. 1888 and *Journal of Medicinal Plants Research* 2(9): 207–212. 2008

(Fruits and leaves antioxidant, antinfecive, antiseptic, cough sedative, antiinflammatory, antihypertensive, used for stomach and intestinal complaints.)

in English: Rhodesian foxglove, wild foxglove

in Southern Africa: inKunzanienkulu, uDonqa, uDonqabathwa, vingerhoedblom, vingerhoedbossie, wilde vingerhoedblom

in Swaziland: ludvonca, umdonqa

Cerbera L. Apocynaceae

Named for the mythical dog Cerberus (Kerberos), the three-headed monster which guarded the entrance to Hades, referring to the poisonous juice of the plant; see Carl Linnaeus, *Species Plantarum*. 1: 208–209. 1753 and *Genera Plantarum*. Ed. 5. 98. 1754, *Familles des Plantes* 2: 171. 1763, *Genera Nova Madagascariensia* 10. 1806, *Bijdragen tot de flora van Nederlandsch Indië* 1049. 1826, *Flora de Filipinas* 584. 1845 and *Feddes Repert.* 91(1–2): 45–55. 1980, *Taxon* 41: 560. 1992, *Taxon* 44: 611–612. 1995, *Wageningen Agricultural University Papers* 98(3): 1–64. 1999.

Cerbera floribunda K. Schum. (*Cerbera batjanica* Teijsm. & Binn. ex Valetton; *Cerbera micrantha* Kaneh.)

Sulawesi, Pacific.

See *Die Flora von Kaiser Wilhelms Land* 111. 1889, *Ann. Jard. Bot. Buitenzorg* 12: 247. 1895 and *Bot. Mag.* (Tokyo) 45: 343. 1931

(A muscle relaxant, used to treat malaria, hepatitis, blackwater fever, a complication of malaria.)

in Papua New Guinea: abumung

Cerbera manghas L. (*Cerbera forsteri* Seem.; *Cerbera lactaria* Buch.-Ham. ex D. Dietrich; *Cerbera linnaei* Montr.; *Cerbera manghas* f. *luteola* Boiteau; *Cerbera manghas* var. *acutisperma* Boiteau; *Cerbera manghas* var. *mugfordii* (F.M. Bailey) Domin; *Cerbera manghas* var. *samoensis* Hochr.; *Cerbera odollam* auct. non Gaertner; *Cerbera odollam* var. *mugfordii* F.M. Bailey; *Cerbera tanghin* Hook., nom. superfl.; *Cerbera venenifera* (Poir.) Steud.; *Cerbera venenifera* Steudel; *Elcana seminuda* Blanco; *Odollamia manghas* (L.) Raf.; *Odollamia moluca* Raf.; *Tabernaemontana obtusifolia* Poir.; *Tanghinia manghas* (L.) G. Don; *Tanghinia veneniflua* G. Don; *Tanghinia venenifera* Poir.)

Vietnam, Taiwan, Thailand, Tanzania. A shrub or tree, acrid latex, leaves narrowly obovate to elliptical, inflorescence few- to many-flowered, sepals very variable in shape and size, corolla tube narrowly infundibuliform, stamens inserted beneath the mouth, lanate scales, fruit consisting of 2 mericarps purplish-red or pale green, mangrove swamps and tidal river banks

See *Species Plantarum* 1: 208–211. 1753, *Tableau Enc.* 2: 300. 1792, *Genera Nova Madagascariensia* 10. 1806, *Encyclopédie Méthodique. Botanique ... Supplément* 5: 275–276, 283. 1817, *Botanical Magazine* 57: t. 2968. 1830, *A General History of the Dichlamydeous Plants* 4: 98. 1837, *Nomenclator Botanicus. Editio secunda* 1: 332. 1840, *Flora de Filipinas* 584. 1845, *Mémoires de l'Académie Royale des Sciences, Belles-Lettres et Arts de Lyon: Section des Sciences sér. 2* 10: 233. 1860, *Flora Vitiensis* 157. 1866 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 11/12: 35–135. 1908, *Annales de médecine légale, criminologie, police scientifique et toxicologie* 35(5):194–8. 1955, *Thérapie.* 23(1): 39–49. 1968, *Flore de Madagascar et des Comores* 169: 1–317. 1976, *Genetica* 68: 3–35. 1985, *Med. J. Aust.* 144(10): 540–4. 1986, *Arch. Int. Pharmacodyn. Ther.* 307: 83–91. 1990, *A revision of Tabernaemontana* 1–210. 1991, *Taxon* 41: 560. 1992, *Bioorg. Med. Chem. Lett.* 10(21): 2431–4. 2000, *Phytother. Res.* 16(4): 353–8. 2002, *J. Toxicol. Clin. Toxicol.* 41(3): 309–15. 2003, *Chem. Pharm. Bull.* (Tokyo). 52(8): 1023–5. 2004, *Journal of Ethnopharmacology* 123(3): 369–377. 2009

(Toxic, poison, morbidity and few deaths, cardiac glycoside poisoning. Cytotoxic cardenolide glycosides, inotropic effects. Poisonous seeds, severe vomiting, purging and collapse. Plant extracts used to treat ciguatera fish poisoning. Stem bark and latex analgesic, diuretic, arrow poison. Latex emetic, cathartic, rubefacient. Leaves and bark laxative and emetic. Root and bark purgative; scraped root used to treat liver disorders; a decoction of the inner bark drunk with cold water as an abortifacient. *Cerbera venenifera* has a long history as an ordeal poison. Antiproliferative and antiestrogenic principles. Oil from the seeds rubbed on the skin as a rubefacient, and as a cure for itching; also applied to the hair as an insecticide. Seeds used for stupefying fish.)

in English: common cerbera, dog-bane, odollam tree, ordeal tree, pink-eyed cerbera, sea mango, yellow-eyed cerbera

in Pacific: abumung, dranu toloni rewa, kabakaba, lagir, leva, rewa, savirewa, toto, vasa

in Madagascar: famentana, kibona (the seeds), kisopo, samanta, tangena, tanghin

in Burma (Myanmar): kalwa salat

in China: hai mang guo, niu xin qie zi

in India: caat aralie, cande, chattankaya, garna, garaunda, garji, hindaramba, kalachedi, kattarali, kodalma, kottuma, monde, sukanu, utalam

in Indonesia: bintan, bintaro, mangga brabu

in Japan: mi-fukura-gi, Okinawa-kyô-chiku-tô

in Malaysia: bebuta, bentan, bintan, bintaru, buta buta, nyan, pong pong

in Papua New Guinea: abumung

in Philippines: baraibai

in Thailand: rak khao, teenpet lek, teenpet sai

in Vietnam: hai qua tu, m[uw][ows]p s[as]t h[uw][owf]ng, m[uw][ows]p x[as]c h[uw][owf]ng

Cerbera odollam Gaertn. (*Cerbera dilatata* Markgr.; *Cerbera forsteri* Seem.; *Cerbera lactaria* Buch.-Ham. ex Spreng.; *Cerbera manghas* auct. non L.; *Excoecaria ovatifolia* Noronha, nom. nud.; *Odollamia malabarica* Raf.; *Tanghinia lactaria* (Buch.-Ham. ex Spreng.) G. Don; *Tanghinia odollam* (Gaertn.) G. Don)

Sri Lanka, India, Thailand, Pacific. A shrub or tree, leaves obovate, inflorescence few- to many-flowered, sepals very variable in shape and size, stamens inserted around the middle of the corolla tube, fruit consisting of 2 mericarps subglobose to broadly ellipsoid pale yellow-green or red, mangrove swamps and tidal river banks

See *Species Plantarum* 1: 208. 1753, *De Fructibus et Seminibus Plantarum...* 2(2): 193. 1791 and *Indian Heart J.* 17(3): 263–70. 1965 [Cardiotoxic effects of *Cerbera odollam*.], *J. Ethnopharmacol.* 34(2–3): 201–206. 1991 [Toxicity and effects on the central nervous system of a *Cerbera odollam* leaf extract.], *Phytochemistry.* 65(4): 507–510. 2004, *J. Ethnopharmacol.* 95(2–3): 123–126. 2004, *J. Ethnopharmacol.* 100(1–2): 138–139. 2005

(Used in Ayurveda and Sidha. Poisonous tree, containing cerberin as the main active cardenolide, cytotoxic cardenolide glycoside; plant poisoning, used both for suicide and homicide. Stem bark and roots for skin diseases and arrow poison. Bark, leaves and latex emetic and purgative. Fruits for rheumatism. Toxic seeds, the seed, and in particular the seed oil, toxic and strongly purgative. Seeds used for stupefying fish.)

in English: odallum tree, odollam tree, yellow-eyed cerbera

in Pacific: chiute

in Brunei: pong pong

in India: auddalakah, cande, cattankaya, chande, chat-tankaya, chatthankai, chende, chende hoo, chende mara, chinde mara, dabur, dhakur, honde, honde mara, kadalma, kadama, kadamothe, katalma, katarali, kattalari, kattarali, kattuma, kharo-uro, monde, odalam, odallam, odallum, otalam, otavalam, othalam, pilikirbir, pona, ponna, sukanu, svanamarah, tende, udalai, utalai, utalam

in Malaysia: bebuta, betah, bintan, buta-butua, goro mata boeta

in Thailand: sang la, teenpet nam, teenpet thale

in Vietnam: m[uw][ows]p s[as]t v[af]ng, m[uw][ows]p x[as]c v[af]ng

Cercestis Schott Araceae

Cercestes was a son of Aegyptus (Agyptos) and Phoenissa; see *Oesterreichisches Botanisches Wochenblatt* 7: 406, 414. 1857, *J. Bot.* 20: 194. 1882, *Bot. Jahrb. Syst.* 15: 449. 1892 and *Aroideana* 8(3): 73–79. 1986, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana.* 10: 15–25. 1988, *Willdenowia* 21(1–2): 35–50. 1991, Mayo, S.J., Bogner, J. & Boyce, P.C. *The genera of Araceae.* Royal Botanic Gardens, Kew, United Kingdom. 1997.

Cercestis afzelii Schott (*Cercestis afzelii* var. *latiloba* Engl.)

Tropical Africa. Terrestrial, epiphyte, sprawling, climber, dark red glossy fruits

See *Oesterr. Bot. Wochenbl.* 7: 414. 1857

(Febrifuge.)

in Ghana: batatwene, matatwene, Mmatatwene

Cercestis camerunensis (Ntépé-Nyamè) Bogner (*Rhektophyllum camerunense* Ntépé-Nyamè)

Tropical Africa, Gabon.

See *Adansonia*, n.s., 20: 454. 1981, *Aroideana* 8(3): 73. 1985 (publ. 1986)

(Leaves eaten to treat liver complaints. Leaf-sap taken for heart troubles and to stop vomiting.)

Cercestis mirabilis (N.E. Br.) Bogner (*Nephtytis picturata* N.E. Br.; *Rhektophyllum congense* De Wild. & T. Dur.; *Rhektophyllum mirabile* N.E. Br.)

Tropical Africa, Uganda. Climber, herbaceous, epiphytic, creeping, long adhesive clasping pendulous roots, leaves coriaceous, male flowers white, fruit pink-red, young leaves and inflorescences eaten as a vegetable, can be confused with *Cercestis camerunensis*

See *Journal of Botany, British and Foreign* 20: 195, t. 230. 1882, *Gardener's chronicle*, new series 1887(1): 476. 1887 and *Bulletin de l'Herbier Boissier* 1: 844. 1901, *Aroideana* 8(3): 73. 1985 (publ. 1986)

(Leaves eaten to treat liver complaints. Leaf-sap taken for heart troubles and to stop vomiting.)

Cercis L. Fabaceae (Caesalpinaceae, Cercideae, Leguminosae)

The Greek *kerkis* is the ancient name used by Theophrastus (*HP.* 1.11.2) for the Judas tree or redbud, *Cercis siliquastrum*, see *J. Arnold Arbor.* 29(2): 152–168. 1948, *J. Arnold Arbor.* 57(1): 1–53. 1976.

Cercis canadensis L. (*Cercis canadensis* Castiglioni; *Cercis canadensis* fo. *alba* Rehder; *Cercis canadensis* fo. *glabrifolia* Fernald; *Cercis canadensis* var. *canadensis*; *Cercis canadensis* var. *typica* M. Hopkins; *Cercis occidentalis* Torr. ex A. Gray; *Siliquastrum occidentale* (Torr. ex A. Gray) Greene)

North America. Perennial non-climbing tree or shrub

See *Species Plantarum* 1: 374. 1753, *Trait. Arb. Arbust.* 2: 263. 1755, *Viaggio Amer. Sett.* 1785–87(2): 223. 1790, *Boston J. Nat. Hist.* 6(2): 177–178. 1850, *Manual of the Botany of the Region of San Francisco Bay* ... 84. 1894 and *Mitt. Deutsch. Dendrol. Ges.* 1907: 72. 1907, *Trees & Shrubs Hardy in British Isles* 1: 334. 1914, *Rhodora* 38(450): 234. 1936, *Rhodora* 44(522): 200. 1942, *Ind. Gen. Vasc. Pl.* 1753–74(Regn. Veg.li) 81. 1967, *Taxon* 46(3): 466. 1997

(Bark astringent, a remedy for diarrhea and dysentery, vomiting, whooping cough, fever. Roots and inner bark infusions taken for fever, congestion.)

in English: California redbud, eastern red bud, Judas tree, redbud, western redbud

Cercis canadensis L. var. *texensis* (S. Watson) M. Hopkins (*Cercis canadensis* subsp. *texensis* (S. Watson) E. Murray; *Cercis occidentalis* Torr. ex A. Gray; *Cercis reniformis* A. Gray; *Cercis reniformis* Engelm. ex A. Gray, nom. nud.)

North America. Perennial non-climbing tree or shrub

See *Boston J. Nat. Hist.* 6(2): 177. 1850, *Smithsonian Miscellaneous Collections* 258: 209. 1878 and *Rhodora* 44(522): 203–204. 1942, *Kalmia* 12: 19. 1982

(Bark used for chills and fever.)

in English: Texas redbud

Cercis chinensis Bunge (*Cercis chinensis* Bunge fo. *chinensis* Bunge; *Cercis chinensis* f. *rosea* P.S. Hsu; *Cercis pauciflora* H.L. Li)

China. Perennial non-climbing tree, flowers rosy-pink

See *Species Plantarum* 1: 374. 1753, *Enum. Pl. Chin. Bor.* 21. 1833 [Mar. 1833], *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Petersbourg par Divers Savans et lus dans ses Assemblées* 2: 95. 1835 and *Bulletin of the Torrey Botanical Club* 71(4): 425. 1944, *Acta Phytotaxonomica Sinica* 11(2): 193. 1966

(Bark and flowers used for relieving rheumatic muscles and joint pain.)

in English: Chinese red bud, red bud

in Japan: hanazuo

in China: zi jing pi, tzu ching

Cercis siliquastrum L. (*Siliquastrum orbicularis* Moench)

S. Europe to E. Asia. Perennial non-climbing tree

See *Species Plantarum* 1: 374. 1753

(Aromatic, bitter, for catarrh, headache.)

in English: Judas tree, love tree

in Italian: albero di Giuda

in China: ching p'i, tzu ching

in Japan: seiyo-hanazuo

Cercocarpus Kunth Rosaceae

Greek *kerkos* 'a tail' and *karpos* 'fruit', referring to the tail-like plume of the fruits, see *Nova Genera et Species Plantarum* (quarto ed.) 6: 232–234, pl. 559. 1823[1824].

Cercocarpus intricatus S. Watson (*Cercocarpus intricatus* S. Watson var. *villosus* C.K. Schneid.; *Cercocarpus ledifolius* var. *intricatus* (S. Watson) M.E. Jones)

North America. Perennial shrub

See *Proceedings of the American Academy of Arts and Sciences* 10: 346. 1875, *Botanical Gazette* 5(12): 154. 1880

(Ceremonial.)

in English: littleleaf mountain mahogany

Cercocarpus ledifolius Nutt.

North America.

See *A Flora of North America: containing* ... 1(3): 427. 1840

(Poultice of powdered green wood applied to burns. Decoction of bark taken for gonorrhoea, stomachache.)

in English: curl-leaf mountain-mahogany

Cercocarpus ledifolius Nutt. var. *ledifolius* (*Cercocarpus ledifolius* Nutt. var. *hypoleucus* (Rydb.) M. Peck)

North America. Perennial tree or shrub

See *A Flora of North America: containing* ... 1(3): 427. 1840 and *Madroño* 32: 24–28. 1985

(Powdered green wood made into a paste applied to burns. Decoction of bark taken for diarrhea, tuberculosis; bark infusion taken for colds and coughs.)

in English: curl-leaf mountain-mahogany

Cercocarpus montanus Raf.

North America. Perennial tree or shrub

See *Ann. Lyceum Nat. Hist. New York* 2: 198–199. 1827, *Atlantic Journal* 1(4): 146. 1832

(Roots and bark used for stomach troubles.)

in English: alderleaf mountain mahogany

Cercocarpus montanus Raf. var. *montanus* (*Cercocarpus montanus* Raf. var. *flabellifolius* (Rydb.) Kearney & Peebles)

North America. Perennial tree or shrub

See *Ann. Lyceum Nat. Hist. New York* 2: 198–199. 1827, *Atlantic Journal* 1(4): 146. 1832 and *Madroño* 32: 24–28. 1985

(Plant decoction as a postpartum remedy. Ceremonial, sweat-house and male prayersticks.)

in English: alderleaf mountain mahogany

Ceriops Arn. Rhizophoraceae

Greek *keros* ‘wax’ with *opsis* ‘aspect, appearance’, probably referring to the waxy secretions exuded by some species; or from the Greek *keras* ‘horn’, in reference to the hypocotyl emerging from the fruit; see *Annals of Natural History*. 1: 363–364. 1838 and *Flora Malesiana* ser. 1(54): 445–493. 1958, *Caryologia* 48(3–4): 319–328. 1995.

Ceriops decandra (Griff.) Ding Hou (*Bruguiera decandra* Griff.; *Ceriops decandra* (Griff.) W. Theob.; *Ceriops decandra* Ding Hou; *Ceriops roxburghiana* Arn.)

Southeast Asia. Tree, straight, columnar, narrow crown, short basal buttresses, roots superficial, bark whitish or pale grey, branches jointed with swollen nodes, coriaceous leaves opposite clustered at the end of the twigs, flowers in head-like, deeply lobed calyx, white petals, stamens twice the number of calyx lobes, fruit an ovoid-conical berry, persistent erect or ascending calyx lobes, seeds viviparous, hypocotyl club-shaped, in tidal forest in high rainfall regions, mangrove swamp

See *Transactions of the Medical and Physical Society of Calcutta* 8: 10. 1836, *Not. Pl. Asiat.* 4: 663. 1854, *Burmah, its People and Natural Productions* ed. 3, 2: 480. 1860 [1883] and *Fl. Males.*, Ser. 1, Spermat. 5: 471. 1958, *Taxon* 34(1): 154. 1985

(Bark a source of tannin; a decoction applied externally to treat hemorrhages and indolent ulcers. Fresh leaves juice given to the mothers in abdominal pain after childbirth, a postpartum remedy.)

in English: flat-leaved spurred mangrove

in Brunei: tengar

in Burma: ka-pyaing

in Cambodia: smaè

in China: jiao guo mu shu

in India: garani, gharan, goran

in Indonesia: bido-bido, palun, tengar

in Malaysia: landing-landing, tengar

in Philippines: malatangal, tungung, tungug

in Singapore: tengar

in Thailand: kapuulong, prong khaao, samae manoh

in Vietnam: dzà

Ceriops tagal (Perr.) C.B. Robinson (*Ceriops boiviniana* Tul.; *Ceriops candolleana* Arn., nom. illeg.; *Ceriops candolleana* var. *sasakii* Hayata; *Ceriops candolleana* var. *spathulata* Blume; *Ceriops candolliana* Arn.; *Ceriops forsteniana* Blume; *Ceriops globulifera* Boivin ex Tulasne; *Ceriops lucida* Miq.; *Ceriops lucida* var. *latifolia* Miq.; *Ceriops lucida* var. *subspathulata* Miq.; *Ceriops pauciflora* Benth.; *Ceriops somalensis* Chiov.; *Ceriops tagal* C.B. Rob.; *Ceriops tagal* var. *australis* C.T. White; *Ceriops timoriensis* (DC.) Domin; *Rhizophora candel* Blanco; *Rhizophora tagal* Perr.; *Rhizophora timoriensis* DC.)

East Africa, SE Asia. Evergreen tree, single trunk, slender stem, compact crown, stilt roots, light brown bark, shiny leathery leaves, creamy white flowers, cymes on the terminal nodes of new shoots, deeply lobed calyx, stamens twice the number of calyx lobes, anthers much shorter than filaments, greenish fruit an ovoid berry, persistent reflexed calyx lobes, seeds viviparous, mangrove forests

See *Mémoires de la Société Linnéenne de Paris* 3: 138. 1824, *Flora de Filipinas* 396. 1837, *Annals and Magazine of Natural History* 1: 364. 1838, *Annales des Sciences Naturelles; Botanique*, série 4 6: 112. 1856, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 1: 325. 1861 and *Philippine Journal of Science* 3(5): 306. 1908, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 3: 115–116, pl. 20. 1913

(Bark astringent. Root decoction a substitute of quinine, also to stop hemorrhage and applied on malignant ulcers.)

in English: Indian mangrove, tagal mangrove (tagal is a common name for the plant in the East), yellow mangrove

in East Africa: mkandaa (Swahili)

in Southern Africa: isiNkaha, wortelboom

in Brunei: tengar

in Cambodia: smaè

in China: jiao guo mu

in India: ankandal, ankantal, chowri, gadara, garan, gatharu, geder, goran, kiraari, kosir, pandikutti

in Indonesia: tanggala tutu, tengar, tingi

in Malaysia: tengar

in Philippines: sambali-rongon, tangal, tongog

in Singapore: tengar

in Thailand: prong, prong daeng, samae

in Vietnam: dzà do, dzà vôi

Ceriscoides (Hook.f.) Tirveng. Rubiaceae

See *Gen. Pl.* 2: 90. 1873 and *Bulletin du Muséum d'Histoire Naturelle*, sér. 3, Bot. 35: 15. 1978.

Ceriscoides campanulata (Roxb.) Tirveng. (*Gardenia blumeana* DC.; *Gardenia campanulata* Roxb.; *Genipa campanulata* Baill.; *Genipa campanulata* (Roxb.) Baill.)

Bhutan, India. Spiny shrub, elliptic-ovate leaves, dimorphic campanulate flowers, fleshy ridged fruits, leaves used as vegetable

See *Hort. Bengal.* 15. 1814, *Flora Indica*: being a systematic account of the plants . . . ed. Carey & Wall., 2: 556. 1824, *Prodr.* 4: 383. 1830, *Fl. Ind.* ed. Carey, 1: 710. 1832, *FBI* 3: 118. 1880, *Histoire des Plantes* (Baillon) 7: 371. 1880 and *Bull. Mus. Natl. Hist. Nat.*, (Paris) Sér. 3, Bot. no. 521, 35: 16. 1978

(Fruits cathartic, anthelmintic. Crushed fruits as fish poison.)

in India: chauhau

Ceriscoides turgida (Roxb.) Tirveng. (*Gardenia donia* Buch.-Ham. ex Wall., nom. nud.; *Gardenia montana* Roxb.; *Gardenia turgida* Roxb.; *Gardenia turgida* var. *montana* (Roxb.) Hook.f.; *Randia turgida* (Roxb.) Tirveng.)

India, Vietnam. Small tree

See *Fl. Ind.* 2: 557. 1824, *Numer. List*: 8292. 1847, *Fl. Brit. India* 3: 108. 1880 and *Bull. Mus. Natl. Hist. Nat.*, Sér. 3, Bot. 35: 15. 1978, *Ceylon J. Sci., Biol. Sci.* 14(1–2): 5. 1981

(Whole plant in cholera, dysentery, fever, epilepsy, pneumonia, snakebite, smallpox. Emetic, eating the fruit; pulp pounded and applied to head for fever and abdominal colic. Root paste applied as an antidote to scorpion bite; root stomachic. Seeds powder given in case of food poisoning for its emetic property; seeds extract for diarrhea. Veterinary medicine, fruits juice squeezed into the ailing eyes of cattle to prevent lachrymation. Fruit as fish poison.)

in India: bangeri, bonagaare, bongeri, boodugaare, dandou kit, elkasettu, gangli, gurman, katolmaram, kharhar, khurphendra, kokkita, kukka elaka, kukkayelka, magge, mindhal, mullukokkita, pendra, pendri, petra, phanda, phethra, thanela, thanera, thella elaka, thellakokkita, tuddumunga, vangli, vettibikki, yerrabikki, yerribikki

Ceropegia L. Asclepiadaceae (Apocynaceae)

Greek *keros* 'wax' and *pege* 'a source, spring, origin, fountain', referring to the flowers or to the waxy appearance of the plant; see Carl Linnaeus (1707–1778), *Species Plantarum*. 211. 1753, *Genera Plantarum*. Ed. 5. 100. 1754 and Robert Allen Dyer (1900–1987), *Ceropegia, Brachystelma and Riocreuxia in Southern Africa*. Rotterdam 1983.

Ceropegia andamanica Sreek., Veenak. & Prashanth

South Andaman. Allied to *Ceropegia metziana* Miq.

See Sreekumar, P.V., Veenakumari, K., and Mohanraj Prashanth. "*Ceropegia andamanica* (Asclepiadaceae)—A

new 'fly trap flower' from Andaman islands, India." *Blumea* (Netherlands) 43(1): 215–217. 1998

(Insecticide.)

Ceropegia aristolochioides Decne. (*Ceropegia beccariana* Martelli; *Ceropegia crassula* Schltr.; *Ceropegia perrottetii* N.E. Br.; *Ceropegia seticorona* E.A. Bruce var. *dilatiloba* P.R.O. Bally; *Ceropegia seticorona* var. *seticorona*; *Ceropegia volubilis* N.E. Br. var. *crassicaulis* Huber)

Tropical Africa.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 263. 1838

(Stimulant, a wash for infants.)

Ceropegia bulbosa Roxb.

India. Tubers and leaves eaten uncooked

See *Plants of the Coast of Coromandel* 1: 11, pl. 7. 1795

(Used in Ayurveda. Tuberos roots refrigerant, tuber with sugar to increase vitality.)

in India: ankalodya, batchali dumpa, bittiruka, dúdha malida kand, gayala, gayli, gilodya, gilodayam, halike, hal-like, halluka, hedulo, hulluka, jeemi kanda, kaapar kaddha, kalodayam, khadula, khaparkaru, khapparkadu, langatai, malode, manchi mande, manchimanda, manchimande, manchimandu, mancimande, mande, manjimande, nimmataayi, nimmatayi, paalathige, palatige, patalathumbi, patalatumbi, thiyamande, tiyyamanda, tiyyamande

in Pakistan: galot

Ceropegia candelabrum L. (*Ceropegia candelabrum* B. Heyne ex Decne., nom. inval.; *Ceropegia candelabrum* Lour.; *Ceropegia candelabrum* Thwaites; *Ceropegia candelabrum* Roxb.)

India.

See *Hort. Malab.* 9: t. 16. 1689, *Species Plantarum* 1: 211. 1753, *Flora Cochinchinensis* 114. 1790, *Flora Indica*; or, descriptions of Indian Plants 2: 27. 1832, *A General History of the Dichlamydeous Plants* 4: 112. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 643. 1844, *Enumeratio Plantarum Zeylaniae* 199. 1864 and *Rev. Handb. Fl. Ceylon* 1: 53. 1973

(Tubers for bowel complaints of children.)

Ceropegia hirsuta Wight & Arnott (*Ceropegia hirsuta* Hochstetter ex Decaisne)

India. Twining herbs, tuberous, hairy, corolla inflated at the base

See *Contributions to the Botany of India* 30. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 644. 1844

(Tubers cooked and eaten as stomachic.)

in India: kharpudi, khutti

Ceropegia juncea Roxb.

India.

See *Plants of the Coast of Coromandel* 1: 12–13, t. 10. 1795 and s 30: 696. 1981

(Stem latex applied on the spot of any insect bite. Veterinary medicine, tubers ground with those of *Asparagus racemosus* given as galactagogue.)

in India: bellangada, thiralankodi

Ceropegia lugardiae N.E. Br. (*Ceropegia apiculata* Schltr.; *Ceropegia distincta* N.E. Br. subsp. *lugardiae* (N.E. Brown) Huber)

Tanzania. Herbaceous twiner, stem green with brown-purple patches and dots

See *Species Plantarum* 2: 211. 1753, *Bulletin of Miscellaneous Information Kew* 1895: 262. 1895 and *Gardener's Chronicle & Agricultural Gazette*, Ser. 3 30: 302. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 152. 1913

(Arrow poison, criminal poisoning.)

Ceropegia tuberosa Roxb. (*Ceropegia candelabrum* subsp. *tuberosa* (Roxb.) H. Huber; *Ceropegia candelabrum* var. *tuberosa* (Roxb.) N.P. Singh; *Ceropegia tuberosa* Wall.; *Ceropegia tuberosa* Dalzell & Gibson)

India. Tubers eaten raw or roasted

See *Plants of the Coast of Coromandel* 1: 12, t. 9. 1795, *A Numerical List of Dried Specimens* n. 8145 A. 1847, *The Bombay Flora* ... 154. 1861 and *Taxon* 30: 696. 1981, *Revised Handbook to the Flora of Ceylon* 4: 120. 1983, *Fl. E. Karnataka* 1: 410. 1988

(Used in Ayurveda.)

in India: baccaimande, bachalimanda, bachha manda, bachchalimandu, bachhalimanga, bellagada, bellamgadda, bhutumbi, bitharige, bittarige, bittarike, bittharike, bittiruka, devi, divyatumbi, gartalabu, gilodya, jatili, kanvel, khadula, langatai, manda, nagatumbi, nimmatai, paralatumbdi, patalatumbi, pullamanda, pullamanga dumpa, valmikasambhava

Cestrum L. Solanaceae

Greek *kestron* 'point, sting, graving tool' was used by Dioscorides to designate a Labiatae, *Stachys officinalis*, or some other plant; Plinius applied the Latin *cestros*, *i* to the betony; see Carl Linnaeus, *Species Plantarum*. 1: 191. 1753, *Genera Plantarum*. Ed. 5. 88. 1754, *Familles des Plantes* 2: 219. 1763, *Fl. Peruv. Prodr.* 21, t. 33. 1794, *Plantae Asiaticae Rariores* 3: 75, 78. 1832, *Linnaea* 8: 251–252. 1833, *Sylva Telluriana* 56. 1838, *Genera Plantarum* 667. 1839, *Linnaea* 19: 260. 1847 and *Symb. Antill.* 6(1): 249–279. 1909, *Candollea* 6: 46–398. 1935, *Fieldiana, Bot.* 24(10/1–2): 1–151. 1975,

Rodriguésia 45–49(71–75): 16. 1998 (1993–1997 publ. 1998), *Ann. Missouri Bot. Gard.* 85(2): 273–351. 1998.

Cestrum acuminatissimum Dunal (*Cestrum lorentense* Francey)

French Guiana, Colombia. Shrub, greenish-yellow flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(1): 627. 1852 and *Candollea* 6: 225–226. 1935

(Toxic.)

Cestrum aurantiacum Lindl. (*Cestrum aurantiacum* Steud.; *Cestrum aurantiacum* var. *chaculanum* (Loes.) Francey; *Cestrum chaculanum* Loes.; *Cestrum elegans* (Brongn.) Schldtl.; *Cestrum paucinervium* Francey; *Cestrum pedunculare* Pav. ex Dunal)

Tropical America. Shrub or tree, bark grey, corolla orange, sepals pale green, fruit white cream, a noxious weed, in riverine forest

See *Species Plantarum* 1: 191. 1753, *Nomenclator Botanicus Hortensis* (ed. 2) 1: 337. 1840, *Edwards's Botanical Register* 30(Misc.): 71. 1844, *Annales de Flore et de Pomone* 118. 1844, *Linnaea* 19: 261–262. 1847, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 618. 1852 and *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 65: 97–98. 1923, *Candollea* 6: 101–102, 104. 1935, *Journal of the Arnold Arboretum* 17: 341–349. 1936, *Plant Systematics and Evolution* 185: 259–273. 1993, *Journal of Cytology and Genetics* 33(2): 121–124. 1998

(Poisonous.)

in English: bastard jasmine, orange cestrum, yellow cestrum

in Hawaii: makahala

in China: huang hua ye xiang shu

Cestrum diurnum L. (*Cestrum album* Ferrero ex Dunal; *Cestrum diurnum* var. *fasciatiflorum* Dunal; *Cestrum diurnum* var. *fastigiatum* (Jacq.) Stehlé; *Cestrum diurnum* var. *odontospermum* (Jacq.) O.E. Schulz; *Cestrum diurnum* var. *tinctorium* (Jacq.) Maza; *Cestrum diurnum* var. *venenatum* (Mill.) O.E. Schulz; *Cestrum elongatum* Steud., nom. nud.; *Cestrum fastigiatum* Jan; *Cestrum fastigiatum* Jacq.; *Cestrum laurifolium* Fawc.; *Cestrum odontospermum* Jacq.; *Cestrum tinctorium* Jacq.; *Cestrum tinctorium* Griseb.; *Cestrum venenatum* Mill.; *Cestrum vespertinum* Lunan)

Mexico. Shrub, white flowers in peduncled axillary or terminal branched compound panicle, dark purple subglobose berry

See *The Gardeners Dictionary*: ... eighth edition no. 6. 1768, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 3: 44, 45, t. 330, 331, 332. 1798, *Nomenclator Botanicus Hortensis* 1: 337. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 604–605. 1852, *Anales de Historia Natural* 23: 269. 1894 and *Symbolae Antillarum* 6: 263–264. 1909

(Fruits narcotic. Leaves paste applied on skin diseases, a poultice on fracture.)

in English: Chinese inkberry, day-blooming cestrum, day cestrum, day jessamine

in India: nar pakal nayaki

in Mexico: juan de noche (Yucatán); pipiloxíhuítl, pipiloxóchitl (Aztec I., see Don Miguel Colmeiro, *Diccionario de los diversos nombres vulgares de muchas plantas usuales o notables del antiguo y nuevo mundo*. Madrid 1871)

in Pacific: tintan-China

Cestrum fasciculatum (Schltdl.) Miers (*Cestrum spigelioides* Zuccarini ex Francey; *Habrothamnus fasciculatus* (Schltdl.) Benth.; *Habrothamnus fasciculatus* (Schltdl.) Endl.; *Habrothamnus fasciculatus* (Schltdl.) Endl. ex Walp.; *Habrothamnus fasciculatus* (Schltdl.) M. Martens & Galeotti; *Meyenia fasciculata* Schltdl.)

Mexico.

See *Linnaea* 8: 251–252. 1833, *Genera Plantarum* 667. 1839, *Plantas Hartwegianas imprimis Mexicanas* 49. 1840, *Repertorium Botanices Systematicae*. 3: 122. 1845, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 12(1): 1845. 1845, *London Journal of Botany* 5: 151. 1846, *Linnaea* 19: 260. 1847 and *Candollea* 6: 113. 1935, *Pl. Syst. Evol.* 185: 133–151. 1993, *J. Cytol. Genet.* 33(2): 121–124. 1998

(Powdered fruit rind mixed with *Curcuma longa* powder and made into a paste applied on measles. Dried fruit ground with *Azadirachta indica* leaf and made into a paste applied against measles.)

in Mexico: hierba del perro

in India: ban baigun

Cestrum laevigatum Schltdl. (*Cestrum axillare* Vell.; *Cestrum foetidissimum* Dunal; *Cestrum laevigatum* var. *evolutum* Schlecht.; *Cestrum laevigatum* var. *pauperculum* Schltdl.; *Cestrum multiflorum* Schott ex Sendtn.; *Cestrum multiflorum* Roem. & Schult.; *Cestrum pendulinum* Hort. Monsp. ex Dunal; *Cestrum undulatum* Ruiz & Pav.; *Cestrum undulatum* var. *otites* Dunal)

Tropical America, Brazil. Lianescent shrub, tree, strong solanaceous odor, stems light green, smooth leaves light green, flowers greenish cream-yellow, corolla lemon yellow, fruits green to purplish-black

See *Flora Peruviana* 2: 28, t. 155. 1799, *Systema Vegetabilium*, editio decima sexta 4: 553. 1819, *Syst. Veg.* 1: 673. 1825, *Flora Fluminensis* 3: t. 6. 1827, *Linnaea* 7: 58. 1832, *Repert.* 3: 117. 1844–45, *Flora Brasiliensis* 10: 216. 1846, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 615, 630. 1852

(Toxic.)

in English: inkberry, inkberry bush, poison berry

in Brazil: coerana

in South Africa: cestrum, ink berry, inkbessie

Cestrum latifolium Lam. (*Cestrum albopunctatum* Dunal; *Cestrum albo-punctatum* Dunal; *Cestrum billbergianum* Beurl.; *Cestrum chloranthum* Dunal; *Cestrum floribundum* Roem. & Schult.; *Cestrum hirtum* Sieber ex Sendtn.; *Cestrum latifolium* var. *tenuiflorum* (Kunth) O.E. Schulz; *Cestrum oliganthum* Dunal; *Cestrum oliganthum* var. *latifolium* Dunal; *Cestrum ovatum* Roem. & Schult.; *Cestrum poeppigii* Sendtn.; *Cestrum priurei* Dunal; *Cestrum tenuiflorum* Kunth; *Cestrum tenuifolium* Francey; *Cestrum vespertinum* Griseb.)

West Indies.

See *Tableau Encyclopédique et Méthodique ... Botanique* 2: 5. 1794, *Nova Genera et Species Plantarum* (quarto ed.) 3: 61. 1818, *Systema Vegetabilium*, editio decima sexta 4: 807. 1819, *Flora Brasiliensis* 10: 210. 1846, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 635. 1852, *Kongl. Vetenskaps Academiens Handlingar* 40: 140. 1854[1856] and *Fl. Madagasc.* 17: 3–6. 1972, *Ann. Missouri Bot. Gard.* 60: 573–780. 1973

(Infusion of leaves baths for rashes, mange, boils, marasmus.)

in English: lady of the night

Cestrum nocturnum L. (*Cestrum hirtellum* Schltdl.; *Cestrum leucocarpum* Dunal; *Cestrum nocturnum* Duss; *Cestrum nocturnum* Griseb.; *Cestrum nocturnum* var. *mexicanum* O.E. Schulz; *Cestrum scandens* Thibaud ex Dunal; *Cestrum scandens* Vahl; *Cestrum suberosum* Jacq.)

South America. Shrub, small white flowers sweet scented

See *Species Plantarum* 1: 191. 1753, *Flora of the British West Indian Islands* 444. 1861 and *Symb. Antill.* 6(1): 249–279. 1909, *Fl. Pakistan* 168: 57. 1985, *Journal of Cytology and Genetics* 33(2): 121–124. 1998, *Journal of Wuhan Botanical Research* 16(3): 280–282. 1998

(Stem bark and leaves sedative, antimicrobial. Leaves and unripe fruits poisonous to sheep. Flowers cardiotoxic, included in a complex remedy for mental disorders.)

in English: family nightshade, lady of the night, night blooming cestrum, night cestrum, night jasmine, night jessamine

in Hawaii: 'ala aumoe, kupaoa, onaona Iapana

in Mexico: dama de noche, galán de noche, galán de tarde, huela de noche, parqui, pipilohuite; ak'ab-yom (Maya, Yucatán); ishcauico, ishcauico'ko, scauilojó (El Tajín); pipiloxíhuítl (Aztec I.); ijyocxibitl (Tetelcingo)

in Peru: galán de noche, palqui, parqui, quiebra olla

in China: ye xiang shu

in India: mirch, nalliravu nayaki, rat-ki-rani, rerani

in Indonesia: bunga sedap malam

in Japan: ya-kô-boku

in Philippines: dama de noche

Cestrum ochraceum Francey

Colombia. Treelet, bluish-purple fruits

See *Candollea* 6: 343–344. 1935

(Fruits infusion sudorific, in the treatment of rheumatic pains.)

Cestrum parqui L'Hér. (*Cestrum alternifolium* O.E. Schulz; *Cestrum alternifolium* (Jacq.) O.E. Schulz; *Cestrum camp-estre* Griseb.; *Cestrum conglomeratum* Ruiz & Pav.; *Cestrum foetidissimum* Jacq. var. *pallidissimum* Dunal; *Cestrum jamaicense* Lam.; *Cestrum jamaicense* var. *parqui* Lam.; *Cestrum lorentzianum* Griseb.; *Cestrum mandonii* Rusby; *Cestrum parqui* Benth.; *Cestrum parqui* fo. *heterophyllum* Kuntze; *Cestrum parqui* var. *glabriusculum* Kuntze; *Cestrum parqui* var. *longiflorum* Francey; *Cestrum parqui* var. *oranense* Scolnik; *Cestrum parqui* var. *tomentostipes* Kuntze; *Cestrum plicatum* Francey; *Cestrum pseudo-quina* Mart.; *Cestrum pseudoquina* Mart.; *Cestrum salicifolium* Jacq.; *Cestrum salicifolium* Kunth ex Spreng.; *Cestrum salicifolium* Hort. Monsp. ex Dunal; *Cestrum virgatum* Ruiz & Pav.; *Ixora alternifolia* Jacq.)

Tropical America, Venezuela, Peru. Shrub or treelet, flowers yellow to pale orange, mature fruits dark bluish-black

See *Species Plantarum* 1: 191. 1753, *Enumeratio Systematica Plantarum* 12. 1760, *Encyclopédie Méthodique, Botanique* 1: 687–688. 1783, *Encycl. (Lamarck)* 1(2): 687. 1785, *Stirpes Novae aut Minus Cognitae* 4: 73, pl. 36. 1788, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 3: 43, t. 329. 1798, *Flora Peruviana* [Ruiz & Pavon] 2: 27, t. 156. 1799, *Syst. Veg.* (ed. 16) [Sprengel] 1: 673. 1824 [dated 1825; publ. in late 1824], *Flora* 21(2, Beibl.): 66. 1838, *Plantas Hartwegianas imprimis Mexicanas* 24. 1839, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(1): 616. 1852, *Abh. Königl. Ges. Wiss. Göttingen* 19: 170, 217. 1874, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 244. 1879, *Revisio Generum Plantarum* 3(3): 219. 1898 and *Bulletin of the New York Botanical Garden* 4: 425. 1907, *Symbolae Antillarum* (Urban). 6: 270–272. 1909, *Candollea* 7: 1–132. 1936, *Revista Argent. Agron.* 21: 30. 1954, *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, *Flora Illustrada de Entre Ríos (Argentina)* 6(5): 346–452. 1979, *Darwiniana* 31: 261–297. 1992, *Cytologia* 62: 103–113. 1997

(Antihemorrhoidal, antitumor, diaphoretic, purgative, anti-spasmodic, a decoction or infusion to treat intermittent fevers; inner bark infusion drunk to cure stomach ailments. Stem of *Vitis vinifera* mixed with *Solanum nigrum* and *Cestrum parqui* and applied to treat inflammation. Toxic alkaloid, poisoning of livestock.)

in English: Chilean cestrum, green cestrum, green poison-berry, willow-leaved jessamine

in India: gabbi, partanga, patanga, raat ki rani, rat-ki-rani

in Argentina: duraznillo negro

in Bolivia: andrés huallya, fernandillo, hediondilla, karal-awa, palqui amarillo, palqui negro, rama verde, yerba buena

in Peru: palqui, parqui

Cestrum peruvianum Willd. ex Roem. & Schult. (*Cestrum affine* Kunth, nom. illeg.; *Cestrum granadense* Francey)

Peru.

See *Nova Genera et Species Plantarum* (quarto ed.) 3: 60. 1818, *Systema Vegetabilium* 4: 807. 1819 and *Candollea* 7: 17–18. 1936

(Leaves and flowers for fevers and influenza.)

in Ecuador: sauco

Cestrum reflexum Sendtner (*Cestrum floribundum* Britton, nom. illeg.; *Cestrum floribundum* Roem. & Schult.; *Cestrum reflexum* var. *densiflorum* Francey; *Cestrum ulei* Dammer)

Brazil, Colombia.

See *Systema Vegetabilium*, editio decima sexta 4: 807. 1819, *Flora Brasiliensis* 10: 218. 1846, *Memoirs of the Torrey Botanical Club* 6: 92. 1896 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 198. 1907, *Candollea* 6: 267–268. 1935, *Ann. Missouri Bot. Gard.* 60: 573–780. 1973, *Ann. Missouri Bot. Gard.* 85: 323. 1998

(Leaves and roots toxic.)

in Peru: saucap, yerba de Santa María

Cestrum tomentosum L.f. (*Cestrum ambatense* Francey; *Cestrum densiflorum* Francey; *Cestrum densiflorum* var. *puberulum* Francey; *Cestrum diasae* Pittier; *Cestrum granadense* Roem. & Schult.; *Cestrum hirsutum* Jacq.; *Cestrum lanatum* M. Martens & Galeotti; *Cestrum lanuginosum* Ruiz & Pav.; *Cestrum meridanum* Pittier; *Cestrum miersianum* sensu Francey; *Cestrum miersianum* Pittier; *Cestrum miersianum* Wedd.; *Cestrum moritzii* Dunal; *Cestrum mortonianum* J.L. Gentry; *Cestrum neomiersianum* Benítez; *Cestrum sesseoides* Francey; *Cestrum verbascifolium* Zucc. ex Francey)

South America, Colombia.

See *Supplementum Plantarum* 150. 1781[1782] and *Candollea* 6: 169. 1935

(Leaves and flowers infusion for colds and influenza.)

in Ecuador: judas superina, sauco

Ceterach Willd. Aspleniaceae

The Arabic name for *Ceterach officinarum*, see *Fl. Franc.* (DC. & Lamarck), ed. 3. 2: 566. 1805.

Ceterach officinarum Willd. (*Asplenium ceterach* L.; *Ceterach officinarum* (L.) DC.; *Grammitis ceterach* Sw.; *Gymnogramme ceterach* Spring; *Hemidictyum ceterach* Bedd.; *Scolopendrium ceterach* Symons; *Vittaria ceterach* Bernh.)

China.

See *Anleitung zum Selbststudium der Botanik* 578. 1804, *Flore Française*. Troisième Édition 2: 566. 1815, *Helios* 11(9): 133. 1893

(Whole plant antitussive, astringent and diuretic, for diseases of the urinary tract, bronchial complaints. Rhizome for enlargement of spleen, jaundice, incontinence of urine.)

in English: scale fern

in China: yao jue

Chaenomeles Lindley Rosaceae

Greek *chaino*, *chainein* 'to gape' and *melon* 'an apple', but the fruits don't split.

Chaenomeles sinensis (Thouin) Koehne (*Cydonia sinensis* Thouin; *Malus sinensis* Dum. Cours.; *Pseudocydonia sinensis* (Thouin) C.K. Schneider; *Pyrus cathayensis* Hemsley; *Pyrus chinensis* Sprengel; *Pyrus sinensis* (Thouin) Poiret)

China. Tree deciduous, sometimes as *Pseudocydonia sinensis*

See *Annales du muséum national d'histoire naturelle* 18: 145, pl. 8, 9. 1812, *Encyclopédie Méthodique. Botanique ... Supplément* 4: 452. 1816, *Systema Vegetabilium*, editio decima sexta 2: 516. 1825, *Journal of the Linnean Society, Botany* 23(155): 256. 1887, *Die Gattungen der Pomaceen* 29. 1890 and *Repertorium Specierum Novarum Regni Vegetabilis* 3(38–39): 181. 1906, *Syst. Bot.* 16: 388. 1991

(Fruits antitussive, antibacterial, to treat asthma, cold, sore throats, mastitis and tuberculosis.)

in English: Chinese quince

in China: mu gua

Chaenomeles speciosa (Sweet) Nakai (*Chaenomeles lagenaria* (Loisel.) Koidz.; *Cydonia japonica* (Thunberg) Persoon var. *lagenaria* (Loisel.) Makino; *Cydonia lagenaria* Loisel.; *Cydonia speciosa* Sweet; *Pyrus japonica* Thunb.)

China, Japan. Spiny shrub, deciduous, branched, glabrous, leaves alternate, flowers in clusters blooming before the leaves appear, fruit fleshy ovoid ligneous heavy very fragrant, exocarp purplish-red, sour pulp reddish-brown

China.

See *The Gardeners Dictionary ... Abridged ... fourth edition* (426). 1754, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 3: 208. 1780, *Syn. Pl.* 2: 40. 1807, *Traité des Arbres et Arbustes* [Nouvelle édition] 6: 255, pl. 76. 1815, *Hortus suburbanus Londinensis* 113. 1818, *Transactions of the Linnean Society of London* 13(1): 96, 97. 1821 and

Botanical Magazine 22(255): 64–65. 1908, *Botanical Magazine* 23(272): 173. 1909, *Japanese Journal of Botany* 4: 331–333. 1929

(Fruits analgesic, antiinflammatory, antispasmodic, astringent and digestive, used for vomiting and diarrhea, nausea, joint pains, cholera, abdominal pain, digestion, rheumatism.)

in English: Chinese quince, common flowering quince, Japanese quince

in China: mu gua, zha zi, zhou pi mu gua

in Japan: boke

in Tibetan: se yup

Chaerophyllum L. Apiaceae (Umbelliferae)

Greek *chairō* 'to rejoice, to please' and *phyllon* 'leaf', referring to the fragrant foliage and flowers, see *Species Plantarum* 1: 256–259. 1753 and *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Cytologia* 45: 389–402. 1980, *Taxon* 41: 560. 1992, *Taxon* 44: 611–612. 1995.

Chaerophyllum procumbens (L.) Crantz (*Chaerophyllum procumbens* Hook.; *Scandix procumbens* L.)

North America. Annual herb

See *Species Plantarum* 1: 257–258. 1753, *Class. Umbel. Emend.* 77. 1767 and *Amer. J. Bot.* 63(5): 608–625. 1976

(Poisonous root used as an emetic.)

in English: spreading chervil

Chaerophyllum procumbens (L.) Crantz var. *procumbens*

North America. Annual herb

See *Species Plantarum* 1: 257–258. 1753, *Class. Umbel. Emend.* 77. 1767 and *Amer. J. Bot.* 63(5): 608–625. 1976

(Poisonous root used as an emetic.)

in English: spreading chervil

Chaerophyllum reflexum Lindl. (*Chaerophyllum reflexum* Bush)

India. Erect herb, fleshy roots spindle-shaped, white polygamous flowers in compound umbels, roots edible, upper parts as fodder

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 233. 1835 and *Transactions of the Academy of Science of St. Louis* 12(6): 62–63. 1902

(Roots boiled and consumed for cough, cold and body pain, anemia, stomach problems.)

in India: bhai, lcha-wa, sojuga

Chaerophyllum villosum Wall. ex DC. (*Anthriscus boissieu* H. Lév.; *Chaerophyllum reflexum* Aitch.; *Chaerophyllum reflexum* Lindl.; *Chaerophyllum reflexum* Bush)

China, Afghanistan, Pakistan, India, Nepal and Bhutan. Annual, slender, perennial herb, white or pinkish flowers, plant as a whole used as fodder

See *Numer. List* [Wallich] n. 558. 1828, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 225. 1830, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 233. 1835 and *Transactions of the Academy of Science of St. Louis* 12(6): 62–63. 1902, *Journal of Research in Indian Medicine* 4(1): 68–72. 1969

(An adulterant of *Aconitum*.)

in China: xi ye qin

in India: khelti, methapatis, mithi patis, nyo, shakrag

Chaetachme Planchon Ulmaceae

Greek *chaite* ‘bristle, mane’ and *akme* ‘highest point’, possibly referring to the midrib or to the sharp, bristle-like point of the leaves; see Eve Palmer & Norah Pitman, *Trees of Southern Africa* 1: 433–434. Balkema, Cape Town 1972, *Bothalia* 29(2): 239–247. 1999.

Chaetachme aristata E. Mey. ex Planch. (*Chaetachme aristata* Planch.; *Chaetachme madagascariensis* Baker; *Chaetachme microcarpa* Rendle; *Chaetachme nitida* Planch. & Harv.; *Chaetachme serrata* Engl.)

East and South Africa. Tree or shrub, low branching, leaning, wide-spreading, woody climber with thorns, bark fibrous longitudinally ridged, drooping branches, leaves coriaceous, flowers tiny and yellow-white in cluster, anthers yellow-orange, fleshy fruits green to greyish-orange, fruits subglobose with two long brown erect styles

See *Annales des Sciences Naturelles; Botanique*, sér. 3 Bot. 10: 266, 341. 1848, *Journal of the Linnean Society, Botany* 21: 443. 1885 and *Flora of Tropical Africa* 6(2): 13. 1916, *Systematics Association Special Volume* 40(2): 131–135. 1989

(Bark used for piles, roots for toothache.)

in English: chaetachme, thorny elm

in Madagascar: hily, kisaka

in Southern Africa: basterwitpeer, doringolm, mula-nguluvhe (= wild-pig fodder), umBambangwe (= it catches the leopard), umBangabangwe, umBhangbangwe, umKhovothi, umKovoti

in Tanzania: kasemele

Chaetanthera Ruiz & Pavón Asteraceae

Greek *chaite* ‘bristle, loose flowing hair, long hair’ and *anthera* ‘anther’, alluding to the hairy anthers, see *Flora Peruviana, et Chilensis Prodromus* 106, pl. 23. 1794.

Chaetanthera sphaeroidalis Hicken (*Oriastrum sphaeroidale* Reiche)

Chile.

See *Nova Genera ac Species Plantarum* 3: 50. 1843 and *Anales Univ. Chile* 115: 339. 1904, *Flora de Chile* 4: 353. 1905, *Darwiniana* 1: 41. 1922, *Economic Botany* 37(1): 120–135. 1983

(Leaves infusion against cold and high altitude sickness.)

in Chile: flor de la puna

Chailletia DC. Dichapetalaceae (Chailletiaceae)

See *Nouv. Bull. Sci. Soc. Philom. Paris* 2: 205. 1811, *Ann. Mus. Natl. Hist. Nat.* 17: 153–159, f. 1. 1811, *Prodr.* 2: 58. 1825

Chailletia griffithii Hook.f.

India.

See *The Flora of British India* [J.D. Hooker] 1: 571. 1875

(Root decoction used as a postpartum remedy.)

Malay name: meroyan kabut

Chamabainia Wight Urticaceae

From the Greek *chamai* ‘on the ground, low, dwarf’ and *baino* ‘to go, to stand fast’, referring to the habit of the plant.

Chamabainia cuspidata Wight (*Boehmeria squamigera* Weddell; *Chamabainia cuspidata* var. *denticulosa* W.T. Wang & C.J. Chen; *Chamabainia cuspidata* var. *morii* (Hayata) W.T. Wang; *Chamabainia morii* Hayata; *Chamabainia squamigera* Weddell)

China.

See *Enumeratio Systematica Plantarum* 9, 31. 1760, *Icones Plantarum Indiae Orientalis* 6: 11, pl. 1981, f. 3(1). 1853, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 218. 1869 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 282–283. 1911, *Cytologia* 44: 799–808. 1979, *Acta Botanica Yunnanica* 3(1): 15–16, pl. 2–3, f. 2. 1981, *Cell and Chromosome Research* 12: 22–29. 1989

(To relieve abdominal pain.)

in China: wei zhu ma

Chamaecrista Moench Fabaceae (Caesalpiniaaceae, Cassieae)

Greek *chamai* ‘on the ground, dwarf’ and Latin *crista, ae* ‘a crest’, see *Methodus Plantas Horti Botanici ...* 272. 1794

and *Ann. Missouri Bot. Gard.* 38(1): 1–94. 1951, formerly in *Cassia*.

Chamaecrista absus (L.) H.S. Irwin & Barneby (*Cassia absus* L.; *Cassia babylonica* Schrank; *Cassia coccinea* Wall.; *Cassia exigua* (Roxb.) Steud.; *Cassia exigua* Roxb.; *Cassia foliolis* L.; *Cassia foliolosa* Benth.; *Cassia thonnin-gii* DC.; *Cassia viscida* Zoll.; *Grimaldia absus* (L.) Link; *Grimaldia opifera* Schrank; *Senna absus* (L.) Roxb.; *Senna exigua* Roxb.; *Senna quadrifolia* Burm.) (Latin *absum* 'to be away from, to be removed from')

Old World Tropics. Perennial non-climbing herb, shrub, variable, annual viscid-glandular, compound leaves, inflorescence a terminal or axillary raceme, cream to orange-yellow flowers, dark brown flat dehiscent pod, raw green pods eaten, weed of open pastures, waste places

See *Sp. Pl.* 1: 376. 1753, *Bot. Zeitung* (Regensburg) 4: 312. 1805, *Hort. Bengal.* [31], nomen. 1814, *Numer. List* [Wallich] n. 5315. 1831–32, *Nomencl. Bot.* [Steudel], ed. 2. 1: 305. 1840, *Trans. Linn. Soc. London* 27: 544. 1871 and *Webbia* 11: 197–292. 1955, *Journal of Natural Products* 42(3): 299–300. 1979, *Bot. Hist. Hortus Malabaricus*: 93. 1980, *Journal of Veterinary Pharmacology and Therapeutics* 3: 261–273. 1980, *Mem. New York Bot. Gard.* 35: 664. 1982, *Journal of Ethnopharmacology* 50: 55–59. 1996, *Flora Malesiana* I, 12, 2: 409–784. 1996, *Pharmaceutical Biology* 36(4): 237–279. 1998

(Used in Ayurveda, Unani and Sidha. Toxic alkaloids, cathartic, possibly harmful to livestock. Plant hypotensive, antimycotic, aphrodisiac, laxative, antifungal and antibacterial. Roots infusion for stomachache. Leaves astringent, analgesic, antimicrobial, bitter, a remedy for coughs and poisonous bites; fresh leaves decoction given for itches; dry powdered leaves for dressing ulcers, applied to eczema, ringworm, wounds, sores, abscesses, ulcers and venereal inflammations. Leaves and seeds in cough, ringworm, skin diseases. Seeds astringent, antimicrobial, stimulant, anti-tumour, diuretic, cooling, used in skin affections, to treat diabetes; dried seed powder or seed paste applied externally for eye infections, conjunctivitis. Veterinary medicine, leaves for diarrhea.)

in English: black grain, four-leaved senna, pig's senna, tropical sensitive-pea

in Namibia: niini

in Senegal: bu bun bu togan, bu géréte, bu géréte ébé (= ground-nut of cattle), diabañdur, ékâgol, korodièl

in India: adavihuli, arangakulithika, aranyakulatha, aranyakulathika, atavikanam, ayantiramakam, banar, bankultthi, bee chaksu, benar, cahnapalavithulu, caksu, caksusya, cannita, catacciyankam, catavu, catcuki, chaaksee, chakshu, chakshushya, chaksi, chaksoo, chaksu, chaksu pahadi, chakut, chamada, chanubala vittulu, chanupala-vittulu, chanupala vittulu, chanupalavittulu, chashmizaj, chashmizak, chashum, cheaksu, cheemaara, cheshmak, ciksi, chimar, chimas, chimed, chipita, chon, cimpikam, cintatiam,

citacamiyam, civappirota, drikaprasada, edikkol, elehuri, haalu beeja, halubija, hab-es-soudan, idi kollu, idikkol, itikkol, itikkolluceti, itukol, kaadu huliga, kaadu hurali, kaattukollu, kaattumuthira, kacakakkollu, kacakam, kacappukkol, kadu huliga, kanam, kanaanottha, kanbelaga, kankhuti, kankuti, kanna beeja, kannu kutukana beeja, kannu kutukina beeja, kanukudu, karin-kolla, karinkilla, karinkolla, karkkol, karkkoli, karkkolini, karkkoliniceti, karkoli, karpurattotiyam, karum, karunganam, karunkanam, karunkol, karunkollu, karuppukkol, karuppukollu, kattu-k-kollu, kattukko, kattukkol, kattukollu, kattukol, kattukollu, kattukolu, katuputukollu, katuputukolluceti, kulani, kulathanjana, kulatha, kulathika, kulattikai, kulattikalan, kulavilo, kulmasha, kumbhakarini, kummatari, kurubilwaka, kuttukol, lochanahita, malapaka, mulaipalyirai, mulaippal-virai, mulaippal vitai, mulaippalavirai, mulaippalvirai, mulaippalvitai, narkantaparpmakki, nirnalo, peykkollu, pirottattam, supal vel, tashmizaj, tashmizak, tekacitti, uppitanuku, uppitanukuceti, vaccatakaceti, vaccatakam, vanakulali, vanyakulatha, vanyakulathah

in Tibet: rgya snag nag po, rgya sran nag po

Chamaecrista biensis (Steyaert) Lock (*Cassia biensis* (Steyaert) Mendonça & Torre; *Cassia katangensis* (Ghesq.) Steyaert var. *biensis* Steyaert)

Namibia. Perennial non-climbing herb, woody rootstock, more or less erect, prostrate or decumbent, straggling, inflorescence an extra-axillary raceme, yellow flowers, erect compressed pod, foliage browsed by livestock

See *Bulletin du Jardin Botanique de l'État* 20: 260. 1950, *Boletim da Sociedade Broteriana*, ser. 2 29: 33. 1955, *Australian Journal of Experimental Agriculture* 27: 45–53. 1987, *Kew Bulletin* 43(2): 335. 1988, *Journal of Human Evolution* 49: 482–498. 2005

(Raw or boiled roots eaten to cure stomach disorders. Magic, ritual, lucky charm, used to bring luck.)

Chamaecrista falcinella (Oliv.) Lock (*Cassia falcinella* Oliv.)

Botswana, Namibia. Annual or perennial non-climbing herb, variable

See *Flora of Tropical Africa* 2: 281. 1871 and *Kew Bulletin* 43(2): 336. 1988

(A decoction of the pounded leaves drunk as a remedy for rheumatism. Pounded leaves mixed with *ghee* are rubbed on the skin to promote healing of broken bones. Pounded roots mixed with water and drunk to treat diarrhea.)

Chamaecrista fasciculata (Michx.) Greene (*Cassia brachiata* (Pollard) J.F. Macbr.; *Cassia chamaecrista* L.; *Cassia chamaecrista* fo. *hirsuta* Kuntze; *Cassia chamaecrista* fo. *pubicaulis* Kuntze; *Cassia chamaecrista* var. *robusta* Pollard; *Cassia depressa* Pollard; *Cassia fasciculata* Michx.; *Cassia fasciculata* fo. *jenseni* E.J. New York Bot. Gard.* 35: 664, 802. 1982, *Phytologia* 63(5): 410. 1987

(Toxic for grazing animals, large quantities can be somewhat poisonous when consumed by livestock. Leaves and seeds are purgative. Plant infusion stimulant, tonic, antiemetic, stomachic; a decoction to treat urinary tract infections. Moistened bruised leaves used topically for sores. A cold infusion of the mucilaginous pea pods to ease sore throats.)

in English: dwarf cassia, golden cassia, partridge pea, prairie senna, sensitive pea, showy partridge pea, sleeping plant

Chamaecrista gracilior (Ghesq.) Lock (*Cassia fallacina* Chiov. var. *gracilior* Ghesq.; *Cassia gracilior* (Ghesq.) Steyaert)

Tropical East Africa. Annual non-climbing herb

See *Bulletin du Jardin Botanique de l'État* 9: 144. 1932, *Kew Bulletin* 43(2): 333–342. 1988

(For cerebral malaria, a cold infusion from a dry powdered mixture of aerial parts of the plant with aerial parts of *Indigofera asparagoides* Taub. (*Microcharis asparagoides* (Taub.) Schrire), *Dissotis brazzae* Cogn., *Justicia matamensis* (Schweinf.) Oliv. (*Justicia anselliana* (Nees) T. Anderson), *Pentas zanzibarica* (Klotzsch) Vatke, *Rhynchosia minima* (L.) DC. and *Antherotoma naudinii* Hook. f.)

in Tanzania: mnkuza

Chamaecrista kirkii (Oliv.) Standl. (*Cassia kirkii* Oliv.; *Cassia wildemaniana* Ghesq.)

Tropical East Africa. Annual non-climbing herb, shrub, woody-based, yellow flowers

See *Flora of Tropical Africa* 2: 281. 1871 and *Smithsonian Miscellaneous Collections* 68(5): 5. 1917, *Bulletin du Jardin Botanique de l'État* 9: 154. 1932, *Food and Chemical Toxicology* 39(3): 287–291. 2001

(Leaves infusion or decoction drunk to remedy traumatic pains. Used to control insect pests of stored grain and legumes.)

in Ghana: lodel

in Tanzania: kashenganzili

Chamaecrista kleinii (Wight & Arn.) V. Singh (*Cassia dimidiata* sensu auct. non Roxb. nec G. Don; *Cassia kleinii* Wight & Arn.; *Cassia kleinii* Wight & Arn. var. *pilosa*

Thwaites; *Chamaecrista kleinii* (Wight & Arn.) K.M. Matthew)

India. Perennial non-climbing herb

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 293. 1834 and *Flora of Ceylon* 7: 34–107. 1991, *Journal of Economic and Taxonomic Botany* 16(3): 600. 1992, *Kew Bull.* 48(4): 757–765. 1993, *J. Cytol. Genet.* 29(2): 173–176. 1994

(Astringent.)

in India: malam-todda-vadi, nela tangedu

Chamaecrista kunthiana (Schltdl. & Cham.) H.S. Irwin & Barneby (*Cassia ciliaris* Collad.; *Cassia humilis* Steud.; *Cassia humilis* Willd. ex Steud., nom. illeg.; *Cassia kunthiana* Schltdl. & Cham.; *Cassia tagera* L.; *Chamaecrista tagera* (L.) Standl.; *Tagera filiformis* Raf.)

South America, Mexico. Perennial non-climbing herb, tiny leaflets, flowers yellow-orange

See *Species Plantarum* 1: 376–380. 1753, *Histoire Naturelle et Médicale des Casses* 96. 1816, *Linnaea* 5: 598–599. 1830, *Sylva Telluriana* 129. 1838, *Nomenclator Botanicus*. Editio secunda 1(3): 305. 1840 and *Contributions from the United States National Herbarium* 18(3): 104. 1916, *Memoirs of the New York Botanical Garden* 35: 724. 1982, *Economic Botany* 42(1): 16–28. 1988

(Healing wounds, leaves crushed and applied; leaves infusion taken for uro-genital problems.)

Chamaecrista lateritica (R. Vig.) Du Puy (*Cassia capensis* Thunb. var. *humifusa* sensu Ghesq.; *Cassia mimosoides* L. var. *filipendula* sensu Ghesq.; *Cassia mimosoides* var. *lateritica* R. Vig.)

Madagascar. Perennial non-climbing herb, yellow flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 503. 1825 and *Notulae Systematicae*. Herbar du Museum de Paris 13(4): 350. 1948, *Kew Bulletin* 50(3): 581–584. 1995, *Blumea* 51(2): 199–220. 2006

(Leaf infusion taken against stomachache.)

in Madagascar: fanivana, fanotonomadro, kelimanjakalanitra, kisendrisendry, kitenotenona, manjakabenitany, sendrisendry, tsitambamba

Chamaecrista mimosoides (L.) Greene (*Cassia angustissima* Lam.; *Cassia mimosoides* L.; *Cassia nictitans* sensu Stickman; *Cassia procumbens* sensu Stickman; *Cassia sensitiva* Roxb.)

Continental S.E. Asia. Perennial non-climbing shrub, erect to decumbent herb, pubescent, leaves sensitive, glandular leaves leaflets linear, yellow flowers, flat linear pods, dried leaves as a substitute of tea, closely related to *Chamaecrista lechenaultiana*

See *Bull. Misc. Inf., Kew*: 146–151. 1849, *J. Linn. Soc. Bot.* 25: 1–107. 1889 and *Webbia* 11: 197–292. 1955, *Kew Bulletin*

43: 333–342. 1988, *Nordic J. Bot.* 8: 457–488. 1989, *Flora of Ceylon* 7: 34–107. 1991

(Toxins. Plant paste applied for leprosy. Fresh leaf extract in treating sore eyes; leave juice applied on wounds in the ear; leaves poultice to reduce swellings. Roots used for treating dysentery, spasms, stomach complaints; root extract drunk for cough, colic, stomachache. Crushed leaves and stems as fish poison.)

in English: fish-bone cassia, gold flower, patwa grass, tea senna

in South America: huaranhilllo

in China: han xiu cao jue ming

in India: bin siyambala, birbiri, ikrar, nelaponna, nelathangadi, ot-kondro, otkondro, patwaghas, silkhun

in Indonesia: dinding, palia tunggal, tuturiyan

Greene; *Chamaecrista riparia* (Kunth) Britton; *Nictitella amena* Raf.)

Mexico, Belize, Costa Rica. Perennial non-climbing shrub, petiole gland stalked positioned below the last pair of leaflets, yellow flowers, for soil stabilisation and forage

See *Species Plantarum* 1: 380. 1753, *Species Plantarum*, Editio Secunda 1: 543. 1762, *Methodus Plantas Horti Botanici ...* 272. 1794, *Histoire Naturelle et Médicale des Casses* 127, pl. 17. 1816, *Nova Genera et Species Plantarum* (quarto ed.) 6: 369–370. 1823[1824], *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 2(2): 130–131. 1824, *Sylva Telluriana* 128. 1838, *Flora Brasiliensis* 15(2): 174. 1870, *Transactions of the Linnean Society of London* 27: 579. 1871, *Revisio Generum Plantarum* 1: 169. 1891, *Bulletin of the Torrey Botanical Club* 22(12): 515, pl. 250, 252, f. 3. 1895, *Bulletin of the Torrey Botanical Club* 24(3): 151. 1897, *Pittonia* 3(17C): 243. 1897, *Pittonia* 4(20D): 28, 32. 1899 and *Catalogue of North American Plants North of Mexico* (ed. 2) 5. 1900, *Proceedings of the Biological Society of Washington* 14: 163. 1901, *Proceedings of the American Academy of Arts and Sciences* 41(9): 239. 1905, *Annals of the Missouri Botanical Garden* 2: 41. 1915, *Bulletin of the Torrey Botanical Club* 44(1): 9, 11. 1917, *Repertorium Specierum Novarum Regni Vegetabilis* 15: 313–314. 1918, *Contributions from the Gray Herbarium of Harvard University* 59: 25. 1919, *North American Flora* 23(5): 294, 298. 1930, *Rhodora* 38(456): 423, pl. 448, f. 1–3, 5. 1936, *Boissiera*. 7: 2. 1943, *Memoirs of the New York Botanical Garden* 35(2): 829, 833–834. 1982, *Phytologia* 63(5): 411. 1987, *Revista de Biología Tropical* 52(3): 807–816. 2004

(Stimulant, tonic, febrifuge, antiviral activity against *Herpes simplex* virus, a remedy for stomachache and fever.)

in English: partridge pea, sensitive partridge-pea, sensitive-pea, wild sensitive-plant

in Hawaii: lauki

Chamaecrista nigricans (Vahl) Greene (*Cassia nigricans* Vahl)

Tropical Africa. Annual non-climbing herb, woody undershrub

See *Symbolae Botanicae, ...* 1: 30. 1790, *Pittonia* 4(20D): 30. 1899 and *Webbia* 26: 1–99. 1971, *J. Econ. Taxon. Bot.* 10: 321–327. 1987, *Kew Bulletin* 43: 333–342. 1988, *Journal of Cytology and Genetics* 28: 1–5. 1993, *Journal*

of Ethnopharmacology 62(2): 123–127. 1998, *Fitoterapia* 72(3): 206–214. 2001, *Food and Chemical Toxicology* 39(3): 287–291. 2001, *Indian Journal of Pharmacology* 33: 350–356. 2001, *Pharmaceutical Biology* 40(2): 117–128. 2002, *Journal of Ethnopharmacology* 108(2): 161–184. 2006, *Journal of Ethnopharmacology* 126(3): 492–499. 2009

(Insecticidal, contraceptive, antifungal, antibacterial, anti-malarial, analgesic, sedative, laxative, vermifuge, febrifuge, antiinflammatory, for skin diseases, peptic ulcers, stomachache, diarrhea, worms. Used to control insect pests of stored grain and legumes. Veterinary medicine, insecticide.)

in Burkina: arazantia, tuntwo, zambrekunda, zandre kuka

in Gambia: sila talo

in Ghana: lodel

in Guinea: macarra bubel, mamcarra- bubel, sila talô

in Kenya: okeke

in Mali: jala ninkuma, jalaninkuna, niokorokalani, orignele, origuele, singiagel, singinanguel

in Niger: àda pelu, daddori, gewaya tsamiya, gwaya tsamia, néngalbubel, niangari bubu, nya'ngal, nya'ngal bubu, nyanngal buubi, zohégar

in Nigeria: gwaya, madacin kasa, sodegi

in Senegal: bembehuey, diala ni nguna, diala ni nkuna, diumbèmbèwèy, dyubembehu, gen gélib, heb eddbae, koro diala ni, las gélib, māgarabubèl, makarabubèl, mbamar fondièdi, mbamar fosedì, mbèndum, ñokoro, singiāgel

in Sudan: aradeebo

in Tchad: kadekolé

in Uganda: achack, ayebi, epeduru loicici, guissa-lè, kissa-lè

Chamaecrista pumila (Lam.) K. Larsen (*Cassia prostrata* Roxb.; *Cassia pumila* Lam.; *Cassia pumila* Pittier, nom. illeg.; *Cassia pumila* F. Muell., nom. illeg.; *Chamaecrista pumila* (Lam.) V. Singh; *Senna prostrata* Roxb.)

India, Thailand. Perennial non-climbing shrub, procumbent or erect woody herb or shrub, bright yellow flowers, linear pods, ground cover

See *Encyclopédie Méthodique, Botanique* 1(2): 651. 1783, *Fragmenta Phytographiae Australiae* (Mueller) 3(19): 47. 1862 and *Trabajos del Museo Comercial de Venezuela* 3: 152. 1928, *Webbia* 11: 197–292. 1955, *Bull. Bot. Surv. India* 18: 85–101. 1979, *Journ. Econ. & Tax. Bot.* 16(3): 599–600. 1992, *Nordic Journal of Botany* 13(4): 403–404. 1993

(Pods paste applied on forehead to cure headache. Seeds used as purgative. Veterinary medicine, plants given to cows and buffaloes as a galactagogue; leaf powder tied on neck of cows and buffaloes to keep off the evil.)

in China: bing xian shan bian dou

in India: aabala, chota aura, chamediyum, chamediyun, nal-lajeelooga, nallajilluga, nalljiluga, nallajiuga, nela thagasi, nelatagace, nelatagache, otemasuria, otcondro, pirimasuria, sarmal, supalichavel, supalyel

in Indonesia: enceng-enceng

in Thailand: makham-bia, makham din

in Vietnam: me d[aa]s]t, me dat

Chamaecrista rotundifolia (Pers.) Greene (*Cassia bifoliolata* Collad.; *Cassia bifoliolata* DC. ex Collad.; *Cassia fabaginifolia* Kunth; *Cassia monophylla* Vell.; *Cassia pentandra* Raddi; *Cassia pentandria* Larrañaga; *Cassia rotundifolia* Pers.; *Cassia rotundifolia* var. *grandiflora* Benth.; *Cassia tenuivenosa* M.E. Jones; *Chamaecrista bifoliolata* (Collad.) Greene; *Chamaecrista bifoliolata* (DC. ex Collad.) Greene)

Tropical America, Guinea, Ghana. Perennial non-climbing herb, more or less woody, weed, yellow axillary flowers

See *Synopsis Plantarum* 1: 456. 1805, *Histoire Naturelle et Médicale des Casses* 120. 1816, *Nova Genera et Species Plantarum* (quarto ed.) 6: 363–364. 1823, *Florae Fluminensis* 166. 1825, *Annales des Sciences Naturelles* (Paris) 1(9): 439. 1826, *Pittonia* 4(20D): 31. 1899 and *Contributions to Western Botany* 18: 41. 1933

(Leaves poultice applied to contusions, urticaria.)

in China: yuan ye jue ming

Chamaecrista zambesica (Oliv.) Lock (*Cassia zambesiaca* Oliv.; *Chamaecrista hildebrandtii* (Vatke) Lock)

Kenya, Tropical Africa. Perennial non-climbing herb, creeping, yellow flowers

See *Flora of Tropical Africa* 2: 280. 1871 and *Kew Bulletin* 43(2): 338. 1988

(Leaves and roots used as a cathartic against the intestinal protozoal parasite *Giardia lamblia*.)

Chamaedaphne Moench Ericaceae

Dwarf laurel, from the Greek *chamai* ‘dwarf’ and *daphne* ‘the bay laurel tree’.

Chamaedaphne calyculata (L.) Moench (*Andromeda calyculata* L.; *Cassandra calyculata* (Linnaeus) D. Don; *Cassandra calyculata* var. *angustifolia* (Aiton) Seymour; *Cassandra calyculata* var. *latifolia* (Aiton) Seymour; *Chamaedaphne calyculata* var. *angustifolia* (Aiton) Rehder; *Chamaedaphne calyculata* var. *latifolia* (Aiton) Fernald; *Chamaedaphne calyculata* var. *nana* (Lodd.) E. Busch)

China, Subarctic America, North America. Perennial shrub, low, evergreen, rhizomatous shrublet, tiny white bell shaped flowers

See *Species Plantarum* 1: 394. 1753, *Methodus Plantas Horti Botanici ...* 457. 1794, *Edinburgh New Philosophical Journal* 17(33): 158. 1834

(Antiphlogistic, febrifuge, poultice of the leaves applied to inflammations, leaves infusion to treat fevers.)

in English: cassandra, leather-leaf

in China: di gui

Chamaelirium Willd. Melanthiaceae (Liliaceae)

From the Greek *chamai* ‘on the ground, low, dwarf’ and *leirion* ‘a lily’, see *Harvard Pap. Bot.* 2:149–152. 1997.

Chamaelirium luteum (L.) A. Gray (*Abalon albiflorum* Raf.; *Abalon albiflorum* var. *obovatum* Raf.; *Abalon albiflorum* var. *pumilum* Raf.; *Abalon albiflorum* var. *serpentarium* Raf.; *Abalon albiflorum* var. *spicatum* Raf.; *Abalon albiflorum* var. *sylvaticum* Raf.; *Chamaelirium carolinianum* Willdenow; *Chamaelirium luteum* Miq., nom. illeg.; *Chamaelirium obovale* Small; *Chionographis lutea* (L.) Baill.; *Dasurus luteus* (L.) Salisb., nom. inval.; *Diclinotrys albiflorum* Raf.; *Helonias dioica* (Walter) Pursh; *Helonias lutea* (L.) Ker Gawl.; *Helonias pumila* Jacq.; *Melanthium dioicum* Walter; *Melanthium luteum* (L.) Thunb.; *Ophiostachys virginica* Delile; *Siraitos luteus* (L.) F.T. Wang & Tang; *Veratrum flavum* Herb. ex Schult. & Schult.f.; *Veratrum luteum* Linnaeus)

North America. Perennial

See *Species Plantarum* 2: 1044–1045. 1753, *Flora Japonica*, ... 152. 1784, *A Manual of the Botany of the Northern United States* 503. 1848, *Annales Museum Botanicum Lugduno-Batavi* 1: 144. 1863, *Genera Plantarum* 51. 1866, *Histoire des Plantes* 12: 593. 1894 and *Torreyia* 1: 108. 1901, *Contributions from the Institute of Botany, National Academy of Peiping* 6: 109. 1949

(Diuretic, emetic, uterine tonic, vermifuge, in the treatment of amenorrhea, dysmenorrhea and leucorrhea.)

in English: blazing star, devil’s-bit, fairy-wand, false unicorn root, rattlesnake-root, unicorn root

Chamaemelum Miller Asteraceae

Greek *chamai* ‘on the ground, low, dwarf’ and *melon* ‘an apple’, Latin *chamaemelon* and Greek *chamaimelon* ‘earth-apple, camomile, chamomilla’; see Philip Miller (1691–1771), *The Gardeners Dictionary ...* Abridged ... fourth edition vol. 1. 1754, *Fam. Pl.* (Adanson) 2: 128. 1763, *Dict. Sc. Nat.* 29: 179, 185. 1823, *Giornale Botanico Italiano* 2: 33. 1845 and *Rep. Bot. Exch. Cl. Brit. Isles*, 3: 430. 1913, *Candollea* 43(1): 124. 1988.

Chamaemelum nobile (L.) All. (*Anthemis nobilis* L.; *Chamaemelum nobile* L.; *Chamaemelum nobile* All.)

Europe.

See *Species Plantarum* 2: 893–896. 1753, *Flora Pedemontana* 1: 185. 1785

(Used in Ayurveda, Unani and Sidha.)

in English: chamomile, common chamomile, English chamomile, garden chamomile, Roman chamomile, true chamomile

in India: ai, babuna, babunah, babunaj, camanti, cankacut-tam, chamaindoo poo, cimai camandi, cimai camanti, cimai camantippu, cimaiccamanti, gul babuna, gule-babunah, kuranku, utacamanti

in Brazil: camomila nobre, camomila odorante, camomila verdadeira, macela dourada

Chamaemelum nobile (L.) All. var. ***discoideum*** (Boiss. ex Willk.) A. Fern. (*Chamaemelum nobile* var. *discoidea* All.; *Chamaemelum nobile* var. *discoidea* (Boiss.) P. Silva)

Europe.

See *Fl. Descr. Anal. Paris* 397. 1845 and *Sida* 17(3): 627–629. 1997

(Flower-heads infusion as stomachic.)

Chamaerhodos Bunge Rosaceae

Greek *chamai* ‘on the ground, low, dwarf’ and *rhodon* ‘rose’, see *Bot. Zhurn.* 65 (5): 659–668. 1980, *Taxon* 51(2): 544. 2002.

Chamaerhodos erecta (Linnaeus) Bunge (*Chamaerhodos micrantha* J. Krause; *Chamaerhodos songarica* Juzepczuk; *Sibbaldia erecta* Linnaeus)

China.

See *Species Plantarum* 1: 284. 1753, *Flora Altaica* 1: 430. 1829 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 12: 411. 1922, *Flora URSS* 10: 615. 1941

(Antiseptic.)

in English: little rose

in China: di qiang wei

Chamaerops L. Arecaceae (Palmae)

Greek *chamai* ‘on the ground, low’ and *rhops* ‘a bush’, clump-forming; Latin *chamaerops* and Greek *chamairops* for *chamaedrys* (Plinius), Latin *chamaerepes* and Greek *chamairepeis* for the dwarf palm (Plinius).

Chamaerops humilis L. (*Chamaerops humilis* L. var. *argentea* André; *Phoenix humilis* (L.) Cav.)

Mediterranean.

See *Species Plantarum* 2: 1187. 1753, *Icones et Descriptiones Plantarum, quae aut sponte ...* 2: 12. 1793 and *Taxon* 28: 60. 1979

(Used in Ayurveda. Magic, ritual.)

in English: dwarf fan palm

in India: advi eeta, bhukharjuri, bhukhorjuro, chitti etha, chittitha, cittiya, inji, khajira, khajoor, khajri, khajur, konda-ita, kondaita, malai-icham, siru-icha, siruicha, thakal, thangtup

in Japan: chabo-tô-juro

in Brazil: leque-do-mediterrâneo, palmeira de leque, palmeira-de-leque-da-europa, palmeira das vassouras, palmeira-moinho-de-vento, palmito-espanhol

in Uruguay: palma de escoba

in Italian: cerfuglione, palma di San Pier Martire, palma di San Pietro, palma nana; ciafagghiuni spinusu, ddummi, giummara, scupazzu, scopazzo (Sicily)

Chamaesium H. Wolff Apiaceae

From the Greek *chamai* ‘on the ground, low, dwarf, false’, see *Notizbl. Bot. Gart. Berlin-Dahlem* 9: 275. 1925, *China J. Pl. Resources & Environm.* 4(3): 1–8. 1995, *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice). 31: 13–16. 1999.

Chamaesium novem-jugum (C.B. Clarke) C. Norman (*Aulacospermum novem-jugum* (C.B. Clarke) Kachroo, Naqshi & U. Dhar; *Chamaesium novemjugum* (C.B. Clarke) C. Norman; *Chamaesium spatuliferum* (W.W. Smith) C. Norman; *Chamaesium spatuliferum* var. *minus* R.H. Shan & S.L. Liou; *Trachydium novemjugum* C.B. Clarke; *Trachydium novemjugum* var. *tongolense* H. de Boisseu; *Trachydium spatuliferum* W.W. Smith)

China, India.

See *The Flora of British India* 2(6): 672. 1879 and *Notes from the Royal Botanic Garden, Edinburgh* 8(38): 210. 1914, *Journal of Botany, British and Foreign* 76(908): 231. 1938, *Flora Reipublicae Popularis Sinicae* 55(1): 125, 298 (Addenda). 1979, *Cent. Asia & Kashmir Himal. Archaeobot. & Fl.* 107. 1995

(Medicinal.)

in China: cu leng ai ze qin

Chamaesium paradoxum H. Wolff (*Trachydium paradoxum* (H. Wolff) M. Hiroe)

China.

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(84): 275–276. 1925

(Medicinal.)

in China: ai ze qin

Chamaesium thalictrifolium H. Wolff (*Trachydium thalictrifolium* (H. Wolff) M. Hiroe)

China.

See *Acta Horti Gothoburgensis* 2(7): 302–303. 1926

(Medicinal.)

in China: song pan ai ze qin

Chamerion (Raf.) Raf. Onagraceae

From the Greek *chamai* ‘on the ground, low, dwarf’ and *nerion* ‘oleander’, see *Plantae Veronenses* 3: 168. 1754, *American monthly magazine and critical review* 2: 266. 1818 and *Folia Geobotanica et Phytotaxonomica* 7(1): 85. 1972.

Chamerion angustifolium (L.) Holub (*Chamaenerion angustifolium* (L.) Scop.; *Chamaenerion angustifolium* (L.) Schur; *Chamaerion angustifolium* (L.) Holub; *Epilobium angustifolium* L.; *Epilobium angustifolium* subsp. *macrophyllum* (Hausskn.) Hultén)

Europe, British Columbia. Perennial herb, rosy-pink flowers, see also *Epilobium*

See *Species Plantarum* 1: 347. 1753, *Flora Carniolica*, Editio Secunda 1: 271. 1771, *Enumeratio Plantarum Transsilvaniae* 213. 1866, *Monogr. Gatt. Epilobium* 38. 1884 and *Rhodora* 20(229): 4. 1918, *Arkiv för Botanik*, Andra Serien 7(1): 85. 1967[1968], *Folia Geobotanica et Phytotaxonomica* 7(1): 86. 1972, *Vascular Plants of Russia and Adjacent States (former USSR)* 219. 1995, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Opera Bot.* 137: 1–42. 1999

(Said to be poisonous. For muscular pain. Antiinflammatory, the running root-stock made into a poultice applied for wounds and sores. A good source of vitamin C and pro-vitamin A.)

in English: burnt-weed, fireweed, flowering-willow, great willow-herb, Indian wickup, rose-bay willow-herb, wickup

in China: liu lan

in India: gass

Chamerion angustifolium (L.) Holub subsp. *angustifolium* (*Chamaenerion angustifolium* (L.) Scop.; *Chamaenerion angustifolium* (L.) Schur; *Chamaenerion angustifolium* var. *album* Yue Zhang & J.Y. Ma; *Chamaerion angustifolium* (L.) Holub; *Epilobium neriifolium* H. Lév.; *Epilobium spicatum* Lam.)

Europe, British Columbia. Perennial herb, rosy-pink flowers, see also *Epilobium*

See *Species Plantarum* 1: 347. 1753, *Flora Carniolica*, Editio Secunda 1: 271. 1771, *Flore Française* 3: 482. 1778, *Enumeratio Plantarum Transsilvaniae* 213. 1866, *Monogr. Gatt. Epilobium* 38. 1884, *Monde des Plantes; revue mensuelle de botanique* 6: 2, 125. 1896 and *Rhodora* 20(229): 4. 1918, *Arkiv för Botanik*, Andra Serien 7(1): 85. 1967[1968], *Folia Geobotanica et Phytotaxonomica* 7(1): 86. 1972, *Vascular Plants of Russia and Adjacent States (former USSR)* 219. 1995, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Opera Bot.* 137: 1–42. 1999, *Bulletin of Botanical Research* 23(4): 390. 2003

(Plant infusion reported to be poisonous. For muscular pain. Antiinflammatory, the running root-stock made into a poultice applied for wounds and sores.)

in English: burnt-weed, fireweed, flowering-willow, great willow-herb, Indian wickup, rose-bay willow-herb, wickup

in China: liu lan

Chamerion latifolium (L.) Holub (*Chamaenerion halimifolium* Salisb.; *Chamaenerion latifolium* (L.) Franch. & Lange; *Chamaenerion latifolium* (L.) Sweet; *Chamerion subdentatum* (Rydb.) A. Löve & D. Löve; *Epilobium changaicum* Grubov; *Epilobium kesamitsui* Yamazaki; *Epilobium latifolium* L.)

North America. Perennial subshrub, herb, vegetable

See *Folia Geobotanica et Phytotaxonomica* 7(1): 86. 1972

(Leaves rich in vitamin A and C.)

in English: dwarf fireweed

in China: kuan ye liu lan

Champereia Griffith Opiliaceae

From the Malayan name for the species, *chemperai*.

Champereia griffithiana Planch. ex Kurz

Malaysia, Myanmar. Small tree, oblong leaves, orange yellow fruits

See *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 4: 237. 1844, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 44(3): 154. 1876 [1875 publ. 13 Jan 1876]

(For ulcers, pounded leaves and roots and poultice; roots decoction for rheumatism, abscesses and ulcers.)

Malay name: chemperai, chiprah

Changium H. Wolff Apiaceae (Umbelliferae)

See *Bull. Bot. Res., Harbin.* 11(2): 75–83. 1991, *China J. Pl. Resources & Environm.* 4(3): 1–8. 1995.

Changium smyrnioides H. Wolff (*Conopodium smyrnioides* (H. Wolff) M. Hiroe; *Conopodium smyrnioides* (Fedde ex H. Wolff) M. Hiroe)

China.

See *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 2: 118. 1824 and *Repert. Spec. Nov. Regni Veg.* 19(546–551): 315. 1924, *Umbelliferae of Asia* 1: 95. 1958, *Byull. Moskovsk. Obšč. Isp. Prir., Otd. Biol.* 96(5): 71. 1991, *Acta Phytotax. Sin.* 38(2): 111–120. 2000, *Biochem. Syst. & Ecol.* 32: 583–596. 2004, *Zhong yao cai = Zhongyaocai = Journal of Chinese Medicinal Materials* 31(1): 47–49. 2008

(Antioxidant. Root used in China as the traditional medicine *ming dang shen*.)

in China: *ming dang shen shu*, *ming dang shen*

Chaptalia Vent. Asteraceae

For the French chemist Jean Antoine Claude Chaptal (Count) de Chanteloup, 1756–1832 (Paris), 1777 M.D. Montpellier, Minister of the Interior (he resigned his post in 1804), his writings include *Essai sur le perfectionnement des arts chimiques en France*. [Octavo, first edition.] Paris [1800], *Chimie appliquée à l'agriculture*. Paris 1823, *Chimie appliquée aux arts*. Paris 1807, *L'Art de faire le vin*. Paris 1819 and *Mes souvenirs sur Napoléon*. Paris 1893. See *Description des Plantes Nouvelles ... Jardin de J. M. Cels* sub pl. 61. 1802, *Annales du muséum national d'histoire naturelle* 19: 68. 1812 and J. Pigeire, *La vie et l'oeuvre de Chaptal, 1756–1832*. Paris 1932, M.P. Crosland, *The Society of Arcueil*. Cambridge, Mass. 1967, M.P. Crosland, in *D.S.B.* (or *Dictionary of Scientific Biography*. Editor in Chief Charles Coulston Gillispie.) 3: 198–203. New York 1981, *Fl. Venez. Guayana* 3: 177–393. 1997.

Chaptalia nutans (L.) Pol. (*Cacalia spatulata* Sessé & Moc.; *Chaptalia diversifolia* Greene; *Chaptalia erosa* Greene; *Chaptalia majuscula* Greene; *Chaptalia subcordata* Greene; *Leria lyrata* Cass.; *Leria nutans* (L.) DC.; *Thyrsanthema nutans* (L.) Kuntze; *Tussilago lyrata* Pers.; *Tussilago nutans* L.; *Tussilago vaccina* Vell.)

South America.

See *Species Plantarum* 2: 834. 1753, *Systema Naturae*, Editio Decima 2: 1214. 1759, *Description des Plantes Nouvelles ... Jardin de J. M. Cels* sub pl. 61. 1802, *Annales du muséum national d'histoire naturelle* 19: 68. 1812, *Dictionnaire des Sciences Naturelles* [Second edition] 26: 102. 1823, *The Botany of the Voyage of H.M.S. ~Herald~* 313. 1856, *Linnaea* 41: 582. 1878, *Biologia Centrali-Americana*; ... *Botany ...* 2(10): 255. 1881, *Plantae Nouae [sic] Hispaniae...* 132. 1889, *Revisio Generum Plantarum* 1: 369. 1891 and *Leaflets of botanical observation and criticism* 1(14): 194. 1906, *Fieldiana, Bot.* 24(12): 429–440, 591–597. 1976, *Phytologia* 78(3): 153–188. 1995, *Mem. New York Bot. Gard.* 78: 85–122. 1996

(Poultices of leaves on sores and swellings. Leaf tea for amenorrhea.)

Chariessa Miq. Icacinaceae (Olacaceae)

Greek *charieis*, *chariessa* ‘lovely, graceful, beautiful’, see *Flora van Nederlandsch Indië* 1(1): 794. 1856

Chariessa samoensis Engl. (*Chariessa samoensis* (A. Gray) Engl.; *Citronella samoensis* (A. Gray) R.A. Howard; *Pleuropetalon samoense* A. Gray; *Villaresia samoense* (A. Gray) Valetton)

Pacific.

See *United States Exploring Expedition ... Atlas. Botany. Phanerogamia* 1: 299, t. 27. 1854, *Die Natürlichen Pflanzenfamilien* 3(5): 245. 1893 and *Journal of the Arnold Arboretum* 21(4): 475. 1940

(For stomach complaints.)

Samoan name: *ala'a*

Chasmanthera Hochst. Menispermaceae

Latin and Greek *chasma* ‘an opening, a chasm’ and *anthera* ‘anther’, see *Flora* 27(1): 21. 1844, *Annals and Magazine of Natural History*, ser. 2 7: 35, 38. 1851.

Chasmanthera dependens Hochst.

Sudan, Nigeria, Tanzania. Herbaceous vine, climber, liana, woody, rough stem grey with white spots, leaf surface papery, in the axils of the leaves flowers cream-green, sepals and petals cream, anthers yellow, flowers fragrant, fruits pendulous yellow-green, in woodland

See *Flora* 27(1): 21. 1844

(Roots, stem and leaves antiinflammatory, tonic, for venereal diseases. Root decoction for the treatment of venereal diseases. Boiled stem bark a general tonic.)

African names: *ato oloriraun*, *ogbo*

Chassalia Comm. ex Poiret Rubiaceae

Perhaps named after Chazal de Chamarel; Malcy de Chazal (1803–1880) was the eldest daughter of the gifted artist Toussaint-Antoine de Chazal de Chamarel whose father had gone out to Mauritius in 1770 to join his elder brother; see René de Chazal (& Edmond Rouillard), *Notes et Documents sur la famille de Chazal*. Port Louis, Mauritius 1910; see *Encyclopédie Méthodique. Botanique ...* (Lamarck) Supplément 2: 450, in obs. 1812, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 8: 198, nomen alternativum. 1817, *Ned. Kruidk. Arch.* ii. II. 248. 1851.

Chassalia albiflora K. Krause (*Psychotria albiflora* (K. Krause) De Wild.; *Psychotria albiflora* De Wild.)

Tanzania.

See *Bot. Jahrb. Syst.* 39: 566. 1907, *Pl. Bequaert.* 2: 328. 1924

(Fruits and leaves wound dressing, antiinflammatory, for liver diseases.)

Chassalia blumeana Govaerts (*Cephaelis stipulacea* Blume; *Chassalia stipulacea* (Blume) Piessch., nom. illeg.; *Uragoga blumeana* Kuntze, nom. illeg.; *Uragoga stipulacea* (Blume) K. Schum.)

Malesia.

See *Bijdr. Fl. Ned. Ind.* 16: 1005. [Oct 1826–Nov 1827], *Nat. Pflanzenfam.* 4(4): 120. Aug. 1891 and *Flora* (Germany) 196(2): 128. 2001, *Bot. J. Linn. Soc.* 157(1): 119. 2008

(Roots or leaves applied to cuts, wounds and ulcers.)

Chassalia curviflora (Wall.) Thwaites (*Chassalia chartacea* Craib; *Chassalia curviflora* Thw.; *Psychotria curviflora* Wall.; *Uragoga curviflora* (Wall.) Kuntze)

India, Philippines. Shrub, erect, inflorescence corymbiform, flowers white, pink or violet, drupe globose ribbed, fruits sometimes eaten, in humid lowland lower montane forests

See *Encyclopédie Méthodique. Botanique ... Supplément* 2: 450. 1812, *Fl. Ind.* ed. Carey & Wall. 2: 168. 1824, *Enumeratio Plantarum Zeylaniae* [Thwaites] 150, 421. 1859, *Revis. Gen. Pl.* 1: 299. 1891 and *Bull. Misc. Inform. Kew* 1931, 279. 1931, *Fl. Tripura State* 2: 44. 1983, *Bull. Bot. Surv. India* 24(1–4): 222. 1983 [dt. 1982, publ. 1983]

(Roots decoction for malaria, cough; crushed, applied as a poultice for headache, convulsions and herpes; roots or leaves applied to cuts, wounds and ulcers; for fever, pound the roots and swallow. Leaves infusion for fever, convulsions. Veterinary medicine, crushed leaves applied to horses with wounds.)

in India: nirvisha, kareta-amelpodi, katou-belluta-amelpodi

in Indonesia: ki kores wungu, tenam

in Malaysia: beberak, beberas, biring sigalak, jarum, lado-lado, pindul ribatan

in Cambodia: trong pra na

in Thailand: khem khaao, khem mai, khem phra

in Vietnam: d[ow]n t[uw][ows]ng qu[aa]n, m[aw]jt tr[aws]ng, x[uw][ow]ng s[ow]n

Chassalia curviflora (Wall.) Thwaites var. ***ophioxylodes*** (Wall.) Deb & B. Krishna (*Chassalia ambigua* (Wight & Arn.) Alston; *Chassalia ophioxylodes* (Wall.) Craib; *Psychotria ambigua* Wight & Arn.; *Psychotria ophioxylodes* Wallich)

Tropical Asia, India.

See *Encyclopédie Méthodique. Botanique ... Supplément* 2: 450. 1812, *Fl. Ind.* ed. Carey & Wall. 2: 168. 1824, *Prodr. Fl. Ind. Orient.*: 433. 1834, *Enumeratio Plantarum Zeylaniae* [Thwaites] 150, 421. 1859, *Revis. Gen. Pl.* 1: 299. 1891 and *Gard. Bull. Straits Settlem.* 6: 474. 1930, *Handb. Fl. Ceylon* 6(Suppl.): 152. 1931, *Bull. Misc. Inform. Kew* 1931, 279. 1931, *Fl. Tripura State* 2: 44. 1983, *Bull. Bot. Surv. India* 24(1–4): 222. 1983 [dt. 1982, publ. 1983]

(Leaves and tender fruits made into a paste taken with milk for gastric complaints.)

in India: kaattusirukaapipatchilai, kareta-amelpodi, katou-belluta-amelpodi, nirvisha

Chassalia kolly (Schumach.) Hepper (*Chassalia parviflora* Benth.; *Chassalia yorubensis* K. Schum., nom. nud.; *Psychotria benthamiana* Hiern; *Psychotria kolly* Schumach.; *Psychotria warneckeii* K. Schum. & K. Krause; *Psychotria yorubensis* (K. Schum.) De Wild.; *Psychotria yorubensis* De Wild.; *Uragoga benthamiana* Kuntze; *Uragoga benthamiana* (Hiern) Kuntze; *Uragoga kolly* Kuntze; *Uragoga kolly* (Schumach.) Kuntze)

Tropical Africa.

See *Niger Fl.*: 417. 1849, *Fl. Trop. Afr.* 3: 204. 1877, *Revis. Gen. Pl.* 2: 959, 961. 1891 and *Westafr. Kautschuk-Exped.*: 322. 1900, *Bot. Jahrb. Syst.* 39: 558. 1907, *Pl. Bequaert.* 2: 442. 1924, *Kew Bull.* 16: 330. 1962

(Leaves and stem for diarrhea, fevers, during delivery.)

Cheilanthes Swartz Pteridaceae (Adiantaceae)

Greek *cheilos* ‘lip, margin’ and *anthos* ‘a flower’, in allusion to the shape of indusium (the membranous covering) or to the marginal sporangia, see *Syst. Pl.* 290. 1764, *Neues Journal für die Botanik* 1(2): 36. 1805, *Synopsis Filicum* 5, 126. 1806, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5(3): 311. 1811, *Hortus Regius Botanicus Berolinensis* 2: 40. 1833, *Mémoires sur les Familles des Fougères* 5: 148, 153–154, t. 12B. 1852, *Mémoires sur les Familles des Fougères* 7: 33, 135, t. 20. 1857, *Historia Filicum* 279. 1875, *Atti Istituto Veneto di Scienze, Lettere ed Arti ser. 5.* 3: 579. 1877, *Reale Istituto Lombardo di Scienze e Lettere, Rendiconti* 9: 810. 1877 and *Contributions to Western Botany* 16: 12. 1930, *Bulletin of the Fan Memorial Institute of Biology.* 4(10): 359. 1933, *Webbia* 9: 394. 1953, *Fl. Madagasc.* 5(5): 113–168. 1958, *Fern Gaz.* 11(2–3): 141–162. 1975.

Cheilanthes albomarginata C.B. Clarke (*Aleuritopteris albomarginata* (C.B. Clarke) Ching; *Aleuritopteris subrufa* (Baker) Ching; *Cheilanthes farinosa* var. *albomarginata* (C.B. Clarke) Bedd.; *Cheilanthes leveillei* H. Christ; *Cheilanthes subrufa* Baker)

India.

See *Transactions of the Linnean Society of London, Botany* 1(7): 456, t. 52. 1880, *A Supplement to the Handbook of the Ferns of British India* 22. 1892 and *Bulletin of Miscellaneous Information Kew* 1906(1): 8–9. 1906, *Bulletin de l'Académie Internationale de Géographie, Botanique* 17(212): 149–150. 1907, *Hong Kong Naturalist* 10(3–4): 199, 201–202. 1941

(Fronde juice applied to treat cuts and wounds. Leaf extract used externally for abscess, aqueous extract of green leaf antifungal. Rhizomes antibacterial, a decoction drunk against diarrhea; rhizome juice given to treat peptic ulcer.)

in English: bristly cloak fern, glade fern, slender lip fern

in Nepal: damini sinka, dankernu, dum kalleti, rani sinka

Cheilanthes anceps Blanf. (*Aleuritopteris anceps* (Blanf.) Panigrahi; *Aleuritopteris calicicola* Ching, nom. nud.; *Aleuritopteris farinosa* (Blanf.) Ching var. *anceps* (Blanf.) Ching; *Cheilanthes farinosa* (Forssk.) Kaulf. var. *anceps* (Blanf.) Blanf.)

India, Nepal.

See *Enumeratio Filicum* 212. 1824, *Mémoires sur les Familles des Fougères* 5: 153, t. 12B, f. 1. 1852, *Mexicanas Plantas* 1: 121. 1872, *J. Simla Nat. Hist. Soc.* 1(2): 21. 1886, *Journal of the Asiatic Society of Bengal* 57(2): 301–302. 1888 and *J. Bombay Nat. Hist. Soc.*, 13(2): 249. 1900, *Hong Kong Naturalist* 10(3–4): 201–202. 1941, *Bulletin of the Botanical Survey of India* 2(3–4): 321. 1961, *Sporae Pterid. Sin.* 157, pl. 33, f. 20–21. 1976, *J. Cytol. Genet.* 23: 38–52. 1988

(Juice squeezed from frond of *Cheilanthes anceps* mixed with *Drymaria diandra* and *Centella asiatica* given to treat peptic ulcer.)

in Nepal: kali sinka, rani sinka

Cheilanthes argentea (S.G. Gmel.) Kunze (*Aleuritopteris argentea* (S.G. Gmel.) Fée; *Allosorus argenteus* (S.G. Gmel.) C. Presl; *Allosorus argenteus* C. Presl; *Cassebeera argentea* (L.) J. Sm.; *Cassebeera argentea* J. Sm.; *Doryopteris argentea* (S.G. Gmel.) H. Christ; *Doryopteris argentea* Christ; *Pteris argentea* S.G. Gmel.; *Pteris argentea* S.G. Gmel.; *Pteris argentea* L.; *Pteris argentea* Bory)

China.

See *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 12: 519, t. 12, f. 2. 1768, *Enumeratio Filicum* 216. 1824, *Tentamen Pteridographiae* 153. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 4: 159. 1841, *Linnaea* 23: 242. 1850, *Mémoires sur les Familles des Fougères* 5: 154. 1852 and *Bulletin de l'Herbier Boissier*, sér. 2, 2(10): 831. 1902

(Plant juice or plant paste used to treat ulcers, wounds, sores.)

Cheilanthes dalhousiae Hook. (*Aleuritopteris dalhousiae* (Hook.) Ching; *Cheilanthes farinosa* var. *dalhousiae* (Hook.) C.B. Clarke; *Cheilanthes farinosa* var. *flaccida* Bedd.; *Leptolepidium dalhousiae* (Hook.) K.H. Shing & S.K. Wu)

Nepal.

See *Species Filicum* 2: 80, t. 78 B. 1852, *Transactions of the Linnean Society of London, Botany* 1(7): 457, t. 51. 1880, *Handbook to the Ferns of British India* 93. 1883 and *Hong Kong Naturalist* 10(3–4): 204. 1941, *Acta Botanica Yunnanica* 1(1): 116. 1979

(Powdered roasted rhizome taken in stomach disorders; rhizome paste applied to skin diseases, eruptions and boils.)

in Nepal: raanisinkaa, rani sinka

Cheilanthes eckloniana Mett. (*Notholaena eckloniana* Kunze)

India, South Africa.

See *Linnaea* 10. 501. 1836

(Leaves smoked for the relief of colds, catarrh, headache.)

Cheilanthes farinosa (Forssk.) Kaulf. (*Aleuritopteris chihuahuensis* Saiki; *Aleuritopteris farinosa* (Forssk.) Fée; *Aleuritopteris farinosa* (Forssk.) E. Fourn.; *Aleuritopteris mexicana* Fée; *Aleuritopteris peruviana* Saiki; *Cheilanthes dealbata* D. Don, nom. illeg.; *Cheilanthes farinosa* Kaulf.; *Cheilanthes farinosa* var. *deltoidea* Bonap.; *Pellaea pulcherrima* Rovirosa, nom. nud.; *Pteris argyrophylla* Sw.; *Pteris farinosa* Forssk.)

South America, Gabon. Rhizomes creeping, fronds under-surface coated with white meal

See *Flora Aegyptiaco-Arabica* 187. 1775, *Synopsis Filicum* 105. 1806, *Flora Americae Septentrionalis*; or, ... 2: 671. 1814[1813], *Enumeratio Filicum* 212. 1824, *Prodromus Florae Nepalensis* 16. 1825, *Mémoires sur les Familles des Fougères* 5: 153–154, t. 12B, f. 1. 1852, *Mexicanas Plantas* 1: 121. 1872 and *Pteridografía del Sur de México* t. 14. 1909, *Notes Pteridologiques* 4: 77. 1917, *Journal of Phytogeography and Taxonomy* 32(2): 85, 89. 1984

(Leaves poisonous, toxic. Plant antibacterial, the juice mixed with honey taken in tuberculosis; plant paste used to treat ulcers, sores, lesion of the skin or mucous membranes; plant decoction or powder taken to increase health and sexual vigor. Fresh fern antibacterial. Leaf juice mixed with water drunk in case of irregularity of menstrual discharge, only few drops are to be taken, excess is poisonous; leaves decoction in fever and cold, to wash ulcers. Roots applied in eczema and wounds; eaten in stomachache; powdered rhizome applied to the wounds; rhizome juice dropped in the wounds as vermifuge. Veterinary medicine, leaves decoction to wash ulcers to remove maggots from the wounds.)

in India: chunpata, hansraj, inchentong, injentong, morjiva, ramisinko, rani-sinka, sonapali

in Nepal: dubani sinka, rani sinka

Cheilanthes grisea Blanf. (*Aleuritopteris farinosa* var. *grisea* (Blanf.) Ching; *Aleuritopteris farinosa* var. *grisea* (Blanf.) Ching; *Aleuritopteris grisea* (Blanf.) Panigrahi; *Aleuritopteris platyklamys* Ching; *Cheilanthes farinosa* fo. *minor* C. B. Clarke & Baker; *Cheilanthes farinosa* var. *grisea* (Blanf.) Blanf.; *Cheilanthes farinosa* var. *tenera* C.B. Clarke & Baker)

China, Himalaya.

See *J. Simla Nat. Hist. Soc.* 1(2): 21. 1886, *Journal of the Linnean Society, Botany* 25(164): 411. 1888, *Journal of the Asiatic Society of Bengal* 57(2): 302. 1888 and *Hong Kong Naturalist* 10(3–4): 202. 1941, *Bulletin of the Botanical Survey of India* 2(3–4): 321. 1961, *Flora Tsinlingensis* 2:

207–208, t. 18, f. 3–5. 1974, *J. Cytol. Genet.* 23: 38–52. 1988, *Bot. Mag.* (Tokyo) 105: 105–124. 1992

(Antiseptic, antibacterial, disinfectant, roots applied in eczema and wounds; powdered rhizome applied to the wounds; rhizome juice dropped in the wounds as vermifuge.)

Cheilanthes hirta Sw. var. ***contracta*** Kunze (*Cheilanthes contracta* Mett. ex Kuhn; *Cheilanthes contracta* (Kunze) Mett. ex Kuhn; *Cheilanthes contracta* Kunze; *Pellaea contracta* (Kunze) Fée; *Pellaea contracta* Fée)

East Africa, Madagascar. Terrestrial, frond stalks brown, pinnae light green, spores light brown, streams and riverbanks

See *Syn. Fil.* 5, 126. 1806, *Linnaea* 10: 539. 1836, *Filicum Species* 59. 1841, *Linnaea* 23. 243, 307. 1850, *Mémoires sur les Familles des Fougères* 5: 129. 1852, *Filices Africanæ* 70. 1868 and *Flore de Madagascar et des Comores* 5(5): 113–168. 1958, *J. Ethnopharmacol.* 2(4): 323–335. 1980 [Antineoplastic constituents of some Southern African plants: *Urginea capitata*, *Raphionacme hirsuta* and *Cheilanthes contracta*, *Brunsvigia radulosa*, *Amaryllis belladonna*.]

(Used in anticancer formulation.)

Cheilanthes kuhnii Milde (*Aleuritopteris kuhnii* (Milde) Ching; *Leptolepidium kuhnii* (Milde) K.H. Shing & S.K. Wu)

China.

See *Botanische Zeitung* (Berlin) (1867) 25: 149. 1867 and *Hong Kong Naturalist* 10(3–4): 202. 1941, *Acta Botanica Yunnanica* 1(1): 117. 1979

(Antibacterial.)

Cheilanthes mysuriensis Wall. ex Hook. (*Cheilanthes mysuriensis* Wall., nom. nud.; *Cheilosoria mysuriensis* (Wall. ex Hook.) Ching & K.H. Shing)

India.

See *A Numerical List of Dried Specimens* [Wallich] n. 66. 1828, *Species Filicum* 2: 94, t. 100 A. 1852 and *Flora Fujianica* 1: 84. 1985

(Rhizome and rachis made into a paste applied after scorpion sting. Leaf paste applied for healing fractured bones.)

in India: kondabadanika, poorankadi chedi

Cheilanthes pruinata Kaulf. (*Cheilanthes fasciculata* Goldm.; *Cheilanthes mathewsii* Kunze)

Chile.

See *Enumeratio Filicum* 210. 1824, *Die Farrnkräuter* 1: 50, t. 25. 1840, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 19(Suppl. 1): 456. 1843, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 276. 1874

(Leaves infusion febrifuge.)

in Chile: doradilla

Cheilanthes pteridioides C. Chr. (*Adiantum fragrans* L.f.; *Cheilanthes fragrans* (L.f.) Sw.; *Cheilanthes fragrans* Webb & Berthel.; *Cheilanthes fragrans* Sw.; *Cheilanthes pteridioides* (Reichard) C. Chr.)

India.

See *Supplementum Plantarum* 447. 1781, *Synopsis Filicum* (Swartz) 127, 325. 1806 and *Index Filic.* 178. 1905

(Whole plant emmenagogue, antiscorbutic, given in cold, cough and sore throat.)

Cheilanthes rufa D. Don (*Aleuritopteris intermedia* Ching, nom. nud.; *Aleuritopteris rufa* (D. Don) Ching)

Nepal.

See *Prodromus Florae Nepalensis* 16. 1825 and *Hong Kong Naturalist* 10(3–4): 200–201. 1941, *Sporae Pterid. Sin.* 156, pl. 34, f. 4–5. 1976, *Aspects Pl. Sci.* 11: 459–465. 1989

(Plant antibacterial; the juice given in case of indigestion.)

in Nepal: bish kabre, sunauli unyu

Cheilanthes swartzii Webb & Berthel.

Europe, India.

See *Hist. Nat. Iles Canaries* 3 [2]. pars 3. 453. 1847

(Plant antibacterial, diaphoretic.)

Cheiloclinium Miers Celastraceae

Greek *cheilos* ‘lip, margin’ and *kline* ‘a bed’, *klinion* ‘a little bed’, see *Mantissa Plantarum* 2: 159–160, 293. 1771, *Report on the Plants collected during Mr. Babbage’s Expedition* 12. 1858, *Transactions of the Linnean Society of London* 28(2): 331, 416, 420–421. 1872 and *Publications of the Field Museum of Natural History, Botanical Series* 8(1): 19. 1930, *Brittonia* 3(3): 341–555. 1940, *Contr. (Used in Ayurveda, Unani and Sidha. Tonic, anthelmintic, astringent, mucilaginous, stem sap dripped into eyes to

relieve soreness and irritation; liquid squeezed from plant used to treat earache; stem crushed and the sap drunk to relieve constipation and catarrh; stem germicide, chewed for toothache. Roots decoction taken for fever and tuberculosis. Extract from the rhizomes and stem given orally to cure urinary tract infections and inflammation; pasted rhizome taken against intestinal worms; juice from the fresh rhizome used as a purgative and to cure coughs and jaundice; rhizome juice taken internally by women for urinary disorders; rhizome eaten with sugar to cure spermatorrhea; cooked rhizome eaten as vegetable to cure backache and rheumatism. For snakebite rhizome infusion drunk, or rhizome made into a paste and applied on snakebites; rhizome paste applied externally to cure boils; powdered dried rhizome applied on skin diseases; a decoction of *Costus speciosus* rhizome along with tubers of *Cyperus rotundus* and bark of *Azadirachta indica* is given for jaundice. Leaves febrifuge, antidiabetic, used for clearing urine; leaves pounded and the paste applied locally for mumps. Planted in the yard and paddy field to keep the snakes and rats away. Magic, superstitious and medico-religious beliefs, used as a spear by a certain god; planted to ensure good growth of rice plants. Crushed rhizome as fish poison. Veterinary medicine, for wounded domestic animals and maggots in the wound; rhizome juice given to cure internal injuries and anthrax.)

Fil.* (Hooker & Baker), ed. 2. 476. 1874, *Atti dell' Istit. Veneto* 5(3): 579. 1877

(Plant juice given in case of peptic ulcer. Roots vulnerary, tonic. Rhizome as tonic, a poultice for wounds and cuts.)

in Nepal: kali sinka

Chelidonium L. Papaveraceae

Latin *chelidonia* for swallowwort, celandine (Plinius), Greek *chelidon*, *chelidonos* 'a swallow', probably referring to the season of flowering; see *Species Plantarum* 1: 505–506. 1753 and *J. Korean Res. Inst. Ewha Women's Univ.* 11: 455–478. 1967, *Lagascalia* 9: 115–130. 1979, *J. Jap. Bot.* 54: 155–160. 1979, *Experientia* (Basel). 37: 341–342. 1981, *Bull. Soc. Roy. Bot. Belgique* 114: 176–180. 1981, *Watsonia* 19: 134–137. 1992, *J. Wuhan Bot. Res.* 32(2): 180–182. 1995, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen* 148–149. Basel 1996, *Grassl. China* 2000(5): 1–5. 2000.

Chelidonium majus L. (*Chelidonium grandiflorum* (DC.) DC.; *Chelidonium majus* subsp. *grandiflorum* (DC.) Printz; *Chelidonium majus* var. *grandiflorum* DC.)

Europe. Biennial herb, brittle, orange-yellow cell sap, yellow flowers, fruits a slender capsule, the plant is considered unpalatable because of its acrid taste and pungent fetid smell

See *Species Plantarum* 1: 505–506. 1753, *Regni Vegetabilis Systema Naturale* 2: 99. 1821, *Prodrumus Systematis Naturalis Regni Vegetabilis* 1: 123. 1824 and Reeks, H.C. "Poisoning of cattle by common celandine." *J. Comp. Pathol. Ther.*, 16: 367–371. 1903, Koopman, H. "A fatal case of celandine poisoning." *Sammlung von Vergiftungsfallen* 8: 93–98. 1937, Frohne, D., Pfander, H.J. *A Colour Atlas of Poisonous Plants*. Wolfe Publishing Ltd., London. 1983, Cooper, M.R., Johnson, A.W. *Poisonous Plants in Britain and Their Effects on Animals and Man*. Her Majesty's Stationery Office, London. 1984, *Regnum Veg.* 127: 33. 1993

(The entire plant, mainly the roots, considered poisonous, highly toxic, may be fatal if eaten; this plant suspected in the death of a child. There are records of skin irritation and soreness after the latex is applied to the skin, to help minor skin injuries. Cattle were poisoned and died after ingesting the ripe fruit of this plant; plant can cause toxic effects in horses

or cattle. Fresh herb used as a vulnerary in bruises, sprains, hemorrhoids and for snakebites. Veterinary medicine.)

in English: celandine, celandine poppy, common celandine, greater celandine, swallowwort, wart-weed

in China: bai gu cai, bai qu cai

in Japan: otompy-kina

Chelidonium majus* L. subsp. *majus

Europe. Biennial herb, brittle, orange-yellow cell sap, yellow flowers, fruits a slender capsule, the plant is considered unpalatable because of its acrid taste and pungent fetid smell

See *Species Plantarum* 1: 505–506. 1753, *Regni Vegetabilis Systema Naturale* 2: 99. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 123. 1824 and Reeks, H.C. “Poisoning of cattle by common celandine.” *J. (The entire plant, mainly the roots, considered poisonous, highly toxic, may be fatal if eaten.)

in English: celandine, celandine poppy, common celandine, greater celandine, swallowwort, wart-weed

Chelone L. Scrophulariaceae

Greek *chelone* ‘a tortoise’, referring to the flowers, see *Species Plantarum* 2: 611–612. 1753.

***Chelone glabra* L.** (*Chelone chlorantha* Pennell & Wherry; *Chelone glabra* var. *chlorantha* (Pennell & Wherry) Cooperr.; *Chelone glabra* var. *dilatata* Fernald & Wiegand; *Chelone glabra* var. *elatior* Raf.; *Chelone glabra* var. *elongata* Pennell & Wherry; *Chelone glabra* var. *linifolia* Coleman; *Chelone glabra* var. *ochroleuca* Pennell & Wherry; *Chelone glabra* var. *typica* Pennell; *Chelone montana* (Raf.) Pennell & Wherry; *Chlonanthes glabra* (L.) Raf.)

North America. Perennial, spikes of white flowers, the main larval food for the Baltimore checkerspot butterfly, butterflies and bumblebees go for the nectar

See *Species Plantarum* 2: 611. 1753, *Autikon Botanikon* 19. 1840 and *Academy of Natural Sciences of Philadelphia Monographs* 1: 187. 1935, *Flora of Indiana* 838. 1940, *Huntia* 7: 220. 1987

(Leaves anthelmintic, laxative and purgative, used in dyspepsia, debility and jaundice, in diseases of the liver, and for worms in children; bitter powder given as a tonic laxative; as an ointment recommended for irritable ulcers, inflamed breasts, piles.)

in English: balmony, bitter herb, hummingbird tree, salt-rheum weed, shellflower, snakehead, turtle-bloom, turtle-head, white chelone, white turtlehead

Chenopodium L. Chenopodiaceae

Greek *chen*, *chenos* ‘a goose’ and *podion* ‘a little foot’, *pous*, *podos* ‘foot’, referring to the shape of the leaves; see Carl Linnaeus, *Species Plantarum*. 218. 1753, *Genera Plantarum*. Ed. 5. 103. 1754, A. Bonavilla, *Dizionario etimologico di tutti i vocaboli usati nelle scienze, arti e mestieri, che traggono origine dal greco*. Milano 1819–1821, N. Tommaseo & B. Bellini, *Dizionario della lingua italiana*. Torino 1865–1879 and *Lingua Nostra*. XVIII: 99. Firenze 1957, *Acta Biol. Cracov., Ser. Bot.* 21: 31–63. 1978, *Scripta Fac. Sci. Nat. Univ. Purkyn. Ludw. & Aellen)

Europe, North America, Alaska. Herb, mealy, not aromatic, leaves cooked and eaten as vegetable, seed used as poultry and livestock feed, taxonomic situation confused, *Chenopodium album* is mainly known as a noxious weed with global distribution

See *Species Plantarum* 1: 219. 1753, *Institutiones Rei Herbariae* 1: 206. 1766, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 7: 143. 1815, *Systema Vegetabilium* 6: 275. 1820, *Prodromus Florae Nepalensis* 75. 1825, *Flora von Preussen* 130. 1866 and *Synopsis der Mitteleuropäischen Flora* 5(1): 59. 1913, *American Midland Naturalist* 3: 277. 1914, *Repertorium Specierum Novarum Regni Vegetabilis* 24(677/680): 339. 1928, *Acta Horti Gothoburgensis* 8: 175, 176. 1933, *American Midland Naturalist* 30: 68. 1943, *Fl. Trop. E. Africa, Chenopodiaceae* 6. 1954, *Acta Phytotaxonomica et Geobotanica* 20: 206. 1962

(Used in Ayurveda, Unani and Sidha. Can cause sickness and death in livestock if large quantities are ingested; plants can accumulate both nitrates and soluble oxalates, cattle and sheep have been poisoned. Humans who consume large quantities of the plant and are subsequently exposed to sunlight suffer photosensitization. Plant decoction antirheumatic, antidiarrheal; plant as a vegetable curry eaten for anemia. Leaves decoction carminative, stomachic, applied as a poultice on skin sores, burns; leaf chewed as an emetic; tender parts cooked and consumed to treat dyspepsia. Seeds anthelmintic, laxative, aphrodisiac and tonic, useful in biliousness, abdominal pains, eye diseases, throat troubles, piles and diseases of blood, heart and spleen; seed paste applied in various skin diseases.)

in English: blue weed, common lamb's quarters, common pigweed, fat hen, goosefoot, lamb's quarters, pigweed, white goosefoot, wild spinach

in North America: kitsarius (Pawnee)

Maori name: huainanga

in Egypt: rokab el-gamal

in China: hui hsien, hui t'iao, lai, li

in India: agralohita, am, badane bettaave, bahua, bathu, bathua, bathua sabz, bathusag, bathuwa, bele soppu, bethu-asag, bethusag, bettusaga, bilee palya, cakkaravarttikirai, cakkaravarttikiri, cakkiravalaittukam, cakkiravarttikirai, candan-betu, carkkaraivarthi, carkkaraivartti, chakavata, chakavatha, chakkotha, chakkothana soppu, chakravarthi koora, chakravarthi soppu, chakravarthy bele, chakravarti, chakravati, chakvit, chandan, chandanbedu, chilario, chilaro, chilli, chillika, chivil, churu, dankhar, ddala, em, eyar, gaud-avastuka, ghanaghana, hilamochika, hucha chakkota, huchu chakotha, huli chikka, hunchik, husbak, hutthu, jilmil, kankella, kolikkirai, ksarapatra, ksarasrestah, ksharadala, ksharapatra, ksharpaba, kulf, laghupatracilli, monshaobi, mridupatri, pacalai, panshupatra, pappu-koora, pappu-kura, pappukoora, pappukura, paruppu-k-kirai, paruppu kirai, paruppu-kirai, parupukire, parupukirai, rajani, sakajivah, sakarat, shakaraja, shakarata, shakashreshtha, shakavira, tulsi, tuni, vastu, vastuccira, vastuka, vastukah, vastuki, vasuka, vayalaikkoti, veershak, virasakah, vrntaka, yava-saka, yavasakah

in Japan: shiro-akaza

in Nepal: bethe

in Pakistan: josag

in Tibetan: snergod

in Southern Africa: bloubossie, hondebossie, hondepis-bossie, misbredie, seepbossie, serue, umbikicane, varkbossie, withondebossie

Chenopodium hybridum L. (*Anserina stramonifolia* Friche-Joset & Montandon; *Atriplex hybrida* (L.) Crantz; *Botrys hybrida* (L.) Nieuwl.; *Chenopodium angulosum* Lam.; *Chenopodium stramonifolium* Chevall.; *Vulvaria stramonifolia* Bubani)

Cosmopolitan. Herb, annual, erect, leaves entire, small greenish flowers, glomerules in panicles, plant with disagreeable smell, leaves cooked and eaten like spinach, cooking the plants will reduce their content of oxalic acid, seeds eaten, dyes can be obtained from the whole plant, in clearings and waste places

See *Species Plantarum* 1: 219. 1753, *Institutiones Rei Herbariae* 1: 207. 1766 and *American Midland Naturalist* 3(9): 275. 1914, *Nordic J. Bot.* 14: 155. 1994

(Analgesic. Poisonous to swine.)

in English: maple-leaved goosefoot, sowbane

in China: za pei li

in Italian: farinello ibrido

Chenopodium incanum (S. Watson) A. Heller (*Chenopodium fremontii* var. *incanum* S. Watson; *Chenopodium incanum* var. *incanum*; *Chenopodium paniculatum* var. *incanum* (S. Watson) Murr)

North America. Annual herb

See *Proceedings of the American Academy of Arts and Sciences* 9: 94. 1874, *Plant World* 1(2): 23. 1897 and *Allegemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 12: 54. 1906

(Magico-religious beliefs, ceremonial, contact therapy, Doctrine of Signatures, stem as antidote for snake infection.)

in English: mealy goosefoot

Chenopodium incanum (S. Watson) A. Heller var. *incanum* (*Chenopodium fremontii* var. *incanum* S. Watson)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 9: 94. 1874, *Plant World* 1(2): 23. 1897 and *Allegemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 12: 54. 1906

(Magico-religious beliefs, ceremonial, contact therapy, Doctrine of Signatures, stem as antidote for snake infection.)

in English: mealy goosefoot

Chenopodium murale L. (*Chenopodium biforme* Nees; *Chenopodium congestum* Hook. f.; *Chenopodium ilicifolium* Griff.; *Chenopodium longidjawense* Peter; *Chenopodium lucidum* Gilib.; *Chenopodium murale* var. *acutidentatum* Aellen; *Chenopodium murale* L. var. *albescens* Moq.; *Chenopodium murale* var. *biforme* (Nees) Moq.; *Chenopodium murale* var. *microphyllum* Boiss.; *Chenopodium murale* var. *paucidentatum* Beck; *Chenopodium murale* var. *spissidentatum* Murray; *Chenopodium triangulare* Forssk.; *Rhagodia baccata* (Labill.) Moq.; *Rhagodia baccata* var. *congesta* (Hook. f.) Hook. f.; *Rhagodia congesta* (Hook. f.) Moq.)

Cosmopolitan. Annual herb, erect or spreading, many-branched, mealy on the young parts, root a tap-root, leaves variable, flowers greenish, single black shiny seed, pot-herb, leaves used as a fresh or steamed vegetable, fodder for sheep and goats, a weed of crops, fallows and pastures

See *Species Plantarum* 1: 219. 1753, *Flora Aegyptiaco-Arabica* 205. 1775, *Exercitia Phytologica* 440. 1792, *Novae Hollandiae Plantarum Specimen* 1: 71, t. 96. 1805, *Plantae Preissianae* 1: 636. 1845, *London Journal of Botany* 6: 280. 1847, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 50–51, 69. 1849, *Notulae ad Plantas Asiaticas* 4: 337. 1854, *Flora Tasmaniae* 1: 312. 1857 and *Repertorium Specierum Novarum Regni Vegetabilis* 24: 343. 1928, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 40(Band 2, Lieferung 2): 22. 1932, *Flora of Saudi Arabia* ed. III. vol. 1. 192–223. 1988

(Leaves chewed as an emetic. A wash for skin infections, bruises, cuts.)

in English: chuana soap, goosefoot, green fat hen, lamb's quarters, nettle-leaf goosefoot, nettle-leaved goosefoot, rounded-leaved fat-hen, sowbane, swine-bane, wheat bush

in Arabic: abu 'efein, mazrita

in India: bahu, chil-nibhaji (chill, small herb, bhaji, vegetable), goyalo, kharathua, kharatua, kurund

in Pakistan: bathua, gorago

in East Africa: hangasimu (Shambaa); ototo (Ekegusii)

in Southern Africa: koringbossie, gansevoet, misbredie, muurhondebossie, tjuana-seep; serua (Pedi); thumana (Sotho); umdongabatwa (Zulu)

in Hawaii: 'aheahea

Chenopodium oahuense Aellen (*Atriplex oahuensis* Meyen; *Chenopodium oahuense* (Meyen) Aellen; *Chenopodium oahuense* var. *discosperma* Fosb.; *Chenopodium oahuense* var. *discospermum* Fosb.; *Chenopodium pekeloii* Degener, I. Degener & Aellen; *Chenopodium sandwicheum* Moq.)

North America. Perennial tree or shrub

See *Amer. J. Bot.* 65: 236–242. 1978

(For skin diseases.)

in English: Hawaiian goosefoot

in Hawaii: 'aheahea, 'ahea, 'ahewahewa, alaweo, alaweo huna, 'aweoweo, kaha'ihai

Chenopodium olukondae Murr (*Chenopodium album* L.; *Chenopodium mucronatum* subsp. *olukondae* Murray; *Chenopodium opulifolium* subsp. *oluhondae* Murray)

South Africa.

See *Species Plantarum* 1: 219. 1753, *Institutiones Rei Herbariae* 1: 206. 1766, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 7: 143. 1815, *Systema Vegetabilium* 6: 275. 1820, *Prodromus Florae Nepalensis* 75. 1825, *Flora von Preussen* 130. 1866 and *Synopsis der Mitteleuropäischen Flora* 5(1): 59. 1913, *American Midland Naturalist* 3: 277. 1914, *Repertorium Specierum Novarum Regni Vegetabilis* 24(677/680): 339. 1928, *Acta Horti Gothoburgensis* 8: 175, 176. 1933, *American Midland Naturalist* 30: 68. 1943, *Fl. Trop. E. Africa, Chenopodiaceae* 6. 1954, *Acta Phytotaxonomica et Geobotanica* 20: 206. 1962

(Used in Ayurveda. Toxic. Leaves decoction applied as a poultice on skin sores; tender parts cooked and consumed to treat dyspepsia; seed paste applied in various skin diseases.)

in India: agralohita, am, badane bettaave, bahu/bathu, bathu, bathua, bathua sabz, bathusag, bathuwa, bele soppu, bethu-asag, bethusag, bettusaga, bilee palya, cakkaravarttikirai, cakkaravarttikiri, cakkiravalaittukam, cakkiravarttik kirai, candan-betu, carkkaravarthi, carkkaravartti, chakavata,

chakavatha, chakkotha, chakkothana soppu, chakravarthi kooru, chakravarthi soppu, chakravarthy bele, chakravarti, chakravati, chakvit, chandan, chandanbedu, chilario, chil- laro, chilli, chillika, chivil, dankhar, ddala, em, eyar, gaud- avastuka, ghanaghana, hilamochika, hucha chakkota, huchu chakotha, huli chikka, hunchik, husbak, huttchu, jilmil, kankella, kolikkirai, ksarapatra, ksarasrestah, ksharadala, ksharapatra, ksharpaba, kulf, laghupatracilli, monshaobi, mridupatri, pacalai, panshupatra, pappu-koora, pappu-kura, pappukoora, pappukura, paruppu-k-kirai, paruppu kirai, paruppu-kirai, parupukire, parupukkirai, rajani, sakajivah, sakarat, shakaraja, shakarata, shakashreshtha, shakavira, tulusi, tuni, vastu, vastuccira, vastuka, vastukah, vastuki, vasuka, vayalaikkoti, veershak, virasakah, vrntaka, yava- saka, yavasakah

Chenopodium opulifolium Schrad. ex W.D.J. Koch & Ziz (*Chenopodium album* L. subsp. *opulifolium* (Schrad.) Batt.; *Chenopodium album* subsp. *opulifolium* (Schrad. ex W.D.J. Koch & Ziz) Maire; *Chenopodium album* var. *opulifolium* (Schrad.) Aswal; *Chenopodium album* var. *opulifolium* G. Mey.; *Chenopodium opulifolium* Schrad.; *Chenopodium opu- lifolium* Schrad. ex DC.; *Chenopodium triangulare* Forssk.)

Europe, Mediterranean, India, Eastern Africa. A grey-mealy erect annual or short-lived perennial herb, no aromatic smell, spreading branches, often woody below, mealy on all young parts, clustered flowers in axillary spikes, tiny flowers in a large dense rounded terminal head, small capsules sur- rounded by the dry enlarged flower parts, tiny black seeds, leaves eaten as vegetables, a weed of cultivation, waste ground, roadsides

See *Species Plantarum* 1: 218–222. 1753, *Flora Aegyptiaco- Arabica* 205. 1775, *Catalogus Plantarum* 6. 1814, *Chloris Hanoverana* 465. 1836 and *Flore de l'Afrique du Nord*: 8: 36. 1962, *Taxon* 28: 391–392. 1979, *Boletim da Sociedade Broteriana*, ser. 2 53: 15–28. 1979, *Taxon* 29: 728. 1980, *Flora of Australia* 4: 81–330. 1984, *Hessische Floristische Briefe* 38: 11–14. 1989, *Flora of Lahual-Spiti: A Cold Desert in North-west Himalaya* 531. 1994, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 15–18. 1997

(The roots boiled and the decoction drunk as an emetic. Leaves used in a steam bath to treat fever and colds. Veterinary medicine, leaves paste applied on wounds and sores of cattle.)

in English: broad-leaved goosefoot, round-leaved goosefoot, wild spinach

in India: em

in South Africa: hondebossie

in Tanzania: kapugutilo, lushemu, mfungulo, nyalufungulo

Chenopodium ugandae (Aellen) Aellen (*Chenopodium opu- lifolium* subsp. *oluhondae* Murray; *Chenopodium opulifo- lium* Schrad. ex W.D.J. Koch & Ziz subsp. *ugandae* Aellen; *Chenopodium opulifolium* var. *olukondae* auct.)

Uganda, Europe, Mediterranean. Herb

See *Species Plantarum* 1: 218–222. 1753, *Catalogus Plantarum* 6. 1814

(Febrifuge.)

in Rwanda: ituza, umugombe, umukuzanyana, umwisheke

Chesneya Lindley ex Endl. Fabaceae (Galegeae)

After the British plant collector Francis Rawdon Chesney, 1789–1872, botanical explorer and traveller (Euphrates), 1834 Fellow of the Royal Society; see *Genera Plantarum* 1275. 1840 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 339. 1965, *Botaničeskij Žurnal* (Moscow & Leningrad) 72(2): 250. 1987.

Chesneya nubigena (D. Don) Ali (*Astragalus crassicaulis* Graham, nom. nud.; *Astragalus nubigenus* D. Don; *Astragalus nubigenus* (Meyen) Taub.; *Calophaca crassicaulis* (Benth. ex Baker) Kom.; *Calophaca crassicaulis* (Baker) Kom.; *Caragana crassicaulis* Benth. ex Baker; *Caragana crassicaulis* Baker; *Spongiocarpella nubigena* (D. Don) Yakovlev)

India, Bhutan. Perennial non-climbing shrub, fodder for goats, sheep and camels, see also *Spongiocarpella nubigena*

See *Prodromus Florae Nepalensis* 245. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 5932. 1831, *The Flora of British India* 2(4): 117. 1876, *Die Natürlichen Pflanzenfamilien* 3(3): 303. 1894 and *Botaničeskij Žurnal* (Moscow & Leningrad) 72(2): 252. 1987, *Acta Bot. Yunnan.* 15: 377–384. 1993

(Whole plant antiseptic, laxative, stomachic, antibacterial, analgesic, used in wounds.)

in China: yun wu que er dou

Chichicaste Weigend Loasaceae

A common name, see *Familles des Plantes* 2: 501. 1763, *Encyclopédie Méthodique, Botanique* 3: 579. 1792.

Chichicaste grandis (Standl.) Weigend (*Loasa grandis* Standl.)

Panama, South America. Woody herbs, hairy, nodding flowers in terminal inflorescence

See *Journal of the Washington Academy of Sciences* 17(1): 12. 1927, *Am. J. Trop. Med. Hyg.*, 23(1): 3–76. 1943, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 202–206. 2007

(All parts of the plant are covered with intensely stinging painful hairs.)

Vernacular name: chichicaste

Chilocarpus Blume Apocynaceae

Greek *cheilos* ‘a lip’ and *karpos* ‘fruit’, referring to the dehiscence of the fruit, or from *chylos* ‘juice, the juice of a plant’ and *karpos*; see *Prodr. Fl. Nov. Holland.* 469. 1810, Carl Ludwig von Blume, *Catalogus van eenige der merkwaardigste zoo in-als uitheemse gewassen, te vinden in ‘s Lands Plantentuin te Buitenzorg* etc. 22. [Batavia 1823], *Bijdr. Fl. Ned. Ind.* 16: 1025 [Oct 1826–Nov 1827] and M.A. Canini, *Dizionario etimologico dei vocaboli italiani d’origine ellenica*. 1: 200. Torino 1925.

Chilocarpus torulosus (Boerl.) Markgr. (*Alyxia torulosa* Boerl.; *Chilocarpus anguineus* Stapf; *Neokeithia torulosa* (Boerl.) Steenis)

Borneo. Woody climber

See *Bull. Inst. Bot. Buitenzorg* 5: 12. 1900, *Hooker’s Icon. Pl.* 30: t. 2993. 1913, *Bull. Jard. Bot. Buitenzorg*, III, 17: 408. 1948, *Blumea* 19(1): 162. 1971

(Fresh latex rubbed on the wound or affected part in snake-bites and bruises.)

Chimaphila Pursh Ericaceae (Pyrolaceae)

Greek *cheima*, *heimatos* ‘winter weather, cold, frost’ and *philos* ‘lover, loving’, evergreen habit, see *Flora Americae Septentrionalis*; or, ... (Pursh) 1: 279–280, 300. 1813 [dt. 1814; issued in Dec 1813] and *Fieldiana, Bot.* 24(8/2): 81–88. 1966, *Flora Neotropica* 66: 28–53. 1995, *Biologia* 50: 27–31. 1995, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 29: 18–22. 1998, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2187. 2001, *Fieldiana: Botany, New Series* 45: 1–107. 2005.

Chimaphila maculata (L.) Pursh (*Chimaphila acuminata* (Lange) Rydb.; *Chimaphila acuminata* Rydb.; *Chimaphila costaricens* Andres, nom. nud.; *Chimaphila dasystemma* Torr. ex Rydb.; *Chimaphila dasystemma* T.D. Penn., nom. nud.; *Chimaphila guatemalensis* Rydb.; *Chimaphila kochii* Andres; *Chimaphila maculata* subsp. *kochii* Andres, nom. nud.; *Chimaphila maculata* var. *acuminata* Lange; *Chimaphila maculata* var. *dasystemma* (Torr. ex Rydb.) Kearney & Peebles; *Chimaphila maculata* var. *dasystemma* (Torr.) Kearney & Peebles; *Chimaza maculata* R. Br. ex D. Don, nom. nud., pro. syn.; *Pseva maculata* (L.) Kuntze; *Pseva maculata* Kuntze; *Pyrola maculata* L.)

North America. Rhizomatous herb, subshrub, terrestrial, perennial, stoloniferous, leaves dark green, scented flowers, waxy white petals, anthers yellow, green fruit

See *Species Plantarum* 1: 396–397. 1753, *Flora Americae Septentrionalis*; or, ... 1: 300. 1814 [1813], *A Synopsis of the British Flora* 175. 1829, *Prodr. (DC.)* 7(2): 775. 1839, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1867(4–7): 112. 1868, *Revisio Generum Plantarum* 2: 390. 1891 and *North American Flora* 29(1): 31–32. 1914, *Verhandlungen des Botanischen Vereins*

für die Provinz Brandenburg und die Angrenzenden Länder 56: 27, 66. 1914, *Journal of the Washington Academy of Sciences* 29(11): 487. 1939, *Huntia* 7: 232. 1987

(Plant analgesic, antibacterial, antiseptic, astringent, diaphoretic, diuretic, febrifuge, rubefacient, stimulant and tonic, for rheumatism, backaches and colds, fevers, ulcers, scrofula, bladders stones and cancers, pain, cystitis.)

in English: spotted pipsissewa, spotted wintergreen, striped prince's pine

Chimaphila menziesii (R. Br.) Spreng. (*Chimaphila menziesii* (R. Br. ex D. Don) Spreng.; *Chimaphila menziesii* Spreng.; *Pyrola menziesii* R. Br.)

North America. Perennial subshrub

See *Memoirs of the Wernerian Natural History Society* 5: 245–246. 1824, *Systema Vegetabilium*, editio decima sexta 2: 317. 1825

(Decoction of leaves taken for female, kidney and bladder troubles.)

in English: little prince's pine

Chimaphila umbellata (L.) W.P.C. Barton (*Chimaphila acuta* Rydb.; *Chimaphila corymbosa* Pursh, nom. illeg. superfl.; *Chimaphila cymosa* J. Presl & C. Presl; *Chimaphila domingensis* S.F. Blake; *Chimaphila mexicana* (DC.) Rydb.; *Chimaphila occidentalis* Rydb.; *Chimaphila umbellata* (L.) Nutt., nom. illeg.; *Chimaphila umbellata* (L.) (Plant aphrodisiac, laxative, a decoction used to increase sexual desire, to check bleeding, blood diseases, biliousness, useful in burning sensations.)

in India: amarapushpaka, ashvabala, chamarapushpa, darbhapathraka, gela gaddi, ghellagadi, gurgur, ikshugandha, ikshura, ishika, kaasi gaddi, kachalu, kadpi, kalivaeru gaddi, kanda, kansa, kanta-karvel, karmamoola, kasai, kasekshu, kasha, luchra, nadeya, niraja, potagala, sharada, shiri, sukanda, sukku debbe hullu, suku dabha, tauri, thendebalada hullu, vanahasaka, varival

in Thailand: dueai na, duei naa, duei na

Chionachne macrophylla (Benth.) Clayton (*Polytoca macrophylla* Benth.)

Malesia, New Guinea. Perennial, robust, monoecious, spikelets unisexual, cattle fodder, see also *Polytoca*

See *Plantae Javanicae rariores* 15, 18, 20, f. 5. London (Jul.) 1838, *Synopsis Plantarum Glumacearum* 1: 403. 1854 [1855], *Journal of the Linnean Society, Botany* 19: 52. 1881 and *Kew Bulletin* 35(4): 814. 1981, *Blumea* 47(3): 545–580. 2002

(Leaf shoots heated and squeezed into a sore ear.)

in Papua New Guinea: bagona

Chionanthus L. Oleaceae

Greek *chion* ‘snow’ and *anthos* ‘flower’, referring to the great abundance of white flowers in some species; see Carl Linnaeus, *Species Plantarum*. 8. 1753 and *Genera Plantarum*. Ed. 5. 9. 1754.

Chionanthus virginicus L.

Eastern N. America.

See *Species Plantarum* 1: 8. 1753 and *Regnum Veg.* 127: 33. 1993

(Alterative, aperient, cholagogue, diuretic, febrifuge, tonic, to treat inflammations of the eye, nephritis, disorders of the liver and gall bladder, jaundice and chronic weakness, rheumatism, mouth ulcers and spongy gums, wounds,

inflammations, sores, infections; overdoses can cause vomiting, frontal headaches and a slow pulse.)

in English: fringe tree, old man's beard, Virginia fringe tree

Chionochloa Zotov Poaceae (Gramineae)

From the Greek *chion* 'snow' and *chloe*, *chloa* 'grass, young grass', referring to the habitat; sometimes referred to as *Danthonia* sensu lato and *Rytidosperma* Steudel, intergrading with *Cortaderia* Stapf and *Danthonia* DC., type *Chionochloa rigida* (Raoul) Zotov, see *Transactions and Proceedings of the New Zealand Institute* 45: 274. 1913, *Journal of the Linnean Society, Botany* 51: 1–9. 1937, *New Zealand Journal Agric. Res.* 3: 728–733. 1960, *New Zealand Journal of Botany* 1: 78–136. 1963, *New Zealand Journal of Botany* 3: 180–193, 300–319. 1965, *New Zealand Journal of Botany* 4: 392–397. 1966, *New Zealand Journal of Botany* 5: 3–16. 1967, *New Zealand Journal of Botany* 8: 132–152. 1970, *New Zealand Journal Agric. Res.* 13: 534–554. 1970, *New Zealand Journal of Botany* 10: 205–224, 515–544. 1972, *New Zealand Journal of Botany* 14: 315–326. 1976, *Phytochem.* 15: 1933–1935. 1976, *New Zealand Journal of Botany* 15: 399–442, 761–765. 1977, *New Zealand Journal of Botany* 16: 255–260, 435–460, 479–498. 1978, *New Zealand Journal of Botany* 17: 43–54. 1979, *New Zealand Journal of Botany* 19: 161–170. 1981, Williams, G.R. & Given, D.R. *The Red Data Book of New Zealand: rare and endangered species of endemic terrestrial vertebrates and vascular plants*. Wellington, N.Z.: Nature Conservation Council 1981, *New Zealand Journal of Botany* 21: 13–20. 1983, *Phytochem.* 22: 119–124. 1983, *New Zealand Journal of Botany* 24: 529–537. 1986, Briggs, J.D. & Leigh, J.H. *Rare or Threatened Australian plants*. Revised Edition. Australian National Parks and Wildlife Service 1988, *New Zealand Journal of Botany* 27: 163–165. 1989, *New Zealand Journal of Botany* 28: 59–65. 1990, H.E. Connor, "Chionochloa Zotov (Gramineae) in New Zealand." *New Zealand Journal of Botany* 29: 219–283. 1991, *New Zealand Journal of Botany* 30: 125–133. 1992, *New Zealand Journal of Botany* 35: 259–262. 1997, *Am. J. Bot.* 86: 1136–1145. 1999, *Flora of New Zealand* 5: 423–459. 2000, *Flora of Australia* Volume 44B, Poaceae 3: 26. 2005.

Chionochloa flavescens Zotov (*Danthonia flavescens* Hook.f.)

New Zealand. Densely tufted, alpine plant, tough, stout shoots, leaf sheaths glabrous or hairy, leaf blades tapering, glossy leaves drooping and deciduous, dead sheaths break crosswise, glumes acute or shortly awned, growing on rocky coarse textured slopes, on shady slopes, sometimes described under *Chionochloa rigida* (Raoul) Zotov

See *Handbook of the New Zealand Flora* 332. 1864 and *Transactions and Proceedings of the Royal Society of New Zealand* 68: 295. 1938, *New Zealand Journal of Botany* 1: 97. 1963, *New Zealand J. Bot.* 29: 253. 1991

(Grass decoction taken for rheumatic pains.)

in English: broad leaved snow tussock, broad leaved snow tussock grass, snow tussock

Maori name: wi

Chiranthodendron Larreat. Sterculiaceae (Bombacaceae, Malvaceae)

Greek *cheir* 'hand' plus *anthos* 'flower' and *dendron* 'tree', referring to the stamens basally united but apically separate and resembling a hand, see *Descripciones de Plantas* [Larreategui] 37. 1795, *Anal. Cienc. Nat.* vi. (1803) 303, adnot. 1803, Larreategui, José Dionisio, *Description botanique du Chiranthodendron*, arbre du Mexique, nouvellement connu, et remarquable par son aspect et sa beauté; traduction de l'espagnol de don Joseph-Denis Larreategui ... avec deux planches coloriées: publiée par m. Lescallier ..., Paris, Imprimerie impériale, 1805, *Plantae Aequinoctiales* [Humboldt & Bonpland] 1: 81. 1806 and *Aliso* 13(1): 239. 1991, Vazquez Garcia, Luis Miguel, *El arbol de las manitas en Mexico*. Toluca: Universidad Autonoma del Estado de Mexico, 1991, *Taxon* 58(4): 1357. 2009.

Chiranthodendron pentadactylon Larr. (*Cheirostemon platanoides* Bonpl.; *Chiranthodendron platanoides* (Bonpl.) Baill.)

Mexico.

See *Plantae Aequinoctiales* 1: 82, t. 24. 1806, *Histoire des Plantes* 4: 69. 1873 and *Fieldiana, Bot.* 24(6): 403–428. 1949, *Journal of Ethnopharmacology* 100(1–2): 153–157. 2005, *Journal of Ethnopharmacology* 103(1): 66–70. 2006, *Journal of Ethnopharmacology* 108(3): 367–370. 2006, *Journal of Ethnopharmacology* 126(3): 455–458. 2009, *Journal of Ethnopharmacology* 128(1): 49–51. 2010

(Flowers antisecretory, antibacterial, antiprotozoal, astringent, to treat gastrointestinal disorders, diarrhea, dysentery. Flowers infusion sedative and cardiac tonic, used to treat high blood pressure.)

in English: little hand flower

in Latin America: arbol de las manitas, cacpalxochitl, camxóchitl, canac, canaco, canague, flor de manita, huiahuonahua, limaneshmu, macpalxochicuáhuil, macpalxochitl, majagua, manita, mano de dragón, mano de león, mano de mico, mapasúchil, mapilxochit, palo de mecate, palo de tayyo, papasuchil, ranac, tayuyo, teyagua, teyegue

Chirita Buch.-Ham. ex D. Don Gesneriaceae

From a Nepalese or Hindustani vernacular name; see Richard William George Hingston, *A naturalist in Hindustan*. London 1923.

Chirita fimbriepala Handel- Mazzetti (*Didymocarpus fimbriepalus* (Handel-Mazzetti) Handel- Mazzetti)

China.

See *Edinburgh Philosophical Journal* 1: 378. 1819 and *Anzeiger der Akademie der Wissenschaften in Wien. Mathematische-naturwissenschaftliche Klasse. Wien* 62: 65. 1925, *Symbolae Sinicae* 7(4): 882–883. 1936

(Rhizome for injuries from fractures and contusions.)

in China: ma huang qi

Chirita longgangensis W.T. Wang var. ***hongyao*** S.Z. Huang

China.

See *Edinburgh Philosophical Journal* 7: 83. 1822 and *Guihaia* 2(4): 171–173, pl. 1. 1982

(Whole plant blood tonic.)

in China: hong yao chun zhu ju tai

Chironia L. Gentianaceae

A mythological creature, father of medicine and surgery, half horse and half man, son of Phyllira and Saturnus (Kronos), pupil of Apollo and Artemis, Chiron was the wisest of Centaurs, he cured a wound in his foot caused by the arrows of Hercules (Heracles).

Chironia baccifera L.

South Africa. Shrub, woody-based, starry bright pink flowers, red berries

See *Species Plantarum* 1: 275. 1753

(Poisonous to stock. Purgative, bitter tonic, blood purifier, a remedy for piles, stomach ulcers, acne and boils, sores, syphilis, leprosy, diabetes and kidney and bladder infections, arthritis, also used to expel a retained placenta after childbirth.)

in English: Christmas berry, piles bush, toothache berry, wild gentian

in South Africa: aambeiebos, bitterbos, meidjie Willemse, perdebossie, tandpynbossie

Chironia palustris Burch. subsp. ***transvaalensis*** (Gilg) Verd. (*Chironia transvaalensis* Gilg)

South Africa. Herb, leaves cauline and in a basal rosette, pink flowers 5-merous in a lax few-many flowered cyme, calyx 5-lobed without basal glands, lobes sometimes winged, corolla tube 5-lobed, ovary 1-locular, stigma capitate or 2-lobed, bright yellow anthers straight or very slightly twisted, capsule septicidally 2-valved

See *Species Plantarum* 1: 189. 1753, *Travels in the interior of South Africa* 2: 226. 1824, *Botanische Jahrbücher für*

Systematik, Pflanzengeschichte und Pflanzengeographie 26(1): 106. 1898 and *Bothalia* 7: 460. 1961

(Poisonous, toxic to sheep and rabbits.)

in English: cerise star, marsh chironia, Rhodesian wild gentian

in South Africa: bitterwortel, lehlapahali, lephshetlane, mosia

Chironia purpurascens Benth. & Hook. f. subsp. ***humilis*** (Gilg) Verd. (*Chironia humilis* Gilg; *Chironia humilis* var. *wilmsii* (Gilg) Prain)

South Africa. Herb, magenta flowers, bright yellow anthers twisted

See *Genera Plantarum* [Bentham & Hooker f.] 2(2): 805. 1876, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(1): 105. 1898 and *Bulletin of Miscellaneous Information Kew* 1908: 350. 1908, *Bothalia* 7: 462. 1961

(May be poisonous.)

Chisocheton Blume Meliaceae

Greek *schizo*, *schizein* 'to split, to divide' and *chiton* 'a tunic, covering, cloak', referring to the nature of the flowers; see K.L. von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 168. 1825 and *Bulletin of the British Museum (Natural History)*, *Botany* 6(4): 359, 365–366, 368. 1979.

Chisocheton cumingianus Harms subsp. ***balansae*** (C. DC.) Mabb. (*Chisocheton balansae* C. DC.; *Dasycoleum cumingianum* C. DC.)

China, India.

See *Monographiae Phanerogamarum* 1: 541. 1878 and *Taxon* 26(5–6): 528. 1977, *Bull. Brit. Mus. (Nat. Hist.), Bot.* 6(4): 349. 1979

(Crushed leaf paste from the base of the leaf taken for throat congestion and pain.)

in India: tasso roro

Chisocheton divergens Blume

Borneo. Tree

See *Bijdragen tot de flora van Nederlandsch Indië* 4: 169. 1825

(Bark decoction drunk for the treatment of cold.)

Chisocheton pentandrus Merr.

Philippines.

See *Publications of the Bureau of Science Government Laboratories* 27: 31. 1905

(Antiseptic.)

in Philippines: katong-machin

Chlamydocola (K. Schumann)**M. Bod. Sterculiaceae**

Greek *chlamys*, *chlamydos* 'cloak, short mantle' plus *Cola* Schott & Endl., see *Journal d'Agriculture Tropicale et de Botanique Appliquée* 1(7–9): 312–316. 1954, *Kew Bulletin* 57: 403–415. 2002.

Chlamydocola chlamydantha (K. Schum.) M. Bodard (*Cola chlamydantha* K. Schum.; *Cola chlamydantha* Hutch. & Dalziel)

Tropical Africa. Tree or small tree, slender, bole straight, inflorescence a fascicle on old branches, large orange-red cauliflorous flowers, carpels curved inwards, seeds with red aril surrounded by colourless viscous liquid, juice from the large fruit drunk by the humans, seed cotyledons chewed as an inferior substitute of those of the true kola, sour-sweet fruit pulp edible, gorillas eat the fruit

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 112. 1900, *Flora of West Tropical Africa* 1: 256. 1928, *J. Agric. Trop. Bot. Appl.* 1: 313. 1954, *Candollea* 25(1): 143–170. 1970

(Leaves febrifuge. Bark decoctions taken for stomachache and against cough. Liquid from the fruit cavity to treat eye inflammation.)

in Central African Republic: kpongo, ngadoka, pongo

Chloranthus Swartz Chloranthaceae

Greek *chloros* 'green' and *anthos* 'flower', see *Systema Naturae*, ed. 12 2: 154. 1767, *Nova Genera Plantarum* 58. 1783, *Philosophical Transactions of the Royal Society of London* 77: 359, pl. 15. 1787, *Botanical Magazine* 48: sub pl. 2190. 1820, *Narrat. Exped. Japan* 2: 318. 1856 and *Pl. Syst. Evol.* 195: 177–185. 1995, *Bot. J. Linn. Soc.* 133(3): 327–342. 2000.

Chloranthus erectus (Buch.-Ham.) Verdc. (*Chloranthus elatior* Link; *Chloranthus elatior* R. Br., nom. nud.; *Chloranthus erectus* Sweet ex Wall.; *Chloranthus erectus* Sweet, nom. nud.; *Chloranthus officinalis* Blume; *Cryphaea erecta* Buch.-Ham.)

India, China. Small aromatic herb, shrub, erect, minute subulate stipules, small white flowers, inflorescence branches spicate, creamy white succulent obovoid fruits, yellowish white fruits

See *Hort. Suburb. London* 28. 1818, *Botanical Magazine* 48: sub t. 2190. 1820, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 140. 1821, *Edinburgh Journal of Science* 2: 11. 1825, *Enumeratio Plantarum Javae* 1: 79. 1827, *A Numerical List of Dried Specimens* [Wallich] n. 6881. 1832 and *Kew Bulletin* 40(1): 217. 1985

(Plant stimulant, sudorific, febrifuge. Leaves stimulant, febrifuge, antispasmodic, in fever, venereal diseases; leaves and

roots sudorific, febrifuge. Roots and nodes pounded and applied for treating old fracture; powdered roots rubbed on the body to treat fever. Stem bark applied to treat broken bone and fracture, even old one. Magic, ceremonial, ritual.)

in China: yu zi lan

in India: bea-ken-kur, lakang-taklang

in Indonesia: kerastulang

Malayan names: rami hutan, samban paya, sambau paya, sigueh putih

Chloranthus fortunei (A. Gray) Solms (*Tricercandra fortunei* A. Gray)

China.

See *Memoirs of the American Academy of Arts and Science*, new series 6(2): 405. 1858, *Prodromus Systematis Naturalis Regni Vegetabilis* 16: 476. 1868 and *Chinese Journal of Natural Medicines* 6(6): 404–407. 208, *J. Nat. Prod.* 71(4): 674–677. 2008

(Used for the treatment of bone fractures.)

in China: shui jing hua, si sui jin su lan

Chloranthus henryi Hemsley

China.

See *Journal of the Linnean Society, Botany* 26(176): 367–368. 1891

(Analgesic.)

in China: kuan ye jin su lan

Chloranthus henryi Hemsley var. ***hupehensis*** (Pampanini) K.F. Wu

China.

See *Acta Phytotax. Sin.* 18(2): 223. 1980

(Analgesic.)

in China: hu bei jin su lan

Chloranthus holostegius (Handel-Mazzetti) Pei & Shan (*Chloranthus holostegius* (Hand.-Mazz.) P'ei & San)

China.

See *Contr. Biol. Lab. Chin. Assoc. Advancem. Sci., Sect. Bot.* 10: 210. 1938

(Antiinflammatory.)

in China: quan yuan jin su lan

Chloranthus japonicus Siebold (*Chloranthus mandshuricus* Ruprecht; *Tricercandra japonica* (Siebold) Nakai; *Tricercandra quadrifolia* A. Gray)

China, Japan.

See *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 14(2): 681. 1829, *Narrat. Exped. Japan* 2: 318. 1856, *Dec. Pl. Amur* pl. 2. 1859 and *Flora Sylvatica Koreana* 18: 14. 1930

(Stomachic, diuretic.)

in China: yin xian cao

Chloranthus multistachys S.J. Pei

China.

See *Sinensia* 6: 681, f. 7. 1935

(For liver troubles.)

in China: duo sui jin su lan

Chloranthus serratus Roemer & Schultes (*Chloranthus serratus* (Thunberg) Roemer & Schultes; *Nigrina serrata* Thunb.)

China, Japan.

See *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 7: 142, pl. 5. 1815, *Systema Vegetabilium* 3: 461. 1818

(Astringent, for diarrhea.)

in China: ji ji

Chloranthus sessilifolius K.F. Wu

China.

See *Acta Phytotax. Sin.* 18(2): 220–221, pl. 1, f. 1–6. 1980

(Blood purifier.)

in China: si chuan jin su lan

Chloranthus spicatus Makino (*Chloranthus inconspicuus* Swartz; *Chloranthus inconspicuus* Blanco, nom. illeg.; *Chloranthus spicatus* (Thunberg) Makino; *Nigrina spicata* Thunberg)

Japan, China.

See *Nova Genera Plantarum* 59. 1783, *Philosophical Transactions of the Royal Society of London* 78: 359, pl. 15. 1787, *Flora de Filipinas* 54. 1845 and *Bot. Mag. (Tokyo)* 16(188): 180. 1902

(Antiinflammatory, for rheumatism.)

in China: jin su lan, zhu lan

in Japan: cha-ran

in Okinawa: awaran

Chloris Swartz Poaceae (Gramineae)

After the Greek goddess of flowers, Chloris, daughter of Amphion; Flora was the equivalent Roman goddess; Latin *chloris*, *chloridis* ‘verdant’, Greek *chloros* ‘green’; related to *Eustachys* Desv. and *Cynodon* Rich., often confused with *Enteropogon* Nees, hybridization with *Cynodon* Rich., see

Olof Peter Swartz, *Nova genera et species plantarum seu Prodromus*. 25. 1788 and *Bulletin de la Société Botanique de France* 91: 63. 1944, *Bulletin de la Société Botanique de France* 97: 227. 1950, *Flora of Ethiopia and Eritrea* 7: 166–171. 1995, *Bulletin du Muséum d’Histoire Naturelle sér.* 2, 29: 349. 1957, *Folia Primatologica* 15: 1–35. 1971, D.E. Anderson, “Taxonomy of the genus *Chloris* (Gramineae).” *Brigham Young University Science Bulletin: Biological Series* 19(2): 1–133. 1974, *Taxon* 25: 176–178. 1976, *Feddes Repert.* 94: 625–630. 1983, *Taxon* 32(3): 472. 1983, *Feddes Repert.* 96: 269–277. 1985, *Flora Mesoamericana* 6: 287–289. 1994, *Contributions from the United States National Herbarium* 41: 39–52, 222–223. 2001, *Flora of Australia* Volume 44B, Poaceae 3: 269–282. 2005, *Journal of Biogeography* 32(2): 311–327. 2005, *Plant Pathology* Volume 54, Issue 2: 253–253. 2005, *Ecological Management and Restoration* Volume 6, Issue 1: 43–50, 73–75. 2005, *Botanical Journal of the Linnean Society* 147(4): 399–416. 2005, *Botanical Journal of the Linnean Society* 148(1): 57–72. 2005.

Chloris barbata Swartz (*Andropogon barbatus* sensu L. 1771 (also *barbata* and *barbatum*); *Andropogon polydactylon* L.; *Andropogon polydactylos* L.; *Chloris barbata* (L.) Nash, nom. illeg., non *Chloris barbata* Sw.; *Chloris barbata* (L.) Swartz; *Chloris barbata* var. *divaricata* Kuntze; *Chloris barbata* var. *formosana* Honda; *Chloris dandyana* C.D. Adams; *Chloris inflata* Link; *Chloris inflata* Llanos; *Chloris longifolia* Steud.; *Chloris paraguayensis* Steud.; *Chloris paraguayensis* Steud.; *Chloris polydactyla* (L.) Sw.; *Chloris rufescens* Steud., nom. illeg., non *Chloris rufescens* Lag.; *Miscanthus polydactylos* (L.) Voss; *Saccharum polydactylum* (L.) Thunb.)

Tropics, origin uncertain. Annual or short-lived perennial, stout, glabrous, three-awned, loosely tufted, inflorescence spicate and digitately arranged at the end of a flowering culm, lowest fertile floret with long-bearded callus, glumes unequal, a common weed species widespread in tropics and subtropics, high food value, fodder and forage

See *Voy. Jamaica* 111, tab. 65, fig. 2. 1707, *Systema Naturae, Editio Decima* 2: 1305. 1759, *Species Plantarum, Editio Secunda* 2: 1483. 1763, *Mantissa Plantarum* 302. 1771, *Flora Japonica*, ... 42. 1784, *Nova Genera et Species Plantarum seu Prodromus* 26. 1788, *Flora Indiae Occidentalis* 1: 200, 203. 1797, *Essai d’une Nouvelle Agrostographie* 84, 158, 176. 1812, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 105. 1821, *Synopsis Plantarum Glumacearum* 1: 204–206. 1854, *Enum. (A decoction of the plant or of the roots used for colds and rheumatisms. Leaves antiseptic, wound dressing, applied on wound to prevent bacterial infection.)

in English: blackseed, blackseed grass, blue grass, feather finger grass, feather fingergrass, feather windmill grass, feathered chloris, feather-top chloris, feathertop, feathertop chloris, feathertop Rhodes, feathertop Rhodes grass, feathery Rhodes grass, haygrass, old land grass, old land's grass, showy chloris, showy windmill grass, sweet grass, sweet hay grass, white grass, windmill grass, woolly-top

in India: bhothia jara, chota sailria, ganjali hullu, gharanaghas, gharaniagas, gudi hullu, pandhad, phundna

in Spanish: verdillo plumerito, zacate, zacate mota, zacate plumain Mexico: barba de chivo, barba de indio, barbas de

indio, cebadilla, cola de zorra, huak-top'suuk, meex-mascual, motita, paraguítas, pata de gallo, verdillo plumerito, zacate cola de zorra, zacate lagunero, zacate mota, zacate motilla

in Madagascar: antocazo, antokazo

in Niger: asghal, azghal, buta'n kurégé, gabarédilabé, garago, tasbat n-ejemar, toesbat najemâr

in Sahara: kra el rab

in Somalia: agar, ausdug

in S. Rhodesia: Wuwu

in Southern Africa: blougras, hooigras, katstertgras, klossiegras, klossiesgras, kwasgras, oulandegras, paardgras, perdegas, soetgras, spinnekopgras, vley-quirngras, witgras, witpluimchloris, wollerigegras; amafusine (Zulu); sehabane, leholala-dipere (Sotho); umadolwana (Xhosa)

in Upper Volta: garbere

Chlorocardium Rohwer, H.G. Richt. & van der Werff Lauraceae

From the Greek *chloros* 'green, pale green' and *kardia* 'heart', see *Annals of the Missouri Botanical Garden* 78(2): 388–400. 1991.

Chlorocardium rodiei (R.H. Schomb.) Rohwer, H.G. Richt. & van der Werff (*Nectandra rodioei* R.H. Schomb.; *Ocotea rodiei* (R.H. Schomb.) Mez; *Ocotea rodiei* Mez)

South America, Guyana. Tree, flowers creamy-white

See *Acta Literaria Universitatis Hafniensis* 1: 279. 1778, *London Journal of Botany* 3: 626. 1844, *Flora of the British West Indian Islands* 282. 1860, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 5: 236. 1889 and *Annals of the Missouri Botanical Garden* 78(2): 388–390. 1991

(Used to stop bleeding and prevent infections, also used as a contraceptive or for abortions. *Ocotea rodiei* is a sacred plant of Amazon.)

in English: green heart, greenheart

Chlorocardium venenosum (Kosterm. & Pinkley) Rohwer, H.G. Richt. & van der Werff (*Ocotea venenosa* Kosterm. & Pinkley)

Colombia, Ecuador. Tree, leaves spirally arranged, smooth fruit depressed-globose

See *Histoire des plantes de la Guiane Française* 2: 781, pl. 310. 1775 and *Botanical Museum Leaflets* 22(7): 241–271. 1969, *Annals of the Missouri Botanical Garden* 78(2): 390–392. 1991

(Fruit employed as an ingredient of arrow poison, curarizing effect.)

Chlorogalum Kunth Asparagaceae (Hyacinthaceae, Liliaceae)

Greek *chloros* 'green' and *gala* 'milk', referring to the sap, see *Sp. Pl.* 1: 308, 310. 1753, *Gard. Dict. Abr.*, ed. 4. [textus s.n.]. 1754, *Fam. Pl.* (Adanson) 2: 49. 1763, *Fl. Tellur.* 3: 53. 1837 [1836 publ. Nov–Dec 1837], *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 4: 681. 1843.

Chlorogalum pomeridianum (DC.) Kunth (*Anthericum pomeridianum* (DC.) Ker Gawl.; *Anthericum pomeridianum* Ker Gawl.; *Laothoe pomeridiana* (DC.) Raf.; *Laothoe pomeridiana* Raf.; *Phalangium pomeridianum* (DC.) Sweet; *Phalangium pomeridianum* Sweet; *Scilla pomeridiana* DC.)

North America. Perennial herb

See *Cat. Pl. Horti Monsp.*: 143. 1813, *Bot. Reg.* 7: t. 564. 1821, *Hort. Brit.*: [Sweet] 416. 1826, *Fl. Tellur.* 3: 53. 1837 [1836 publ. Nov–Dec 1837], *Enum. Pl.* [Kunth] 4: 682. 1843

(Poisonous. Bulb used as a fish poison.)

in English: soap plant, wavyleaf soap plant, wild potato

Chlorogalum pomeridianum (DC.) Kunth var. ***pomeridianum*** (*Laothoe pomeridiana* (DC.) Raf.)

North America. Perennial herb

See *Cat. Pl. Horti Monsp.*: 143. 1813, *Bot. Reg.* 7: t. 564. 1821, *Hort. Brit.*: 416. 1826, *Fl. Tellur.* 3: 53. 1837, *Enum. Pl.* [Kunth] 4: 682. 1843 and *Madroño* 5(5): 137. 1940

(Poisonous, the roots and plant. Crushed bulb used as a fish poison.)

in English: soap plant, wavyleaf soap plant, wild potato

Chlorophytum Ker Gawl. Asparagaceae (Anthericaceae, Liliaceae)

Greek *chloros* 'green, pale green, yellow-green' and *phyton* 'a plant', referring to the foliage; see *Curtis's Botanical Magazine*. 27: t. 1071. 1807 and *Journal of Cytology and Genetics* 6: 7–13. 1971, *Taxon* 28: 627–628. 1979, *Journal of the Indian Botanical Society* 59: 67–71. 1980, *Cytologia* 52: 543–550. 1987, *Cytologia* 53: 571–575. 1988, *Cytologia* 58: 433–437. 1993.

Chlorophytum arundinaceum Baker (*Anthericum tuberosum* Hook.f., nom. illeg.)

India, Nepal. Herb, cluster of fleshy roots, radical leaves linear-lanceolate, dense-flowered racemes, globose capsule, white flowers eaten as vegetable

See *Journal of the Linnean Society, Botany* 15: 323. 1876, *Fl. Brit. India* 6: 334. 1892

(Used in Ayurveda, Unani and Sidha. Roots tonic and aphrodisiac, for dysmenorrhea and impotency; crushed roots mixed with milk given for arthritis, rheumatism; decoction

of roots of *Chlorophytum arundinaceum* and turmeric given in rheumatism. Magico-religious beliefs, spiritual, love charm, emotional.)

in India: eeerulli yele gida, banadhau, bharatbatuli, dheunga, musali, musli safaid, pandri kand musli, phulsaag, phulsag, pirijadu, safed moosli, safed musali, safed-musli, safedmusli, shveth musalee

Tibetan: pusala, susala

Chlorophytum bharuchae Ansari, Sundararagh. & Hemadri

India. Erect perennial herb, tuberous, strap-like leaves, white flowers

See *Indian Forester* 96: 304. 1970, *Indian Journal of Botany* 2: 59–62. 1979, *Journal of Ethnopharmacology* 107(3): 463–469. 2006

(For menstrual and fertility problems.)

in India: phulbaji

Chlorophytum borivilianum Santapau & R.R. Fernandes (*Chlorophytum borivilianum* Santapau & A. Fern.)

India. Perennial herbs, tuberous roots, white flowers in unbranched racemes, trigonous capsules, leaves used as vegetable

See *J. Bombay Nat. Hist. Soc.* 3: 898. 1955

(Root antimicrobial, aphrodisiac, demulcent, tonic, stimulant and galactagogue, used in the form of powder to treat freckles, cough, deafness, general and sexual debility, diarrhea, dysentery.)

in India: kulai, musali safed, museli shveth, musli safed, musli safed gugali, safed musli, turchi

Chlorophytum comosum (Thunb.) Jacques (*Anthericum comosum* Thunb.; *Anthericum longituberosum* Poelln., as *Chlorophytum longituberosum*; *Anthericum planifolium* Thunb.; *Anthericum sternbergianum* Roem. & Schult.; *Anthericum vallistrappii* Poelln., as *Chlorophytum vallistrappii*; *Caesia comosa* (Thunb.) Spreng.; *Chlorophytum beniense* De Wild.; *Chlorophytum bukobense* Engl.; *Chlorophytum bukobense* Engl. var. *kilimandscharicum*; *Chlorophytum burchellii* Baker; *Chlorophytum comosum* (Thunb.) Baker, nom. illeg., non *Chlorophytum comosum* (Thunb.) Jacques; *Chlorophytum delagoense* Baker; *Chlorophytum elatum* (Aiton) R. Br. ex Ker var. *burchellii* (Baker) Baker; *Chlorophytum elgonense* Bullock; *Chlorophytum gazense* Rendle; *Chlorophytum glaucidulum* Poelln.; *Chlorophytum glaucidulum* Poelln. var. *pauper*; *Chlorophytum kirkii* Baker; *Chlorophytum limurense* Rendle; *Chlorophytum longum* Poelln.; *Chlorophytum macrophyllum* (A. Rich.) Asch. var. *angustifolium* Poelln.; *Chlorophytum magnum* Peter ex Poelln.; *Chlorophytum miserum* Rendle; *Chlorophytum nemorosum* Poelln.; *Chlorophytum paludicolum* Poelln.; *Chlorophytum petrophilum* Krause; *Chlorophytum pulchellum* auct., sensu Oberm., non Kunth; *Chlorophytum*

ramiferum Rendle; *Chlorophytum rugosum* Poelln.; *Chlorophytum semlikiense* De Wild.; *Chlorophytum sternbergianum* (Roem. & Schult.) Steud.; *Chlorophytum turritum* Peter ex Poelln.; *Chlorophytum usambarense* Poelln.; *Chlorophytum viviparum* A. Chev.; *Chlorophytum viviparum* A. Chev. var. *maritimum*; *Hartwegia comosa* (Thunb.) Nees; *Hollia comosa* (Thunb.) Heynh.; *Phalangium comosum* (Thunb.) Poir.; *Phalangium viviparum* Hort.)

Tropical & S. Africa.

See *Prodromus Plantarum Capensium* ... 63. 1794, *Encyclopédie Méthodique, Botanique* 5: 252. 1804, *Systema Vegetabilium*, editio decima sexta 2: 88. 1825, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 15(2): 378. 1831, *Alphabetische und Synonymische Aufzählung der Gewächse* 303. 1846, *Journal de la Société Impériale et Centrale d'Horticulture* 8: 345. 1862, *Journal of the Linnean Society, Botany* 15: 329–330. 1876 and *Phytochemistry* 41(5): 1405–1410. 1996

(Antitumour promoter compounds.)

in English: bracket plant, hen-and-chicks, ribbon plant, spider ivy, spider plant, walking anthericum

in Southern Africa: ujejane (Xhosa)

Chlorophytum glaucum Dalzell (*Anthericum nimmonii* J. Graham; *Hartwegia nimmonii* Dalzell ex Baker)

India. Annual herb, white flowers, sharply 3-winged capsule, tubers eaten

See *Cat. Pl. Bombay*: 220. 1839, *Hooker's J. Bot. Kew Gard. Misc.* 2: 142–143. 1850, *J. Linn. Soc., Bot.* 15: 324. 1876

(Tubers eaten in sexual impotency.)

in India: musali, pulum musali

Chlorophytum indicum (Willd. ex Schult. & Schult.f.) Dress (*Asphodelopsis arangadinensis* Steud. ex Baker; *Chlorophytum attenuatum* Baker; *Chlorophytum attenuatum* (Wight) Baker; *Liliago indica* (Willd. ex Schult. & Schult.f.) C. Presl; *Ornithogalum indicum* Willd. ex Schult. & Schult.f.; *Phalangium attenuatum* Wight; *Phalangium indicum* (Willd. ex Schult. & Schult.f.) Kunth)

India.

See *Syst. Veg.*, editio decima sexta 7: 535. 1829, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 4: 598. 1843, *Abh. Königl. Böhm. Ges. Wiss.*, IV, 3: 534. 1845, *Icon. Pl. Ind. Orient.*: t. 2037. 1853, *Journal of the Linnean Society, Botany* 15: 332. 1876 and *Baileya* 9: 43. 1961

(Used in Sidha.)

in India: tiravanti

Chlorophytum laxum R. Br. (*Anthericum bichetii* Backer; *Anthericum parviflorum* (Wight) Bentham; *Chlorophytum*

abyssinicum Hochst. ex Kotschy & Peyr.; *Chlorophytum abyssinicum* Kotschy & Peyr.; *Chlorophytum acaule* Baker; *Chlorophytum bichetii* Backer; *Chlorophytum debile* Baker; *Chlorophytum falcatum* (Wall. ex Kunth) Baker; *Chlorophytum falcatum* Baker; *Chlorophytum laxiflorum* Baker, nom. illeg.; *Chlorophytum laxiflorum* (R. Br.) Baker; *Chlorophytum laxum* f. *javanicum* (Hassk.) Backer; *Chlorophytum parviflorum* (Wight) Dalzell; *Chlorophytum parviflorum* Dalzell; *Chlorophytum xerotinum* F. Muell.; *Nolina javanica* Hassk.; *Phalangium laxum* (R. Br.) F. Muell.; *Phalangium parviflorum* Wight)

Trop. Africa, South China, India, Malesia.

See *Prodromus Florae Novae Hollandiae* 277. 1810, *Fragmenta Phytographiae Australiae* 7: 71. 1869, *Journal of the Linnean Society, Botany* 15: 328. 1876 and *Bulletin of the Botanical Survey of India* 10: 228. 1968, *Chinese Chemical Letters* 16(7): 925–927. 2005

(The aerial part of the plant used for the treatment of traumatic injury, poisonous snakebites, swelling and pain. Antimicrobial roots used to treat diarrhea and dysentery and also used as demulcent and galactagogue.)

in China: xiao hua diao lan

in India: neeruvatti pacha

Chlorophytum tuberosum (Roxb.) Baker (*Acrospira lilioides* A. Chev.; *Anthericum anthericoideum* Hochst. ex A. Rich.; *Anthericum kilimandscharicum* Poelln.; *Anthericum niveum* (Poir.) Spreng.; *Anthericum ornithogaloides* Hochst. ex A. Schweinf. & Asch.; *Phalangium ornithogaloides* (Hochst. ex A. Rich.) Schweinf.; *Phalangium tuberosum* (Roxb.) Kunth)

E. Trop. Africa, India, Myanmar. Perennial herb, white flowers in racemes, roots used as a vegetable

See *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 4: 598. 1843, *Abhandlungen der königlichen Böhmischen Gesellschaft der Wissenschaften* IV, 3: 534. 1845, *Journal of the Linnean Society, Botany* 15: 332. 1877 and *Bulletin of the Botanical Survey of India* 10: 228. 1968, *Senckenberg. Biol.* 50: 243. 1969

(Used in Ayurveda and Sidha. Flowers cooked as tonic and restorative. Roots tonic, mucilaginous, antimicrobial, used to treat diarrhea and dysentery and also used as demulcent and galactagogue; powdered tubers used in leucorrhoea. Tuber powder of *Eulophia ramentacea* given with the roots of *Chlorophytum tuberosum* and *Curculigo orchoides* with milk to cure impotency and weakness.)

in India: dhauri musli, dravanti, janjaria, kaura-kanda, kawra-kanda, kuchhela, musali, safed musali, safed musli, sarala pagada, tiravanticam

Chloroxylon DC. Rutaceae (Flindersiaceae)

From the Greek *chloros* 'green' and *xylon* 'wood', see *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 625. 1824.

Chloroxylon dupada Buch.-Ham.

India.

See Hamilton, Francis (1762–1829), *A journey from Madras through the countries of Mysore, Canara, and Malabar ...* London: T. Cadell and W. Davies, 1807

(Used in Ayurveda.)

in India: coong kilium, yakshadhupa

Chloroxylon faho Capuron (*Chloroxylon falcatum* Capuron; *Chloroxylon swietenia* DC.; *Swietenia chloroxylon* Roxburgh)

India, Madagascar. Tree, white flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 625. 1824 and *Adansonia* sér. 2, 1: 68. 1961, *Adansonia* sér. 2, 7(4): 479–481, t. 1. 1967

(Used in Ayurveda and Sidha. Gum powder mixed with and dissolved in water given for the treatment of diabetes and urinary disorders. Paste from fresh leaves applied to treat poisonous bites; dried stem bark powdered and made into a paste applied to itches. Leaves and root made into a paste given to alleviate headache. Bark astringent and leaves used in rheumatism; fresh bark paste applied on the skin for skin diseases; stem bark pounded with stem barks of *Azadirachta indica* and *Pongamia pinnata* given orally after delivery as antiseptic, tonic and postpartum remedy. Veterinary medicine, wood ash mixed with coconut oil applied over cattle necks; stem bark of *Deccania pubescens* ground with those of *Carissa spinarum*, *Chloroxylon swietenia* and tubers of *Withania somnifera* given in anthrax; stem bark powder along with gruel given orally for anthrax and ephemeral fevers; leaves crushed and applied to wounds of cattle; leaves and twigs used to repel lice inside the cage of poultry.)

in English: Ceylon satinwood, satinwood, satinwood tree

Choerospondias B.L. Burt & A.W. Hill Anacardiaceae

Latin *choeras*, *adis* 'the scrofula', Greek *choiras* 'neck gland' plus *Spondias*, see *Gen. Pl.* [Jussieu] 372. 1789 and *Annals of Botany*, n.s. Oxford 1: 254. 1937, *Bull. Misc. Inform. Kew* 1937: 407. 1937.

Choerospondias axillaris (Roxb.) B.L. Burt & A.W. Hill (*Poupartia axillaris* (Roxb.) King & Prain; *Poupartia fordii* Hemsl.; *Spondias axillaris* Roxb.)

India, Nepal. Deciduous trees, warty fibrous bark, pinnate leaves, yellow oblong drupes, fruits rich in vitamin C

See *Hort. Bengal.* 34. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 453–454. 1832, *FBI* 2: 42. 1876, *Hooker's Icon. Pl.* 26: t. 2557. 1898 [1899 publ. Apr 1898] and *Annals of the Royal Botanic Garden. Calcutta.* 9(1): 20. 1901, *Annals of Botany*, n.s. Oxford 1: 254. 1937, *Bull. Misc. Inform. Kew* 1937: 407. 1937, *Scandinavian Journal of Plastic and Reconstructive Surgery and Hand Surgery* 30(2): 139–144. 1996, *Zhongguo Zhong Yao Za Zhi.* 30(14): 1096–1098. 2005

(Dry bark used as masticatory. Arrhythmias, anti-arrhythmic action of the fruits. Water extract from the bark in the treatment of second degree burns in both children and adults.)

in China: nan suan zao

in India: theseli-araung

in Nepal: lapsi

Chondrodendron Ruiz & Pavón Menispermaceae

Greek *chondros* 'cartilage, lump, groats of wheat' and *dendron* 'tree', see *Botanical Museum Leaflets* - Harvard University 29(1): 27–48. 1983.

Chondrodendron tomentosum Ruiz & Pav. (*Botryopsis spruceana* Eichler; *Chondrodendron cretosum* Miers; *Chondrodendron scabrum* Miers; *Chondrodendron tamoides* Miers; *Cocculus chondrodendron* DC.; *Epibaterium tomentosum* (Ruiz & Pav.) Pers.)

Peru. Woody vine, large heart-shaped leaves, small flowers greenish-white, edible bittersweet fruit

See *Systema Vegetabilium Florae Peruvianae et Chilensis* 261. 1798, *Synopsis Plantarum* 2: 561. 1807, *Regni Vegetabilis Systema Naturale* 1: 522. 1818[1817], *Annals and Magazine of Natural History*, ser. 2 7: 44. 1851, *Flora* 47: 394–395. 1864

(Antibacterial, antiseptic, wound healer, diuretic, menstrual stimulant, antiinflammatory and febrifuge. Leaves crushed and applied externally for the treatment of poisonous snake-bites. Root used to increase urination, reduce fever and promote menstruation, to treat edema, inflammation of the urinary tract. enlarged prostate, kidney stones and testicular inflammation; externally used for bruises and contusions. Arrow poisons.)

in English: curare, ice vine, pareira root, velvet leaf

in South America: ampihuasca blanca, antinoopa, antinupa, comida de venados, curari, ourari, pareira, pareira brava, urari, uva-da-serra, uva-do-mato, woorari, worali

Chonemorpha G. Don f. Apocynaceae

Greek *chone* ‘a funnel’ and *morphe* ‘a form, shape’, referring to the shape of the flowers, the calyx is tubular.

Chonemorpha eriostylis Pitard (*Chonemorpha eriostylis* var. *baviensis* Pit.)

China. Liana, white corolla, linear follicles

See *Fl. Indo-Chine* 2: 1247–1248. 1933

(Stem for rheumatism.)

in China: lu jiao teng

Chonemorpha fragrans (Moon) Alston (*Beluttakaka grandieriana* Pierre, nom. nud.; *Beluttakaka griffithii* (Hook.f.) Kuntze; *Beluttakaka macrophylla* (G. Don) Kuntze; *Cercocoma macrantha* Teijsm. & Binn., nom. nud.; *Chonemorpha blancoi* Merr., nom. superfl.; *Chonemorpha elliptica* Merr. & Rolfe; *Chonemorpha grandieriana* Pierre ex Spire; *Chonemorpha grandiflora* G. Don; *Chonemorpha grandiflora* (Roth) G. Don; *Chonemorpha griffithii* J.D. Hooker; *Chonemorpha macrantha* Pit.; *Chonemorpha macrophylla* G. Don; *Chonemorpha macrophylla* (Roxb.) G. Don, nom. illeg.; *Chonemorpha macrophylla* var. *grandis* A. DC.; *Chonemorpha mollis* Miq.; *Chonemorpha penangensis* Ridl.; *Chonemorpha rheedei* Ridl.; *Chonemorpha valvata* Chatterjee; *Chonemorpha yersinii* Vernet; *Echites fragrans* Moon; *Echites grandiflorus* Roth, nom. illeg.; *Echites grandis* Wall., nom. inval.; *Echites latifolius* Buch.-Ham. ex Wall., nom. inval.; *Echites macranthus* Spreng., nom. illeg.; *Echites macrophyllus* Roxb., nom. illeg.; *Epichysianthus macrophyllus* (Roxb.) Voigt; *Epichysianthus macrophyllus* (G. Don) Voigt; *Rhynchodia macrantha* Pharm. ex Wehmer; *Tabernaemontana elliptica* Blanco, nom. illeg.)

Himalaya, Malesia. Climbing shrub, woody vine, sweet scented, white flowers in axillary or terminal cymes, flat shortly beaked seeds bearing a long tuft of hair

See *Hort. Bengal.* 20. 1814, *Novae Plantarum Species* 136. 1821, *A Catalogue of the Indigenous and Exotic Plants Growing in Ceylon* 20. 1824, *Flora Indica*; or, descriptions of Indian Plants 2: 13. 1832, *A General History of the Dichlamydeous Plants* 4: 76. 1837, *Hortus Suburbanus Calcuttensis* 523. 1845, *Revisio Generum Plantarum* 2: 413. 1891 and *Bull. Écon. Indochine* 35: 1197. 1904, *Contr. Apocyn.* 72. 1905, *Philipp. J. Sci.*, C 3: 121. 1908, *Agric. Bull. Straits Fed. Malay States* 10: 146–147. 1911, *Annals of the Royal Botanic Gardens. Peradeniya* 11: 203. 1929, *Fl. Indo-Chine* 3: 1249. 1933, *Kew Bulletin* 2: 51. 1947

(Used in Ayurveda. Roots for skin diseases, leprosy, scabies, syphilis, inflammation, constipation, worm infestations, hyperacidity, diabetes, jaundice, cough, bronchitis, intermittent fevers, stomach disorders, purgative; crushed roots decoction drunk for retained placenta. Stem for the treatment of fractures and rheumatism.)

in English: Griffith chonemorpha, hairy leaf chonemorpha

in China: da ye lu jiao teng, yang bi lu jiao teng

in India: belutta-kaka-kodi, beluttakakakodi, chandrahoovina balli, jyemi longwan, kakkakkoti, moorva, morala, morata, murva, palvalli, perumkurumpaveru, phung-theikelki, veluttakkakkakkoti

Chonemorpha megacalyx Pierre

China. Lianas, corolla pink or reddish, seeds with silky coma

See *Contr. Apocyn.* 76–85, pl. 20–21, f. 4–6. 1906

(Stem to treat backache, leg pain, rheumatism, fractures. Seed coma used externally to treat hemostasis.)

in China: chang e lu jiao teng

Chorispora R. Br. ex DC. Brassicaceae (Cruciferae)

Greek *choris* ‘separate, asunder, apart’ and *spora* ‘seed’, alluding to the septate fruits, see *Hortus Kewensis*; or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. London (2nd ed.) 4: 129. 1812, *Mémoires du Muséum d’Histoire Naturelle* 7(1): 237. 1821, *Syst. Nat.* [Candolle] 2: 435. 1821, Jacquemont, Victor (1801–1832), *Voyage dans l’Inde*, pendant les années 1828 à 1832, publié sous les auspices de M. Guizot, Ministre de l’Instruction Publique ... Paris, 1841–1844.

Chorispora sabulosa Cambess. (*Chorispora elegans* Cambess.; *Chorispora elegans* var. *integrifolia* O.E. Schulz; *Chorispora elegans* var. *sabulosa* (Cambess.) O.E. Schulz; *Chorispora elegans* var. *stenophylla* O.E. Schulz; *Chorispora sabulosa* var. *eglandulosa* Narayanswamy ex H.B. Naithani & Uniyal; *Chorispora sabulosa* var. *eglandulosa*

Narayanswamy ex Naithani & Uniyal; *Chorispora sabulosa* var. *sabulosa* Cambess.)

India.

See *Voyage dans l'Inde* 4(Bot.): 15. 1844 and *Indian Journal of Forestry* 5(3): 245. 1982

(Young leaves and shoots cooked as vegetable and eaten as tonic and stomachic.)

in China: sha sheng li zi jie

in India: imbuk

Christia Moench Fabaceae (Desmodieae)

For the German botanist Johann Ludwig Christ, 1739–1813, clergyman, among his works are *Handbuch über die Obstbaumzucht und Obstlehre*. Frankfurt 1794, *Der neueste und beste deutsche Stellvertreter des Indischen Caffee oder der Caffee von Erdmandeln*. Frankfurt 1801 and *Vollständige Pomologie und zugleich systematisches ...* Frankfurt 1809; see *An Enumeration of Philippine Flowering Plants* 2(3): 241–323. 1923, *Reinwardtia* 6(1): 85–108. 1961, *Flowering Plants of Jamaica* 1–848. 1972, *Annals of the Missouri Botanical Garden* 68: 551–557. 1981, *Flora of the Lesser Antilles, Leeward and Windward Islands* (Dicotyledoneae—Part 1) 4: 334–538. 1988.

Christia vespertilionis (L.f.) Bakh. f. (*Christa vespertilionis* (L.f.) Bakh. f.; *Christia lunata* Moench; *Hedysarum vespertilionis* L.f.; *Lourea vespertilionis* (L.f.) Desv.; *Lourea vespertilionis* Desv.)

India. Perennial non-climbing herb

See *Species Plantarum* 2: 745–751. 1753, *Supplementum Plantarum* 331. 1781 [1782], *Suppl. Meth.* 39. 1802, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 122. 1813, *An Introduction to the Natural System of Botany* 148. 1836, *Nat. Geneesk. Arch.* 3: 56. 1846

(Whole plant for treating tuberculosis and snakebites. Leaves used as a topical treatment for healing bone fractures.)

in English: bat-winged hedysarum, butterfly plant, windmill plant

in China: bian fu cao

Christolea Cambess. Brassicaceae (Cruciferae)

See *Chloris Melvilliana* 10–12, pl. B. 1823, *Linnaea* 6: 533. 1831, Jacquemont, Victor (1801–1832), *Voyage dans l'Inde* 4: 160. Paris, 1841–1844 [The part of v. 4 dealing with botany: “Description des collections: botanique” has the separate title of *Plantae rariores*, quas in India orientali collegit Victor Jacquemont / J. Cambessedes.] and Jafri, Saiyad Masudal Hasan (1927–1986), “*Christolea*: with special reference to the

species in N.W. Himalayas, W. Pakistan and Afghanistan.” *Notes R. Bot. Garden Edinburgh* 22: 49–59. 1955.

Christolea crassifolia Cambess. (*Christolea afghanica* (Rech. f.) Rech. f.; *Christolea crassifolia* var. *pamirica* (Korsh.) Korsh.; *Christolea incisa* O.E. Schulz; *Christolea pamirica* Korsh.; *Ermania crassifolia* Junussov; *Ermania crassifolia* (Cambess.) Ovcz. & Sabir Junusovicz Junussov; *Ermania pamirica* (Korsh.) Ovcz. & Junussov; *Koelzia afghanica* Rech. f.; *Parrya ramosissima* Franch.)

India, China.

See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 4: 89. 1896 and *Notizbl. Bot. Gart. Berlin-Dahlem* 9: 1073. 1927, *Phyton* (Horn) 3: 59. 1951, *Anz. Österr. Akad. Wiss., Math.-Naturwiss. Kl.* xci. 64. 1954, *Acta Bot. Yunnan.* 15: 377–384. 1993

(Fresh leaves and tender shoots eaten as nutritious vegetable and to improve eyesight.)

in India: kharla, lukmuk, sanak

Chrozophora A. Juss. Euphorbiaceae

Greek *chrozo* ‘to dye, tinge, stain’ and *phoros* ‘bearing’, source of turn-sole dye, see *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen*, tabulis aeneis 18 illustratum 27. 1824.

Chrozophora brocchiana (Vis.) Schweinf. (*Chrozophora brocchiana* var. *hartmannii* Schweinf.; *Chrozophora brocchiana* var. *hartmannii* Müll.Arg.; *Chrozophora senegalensis* (Lam.) A. Juss. ex Spreng. var. *lanigera* Prain; *Croton brocchianus* Vis.; *Croton lanigerus* (Prain) Perr. ex Prain; *Croton macrocalyx* Ehrenb. ex Schweinf.; *Tournefol brocchiana* (Vis.) Kuntze)

Cape Verde to Sahara. Herb, more or less prostrate or suffrutescent, small crimson flowers, violet capsule, eaten by sheep and goats

See *Plantae quaedam Aegypti ac Nubiae enumeratae...* 39. 1836, *Plantae Quaedam Niloticae* 9. 1862, *Revisio Generum Plantarum* 2: 621. 1891

(Emetic, astringent, for venereal diseases, diabetes, diarrhea, rheumatism, mental derangement. Macerated leaves against taenia and ascaris.)

Chrozophora oblongifolia (Delile) A. Juss. ex Spreng. (*Chrozophora obliqua* auct., non (Vahl) A. Juss.; *Croton oblongifolius* Delile)

NE Trop. Africa, India. Erect shrubby herb, yellow flowers

See *Species Plantarum* 2: 1004–1005. 1753, *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 283. 1812, *Systema Vegetabilium*, editio decima sexta 3: 850. 1826

(Seeds purgative. Green leaves to heal wounds and pimples, rubbed on the infected area. Whole plant ground and paste

applied on snakebites and bites of poisonous insects and other arthropods.)

in India: chawa-tong

in Pakistan: parsand

Chrozophora plicata (Vahl) A. Juss. ex Spreng. (*Chrozophora burmannii* Spreng.; *Chrozophora obliqua* Schweinf., nom. illeg.; *Chrozophora obliquifolia* (Vis.) Baill.; *Chrozophora obliquifolia* Kotschy ex Pax & K. Hoffm., nom. illeg.; *Chrozophora parvifolia* Klotzsch ex Schweinf.; *Chrozophora plicata* var. *erecta* Prain; *Chrozophora plicata* var. *genuina* Müll.Arg., nom. inval.; *Chrozophora plicata* var. *obliquifolia* (Vis.) Prain; *Chrozophora plicata* var. *prostrata* Müll.Arg.; *Chrozophora prostrata* Dalzell & Gibson; *Chrozophora prostrata* var. *parvifolia* (Klotzsch ex Schweinf.) N.P. Balakr.; *Chrozophora tinctoria*, sensu Klotzsch; *Croton asper* J. König ex Roxb.; *Croton hastatus* Burm.f., nom. illeg.; *Croton lanuginosus* K. Schum. ex Schweinf.; *Croton moluccanus* Willd.; *Croton obliquifolius* Vis.; *Croton plicatus* Vahl; *Croton tinctorius* Burm.f., nom. illeg.; *Tournefortia plicata* (Vahl) Kuntze)

Trop. and Subtrop. Africa, Indochina. Herb, semiwoody, prostrate, decumbent, erect, branched, densely covered in greyish stellate hairs, leaf-opposed or pseudo-axillary inflorescences, flowers yellowish-orange or pinkish or crimson-red, fruit strongly 3-lobed reddish- or bluish-purple, weed

See *Familles des Plantes* 2: 356, 612. 1763, *Fl. Indica* 304–305. 1768, *Introductio ad Historiam Naturalem* 243. 1777, *Symbolae Botanicae*, ... 1: 78. 1790, *Systema Vegetabilium*, editio decima sexta 3: 850–851. 1826, *Étude Euphorb.*: 322. 1858, *Bombay Fl.*: 233. 1861, *Pl. Quaed. Nilot.*: 10–11, 13. 1862, *Revis. Gen. Pl.* 2: 621. 1891 and *Fl. Trop. Afr.* 6(1): 835. 1912, *Bull. Bot. Surv. India* 15(1–2): 7. 1973 (publ.1976)

(Used in Ayurveda, Unani and Sidha. Acrid and poisonous, said to cause vomiting and diarrhea. Extract of *Sphaeranthus indicus* and leaves of *Grewia tiliaefolia* and this plant given orally for dermatitis. Plant extract as gargle for mouth sores.)

in English: dyer's croton, giradol, turnsole

in India: alincakikkoti, alinciki, guruguchettu, lingamiriyam, naitavakakkoti, naitavarakam, neel kanthi, neelkanthi, nilkanthi, patukakkoti, patukam, penceruppati, peruncerup-patai, perunceruppati, shadevi, shahdevi, sonballi, subali, suryavarta, suryavarti

in Senegal: ka vamburā, n-diamat, n-diamet, ndadar lag, ndahafula, ndusur, sama ndéku

Chrozophora prostrata Dalzell & Gibson

India. Prostrate woolly herbs, flowers in axillary racemes, woolly stellate capsule, often as *Chrozophora plicata* (Vahl) A. Juss. ex Spreng.

See *The Bombay Flora* ... 233. 1861

(Plant depurative, spasmolytic, purgative, cough-sedative; whole plant paste applied in skin diseases. Roots for asthma and bronchitis; ash for cough.)

in India: neelkanthi, pujibatango

Chrozophora rottleri (Geiseler) A. Juss. ex Spreng. (*Chrozophora rottleri* A. Juss.; *Croton rottleri* Geiseler)

India, Indochina. Herbs or undershrub, leaves 2-glandular at base, stigmas red, purple fruits

See *Crotonis Monographiam* [Geiseler] 54. 1807, *Systema Vegetabilium*, editio decima sexta 3: 850. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2): 747. 1866

(Used in Ayurveda. Plant acrid, poisonous, emetic, cathartic, drastic corrosive. Leaves depurative, seeds purgative; ashes of the roots administered to children for cough; root powder given with water in cough and cold. Leaves chewed to treat leucoderma; crushed leaves applied in sunburn and sunstroke. Fish poison. Veterinary medicine, leaves used in the treatment of skin diseases on neck of horses.)

in India: dekha chowkdi, dekha-chowkdi, erra miriyam, gubra, gurugu, khakaguddi, khudi-okra, linga menasu, linga mirapa, lingamenasu, shadevi, sonballi, souballi, subali, suravarta, surya-varti, suryavarta

Chrysactinia A. Gray Asteraceae

From the Greek *chrysos* 'gold', *chrysaktin* 'with golden rays' and *aktin* 'ray', see *Memoirs of the American Academy of Arts and Science*, new series 4(1): 93. 1849 and *Madroño* 24(3): 134. 1977.

Chrysactinia mexicana A. Gray

Mexico.

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 93. 1849

(A decoction drunk to induce conception; leaves and stems infusion to treat infertility in women.)

in Mexico: damianita, San Nicolas

Chrysanthellum Rich. Asteraceae

From the Greek *chrysos* 'gold' and *anthos* 'flower', referring to the small golden flowers, see *Synopsis Plantarum* 2: 471. 1807 and *Ceiba* 19(1): 1–118. 1975, *Fieldiana, Botany* 24(12): 181–361, 503–570. 1976, *Flora of Chiapas* 5: 1–232. 1999.

Chrysanthellum americanum (L.) Vatke (*Anthemis americana* L.; *Anthemis americana* L.f., nom. illeg., non *Anthemis americana* L.; *Anthemis oppositifolia* Lam.; *Chrysanthellum americanum* Vatke; *Chrysanthellum americanum* Hitchc.; *Chrysanthellum procumbens* Rich. ex Pers., nom. illeg. superfl.; *Verbesina mutica* L., nom. illeg. superfl.)

Pantropical. Herb, annual, aromatic, spreading, prostrate, creeping, leaves alternate, florets yellow, capitulum with a large peduncle, interior flowers tubular, exterior flowers ligulate, dark flattened achenes, weed

See *Species Plantarum* 2: 893–896, 901–903. 1753, *Species Plantarum*, Editio Secunda 1273. 1763, *Supplementum Plantarum* 378. 1781 [1782], *Encyclopédie Méthodique, Botanique* 1(2): 576. 1783 [1785], *Syn. Pl.* 2: 471. 1807, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 9: 122. 1885 and *Ann. Missouri Bot. Gard.* 62: 1184. 1975, *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 10: 177–184. 1987, *Feddes Repertorium* 99: 1–13. 1988, *Feddes Repertorium* 101: 49–62. 1990

(Decoction of entire plant used for fever, measles, jaundice, kidney and bladder stones. Veterinary medicine, plant in water given to chicken for yaws.)

in Burkina Faso: dye dye seni, hi lè, ko anga, pi lè, wal touko
in Nigeria: abilèrè, kiyesile, oyigi, rariyar kasa

Chrysanthellum indicum DC. (*Chrysanthellum indicum* subsp. *mexicanum* (Greenm.) B.L. Turner; *Chrysanthellum indicum* var. *mexicanum* (Greenm.) B.L. Turner; *Chrysanthellum mexicanum* Greenm.; *Coreopsis diffusa* M.E. Jones; *Hinterhubera kotschyi* Sch. Bip. ex Hochst., nom. nud. inval.)

India, Mexico.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 631. 1836, *Flora* 24(1): 42. 1841 and *Proceedings of the American Academy of Arts and Sciences* 39: 114. 1903, *Contributions to Western Botany* 18: 73. 1933, *N. Amer. Fl.*, ser. ii 2: 149. 1955, *Amer. J. Bot.* 66: 173–178. 1979, *Phytologia* 51(4): 291. 1982

(Increase of the mechanical resistance of capillaries, has been shown to be effective in reducing the signs of rosacea.)

in English: golden chamomile

Chrysanthellum indicum DC. var. ***afroamericanum*** B.L. Turner (*Chrysanthellum procumbens* Pers.)

Tropical Africa.

See *Phytologia* 52(4): 291. 1982

(Aerial portion, febrifuge, diuretic, for heart diseases, gonorrhoea, a poultice for maturing boils. Whole plant infusion without the roots together with *Tamarindus indica* taken for hepatitis; a decoction of the entire plant taken for jaundice with urinary complications. Leaves mashed and mixed in shea butter, taken to cure heart troubles.)

in Ghana: niba

in Nigeria: abilere, ágádi-ísí-awo, ayigi, ganshin gona, giito gortogalhi, goshin baana, oyigi, raáriyár kása

in Senegal: fura kuna

Chrysanthellum integrifolium Steetz (*Chrysanthellum americanum* var. *integrifolium* (Steetz) Alexander; *Chrysanthemum coronarium* L.; *Glebionis coronaria* (L.) Cass. ex Spach; *Matricaria coronaria* (L.) Desr.; *Xanthophthalmum coronarium* (L.) Trehane)

Panama.

See *Species Plantarum* 2: 890. 1753, *Encyclopédie Méthodique, Botanique* 3(2): 737. 1792, *Histoire Naturelle des Végétaux* 10: 181. 1841, *The Botany of the Voyage of H.M.S. ~Herald~* 160. 1854 and *North American Flora*, series 2, 2: 148. 1955

(Used in Ayurveda, Unani and Sidha.)

in English: chrysanthemum greens, crown daisy

in India: akura kara, akurkurra, chamanthi, chamanti, chandra-mallika, chandramallika, gavanashevathi, gul-i-seoti, gul seoti, gulacheeni, gulchini, guldaudi, gulesevathi, gulesevati, hale, kupotakacceti, kupotakam, mancalcamanti, mancamanti, mancatcamanti, mancatcevanti, mancatcevanti, mancatcittirappu, mutiracevanti, pithogarkah, seunti, shamantippu, shevantika, sventi, swenti, taza gul seoti ki pankhriyan, tursiphal

Chrysanthemum L. Asteraceae

Latin *chrysanthemum*, *chrysanthemon* and Greek *chrysanthemon* for the gold-flower, marigold, also called *heliochryson* (Plinius), Greek *chrysos* ‘gold’ and *anthemon* ‘flower’, referring to the colour of the capitula; see Carl Linnaeus, *Species Plantarum*. 2: 843, 887, 889–890. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 2. 1754, *Genera Plantarum*. Ed. 5. 379. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 65. 1837, *Flora Orientalis* 3: 335–336. 1875, *Compositae Indicae* 146. 1876, *Genera Plantarum* 2: 426. 1876, *Pflanzenfam.* 4(5): 278. 1889 and *Acta Phytotaxonomica et Geobotanica* 4: 36–37. 1935, *Contributions from the Institute of Botany, National Academy of Peiping* 3: 480–481. 1935, *Kiku* 115. 1948, *Acta Phytotaxonomica et Geobotanica* 29(6): 168. 1978, *Taxon* 47: 443–444. 1998, *Taxon* 48: 375. 1999.

Chrysanthemum morifolium Ramatuelle (*Anthemis grandiflora* Ramat.; *Dendranthema grandiflorum* (Ramat.) Kitam.; *Dendranthema morifolium* (Ramat.) Tzvelev; *Matricaria morifolia* Ramat.; *Tanacetum morifolium* (Ramat.) Kitam.)

Cosmopolitan. Perennial herb, erect, sprawling, hairy, striate, leaves alternate, inflorescence small head, flowers yellowish-white, ray corollas white, calyx greenish, fruit one-seeded

See *Species Plantarum* 2: 843–845, 887, 890–891, 893–896. 1753, *Journal d’Histoire Naturelle* 2: 233, 240. 1792, *Actes de la Société Linnéenne de Bordeaux* 20: 561. 1860 and *Mem. Coll. Sci. in Sri Lanka: ottu pul, tuttiri

in Thailand: ya chaochu, ya khikh rok, ya khitroei, yaa chaochuu, yaa ka troei, yaa khee khrok, yaa khee troei, yaa klon, yaa kon, yaa nam luek, yaa nokkhum

in Vietnam: bong co, co bong, co' bông, co may, co' may

Chrysosplenium L. Saxifragaceae

Greek *chrysos* 'gold' and *splenion* 'pad or compress of linen', referring to the sessile leaves; Latin *asplenium* or *asplenon* 'miltwort, spleenwort', Greek *asplenon* 'miltwaste', *a-* euph. and *splen* 'the spleen; see *Species Plantarum* 1: 398–405. 1753, *Genera Plantarum* 308. 1789, *Bulletin de la Société Impériale des Naturalistes de Moscou* 17(2): 272–273. 1844, *Bulletin de l'Académie Impériale des Sciences de St.-Pétersbourg* 17: 420. 1872, *Bulletin de l'Académie Impériale des Sciences de St.-Pétersbourg* 23: 340–344, 348–349. 1877, *Nouvelles archives du muséum d'histoire naturelle* 2: 102, 104, 106, 112. 1890, *Nouvelles archives du muséum d'histoire naturelle* 3: 12. 1891 and *Journal of the Faculty of Science: University of Tokyo, Botany* 7: 19, 76–77, 85. 1957, *Acta Phytotax. Sin.* 24(3): 203–204, 206. 1986, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 154–155. 1996.

Chrysosplenium forrestii Diels

China, Bhutan.

See *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 282. 1912

(Aerial parts for liver problems.)

in China: gong shan jin yao

Chrysothemis Decne. Gesneriaceae

Greek *chrysos* 'gold' and *themis* 'law, the custom'; Themis was a daughter of Coelus and Terra, she became mother of Dice, Irene and Eunomia.

Chrysothemis friedrichsthaliana (Hanst.) H.E. Moore (*Tussacia friedrichsthaliana* Hanst.) (*Tussacia* Benth., for the French botanist François Richard de Tussac, 1751–1837.)

Guatemala.

See *Revue Horticole* 3: 242. 1849, *Linnaea* 34(3): 337–338. 1865 and *Baileya* 2(3): 87. 1954

(A snakebite remedy, also used for diarrhea and to reduce bruises and swellings.)

in Panama: wilkwa

Chuanminshen M.L. Sheh & R.H. Shan Apiaceae (Umbelliferae)

From the common name, see *Acta Phytotax. Sin.* 18: 45–49. 1980.

Chuanminshen violaceum M.L. Sheh & R.H. Shan

China. Herb perennial, deep-rooted, leaves mainly in basal rosette, umbels loosely compound, inflorescence branches many-branched and spreading, fruits dorsally compressed, grassy places along stream banks, on mountain slopes

See *Acta Phytotax. Sin.* 18(1): 48–49, pl. 2. 1980, *Bull. Nanjing Bot. Gard. Mem. Sun Yat Sen* 1981: 1–8. 1981, *Bull. Nanjing Bot. Gard.* 1987: 14–26. 1987, *China J. Pl. Resources & Environm.* 4(3): 1–8. 1995, *Chemical Journal of Chinese Universities-Chinese* 23(8): 1539–1541. 2002, *Bot. Bull. Acad. Sin.* 44(4): 291–296. 2003

(Root tonic, invigorating.)

in China: chuan ming shen shu

Chukrasia A. Juss. Meliaceae (Swietenieae, Swietenioideae)

From a Hindi name, chikrassee, for *Chukrasia tabularis* A. Juss., see *Mémoires du Muséum d'Histoire Naturelle* 19: 251. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 122. 1834 and Mabblerley, D.J., Pannell, C.M., and Sing, A.M. *Flora Malesiana*. Series I, Vol 12, Part 1: *Meliaceae*. 1995, Kalinganire, A. and Pinyopusarek, K. *Chukrasia: Biology, Cultivation and Utilisation*. ACIAR Technical Reports No. 49, 35pp. 2000.

Chukrasia tabularis A. Jussieu (*Chickrassia nimmonii* Graham ex Wight; *Chickrassia tabularis* Wight & Arn.; *Chickrassia tabularis* (A. Juss.) Wight & Arn.; *Chickrassia tabularis* var. *velutina* (M. Roem.) King; *Chickrassia velutina* M. Roem.; *Chikrassia nimmonii* Graham ex Wight;

Chikrassia tabularis var. *genuina* Theob.; *Chikrassia tabularis* var. *velutina* (M. Roemer) Theob.; *Chikrassia trilocularis* (G. Don f.) M. Roemer; *Chikrassia velutina* M. Roemer; *Chukrasia chickrassa* (Roxb.) Schultze-Motel; *Chukrasia nimmonii* (R. Graham ex Wight) Merr. & Chun; *Chukrasia tabularis* var. *attopeuensis* Pierre; *Chukrasia tabularis* var. *dongnaiensis* (Pierre) Pellegrin; *Chukrasia tabularis* var. *microcarpa* (Pierre) Pellegrin; *Chukrasia tabularis* var. *quadri-valvis* Pellegrin; *Chukrasia tabularis* var. *velutina* (M. Roem.) Pellegr.; *Chukrasia tabularis* var. *velutina* (Wallich) King; *Chukrasia velutina* (M. Roem.) C. DC.; *Chukrasia velutina* var. *dongnaiensis* Pierre; *Chukrasia velutina* var. *macrocarpa* C. de Candolle; *Chukrasia velutina* var. *microcarpa* Pierre; *Dysoxylum esquirolii* H. Lév.; *Plagiotaxis velutina* Wallich; *Swietenia chickrassa* Roxb.; *Swietenia sotrophola* Buch.-Ham. ex Wall; *Swietenia velutina* Wall. ex Kurz; *Swietenia villosa* Wall. ex Kurz)

SE Asia, India, Borneo. Tree, straight cylindrical bole, inner bark red and white, a yellow transparent gum exudes from the trunk, no odor, leaves paripinnate, glabrous dark green leaflets, creamy fragrant flowers, infructescence pendulous, yellow transparent gum by the sap, flowers contain a red and yellow dye

See *Journey Madras* 1: 184. 1807, *Hortus Bengalensis*, or a catalogue ... 33. 1814, *Mémoires du Muséum d'Histoire Naturelle* 19: 251, pl. 22. 1830, *Num. List* n. 4892. 1831–32, *Bull. Sci. Nat. Géol.* 23: 241. 1830, *Fl. Ind.* 2: 399. 1832, *Fam. Natur. Monogr.* 1:135. 1846, *Num. List* n. 8099. 1847, *Enum. Pl. Zeyl.* 61. 1858, *J. Asiat. Soc. Bengal* 42(2): 65. 1873, *Mon. in Indonesia: ingol batu

in Laos: mai nhom, nhom hin, nhom kok

Malay names: surian batu, cherana puteh, repoh, suntang puteh

in Sri Lanka: hulan hik, hiri kita, kaloti

in Vietnam: lat hoa, lat da dong, lat chun

Chuquiraga Juss. Asteraceae

From the vernacular name, see *Genera Plantarum* 178. 1789.

Chuquiraga jussieui J.F. Gmel. (*Chuquiraga insignis* (Willd.) Bonpl.; *Chuquiraga lancifolia* Bonpl.; *Chuquiraga microphylla* Bonpl.; *Chuquiraga peruviana* J. St.-Hil.; *Chuquiraga pseudoruscifolia* Muschl.; *Johannia insignis* Willd.; *Lychnophora van-isschoti* Heckel)

Central America. Shrub

See *Systema Naturae* ... editio decima tertia, aucta, reformata 1205. 1792, *Species Plantarum*. Editio quarta 3: 1705. 1803, *Plantae Aequinoctiales* 1(6): 151, 153, t. 43. 1808[1807], *Denkschriften der Koeniglich-Baierischen Botanischen Gesellschaft in Regensburg* 2: 148, 157. 1822, *Chloris Andina* 1(1): 3. 1855 and *Rev. Cult. Colon.* 11: 161, f. 1. 1902, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50(2/3, Beibl. 111): 93–94. 1913, *Blumea* 5: 662. 1945

(Leaves or flowers infusion febrifuge, diuretic, tonic, stomachic, used against hepatic problems, rheumatism, inflammations, influenza and also for relief of persistent coughs.)

in English: flower of the Andes

in Ecuador: chuquiragua

Chuquiraga kuschelii Acevedo

Chile.

See *Genera Plantarum* 178. 1789 and *Boletín del Museo Nacional de Historia Natural* 24: 86. 1948

(Stem and leaves anesthetic.)

in Chile: kiri

Chuquiraga spinosa Less. (*Chuquiraga spinosa* (Ruiz & Pav.) D. Don; *Chuquiraga spinosa* D. Don)

Chile, Peru. Shrub, semi-woody

See *Systema Vegetabilium Florae Peruvianaee et Chilensis* 1: 188–189. 1798, *Linnaea* 5: 259. 1830, *Trans. Linn. Soc.*

London 16(2): 285. 1830 and *Journal of Ethnopharmacology* 111(2): 284–294. 2007

(Antioxidant.)

in Chile: chana, huamanpinta

Chydenanthus Miers Lecythidaceae

Greek *chydaios* and Latin *chydaeus* ‘abundant, common’ plus *anthos* ‘flower’, see *Trans. Linn. Soc. London, Bot.* 1(2): 111. 1875 [1880 publ. Dec 1875].

Chydenanthus excelsus Miers (*Barringtonia excelsa* Blume; *Barringtonia vriesei* Teijsm. & Binn.; *Chydenanthus excelsa* Miers)

India. Tree, drooping branches, pinkish-white flowers in panicles, warted 4-angled fruits

See *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 2: 308. 1851, *Trans. Linn. Soc. London, Bot.* 1(2): 112. 1875 [1880 publ. Dec 1875], *Revisio Generum Plantarum* 1: 241. 1891

(Poisonous. Fresh nut scraped and applied directly to a sore. Dried nut ground, mixed with water and drunk to treat coughs, influenza, sore throat and bronchitis; externally applied to wounds and a swollen spleen after an attack of malaria. Fresh leaves applied externally to relieve rheumatism and when heated used as a remedy to stomach pain. Seeds vermifuge used against parasitic elements in intestinal tract; seed powder applied on wounds. Bark decoction to treat constipation and epilepsy. Piscicide, insecticide, fruits, roots or seed used as a fish poison; bark and fruits narcotic, pulped and used to stupefy fish.)

in India: kin-cha-yuh

in Indonesia: besole

Cibotium Kaulf. Cibotiaceae (Dicksoniaceae, Dryopteridaceae, Thyrsopteridaceae)

From the Greek *kibotos* ‘a box, small box’; see Georg Friedrich Kaulfuss (1786–1830), in *Berlinisches Jahrbuch für die Pharmacie und für die damit verbundenen Wissenschaften.* 21: 40, 53. 1820 and *Bot. Mag.* (Tokyo) 43. 316. 1929.

Cibotium barometz (L.) J. Sm. (*Aspidium barometz* (L.) Willd.; *Aspidium barometz* Willd.; *Aspidium baromez* Willd.; *Cibotium assamicum* Hook.; *Cibotium baranetz* Christ; *Dicksonia baranetz* Link; *Dicksonia barometz* Link; *Dicksonia barometz* (L.) Link; *Dicksonia barometz* Hook. & Baker; *Nephrodium baromez* (L.) Sweet; *Nephrodium baromez* Sweet; *Polypodium barometz* L.)

China. Large fern, the rhizome of this plant is very thick, woody, covered by long soft, golden yellow hairs, looks like a golden hair dog

See *Sp. Pl.* 2: 1092. 1753, *Species Plantarum*. Editio quarta [Willdenow] 5(1–2): 268–269. 1810, *Hortus Britannicus* [Sweet] 580. 1827, *Filicum Species* 166. 1841, *London J. Bot.* 1: 437. 1842, *Sp. Fil.* 1. 83 t. 29 B. 1844, *Syn. Fil.* (Hooker & Baker) 49. 1866 and *Philipp. J. Sci.*, C 2: 117. 1907, *Contr. U. S. Nat. Herb.* 16: 54. 1912, *Journal of Japanese Botany* 62: 261–267. 1987

(Plant vulnerary, antirheumatic. Hairs of the rhizome and stipe used as a wound dressing and to staunch blood loss. Stem as vermifuge. Roots tonic, styptic, for the treatment of lumbago.)

in English: golden fern, golden moss

in China: gou ji, jin mao gou jue, kou chi

in Japan: taka-warabi

Malayan name: pakoë kidang, penawar jambi, penghawar djambi

in Okinawa: shishiba

in the Philippines: salagisog

in Vietnam: cau tich, co cut pa, cu li, cut bang, kim mao, nhai cu viang

Cicer L. Fabaceae (Cicereae)

From the classical Latin name, *cicer*, *ciceris* ‘the cickpea’, ancient German word *kichurra*, German *Kicher*, Hebrew *kikkar* ‘round, circle’, see *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 109–110. 1978, *Webbia* 34: 535–542. 1979, *Grassl. China.* 4: 53–60. 1989, *Ann. Missouri Bot. Gard.* 81: 792–799. 1994, *Caryologia* 48(2): 147–155. 1995, *Fl. Medit.* 7: 213–218. 1997, *Cytologia* 65: 161–166. 2000.

Cicer arietinum L. (*Cicer album* hort.; *Cicer arietinum* L.; *Cicer arietinum* L.; *Cicer edessanum* Bornm.; *Cicer grossum* Salisb.; *Cicer nigrum* Hort. Vindob. ex Zeyher; *Cicer nigrum* Hort.; *Cicer nigrum* Hort. ex Steud.; *Cicer physodes* Rchb.; *Cicer rotundum* Alef.; *Cicer sativum* Schkuhr; *Cicer sintenisii* Bornm.; *Ononis crotalarioides* M.E. Jones; *Ononis crotalarioides* M.E. Jones, nom. illeg.; *Ononis crotalarioides* Coss.)

Probably originated in SW Asia but its native area obscured by cultivation. Annual non-climbing herb, young green pods eaten raw, pulse crop, fodder

See *Species Plantarum* 2: 716–719, 738. 1753, *Bot. Handb.* [C. Schkuhr]. 2: 367, t. 202. 1796, *Prodr. Stirp. Chap. Allerton* 340. 1796, *Nomencl. Bot.* [Steudel], ed. 2. 1: 361. 1840 and *Contributions to Western Botany* 15: 138–139, 163. 1929, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 18 (2): 487–559. 1937, *Repert. Spec. Nov. Regni Veg.* 50: 138. 1941, *Phytologia* 10(5): 321–406. 1964, *Fl. Trop. E. Africa, Leguminosae*: 1065. 1971, *A Revised Handbook to the Flora of Ceylon* 1: 428–458. 1980, *Taxon* 33(3): 441. 1984, *J. Econ. Taxon.*

Bot. 7: 249–276. 1985, *A Revised Handbook of the Flora of Ceylon* 7: 108–381. 1991

(Used in Ayurveda, Unani and Sidha. The foliage and seed-pods contain oxalic acid and can irritate the skin. Tonic, astringent, diuretic, anthelmintic, water soaked seeds with hot milk used in the treatment of dyspepsia, constipation and snakebite; roasted seeds used for cough; seeds powder given for jaundice; seed paste in spider bite. Roasted seeds used in religion and magico-religious beliefs. Veterinary medicine, mature grains tied on severe sprains of cattle.)

in English: Bengal gram, catjang arab, chick pea, chickpea, Egyptian pea, garbanzo bean, gram, katjang arab, yellow gram

in China: ying zui dou

in India: arenu, arimantai, arimantakam, arukkanam, balab-haishajya, balabhojya, but, but mah, cana, canaka, canakah, canakam, canam, chana, chanagalu, chanaka, chanakam-ulu, chane, chane ka sag, chane-ka-sirkah, channa, channo, chano, chennuka, chola, chona, chunda kadalai, chunna, citayam, cul, culakaceti, culakam, cunna, curakacitam, curam, curanan, dalchana muqqashar, hamze, habbat-ul-khazara, habbat-ul-khazra, habbat-ul-khizra, harbar, harbara, harb-haraa, harimandhakam, harimandhakamu, harimantha, hasi kadale, hub-at-khizra, hubt-ul-khazra, jennaga, jivana, jumez, kadalai, kadalai kadi, kadalai pulippu, kadale, kadale kaalu, kadle, kalle, kanchuki, karas, karikadale, katala, katalai, kempukadale, khallul-himmas, konda-kadala, kontaikkatali, krishnachanchuka, kudoly, mookkukkadalai, mukantam, mukilikakkatalai, muttukaceti, muttukam, muttukampayaru, nakhood bariyan, nakhud, nakhud (chana), narali, nattukkatalai, nikantacaceti, nikantakam, pakantam, parcoti, patumalarcci, porikatalai, safaid chanay ki dal, sakalapriya, sanuagalu, senaga, senagalu, shenagalu, sirkahe-nakhud, sirkahenakhud, soppukadale, sugandha, tukkarancam, tuviputam, ukantacaceti, ukantacaceti, ukantakam, ukantam, vacipatcam, vajibhakshya, vajimantha, vakkarancappayaru, vanacankatam

in Nepal: chana

in Tibetan: mon sran tsa na

in Mexico: bizaa baa xtila, pizaa paa castilla

in Arabic: hommos, homs

Cicer microphyllum Benth. (*Cicer jacquemontii* Jaub. & Spach; *Cicer microphyllum* Royle; *Cicer songaricum* Steph. ex DC.; *Cicer songaricum* auct. non (DC.) Bunge; *Cicer songaricum* Jaub. & Spach)

India, Nepal, Himalaya. Perennial climbing shrub, spreading, glandular, hairy, purple flowers in pairs or solitary, young green pods eaten raw, unripe seed eaten, grazed by sheep and goats, fodder plant fed to milking animals

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 200. 1835, *Annales des Sciences Naturelles; Botanique*, sér. 2, 18: 231. 1842

(Flower nectar stimulant. Veterinary medicine, tonic, stimulant, dried plants fed to yak, cattle and goats.)

in English: wild gram

in China: xiao ye ying zui dou

in India: seri, srad-kar

in Tibet: sgo-napu-ci

Cichorium L. Asteraceae

Chikourych, an ancient Arabic name for one species of salad vegetable, for chicory; Latin *chicoreum*, *ei* (Quintus Horatius Flaccus, *Carmina*. 1, 31, 16), *cichorium* (Plinius), *cichorea*; Greek *kichoreion*, *kichorion*, *kichora*; see Carl Linnaeus, *Species Plantarum*. 813. 1753 and *Genera Plantarum*. Ed. 5. 354. 1754 and *Acta Fac. Rerum Nat. Univ. Comenianae*, *Bot.* 23: 1–23. 1974, *Acta Bot. Neerl.* 26: 239–249. 1977, *Amer. J. Bot.* 65: 717–721. 1978, *Acta Fac. Rerum Nat. Univ. Comenianae*, *Bot.* 26: 1–42. 1978, *Recent Res. Pl. Sci.* (New Delhi). 7: 261–271. 1979, *J. Palynol.* 16: 85–105. 1980, *Taxon* 30: 77–78. 1981, *Watsonia* 19: 134–137. 1992, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Linzer Biol. Beitr.* 29(1): 5–43. 1997.

Cichorium endivia L. (*Cichorium endivia* subsp. *endivia* Hegi; *Cichorium endivia* var. *sativa* DC.)

Cosmopolitan. Erect, hispid, annual herb, white latex, blue sessile heads

See *Species Plantarum* 2: 813. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(1): 84. 1838 and *Illustrierte Flora von Mittel-Europa* 6(2): 998. 1929, *Skin Pharmacol. Physiol.* 17: 42–48. 2004, *Fitoterapia* 77(5): 354–357. 2006

(Used in Ayurveda. Seeds given for jaundice; extracts of roots, stalks, and inflorescences a protection against sunburn.)

in English: endive, escarole

in Arabic: shikorya, sireis

in India: kaasini gida, kasani, kashini, kasini, kasni

in Italian: cicoria, endivia

in Mexico: nocuana beece-tao, nocuana peece-tao

Cichorium intybus L. (*Cichorium intybus* convar. *foliosum* (Hegi) Holub; *Cichorium intybus* var. *foliosum* Hegi; *Cichorium intybus* var. *sativum* (Bisch.) Janch.) (Latin *intibus*, *intybus*, *intubus*, or *intibum*, *intybum*, Greek *entybon* ‘endive, succory’)

Cosmopolitan, Europe. Perennial herb, milky sap, tall, branching, long taproot, sparse upper toothed leaves, flowers with toothed petals, food

See *Species Plantarum* 2: 813. 1753 and *Fl. Iran.* 122: 6. 1977, *Folia Geobotanica et Phytotaxonomica* 28(1): 107. 1993

(Used in Ayurveda. Leaves given in fever, vomiting, diarrhea, asthma, as a tonic for nerves; roots infusion as a sedative; roots decoction a wash and poultice applied to sores. Seeds in painful micturition.)

in English: blue daisy, blue sailors, bunk, chicory, coffee weed, French endive, succory, wild endive, wild succory

in South Africa: sigorei, tjiekoriebossie, witloof

in China: ju qu

in India: jangli chikori, kasni

in Japan: kiku-niga-na, fudan-sô, kudan-sô

in Bolivia: allqu-sik'i, anu sik'i, chuku-chuku, lichi-liche

in Arabic: chkouria, seris, shikouria, tilfaf

Cicuta L. Apiaceae (Umbelliferae)

Cicuta, ae, the Latin name for poison hemlock, *Conium maculatum* L. The Greek philosopher Socrates (Sokrates), charged with impiety and corruption of youth, drank the hemlock (Latin *cicuta*) in the spring of 399 BC., his last hours are described in Plato's *Phaedo*. See Carl Linnaeus, *Species Plantarum*. 243 and 255. 1753 and *Genera Plantarum*. Ed. 5. 114 and 123. 1754, Anton Freiherr von Störck (Stoerck), *Libellus (libellus secundus) quod demonstratur cicutam*, etc. Vindobonae 1760–1761, Louis Rouppe, *De morbis navigantium*, liber unus. *Accedit observatio de effectu extracti cicutae Storkiano in cancro*. Leiden 1764, Pietro Bubani, *Flora Virgiliana*. 39. Bologna 1870 and *Clin. Toxicol.* (Philadelphia, Pa.). 47(4): 270–278. 2009, *Clin. Toxicol.* (Philadelphia, Pa.). 49(3): 142–149. 2011.

***Cicuta bulbifera* L.**

North America. Perennial

See *Species Plantarum* 1: 255–256. 1753 and Campbell, E.W. "Plant poisoning *Umbelliferae* (parsley family)." *Maine Med. Assoc.*, 57(2): 40–42. 1966, *Canad. J. Bot.* 58: 755–1767. 1980, *Taxon* 31: 583–587. 1982

(Deadly poisonous.)

in English: bulb-bearing water-hemlock, bulblet-bearing water hemlock, bulbous water hemlock

***Cicuta douglasii* (DC.) J.M. Coult. & Rose (*Cicuta douglasii* J.M. Coult. & Rose; *Cicuta maculata* L. var. *californica* (A. Gray) B. Boivin)**

North America. Perennial herb

See *Species Plantarum* 1: 255–256. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* [DC.] 4: 125. 1830 and *Contributions from the United States National Herbarium* 7(1): 95. 1900, Starreveld, E., Hope, C.E. "Cicutoxin poisoning (water hemlock)." *Neurology* 25: 730–734. 1975, *American Journal of Botany* 63(5): 608–625. 1976, *Syesis* 10: 125–138. 1977, James, L.F., Ralphs, M.H. "Water hemlock."

Utah. Sci., 47(2): 67–69. 1986, *J. Vet. Diagn. Invest.* 8(4): 474–480. 1996

(Plant highly poisonous to all types of livestock and to humans. Toxins concentrated in the chambered rootstock but also occur in the leaves and stems as well. The onset of symptoms is so rapid that treatment may not be successful. Poultice of soaked roots applied to the stomach as a purgative; pounded for sores, rheumatism, pain in the legs and back, headache; an infusion taken as an emetic; split roots poultice for rattlesnakebites. Infusion of grated tubers taken as an emetic. Infusion of burned powdered bark taken for diarrhea.)

in English: water-hemlock, western water-hemlock

***Cicuta maculata* L. (*Cicuta curtissii* J.M. Coult. & Rose; *Cicuta maculata* var. *curtissii* (J.M. Coult. & Rose) Fernald; *Cicuta maculata* var. *maculata*; *Cicuta mexicana* J.M. Coult. & Rose; *Cicuta virosa* L. var. *maculata* (L.) J.M. Coult. & Rose)**

North America. Perennial, biennial herb, purple-striped or mottled, fleshy or tuberous roots, stem smooth branching and swollen at the base, yellow oily liquid/viscous resin exudes from cut stems and roots, small white flowers borne in flat-topped umbrella-like clusters, water hemlock root resembles a parsnip

See *Species Plantarum* 1: 255–256. 1753, *Revision of North American Umbelliferae* 130. 1888 and Starreveld, E., Hope, C.E. "Cicutoxin poisoning (water hemlock)." *Neurology* 25: 730–734. 1975, *J. Nat. Prod.* 49(6): 1117–1121. 1986 [Antitumor agents, 85. Cicutoxin, an antileukemic principle from *Cicuta maculata*, and the cytotoxicity of the related derivatives.], Panter, K.E., Keeler, R.F., Baker, D.C. "Toxicoses in livestock from the hemlocks (*Conium* and *Cicuta* spp.)." *J. Anim. Sci.*, 66: 2407–2413. 1988, *Arch. Pediatr.* 15(2): 139–141 2008, *Toxicon*. 57(1): 157–161. 2011 [Water hemlock poisoning in cattle: Ingestion of immature *Cicuta maculata* seed as the probable cause.]

(Plant poisonous to all types of livestock and to humans; roots are highly toxic to all animals and to humans; toxin concentrated in the rootstock in the spring; also immature seed implicated in livestock poisoning. Plant decoction applied on bruises, sprains, sore joints or broken bones. Roots contraceptive; an infusion insecticide, to soak corn before planting to repel insect pests; smashed roots poultice applied for sores or cuts; for rheumatism, dried roots powdered and applied externally. Veterinary medicine, smashed roots poultice applied to horses for sores. Ceremonial, magic medicine. Arrow poison.)

in English: beaver-poison, children's-bane, muskrat-weed, musquash-root, poison hemlock, spotted cowbane, spotted water-hemlock, water-hemlock

***Cicuta maculata* L. var. *angustifolia* Hook. (*Cicuta occidentalis* Greene; *Cicuta douglasii* var. *occidentalis* (Greene) M.E. Jones; *Cicuta valida* Greene)**

North America. Perennial herb

See *Pittonia* 2(7A): 7–8. 1889 and *Leaflets of Botanical Observation and Criticism* 2(11): 238–239. 1912

(Fleshy roots a virulent poison. Febrifuge, a decoction of leaves, roots and stems. Poultice of roots analgesic, antirheumatic, applied for swellings, to rattlesnakebites.)

in English: spotted water hemlock

Cicuta maculata L. var. ***maculata*** (*Cicuta curtissii* J.M. Coult. & Rose; *Cicuta maculata* var. *curtissii* (J.M. Coult. & Rose) Fernald; *Cicuta mexicana* J.M. Coult. & Rose)

North America. Perennial, biennial herb

See *Species Plantarum* 1: 255–256. 1753, *Revision of North American Umbelliferae* 130. 1888 and Starreveld, E., Hope, C.E. “Cicutoxin poisoning (water hemlock).” *Neurology* 25: 730–734. 1975, Panter, K.E., Keeler, R.F., Baker, D.C. “Toxicoses in livestock from the hemlocks (*Conium* and *Cicuta* spp.)” *J. Anim. Sci.*, 66: 2407–2413. 1988

(Plant poisonous to all types of livestock and to humans; toxin concentrated in the rootstock in the spring. Roots contraceptive. Plant decoction used on bruises, sprains, sore joints or broken bones. Root infusion insecticide, to soak corn before planting to repel insect pests; smashed roots poultice applied for sores or cuts; for rheumatism, dried roots powdered and applied externally. Veterinary medicine, smashed roots poultice applied to horses for sores. Ceremonial, magic medicine. Arrow poison.)

in English: beaver-poison, children’s-bane, muskrat-weed, musquash-root, spotted cowbane, spotted water-hemlock, water-hemlock

Cicuta virosa Linnaeus (*Cicuta mackenzieana* Raup; *Cicuta virosa* f. *longiinvolucellata* Y.C. Chu)

China, North America. Perennial herb, stout, branched, hollow caudex, fibrous or fleshy fibrous roots, leaves boiled

See *Species Plantarum* 1: 255–256. 1753 and *Fl. Turkey* 4: 425. 1972, *Botaničeskij Žurnal* (Moscow & Leningrad) 61(1): 93–99. 1976, *Taxon* 31: 583–587. 1982, Frohne, D., Pfander, H.J. *A Colour Atlas of Poisonous Plants*. London. 1983, *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1675–1678. 1989, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 116–118. 1990, *Linzer Biologische Beiträge* 23: 457–481. 1991, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 133: 301–318. 1996, *Biochem. Biophysical Res. Commun.* 219(2): 332–336. 1996, *Opera Botanica* 137: 1–42. 1999, *Arch. Pediatr.* 15(2): 139–141 2008, *Int. J. Food Microbiol.* 145(2–3): 464–470. 2011

(All parts are highly toxic, poisonous, especially the rootstock; nevertheless, the plant has reputed medicinal value. It contains lower quantities of the toxic chemicals that cause poisoning in humans and livestock. Root antispasmodic. Dried rhizomes and roots used as arrow poison.)

in English: cowbane, hemlock, Mackenzie’s water hemlock, northern water-hemlock, water hemlock

in China: du qin

in Japan: tokamax, tokaomap

Cicuta virosa L. var. ***latisecta*** Čelak. (*Cicuta nipponica* Franch.; *Cicuta virosa* fo. *latisecta* (Čelak.) Y.C. Chu; *Cicuta virosa* var. *nipponica* (Franch.) Makino)

China, Europe, North America. Perennial herb, stout, branched

See *Prodromus der Flora von Böhmen* 3: 563. 1875, *Bulletin de la Société Botanique de France* 26: 85–86. 1879 and *Clavis Pl. Chinae Bor.-Or.* ed. 2: 467. 1995, *Bot. Žurn.* (Moscow & Leningrad) 80(6): 114–116. 1995, *Int. J. Food Microbiol.* 145(2–3): 464–470. 2011 [Chemical composition and antifungal activity of essential oil from *Cicuta virosa* L. var. *latisecta* Čelak.]

(All parts are highly toxic, poisonous.)

in China: kuan ye du qin

Cienfuegosia Cav. Malvaceae

After the Spanish botanist Bernardo Cienfuegos, 16th century. See [Gonzalo de Sylveira], *Vida del bienaventurado padre Gonzalo de Sylveira, sacerdote de la Compañía de Jesus, martirizado en Monomotapa ...* Traducida de Latin ... por B. de Cienfuegos. Madrid 1674, Antonio José Cavanilles (1745–1804), *Monadelphiae classis dissertationes decem*. 2. 1786 and 3: 174–175, 185, t. 72, fig. 2. Madrid 1787, *Genera Plantarum* 274. 1789, M. Colmeiro y Penido, *La Botánica y los Botánicos de la Península Hispano-Lusitana*. 1858, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 2: 337. 1883 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 6: 56. 1902, *Bulletin of Miscellaneous Information Kew* 1907: 48. 1907, Rev. Francisque Marconnés, *A grammar of Central Karanga*. The language of Old Monomotapa. As at present spoken in Central Mashonaland, Southern Rhodesia. Witwatersrand 1931 and *Annals of the Missouri Botanical Garden* 56(2): 194, 196, 203, 217. 1969.

Cienfuegosia drummondii (A. Gray) Lewton

South America, North America. Perennial

See *Monadelphiae Classis Dissertationes Decem* 3: 174. 1787, *Smithsonian Contributions to Knowledge* 3(5): 23. 1852, *Revisio Generum Plantarum* 1: 67. 1891 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 7: 57. 1902, *Bulletin of the Torrey Botanical Club* 37(9): 475. 1910, *Ann. Missouri Bot. Gard.* 56: 223–227. 1969, *Economic Botany* 31(3): 302–306. 1977

(Roots contraceptive, fertility regulators, decoction or mate.)

in English: yellow flymallow

***Cienfuegosia heteroclada* Sprague**

Guinea. Suffrutex, angular, gland-dotted, woody rootstock

See *Bulletin of Miscellaneous Information Kew* 1907: 48. 1907

(Cold infusion of the pulverized roots applied as a remedy for snakebite.)

Cimicifuga Wernisch. Ranunculaceae

Latin *cimex*, *cimicis* ‘a bug’ and *fugo* ‘to drive away’, referring to the use of *Cimicifuga foetida* L.

Cimicifuga dahurica (Turcz. ex Fisch. & C.A. Mey.) Maxim. (*Actaea dahurica* Turcz. ex Fisch. & C.A. Mey.; *Actaea davurica* Franch.; *Actaea pterosperma* Turcz. ex Fisch. & C.A. Mey.; *Actinospora dahurica* Turcz. ex Fisch. & C.A. Mey.)

Russia. Male inflorescence white

See *Species Plantarum* 1: 504. 1753, *Genera Plantarum* 298, 321. 1763, *Index Seminum* [St. Petersburg] 1: 21. 1835 [*Index Sem. Hortus Bot. Petrop.*], *Primitiae Florae Amurensis* 28–29. 1859 and *Komarov Lectures*. 20: 47–61. 1973, *Cathaya* 6: 43–56. 1994, *Korean Journal of Plant Taxonomy* 28: 385–398. 1998

(Rhizomes for toothache, sore throat, headache, chronic diarrhea, prolapsed womb, rectocele.)

in English: Manchurian bugbane

Cimicifuga foetida L. (*Cimicifuga europaea* Schipcz.; *Cimicifuga foetida* Pursh, nom. illeg.; *Cimicifuga foetida* var. *intermedia* Regel; *Cimicifuga foetida* var. *maireri* (H. Lév.) W.T. Wang & Zh. Wang; *Cimicifuga foetida* var. *racemosa* Regel; *Cimicifuga foetida* var. *racemosa* Yabe, nom. illeg., non *Cimicifuga foetida* var. *racemosa* Regel; *Cimicifuga foetida* var. *velutina* Franch. ex Finet & Gagnep.; *Cimicifuga maireri* H. Lév.; *Cimicifuga taquetii* H. Lév.; *Cimicifuga ussuriensis* Oettingen)

Japan, China, India. Perennial herb, erect, branched, leafy, rhizomes dark brown, leaves pinnately compound, flowers white, sepals and petals imbricate ovate concave, flat follicles tipped with persistent styles, in grassland, on slopes

See *Genera Plantarum* 298, 321. 1763, *Systema Naturae*, ed. 12. 2: 659. 1767, *Flora Americae Septentrionalis* 2: 373. 1813, *Pl. Radd.* 1: 121–122. 1861, *Reise Osttib.* 1(1): 122. 1862 and *Bulletin de la Société Botanique de France* 51: 521. 1904, *Trudy Botanicheskago Sada Imperatorskago Yur'evskago Universiteta* 6: 138. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 9: 448–449. 1911, *Enum. (Rhizomes for toothache, sore throat, headache, chronic diarrhea, prolapsed womb, rectocele; roots in bronchitis, asthma, catarrh.)

in English: bugbane, fetid bugbane, skunk bugbane, stinking bugbane

in China: sheng ma

in India: jiunti

Cimicifuga heracleifolia Komarov (*Actaea heracleifolia* (Kom.) J. Compton)

Eurasia.

See *Species Plantarum* 1: 504. 1753, *Genera Plantarum* 298, 321. 1763 and *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 18(3): 438–439. 1901, *J. Korean Res. Inst. Ewha Women's Univ.* 11: 455–478. 1967, *Cathaya* 6: 43–56. 1994

(Rhizomes for toothache, sore throat, headache, chronic diarrhea, prolapsed womb, rectocele.)

in English: Komarov's bugbane

Cimicifuga racemosa (L.) Nutt. (*Actaea monogyna* Walter; *Actaea racemosa* Linnaeus; *Cimicifuga serpentaria* (L.) Pursh, nom. illeg.)

North America.

See *Species Plantarum* 1: 504. 1753, *Flora Americae Septentrionalis* 2: 372. 1813, *Gen. N. Amer. Pl.* 2: 15. 1818, *Revisio Generum Plantarum* 1: 4. 1891

(Infusions used to stimulate menstruation, to treat rheumatic pains, coughs and colds, constipation, and kidney trouble, to promote milk flow in women.)

in English: black cohosh, black snakeroot, snakeroot

Cinchona L. Rubiaceae

Named for the Countess de Cinchon, wife of the Spanish Viceroy of Peru; the Spanish botanist José Celestino Bruno Mutis discovered *Cinchona*. See *Species Plantarum* 1: 172. 1753, *Skrifter af Naturhistorie-Selskabet* 1(1): 20. 1790, *Synopsis Plantarum* 1: 196. 1805, *Plantae Aequinoctiales* 1: 131. 1808[1807], *Systema Vegetabilium* 5: 18. 1819, Heinrich von Bergen, *Versuch einer Monographie der China* [the explanation of the tables was written by the German professor of medicine Christian Heinrich Pfaff, 1773–1852] Hamburg, Hartwig & Müller 1826, *Genera Plantarum* 556. 1838, *Annales des Sciences Naturelles; Botanique*, sér. 3 10: 10. 1848, Sir Clements Robert Markham (1830–1916), *A memoir of the Lady Ana de Osorio* Countess of Chinchon and Vice-queen of Peru (a.d. 1829–1839). (Bark sweet and bitter, used as a medicine as *Cassia* bark.)

in China: shao hua gui, ye huang gui

Cinnamomum ledermannii Schewe

New Guinea.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* lviii. 383, 492. 1923

(Crushed leaves or bark for dysentery and diarrhea. Fresh leaves to relieve a headache.)

in Papua New Guinea: hulukumo, marakonga, wisilida

Cinnamomum macrocarpum Hook.f.

India. Small tree, glossy fragrant leaves, dull yellow flowers, stout branched panicles, purplish brown berries

See *Fl. Brit. India* [J.D. Hooker] 5: 133. 1886 [Aug 1886]

(Used in Ayurveda and Sidha. Bark used for cough, diarrhea and dysentery. Oil from the root bark and leaves applied externally in rheumatic affections.)

in India: bhrynga, carua, chochakam, cocakam, dalachini, dalacinni, dalchini, dalcini, ilavangappattai, ilavannam, kadu dalchini, karaupa, karuva, lavaanga patra, lavanga, lavanga patra, lavanga patre, lavangapatre, magacerulu, magacherulu, moddulavangapatta, paria-lavanga-pattai, periya lavanga ppattai, periya lavankappatai, periyalavangappattai, sirunagappu, talichappattiri, talisapatramu, talisapatri, talishapatri, tamala, tamalapatra, tejapatra, tvacha, tvakpatra, tvakpatram, twukputra

Cinnamomum mairei Lév. (*Cinnamomum argenteum* Gamble)

China.

See *Repertorium Specierum Novarum Regni Vegetabilis* 13(355–358): 174. 1914, *Plantae Wilsonianae* 2(1): 67–68. 1914

(Bark of branchlets used as an aromatic spice. Leafy branchlets, trunk and root all contain essential oil.)

in China: gui pi, yin ye gui

Cinnamomum malabathrum J. Presl (*Cinnamomum malabathrum* Batka; *Cinnamomum malabathrum* (Lamarck) J. Presl; *Cinnamomum malabathrum* Miq.)

India.

See *Nov. Act. Acad. Caes. Leop.-Carol. Germ. Nat. Cur.* 17: II. 618. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 10. 1864, *Nomenclature et Iconographie des Canneliers et Camphriers* 8. 1889

(Seeds, bark and dried buds, astringent, stimulant and carminative. Chewed tender leaves made into a paste applied on an aching tooth.)

in English: country cinnamon

in India: brhunga lavanga patre, bhrynga, cuddu lavanga, daalchinni, dalchini, ilavangam, illavangam, jangli-dalchini, kaadu daalchinni mara, kadu dalchini, katou-karua, kempu gaali chakke, kempu nisane, lavanga, lavanga pathre, magacherulu, moddulavangapatta, patta mere, peria lavangapattai, tejpatta, thaalisaopathram, thamaala pathra

Cinnamomum mercadoi S. Vidal

Philippines.

See *Revis. Pl. Vascul. Filip.* 224. 1886

(Bark rubefacient, used to treat headaches, tuberculosis, rheumatism, stomach and intestinal troubles.)

in Philippines: kalingag

Cinnamomum mindanaense Elmer

Philippines.

See *Leaflets of Philippine Botany* 2: 705. 1910

(Leaves stimulant and carminative. Bark for wound infection, stomachache.)

in English: Mindanao cinnamon

in Philippines: kalingag

Cinnamomum mollifolium H.W. Li

China.

See *Acta Phytotax. Sin.* 13(4): 45–47, fig. 1. 1975

(Indolent ulcers.)

in China: mao ye zhang

Cinnamomum parthenoxylum (Jack) Meisn. (*Camphora parthenoxylon* (Jack) Nees; *Camphora porrecta* (Roxb.) Voigt; *Cinnamomum barbatoaxillatum* N. Chao; *Cinnamomum glanduliferum* (Wall.) Blume; *Phoebe latifolia* Champ. ex Benth.; *Sassafras parthenoxylon* (Jack) Nees)

Indonesia, Malaya, China. Tree, bole cylindrical, bark with long wavy fissures

See *Malayan Miscellanies* 1: 28. 1820, *Plantae Asiaticae Rariores* 2: 72. 1831, *Systema Laurinarum* 98, 109, 491. 1836, *Hortus Suburbanus Calcuttensis* 308. 1845, *Museum Botanicum* 1: 323. 1851, *Hooker's Journal of Botany and Kew Garden Miscellany* 5: 197–198. 1853, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 26. 1864 and *J. Sci. Res.* (Jakarta) 1(5): 122, 126. 1952, *Flora Sichuanica* 1: 459, f. 12. 1981

(Leafy branchlets, root, bark and wood contain volatile oil and camphor. Fruit kernel contains oil or fat used for soap manufacture. Wood finely grained, used for furniture and cabinets. Leaves feed the silky worm.)

in China: huang zhang

Cinnamomum pauciflorum Nees (*Cinnamomum calcareum* Y.K. Li; *Cinnamomum pauciflorum* Chun ex H.T. Chang; *Cinnamomum petrophilum* N. Chao; *Cinnamomum recurvatum* (Roxb.) Wight; *Laurus recurvata* Roxb.; *Laurus recurvata* Roxb. ex Wall.)

China, Himalaya. Shrub or small tree, solitary panicles subterminal to axillary, creamish white flowers

See *Plantae Asiaticae Rariores* 2: 75. 1831, *Flora Indica*; or, descriptions of Indian Plants 2: 301. 1832, *Icones Plantarum Indiae Orientalis*, pl. 133. 1839 and *Acta Sci. Nat. Univ. Sunyatseni* 1959(2): 22. 1959, *Flora Sichuanica* 1: 460, f. 19. 1981, *Acta Phytotaxonomica Sinica* 22(1): 79–80, pl. 1, f. 4. 1984

(Stem bark decoction cardiotoxic and antispasmodic, for the treatment of stomach disorders. Bark and root used for abdominal pain; root and fresh bark chewed for dysentery and stomachache. Leafy branchlets contain volatile oil.)

in China: shao hua gui

in India: dieng lorthia, kutu, sungza taluba

Cinnamomum podagricum Kosterm.

New Guinea. Small tree

See *Reinwardtia* 7: 462. 1969

(Bark chewed and spit on the body of a person suffering from cold or chest pain. Magic, ritual, evil spirits.)

in Papua New Guinea: kadza ura

Cinnamomum rhynchophyllum Miq. (*Cinnamomum lampongum* Miquel)

Indonesia, Sumatra. Tree, leaves veined, inflorescence a terminal or axillary hairy panicle, yellow flowers, fruit an ovoid berry, in lowland and hill forests

See *Flora van Nederlandsch Indië* 1(1): 895. 1855

(Bark used for intestinal problems.)

in Indonesia: kayu lawang, kayu salangan, modang sanggar

in Malaysia: teja

Cinnamomum sintoc Blume (*Cinnamomum sintok* Blume)

Java, Malaya.

See *Bijdragen tot de flora van Nederlandsch Indië* 11: 571. 1826 [24 Jan 1826]

(Used to allay tiredness, fatigue and fever.)

Cinnamomum sulphuratum Kurz (*Cinnamomum sulphuratum* Nees)

India. Trees, smooth aromatic bark, lax inflorescence minutely tomentose, densely pilose pale yellow flowers

See *Plantae Asiaticae Rariores* 2: 74. 1831

(Used for intestinal problems.)

in India: matta daalchini, matta dalchini, matta dalchinni, pikkadalchini, pinga dalchinni, pingadalchini

Cinnamomum tamala (Buch.-Ham.) T. Nees & Eberm. (*Cinnamomum tamala* T. Nees & Eberm.; *Laurus tamala* Buch.-Ham.)

Himalaya. Evergreen aromatic tree, rough bark, long-pointed stalked leathery leaves, pale yellow flowers in panicles, silky perianth, black ovoid drupes, bark and leaves used as spices

See *Species Plantarum* 1: 369. 1753, *Botanica expeditior* 74. 1760, *Transactions of the Linnean Society of London* 13(2): 555–558. 1822, *Handbuch der medicinisch-pharmaceutischen Botanik* 2. 1831, *FBI* 5: 128. 1886

(Used in Ayurveda. Bark analgesic, antibiotic, antiseptic, astringent, carminative, digestive, aromatic, emmenagogue, stimulant, stomachic, a decoction for complaints of colic, diarrhea and piles, coughs, diarrhea, gonorrhoea, rheumatism, boils, itchings, conjunctivitis; stem bark juice applied on teeth in tooth decay and toothache; dried bark used for stomachache, intestinal disorders and gonorrhoea. Paste of stem bark applied on spondylarthritis; bark and leaves for headache. Leaves carminative, digestive, aromatic, emmenagogue, stimulant, used in colic, diarrhea, dysentery, rheumatism, scorpion sting; a decoction of leaves of *Cinnamomum tamala* with roots of *Lasia spinosa* given in rheumatism. Ceremonial, leaves used in worship.)

in English: bay leaves, Indian cassia

in China: chai gui

in Indonesia: kayu manis

in Malaysia: kayu manis

in Nepal: kukhi taj

in Papua New Guinea: skin diwai

in Philippines: cinnamon, kanela

in Tibet: sin tsha, sin-tsha

in Vietnam: qu[ees] h[oof]i, qu[ees] r[af]nh, qu[ees]

in Mexico: guiña xtila ticanaca latiyaga, quiña castilla cicanaca latiyaga

in Peru: yuwiich

Cinnamomum wightii Meisn. (*Cinnamomum wightii* Lukman.)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(1): 11. 1864, Lukmanoff, Athanase de (fl. 1889), *Nomenclature et Iconographie des Cannelliers et Camphriers* 8. Paris, 1889

(Used in Ayurveda and Sidha.)

in India: adavilavanga, adavilavanagapatta, adavilavangapatta, akupatrikamu, cempala, cuddoolavanga, cuddulavanga, dalacinni, dalchini, eluke, ijin, ilavangam, kaadu daalchini, kaadulavanga, kadudalacini, kadudalchini, kadudalcini, kadulavanga, katcarua, katkaruva, katoukarua, katukaruva, naagakes haram, paccaku, pachaaku, pachchaku, pattsaku, shantha maram, talisapatri, talishapatri, tejpatra, thaalisapathri, tomalo, vella kodala, vettadu

Cinnamomum wilsonii Gamble (*Cinnamomum wilsonii* var. *multiflorum* Gamble)

China.

See *Plantae Wilsonianae* 2(1): 66–67. 1914

(Dried bark used for traumatic injury, abdominal pain and cold.)

in China: chuan gui

Cinnamomum zeylanicum Nees

India.

See *Pl. Asiat. Rar.* (Wallich). ii. 74 and iii. 32. 1829–1832

(Bark astringent and carminative, used in dyspepsia, cold and to check vomiting.)

Cipadessa Blume Meliaceae

See *Bijdragen tot de flora van Nederlandsch Indië* 4: 162. 1825, *Adansonia* 11: 257. 1874 and *Journal d'Agriculture Tropicale et de Botanique Appliquée* 11: 128. 1964.

Cipadessa baccifera (Roth) Miquel (*Cipadessa baccifera* Miq.; *Cipadessa baccifera* var. *sinensis* Rehder & E.H.

Wilson; *Cipadessa cinerascens* (Pellegrin) Handel-Mazzetti; *Cipadessa fruticosa* Blume; *Cipadessa fruticosa* var. *cinerascens* Pellegrin; *Cipadessa sinensis* (Rehder & E.H. Wilson) Hand.-Mazz.; *Cipadessa sinensis* (Rehder & E.H. Wilson) E. Salisb.; *Melia baccifera* Roth; *Rhus blinii* H. Lév.)

Indo-Malesia. Evergreen shrub, slender, small greenish white flowers in clusters in axillary panicles, fruit dark red, oil from seeds used for soap making

See *Species Plantarum* 1: 384–385. 1753, *Novae Plantarum Species* 215. 1821, *Bijdragen tot de flora van Nederlandsch Indië* 4: 162. 1825 [20 Sep 1825], *Familiarum Naturalium Regni Vegetabilis Monographicae* 95. 1846, *Ann. Mus. Bot. Lugduno-Batavi* 4: 6. 1868 and *Flore Générale de l'Indo-Chine* 1: 784. 1911, *Flore du Kouy-Tchéou* 411. 1914 (1914–1915), *Plantae Wilsonianae* 2(1): 159. 1914, *Vegetationsbilder* xx. Heft 7, p. [9]. 1930, *Symbolae Sinicae* 7(3): 632. 1933, *Taxon* 29: 360–361. 1980, *Phytochemistry* 37(2): 505–507. 1994, *Phytochemistry* 55(8): 867–872. 2000, *Journal of the Brazilian Chemical Society* 16(6). 2005, *Research Journal of Environmental Toxicology* 1(3): 124–130. 2007, *J. Nat. Prod.* 70(8): 1344–1347, 1352–1355. 2007

(Used in Sidha. Limonoids from the leaves. Ash of the burnt stem applied on sores of tiger bite. Paste of bark pressed against the teeth for about 15 mins to relieve bleeding and swelling of gums; bark juice anthelmintic, emetic, also given to treat indigestion. Root juice anthelmintic, given in cases of indigestion and constipation, also used in treating cough and cold. Leaves and dried fruits insecticidal; leaf paste taken for diarrhea, and also applied on scabies; leaf juice drunk to reduce menstrual pain, stomachache and fever. Seed paste purgative, used in piles as an external ointment. Good for snake poison, for the treatment of cobra poison, drink the leaves juice and apply paste of leaves in the case of cobra bite; daily intake of one or two leaves will make a permanent resistance against cobra poison.)

in English: Indian neem

in China: jiang guo lian

in India: adasaage, adusoge, adusoge soppu, bettadabaevu, cannatturukka vempu, cedigula, cevattai, chaedu beera, chandbera, chanduvira, chedu bira, chedubira, cheduveera, chend bera, chithundagida, chithunde, chittunde, chitunde, gudmai, hanoyi, hanumana thoppalu, hanumantatap, hanumantatoppalu, hanumantha-bira, kaipananarangi, karbe, kaypanarachi, kshudranimba, mandala kaayi, mendala kaayi, minnamunni, nalbila, narachalu gida, narsullu, padavali, pithomaari, pithomari, pittamari, potti, pottu vepa, puilipan cheddi, pulipanchedi, pulippan, pulippan cheddi, pulippanchedi, pullipamcheddi, pullipuchedi, purantab, purudona, purudonda, rana beri, ranabili, ranabilla, savattuchedi, sevattai, sidigolu, sidugoli, sirugoli maram, siruguli, sirukolli, sitthunde gida, thabate, thavitegu, tiruguli, titakhari, turaka vepa, vananimbam

in Nepal: mas geri, paimati, painleti

Circaea L. Onagraceae

After Circe (gen. Circae) (Kirke), mythical sorceress, the enchantress in the Odyssey, daughter of Helios and Perse, referring to the prickly fruits; Latin *circaea*, *ae* applied by Plinius to a plant used as a charm, Greek *kirkaia*, see *Species Plantarum* 1: 8–9. 1753 and *Acta Phytotax. Geobot.* 33: 28–40. 1982.

Circaea alpina L. (*Circaea lutetiana* Georgi; *Circaea lutetiana* race *alpina* (L.) H. Lév.; *Circaea lutetiana* L. subsp. *alpina* (L.) H. Lév.; *Circaea lutetiana* var. *alpina* (L.) Torr.)

Europe. Herb, erect, slender tuber-tipped rhizome, white to pale pink deeply notched petals, inflorescence of terminal clusters, capsules hooked-hairy, on wet mossy ground

See *Species Plantarum* 1: 8–9. 1753, *Rep. Bot. Dept. Surv. N.Y. Assembly* 50: 136. 1841, *Monde des Plantes* 7: 71. 1898 and *Bull. Acad. Int. Geogr. Bot.* 22: 220. 1912, *Botaniceskij Žurnal SSSR* 71: 1145–1147. 1986, *La Kromosomo* 51–52: 1675–1696. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 279–282. 1990, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 39: 67–74. 1992, *Botaničeskij Žurnal* (Moscow & Leningrad) 79(2): 135–139. 1994, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10–15. 1999

(Plant used on wounds and cuts.)

in English: enchanter's-nightshade, small enchanter's nightshade

Circaea cordata Royle (*Circaea* × *hybrida* Hand.-Mazz.; *Circaea cardiophylla* Makino; *Circaea kitagawae* H. Hara)

China, Himalaya.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 211, pl. 43, f. 1a-l. 1834 and *Botanical Magazine* 20: 42. 1906, *Symbolae Sinicae* 7: 605. 1933, *Journal of Japanese Botany* 10(9): 595–596, f. 11. 1934, *Amer. J. Bot.* 70: 1476–1481. 1983

(Infusion taken orally and also used as a wash on wounds and injured part.)

in China: lu zhu cao

in Japan: manshu-ushitakiso

Circaea lutetiana L. (*Circaea canadensis* subsp. *quadrisulcata* (Maxim.) Boufford; *Circaea lutetiana* Georgi; *Circaea lutetiana* fo. *quadrisulcata* Maxim.; *Circaea quadrisulcata* (Maxim.) Franch. & Sav.)

Europe.

See *Species Plantarum* 1: 8–9. 1753, *Botanische Zeitung*. Berlin 28: 787. 1870, *Enumeratio Plantarum in Japonia Sponte Crescentium ...* 1(1): 169. 1873 and *Ann. Missouri Bot. Gard.* 69: 879. 1983, *Harvard Papers in Botany* 9(2): 256. 2005

(Infusion used as wash on injured part, on wounds.)

in English: enchanter's-nightshade

Circaea lutetiana L. subsp. *canadensis* (L.) Aschers. & Magnus (*Circaea lutetiana* var. *canadensis* L.)

North America. Herb, corolla white to light blue, pubescent fruits

See *Species Plantarum* 1: 8–9. 1753, *Botanische Zeitung*. Berlin 28: 787. 1870 and *American Journal of Botany* 70: 1476–1481. 1983

(Infusion used as wash on injured part, on wounds.)

in English: broadleaf enchanter's nightshade

Cirsium Miller Asteraceae

Greek *kirson* according to Dioscorides a kind of thistle, said to heal the *kirsos* 'varicocele, varix'; Latin *cirsion*, *ii* used by Plinius for a kind of thistle; see Philip Miller (1691–1771), *The gardeners dictionary*. Abr. ed. 4. (28 Jan.) 1754 and *Kew Bulletin* 22: 107–140. 1968, *Acta Biologica Cracoviensia, Series Botanica* 17: 133–164. 1974, *Brittonia* 27: 297–304. 1975, *Watsonia* 11: 211–223. 1977, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 26: 1–42. 1978, *Taxon* 28: 395–397. 1979, *Journal of Palynology* 16: 85–105. 1980, *Botanical Journal of the Linnean Society* 82: 357–368. 1981, *Taxon* 30: 695–696, 701–702, 829–842. 1981, *Biologicheskii Zhurnal Armenii* 34(7): 769–772. 1981, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Zapovedniki Belorussii Issledovaniia* 12: 3–8. 1988, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Fitologija* 39: 3–22. 1991, *Watsonia* 20: 63–66. 1994, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 133: 301–318. 1996, *Iranian Journal of Botany* 8(1): 91–104. 1999, *Opera Botanica* 137: 1–42. 1999.

Bieb.; *Cirsium setosus* Besser; *Cnicus arvensis* (L.) C. Hoffmann var. *setosus* (Ledebour) Maximowicz; *Cnicus segetum* (Bunge) Maxim.; *Serratula setosa* Willdenow)

East Asia, China.

(Plant antipyretic, depurative and hemostatic.)

in China: ci er cai

Cirsium sinense C.B. Clarke (*Cnicus sinensis* C.B. Clarke)

India.

See *Compos. Ind.* 219. 1876

(Stem and leaves antiscorbutic. Roots juice taken internally for flatulence; crushed roots antispetic, applied externally to ulcers and abscesses.)

in India: leh hling

Cirsium undulatum (Nutt.) Spreng. (*Carduus helleri* Small; *Carduus undulatus* Nutt.; *Cirsium helleri* (Small) Cory; *Cirsium megacephalum* (A. Gray) Cockerell; *Cirsium megacephalum* Rouy; *Cirsium ochrocentrum* A. Gray var. *helleri* (Small) Petr.; *Cirsium ochrocentrum* var. *helleri* Petr.; *Cirsium undulatum* Spreng.; *Cirsium undulatum* (Nutt.)

Spreng. var. *megacephalum* (A. Gray) Fernald; *Cnicus undulatus* A. Gray var. *megacephalus* A. Gray

North America.

See *The Genera of North American Plants* [Nuttall] 2: 130. 1818, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 374. 1826, *Mem. Amer. Acad. Arts* n.s., 4: 110. 1849, *Proceedings of the American Academy of Arts and Sciences* 10: 42. 1874 and *Fl. S.E. U.S.* [Small]. 1307, 1341. 1903, *Fl. France* [Rouy & Foucaud] 9: 30. 1905, *Univ. Missouri Stud., Sci. Ser.* 2(2): 254. 1911, *Beih. Bot. Centralbl.* 35, Ab. 2: 418. 1917, *Rhodora* 38: 408. 1936

(Decoction of root used for gonorrhoea.)

in English: wavy-leaf thistle, wavyleaf thistle

Cirsium verutum (D. Don) Spreng. (*Cirsium involucratum* DC., nom. illeg.; *Cnicus involucratum* Wall. ex DC.; *Cirsium verutum* Spreng.; *Cnicus verutus* D. Don)

Nepal. Erect herb, robust, grooved, stalked radical leaves crowded in terminal clusters, outer involucre bracts ending in long rigid erect or spreading spines, whitish yellow flowers, raw roots edible, young stems cooked and eaten as vegetable, seeds edible

See *Species Plantarum* 2: 826. 1753, *Prodromus Florae Nepalensis* 167. 1825, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 370. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 639. 1838 [1837 publ. early Jan 1838]

(Whole plant diaphoretic, tonic, expectorant, a remedy for fevers, cough, burning sensation. Roots cooling; powdered roots made into a poultice used as antiseptic in cuts and sores to help the healing process. Root juice to treat fever and stomach disorders, mixed with the juice of *Drymaria diandra* and *Cheilanthes albomarginata*; galactagogue, soft aerial parts cooked and prescribed to postnatal women as a postpartum remedy; cooling, the root or the inner stem portion eaten raw to relieve burning sensation during urination. Leaves galactagogue; applied to wounds. Veterinary medicine, galactagogue leaves useful to the milching cattles.)

in India: alakam, alirinampu, anai-tippili, anaitippili, attitippili, bis kandara, biskandara, biskandaru, buanda, kajakkana, kandara, kandaru, kandaya, kardra, karikkanai, karitippili, matakarkanai

in Nepal: chokam, sungurekaandaa, thakailo, thakal

Cirsium vulgare (Savi) Ten. (*Ascalea lanceolata* (L.) Hill; *Carduus lanceolatus* L.; *Carduus vulgaris* Savi; *Cirsium abyssinicum* Sch. Bip. ex A. Rich.; *Cirsium lanceolatum* Hill; *Cirsium lanceolatum* (L.) Scop., nom. illeg.; *Cirsium lanceolatum* var. *abyssinicum* (Sch. Bip. ex A. Rich.) Chiov.; *Cirsium lanceolatum* var. *hypoleucum* DC.; *Cirsium lanceolatum* var. *nemorale* Nägeli ex K. Koch; *Cirsium lanceolatum* var. *vulgare* Nägeli ex K. Koch; *Cirsium vulgare* (Savi) Airy Shaw; *Cnicus lanceolatus* (L.) Willd.; *Cnicus*

lanceolatus var. *abyssinicum* (Sch. Bip. ex A. Rich.) Vatke; *Eriolepis lanceolata* (L.) Cass.; *Lophiolepis dubia* Cass.)

Europe, North America.

See *Species Plantarum* 2: 821. 1753, *Herbarium Britannicum* 1: 72. 1769, *Flora Carniolica*, Editio Secunda 2: 130. 1772, *Flora Berolinensis Prodrum* 259. 1787, *Flora Pisana* 2: 241–242. 1798, *Dictionnaire des Sciences Naturelles* 37: 183. 1823, *Dictionnaire des Sciences Naturelles* 41: 331. 1826, *Flora Napolitana* 5: 209. 1835[1836], *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 636. 1837, *Syn. Pl.* (ed. 2) 990. 1843, *Tentamen Florae Abyssinicae* ... 1: 456. 1848, *Linnaea* 39: 510. 1875 and *Annuario del Reale Istituto Botanico di Roma* 8: 194. 1904, *Repertorium Specierum Novarum Regni Vegetabilis* 43: 304. 1938

(Analgesic, stomachic, for gastrointestinal troubles.)

in English: black thistle, boar thistle, bull thistle, Scotch thistle, spear thistle

in Southern Africa: disseldoring, kafferdisseel, karmedik, makdisseel, skaapdisseel, Skotsedissee, speerdisseel, wildekarmedik; hlaba (Sotho)

in Hawaii: pua kala

Cirsium wallichii DC.

India. Stems and young plant parts used as a vegetable, roots eaten

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 643. 1838 [1837 publ. early Jan 1838] and *Journal of Ethnobiology and Ethnomedicine* 2: 14. 2006

(Roots cooling, the paste applied on the forehead in fever, root powder taken with water in early morning helps to cure gastric problems, dyspepsia. Young plant parts given to children for colds.)

in India: bungsee, bursa, chiul, kander, mullu, seethi

Cissampelos L. Menispermaceae

From the Greek *kissos* 'ivy' and *ampelos* 'a vine, grape-vine'; see Carl Linnaeus, *Species Plantarum*. 2: 1031–1032. 1753, *Genera Plantarum*. Ed. 5. 455. 1754, *Annals and Magazine of Natural History*, ser. 3 17: 268. 1866, *Contributions to botany, iconographic and descriptive* 3: 203–204. 1871 and *Fieldiana, Bot.* 24(4): 258–266. 1946, *Phytologia* 30(6): 415–484. 1975, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85: 1432–1442. 2001. *Cissampelos mucronata*, *Cissampelos tropaeolifolia*, *Cissampelos owariensis* and *Cissampelos pareira* have often been confused.

Cissampelos capensis L.f. (*Antizoma capensis* Diels; *Antizoma capensis* var. *pulverulenta* Diels; *Cissampelos capensis* Thunb.; *Cissampelos fruticosa* L.f.; *Cissampelos humilis* Poir.)

South Africa, Namibia. Shrub, scrambling vine, scandent, woody base, flowers cream, inflorescence an axillary umbel-like cyme, fruit a compressed obovoid orange drupe

See *Prodromus Plantarum Capensium*, ... 110. 1800, *Encycl.* (Lamarck) 5: 11. 1804 and *Pflanzenr.* (Engler) *Menispermac.* 307. 1910, *Journal of Ethnobiology* 26(1): 60–81. 2006, *Planta Medica* 73(3): 296–297. 2007

(All plant parts rich in alkaloids. Plants antiplasmodial, anti-protozoal, spasmolytic, antimicrobial, antiinflammatory, analgesic, antibacterial and antifungal, astringent, anthelmintic. Rhizome decoction taken as a blood purifier, to treat boils, glandular swellings, syphilis, cholera, colic, diarrhea, diabetes; the extract used to prevent miscarriage, difficult labor and to expel retained placenta. Leaves paste applied to sores and boils. Magico-religious beliefs, ritual, stems burnt as incense against evil spirits, while a stem infusion is used as a ritual wash for the same purpose.)

in South Africa: dawidjie

Cissampelos mucronata A. Rich. (*Cissampelos apiculata* Hochst.; *Cissampelos aristolochiaefolius* Fenzl; *Cissampelos comata* Miers; *Cissampelos macrostachya* Klotzsch; *Cissampelos pareira* subvar. *hirta* (A. Rich.) Engl.; *Cissampelos pareira* var. *deglabrescens* Welw. ex Hiern; *Cissampelos pareira* var. *macrostachya* (Klotzsch) T. Durand & Schinz; *Cissampelos pareira* L. var. *mucronata* (A. Rich.) Durand & Schinz; *Cissampelos pareira* var. *zairensis* (Miers) T. Durand & Schinz; *Cissampelos senensis* Klotzsch; *Cissampelos tropaeolifolia* DC.; *Cissampelos vogelii* Miers; *Cissampelos zairensis* Miers)

Tropical Africa. Liana, herbaceous, twiner, climber, trailing, creeping, thick woody rootstock, small whitish greenish yellow flowers, orange red fruits

See *Regni Vegetabilis Systema Naturale* 1: 532–533. 1818[1817], *Florae Senegambiae Tentamen* 1: 11. 1831, *Flora* 27: 312. 1844, *Flora* 28: 93. 1845, *Fl. Nig.* 214–215. 1849, *Naturwissenschaftliche Reise nach Mossambique ...* 1: 173–174. 1862, *Ann. Mag. Nat. Hist.*, ser. 3, 27: 180. 1866, *Contributions to botany*, iconographic and descriptive 3: 180. 1871, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 19. 1896, *Conspectus Florae Africae* 1(2): 51–52. 1898, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 395. 1899 and *Das Pflanzenreich* IV. 94(Heft 46): 301. 1910, *Kew Bull.* 1: 10–25. 1937, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Journal of Ethnopharmacology* 37: 117–127. 1992, *Journal of Ethnopharmacology* 48: 131–144. 1995, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 109: 1–9. 2007, *Journal*

of Ethnopharmacology 113: 521–540. 2007, *South African Journal of Botany* 74(1): 2–9. 2008

(All plant parts rich in alkaloids. An infusion of the bitter rhizome to cure diarrhea, dysentery, colic, intestinal worms, menstrual problems, venereal diseases, infertility, azoospermia, to induce contraction of the uterus to start labor or abortion and to expel the placenta; extracts from the dried rhizome antiprotozoal, sedative. Leaf decoction a light purge, taken as a vermifuge against tapeworm. An ingredient in arrow poison.)

in Burundi: agahanda, umuhanda

in Congo: amangulo, cibombomwe, cibombwe, irhulambwire, kahulula, lrikija, lukija, masamba

in Ghana: akuraso, nkura-asu, sit-down-sofful (sit-down softly)

in Ivory Coast: diriou doubou, kototwé yérikou, krokrisambon

in Kenya: chepchan, kishiki cha buga, mulandira, olandra, olopitaq, olopito

in Madagascar: hamafana, vahibory, vahifotsy, vahimboalavo, voaravina, voriravina

in Nigeria: jibda kasa, jibdakasa, jokoje, judarkar, kunnen mazuru

in Senegal: bubune bat elankur, nofelbalu

in Sierra Leone: jokoje

in South Africa: umbombo

in Tanzania: kishiki cha buga, makuta gambewa, msimbasi, mulibata

in Togo: djokodjè, kassahé

in Uganda: akavamagombe, kavamagombe, masu

Cissampelos owariensis P. Beauv. ex DC. (*Cissampelos hirta* Miers; *Cissampelos insignis* Alston; *Cissampelos insolita* Miers ex Oliv.; *Cissampelos insolita* Miers; *Cissampelos macrosepala* Diels; *Cissampelos owariensis* var. *asperifolia* Welw. ex Hiern; *Cissampelos pareira* L.; *Cissampelos pareira* subsp. *owariensis* (P. Beauv. ex DC.) Engl.; *Cissampelos pareira* var. *owariensis* (P. Beauv. ex DC.) Oliv.; *Cissampelos robertsonii* Exell)

Sierra Leone, Uganda. Twining herb, climber, liane, scandent shrub, stem and branchlets more or less densely pubescent, papery leaves, female inflorescence with greenish-white bracts, fruits red or green, very variable

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 100. 1824, *Ann. Mag. Nat. Hist.*, ser. 3, 27: 136. 1866, *Flora of Tropical Africa* 1: 46. 1868, *Contributions to Botany*, iconographic and descriptive 3: 179. 1871, *Catalogue of the African Plants collected by Dr. F. (Used in Ayurveda, Sidha and Unani. Hypotensive and hypoglycemic, exhibits curare-like activity, depressing the central nervous systems, relaxing smooth muscles. Stem used as a diuretic against edema; a piece of stem tied in thread and worn on neck to cure headache; stem and leaves prescribed against flatulence, stomachache and edema. Plant juice after delivery to stop bleeding; plant used in venereal diseases. Root decoction abortive, astringent, diuretic, antispasmodic, purgative, emetic, emmenagogue, febrifuge, pectoral, antidote, antiseptic in the bladder and in chronic inflammation of the urinary passage; root paste applied to cure breast abscesses; root paste given in intermittent fever; root powder given for rheumatism and asthma; root decoction given to cure malaria, dysentery and fever; root infusion drunk for snakebite and stomach ulcers; root extract in dysentery and epilepsy; a mixture of the crushed roots, with the roots of *bantulsi*, *Ocimum gratissimum* L. subsp. *gratissimum*, useful in stomach pains, fever, cold; powdered root along with grains of *Hordeum vulgare* given for treating malaria and fevers. Leaves stomachic, astringent, for diarrhea, dysentery, abdominal pains, applied to snakebites, scabies, abscesses, boils, pimples, burns, wounds, sores, itches and ulcers; leaf paste used for bandaging fractured bone; leaf extract drunk for spermatorrhea; juice of fresh leaves used for eye troubles; juice of leaves mixed with powder of black pepper given for diphtheria. Leaves for birth control by prevention of pregnancy. Bark fibres as fish poison. Veterinary medicine, leaves ground with those of *Mukia maderaspatana* and *Pergularia daemia* given in anthrax. Magic, ritual, contact therapy, stem with seven nodes tied as an amulet on forehead to relieve headache.)

Sci.* 49: 37–38. 1980, *Arnaldoa* 9(2): 43–110. 2002 [2003]

(Used in Sidha. Antiinflammatory. Leaf poultices on boils, carbuncles, sunburn, thrush, ulcers, snakebites; leaf tea for flu, colds, cough; stems and leaves decoction drunk to treat mental disorders. Sap from the stem, taken orally, reputed to be febrifuge. Roots to control wound maggots.)

in English: snakebitters, snake tongue, snake vine

in India: natalai verkkilanku, pooliarileh kalung, puli natalai

Cissus cactiformis Gilg (*Cissus quadrangularis* var. *pubescens* Dewit; *Cissus succulenta* (Galpin) Burt Davy; *Cissus tetragona* Harv.; *Vitis quadrangularis* (L.) Wall. ex Wight & Arn.; *Vitis succulenta* Galpin)

East Africa.

See *Die Pflanzenwelt Ost-Afrikas* C: 258. 1895

(Astringent. Roots for arthritis, rheumatism.)

Cissus cymosa Schumach. & Thonn. (*Cissus cymosa* Steud.; *Cissus cymosa* Schumach.; *Cyphostemma cymosum* (Schumach. & Thonn.) Desc.; *Vitis thonningii* Baker)

Ghana. Herbaceous climber, strong, large flat panicles, green petals with purple tips

See *Beskrivelse af Guineiske planter* 82–83. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 102–103. 1828, *Nomenclator Botanicus*. [Steudel] Editio secunda 1: 372. 1840, *Fl. Trop. Afr.* [Oliver et al.] 1: 407. 1868 [Oct 1868] and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 121. 1960, *Naturalia Monspeliensia*. Série Botanique. 18: 20. 1967

(Antiinflammatory. Poultice of young leaves mixed with crushed palm kernel a remedy for whitlow, purulent infections.)

Cissus debilis (Baker) Planch. (*Cayratia debilis* (Planch.) Suess.; *Vitis debilis* Baker)

Tropical Africa. Climber, slender, grooved, very small flowers, white corolla

See *Dictionnaire des Sciences Naturelles* 10: 103. 1818, *Flora of Tropical Africa* 1: 403. 1868, *Monographiae Phanerogamarum* 5: 471, 569. 1887 and *Mitteilungen der Botanischen Staatssammlung München* 1(8): 352. 1953

(Leaf decoction for headache. Plant juice in healing the umbilical cord.)

Cissus jatrophoides (Welw. ex Baker) Planch. (*Vitis jatrophoides* Welw. ex Baker)

Ethiopia.

See *Flora of Tropical Africa* 1: 400. 1868, *Monographiae Phanerogamarum* 5: 579. 1887 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 122. 1960, *Naturalia Monspeliensia*. Série Botanique. 18: 226. 1967

(Cure for snakebite, crushed roots mixed with honey and mixture drunk.)

in Ethiopia: kosli-auhi

Cissus javana DC. (*Cissus discolor* Blume; *Vitis discolor* (Blume) Dalzell)

Indonesia, Java, India. Climber, purple-black globular fruits, watery purple pulp

See *Cat. Gew. Buitenzorg* (Blume) 39. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 628. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 1: 181. 1825, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 39. 1849

(Ceremonial, ritual, religious and supernatural beliefs.)

in English: rex begonia vine

in China: qing zi ge

in India: embranvally, kongngouyen laba

in Papua New Guinea: jarui

in Sarawak: kuru krangas

Cissus oliveri (Engl.) Gilg (*Cissus arguta* Hook. f. var. *oliveri* Engl.; *Cissus oliveri* Gilg ex Engl.; *Cissus oliveriana* (Engl.) Gilg; *Cissus oliveriana* Gilg)

Tropical Africa.

See Engler, Heinrich Gustav Adolf (1844–1930), *Über die Hochgebirgsflora des tropischen Afrika*. 295. Berlin, 1892, *Abh. Preuss. Akad. Wiss.* (1894) 46. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 258. 1895

(Whole plant antifungal, antiviral, analgesic.)

Cissus pallida (Wight & Arn.) Planch. (*Cissus pallida* Planch.; *Cissus pallida* Salisb.; *Cissus pallida* Steud.; *Vitis pallida* Trim.; *Vitis pallida* Wight & Arn.)

India. Shrub or small tree, erect, purplish white flowers, fleshy round fruits

See *Prodr. Stirp. Chap. Allerton* 66. 1796, *Cat. Ind. Pl.* 25. 1833, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 125. 1834, *Nomenclator Botanicus*. [Steudel] Editio secunda 1: 372. 1840, *Syst. Cat. Fl. Pl. Ceylon* (1885) 19. 1885, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 477. 1887, *Handb. Fl. Ceyl.* i. (1893) 292. 1893 and *Curr. Sci.* 49: 37–38. 1980

(Veterinary medicine, tubers paste in cases of retained placenta; ground fresh tuber applied on the wounds.)

in India: budara theega, chakalli, konda gummadi, kondage, manda kumbala, mandaka balli, maratha, marda, nalla teega, nallathige, nallatige, pedda gummudu, peddagummadi

Cissus petiolata Hook.f. (*Cissus bignonioides* (Schwein. ex Planch.) Gilg & M. Brandt; *Cissus bignonioides* Gilg & M. Brandt; *Cissus hochstetteri* (Miq.) Planch.; *Cissus koumimensis* A. Chev.; *Cissus petiolata* Hook.f. var. *pubescens* Dewit; *Cissus quadrangularis* sensu White; *Cissus suberosa*

(Baker) Planch.; *Cissus suberosa* (Welw. ex Bak.) Planch.; *Vitis suberosa* Welw. ex Bak.; *Vitis suberosa* Baker)

West tropical Africa. Climber, tetragonal stems developing corky wings when older, woody, robust, succulent, small flowers greenish-white in terminal and axillary branched inflorescences, fruits reddish when ripe

See *Niger Flora* 262. 1849

(Sap expressed from the root instilled to the ears for earache; roots for stomach troubles and internal parasitism. For pregnancy disorders. Magic, ritual, leaves decoction for madness. Veterinary medicine.)

in Benin: ahihi, assankan wéwé

in Burundi: umugobore

in Tanzania: kihindihindi

Cissus populnea Guill. & Perr.

Tropical Africa. A strong woody liane, all parts are mucilaginous

See *Florae Senegambiae Tentamen* 1: 134. 1831 and Geidam, M.A. et al. "Effects of aqueous stem bark extract of *Cissus populnea* on some serum enzymes in normal and alloxan-induced diabetic rats." *Pakis. J. Biol. Sci.* 7(8): 1427–1429. 2004, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 93: 43–49. 2004, Ojekale, A.B. et al. "Phytochemistry and spermatogenic potentials of extract of *Cissus populnea* (Guill. and Perr.) stem bark." *TSW Holistic Health Med.* 1: 176 - 182. 2006

(Antibacterial, anti-trypanosomal, vermifuge, febrifuge, a component of a herbal anti-sickling, diuretic, lactation stimulant, wound healing, aphrodisiac, genital stimulants/depressants, fertility enhancer, antidote; leaf sap for eye treatments; stem for venereal diseases. Magic. Veterinary medicine, lactation stimulant, liane for dysentery.)

in Benin: karayérékou, sarou yara

in Ivory Coast, Burkina Faso: flougou, bako, kahon, niamia aka, koua ira, foto, fougou lipou

in Mali: bakani, garo, jumbo

in Niger: loda, lada

in Nigeria: malaiduwa

in Senegal: bakañi, bu mumunö, bumbāg, gi-mbel-mbel, karo, ku gumbenek, kumbaô, ngaro, pumbāg

in Togo: kodjé, adéflo, sankan

in West Africa: karayérékou, sarou yara

Cissus producta Afzel. (*Cissus purpurascens* A. Chev.; *Vitis producta* Baker; *Vitis producta* (Afz.) Baker)

Tropical Africa. A large herbaceous climber, succulent, tetragonous stems, short internodes, tuberous rootstock, pinkish flowers, ripe fruits black, in forest

See *Flora of Tropical Africa* [Oliver et al.] 1: 389. 1868

(Roots insecticides, antibacterial, arachnicides; fruit pain killer. Veterinary medicine, roots for swellings. Magic.)

in Gabon: bokolo-bwa-Abongo, bokoo-a-Abongo, bukulu-bu-Babongu, bukulu-bu-Barimba, mokèdi-a-Abongo, okolo w'abongo, okolo w'akowa, okolo w'azongo

in Senegal: bu falal, bu ñis, bu télèn, fu mélit, hu lébé lun, hu rèbèrun, hurébèrun, i san é ñov, ku léno kayola, o-ndèm-belèmb, tomborõ porañé

Cissus quadrangula L. (*Cissus quadrangula* Salisb.)

India, South Africa. Vine

See *Mant. Pl.* 39. 1767, *Prodr. Stirp. Chap. Allerton* 66. 1796

(Whole plant infusion purgative. Succulent stem crushed with onion given orally for asthma; powdered young stem fried with *ghee* and taken against intestinal worms; stem juice applied on swellings, body pains and bone fracture; stem juice for irregular menstruation and scurvy, dropped into ear for earache and into nose for epistaxis; stem paste for fertility, applied on rheumatic disorders; stem decoction in lime water taken as stomachic and alterative; paste of shoot for burns and wounds. Ash of leaves and shoots in bowel complaints and digestive troubles.)

in India: hadajor, hadsandhi, hadasankal, hadasinkuda, hadbhanga, hadjod, hadjodi, hadjora, hadjore (had = bone, jore/jora = joint), hadsandhi, hadsanka, hadsankal, harbhanga, harjor, harjora, harjura, harsankar, hasjora

Cissus quadrangularis L. (*Cissus cactiformis* Gilg; *Cissus edulis* Dalziel; *Cissus quadrangula* Salisb.; *Cissus quadrangularis* var. *pubescens* Dewit; *Cissus quadrangulus* L.; *Cissus rotundifolia* (Forssk.) Vahl; *Cissus rotundifolia* Blume; *Cissus succulenta* (Galpin) Burt Davy; *Cissus tetragona* Harv.; *Saelanthus rotundifolius* Forssk.; *Vitis quadrangularis* Wall.; *Vitis quadrangularis* (L.) Wall. ex Wight & Arn., nom. illeg., non *Vitis quadrangularis* (L.) Wall. ex Wight; *Vitis quadrangularis* (L.) Morales, nom. illeg., non *Vitis quadrangularis* (L.) Wall. ex Wight; *Vitis succulenta* Galpin)

India, South Africa. Vine, rambling shrub, herbaceous, climbing, scandent, sprawling, jointed stems, quadrangular and four-winged succulent stems rooting at the nodes, young branches winged bearing long slender tendrils, simple leaves broadly ovate, flowers in clusters at nodes, perianth green with red lobes, apiculate berries, tender leaves as vegetable

See *Species Plantarum* 1: 117, 202–203. 1753, *Systema Naturae*, ed. 12 2: 124. 1767, *Mant. Pl.* 39. 1767, *Prodr. Stirp. Chap. Allerton* 66. 1796, *Bijdragen tot de flora van Nederlandsch Indië* 180. 1825, *Catalogue of Indian Plants* 26. 1833, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 125. 1834, *Flora Capensis* 1: 249. 1859, *Repert. Fis. Nat. Cuba* 1: 210. 1866, *Kew Bulletin* 1895: 144. 1895 and *Transvaal Museum Monograph* 3: 121. 1912, *Flora Neotropica* 80: 1–250. 2000, *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda, Sidha and Unani. Presence of calcium oxalate crystals, irritating action of the fresh stem on the skin. Powdered root and stem specifically used in bone fracture. Root decoction antioxidant, widely used as remedy for hemorrhoids, in the treatment of gastric ulcers, peptic ulcer disease, dysentery; crushed stem and roots used as a plaster for bone fractures, analgesic, hemostatic. Whole plant infusion purgative. Succulent stem crushed with onion given orally for asthma; stem juice applied on swellings, body pains and bone fracture; stem juice for irregular menstruation and scurvy, dropped into ear for earache and into nose for epistaxis; stem paste for fertility, applied on rheumatic disorders; stem decoction in lime water taken as stomachic and alterative; paste of shoot for burns and wounds. Ash of leaves and shoots in bowel complaints and digestive troubles. Veterinary medicine, leaves infusion for diarrhea of calves; leaf paste applied on bone fracture; leaves ground with those of *Pedaliium murex* and the decoction given in fevers; leaves of *Crotalaria verrucosa* along with those of *Cissus quadrangularis* pounded and given for ephemeral fever; stem fed in the bone fracture of cattle; stem juice with salt given to cure anorexia; roots of *Indigofera trita* along with stem bark of *Balanites aegyptiacus*, stem of *Cissus quadrangularis* and *Tinospora cordifolia* pounded and the extract given in impaction; stem and the leaves of *Erythroxylum monogynum* pounded and the extract applied over the fractured area and bandaged; stem extract given in dysentery; stem paste applied on sprains and swellings; warm crushed plant applied locally on wounds of oxen.)

in India: asthi samhaara, asthisamhari, asthisamhrta, ashtisandhana (ashti, bone; sandhana, to join, to heal), asthisandhani, asthisanhara, asthisrinkala, asthisrnkhala, astisamhara, astisamhari, cannalam-paranta, cannalamparanta, changala paranda, changalamparanda, changalaparanda, chaudhari, chodhari, grantiman, gudametige, had sankat, hadajor, hadsandhi, hadasankal, hadasinkuda, hadbhanga, hadjod, hadjodi, hadjora, hadjore (had = bone, jore/jora = joint), hadsandhi, hadsanka, hadsankal, harbhanga, harjor, harjora, harjura, harsankar, hasjora, hedsinkuda, horsingaari, isgangalany, jangli-angoor, kaandavela, kandvel, kandvela, kari-p-pirantai, kokkitaya-ralu, mangaravalli, mangaroli, manimanguravalli, mhasvel, nallaeru, nalle, nalleda, nalleru, nullerutige, perandai, peranta, perunde codie, pirandai, pirandei, pirandi, pirantai, puranai, sanduballi, sathura pirandai, tsjangelam-parenda, sanduballi, sunduballi, tridhari, vajjiravalli, vajra-valli, vajravalli, vedhari

in Philippines: sugpon-sugpon, sulpa-sulpa

in Thailand: phet-sangkhat

in Kenya: egis

in Madagascar: ambavajilinala, kitohitohy

in Nigeria: sasarin kura

in Tanzania: kihindihindi, kilindilundi, mhindihindi

Cissus quadrangularis L. var. *pubescens* Dewit (*Cissus fischeri* Gilg)

Zaire.

See *Bulletin du Jardin Botanique de l'État* 29: 297. 1959

(Antioxidant.)

Cissus repanda Vahl (*Rinoxstylis repanda* (Vahl) Raf.; *Vitis repanda* (Vahl) Wight & Arn.; *Vitis vitifolia* var. *repanda* (Vahl) Kuntze)

India. Woody climber, leaves suborbicular, pink flowers in umbellate cymes, purple pyriform berries

See *Symbolae Botanicae, ...* (Vahl) 3: 18. 1794, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 125. 1834, *Sylva Telluriana* 87. 1838, *Revisio Generum Plantarum* 1: 138. 1891

(Paste of tender branches and leaves smeared over inflammation due to Guinea worms. Tuber pounded and applied to folliculosis; dried root tubers blood purifiers; root powder as paste applied on cuts and fractured bones and bandaged; roots of *Blumea laciniata* along with those of *Butea superba* and *Vitis repanda* used for snakebite. Pounded bark in water used to cure abdominal ulcers. Veterinary medicine, climber infusion given to cattle for boils; climber kept in cowpen as snake repellent; leaf paste applied over wounds, ulcers and carbuncles.)

in India: baul dang, bauldang, bhel chapru, dawad-tonda, gummadithige, kongngouyen, medmedia-lop, nelaboddu, pani-bel, panibel, panivelo, panwel, pasupugodanithegani

Cissus repens Lam. (*Cissus cordata* Roxb.; *Cissus glauca* Roxb.; *Cissus repens* Thwaites; *Cissus repens* A. Chev., nom. nud.; *Cissus repens* var. *sinensis* Hand.-Mazz.; *Vitis repens* (Lam.) Wight & Arn.; *Vitis vitifolia* var. *repens* (Lam.) Kuntze)

India. Long slender climber, scandent shrub, trailing, flexible fleshy stems, cordate-ovate membranous leaves with sharp teeth on the margin, flowers in compound umbellate cymes, calyx truncate, triangular petals, young shoots and leaves edible

See *Species Plantarum* 1: 202–203. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 31. 1783, *Hort. Bengal.* 11. 1814, *Flora Indica*; or descriptions of Indian Plants 1: 425. 1820, *Cat. Ind. Pl.* 58. 1833, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 125–126. 1834, *Enum. Pl. (Leaf paste applied on cuts and wounds, on forehead for headache; aqueous extract gargled to treat pyorrhea; leaves purgative; in giddiness leaves kept below head while sleeping.)

in China: bai tong shu

in India: hanngonyo, hingkuwai, sing-ke-ra, singkera

Claoxylon khasianum Hook.f. (*Claoxylon khasianum* var. *serratum* Hook.f.)

India.

See *The Flora of British India* [J.D. Hooker] 5(14): 411. 1887

(A paste of roots of *Claoxylon khasianum* together with *Ardisia paniculata*, *Clerodendrum wallichii*, *Mussaenda macrophylla* and *Trevesia palmata* applied for the treatment of abdominal troubles and tumour.)

in China: mo ye bai tong shu

in India: nagabang

Claoxylon longifolium (Blume) Endl. & Hassk. (*Claoxylon longifolium* Baill., nom. illeg.; *Erythrochilus longifolius* Blume)

Tropical Asia.

See *Bijdragen tot de flora van Nederlandsch Indië* 616. 1826, *Cat. Hort. Bot. Bogor.* 235. 1844, *Étude générale du groupe des Euphorbiacées* 493. 1858

(Antiseptic.)

in China: chang ye bai tong shu

Claoxylon marianum Müll.Arg.

Pacific, Marianas.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 783. 1866

(Purgative.)

Common names: cator, panao

Clappertonia Meisn. Malvaceae (Tiliaceae)

After the British (b. Annan, Dumfriesshire) explorer Capt. Hugh Clapperton, 1788–1827 (d. Chungary, near Sokoto, Abyssinia), traveller, plant collector, traveller, from 1808 to 1813 in East Indies, 1814–1817 Canada, 1822–1824 (after crossing the Sahara to Lake Chad) expedition to Northern Provinces of Nigeria with Dixon Denham (1786–1828, d. Freetown, Sierra Leone) and Walter Oudney (1790–1824). Clapperton's second journey was intended to visit the Sultanate of Sokoto in Central Africa, and continue on to Timbuctoo if possible; in addition to geographical discovery, the expedition was to bring back information about the slave trade to assist in its suppression. See Cothenius, Christian Andreas (1708–1789), *Dispositio Vegetabilium Methodica* a staminum numero desumta. 19. Berolini, 1790, Denham, Clapperton and Oudney, *Narrative of Travels and discoveries in Northern and Central Africa. 1822–1824.* [Botany by R. Brown.] London 1826, Hugh Clapperton and Richard Lander, *Journal of a Second Expedition into the Interior of Africa from the Bight of Benin to Soccatoo* ... to which is added, the *Journal of Richard Lander from Kano to the Sea-coast.* Philadelphia 1829 (1st American edition; first published in London in the same year), Robert Huish, *The Travels of Richard and John Lander ... for the discovery of*

the course ... of the Niger. London 1836, Meissner, C. F. (Carl Friedrich) (1800–1874), *Plantarum vascularium genera, secundum ordines ...* Lipsiae, 1836–1843, Anonymous, *The English Explorers*, comprising details of the more famous travels by Mandeville, Bruce, Park, and Livingstone. With a chapter on Arctic Explorations. London, William P. Nimmo 1875, Joseph Vallot, “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 168–238. Clappertonia ficifolia Decne.

Tropical Africa. Shrub, pink-purple petals, spiny and red-tipped fruits, eaten by elephants

See Delessert, Benjamin (1773–1847), *Icones selectae plantarum quas in systemate universalis: ex herbariis parisiensibus, praesertim ex Lessertiano: descripsit Aug. Pyr. de Candolle, ex archetypis specimenibus a P.J.F. Turpin / delineatae et editae a Benj. De Lessert ...*, 5: 1, t. 1. Parisiis, 1820–1846

(Ground fresh leaves applied on old wounds and ulcers.)

in Central African Republic: ponga

in Gabon: pounga ya yohio

Clarisia Ruíz & Pav. Moraceae

Named for Miguel Barnades y Cláris, see *Flora Peruviana, et Chilensis Prodrum* 128. 1794, *Systema Vegetabilium Florae Peruviana et Chilensis* 255. 1798, *Mém. Mus. Hist. Nat.* 7: 473. 1821, *Kongelige Danske videnskabernes Selskabs Skrifter, Naturvidenskabeli Mathematisk Afdeling* 2: 316. 1851, *Trabalhos da Sociedade Vellosiana* 72. 1852, *Revista Brasileira de Botânica* 1: 210, 368–369. 1857[1858] and *Bulletin du Muséum d’Histoire Naturelle*, sér. 2 1: 163. 1929, *Acta Bot. Neerl.* 11: 430, 465. 1962, *Flora Neotropica* 83: 88. 2001.

Clarisia racemosa Ruiz & Pav. (*Clarisia nitida* (Allemão) J.F. Macbr.; *Soaresia nitida* Allemão; *Sorocea nitida* (Allemão) Warb.; *Sorocea nitida* Warb.)

Peru. Tree, outer bark reddish, inner bark with white latex, female inflorescence racemose, male inflorescence spicate or racemose, in lowland primary forest

See *Systema Vegetabilium Florae Peruviana et Chilensis* 255. 1798, *Revista Brasileira de Botânica* 1: 210. 1857 and *Field Museum of Natural History, Botanical Series* 11(1): 15–16. 1931, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 274–299, 308–331. 1937

(Powdered bark an external wound healing.)

in Peru: mashonaste, tulpay, turpay amarillo

Clarkia Pursh Onagraceae

In honor of Captain William Clark, 1770–1838, explorer, of Lewis and Clark Expedition, companion of the American naturalist Meriwether Lewis (1774–1809) to the sources of the Missouri, then across the Rocky Mountains, and down the river Columbia to the Pacific Ocean, Clark later became Superintendent of Indian Affairs in Louisiana Territory, he was the younger brother of George Rogers Clark. See *Discoveries made in exploring the Missouri, Red River and Washita*, by Captains Lewis and Clark, Doctor Sibley and W. Dunbar. Natchez 1806, P. Gass, *Journal of the Voyages and travels of a corps of discovery*, under the command of Capt. Lewis. 1807, John H. Mitchell, “Oregon: Its history, geography, and resources.” *National Geographic*. 239–284. April 1895, Cyrus C. Babb, “A Relic of the Lewis and Clark Expedition.” *National Geographic*. 100–101. in English: winecup clarkia

Clathrotropis Harms Fabaceae (Sophoreae)

From the Greek *klathron* 'a gate, a lock' and *tropis* 'keel, the keel of a vessel', see *Genera Siphonogamarum* 221. 1901, *Flore de la Guyane française* 2: 36–162. 1952.

Clathrotropis brachypetala (Tul.) Kleinhoonte (*Bowdichia brachypetala* (Tul.) Ducke; *Diplostropis brachypetala* Tul.)

South America, Guyana. Perennial non-climbing tree, spreading racemes, standard petal rose, wing and keel petals white, shortly beaked pod

See *Nova Genera et Species Plantarum* (folio ed.) 6: 295. 1824, *Archives du Muséum d'Histoire Naturelle* 4: 111. 1844 and *Archivos do Jardim Botânico do Rio de Janeiro* 3: 133. 1922, *Recueil des Travaux Botaniques Néerlandais* 22: 398. 1925

(Bark and leaves decoction used in a bath to get rid of lice, fleas and ticks. Bark infusion to cleanse sores and ulcers, and insect, scorpion and snakebites. Scrapings of young bark applied as a poultice to relieve pains.)

in Guyana: aromata

Clathrotropis glaucophylla R.S. Cowan

Venezuela, Guyana. Perennial non-climbing tree

See *Boletín de la Sociedad Venezolana de Ciencias Naturales* 15(81): 97–106. 1954, *J. Nat. Prod.* 1980, 43(1): 164–167. 1980, *Phytochemistry* 61(8): 975–978. 2002

(Bark used as admixture of curare arrow poison. Quinolizidine alkaloids.)

Clausena Burm.f. Rutaceae

The genus was named after the Danish priest Peder Claussen, 1545–1614, the translator of Snorre Sturleson (or Snorri Sturluson, or Sturlason), in 1566 parish priest of Undal, he wrote *Topographia Norwegiae* ... [Copenhagen] 1685; see *Snorre Sturlesøn Norske Kongers Chronica. Udsat paa Danske*, aff H.P. Claussøn. 1633, Nicolaas Laurens Burman (1734–1793), *Flora Indica*. 87, 243, t. 29, fig. 2. Lugduni Batavorum 1768 and *Bull. Mus. Natl. Hist. Nat.*, B, *Adansonia* Sér. 4, 16(1): 125, 128, 141. 1994.

Clausena pentaphylla (Roxb.) DC. (*Clausena pentaphylla* DC.)

India.

See *Flora Indica* ... nec non Prodrumus Florae Capensis 87, 243. 1768 and *Silvae Geneticae* 22: 182–188- 1973

(Used in Ayurveda. Leaves decoction used in cough and cold; root paste for the treatment of ulcers and fevers. Veterinary medicine, root powder mixed with oil applied on wounds and sprains of animals.)

in India: ban limbu, ban-nebu, ratanajota, ratanjot, ratanjote, rowana, shatrabad, surjmukha, teyrar, tharu

Clausena willdenowii Wight & Arn. (*Clausena willdenowii* H. Lévl.)

India.

See *Prodrumus Florae Peninsulae Indiae Orientalis* 96. 1834 and *Flore du Kouy-Tchéou* 375. 1915

(For skin diseases, astringent.)

in India: boyyaval, chidu, cidu, kadukarabe, kadukaribevu, kariveppila, karuvepella, kattukariveppilai, katuveppilai, kondakarivepaku, korakatta, kurakol, mohisiamoringi, morakkuranni, morkurangee, morkurangi, pothi, potti

Clavija Ruíz & Pav. Theophrastaceae (Primulaceae)

For the Spanish author José Clavijo (Clavigo) y Fajardo (Faxardo), 1730–1806, naturalist, translator of Buffon, he fought a duel with Beaumarchais, wrote *El Pensador*. Madrid 1762–1767; *clavija* is the Spanish name for a peg; according to Pritzell the genus was dedicated to the Spanish Don José de Viera y Clavijo, 1731–1813. See *Fl. Peruv. Prodr.* 142, t. 30. 1794.

Clavija mezii Pittier

Panama. Treelet or shrub, slender, leaves coriaceous, orange fruits cauliflorous

See *Flora Peruviana*, et Chilensis Prodrumus 142, pl. 30. 1794, *Flora Peruviana* 2: 284. 1799, *Edinburgh New Philos. J.* 10: 235. Jan-Mar 1831 and *Contributions from the United States National Herbarium* 20(3): 132. 1918, *Nordic Journal of Botany* 9(1): 15–30. 1989, *Opera Bot.* 107: 1–78. 1991

(Roots and wood used to treat snakebite.)

in South America: confite, kuandu

Claytonia L. Portulacaceae (Montiaceae)

For the British botanist John Clayton, 1686 (or 1694)–1773 (Gloucester County, Virginia), physician, plant collector, emigrated to Virginia from England in 1705, he was clerk or prothonotary of Gloucester County, contributed to J.F. Gronovius, *Flora virginica exhibens plantas quas* ... Johannes Clayton in Virginia observavit atque collegit. Leyden 1739–1743, correspondent of Linnaeus, Johan Frederik (Jan Fredrik) Gronovius (1686–1762), Pehr Kalm (1716–1779), John Bartram (1699–1777), Benjamin Franklin and Thomas Jefferson. See Carl Linnaeus, *Species Plantarum* 1: 204. 1753, *Genera Plantarum* Ed. 5. 96. 1754, *Flora Sibirica* 4: 88. 1769, *Mémoires de la Société Impériale des Naturalistes de Moscou* 5: 94–96. 1817, *Mémoires de la Société Impériale des Naturalistes de Moscou* 1: 137. 1829, *Flora Boreali-Americana* 1(5): 224. 1832, *A Flora of North America: containing* ... (Anticonvulsive, contraceptive, powdered roots given to child with convulsions.)

in English: spring beauty, Virginia springbeauty

Cleidion Blume Euphorbiaceae

Greek *kleidion*, *klidion*, diminutive of *kleis* ‘lock, key’, referring to the stamens or to the female pedicels; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 612–613. 1826, *Novarum Stirpium Brasiliensium Decades* 6: 52. 1843, *Bulletin de la Société Impériale des Naturalistes de Moscou* 16: 58. 1843, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 3: 579. 1845, *Madras Journal of Literature and Science*, ser. 2 22: 70. 1861 and *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002.

Cleidion nitidum (Müll.Arg.) Thwaites ex Kurz (*Cleidion nitidum* (Müll.Arg.) Kurz; *Mallotus nitidus* Müll.Arg.)

India, Andaman Is., Sri Lanka. Small tree or shrubs, evergreen, coriaceous alternate dark reddish-brown to blackish leaves, male flowers sessile in axillary inflorescences, globose capsule somewhat depressed mostly 3-lobed

See *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 979. 1866, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 245. 1873 and *J. Econ. Taxon. Bot.* 11(1): 21. 1987, *Rev. Handb. Fl. Ceylon* 11: 168. 1997

(Poisonous. Leaves used in abortion. Leaves of *Cleidion nitidum*, *Callicarpa longifolia* and *Leea indica* pounded and applied to cuts and wounds.)

in India: tam-fa-tu, tamfatu

***Cleistanthus* Hook.f. ex Planchon Phyllanthaceae (Euphorbiaceae)**

Greek *kleistos* ‘closed’ and *anthos* ‘flower’, the flowers appear or remain partially closed; see *Hooker’s Icones Plantarum* 8: t. 779. 1848, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1857: 146. 1857, Baillon, Henri Ernest (1827–1895), *Étude générale du groupe des Euphorbiacées* Paris, Victor Masson, 1858 and *Bulletin du Jardin botanique de l’État a Bruxelles* 30(4): 421–461. 1960 [*Notulae systematicae* XXIX. Révision des *Cleistanthus* d’Afrique continentale (Euphorbiacées)].

***Cleistanthus bipindensis* Pax**

Tropical Africa, Cameroon. Shrub or small tree, inflorescence densely hairy, reddish green flowers, along small streams, in marshy places

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 282. 1903

(Stem bark chewed for its tonic properties.)

Cleistanthus collinus (Roxb.) Benth. ex Hook.f. (*Amanoa collina* (Roxb.) Baill.; *Andrachne cadishaco* Roxb. ex Wall., nom. inval.; *Andrachne cadishan* Roxb. ex Hook. f., nom. inval.; *Andrachne orbiculata* Roth; *Bridelia collina* (Roxb.) Hook. & Arn.; *Cleistanthus collinus* (Roxb.) Benth.;

Cleistanthus collinus (Roxb.) Hook.f.; *Cleistanthus collinus* Benth. & Hook.f.; *Clutia collina* Roxb.; *Emblisa palasis* Buch.-Ham.; *Lebidieropsis collina* (Roxb.) Sri Lanka. Small deciduous tree, greenish axillary flowers in clusters, woody trigonous capsule

See *Species Plantarum* 2: 1014. 1753, *Plants of the Coast of Coromandel* 2: 37. 1802, *Trans. Linn. Soc. London* 13: 507. 1822, *The Botany of Captain Beechey’s Voyage* 211. 1837, *A Numerical List of Dried Specimens* 7877. 1847, *Étude générale du groupe des Euphorbiacées* 582. 1858, *Linnaea* 32: 80. 1863, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 509–510. 1866, *Genera Plantarum* 3(1): pl. 3, 268. 1880, *Fl. Brit. India* 5: 274–275. 1887 and *Drug Development Research* 51(3): 187–190. 2000, *J. Toxicol. Clin. Toxicol.* 41(4): 369–372. 2003, *J. Assoc. Physicians India* 54: 742–744. 2006, *J. Assoc. Physicians India* 55: 85–86. 2007, *Indian J. Med. Sci.* 62: 62–64. 2008

(Used in Ayurveda and Sidha. Extremely toxic plant poison; seeds and bark exceedingly poisonous; liquid extracted from the crushed leaves highly toxic, frequently used for homicidal and suicidal purposes; leaves a gastro-intestinal irritant and fish poison; root bark a gastro-intestinal irritant. Powder of the roots with *Pongamia pinnata* for poisoning arrow blades; powder also used, with fruits, for killing wild animals; root powder in water a fish poison. Root paste applied on boils and suppuration. Stem bark powder in cutaneous diseases, and along with black catechu pounded applied on ringworm patches. Seeds of *Argemone mexicana* crushed with fruits of *Cleistanthus collinus* and applied in skin diseases. Leaves decoction for bathing to cure acute headache; cytotoxic, anti-proliferative and antitumor; leaves insect repellent in paddy fields. Stem sometimes used for abortion. Magic, fruits used as charms to protect families from evil eyes. Crushed stem bark, leaves, fruits and seeds piscicide. Veterinary medicine, stem bark and young leaves made into a paste and applied for blisters of cattle.)

in India: bade daarige, badedarige, boda daraga, bodadara, cirrotuvai, cittotuvai, cittotuvaiceti, garari, garrar, inarcecitam, inarcecitamaram, indrayaya, kaadu gargari, kadagargari, kadise, kadishe, kadishen, karada, karda, kargalli, kargelo daru, karia, karla, karlajuri, kaudigam, kodarsi, kodasigana mara, kodasige, kodasina, kodesa, kodisa, kodise, kodisha, kodishe, kodisi, kondasigina, korisa, korodo, korshe, korsi, kutaja, nachuta, nalla-kordsha, nalla vadise, nandi, nantiracinni, narotuppai, navacikam, navacikamaram, nilaippalai, nilappala, nilappalai, odaichi, odan, odda, oddan, odeshi, odise, odishi, odisi, odu, odugu, odukkan, oduppai, oduvan, otaicci, otukkan, otukku, otukkuppalai, otuku, otuppai, otuvan, parashi, parasi, parasu, turotakam, ullulavaram, ullulavu, vadessa, vadisa, vadisaaku, vadise, vishavriksha, vodisa, vodisha, vodisi, voildisa, voldisa, wodayu, woddan, woden, wodesha, wodisha

Cleistanthus sankunnianus Sivar. & Balach.

India. Low woody shrub, scandent branches

See *Kew Bulletin* 40(1): 121–123. 1985

(Used in Ayurveda.)

Cleistopholis Pierre ex Engl. Annonaceae

Greek *kleistos*, *klistos* ‘closed’ and *pholis*, *pholidos* ‘scale, horny scale’, possibly referring to the inner petals; see *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 14 Suppl. 1: 124. 1829, *Flora Javae Anonac.*: 28–29: 68, 71. 1830, *Flora Indica*: being a systematic account of the plants . . . 145. 1855, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 160. 1897 and *Bull. Misc. Inform. Kew* 259. 1923, J. Vivien & J.J. Faure, *Arbres des Forêts denses d’Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d’Afrique centrale*. CTA, Ede/Wageningen 1989.

Cleistopholis glauca Pierre ex Engl. & Diels (*Cleistopholis bequaerti* De Wild.; *Cleistopholis grandiflora* De Wild.)

Tropical Africa. Tree, flowers yellow-green

See *Monogr. Afrik. Pflanzen.-Fam.* 6: 35. 1901, *Plantae Bequaertianae* 1(4): 464. 1922, *J. Nat. Prod.* 63(1): 6–11. 2000

(Antiviral, emetic, the stem bark.)

in Cameroon: avom

in Gabon: avom, nkomi, onghondjia

in Zaire: bontole wa welo (Kundu); kikolekole (Kisongola); likamba (Turumbu); montole (Madibi); mubwabwa (Tshiluba); munkole (Kirega)

Cleistopholis patens (Benth.) Engl. & Diels (*Cleistopholis brevipetala* Exell; *Cleistopholis klaineana* Pierre ex Engler & Diels; *Cleistopholis lucens* De Wild.; *Cleistopholis patens* Engl. & Diels; *Cleistopholis patens* var. *klaineana* Pellegr.; *Cleistopholis pynaertii* De Wild.; *Cleistopholis verschuereni* De Wild.; *Oxymitra patens* Benth.)

Tropical Africa.

See *Transactions of the Linnean Society of London* 23(3): 472; t. 51. 1862 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 35. 1901, *Bull. Jard. Bot. État Bruxelles* 4: 387. 1914, *Plantae Bequaertianae* 1(4): 465. 1922, *Journal of Botany, British and Foreign* 70(Suppl.): 208. 1932, Robert T. Parsons, *Religion in an African Society*. Prod.* 50(5): 961–964. 1987, *Antimicrobial Agents and Chemotherapy* 34(4): 529–533. 1990, *Natural Product Research* 13(2): 147–150. 1999, *Journal of Ethnopharmacology* 76(1): 99–103. 2001, *Phytotherapy Research* 15(1): 73–75. 2001, *J. Nat. Prod.* 69(4): 585–590. 2006, *Planta medica* 75(10): 1143–1145. 2009

(Leaves juice or exudate from the leaves hemostatic agent, for fresh wounds. Root bark or stem bark extract antiplasmodial, anthelmintic, antifungal, anticandidal, antimicrobial, antibacterial.)

in English: salt-and-oil tree

in Cameroon: avom, dembeka, kiyo, ntolo, pio

in Congo: lukunzu

in Gabon: avom, avome

in Ivory Coast: botopouo, sobou

in Nigeria: apako, ogwu odenigbo, otu, párá; apako, oke, pipagha (Yoruba); otù (Edo); ojo (Igbo); lupu, pàá, (Ijo-Izon, or Ijaw)

in Sierra Leone: siopiando (Kissi); fubame (Kono); karakil-kene (Manding-Maninka); moigbama, moigbwama (Mende)

in Yoruba: apako, oke

in Zaire: bontole (Kundu); bontolei (South Maringa), bukadi, lupupaya, tsho-lole (Tshiluba); kole (Kiombe); kole kole (Basolongo); lie sie (Luki); likamba (Turumbu); lukukonzi (Mayumbe); moboka (Kisangani); ntole (lake Mai-Ndombe); popongo (Uele)

Cleistopholis staudtii Engl. & Diels (*Oxymitra staudtii* Engler & Diels; *Polyalthia crassipes* Engl.)

Tropical Africa.

See *Notizbl. Königl. Bot. Gart. Berlin* 2: 297. 1899 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 35. 1901, *Botanisch Jaarboek Syst.* 39: 477. 1907, *Planta Medica* 50(3): 282. 1984

(Alkaloids.)

in Gabon: avome

Clematis L. Ranunculaceae

Latin *clematis* and Greek *klematis*, *klematidos* (diminutive of *klema*, *klematos* ‘a shoot, vine-branch, twig’) the name of various climbing plants, used for periwinkle (*Vinca herbacea*, Dioscorides), traveller’s joy (*Clematis vitalba* L.), and probably bearbind, *Convolvulus arvensis* (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 542–545. 1753 and *Genera Plantarum*. Ed. 5. 242. 1754, *A Flora of North America*: containing ... 1(1): 10. 1838 and *Bulletin of Miscellaneous Information Kew* 1920: 12. 1920, *Fieldiana, Bot.* 24(4): 243–256. 1946, *Sci. Rep. Osaka Univ.* 16: 33–34. 1967, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2190–2192. 2001.

Clematis baldwinii Torr. & A. Gray (*Clematis baldwinii* Torr. & A. Gray var. *baldwinii*; *Coriflora baldwinii* (Torr. & A. Gray) W.A. Weber; *Viorna baldwinii* (Torr. & A. Gray) Small)

North America. Perennial

See *A Flora of North America*: containing ... 1(1): 8. 1838 and *Flora of the Southeastern United States* 439, 1331. 1903, *Phytologia* 51(6): 372. 1982

(Plant infusion for sunstroke.)

in English: Baldwin's clematis, pine hyacinth, pine-woods clematis

Clematis barbellata Edgew.

India, Himalaya, Nepal.

See *Transactions of the Linnean Society of London* 20(1): 25. 1846 [1851 publ. 29 Aug 1846] and *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 3: 34. 1976, *Acta Bot. Indica* 8: 1–10. 1980

(Leaves and flowers antibacterial, used for scabies, skin diseases, boils, cuts and wounds.)

in India: belkangu, chabru, santai, wantah

in Nepal: kramay

Clematis brachiata Thunb. (*Clematis bathiei* H. Lév.; *Clematis brachiata* Ker Gawl., nom. illeg.; *Clematis brachiata* Thunb. var. *burkei* Burt Davy; *Clematis burgensis* Engl.; *Clematis dolichopoda* Brenan; *Clematis glaucescens* Fresen.; *Clematis hirsuta* sensu Milne-Redh.; *Clematis hirsuta* Guill. & Perr. var. *dolichopoda* (Brenan) Staner & J. Afric.* 1(2): 7. 1898 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 27: 3. 1917, *A Manual of the Flowering Plants and Ferns of the Transvaal* 1: 37, III. 1926, *Flore de Madagascar et des Comores* 76: 12–13. 1950, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 39: 129–139. 1993, *Journal of Ethnopharmacology* 43: 89–124. 1994, *Journal of Ethnopharmacology* 52: 95–100. 1996, *Acta Phytotaxonomica Sinica* 38: 325. 2000, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnobiology and Ethnomedicine* 2: 1–9. 2006, *Journal of Ethnopharmacology* 112: 152–161. 2007, *Journal of Ethnobiology and Ethnomedicine* 4: 10. 2008

(When chewed the leaf produces a burning sensation in the mouth. Leaves used to ease blisters, aches and pains; poultice of leaves relieves rheumatic pain, plant can easily burn skin if kept on too long; leaves infusion used to ease headaches, coughs and colds, chest ailments and abdominal upsets; leaves for pest control, wound maggots, mosquito and biting insect repellent. Ritual. Veterinary medicine, vermifuge.)

in English: bridalwreath, old man's beard, poobah's beard, traveller's joy, wild clematis

in Arabic: haya'a

in Burundi: umukamba, umunkamba

in Comoros: igacheou

in Congo: gumba, monikia

in Kenya: bisinda, mûgaya ng'ûndu, naitasingisho, sheraha, shiraha, sisiat

in Rwanda: umukamba, umunkamba

in Southern Africa: iTyolo, ityolo, klimop, lemoenbloeisels, maamba, mogau, morara-oa-thaba, nyokana, roosmaryn, tshiumbeumbe, umdlonza

Clematis buchananiana DC. (*Clematis buchananiana* Wall.; *Clematis buchananii* D. Don)

India. Climber, rambling, trailing, thick bush-like, yellowish flowers, open slope, in forest

See *Regni Vegetabilis Systema Naturale* [Candolle] 1: 140. 1817 [1818 publ. 1–15 Nov 1817], *Prodr. Fl. Nepal.* 191. 1825, *Numer. List* [Wallich] n. 4677. 1831 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 3: 34. 1976, *Acta Botanica Indica* 8: 1–10. 1980, *Journal of Cytology and Genetics* 19: 114–115. 1984, *Proceedings of the Indian Science Congress Association* 74(3, vi): 184–185. 1987

(Said to be poisonous. Plant juice applied on cuts and wounds. Aerial parts paste used to treat gout, to massage the affected parts. Stem bark more or less pasted kept between the teeth to

relieve toothache. Leaf paste applied to treat cuts, sores and wounds. Fresh roots to cure sinusitis and nose-blocks; root juice to relieve stomach disorders.)

in India: garol, jermai sniuh, kanguli, kehinha, kynsaw blai, lagulia, margain, mei bytengdoh, mei lieh, pinsasay lahara

in Nepal: bagajwen, bagh junge, charchare, khondro langdu, surtilang

Clematis buchaniana DC. var. *vitifolia* Hook. f. & Thomson

India. Climbers, ribbed twigs, creamy flowers sweetly scented, achenes densely hairy

See *Flora Indica*: being a systematic account of the plants 1: 11. 1855

(Stem peels and roots crushed and the juice taken for stomachache, ulcers. Leaf paste applied for sores and skin diseases.)

in India: garol, jermai sniuh, kanguli, kehinha, kynsaw blai, lagulia, margain, mei bytengdoh, mei lieh, pinsasay lahara, vera phul

Clematis campestris A. St.-Hil. (*Clematis bangii* Rusby; *Clematis campestris* var. *mendocina* (Phil.) National, 1923–1927, *Anales del Museo Nacional de Buenos Aires* 32: 204. 1923, *Fl. Illustr. Entre Ríos* 3: 310. 1987

(Antirheumatic, caustic, rubefacient, skin diseases.)

in Argentina: barba de viejo, cabello de ángel

Clematis chinensis Osbeck (*Clematis benthamiana* Hemsl.; *Clematis chinensis* Retz., nom. illeg., non *Clematis chinensis* Osbeck; *Clematis liukiuensis* Warb.)

China. Perennial herb, roots brown outside

See *Dagbok ofwer en Ostindisk Resa* 205, 242. 1757, *Observationes Botanicae* 2: 18, pl. 2. 1781, *Journal of the Linnean Society, Botany* 23: 2. 1886

(Roots for rheumatism, arthritis, tonsillitis, sore throat, toothache, jaundice.)

in English: Chinese clematis, clematis vine

in China: wei ling xian

in Japan: Shina-botan-zuru

Clematis clemensiae Eichler

New Guinea. Vine, slender, flowers in loose panicle

See *Bibliotheca Botanica* xxxi. Heft 124, 35. 1958

(Leaves crushed and sniffed to relieve headache and clear the nose; crushed leaves extract drunk to treat cough.)

in Papua New Guinea: apapena, didila, kitara, saihuna, tataratara, tataratara, titaraetiara, wamom, zamzamfiroro

Clematis columbiana (Nuttall) Torrey & A. Gray (*Atragene columbiana* Nuttall; *Clematis columbiana* var. *columbiana*; *Clematis pseudoalpina* (Kuntze) A. Nelson; *Clematis verticillaris* DC. var. *columbiana* (Nutt.) A. Gray)

North America. Clambering perennial, vine, pink flowers

See *Species Plantarum* 542. 1753, *J. Acad. Nat. Sci. Philadelphia* 7(1): 7. 1834, *Fl. N. Amer.* 1(1): 11. 1838, *Rep. Geol. Resources Black Hills* 531. 1880 and *Brittonia* 25: 382. 1971

(Used in a head wash for scabs, itch, sores and eczema; leaves poultice for sweaty feet.)

in English: rock clematis

Clematis connata DC.

Nepal, India, Himalaya.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 4. 1824, *Deutsche Dendrologie* 158. 1895 and *Plantae Wilsonianae* 1(3): 322. 1913, *Res. Bull. Univ. (Leaves crushed and inserted in caries to relieve a toothache. Leaves and roots decoction given to a parturient to stop excessive bleeding.)

in Spanish: barba de chivo, barba de viejo

Clematis flammula L. (*Anemone flammula* (L.) K. Krause)

Europe, North Africa.

See *Species Plantarum*: 544. 1753, *Regni Vegetabilis Systema Naturale* 1: 133. 1817 and *Deutschlands Flora* ed. 2, 5: 303. 1901

(For cough, pneumonia.)

in Arabic: 'ansara, azenzu, nar barda, nar berd, nar berda

Clematis glycinoides DC.

New Caledonia. Vine, white flowers

See *Regni Vegetabilis Systema Naturale* 1: 145. 1817, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 26: 155. 1885, *Verhandlungen der Kaiserlich-Königlichen Zoologisch-Botanischen Gesellschaft in Wien* 37(Abh.): 50. 1887 and *Bibliotheca Botanica* 89: 109. 1926

(Vesicant, irritant.)

in English: forest clematis, headache vine, traveller's joy

Clematis gouriana Roxb. ex DC. (*Clematis martini* H. Lév.; *Clematis vitalba* L. subsp. *gouriana* (Roxb. ex DC.) Kuntze; *Clematis vitalba* var. *gouriana* (Roxb. ex DC.) Finet & Gagnep.; *Clematis vitalba* var. *micrantha* H. Lév. & Vaniot)

East India, Laos, China. Creeper, climbing shrub, greenish white flowers in panicle

See *Regni Vegetabilis Systema Naturale* 1: 138–139. 1817, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 26(2): 100. 1885 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 11(152): 167. 1902, *Bulletin de la Société Botanique de France* 50: 532. 1903, *Bulletin de l'Académie Internationale de Géographie, Botanique* 17(210–211): ii. 1907, *Botaniska Notiser* 132: 210. 1979, *Journal of Ethnopharmacology* 114(2): 103–113. 2007

(Used in Ayurveda. Whole plant said to be poisonous; stem and leaves bitter; the juice of freshly crushed leaves and stems has a vesicant blistering action. Whole plant juice applied on forehead for cold, headache, wound healing, antimicrobial. Leaf extract applied externally for eczema, boils, itches; leaf paste applied to scabies, cuts and wounds; powdered leaves taken like snuff for sinusitis. Leaves of *Clematis* and *Dioscorea* crushed together and juice dropped in the nose for epilepsy. Flowers keep off insects. Roots decoction given in stomachache. Veterinary medicine, stem and leaves bitter used as stomachic.)

in China: xiao suo yi teng

in India: attumesaikodi, baelkan, bel kangu, belkangu, belkum, boromohanti, chabru, cheerappookodi, chibru, churanhar, dehra, devi, dun, gokarni, gowri kunthala, idiya, jhol, jyrmi bytengdoh, kanguli, madhulika, madhurasa, madhusreni, maruvel, mookuvali talai, mor-vel, morabela, morata, moriel, moriyal, morvel, moryel, murva, pannedang, pedutivva, piluparni, poovalli, ranjai, ranjaayi, shend-vel, sruva, talajadhri, talazadari, tejani, telasadari, telejadari, totul, udurumbe soppu, udurumber soppu, yidya

Clematis grandiflora DC.

Tropical Africa, Sierra Leone. Herbaceous climber, calyx cream, stamens cream

See *Regni Vegetabilis Systema Naturale* 1: 151. 1818[1817]

(Leaves and juice as vesicant, for headache, skin diseases. The juice of the plant is irritant, the leaves used as a vesicant. Rituals, ceremonial.)

Clematis grata Wall. (*Clematis grata* Maxim.; *Clematis grata* O. Hoffm. ex Baker; *Clematis vitalba* subsp. *grata* (Wall.) Kuntze; *Clematis vitalba* L. var. *grata* (Maxim.) Finet & Gagnep.)

China, Himalaya.

See *Plantae Asiaticae Rariores* (Wallich) 1: 93, t. 98. 1830, *J. Linn. Soc., Bot.* 20: 88. 1883 [1884 publ. 1883] and *Bulletin de la Société Botanique de France* 50: 532. 1903, *J. Cytol. Genet.* 19: 114–115. 1984, *Proc. Indian Sci. Congr. Assoc.* 74(3,VI): 184–185. 1987

(Leaves used for spleen troubles.)

in China: xiu li tie xian lian

in India: johi

Clematis graveolens Lindley (*Clematis graveolens* Hook., nom. illeg.; *Clematis orientalis* L. subsp. *graveolens* (Lindl.) Kuntze)

Nepal.

(Powdered stem, mixed with the powder of *Bistorta milletii* (*Polygonum milletii* (H. Lév.) H. Lév.) and *Desmodium* sp., taken with water to treat cough and cold. Seeds mashed and applied on the forehead to alleviate headaches. Root paste antiseptic, healing agent, applied to cure pimples. Blistering.)

in China: huang yao tzu, hung yao tzu, mu yao tzu, tao ku

in Nepal: emau phanjau, nashar

Clematis hedysarifolia DC. (*Clematis hedysarifolia* Lindl., nom. illeg.)

India. Woody climber, coriaceous leaflets, flowers creamy-white, hairy achenes

See *Regni Vegetabilis Systema Naturale* 1: 148. 1818, *Botanical Register*; consisting of coloured ... 7: t. 599. 1822

(Leaf juice said to be contraceptive; leaves eaten raw for common cough and stomachache; leaf paste on the forehead for headache. Leaves of *Clematis* and *Dioscorea* crushed together and juice dropped in the nose for epilepsy. Roots decoction taken to kill intestinal worms.)

in India: bendri-chi-ve, bendrichivel, butgandiveil, luangcalli, marvel, morvel, murva, ranjai, vangadvel

Clematis hexapetala Pallas (*Clematis hexapetala* L.f., nom. illeg.)

China, Korea. Perennial herb, erect, long blackish roots, leaves opposite pinnate, white flowers paniced, petals wanting, numerous free carpels, stalked achenes, on slopes

See *Species Plantarum* 1: 543–545. 1753, *Reise durch verschiedene Provinzen des russischen Reichs* 3: 735, pl. 1, f. 2. 1776, *Supplementum Plantarum* 271. 1782 [1781 publ. Apr 1782], *Systema Naturae* 1: 146. 1817 and *Journal of Wuhan Botanical Research* 3(4): 371–379. 1985, *Journal of Wuhan Botanical Research* 9(2): 107–111. 1991, *Journal of Wuhan Botanical Research* 32(2): 180–182. 1995

(Roots used for rheumatic arthritis, tonsillitis, sore throat, toothache, jaundice.)

in English: six-petalled clematis

in China: mian tuan tie xian lian, weilingxian

Maori name: pikiarero

Clematis hexasepala (L.f.) DC. (*Clematis hexapetala* L.f., nom. illeg.; *Clematis hexasepala* DC.)

New Zealand.

See *Supplementum Plantarum* 271. 1782, *Systema Naturae* [Candolle] 1: 146. 1817 [1818 publ. 1–15 Nov 1817]

(Ceremonial, Maori girls wore the flowers as chaplets.)

Clematis hirsuta Guill. & Perr. (*Clematis brachiata* Thunb.; *Clematis simensis* Fresen.)

Tropical Africa. Scrambling shrub, vine, straggling, woody-based herbaceous climber, spreading, glandular leaves, white-yellow flowers

See *Prodromus Plantarum Capensium, ...* 94. 1800, *Flora Senegambiae Tentamen* Paris, London 1830–1833, *Museum Senckenbergianum* 2: 267. 1837 and *Bulletin of Miscellaneous Information Kew* 1920: 12. 1920, *Acta Phytotax. Sin.* 38(4): 325. 2000, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 110: 516–525. 2007, *Journal of Ethnopharmacology* 111: 271–283. 2007, *Journal of Ethnopharmacology* 112: 55–70. 2007

(Leaves and juice blistering, vesicant, wound dressing, antidote, for leprosy, skin diseases, fevers. Juice applied externally to skin diseases, headache, cataract, influenza, applications of the powdered roots and leaves also used. Leafy stem decoction for cough; leaves infusion for insanity, diarrhea. Poison for arrows. Magic, ritual, roots, talisman of good luck.)

in Burundi: umunkamba

in Central African Republic: ngongoro, wi gonge

in Congo: kalumisa, kinyukambele, luhombia mashaka, monikia, ruhombia mashaka, umukamba w'igikasa

in Guinea: kipiti

in Ivory Coast: konkondégurasié, sansa

in Kenya: bisinda, engisugi olenario, mugayangandu

in Rwanda: umunghomba, umunkamba

in Tanzania: minkamba, nyanjaeyela, omnkamba, orkisuje, ormuasa, tumbanko, yaatha

in Uganda: abwe, mpangula, omwombyer

Clematis hirsutissima Pursh (*Clematis hirsutissima* var. *hirsutissima*; *Coriflora hirsutissima* (Pursh) W.A. Weber; *Viorna hirsutissima* (Pursh) A. Heller)

North America. Perennial

See *Flora Americae Septentrionalis*; or, ... 2: 385. 1814[1813] and *Muhlenbergia: a journal of botany* 1(3): 40. 1904, *Phytologia* 51(6): 373. 1982

(Whole plant infusion as an itch medicine.)

in English: hairy clematis, sugarbowl

Clematis ladakhiana Grey-Wilson

India.

See *Kew Bulletin* 44(1): 49. 1989

(Root and young shoot extract given to cure stomachache.)

in India: aank ral

Clematis lasiantha Nuttall (*Clematis lasiantha* Fisch., nom. inval.)

North America. Perennial vine

See *Catalogue du Jardin des Plantes...à Gorenki* ed. 2: 47. 1812, *Fl. N. Amer.* 1(1): 9. 1838 and *Sci. Rep. Osaka Univ.* 16: 34. 1967

(Pounded stems or chewed or burned roots in the treatment of colds.)

in English: pipestem, pipestem clematis

Clematis loureiroana DC. (*Clematis filamentosa* Dunn)

Laos.

See *Regni Vegetabilis Systema Naturale* 1: 144. 1817 and *Journal of Botany, British and Foreign* 47(6): 197. 1909

(Powdered crushed roots for cough and cold.)

in China: si tie xian lian

in India: sladienglum

Clematis microphylla DC. (*Clematis hexapetala* subsp. *microphylla* (DC.) Kuntze; *Clematis microphylla* var. *normalis* Domin; *Clematis microphylla* var. *normalis* (DC.) Domin)

Australia. Climber, vigorous, greenish-cream flowers, clusters of fluffy seeds, nesting sites for native birds

See *Syst. Nat.* [Candolle] 1: 147. 1817 [1818 publ. 1–15 Nov 1817], *Verhandlungen des Botanischen Vereins für die*

Provinz Brandenburg und die Angrenzenden Länder 26: 108. 1885 and *Bibliotheca Botanica* Heft 89: 110. 1926

(Leaves rubefacient, known or suspected of causing dermatitis, handling the leaves may cause inflammation of the skin. Poultices of the crushed leaves antiinflammatory, for rheumatism.)

in English: small-leaf clematis, small-leaved clematis

Clematis montana Buch.-Ham. ex DC. (*Clematis montana* D. Don, nom. illeg.)

China.

See *Regni Vegetabilis Systema Naturale* 1: 164. 1817, *Prodromus Florae Nepalensis* 192. 1825 and *Plantae Wilsonianae* 1(3): 331. 1913, *Acta Botanica Indica* 8: 1–10. 1980

(Roots for skin diseases and itching. Leaves decoction in cold and fever; leaves skin irritant, blistering.)

in China: xiu qiu teng

in India: garol, geor bel, kanguli, kaunibai, kaunie-bali, wantah

in Nepal: junge lahare, tarkarmando

Clematis napaulensis DC. (*Clematis cirrhosa* L. var. *napaulensis* Kuntze; *Clematis forrestii* W.W. Sm.)

Nepal, India.

See Carolus Clusius (Charles de l'Écluse or Lescluse), 1526–1609, *Rariorum plantarum historia*. 1: 123. Antwerpen 1601, *Species Plantarum* 1: 544. 1753, *Regni Vegetabilis Systema Naturale* 1: 164. 1817, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 26(2): 143. 1885 and *Notes from the Royal Botanic Garden, Edinburgh* 8(38): 183–184. 1914, *Taxon* 54(2): 469. 2005

(The juice of freshly crushed leaves and stems has vesicant properties.)

in China: he bao tie xian lian

in India: ghantiali, jali, kangalya, lamrya, marchya lagulu

Clematis occidentalis (Hornem.) DC. (*Atragene americana* Sims; *Atragene occidentalis* Hornem.; *Clematis alpina* subsp. *occidentalis* (Hornem.) Kuntze; *Clematis occidentalis* var. *occidentalis*; *Clematis verticillaris* DC.; *Clematis verticillaris* var. *cacuminis* Fernald; *Clematis verticillaris* var. *grandiflora* B. Boivin)

North America. Perennial vine

See *Species Plantarum* 1: 542, 543. 1753, *The Gardeners Dictionary*, ed. 8. [textus s.n.] *Clematis* n. 9. 1768 [16 Apr 1768], *Botanical Magazine* 23: t. 887. 1805, *Hortus Regius Botanicus Hafniensis* 2: 520. 1815, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 10. 1824, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die*

Angrenzenden Länder 26: 161. 1885 and *Rhodora* 49(585): 219–220. 1947

(Ceremonial. Veterinary medicine, plant infusion given to horses as a diuretic.)

in English: bell rue, western blue virginsbower

Clematis orientalis L. (*Clematis incisodentata* Rich.; *Clematis orveniae* Harvey & Sonder; *Clematis petersiana* Klotzsch; *Clematis thunbergii* Steud.; *Clematis triloba* Thunb.; *Clematis viridiflora* Bertol.)

India.

See *Prodromus Plantarum Capensium*, ... 94. 1800, *Nomenclator botanicus hortensis*, oder, Alphabetische und synonymische Aufzählung der in den Gärten Europa's cultivirten Gewächse, nebst Angabe ihres Autors, ihres Vaterlandes, ihrer Dauer und Cultur / bearb. von Gustav Heynhold nebst einer Vorrede von Dr. Ludwig Reichenbach. Dresden, Leipzig: In der Arnoldischen Buchhandlung, 1840–46 [*Alphabetische und synonymische Aufzählung der in den Jahren 1840 bis 1846 in den europäischen Gärten eingeführten Gewächse.*], *Tentamen Florae Abyssinicae* ... 1: 2. 1847, *Miscellanea Botanica* 19: 7, t. 3. 1858, *Flora Capensis* 1: 2. 1859, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 26: 125. 1885 and *Acta Phytotaxonomica Sinica* 38: 325. 2000

(Poisonous. The juice of freshly crushed leaves and stems has vesicant properties; plant juice can cause peeling of the skin of animals; leaf juice to heal wounds.)

in English: Chinese clematis, oriental Virgin's bower

in India: bisho, garol, khuta

Clematis orientalis L. var. ***acutifolia*** Hook. f. & Thomson

India, Ladakh.

See *Flora Indica*: being a systematic account of the plants. 9. 1885

(Poisonous. Leaf juice to heal wounds.)

in India: bisho, khuta

Clematis paniculata J.F. Gmel. (*Clematis paniculata* Thunb., nom. illeg.)

North America. Climber, twining, curled tendrils, snowy white star-like flowers, daisy-like petals with a yellow centre, feathery seed heads

See *Syst. Nat.*, ed. 13[bis]. 2(1): 873. 1791 [late Sep–Nov 1791], *Transactions of the Linnean Society of London* 2: 337. 1794 [1 May 1794]

(Leaves applied to blisters as a counter irritant. Sap blown on the wound to heal it.)

in English: bush clematis

in China: hsien jen ts'ao

Maori names: pikiarero, puawananga

Clematis papuasica Merr. & L.M. Perry

Solomon Islands. Vine

See *Journal of the Arnold Arboretum* 24(1): 34–35. 1943

(Leaves crushed and rubbed on fungal skin infection.)

in Papua New Guinea: feriyanyua, omwalu, suwone

Clematis recta L. (*Anemone recta* (L.) K. Krause; *Clematis lathyrifolia* Bess. ex Reichenb.)

North America.

See *Species Plantarum* 1: 544. 1753, *Flora Germanica Excursoria* 734. 1832, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 9: 260. 1888 and *Deutschlands Flora* ed. 2, 5: 302. 1901

(Used as a vesicant. May produce vesicles and ulcers; local application useful in the treatment of cancerous ulcers.)

in English: erect clematis, ground Virgin's bower, upright Virgin's bower

Clematis smilacifolia Wall.

India.

See *Asiatic Researches* 13: 402, 414. 1820, *Cat. n.* 4683. 1831 and *Taxon* 29: 165–166. 1980

(Used in cough, cold, influenza, malaria.)

in China: ba qia ye tie xian lian

in India: tangam mirap

Clematis terniflora DC. (*Clematis dioscoreifolia* H. Lév. & Vaniot; *Clematis maximowicziana* Franch. & Sav.; *Clematis paniculata* Thunb., nom. illeg.)

China.

See *Transactions of the Linnean Society of London* 2: 337. 1794, *Regni Vegetabilis Systema Naturale* 1: 137. 1818[1817], *Enumeratio Plantarum in Japonia Sponte Crescentium* ... 2(2): 261. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 7(152–156): 339. 1909, *Journal of the Arnold Arboretum* 1: 195. 1920, *Taxon* 29: 712. 1980, *Taxon* 30: 842–843. 1981, *Journal of Wuhan Botanical Research* 9(2): 107–111. 1991, *New Zealand J. Bot.* 31: 91–96. 1993

(Roots analgesic.)

in English: sweet autumn clematis

in China: yuan zhui tie xian lian

Clematis terniflora DC. var. ***mandshurica*** (Rupr.) Ohwi (*Clematis liaotungensis* Kitag.; *Clematis mandshurica* Rupr.; *Clematis recta* L. var. *mandshurica* (Rupr.) Maxim.)

China.

See *Regni Vegetabilis Systema Naturale* 1: 137. 1818 [1817], *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg* 15: 258. 1857, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 22(2): 218–219. 1876 and *Report of the Institute of Scientific Research, Manchoukuo* II 7: 291. 1938, *Acta Phytotaxonomica et Geobotanica* 7(1): 43. 1938, *Journal of Wuhan Botanical Research* 3(4): 371–379. 1985

(Roots for arthritis, rheumatism, tonsillitis, sore throat, toothache, jaundice.)

in China: la liao tie xian lian

Clematis tibetana Kuntze

India, Himalaya. Woody climber, pinnate leaves, yellow flowers in axillary branches, fodder

See *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 26: 172. 1885

(Applied locally and taken internally in syphilis and ulcers. Veterinary medicine, root powder applied to kill lice on cattle and yak.)

in English: clematis

in China: zhong yin tie xian lian

in India: zakzic, zakzik

Clematis tongluensis Tamura (*Clematis tongluensis* (Bruhl) Tamura)

India. Twiner, inflorescence solitary

See *Acta Phytotax. Geobot.* 19: 77. 1962, *Acta Phytotax. Sin.* 38(6): 503. 2000

(Roots crushed and inhaled to cure sinusitis and nose blockage.)

in India: pinasay lahara

Clematis triloba B. Heyne ex Roth (*Clematis triloba* B. Heyne)

India. Climber, trailing, sulcate stems, simple opposite leaves

See *Novae Plantarum Species* 251. 1821

(Used in Ayurveda and Unani. Paste of leaves applied on eczema, snakebite, ringworm, dermatitis.)

in India: banderchiti, churahar, devashreni, devi, dhanurguna, dhanurmala, dridhasutrika, gokarni, habbu balli, hegguru, laghukarni, laghuparnika, madhulika, madhuras, madhushreni, madhusrava, morata, moravela, morbel, morhari, morvel, muhari, murhari, murva, piluparni, prithakaparni, ranjaayi, ranjal, snigdhaparni, snuva, souga valli, tejani, tikeke

Cleome amblyocarpa Barratte & Murb. (*Cleome arabica* L. subsp. *amblyocarpa* Barr. & Murb.) (from the Greek *amblys* ‘blunt, obtuse’ and *karpos* ‘fruit’.)

Morocco. Erect herb, glandular, viscid, red petals

See *Acta Universitatis Lundensis*, n.s. 1(4): 25. 1905

(Antalgic, plant cataplasms on chest; fruit decoction for cough, chest pain, pneumonia; leaves infusion stomachic, diuretic.)

in Arabic: amhinza, hoyar, i-hanza, mohinza

Cleome arabica L.

Middle East, Algeria. Viscid herb, small yellow flowers, desert plant

See *Centuria I. Plantarum* ... 20. 1755 [19 Feb 1755] and *Fl. Iranica* 68: 27. 1970, *Biochemical Society transactions* 25(4): S608. 1997, *Pharmaceutical Biology* 41(1): 10–15. 2003, *Prostaglandins, Leukotrienes and Essential Fatty Acids* 72(3): 195–201. 2005, *Pharmacognosy Research* 1(4): 162–165. 2009

(Leaves diuretic, febrifuge, antiinflammatory, for anemia, asthenia, acute inflammation, lumbago, arthritis, rheumatism, itching.)

in Mali: mkhenza

in Mauritania: mraïnze, mraïnzè

Cleome aspera Koenig ex. DC. (*Cleome aspera* Koen.)

India.

See *Prodr.* (DC.) 1: 241. 1824 and *Curr. Sci.* 48: 730–731. 1979

(Leaf paste in eczema.)

in India: karumpoindu

Cleome chelidonii L.f. (*Aubion chelidonii* (L.f.) Raf.; *Cleome chelidonii* Bojer; *Polanisia chelidonii* (L.f.) DC.)

India, Myanmar, Thailand, Indonesia. Herb, reddish flowers

See *Suppl. Pl.* 300. 1782 [1781 publ. Apr 1782], *Sylva Telluriana* 110. 1838, *Ann. Sci. Nat., Bot.* sér. 2, 20: 56. 1843 and *Journal of Palynology* 33(1–2): 157–164. 1997

(Leaf juice dropped for ear infections; root anthelmintic; whole plant infusion for skin diseases.)

in India: jal-talavni

in Indonesia: bobowan, mamam

in Thailand: phak saan, phak sian paa

in Vietnam: m[af]n ri t[is]a, m[af]n m[af]n t[is]m

Cleome felina L.f.

India.

See *Supplementum Plantarum* 300. 1782 [1781 publ. Apr 1782]

(Used in Ayurveda and Sidha. Veterinary medicine, dried plant ground with stem bark of *Pongamia pinnata* given orally in impaction.)

in India: adavi saasive, adaviulava, cuvarnaciri, erra vointa, swarnakshira, taivelai

Cleome gynandra L. (*Cleome acuta* Schumach. & Thonn.; *Cleome affinis* (Blume) Spreng.; *Cleome alliacea* Blanco; *Cleome alliodora* Blume, nom. illeg.; *Cleome blumeana* Schult. f.; *Cleome blumeana* D. Raf.; *Isexina aurea* Raf.; *Peritoma aurea* Nutt.; *Peritoma breviflora* Wooton & Standl.; *Peritoma lutea* (Hook.) Raf.)

North America. Annual herb

See *Flora Boreali-Americana* (Hooker) 1(2): 70–71, pl. 25. 1830, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 15. 1834, *A Flora of North America: containing ...* (Torr. & A. Gray) 1(1): 122. 1838, *Sylva Telluriana* 112. 1838, *Oesterreichische Botanische Zeitschrift* 34(4): 113–114. 1884 and *Contributions from the United States National Herbarium* 16(4): 128–129. 1913, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 17b: 215. 1936

(Plant used for ant and insect bites. Ceremonial.)

in English: golden cleome, yellow bee plant, yellow cleome, yellow spiderflower

Cleome lutea Hook. var. **lutea** (*Cleome lutea* var. *jonesii* J.F. Macbr.)

North America. Annual herb

See *Flora Boreali-Americana* 1(2): 70–71, pl. 25. 1830 and *Contributions from the Gray Herbarium of Harvard*

University 65: 39–40. 1922, *Proceedings of the Biological Society of Washington* 48(9): 39. 1935, *Novon* 17(4): 448. 2007

(Plant used for ant and insect bites. Ceremonial.)

in English: yellow bee plant, yellow spiderflower

Cleome monophylla L. (*Cleome cordata* Burch.; *Cleome cordata* Ehrenb. ex Schweinf., nom. illeg.; *Cleome monochroma* J.F. Macbr.; *Cleome monophylla* Law; *Cleome subcordata* Steud. ex Oliv.)

India and Africa. Annual herb, unpleasant smell, branched, erect or spreading, weedy, woody, short sticky hairs, long hairs without glands, leaves clasping the stem, mauve-pink flowers on terminal stalks, narrow spindle-shaped capsule, small flat seeds, acrid taste, tender leaves and shoot used as vegetable, leaves eaten by cows and goats, common in moist *Hyparrhenia* grasslands

See *Species Plantarum* 1: 672. 1753 [1 May 1753], *Beitrag zur Flora Aethiopiens ...* 68. 1867, *Transactions of the Linnean Society of London* 29: 28. 1872 and *Publications of the Field Museum of Natural History, Botanical Series* 4: 169. 1929, *Entomologia Experimentalis et Applicata* 76(3): 217–222. 1995

(Used in Sidha. Whole plant used externally to treat swellings; roots chewed to treat cough. Leaves and seeds applied to ulcers, sores, boils and wounds; seeds anthelmintic, rube-facient and vesicant. Acrid leaves slightly toxic; crushed leaves rubbed on the head against headache; ground leaf used for removing irritating particles from the eye; dried ground leaves put on sores. Essential oil arthropod repellent. Veterinary medicine, whole plant given orally to cure foot and mouth diseases of cattle.)

in English: bastard mustard, single-leaved cleome, spider flower, spiderplant, spindlepod

in Nigeria: waken barewa

in Somalia: aiyo

in Southern Africa: enkelblaarcleome, rusperbossie; matle-pelo (Sotho); musa pelo, munyenya (South Sotho); mushangishangi (Shona)

in S. Rhodesia: muShangishangi

in Tanzania: mwezimwa, nyakamage

in India: gaddi vointa, hurhuria, koli kaalina gida, kop-pumulli chedi, menasina kase, tsjeru-vela, ucivelai, yellukku sakkalathi

Cleome paradoxa R. Br. ex DC. (*Cleome paradoxa* R. Br.; *Dianthera grandiflora* auct.)

Tropical Africa. Shrubby, flowers in terminal racemes

See *A Voyage to Abyssinia, and travels into the ...* 65. 1814, *Prodr.* (DC.) 1: 241. 1824 and *Functional Plant Biology* 34(4): 247–267. 2007, *Pharmacognosy Research* 1(4): 175–178. 2009

(Antidiabetic, antihyperglycemic, lactogenic.)

Cleome parvipetala R.A. Graham

East Africa, Kenya.

See *Kew Bulletin* 13: 177. 1958

(Used for ulcers, leprosy.)

in Kenya: Ionomokerio

Cleome rutidosperma DC. (*Cleome ciliata* Schumach. & Thonn.; *Cleome guineensis* Hook.f.; *Cleome icosandra* L.; *Cleome rytidosperma* DC. ex Schult. f.; *Cleome thyrsoflora* De Wild. & Durieu)

Tropical Africa. Ascending herb, pubescent or glandular, spreading, straggling, prostrate, branched from the base, pink-purple flowers, leaves eaten as a cooked vegetable or added to soup, a troublesome weed, close to *Cleome schimperi*, often confused with *Cleome iberidella*

See *Species Plantarum* 2: 672. 1753, *Prodr.* 1: 241. 1824, *Beskrivelse af Guineiske planter* 294. 1827, *Systema Vegetabilium* 7(1): 41. 1829, *Niger Flora* 218. 1849, *Bulletin de la Société Botanique de Belgique* 38(2): 14. 1899 and *Brittonia* 12(4): 281, 283, 290. 1960, *Taxon* 29: 352–353, 358–360. 1980, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 566–584. 2001, *Acta Pol. Pharm.* 67(3): 315–328. 2010

(Root infusion for chest pain, scurvy, constipation. Leaves antiparasitic, a decoction to treat diarrhea; leaf juice and oil from the seeds to cure skin diseases and rheumatism; leaf juice dropped into ear for earache; leaf extract for irritated skin and to treat convulsions; leaf paste mixed with salt is applied on forehead for headache.)

in English: fringed spiderflower, spiderplant

in China: zhou zi bai hua cai

in Congo: kalabo, mvua-vuanga, talabo

in Tanzania: mgagani

Cleome scaposa DC.

India.

See *Prodr.* (DC.) 1: 239. 1824

(Plant decoction given in fever.)

in India: torthan

Cleome serrulata Pursh (*Atalanta serrulata* Nutt.; *Atalanta serrulata* (Pursh) Nutt. ex Raf.; *Atalanta serrulata* (Pursh) Raf.; *Cleome integrifolia* (Nutt.) Torr. & A. (Bark chewed as a substitute for areca nuts, the endosperm of *Areca catechu* L. Crushed leaves rubbed to get rid of lice, used also to treat skin irritation. Leaves juice drunk for diarrhea. Veterinary medicine, burn the plant; crushed leaves rubbed to get rid of ticks infesting dogs.)

in English: hairy glory bower

in Borneo: empahit

in China: juan mao da qing

Malayan names: bubut, chapah, chapaneng, chempening, kasap, labu labu, pakai panggil, panggil, panggil panggil, pechah periok babi, pepanggil, sepanggil, tapak kerbau

in Thailand: chumwan, nangyaem-paa, phuangphi-daeng

Clerodendrum viscosum Vent. (*Clerodendrum infortunatum* L.; *Clerodendrum infortunatum* Dennst.; *Clerodendrum infortunatum* Gaertn.)

India. Shrub, villous, ovate villous leaves, white to pink flowers in terminal panicles, black drupes

See *Species Plantarum* 2: 637. 1753, *De Fructibus et Seminibus Plantarum...* 1: 271. 1788, *Jardin de la Malmaison* t. 25. 1803, *Schlüssel Hortus indicus malabari-cus*, ... 27. 1818, *FBI* 4: 594. 1885 and *Glimpses Cytogenet. India* 3: 188–198. 1992

(Used in Ayurveda. Stem used as toothbrush to relieve toothache. Shoots juice with roots of *Ziziphus mauritiana* and leaves of *Euphorbia nerifolia* given in typhoid fever; shoots and leaves extract given in purulent discharge from vagina. Fruit of *Cassia hirsuta* together with stembarks of *Ardisia solanacea* and *Clerodendrum viscosum* are powdered and the powder given as antidote against snakebite, powder is also applied to the affected bitten part. Root paste in mother's

milk given to children as an anthelmintic; roots juice given in venereal diseases; roots infusion with roots of *Girardinia palmata* and *Solanum melongena* as a bath in debility and fatigue; root decoction drunk for malaria and fevers. Leaves and roots applied for tumours and skin diseases; a decoction given in cholera. Leaves and flowers in scorpion sting and sprouts in snakebite. Leaves tonic, abortifacient and anti-periodic, in a preparation to induce abortion; fresh juice of the leaves vermifuge, bitter tonic, febrifuge, in malaria; leaf paste applied in skin diseases; leaves of *Clerodendrum viscosum* and *Justicia adhatoda* crushed and the juice taken for dysentery. For mad-dog bite, young leaves ground with the root of *Catunaregam spinosa*. Tender leaf pasted with the bark of *Shorea robusta* and the leaf of *Azadirachta indica* and applied on sores. Magico-religious beliefs, flowers used in worshipping village god and in the marriage ceremony. Veterinary medicine, ground tuber fed for maggot wounds; leaves boiled and the water used for bath in itch.)

in India: aesaga, bandarigatcho, bandira kari, barhicuda, basavanapaada, basavanapaadu, bhandira, bhandirah, bhant, bhanua, bhat, bhatar, bhates, bhete, bik-bik, bockada, bogada cinna, bokkuda, bokkudu, buhasin, busi, chirmabusi, dhantu, dhapat tita, dhopat tita, dieng jaremsynrang, dudhika, ghato, ghentu, gurrapu gatte akku, gurrapu kattiyaku, gurrapukattiyaku, guruja, ibbane, isaga, isiga, itayan, ittaevu, ittaimara, ittayhoovu, kaari, karu, kharbari, khumtam, konda-thakali, kuthap-manbi, madras mallige, mandookabrahmi, manjayay, parale, paraley, parele, parugilai, peragu, perivelom, perugilai, perukilai, peruku, perungilai, phlarik-araung, phragik, phuihnam, phuihnamchhia, ping mara, samarka, samarkana, sammokhi, sarasvathiyaku, saraswati-yaku, sthouneyaka, thunora, titabhamt, vattakanni, vattaparuvallam, vek-gach, vondari goch

in Nepal: bagan, bhaint

Clerodendrum volubile P. Beauv. (*Clerodendrum multiflorum* G. Don; *Clerodendrum volubile* var. *grossiserratum* Moldenke; *Siphonanthus volubilis* (P. Beauv.) Hiern; *Siphonanthus volubilis* Hiern; *Torreya paniculata* Spreng.)

Tropical Africa. Small trees, crenate leaves, flowers in axillary cymes, white corolla, fruits lobed

See *Species Plantarum* 1: 109. 1753, *Flore d'Oware* 1: 52, t. 32. 1806, *Edinb. Phil. Journ.* xi. (1824) 850. 1824 and *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853—61* 1: 842. 1900, *Bol. Soc. Brot.*, II, 39: 135. 1965

(Plant astringent, alterative; a decoction to treat diarrhea, gonorrhoea, syphilis, hysteria, nervous breakdown and mental disorders. Roots and leaves decoction, as a bath to relieve body pains; for headache, leaves paste applied on forehead.)

in India: thakari

Clerodendrum wallichii Merr. (*Clerodendrum nutans* Wall.; *Clerodendrum nutans* Wall. ex Jack; *Clerodendrum nutans* Wall. ex D. Don, nom. illeg.)

India, Nepal.

See *Malayan Miscellanies* 1(1): 17. 1820, *Prodromus Florae Nepalensis* 103. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 1793. 1829 and *Journal of the Arnold Arboretum* 33(3): 220. 1952

(A paste of roots of *Claoxylon khasianum* together with *Ardisia paniculata*, *Clerodendrum wallichii*, *Mussaenda macrophylla* and *Trevesia palmata* applied for the treatment of abdominal troubles and tumour. This plant considered a symbol of peace.)

in China: chui mo li

in India: kuthap maan

Clethra L. Clethraceae (Cyrillaceae)

Klethra, the classical Greek name for alder, *Alnus glutinosa*, Theophrastus (*HP.* 1.4.3, 3.3.1), referring to the leaves, see *Species Plantarum* 1: 396. 1753, *The Civil and Natural History of Jamaica* in Three Parts 214, t. 21, f. 1. 1756, *Systema Naturae*, Editio Decima 1009, 1010, 1367. 1759, *Familles des Plantes* 2: 165–166. 1763, *Florae Peruvianaes, et Chilensis Prodromus* 59, t. 10. 1794, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 589. 1839, *Linnaea* 24(1): 3, 12. 1851, *Bulletin de la Société Impériale des Naturalistes de Moscou* 32(1): 263. 1859 and *Bot. Jahrb. Syst.* 87(1): 100. 1967.

Clethra acuminata Michx.

North America. Perennial tree or shrub

See *Flora Boreali-Americana* 1: 260. 1803 and *J. Jap. Bot.* 55: 65–72. 1980

(Emetic, febrifuge, for gastrointestinal disorders.)

in English: mountain sweet pepper bush, mountain white-alder, sweet pepper-bush

Clibadium F. Allam. ex L. Asteraceae

See *Mantissa Plantarum* 2: 161, 294. 1771 and *Fieldiana, Bot.* 24(12): 181–361, 503–570. 1976, *Economic Botany* 49(3): 328–330. 1995, *Fl. Venez. Guayana* 3: 177–393. 1997, *Brittonia* 55(3): 245–301. 2003.

Clibadium erosum (Sw.) DC. (*Clibadium erosum* DC.; *Trixis erosa* Sw.)

South America.

(Essential oil phototoxic. Leaves antibiotic. Bark decoction to wash cuts and sores. Plant boiled together with *Lippia alba* and *Wedelia trilobata* and the liquid taken as a cure for head and chest colds. Fish poison.)

in English: cure-for-all, white kunami, white kunani

in Guyana: cunambi, konali, kunami

Clibadium sylvestre (Aubl.) Baill. (*Baillieria barbasco* Kunth; *Baillieria sylvestris* Aubl.; *Clibadium appressipilum* S.F. Blake; *Clibadium badieri* (DC.) Griseb.; *Clibadium barbasco* (Kunth) DC.; *Clibadium caudatum* S.F. Blake; *Clibadium havanense* DC.; *Clibadium latifolium* Rusby;

Clibadium schomburgkii Sch. Bip. ex M.R. Schomb., nom. nud.; *Clibadium strigillosum* S.F. Blake; *Clibadium vargasii* DC.; *Trixis aspera* (Aubl.) Sw. var. *sylvestris* (Aubl.) Pers.)

Brazil.

See *Histoire des plantes de la Guiane Française* 2: 804, 807, t. 317. 1775 [Jun 1775], *Nova Genera et Species Plantarum seu Prodrum* 115. 1788, *Synopsis Plantarum* 2: 491. 1807, *Nova Genera et Species Plantarum* (folio ed.) 4: 226–227. 1820[1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 506–507. 1836, *Reisen in Britisch-Guiana* 940. 1848[1849], *Flora of the British West Indian Islands* 368. 1864[1861], *Histoire des Plantes* 8: 307. 1886 and *Contributions from the Gray Herbarium of Harvard University* 52: 4–5. 1917, *Descriptions of Three Hundred New Species of South American Plants* 150. 1920, *Contributions from the United States National Herbarium* 22(8): 600–601. 1924, *Pharmacological Research Communications* 1(1): 7–14. 1969, *Fl. Venez. Guayana*. 3: 177–393. 1997, *Brittonia* 55(3): 245–301. 2003

(Convulsant. Used to stop hemorrhages and prevent infections, also used as a contraceptive or for abortions. Leaves and fruit fish poison.)

in Brazil: canabed

in Panama: kuinkuimas

Common names: barbasco, cunani

Clidemia D. Don Melastomataceae

Named in honor of Cleidemus, a botanist of ancient Greece, or for Clidemus, a Greek who wrote the history of Attica; see *Clitodemi fragmenta* in Karl Mueller and Theodor Mueller, *Fragmenta Historicorum Graecorum*. Parisiis 1841–1848 [Clitodemus was an ancient writer] and *Memoirs of the Wernerian Natural History Society* 4: 284, 306–307. 1823 and *Brittonia* 3(2): 97–140. 1939, *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 249–521. 1941, *Fieldiana, Bot.* 24(7/4): 407–525. 1963, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1339–1419. 2001, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 394–574. 2007.

Clidemia hirta (L.) D. Don (*Clidemia elegans* (Aubl.) D. Don; *Clidemia hirta* var. *chrysantha* Cogn.; *Clidemia hirta* var. *elegans* (Aubl.) Griseb.; *Melastoma hirta* L.; *Melastoma hirtum* L.; *Staphidium elegans* (Aubl.) Naudin)

South America. Herb

See *Species Plantarum* 1: 390. 1753, *Histoire des plantes de la Guiane Française* 1: 427, t. 167. 1775, *Memoirs of the Wernerian Natural History Society* 4: 309. 1823, *Annales des Sciences Naturelles; Botanique*, sér. 3 17(5): 307–308. 1851, *Flora of the British West Indian Islands* 247. 1860

(Fresh leaves crushed applied on bleeding wounds to stop bleeding.)

in English: bush currants, camasey, Koster's curse, soap-bush
in Madagascar: trotrobato, tsitotroko

in Mexico: lila

in Peru: mullava, pajar mullaca, yana mullaca, mullaca, tesiguiño-ey

Clinacanthus Nees Acanthaceae

From the Greek *kline* 'a bed' and *akantha* 'a thorn', see *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 511. 1847, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1854: 155. 1854.

Clinacanthus nutans Lindau (*Beloperone fulgida* (Blume) Hassk.; *Clinacanthus burmanni* Nees, nom. illeg.; *Clinacanthus nutans* (Burm.) Lindau; *Justicia nutans* N.L. Burman)

SE Asia, Malacca, Java, Borneo. Shrub finely pubescent, scandent, erect, drooping, clambering, leaves acute acuminate, inflorescence in dense cyme terminal, calyx green glandular, corolla tube purple-red with a green base, fruit a capsule basally contracted, whole plant edible, in deciduous forest

See *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 511. 1847, *Bot. Jahrb. Syst.* xviii. (1894) 63. 1894

(Leaves antipyretic, antiinflammatory. Tender parts of the plant for the treatment of burn, *Herpes zoster* and insect bite, snake venom, snakebite, antipyretic, efficiency of regulating menstrual function, subsidence of a swelling, detumescence, removing blood stasis, relieving pain, setting a broken bone (set a fracture), therapeutic effect (treat), injuries from falls, fractures, contusion and strains, anemia, jaundice, rheumatism.)

in China: e zhui hua

in Thailand: phak lin khiat, phak man kai, phayaa plong kham, phayaa-plong-thong, phayaa yo, pho so chaang

Clinopodium L. Lamiaceae (Labiatae)

Latin *clinopodion* and Greek *klinopodion* for a plant, wild basil (Plinius), Greek *kline* 'a bed' and *podion* 'a little foot', referring to the flowers and stems; see Carl Linnaeus, *Species Plantarum*. 587. 1753, *Genera Plantarum*. Ed. 5. 256. 1754 and *Willdenowia* 38: 363–410. 2008.

Clinopodium barosmum (W.W. Sm.) Bräuchler & Heubl (*Calamintha barosma* W. Smith; *Micromeria barosma* (W.W. Sm.) Handel-Mazzetti; *Satureja barosma* (W.W. Sm.) Kudô)

China.

See *Species Plantarum* 2: 567–568. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Edward's*

(Astringent, antibacterial, cardiotoxic, cytotoxic, antitumour, carminative, antioxidant, diaphoretic and expectorant.)

in English: basil, basilweed, cushion calamint, dog mint, wild basil

Clinopodium wardii (C. Marquand & Airy Shaw) Bräuchler (*Micromeria wardii* Marquand & Airy Shaw)

Tibet.

See *Journal of the Linnean Society, Botany* 48(321): 216–217. 1929, *Taxon* 55: 980. 2006

(Cardiotonic, digestive, carminative.)

in English: Ward micromeria

in China: xi zang jiang wei cao

Clintonia Raf. Liliaceae (Convallariaceae)

For the American politician De Witt Clinton (pseud. Atticus or Hibernicus), 1769–1828, naturalist, 1788 became a lawyer, 1802 appointed Mayor of New York City, planned the Erie Canal scheme (the so-called *Clinton's ditch*), wrote *A Memoir of the Antiquities of the Western Parts of the State of New York*. Albany 1818. See *Amer. Monthly Mag. & Crit. Rev.* 2(4): 266. 1818, David Hosack, *Memoir of De Witt Clinton*. 1829, William W. Campbell, *The Life and Writings of De Witt Clinton*. Clintonia andrewsiana Torrey

North America. Perennial herb

See *Pacif. Railr. Rep.* 4(5): 150–151. 1857

(Poisonous. An eye and heart medicine.)

in English: Andrew's clintonia, red clintonia, western blue-beadlily, wood lily

Clintonia borealis (Aiton) Raf. (*Clintonia borealis* Raf.; *Convallaria borealis* (Aiton) Poir.; *Dracaena borealis* Aiton; *Smilacina borealis* (Aiton) Ker Gawl.)

North America. Perennial herb, strap-like leaves, yellow to greenish yellow flowers in a terminal cluster, bright light blue berry

See *Hortus Kewensis*; or, a catalogue ... 1: 454, pl. 6. 1789, *Botanical Magazine* pl. 1155, 1403. 1811, *Encyclopédie Méthodique, Botanique Suppl.* 5: 737. 1817, *Amer. Monthly Mag. & Crit. Rev.* 2: 266. 1818, *Atlantic Journal* 1(3): 120. 1832 and *Phytother. Res.* 16(1): 63–65. 2002

(Poisonous, causes only low toxicity if eaten. Whole plant an eye and heart medicine, antidote, antioxidant, antidiabetic, also applied to draw poison from bite made by dog which has eaten the plant. Poultice or decoction of leaves applied to open wounds, ulcers, burns, sores. Poultice of roots antidote,

infusion of root used to aid parturition, applied to draw poison from bite made by dog which has eaten the plant. Insecticide.)

in English: blue bead-lily, bluebead, corn-lily, yellow bluebeadlily, yellow clintonia

Clintonia udensis Trautv. & C.A. Mey. (*Clintonia alpina* Kunth ex Baker; *Clintonia alpina* Kunth ex Baker var. *udensis* (Trautv. & C.A. Mey.) J.F. Macbr., nom. illeg.; *Clintonia udensis* subsp. *alpina* (Kunth ex Baker) Kitam.; *Clintonia udensis* var. *alpina* (Kunth ex Baker) H. Hara)

China.

See *Enum. Pl.* 5: 159. 1850, *Florula Ochotensis Phaenogama* 92, pl. 30. 1856, *Journal of the Linnean Society, Botany* 14(80): 585. 1875 and *Contributions from the Gray Herbarium of Harvard University* 56: 18. 1918, *Journal of Japanese Botany* 38(3): 71. 1963, *Acta Phytotaxonomica et Geobotanica* 22: 68. 1966, *Rep. Clivia Lindley Amaryllidaceae (Alliaceae, Liliaceae)

The genus was named after Lady Charlotte Florentina Clive, Duchess of Northumberland, d. 1866, granddaughter of Lord Robert Clive, 1725–1774, the founder of the British Empire in India, the first Governor of Bengal in the service of East India Company; see James Mill and Horace Hayman Wilson, *The History of British India*. 1840–1848 and Allen Edwardes, *The Rape of India. A Biography of Robert Clive and a Sexual History of the Conquest of Hindustan*. NY 1966, *Journal of Ethnopharmacology* 82(2–3): 147–154. 2002, *Chem. Rev.* 108(6): 1982–2014. 2008, *Phytochemistry Reviews* 8(2): 311–502. 2009.

Clivia caulescens R.A. Dyer

South Africa. Evergreen bulbous plant, orange cream pen-dulous flowers

See *Fl. Pl. South Africa* 23: t. 891. 1943

(Analgesic.)

Clivia gardenii Hook. (*Clivia gardenii* var. *citrina* Swanevelder, A.E. van Wyk & Truter) (after Major Robert Garden, a soldier between 1848–1853 in KwaZulu Natal.)

South Africa. Perennial, slender tubular orange greenish pendulous flowers, pearly seed

See *Bot. Mag.* 81: t. 4895. 1855 and *Bothalia* 35(1): 68. 2005 [May 2005]

(Toxic dangerous rhizomes used for the treatment of child-birth complications and snakebite.)

in English: Major Garden's clivia

in South Africa: boslelie, umayime

Clivia miniata (Lindley) J.F.W. Bosse (*Clivia miniata* (Lindl.) Regel; *Clivia miniata* var. *citrina* W. Watson; *Clivia miniata* var. *flava* E. Phillips; *Clivia sulphurea* Laing; *Himantophyllum atrosanguineum* F.N. Williams; *Himantophyllum miniatum* (Lindl.) Groenl.; *Imantophyllum atrosanguineum* F.N. Williams; *Imantophyllum minia-tum* Hook.; *Imantophyllum miniatum* (Lindl.) Hook.; *Imatophyllum atrosanguineum* F.N. Williams; *Imatophyllum miniatum* (Lindl.) Groenl.; *Vallota miniata* Lindl.)

S. Africa. Herb, evergreen, bulbous, leaves strap-shaped, orange flowers, inflorescence an umbel, membranous spathes, fleshy bright red fruit

See *Genera plantarum* 1: 276. 1830, *Bot. Mag.* 80: t. 4783. 1854, *Gard. Chron.* 1854: 119, 149. 1854, *Wiener Ill. Gart.-Zeitung* 2: 275. 1858, *Rev. Hort.* 1859: 125. 1859, *Vollst. Handb. Bl.-Gärtn.*, ed. 3, 1: 768. 1859, *Gartenflora* 13: t. 434. 1864, *Garden* (London 1871–1927) 56: 338. 1899 and *Fl. Pl. S. Africa* 11: t. 411. 1931, *Journal of Cytology and Genetics* 7–8: 24–35. 1973, *Acta Horticulturae Sinicae* 13: 61–63. 1986, *Botaničeskij Žurnal (Moscow & Leningrad)* 73: 1207–1208. 1988, *Bothalia* 36(1): 78 (77–80; figs. 13–14). 2006 [May 2006]

(All parts are poisonous. The plant contains small amounts of the alkaloid lycorine, the greatest concentration of the alkaloid is in the bulb. Large quantities must be ingested to cause symptoms of toxicity. Children and family pets can be poisoned. Rhizomes are reportedly extremely toxic, leaves and rhizomes help childbirth, and also for snakebites and fever complaints, pain relief, muscle and uterine stimulation, impotency and barrenness; leaves infusion used to induce labor and speed contractions, ingesting too much can overstimulate uterine contractions and cause complications.)

in English: bush lily, clivia, fire lily, flame lily, kaffir lily, orange lily, scarlet kaffir lily, St. John's lily

in South Africa: boslelie, uMayime (Zulu)

Clivia nobilis Lindl. (*Clivia nobilis* L.; *Haemanthus cernuiflorus* J. Bell ex Drapiez; *Himantophyllum aitonii* (Hook.) Duch.; *Imatophyllum aitonii* Hook.; *Imatophyllum maximum* Guillon)

S. Africa. Herb, bulbous, evergreen, pendulous flowers orange-green to red, clusters of bright red berries

See *Bot. Reg.* 14: t. 1182. 1828, *Botanical Magazine* 55: t. 2856. 1828, *Journal de la Société Impériale et Centrale d'Horticulture* 5: 626. 1859, *Rev. Hort.* 1881: 140. 1881 and *Journal of Natural Products* 51(3): 549–554. 1988

(Magic, ritual.)

in English: bush lily

Clivia robusta B.G. Murray et al. (*Clivia robusta* var. *citrina* Swanev., *Forb.-Hard.*, Truter & A.E. van Wyk)

South Africa. Herb, bulbous, erect, evergreen, threatened, pendulous flowers dark orange-yellow, confused with *Clivia gardenii*

See *Bot. J. Linn. Soc.* 146: 369–374. 2004, *Bothalia* 36: 66–68. 2006

(Magic, ritual.)

in English: bush lily

Clusia L. Clusiaceae (Guttiferae)

In honor of the celebrated French (b. Arras) botanist Carolus Clusius (Charles de l'Écluse or Lescluse), 1526–1609 (d. Leiden or Leyden, Netherlands), traveller, plant collector, trained as a lawyer University of Louvain, studied at Montpellier, 1593–1609 professor of botany University of Leyden; see *Species Plantarum* 1: 509–510. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 5: 203. 1821[1822], *An Introduction to the Natural System of Botany* 74. 1836, Ernst H.F. Meyer, *Geschichte der Botanik*. IV: 350–358. Königsberg 1854–1857, *Annales des Sciences Naturelles; Botanique*, série 4 13: 315. 1860, *Genera Plantarum* 1: 170. 1862, *Epharmosis sive materiae ad instruendam anatomiam systematis naturalis* 3: 16, 80–81. 1892 and *Bahama*

Fl. 281. 1920, Wilfrid Blunt and W.T. Stearn, *The Art of Botanical Illustration*. 63–64. London 1950, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 357. 1965, P. Jovet & J.C. Mallet, in *D.S.B.* 8: 120–121. 1981, *Selbyana* 9(1): 112–120. 1986, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 149–150. Regione Siciliana, Palermo 1988, *Sida* 16(3): 517. 1995, *Sida* 17(4): 766. 1997.

Clusia amazonica Planch. & Triana (*Clusia martiana* Engl.; *Clusia oedematopoidea* Maguire; *Clusia uleana* Engl.)

Brazil. Scandent shrub, strangler, black-purple fruits

See *Annales des Sciences Naturelles; Botanique*, série 4 13: 358. 1860, *Flora Brasiliensis* 12(1): 412. 1888 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 58(4/Beibl.): 1. 1923, *Phytologia* 39(2): 73–74. 1978, *Botanical Museum Leaflets*—Harvard University 29(1): 49–50. 1983

(Fruit infusion drunk as a diuretic.)

in Colombia: ka-hee-wá-ka, pap-ká, ree-ka-ne-to-ma

Clusia chiribiquetensis Maguire (named for Cerro Chiribiquete)

Colombia. Shrub, sticky latex, white flowers, red purple sepals

See *Botanical Museum Leaflets* 15: 56, t. 18. 1951

(Fleshy resinous leaves applied as antifungal.)

in Colombia: ta-té-pe-ka-me

Clusia columnaris Engl. (*Clusia columnaris* var. *magdalenensis* Cuatrec.; *Clusia columnaris* var. *vaupesana* Cuatrec.; *Clusia williamsii* Steyerf.)

Brazil. Small tree, white latex, white fragrant flowers

See *Flora Brasiliensis* 12(1): 432. 1888 and *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 8: 41. 1950, *Fieldiana, Botany* 28: 392. 1952

(Latex to relieve toothache.)

in Colombia: be bam, dee-ká-da, nee-ká-da, ree-ka-re-to-mee-see-ma-va

Clusia flavida (Benth.) Pipoly (*Havetia flavida* Benth.; *Havetia flexilis* (Spruce ex Planch. & Triana) Vesque; *Havetiopsis flavida* (Benth.) Planch. & Triana; *Havetiopsis flexilis* Spruce ex Planch. & Triana; *Havetiopsis flexilis* Planch. & Triana) (*Havetiopsis* Planchon & Triana, resembling *Havetia*, for Armand (Amand) Étienne Maurice Havet, 1795–1820, author of *De l'hygiène des voyageurs, qui se disposent à parcourir les régions équatoriales*. Thèse, etc. Paris 1819 and *Le Dictionnaire des Ménages*. Second édition. Paris 1822; see *Annales des Sciences Naturelles; Botanique*, série 4 14: 246. 1860, *Annales des Sciences Naturelles; Botanique*, série 4 13: 315. 1860.)

Venezuela. Shrub, reddish flowers

See *London Journal of Botany* 2: 369. 1843, *Annales des Sciences Naturelles; Botanique*, série 4 14: 247. 1860, Vesque, Julien (Joseph) (1848–1895), *Epharmosis: sive, Materiae ad instruendam anatomiam systematis naturalis* 3: 73, t. 72. Vincennes: Celapierre, [1889]–1892, *Monogr. Phan.* 8: 155. 1893 and *Flora of the Venezuelan Guayana* 4: 272. 1998, *Arnaldoa* 9(2): 43–110. 2002 [2003]

(Crushed leaves poulticed on the feet for cracked skin.)

Clusia fockeana Miq. (*Androstylium fockeanum* (Miq.) Miq.; *Clusia stahelii* Maguire)

Guyana. Shrub or small tree, solitary or clumped, often epiphytic and stilt-rooted, stems with latex, nodding terminal inflorescence, petals whitish with a broad purple claw

See *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 10: 82. 1843, *Stirpes Surinamensis Selectae* 7: 93. 1851 and *Bulletin of the Torrey Botanical Club* 75: 424. 1948

(Latex applied for snakebites and ulcers.)

in Guyana: tetiruma

Clusia gaudichaudii Choisy ex Planch. & Triana (*Clusia gaudichaudii* Cambess.)

Colombia. Strangler epiphyte, dark red flowers

See *Flora Brasiliae Meridionalis* (quarto ed.) (A. St.-Hil.). 1: 317–318. 1828, *Annales des Sciences Naturelles, Botanique* sér. 4, 13: 359. 1860

(Juice of the crushed leaves applied to the gums to relieve toothache.)

in Brazil: apuí

Clusia grandiflora Splitg.

Guyana. Shrub or small tree, often epiphytic, sepals white with pink margins, white petals pink or reddish towards the base, nodding terminal inflorescence, seeds in orange arils

See *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 9: 101–103. 1842

(Aerial root cut into pieces and soaked in water or wine, infusion drunk for back pains.)

in Guyana: kupa-rope

Clusia hammeliana Pipoly (*Clusia peruviana* Szyszyl.; *Quapoya acuminata* (Spreng.) Walp.; *Quapoya acuminata* (Planch. & Triana) Kuntze; *Quapoya bracteolata* Sandwith; *Quapoya peruviana* (Poepp.) Kuntze; *Quapoya peruviana* var. *guayanensis* Maguire; *Renggeria montana* Klotzsch; *Rengifia acuminata* Planch. & Triana; *Rengifia peruviana* Poepp.)

Venezuela.

See *Systema Vegetabilium*, editio decima sexta 2: 599. 1825, *Nova Genera ac Species Plantarum* 3: 12, t. 210. 1842, *Repertorium Botanices Systematicae*. 1: 393. 1842, *Annales*

des Sciences Naturelles, Botanique 14: 243. 1860, *Revisio Generum Plantarum* 61. 1891, *Diss. Cl. Mat.-Phys. Acad. Litt. Cracov* 29: 225. 1894 and *Bulletin of Miscellaneous Information Kew* 1931: 177. 1931, *Memoirs of the New York Botanical Garden* 10(4): 30. 1961, *Flora of the Venezuelan Guayana* 4: 273. 1998

(Crushed roots as a fish poison.)

Clusia huberi Pipoly (*Clusia duidae* Gleason; *Oedematopus duidae* Gleason) (*Oedematopus* Planchon & Triana, from the Greek *oideo*, *oidao* ‘swell, become swollen’, *oidema*, *oide-matos* ‘swelling, tumour’ and *pous* ‘foot’.)

Venezuela. Shrub, stout, white latex

See *Bulletin of the Torrey Botanical Club* 58: 402, 406. 1931, *Flora of the Venezuelan Guayana* (gen. eds. J.A. Steyermark et al.), 4: 274. 1998

(Dried leaves and bark as a strong vermifuge.)

Clusia insignis Mart. (*Clusia insignis* var. *hoffmannseggiana* Engl.; *Clusia insignis* var. *hoffmanseggiana* Engl.)

Brazil. Tree, columnar, very hard wood, thick leaves, purple-red flowers smelling like rancid butter

See *Nova Genera et Species Plantarum ...* (Martius) 3: 164, t. 288. 1829–1832

(Plant resin for treating toothache.)

Clusia lopezii Maguire (*Clusia lopezii* Maguire ex R.E. Schult.)

Colombia.

See *Botanical Museum Leaflets* 15: 61. 1951

(Resin applied to deep dental caries to relieve toothache.)

Clusia microstemon Planch. & Triana

Brazil. Epiphyte, white flowers, white latex

See *Ann. Sci. Nat., Bot.* sér. 4, 13: 331. 1860

(Latex applied to deep dental caries to relieve toothache. Crushed leaves applied on muscular sprains.)

Clusia obovata (Spruce ex Triana & Planch.) Pipoly (*Oedematopus obovatus* Spruce ex Triana & Planch.; *Oedematopus obovatus* Spruce ex Planch. & Triana; *Oedematopus quadratus* Maguire)

Venezuela.

See *Annales des Sciences Naturelles, Botanique* 14: 250. 1860 and *Bulletin of the Torrey Botanical Club* 75: 432. 1948, *Flora of the Venezuelan Guayana* 4: 275. 1998

(Dried leaves and bark as a strong vermifuge.)

Clusia octandra (Poepp.) Pipoly (*Havetia octandra* Poepp.; *Oedematopus octandrus* (Poepp.) Planch. & Triana)

Venezuela.

See *Nova Genera ac Species Plantarum* 3: 11. 1845, *Annales des Sciences Naturelles, Botanique* 14: 250. 1860 and *Flora of the Venezuelan Guayana* 4: 276. 1998, *Arnaldoa* 9(2): 43–110. 2002 [2003]

(Flowers as a contraceptive.)

Clusia opaca Maguire (*Clusia opaca* Maguire ex R.E. Schult.; *Clusia reducta* Steyerem.)

Brazil. Shrub, latex colourless, red fruits

See *Bot. Mus. Leaflet*. 15: 62. 1951, *Fieldiana, Botany* 28: 391. 1952

(Resinous bark, dried and powdered, mixed with oil from the palm *Oenocarpus bataua* var. *bataua*, applied to sprains and aching joints.)

Clusia penduliflora Engl.

Brazil. Vine, red fruits

See *Flora Brasiliensis* (Martius) 12(1): 412, t. 84, f. 2. 1888 and *Arnaldoa* 9(2): 43–110. 2002 [2003]

(Antifungal, antiseptic, crushed leaves made into a paste and applied on open cracks and sores of the feet.)

Clusia quadrangula Bartlett (*Clusia cooperi* Standl.)

Guatemala, Panama. Tree

See *Proceedings of the American Academy of Arts and Sciences* 43(2): 55. 1907, *Publications of the Field Columbian Museum, Botanical Series* 4(8): 234–235. 1929

(Milky sap applied to boils, pimples.)

Clusia radicans Pav. ex Planch. & Triana

Peru.

See *Annales des Sciences Naturelles; Botanique, série 4* 13: 374. 1860

(Resin applied to bone fracture.)

Vernacular name: pullapullquelpuan

Clusia renggerioides Planch. & Triana

Brazil. Strangler, red purple petals

See *Annales des Sciences Naturelles; Botanique, série 4*, 13: 350. 1860

(Flowers infusion drunk as astringent, antidiarrhetic.)

Clusia rosea Jacq. (*Clusia rosea* L., nom. illeg., non *Clusia rosea* Jacq.; *Clusia rosea* Cambess.)

Latin America. Tree or shrub, strangler, evergreen, dioecious, aerial roots from the trunk and branches, thick fleshy obovate opposite decussate leaves, grooved petiole base, yellowish latex exuding from cut surfaces, rose-pink flowers, globose fruits, red arillate seeds, the fruit splits when ripe, sometimes growing as strangler epiphytes

See *Species Plantarum* 1: 509–510. 1753, *Enumeratio Systematica Plantarum* 34. 1760, *Species Plantarum*, Editio Secunda 2: 1495. 1763, *Fl. Bras. Merid.* (A. St.-Hil.). 1: 316. 1825–1833 and *Journal of Arnold Arboretum* 57: 74–90. 1976, *Ann. Missouri Bot. Gard.* 67: 986. 1980, *Listados Florísticos de México* 22: 1–55. 2001, *Ceiba* 44(2): 105–268. 2003 [2005], *Proceedings of the California Academy of Sciences*, Series 4, 57(7): 247–355. 2006

(Yellow sap purgative. Fruits poisonous if eaten, purgatives and emetics. Latex used in cataplasm for pain, fractures.)

in English: autograph tree (referring to the use of the leaves as a medium for graffiti), balsam apple, balsam fig, copey, cupey, fat pork tree, pitch apple, Scotch attorney, wild mammee

in Peru: matapalo

in Venezuela: copel, copey

Clusia schomburgkiana (Planch. & Triana) Benth. ex Engl. (*Clusia planchoniana* Engl.; *Clusia schomburgkiana* var. *lakei* Maguire; *Clusia spruceana* Planch. & Triana; *Polythecandra schomburgkiana* Planch. & Triana; *Polythecandra spruceana* Planch. & Triana)

Brazil. Shrub, latex colourless, white to red dark flowers

See *Annales des Sciences Naturelles, Botanique* 13: 346. 1860, *Annales des Sciences Naturelles, Botanique* 14: 229. 1860, *Fl. Bras.* (Martius) 12(1): 431–432, pl. 93, fig. 1. 1888

(Resin applied to gums to relieve toothache.)

Clusia schultesii Maguire (*Clusia schultesii* Maguire ex R.E. Schult.)

Colombia.

See *Botanical Museum Leaflets* 15: 65. 1951

(Crushed leaves poulticed on sores of the feet.)

Clusia spathulifolia Engl. (*Clusia spathulaefolia* Engl. ex Martius)

Brazil. Scandent shrub or tree, yellowish latex, coriaceous leaves, fruit in pendant clusters

See *Fl. Bras.* (Martius) 12(1): 412. 1888

(Dried powdered bark vermifuge.)

Clusia Boerh. ex L. Peraceae (Euphorbiaceae)

After the Dutch botanist Outgers Cluyt (Angerius Clutius, Theodorus Augerius Clutius), 1590–1650, apothecary, professor of botany and Curator of the Botanical Garden at Leyden, his works include *Memorie der vreemder blom-bollen, wortelen, kruiden, planten, struycken, zaden ende vruchten: hoe men die sal wel gheconditioneert bewaren ende over seynden*. Amsterdam 1631, *Van de Beyn*, etc. Amsterdam 1627 and *Augerii Clutii M.D. opuscula duo singularia. I. De nuce medica. II. De hemerobio sive ephemero*

insecto, & majali verme. Amsterodami 1634. See Wilhelm Lauremberg [Guilielmus Laurembergius] (1547–1612), *G. Laurembergii Historica descriptio Aetitis seu Lapidis Aquilae, in qua de ejus natura, etymologia, generatione, patria ... disseritur, cui adjunctus est ejusdem Tractatus de Lapide Calsuve, necnon methodus conficiendi herbaria viva*. Rostochii 1627. There are reports that several *Clutia* spp. are highly toxic to livestock.

Clutia abyssinica Jaub. & Spach.

Ethiopia, S. Africa. Shrub or treelet, dioecious, woody-based, erect, sparsely branched, stem green tinged red-brown, leaves dark green above, old leaves turn red, inflorescence an axillary white-yellow fascicle, fruits pale green with yellow-green dots and white-grey pubescence, black shining minutely pitted seeds

See *Species Plantarum* 2: 1042. 1753, Jaubert, Hippolyte Francois, 1798–1874, *Illustrationes Plantarum Orientalium / auctoribus comite Jaubert et Eduardo Spach*. 5: 77, t. 468. Parisiis 1855 and *Journal of Ethnopharmacology* 9: 105–128. 1983, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Journal of Ethnopharmacology* 106: 158–165. 2006, *Scripta Botanica Belgica* 34: 1–199. 2006, *Journal of Ethnopharmacology* 112: 55–70. 2007

(Wood smoked to treat menstrual pains. Leaf, stem and root extracts antiviral, antifungal, antibacterial. Roots decoction to treat malaria, jaundice, diarrhea, dysentery; root bark decoction or maceration drunk to treat abdominal problems, as a laxative and to expel intestinal worms. Leaves antiviral, analgesic, antipyretic, used to treat worms, fever, cough, rib pain, rheumatism, skin fungal infection. Veterinary medicine, antalgic, astringent, insecticide, for edema, mastitis, ticks, diarrhea.)

in English: lightning bush, smooth-fruited clutia

in Burundi: umuberama, umurerama

in Ethiopia: muka foni, tasuu

in Kenya: enginyamasambi, muthima mburi, muthimamburi, mûthimambûri, sambukwe

in Rwanda: umutalishonga, umutarishonga

in Tanzania: eng'odo, enginyamasambi, enginyanasambi, mburuku, mhende, muhende, nyodo, ongodoo, yaambura

Clutia abyssinica Jaub. & Spach var. ***abyssinica*** (*Clutia abyssinica* var. *calvescens* Pax; *Clutia abyssinica* var. *calvescens* Pax & K. Zimbabwe to S. Africa.

See *Species Plantarum* 2: 1042. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1045. 1866 and *Das Pflanzenreich* IV 147,3 (Heft 47): 54. 1911, *Bot. Commelin* 96. 1983

(Leaf infusion used for headache, stomachache, indigestion, dysentery and diarrhea, broken limbs and sprains; infusion of leaves, stems and roots in milk applied to treat stomachache in children. Veterinary medicine, pain.)

in English: lightning bush, warty-fruited clutia, wild pepper tree

in Southern Africa: gewone bliksembos, weerligbos; umbezo, umEmbesa, iKhambi lenkosi, uNgwalemi (Zulu); iQadi, umSiphane (Xhosa); mohlatsoa-mafi (South Sotho: Lesotho, Orange Free State, south east Transvaal)

Clutia richardiana Müll.Arg.

Ethiopia, Yemen.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1044. 1866 and *Phytotherapy Research* 17(6): 657–660. 2003

(Hypoglycemic effects.)

Clutia robusta Pax (*Clutia brachyadenia* Volkens ex Pax; *Clutia kilimandscharica* Engl.; *Clutia lanceolata* Forssk. subsp. *robusta* (Pax) M.G. Gilbert; *Clutia richardiana* Müll. Arg.; *Clutia richardiana* var. *trichophora* Müll. Arg.; *Clutia robusta* var. *acutifolia* Pax; *Clutia robusta* var. *genuina* Pax, nom. inval.; *Clutia robusta* var. *kilimandscharica* (Engl.) Pax; *Clutia robusta* var. *polyphylla* Pax; *Clutia robusta* var. *rhododendroides* Pax; *Clutia robusta* var. *salicifolia* Pax; *Clutia stenophylla* Pax & K. Hoffm.)

Tanzania, Zimbabwe. Shrub, woody-based herb, white-yellow flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1044. 1866, Ritter von Ludwig Höhnel, Sámuel Teleki (1845–1916), *Zum Rudolph-see und Stephanie-see*, App.: 5. 1892 [Appendices (p. [819]-872): A. Aus den Jagdtagebuch des Grafen S. Teleki.—B. Aufzählung der wissenschaftlichen Ergebnisse der Expedition.], Engler, Heinrich Gustav Adolf, 1844–1930, *Über die Hochgebirgsflora des tropischen Afrika* 285. Berlin 1892, Höhnel, Ludwig von, (1857–1942), *Discovery of Lakes Rudolph and Stefanie: a narrative of Count Samuel Teleki's exploring and hunting expedition in Eastern Equatorial Africa in 1887 & 1888 / by his companion Lieut. Ludwig von Höhnel*. Translated by N. Bell (N. d'Anvers). London 1894, *Pflanzenw. Ost-Afrikas*, C: 241. 1895 and *Bot. Jahrb. Syst.* 43: 85. 1909, *Das Pflanzenreich* 147,3(Heft 47): 61, 63. 1911, *Nordic Journal of Botany* 12(4): 401. 1992, Govaerts, R. *World Checklist of Seed Plants* 3(1, 2a & 2b). Continental Publishing, Deurne. 1999 [as *Clutia kilimandscharica*.], Govaerts, R., Frodin, D.G. & Radcliffe-Smith, A. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)* 1–4. The Board of Trustees of the Royal Botanic Gardens, Kew. 2000 [as *Clutia kilimandscharica*.]

(Leaves antiviral, analgesic. Roots decoction mixed with cow milk used to cure colds and rheumatism.)

in Tanzania: enginayamasambi, iparagigi, lelivua, mbaradschidschi, mbarajiji

Clutia similis Müll. Arg.

Tropical Africa.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2.2): 1046. 1866

(Antidote, for snakebites.)

Clutia stuhlmannii Pax

Tropical Africa, Tanzania, Burundi. Suffrutex

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 112. 1894

(Whole plant decoction to cure ankylostomiasis, overdose reported to cause dizziness in children.)

in Tanzania: nshonga, omutula

Clutia whytei Hutch.

Tropical Africa, Tanzania. Shrub

See *Flora of Tropical Africa* 6(1): 806. 1912

(Leaves decoction drunk for convulsions. Roots decoction for stomach problems and headache.)

in Tanzania: ilwila

Cnesmone Blume Euphorbiaceae

From the Greek *knesiao* 'to itch', *knesmos* 'itching', see *Bijdragen tot de flora van Nederlandsch Indië* 630. 1826.

Cnesmone javanica Blume

Java, Malay Peninsula. Climber, slender, stinging hairs, alternate simple leaves short-acuminate, 3-lobed capsule covered with spiny hairs

See *Bijdragen tot de flora van Nederlandsch Indië* 630. 1826

(Plant covered with stinging hairs which cause irritation and pain. Arrow or dart poison.)

Malayan name: jelatang rusa

in Thailand: ka-rang-tang-kwang, lang-tang-kwang, racha-se-kui, rang-tang-kwang, ta-rang-tang-kwang, tam-yae, tam-yae-khrua

Cnestis Juss. Connaraceae

Greek *knesiao* 'to itch', *knizo*, *knetho*, *knestis* 'scraping knife, rasp, scratch', inside the fruits are covered with irritating hairs, see *Genera Plantarum* 374. 1789, *Flora Cochinchinensis* 1: 259, 284. 1790 and *Beitrag zur Vergleichenden Anatomie und zur Systematik der Connaraceen* 10, 77. 1910, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 9: 128, 241. 1924, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 60: 218, 241. 1926, *Pflanzenr.* 103: 28. 1938, *Fl. Madagasc.* 97: 1–25. 1958, *Agric. Univ. Wageningen Pap.* 89(6): 174–238. 1989.

Cnestis ferruginea DC. (*Cnestis ferruginea* Vahl ex DC.; *Cnestis oblongifolia* Baker)

Sierra Leone. Shrub or tree, slender, lianescent, scrambling, woody vine, white flowers, red beaked dehiscent fleshy fruits, black seed with yellow-orange aril, vine and leaves eaten by elephants

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 87. 1825, *Flora of Tropical Africa* 1: 462. 1868 and *Journal of Ethnopharmacology* 6(3): 365–370. 1982, *Pharmaceutical*

Biology 26(4): 246–252. 1988, *Revue Nématol.* 13(4): 463–465. 1990, *African Journal of Biomedical Research.* 5: 77–79. 2002, *Economic Botany*, Vol. 58, Supplement (Winter, 2004): S239–S252. 2004, *International Journal of Pharmacology* 3(3): 295–298. 2007, *Toxicon* 50(2):189–195. 2007, F. Olayemi, Y. Raji, O. Adegoke, M. Oyeyemi, *Abstracts of the World Congress on Medicinal and Aromatic Plants*, Cape Town, November 2008, in *African Journal of Traditional, Complementary and Alternative Medicines, Research Journal of Agriculture and Biological Sciences* 4(1): 58–64. 2008

(Poisonous, cytotoxic. Whole plant wound dressing, anti-oxidant, molluscicidal, nematocidal, antidote, anticonvulsant, for jaundice, malaria. Fruits and stem laxative, febrifuge, for malaria, coughs. Stem rubbed on the skin; bark rubbed on the gum. Fruits astringent, antimicrobial, antimalarial. *Cnestis ferruginea* possesses reversible male antifertility effects due to quinolizidine alkaloid. Leaves antioxidant. Root used as laxative and for cough.)

in Central African Republic: ekunggu, elundi, mobandi

in Ghana: apowse, awendade

Cnestis palala (Loureiro) Merrill (*Cnestis diffusa* Blanco; *Cnestis palala* Merr.; *Cnestis platantha* Griff.; *Cnestis ramiflora* Griffith; *Thysanus palala* Loureiro)

China, Vietnam. Climber, liana, inflorescence an axillary raceme or panicle, white creamy flowers, red fruits ellipsoid to pear-shaped

See *Flora Cochinchinensis* 1: 259, 284. 1790, *Fl. Filip.* [F.M. Blanco] 386. 1837, *Notulae ad Plantas Asiaticas* 4: 432, 434. 1854 and *J. Straits Branch Roy. Asiat. Soc.* 85: 201. 1922 [Apr 1922], *J. Econ. Taxon. Bot.* 15(2): 493. 1991, *Chem. Pharm. Bull.* (Tokyo) 41(2): 388–390. 1993

(Toxic. Roots decoction as a postpartum remedy and stomachic. Whole plant infusion taken for stomachache.)

in China: shi mao guo

in Indonesia: andor balimbing, baih patuh senggulin, jukut abang

in Laos: bèn bit, hon kai, 'sã māt

Malay names: garing-garing, karang-karang, kulau, ribu hutan betina, rumput kachit, sembelit kecil, sembelit merah, semilat, susun kelapa

in Philippines: kalakalamyasan, palo santo, salsaladoi

in Thailand: kra phaak laak, maa daeng, ngonkai

in Vietnam: d[aa]y v[aws]p c[aa]f]y, tr[uw][owf]ng kh[ees]

Cnestis polyphylla Lam. (*Cnestis boiviniana* Baill. ex G. Schellenb.; *Cnestis borbonensis* Raeusch.; *Cnestis bullata* (Baill.) Baill.; *Cnestis glabra* Blanco; *Cnestis glabra* Náves; *Cnestis glabra* Lam.; *Cnestis lurida* Baill.; *Cnestis mada-gascariensis* Raeusch.; *Cnestis natalensis* Planch. & Sond.

ex Harv. & Sond.; *Cnestis natalensis* (Hochst.) Planch. ex Sond.; *Cnestis polyphylla* var. *bullata* Baill.; *Cnestis scandens* J.F. Gmel.; *Sarmienta cauliflora* Sieber, nom. nud.; *Zanthoxylum natalense* Hochst. ex Krauss)

Madagascar, South Africa.

See *Encyclopédie Méthodique, Botanique* 3(1): 23, pl. 387, f. 2. 1789, *Systema Naturae* ... editio decima tertia, aucta, reformata 2(1): 729. 1791 [late Sep–Nov 1791], *Florae Peruvianae, et Chilensis Prodrum* 4. 1794, *Nomenclator Botanicus*, ed. 3 132. 1797, *Fl. Peruv.* [Ruiz & Pavon] 1: 8, t. 7. 1798, *Syn. Pl.* (Persoon) 1: 13. 1805 [1 Apr–15 Jun 1805], *Fl. Filip.* [F.M. Blanco] 387. 1837, *Flora* 27: 304. 1844, *Flora Capensis* (Harvey) 1: 528. 1860, *Adansonia* 7: 243–244. 1867, *Histoire des Plantes* t. 17. 1886 and *Das Pflanzenreich* IV. 127(Heft 103): 39–40. 1938, *Biochimie* 66(7–8): 557–562. 1984

(Neurotoxin. Convulsant. Leaves for skin diseases.)

in English: itch-pod

in Southern Africa: jeukpeul, wildeperske; iHlozi (Zulu); muSunzi (Shona)

in S. Rhodesia: muSunzi, muSunzu

Cnicus L. Asteraceae

Greek *knekos* 'carthamus, wild carthamus, safflower, thistle' (Hippocrates, Aristoteles, Theophrastus), Latin *cnicus*, *cnecus* 'safflower'; see Carl Linnaeus, *Species Plantarum*. 2: 820–826, 909–919. 1753 and *Genera Plantarum*. Ed. 5. 358. 1754.

Cnicus benedictus L. (*Carbeni benedicta* (L.) Benth.; *Carduus benedictus* Steud., nom. inval.; *Carduus benedictus* auct. ex Steud.; *Carduus benedictus* Garsault, nom. inval.; *Centaurea benedicta* (L.) L.)

S. Europe to W. Asia. Herb, flowers yellow

See Pietro Andrea Gregorio Mattioli (Petrus Andreas Matthiolus), circa 1500/1501–1577, *De plantis epitome utilissima* ... Francofurti ad Moenum, 1586, *Species Plantarum* 2: 826. 1753, *Familles des Plantes* 2: 116, 532. 1763, *Species Plantarum*, Editio Secunda 2: 1296. 1763, Geoffroy, Etienne-Francois (1672–1731), *Description, vertus et usages de sept ceuts dix-neuf plantes ... : et de cent trente-quatre animaux*, en sept cents trente planches, gravées en taille-douce, sur les desseins d'après natures, de m. de Gersault [Garsault, Francois Alexandre Pierre de, 1691–1778], par mm. de Fehrt, Prevost, Duflos, Martinet, & c. / et rangées suivant l'ordre du livre intitulé *Matiere médicale* de m. Geoffroy... Paris: P.F. Didot le jeune, 1767 [Vols. 2,5 have title: *Les figures des plantes et animaux d'usage en medecine*, décrits dans *Matiere médicale* de m. Geoffroy ... dessinés d'après nature par m. de Garsault... Paris, L'auteur.], *Nomencl. Bot.* [Steudel] 151. 1821, *Genera Plantarum* 2(1): 482. 1873 and *Kew Bulletin* 22: 138. 1968

(Astringent, antiasthmatic, cholagogue, antiinflammatory, contraceptive, antibacterial, diaphoretic, diuretic, strongly emetic, emmenagogue, galactagogue, stomachic, for venereal and skin diseases, anorexia, depression, dyspepsia, digestion, liver and gall bladder problems, wounds and ulcers, a remedy for the plague.)

in English: bitter thistle, blessed thistle, cursed thistle, holy thistle, karmedik, Our Lady's thistle, spotted thistle, St. Benedict's thistle

in South Africa: geseëndedissel, makdissel

in China: nang ye hua

Cnidium Juss. Apiaceae (Umbelliferae)

Greek *knide* 'nettle', Latin *cnide*, *cnides* for a sea-nettle, *urtica* (Plinius), see *Bot. Zhurn.* 64 (2): 227–232. 1979, *Guihaia* 19(4): 349–354. 1990.

Cnidium monnieri (Linnaeus) Cusson var. ***formosanum*** (Y. Yabe) Kitagawa (*Cnidium formosanum* Y. Yabe)

Japan, China.

See *Journal of the College of Science, Imperial University of Tokyo* 16(4): 63. 1902, *J. Jap. Bot.* 48(8): 237. 1973, *Biol. Pharm. Bull.* 24(9): 1012–1015. 2001, *Biol. Pharm. Bull.* 25(2): 260–263. 2002, *The American Journal of Chinese Medicine* 32(1): 11–20. 2004, *Phytotherapy Res.* 21(3): 226–230. 2007, *J. Ethnopharmacol.* 117(3): 403–407. 2008

(Antipruritic, tonic, anti-allergic, antiasthmatic, cytotoxic, antitumor, the dried fruits.)

in China: tai wan she chuang

Cnidium monnieri (L.) Cusson var. ***monnieri*** (*Cicuta monnieri* (L.) Crantz; *Cicuta sinensis* Zuccagni; *Cnidium microcarpum* Turczaninow; *Cnidium mongolicum* H. Wolff; *Cnidium monnieri* (L.) Spreng.; *Ligusticum mongolicum* (H. Wolff) Leute; *Ligusticum monnieri* (L.) Calestani; *Pinasgelon monnieri* (L.) Rafinesque; *Selinum monnieri* L.; *Seseli daucifolium* C.B. Clarke; *Seseli daucifolium* Lag.)

Japan, China. Erect herb, whitish pink flowers, rigid globose fruits, leaves as vegetable

See *Centuria I. Plantarum* ... 9. 1755 [19 Feb 1755], *Hist. Soc. Roy. Méd.* 1782–83: 280. 1787, *Pl. Umbell. Prodr.* 39. 1813, *Amenidades Naturales de las Españas* 1(2): 84. 1821, *Good Book* 51. 1840 and *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 324. 1930, *Biol. Pharm. Bull.* 25(6): 809–812. 2002, *Planta Med.* 69(12): 1091–1095. 2003, *Phytotherapy Res.* 21(3): 226–230. 2007, *Neurochemistry International* 53(6–8): 416–423. 2008

(Leaves eaten to expel worms from the intestine. Seeds in stomach disorders. Antipruritic, tonic, antiasthmatic, anti-allergic, cytotoxic, antitumor, the dried fruits.)

in China: she chuang

Cnidium officinale Makino

Korea, Japan.

See *Bot. Mag.* (Tokyo) xxii. 173. 1908, *Journal of Plant Biology* 39: 15–22. 1996, *Flavour and Fragrance Journal* 17(1): 49–53. 2002, *Journal of Ethnopharmacology* 81(3): 373–379. 2002, *Pest Management Science* 59(1): 119–123. 2003, *J. Pharmacol. Sci.* 92(1): 74–78. 2003, *Journal of Ethnopharmacology* 93(2–3): 403–408. 2004, *Phytomedicine* 12(9): 648–655. 2005, *Journal of Agricultural and Food Chemistry* 53(14): 5549–5553. 2005

(Antiangiogenic, antitumor, antimetastatic, acaricidal, insecticidal, larvicidal and adulticidal. Used for diabetic glomerulopathy and in the treatment of female genital inflammatory diseases.)

in Korea: chunkung

Cnidoscolus Pohl Euphorbiaceae

Greek *knide* 'nettle' and *skolos* 'thorn, prickle', referring to the stinging and urticating hairs, see *Species Plantarum* 2: 1006–1007. 1753, *Plantarum Brasiliae Icones et Descriptiones* 1: 56. 1827 and *Fieldiana, Bot.* 24(6): 25–170. 1949, *Ann. Missouri Bot. Gard.* 75(3): 1087–1144. 1988.

Cnidoscolus aconitifolius (Mill.) I.M. Johnst. (*Cnidoscolus aconitifolius* I.M. Johnst.; *Cnidoscolus chayamansa* McVaugh; *Cnidoscolus napaefolius* Pohl; *Cnidoscolus napaefolius* (A. Juss.) Pohl; *Cnidoscolus napeifolius* (Desr.) Pohl; *Jatropha aconitifolia* Mill.; *Jatropha aconitifolia* var. *genuina* Müll.Arg., nom. inval.; *Jatropha aconitifolia* var. *papaya* (Medik.) Pax; *Jatropha napaefolia* Desr.; *Jatropha napaefolia* Desr. ex A. Juss.; *Jatropha napeifolia* Desr.; *Jatropha papaya* Medik.)

Mexico to C. America. Shrub or small tree, monoecious, soft wooded, spreading, milky sap, flowers white, inflorescence a dichotomous cyme, ovoid-globose hispid capsule, forage for domestic animals, young leaves and shoots cooked and eaten, stem and leaves armed with stinging hairs

See *The Gardeners Dictionary*: ... eighth edition no. 6. 1768, *Botanische Beobachtungen des Jahres 1782* 194. 1783, *Encyclopédie Méthodique, Botanique* 4: 15. 1797, *Plantarum Brasiliae Icones et Descriptiones* 1: 56, 57, 63. 1827, *Linnaea* 34: 212. 1865 and *Das Pflanzenreich* IV 147,1(Heft 42): 101. 1910, *Ill. Fl. N. U.S.*, ed. 2, 2: 462. 1913, *Contributions from the Gray Herbarium of Harvard University* 68: 86. 1923, *Bulletin of the Torrey Botanical Club* 71(5): 466–468. 1944, *Taxon* 41: 564. 1992, *Economic Botany* 56(4): 350–365. 2002

(Stinging, swelling and blistering, pain persistent for hours. Roots antimenorrhagic. Leaves analgesic, for rheumatism, venereal diseases, gout, for headache apply leaf juice on head, also used to cure alcoholism, diabetes, insomnia, skin disorders, scorpion stings. Uncooked chaya leaves contain cyanogenic glycosides.)

in English: cabbage star, chaya, tree spinach, wild chaya

in South America: candelero, chaya, chichicaste, mala mujer, quehua, quelite, tza, xtasj

Cnidoscolus urens (L.) Arthur (*Bivonea urens* (L.) Arthur; *Cnidoscolus adenophilus* (Pax & K. Hoffm.) Pax & K. Hoffm.; *Cnidoscolus neglectus* Pohl; *Cnidoscolus urens* Arthur; *Cnidoscolus urens* subsp. *adenophilus* (Pax & K. Hoffm.) Breckon; *Janipha urens* (L.) Poir. ex Pohl; *Jatropha adenophila* Pax & K. Hoffm.; *Jatropha herbacea* L.; *Jatropha urens* L.; *Jatropha urens* var. *genuina* Müll.Arg., nom. inval.; *Jatropha urens* var. *herbacea* (L.) Müll.Arg.; *Jussieuia herbacea* Houst.; *Manihot urens* (L.) Crantz)

U.S.A., Mexico, Trop. America. Shrub or small tree, woody, herbaceous, spreading, white sweet scented flowers, green angled fruits, stiff whitish strongly stinging hairs, white latex

See *Institutiones Rei Herbariae* 1: 167. 1766, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1101. 1866 and *Das Pflanzenreich* IV 147,7(Heft 63): 400. 1914, *Torrey* 21: 11. 1921, *Torrey* 22: 30. 1922, *Contributions from the Gray Herbarium of Harvard University* 68: 86. 1923, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 19c: 166. 1931, *Ann. Missouri Bot. Gard.* 75(3): 1114. 1988 [19 Oct 1988], *Journal of Ethnopharmacology* 110(1): 76–91. 2007

(Stinging hairs can cause severe burning, swelling, ulcers, blistering and intense pain. Used for paralysis, dropsy, unconsciousness. Anti inflammation and cough, root decoction drunk. Magic.)

in English: Brazilian stinging nut, bull-nettle, devil-nettle, spurge nettle, tread-softly

in South America: chichicaste, chichicaste de las Costas, guaritoto, mala mujer, ortiga, pringamoza, taaxt ke'ev, tajkts ke'ev, urtiga, urtiga branca, yaga xveya, yerba santa

Cnidoscolus urens (L.) Arthur var. *stimulosus* (Michx.) Govaerts (*Bivonea stimulosus* (Michx.) Raf.; *Cnidoscolus michauxii* Pohl, nom. illeg.; *Cnidoscolus stimulosus* (Michx.) Engelm. & A. Gray; *Jatropha stimulosus* Michx.; *Jatropha stipulosa* Steud., nom. inval.; *Jatropha urens* var. *stimulosus* (Michx.) Müll.Arg.)

North America. Herbaceous, perennial, flowers white, fruits green, edible tubers, stinging hairs on leaves and stems

See *Species Plantarum* 2: 1006–1007. 1753, *Flora Boreali-Americana* 2: 216. 1803, *Specchio* 1: 156. 1814, *Florula Ludoviciana*, or, a flora of the state of ... 138. 1817, *Boston J. Nat. Hist.* 5(2): 234. 1845 and *Torrey* 21: 11. 1921, *World Checklist Bibliogr. Euphorbiaceae*: 398. 2000

(Dermatitis, skin irritation, severe burning and itching, reddening of the skin and perhaps blistering.)

in English: finger rot, spurge nettle, tread-softly

Cobaea Cav. Polemoniaceae (Cobaeaceae)

For the Spanish naturalist Barnabas (Bernabé) Cobo, 1582–1657 (Lima) (but Stearn writes 1572–1659), Jesuit, missionary, author of *Historia de la fundación de Lima*. [Colección de historiadores del Perú. tom. 1.] Lima 1882 and *Historia del Nuevo Mundo*. [Sociedad de Bibliófilos Andaluces.] Sevilla 1890–1895. See [Lima - Ecclesiastical Province - Council 1583], *Concilium Limense*. Celebratum anno 1583. Madrid 1614, *Genera Plantarum* 136. 1789, Antonio José Cavanilles, *Icones et Descriptiones Plantarum*. 1: 11, t. 16–17. 1791, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 210. 1852, M. Colmeiro y Penido, *La Botánica y los Botánicos de la Peninsula Hispano-Lusitana*. 1858 and L. Polgar, *Bibliography of the History of the Society of Jesus*. Rome 1967, *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/2): 112–131. 1967, *Fieldiana, Bot.* 24(9/1–2): 85–96. 1970, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 82. Berlin & Hamburg 1989, *American Journal of Botany* 85(6): 741–752. 1998, *Syst. Bot. Monogr.* 57: 1–81. 1999.

Cobaea scandens Cav. (*Cobaea lasseri* Pittier; *Rosenbergia scandens* (Cav.) House; *Rosenbergia trianae* (Hemsl.) House)

Central and NW South America. Herb, vine, pinnately compound leaves ending in a tendril, inflorescence cymose, corolla broadly campanulate, seeds with a conspicuous marginal wing

See *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1856: 30–31. 1856, *Garden*, an illustrated weekly journal of gardening in all its branches 17: 352. 1880, *Die Natürlichen Pflanzenfamilien* IV(3a): 44. 1891 and *Muhlenbergia: a journal of botany* 4: 23–24. 1908, *Boletín de la Sociedad Venezolana de Ciencias Naturales* 4: 346. 1938, *Syst. Bot. Monogr.* 57: 44. 1999

(A tea made from the leaves serves as a cough medicine.)

in English: cup-and-saucer vine, cup vine, saucer vine, violet ivy

in Peru: galán de noche

Coccinia Wight & Arn. Cucurbitaceae

Latin *coccineus*, *a*, *um* and *coccinus*, *a*, *um* (Latin *coccum*, *i* and Greek *kokkos* ‘a berry, scarlet colour’), Greek *kokkinos* ‘scarlet-coloured, red, scarlet’; see Robert Wight and G. Arnott Walker Arnott, *Prodromus florae Peninsulae Indiae Orientalis*. 1: 347. 1834 and *Botanical Journal of the Linnean Society* 81: 233–247. 1980, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 688–717. 2001.

Tanzania, Kenya, Uganda. Creeping or climbing herb, slender, strong, deeply lobed leaves, corolla pale yellow to pink-orange, bright red edible fruit, leaves used as a vegetable, roots famine food, in bushland, grassland and at roadsides, normally associated with snakes

See *Flora* 24(1, Intelligenzbl.): 22. 1841, *Fam. Nat. Syn. Monogr.* 2: 93. 1846 [Dec 1846], *Tentamen Florae Abyssinicae* ... 1: 293. 1847, *Flora Capensis* 2: 493. 1862, Schweinfurth, Georg August, 1836–1925, *Reliquiae Kotschyanae*: Beschreibung und Abbildung einer Anzahl unbeschriebener oder wenig gekannter Pflanzenarten welche Theodor Kotschy auf seinen Reisen in den Jahren 1837 bis 1839 als Begleiter Joseph's von Russegger in den südlich von Kordofan... gesammelt hat / Hrsg. von Georg Schweinfurth. Nebst einer biographischen Skizze Theodor Kotschy's von O. Kotschy. Berlin: G. Reimer, 1868, *Monographiae Phanerogamarum* 3: 538, 540. 1881 and *Vierteljahrsschr. Naturf. Ges. Zürich* lii. 433. 1907, *Bot. Jahrb. Syst.* xlix. 499. 1913, *Bull. Jard. Bot. État Bruxelles* 5: 114. 1916, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 491. 1923

(Roots poisonous unless well cooked. Unripe fruits cytotoxic, antitumour, antiinflammatory and analgesic. Root decoction with leaf sap used as a mouth wash for toothaches; root infusion for skin diseases, itch.)

in English: wild spinach

in Kenya: kimoe, kyambatwa, nandemu, obutsiba

in Southern Africa: bobbejaangif, siph

in Tanzania: nyayambo, tambalanjoka

Coccinia barteri (Hook. f.) Keay (*Phyzedra barteri* (Hook. f.) Cogn.; *Phyzedra elegans* Harms & Gilg; *Phyzedra heterophylla* A. Chev.; *Staphylosyce barteri* Hook. f.) (*Phyzedra* Hook.f., from the Greek *physis* 'bubble, bladder' and *hedra* 'seat, chair', presumably referring to the shape of the edible tubers.)

Sierra Leone, Cameroon. Climber, yellowish flowers, red fruits with white spots

See *Gen. Pl.* [Bentham & Hooker f.] 1(3): 827–828. 1867, *Fl. Trop. Afr.* [Oliver et al.] 2: 553. 1871, *Monographiae*

Phanerogamarum [A. DC. & C. DC.] 3: 525. 1881 and *Kew Bulletin* 8: 82. 1953

(Cold plant infusion taken for venereal diseases.)

in Ghana: asamankatewa, asamankyekyea

Coccinia cordifolia (L.) Cogn. (*Bryonia cordifolia* L.; *Coccinia cordifolia* Cogn.)

India.

See *Species Plantarum* 2: 1012–1013. 1753, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 347–348. 1834, *Monographiae Phanerogamarum* 3: 529. 1881 and *Fl. Trop. E. Afr., Cucurbit.* 117. 1967

(Used in Sidha. Leaf juice for dysentery, diabetes. Fruit and leaves for skin diseases and conjunctivitis.)

in Bangladesh: telakucha

in India: gilodi, kanduri, kovai, kovvai, teedori, tendli, tidori, tindori

Coccinia grandis (L.) Voigt (*Bryonia grandis* L.; *Bryonia grandis* Wall.; *Cephalandra indica* (Wight & Arn.) Naudin, nom. illeg.; *Cephalandra indica* Naudin; *Coccinia cordifolia* hort.; *Coccinia grandis* Voigt; *Coccinia helenae* Buscal. & Muschl.; *Coccinia indica* Wight & Arn., nom. illeg.; *Coccinia moghadd* (J.F. Gmel.) Schweinf.; *Coccinia moghadd* Asch.; *Coccinia palmatisecta* Kotschy; *Phyzedra gracilis* A. Chev.; *Turia moghadd* J.F. Gmel.)

Tropical Asia and Africa, India. Herb, liana, perennial, prostrate, climbing, creeping, tuberous rootstock, simple tendrils, young stems angular, sexes on different plants, yellow to light yellow flowers, corolla bell shaped, female flowers solitary on stalks, bright red smooth indehiscent berry, compressed seeds, invasive noxious weed, ripe fruit eaten raw, unripe fruits cooked and eaten as vegetable, ripe fruit pulp eaten by the children, plant used for fodder, riverine grassland, in dry *Acacia* bushland and riverine bushland

See *Mantissa Plantarum* 1: 126. 1767, *Numer. List* [Wallich] n. 6700 K, L. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 347–348. 1834, *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 2: 280. 1836, *Hortus Suburbanus Calcuttensis* 59. 1845, *Annales des Sciences Naturelles; Botanique*, sér. 5, 5: 16. 1866, *Beitrag zur Flora Aethiopiens* ... 267. 1867 and *Journal of Cytology and Genetics* 9–10: 42–49. 1975, *Proceedings of the Indian Science Congress Association* (iv, a) 67: 35–36. 1980, *Taxon* 29: 358–360. 1980, *Proceedings of the Indian Science Congress Association* 68 (vi): 96. 1981, *Proceedings of the Indian Science Congress Association* 69 (3-vi): 216. 1982, *Cytologia* 48: 691–697. 1983, *Cytologia* 56: 409–417. 1991, *Journal of Ethnopharmacology* 37: 47–70. 1992, *Journal of Cytology and Genetics* 31(1): 65–71. 1996, *Journal of Ethnopharmacology* 83: 39–54. 2002

(Used in Ayurveda, Sidha and Unani. Bark for gonorrhoea and cathartic. Aerial parts for eye diseases, chest colds,

antisnake venom and detoxicant; to relieve headaches, the crushed plant is tied around the forehead; plant decoction applied on head to cure vertigo. Flowers for jaundice. Leaves mixed with *ghee* applied for pain on the left side of the abdomen and lightening of the skin in children; leaves applied to treat earache and tonsillitis; leaf juice applied on the head for cooling effect, also drunk for eye disease; leaf juice applied over small tumours. Juice from roots and leaves hypoglycemic, antiamebic, antiinflammatory, antisnake venom, for toxic symptoms, jaundice, bruises and gonorrhoea, scorpion and wasp poisoning; root decoction for diabetes. Fruits for asthma, chewed to treat sores of the tongue. Mucilage from the young fruits and roots used in diabetes. Veterinary medicine, leaves against allergy, dysentery, epistaxis, opacity of cornea, tympany, ephemeral fevers; leaf juice applied on sprains; fruits applied on yoke gall; crushed fruit fed to cattle for dizziness; fruits along with those of *Gmelina asiatica* pounded and applied to kill lice and insects; roots of *Helicteres isora* along with those of *Coccinia grandis* and leaves of *Jasminum auriculatum* pounded and the extract given orally for tympany.)

in English: ivy-fruited gourd, ivy gourd, pain-cure, scarlet-fruited gourd, scarlet gourd

in Arabic: bakhra'a

in Kenya: arekoi, ariapongos, barambar, daal-guo, daalle, dalaam, ekadala, elero, emanimun, enkaiserariai, imon-diu, imore, ketporapis, kidunda, kigerema, kimowe, kimuya, kipchimchim, kirigirigi, lahuge, mitkuru, mutkuru, ndambawangaa, ndegegeya, nkaisiruaruai, nyamutu kuru, nyamutkuru, nyathund-guok, olamposhi, parampar, pchichen, pchichin, tarmuch

in Thailand: khae doh, phak khaep, tam loeng

in Tibet: bi mba

Coccinia rehmannii Cogn. (*Coccinia ovifera* Dinter & Gilg; *Coccinia rehmannii* var. *littoralis* Meeuse)

Swaziland, Namibia. Herbaceous, climbing, perennial creeper, yellow flowers, starchy tuber eaten after roasting, children may eat the fruits

See *Bull. Herb. Boissier* iii. (1895) 418. 1895

(Fruits said to cause sore eyes.)

in English: wild cucumber

Coccinia sessilifolia Cogn. (*Cephalandra sessilifolia* Sond.; *Coccinia schinzii* Cogn.; *Coccinia schinzii* Cogn. ex Schinz; *Coccinia sessilifolia* (Sond.) Cogn.)

Botswana, Namibia and South Africa. Dioecious vine, annual stems, deep perennial fleshy root, prostrate or scandent herb, tendrils simple, corolla pale yellow to pink, bright red berry

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 534. 1881, *Bulletin de l'Herbier Boissier* 3: 419. 1895

(Roots said to be toxic.)

in English: wild cucumber

Coccinia trilobata C. Jeffrey (*Coccinia trilobata* (Cogn.) C. Jeffrey)

Tanzania. Herb, climbing, straggling, creeping, yellow flowers, leaves famine food

See *Kew Bulletin* 15: 349. 1962

(The fruits are said to be toxic.)

in Tanzania: itotwe

Coccocypselum P. Browne Rubiaceae

Greek *kokkos* ‘berry, grain, seed’ and *kypsele* ‘a hollow vessel, beehive, basket’, alluding to the clusters of fruits. See Patrick Browne, *The civil and natural history of Jamaica*. 144. London 1756, *Histoire des plantes de la Guiane Française* 1: 108, t. 42. 1775, *Nova Genera et Species Plantarum seu Prodrum* 31. 1788, *Florae Peruvianae, et Chilensis Prodrum* 11, pl. 2. 1794, *Flora Peruviana* 1: 54, t. 84. 1798, *Anales de Historia Natural* 1(1): 39–40, pl. 4. 1799 and Cornelis Andries Backer (1874–1963), *Verklarend woordenboek der wetenschappelijke namen van de in Nederland en Nederlandsch-Indië in het wild groeiende en in tuinen en parken gekweekte varens en hogere planten*. Groningen 1936, J.A. Steyermark, “*Coccocypselum*.” in “The Botany of the Guayana Highland Part VII: Rubiaceae.” *Memoirs of the New York Botanical Garden*. 17: 299–307. 1967, *Kew Magazine* 10: 76–80. 1993, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2206–2284. 2001, *Acta Botanica Hungarica* 44(3–4): 237–280. 2002.

Coccocypselum guianense (Aubl.) K. Schum. (*Bellardia repens* Willd.; *Bellardia tontanea* (Kunth) Roem. & Schult.; *Coccocypselum guianense* var. *patens* Steyermark; *Coccocypselum tontanea* Kunth; *Tontanea guianensis* Aubl.)

Brazil. Herb, procumbent, calyx purple tinged

See *Species Plantarum*. Editio quarta 1: 626. 1797, *Systema Vegetabilium* 3: 205. 1818, *Nova Genera et Species Plantarum* (quarto ed.) 3: 406. 1819, *Flora Brasiliensis* 6(6): 315. 1889 and *Memoirs of the New York Botanical Garden* 17: 303. 1967, *Ethnobotany Research & Applications* 5: 351–372. 2007

(For *winti* rituals, the Afro-Surinamese *winti* religion.)

in Suriname: fodoë kama, fodu kama

Coccocypselum hirsutum Bartl. ex DC. (*Coccocypselum brevipetiolatum* Steyermark; *Coccocypselum ciliatum* Cham. & Schldtl.; *Coccocypselum glabrum* Bartl. ex DC.; *Coccocypselum hirsutum* var. *glabrum* (Bartl. ex DC.) L.O. Williams; *Coccocypselum hirsutum* var. *hirsutum*; *Coccocypselum hirsutum* var. *uniflorum* Hadac; *Tontanea glabra* (Bartl. ex DC.) Standl.; *Tontanea hirsuta* (Bartl. ex DC.) Standl.)

Tropical America. Small creeping plant, purple flowers

See *Prodr.* 4: 396–397. 1830, *Linnaea* 6: 414. 1831 and *N. Amer. Fl.* 32: 147. 1921, *Journal of the Washington Academy of Sciences* 15(5): 104. 1925, *Mem. New York Bot. Gard.* 17(7): 305. 1967, *Folia Geobot. Phytotax.* 5: 431. 1970, *Phytologia* 25(7): 462. 1973, *Economic Botany* 42(1): 16–28. 1988, *Schlechtendalia* 10: 15–65. 2003

(For urogenital problems and venereal diseases, for uterine problems, leaves infusion drunk; for headache liquid from leaves rubbed on the head.)

Common name: huevo de Indio

Coccoloba P. Browne Polygonaceae

Coccolobis or *coccolubis* ‘a Spanish name for a kind of grape’, Greek *kokkos* ‘berry, grain, seed’ and *lobos* ‘lobe, pod’, referring to the grape-like fruits; see *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, Patrick Browne, *The civil and natural history of Jamaica*. 209–210. London 1756, *Systema Naturae*, Editio Decima 2: 1007. 1759 and *Fieldiana, Bot.* 24(4): 104–137. 1946, Richard A. Howard, “A history of the genus *Coccoloba* in cultivation.” *Baileya*. 6(4): 204–212. 1958, *Ann. Missouri Bot. Gard.* 47(4): 323–359. 1960 [1961], *Fieldiana, Bot.*, n.s. 13: 99–138. 1983, Maximino Martínez, *Catálogo de nombres vulgares y científicos de plantas mexicanas*. 1086–1087. México 1987, *Fl. Ecuador* 38: 1–61. 1989, *Agroforestry Systems* 14(2): 149–161. 1991, *Journal of Ethnopharmacology* 53(3): 117–142. 1996, *Journal of Ethnopharmacology* 61(1): 17–30. 1998, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2167–2176. 2001, *Ceiba* 44(2): 105–268. 2003[2005].

Coccoloba acuminata Kunth (*Coccoloba acuminata* var. *glabra* Lindau; *Coccoloba acuminata* var. *pubescens* Lindau; *Coccoloba strobilulifera* Meisn.; *Coccoloba strobilifera* Meisn.)

Colombia.

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 176–177. 1817 [1818], *Flora Brasiliensis* 5(1): 25. 1855, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 13: 193. 1890 and *Bull. Torrey Bot. Club* 27: 129. 1900

(Active diterpene.)

Coccoloba carinata Ruiz ex Meisn.

South America.

See *Prodrum Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 164. 1856

(Diuretic, used for urinary tract ailments.)

Coccoloba diversifolia Jacq. (*Coccoloba lancifolia* Lundell; *Coccoloba laurifolia* Jacq.; *Coccoloba oligocarpa* Lundell)

West Indies, Jamaica. Tree, leaves variable, ochrea or tubular sheathing leaf base

See *Enumeratio Systematica Plantarum* 19. 1760, Nikolaus Joseph von Jacquin, 1727–1817, *Selectarum stirpium Americanarum historia*. t. 76. Vindobonae [Wien], 1763, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 3: 9, t. 267. 1798 and *Bulletin of the Torrey Botanical Club* 66(9): 593. 1939, *J. Arnold Arbor.* 30: 388–424. 1949, *Wrightia* 4(1): 34. 1968, *Brittonia* 44(3): 356–367. 1992

(Bark chewed to relieve stomachaches.)

in English: dove plum, pigeon plum, plum bush, snail seed

Coccoloba nitida Kunth (*Coccoloba nitida* Mart. ex Meisn., nom. illeg.; *Coccoloba nitida* Desf.)

Colombia.

See *Tabl. École Bot.*, ed. 2. 46. 1815, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 2: 176. 1817[1818], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 164. 1856

(Diuretic, used for urinary tract ailments.)

Coccoloba pubescens L. (*Coccolobis pubescens* (L.) Crantz)

West Indies.

See *Systema Naturae*, Editio Decima 1007. 1759, *Institutiones Rei Herbariae* 1: 132. 1766

(Stomachic, astringent, for skin diseases.)

in Dominica: grand feuille, gwan fëy, wézinyé

Coccoloba uvifera (L.) L. (*Coccoloba uvifera* (L.) Jacq.; *Coccolobis uvifera* (L.) Jacq.; *Guaibara uvifera* (L.) House; *Polygonum uvifera* L.)

Tropical America, West Indies. Tree or shrub, sprawling, straggling branches, rounded leathery leaves, ochrea or tubular sheathing leaf base, greenish white fragrant flowers, fleshy purplish edible fruit in pendulous clusters

See *Species Plantarum* 1: 365. 1753, *Systema Naturae*, Editio Decima 2: 1007. 1759, *Enumeratio Systematica Plantarum* 19. 1760 and *American Midland Naturalist* 8: 64. 1922

(Astringent, tea of bark for diarrhea, dysentery; bark resin used against throat ailments. Roots for dysentery.)

in English: Jamaican kino, sea grape, seaside grape

in Dominica: wézinyé bòdlamè

in Mexico: carnero, manzana, roble de la costa, uva, uva de la costa, uva de mar, uva de playa, uvero, uvito

Cocculus DC. Menispermaceae

Greek *kokkos* 'berry, grain', Latin *coccum*, *i*; see Augustin Pyramus de Candolle, *Regni vegetabilis systema naturale*. 1: 515. 1817, *Flora* 27: 21. 1844 and *Memoirs of the New York Botanical Garden* 20(2): 1–70. 1970, *Journal of Ethnopharmacology* 9: 1–83. 1983, *Journal of Ethnopharmacology* 74(2): 195–204. 2001.

Cocculus carolinus (L.) DC. (*Epibaterium carolinum* (L.) Britton; *Menispermum carolinum* L.)

North America. Perennial vine

See *Sp. Pl.* 1: 340. 1753, *Regni Vegetabilis Systema Naturale* 1: 511, 515–531. 1818 [1817]

(Blood purifier, used to treat blood ailments.)

in North America: Carolina coralbead, Carolina moonseed, coral beads, coral vine, hierba de ojo, margil, red-berried moonseed, red moonseed, snailseed

Cocculus cordifolius DC. (*Chasmanthera cordifolia* (DC.) Baill.)

India.

See *Systema Naturae* 1: 517. 1817, *Histoire des Plantes* 3: 31. 1872

(Used in Sidha.)

in India: amirtai, amirtak koti, amirtavalli, amradvalli, amratavalli, chittamratam, cintil, comavalli, gulancha, gulvel, kuntali, paiyamratam, sindil, sindilkodi, tippatega

Cocculus hirsutus (L.) Diels (*Cocculus hirsutus* (L.) W. Theob.; *Cocculus villosus* (Lam.) DC.; *Cocculus villosus* DC.; *Holopeira torrida* Miers; *Menispermum hirsutum* L.; *Menispermum villosum* Lam.)

India, Tropical Africa to South China. Twining, perennial, scandent shrub or liana, young parts densely softly villous, inflorescence a small axillary cyme, dark blue-red obovoid or rounded drupes, leaf eaten as vegetable, tender shoots and leaves as a fodder

See Leonardi Plukenetii *amaltheum botanicum*: (i.e.), stirpium indicarum alterum copiae cornu millenas ad minimum & bis centum diversas species novas & indictas nominatim comprehendens, quarum sexcenae & insuper, selectis iconibus, aeneisque tabulis in gratiam phytosoporum exquisitè & summo artificio illustrantur, opus temporis sacratum, in magnis vel voluisse sat est. 61, t. 384, f. 7. Londini: [s.n.], 1705 [Plukenet, Leonard, 1642–1706], *Species Plantarum* 1: 341. 1753, *Annals and Magazine of Natural History* ser. 2. 7(37): 42. 1851, *Burmah, its People and Natural Productions* ed. 3, 2: 657. 1860, *Contrib. Bot.* 3: 273. 1867 [Jan 1867], *Ann. Mag. Nat. Hist.* ser. 3, 19(109): 29. 1867 and *Das Pflanzenreich* IV. 94 (Heft 46): 236. 1910, *Fl. Trop. E. Africa, Menispermaceae* 12. 1956, *Phytochemistry* 26(3): 793–794. 1987, *Journal of Ethnopharmacology* 28: 255–283. 1990, *Fitoterapia* 73: 28–31. 2002, *Journal of Ethnopharmacology* 90(1): 171–177. 2004

(Used in Ayurveda, Unani and Sidha. Antifungal. Roots tonic, febrifuge, alterative, diuretic, laxative, an infusion taken for jaundice and stomach pain; root decoction applied against fever, rheumatism; root made into a paste and given internally in menorrhagia; powdered roots mixed with sugar taken orally against weakness and fatigue. Crushed leaves for the bleeding of the lower digestive tract, dysentery, gonorrhoea, inflammation and rheumatism; leaves crushed in castor oil and the paste applied on sprain; leaf paste applied for skin burns and skin diseases; leaf extract mixed with curd and given to overcome spermatorrhea and bleeding, also drunk for scorpion sting; leaf infusion taken to treat stomachache and leaf decoction drunk against female sterility and leucorrhoea; febrifuge, leaf juice mixed with sugar febrifuge and to treat nervous illnesses; leaf juice applied externally on forehead to relieve headache; a mucilaginous gel from the leaf juice applied as cooling and soothing in eczema and venereal diseases. Veterinary medicine, leaves crushed with sugar administered with water to control dysentery; leaves pounded with garlic and black pepper and given orally for epistaxis;

leaf juice rubbed on the body to remove lice or external parasitic insects; leaves given to goats as a lactagogue; ground roots for fracture of limb.)

in India: aadama balli, adambuballi, akabhida, anantavalli, bajar bel, bajarbel, calakattu, calapasani, carpatci, chchilihinda, cheepurutheega, chhirenta, chilahinta, chilihindah, chilihinta, chipuru-tige, chipurutige, chireta, cipurutige, ciriya-katukkoti, cirukaikkoti, cirukattukoti, cutarcaracam, daagadiballi, dagadi, dagadi balli, dagadiballi, dasaritega, dhagadi balli, diar, dier, dirghakanda, dirghavalli, doosaratheega, doosari balli, doosaritheega, doosratiga, dridhakanda, dridhalata, dusapi, dusara teega, dusara theega, dusara tiga, dusaraputiga, dusaratiga, dusaratige, dusare balli, dusari balli, dusari-tige, dusariballi, dusaritige, dusary teega, dusedithige, dusiriteega, eluccikkoti, farid-butti, faridbel, faridburti, faridbutti, garudi, hier, hunder, huyer, jaljamni, jalayamani, jaljamni (jal, water; jam, to coagulate), jantika-patta, janti-ke-bel, janti-ki-bel, jantike bel, jantikibel, jawalsoppu, kaage maari, kalini, kalinikkoti, kaliniyam, kanakavacciratti, karrom, katla tiga, katlathige, katlatige, katle-tige, katletiga, kattle-ti, kattu-k-koti, kattuk-kodi, kattukkodi, kattukkoti, kattukodi, ketuvacakkoti, ketuvacam, khareta-ki-bel, kolim, koticci, kotippavai, kotippavaikkoti, kottukodi, ma baba na bakla, mahahala, mahamula, malaiccurukay, malaikkaru, mattakajakkoti, mekanatattimuli, mekanati, mekanatikkoti, musakani, nirppanti, nirppantikoti, paathalagarudi, paravel, parvel, patala bheri, patalagaruda, patalagarudah, patalagarudakkoti, patalagarudi, periya kattukkoti, perkkaci, perkkacikkoti, sauparni, shipri, sirukattukodi, somavalli, sugadi balli, sugadiballi, sugadigida, tan, tana, tanoli, tanvel, ticaikkarutankoti, tiktanga, til dhara, tucari, uppaittiricci, uppirkuruti, utiritam, utiritankoti, utitaniratti, vacchanvel, vachhvel, vacipputu, val, vanatiktika, vasan-vel, vasanavalli, vasanavela, vasandi, vasantitiktika, vasanvel, vatsadani, vavadi, vev-no-velo, vevdi, vevti, wasan, yadaniballi, yagadi balli, yudaani balli

(Used in Ayurveda, Unani and Sidha. Copra mite dermatitis, allergy to coconut is infrequent. Cigarette made from the bark smoked for cough. Flower bud paste given for earache. Leaves paste decoction abortifacient. A poison antidote, aphrodisiac, anti hypertensive, antinociceptive, analgesic and free radical scavenging, astringent, antifungal, leishmanicidal, antibacterial, antiviral, to increase sexual potency in men, to treat diabetes, weakness, chest colds, gastrointestinal disorders. Roots antipyretic and diuretic, pound the root and poultice for syphilis and gonorrhoea. Outer part of the stem used to cure toothache and earache. Decoction of fruit pericarp together with leaves of *Adenostemma lavenia* gargled to treat toothache; burnt powdered endocarp of the fruit mixed with coconut oil and applied to boils; coconut oil applied over burns; milky endosperm drunk by pregnant women to force childbirth; kernel burnt and the ash applied over the burns; plant juice of *Hemidesmus indicus* var. *pubescens* (Wight & Arn.) Hook. f. mixed with grating of *Cocos nucifera* consumed for cold, to refresh mouth and to increase eyesight. Juice from the roasted flower mixed with gambir, *Uncaria gambir*, orally administered against bloody diarrhoea. Sacred plant, auspicious, fruits used in religion and magico-religious beliefs, *poojas* of sea, worshipping, any religious and social

ceremony, as an offering to deities; tender coconut water considered divine, used as purification water.)

in English: coconut, coconut palm, copra, porcupine wood, tree of life

in Arabic: jauz al-hind

in Brazil: coco da bahia, coqueiro, coqueiro-da-bahia, coqueiro da índia, coqueiro-da-praia, injá-guaçu, ioiá-guacuíba

in Ecuador: yumysham

in China: hsu yu, ye zi pi, yeh tzu, yueh wang t'ou (= hornbill head)

Kuntze)

India, Australia. Perennial non-climbing shrub, forage

See *Species Plantarum* 2: 745–751. 1753, *Enumeratio Methodica Plantarum* 168. 1759, *Natuurlijke Historie* 2(10): 246–247. 1779, *Supplementum Plantarum* 332–333. 1781 [1782], *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 122, pl. 5, f. 15. 1813, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 326. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 227. 1834, *Flora* 25(2, Beibl. 49): 62. 1842, *The Flora of British India* 2(4): 175. 1876, *Revisio Generum Plantarum* 1: 196. 1891 and *Journal of the Arnold Arboretum* 19(4): 345–346. 1938, *Journal of Japanese Botany* 40(12): 367–368. 1965, *Cytologia* 54: 51–64. 1989, *Guihaia* 15(2): 166–171. 1995

(Psychedelic, *ayahuasca* analogue, plants containing entheogenic tryptamines. The whole plant used for dispelling stasis. Leaves and fruits applied on wounds.)

in English: move plant, moving plant, semaphore plant, telegraph plant, whirling plant

in China: wu cao

in India: aelemudure, ban chandal, bhunakra, chanchala, colopotro, dudli, naagathagare, nagar gare, nagatagare, nagatakari, nageswar, samphleng gap, thozhuganni, touganni

Coddia Verdc. Rubiaceae

The genus was named to honor the South African botanist Leslie Edward W. Codd, born 1908, former Director

of Botanical Research Institute, Pretoria, co-author with Mary Gunn of *Botanical Exploration of Southern Africa*. Cape Town 1981, author of *Trees and Shrubs of the Kruger National Park*. [Mem. Bot. Surv. S. Afr. no. 26] Pretoria 1951 and “Notes on poisonous plants with special reference to the *Gousiekte* problem.” *J. S. Afr. Biol. Soc.* 2: 8–18. 1961; see *Sylva Telluriana* 21. 1838, *Flora* 25: 236. 1842 and *Kew Bulletin* 36(3): 493–557. 1981, A.P. Backer, D.J.B. Killick and D. Edwards, “A plant ecological bibliography and thesaurus for southern Africa up to 1975.” *Memoirs of the Botanical Survey of South Africa*. no. 52. 1986.

Coddia rudis (E. Mey. ex Harv.) Verdc. (*Gardenia microcarpa* Hochst., nom. illeg.; *Gardenia parvifolia* (Lam.) D. Dietr.; *Heinsia capensis* H. Buek ex Harv.; *Lachnosiphonium rude* (E. Mey. ex Harv.) Ridl.; *Lachnosiphonium rude* (E. Mey. ex Harv.) J.G. García; *Lachnosiphonium rude* var. *parvifolium* (Harv.) J.G. García; *Randia parvifolia* Harv., nom. illeg.; *Randia parvifolia* Lam.; *Randia rudis* E. Mey. ex Harv.; *Xeromphis rudis* (E. Mey. ex Harv.) Codd)

Tropical Africa. Small multi-stemmed tree, arching branches, small light green glossy spatulate leaves clustered, white scented flowers, fruits greenish-brown

See *Encyclopédie Méthodique, Botanique* 3: 25. 1789, *Vollständiges Lexicon der Gärtnerei und Botanik* 3: 441. 1817, *Thesaurus Capensis* 1: 22–23, t. 35. 1859 and *Memorias da Junta de Investigações do Ultramar* 4: 31. 1958, *Kirkia* 1: 110. 1961, *Kew Bulletin* 36: 509. 1981, *Small Ruminant Research* 39(1): 73–85. 2001, *African Journal of Range & Forage Science* 19(1): 13–20. 2002, *Journal of Arid Environments* 67(2): 270–287. 2006

(Applied as poultice on a fracture. Pounded root decoctions for impotence.)

in English: lesser xeromphis, small bone-apple

in Southern Africa: kleinbeenappel; umDondwane, umGogwane (Zulu); iNtsinde (Xhosa); sitole (Tsonga)

in Swaziland: mahlamganisa, mahlanganisa, sikhwakhwane, silulwane, umhlabelo

Codiaeum A. Juss. Euphorbiaceae

Greek *kodia*, *kodia* ‘head, head of plants, bulb, capsule’, some suggest from *kodiho*, the Ternate native name for *Codiaeum variegatum* (L.) Blume. See Adrien Henri Laurent de Jussieu, *De Euphorbiacearum generibus*. 33, t. 9, fig. 30. 1824 and Smith, A.C. *Flora Vitiensis Nova*. A new flora for Fiji (Spermatophytes only). Pacific Tropical Botanical Garden, Lawai. 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 83. (Roots decoction as postpartum remedy, and also for rheumatism. Warm pounded leaves in coconut oil tied on enlarged scrotum of children.)

in India: kamarang

Codonanthe (Mart.) Hanst. Gesneriaceae

From the Greek *kodon* 'a bell' and *anthos* 'flower', see *Nova Genera et Species Plantarum* ... 3: 48, 50, 52, t. 222. 1829, *Linnaea* 26: 207, 209. 1854 and *Fieldiana, Bot.* 24(10/3): 240–313. 1974.

Codonanthe crassifolia (H. Focke) C.V. Morton (*Codonanthe confusa* Sandwith; *Episcia hookeri* Hanst.; *Hypocyrtia crassifolia* H. Focke)

South and Central America. Epiphytic herb, trailing, creeping, succulent, leaves fleshy, flowers white, fruits pinkish

See *Nova Genera et Species Plantarum* ... 3: 39, 41, 48, t. 217. 1829, *Tijdschrift voor de Wisen Natuurkundige Wetenschappen*... 5: 199–200. 1852, *Linnaea* 26: 209. 1854, *Linnaea* 34(3): 350. 1865 and *Bulletin of Miscellaneous Information Kew* 10: 492. 1931, *Publications of the Field Museum of Natural History, Botanical Series* 18(4): 1159. 1938

(Infusion drunk for colds, cough, sore throat, whooping cough, vomiting.)

Codonopsis Wallich Campanulaceae

Greek *kodon* 'a bell' and *opsis* 'like, resembling', referring to the shape of the corolla; see *Novae Plantarum Species* 399. 1821, *Flora Indica*; or descriptions of Indian Plants 2: 103. 1824 and *Acta Phytotax. Sin.* 18(2): 245. 1980, *Fl. Reipubl. Popularis Sin.* 73(2): 48. 1983, Christopher Grey-Wilson, "A survey of *Codonopsis* in cultivation." *The Plantsman*. 12(2): 65–99. September 1990.

Codonopsis bhutanica Ludlow (*Codonopsis xizangensis* D.Y. Hong)

Nepal, Bhutan.

See *Journ. Roy. Hort. Soc.* 97(3): 127. 1972, *Acta Phytotax. Sin.* 18(2): 246, pl. 1, f. 1–3. 1980

(Whole plant for kidney diseases, leprosy, gout.)

Codonopsis clematidea (Schrenk) C.B. Clarke (*Codonopsis clematidea* C.B. Clarke; *Codonopsis clematidea* var. *obtusata* (Chipp) Kitam.; *Codonopsis obtusata* (Chipp) Nannf.; *Codonopsis obtusata* Nannf.; *Codonopsis ovata* Benth. var. *cuspidata* Chipp; *Codonopsis ovata* var. *obtusata* Chipp; *Codonopsis ovata* var. *ramosissima* Hook.f. & Thomson; *Glosocomia clematidea* Fisch.; *Glosocomia clematidea* (Schrenk) Fisch., C.A. Mey. & Avé-Lall.; *Wahlenbergia clematidea* Schrenk)

India, Afghanistan. Herb, roots eaten

See *Enumeratio Plantarum Novarum* 1: 38. 1841, *Index Seminum* [St. Petersburg] 10: 46. 1845, *Gartenfl.* 226: t. 167, f. 2. 1856, *J. Proc. Linn. Soc., Bot.* 2: 15. 1858, *Fl. Brit. India* [J.D. Hooker] 3(8): 438. 1881 and *Journal of the Linnean Society, Botany* 38(267): 385. 1908, *Acta Horti Gothob.* 5: 28. 1930, *Fl. Afgh.*: 383. 1960, *Proc. Indian Natl. Sci. Acad.*, B 55: 177–184. 1989

(Whole plant a mild stomachic, tonic, stimulant, used in gout, dyspepsia, joint disorders, rheumatism, impure blood, leprosy; whole plant decoction given against stomachache, rheumatism, indigestion, and as a stimulant. Roots and leaves to treat bruises, rheumatism. Seed paste applied on swollen body parts.)

in India: bruktung, ludut, mokhting

in Tibet: ludut

Codonopsis lanceolata (Siebold & Zucc.) Trautv. (*Campanumoea japonica* Siebold ex Merr.; *Campanumoea lanceolata* Siebold & Zucc.; *Codonopsis bodinieri* H. Lévl.; *Codonopsis lanceolata* (Siebold & Zucc.) Benth. & Hook.f. ex Trautv.; *Codonopsis lanceolata* f. *emaculata* (Honda) H. Hara; *Codonopsis lanceolata* var. *amurata* T. Koyama; *Codonopsis lanceolata* var. *emaculata* Honda; *Codonopsis ussuriensis* f. *viridiflora* J. Ohara; *Codonopsis yesoensis* Nakai; *Glosocomia hortensis* Rupr.; *Glosocomia lanceolata* (Siebold & Zucc.) Rupr.; *Glosocomia lanceolata* Rupr.; *Glosocomia lanceolata* Regel)

China.

See *Prodromus Florae Nepalensis* 158. 1825 [26 Jan-1 Feb 1825], *Bijdragen tot de flora van Nederlandsch Indië* 726. 1825, *Fl. Japon.* 1: 174, t. 91. 1835, *Bull. Cl. Phys.-Math. Acad. Imp. Sci. Saint-Pétersbourg* 15: 209, 223. 1857 and *Bot. Mag.* (Tokyo) 50: 436. 1936, *Enum. Sperm. Jap.* 2: 98. 1952, *J. Jap. Bot.* 32: 61. 1957, *Bot. Zhurn.* 65 (5): 659–668. 1980, *J. Phytogeogr. Taxon.* 33: 72. 1985

(Roots to nurse mothers as a lactogenic.)

in Japan: chiru-muk, tope-muk

Codonopsis ovata Benth. (*Glosocomia ovata* (Benth.) Lindl.; *Glosocomia ovata* Lindl.)

India.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 253. t. 69. f. 3. 1833–1840, *Edwards's Botanical Register* 28: t. 3. 1842

(Roots and leaves stimulant, a poultice to treat ulcers, wounds.)

in India: ludut, sirdandi

Codonopsis pilosula (Franchet) Nannfeldt (*Campanumoea pilosula* Franch.; *Codonopsis pilosula* Nannf.)

Russia, China, Korea. Perennial herb, twining, usually with milky juice, large roots brown deeply wrinkled, alternate leaves long-petiolate, axillary or terminal hermaphrodite flowers, calyx deeply divided, corolla broadly campanulate yellowish-green with pinkish-violet streaks, fruit an obconical capsule, small numerous seeds

See *Bijdragen tot de flora van Nederlandsch Indië* 726. 1825, *Plantae Davidianae ex Sinarum Imperio* 1: 192. 1884, *Icones Plantarum* 20: t. 1966. 1891 and *Acta Horti Gothoburgensis* 5(2): 29. 1930, *Journal of Wuhan Botanical Research* 3(4): 459–460. 1985, *Korean Journal of Plant Taxonomy* 19: 81–102. 1989, *Chinese Traditional and Herbal Drugs* 22(5): 224–227. 1991, *J. Hunan Agric. Coll.* 11(2): 166–170. 1991

(Root astringent, aphrodisiac, general tonic, cooling, styp-tic, for weakness, nausea, diarrhea, vomiting, indigestion, poor appetite, rheumatic pain, prolapse of uterus, excessive uterine bleeding, hypertension, asthma, cough, dizziness and palpitations, prolapse of rectum, loose bowels. Ginseng substitute.)

in English: bastard ginseng, bellflower, bonnet bellflower, pilose Asia-bell, poor man's ginseng, tangshen

in China: chuan dang, dang shen, dangshen

in Tibet: long du du ji

Codonopsis rotundifolia Royle (*Codonopsis rotundifolia* Karst. & Schenck; *Codonopsis rotundifolia* Benth. ex Royle; *Codonopsis rotundifolia* Benth.; *Glosocomia rotundifolia* (Benth.) Rupr.)

India, Himalaya.

See *Prodromus Florae Nepalensis* 158. 1825, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 254. t. 62. 1835, *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Pétersbourg* 15: 210. 1857

(Paste of root and leaves to cure wounds and cuts.)

Codonopsis tangshen Oliv.

China. Climber, white sticky juice

See *Hooker's Icones Plantarum* 20: t. 1966. 1891

(Roots as a general tonic.)

in English: pilose Asia-bell, tangshen

in China: dang shen, dangshen, tang-shen

Coelogyne Lindley Orchidaceae

From the Greek *koilos* 'hollow' and *gyne* 'woman, female, pistil', alluding to the stigmatic cavity or to the lip; see *Collectanea Botanica* ad pl. 33. 1821, *Prodr. Fl. Nepal.* 36. 1825, *The Genera and Species of Orchidaceous Plants* 44. 1830, *Folia Orchidacea. Panisea 5: Panisea 1.* 1854 and B.A. Lewis and P.J. Cribb, *Orchids of the Solomon Islands and Bougainville.* Royal Botanic Gardens, Kew 1991.

Coelogyne fuscescens Lindl. (*Cephalanthera cucullata* subsp. *epipactoides* (Fischer & Meyer) H. Sund.; *Cephalanthera epipactoides* Fischer & Meyer; *Coelogyne brunnea* Lindl.; *Coelogyne cynoches* E.C. Parish & Rchb. f.; *Coelogyne fuscescens* var. *brunnea* (Lindl.) Lindl.; *Coelogyne fuscescens* var. *integrilabia* Pfitzer; *Coelogyne fuscescens* var. *viridiflorum* Pradhan; *Coelogyne integrilabia* (Pfitzer) Schltr.; *Pleione cynoche* (Parish & Rchb. f.) Kuntze; *Pleione cynoche* Kuntze; *Pleione cynoches* (Parish & Rchb. f.) Kuntze; *Pleione fuscescens* (Lindl.) Kuntze; *Pleione fuscescens* Kuntze)

India, Nepal.

See *The Genera and Species of Orchidaceous Plants* 41. 1830, *Gardener's Chronicle & Agricultural Gazette* 1848: 71. 1848, *Folia Orchidacea. Coelogyne* 11. 1854, *Annales des Sciences Naturelles; Botanique, série 4 1:* 30. 1854, *Transactions of the Linnean Society of London, Botany* 30: 147. 1874, *Revisio Generum Plantarum* 2: 680. 1891 and *Pflanzenr.*, IV, 50 II B 7: 43. 1907, *Orchis* 9: 13. 1915, *Europ. Medit. Orchid.* 45. 1975, *Indian Orchids: Guide Identif. & Cult.* 2: 268. 1979

(Pseudobulb macerated and taken orally to cure stomach ailments.)

in China: he chun bei mu lan

in India: sumong reep, sunakhari

Coelogyne sandariana Rchb.f. (*Coelogyne sanderae* Kraenzl. ex O'Brien; *Coelogyne sandariana* hort.; *Pleione sandariana* (Rchb.f.) Kuntze; *Pleione sandariana* Kuntze; *Pleione sonderiana* Kuntze)

Malesia. Epiphytic

See *Gard. Chron.*, III, 1: 764. 1887, *Revisio Generum Plantarum* 2: 680. 1891, *The Gardeners' Chronicle & Agricultural Gazette* 1: 361. 1893

(Pseudobulbs decoction drunk for stomachache.)

Coffea L. Rubiaceae

Quahwah, qahwa is the Arabic name for the genus, Kaffa or Caffa is a province in Southern Ethiopia; see Carl Linnaeus (1707–1778), *Species Plantarum*. 1: 172. 1753, *Genera Plantarum*. Ed. 5. 80. 1754, *Familles des Plantes* 2: 500. 1763, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 477. 1830, *Sylva Telluriana* 164. 1838, *Floral Cabinet* 2: 143. 1838, G. Morosini, in *Relazioni degli ambasciatori veneti al Senato*, a cura di E. Albèri. Serie III, vol. III. Firenze 1855, *Genera Plantarum* 2: 116. 1873, *Bull. Mens. Soc. Linn. Paris* 1: 242, 270. 1880, *Index Gen. Phan.* 501. 1888 and *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 1(Coll. Bot.): 93. 1916, [Coffee] "Commemoração do II Centenario do Cafeeiro no Brasil." *Bol. Mus. Nac. Rio de Janeiro*. Vol. 3, fasc. 4. 1927, A. Chevalier, *Les Caféiers du Globe*. East Africa, SE Sudan, SW Ethiopia, N. Kenya. Evergreen shrub or small tree, shiny dark green leaves opposite, white scented flowers

See *Species Plantarum* 1: 172. 1753 and *Mededeelingen uitgeven van het Department van Landbouw in Nederlandsch-Indië* 11: 126. 1913, *Fl. Trop. E. Africa, Rubiaceae* 713. 1988,

Acta Botanica Venezuelica 19(1): 5–15. 1996, *Caryologia* 51: 19–35. 1998, *Journal of Ethnopharmacology* 87: 155–161. 2003

(Used in Ayurveda, Unani and Sidha. Leaf decoction taken for liver problems, leaf poultice on sores. Seed decoction stimulant, febrifuge, for influenza, fever, jaundice. Root juice or root tea drunk for scorpion sting. Veterinary medicine, for retained placenta.)

in English: Arabian coffee, Arabian coffee plant, arabica coffee, coffee, common coffee

in India: bannu, bannu gida, bonda, bonda-bija, bun, bund, bundu, bunnu, bunu, cahwa, caphi, capie cottay, cilapakak-kottai, cilapakam, coffee gida, cofi, kaaphe, kaaphi, kaapivittulu, kaappikkuru, kafi, kahwa, kaphe, kaphi, kapi, kapi-bija, kapi-kottai, kapi-vittulu, kapikottai, kapivittulu, kappi, kappi-karu, kappikkottai, kappikkottaiceti, kawfi, kopi, koppi, koppiceti, kuehwa, kuppu, mlechca-phala, patakari, patakarikkottai, pilu, qahva, rajapiluh, ticaipari, ticaiparik-kottai, tochem-keweh, tumpavakakottai, tumpavakam

Malayan names: kahwa, kopi

in Philippines: kafe, kape, kapi

in Vietnam: c[af] ph[ee] ch[ef]

in Mexico: cafeto, cafie, caje, capé, capij

in Burundi: akawa

in Congo: kawa

in Kenya: bun, buna, ekahawa, ekawa, kaawa, kahawa, kahawek, kahua, kahuwa, kawa, kawek, mûhûa

in Madagascar: kafe

in Rwanda: ikawa

in Uganda: mwani

Coffea eugenioides S. Moore (*Coffea arabica* var. *intermedia* A. Froehner; *Coffea becquetii* A. Chev.; *Coffea intermedia* (A. Froehner) A. Chev.; *Coffea nandiensis* Dowson; *Coffea nandiensis* Dowson ex Bullock)

Sudan, Uganda, Kenya, Tanzania. Shrub or small tree, interpetiolar stipules triangular with a fine tip, inflorescence an axillary fascicle, creamy white tubular flowers, ellipsoid to roundish drupe, ripe red soft skin, seeds ground and used as coffee, ripe red fruit eaten, very low caffeine content, in forest, understory vegetation

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25: 264. 1897, *Journal of Botany, British and Foreign* 45: 43. 1907, *Annals of Applied Biology* 8: 88. 1921, *Bull. Misc. Inform. Kew* 1930: 401. 1930, *Revue de Botanique Appliquée et d'Agriculture Tropicale* 14: 354. 1934, *Rev. Bot. Appl. Agric. Trop.* 19: 397. 1939

(Febrifuge, stimulant.)

in English: nandi coffee, wild coffee

in Tanzania: kikwandie, mkahawa mwitu

Coffea liberica Hiern (*Coffea abeokutae* P.J.S. Cramer; *Coffea arnoldiana* De Wild.; *Coffea dewevrei* De Wildeman & T. Durand; *Coffea dewevrei* var. *excelsa* (A. Chev.) A. Chev.; *Coffea dybowskii* De Wild.; *Coffea excelsa* A. Chev.; *Coffea klainii* Pierre ex De Wild.; *Coffea liberica* Bull ex Hiern; *Coffea liberica* var. *dewevrei* (De Wild. & T. Durand) Lebrun)

Tropical West and Central Africa, Angola, Sierra Leone. Shrub or small tree, flowers in axillary clusters, corolla white, oblong-ellipsoid drupe

See *Transactions of the Linnean Society of London, Botany* 1(4): 171–172, t. 24. 1876, *Mat. fl. Congo* fasc. 6: 32. 1899 and *Rev. Cult. Colon.* 12(124): 258, 259. 1903, *Mémoires de l'Institut Royal Colonial Belge; Section des Sciences Naturelles et Médicales* 11(3P): 168. 1941, *Encyclopédie Biologique* 22: 29. 1942, *Indian Coffee* 44: 29–36. 1980, *Caryologia* 52: 1–8. 1999

(Febrifuge, stimulant, bitter, tonic.)

in English: excelsa coffee, Liberian coffee, Liberica coffee

in Indonesia: kopi nangka

Malayan names: kahwa, kopi

in Philippines: kapeng barako

in Thailand: kafe-baiyai

in Vietnam: c[af] ph[ee] d[aa]u da, c[af] ph[ee] m[is]t

in Mexico: cafeto

Coffea stenophylla G. Don

West Tropical Africa. Shrub or small tree, evergreen, densely branched, inflorescence axillary, corolla white or slightly pinkish, violet-black drupe

See *A General History of the Dichlamydeous Plants* 3: 581. 1834

(Febrifuge, stimulant, bitter, tonic.)

in English: highland coffee, narrow-leaved coffee, Sierra Leone coffee, stenophylla coffee

Cogniauxia Baillon Cucurbitaceae (Benincaseae, Benincasinae)

For the Belgian botanist Célestin Alfred Cogniaux, 1841–1916, a specialist on Melastomataceae, Cucurbitaceae and Orchidaceae, with A. Goossens wrote *Dictionnaire Iconographique des orchidées*. [plates printed by Goffart, after watercolours by A. Goossens, the Belgian orchid painter.] Brussels 1896–1907, contributor to C.F.P. von Martius *Flora Brasiliensis* (Orchidaceae) and to Engler *Das Pflanzenreich*. See *The Gardeners Dictionary ... Abridged ... fourth edition* no. 1. 1754, *Mém. Soc. Phys. Genève* 3(1): 25. 1825, *Bull.*

Mens. Soc. Linn. Paris 1: 423. 1884 and *Kew Bull.* 15: 339. 1962, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 209. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 363. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 79. 1972, Frans A. Stafleu and Erik A. Mennega, *Taxonomic Literature. Supplement IV*. 248–254. 1997.

Cogniauxia podolaena Baill. (*Cogniauxia ampla* Cogn.; *Cogniauxia auriculata* Cogn.; *Cogniauxia brazzaei* Cogn.; *Cogniauxia cordifolia* Cogn.; *Luffa batesii* C.H. Wright) (from the Greek *pous, podos* ‘a foot’ and *chlaena, laina* ‘a cloak, blanket’)

Tropical Africa. Climbing, herbaceous vine with tendrils, scrambling, trailing, sprawling, orange-yellow flowers

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 424. 1884, *Hooker's Icones Plantarum* t. 2490. 1896, *Bull. Misc. Inform. Kew* 1896, 161. 1896 and *Journal of Ethnopharmacology* 92(2–3): 229–232. 2004, *Lancet* 365: 1487–1498. 2005, *Phytothérapie* 3(6): 252–259. 2005, *Journal of Ethnopharmacology* 104(1–2): 168–174. 2006, *Planta Medica* 74(12): 1453–1456. 2008, *Molecules* 14: 3037–3072. 2009

(Fruits recognized as toxic. Plants used for hormone infertility treatment. Roots antiplasmodial, emetic, cathartic, diuretic, abortifacient, stomachic, revulsive, anthelmintic, for the treatment of malaria, rheumatism, headache, urethral discharges, edema, constipation, ascites, elephantiasis of the scrotum. Leaves hypoglycemic and antihyperglycemic, for the treatment of diabetes mellitus. Insect repellent.)

in Gabon: mbama

Coix L. Poaceae

From the ancient Greek name used by Theophrastus for a kind of Egyptian palm, *Hyphaene thebaica* (L.) Martius, Latin *coix, coicis* for a kind of Ethiopian palm (Plinius), see *Species Plantarum* 2: 972. 1753, *Genera Plantarum*. Ed. 5. 419. 1754, *Enumeratio Methodica Plantarum* 208. 1759, *Syst. Nat.* ed. 10, 1261. May–Jun 1759, Casimiro Gomez [de] Ortega (1740–1818), *Tabulae Botanicae* 30. Matriti [Madrid] 1773, *De Fructibus et Seminibus Plantarum...* 1: 7. 1788, *Philosophische Botanik* 1: 177. 1789, *Consp. Reg. Veg.* 51. 1828, *Revisio Generum Plantarum* 2: 793. 1891 and *Bull. Agric. Congo Belge* 39: 247–304. 1948, *Rev. Bot. Appl.* 31: 197–211. 1951, *J. Agr. Trop.* 8: 44–56. 1961, *Econ. Botany* 28: 38–42. 1974, *Bot. Mus. Leaflet*. 24: 205–224. 1976, *Cytologia* 50: 655–661. 1985, *Flora Mesoamericana* 6: 401–402. 1994, *Blumea* 47(3): 545–580. 2002, *Contributions from the United States National Herbarium* 46: 162–163. 2003.

Coix aquatica Roxb. (*Coix gigantea* Roxburgh; *Coix gigantea* subsp. *aquatica* (Roxb.) Bhattacharya; *Coix gigantea*

var. *aquatica* (Roxb.) Watt; *Coix lacryma-jobi* f. *aquatica* (Roxb.) Backer; *Coix lingulata* Hack.)

China, India, Thailand, SE Asia. Floating, creeping, succulent culms, sometimes decumbent and rooting from nodes, floating roots, leaves densely hairy, male spikelets mainly in triads, animal food, fodder, weed species, ponds, lakes, wet habitats, streams and marshes

See *Der Naturforscher* 23: 211. 1788, *Flora Indica*; or, descriptions of Indian Plants 3: 571–572. 1832, *Oesterreichische Botanische Zeitschrift* 41: 5. 1891 and *Journal of Cytology and Genetics* 1: 14–20. 1966, *Current Science* 55: 1200–1201. 1986, *Genetica* 74: 61–68. 1987, *Cytologia* 54: 169–172. 1989, *Proceedings of the Indian Science Congress Association* 77(3, vi): 135. 1990, *Nucleus* 37(1,2): 10–15. 1994, *The Grasses and Bamboos of India* 1: 175. 1997

(Leaves antifungal, astringent and antibacterial, used for diarrhea and dysentery. Seeds antidiabetic, diuretic. Root paste with bark paste of *Oroxylum indicum* used in dysentery.)

in China: shui sheng yi yi

in India: gobdhu, gorgora, gurgor, gurtu

in Thailand: chaai fuei, chaai phuei, chai fueai, dueai hin, duei hin, lam iak, o nam

Coix gigantea J. König ex Roxb. (*Chionachne barbata* (Roxb.) Aitch.; *Chionachne barbata* (Roxb.) Benth., nom. illeg., non *Chionachne barbata* (Roxb.) Aitch.; *Chionachne barbata* (Roxb.) Duthie, nom. illeg., non *Chionachne barbata* (Roxb.) Aitch.; *Chionachne barbata* (Roxb.) R. Br.; *Chionachne gigantea* (J. Koenig) Veldkamp; *Chionachne koenigii* (Spreng.) in Madagascar: kola

in Nigeria: ajauru, goro, evbe, ibong, obi, obi-abata, obi-ajopa, oji-awusa

in Sierra Leone: an kola, tolo

in Uganda: engongoli, ngongolia

Cola attiensis Aubrév. & Pellegr. (*Cola attiensis* Aubrév., Pellegr., Aubrév. & Pellegr.)

Tropical Africa. Small tree or shrub, cauliflorous, yellow flowers

See *Fl. Forest. Côte d'Ivoire* [Aubréville] 2: 244. 1936, *Bulletin de la Société Botanique de France* 92: 255. 1946

(Fruits analgesic, for headache, fevers, migraine, syphilis.)

Cola cordifolia (Cav.) R. Br. (*Southwellia cordifolia* (Cav.) Spach; *Southwellia cordifolia* Spach; *Sterculia cordifolia* Cav.; *Sterculia cordifolia* Blanco, nom. illeg.)

Indonesia.

See *Species Plantarum* 2: 1007–1008. 1753, *Monadelphiae Classis Dissertationes Decem* 5: 286, t. 143, f. 2. 1788, *Paradisus Londinensis* t. 69. 1807, *Fl. Filip.* [F.M. Blanco] 764. 1837, *Plantae Javanicae Rariores* 237. 1844, *Histoire Naturelle des Végétaux*, Classés par Familles (Spach) 14: 402.

1847 and *Publications of the Bureau of Science Government Laboratories* 17: 29. 1904

(Bark and stem for pulmonary diseases, abscess, bronchitis. Leaves maceration for leprosy. Magic, ceremonial.)

in Ivory Coast: awa, awapou, bafoalé, bofoualé, gonomaï, ntaba, potié, taba, tamba, tawa, tigba, wama, waré, wawapou, wobisé, wogolidio

in Mali: n'daba nogo, ntaba, woma, wongo, tabai

in Senegal: tabayi

Cola greenwayi Brenan (*Cola microcarpa* Brenan)

Kenya, Tanzania, Malawi. Tree, inflorescence an axillary fascicle, deep orange obovoid follicles

See *Bulletin of Miscellaneous Information Kew* 1956: 144. 1956, *Journal of Ethnopharmacology* 97(2): 285–291. 2005

(Twigs antiinflammatory, antibacterial.)

in English: vanquisher, Zulu coshwood

in Tanzania: kabamba, mlungu

Cola lateritia K. Schumann (*Bichea lateritia* (K. Schum.) Kuntze)

Congo, Guinea. Tree, concave buttresses, inflorescence a reddish orange pubescent panicle, indehiscent reddish wrinkled follicles, seed surrounded by a mucilaginous pulp, seed chewed and fruit eaten, leaf buds and young leaves eaten as a vegetable, rodents eat the fruits

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 2: 307. 1899 and *Deutsche Botanische Monatsschrift* 21: 173. 1903

(Bark decoction applied as vaginal douche against sterility; inner bark infusion drunk against cough and intercostal pain.)

in Central Africa: bwalo, efok, fofoko

in Cameroon: bwalo, efok, fofoko

in Gabon: alonzork, ebouboure, mendeneu

in Ivory Coast: alabalu, petit ouara, uara

in Nigeria: kechi shuan

in Yoruba: orodo

in Zaire: bofofoko, bogoro, kitabo, toko

Cola laurifolia Mast.

West Africa, Senegal, Nigeria. Tree, sometimes rooting branches, inflorescence a densely reddish hairy short axillary cyme, wrinkled reddish pubescent obovoid follicles, seeds covered by a yellow aril, fruits eaten raw

See *Fl. Trop. Afr.* [Oliver et al.] 1: 222. 1868 [Oct 1868] and *Revue de Médecines et Pharmacopées Africaines* 7(1): 11–24. 1993, *Biotechnologie, Agronomie, Société et Environnement* 5(1): 43–58. 200

(Seed against diarrhea and dysentery. Love potions.)

in English: laurel-leaved kola

in Nigeria: aburu, aworiwo, doshi, fomu, karanga, ofun, ofuri-iyu, ufa

Cola lepidota K. Schum.

Tropical Africa. Small tree or shrub, red cauliflorous flowers, indehiscent fruit, arils edible

See *Bot. Jahrb. Syst.* 15(1): 136. 1892 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 121, t. 13. 1900

(Seed oil antiviral, cough sedative.)

Cola nitida (Vent.) Schott & Endl. (*Cola astrophora* Warb.; *Cola nitida* A. Chev.; *Cola nitida* Schott & Endl.; *Cola vera* K. Schum.; *Sterculia nitida* Vent.)

Tropical Africa. Small tree, bark grey to brown rough, leaves thick waxy, flowers cream with magenta center thick with scurfy cover, tepals pink-red outside deeper red inside, corona deep red with lighter yellow anthers

See *Jardin de la Malmaison* sub. t. 91. 1805, *Meletemata Botanica* 33. 1832 and *Tropenpflanzer*, vi. 627. 1902, *Vég. Utiles Afrique Trop. Franç.* vi. 120. 1911, *Journal of Ethnopharmacology* 18: 257–266. 1986, *Journal of Ethnopharmacology* 41: 193–200. 1994, *Journal of Ethnopharmacology* 115: 67–71, 387–408. 2008

(When chewed, a stimulant to the nervous system, a restorative. Mashed roots to heal wounds. Slimy liquid from macerated leaves used for treating eye problems. Ceremonial, healing rituals.)

in Benin: avi, awedi, gbahundja, gbanja, gbawundja, golo, goro, obi

in Cameroon: gorohi, kolatier, lepi, tse

(Used in Unani. Plant poisonous to all animals and humans. Poisoning has been reported in cattle, goats horses, sheep and swine, as well as in humans and dogs.)

in English: autumn crocus, meadow-saffron, mysteria, naked boy, naked ladies, naked lady, wonder bulb

in India: nim kofta, suranjan shirin, suranjan talkh

Colchicum bulbocodium Ker Gawl. (*Bulbocodium verum* L.; *Colchicum verum* (L.) Stef., nom. illeg.; *Merendera verna* (L.) Bubani)

Europe, Eurasia. Perennial herb with basal leaves

See *Sp. Pl.*: 294. 1753, *Bot. Mag.* 26: t. 1028. 1807 and Govaerts, R. *World Checklist of Seed Plants* 3(1, 2a & 2b). Continental Publishing, Deurne. 1999 [as *Bulbocodium verum*.]

(All parts poisonous, low toxicity if eaten.)

in English: Spring meadow saffron

Colchicum luteum Baker (*Colchicum alberti* Regel; *Colchicum luteum* var. *albertii* (Regel) Priszter)

Afghanistan, Himalaya. Small grass herb-like, yellow flowers

See *Species Plantarum* 1: 341. 1753, *Gardener's Chronicle & Agricultural Gazette* 33. 1874, *Trudy Imp. S.-Peterburgsk. Bot. Sada* 8: 647. 1884 and *Bot. Közlem.* 63(1): 48. 1976

(Used in Ayurveda, Unani and Sidha. Crushed and cooked corms rubbed for gout, rheumatism, joint pain, liver and

spleen diseases. A decoction of corms and seeds given against stomach complaints.)

in India: curinacanmiciri, curincan, haranthutia, harantutiya, hirantutiya, hiranya-tuttha, hiranyatuttha, kaadige gida, kukum, shuranjan-i-talkh, shuranjan talkh, surainjan kharh-wian, suranjan, suranjaan kadvi, suranjaan meeti, suranjaan mitti, suranjan, suranjan-i-shirin, suranjan kaduva, suranjan meethi, suranjan shirin, suranjan talakh, suranjan talkh, suranjana, suranjane talkh, suranjanetalkh, surjaan kadavi, surjaan mithi, tukapa, tutham, tuthanjana, virkum

Coldenia L. Boraginaceae

After the Scottish (born in Ireland) scientist Cadwallader Colden, 1688–1776, physician, studied at the University of Edinburgh (graduated 1705), studied medicine in London, father of the American botanist Jane Colden (1724–1766), historian, botanist, emigrated to America, 1719 Surveyor-General of New York, 1761 Lieutenant-Governor of New York (under Burnet), correspondent of Linnaeus. See Carl Linnaeus, *Species Plantarum*. 1: 125. 1753, *Genera Plantarum*. Ed. 5. 61. 1754, *Hooker's Journal of Botany and Kew Garden Miscellany* 9: 21. 1857, *Proceedings of the American Academy of Arts and Sciences* 5: 341. 1862, [Cadwallader Colden], *The Colden Letter Books ... 1760–1765 (1765–1775)*. New York 1877, 1878 and *Muhlenbergia*; a journal of botany 2(2A): 239. 1906, Alice Mapelsden Keys, *Cadwallader Colden*, a representative eighteenth century official. New York 1906, Anna Murray Vail (1863–1955), *Jane Colden*, an early New York botanist. New York 1907, Howard Atwood Kelly and Walter Lincoln Burrage, *Dictionary of American Medical Biography*. Lives of eminent physicians of the United States and Canada, from the earliest times. New York 1928, *The Letters and Papers of Cadwallader Colden*. New York 1917–1937, Brooke Hindle, in *D.S.B.* 3: 343–345. 1981, *Taxon* 56(1): 163–169. 2007.

Coldenia procumbens L. (*Bourreria microphylla* Griseb.)

Tropical and subtropical Africa, India. Herb, prostrate, procumbent, spreading, greenish yellow solitary extra-axillary flowers, thick nutlets with a distinct beak

See *Species Plantarum* 1: 125. 1753, *Catalogus plantarum cubensium ...* [Grisebach] 210. 1866, *Revisio Generum Plantarum* 2: 439. 1891 and *Indian Journal of Pharmacology* 23(4): 261–263. 1991, *Journal of Ethnopharmacology* 65: 103–112. 1999, *Hamdard Medicus* 44(3): 20–23. 2001

(Used in Ayurveda and Sidha. Plant extract applied for skin diseases. Leaves antiinflammatory, analgesic, wound healing, anthelmintic, antioxidant, for arthritis, epilepsy, hysteria, madness, fever, dyspepsia, diabetes. Fresh leaves applied on rheumatic swellings, boils; leaves as a poultice to mature abscesses; expressed oil a liniment applied to swollen knees and joints. Fresh roots of *Coldenia*, *Amaranthus viridis*, *Celosia argentea* and *Aerva lanata* pounded together and the

juice given in leucorrhoea and menorrhagia. Veterinary medicine, leaf ash mixed with gingelly oil applied as an ointment for wounds; whole plant made into a paste and applied in yoke-sores.)

in English: procumbent coldenia, prostrate coldenia

in China: shuang zhu zi cao

in India: bhuinlau, bukkinaku, ceruppatai, cheppu tadaka, cheppu tattaku, chepputattaku, chepputhatta, cheruppada, cheruppadi, godaapadi, hamapadi, hamsa padu, hamsapaadi, hamsapadu, hamsapdu, hansa padu, moyini boota, moyinibuta, perunceruppatai, serupada, serupadi, seruppada, sirupadi, siruseruppada, taripakshi, tripakshee, tripakshi, tripanki, tripungkee, tripungki, tripunkhi

in Philippines: oregano-lalaki, papait ti nuang, tabtabokol, tapiasin

in Nigeria: ijaa, tsamiyar ruwa

Colebrookea Smith Lamiaceae (Labiatae)

For the British amateur botanist Henry Thomas Colebrooke, 1765–1837, colonial magistrate, in India, 1816 a Fellow of the Royal Society, 1816 Fellow of the Linnean Society, plant collector and Sanskrit scholar, his writings include *Essays on the Religion and Philosophy of the Hindus*. London & Edinburgh 1858 and *A Grammar of the Sanscrit Language*. Calcutta 1805; see *Exotic Botany* 2: 111, pl. 115. 1806, *Systema Vegetabilium*, editio decima sexta [Sprengel] 2: 676, 713. 1825 [Jan-May 1825] and J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 365. 1965, Emil Bretschneider, *History of European Botanical Discoveries in China*. Leipzig 1981, Harold B. Carter, *Sir Joseph Banks (1743–1820). A Guide to Biographical and Bibliographical Sources*. Winchester 1987.

Colebrookea oppositifolia Smith (*Buchanania oppositifolia* Sm.; *Colebrookea oppositifolia* Lodd., nom. illeg., non *Colebrookea oppositifolia* Sm.; *Colebrookea ternifolia* Roxb.; *Elsholtzia oppositifolia* (Sm.) Poir.; *Elsholtzia oppositifolia* Poir.; *Sussodia oppositifolia* Buch.-Ham.; *Sussodia oppositifolia* (Sm.) Buch.-Ham.)

India, China. Shrub, many-branched, erect, densely lanate-tomentose, hoary, flowers white, panicles terminal, calyx campanulate, stamens 4 subequal, style erect, ovoid-obovoid nutlets, in savanna forests

See *Botanisches Magazin (Römer & Usteri)* 4(11): 3. 1790, *Exotic Botany* 2: 111, pl. 115. 1806, *Hort. Bengal.* 45. 1814, *Pl. Coromandel.* 3: 40. 1815, *Encycl. Meth. Bot. Suppl.* 5: 663. 1817, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 14: 366. 1819 [14 Aug 1819], *Botanical Cabinet*; consisting of coloured delineations . . . 5: f. 487. 1820, *Prodromus Florae Nepalensis* 104. 1825 [26 Jan-1 Feb 1825], *Flora Indica*; or, descriptions of Indian Plants 3: 25–26. 1832 and *Cytologia* 58: 439–444. 1993, *Phytochemistry* 42(3): 867–869. 1996, *Journal of Ethnopharmacology* 114(2): 103–113. 2007

(Used in Sidha. Root stimulates the central nervous system, a preparation for epilepsy; root infusion hepatoprotective, sedative, to relieve peptic ulcer and asthma; root decoction applied to treat sprains and body pain; root paste applied on forehead in epilepsy. Juice of leaf or the paste used to relieve dysentery, cough, eye sores, fever and cataract; tender leaves fresh juice used as nasal drops to treat recurrent headache; leaves chewed to cure toothache, mouth ulcers; leaves chewed and juice swallowed to relieve cough; leaves applied to bruises, cuts and wounds; leaves smoke repels insects. Stem and leaves used to extract worms from sores on the legs. Veterinary medicine, leaf juice to treat cataract.)

in English: opposite-leaf dysophylla

in China: yu e mu

in India: bambker, bansa, bhainsa, bhaman, bhamber, bhamini, bhamni, bhimsingpati, bhinda, bhirmoli, binda, bindu, bintalakri, birali ghas, chitisuhali, dharoos, dharros, dhusre, doos, dusen, dushno, duson, dussarika-jhar, jolodi, kala-bansa, kala-bansa, kalabasa, kosuri, kudsaadi, lunji, pansra, pulhadi mandardoo, thuggi gida, tilhai, tolisi, tulia, vitupucittalai

in Nepal: basul sul, dhursi, dhursul, dhusure, dosu, kaichak

Coleonema Bartling & H.L. Wendl. Rutaceae

From the Greek *koleos* 'a sheath' and *nema* 'a thread, filament', referring to the staminodes, see *Beiträge zur Botanik* 1: 55–56. 1824.

Coleonema album (Thunb.) Bartl. & H.L. Wendl. (*Coleonema album* Bartl. & Wendl.; *Coleonema album* E. Mey.; *Diosma alba* Thunb.)

South Africa. Shrub, perennial, compact, erect, many-branched, needle-like glandular aromatic leaves, small cone-like gall, small white scented flowers, solitary axillary inflorescence, 5-lobed fruits

See *Species Plantarum* 1: 198. 1753, *Prodromus Plantarum Capensium* ... 84. 1794, *Beiträge zur Botanik* 1: 56. 1824, *Zwei Pflanzengeogr. Docum.* (Drège) 174. 1843–1844 and *J. S. African Bot.* 401. 1984

(Insect repellent.)

in English: bait bush, Cape May, white confetti bush

in South Africa: aasbossie, klipboegoe

Coleonema aspalathoides Juss. ex Don (*Coleonema aspalathoides* A. Juss.)

South Africa. Evergreen aromatic shrub, erect, dark green aromatic needle-like leaves

See *Mém. Mus. Par.* xii. (1825) 471. 1825, *A General History of the Dichlamydeous Plants* 1: 783. 1831

Coleonema calycinum (Steud.) I. Williams (*Coleonema calycinum* I.J. Williams; *Diosma calycina* Steud.)

South Africa. Shrub, evergreen, erect, scented foliage, white fragrant flowers, shiny black seed

See *Flora* 13: 549. 1830 and *Journal of South African Botany* 47: 73. 1981

(Diuretic.)

in English: broom buchu, confetti bush

in South Africa: boegoe

Coleonema juniperinum Sond.

South Africa. Shrub or shrublet, resin-scented foliage, creamy white flowers

(Febrifuge.)

in English: fever bush

in South Africa: koorsbos

Coleonema nubigena Esterh. (*Coleonema gracile* Schltr.; *Coleonema gracile* Eckl. & Zeyh.)

South Africa. Dense rounded shrub, coconut-scented foliage, white flowers

See *Enumeratio Plantarum Africae Australis Extratropicae* 1: 106. 1835, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 27: 163. 1899[1900] and *Journal of South African Botany* 9: 137. 1943

(Diuretic.)

Coleonema pulchellum I. Williams

South Africa. Shrub, evergreen, erect, slender, needle-like leaves, pungent sweet-smelling foliage, small pink solitary flowers, chambered capsule

See *Journal of South African Botany* 47(1): 89. 1981

(Diuretic.)

in English: confetti bush

in South Africa: buchu

Coleonema pulchrum Hook.

South Africa. Shrub, slender, turpentine scented foliage, pink flowers

See *Bot. Mag.* 61: t. 3340. 1834

(Diuretic.)

Coleonema virgatum Eckl. & Zeyh.

South Africa. Erect shrub, pink or white flowers

See *Enum. Pl. Afric. Austral.* 1: 106. [Dec 1834-Mar 1835]

(Diuretic.)

Colletia Comm. ex Adr. Juss. Rhamnaceae

For the French botanist Philibert Collet, 1643–1717 (or 1718), among his writings are *Historia rationis*. 1695, *Explication*

des statuts, coutumes, et usages observés dans la province de Bresse, Bugey, Valromay, et Gex. Lion 1698, *Entretiens sur la clôture religieuse.* Dijon 1697 and *Traité des usures,* ou Explication des prets et des interets par les loix qui ont été faites en tous les siecles. 1690. See Pierre Jean Baptiste Chomel, *Réponse de M. Chomel ... à deux lettres écrites par Mr. P.C. [i.e. P. Collet] sur la botanique.* [Paris 1697], G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch.* 216. 1852, Révérend Edmond du Mesnil, *Armorial historique de Bresse, Bugey Dombes, Pais de Gex, Valromey et Franc-Lyonnais ...* Avec les remarques critiques de P. Collet. Lyon 1872 and *Economic Botany* 30(2): 161–185. 1976, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen.* 4. Aufl. 83. 1989.

Colletia paradoxa (Spreng.) Escal. (*Colletia bictoensis* Lindl.; *Colletia cruciata* Gillies & Hook.; *Condalia paradoxa* Spreng.)

Argentina, Uruguay.

See *Genera Plantarum* [Jussieu] 380. 1789 [4 Aug 1789], *Anales de Historia Natural* 1: 39. 1799, *Systema Vegetabilium*, editio decima sexta [Sprengel] 1: 219. 1824 [dated 1825; publ. in late 1824], *Botanical Miscellany* 1: 152. 1829, *Journal of the Horticultural Society of London* 5: 31. 1850 and *Boletín de la Sociedad Argentina de Botánica* 1: 219. 1946, *Pharmaceutical Biology* 40(8): 603–616. 2002

(Febrifuge, purgative, antispasmodic, anti-neoplastic, cytotoxic.)

in Argentina: curamanuel, curro

Collinsonia L. Lamiaceae (Labiatae, Satureineae)

For the English botanist Peter Collinson, 1693/1694–1768 (Middlesex, England), Quaker, naturalist, horticulturist, gardener, 1728 Fellow of the Royal Society. See John Fothergill, *Some account of the late Peter Collinson.* London 1770, John Coakley Lettson, *Memoirs of John Fothergill, M.D.* 263–274. London 1786, R. Pulteney, *Historical and biographical sketches of the progress of botany in England.* 2: 275–277. London 1790, Aylmer Bourke Lambert (1761–1842), “Notes relating to botany, collected from the manuscripts of the late Peter Collinson.” in *Trans. Linn. Soc. London.* 10: 270–282. 1811, Lewis Weston Dillwyn (1778–1855), *Hortus collinsonianus.* An account of the plants cultivated by ... Peter Collinson. Swansea 1843 and Norman G. Brett-James, *The Life of Peter Collinson.* London 1925, Ernest Earnest, *John and William Bartram, Botanists and Explorers 1699–1777, 1739–1823.* 184. Philadelphia 1940, Earl G. Swem, “Brothers of the Spade ...” in *American Antiquarian Society Proceedings.* 68: 17–190. 1948, J.H. Barnhart, *Biographical Notes upon Botanists* 1: 369. 1965, Edmund Berkeley and Dorothy Smith Berkeley, *Dr. Alexander Garden of Charles Town.* 372. University of North Carolina Press [1969], George F. Frick, in *D.S.B.* 3: 349–351. 1981, *Cytologia* 46: 27–44. 1981.

Collinsonia canadensis L. (*Collinsonia angustifolia* Raf.; *Collinsonia canadensis* var. *cordata* Pursh; *Collinsonia canadensis* var. *ovata* Pursh; *Collinsonia canadensis* var. *tuberosa* (Michx.) Alph.Wood; *Collinsonia cuneata* Wender.; *Collinsonia decussata* Moench; *Collinsonia ovalis* Pursh; *Collinsonia praecox* Walter; *Collinsonia scabra* Pers.; *Collinsonia scabriuscula* Aiton; *Collinsonia scabriuscula* var. *puberula* Benth.; *Collinsonia tuberosa* Michx.; *Collinsonia urticifolia* Salisb.; *Pleuradenia praecox* (Walter) Raf.; *Pleuradenia praecox* Raf.; *Pleuradenia scabra* Raf., nom. superfl.)

North America. Perennial, hard heavy knotty root

See *Species Plantarum* 1: 28. 1753, *Fl. Carol.* [Walter] 65. 1788 [Apr–Jun 1788], *Hortus Kewensis* (W. Aiton) 1: 47. 1789, *Methodus* [Moench] 379. 1794 [4 May 1794], *Prodr. Stirp. Chap. Allerton* 75. 1796 [Nov–Dec 1796], *Flora Boreali-Americana* (Michaux) 1: 17. 1803, *Syn. Pl.* (Persoon) 1: 29. 1805 [1 Apr–15 Jun 1805], *Flora Americae Septentrionalis* (Pursh) 1: 20–21. 1813 [dt. 1814; issued Dec 1813], *Neogenyton* 2. 1825, *Medical Flora* 1: 114. 1828, *Schrift. Ges. Bef. Gesammt. Naturw. Marb.* 2: 242. 1831, *Atlantic J.* 182. 1833, *Prodromus* (DC.) 12: 253. 1848 [5 Nov 1848], *Class-book Bot.* (ed. 1861). 544. 1861 and *Sida* 8: 216. 1979

(Plant emetic, stimulant, deodorant, strengthener, analgesic, antidiarrheal, antirheumatic, blood purifier, for chronic catarrhal diseases, chronic laryngitis, pharyngitis, chronic bronchitis, applied for swollen breasts, to the forehead for headaches. Bruised leaves in form of cataplasm for bruises, sprains, ulcers and wounds. Roots decoction taken for diarrhea, heart and kidney troubles. Veterinary medicine, infusion for horses with colic.)

in English: citronella, hard-hack, heal-all, horse balm, horseweed, knob root, knob weed, northern horse-balm, rich leaf, richweed, stone root

Collomia Nutt. Polemoniaceae

Greek *kolla* ‘glue’, referring to the mucilaginous seeds; see *Florae Peruvianae, et Chilensis Prodromus* 20, 25. 1794, Thomas Nuttall (1786–1859), *The Genera of North American Plants*, and catalogue of the species, to the year 1817. 1: 126–127. Philadelphia 1818.

Collomia grandiflora Douglas ex Lindl. (*Gilia grandiflora* (Douglas ex Lindl.) A. Gray, nom. illeg.; *Navarretia grandiflora* (Douglas ex Lindl.) Kuntze; *Navarretia grandiflora* Kuntze)

North America. Annual herb

See *Botanical Register*; consisting of coloured ... 14: pl. 1166. 1828, *Proceedings of the American Academy of Arts and Sciences* 17: 223. 1882, *Revisio Generum Plantarum* 2: 433. 1891 and *Taxon* 35: 899–900. 1986

(Febrifuge, laxative.)

in English: grand collomia, largeflower mountain trumpet

Collomia linearis Nutt. (*Navarretia linearis* (Nutt.) Kuntze; *Navarretia linearis* Kuntze)

North America. Annual herb

See *The Genera of North American Plants* 1: 126. 1818, *Revisio Generum Plantarum* 2: 432. 1891 and *Taxon* 31(2): 344–360. 1982, *Bot. Žurn.* (Moscow & Leningrad) 76: 1174–1178. 1991

(Crushed plant made into a paste applied to wounds, boils, sores, ulcers and bruises.)

in English: narrow-leaved collomia, narrowleaf mountain trumpet, tiny trumpet

Colocasia Schott Araceae

Greek *kolokasion*, *kolokasia*, possibly from the Arabian *kolkas* or *kulkas*; ancient Greek name used by Dioscorides for the root of *Nelumbo nucifera*, the Sacred Lotus, Latin *colocasia* for the Egyptian bean; see H.W. Schott and S.F.L. Endlicher, *Meletemata botanica*. 1: 18. 1832, Pietro Bubani, *Flora Virgiliana*. 39–41. Bologna 1870 and *Fieldiana, Bot.* 304–363. 1958, Salvatore Battaglia, *Grande dizionario della lingua italiana*. III: 303. (Used in Ayurveda, Unani and Sidha. The tubers contain needle-like raphides of calcium oxalate in the superficial tissues; the oxalate content of the raw leaves, calcium oxalate raphides, crystals are not poisonous, just irritating. Ingestion of any part of the plant in the raw state causes great pain and swelling of the lips, tongue and throat. Powdered corms laxative, anthelmintic, antidote, used for the treatment of swellings, rheumatism, leprosy, sores, burns, abscesses, stings, snake or insect bites, cervical lymphadenitis; corm as a vegetable in chronic dysentery; raspings from the corm applied as a poultice to mature boils, to treat snakebites and rheumatism; juice of the corm used as an effective abortifacient. Roots pounded and cooked in butter and eaten as a remedy to tuberculosis. Stem to treat wounds. Leaves cytotoxic, abortifacient, anticancer, probiotic, insect repellent, heated and applied directly to boils; juice of the petioles rubefacient, styptic, used in earache; leaf stalks milky exudate effective against snakebites and bee sting; leaf boiled with fresh milk and the liquid drunk for pregnancy; crushed young leaves applied to new wounds to stop bleeding. Veterinary

medicine, for East coast fever, worm and maggot infestation, respiratory diseases; crushed roots given to domestic animals to increase milk yield.)

Colophospermum Kirk ex J. Léonard Fabaceae (Caesalpiniaceae, Detarieae, Leguminosae)

Greek *kolophonios*, *kolophonion*, *kolophonía* 'of or from Colophon in Ionia, colophonium, resin' and *sperma* 'seed', and refers to the very strong smelling oil contained in the seeds. Kolophon is supposed to be one of the so-called birthplaces of Homer, others were Smyrna, Athens, Rhodes, etc.; the exact place of his birth is enveloped in obscurity, but there is the strongest evidence that he was a native of the west coast of Asia Minor.

Colophospermum mopane (Benth.) J. Léonard (*Colophospermum mopane* (J. Kirk ex Benth.) Léonard; *Colophospermum mopane* (J. Kirk ex Benth.) J. Kirk ex J. Léonard; *Copaiba mopane* (Kirk ex Benth.) Kuntze; *Copaifera mopane* Kirk ex Benth.; *Copaifera mopane* Benth.; *Hardwickia mopane* (J. Kirk ex Benth.) Breteler) (the specific name is derived from a Bantu common name for the plant, see Sir Harry H. Johnston, *A comparative study of the Bantu and Semi-Bantu languages*. Oxford 1919, 1922, Henri A. Junod, *Moeurs et Coutumes des Bantous*. Paris 1936)

Malawi, Mozambique, Namibia, South Africa. Perennial non-climbing tree

(Used in Sidha. Pounded leaves mixed in coconut oil rubbed on the body for fever, malaria; young leaves abortifacient.)

Leaves juice along with those of *Ochrosia oppositifolia* taken in water as an emmenagogue.)

in English: Asian nakedwood, Carolina buckthorn, Indian cherry, yellow buckthorn

in China: she teng

in India: inmoi, katapa, kompaikoli, maanikya, manikya, mayirmanikkam, vira

in Japan: yaeyama-hama-natsu-me

Malayan names: peri pantai, peria laut

in Papua New Guinea: orogogo

in Hawaii: 'anapanapa, kauila 'anapanapa, kauila kukuku, kolokolo, kukuku

in Comoros: kombô hajê

in Madagascar: anantsivora, anantsivoro, vahintsivory

in Tanzania: mkaburi shamsi

Colubrina glandulosa Perkins (*Colubrina glandulosa* var. *glandulosa*; *Colubrina rufa* (Vell.) Reissek; *Colubrina rufa* var. *glandulosa* (Perkins) M.C. Johnst.; *Cormonema glandulosum* (Perkins) Suss.)

South America.

See *Florae Fluminensis* 1: 96. 1825[1829], *Flora* 24(Beibl. 2): 65. 1841, *Flora Brasiliensis* 11(1): 98. 1861 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45(3): 465. 1911, *Wrightia* 3(5): 91. 1963, *Biotropica* 8(2): 71–95. 1976, *Economic Botany* 55(2): 223–235. 2001

(For venereal diseases.)

in English: Spanish ehu

in South America: caçoca, carbonero, falso-pau-Brasil, guaxumbo, jucuruju, sabiá-da-mata, saguaragi, saguaraji, saguari, sobragi, sobrasil, sucuru-juba

Colubrina greggii S. Watson

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 17: 336–337. 1882 and *Brittonia* 23(1): 37. 1971

(A decoction of the root drunk as an emmenagogue.)

Colubrina texensis (Torr. & A. Gray) A. Gray (*Rhamnus texensis* Torr. & A. Gray)

USA, Texas.

See *A Flora of North America: containing ...* 1(2): 263. 1838, *Boston J. Nat. Hist.* 6(2): 169. 1850

(Fruit crushed and added to water, the liquid is drunk to relieve bleeding diarrhea.)

Columnea L. Gesneriaceae

For the Italian botanist Fabius Columna (Fabio Colonna), 1567–1650, see *Species Plantarum* 2: 612. 1753, *Flore des Antilles* 1: 141. 1808, *Essai sur les Propriétés Médicales des Plantes*, ed. 2 192. 1816 and *Fieldiana, Botany* 24(10/3): 240–313. 1974, Edward Lee Greene, *Landmarks of Botanical History*. Edited by Frank N. Egerton. Stanford University Press, Stanford, California 1983, *The Gloxinian* 39(2): 21–25. 1989, *Allertonia* 6(5): 327–400. 1993, *Pharmaceutical Biology* 32(1): 90–94. 1994, *The Gloxinian* 44(3): 16–25. 1994, *Novon* 7(4): 413–416. 1997[1998], *Selbyana* 25(2): 182–209. 2005, *Journal of Ethnopharmacology* 123(3): 413–422. 2009.

Columnea calotricha Donn. Sm. (*Alloplectus calotrichus* (Donn. Sm.) Stearn; *Ortholoma calotrichum* (Donn. Sm.) Wiehler; *Trichantha calotricha* (Donn. Sm.) Wiehler)

Guatemala.

See *Nova Genera et Species Plantarum ...* 3: 53, 57. 1829, *Icones Plantarum* 7: tt. 666, 667. 1844, *Linnaea* 26(2): 209. 1853 [1854] and *Botanical Gazette* 40(1): 9. 1905, *Bulletin of the British Museum (Natural History)*, *Botany* 4(5): 189. 1969, *Phytologia* 27(5): 321. 1973, *Selbyana* 1(1): 34. 1975, *Taxon* 39: 133–134. 1990, *Taxon* 42: 874. 1993

Leaves macerated in water as an external wash for a febrifuge; cataplasm rubbed on the head to relieve headache.)

Columnea crassa C.V. Morton (*Dalbergaria crassa* (C.V. Morton) Wiehler)

Panama.

See *Species Plantarum* 2: 638. 1753 and *Annals of the Missouri Botanical Garden* 29(1): 45–46. 1942, *Phytologia* 27: 317. 1973

(To stop nosebleeding leaves and roots in nostrils, on forehead to relieve headaches.)

in Central America: picrí

Columnea ericae Mansf. (*Columnea archidonae* Cuatrec.; *Dalbergaria archidonae* (Cuatrec.) Wiehler; *Dalbergaria ericae* (Mansf.) Wiehler)

Ecuador.

See *Repertorium Specierum Novarum Regni Vegetabilis* 36: 123. 1934, *Anales. Ciencias. Universidad de Madrid*. Madrid 4(2): 245, fig. 16. 1935, *Phytologia* 27(5): 316–318. 1973

(For menstrual problems.)

Columnea guttata Poepp. (*Columnea ericae* Mansf.; *Columnea picta* H. Karst.; *Dalbergaria evolvens* Wiehler; *Dalbergaria guttata* (Poepp.) Wiehler; *Dalbergaria madisonii* Wiehler; *Dalbergaria puyana* Wiehler)

Peru, Ecuador. Epiphyte, yellow flowers

See *Nova Genera ac Species Plantarum* 3: 1. 1840, *Florae Columbiae terraumque adjacentium specimina selecta in*

peregrinatione duodecim annorum observata delineavit et descripsit 2: 105, t. 154. 1865 and *Repertorium Specierum Novarum Regni Vegetabilis* 36: 123. 1934, *Phytologia* 27(5): 317–318. 1973, *Selbyana* 2: 104, t. 30C. 1977, *Selbyana* 5(1): 90, t. 4C. 1978, *Phytologia* 73(3): 223. 1992

(Antiemetic.)

Columnnea kalbreyeriana Mast. (*Columnnea citrina* C.V. Morton; *Columnnea conferta* C.V. Morton; *Columnnea kahlbreyeri* Hook. f., nom. illeg.; *Dalbergaria kalbreyeriana* (Mast.) Wiehler)

South America. Hemiepiphytic or epiphyte, climber, flowers yellow with red basal stripes

See *Gardener's chronicle*, new series 17(420): 44, 216, pl. 32. 1882, *Bot. Mag.* 108: t. 6633. 1882 and *Annals of the Missouri Botanical Garden* 29(1): 44–45. 1942, *Phytologia* 27(5): 317–318. 1973, *Journal of Ethnopharmacology* 73: 233–241. 2000

(For snakebites.)

Columnnea medicinalis (Wiehler) L.E. Skog & L.P. Kvist (*Alloplectus ichthyoderma* Hanst.; *Columnnea densibracteata* L.P. Kvist & L.E. Skog; *Columnnea eubracteata* Mansf.; *Dalbergaria medicinalis* Wiehler)

Ecuador, Colombia. Suffrutex, epiphyte, climbing, bracts wrapped tightly around the base of the white yellowish flowers

See *Linnaea* 34(3): 372. 1865, *Revisio Generum Plantarum* 2: 472. 1891 and *Bibliotheca Botanica* 116: 146. 1937, *Novon* 7(4): 414. 1997[1998], *Phytologia* 73(3): 226. 1992, *Allertonia* 6(5): 352, 355, f. 4. 1993, *Journal of Ethnopharmacology* 96(3): 389–401. 2005

(For menstrual problems.)

in Ecuador: Santo cristo

Columnnea sanguinea (Pers.) Hanst. (*Alloplectus affinis* (C.V. Morton) Stearn, nom. illeg.; *Alloplectus aureonitens* (Hook.) Stearn; *Alloplectus cubensis* (Urb.) Stearn; *Alloplectus sanguineus* (Pers.) G. Don; *Besleria sanguinea* Pers.; *Collandra aureonitens* (Hook.) Hanst.; *Collandra phoenicea* (Tussac) G. India* 87. 1974, *Leiden Botanical Series* 14: 112. 1991, *Taxon. Revis. Indian Subcontinental Pteridophytes* 62. 2008

(Ceremonial, used in worship to ward off evil spirits.)

in India: gabo labi

Comandra Nutt. Santalaceae

From the Greek *kome* 'hair of the head, tuft of hairs' and *aner, andros* 'male, stamen', referring to the bearded stamens, see *Rhodora* 30(350): 23–24. 1928, *Fl. Canada* 3: 547–1115. 1978.

Comandra livida Richardson (*Geocaulon lividum* (Richardson) Fernald)

North America. Erect perennial herb, parasitic, creeping thread-like reddish rhizomes, spreading underground stems, flowers in slender-stalked clusters from leaf axils, inconspicuous greenish purple petal-like sepals, orange berry-like juicy drupes

See *Narrative of a Journey to the Shores of the Polar Sea* 734. 1823 and *Rhodora* 30(350): 23. 1928

(Fruits swallowed to relieve chronic chest problems, tuberculosis. Leaves and bark decoction emetic and purgative. Chewed stems and leaves applied as a poultice on wounds.)

in English: false toadflax, northern bastard toadflax, northern comandra

Comandra pallida A. DC.

North America.

See *The Genera of North American Plants* 1: 157–158. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 636. 1857, *Proceedings of the California Academy of Sciences, Series 2*, 5(18): 722. 1895 and *Memoirs of the Torrey Botanical Club* 22(1): 70. 1965

(Narcotic. The plant can be toxic to mammals.)

Comandra umbellata (L.) Nutt. (*Comandra richardsiana* Fernald; *Comandra umbellata* subsp. *umbellata*; *Thesium umbellatum* L.)

North America. Perennial, subshrub, rhizomatous, hemiparasitic, erect, short green leaves, tiny and massed star-shaped flowers white to pink, semi-desert

See *Species Plantarum* 1: 208. 1753, *The Genera of North American Plants* 1: 157–158. 1818

(Narcotic, pectoral. Decoction for headaches. Used to treat sore eyes and sores on the body and also as a mouthwash for canker sores. Leaves infusion to treat lung problems, cold. Plant juice applied to treat cuts and sores. Livestock known to be affected by toxin in species.)

in English: bastard toadflax

Comandra umbellata (L.) Nutt. subsp. *pallida* (A. DC.) Piehl (*Comandra pallida* A. DC.; *Comandra umbellata* var. *angustifolia* (A. DC.) Torr.; *Comandra umbellata* var. *pallida* (A. DC.) M.E. Jones)

North America. Perennial subshrub

See *The Genera of North American Plants* 1: 157–158. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 636. 1857, *Proceedings of the California Academy of Sciences, Series 2*, 5(18): 722. 1895 and *Memoirs of the Torrey Botanical Club* 22(1): 70. 1965

(Narcotic; the plant can be toxic to mammals. Plant used for sore eyes, a wash for sores. Roots used for headaches.)

in English: pale bastard toadflax

Comandra umbellata (L.) Nutt. subsp. *umbellata* (*Comandra richardsiana* Fernald)

North America. Perennial subshrub, herb, rhizomatous, hemiparasitic, erect, short green leaves, tiny and massed star-shaped flowers white to pink, semi-desert

See *Species Plantarum* 1: 208. 1753, *The Genera of North American Plants* 1: 157–158. 1818

(Narcotic, pectoral. Decoction for headaches. Used to treat sore eyes and sores on the body and also as a mouthwash for canker sores. Leaves infusion to treat lung problems, cold. Plant juice applied to treat cuts and sores. Livestock known to be affected by toxin in species.)

in English: bastard toadflax

Comanthosphace S. Moore Lamiaceae (Labiatae)

Greek *kome* ‘hair of the head, tuft of hairs’, *anthos* ‘flower’ and *sphakos* ‘sage’, referring to the flowers, see *Exotic Botany* 2: 113, t. 116. 1806, *Mém. Mus. Hist. Nat.* 2: 154, t. 6. 1815, *Journal of Botany, British and Foreign* 15: 293. 1877 and *Nordic Journal of Botany* 14(1): 59–63. 1994. Related genera *Leucosceptrum* and *Rostrinucula*.

Comanthosphace japonica (Miq.) S. Moore (*Comanthosphace japonica* S. Moore; *Comanthosphace japonica* (Miq.) S. Moore ex Hook.f.; *Comanthosphace stellipila* S. Moore var. *japonica* (Miq.) Matsum. & Kudô; *Elsholtzia japonica* Miq.; *Leucosceptrum japonicum* (Miq.) Kitam. & Murata; *Pogostemon japonicum* Kuntze; *Pogostemon japonicum* (Miq.) Kuntze; *Pogostemon japonicus* (Miq.) Benth.; *Pogostemon japonicus* Benth. & Hook. f.)

China, Japan.

See *Botanisches Magazin* (Römer & Usteri) 4(11): 3. 1790, *Annales Museum Botanicum Lugduno-Batavi* 2: 102–103. 1865, *Genera Plantarum* [Bentham & Hooker f.] 2(2): 1180. 1876, *Journal of Botany, British and Foreign* 15(178): 293. 1877, *Revisio Generum Plantarum* 2: 530. 1891, *Bot. Mag.* 122: t. 7463. 1896 and *Botanical Magazine* 26(310): 301. 1912, *Acta Phytotaxonomica et Geobotanica* 20: 168. 1962, *Chemical & Pharmaceutical Bulletin* 27(5): 1252–1254. 1979

(Flavone glycosides.)

in English: Japanese comanthosphace

in China: tian ren cao

Comanthosphace ningpoensis (Hemsley) Handel-Mazzetti (*Caryopteris ningpoensis* Hemsley; *Comanthosphace ningpoensis* var. *stellipiloides* C.Y. Wu; *Elsholtzia ciliata* (Thunb.) Hylander; *Leucosceptrum ningpoense* (Hemsley) Kitamura & Murata)

China.

See *J. Linn. Soc., Bot.* 26(175): 264–265. 1890 and *Symbolae Sinicae* 7(4): 936. 1936, *Botaniska Notiser* 129. 1941, *Acta Phytotaxonomica Sinica* 8(1): 52. 1959, *Acta Phytotax. Geobot.* 20: 167, f. 5–6. 1962

(Astringent, used to dispel wind and induce diaphoresis, to stop bleeding, to treat cold, headache, boils and sores.)

in English: Ningpo comanthosphace

in China: mian sui su, rong mao bian zhong

Comanthosphace stellipila (Miq.) S. Moore ex Briq. (*Comanthosphace stellipila* S. Moore; *Elsholtzia stellipila* Miq.; *Leucosceptrum stellipilum* (Miq.) Kitam. & Murata; *Pogostemon stellipila* Benth. & Hook.f.; *Pogostemon stellipila* (Miq.) Benth.)

Japan.

India, China. Corolla dark blue to blue-purple with dark blue veins and pale yellow base

See *London and Edinburgh philosophical magazine and journal of science* 8: 76. 1836, *Transactions of the Linnean Society of London* 17(4): 515. 1837, *Prodr.* (DC.) 9: 92. 1845 and *Grana Palynologica* 7(1): 144. 1967, *Folia Geobotanica et Phytotaxonomica Praha* 3: 218. 1968

(Shoots decoction given in fevers.)

in China: rou ruo hou mao hua

Comastoma pulmonarium (Turcz.) Toyokuni (*Gentiana arrecta* Franch.; *Gentiana holdereriana* Diels & Gilg; *Gentiana pulmonaria* Turcz.; *Gentianella pulmonaria* (Turcz.) Harry Sm.)

China, Tibet.

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 22(4): 317. 1849, *Journal of the Linnean Society, Botany* 26(174): 124. 1890 and Diels, Friedrich Ludwig Emil (1874–1945), *Beschreibung der auf der Forschungsreise durch Asien gesammelten Pflanzen* 3: 17, pl. 2. [Berlin, 1903], *Symbolae Sinicae* 7(4): 980. 1936, *Botanical Magazine* 74: 198. 1961, *Candollea* 47: 547. 1992, *Cytologia* 58: 115–123. 1993

(For skin diseases, antiinflammatory.)

in English: lungwort comastoma

in China: hou mao hua

Comastoma tenellum (Rottb.) Toyok. (*Cicendia tenella* (Rottb.) Raf.; *Gentiana tenella* Boern.; *Gentiana tenella* Rottb.; *Gentianella tenella* (Rottb.) Börner; *Gentianella tenella* (Rottb.) Harry Sm.)

China. Annual herb, tubular flowers

See *Familles des Plantes* 2: 503. 1763, *Skrifter af Naturhistorie-Selskabet* 10: 436, pl. 2, f. 6. 1770, *Flora Telluriana* 3: 26. 1837 and *Eine Flora für das deutsche Volk* 542. 1912, *Uppsala Universitets Arsskrift* 7: 259. 1945, *Botanical Magazine* 74(874): 198. 1961

(Whole plant eaten for malaria, headache and fever; plant decoction given in fevers. Leaves and stem decoction given in fever.)

in English: tender comastoma, tender gentiana

in China: chang geng hou mao hua

in India: mersaku, teeta

Combretum Loeffling Combretaceae

Combretum is the Latin name used by Plinius (b. A.D. 23, Novum Comum, Transpadane Gaul [now in Italy]—d. Aug. 24, 79, Stabiae, near Mt. Vesuvius) to describe a medicinal herb similar to *baccar*, *bacchar*, *baccaris*, *baccharis*, or a kind of rush, perhaps *Juncus maximus* L.; see Pehr Loeffling (1729–1756), *Iter hispanicum*. 308. Stockholm 1758, *Ann. Sci. Nat., Bot.* sér. 4, 6: 86. 1856, *Flora* 49: 149. 1866 and *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 221–229. 1941, *J. Linn. Soc., Bot.* 55(356): 103–141. 1953, *Fieldiana, Bot.* 24(7/2): 268–281. 1962, *Ind. Gen. Vasc. Pl.* 1753–1774 (Regn. Veg. li.) 41. 1967, *Phytologia* 38(5): 369–383. 1978, *Bull. Mus. Natl. Hist. Nat., B, Adansonia* Sér. 4, 17(3–4): 193. 1995, *Fl. Ecuador* 81(140): 13. 2007, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007, *Fl. Mesoamer.* 4(1): 1–855. 2009.

Combretum aculeatum Vent. (*Combretum denhardtiorum* Engl. & Diels; *Combretum hartmannianum* Schweinf.; *Combretum leuconili* Schweinf.; *Combretum ovale* G. Don; *Combretum stefaninianum* Pamp.; *Commiphora holstii* Engl.; *Poivrea aculeata* (Vent.) DC.; *Poivrea hartmanniana* Schweinf.; *Poivrea ovalis* (G. Don) Walp.)

Tanzania, Ghana. Shrub, rambling, lianescent, woody climber, scandent young shoots, spiny when old, seeds eaten

See *Choix de plantes, dont la plupart sont cultivées* ... t. 58. 1808 and *Journal of Ethnopharmacology* 14: 283–314. 1985

(Roots-powder rubbed over the body in a leprosy treatment; root decoction for catarrh and stomach troubles. Leaves diuretic, vermifuge, laxative, to treat colitis, blenorrrhea, helminthiasis, leprosy. Veterinary medicine, the leaves, tonic, stimulant.)

in Guinea: bulapâl, konti, lahon niandi, laugni, uolo

in Ivory Coast: guluğu, koditambiga, kudugulungu, laré

in Kenya: lemawoi

in Mali: buburé, bulapâl, kolobé, konti, lahon niandi, laugni, lawnandi, peelie ninyilu, uolo, wolo-konti

in Mauritania: ikik, lawnandi, savât

in Nigeria: bubukia, buburé, buka-buki, bulapâl, búrbúra, fárár géézà, farar geza, lahon niandi, laugni, lawnyi, sakaata-saare

in Senegal: bulapâl, kabana, kôti, kunu ndin dolo, laoñádi, lawnandi, ñalafum, nélafum, nelafun, ñélafund, sabe, sambé, saout, saut, savat, sowat, wolo, wolo koli

in Sudan: shi heit

in Tanzania: mpupu lu

in Upper Volta: gulugu, laré, kodem tabaga, kodentigla, koditambiga, kotintaabora, kudugulungu

Combretum acuminatum Roxb. (*Embryogonia acuminata* (Roxb.) Blume)

India.

See *Hortus Bengalensis*, or a Catalogue of the Plants Growing in the Honourable East India Company's Botanical Garden at Calcutta. [28] Serampore 1814, *Flora Indica* or Descriptions of Indian Plants. 2: 228. 1824 and *Musée Botanique de M. Benjamin Delessert* 2: 122–123. 1956

(Leaves decoction for worms.)

in India: bahera, nahar lata, naharlata

Malay names: sangsong harus, songsong, susong harus

Combretum adenogonium Steud. ex A. Rich. (*Combretum adenogonium* Steud.; *Combretum albidiflorum* Engl. & Diels; *Combretum augustinum* Diels; *Combretum basarense* Engl.; *Combretum chevalieri* Diels; *Combretum dalzielii* Hutch.; *Combretum fragrans* F. Hoffm.; *Combretum ghasalense* Engl. & Diels; *Combretum haynesianum* Diels; *Combretum kamatutu* De Wild.; *Combretum kilossanum* Engl. & Diels; *Combretum multispicatum* Engl. & Diels; *Combretum subvernicosum* Engl. & Diels; *Combretum ternifolium* Engl. & Diels; *Combretum tetraphyllum* Diels; *Combretum undulatum* Engl. & Diels; *Combretum zechii* Diels)

Ethiopia, Tanzania. Tree, rough stem, leaves slightly resinous

See *Tentamen Florae Abyssinicae* ... 1: 266. 1848, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 46. 1899 and *Journal of Ethnopharmacology* 25: 339–359. 1989, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 99: 273–279. 2005, *Journal of Ethnopharmacology* 113: 457–470. 2007

(Laxative, purgative, cathartic, wound healing, the powdered wood. Roots decoction for leprosy, cough, venereal diseases, syphilis. Leaves for septic wounds, rashes, fungal or bacterial scalp infection, malaria, hypertension, fever. Veterinary medicine, antidote, for snakebites.)

in English: four-leaved combretum

in Burkina Faso: kwingenga

in Ghana: kparamara, popal

in Mali: bashi, cangara ble, cangarajè, cintiriye, dadami saa, dafologo, doki, gujapilu, henbahia, tiangara

in Tanzania: chimbiti, makoyoyo, malangu, mlama, mluzyaminzi, mufuka, nonja minze

Combretum albidum G. Don

India.

See *Trans. Linn. Soc. London* 15(2): 429. 1827 and *Fl. Orissa* 2: 666. 1995

(Veterinary medicine, leaves pounded and given in Babesiosis.)

in India: yadaku

Combretum albopunctatum Suess.

South Africa. Tree or shrub

See *Mitt. Bot. Staatssamml. München*, Heft 8, 336. 1953, *South African Journal of Botany* 73(2): 173–183. 2007

(Antifungal. Ritual, ceremonial, roots to cure infertility in women.)

in English: combretum-with-the-white-dots, silver-dot bush-willow, silver-dot combretum

in South Africa: Okavangoboswilg

Combretum album Pers. (*Combretum album* De Wild., nom. illeg., non *Combretum album* Pers.; *Combretum decandrum* Jacq. *Combretum decandrum* Roxb., nom. illeg., non *Combretum decandrum* Jacq.; *Combretum wildemanii* (De Wild.) M.G. Gangop. & Chakrab.)

India.

See *Enumeratio Systematica Plantarum* 19. 1760, *Plants of the Coast of Coromandel* 1: 43, pl. 59. 1796, *Syn. Pl.* 1: 411. 1805 and *Repertorium Specierum Novarum Regni Vegetabilis* 13: 195. 1914, *Journal of Economic and Taxonomic Botany* 14: 224. 1990, *J. Econ. Taxon. Bot.* 32(Suppl.): 72–78. 2008

(Leaves for skin diseases; leaf paste cooling, applied for body pain. The juice oozing out during burning of its wood in the non-burning side useful in curing eczema, ringworm.)

in India: arikota, atan, bain lewa, bandarebhra, boddu, bon-tatige, dhoba lota, droa chali, du grak, ducherek, dugi shing, jarangsla, jonari lewa, koldam hrui, lota chali, mandalatige, mandratiga, nallapippindatheega, nallapippindatige, peyiraimbaddi, peyiraru, peyyareyyibaddu, peyyarutheega, punk, rampamaredu, ruel, tirumal, tita sali, vadalam, vedala, yadala

Combretum alternifolium Spreng. (*Combretum alternifolium* Pers., nom. illeg. superfl.; *Poivrea alternifolia* (Pers.) DC.)

Venezuela.

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 19. 1760, *Synopsis Plantarum* 2: 412. 1805, *Systema vegetabilium* 2: 331. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 17. 1828

(Antidote, antiinflammation.)

Combretum apiculatum Sond. (*Combretum apiculatum* forma *sulphureum* Heurck & Müll.Arg.; *Combretum apiculatum* forma *viscosum* Heurck & Müll.Arg.; *Combretum apiculatum* subsp. *boreale* Exell; *Combretum apiculatum* var.

parvifolium Bak. f.; *Combretum apiculatum* var. *sulphureum* (Heurck & Müll.Arg.) Dummer; *Combretum apiculatum* var. *viscosum* (Heurck & Müll.Arg.) Dummer; *Combretum glutinosum* Wood; *Combretum glutinosum* auct.)

South Africa. Tree or small tree, many-branched, spreading, climber, liana to lianescent, leaning, drooping branches, white yellow flowers or sometimes red

See *Linnaea* 23: 45. 1850

(Leaves antifungal, cytotoxic, used for abdominal disorders, conjunctivitis, leprosy, bloody diarrhea, snakebite, scorpion sting, mental illness. Roots for gonorrhoea; boiled roots to treat stomach problems and infertility in women.)

in English: hill combretum, red bushwillow

in N. Rhodesia: muhuhu

in S. Rhodesia: mBondo, inPembele, nKalanga, muGarasaka

in Southern Africa: rooibos, rooiboswilg; mogoeleri (Sotho); umBondwe, umBondwe-omnyama (Zulu); ruKweza (Shona); umBodomnyama, inKukutu (Swazi); Xkukutsu, xikukutsu (Tsonga); shikukutse (Shangaan); mogodiri (Western Transvaal, northern Cape, Botswana); mohwelere, mohwelere-tshipi (North Sotho); tsingitsi (Kalanga: Northern Botswana); kasinsi (Subya); omumbuti (Herero)

in Tanzania: kunganungo, mlama, mnama mweusi, mrama, mughombo, mughomboghombo

Combretum bracteosum (Hochst.) Engl. & Diels (*Combretum bracteosum* (Hochst.) Brandis; *Combretum bracteosum* Engl. & Diels; *Combretum bracteosum* Brandis ex Engl.; *Combretum bracteosum* (Hochst.) Brandis ex Engl.; *Poivrea bracteosa* Hochst.) (the specific epithet alludes to the conspicuous foliaceous lower bracts in the inflorescence)

South Africa. Shrub or small tree, scrambling, multistemmed, armed with curved spines, orange-red clustered flowers, fruit a hard round nut

See *Flora* 27: 424. 1844, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 7 (1893) 123 nomen. 1893, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 95. 1898–1904

(Could be harmful, toxic.)

in English: hiccough creeper, hiccough nut, hiccup nut

in Southern Africa: hikklimop, uQota, uQotha, uQotho

Combretum cacoucia Exell (*Cacoucia coccinea* Aubl.; *Cacoucia coccinea* M.A. Lawson, nom. illeg.; *Combretum coccineum* (Aubl.) Engl. & Diels, nom. illeg.; *Schousboea coccinea* (Aubl.) Willd.; *Terminalia cacoucia* Baill., nom. illeg.)

Brazil. Tree, liana, climbing vine, red flowers sweetly fragrant

See *Histoire des plantes de la Guiane Française* 1: 450, t. 179. 1775, *Systema Plantarum* 2: 578. 1779, *Encyclopédie Méthodique, Botanique* 1(2): 734. 1785, *Species Plantarum*. Editio quarta 2: 578. 1799, *Flora of Tropical Africa* 2: 434.

1871, *Histoire des Plantes* 6: 275. 1877, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3(11): 100, 110, 112. 1899 and *Bulletin of Miscellaneous Information Kew* 1931(10): 469. 1931, *Boletim da Sociedade Broteriana*, ser. 2 40: 10. 1966

(Poison. Flowers said to be toxic, poisonous.)

Combretum caffrum Kuntze (*Combretum caffrum* (Eckl. & Zeyh.) Kuntze; *Combretum salicifolium* E. Meyer ex Hooker; *Dodonaea caffra* Eckl. & Zeyh.)

South Africa.

See *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 55. [Dec 1834-Mar 1835], *Icon. Pl.* 6: t. 592. 1843, *Revis. Gen. Pl.* 3[3]: 87. 1898

(Veterinary medicine, for conjunctivitis, drops from squeezed leaves.)

in English: Cape bushwillow

in Southern Africa: Kaap vaderlandswilg, Kaapse vaderlandswilg; umDubu (Xhosa), umDubu (Zulu)

Combretum collinum Fresen. (*Combretum abercornense* Exell; *Combretum album* De Wild.; *Combretum angustilanceolatum* Engl.; *Combretum bajonense* Sim; *Combretum binderanum* Kotschy; *Combretum burtii* Exell; *Combretum cognatum* Diels; *Combretum coriaceum* Schinz; *Combretum crotonoides* Hutch. & Dalziel; *Combretum eylesii* Exell; *Combretum gazense* Swynnerton & Bak. f.; *Combretum ghasalense* Engl. & Diels; *Combretum griseiflorum* S. Moore; *Combretum hypopilinum* Diels; *Combretum junodii* Dummer; *Combretum laeteviride* Engl. & Gilg; *Combretum mechowianum* O. Hoffm.; *Combretum millerianum* Burt Davy; *Combretum millerianum* Burt Davy; *Combretum monticola* Engl. & Gilg; *Combretum schinzii* Engl. ex Engl. & Diels; *Combretum struempellianum* Gilg & Ledermann ex Engl.; *Combretum tophamii* Exell ex Burt Davy & Hoyle)

East Africa. Small tree, shrub, erect, many branched, leaves coriaceous, sweetly scented creamy flowers in axillary spikes, 4-winged reddish-brown fruits

See *Museum Senckenbergianum* 2: 153. 1837, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 47, t. 15B. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 495. 1907, *Journal of Ethnopharmacology* 6: 29–60. 1982, *Journal of Ethnopharmacology* 46: 17–23. 1995, *Journal of Ethnopharmacology* 97: 421–427. 2005

(Leaves cytotoxic, roots antifungal. Used for malaria, jaundice, diarrhea, excessive menstrual bleeding, rectal prolapse, dysentery, snakebites, gastroenteritis, sterility and infertility.)

in Benin: adjantiro, ayahoui, baamou, bangoubokou soun haro, bohangossa, bouangossou, bouwangossa, denguéboroumé, dooki, doso, fétan pouara, jar taramniya, jargagni,

moufape, mouyambimou, sounon bogrou, wourou poporé, yékan assou

in Kenya: adugo, ititu, mûranjîkî

in Nigeria: jan taramniya

in Senegal: dooki debi

in Tanzania: kayaga, mkoyoyo, mlahaa, mlama, mlandala, mnama, msitu, mubula, mupapaghe, nacholova, nandalaa, omukoyoyo, sifumfwe

in Togo: aléb'lé, aléblé, poopéling, pupiong

in Uganda: mukoola, odugu

in Zambia: umulama

Combretum collinum Fresen. subsp. **elgonense** (Exell) Okafor (*Combretum abercornense* Exell; *Combretum collinum* subsp. *elgonense* Okafor; *Combretum elgonense* Exell; *Combretum kabadense* Exell; *Combretum laboniense* M.B. Moss; *Combretum mechowianum* O. Hoffm.; *Combretum mechowianum* auct., p.p., non O. Hoffm.; *Combretum molle* R. Br. ex G. Don; *Combretum muvarzense* Exell)

Tanzania. Tree, fodder

See *Transactions of the Linnean Society of London* 15: 431. 1827, *Linnaea* 43: 131. 1880 and *Boletim da Sociedade Broteriana*, ser. 2 41: 142. 1967, *Fitoterapia* 72(4): 351–368. 2001

(Febrifuge, a decoction of the roots and leaves drunk and a steambath of the leaves taken as a malaria cure.)

Combretum collinum Fresen. subsp. **gazense** (Swynn. & Baker f.) Okafor (*Combretum album* De Wild.; *Combretum bajonense* Sim; *Combretum collinum* subsp. *gazense* Okafor; *Combretum eylesii* Exell; *Combretum gazense* Swynn. & Baker f.; *Combretum gazense* Swynn. ex Bak. f.; *Combretum mechowianum* auct., sensu White, p.p., non O. Hoffm. s.s.; *Combretum mechowianum* O. Hoffm.; *Combretum mechowianum* subsp. *gazense* (Swynn. ex Bak.f.) J. Duvign.; *Combretum mechowianum* subsp. *gazense* (Swynn. & Baker f.) P.A. Duvign.; *Combretum ritschardii* De Wild. & Exell; *Combretum singidense* Exell)

South Africa.

See *Linnaea* 43: 131. 1880–82 and *Journal of the Linnean Society, Botany* 40: 68. 1911, *Contribution à l'étude de la flore du Katanga* Suppl. 5: 45. 1933, *Bulletin de la Société Botanique de Belgique* 88: 81. 1956, *Boletim da Sociedade Broteriana*, ser. 2 41: 145. 1967

(Febrifuge.)

in English: bushwillow, Rhodesian bushwillow, Rhodesian combretum, variable combretum

in Southern Africa: Rhodesiese boswilg; mvuva (Tsonga or Thonga); modubana (Western Transvaal, northern Cape, Botswana); mohwelere (North Sotho); muvuvha (Venda); opupa (Mbukushu)

Combretum collinum Fresen. subsp. **hypopilinum** (Diels) Okafor (*Combretum collinum* subsp. *hypopilinum* Okafor; *Combretum flaviflorum* Exell; *Combretum hypopilinum* Diels; *Combretum verticillatum* Engl. & Diels)

Nigeria.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 495, 497. 1907, *Boletim da Sociedade Broteriana*, ser. 2 41: 142. 1967

(Laxative, purgative.)

in Nigeria: aro, jan taramniya

Combretum collinum Fresen. subsp. **suluense** (Engl. & Diels) Okafor (*Combretum angustilanceolatum* Engl.; *Combretum binderianum* auct., sensu Liben, p.p., non Kotschy; *Combretum brosigianum* Engl. & Diels; *Combretum fischeri* Engl.; *Combretum griseiflorum* S. Moore; *Combretum kerengense* Diels; *Combretum makindense* Gilg ex Engl.; *Combretum mechowianum* auct., sensu White, p.p., non O. Hoffm. s.s.; *Combretum millerianum* Burt Davy; *Combretum oliverianum* Engl.; *Combretum suluense* Engl. & Diels)

Tropical Africa, Mozambique. Tree

See *Linnaea* 43: 131. 1880–1882, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 54, t. 14/G. 1899 and *Boletim da Sociedade Broteriana*, ser. 2 41: 143. 1967, *South African Journal of Botany* 73(2): 173–183. 2007

(Antifungal.)

in English: weeping bushwillow, Zulu bushwillow, Zulu combretum

in Southern Africa: treurboswilg; umBondwe-omhlophe (Zulu); liFufu (Swazi); mvuva (Tsonga); muvuvha (Venda)

Combretum constrictum (Benth.) C. Lawson (*Poivrea constricta* Benth.)

Tropical Africa. Shrub, sepals and petals pinkish red

See *Niger Flora* 337. 1849, *Flora of Tropical Africa* 2: 423. 1871

(Leaves and stem bark antifungal, used for snakebites, aphrodisiac.)

in Tanzania: mchugu chugu, msugu sugu

Combretum decandrum Jacq. (*Combretum alternifolium* Pers., nom. illeg.; *Combretum decandrum* Roxb., nom. illeg.; *Combretum decandrum* Ruiz & Pav., nom. inval.; *Combretum decandrum* Ruiz & Pav. ex G. Don, nom. inval.; *Combretum latipaniculatum* Rusby; *Combretum nicoyanum* Pittier; *Combretum palmeri* Rose; *Combretum punctulatum* Pittier; *Gonocarpus jacquinii* Ham., nom. illeg.; *Poivrea alternifolia* (Pers.) DC.)

Colombia. Spiny liana

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 19. 1760, *Synopsis Plantarum* 2: 412. 1805,

(Wound healing, for burns, fever, malaria.)

Combretum dolichopetalum Engl. & Diels

Tropical Africa, Ghana. Liana

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* [Engler] 3: 91. 1899

(Leaves and roots antidote, tonic, stomachic.)

Combretum erythrophyllum Sond. (*Combretum erythrophyllum* (Burch.) Sond.; *Combretum glomeruliflorum* Sond.)

South Africa, Tanzania. Tree, creamy yellow sweetly scented flowers, small 4-winged fruits

See *Linnaea* 23: 43. 1850

(Roots and seeds reputed to be poisonous. Roots purgative, aphrodisiac, also to treat venereal diseases.)

in English: bushwillow, river bushwillow, river combretum, Vaal River yellowwood

in S. Rhodesia: mGupa, muDubu, muPuma

in Southern Africa: bosveld wilg, geelhout, riviervaderlandswilg, roodeblat, rooiblaar, vaderlandswilg; muDiki, muPuma (Shona); modibo (North Sotho); modubunoka, mokhukhu (Tswana: Western Transvaal, northern Cape, Botswana); umBondwe, umDubu, umDubu-wehlanze (Zulu); umDubu (Xhosa); muvuvhu, mugwiti (Venda)

Combretum flagrocarpum C.B. Clarke (*Combretum flagrocarpum* Herb. Calc. ex C.B. Clarke; *Combretum wallichii* DC. var. *flagrocarpum* (C.B. Clarke) M.G. Gangop. & Chakrab.)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 21. 1828, *The Flora of British India* [J.D. Hooker] 2: 455. 1878 and *Journal of Economic and Taxonomic Botany* 17(3): 681. 1993

(Leaf juice applied on cuts and wounds as hemostatic.)

in India: leihruai-sen

Combretum fragrans F. Hoffm. (*Combretum albidiflorum* Engl. & Diels; *Combretum ghasalense* Engl. & Diels; *Combretum kamatutu* De Wild.; *Combretum kilossanum* Engl. & Diels; *Combretum multispicatum* Engl. & Diels; *Combretum ternifolium* Engl. & Diels; *Combretum tetraphyllum* Diels; *Combretum undulatum* Engl. & Diels)

East Africa. Tree or small tree

See *Beitr. Kenntn. Fl. Centr.-Ost-Afr.* 31. 1889

(Roots and leaves antimicrobial, a decoction for the treatment of diarrhea; roots antifungal and antibacterial, leaves antiproliferative, stem bark antibacterial. Used for coughs, syphilis, chronic wounds, leprosy, snakebites; roots for diarrhea.)

in Mali: cangarajé, doki

in Nigeria: bakin taramniya, zindi

in Tanzania: hansebwe

Combretum fruticosum (Loefling) Stuntz (*Combretum argenteum* Bertol.; *Combretum aurantiacum* Benth.; *Combretum benthamianum* Van Heurck & Müll.Arg.; *Combretum erianthum* Benth.; *Combretum farinosum* Kunth; *Combretum farinosum* var. *phaenopetalum* Donn. (Lactogenic, for breast problems.)

in English: orange caterpillar

in Latin America: angarilla, bejuco angarilla, bejuco de piedra, carape, carapi, cepillo, cepillo del diablo, chupa miel, compio, guie-begu, guie-tzine, lupe-mé, papamiel, peine de mico, peinecillo, peineta, peinetillo, quie-tzine, tamborillo, tzimón, zinón

Combretum ghasalense Engl. & Diels (*Combretum adenogonium* Steud. ex A. Rich.; *Combretum dalzielii* Hutchinson; *Combretum fragrans* F. Hoffm.; *Combretum kerstingii* Engl. & Diels)

East Africa. Tree or small tree, shrub

See *Beitr. Kenntn. Fl. Centr.-Ost-Afr.* 31. 1889, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 47, t. 15B. 1899 and *Flore Forestiere Soudano-Guineenne* 112. 1950, *Journal of Ethnopharmacology* 99(2): 273–279. 2005

(Antimalarial, boil the leaves with that of *Jatropha gossypifolia* L. and whole plant of *Ocimum canum* (*Ocimum americanum* L.) and drink.)

in English: black combretum

in Ghana: kpmara, popal

in Nigeria: bakar tàrànmfíyáá, dààlóló

Combretum glutinosum Perr. ex DC. (*Combretum glutinosum* Perr.; *Combretum passargei* Engl. & Diels; *Combretum relictum* (Aubrév.) Hutch. & Dalziel; *Combretum schweinfurthii* Engl. & Diels)

Ghana. Small tree or shrub, leaves coriaceous, inflorescence an axillary spike, pale yellow to white fragrant flowers, red to yellow-brown 4-winged samara, bitter-tasting fresh young leaves eaten as a vegetable, forage

See *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 21. 1828, *Florae Senegambiae Tentamen* 288, t. 68. 1833 and *Journal of Natural Products* 57(6): 732–737. 1994, *Journal of Ethnopharmacology* 66: 335–338. 1999, *Economic Botany* 55: 276–289. 2001, *Journal of Ethnopharmacology* 92: 233–244. 2004, *African Journal of Traditional, Complementary and Alternative Medicines* 3(1): 75–81. 2006

(Young shoots and roots aphrodisiac. Leaves antitussive, antimalarial, antifungal and disinfectant. Crushed or dry powdered leaves or bark a dressing on wounds. Leaves, bark or fruits decoction or infusion to treat fevers, malaria, respiratory problems, urinary, intestinal, liver and kidney complaints and to clean wounds and sores. Veterinary medicine, green fruits antiseptic, wound healing.)

in Benin: bekpagorou, berkpagoro, bwangossa, gankoola

in Burkina Faso: kouramtouaga

in Gambia: doki, jamba kattango, rat, tahi

in Guinea: diamba, simba bali

in Ivory Coast: naniaragbwé

in Mali: bamakile, cangara, càngàra bilen, cangwèrèbilen, diangara, dooki, dujopilu, ghjopilu, guzon-pilu, intianon, jamba, jambakatan, kogolo-kagala, maco, sikogo, sukorgo, sukurgo, surkurgo, tiangara, tikoogho, tikorgo

in Mauritania: dooki gori

in Nigeria: akalafa, buski, daguro, dalo, dàngèràá, kattakara, kedagav, kokovbey, taraminiya, taramniya, taramnya

in Senegal: âgara, bu lata, dampata, dati, demba, dirinimble, djambakatan, doki, dokí, dooki gori, doko, dokovoro, dokoworo, dooki, ka dambakata, kalakudun, ndoki, ndukoworo, nokegore, nokégoré, nooko, rat, ratt, soki, tangara, yay

in Sudan: djama khattan, tafe, tiangara

in Togo: makpiob, tinetabl'pieng, tinetap'piong

Combretum goetzei Engl. & Diels (*Combretum passargei* Engl. & Diels)

Tropical Africa. Shrub, scandent, long arching branches, pink white flowers

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 97. 1899

(Anthelmintic.)

Combretum hereroense Schinz (*Combretum hereroense* var. *villosissimum* Engl. & Diels; *Combretum porphyrolepis* Engl. & Diels; *Combretum rhodesiacum* Bak.; *Combretum transvaalense* Schinz; *Combretum transvaalense* var. *villosissimum* Burt Davy) (the specific name after the Herero people, a group of closely related Bantu-speaking peoples of southwestern Africa; see H. Beiderbecke, *Life among the Hereros in Africa*. New York 1922, Frank R. Vivelo, *The Herero of Western Botswana*. St. Paul 1956.)

Tanzania. Shrub, small tree, creeping, drooping, spreading arching branches, reddish 4-winged fruit

See *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 30: 245. 1888

(Stembark antibacterial, antifungal, cytotoxic. Used for cardiac problems, heartburn, venereal diseases, body pain, coughs, chest and stomach troubles, headache, schistosomiasis.)

in English: mouse-eared bushwillow, mouse-eared combretum, russet bushwillow

in S. Rhodesia: umKosikasi

in Southern Africa: kieriessler, steelboom; mokata (Mangwato and Kgatla dialects, Botswana); umHlalavane, umDubu (Zulu); siHlalavane (Swazi); xikhavi (Tsonga); mokabi (Western Transvaal, northern Cape, Botswana);

mokabi, mokata (North Sotho); mudzwiri, mugavhi (Venda); mongave (Mbukushu)

in Tanzania: mlama, mlowasi, mughanduta, mughiyanduta, munangana

Combretum hypopilinum Diels

Tropical Africa, Nigeria.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 495, 497. 1907, *Boletim da Sociedade Broteriana*, ser. 2 41: 142. 1967

(Purgative. Antidote, barks of the underground part also for jaundice.)

in Nigeria: aro, jan taramniya

Combretum imberbe Wawra

Tanzania, Botswana, Zimbabwe. Tree, shrub, inflorescence an axillary or terminal spike, yellowish scented flowers, indehiscent 4-winged nut, foliage eaten by livestock

See *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger*. 38: 556. 1860 and *Journal of Ethnopharmacology* 75: 45–50. 2001, *Journal of Ethnopharmacology* 86: 97–108. 2003, *Phytochemistry* 63(1): 81–88. 2003, *Journal of Ethnopharmacology* 110(1): 56–60. 2007

(Bark powder applied externally against leprosy. Roots or leaves infusion drunk to treat coughs and colds; leaves anti-inflammatory, antifungal, antibacterial, cytotoxic. Powdered roots or leaves and decoctions from roots and leaves taken to treat diarrhea. Root infusion drunk to treat schistosomiasis: root maceration taken to treat stomachache; roots to treat infertility in women, for gynaecological complaints. Magic, ritual, ceremonial, protective power.)

in English: bastard yellow wood, elephant trunk, elephant tusk tree, ironwood, ivory tree, leadwood, leadwood bush-willow, stone tree

in Botswana: motshwere, mutswiri

in Namibia: munjondo, muywile, omumborombonga

in S. Rhodesia: mBimba, muBigiti, muChiri, umTili

in Southern Africa: hardekool, loodhout, mmondzo, mohwelere-tshipi, mondzo, motswere, motswiri, muheri, muhiri, omumboromboga, ummono; uMangwenja, uPhanda, umBondwe-omnyama, imPondondlovu, im-pondondlovu, isiKwishi (Zulu); umMondo, imPondozendhovu (= elephant's tusks) (Swazi); mbiba, mbimba (Tonga); imonso (Ndebele); imonso, muBigiti, muBimba, muChenalota, muChiri, muGodo, muRwiti, muTili, muTswili, muZwile, muYando (Shona); motswiri (Tswana: Western Transvaal, northern Cape, Botswana); muheri (= stone tree), mudzwiri (Venda); muvimba (Subya); mgete (Kalanga: Northern Botswana); omumborombonga (Herero); myondo (Okavango); omukuku (Ovambo)

in Zimbabwe: mbwele, monzo, muchenarota, mutsviri, muyando, ubimba, umchenalota, umtswili

Combretum kraussii Hochst. (*Combretum nelsonii* Dummer) (after the German naturalist and botanist Christian Ferdinand Friedrich von Krauss (1812–1890), traveller and botanical collector; see Christian Ferdinand Hochstetter (1787–1860), “Pflanzen des Cap- und Natal-landes, gesammelt und zusammengestellt von Dr. Ferdinand Krauss.” *Flora*. 28: 337–344, 753–764. 1845 and 29: 113–129, 129–138, 209–219. 1846 and John Hutchinson (1884–1972), *A Botanist in Southern Africa*. London 1946, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 319. 1965.)

South Africa and Swaziland. Shrub or tree, creamy-white flowers in dense heads, four-winged fruit

See *Flora* 27(2): 424. 1844 and *Gardener's Chronicle & Agricultural Gazette* III, 53: 164. 1913

(Sawdust irritant. Roots anodyne, antiseptic, antidiuretic, tonic and appetite stimulant, to treat wounds, eye infections.)

in English: forest bushwillow, forest combretum, read-leaf bushwillow

in Southern Africa: bosvaderlandswilg, boswilg, rooiblaar, rooiblad, vaderlandswilg; modubu (North Sotho); umDubuwehlathi, umDubu, uHwabhu (Zulu); umDubu wehlathi (Xhosa); muvuvhu, muvuvhu-wa-thavhani, muvuvhu-wannda (Venda)

Combretum latifolium Blume (*Combretum cyclophyllum* Steud.; *Combretum extensum* Roxb. ex G. Don; *Combretum extensum* Roxb.; *Combretum formosum* Griff.; *Combretum formosum* G. Don; *Combretum horsfieldii* Miq.; *Combretum leucanthum* Van Heurck & Müll.Arg.; *Combretum macrophyllum* Roxb.; *Combretum micropetalum* Llanos; *Combretum micropetalum* DC.; *Combretum platyphyllum* Van Heurck & Müll.Arg.; *Combretum rotundifolium* Roxb.; *Combretum rotundifolium* Rich.; *Combretum wightianum* Wall. ex Wight & Arn.; *Embryogonia latifolia* (Blume) Blume)

India. Liana, elliptic glabrous leaves, yellow flowers in spikes

See *Actes de la Société d'Histoire Naturelle de Paris* 1: 108. 1792, *Hort. Beng.* 28, 1814, *Bijdragen tot de flora van Nederlandsch Indië* 13: 641. 1825, *Transactions of the Linnean Society of London* 15(2): 420, 422. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 19. 1828, *Fl. Ind.*, ed. 1832, 2: 231. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 317. 1834, *Notulae ad Plantas Asiaticas* 4: 682. 1854

(Anthelmintic, antiinflammatory, for abscesses.)

in China: kuo ye feng che zi

in India: dulsoni, gamgoli, jelosi, pee-ula

Combretum longispicatum (Engl.) Engl. & Diels (*Cacoucia longispicata* Engl.)

East Africa, Tanzania. Climbing shrub, woody vine, stem brown-grey, twining branches, flowers pink red, fruit green-yellow

See *Histoire des plantes de la Guiane Française* 450, t. 179. 1775, *Die Pflanzenwelt Ost-Afrikas* C: 293. 1895, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 95. 1899

(Poisonous.)

in Tanzania: mweembe, mweembea

Combretum micranthum G. Don (*Bureava crotonoides* Baill.; *Combretum altum* Perr.; *Combretum parviflorum* Rchb.; *Combretum raimbaultii* Heckel)

Nigeria. Shrub or bush, twigs reddish, leaves opposite, small flowers on short axillary clusters or fasciculate spikes, whitish corolla, fruits glabrous 4-winged, savanna

See *Edinburgh Philosophical Journal* 11: 347. 1824 and *Journal of Ethnopharmacology* 21: 109–125. 1987, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 97: 327–336. 2005, *Journal of Ethnopharmacology* 103: 350–356. 2006, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Journal of Ethnopharmacology* 105: 387–399. 2006, *Journal of Ethnopharmacology* 115: 387–408. 2008

(Decoction of the root for the treatment of Guinea worm infestation. The decoction from the leaves of the plant, together with those of *Scoparia dulcis*, used for fever. Leaves, fruits and stem antimicrobial, wound healing, febrifuge, diuretic and antidiuretic, hypotensive, antidote, detoxicant, anthelmintic.)

in English: kinkeliba bark

in Uganda: ioro

in W. Africa: kahajaga, nyanyaka

Combretum mossambicense (Klotzsch) Engl. (*Combretum armatum* Phillips; *Combretum cataractarum* Diels; *Combretum detinens* Dinter; *Poivrea mossambicensis* Klotzsch)

East Africa, Malawi, Tanzania. Shrub or small tree, scrambler, whippy stems, few very long arched-straggling branches, flowering when leafless, corolla pink to white, filaments white, anthers brick-red, dry woodland, flowers have slightly unpleasant musty odor or cool light fresh odor

See *Die Pflanzenwelt Ost-Afrikas* C: 292. 1895

(A drastic purge.)

in English: knobbly combretum, Mozambique combretum, shaving-brush combretum

in S. Rhodesia: bondolokoto, marowe

in Southern Africa: knoppiesklomp; mubondolokoto (Shona); khulavusiku (Tsonga); gopokopo-bani (Venda); mochekesane (Kololo: Barotseland)

Combretum mucronatum Schumach. & Thonn. (*Combretum mucronatum* Schumach.; *Combretum olivaceum* Engl.; *Combretum smeathmannii* G. Don)

Guinea. Liana, shrub, climbing, white fragrant flowers, winged fruits

See *Beskrivelse af Guineiske planter* 184–185. 1827, *Transactions of the Linnean Society of London* 15: 424. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 204–205. 1828

(Against Guinea worms.)

in Sierra Leone: hapkpa nyamui

in Yoruba: abee, hewu hewu

in Zaire: futa

Combretum nanum Buch.-Ham. ex D. Don (*Combretum nanum* Buch.-Ham.)

Himalaya, India. Seeds eaten

See *Prodr. Fl. Nepal.* 219. 1825

(For cholera, dysentery, colic, stomachache; root paste applied on head of infant to expel intestinal worms.)

in India: bhuidaudi, dudhel, kaikayi, vatmangi

Combretum nelsonii Dümmer

South Africa.

See *Gardener's Chronicle & Agricultural Gazette* III, 53: 164. 1913, *South African Journal of Botany* 73(2): 173–183. 2007

(Antifungal.)

Combretum nigrescens King

SE Asia, India. Climber

See *Journal of the Asiatic Society of Bengal.* Part 2. *Natural history* 66: 340. 1897

(For wounds, septic wounds, scurvy, pound the leaves and poultice.)

Malay name: akar chinias

in Sarawak: engkrapot, kasiah

Combretum nigricans Lepr. ex Guill. & Perr. (*Combretum elliotii* Engl. & Diels; *Combretum nigricans* Guill. & Perr.; *Combretum nigricans* var. *elliotii* (Engl. & Diels) Aubrév.)

Tropical Africa, Ghana. Tree

See *Florae Senegambiae Tentamen* 1: 290. 1833, *Monographien afrikanischer Pflanzen-Familien und -Gattungen Combret.* 42. 1899

(Decoction of stem with leaves for hematuria. Leaves, barks stem, branch and trunk for stomachache, gastritis; leaves and barks expectorant, for coughs. Leaves decoction for fish poison.)

in Benin: alémébé, bouhiki, chiriri, dagéra, dokigori, hégnimalé, koudékoudé, koulogoutémini, moufopaïe

in Central African Republic: dourou

in Mali: dokigori, guzon-kèlèlè, jirinimble, kashinyire, koto, macomina, nafongo, nafungo, nihipwin, samabili, samanbili

in Nigeria: alo, buiki, chiriri, dagara, dägara, dagera, délinya, tsiriry

in Senegal: buiti, busdé, buski, dooki gori, sama bali, tap

Combretum ovalifolium Roxb.

India.

See *Hortus Bengalensis*, or a catalogue ... 28. 1814, *Flora Indica*; or descriptions of Indian Plants 2: 226. 1832 and *J. Linn. Soc., Bot.* 55(356): 103–141. 1953, *Taxon* 28: 403. 1979

(Decoction of bark of *Albizia procera* with barks of *Combretum ovalifolium* and *Acacia ferruginea* and root of *Blumea eriantha* given as an antidote for snakebite.)

Combretum padoides Engl. & Diels

Tanzania. A many-stemmed deciduous shrub or small tree, long trailing branches, scrambling, tiny white-cream-yellow sweet-scented flowers on single simple or branched loose spikes, rounded 4-winged fruit, bee forage, tender leaves eaten as vegetables, in riverine forests, coastal and swamp forests, on rocky hills

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 13, t. 2/B. 1899

(Roots and stem bark antibacterial, roots antifungal, stem bark cytotoxic. Saponins in leaves, used as a remedy for snakebite and wounds; roots used to treat hookworm infection.)

in English: thicket bushwillow, thicket combretum

in South Africa: boskasieboswilg

in Tanzania: mgona-nkolongo, mkowatama, msangate

Combretum paniculatum Vent. (*Combretum abbreviatum* Engl.; *Combretum pincianum* Hook.; *Combretum ramosissimum* Engl. & Diels)

Senegal. Shrub, spreading, woody, climber, scrambling, liana, scandent, stems with dull stout spines, papery leaves, orangish-red petals and stamens, glabrous winged fruits, flowers and fruits eaten by monkeys

See *Choix de plantes, dont la plupart sont cultivées* ... t. 58. 1808, *Botanical Magazine* t. 4262. 1846, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 3: 72. 1899 and *Journal of Ethnopharmacology* 12: 35–74. 1984

(Leaves infusion for diarrhea, dysentery, to stop bleeding. Veterinary medicine, root bark for fertility problems.)

in Central African Republic: mosisilingi

in South Africa: gopo-gopo, mukopo-kopo

in Zaire: kamba

Combretum petrophilum Retief

South Africa. Yellow flowers

See *Bothalia* 16(1): 44–45. 1986, *South African Journal of Botany* 73(2): 173–183. 2007

(Antifungal.)

Combretum pilosum Roxb. (*Combretum insigne* Van Heurck & Müll.Arg.; *Poivrea pilosa* (Roxb.) Wight & Arn.; *Poivrea pilosa* Wight & Arn.)

India, Himalaya, Thailand. Scandent shrubs, rusty, acuminate leaves, pink flowers in paniced spikes, winged fruits

See *Hort. Bengal.* 28. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 231–232. 1832, *Prodr. Fl. Ind. Orient.* 1: 317. 1834

(Tender shoots eaten for stomachache and intestinal worms; juice drunk for jaundice. Leaves febrifuge.)

in China: chang mao feng che zi

in India: bhoree loth, rickha, riekha, thoonia loth

Combretum platypetalum Welw. ex Laws. subsp. *baumii* Exell (*Combretum baumii* Engl. & Gilg)

Namibia, South Africa. Shrub, young leaves and branches densely covered with short silvery hairs, flowers in bright red clusters

See *Flora of Tropical Africa* [Oliver et al.] 2: 433. 1871 and *Kunene-Sambesi-Exped.* [Warburg] 320. 1903

(Roots decoction for diarrhea with blood in the stool.)

in English: red wings

in Southern Africa: mubupu

Combretum psidioides Welw. (*Combretum molle* R. Br. ex G. Don; *Combretum molle* Engl. & Diels)

Zambia, Tanzania, Angola. Tree or shrub, spreading, flaking bark, sweetly scent greenish white flowers in axillary spikes, sticky crimson winged fruit, in sandy woodland

See *Trans. Linn. Soc. London* 15(2): 431. 1827, *Bol. & Ann. Cons. Ultram.* Lisb. May 1856, Ser. I. No. 24, parte nao official, p. 249, no. 108. 1856, *Monogr. Afr. Pfl.* 3: 51. 1899

(Stem bark antifungal, roots tonic, leaves antibacterial. To treat diarrhea, muscle pain, malaria, rheumatic pain and edema. Aphrodisiac, galactagogue.)

in English: peeling-twig combretum, silver bushwillow

in Namibia: ngoalla

in South Africa: silwerboswilg

in Tanzania: mlama zambila

Combretum quadrangulare Kurz (*Combretum attenuatum* Wallich)

Burma (Myanmar), Thailand. A shrub or small tree, covered with sessile flat circular scales, branches quadrangular, leaves opposite, inflorescence axillary and terminal, petals broadly ovate white yellowish, pseudocarp 4-winged, seed fusiform, in lowland forest, can tolerate saline conditions

See *Numer. List* [Wallich] n. 3989. 1831, *Journal of the Asiatic Society of Bengal.* Part 2. *Natural history* xliii: 188. 1874 and *Phytochemistry* 49(3): 835–838. 1998, *Journal of Natural Products* 63(1): 57–64. 2000, *Chemical and Pharmaceutical Bulletin Tokyo* 48(4): 496–504. 2000

(Roasted seeds, bark or leaves anthelmintic. Sapwood for threadworm; seeds or whole plant for roundworm and gastro-intestinal ailments associated with intestinal parasitism in children. Roots alterative and anthelmintic, for abscesses, gonorrhoea. Leaves antipyretic, for wounds and dysentery. Whole plant against abscesses in infants, and against stomachache.)

in Cambodia: sang ke, song ke

in Thailand: chong khae, kae, khon khae, phaeng, sakae, sakae naa, sang kae

in Vietnam: ch[aa]n b[aaf]u, ch[uw]n b[aaf]u, tr[aa]m b[aaf]u

Combretum racemosum P. Beauv.

Cameroon, Tanzania. Shrub, liana, climber, twiner, scrambler, very young leaves whitish, leaves papery, bracts purple-white, flowering bracts whitish with distinct reddish-purple stain, lower leaf veins and filaments red, young fruits and flowers greenish-white, inflorescences red, petals and stamens dark red, flowers red with long exerted stamens, open area, in streamside vegetation

See *Flore d'Oware* 2: 90, t. 118. 1820

(Roots and young leaves anthelmintic. Leaves infusion, a bath, anthelmintic, wound dressing, for stroke, hypertension, yellow fever, cough.)

in Cameroon: mososongoh

in Central African Republic: embema

in Congo: nsonsumbi

in Nigeria: ebe-bin, ogan pupa

Combretum raimbaultii Heckel

Nigeria. Shrub

See *Edinburgh Philosophical Journal* 11: 347. 1824 and *Journal of Ethnopharmacology* 21: 109–125. 1987, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 97: 327–336. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Journal of Ethnopharmacology* 105: 387–399. 2006

(Antimicrobial, antidote, astringent, febrifuge, diuretic, hypotensive, detoxicant.)

in Nigeria: geza

Combretum roxburghii Spreng. (*Combretum decandrum* Jacq.; *Combretum decandrum* Ruiz & Pav. ex G. Don; *Combretum decandrum* Roxb., nom. illeg.; *Combretum roxburghii* G. Don; *Pentaptera roxburghii* Tul.; *Poivrea roxburghii* DC.)

India. Shrub, woody, scrambling, climber, warty bark, elliptic-lanceolate pubescent leaves, greenish-white flowers in dense inflorescences, axillary and terminal panicles, oblong ovoid fruits dry with papery wings

See *Iter Hispanicum* 308. 1758, *Enumeratio Systematica Plantarum* 19. 1760, *Plants of the Coast of Coromandel* 1: 43, pl. 59. 1795–1798, *Systema Vegetabilium*, editio decima sexta [Sprengel] 2: 331. 1825, *Trans. Linn. Soc. London* 15(2): 429. 1827, *Prodr.* (DC.) 3: 18. 1828, *Gen. Hist.* 2: 665. 1832, *Ann. Sci. Nat., Bot.* sér. 4, 6: 84. 1856, *FBI* 2: 452. 1878

(Seed oil applied to eczema. Leaves for skin diseases; dried leaves pounded with black peppers given with water to check diarrhea, malaria and gastrointestinal disorders; leaf juice applied to treat wounds between the toes. Fresh stem bark chewed as a masticatory.)

in India: ainti, arikota, arkeng-rikang, aten, bain lewa, bandarebhra, boddu, bontatige, dagi shing, dhoba lota, droa chali, du grak, ducherek, dugi shing, dugrak, dugrek, janoltoda, jonari lewa, keuti, kevtilaha, koldam hrui, lota chali, mandalatige, mandratiga, manertige, mei longkhasaw, nallapippindatheega, nallapippindatige, peyiraimbaddi, peyiraru, peyyareyyibaddu, peyyarutheega, pormultonda, punk, rampamaredu, rasong, ruel, ther sali, tirumal, tita sali, vadalam, vedala, yadala

in Nepal: jhyaringe

Combretum schumannii Engl. (*Combretum engleri* Schinz)

Tanzania. Small spreading tree, shrub, inflorescence a short axillary sticky spike, pale yellow scented flowers, indehiscent 4-winged nut

See *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1894: 34. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 289. 1895

(Pulp made from the root bark applied to swellings. Heated leaves applied to the chest to treat pneumonia, leaves also used to treat epilepsy and headache.)

in English: forest tree combretum, sand bushwillow

in Tanzania: mgongolo, mgurure, mpera-mwitu

Combretum sondaicum Miq. (*Combretum oliviforme* A.C. Chao; *Combretum oliviforme* var. *yaxianense* Y.R. Ling)

Thailand and Peninsular Malaysia. A scandent shrub or liana, leaves opposite, inflorescence a terminal panicle of head-like spikes or racemes, petals obovate to suborbicular greenish white, pseudocarp suborbicular 4-winged

See *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 327. 1861 and *Acta Phytotaxonomica Sinica* 7(3): 244–245, pl. 54, 1–4, pl. 55, 18, pl. 58, f. 1, 2. 1958, *Acta Phytotaxonomica Sinica* 19(3): 388–389, pl. 2. 1981

(Leaves and roots used for poulticing boils, boil the roots and the leaves together and poultice; leaves febrifuge, applied to soothe a headache.)

in China: lan xing feng che zi

in Indonesia: akar gambir-gambir, bayit jaha, sungsung ayer
Malay name: akar chinass

in Vietnam: ch[uw]n b[aaf] sun da, tr[aa]m b[aaf]ju sun da

Combretum tetralophum C.B. Clarke (*Combretum tetragonocarpum* Kurz var. *tetralophum* (C.B. Clarke) M.G. Gangop. & Chakrab.)

India. Climber

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 41(2): 306. 1872, *The Flora of British India* 2: 454. 1878 and *Journal of Economic and Taxonomic Botany* 17: 697. 1993

(Vermifuge, leaves are eaten.)

in Sarawak: akar gelam

Combretum trifoliatum Vent. (*Cacoucia trifoliata* (Vent.) DC.; *Cacoucia trifoliata* DC.; *Combretum lucidum* Blume)

Thailand and Peninsular Malaysia. A climbing or scrambling shrub, young branches pubescent, leaves elliptical to lanceolate, inflorescence an axillary or terminal panicle, white or yellowish-white flowers in whorls of 3 sweet-scented, petals narrowly elliptical densely pubescent, winged pseudocarp glabrous shiny black-brown, along banks of watercourses

See *Choix de plantes, dont la plupart sont cultivées ...* t. 58. 1808, *Bijdr. Fl. Ned. Ind.* 13: 641. 1826, *Prodr.* (DC.) 3: 22. 1828

(Seeds a vermifuge; fruits anthelmintic. Roasted seeds mixed with maize, ground and made into pills chewed as a tonic for the gums and a remedy for angina. Juice used for dysentery.)

in Cambodia: trâhs, tras, tro

in Laos: ben nam

in Malaysia: akar song-song barus, song-song barus, sonsong barus, sonsong harus

in Thailand: chut, puei, yaan tut

in Vietnam: tr[aa]m b[aaf]ju ba l[as]

Combretum woodii Dümmer (the specific name after the Natal botanist John Medley Wood, 1827–1915, he wrote “Poisonous plants.” *Natal Mercury*. 1894 and “Indigenous food plants.” *Rep. Colon. Herb. (Natal)* 1900: 12–24. 1901)

South Africa. Tree, white younger leaves around flower spikes, flowers in short spikes, fruits 4-winged

See *Gardener's Chronicle & Agricultural Gazette* III, 53: 181. 1913

(Sawdust irritant.)

in English: false forest bushwillow, large-leaved forest bushwillow, Wood's combretum

in Southern Africa: basterbosvaderlandswilg, grootblaarvaderlandswilg, iWaphu, Mbondvo sehlati, umBondwe

Combretum zeyheri Sond. (the specific name after the German botanist and plant collector Carl Ludwig Philipp

Zeyher, 1799–1858; see *Catalogue of the Books, Manuscripts, Maps and Drawings in the British Museum (Natural History)*. 2: 504 and 5: 2389. Weinheim 1964

Tanzania. Tree, shrub or small tree, open spreading crown, drooping branches, sweetly scented yellowish flowers in axillary spikes, 4-winged fruits, along stream bank, in *Brachystegia* woodland, rocky grassland

See *Linnaea* 23: 46. 1850

(Extract of fruits, stem bark and roots antibacterial; fruit extract very cytotoxic. Leaves infusion taken for coughs. Dried roots and leaves used for diarrhea, bloody diarrhea, vomiting, malaria, scorpion bites, coughs, colic, smallpox, dry wounds, schistosomiasis, back and joint pain. Roots decoction drunk for fever, syphilis, gonorrhoea, stomach pain.)

in English: large-fruited bushwillow, large-fruited combretum, Zeyher's bushwillow

in Namibia: nave, ngoma

in N. Rhodesia: muhuhu

in Southern Africa: blassklapper, fluisterboom, kiere-klapper, Nicholas-klapper, Niklaasklapper, peulboom, raasblaar, raasbos, warmkos, wurmhout; umBondwe-asebudwini, umBondwe wasembundwini (= the umBondwe of mounds, the umBondwe of higher ground), umBondwe-mhlophe (Zulu); umBondo omhlophe (Swazi); mafamba-a-borile, mphuba (Tsonga); modubana, lesapo (Western Transvaal, northern Cape, Botswana); mokabi, moduba, moluba (North Sotho); mufhatela, mufhatela-thundu (= building material of new arrival) (Venda); mosinsi (Subya); msana (Swahili); muruka, muTembere (Shona); omushendje (Ovambo)

in S. Rhodesia: muKenge, muRuka, umBonda

in Tanzania: ilama, kakati, llama, mhanyati, mkoyoyo, mlama, mnana dume, mnyahati, msana, muhanyati, munyahati

Commelina L. Commelinaceae

Dedicated to the Dutch botanists Commelin or Commelij, Jan Commelin (1629–1692) and his nephew Caspar(us) Commelin (1667/1668–1731), authors of *Horti Medici Amstelodamensis Rariorum ... Plantarum ... Descriptio et Icones*. Amsterdam 1697–1701; Caspar, physician and professor, wrote *Flora malabarica*. Leyden 1696; Jan was the first botanist of the Hortus Medicus of Amsterdam, Pieter Hotton was appointed as his successor (with the title of *cultor plantarum exoticarum*). See Carl Linnaeus, *Species Plantarum*. 40–42. 1753, *Genera Plantarum*. Ed. 5. 25. 1754 and *J. Arnold Arbor*. 18: 64–66. 1937, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 213. 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 370. 1965, D. Onno Wijnands (1945–), *The Botany of the Commelins*. Zambia, Kalahari desert. Shrub or small tree, branchlets not spine-tipped, latex sticky, flowers in axillary cymes, fruits minutely apiculate, refreshing sweet roots chewed as a source of water, very light wood, in *Colophospermum mopane* woodland, easily confused with *Commiphora tenuipetiolata*

See *Monographiae Phanerogamarum* 4: 24. 1883 and *Journal of Vegetation Science* 3(2): 261–266. 1992

(Roots boiled in water, then used to treat high blood pressure and diarrhea. Sacred tree.)

in English: Angolan commiphora, commiphora, poison-grub, sand commiphora, sand corkwood

in Namibia: hu'h, iinas, mughogho, oshiwowo, sandkanniedood

in South Africa: sandkanniedood

Commiphora berryi Engl. (*Balsamodendrum berryi* Arn.; *Commiphora berryi* (Arn.) Engl.)

India. Thorny shrub, drought resistant

See *Monographiae Phanerogamarum* 4: 17. 1883 and *Food and Chemical Toxicology* 46(9): 3182–3185. 2008

(Used in Ayurveda and Sidha. Gum hepatoprotective, antibacterial and antioxidant, used for snakebite and scorpion sting, mixed with hot milk given for hysteria and nervous disorders.)

in English: Indian balm of Gilead

in India: benda, chilla kampa, gajjilikai, gejala kaayi, guchhanne kaayi, guggilamu, kondaraagi, mudgiluvai, mul kiluvai, mullu betta maavu, mullu bettamaver, mullukiluvai, mullukiluvan, mulu kilivary, muluyishane

Commiphora boiviniana Engl. (*Commiphora edulis* Engl. subsp. *boiviniana* (Engl.) J.B. Gillett)

East Africa. Slender tree, shrub, multistemmed, white sap, yellowish-green petals, very variable species

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 486. 1912, *Flora of Tropical East Africa Burseraceae*: 65. 1991

(Highly toxic resinous sap of the inner bark. Arrow poison.)

in Kenya: aba fuka, baamba, laimai, laiyamai, mashan

in Tanzania: danda chindi, kilemba, mburusigi, mfu

Commiphora caudata Engl. (*Commiphora caudata* (Wight & Arn.) Engl.)

India. Tree, small flowers, juicy pericarp

See *Monographiae Phanerogamarum* 4: 27. 1883

(Used in Ayurveda and Sidha. Leaves with goat milk taken as sexual stimulant in males. Hepatoprotective, febrifuge, antibacterial and antioxidant. Stem exudation, gum, mixed with water and used as mouth wash to cure mouth ulcer; gum also used for wound healing and rheumatoid arthritis.)

in English: hill mango

in India: assuraada, atakamikam, atakamikamaram, hasuvaara, idinjil, ikkada, ikkata, itinjil, kalmaavu, karpurakiluvai, kattukkiluvai, kiluvai, kond-amavu, konda maavu, konda-mamidi, konda mugur, konda rega, kondamaamidi, kondamavu, kondamukkadi, kondaraavi, magalinga,

malaikkiluvai, malaima, malankiluvai, netta maamidi, paccaikkiluvai, perunkiluvai, urukkutanaiparpamakki, vaeta-pathri, venkiluvai, vetapatri, vetkiluvai

Commiphora dalzielii Hutch.

West Africa, Ghana. Shrub or tree, short spiny branchlets, aromatic, open coastal savanna, dry regions, survives fire damage

See *Plantarum Rariorum Horti Caesaris Schoenbrunnensis* 2: 66. 1797 and *Kew Bull.* 1929, 25. 1929, *Flora of West Tropical Africa* [Hutchinson & Dalziel] ed. 1 1: 488. 1928

(Resinous. Resin for medicinal plasters.)

Commiphora edulis Engl. (*Commiphora chlorocarpa* Engl.; *Commiphora edulis* (Klotzsch) Engl.; *Hitzeria edulis* Klotzsch)

South Africa. Small tree or shrub, multi-stemmed, milky juice when cut, branchlets not spine-tipped, small yellow-green flowers, fleshy fruits eaten by baboons and birds

See *Monographiae Phanerogamarum* 4: 22. 1883

(Leaf and stem anticancer; roots to treat stomach problems in women.)

in English: light-stemmed commiphora, rough-leaved corkwood

in Southern Africa: skurweblaarkanniedood; shipondoti, xipondoti (Thonga or Tsonga); moroka (Western Transvaal, northern Cape, Botswana)

in Tanzania: mtwintwi

Commiphora eminii Engl. subsp. *zimmermannii* (Engl.) J.B. Gillett (*Commiphora hornbyi* Burt; *Commiphora kyimbilensis* Engl.; *Commiphora missionis* Chiov.; *Commiphora puguensis* Engl.; *Commiphora zimmermannii* Engl.)

Tanzania. Tree or shrub, slow growing with few lateral roots, white latex

See *Kongliga Svenska Vetenskapsakademiens Handlingar* 40: 282, t. 9. 1779, *Die Pflanzenwelt Ost-Afrikas* C: 230. 1895 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 154. 1910, *Bulletin of Miscellaneous Information Kew* 1935: 112. 1935, *Bulletin du Jardin botanique national de Belgique / Bulletin van de National Plantentuin van België* 60(1/2): 213–221. 1990, *Flora of Tropical East Africa Burseraceae*: 57. 1991, *Africa: Journal of the International African Institute* 65(2): 217–235. 1995

(Cure afterbirth, bleeding. Purgative.)

in Kenya: kitungati, mururi, mutunguka

in Kikuyu: mukungugu

in Tanzania: idondo, isume, mnyakun, mnyeleta nguye

Commiphora erlangiana Engl.

Tropical Africa, Ethiopia. Shrub or tree, flowers in drooping racemes, dark red petals

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(3): 311. 1904

(Poisonous resin, also used for poisoning hyenas. Roots for stomachache, postpartum remedy, expulsion of placenta after childbirth. Arrow poison.)

in Somalia: ba aror, dunkal

Commiphora erythraea Engl.

East Africa. Often confused with *Commiphora kataf*

See *Monographiae Phanerogamarum* 4: 20. 1883 and *Natural product communications* 4(12): 1751–1754. 2009

(Stir gum in cold water, wash body or apply to wounds, scabies. Veterinary medicine, to stop bleeding.)

in Kenya: hagar

Commiphora glandulosa Schinz (*Commiphora pyracanthoides* Engl. subsp. *glandulosa* (Schinz) Wild; *Commiphora pyracanthoides* subsp. *glandulosa* Wild)

Tropical Africa. Shrub or small tree, branchlets spine-tipped, small reddish bell-shaped flowers, calyx covered with glandular hairs, red fleshy berry, leaves browsed

See *Bull. Herb. Boissier* Sér. II. viii. 633. 1908

(Leaf and stem anticancer.)

in English: tall common corkwood, tall firethorn corkwood

in Southern Africa: groot gewone kanniedood, grootdoringkanniedood, xifati; iMinyela, isiNgankomo (Zulu); muBwabwa (Shona)

in Southern Rhodesia: muBwabwa, muSambwa

in Swaziland: liMinyela

Commiphora guidottii Chiov. (*Commiphora guidottii* Chiov. ex Guid.)

Somalia. Shrub or tree, erect contracted inflorescence, creamy petals

See *Rivista Ital. Essenze Profumi* 13: 232. 1931, *Flora Somalia* 2: 91, f. 54, 55. 1932

(Poisonous resin.)

in Somalia: addi, dunkal, garaho, hadi

Commiphora guillauminii H. Perrier

Madagascar. Shrub, white latex

See *Mémoires du Muséum National d'Histoire Naturelle* 18: 281. 1944

(Bark to treat wounds.)

in Madagascar: arofy vaventy ravina

Commiphora habessinica Engl.

East Africa. Spiny tree or shrub, milky sap, resinous odor, yellow flowers

See *Monographiae Phanerogamarum* 4: 10. 1883

(Veterinary medicine, stem bark for diarrhea, dysentery.)

in Kenya: oloilupai

Commiphora harveyi Engl. (*Balsamea harveyi* Engl.; *Commiphora harveyi* (Engl.) Engl.; *Protium africanum* Harv.) (the name of the species honors William Henry Harvey, 1811–1866, Irish botanist; see Robert Lloyd Praeger (1865–1953, d. Belfast), “William Henry Harvey.” in Francis Wall Oliver (1864–1951), ed., *Makers of British Botany*. 204–224. Cambridge 1913, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 135. Boston 1965, D.A. Webb, “William Henry Harvey, 1811–1866, and the tradition of systematic botany.” *Hermathena*. 103: 32–45. 1966, E. Charles Nelson, “William Henry Harvey: A Portrait of the Artist as a Young Man.” *Curtis's Botanical Magazine*. Volume 13. 1: 36–41. February 1996)

South Africa. Tree, branchlets not spine-tipped, small creamy flowers borne in panicles, pointed fleshy spherical berry eaten by monkeys and birds

See *Monographiae Phanerogamarum* 4: 25. 1883

(For rheumatic pain.)

in English: bronze paper commiphora, copper-stem corkwood, corkwood, Harvey's cork tree, red-stem corkwood

in Southern Africa: kanniedood, koperstamkanniedood, rooistamkanniedood, umNumbi; iMinyela, uMinyela, umBumbungane, uSingankomo (Zulu); iHlunguthi, umHlunguthi (Xhosa)

in Swaziland: umbangandlala, umnumbi

Commiphora holtziana Engl.

East Africa, Somalia, Kenya. Small tree

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 310. 1904, *Flora of Tropical East Africa Burseraceae*: 81. 1991, *Phytochemistry* 69(8): 1710–1715. 2008

(Antiectoparasitic, against the cattle tick.)

Commiphora incisa Chiov.

East Africa. Shrub, spiny, creamy clear sap

See *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana Coll. Bot.*: 45. 1916, *Miss. Somal. Ital. Merid., Relaz.* 236. 1916

(Veterinary medicine, insecticide, insect repellent, for external parasitism.)

Commiphora kataf (Forssk.) Engl. (*Amyris kataf* Forssk.; *Balsamodendrum kataf* Kunth; *Commiphora*

allophylla Sprague; *Commiphora erythraea* (Ehrenb.) Engl.; *Commiphora holtziana* Engl. subsp. *holtziana*; *Commiphora holtziana* subsp. *microphylla* J.B. Gillett; *Commiphora kataf* Engl.; *Commiphora kataf* subsp. *turkanaensis* J.B. Gillett; *Commiphora lughensis* Chiov.; *Commiphora pseudopaolii* J.B. Gillett; *Commiphora somalensis* Engl.; *Hemprichia erythraea* Ehrenb.)

Tropical Africa.

See *Fl. Aegypt.-Arab.* 80. 1775, *Ann. Sci. Nat.* (Paris) 2: 349. 1824, *Linnaea* 4: 396. 1829, *Monographiae Phanerogamarum* 4: 19. 1883 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 310. 1904, *The Journal of Ecology* 40(1): 91–124. 1952, *Journal of Tropical Ecology* 1(1): 65–87. 1985, *Flora of Tropical East Africa Burseraceae*: 81. 1991, *Natural Product Communications* 4(12): 1751–1754. 2009

(Used in Unani and Sidha. Orally, used for indigestion, ulcers, colds, cough, asthma, bronchial congestion, arthritic pain, leprosy, syphilis, as a stimulant, antispasmodic, and to increase menstrual flow. Topically, used for mild inflammation of the oral and pharyngeal mucosa, itching, scabies, wounds, aphthous ulcers, gingivitis, hemorrhoids, abrasions, furunculosis.)

in English: bdellium of Bombay, bisabol myrrh, bursa opopanax, coarse myrrha, opopanax, opopanax myrrh tree, perfumed bdellium, scented myrrh

in India: camuttirakkukkil, cayintavakukkulu, cintukukkil, habak-hadi

Commiphora kerstingii Engl.

West Africa, Togo, Nigeria. Tree, savanna

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 152. 1910

(Bark used as an antidote to arrow poison. Magic, ritual.)

in Nigeria: bagana, bar na gada, bazana, dale, daleji, dali, garkuwar-wuta, hana gobara, hana goobarà, gurzun dali, kaabiije, kaabiwal, kabiwal, kwaor

Commiphora kua (R.Br. ex Royle) Vollesen (*Balsamodendrum abyssinicum* O. Berg; *Balsamodendrum habessinica* O. Berg; *Balsamodendrum kua* R.Br. ex Royle; *Commiphora abyssinica* (O. Berg) Engl.; *Commiphora assaortensis* Chiov.; *Commiphora atramentaria* Chiov.; *Commiphora bruceae* Chiov.; *Commiphora candidula* Sprague; *Commiphora crenulata* A. Terracc. ex Chiov.; *Commiphora danicaliensis* Chiov.; *Commiphora ellenbeckii* Engl.; *Commiphora flaviflora* Engl.; *Commiphora gowllo* Sprague; *Commiphora gracilispina* J.B. Gillett; *Commiphora habessinica* (O. Berg) Engl. subsp. *habessinica*; *Commiphora habessinica* subsp. *tanganyikensis* J.B. Gillett; *Commiphora habessinica* var. *crenulata* A. Terracc.; *Commiphora habessinica* var. *simplicifolia* Schweinf.; *Commiphora incisa* Chiov.; *Commiphora kua* (J.F. Royle) Vollesen; *Commiphora kua*

var. *gowllo* (Sprague) J.B. Gillett; *Commiphora lindensis* Engl.; *Commiphora madagascariensis* auct.; *Commiphora playfairii* auct.; *Commiphora rivae* auct.; *Commiphora salubris* Engl.; *Commiphora subsessilifolia* Engl.)

Somalia. Shrub or tree, branches recurved downward, white creamy milky sap, pleasant resinous odor

See *Monographiae Phanerogamarum* 4: 10. 1883 and *Hooker's Icon. Pl.* 32: t. 3109. 1927, *Nordic Journal of Botany* 4(1): 37. 1984, *Flora of Tropical East Africa, Burseraceae*: 19. 1991

(Spines are poisonous.)

Commiphora madagascariensis Jacq. (*Balsamodendrum africanum* var. *habessinicum* (O. Berg) Oliv.; *Balsamodendrum habessinica* O. Berg; *Balsamodendrum habessinicum* O. Berg; *Commiphora abyssinica* Engl.; *Commiphora abyssinica* (Engl.) Engl.; *Commiphora habessinica* Engl.; *Commiphora habessinica* (O. Berg) Engl.; *Commiphora salubris* Engl.; *Commiphora subsessilifolia* Engl.)

East Africa. Spiny tree, thorny shrub, straggling, sticky sap, resin very aromatic, green or yellow-green sweet scented flowers

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 66. 1797, *Ann. Nat. Hist.* 3(15): 87. 1839, *Bot. Zeitung* (Berlin) 20: 161. 1862, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 10. 1883 and *Bot. Jahrb. Syst.* 34(2): 303. 1904, *Bot. Jahrb. Syst.* liv. 294. 1917

(Sap and leaves analgesic, febrifuge, antimicrobial, anti-inflammatory. For abdominal pain, roots extract. Magic, against the bad spirits.)

in English: Abyssinian myrrh tree, Hotai myrrh

in Burundi: umudahwera, umutanyereza

in Tanzania: mtonto, muluba

Commiphora marlothii Engl. (the specific name after the South African (but German-born) pharmacist and botanist Hermann Wilhelm Rudolph Marloth, 1855–1931, author of *The Flora of South Africa*. Capetown, London 1913–1932 and *Dictionary of the common names of plants*, with list of foreign plants cultivated in the open. Cape Town, 1917)

South Africa. Small tree, sprawling, multi-stemmed, branchlets not spine-tipped, yellowish white aromatic latex, calyx and corolla light yellow, red fleshy berry, roots peeled and eaten

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 155. 1910

(Leaf anticancer; stem antimicrobial.)

in English: paper tree, paperbark corkwood, paperbark tree

in Southern Africa: papapa, papierbaskanniedood; mopapama (Mangwato dialect, Botswana)

in Rhodesia: Mpapapa (it's an onomatopoeic name, like the "sound of paper flapping in the wind")

in Southern Rhodesia: quoquodo

Commiphora merkeri Engl. (*Commiphora viminea* Burt Davy) (the specific name after the German plant collector Moritz Merker, d. 1908; see I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976)

South Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 155. 1910, *Journal of Ethnopharmacology* 12: 35–74. 1984

(Roots decoction or infusion aphrodisiac, for impotence. Resin fungicide.)

in English: zebra-bark corkwood, zebra commiphora

in South Africa: mutonyombidi, shifati

in Tanzania: ol dimuai

Commiphora mollis (Oliv.) Engl. (*Balsamodendron molle* Oliv.; *Commiphora cinerea* Engl.; *Commiphora mollis* Engl.; *Commiphora mollis* F. Hoffm.; *Commiphora ndemfi* Engl.; *Commiphora welwitschii* Engl.)

South Africa. Small tree, dense-crowned, sprawling, watery white latex, sticky resin, branchlets not spine-tipped, small dark yellow flowers, fleshy part of fruit sticky and aromatic, spine-like branch remnants, game and cattle browse on leaves and twigs

See *Flora of Tropical Africa* 1: 326. 1863, *Monogr. Phan.* [A. DC. & C. DC.] iv. 22–23. 1883, *Beitr. Kenntn. Fl. Centr.-Ost-Afr.* (1889) 21. 1889

(Stem extract antioxidant.)

in English: softly hairy commiphora, velvet corkwood, velvet-leaved corkwood

in Southern Africa: fluweelkanniedood, kuhuti; nkuhuti, shisenga, xisenga (Tsonga); muWawa (Shona); mmetlakgamelo (= for carving milkpails), mmetlakgamelo (North Sotho)

in Southern Rhodesia: imiNyela, muWawa

in Tanzania: mukunguu

Commiphora molmol (Engl.) Engl. ex Tschirch (*Commiphora molmol* (Engl.) Engl.; *Commiphora molmol* Engl. ex Tschirch; *Commiphora myrrha* (T. Nees) Engl. var. *molmol* Engl.)

East Africa. Shrub or tree

See *Monographiae Phanerogamarum* 4: 10. 1883, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 95. 1892 and *Handb. Pharmakogn.* 3: 1117. 1925, *Agents and actions* 17(3–4): 381–382. 1986, *Cancer Chemotherapy and Pharmacology* 33(2): 130–138.

1993, *Chemotherapy* 40(5): 337–347. 1994, Barnes, J et al. *Herbal Medicines*. Second Ed. London: Pharmaceutical Press 2002, *Die Pharmazie* 58(3): 163–168. 2003, *Journal of the Egyptian Society of Parasitology* 37(2): 449–468. 2007, *Journal of the Egyptian Society of Parasitology* 38(3): 763–796. 2008, *Journal of the Egyptian Society of Parasitology* 39(1): 47–58, 121–139. 2009, *Food and Chemical Toxicology* 48(1): 236–241. 2010

(Used in Ayurveda, Sidha and Unani. Topical preparations containing myrrh are reported to cause contact dermatitis. High doses may affect heart rate. Interaction with antidiabetic therapy is possible as hypoglycemic properties have been documented. Oil extract molluscicidal. Resin antiinflammatory, antidote, wound healing, antiparasitic, antimicrobial, antipyretic, nonmutagenic, antioxidative, stimulant, genotoxic, purgative, cytotoxic, anticarcinogenic, emmenagogue, antitumor, for inflammatory conditions, snakebite, vaginal trichomoniasis, stomach problems, indigestion, asthma, cough and other bronchial problems. Myrrh should not be used by pregnant women as it has abortifacient effects.)

in English: harobol myrrh, heera bol tree, hirabol myrrh, myrr

in India: guggula, heerabol, hirabol, hirabol karam, hirabol karam (kani) (saf), hirabol methia, hirabol methiya, miru, mur, mur makki, murmaki, murmakki, murr

Commiphora mossambicensis (Oliv.) Engl. (*Commiphora fischeri* Engl.; *Commiphora mossambicensis* Engl.; *Commiphora stolzii* Engl.; *Protium mossambicense* Oliv.)

Tanzania. A many-branched deciduous tree, spreading crown, thick rootstock, a yellow gum oozes out if cut becoming a hard clear resin, glue-like sap, tiny yellow-green flowers on axillary stalks, single-seeded soft fruit in dense rounded clusters, roots edible, fodder, browsed by goat and elephant, wooded grassland, open woodland

See *Monographiae Phanerogamarum* 4: 26. 1883, *Bot. Jahrb. Syst.* 20: 97. 1893 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 292–293. 1917

(Resinous, resin also used to dry up infected skin wounds; chewed young stem for coughs. Veterinary medicine, leaves decoction tonic, stimulant, leaves infusion febrifuge.)

in English: Mozambique commiphora, paperbark, paperbark tree, soft-leaved commiphora

in Southern Africa: gwatigwati, muBwabwa, muRgwiti, muTaswa, muZororo

in Tanzania: ikwandaja, intiwi, iporopotwa, iporotwa, iyela, mdonho, mponda, mpondo, mrondo, mtonto, mulonto, mutondo, mutonto, pumonoo

Commiphora mukul Engl. (*Balsamodendrum mukul* Hook. ex Stocks; *Balsamodendrum mukul* Hook.; *Commiphora mukul* (Hook. ex Stocks) Engl.)

India. Small tree, often branched near the base, when young a dense thorny shrub, oleo gum resin, arid rocky areas

See *Hooker's J. Bot. Kew Gard. Misc.* 1: 259. 1849, *Monographiae Phanerogamarum* 4: 12. 1883 and *JAMA: Journal of the American Medical Association* 290(6): 765–772. 2003, *The Annals of Pharmacotherapy* 38(7–8): 1222–1225. 2004, *Am. J. Health Syst. Pharm.* 62(10): 1012–1014. 2005, *Complementary Therapies in Medicine* 13(4): 279–290. 2005, *Ann. Pharmacother.* 40(11): 1984–1992. 2006, *Complementary Therapies in Medicine* 17(1): 16–22. 2009, *Pakistan Journal of Pharmaceutical Sciences* 23(4): 119–124. 2010

(Used in Ayurveda, Unani and Sidha. Guggul may cause stomach discomfort or allergic rash, dermatologic hypersensitivity reaction in some patients as well as other serious side effects and interactions, it should be avoided in pregnant or breast-feeding women and in children; a possible cause of rhabdomyolysis. Herbal extract from the resin antiinflammatory, cholesterol-lowering agent, hypolipidemic, antirheumatic, used in the treatment of rheumatism, gout, arthritis, hypercholesterolemia, dyslipidemia, obesity, neurological disorders, urinary disorders, skin diseases, swollen gums, chronic tonsillitis and ulcerated throat.)

in English: gum gugul, Indian bdellium, mukul myrr tree

in India: aflatan, ahavabhishta, attiram, bhutahara, boe jahudan, boejahudan, bolah, cutcam, devadhupa, deveshta, dhurta, divya, durga, erumaikan kungiliyam, gaughil, gogil, gugal, guggala, guggul, guggula, guggulu, gugguluh, gugul, gukkal, gukkulu, gulag, gulgulu, gulra, guluh, inkukam, iracakantam, jatala, jatayu, kalaniriyasa, kalaniryasa, kaucikatari, kaushika, kausikah, kou-shikaha, koushikhaka, koushikaha, kukkil, kukkulu, kumbha, kumbhi, kumbholu, kumbholukhalaka, kumuda, kunkiliyam, kunti, lekkatah, mahi-saksh gugal, mahisaksah, mahisaksagulgulu, mahisaksh, mahisaksi, mahishaksha, mahishakshaka, maicatci, maiccatitam, maisakshi, maisakukkilam, maisatchi kungiliyam, maisatchikungiliyam, maishakshi, marudishta, moql, moql-e-arzaq, moql-e-arzaqi, moql-e-arzaqi, mukul, muklearabi, muqhil, muqil, muql, muql-e-yahud, muqul, mysakhi-guggil, mysakhi-guggul, nishadhaka, palangkashara, palankasa, palankasha, pavandvishta, purah, puta, rakshoha, ranghanturb, sarvasaha, shambhava, shiva, tevakantam, tut-takomam, uddipta, ulukhalaka, usha, vayughna

in Tibetan: gu gul, gu-gu-la

Commiphora myrrha (T. Nees) Engl. (*Balsamea myrrha* (T. Nees) Oken; *Balsamodendrum myrrha* T. Nees; *Commiphora coriacea* Engl.; *Commiphora cuspidata* Chiov.; *Commiphora habessinica* (O. Berg) Engl. var. *grossedentata* Chiov.; *Commiphora molmol* (Engl.) Engl.; *Commiphora molmol* Engl. ex Tschirch; *Commiphora myrrha* Engl.; *Commiphora myrrha* var. *molmol* Engl.; *Commiphora playfairii* Engl.; *Commiphora playfairii* (Hook.f. ex Oliv.) Engl. var. *benadirensis* Chiov.; *Commiphora rivae* Engl.)

Somalia. Tall shrub, spreading, clear sap, thorny

See *Annales des Sciences Naturelles (Paris)* 2: 348. 1824, *Pl. Medicin.* 1: t. 357. 1828, *Allgemeine Naturgeschichte* 3(3): 1760. 1841, *Monographiae Phanerogamarum* 4: 10. 1883, *Ann. Ist. Bot. Roma*, vii. 17. 1897 and *Handb. Pharmakogn.* iii. 1117. 1925, *Bull. Misc. Inform. Kew* 134. 1941, *Fl. Trop. E. Africa, Burser.* 26. 1991, *Journal of Ethnopharmacology* 35: 25–63. 1991, *Holistic Nursing Practice* 21(6): 308–323. 2007, *Parasitology International* 58(3): 210–214. 2009

(Used in Ayurveda, Sidha and Unani. Patients who have sensitive skin should avoid topical products containing myrrh. High doses may affect heart rate. Resin antiseptic, anesthetic and antitumor, antineoplastic, antiparasitic and healing wounds. External use on inflammation of the mouth cavity, periodontitis, wounds, abscesses and pharyngitis; grind into powder and make into paste and apply to affected areas. For pain due to injuries, bruises, cold sores, rheumatoid arthritis, hemorrhoid, amenorrhea, bone and muscle ache, angina pectoris. Myrrh should not be used by pregnant women as it has abortifacient effects.)

in English: common myrrh, common myrrh tree, harobol myrrh, heera bol tree, hirabol myrrh, myrrh, official myrrh, true myrrh

in Arabic: myrrh

in China: mo yao, mokyak, mu yao

in India: balintrapolum, barbarah, bol, bola, bolah, caruk-karaippolam, civapolam, gandharasa, gandharasah, guggula, heerabol, hirabol, hirabol karam, hirabol karam (kani) (saf), hirabol methia, hirabol methiya, kanturu, kunkumatipam, kunkumatupam, kuntavilakkam, kunturu, miru, mur, mur makki, murmaki, murmakki, murr, narumpasa, narumpasamaram, nirlokam, polam, raktabol, rasagandha, rasam, saindhav, saindhava, samudraguggul, surasah, valattipolam, valendrabolam, valentira palam, valentira polam, valentirapolam, vellaipolam, vellaippa-polam, vellaippapolam, vellattipolam, vola

in Japan: motsuyaku

in Korea: yuhyang

in Tibetan: bo la bo ra pa, bo la bor pa

Commiphora neglecta Verdoorn

South Africa. Shrub or small tree, branchlets spine-tipped, watery latex, small yellow-green cup-shaped flowers, round fleshy red berry, roots peeled and eaten

See *Bothalia* vi. 214. 1951

(Stem extract antioxidant.)

in English: green-stem corkwood, neglected commiphora, sweet-root corkwood

in Southern Africa: groenstamkanniedood, soetwortelkanniedood; iMinyela, isiNgankomo (Zulu); amangwe azidlayo, shisenga, xisenga (Tsonga)

in Swaziland: liMinyela

Commiphora opobalsamum Engl. (*Amyris gileadensis* L.; *Amyris opobalsamum* L.; *Balsamodendrum gileadense* Kunth; *Balsamodendrum opobalsamum* Kunth; *Commiphora gileadensis* (L.) Chr.; *Commiphora gileadensis* (L.) M.R. Almeida, nom. inval.; *Commiphora opobalsamum* (L.) Engl.)

Southern Arabia, Abyssinia. Small tree, resinous, small reddish flowers, fruit reddish grey

See Linnaeus, Carl von (1707–1778), *Opobalsamum declaratum* in dissertatione medica ... / praesidio Caroli von Linne; submittit .. Wilhelmus Le Moine. 13 (–14), 14 (–15). Upsaliae 1764 [22 Dec 1764], *Ann. Sci. Nat.* (Paris) 2: 348–349. 1824, *Monographiae Phanerogamarum* 4: 15. 1883 and *Dansk Botanisk Arkiv* 4(3): 18. 1922, *Fl. Maharashtra* 1: 219. 1996, *Journal of Ethnopharmacology* 98(3): 287–294. 2005, *Journal of Asian Natural Products Research* 21(5): 383–391. 2007, *Phytochemistry* 68(9): 1331–1337. 2007, *Journal of Natural Products* 71(1): 81–86. 2008

(Used in Unani. Suspected of producing allergic effects, violent reactions. Hypotensive, bradycardiac, hepatoprotective, antiinflammatory, gastric anti-ulcer, antimicrobial, antimalarial, antiproliferative, antitumor, cytotoxic, antioxidant and estrogenic; used in diseases of the urinary tracts.)

in English: balm of Gilead, balm of Mecca, balsam of Gilead, balsam tree, Mecca balsam, Mecca myrrh

in India: mur makki

in Saudi Arabia: balessan

Commiphora paolii Chiov. (*Commiphora longipedicellata* Vollesen)

Somalia. Shrub, edible fruit

See *Miss. Somal. Ital. Merid., Relaz.* 236. 1916, *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* i. 46. 1916

(Bark extracts to accelerate delivery of human afterbirth, diluted bark extracts as tick repellent. Veterinary medicine, foot and mouth disease, decoction of bark used to wash the hooves; bark extracts for camel skin disorders.)

in Kenya: hagarso

Commiphora pedunculata Engl. (*Balsamodendrum pedunculatum* Kotschy & Peyr.; *Commiphora boiviniana* Engl.; *Commiphora pedunculata* (Kotschy & Peyr.) Engl.)

West Africa Senegal, Nigeria. Tree or shrub, stout, resinous, small black plum-like fruit, savanna

See Karl Georg Theodor Kotschy, 1813–1866, *Plantae tinneanae sive descriptio plantarum ... in septentrionali interiori Africae parte collectarum ... suis sumptibus ediderunt A.P.F. Tinne et J.A. Tinne.* 11, t. 5. Vindobonae 1867, *Monographiae Phanerogamarum* 4: 23. 1883 and *Botanische Jahrbücher*

für Systematik, Pflanzengeschichte und Pflanzengeographie 48: 486. 1912, *Flora of Tropical East Africa Burseraceae*: 65. 1991

(Astringent.)

in French: myrrhier soudanien

in Mali: barakante, barkante, lekotanga

in Nigeria: daashin jeii, luban, lubban, namijin daashii, namijin dashi

in Upper Volta: sabnughagha

Commiphora pteleifolia Engl. (*Commiphora africana* (A. Rich.) Engl.)

Tropical Africa. Shrubby liana, spiny, tree or shrub, white sap

See *Abh. Preuss. Akad. Wiss.* (1894) 16. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 229. 1895

(Leaves and sap analgesic, antimicrobial.)

in Tanzania: mtwitwi

Commiphora pterocarpa H. Perrier (*Commiphora grandifolia* Engl.)

Madagascar. Shrub or tree, inflorescence an axillary spike with flowers in fascicles, fruit a winged dehiscent compressed ovoid drupe

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 66. 1797, *Adansonia* 8: 71, t. 6. 1867, *Monographiae Phanerogamarum* 4: 25–26. 1883 and *Mémoires du Muséum National d'Histoire Naturelle* 18: 282–283. 1944, *Journal of Ethnopharmacology* 14: 159–172. 1985

(A decoction of the bark for ulcerated wounds.)

in Madagascar: arofy, daro

Commiphora puguensis Engl. (*Commiphora kymbilensis* Engl.) (Pugu Hills.)

Tanzania. Tree, weeping branches, flowers in axillary panicle cymes, calyx broadly campanulate, leaves aromatic and resinous

See *Bot. Jahrb. Syst.* xlv. 289. 1911, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 293–294. 1917, *The Journal of Ecology* 30(1): 65–146. 1942

(Branches infusion coagulant taken for afterbirth, bleeding.)

in Tanzania: idondo, isume, mnyakun

Commiphora pyracanthoides Engl.

South Africa. Small tree, multi-stemmed shrub, branchlets spine-tipped, white latex, small reddish bell-shaped flowers, calyx without any hairs, red fleshy berry eaten by birds, leaves browsed

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 368–369. 1899 and *Kew Bull.* 8: 105. 1953

(Leaf and stem anticancer. If eaten fruit said to produce a stinging sensation in the mouth.)

in English: common corkwood, cork tree, firethorn corkwood

in Southern Africa: doringkanniedood, gewone kanniedood, kanniedood, kurkbas; shifati, xifati (Tsonga); iMinyela, isiN-gankomo (Zulu)

in Swaziland: liMinyela

Commiphora rostrata Engl. (*Commiphora reflexa* Chiov.; *Commiphora robecchii* Engl.; *Commiphora rostrata* var. *reflexa* (Chiov.) J.B. Gillett)

Ethiopia, Somalia, Kenya. Erect, strong-smelling shrub, prostrate or scandent, stems exude a copious clear sap highly aromatic, lateral shoots end in strong spines, male inflorescence a branched cyme, narrow-stalked deep red flowers, red pointed fruits with wiry stalks, young leaves and shoots edible, stem pith chewed to relieve thirst, salty acid bitter sour leaves eaten raw, goats and sheep and camels browse the plants, in dry open *Acacia-Commiphora-Boswellia* bushland

See *Annuario del Reale Istituto Botanico di Roma* 7: 17. 1897 and *Flora Somala* 2: 88. 1932, *Economic Botany* 35(1): 96–130. 1981, *Phytochemistry* 27(8): 2519–2521. 1988, *Flora of Tropical East Africa Burseraceae*: 15. 1991, *Insect Science and its Application* 13(5): 679–683. 1992, *Journal of Ethnopharmacology* 112: 152–161. 2007

(Sap antimicrobial, insect repellent and antifungal. Bark or branches chewed or an infusion drunk for fever, colds and coughs. Leaves and young twigs chewed for coughs and chest problems; sap applied to sore eyes, painful. Veterinary medicine, to repel parasites such as lice, fleas, mites and ticks.)

in Kenya: choneh, dainjo, dirraa, eurumosing, galdayan, galida-ayen, hanguli, janau, jano, jenau, lekora, lmaini, lokimeta, ltilimani, munyei, mutunkuuri, udesi

Commiphora schimperi (O. Berg) Engl. (*Balsamodendrum schimperi* O. Berg; *Commiphora betschuanica* Engl.; *Commiphora schimperi* Engl.) (the specific name after the German botanist Andreas Franz Wilhelm Schimper, 1856–1901, in 1898–1899 with the German *Valdivia* Deep Sea Expedition (“Deutsche Tiefsee-Expedition”) for study of plankton, visited Cameroons, wrote *Taschenbuch der medicinisch-pharmaceutischen Botanik und pflanzlichen Drogenkunde...* Strassburg 1886, *Die indo-malaysche Strandflora ...* Jena 1891 and “Rhizophoraceae.” in *Nat. Pflanzenfam.* 3(7): 42–48. 1892 and 49–56. 1893; see F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 72. Utrecht 1971)

Ethiopia, Yemen, Somalia, Uganda, Tanzania, South Africa. A deciduous spiny shrub or small tree, stem with sharp thorns, branchlets spine-tipped, fairly strong resinous smell,

small red cup-shaped flowers, red fleshy berry with a distinct point, juicy sweet roots chewed, foliage browsed, resin exuded from the bark chewed, in *Acacia-Commiphora* bushland, wooded grassland

See *Annales des Sciences Naturelles (Paris)* 2: 348. 1824, *Botanische Zeitung. Berlin* 20: 162. 1862, *Monographiae Phanerogamarum* 4: 13. 1883

(Used in Ayurveda. Stem anticancer. Root infusion added to children’s milk as a tonic; the red inner bark boiled in tea. Against diarrhea drink decoction of bark.)

in English: glossy-leaved corkwood

in Kenya: ekwangorom, osilalei

in Southern Africa: blinkblaarkanniedood, seroka

in Tanzania: mrunye, mujuhu, myuhu

in India: bolah

Commiphora sphaerocarpa Chiov.

East Africa.

See *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana Coll. Bot.*: 48, f. 1. 1916, *Fitoterapia* 73(1): 48–55. 2002

(Antiinflammatory.)

Commiphora staphyleifolia Chiovenda (*Commiphora staphyleifolia* Chiov. ex Guidotti)

Somalia.

See *Riv. Ital. Ess. e Prof.* xiii. 233. 1931, *Flora Somala* 2: 97. 1932

(Poisonous resin.)

in Somalia: ba aror, dunkal

Commiphora stocksiana Engl. (*Balsamea stocksiana* Engl.; *Commiphora stocksiana* (Engl.) Engl.)

India.

See *Schriften der Berlinischen Gesellschaft naturforschender Freunde* 3: 127. 1782, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 41. 1881, *Monographiae Phanerogamarum* 4: 17. 1883

(Used in Ayurveda.)

in India: amisa, guggulu, mahisaksa, palankasa, purahvaya, purakya

Commiphora tenuipetiolata Engl.

South Africa. Shrub or small tree, many-branched, branchlets not spine-tipped, small green cup-shaped flowers, red round fleshy berry

See *Bot. Jahrb. Syst.* xlviii. 483. 1912

(Stem extract antioxidant.)

in English: satin-bark commiphora, white-stem corkwood
in South Africa: satynbaskanniedood, witstamkanniedood

Commiphora unilobata Gillett & Vollesen

Kenya, Ethiopia. Shrub, dark red petals, slender erect inflorescence

See *Kew Bulletin* 40(1): 73, f. 15, map. 8. 1985

(Poisonous.)

in Somalia: dunkal, goborosc

Commiphora viminea Burt Davy (*Commiphora merkeri* Engl.) (after the German plant collector Moritz Merker, d. 1908; see I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976)

Transvaal, Mozambique. Small tree, young branches spiny, yellowish flowers in small inconspicuous clusters on the spur-branchlets, red fleshy berry apex apiculate, seeds with an aril or aril-like structure, birds eat the fruits, leaves browsed, with *Colophospermum mopane*, along dry watercourses, in dry deciduous woodland; this species was formerly incorrectly identified as *Commiphora merkeri* in southern Africa and vice versa

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 144. 1910, *Man. Fl. Pl. & Ferns Transvaal* [Burt Davy] Pt. II. p. xxi. 485. 1932, *Kew Bull.* 1953: 104. 1953, Paraskeva M.P. et al. "The in vitro biological activity of selected South African *Commiphora* species." *J. Ethnopharmacol.* 2008 Jul. 2. 2008

(Stem with anticancer activity. Resin to treat skin disorders.)

in English: zebra-bark commiphora, zebra-bark corkwood, zebra commiphora

in Namibia: onangwi

in Southern Africa: sebrastamkanniedood, shifati, xifati

in Tanzania: ol-dimitil

in Zimbabwe: chifata, mupopo, siachimvwa

Commiphora wightii (Arn.) Bhandari (*Balsamodendron mukul* Hook. ex Stocks; *Balsamodendron roxburghii* Stocks; *Balsamodendron wightii* Arn.; *Commiphora mukul* (Hook. ex Stocks) Engl.; *Commiphora mukul* Engl.; *Commiphora roxburghii* Engl.; *Commiphora roxburghii* (Stocks) Engl.; *Commiphora roxburghii* Alston)

Pakistan, from Arabia to India. Shrub or small tree, aromatic, thorny and knotty, a resinous gum exudes from the branches, flowers red to pinkish white, vulnerable, endangered, used to adulterate myrrh, red ripe fruits eaten, in open dry zones

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 66. 1797, *Annals of Natural History* 3: 86. 1839 and *Ann. Roy. Bot. Gard. Peradeniya*, xi. 300. 1930, *Bulletin of the Botanical Survey of India* 6: 327. 1965, *Molecular Biology Reports* 37(2): 847–854. 2010

(Used in Ayurveda. Whole plant for fever and skin diseases. Woody portion of the plant and resin used to dry up infected skin wounds and pimples. Gum carminative, antispasmodic, anti-rheumatic, antiinflammatory, diaphoretic, aphrodisiac, snake and mosquito repellent, hypocholesteremic, to relieve muscle pain, to help heal sores, against rheumatoid arthritis, swellings, stomachache, menstrual disorders and stomach gas; resinous gum used internally in sciatica, arthritis and rheumatism, piles, indigestion, toxemia, obesity. Used in religion and magico-religious beliefs, the tree is considered sacred and it is not cut; the resin, *dhoop* or *dhup*, used for religious purposes, burnt as incense on the holy occasions.)

in English: guggul, Indian bdellium

in India: agaru, agilu, antu guggula, bodanki, erumai gung-giliyam, gugal, guggal, guggala, guggilamu, guggul, guggulu, gugul, gugul kan, gulag, kanguggal, kanguggul, kaushika, mahisakshi, mahishaksha, mahishakshi guggula, maisakshi, mukul, shuddhguggul

in Pakistan: gugal, gugar, guggul, kofi bood

Commiphora woodii Engl. (*Commiphora caryaefolia* Oliv.; *Commiphora caryifolia* Oliv.) (for the Natal botanist John Medley Wood, 1827–1915, author (with Maurice Smethurst Evans, 1854–1920, but for the first volume only) of *Natal Plants*. Durban 1898–1912)

South Africa. Tree, branchlets not spine-tipped, gum from the bark, creamy white flowers in dense flower heads, sexes on separate trees, round fleshy red berry, seeds eaten by birds

See *Bot. Jahrb. Syst.* xv. (1893) 97. 1893, *Hooker's Icon. Pl.* 23: t. 2287. 1894

(For skin diseases.)

in English: forest corkwood, wood's cork tree

in Southern Africa: boskanniedood; umHlunguthi (Xhosa); umuMbu, umuBu, uMinyela, umuNde wasehlathini, umuNde wehlathi, umDe-welathi, (Zulu); uMumbe, umNumbi (Swazi)

in Swaziland: umnumbi, umubu

Commiphora zanzibarica (Baill.) Engl. (*Balsamea zanzibarica* Baill.; *Commiphora spondioides* Engl.)

East Africa, Tanzania. Tree, many stemmed, white latex, red and cream cup-shaped flowers, sexes on separate trees, dangling racemes, brown fleshy berry apiculate, often confused with *Lannea schweinfurthii*

See *Adansonia* 11: 180. 1874, *Monographiae Phanerogamarum* 4: 28. 1883, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 371–372. 1899

(Wound healing. Veterinary medicine.)

in English: pendent-fruited corkwood, Pongola corkwood

in Southern Africa: hangvrugkanniedood, Pongolakan-niedood, Jobe's Commiphora (the common name after Jobe

Mafuleka, employee of the first collector of the plant, which was found at “Jobe’s Kraal”, near Makane’s Drift in Northern Zululand); uMinyela, umThekweni omncane (Zulu)

in Tanzania: mdizi

Commiphora zimmermannii Engl. (*Commiphora eminii* Engl. subsp. *zimmermannii* (Engl.) J.B. Gillett)

Tanzania.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 154. 1910, *Journal of Ethnopharmacology* 6: 29–60. 1982, *Flora of Tropical East Africa Burseraceae*: 57. 1991

(Roots antidote, for snakebites. Bark chewed for stomach-ache, indigestion, constipation, purgative. Branches extract a cure afterbirth, postpartum remedy, bleeding. Leaves decoction taken against sterility, infertility, malaria, fevers. Veterinary medicine, bark decoction for fevers.)

in Kenya: kitungati, mnyakwa, mururi, mutunguka, mutunguv

in Kikuyu: mukungugu

in Tanzania: idondo, isume, mbombwe, mfifina, mnyakun, mnyeleta nguye, msume, mtulansuwi

Comocladia P. Browne Anacardiaceae (Comocladiaceae)

Greek *kome* ‘hair of the head, tuft of hairs’ and *klados* ‘a branch’, the leaves are crowded near the top of the branch, see *The Civil and Natural History of Jamaica* in Three Parts 124. 1756, *Systema Naturae*, Editio Decima 10: 861. 1756.

Comocladia dentata Jacq.

South America, Caribbean. Shrub, flowers light yellow to creamy white

See Standley, P.C. & J.A. Steyermark, *Anacardiaceae*. In Standley, P.C. & Steyermark, J.A. (Eds), *Flora of Guatemala*—Part VI. *Fieldiana, Botany* 24(6): 177–195. 1949

(Said to be highly toxic to the touch, poisonous. The timber can cause dermatitis; the sap of some species causes blistering and prolonged inflammation similar to that caused by poison ivy. The dermatitis may be persistent as the resin contaminates clothing and tools. A vesicant paste from the roots to soften and lighten the skin.)

Common names: bastard brazil, guao, toothed maidenplum

Comocladia dodonea (Linnaeus) Urban (*Comocladia dodonea* Britton; *Comocladia dodonea* Urb.; *Comocladia ilicifolia* Sw.; *Ilex dodonea* L., Aquifoliaceae)

West Indies. Small tree, spindly, branching shrub, bark exuding a greenish latex, red purple flowers, shiny red drupes

See *Species Plantarum* 1: 125. 1753, *Prodr. Veg. Ind. Occ.* (Swartz) 17. 1788 [20 Jun–29 Jul 1788] and *Symbolae*

Comocladia P. Browne Anacardiaceae (Comocladiaceae)

Antillarum (Urban). 4(3): 360. 1910 [15 May 1910], *Bull. Torrey Bot. Club* xxxvii. 351. 1910, *Fl. Lesser Antilles* 5: 97. 1989

(Poisonous, toxic, blistering. This species has spiny leaves that can cause mechanical injury, and sap that can produce severe dermatitis. Used for colds, fever, invigorating baths.)

in English: Christmas bush

Comocladia domingensis Britton

West Indies. Shrub, exudate clear, clusters of dark red flowers at the end of branches

See *The Civil and Natural History of Jamaica* in Three Parts 124. 1756 and *Bull. Torrey Bot. Club* 37: 350. 1910

(Poisonous, toxic. The timber can cause dermatitis.)

Comocladia engleriana Loes.

Central America. Shrub or tree, multi-stemmed, latex, reddish flowers

See *Bulletin de l’Herbier Boissier* 3(12): 615–616. 1895 and *Listados Florísticos de México* 17: 1–41. 1997, *American Journal of Botany*. 89: 535–545. 2002

(Irritating sap.)

in Mexico: hinchador, incha huevo

Comocladia mollifolia Ekman & Helwig

South America.

See *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 22A(17): 22. 1929

(The milky juice causes poison ivy-like dermatitis.)

Comptonia L’Hérit. Myricaceae

For Hon. and Rev. Henry Compton, 1632–1713, in 1674 Bishop of Oxford, in 1675 Bishop of London, owner of a garden in Fulham Palace, author of *Episcopalia*: or, Letters of the Right Reverend ... Henry, Lord Bishop of London, to the clergy of his diocese. London 1686; see *Hortus Kewensis*; or, a catalogue ... 3: 334–335. 1789, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. London 1790, John Claudius Loudon (1783–1843), *Arboretum et fruticetum britannicum*. London [1835–] 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 151. 1864, *Die Natürlichen Pflanzenfamilien* 3(1): 28. 1893 and J. Britten, *The Sloane Herbarium* ... revised and edited by J.E. Dandy. 1958, M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. 117–118. London 1980.

Comptonia peregrina (L.) J.M. Coult. (*Comptonia ceterach* Mirbel; *Comptonia peregrina* var. *asplenifolia* (L.) Fernald; *Comptonia peregrina* var. *tomentosa* A. Chevalier; *Liquidambar peregrina* L.; *Myrica asplenifolia* L.; *Myrica asplenifolia* L.; *Myrica asplenifolia* L. var. *tomentosa* (A.

(Chev) Gleason; *Myrica comptonia* C. DC.; *Myrica peregrina* Kuntze; *Myrica peregrina* (L.) Kuntze)

North America, Canada. Perennial subshrub, shrub

See *Sp. Pl.* 2: 999, 1024. 1753, *Syst. Nat.* ed. 10, 2: 1273. 1759, *Hort. Kew.* 3: 334. 1789, *Mem. Torrey Bot. Club* 5(9): 127. 1894 and *Mémoires de la Société des Sciences Naturelles de Cherbourg* 32: 196. 1901, *Rhodora* 40(478): 410. 1938, *Phytotherapy Research* 21(6): 536–540. 2007, *Bioorganic & Medicinal Chemistry Letters* 18(21): 5745–5749. 2008

(Poisonous, stimulant, febrifuge, blood purifier, tonic, anthelmintic, antimicrobial, cytotoxic, analgesic, used in traditional medicine against cancer, scrofula, blisters, bladder inflammation, tuberculosis, fevers, roundworms, headache and inflammation; plant infusion applied to blisters and the leaves used for poison ivy rash. Incense for ritual ceremonies.)

in English: fern gale, meadow fern, shrubby fern, spleenwort-bush, sweet-fern

in North America: comptonie, comptonie voyageuse

Condalia Cav. Rhamnaceae

For the Spanish physician A. Condal, 1745–1804, botanist, see *Anales de Historia Natural* 1(1): 39–40, pl. 4. 1799.

Condalia globosa I.M. Johnst.

North America.

See *Proceedings of the California Academy of Sciences*, Series 4, 12(30): 1086–1087. 1924

(Fruit tonic, stomachic.)

in English: bitter snakewood

Condalia globosa I.M. Johnst. var. *pubescens* I.M. Johnst.

North America. Perennial tree or shrub

See *Proceedings of the California Academy of Sciences*, Series 4, 12(30): 1086–1087. 1924

(Fruit tonic, stomachic.)

in English: bitter snakewood

Congea Roxburgh Lamiaceae (Verbenaceae, Symphoremataceae)

Kangi, a Bengali name for *Congea tomentosa* Roxb., see *Plants of the Coast of Coromandel* 3: 90, t. 293. 1819.

Congea tomentosa Roxb. (*Calochlamys capitata* C. Presl; *Congea azurea* Wall., nom. inval.; *Congea oblonga* Pierre ex Dop; *Congea petelotii* Moldenke; *Congea tomentosa* P'ei, nom. illeg.; *Congea tomentosa* var. *nivea* Munir; *Congea tomentosa* var. *oblongifolia* Schauer; *Congea villosa* Wight; *Congea villosa* (Roxb.) Wight; *Congea villosa* (Roxb.) Voigt; *Roscoea villosa* Roxb.)

India, Sri Lanka, China. Semi-woody vine, perennial, floral bracts light greenish with purple-violet tint

See *Hort. Bengal.* [95]. 1814, *Fl. Ind.* ed. 1832, 3: 55. 1832, *Hort. Suburb. Calcutt.* 473. 1845, *Abh. Königl. Böhm. Ges. Wiss.*, V, 3: 579. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 624. 1847, *Icon. Pl. Ind. Orient.* [Wight] t. 1479 B. 1849 and *Bull. Soc. Bot. France* 61: 320 [1914 publ. 1915], *Biolog. Laborat. Sci. China* 149. 1936, *Phytologia* 3: 409. 1951, *Gard. Bull. Singapore* 21: 310. 1966, *Economic Botany* 40(1): 38–53. 1986

(Decoction of whole plant drunk and/or as a bath to help recovering from fever; mixture applied on fracture of bone. Leaves applied on itchy and sore skin, where caterpillars have crawled. Veterinary medicine, magico-religious beliefs, stem twisted to form a ring put on the neck of cattle, pig and goats to get rid of worms from sores, maggots.)

in English: lavender-wreath, shower of orchids, shower orchid, tomentose congea, woolly congea, woolly congea

in Spanish: lluvia de orquideas, terciopelo

in China: rong bao teng

in India: huai-bawk-hrui, huaibawkhrui, kangi, sa-huai-hrui, sahuaihrui

in Thailand: kra-sai-kui

Coniogramme Fée Pteridaceae (Adiantaceae)

Greek *konios* 'dusty' and *gramme* 'a line', the spore cases are arranged along the veins; see *Epimeliae Botanicae* 263. 1849, *Mémoires de la Société d'Histoire Naturelle de Strasbourg* 4(1): 202. 1850, Antoine Laurent Apollinaire Fée (1789–1874), *Mémoires sur la famille des Fougères*. V. *Genera Filicum*. 167, 171, t. 14. 1850–1852 and *Bulletin of the National Science Museum* 27: 22. 1949, *Fern Gaz.* 11(2–3): 141–162. 1975, *Acta Bot. Yunnan.* 3(2): 218. 1981, *Acta Phytotaxonomica Sinica* 3(2): 218. 1981.

Coniogramme caudata (Wall.) Ching

India, China.

See *A Numerical List of Dried Specimens* n. 4. 1828 and *Index Filicum*, Suppl. Tertium pro Annis 1917–1933 56. 1934

(Fronds extract taken to relieve urinary disorders, gall stones and backache.)

in English: tree fern

Coniogramme petelotii Tardieu (*Coniogramme fraxinea* (D. Don) Fée ex Diels; *Coniogramme fraxinea* fo. *connexa* Ching; *Coniogramme javanica* (Blume) Fée; *Coniogramme subcordata* (D.C. Eaton ex Davenp.) Maxon; *Coniogramme subcordata* Ching, nom. illeg.; *Diplazium fraxineum* D. Don; *Gymnogramma fraxinea* (D. Don) Bedd.; *Gymnogramma javanica* Blume; *Neurogramma fraxinea* (D. Don) H. Christ; *Syngramma fraxinea* (D. Don) Bedd.)

China. Terrestrial fern

See *Prodromus Florae Nepalensis* 12–13. 1825, *Supplement to the Ferns of Southern India and British India* 24. 1876, *Handbook to the Ferns of British India* 386. 1883, *Die Farnkräuter der Erde* 63. 1897, *Die Natürlichen Pflanzenfamilien* 1(4): 262. 1899 and *Contributions from the United States National Herbarium* 17(2): 174. 1913, *Bulletin of the Fan Memorial Institute of Biology* 2(10): 213–214, pl. 31. 1931, *Bulletin du Muséum d'Histoire Naturelle*, sér. 2 5(4): 334. 1933

(Rhizome as a strong antidote.)

Conioselinum Fisch. ex Hoffm. Apiaceae (Umbelliferae)

From the Greek *koneion*, *konion* ‘hemlock’ and *selinon* ‘parsley, celery’, the genera *Conium* plus *Selinum*, see *Genera Plantarum Umbelliferarum* xxviii, 180. 1814, ed. 2: 185. 1816 and *Acta Fac. Rerum Nat. Univ. Comeniana, Bot.* 26: 1–42. 1978, *Bot. Zhurn.* 64 (2): 227–232. 1979, *Biologia (Bratislava)* 50: 27–31. 1995, *Journal of Herbs, Spices & Medicinal Plants* 11(3): 1–11. 2005.

Conioselinum chinense (L.) Britton, Sterns & Poggenb. (*Athamanta chinensis* L.; *Cnidium chinense* (L.) Spreng. ex Steud.; *Conioselinum pacificum* J.M. Coult. & Rose; *Conioselinum pacificum* (S. Watson) J.M. Coult. & Rose; *Conioselinum pumilum* Rose; *Kreidon chinensis* (L.) Raf.; *Ligusticum chinense* (L.) Crantz; *Selinum chinense* (L.) Druce)

North America.

See *Species Plantarum* 1: 245. 1753, *Plantarum umbelliferarum denuo despondarum prodromus...* 40. 1813, *Proceedings of the American Academy of Arts and Sciences* 11: 140–141. 1876, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 22. 1888 and *Contributions from the United States National Herbarium* 7(1): 152. 1900, *Le Naturaliste Canadien* 93(5): 642. 1966

(Leaves infusion drunk in the treatment of colds and sore throats.)

in English: Chinese hemlockparsley

in China: shan xiong

Conioselinum gmelinii (Cham. & Schltdl.) J.M. Coult. & Rose (*Conioselinum chinense* var. *pacificum* (S. Watson) B. Boivin; *Conioselinum gmelinii* J.M. Coult. & Rose; *Conioselinum gmelinii* Steud.; *Conioselinum pacificum* (S. Watson) J.M. Coult. & Rose; *Ligusticum gmelinii* Cham. & Schltdl.; *Ligusticum gmelinii* Schltdl.)

North America. Perennial, roots steamed and eaten

See *Linnaea* 1: 391–392. 1826, *Nomenclator Botanicus*. [Steudel] Editio secunda 1: 403. 1840 and *Contributions from the United States National Herbarium* 7(1): 150, 152. 1900

(Leaves infusion drunk in the treatment of colds and sore throats, as sweatbaths for arthritis and rheumatism.)

in English: Pacific hemlockparsley

Conioselinum morrisonense Hayata

China.

See *Icon. Pl. Formosan.* 10: 20. 1921

(A tonic for colds.)

in China: tai wan shan xiong

Conioselinum pacificum (S. Watson) J.M. Coult. & Rose (*Athamanta chinensis* L.; *Cnidium chinense* (L.) Spreng. ex Steud.; *Conioselinum chinense* Britton, Sterns & Poggenb. var. *pacificum* (S. (Sedative, analgesic, anthelmintic and astringent, tonifies blood, strong liver tonic for men and women, to cure pain in the abdomen.)

in China: qiao shan xiong

Conium L. Apiaceae (Umbelliferae)

Greek *koneion*, *konion* ‘hemlock’, Latin *conium*, ancient names used for both the plant and the poison derived from it; from the Greek *keno*, *kaino*, *kone* ‘to kill, killing, massacre’. The Greek philosopher Socrates (Sokrates), charged with impiety and corruption of youth, drank the hemlock (Latin *cicuta*) in the spring of 399 BC., his last hours are described in Plato’s *Phaedo*; see Carl Linnaeus, *Species Plantarum* 1: 243. 1753 and *Genera Plantarum*. Ed. 5. 114. 1754 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/1): 3–97. 1962, *Bol. Soc. Brot.*, ser. 2, 48: 171–186. 1974, *Taxon* 25: 483–500. 1976, *Scripta Facultatis Scientiarum Naturalium Universitatis Purkynianae Brunensis* 2–3, 6: 113–138. 1976, *Bot. Žurn.* (Moscow & Leningrad) 61(1): 93–99. 1976, *Phytologia* (Sofia) 5: 57–65. 1976, *Lagascalia* 6: 23–32. 1976, *Lagascalia* 7: 163–172. 1978, *Acta Fac. Rerum Nat. Univ. Comenianae, Bot.* 26: 1–42. 1978, *Inform. Bot. Ital.* 20: 637–646. 1988, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 8–9. 1995, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 26/27: 15–18. 1997, *Watsonia* 21: 365–368. 1997, *Opera Bot.* 137: 1–42. 1999.

Conium maculatum L. (*Cicuta major* Lam.; *Cicuta major* Garsault; *Cicuta officinalis* Crantz; *Conium cicuta* Neck.; *Conium maculosum* Pall.; *Coriandrum cicuta* Crantz; *Coriandrum cicuta* Roth; *Coriandrum maculatum* (L.) Roth; *Selinum conium* (Vest) E.L. Krause; *Sium conium* Vest)

Europe. Biennial herb, smooth purple-spotted stem, fleshy unbranched white taproot, nitrophile weed, triangular finely divided sheathing leaves, small white flowers arranged in umbrella-like clusters, tiny flattened ridged fruits

See *Sp. Pl.* 1: 243, 251–252, 255. 1753, *Les Figures de Plantes et Animaux d’Usage en Médecine, Décrit[es] dans la Matière Médicale de Mr. Geoffroy* 2: t. 223. 1764, *Stirp. Austr.* 3: 100. 1767, *Class. Umbell. Emend.* 98. 1767, *Deliciae gallo-belgicae* 1: 142. 1768, *Flore Française* 3: 456. 1779 [1778 publ. after 21 Mar 1779], *Tentamen Florae Germanicae* 1:

130. 1788, *Reise Sudl. Statth.* 1: 478. 1799, *Man. Bot.* 513. 1806 and *J. Sturm’s Flora von Deutschland* 12: 79. 1904, *Biochem. J.*, 64: 259–266. 1956, *Phytochemistry* (Oxf.), 1: 38–46. 1961, Keeler, R.F., Balls, L.D., Shupe, J.L., Crowe, M.W. “Teratogenicity and toxicity of coniine in cows, ewes and mares.” *Cornell Vet.*, 70: 19–26. 1980, Panter, K.E., Keeler, R.F., Baker, D.C. “Toxicoses in livestock from the hemlocks (*Conium* and *Cicuta* spp.)” *J. Anim. Sci.*, 66: 2407–2413. 1988, *Food Chem. Toxicol.* 42(9): 1373–1382. 2004, *Phytochemistry* 66(12): 1399–1406. 2005

(Used in Sidha. Extremely poisonous. All animals may be affected, cattle, goats, horses, swine, and sheep as well as rabbits, poultry, deer, and humans have been poisoned after ingesting poison-hemlock. All parts of the plants are poisonous, especially young leaves and seeds, but can be used medicinally to relieve pain and reputedly as a cancer cure. Love charm.)

in English: hemlock, poison hemlock

in Italian: cicuta

in Arabic: bikhe shoukaran, shawkaran, sikran

in China: du shen shu

in India: enneyccokki, enneyccokkipuntu, koniyam

Connaropsis Planch. ex Hook.f. Oxalidaceae

Resembling *Connarus*, see *Trans. Linn. Soc. London* 23: 166. 1860.

Connaropsis sericea Ridl. (*Sarcotheca laxa* (Ridl.) R. Knuth var. *sericea* (Ridl.) Veldkamp; *Sarcotheca sericea* (Ridl.) R. Knuth)

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 62(2): 201. 1893 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50(Suppl.): 234. 1914, *J. Fed. Malay States Mus.* 10: 131. 1920, *Pflanzer*. (Engler) *Oxalidac.* 424. 1930, *Bulletin of Miscellaneous Information* (Royal Gardens, Kew) Vol. 1930, No. 2 (1930), pp. 74–87. 1930, *Blumea* 15(2): 535. 1968 [1967 publ. 18 Jan 1968]

(For wounds, pound the root and apply.)

Malay name: belimbing hutan, cherichek

Connarus L. Connaraceae

From the Greek *konnaros*, an unknown thorny tree described by Agathocles, a prickly evergreen, possibly a jujube or a Christ’s thorn; see Carl Linnaeus, *Species Plantarum* 2: 675. 1753, *Genera Plantarum*. Ed. 5. 305. 1754, *Narrative of an Expedition to Explore the River Zaire* 431. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 84. 1825,

Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie 23: 208. 1896 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 60: 242–243. 1925, Timothy J. Killeen, Emilia García E. and Stephan G. Beck, eds., *Guía de Árboles de Bolivia*. 243. Herbario Nacional de Bolivia and Missouri Botanical Garden. 1993.

Connarus africanus Lam. (*Connarus africanus* G. Mey., nom. illeg.; *Connarus nigrens* Gilg)

Tropical Africa, Nigeria. Climbing shrub, liana or lianescent shrub, shining foliage, flowers in short axillary densely brown-pubescent panicles, red follicle shortly stiped at base

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 95. 1786 [16 Oct 1786], *Primitiae Florae Essequiboensis* ... 228. 1818, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 317. 1892 and *Flora of West Tropical Africa* 2: 10. 1931, *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 247. 1961

(Ground-up seeds used as a purge and vermifuge. Roots and seeds taken as purge and vermifuge. Bark tonic, taeniocidal, astringent, hemostatic, wound dressing, applied externally to ulcers and wounds. Root bark taken to treat tapeworm infections. Leaf sap, with bark sap of *Chrysophyllum perpulchrum* Mildbr. ex Hutch. & Dalziel, as a nasal instillation to treat fainting. Seeds to bait hooks for fishing.)

Connarus ferrugineus Jack

SE Asia. Liana, woody climber, flowers in panicles, pod-like rusty tomentose fruits, solitary glossy black seed embedded at the base in a yellow aril

See *Malayan Miscellanies* 2: 37. 1822

(Seeds used to kill wild dogs.)

Connarus monocarpus L. (*Connarus monocarpus* L.)

SE Asia, India. Shrubs, flowers in axillary and terminal branched panicles, seeds with a large pulpy yellow aril

See *Species Plantarum* 2: 675. 1753 and *Phytochemistry* 3(2): 335–339. 1964, *Rev. Handb. Fl. Ceylon* 1: 283. 1980

(Used in Sidha. Bark and seeds tonic, taeniocidal, astringent; a decoction or infusion to treat tapeworm infections.)

in India: cetippulikkoti, chettupulukod, chettupulukodi, chetupulukodi, kureel, kurila, mochaka, naikuriel, perim-curigil, shevanarvembu, sumdari, tholage, tholiga, tolage, torolakka

Connarus oligophyllus Wall. ex Planch. (*Connarus oligophyllus* Planch.)

SE Asia.

See *Linnaea* 23: 427. 1850

(Bark decoction for stomachache; for itch pound the root and poultice with it.)

Malay names: lelemak, merensa

Connarus planchonianus G. Schellenb.

India. Straggling shrubs, ovate leaflets, shining beaked capsule

See *Bulletin of Miscellaneous Information Kew* 1927: 375. 1927

(Fruits toxic in raw state.)

Conocephalus Blume Cecropiaceae

From the Greek *konos* ‘a cone’ and *kephale* ‘head’, alluding to the female receptacle or to the form of the flowers, see *Commentationes Botanicae* 115. 1822, *Bijdragen tot de flora van Nederlandsch Indië* 9: 483–484. 1825, *Annales Museum Botanicum Lugduno-Batavi* 1: 203. 1864.

Conocephalus amoenus King ex Hook.f.

Malaysia.

See *Fl. Brit. India* [J.D. Hooker] 5: 545. 1888 and *Economic Botany* 18(3): 270–278. 1964

(Leaves decoction for kidney complaints; heated leaves applied to the abdomen against fever.)

Malay names: chentawan, semelit papan, sentawan

Conomorpha A. DC. Myrsinaceae (Primulaceae)

From the Greek *konos* ‘a cone’ and *morphe* ‘a form, shape’, see *Nova Genera et Species Plantarum* ... 3: 87. 1829[1831], *Transactions of the Linnean Society of London, Botany* 17(1): 102–103. 1834 [1837 publ. 26 Apr–8 May 1834], *Stirpes Surinamensis Selectae* 111. 1851, *Flora Brasiliensis* (Martius) 10: 304–305. 1856 and *Das Pflanzenreich* IV. 236(Heft 9): 251, 254. 1902, *Wrightia* 5(9): 349. 1977, *Acta Biol. Venez.* 10(2): 144, 150–152. 1980.

Conomorpha obovata Mez (*Conomorpha obovata* Werdermann)

South America, Brazil.

See *Bulletin de l'Herbier Boissier*, sér. 2, 5: 535. 1905

(Roots used for toothache, scrapings placed on the tooth.)

Conopholis Wallroth Orobanchaceae (Scrophulariaceae)

From the Greek *konos* ‘a cone’ and *pholis* ‘a horny scale’, referring to the form of the scales, see *Orobanches Generis Diaskene* 78. 1825 and *Fieldiana, Bot.* 24(10/3): 238–240. 1974.

Conopholis alpina Liebm. (*Conopholis alpina* var. *mexicana* (A. Gray ex S. Watson) R.R. Haynes; *Conopholis mexicana* A. Gray ex S. Watson; *Conopholis panamensis* Woodson; *Conopholis sylvatica* Liebm.; *Orobanche multiflora* Nutt.

var. *xanthochroa* (A. Nelson & Cockerell) Munz; *Orobancha xanthochroa* A. Nelson & Cockerell)

North America.

See *Förhandlingar; Skandinaviske Naturforskernes Möte* 4: 184–185. 1844[1847], *Proceedings of the American Academy of Arts and Sciences* 18: 131. 1883 and *Annals of the Missouri Botanical Garden* 25(4): 835–836. 1935, *Sida* 3(5): 347. 1969, *Phytologia* 54: 302–309. 1983, *Phytologia* 56(1): 55–60. 1984, *Fieldiana, Bot.*, n.s. 41: 165–169. 2000

(Magico-religious beliefs, ceremonial, superstitions, good luck charm.)

in English: Mexican cancer-root

Conostomium (Stapf) Cuf. Rubiaceae

From the Greek *konos* ‘a cone’ and *stoma* ‘mouth’, possibly in allusion to the toothed theca, see *Species Plantarum* 1: 119. 1753, *A Voyage to Abyssinia*, and travels into the ... appendix 4: 64. 1814, *Linnaea* 5(1): 165. 1830, *Mémoire sur la famille des Rubiacées* 124. 1830, *Botanical Magazine* 70: t. 4086. 1844, *Niger Fl.* [W.J. Hooker]. 405. 1849 and *Nuovo Giorn. Bot. Ital.*, n.s., 55: 85. 1948, *Economic Botany* 35(1): 96–130. 1981.

Conostomium longitubum (Beck) Cufod. (*Conostomium camptopodium* Bremek.; *Conostomium fasciculatum* (Hiern) Cufod.; *Conostomium hispidulum* Bremek.; *Conostomium kenyense* Bremek.; *Conostomium kenyense* var. *subglabrum* Bremek.; *Conostomium microcarpum* Bremek.; *Conostomium rhynchothecum* (K. Schum.) Cufod.; *Conostomium rotatum* (Baker) Cufod.; *Oldenlandia fasciculata* Hiern; *Oldenlandia fasciculata* (Bertol.) Small; *Oldenlandia longituba* Beck; *Oldenlandia rhynchotheca* K. Schum.; *Oldenlandia rotata* Baker)

Ethiopia, Kenya.

See *Memorie della Reale Accademia delle Scienze dell' Istituto di Bologna* 2: 306. 1850, Paulitschke, Philipp (1854–1899), *Harar. Forschungsreise nach den Somäl und Gallaländern, Ost-Afrikas*, ausgeführt von dr. Kammel von Hardegger und prof. dr. Paulitschke. Nebst beiträgen von dr. Günther ritter von Beck, L. Ganglbauer und dr. Heinrich Wichmann. (1888) 461, fig 2. Leipzig 1888, *Bull. Misc. Inform. Kew* 1895: 216. 1895, *Journal of Botany, British and Foreign* 37: 59. 1899 and *The Geographical Journal*, Vol. 15, No. 2 (Feb. 1900), p. 186. 1900, *Flora of the Southeastern United States* ... Ed. 2 1106. 1903, *Bot. Jahrb. Syst.* 33: 334. 1903, *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2, 48(2): 131–133. 1952

(Used in the treatment of ulcers, leprosy.)

in Kenya: Ionomokerio

Conostomium natalense (Hochst.) Bremek. (*Conostomium natalense* var. *glabrum* Bremek.; *Conostomium natalense* var. *hirsuta* Bär; *Conostomium natalense* var. *natalense*

(Hochst.) Bremek.; *Conostomium natalense* var. *ovalifolium* Bremek.; *Conostomium natalense* var. *tomentellum* Bremek.; *Crusea acuminata* E. Mey., nom. nud.; *Hedyotis natalensis* Hochst.; *Oldenlandia natalensis* (Hochst.) Kuntze)

Zimbabwe, S. Africa. Perennial shrublet, erect, flowers lilac in terminal heads surrounded by leafy bracts

See *Species Plantarum* 1: 101–102, 119. 1753, Drége, J. F. (Johann Franz) (1794–1881), *Zwei Pflanzengeografische Dokumente* 176. [Regensburg] 1843 and *Vierteljahrsschr. Naturf. Ges. Zürich* 68: 430. 1923, *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2, 48(2): 136–138. 1952

(Magic, roots used as a love charm and to prevent lightning.)

in English: wild pentas

in South Africa: Ndilela, phandavhashimana, wildepentas

in Swaziland: umbophe, ungcocolosi

Conostomium quadrangulare (Rendle) Cufod. (*Neurocarpaea quadrangularis* (Rendle) Rendle; *Oldenlandia dolichantha* Stapf; *Oldenlandia megistosiphon* K. Schum.; *Otomeria heterophylla* K. Schum.; *Pentas quadrangularis* Rendle)

Ethiopia, Sudan, Uganda, Kenya. Sweet flowers

See *Journal of Botany, British and Foreign* 34: 127. 1896, *Journal of Botany, British and Foreign* 36: 29. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 56. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 336. 1903, *J. Linn. Soc., Bot.* 37: 518. 1906

(Medicine for eye disease, wash in decoction of roots.)

in Kenya: lokoroumwé

Consolida (DC.) Gray Ranunculaceae

Consolida, name applied by Pseudo Apuleius Barbarus to an herb or unknown plant; Latin *consolido*, *avi*, *atum*, *are* ‘to make firm’; see *Regni Vegetabilis Systema Naturale* 1: 341. 1818[1817], Samuel Frederick Gray (1766–1828), *A natural arrangement of British plants*. 2: 711. London 1821 and *Scripta Fac. Sci. Nat. Univ. Purkyn. Brun.* 1. 8: 23–46. 1978, *Cytologia* 44: 123–133. 1979, *Cytologia* 46: 623–633. 1981.

Consolida ajacis (L.) Schur (*Clematis triloba* Thunb.; *Consolida ajacei* Schur.; *Consolida ajacis* (L.) R. Schrödinger; *Consolida ajacis* (L.) Nieuwl.; *Consolida ajacis* Nieuwl.; *Consolida ambigua* (L.) Ball & Heywood; *Delphinium ajacis* L.; *Delphinium ajacis* Ledeb.; *Delphinium ambiguum* Loisel.; *Delphinium ambiguum* L.; *Delphinium ambiguum* Mill.)

Mediterranean. Annual herb, erect

See *Sp. Pl.* 1: 531. 1753, *Species Plantarum*, Editio Secunda 1: 749. 1762, *The Gardeners Dictionary*: ... eighth edition

3. 1768, *Desv. Journ. Bot.* ii. (1809) 341. 1809, *Fl. Ross.* (Ledeb.) 1(1): 58. 1841, *Verh. Mitth. Siebenbürgischen Vereins Naturwiss. Hermannstadt.* 4(3): 47. 1853 and *Abh. K. K. Zool.-Bot. Ges. Wien* 4(5): 7, 62. 1909, *Amer. Midl. Naturalist* 3: 173. 1914, *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 66: 151. 1962, *Taxon* 29: 718–720. 1980, *Anales Jard. Bot. Madrid* 41: 217. 1984, *Saussurea* 18: 1–10. 1987, *Flora Mediterranea* 5: 323–331. 1995

(Whole plant very poisonous, parasiticide, insecticidal. Toxic, cattle are the primary animals affected, toxin can also affect other ruminants as well as horses. Dangerous all parts, especially seeds and young leaves; roots believed to kill cows. Used in infusions to treat heart problems, wounds.)

in English: doubtful knight's spur, eastern larkspur, larkspur, rocket larkspur

Consolida oliveriana (DC.) Schrod. (*Consolida oliveriana* Schrödinger; *Delphinium oliverianum* DC.)

Iran, Iraq, Turkey.

See *Systema Naturae* 1: 341. 1817 and *Abhandlungen der Kaiserlich-königlichen Zoologisch-botanischen Gesellschaft in Wien.* 4(5): 62. 1909, *Taxon* 29: 362. 1980, *Planta Med.* 74(2): 171–174. 2008, *J. Nat. Prod.* 72(6): 1069–1074. 2009

(Cytotoxic, leishmanicidal.)

Consolida regalis Gray (*Delphinium consolida* L.; *Delphinium consolida* Sibth. & Sm.; *Delphinium consolida* Gouan)

Europe.

See *Species Plantarum* 1: 530–531. 1753, *Flore Française* 3: 325. 1779, *Prodr. Stirp. Chap. Allerton* 375. 1796, *Fl. Graec. (Dangerous plant. All parts of the plant are poisonous; leaves can be a mild skin irritant. The plant contains cardiac glycosides as well as saponins. Some cases of human poisoning are mentioned in the literature, and so these plants should be considered potentially poisonous. Convallotoxin is one of the most toxic naturally occurring substances affecting the heart, these glycosides cause irregularities in heart action. Plant antispasmodic, cardiotoxic, diuretic, emetic, febrifuge, laxative, sedative.)

in English: American lily-of-the-valley, European lily-of-the-valley, ladder-to-heaven, lily-of-the-valley, may lily, muguet

in China: ling lan

in Brazil: convalaria, lírio convale, lírio dos vales, flor de maio, mugueto

in Italian: mughetto

Convolvulus L. Convolvulaceae

Latin *convolvulus* 'a bindweed' (Plinius), from *convolvere*, *volvi*, *volutum*, *ere* 'to roll together, roll up, intertwine'; see Carl Linnaeus, *Species Plantarum* 1: 153–159. 1753 and *Genera Plantarum* Ed. 5. 76. 1754 and *Lilloa* 29: 87–348. 1959, *Acta Bot. Indica* 3: 136–141. 1975, *J. Cytol. Genet.* 13: 99–106. 1978, *Recent Res. Pl. Sci.* (New Delhi). 7: 261–271. 1979, *J. Palynol.* 16: 85–105. 1980, *Taxon* 41: 560–561. 1992, *Candollea* 49(1): 233–243. 1994, *Taxon* 44: 611–612. 1995, *Guihaia* 18(2): 115–118. 1998, *Opera Bot.* 137: 1–42. 1999, *Kew Bulletin* 54(1): 63–79. 1999.

Br.; *Convolvulus sagittifolius* Liou & Ling, nom. illeg.; *Convolvulus sagittifolius* (Fischer) Liou & Ling)

Cosmopolitan. Perennial herb, vine, weedy, creeping, twining, corolla campanulate, persistent calyx, pink axillary bracteate solitary flowers, fodder for goats and sheep

See *Supplementum Plantarum* 137. 1781, *Flora Caroliniana*, secundum ... 93. 1788, *Flora Boreali-Americana* 1: 138. 1803, *Botanical Register*; consisting of coloured ... 6: t. 437. 1820, *Flora Altaica* 1: 225. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 406–407. 1845, *Flora Brasiliensis* 7: 313. 1869, *Edwards's Botanical Register* pl. 322. 1878 and *Flore illustrée du Nord de la Chine* 1: 17. 1931, *Manual of the Southeastern Flora* 1091. 1933, *Bothalia* 6: 695. 1958, *Taxon* 29: 711. 1980

(Used in Ayurveda, Unani and Sidha. Aerial parts decoction given as febrifuge. Fresh root extract taken as purgative. Flower as brain tonic.)

in English: bear-bind, bindweed, common bindweed, corn-bind, creeping-Jennie, European glory bind, field bindweed, green-vine, lesser bindweed, orchard morning-glory, small bindweed, small-flowered morning-glory, wild morning-glory

in Arabic: lebena, moddeid, olleiq, 'ulleiq

in China: tian xuan hua

in India: baalike palya, bachhalu balli, barilomayen, beri, bhadrabala, bhoo chakra balli, bhoochakra balli, cenkulam-pati, cenkulam-patikkoti, chandvel, changdi, chaud-vel, con-akaippantunacani, grachi, haranpadi, haranpag, harin-padi, hasuraani balli, hessaarane balli, heyranpatu, hiranpaddi, hiranpadi, hiranpag, hiranpangi, itukaucikaceti, itukaucikam, latcumanam, mankulam patampu, mendok sekho, mankulampu, manmatavacceti, manmatavam, nallatali, narangi balli, naranji, naranji balli, naringi balli, narunakai, naruntali, narutali, prasarna, prasarni, prosarani, rajbala, saqliyun, sarana, shankhapuspi, tiktima, tiktikmo, vintuccam

in South Africa: akkerwinde, klimop, monnikbaard, warkruid

Convolvulus microphyllus Sieber ex Spreng.

India.

See *Systema Vegetabilium*, editio decima sexta 1: 611. 1824 and *Recent Res. Pl. Sci.* (New Delhi). 7: 261–271. 1979, *Taxon* 29: 711. 1980, *J. Palynol.* 16: 85–105. 1980

(Used in Ayurveda. Whole plant decoction tonic, stimulant.)

in India: sankhapushpi, sankhapuspi, shankhauli

Convolvulus pluricaulis Choisy

India.

See Choisy, Jacques Denys (1799–1859), *Convolvulaceae orientales* 95. Genève 1834 and *J. Cytol. Genet.* 13: 99–106. 1978

(Used in Ayurveda. Whole herb powdered hypnotic, febrifuge. Plant juice given in gastritis.)

in India: sankhavah, sankha, sankhacusuma, sankhapushpi, sankhapuspa, sankhapuspi, sankhpushpi, sankhupuspa, shankpushpi

Convolvulus prostratus Forssk. (*Convolvulus heterotrichus* Maire; *Convolvulus microphyllus* Sieber ex Spreng.; *Convolvulus microphyllus* Sieber ex Spreng. var. *heterotrichus* (Maire) Maire; *Convolvulus microphyllus* Sieber ex Spreng. var. *orreanus* (Murb.) India, Pakistan. Small prostrate perennial herb, woody rootstock, stem slender, small flowers white to light pink in pedunculate axillary heads, corolla funnel-shaped, fruit a globose scarious capsule

See *Diagnoses plantarum orientalium novarum*, ser. 2, 3: 123. 1856

(Used in Ayurveda. Plant decoction brain tonic, to treat mental weakness, mental disorders, insanity, to improve memory, also as antispasmodic, hypotensive, cardiogenic, antifungal, antimicrobial, anticonvulsant, antiulcer.)

in India: sankhapushpi, sankhapuspi, sankhpushpi, santar, santari, shankh pushpe, shankhpushpi

Convolvulus sagittatus Thunb. var. ***aschersonii*** Verdc. (*Convolvulus aschersonii* Engl.; *Convolvulus hallierianus* Schulze-Menz; *Convolvulus penicellatus* Hallier f.; *Convolvulus sagittatus* subvar. *abyssinicus* Hall.f.; *Convolvulus sagittatus* var. *abyssinicus* (Hall.f.) Baker & Rendle; *Convolvulus sagittatus* var. *abyssinicus* Baker & Rendle; *Convolvulus sagittatus* var. *aschersonii* (Engl.) Verdc.)

East Africa. Climber, creeping, prostrate or twining, white corolla

See *Prodromus Plantarum Capensium*, ... 35. 1794, *Tentamen Florae Abyssinicae* ... 2: 74. 1851, *Fl. Hautes-Pyrénées* 439. 1867, *Abh. Preuss. Akad. Wiss. [Hochgebirgsforschung]* 1891. ii. 349. 1892 and *Flora of Tropical Africa* 4(2): 96. 1905, *Kew Bulletin* 12: 345. 1957, *Kirkia* 9: 171. 1973

(Laxative, purgative.)

Convolvulus scammonia L.

SE Asia.

See *Flora Cochinchinensis* 106. 1790

(Used in Unani and Sidha. Milky juice of the leaves as purgative. Root cathartic, diuretic.)

in English: scammony, Syrian bindweed

in Brazil: escamonea, escamonea de Alepo, escamonia

in India: cakamoni, cakamuniya, mamuta, saqmunia

Convolvulus sepium L. (*Calystegia sepium* (L.) R. Br.; *Volvulus sepium* (L.) Junger)

Cosmopolitan.

See *Species Plantarum* 1: 153. 1753, *Prodromus Florae Novae Hollandiae* 483. 1810, *Oesterreichische Botanische Zeitschrift* 41(4): 133–134. 1891 and *Bol. Soc. Brot.*, ser. 2, 2, 53: 15–28. 1979

(Purgative, antiinflammatory, cholagogue and febrifuge. Veterinary medicine, antiscorbutic, stem and root for dropsy.)

in English: bindweed, bracted bindweed, devil's vine, great bindweed, greater bindweed, hedge bindweed, hedge glory bind, Jack-run'-in'-the-country, lady's nightcap, large bindweed, milk convolvulus, Rutland beauty, wild morning-glory

Maori names: pohue, pohuhe

in China: hsuan hua, ou xuan hua

Convolvulus spinosus Burm.f. (*Convolvulus spinosus* Desr.)

Pakistan.

See *Encyclopédie Méthodique, Botanique* 3(2): 548. 1792

(Bark ground and powdered to relieve constipation; strong purgative. Veterinary medicine.)

in Pakistan: dolko, ritachak

Convolvulus trabutianus Schweinf. & Muschl. (*Convolvulus ifniensis* Caball.; *Convolvulus spinosus* auct., non Burm.)

North Africa.

See *Encyclopédie Méthodique, Botanique* 3(2): 548. 1792 and *Repert. Spec. Nov. Regni Veg.* 9: 566. 1911, *Trab. Mus. Nac. Ci. Nat.*, Ser. Bot. No. 30, 7. 1935

(Purgative.)

Conyza Less. Asteraceae

Latin *conyza* and Greek *konyza*, ancient name used by Aristoteles (*Historia animalium*), Nicander, Theophrastus and Dioscorides for different species of *Inula*, a plant of two kinds, the male, the viscous elecampane (called also *cunila bubula*) and the female, fleabane; see *Species Plantarum* 2: 861. 1753, *The British Herbal* 447. 1756, *Novi Proventus Hortorum Academicorum Halensis et Berolinensis*. 1: 14. 1818, Christian Friedrich Lessing (1809–1862), *Synopsis generum Compositarum* 203–204. 1832, *J. Linn. Soc., Bot.* 22: 441–537. 1886 and *Acta Bot. Indica* 3: 136–141. 1975, *Fieldiana, Bot.* 24(12): 128–164, 483–495. 1976, *Taxon* 26: 557–565. 1977, *Taxon* 27: 223–231. 1978, *Adansonia* 18: 19–24. 1978, *Bot. Bull. Acad. (Irritant when in contact with skin. Plant astringent, expectorant, used in dysentery, catarrh, cystitis. Leaves antiinflammatory, febrifuge, astringent, stimulant, hemostatic, diuretic, a remedy for diarrhea and dysentery, catarrh, uterine hemorrhages, a treatment for eczema, rheumatism; a paste applied to cuts and wounds, headache.)

in English: Canadian fleabane, fleabane, horseweed, horseweed fleabane, mule tail

in South Africa: armoedskruid, Kanadese skraalhans, peperbossie, skraalhans, vaalbossie, volstruisgras

in India: jarayupriya, mukshikavisha, zarkash

in Japan: hime-mukashi-yomogi

Malay names: chapu, kapaigis

in Sarawak: daun nyara, kechondong ari

in Hawaii: lani wela

Conyza filaginoides (DC.) Hieron. (*Conyza filaginoides* Hieron.; *Laennecia filaginoides* DC.; *Laennecia parvifolia* DC.; *Laennecia pinnatifida* Turcz.)

Mexico.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 376. 1836, *Bulletin de la Société Impériale des Naturalistes de Moscou* 24(1): 178. 1851 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28(5): 588. 1901

(Flowers, leaves and stems infusion stomachic, used to treat diabetes.)

Conyza incana (Vahl) Willd. (*Conyza incana* B. Heyne ex DC.; *Conyza incana* Wall.; *Conyza incana* Willd.; *Conyza leucophylla* Sch. Bip. ex A. Rich.; *Erigeron incanum* Vahl; *Erigeron leucophyllus* (Sch. Bip. ex A. Rich.) Schweinf.; *Erigeron leucophyllus* Boiss.)

Saudi Arabia. Perennial herb

See *Species Plantarum* 2: 863–865. 1753, *Symbolae Botanicae, ...* 1: 72. 1794, *Species Plantarum*. Editio quarta [Willdenow] 3(3): 1937. 1803, *Numer. List* [Wallich] n. 3046. 1831, *Prodr.* (DC.) 5: 24. 1836, *Tentamen Florae Abyssinicae ...* 1: 386. 1847, *Beitrag zur Flora Aethiopiens ...* 147. 1867, *Fl. Orient.* [Boissier] 3: 171. 1875

(Heated leaves used to relieve muscle and joint pain. Repellent, the smoke.)

in Arabic: arfaj

Conyza leucantha (D. Don) Ludlow & Raven (*Blumeopsis falcata* (D. Don) Merrill; *Conyza leucantha* Ludlow & Raven; *Conyza leucanthemea* Buch.-Ham. ex D. Don; *Conyza viscidula* Wall. ex DC.; *Erigeron falcatum* D. Don)

Himalayas, India.

See *J. Arnold Arbor.* 1938, xix. 70. 1938, *Sunyatsenia* 5: 197. 1940, *Kew Bulletin* 1963: 71. 1963

(Antibacterial.)

in India: haochak

Conyza newii Oliv. & Hiern (*Conyza neuri* Oliv. & Hiern)

Kenya, Tanzania. Shrub, woody-based herb, straggling, yellow florets, fodder

See *Fl. Trop. Afr.* [Oliver et al.] 3: 317. 1877

(Chewed leaves pectoral, expectorant. Veterinary medicine, leaves stomachic. Ritual, magic.)

in Kenya: lamiriruaki, lesirko

in Tanzania: iande, kisegeyo, sino

Conyza pyrifolia Lam. (*Erigeron pyrifolius* (Lam.) Benth.; *Microglossa pyrifolia* (Lam.) Kuntze)

Tropical Africa. Shrub, white flowered climber, spreading, straggling, lianescent, erect, scrambling, woody base, see also *Microglossa pyrifolia*

See *Species Plantarum* 2: 863–865. 1753, *Encyclopédie Méthodique, Botanique* 2(1): 89–90. 1786, *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 1: 14. 1818, *Synopsis Generum Compositarum ...* 203–204. 1832, *Archives de Botanique* 2: 517. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 320. 1836, *Flora Hongkongensis* 176. 1861, *Revisio Generum Plantarum* 1: 353. 1891 and *Journal of Ethnopharmacology* 6: 29–60. 1982, *Journal of Ethnopharmacology* 8: 215–223. 1983, *Journal of Ethnopharmacology* 25(3): 339–359. 1989, *Opera Botanica* 121: 159–172. 1993, *Journal of Ethnopharmacology* 46: 17–23. 1995, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Journal of Ethnopharmacology* 102: 336–343. 2005, *Journal of Ethnopharmacology* 113: 521–540. 2007, *Journal of Ethnopharmacology* 114: 44–53. 2007

(Suspected of poisoning. Roots and leaves for stomachache and worms. Leaves to treat cough and stomachache; juice from crushed leaves applied to an ulcer.)

in Burundi: umuhe, umushi

in Cameroon: bendem-bende

in Comoros: ni homonlé

in Congo: cirhintikwiri, etieme, ilembu, inkoba zanyirabanya, kabazibazi, kabusula mitete, lewundi samba samba, mountantali, muhe, mukokoli, munsusolo, muntantali, nderalushaka, ndoko, umunyurangisaka

in Guinea: kpalahauma

in Ivory Coast: assuebo, bagigo, baou koutoué, blongbé, bouzé doundi, essubo, fourou, kazongoula, kénini, koagni sélébéi, kofélorotrou, li titi, lonbongbué, monfraguénéda, pitibokobé, poukouyebaïé, simblé sama

in Kenya: burungo, ibuca, muhinga, muteei, nyabung adit, nyabung-odide, nyabung odidi, nyabungu odide, tei

in Nigeria: anikan segbo torisa, anikan segbo, okbakakwu

in Rwanda: cirhintwik-wirijike, umuhe, umushi

in Sierra Leone: grimbo yufi

in Tanzania: kichuaghembe, kichwaghwmbe, mfulufuru, mlenga, mswaswaki, uswaswaki

in Togo: gbolido

in Uganda: akabindizi, kabilili akatono, mufugankande, olufugankande

in Papua New Guinea: gogo, pundari

Conyza pyrropapp Sch. Bip. ex A. Rich. (*Conyza pyrropapp* Sch. Bip. ex A. Rich. subsp. *oblongifolia* (O. Hoffm.) Wild; *Erigeron pyrropappus* (Sch. Bip. ex A. Rich.) Sch. Rio de Janeiro* 18: 109–177. 1965, *Rodriguesia* 28(41): 137–193. 1976, *Mem. Inst. Oswaldo Cruz, Rio de Janeiro* 103(3): 277–281. May 2008, James A. Duke, *Duke's Handbook of Medicinal Plants of Latin America*. CRC Press Inc, Boca Raton 2008.

***Copaifera baumiana* Harms**

Tropical Africa. Perennial non-climbing shrub, smooth shiny leaves, yellow flowers, resinous fruits

See *Kunene-Sambesi-Expedition* [Warburg] 246. 1903 [May 1903]

(Veterinary medicine, for Newcastle disease, leaves and stalks pounded and added to drinking water; roots decoction antifungal.)

in Zambia: mukuwa

***Copaifera cearensis* Ducke (*Copaifera cearensis* Huber ex Ducke)**

Brazil. Perennial non-climbing shrub, copaiba oils produced by exudation from the trunks of trees

See *Anais da Academia Brasileira de Ciências* 31(2): 291–293. 1959, *Phytochemistry* 49: 263–264. 1998, *Journal of Ethnopharmacology* 112: 248–254. 2007

(Oleoresin antiinflammatory, antioxidant, wound healing, antimicrobial and analgesic, to treat bronchitis, skin diseases, ulcers and syphilis.)

***Copaifera duckei* Dwyer**

Brazil. Perennial non-climbing shrub

See *Brittonia* 7(3): 163–164. 1951, *Phytochemistry* 55(7): 773–778. 2000, *Phytotherapy Research* 19(11): 946–950. 2005

(Oleoresin anti-nociceptive, insect repellent, topical anti-inflammatory and topical analgesic.)

Copaifera guyanensis Desf. (*Copaiba bijuga* (Hayne) Kuntze; *Copaiba guianensis* (Desf.) Kuntze; *Copaiba guianensis* Kuntze; *Copaifera beyrichii* Hayne; *Copaifera beyrichii* Hayne ex Baker, nom. inval.; *Copaifera bijuga* Hayne; *Copaifera guyanensis* (Desf.) Lyons; *Copaiba guianensis* (Desf.) E.H.L. Krause)

South America. Perennial non-climbing tree, white flowers, erect inflorescence

See *Mémoires du Muséum d'Histoire Naturelle* 7: 376–377. 1821, *Flora Brasiliensis* 14(2): 189. 1871, *Revisio Generum Plantarum* 1: 172. 1891 and *Beihefte zum Botanischen Centralblatt* 32(2): 342. 1914, *Phytochemistry* 55: 773–778. 2000

(Oleo-resin antioxidant, analgesic, antiinflammatory, antimicrobial, gastroprotective.)

Copaifera langsdorffii Desf. (*Copaiba langsdorffii* (Desf.) Kuntze; *Copaifera langsdorffii* var. *grandifolia* Benth.; *Copaifera nitida* Mart. ex Hayne; *Copaifera nitida* Hayne; *Copaifera sellowii* Hayne)

Brazil. Perennial non-climbing tree

See *Mémoires du Muséum d'Histoire Naturelle* 7: 377. 1821, *Getreue Darstellung und Beschreibung der in der Arzneykunde Gebräuchlichen Gewächse* 10: 22. 1825, *Revisio Generum Plantarum* 1: 172. 1891 and *Toxicon* 40: 1231–1234. 2002, *Life Sciences* 75(16): 1979–1987. 2004, *Journal of Ethnopharmacology* 93(1): 51–56. 2004, *International Immunopharmacology* 6(2): 156–169. 2006

(Oleo-resin antioxidant, antiinflammatory, gastroprotective, analgesic, antispasmodic, used to treat gastrointestinal functional disorders, colitis.)

in English: diesel tree

in Brazil: copaíba, copaíva, pau de óleo

Copaifera lucens Dwyer

Brazil. Perennial non-climbing tree

See *Brittonia* 7(3): 160–161. 1951

(Oleo-resin antioxidant, antiedematogenic, antimicrobial.)

Copaifera martii Hayne (*Copaiba martii* (Hayne) Kuntze; *Copaiba martii* Kuntze; *Copaiba rigida* (Benth.) Kuntze; *Copaifera coriacea* Mart.; *Copaifera martii* var. *rigida* (Benth.) Ducke; *Copaifera rigida* Benth.)

Brazil. Perennial non-climbing tree

See *Flora Brasiliensis* 15(2): 243. 1870, *Revis. Gen. Pl.* 1: 172. 1891 and *Archivos do Jardim Botânico do Rio de Janeiro* 5: 128. 1930

(Oleo-resin antioxidant, analgesic, antiinflammatory, gastro-protective, antimicrobial.)

Copaifera multijuga Hayne (*Copaiba multijuga* (Hayne) Kuntze)

Brazil. Perennial non-climbing tree

See *Revisio Generum Plantarum* 1: 172. 1891 and *Phytochemistry* 55: 773–778. 2000, *Phytother. Res.* 15: 476–480. 2001, *Phytother. Res.* 17: 1048–1053. 2003, *J. Pharm. Pharmacol.* 58: 1405–1410. 2006, *J. Ethnopharmacol.* 109(3): 486–492. 2007, *J. Ethnopharmacol.* 112: 248–254. 2007

(Oleo-resin antioxidant, antimicrobial.)

in Brazil: copahiba angelim, copahiba marimary, copaíba

Copaifera officinalis L. (*Copaiba officinalis* Adans.; *Copaiba officinalis* (L.) Kuntze; *Copaifera jacquini* Desf.; *Copaifera officinalis* Lyons; *Copaifera officinalis* (Jacq.) L.; *Copaiba officinalis* Jacq.; *Copaiba officinalis* (L.) Jacq.; *Copaiba officinalis* (L.) A. Lyons)

Brazil, Tropical America. Perennial non-climbing tree

See *Enumeratio Systematica Plantarum, quas in insulis Caribaeis* 21. 1760, *Species Plantarum*, ed. 2. 1: 557. 1762 [Sep 1762], *Familles des Plantes* 2: 241. 1763, *Mémoires du Muséum d'Histoire Naturelle* 7: 376. 1821, *Revisio Generum Plantarum* 1: 172. 1891

(Copaiba oil, oleo-resin antioxidant, fungicide, digestive, antimicrobial, for respiratory, genito-urinary and nervous systems, externally rubbed directly on sore joints, eczema, hemorrhoids, skin disorders.)

in English: balsam copaiba, copaiba balsam, copaiba resin, Jesuit's balsam, Maracaibo balsam, para balsam

in Brazil: amacey, azeite de pau, azeite de zazara, cabinba, copaiba, copaiva, copaive, copayba, coppaiba

Copaifera paupera (Herzog) Dwyer (*Copaiba paupera* Herzog; *Copaifera langsdorffii* Desf. var. *peruviana* J.F. Macbr.; *Copaifera reticulata* Ducke var. *peruviana* J.F. Macbr.)

Bolivia, Peru. Perennial non-climbing shrub

See *Mémoires du Muséum d'Histoire Naturelle* 7: 377. 1821 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 54. 1909, *Archivos do Jardim Botânico do Rio de Janeiro* 1(1): 22. 1915, *Field Museum of Natural History, Botanical Series* 13(3/1): 120. 1943, *Brittonia* 7(3): 169. 1951, *Contr. Gray Herb.* 184: 91–102. 1958, *Planta Med.* 68(9): 808–812. 2002

(Amazonian oleoresin, antimicrobial, antiseptic, antifungal, detoxifier, blood purifier, wound healing, expectorant, leishmanicidal, antimicrobial, cytotoxic, for treatments of bronchitis, intestinal inflammations, gonorrhoea, skin diseases, psoriasis, herpes, dermatitis and inflammations.)

in English: balsam copaiba, copaiba balsam, copaiba resin

Copaifera reticulata Ducke

Bolivia. Perennial non-climbing tree

See *Archivos do Jardim Botânico do Rio de Janeiro* 1(1): 22. 1915, *Contr. Gray Herb.* 184: 91–102. 1958, *Revista da Sociedade Brasileira de Medicina Tropical* 40(3): 264–267. 2007, *J. Ethnopharmacol.* 112: 248–254. 2007, *Revista do Instituto de Medicina Tropical de São Paulo* 50(1): 25–28. 2008

(Oleo-resin antioxidant, larvicidal, antimicrobial.)

Copernicia Martius ex Endl. Arecaceae (Palmae)

After the Polish astronomer Nicholas Copernicus, 1473–1543; see Edward Rosen, in *D.S.B.* 3: 401–411. 1981.

Copernicia prunifera (Mill.) H.E. Moore (*Arrudaria cerifera* (Arruda) Macedo; *Copernicia cerifera* (Arruda) Mart.; *Corypha cerifera* Arruda; *Palma prunifera* Mill.)

Brazil.

See *Species Plantarum* 2: 1187. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition.* 1754, *The Gardeners Dictionary: ... eighth edition no. 7.* 1768, *Travels in Brazil* 494–495. 1816, *Genera Plantarum* 253. 1837, *Not. Palm. Carnauba* 5. 1867 and *Gentes Herbarum*; occasional papers on the kind of plants 9: 242. 1963, *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Pharmacol. Res.* 52(3): 229–233. 2005

(Dermatitis. Antioxidant.)

in English: wax palm, carnauba palm

Coprosma Forster & Forster f. Rubiaceae

Greek *kopros* ‘dung’ and *osme* ‘a smell’, in reference to the fetid smell of some species; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum.* 137, t. 69. 1775, *De Fructibus et Seminibus Plantarum...* 1: 124–125, t. 26, f. 1. 1788, *Supplementum Plantarum* 17, 129. 1781[1782], Du Petit-Thouars, Aubert Aubert (1758–1831), *Mélanges de botanique et de voyages ... Premier recueil.* Paris, 1811 [Description abrégés des isles de Tristan d’Acugna. 41. 1811], *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 477. 1830, *J. Bot.* (Hooker) 3: 270. 1841 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 17(7): 60. 1921, H.H. Allan, *Fl. New Z.* 1: 559–588. 1961, E.J. Beuzenberg, *New Z. J. Bot.* 21: 9–12. 1983, R.D. Wilson, *New Z. J. Bot.* 22: 195–200. 1984, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany.* 25: 115–170. 1987, *New Zealand J. Bot.* 34(2): 282.

1996, *Candollea* 51(2): 386, 389–390. 1996. Sacred plants to the Maori people.

Coprosma foetidissima J.R. Forst. & G. Forst. (*Coprosma affinis* Hook.f.; *Coprosma foetidissima* A. Cunn.; *Coprosma foetidissima* Forst.; *Coprosma pusilla* G. Forst.; *Coprosma sagittata* Colenso)

New Zealand.

See *Char. Gen. Pl.*: 69. 1775, *Fl. Ins. Austr.*: 90. 1786, *Ann. Nat. Hist.* 2(9): 206. 1838 [1839 publ. Nov 1838], *Fl. Antarct.* 1: 21. 1844 [Bot. *Antarct. Voy.* I. (*Fl. Antarct.*). 1: 21, t. 14. 1844], *Trans. & Proc. New Zealand Inst.* 31: 270. 1899

(Leaves infusion drunk for kidney troubles, fevers. Inner bark decoction taken for stomachache and to stop vomiting.)

in English: stinkweed

Maori name: karamu

Coprosma lucida Forst. & Forst.f. var. **lucida** (*Coprosma australis* (A. Rich.) Rob.; *Coprosma australis* B.L. Rob.; *Coprosma lanceolata* Colenso; *Pelaphia laurifolia* Banks & Sol. ex Hook.f., nom. inval.; *Ronabea australis* A. Rich.)

New Zealand. Shrub or tree

See *Characteres Generum Plantarum* 69. 1775, *Voy. Astrolabe* 1: 265. 1832, *Annals of Natural History* 2: 206. 1839, *Fl. Nov.-Zel.* 1: 104. 1852, *Trans. & Proc. New Zealand Inst.* 31: 270. 1899 and *Proc. Amer. Acad. Arts* 45: 408. 1910

(Sap from the inner bark used for scabies, itch, sores, cuts, bruises.)

in English: shiny coprosma

in New Zealand: karamu, manono, mikimiki

Coprosma robusta Raoul (*Coprosma coffaeoides* Colenso)

New Zealand.

See *Ann. Sci. Nat., Bot.*, sér. III, 2: 121. 1844, *Trans. & Proc. New Zealand Inst.* 21: 87. 1888 (publ. 1889) and *Opera Bot. Belg.* 7: 249–260. 1996

(Young shoots infusion for inflammation and bladder problems.)

Maori name: karamu

Coptis Salisb. Ranunculaceae

Greek *kopto*, *koptein* ‘to cut off, to cut’, referring to the leaves, see *Transactions of the Linnean Society of London* 8: 305. 1807.

Coptis chinensis Franch. (*Coptis teeta* Wall. var. *chinensis* (Franch.) Finet & Gagnep.)

China. Perennial herb, stemless, leaves basal, inflorescence a terminal cyme, flowers whitish-green, seeds with a black

crustaceous testa, brownish-yellow rhizome cockspear-like, shady and damp places, under trees, in Traditional Chinese medicine *Coptis* is considered one of the 50 fundamental herbs, it is associated with the heart, liver, stomach and large intestine

See *Transactions of the Medical and Physical Society of Calcutta* 8: 347. 1842, *Journal de Botanique* (Morot) 11(14): 231. 1897 and *Bulletin de la Société Botanique de France* 51: 402. 1904, *Acta Phytotaxonomica Sinica* 24: 157–160. 1986

(Rhizomes stomachic, antiseptic, used in acute conjunctivitis, dysentery, acute gastroenteritis, insomnia and irritability, pyogenic infection, epistaxis, boils, burns and ulcerous skin disease.)

in English: Chinese gold thread, mishmi bitter

in China: huang lian

Coptis teeta Wallich (*Coptis teetoides* C.Y. Cheng)

China, India, Himalaya. Rhizomatous herb, perennial, stemless, woody horizontal rootstock densely fibrous, root brown with orange rootlets, slender scapes, small white or yellowish pedicellate flowers, stalked follicles, black seeds

See *Trans. Med. Phys. Soc. Calcutta* 8: 87. 1836, *Linnaea* 12(Lit.): 227. 1838, *Transactions of the Medical and Physical Society of Calcutta* 8: 347. 1842 and *Acta Pharmaceutica Sinica* 12(3): 196, f. 1, D, 2, D. 1965, *Acta Botanica Yunnanica* 15: 179–190. 1993

(Used in Ayurveda, Unani and Sidha. Plant decoction in cough, cold and fever. Rhizomes bitter, tonic, febrifuge, carminative, expectorant, anthelmintic, diuretic, depurative, stomachic, antiviral, antibacterial, antibiotic, antiperiodic, antipyretic, cooling body, laxative, antifungal, cook in water and drink, used for cough, bronchitis, cold, backache, malaria, dyspepsia, diarrhea, dysentery, diabetes, eye diseases, intermittent fevers, leprosy, dropsy, general debility.)

in English: gold thread

in China: huan liang, yun nan huang lian

in India: haladiya bachnaga, hem-tantu, maamiraa, maamisaa, mahamirana, mameeran, mameesa, mamira, mamira asli, mamirah, mamiram, mamiran, mamiran chini, mamiran-i-chini, mamiri, maniran, mimira, mishamitita, mishamlita, mishmeeta, mishmitita, misimi tita, morima, peetarogini, pidarokini, pita, pita-muulikaa, pitakarosana, pitamula, pitarohini, pitarokini, pithrumani, ringo, supita, tikta, tiktamula, tiktamuulaa, titaa

Coptis trifolia (L.) Salisb. (*Coptis groenlandica* (Oeder) Fernald; *Coptis trifolia* subsp. *groenlandica* (Oeder) Hultén; *Helleborus trifolius* L.)

North America. Perennial, creeping, colonial, roots yellow

See *Species Plantarum* 1: 558. 1753, *Transactions of the Linnean Society of London* 8: 305. 1807 and *Taxon* 31: 583–

587. 1982, *Reports of the Taisetsuzan Institute of Science* 17: 9–16. 1982, *Chinese Medicine* 4: 17. 2009

(Root bitter tonic, to treat stomach cramps, poor digestion and infections, jaundice, mouth and throat sores, gum problems, and worms, to stop vomiting, especially for children, as eyedrops, for teething and as an astringent.)

in English: goldenroot, goldthread, mouth-root, vegetable gold, vegetable gold thread, yellow snakeroot

in North America: coptide trifoliolée, savoyana

Coptosapelta Korth. Rubiaceae

From the Greek *kopto*, *koptein* ‘to cut off, to cut small, to pierce’, *koptos* ‘chopped, pounded’ and *pelte* ‘a shield’, referring to the winged seeds, see *Genera Plantarum* 794. 1791, *Ned. Kruidk. Arch.* 2(2): 112–113. 1851.

Coptosapelta flavescens Korth. (*Coptosapelta flavescens* var. *dongnaiensis* Pierre ex Pit.; *Coptosapelta tomentosa* Valetton ex K. Heyne, nom. illeg.; *Coptosapelta tomentosa* Valetton ex K. Heyne var. *dongnaiense* (Pit.) P.H. Hô; *Randia olaciformis* Merr.; *Webera macrophylla* Roxb.)

Burma, Malay Peninsula, Sumatra, Java, Borneo.

See *Flora Indica*: being a systematic account of the plants . . . 2: 534. 1824, *Nova Genera et Species Plantarum seu Prodromus* 4: 394. 1830, *Die Natürlichen Pflanzenfamilien* 4(4): 51. 1892 and *The Philippine Journal of Science. Section C, Botany*. Manila 3: 163. 1908, *Leaflets of Philippine Botany* 5: 1856. 1913, *Fl. Indo-Chine* 3: 54. 1922, *De Nuttige Planten van Nederlandsch-Indie* ed. 2, 2: 1384. 1927, *Cayco Vietnam* (An Illustrated Flora of Vietnam) 3(1): 164. Montreal: Pham-Hoang Ho, 1993

(Roots decoction given for worms in children, hepatitis, fever, ulceration of the nose, colic, toothache, parasitic worm infections, rheumatism; roots infusion a postpartum remedy; pest repellent. Arrow or dart poison.)

in India: salah

Malay names: akar malang, akar malong, chenderai, jaras, prual, sebereteh, semutega, ubat sampu

Coptosapelta griffithii Hook. f.

Malay Peninsula.

See *Hooker's Icones Plantarum* 11: t. 1089. 1871

(Roots and leaves stomachic, for colic, fever, abscesses.)

Malay names: akar malang, akar malong, akar sampu puchat

Coptosperma Hook.f. Rubiaceae

From the Greek *kopto*, *koptein* ‘to cut off, to cut small, to pierce’ and *sperma* ‘a seed’, see *Genera Plantarum* [Bentham

& Hooker f.] 2(1): 86. 1873, *Flora of Tropical Africa* 3: 92. 1877, *Bull. Mens. Soc. Linn. Paris* 2: 843. 1890.

Coptosperma graveolens (S. Moore) Degreef (*Pavetta graveolens* S. Moore; *Tarenna graveolens* (S. Moore) Bremek.)

Ethiopia, Zaire. Shrub or small tree, corolla greenish

See *Journal of Botany, British and Foreign* 45: 267. 1907, *Repertorium Specierum Novarum Regni Vegetabilis* 37: 193. 1934, *Systematics and Geography of Plants* 71(2): 374. 2001[2002]

(Decoction for rheumatism and jaundice.)

in Kenya: lomesei

in Tanzania: kasolia

Corallocarpus Welw. ex Benth. & Hook.f. Cucurbitaceae

From the Greek *korallion* 'coral, red coral' and *karpos* 'fruit'; Latin *corallum*, *i* (C. Sollius Modestus Apollinaris Sidonius), *corallium* and *curalium*, *ii* (Plinius, Ovidius), see Grosourdy, René de (fl.1864), *El Médico Botánico Criollo* 1(2): 338–339. Paris: F. Brachet, 1864, *Genera Plantarum* [Bentham & Hooker f.] 1(3): 831. 1867, *Transactions of the Linnean Society of London, Botany* 27: 32, t. 12. 1869, *Bulletin de la Société Botanique de France* 42: 304. 1895 and *Proceedings of the American Academy of Arts and Sciences* 40(21): 697–698. 1905, *Gen. S. African Fl. Pl.* ed. 2 747. 1951, *J. Cytol. Genet.* 31(1): 65–71. 1996.

Corallocarpus epigaeus (Rottler) Benth. & Hook.f. ex C.B. Clarke (*Bryonia epigaea* Rottler; *Bryonia epigaea* Blume; *Corallocarpus bequaertii* De Wild.; *Corallocarpus corallinus* (Naudin) Cogn.; *Corallocarpus corallinus* Cogn.; *Corallocarpus epigaea* Hook.; *Corallocarpus epigaea* (Rottler) Hook.f.; *Corallocarpus epigaeus* (Rottler) C.B. Clarke; *Corallocarpus epigaeus* (Rottler) Hook.f.; *Corallocarpus epigaeus* Benth.; *Corallocarpus epigaeus* Benth. & Hook.f., nom. inval.; *Corallocarpus epigaeus* Benth. ex Hook.f.; *Corallocarpus epigaeus* C.B. Clarke; *Corallocarpus fenzlii* Hook.f.; *Corallocarpus hildebrandtii* Gilg; *Corallocarpus tavetensis* Gilg; *Rhynchocharpa coralina* Naudin; *Rhynchocharpa epigaea* Naudin; *Rhynchocharpa epigaea* (Rottler) Naudin)

India, Tanzania. Herbaceous climber, prostrate, perennial, tuberous roots, leaves roughly hairy, all flower parts green, ellipsoid fruits, fruit may be eaten

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 212, 223. 1803, *Bijdr. Fl. Ned. Ind.* 15: 925. 1826, *Annales des Sciences Naturelles* sér. 4, 16: 178–180. 1862, *Gen. Pl.* [Bentham & Hooker f.] 1(3): 831. 1867, *Fl. Trop. Afr.* [Oliver et al.] 2: 565. 1871, *The Flora of British India* [J.D. Hooker] 2: 628. 1879, *Monogr. Phan.* [A. DC. & C. DC.] iii. 647. 1881 and *Botanische Jahrbücher für*

Systematik, Pflanzengeschichte und Pflanzengeographie 34(3): 362. 1904, *Rev. Zool. Afr.* ix. Suppl. Bot. 91. 1921

(Used in Ayurveda and Sidha. Roots laxative; a paste applied in snakebite, and also to women with abdominal pain; powdered roots given in syphilis, diarrhea, sprue (a chronic disorder, a tropical disease, malabsorption of nutrients, disturbed digestion, symptoms include foul-smelling acute or chronic diarrhea, dehydration, glossitis, stomatitis and emaciation), rheumatism, and in low doses in diabetes. Tuberous roots paste applied on snakebite, scorpion sting and swellings; for snakebite, tuber sliced, dried and powdered and eaten or drunk with water; fresh tuber crushed and the juice given in snakebite. Veterinary medicine, bulbs crushed in mustard oil and given orally to release abdominal gases and in insect bites; tuberous roots used as a precautionary medicine.)

in India: aakaasagarudam, aakaasagarudan, aakaash gadda, aakhasha garuda, aakaasha garuda, aakaashagaruda, aakaashagaruda balli, aakasa garudan kizhangu, akaca karutan, akaca karutan kilanku, akacakarutan, akacakarutankilanku, akacakerutan, akacakkarutan, akacakkarutankoti, akacakkoti, akasagerudan, akasagerudon, akas-gaddah, akasgaddah, akasgoddah, akasha-garuda-gaddalu, akasha-garuda-gadde, akasha-garudan, akashagadda, akashagarudagadde, akashagarudan, akashagaruden, akashakarudan, akashgadda, akashgaruda-balli, akaya karutan, akayakarutan, antaravalli, antaravallikkoti, arkkankotan, atarakkovai, cakamuvi, catittavakkoti, catittavam, cavuttirakkutori, cimai civatai, civakamiruti, cutapantani, garudan, gilimoo-gina gedde, gollan-kovaik-kizhangu, gollankovai, kadamba, kadavinai, kadawi nai, kadvi nai, kadvinai, kadwai-nai, kalkovai, karkovai, karutan, karutan kilanku, karutan kizanku, katunaahi, katunahi, kilimukku-k-kilanku, kilimukkukilanku, kimmiyakkilanku, kimmiyam, kirkand, kollaikkovai, kollam-kova-kizhanna, kollan kova killangu, kollan-kova-kizhauna, kollan-kova-kizhauna, kollan kovai, kollan kovaimulam, kollankoti, kollankova, kollankovai, kollankovvai, kolung kovay kalung, korutakkoti, korutan, kovaikkilanku, mahamula, manomaci, mirchia kand, mirchikand, moogina gedde, mukkaarthi gedde, murudonda, naagadonda, naga donda, nagadonda, nahika, nahikaa, nakacanan, paatala-garudaa, pamaku, pamudonda, panangovai, pankayam, patalagaruda, pattirati, pey cintil, peyar cintil, pomudonda, putaiyiral, rakas-gaddah, rakasgaddah, shukanaasaa, sukanasa, tanavaiyatam, ularndadu, vanamait-tanki, varukkatiron, ventonri, yarakam

in Tibet: sa khu ta

Corallophiza Gagnebin Orchidaceae

From the Greek *korallion* 'coral, red coral' and *rhiza* 'a root', see *Acta Helvetica, Physico-Mathematico-Anatomico-Botanico-Medica* 2: 61. 1755, *Spec. Inaug. Corallophiza* 5–6, 8. 1760, *Gen. N. Amer. Pl.* [Nuttall]. 2: 197 (-198). 1818, *Comp. Fl. N. Middle States* 322. 1826 and *Taxon* 45: 695–696. 1996.

North to Central America.

See *Species Plantarum*. Editio quarta 4: 110. 1805, *Gen. N. Amer. Pl.* 2: 197. 1818, *Dictionnaire des Sciences Naturelles* [Second edition] 10: 375. 1818, *Flora of the southern United States* 454. 1860, *Revisio Generum Plantarum* 2: 674. 1891, *Proceedings of the American Academy of Arts and Sciences* 33(25): 475. 1898 and *Harvard Pap. Bot.* 10: 24. 1997

(Diaphoretic, sedative and febrifuge.)

in English: autumn coralroot, chicken toe, coral root, crawley, crawley root, dragon's claw, late coralroot

Corallorhiza striata Lindl. (*Corallorhiza macraei* Gray; *Corallorhiza ochroleuca* Rydb.; *Neottia striata* (Lindl.) Kuntze)

North America.

See *The Genera and Species of Orchidaceous Plants* 534. 1840, *Revisio Generum Plantarum* 2: 674. 1891 and *Taxon* 30: 845–851. 1981

(Diaphoretic.)

in English: hooded coralroot, striped coral root

Corbichonia Scop. Molluginaceae

Possibly from the Latin *corbicula*, *ae* 'small basket' (Palladius Rutilius Taurus Aemilianus, circa 4th century after Christ), see Scopoli, Joannes Antonius (Giovanni Antonio) (1723–1788), *Introductio ad historiam naturalem sistens genera lapidum, plantarum et animalium: hactenus detecta, caracteribus essentialibus donata, in tribus divisa, subinde ad leges naturae*. Pragae: Apud Wolfgangum Gerle, 1777.

Corbichonia decumbens (Forssk.) Exell (*Corbichonia decumbens* Scop.; *Orygia decumbens* Forssk.)

India.

See *Fl. Aegypt.-Arab.* 103. 1775 and *Journal of Botany, British and Foreign* 73: 80. 1935

(Root paste given for the treatment of jaundice.)

in Southern Africa: inyongwane (Zulu)

in India: moti-luni, patar chatti, tellaganzari

Corchorus L. Tiliaceae (Malvaceae)

From the Greek *korchoros* (Theophrastus), *korkoros* (Aristophanes) 'anagallis'; Latin *corchoros*, *corchorus*, applied by Plinius to a poor kind of pulse, growing wild. The derivation of the name is quite obscure, possibly from *koreo* 'to purge', or also from *kore* 'a pupil' and *koreo*; see Carl Linnaeus, *Species Plantarum* 1: 529–530. 1753, *Genera Plantarum*. Ed. 5. 234. 1754 and *Fieldiana, Bot.* 24(6): 302–324. 1949, *Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 413–442. 1956, *Adansonia*, n.s. 3: 91–129. 1963, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85(3): 2452–2468. 2001, *Fl. Trop. E. Africa* 1–120. 2001, *Harvard Papers in Botany* 9(2): 257–296. 2005.

Corchorus aestuans L. (*Corchorus acutangulus* Lam.; *Corchorus acutangulus* auct. non Forssk.; *Corchorus aestuans* Herb. Madr. ex Wall.; *Corchorus aestuans* Forssk., nom. illeg.; *Corchorus aestuans* Blanco; *Corchorus alatus* Don;

Corchorus fuscus Roxb.; *Corchorus muricatus* Schumach. & Thonn.; *Corchorus muricatus* Schumach.; *Corchorus muricatus* Hochst. ex A. Rich.; *Corchorus oppositiflorus* Hassk.; *Corchorus polygonus* Schumach. & Thonn.; *Corchorus procumbens* Bojer; *Triumfetta bogotensis* DC.)

Pantropical, Florida, India. Herb, shrub, subshrub, suffruticose, erect or sub-erect, succulent, branching, erect or spreading, prostrate to ascending, rosette-forming, prostrate, taproot, flowers yellow to yellow-orange in very shortly pedunculate cymes, brown hard ridged dry carpels, used as vegetable, weed of waste ground, on floodplain

See *Species Plantarum* 1: 444. 1753, *Systema Naturae*, Editio Decima 2: 1079. 1759, *Flora Aegyptiaco-Arabica* 101. 1775, *Encyclopédie Méthodique, Botanique* 2(1): 104. 1786, *Hort. ***Corchorus antichorus* Raeusch**

India.

See *Nomenclator Botanicus*, [Raeusch.] ed. 3, 158. 1797

(Whole plant cooling, tonic, aphrodisiac, to treat urinary tract problem, to relieve irritation and pain during urination, to increase male fertility.)

in India: bahufali, bahupali, bahuphali, baphuli, bathi bahuphali, bhedani, bofali, boh phali, bojoromuli, sanabu

***Corchorus asplenifolius* Burch.** (*Corchorus aspleniifolius* Burch.; *Corchorus aspleniifolius* E. Mey. ex Harv. & Sond.; *Corchorus mucilagineus* Gibbs; *Corchorus serrifolius* Burch.; *Corchorus serrifolius* DC.; *Corchorus trilocularis* sensu Eyles)

Kalahari desert, Zambia, South Africa and Swaziland. Perennial herb with prostrate or suberect annual stems from a woody rootstock, narrow leaves, yellow flowers, inflorescence a leaf-opposed fasciculate cyme, fruit a slender cylindrical 3-valved capsule, mucilaginous foliage, nutritious leafy vegetable, in open woodland

See *Fl. Cap.* (Harvey) 1: 229. 1860

(Ash is said to dispel ants.)

in English: wild Jew's mallow

in Southern Africa: guxe, ubangalala

***Corchorus capsularis* L.**

India. Leaves raw or cooked

See *Species Plantarum* 1: 529–530. 1753 and *Science and Culture* 45: 325–327. 1979, *Taxon* 31: 576–579. 1982, *Journal of Fujian Agricultural College* 15: 60–63. 1986, *Cytologia* 57: 21–25. 1992, *Acta Genetica Sinica* 21(2): 125–132. 1994, *Cytologia* 65: 443–446. 2000, *Yakugaku Zasshi* 127: 359–365. 2007

(Used in Ayurveda and Sidha. Leaves carminative, antioxidant, demulcent, laxative, antinociceptive, antiinflammatory, stimulant and stomachic, to treat various ailments related to inflammation and pain, boils; an infusion used for dysentery, fevers, headache, dyspepsia and liver disorders; leaves and fruits to control wound maggots. A decoction of the roots and unripe fruits used for dysentery; contact therapy, root tied to the waist of a baby to stop him from crying; roots insect repellent. Seeds tonic, carminative and febrifuge, a paste applied on head to kill lice. Stem tip applied on head for intense fever. Used as an arrow poison or ordeal poison. Ceremonial, rituals, festivals, the fibre.)

in English: Bangla white jute, jute, white jute

(Used in Ayurveda and Unani. Dried powdered plant given to males with goat's milk to regain sexual vigor. Wood and young leaves cooling, tonic, to treat urinary tract problem, to relieve irritation and pain during urination, to increase male fertility; decoction of seeds and leaves with milk and sugar is a good tonic. Leaves emollient and cooling, mucilage used for the treatment of gonorrhoea and applied as a poultice for healing wounds.)

in India: bahufali, bahupali, bahuphali, baphuli, bathi bahuphali, bhedani, boh phali, bojoromuli, cham gash, cham ghas, chamkas, chamkash, chanchu, hade-ka-khet, harankhuri (haran = deer, khuri = hoofs), katuka, kshudra, kshudrachanchu, munderi, patupatrika, raphuli, sanabu, shunakachanchuka, tvaksara

in Pakistan: bahu phali, boh phali, khurand, munderi

Corchorus fascicularis Lam. (*Corchorus brachycarpus* Guill. & Perr.)

Ethiopia, Pakistan, India. Herb, erect, prostrate, annual, woody base, flowers yellow, capsule 3-loculed, fodder, a weed of cultivation, in savanna woodland

See *Encycl. (Lamarck)* 2(1): 104. 1786 and *Bulletin du Jardin botanique de l'État à Bruxelles* 28(4): 489–531. 1958, *Taxon* 28: 393–395. 1979

(Used in Ayurveda. Mucilaginous jelly-like substance astringent, tonic and restorative. Veterinary medicine, whole plant fed to cattle to improve lactation, also fed to weak cattle to improve health.)

in India: bankosta, bhirupatrika, chanchu, chanchuputra, chanchura, chhunchhu, chinchu, chunchali soppu, chunchi, diaghpatri, hirankhuri, hirankuri, kalabhi, khetapat, kost, kshetrachhunchhu, kshetrasambhava, motibahuphali, sushaka, vijala

in Pakistan: hirankhuri

in Senegal: nzofé

in Sierra Leone: kuri suri

Corchorus olitorius L.

Tropical Africa. Herb, erect, tough, strongly branched, papery leaves, yellow flowers in axillary bracteate fascicle, short-stalked cylindrical ribbed angular fruits, food crop, leafy mucilaginous vegetable, a variable species, in open forest, grassland, in seasonally flooded areas, marshes, rivers and lakes, flood plains

See *Species Plantarum* 1: 529. 1753 and *Fl. Zambes.* 2: 84. 1963, *Science and Culture* 45: 325–327. 1979, *Cytologia* 46: 643–647. 1981, *Indian Journal of Genetics and Plant Breeding* 41: 154–158. 1981, *Taxon* 31: 127–128. 1982, *Journal of Fujian Agricultural College* 15: 60–63. 1986, *Cytologia* 57: 21–25. 1992, *Acta Genetica Sinica* 21(2): 125–132. 1994, Denton, L., “A review of *Corchorus olitorius* L. in Nigeria.” In: Schippers, R.R. & Budd, L. (Editors). *Proceedings of a Workshop on African Indigenous Vegetables*, Limbe, Cameroon, 13–18 January 1997. Natural Resources Institute/IPGRI, Chatham, United Kingdom. pp. 25–30. 1997, *Cytologia* 65: 443–446. 2000

(Used in Ayurveda, Unani and Sidha. Decoction of plant given to cure gonorrhoea; decoction of *Corchorus aestuans* and *Corchorus olitorius* drunk to treat syphilis. Wood decoction given to cure coughs and pain. Leaves and seeds tonic, diuretic, laxative. Seeds purgative and febrifuge, poisonous to mammals and insects, they contain cardiac glycosides. Leaves demulcent, diuretic, cooked with cowpeas, milk and butter, given to lactating mothers; leaves infusion taken against constipation and fever; leafy twigs against heart troubles; leaves paste applied externally to treat syphilis. Scrapings from the root put into cavities in teeth to ease pain; root decoction as a tonic; root decoction and unripe capsules used in diarrhoea. Used as an arrow poison or ordeal poison.)

in China: san shi huang ma

in India: arenukam, bankitutturu, canchu, dirghachanchu, ennepundi gida, hardikaket, jangali jiraa, kaaduchunch, kaaduchunchali gida, kaduchunch, kadukosta, kadvapat, kagle ki tmbaku, karak, kaunti, raja-jira

Corchorus urticifolius Wight & Arn. (*Corchorus quinque-nervis* Hochst. ex A. Rich.)

India and Sri Lanka. Erect to semi-prostrate annual herb

See *Prodromus Florae Peninsulae Indiae Orientalis* 73. 1834 and *Bulletin du Jardin botanique de l'État à Bruxelles* 28(4): 489–531. 1958

(Said to be irritant.)

***Cordeauxia* Hemsl. Fabaceae (Caesalpinieae, Leguminosae)**

See *Bulletin of Miscellaneous Information Kew* 1907: 361. 1–26 Oct 1907, closely related to *Caesalpinia* and *Stuhlmannia*.

Cordeauxia edulis Hemsl.

Central Somalia, Ogaden, Ethiopia. Perennial non-climbing tree, shrub or small tree, rare and endangered species, variable, stiff, long-lived, densely branched, multi-stemmed,

stem and leaves with conspicuous red glands, long taproot, lateral roots, leathery leaves, yellow flowers, inflorescence a terminal raceme, ovoid pod stalked beaked, 2 hard valves, leaves can be infused as tea, very nutritious sweetish to sour seeds valuable famine food, yellow seed oil, dry-season fodder for camels, goats, sheep and cattle, found in semi-desert regions in *Acacia-Commiphora* deciduous bushland, hot arid and semi-arid zones

See *Candollea* 21(1): 3–11. 1966, *Economic Botany* 32(3): 336–345. 1978, *Food / Nahrung* 26(9): 797–802. 1982, *Rivista Tossicol. Sperim. Clin.* 14(1–2): 57–62. 1984, *Economic Botany* 42(2): 242–249. 1988, *Giessener Beiträge zur Entwicklungsforschung* 24: 237–242. 1997, *Economic Botany* 55(1): 47–62. 2001

(Used to regulate gastric secretion, to permit treatment of ulcers due to hot food, to stimulate hemopoiesis, to alleviate anemia. Reputed to cause intestinal disorders in goats when eaten as the sole diet. Freshly picked seeds are roasted or boiled and used to kill insects.)

in English: jeheb nut, ye'eb, ye-eb nut, yeheb, yeheb bush, yeheb nut, yehib

in Somalia: ehb, qud, quda, yicib

Cordia L. Boraginaceae (Cordiaceae)

For the German botanist and pharmacist Valerius Cordus, 1514/1515–1544 (d. Rome), traveller and botanical collector, one of the fathers of pharmacognosics, 1531 bachelor of medicine at the University of Marburg, 1531 Wittenberg University studied under the German humanist and reformer and theologian Philipp Melanchthon (original name Philipp Schwartzerd, 1497–1560), 1540 lectured at Wittenberg, his works include *Pharmacorum conficiendorum ratio. Vulgo vocant dispensatorium*. [Second edition.] Nuremberg [1547?] and *Annotationes in Pedacii Dioscoridis Anazarbei de materia medica libros V*. Strasbourg 1561. Euricius [Eurich] Cordus (1486–1535), father of Valerius, poet and physician, a supporter of Martin Luther, received doctor's degree at Ferrara in 1521, 1527–1533 taught at Marburg, 1533–1535 professor at the Gymnasium in Bremen and municipal physician, wrote *Botanologicon. Coloniae* 1534. See Carl Linnaeus, *Species Plantarum*. 1: 190–191. 1753, *Genera Plantarum*. Ed. 5. 87. 1754, *The Civil and Natural History of Jamaica in Three Parts* 172, pl. 13, f. 2. 1756, *Journal of the Linnean Society, Botany* 2: 128. 1858 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5/2): 539–609. 1960, Garrison and Morton, *Medical Bibliography*. By Leslie T. Morton. 1810 (for the first edition of *Dispensatorium*.) New York 1961, J.H. in Pakistan: dagura, dragur

Cordia millenii Baker (*Gerascanthus millenii* (Baker) Borhidi)

West Africa, Ivory Coast, Nigeria. Tree, fine spreading crown, forest, primate food

See *Kew Bulletin* 1894: 27. 1894 and *Acta Botanica Hungarica* 34(3–4): 405. 1988

(A decoction of leaves taken for asthma, colds, coughs. Pulverized seeds mixed with palm oil used for ringworm and itch. A fetish tree.)

in English: drum tree

in Cameroon: bola, bomba, boomba, jom, jombomba, yom, yombomba

in Congo: bambongmba, mbongmba

in Ghana: akaboa, akyaboa, kyeneboa, kyenedua, kyeneduru, tweneboa, tweneboakodua, tweneduru

in Nigeria: egin ogume, erheigede, kiebo eke, omà, omah, omo, òmò

Cordia mirabiloides Roem. & Schult.

Central America.

See *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 4: 465. 1819

(For gum, dentition.)

Cordia monoica Roxb. (*Cordia bakeri* Britten; *Cordia bequaertii* De Wild.; *Cordia dioica* A. DC.; *Cordia kabarensis* De Wild.; *Cordia monoica* Bojer; *Cordia obovata* Baker, non Balf.f.; *Cordia ovalis* R. Br.; *Cordia ovalis* R. Br. ex A. DC.; *Cordia quarensis* Gürke; *Cordia rubra* Hiern; *Cordia rubra* Hochst. ex A. Rich.; *Gerascanthus bakeri* (Britten) Borhidi; *Gerascanthus monoicus* (Roxb.) Borhidi; *Gerascanthus obovatus* (Balf.f.) Borhidi)

Tanzania, Ethiopia, central and southern Africa. A multi-stemmed shrub or tree, spreading, leaves very rough, branchlets leaf and flower stalks densely covered with rusty hairs, pale yellow sharply fragrant flowers in dense terminal clusters, each flower tubular, hairy cup-like persistent calyx, pointed yellow-orange soft sweet edible fruit, seed in jelly edible pulp, a source of bee forage, riverine forest, woodland, bushland, with *Acacia-Euphorbia*, along watercourses

See *Plants of the Coast of Coromandel* 1: 43, t. 58. 1796, *Hortus Maurit.* 235. 1837, *Prodr.* (DC.) 9: 479. 1845, *Proc. Roy. Soc. Edinb.* xii. (1884) 80. 1884, *Bull. Misc. Inform. Kew* (1894) 28. 1894, *J. Bot.* 33: 88, in nota. 1895, *Pflanzenw. Ost-Afrikas C* (1895) 335. 1895 and *Rev. Zool. Afr. viii. Suppl. Bot.* 43. 1920, *Rev. Zool. Afr. ix. Suppl. Bot.* 88. 1921, *Pl. Bequaert.* ii. 118. 1923, *Acta Botanica Hungarica* 34(3–4): 403, 406, without basionym date. 1988

(Used in Sidha. Leaves to treat eye diseases. Leaves and stem bark used to treat leprosy using a steam bath, and the body can also be washed with a decoction made from pounded bark. Roots boiled and the extract taken for vomiting and malaria, especially by children. Leaf extract given to animals and people to remove retained placenta. Used in blessings and in rituals, believed to be a peace-engendering plant.)

in English: sandpaper cordia, sandpaper tree, snot berry

in India: adavicalle, adavicella, adavichalle, bottukuru, botukukura, kichavirigi, kondavirigi, nakker, narevali, narivari, nariviri, naruvili, paccabotuku, paccabotukura, pachchabotuku, panugeri, patsabotukura, peddabotuku, peddanakkara, piyyagaru

in Kenya: araba, elkaisekiseki, eseki, etuntun, ikuo, ilseki, kithei, lamantume, Imuleel, Imuleelin, lsek, mader, marer-girgir, marer-goh, marergom, msasa, mukuo, mukuu,

muleelin, muthigi, muthugagu, mutugangu, nogirwet, nthei, oseki, oseno, qotte, se'eki, seki, taparer, topererwo, toporewo

in Southern Africa: snotbessie; iLovu-elimnyama, iLovu-lasemfuleni (Zulu); omusepa (Herero)

in Tanzania: bagalmo, bagharimo, eseki, ilseki, isek, magamosi, mdawi, mlembu, mongoongo, motoasi-mwerema, msasa, msena, msenha, mshasa, mshasha, msowowi, museno, mushenhu, mwerema, nembu, oltiaska, oseki, tipa, tipan

Cordia myxa Linn. (*Cordia myxa* Thwaites; *Cordia myxa* Forssk.; *Gerascanthus myxus* (L.) Borhidi; *Vitex gomphophylla* Baker) (Greek *myxa* 'slime', Latin *myxa* for a kind of plum-tree, *Cordia myxa*, Plinius.)

Near and Middle East. Shrub or tree, stout stem, edible sticky mucilaginous pulp, edible kernel

See *Species Plantarum* 1: 190. 1753, *Fl. Aegypt.-Arab.* p. lxiii. 1775, *Genera Plantarum* 644. 1839, *The Vegetable Kingdom* 629. 1846 and *Fl. Trop. Borhidi)

West Africa, Pakistan, Sri Lanka. Shrub or tree, very variable, tangled, multi-branched, drooping branches, heart-wood scented, the bark contains a gum, white-cream sweet-scented tubular flowers in terminal clusters, tiny orange-red tipped fruit with gelatinous sticky sweet edible pulp, ripe fruits eaten raw, famine food, clear gum edible, fruit eaten by monkeys, baboons and birds, fodder for goats, camels, sheep and cattle, found in grassland, open bushland, scrubland, damp sites, black and red sandy soils, dry riverine vegetation, savanna riverbanks, usually with *Salvadora persica*

See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 423. 1792, *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1879: 46. 1879 and *Acta Bot. Hung.* 34(3–4): 406. 1988

(Bark astringent. Leaves against fever. Root abortifacient. Root and bark decoction used to treat stomach disorders; roots decoction for treatment of malaria. Veterinary medicine, a decoction of the root and bark used to treat conjunctivitis in cattle. Widely used in rituals.)

in English: grey-leaved cordia, grey-leaved saucer berry

in Kenya: adome, adomeon, adomewa, adomeyon, adomoyon, adumewa, dorgo, edoma, edome, gaer, gayer, harores, ho'orocho, kithea, kithia, koh, lgueita, lgweita, lgweita-orok, Imanturre, mad'eera, madee'r, madeer, madeer-qoowe, mader, mader-boor, mareer, marer, mderia, mhali, mkayukayu, mtale, muhale, mutaale, mutalya-chana, mutheimunini, nokirwet, ol-dorko, ol-durgo, ol-olgot, salapani, silapani

in Madagascar: hazonkorora, sakalava, taindelonkarany, tanelo, varo karana

in Tanzania: angweegwee, bagalimo, baghalmo-lambi, funidang, hanarmo, hararmo, mdawi, mdawi-sogwe, mdumwakiguu, mkamasi, mlembu, mnembu, mnya mate, mochocho, mpololo, nshishinono, oldorko, oldurgo, ololfot, ololgot

Cordia subcordata Lam. (*Cordia lowriana* Brandis; *Cordia lowryana* Brandis; *Cordia lowryana* J.S. Mill.)

Pacific, Madagascar. Shrub or tree, spreading, orange petals

See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 421. 1792 and *Indian Trees* 479. 1906, *Mémoires du Muséum National d'Histoire Naturelle. Nouvelle Série. Série B, Botanique* 19: 44. 1969, *Adansonia*, sér. 3 23(2): 292, f. 2. 2001

(Anodyne, analgesic, antiinflammatory, for rheumatism.)

in English: sea trumpet

in Madagascar: antafabory, antafambony, aviavy, varoala

in Hawaii: kou

in China: cheng hua po bu mu

Cordia ulmifolia Juss. ex Dum. Cours. (*Cordia ulmifolia* Juss.; *Cordia ulmifolia* A. DC.; *Cordia ulmifolia* Spreng.)

Virgin Island.

See *Le Botaniste Cultivateur, ...* 2: 148. 1805, *Syst. Veg.* (ed. 16) [Sprengel] 1: 653. 1824 [dated 1825; publ. in late 1824], *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 494. 1845

(Purgative, febrifuge.)

in English: black sage

Cordia vignei Hutch. & Dalz.

West Africa, Ivory Coast, Sierra Leone. Shrub, forest

See *Flora of West Tropical Africa* [Hutchinson & Dalziel] 2: 196. 1931

(A leaf-decoction as a purgative; powdered leaves for rheumatism. A bark decoction for washing sores.)

in Ivory Coast: ko-bona

in Sierra Leone: fule

Cordia wallichii Don (*Cordia obliqua* var. *tomentosa* (Wall.) Kazmi, nom. superfl.; *Cordia obliqua* var. *wallichii* (Don) C.B. Clarke; *Cordia tomentosa* Wall., nom. illeg.; *Cordia tomentosa* (Lam.) Roem. & Schult.; *Cordia tomentosa* Cham., nom. illeg.)

India. Leaves fried and eaten, ripe fruit eaten

See *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 4: 459. 1819, *Fl. Ind.* [Carey & Wallich ed.] 2: 339. 1824, *Linnaea* 4: 472 (–473). 1829, *A General History of the Dichlamydeous Plants* 4(2): 379. 1838, *The Flora of British India* [J.D. Hooker] 4: 137. 1883 and *J. Arnold Arbor.* 51(2): 143. 1970

(Used in Ayurveda and Sidha. Fruits demulcent, expectorant, astringent, used in bronchial affections and urinary problems.)

in India: ali, bahuvaraka, bahuwara, bairola, bhutadruma, bhutavriksha, buragunda, buralessura, burgunda, chadle, challe, chandle, doddachalle, dvijakutsita, gandhapushpa, karbudara, karbudaraka, kichavirigi, kondavirigi, lekha-shataka, mannadaki, muk, naamaviri, nakkera, namaviri,

naruvili, naruviri, palantekku, peddabotuku, peddanakera, periyaviri, perunaruvili, pichhila, salle, selu, shailu, shapita, shataka, shelle, shelu, shelubheda, shitala, shitaphala, shleshmata, shleshmatataka, sidam, solle mara, uddala, uddalaka, valiyanichhi, veniru, vidi, viri, virimaram, viriyan

Cordyla Lour. Fabaceae (Caesalpiniaceae, Leguminosae, Swartzieae)

Referring to the shape of fruit or to the long-stalked ovary, from the Greek *kordyle* 'a club', see *Feddes Rep.* 41: 227–235. 1937.

***Cordyla africana* Lour.**

Tanzania. Perennial non-climbing tree, spreading, rounded crown, heads of yellow-orange stamens, no petals, ovary stalked, yellow pods thin walled, flat seeds in fleshy pulp, fruit edible, sticky pulp smells like beans, fleshy pulp of ripe fruit eaten fresh, famine food, in swamp forests, riverine

See *Flora Cochinchinensis* 402, 411, 412. 1790

(Bark laxative, purgative, for constipation. Veterinary medicine, stem bark vermifuge.)

in English: bush mango, sunbird tree, wild mango

in Southern Africa: iGowane-elikhulu, iGowane-lehlali, mufondo, muFondo, muTondo, mutondo, umBhone, wildemango

in Sudan: dougoura, ndimba

in Tanzania: mbachanga, mgwata, mkwata, mndundu, mpachama, mridu, mroma, mtigonzi, mtondo, mumbwe, mvoo, ntondo

***Cordyla densiflora* Milne-Redh.**

Tanzania. Perennial non-climbing tree, short bole, many-branched, spreading, bushy, rounded crown, smooth bark, compound leaves, sweetly scented creamy flowers in dense crowded clusters near the ends of leafless branches or on short side branches, no petals, green-white stamens, rounded cup-like green calyx, green beaked fruit, thin-walled seeds embedded in pulp with unpleasant odour, mature fruit cooked, pulp of ripe fruit juicy eaten raw, in deciduous woodland and dry *Commiphora-Acacia* bushland, savanna

See *Repertorium Specierum Novarum Regni Vegetabilis* 41: 234. 1937

(A solution of pounded leaves, hot water and salt allowed to cool until lukewarm, the solution then used as an enema to treat severe constipation. Ground charcoal made from the wood is mixed with sheep fat and smeared on the wound to treat burns.)

in English: wild mango

in Tanzania: miembe dasi (= wild mango), mkwata

***Cordyla pinnata* (A. Rich.) Milne-Redh.** (*Calycandra pinnata* Lepr. ex A. Rich.; *Calycandra pinnata* A. Rich.; *Cordyla pinnata* (Lepr. ex A. Rich.) Milne-Redh.)

Tropical Africa. Perennial non-climbing tree

See *Florae Senegambiae Tentamen* 30, 31, t. 9. 1832, *Repertorium Specierum Novarum Regni Vegetabilis* 41: 232. 1937

(Leaves pounded applied to abscesses; bark decoction anthelmintic; trunk and root bark purgative and anthelmintic; fruit laxative. Veterinary medicine, vermifuge.)

in English: bush mango

in Mali: dugura, duki, duto, duuki, logolaa, logolanga, wankore

in Senegal: dimb, duguto, duki, duto, duuki

***Cordylanthus* Nutt. ex Benth.**

Scrophulariaceae (Orobanchaceae)

From the Greek *kordyle* 'a club' and *anthos* 'flower', see *A Natural System of Botany* 445. 1836, *Proceedings of the California Academy of Sciences* 1: 62. 1855, *Mus. Bot. Lugd.-Bat.* 2: 27. 1856, *Proceedings of the American Academy of Arts and Sciences* 19: 95. 1883 and *Muhlenbergia*: a journal of botany 3(8): 133. 1907, *Bulletin of the Torrey Botanical Club* 45: 417–418. 1918, *A Manual of the Flowering Plants of California ...* 945. 1925, *Proceedings of the Academy of Natural Sciences of Philadelphia* 99(7): 189. 1947, *Madroño* 23: 93. 1975.

***Cordylanthus ramosus* Nutt. ex Benth.** (*Adenostegia ramosa* Greene; *Adenostegia ramosa* (Nutt. ex Benth.) Greene; *Cordylanthus ramosus* Nutt.; *Cordylanthus ramosus* Nutt. ex Benth. subsp. *setosus* Pennell; *Cordylanthus ramosus* Nutt. ex Benth. var. *puberulus* J.F. Macbr.)

North America. Annual herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 597. 1846, *Pittonia* 2(10B): 180. 1891

(Plant infusion emetic, for syphilis, venereal diseases.)

in English: bushy bird's beak

***Cordylanthus wrightii* A. Gray** (*Adenostegia wrightii* (A. Gray) Greene; *Cordylanthus wrightii* A. Gray subsp. *wrightii*; *Cordylanthus wrightii* A. Gray var. *pauciflorus* Kearney & Peebles) (Charles (Carlos) Wright, 1811–1885, a plant collector for Asa Gray and John Torrey, collected this plant on "Prairies, from 6 to 30 miles east of El Paso" in 1849 and Asa Gray named and described the plant in 1858, see Asa Gray (1810–1888), *Plantae Wrightianae Texano-Neo-Mexicanae*. 1852–1853 and E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Bernice P. Bishop Mus. Bull.* 144: 192. 1937, Elmer Drew Merrill, in *Contr. U.S. Natl.*

Herb. 30(1): 318. 1947, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 523. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 443. 1972, Stafleu and Cowan, *Taxonomic Literature*. 7: 464–466. 1988.)

North America. Annual herb, filiform divided leaves, yellow corolla

See *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 597. 1846, *Report on the United States and Mexican Boundary ... Botany* 2(1): 120. 1859, *Pittonia* 2(10B): 180. 1891 and *Economic Botany* 8(1): 3–20. 1954, *The Southwestern Naturalist* 24: 187–206. 1979

(Antimicrobial, for syphilis, venereal diseases, for prolapses of the uterus and menstrual pain, to bleach the skin. Ceremonial.)

in English: bird's beak, clubflower, Wright clubflower, Wright's birdbeak, Wright's bird's beak

Cordyline Comm. ex R. Br. Asparagaceae (Agavaceae, Dracaenaceae, Liliaceae)

Greek *kordyle* 'a club', referring to the roots or to the stems; see *Theodora Speciosa* 82. 1786, *Genera Plantarum* [Jussieu] 41. 1789, Robert Brown, *Prodromus florum Novae Hollandiae*. 280. 1810, *Revisio Generum Plantarum* 2: 716. 1891 and *Fl. in French: coriandre

Coriaria L. Coriariaceae

From the Latin *corium* ‘leather’, leaves and bark used for tanning, see *Species Plantarum* 2: 1037. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 739. 1824 and *Fieldiana, Bot.* 24(6): 174–175. 1949, *Rhodora* 74(798): 242–253. 1972.

Coriaria arborea Lindsay

New Zealand. Small tree, fluted stem, glossy green leaves in pairs, greenish red to purple flowers in racemes, floral envelope swollen and succulent used as food, purple berry

See *Contr. New Zealand Bot.* 84. 1868 and *Iden* 47(9): 19–24. 1993

(Seeds, stems and leaves if eaten are extremely poisonous; the fleshy part surrounding the seeds is not poisonous. Young shoots for boils, dysentery, bruises, diarrhea, sprains, bleeding cuts; leaves extract for sores, cuts, dysentery, bruises, wounds; roots for rheumatism.)

in English: toot

Maori names: puhou, tupakihi, tutu

Coriaria nepalensis Wall. (*Coriaria kweichowensis* Hu; *Coriaria sinica* Maxim.; *Morus calva* H. Lévl.; *Morus calva* H. Lévl.)

China, Himalaya. Small tree or shrub, greenish red catkins

See *Plantae Asiaticae Rariores* (Wallich) 3: 67, pl. 289. 1832 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(363–367): 265. 1914, *Bulletin of the Fan Memorial Institute of Biology* 7: 213. 1936

(Leaves astringent, antiinflammatory, purgative. Ripe fruits eaten, but highly intoxicating when taken in large quantities.)

in China: ma sang

in India: gangara, gangeru, kholo choroshi, lit zaklo, makola, makroli, masuri, masurya, musroi, nacchar, nachhar, richh-ka-ancha, richh ka ancha, richh-ka-anchal

Coriaria ruscifolia L. (*Coriaria microphylla* Poir.; *Coriaria ruscifolia* subsp. *microphylla* (Poir.) L.E. Skog; *Coriaria thymifolia* Humb. & Bonpl. ex Willd.)

South America. Fruits eaten by birds

See *Species Plantarum* 2: 1037. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 6(1): 87. 1804, *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 819. 1806 and *Rhodora* 74(798): 249. 1972

(Toxic to animals. Fruits with some narcotic and hallucinogenic effect, eaten for inebriation.)

in Ecuador: piñan, shanshi

Coriaria sinica Maxim.

China.

See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 29(3): 9. 1881

(Worshipped, magic.)

in China: ma song zai

Cornulaca Delile Chenopodiaceae (Amaranthaceae)

See Delile, Alire Raffeneau, *Flore d'Égypte*. Explication des planches. *Histoire des plantes cultivées*. Mémoire sur les plantes qui croissent spontanément dans ce pays. Planches., 206. t. 22. f. 3. 1813 [Paris, 1812–1817].

Cornulaca monacantha Delile (*Cornulaca monacantha* var. *diacantha* Maire)

Pakistan, N. Africa. Shrub or semi-shrub, dwarf, many-branched, compact, woody, vigorous, strongly ramified from the base, glabrous-glaucous, leaves recurved tapering from a clasping base into a rigid spine, spinescent small greenish flowers located at the base of the leaves, salt-tolerant, grazed by camels, used as fuel, mobile and stable sand dunes of the desert, sandy waste places, sandy plains and desert wadis

See *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second, 206, 234, t. 22, f. 3. 1813–1814 and *Flora of Saudi Arabia, Chenopodiaceae*. ed. III. vol. 1. 192–223. 1988, *Pharmazie* 55(6): 460–462. 2000, *Phytochemistry* 58: 611–613. 2001, *International Journal of Agriculture and Biology* 7(3): 345–351. 2005, *Journal of Ethnopharmacology* 105: 358–367. 2006

(Polyphenols, saponins. Decoction of leaves purgative, used for treatment of jaundice, a remedy for scabies; a decoction of the leaves taken on an empty stomach.)

in Mali: hamad, sri, tahara, tasra, tazera

in Niger: had, djouri

in Sahara: hâd, tahara

Cornus L. Cornaceae

The Latin name for the cornelian cherry, *Cornus mas* L.; Greek *keras*, Latin *cornu, us* 'horn', Akkadian *qarnu* 'horn', Hebrew *qeren* 'a horn, point, peak', see *Species Plantarum* 1: 117–118. 1753, *The British Herbal* 331. 1756, *Fl. Belg.* (Dumortier) 83. 1827, *Medical Flora*; or, manual of the medical botany of the United States ... 132. 1828, *Alsographia Americana* 58–59. 1838, *Histoire Naturelle des Végétaux. Calif.*, ed. 2: 306. 1911, *Catalogue of North American Plants North of Mexico* ed. 3: 273. 1914, *Publ. Field Columb. Mus., Bot. Ser.* 5: 189. 1923, *Notul. Syst. Inst. Bot. Komarov. Acad. Sci. URSS* 12: 165. 1950

(Diaphoretic.)

in English: brown dogwood, western cornel

Cornus mas Linnaeus (*Cornus erythrocarpa* St.-Lag.; *Cornus flava* Steud.; *Cornus homericum* Bubani; *Cornus mas* f. *conica* Jovan.; *Cornus mas* f. *macrocarpa* Dippel; *Cornus mas* f. *microcarpa* Sanadze; *Cornus mas* f. *oxycarpa* Jovan.; *Cornus mas* f. *pyriformis* Sanadze; *Cornus mas* var. *oblongifolia* Jovan.; *Cornus mascula* L.; *Cornus mascula* Zorn.; *Cornus nudiflora* Dumort.; *Cornus praecox* Stokes; *Cornus vernalis* Salisb.; *Eukrania mascula* (L.) Merr.; *Macrocarpium mas* (L.) Nakai)

Europe.

See *Species Plantarum* 1: 117. 1753, *Syst. Nat.*, ed. 10. 2: 897. 1759, *Prodr. Stirp. Chap. Allerton*: 66. 1796, *Nomencl. Bot.* 1: 227. 1821, *Handb. Laubholz.* 3: 245. 1893, *Fl. Pyren.* 2: 337. 1899 and *Botanical Magazine* 23: 38, in obs. 1909, *Acta Biologica Cracoviensia, Series Botanica* 21: 31–63. 1978

(Febrifuge.)

in English: cornelian cherry, sorbet

Cornus nuttallii Audubon ex Torr. & A. Gray (*Benthamia nuttallii* (Audubon) Nakai; *Benthamia nuttallii* (Audubon ex Torr. & A. Gray) Nakai; *Benthamidia nuttallii* (Audubon ex Torr. & A. Gray) Moldenke; *Benthamidia nuttallii* (Audubon) Moldenke; *Benthamidia nuttallii* Moldenke; *Cornus nuttallii* Hort. ex Koehne; *Cornus nuttallii* Audubon; *Cynoxylon nuttallii* (Audubon ex Torr. & A. Gray) Shafer; *Cynoxylon nuttallii* (Audubon) Shafer; *Cynoxylon nuttallii* Shafer)

North America. Tree, perennial

See *Ornithological Biography* 4: 482. 1838, *A Flora of North America* 1: 652. 1840, *Deutsche Dendrol.* (1893) 436. 1893 and *North American Trees* 746. 1908, *Botanical Magazine* (Tokyo) 23: 41. 1909, *Phytologia* 1(4): 167. 1935, Jeannette E. Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808–1841*. Harvard University Press 1967

(Bitter bark purgative, cathartic, laxative, emetic, blood purifier, tonic, stomachic. Ceremonial, used as a good luck charm.)

in English: mountain dogwood, Pacific dogwood

Cornus oblonga Wallich (*Cornus oblonga* var. *glabrescens* W.P. Fang & W.K. Hu; *Cornus oblonga* var. *griffithii* C.B. Clarke; *Cornus oblonga* var. *siamica* Geddes; *Cornus paniculata* Buch.-Ham. ex D. Don, nom. illeg.; *Swida muchuanensis* (Z.Y. Zhu) Holub; *Swida oblonga* (Wall.) Soják; *Swida oblonga* var. *glabrescens* (W.P. Fang & W.K. Hu) W.P. Fang & W.K. Hu; *Swida oblonga* var. *griffithii* (C.B. Clarke) W.K. Hu; *Yinquania muchuanensis* Z.Y. Zhu; *Yinquania oblonga* (Wall.) Z.Y. Zhu)

China, Pakistan.

See *Flora Indica*; or descriptions of Indian Plants 1: 432–433. 1820, *Prodr. Fl. Nepal.*: 140. 1825, *Fl. Brit. India* 2: 745. 1879 and *Das Pflanzenreich* 41(IV. 229): 44. 1910, *Fl. Siam.* 1: 808. 1931, *Novitates Botanicae ex Universitate Carolinae* 10. 1960, *J. Sichuan Univ., Nat. Sci. (Fruit used as a source of industrial oil or medicinally as a replacement for *zao pi* (the flesh of the fruit of *Cornus officinalis* and *Cornus chinensis*). The bark contains essential oils and tannins and is used in folk remedies to treat arthritis and injuries.)

in China: chang yuan ye lai mu

Cornus officinalis Sieb. & Zucc. (*Cornus officinalis* var. *koreana* Kitam.; *Macrocarpium officinale* (Siebold & Zuccarini) Nakai)

China, Japan, Korea. Shrub or small tree, deciduous, leaves opposite, flowers in dense yellow cymes, fruits red scarlet

See *Species Plantarum* 1: 117–118. 1753, *Flora Japonica* 1: 100, pl. 50. Lugduni Batavorum [Leiden] 1839 and

Botanical Magazine 23(266): 30, 38. 1909, *Acta Phytotax. Geobot.* 25: 39. 1972, *Journal of Zhejiang Forestry College* 2(1): 81–84. 1985

(Antibacterial. The fruit, *zhu yu* or *zao pi*, prescribed as an astringent tonic for impotence, spermatorrhea, dizziness, lumbago, vertigo, weakness, deafness and night sweats.)

in English: dogwood tree, Japanese cornel, Japanese corne-lian cherry

in China: jou tsao, shan chu yu, shan zhu yu, shu suan tsao

Cornus racemosa Lam. (*Cornus comosa* Raf.; *Cornus foemina* Mill. subsp. *racemosa* (Lam.) J.S. Wilson; *Cornus paniculata* L'Hér.; *Cornus paniculata* var. *albida* Pursh; *Cornus paniculata* var. *radiata* Pursh; *Cornus racemosa* f. *caeruleocarpa* Oswald; *Cornus racemosa* f. *nielsenii* J.W. Moore; *Svida racemosa* (Lam.) Moldenke; *Swida racemosa* (Lam.) Moldenke; *Thelycrania racemosa* (Lam.) Tsitsin; *Thelycrania racemosa* (Lam.) D. Löve & J.-P. Bernard)

North America. Perennial shrub

See *Encyclopédie Méthodique, Botanique* 2(1): 116. 1786, *Fl. Amer. Sept.* 1: 109. 1813, *Alsogr. Amer.*: 63. 1838 and *Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 7: 3. 1943 [Boissiera], *Rhodora* 52: 58. 1950, *Phytologia* 5: 337. 1956, *Svensk Bot. Tidskr.* 53: 417. 1959, *Trees and Shrubs* 50. 1959, *Trans. Kansas Acad. Sci.* 67: 795. 1965

(Bark decoction analgesic, stimulant, antidiarrheal, applied as poultice to wounds, cuts; bark into the anus for piles. Roots infusion for tuberculosis, diarrhea. Veterinary medicine, bark decoction applied as poultice to cuts on horses. Ceremonial.)

in English: gray dogwood, northern swamp dogwood, panicle dogwood

Cornus rugosa Lam. (*Cornus circinata* L'Hér.; *Cornus circinata* f. *variegata* Allabach; *Cornus rugosa* f. *eucycla* Fernald; *Cornus tomentosa* Steud.; *Cornus tomentosula* DC.; *Cornus tomentulosa* Michx.; *Cornus verrucosa* G. Nicholson, nom. inval.; *Cornus verrucosa* Hort.; *Cornus virginiana* Lam.; *Swida rugosa* (Lam.) Rydb.; *Swida rugosa* Rydb.; *Thelycrania rugosa* (Lam.) Pojark.)

North America. Shrub or small tree, perennial, erect, leaves blades broadly ovate abruptly pointed and rough, blue fruits

See *Encycl.* (Lamarck) 2(1): 115. 1786, [Royal Botanic Gardens, Kew] *Hand-list of trees and shrubs grown in arboretum*: Part I. *Polypetalæ*. [Part II. Gamopetalæ to Monocotyledons.] London: Printed for H.M. Stationery Off. by Eyre and Spottiswoode, 1894–1896 and *Trillia* 6: 38. 1921, *Fl. Plains N. Amer.* 605. 1932, *Rhodora* 49: 216. 1947, *Notul. Syst. Inst. Bot. Komarov. Acad. Sci. URSS* 12: 165. 1950, *Michigan Bot.* 29(4): 131. 1990 (publ. 1991)

(Bark cathartic, emetic, febrifuge and tonic; a decoction of the roots used in the treatment of kidney complaints, tuberculosis.)

in English: round-leaf dogwood, round-leaved dogwood, roundleaf dogwood

Cornus sanguinea L. (*Cornus sanguinea* Thunb.; *Swida sanguinea* (L.) Opiz; *Thelycrania sanguinea* (L.) Fourr.)

Europe, Spain.

See *Species Plantarum* 1: 117–118. 1753, *Oeckon.-Techn. Fl. Boehmens* 2(1): 174. 1838, *Ann. Soc. Linn. Lyon*, n.s., 16: 394. 1868 and *Acta Biol. Cracov., Ser. Bot.* 21: 31–63. 1978, *Taxon* 30: 698–699. 1981, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995, *Watsonia* 21: 365–368. 1997, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(For fevers.)

in English: blood-twigg, blood-twigg dogwood, bloodtwigg dogwood, common dogwood, dogberry, pegwood

Cornus sericea L. (*Cornus alba* L. p.p.; *Cornus alba* L. subsp. *stolonifera* (Michx.) Wangerin; *Cornus alba* var. *baileyi* (J.M. Coult. & Evans) B. Boivin; *Cornus alba* var. *interior* (Rydb.) The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Cornus sericea* subsp. *sericea*]

(Bark decoction emetic, febrifuge, for coughs, colds. Fruit bitter, anthelmintic, astringent, for intestinal worms, diarrhea.)

in English: American dogwood, red brush, red osier dogwood, red twig dogwood

in North America: ninigahi hte, ninigahi gthezhe (Omaha-Ponca), kinnikinnik

Cornutia Plum. ex L. Lamiaceae (Labiatae, Verbenaceae)

For the French botanist Jacques Philippe Cornut (Cornuti) (Jacobus Philippus Cornutus), 1606–1651, physician, author of *Canadensium plantarum*, aliarumque nondum editarum historia. Paris 1635; see *Species Plantarum* 2: 628. 1753, *Exposition des Familles Naturelles* 1: 245. 1805 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5/2): 609–721. 1960, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 382. 1965.

Cornutia odorata (Poepp.) Schauer (*Cornutia graveolens* Poepp. ex Moldenke; *Cornutia odorata* (Poepp.) Poepp. ex Schauer; *Cornutia odorata* Poepp. ex Schauer; *Cornutia odorata* var. *calvescens* Moldenke; *Cornutia odorata* var. *colombiana* Moldenke; *Hosta odorata* Poepp.)

Tropical America, Ecuador. Tree, mauve yellow flowers, dried leaves smoked

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 60, pl. 114. 1797, *Nova Genera ac Species Plantarum* 3: 63, t. 269. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 681. 1847 and *Repert. Spec. Nov. Regni Veg.* 40: 176, 178–179. 1936

(For rheumatism, antiinflammatory.)

in Peru: supay tabaco

Corokia A. Cunn. Escalloniaceae (Grossulariaceae, Cornaceae, Saxifragaceae)

From the Maori name *korokio* or *korokia-taranga*. See A. Cunningham, in *Annals of Natural History* 3: 249. 1839 and R.H. Eyde, “Systematic anatomy of the flower and fruit of *Corokia*.” *American Journal of Botany* 53: 833–847. 1966, Takhtazhan, Armen Leonovich (1910–2009), *Diversity and Classification of Flowering Plants* 374. New York: Columbia University Press, 1997.

Corokia buddleioides A. Cunn. (*Corokia buddleioides* A. Cunn.)

New Zealand. Shrub or small tree, bright yellow star-like flowers, dark red berries

See *Ann. Nat. Hist.* 3(17): 249. 1839

(Leaves decoction taken for stomachache.)

in English: korokio

Maori names: korokio, korokio taranga

Coronilla L. Fabaceae (Loteae)

Latin *corona*, *ae* ‘a crown’, referring to the flowers; see Carl Linnaeus (1707–1778), *Species Plantarum* 2: 742–743. 1753 and *Genera Plantarum* Ed. 5. 330. 1754, *Tekhno-Bot. Slovar.* 162. 1820 and *Bot. Zhurn.* 65 (6): 836–843. 1980, *Taxon* 30: 853–854. 1981, *Taxon* 41: 57. 1992, *Taxon* 44: 611–612. 1995, *Willdenowia* 25: 669–680. 1996, *Taxon* 46(3): 467. 1997.

Coronilla coronata L. (*Coronilla coronata* Jacq.; *Coronilla coronata* DC.; *Coronilla montana* Scop.)

Middle East, Europe. Perennial non-climbing shrub

See *Systema Naturae*, Editio Decima 2: 1168. 1759, *Flora Carniolica*, Editio Secunda 2: 72. 1772, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 310. 1825

(Poison. Diuretic.)

Coronilla picta (Cav.) Willd. (*Aeschynomene picta* Cav.; *Coronilla picta* Willd.; *Sesban picta* (Cav.) Poir.; *Sesbania picta* (Cav.) Lindl. ex Griseb.; *Sesbania picta* (Cav.) Pers.)

India.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 4(1): 7. 1797, *Species Plantarum*. Editio quarta 3(2): 1148. 1802, *Encyclopédie Méthodique, Botanique* 7: 129. 1806, *Synopsis Plantarum* 2(2): 316. 1807, *Flora of the British West Indian Islands* 184. 1859

(Used in Ayurveda.)

in India: carun chembai, krishnarajam

Coronilla scorpioides (L.) Koch (*Arthrolobium scorpioides* (L.) DC.; *Arthrolobium tauricum* Kalen.; *Astrolobium scor-*

pioides (L.) DC.; *Coronilla scorpioides* K. Koch; *Coronilla scorpioidea* St-Lager; *Ornithopus scorpioides* L.)

Algeria, Middle East, Europe. Annual non-climbing herb

See *Species Plantarum* 2: 744. 1753, *J.C. Röhlings Deutschlands Flora* 5: 201. 1839

in English: annual scorpion vetch, yellow crown vetch

(Poison. Diuretic, purgative, cardiotoxic.)

Coronilla valentina L. subsp. ***glauca*** (L.) Batt. (*Coronilla argentea* L.; *Coronilla argentea* Burm. f.; *Coronilla glauca* L.; *Coronilla glauca* Asso ex Nym; *Coronilla pentaphylloides* (Rouy) A.W. Hill; *Coronilla pentaphylloides* Rouy; *Coronilla pentaphylloides* A.W. Hill)

Algeria, Middle East, Europe. Perennial non-climbing shrub

See *Centuria I. Plantarum ... 23. 1755, Conspectus florae europaeae: seu Enumeratio methodica plantarum phanerogamarum Europae indigenarum, indicatio distributionis geographicae singularum etc.* 185. 1878, *Flore de l'Algérie* 1(2): 285. 1889, *Flore de France* 5: 296. 1899 and *Index Kewensis Suppl.* 6: 53. 1926

(Cardiotonic.)

in English: bastard senna

Coronopus Zinn Brassicaceae (Cruciferae)

Latin *coronopus* and Greek *koronopous* for buckshorn-plantain (Plinius), Greek *korone* 'a crow' and *pous, podos* 'a foot', referring to the shape of the deeply cut basal leaves or referring the habit of the plant and the branching stem; see *The Gardeners Dictionary ... Abridged ... fourth edition* no. 4. 1754, Johann Gottfried Zinn (1727–1759), *Catalogus plantarum horti academici et agri gottingensis.* 325. Gottingae 1757, *Pflanzen-Gattungen* 34–37, pl. 1, f. 4. 1792, *Mémoires de la Société d'Histoire Naturelle de Paris* 1: 140. 1799.

Coronopus didymus (L.) Sm. (*Carara didyma* (L.) Britton; *Carara didyma* Britton; *Coronopus didymus* Sm.; *Coronopus didymus* var. *macrocarpus* Muschl.; *Lepidium didymum* L.; *Lepidium didymus* (L.) Sm.; *Lepidium didymus* Sm.; *Senebiera didyma* (L.) Pers.; *Senebiera incisa* Willd.; *Senebiera pectinata* DC.; *Senebiera pinnatifida* DC.)

North America. Prostrate, leaves pinnatifid, flat pods with notch, young shoot as salad

See *Mantissa Plantarum* 1: 92. 1767, *Flora Britannica* 2: 691. 1800, *Flora Britannica* 2: 691. 1804, *Synopsis Plantarum* 2: 185. 1807 and *An Illustrated Flora of the Northern United States* (Britton & Brown), ed. 2. 2: 167. 1913, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 937–983. 1938, *Fl. Madagasc.* 84: 1–32. 1982, *Novon* 12(1): 5–11. 2002

(Plant expectorant, antiscorbutic, antimalarial, digestive; the juice against boils and swellings; whole plant pasted

with rice and put as poultice on navel of a patient suffering from stomach pain. Fresh leaves juice used as eardrops for infection. Seeds with cooling properties, applied on forehead for headache.)

in English: lesser swine cress, lesser wart cress, swinecress

in Arabic: rashad el-barr

in South Africa: peperbossie, peperkruid

in India: allibija, bangla sag, bucheephool, gabbu kothambari, junglee ajwain, kadualvi, kivi alvi

in Japan: inchin-nazuna

in Argentina: mastuerzo hembra, quimpe

Coronopus squamatus (Forssk.) Asch. (*Carara coronopus* (L.) Medik.; *Coronopus coronopus* (L.) H. Karst.; *Coronopus procumbens* Gilib.; *Lepidium coronopus* (L.) Al-Shehbaz; *Lepidium squamatum* Forssk.; *Senebiera coronopus* (L.) Poir.)

Europe.

See *Species Plantarum* 2: 648. 1753, *Flora Aegyptiaco-Arabica* 117. 1775, *Nomenclator linnæanus. Flora lithuanica inchoata*; seu, *Enumeratio plantarum quas circa Grodnam collegit & determinavit J.-E. Gilibert. Correa bauerlenii F. Muell. (*Correa bauerlenii* F. Muell.) (after Wilhelm Baeuerlen (also Bauerlen), col. 1891–1893, plant collector in Australia, Yantara Lake, far northwest New South Wales)

Australia.

See *Proceedings of the Linnean Society of New South Wales* 9: 960. 1885

(For cold, fevers.)

in English: chef's hat correa, chef's cap correa

Cortaderia Stapf Poaceae (Gramineae)

From *cortadera*, the Argentine name; from the Spanish *cortar* 'to cut, to harvest, pick', from the Latin *curto*, *avi*, *atum*, *are* (*curtus*) 'to shorten'; the plant has sharp-edged leaves. "Que rodea una laguna/con su pajonal dorado/de filosa cortadera/coronada de penachos." (Hilario Ascasubi, *Santos Vega*); a rather heterogeneous genus, intergrading with *Chionochloa* Zotov, type *Cortaderia argentea* (Nees) Stapf (*Cortaderia selloana* (Schultes & Schultes f.) Asch. & Graebner), see *L'illustration horticole* 2: Misc. 14–15. 1855, *The Gardeners' Chronicle*. Ser. 3, 22: 378, 396. 1897 and *Synopsis der mitteleuropäischen Flora* 2(1): 325. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 374. 1906, *Contributions from the United States National Herbarium* 24(8): 291–556. 1927, *Field Museum of Natural History, Botanical Series* 13(1/1): 96–261. 1936, *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, *Bol. Peru, Ecuador, Argentina, Bolivia, Andes. Perennial, deep dark green, large and robust tussock grass, densely tufted, erect, margins rough and cutting, noxious weed species naturalized elsewhere, produces abundant seeds annually and establishes rapidly on bare soil, useful for erosion control, grown to control erosion of mine dumps

See *Reise um die Erde* 1: 484. 1834, *Gramineae* 21–22, 153–154. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 153–154. 1843, *Revue Horticole* 50: 449. 1878, *Gardener's chronicle, ser. 3* 22(571): 396. 1897, *Botanical Magazine* 124: t. 7607. 1898 and *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, *Taxon* 23: 598–599. 1974, *Revista de Ciencias (San Marcos)* 74: 48–57. 1986, *Fieldiana: Botany, New Series* 24: 1–126. 1990, *Publicaciones del Museo de Historia Natural: Universidad Nacional Mayor de San Marcos: Serie B: Botánica* 34: 1–37. 1990, *New Zealand Journal of Botany* 29: 117–129. 1991, *Darwiniana* 33(1–4): 43–51. 1995, *Hickenia* 3(28): 99–103. 2001

(Taken with *Distichlis humilis* and melted sugar for lung diseases.)

in English: Andean pampas grass, Andes grass, jubata grass, jubatagrass, pampas grass, pink pampas grass, purple pampas grass, Selloa pampas grass

in Chile: cortadera

in Ecuador: sig-zal, sigse, sigze, sixe, zicce

in Peru: sacuara

Cortaderia toetoe Zotov

New Zealand. Robust tussock, green, coarse, tall, erect, hairy, waxy, ivory glabrous sheath, stiff leaf blades, sharp

leaves, large plumose panicle, erect seedheads creamy white, glumes equal, pioneer grass, attracts birds, weaving material, occurs in dry to boggy conditions, wetlands, damp and dry soils, coastal and inland, swamps, roadsides and clearings, poor soils

See *New Zealand Journal of Botany* 1: 85. 1963, *Taxon* 23(4): 595–605. 1974, *New Zealand J. Bot.* 29: 117–129. 1991

(Antiinflammatory, antiseptic, astringent.)

in English: feathery grass, native toetoe

in New Zealand: kakaho, toetoe, toetoe kakaho

Cortusa L. Primulaceae

Named by Matthioli in honor of the Director (from 1590 to 1603) of the Botanic Garden of Padova (Italy), Giacomo (Jacopo) Antonio Cortusi (Cortusius), 1513–1593; see *Species Plantarum* 1: 144. 1753 and C. Gola, *L'Orto Botanico. Quattro secoli di attività (1545–1945)*. Padova 1947.

Cortusa matthioli L.

Europe.

(For tumor, swellings.)

in China: jia bao chun

Corydalis DC. Papaveraceae (Fumariaceae)

Latin *corydalis* and ancient Greek *korydalos* (Aristoteles), *korydos* (Aristophanes) for the crested or tufted lark, *korys* 'helmet, helm', referring to the spurs; see *Philos. Bot.* (Medikus) 1: 96. 1789, Étienne Pierre Ventenat (1757–1808), *Choix de plantes, dont la plupart sont cultivées dans le jardin de Cels.* 19. Paris, 1803–1804, *Flore Française*. (DC. & Lamarck), éd. 3. 4: 637. 1805.

Corydalis ambigua Cham. & Schldl. (*Pistolochia ambigua* Soják)

China. Low herb

See *Linnaea* 1: 558. 1826

(Roots used as an anesthetic.)

in China: hsuan hu so, yan hu suo, yen hu so

Corydalis aurea Willdenow (*Capnoides aureum* (Willdenow) Kuntze; *Corydalis washingtoniana* Fedde)

North America. Annual or biennial herb

See *The Gardeners Dictionary ... Abridged ... fourth edition.* 1754, *Flore Française*. Troisième Édition 4: 637. 1805, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 2: 740. 1809, *Revisio Generum Plantarum* 1: 14. 1891 and *Ann. Missouri Bot. Gard.* 34: 234–237. 1947, *Taxon* 31: 120–126. 1982, *Phytologia* 54: 302–309. 1983

(Disinfectant, astringent, analgesic, stimulant, for rheumatism, diarrhea, sores on the hands, stomachaches, menstrual problems, sore throat.)

in English: golden corydalis, scrambled eggs, scrambledeggs

in North America: golden corydalis, corydalis dorée

Corydalis caseana A. Gray

North America.

See *Proc. Amer. Acad. Arts.* 10: 69. 1874, *Bot. California* 2: 430. 1880 and *Bull. Torrey Bot. Club* 34: 426. 1907, *Ann. Missouri Bot. Gard.* 34: 203–207. 1947

(Significant livestock losses have been caused by ingestion of *Corydalis caseana*, which is palatable to both cattle and sheep, despite the toxicity.)

in English: fitweed, Sierra corydalis, Sierran fumewort

Corydalis cava Schweigger & Korte (*Capnoides tuberosa* (DC.) Lyons; *Corydalis bulbosa* Pers., nom. illeg.; *Corydalis tuberosa* DC.; *Fumaria cava* Mill.; *Pistolochia cava* Bernh.)

Europe, Great Britain.

See *Gard. Dict.*, ed. 8. n. 7. 1768 [16 Apr 1768], *Syst. Verz.* (Bernhardi) 1: 57, 74. 1800 [*Systematisches Verzeichnis der Pflanzen, welche in der Gegend um Erfurt gefunden werden, entworfen von D. Johann Jakob Bernhadi. Erster Theil. Erfurt*], *Flore Française*. Troisième Édition 4: 637. 1805, *Synopsis Plantarum* (Persoon) 2: 269. 1806 [Nov 1806] and *Acta Biol. Cracov., Ser. Bot.* 22: 37–69. 1980

(Narcotic, vermifuge, depurative.)

Corydalis crassifolia Royle (*Cysticorydalis crassifolia* (Royle) Fedde; *Cysticorydalis crassifolia* (Royle) Fedde ex Ikonn.)

India.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 68. 1834 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* [Engler & Prantl] 17b: 137. 1936

(Whole pant decoction in controlling bleeding during menstruation.)

in India: chagpa mensa

Corydalis curvisiliqua Engelm. subsp. *occidentalis* (Engelm. ex A. Gray) W.A. Weber (*Capnoides montanum* (Engelm.) Britton; *Corydalis aurea* Willd. subsp. *occidentalis* (Engelm. ex A. Gray) G.B. Ownbey; *Corydalis aurea* Willd. var. *occidentalis* Engelm. ex A. Gray; *Corydalis montana* Engelm.)

North America. Annual or biennial herb, fodder

See *A Manual of Botany of the Northern United States* (ed. 5) 62. 1867 and *Annals of the Missouri Botanical Garden* 34(3): 234. 1947, *Phytologia* 70(4): 231. 1991

(Antirheumatic, analgesic, for stomachache, rheumatic pains, backache, menstrual disorders, sore throat.)

in English: curvepod fumewort, scrambled eggs

Corydalis flabellata Edgew

Himalaya, Bhutan.

See *Transactions of the Linnean Society of London* 20(1): 30. 1846 [1851 publ. 29 Aug 1846]

(Plant tonic, diuretic, alterative, used in skin diseases, syphilis, scrofula, menstrual complaints. Aerial parts used as anti-hypertensive, blood purifier, analgesic in neuralgia.)

in Bhutan: re-skon

in China: shan ye huang jin

in India: lepam

Corydalis flavula (Raf.) DC. (*Capnodes flavulum* Kuntze; *Capnoides flavula* Kuntze; *Capnoides flavula* (Raf.) Kuntze; *Capnoides flavulum* (Raf.) Kuntze; *Corydalis aurea* var. *flavula* (Raf.) Alph. Wood; *Corydalis aurea* var. *flavula* Alph. Wood; *Corydalis flavidula* Chapm.; *Corydalis flavula* DC.; *Corydalis geyeri* Fedde; *Fumaria flavula* Raf.; *Neckeria flavula* Millsp.)

North America.

See *Introductio ad Historiam Naturalem* 313. 1777, *Journal de Botanique* 1: 224. 1808, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 129. 1824, *A Class-book of Botany* (ed. 1870). pt. 4: 226. 1870, *Revisio Generum Plantarum* 1: 14. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 10: 311. 1912, *Amer. J. Bot.* 29(10): 851–858. 1942, *Castanea* 57: 273–281. 1992

(Poison.)

in English: yellow corydalis, yellow fume-wort, yellow fumewort, yellow harlequin

Corydalis formosa Spreng. (*Corydalis formosa* (Andrews) Pursh; *Corydalis formosa* Pursh)

North America.

See *Fl. Amer. Sept.* (Pursh) 462. 1813, *Systema Vegetabilium* (ed. 16) [Sprengel] 3: 162. 1826

(Large doses poisonous. Digestive, diuretic, a decoction from the rhizome used for kidney ailments, scrofula, skin diseases, to expel intestinal worms; roots decoction used to expel worms; raw roots chewed for toothaches.)

in English: stagger weed, turkey corn, wild turkey pea

Corydalis gowaniana Wall.

India, Nepal. Tufted, many bipinnate radical leaves, flower bright yellow

See *Tentamen Florae Nepalensis Illustratae* 55. 1826

(Roots tonic, diuretic, stomachic, febrifuge, for the treatment of leprosy and rheumatism; roots decoction for liver troubles, also used in syphilis, scrofula, cutaneous infections. Dried powdered leaves and stem as insecticide. Ceremonial, roots mixed with *Nardostachys grandiflora* for the preparation of *dhoop*, incense used in religious ceremonies.)

in China: ku mang huang jin

in India: bhuot jato, bhutkasi, bhutkesh, bhutkeshi, bhutkesi

Corydalis latiflora Hook. f. & Thomson (*Corydalis alburyi* Ludlow & Stearn; *Corydalis gerdae* Fedde; *Corydalis latiflora* subsp. *gerdae* (Fedde) Lidén ex C.Y. Wu, H. Chuang & Z.Y. Su; *Corydalis latiflora* subsp. *gerdae* (Fedde) Lidén ex C.Y. Wu ex H. Chuang & Z.Y. Su; *Corydalis mitae* Kitag.; *Corydalis mitae* Kitam.)

Himalaya.

See *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 1: 270. 1855 and *Repertorium Specierum Novarum Regni Vegetabilis* 18(504–507): 30–31. 1922, *Bulletin of the British Museum (Natural History)*, *Botany* 5(2): 49, pl. 1. 1975, *Fl. Reipubl. Popul. Sin.* 32: 277. 1999

(Whole plant antimalarial, and an antidote for snakebite.)

in Bhutan: stong-rizil-pa

Corydalis sempervirens (L.) Pers. (*Capnoides glauca* (Curtis) Moench; *Capnoides sempervirens* (Linnaeus) Borkhausen; *Corydalis annua* Hoffmanns. ex Steud.; *Corydalis glauca* (Curtis) Pursh; *Corydalis glauca* Pursh; *Corydalis rosea* Eaton; *Corydalis rosea* Maxim.; *Corydalis rosea* Zeyh. ex Steud.; *Corydalis sempervirens* Pers.; *Fumaria glauca* Curtis; *Fumaria glauca* Jord.; *Fumaria sempervirens* L.; *Neckeria glauca* (Curtis) Millsp.; *Neckeria glauca* Millsp.; *Neckeria sempervirens* (L.) Neck.; *Neckeria sempervirens* Neck.; *Neckeria sempervirens* A. Heller)

North America. Annual, biennial or perennial herb

See *Species Plantarum* 2: 699–701. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Introductio ad Historiam Naturalem* 313. 1777, *Elem. Bot.* (Necker) 3: 60. 1790, *Bot. Mag.* 5: t. 179. 1792, *Flore Française*. Troisième Édition 4: 637. 1805, *Syn. Pl.* (Persoon) 2(1): 269. 1806, *Fl. Amer. Sept.* (Pursh) ii. 463. 1813, *A Manual of Botany for the Northern States* (A. Eaton) 79. 1817, *Pugill. Pl. Nov.* 8. 1852, *Bulletin, West Virginia Agricultural Experiment Station.* 2: 327. 1892, *Bull. Torrey Bot. Club* 20: 61. 1893 and *American Journal of Botany* 29(10): 851–858. 1942, *Taxon* 31: 120–126. 1982, *Castanea* 57: 273–281. 1992

(Plants decoction used for piles.)

in English: harlequin-flower, pale corydalis, pink and yellow corydalis, rock harlequin, Roman wormwood

in North America: corydale toujours verte

Corydalis stracheyi Duthie ex Prain (*Corydalis ramosa* Wall. ex Hook.f. & Thomson; *Corydalis ramosa* Wall., nom. inval.; *Corydalis ramosa* Wall. ex Prain, nom. illeg.; *Corydalis ramosa* O. Fedtsch. & B. Fedtsch)

Bhutan, India, Himalaya.

See *Numer. List* [Wallich] no. 1434. 1829, *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 267. 1855, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 65(1): 31, 37. 1896

(Whole plant for blood infections and liver disorders; plant juice to treat eye diseases.)

in China: zhe qu huang jin

in India: mamiran

Corydalis turtschaninovii Besser (*Corydalis bulbosa* var. *remota* (Fisch. ex Maxim.) Nakai; *Corydalis remota* Fisch. ex Maxim.; *Corydalis remota* fo. *lineariloba* (Maxim.) C.Y. Wu & Z.Y. Su; *Corydalis remota* fo. *papillosa* (Kitag.) C.Y. Wu & Z.Y. Su; *Corydalis remota* fo. *rotundiloba* (Maxim.) C.Y. Wu & Z.Y. Su; *Corydalis remota* var. *lineariloba* Maxim.; *Corydalis remota* var. *rotundiloba* Maxim.; *Corydalis solida* Sw.; *Corydalis solida* subsp. *remota* (Fisch. ex Maxim.) Korsh.; *Corydalis turtschaninovii* fo. *papillosa* Kitag.; *Corydalis turtschaninovii* var. *papillosa* Kitag.)

China.

See *Flora* 17, Beibl. 1: 6. 1834, *Primitiae Florae Amurensis* 37–38. 1859, *Pl. Amur.* 306. 1892 and *Botanical Magazine* 26: 91. 1912, *Report of the Institute of Scientific Research, Manchoukuo* 2: 294. 1938, *Acta Botanica Yunnanica* 7(3): 268–269. 1985

(Tubers for headache, menstrual cramps, abdominal pains, improving blood circulation.)

Corydalis yanhusuo W.T. Wang ex Z.Y. Su & C.Y. Wu (*Corydalis ternata* (Nakai) Nakai fo. *yanhusuo* (Y.H. Chou & C.C. Hsu) Y.C. Zhu; *Corydalis turtschaninovii* fo. *yanhusuo* Y.H. Chou & C.C. Hsu)

China. Perennial herb, glabrous, tubers brownish-yellow, small flattened pellets, sepals 2, corolla irregular with 4 erect connivent petals one of which spurred, fruit an oblong linear capsule, in sandy areas

See *Flore Française*. Troisième Édition 4: 637. 1805 and *Botanical Magazine* 28: 29. 1914, *Acta Phytotaxonomica Sinica* 15(2): 82–83, pl. 2. 1977, *Acta Botanica Yunnanica* 7(3): 269–272, pl. 6. 1985, *China Journal of Chinese Materia Medica* 15: 19. 1990, *Journal of Wuhan Botanical Research* 11: 383–384. 1993, *China Journal of Chinese Materia Medica* 19(2): 82–83. 1994, *Journal of Plant Resources and Environment* 5(2): 63–64. 1996

(The tubers for headache, menstrual cramps, abdominal pains, improving blood circulation.)

in English: Chinese fumewort, tuber of Yanhusuo

in China: yan hu suo

Corylus L. Betulaceae (Corylaceae)

From the Greek *korylos*, Latin *corylus* or *corulus*, i ‘hazel’, see *Species Plantarum* 2: 998–999. 1753 and *Acta Phytotax. Geobot.* 49: 99–104. 1998.

Corylus americana Walter (*Corylus americana* Mill.; *Corylus americana* Willd.; *Corylus americana* f. *missouriensis* (A. DC.) Fernald; *Corylus americana* f. *missouriensis* Fernald; *Corylus americana* fo. *missouriensis* (A. DC.) Fernald; *Corylus americana* var. *altior* Farwell; *Corylus americana* var. *indehiscens* E.J. Palmer & Steyermark; *Corylus americana* var. *missouriensis* A. DC.; *Corylus americana* var. *missouriensis* A. DC.)

North America. Perennial shrub, a weedy species, sometimes considered a pest

See Humphry Marshall (1722–1801), *Arbustrum Americanum*: the American grove... 37–38. Philadelphia 1785, *Flora Caroliniana*, secundum ... 236. 1788, *Species Plantarum*. Editio quarta [Willdenow] 4(1): 471. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(2.1): 132. 1864 and *Report of the Michigan academy of science, arts and letters* 17: 168. 1916, *Rhodora* 34(401): 96. 1932, *Annals of the Missouri Botanical Garden* 22(3): 516. 1935, M.R. Gilmore, *Uses of Plants by the Indians* ... 22. 1991

(Used for hives, biliousness, diarrhea, cramps, hay fever, childbirth, hemorrhages, prenatal tonic, to induce vomiting and to heal cuts.)

in English: American filbert, American hazel, American hazelnut

in North America: huksik, noisetier d’Amérique, uma, uma-hu

Corylus colurna L. (*Corylus cervorum* Petrov; *Corylus iberica* Wittm. ex Kem.-Nath.; *Corylus iberica* Wittm. ex Bobrov)

India, Himalaya.

See *Species Plantarum* 2: 999. 1753 and *Plantae Wilsonianae* 2(3): 449. 1916, *Bull. Soc. Nat. Mosc., Biol.* 1936, n. s. xlv. 121. 1936

(Nuts are tonic and stimulant.)

in English: Turkish hazel

in India: bhutea badam

Corylus cornuta Marshall (*Corylus cornuta* Du Roi ex Steud.; *Corylus cornuta* fo. *inermis* Fernald; *Corylus cornuta* Marshall var. *cornuta*; *Corylus cornuta* var. *megaphylla* Vict. & J. Rousseau; *Corylus rostrata* Aiton; *Corylus rostrata* Dippel)

North America. Perennial tree or shrub, a weedy species, sometimes considered a pest

See *Arbustrum Americanum* ... 37–38. 1785, *Hortus Kewensis*; or, a catalogue ... 3: 364. 1789, *Nomencl. Bot.* [Steudel] 229. 1821, *Prodr.* 16(2): 133. 1864, *Handbuch der Laubholzkunde* 2: 132. 1891 and *Rhodora* 38(446): 76. 1936, *Contributions de l'Institut Botanique de l'Université de Montréal* 36: 13. 1940, *Kalmia* 12: 19. 1982

(Emetic, astringent, anthelmintic, for sore eyes, rheumatism, intestinal disorders, heart troubles, to expel worms, to heal cuts.)

in English: beaked filbert, beaked hazel, beaked hazelnut

Corylus jacquemontii Decne.

India. Shrub or tree, seed kernel edible

See Jacquemont, Victor (1801–1832), *Voyage dans l'Inde* 4: 160. Paris: Firmin Didot freres, 1841–1844 [The part of v. 4 dealing with botany: “Description des collections: botanique” has the separate title of: *Plantae rariores*, quas in India orientali collegit Victor Jacquemont / J. Cambessedes.]

(Oil from the seed used against muscular pain.)

in India: kabasi

Corymbia K.D. Hill & L.A.S. Johnson Myrtaceae

Corymbia citriodora (Hook.) K.D. Hill & L.A.S. Johnson (*Corymbia citriodora* subsp. *variegata* (F. Muell.) A.R. Bean & M.W. McDonald; *Corymbia variegata* (F. Muell.) K.D. Hill & L.A.S. Johnson; *Eucalyptus citriodora* Hook.; *Eucalyptus maculata* var. *citriodora* (Hook.) Bailey; *Eucalyptus melisiodora* Lindl.; *Eucalyptus variegata* F. Muell.)

Queensland to NE New South Wales. Tall tree, rounded crown, mottled bark, drooping foliage, very long and narrow leaves strong lemon scent, white flowers, clusters of cup-shaped fruits, see also *Eucalyptus citriodora*

See *Sertum Anglicum* 18. 1789, *Icones Plantarum* 7: pl. 619. 1844, *Journal of an Expedition into the Interior of Tropical Australia* 235. 1848, *J. Proc. Linn. Soc., Bot.* 3: 88. 1859, *A Synopsis of the Queensland Flora* 181. 1883 and *Manual of Cultivated Plants* 540. 1924, *Cytologia* 49: 547–550. 1984, *Cytologia* 50: 513–520. 1985, *Acta Botanica Austro Sinica* 5: 161–176. 1989, *Aspects of Plant Sciences* 11: 391–397. 1989, *Telopea* 6(2–3): 214, 388. 1995, *Austral. Syst. Bot.* 13(1): 85. 2000, *Austrobaileya* 5(4): 735. 2000

(Leaves essential oil carminative, stimulant, expectorant, diaphoretic, disinfectant, used in the treatment of colds, flu, asthma, fevers, malaria and coughs.)

in English: lemon-scented gum, lemon-scented spotted gum, spotted gum, white gum

in East Africa: kalitunsi, mkaratusi

in India: nasik, neelgiri, safeda, talanoppi, talanoppu

in Japan: remon-yûkari-no-ki

Corymbium L. Asteraceae (Cichorioideae)

From the Greek *korymbos* ‘corymb’, referring to the inflorescence, see *Species Plantarum* 2: 928. 1753.

Corymbium longiflora Burkill

North America.

See Shecut, John (Linnaeus Edward Whitridge), *Flora Carolinænsis*: or, A historical, medical, and economical display of the vegetable kingdom; according to the Linnæan or sexual system of botany ... In two volumes. Charleston 1806

(Emetic.)

Corymbium villosum Less. (*Corymbium hirtum* Thunb.)

South Africa. Shrub, leaves very hairy, flowers mauve to white cream

See *Phytochemistry* 67(7): 716–722. 2006

(Antimicrobial.)

Corymborkis Thouars Orchidaceae

From the Greek words *korymbos* ‘corymb’ and *orchis* ‘orchid’, referring to the non-resupinate flowers or to the terminal and axillary corymbose inflorescences; see Louis-Marie Aubert Aubert du Petit-Thouars (1758–1831), in *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris.* 1: 318. 1809, *Histoire Particulière des Plantes Orchidées* 37. 38. 1822 and B. Lewis and Phillip Cribb, *Orchids of Vanuatu*. Royal Botanic Gardens, Kew 1989, B.A. Lewis and P.J. Cribb, *Orchids of the Solomon Islands and Bougainville*. Royal Botanic Gardens, Kew 1991, *Bangladesh Journal of Plant Taxonomy* 8(2): 35–49. 2001.

Corymborkis veratrifolia (Reinw.) Blume (*Arundina tahiensis* Nadeaud; *Chloïdia confusa* Ames; *Corymbis angusta* Ridl.; *Corymbis angustifolia* Miq.; *Corymbis batjanica* J.J. Sm.; *Corymbis brevistylis* Hook.f.; *Corymbis confusa* (Ames) Schltr.; *Corymbis disticha* (Breda) Lindl.; *Corymbis exaltata* Schltr.; *Corymbis lauterbachii* Schltr.; *Corymbis ledermannii* Schltr.; *Corymbis longiflora* Hook.f.; *Corymbis minor* Schltr.; *Corymbis rhytidocarpa* Hook.f.; *Corymbis sakisimensis* (Fukuyama) Masam.; *Corymbis subdensa* Schltr.; *Corymbis trukensis* Tuyama; *Corymbis veratrifolia* (Reinw.) Reichb.f.; *Corymborchis angustissima* J.J. Sm.; *Corymborchis rutenii* J.J. Sm.; *Corymborchis veratrifolia* Blume; *Corymborkis angustifolia* (Miq.) Kuntze; *Corymborkis angustissima* J.J. Sm.; *Corymborkis assamica* Bl.; *Corymborkis batjanica* (J.J. Sm.) J.J. Sm.; *Corymborkis brevistylis* (Hook.f.) Holttum; *Corymborkis confusa*

(Ames) Ames; *Corymborkis ledermannii* (Schltr.) Fukuy.; *Corymborkis longiflora* (Hook. f.) Burkill; *Corymborkis parviflora* J.J. Sm.; *Corymborkis rhytidocarpa* Hook.f.; *Corymborkis rhytidocarpa* (Hook.f.) Holttum; *Corymborkis rutenii* J.J. Sm.; *Corymborkis sakisimensis* Fukuyama; *Corymborkis sakisimensis* Masam.; *Corymborkis subdensa* (Schltr.) Fukuy.; *Corymborkis tropidiifolia* J.J. Sm.; *Corymborkis trukensis* (Tuyama) Fukuy.; *Corymborkis veratrifolia* var. *lauterbachii* (Kranzl. ex Schltr.) F.N. Rasm.; *Corymborkis veratrifolia* var. *lauterbachii* (Schltr.) F.N. Rasm.; *Hysteria veratrifolia* Reinw.; *Macrostylis disticha* Breda; *Rynchanthera paniculata* Blume)

Tropical Asia, Pacific. Terrestrial herb or shrublet

See *Cat. Gew. Buitenz.* 99. 1823, *Sylloge Plantarum Novarum* 2: 5. 1825, *Flora Javae* 105, f. 9. 1858, *Collection des Orchidées* 125, 126, t. 42, 43. 1859 [1858 publ. before Dec 1859], *Flora* 48: 184. 1865, *The Flora of British India* 6: 92. 1890 and *Bull. Jard. Bot. Buitenzorg* ser. III, ix. 37. 1927, *Bull. Jard. Bot. Buitenzorg* ser. III, x. 102. 1928, *Bulletin of Miscellaneous Information Kew* 317. 1935, *Trans. Nat. Hist. Soc. Taiwan* 31: 289–290. 1941, *Transactions of the Natural History Society of Taiwan* 32: 267. 1941, *Hokuriku J. Bot.* 12: 101. 1964, *Bot. Tidsskr.* 71(3–4): 175. 1977

(Emetic and febrifuge, chew the leaves and swallow the juice. A treatment for impotence, boil roots together with those of *Memecylon lancifolium* and make a drink.)

in China: guan hua lan

in Japan: baikei-ran, koba-ran

Malayan names: kayu hok, wee luvak

in the Solomon Islands: laulau, sisiduru

in Vanuatu: néré vudhvékar

Corynanthe Welw. Rubiaceae (Coptosapelteae)

From the Greek *koryne* ‘a club’ and *anthos* ‘a flower’, referring to the corolla lobes, see *Trans. Linn. Soc. London* 27(1): 37, t. 14. 1869 [24 Dec 1869] and *Botanical Journal of the Linnean Society* 120(4): 287–326. 1996, *Scripta Botanica Belgica* 35: 1–438. 2006, *Botanical Journal of the Linnean Society* 154: 455–495. 2007, *Strelitzia* 22: 1–279. 2008.

Corynanthe mayumbensis (R.D. Good) Raym.-Hamet ex N. Hallé (*Pausinystalia mayumbensis* R.D. Good; *Pseudocinchona mayumbensis* (R.D. Good) Raym.-Hamet)

Gabon. Tree or shrub, white flowers

See *Journal of Botany, British and Foreign* 64, Suppl. 2: 1. 1926, *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 212: 305. 1941, *Flore du Gabon* 12: 64. 1966, *Journal of Ethnopharmacology* 102(2): 185–190. 2005

(Cytotoxic, antileishmanial and antifungal.)

Corynanthe pachyceras K. Schumann (*Pausinystalia pachyceras* (K. Schum.) De Wild.; *Pseudocinchona africana* A. Chev.; *Pseudocinchona africana* A. Chev. ex Perrot; *Pseudocinchona pachyceras* (K. Schum.) A. Chev.)

Tropical Africa. Tree, short fluted bole, slash reddish-orange, strongly sweetly scented white flowers in short terminal panicles

See *Notizbl. Königl. Bot. Berlin-Dahlem* 3: 96. 1901, *Vég. Ut. Afr. Trop. Franç.*, 5: 229. 1909, *Compt. Rend. Hebd. Séances Acad. Sci.* 148: 1466. 1909, *Expl. Bot. Afr. Occ. Fr.* 1: 308. 1920, *Ann. Soc. Sci. Bruxelles* 42(1): 176, 178. 1922, *Arch. Pharm. (Berlin)*, 260: 62. 1922, *Compt. Rend. Hebd. Séances Acad. Sci.* 182: 1403. 1926, *Mém. Soc. Linn. Normandie, N.S., sect. Botan.* 1(4): 7. 1938, *Fl. Gabon* 12: 62. 1966, *Planta Med.* 66(6): 531–536. 2000

(Roots and leaves aphrodisiac, for malaria, fevers. Stem and roots bitter, astringent, for malaria, fevers. Bark aphrodisiac, anesthetic, leishmanicidal, febrifuge, antiplasmodial and cytotoxic, for cough, leprosy, fevers, impotence; chewed bark for cough. Bark a constituent in various arrow poisons.)

in Benin: nikiba

in Cameroon: akalan, bitok, djombe, dyombe-wa

in Ghana: hwema, pamprama

in Ivory Coast: kiumbe

in Nigeria: ako-idagbon, ako igbon, ako-wenren-wenren (Yoruba); oviendagba (Edo); bofat (Boki)

in Yoruba: ako idagbon, ako nwerewere, ako wenrenwenren

Corynanthe paniculata Welw.

Angola. Tree, green inflorescence

See *Transactions of the Linnean Society of London* 27: 37, 14. 1869

(Antileishmanial.)

Corynocarpus Forst. & Forst.f. Corynocarpaceae

From the Greek *koryne* ‘a club’ and *karpos* ‘fruit’, alluding to the shape of the fruit; see Johann Reinhold Forster and Johann Georg Adam, *Characteres generum plantarum*. 31, t. 16. 1775, *Die Natürlichen Pflanzenfamilien* 1: 185. 1897 and *New Zealand J. Bot.* 35: 255–258. 1997.

Corynocarpus laevigatus Forst. & Forst.f. (*Corynocarpus laevigatus* Forst.; *Corynocarpus laevigatus* J.R. Forst. & G. Forst.)

New Zealand. Small tree, evergreen, wide spreading branches, glossy coriaceous leaves, petals whitish-green, egg-like berries hang in clusters from under the leaves

(The kernel, fresh or raw, contains a violent alkaloid poison. Leaves for wounds. Ritual, magico-religious beliefs.)

in English: karaka nut, New Zealand laurel

Maori name: karaka

Corynostylis Mart. Violaceae

From the Greek *koryne* 'a club' and *stylos* 'style', see *Nov. Gen. Sp. Pl.* (Martius) 1: 25–26. t. 17, 18. 1823 [1824], *Nouveaux Éléments de Botanique* 907. 1840 and *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 56–82. 1941, *Fieldiana, Bot.* 24(7/1): 70–82. 1961, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2526–2530. 2001.

Corynostylis arborea (L.) S.F. Blake (*Calyptrion hybanthus* (L.) Millsp.; *Corynostylis arborea* S.F. Blake; *Corynostylis hybanthus* M. Martens; *Corynostylis hybanthus* (L.) Mart.; *Viola arborea* L.; *Viola hybanthus* L.) (Greek *kalypto*, *kalyptein* 'to hide, cover', *kalyptra*, *kaliptré* 'veil, lid, hood, cover, seed-capsule')

South America.

See *Systema Naturae*, Editio Decima 2: 1239. 1759, *Species Plantarum*, Editio Secunda 1328. 1763, *Publications of the Field Columbian Museum, Botanical Series* 1(1): 32. 1895 and *Contributions from the United States National Herbarium* 23(3): 837. 1923

(Emetic.)

Corypha L. Arecaceae (Palmae)

From the Greek *koryphe* 'a summit, hilltop, head top, crown, apex', with reference to the terminal leaves; see Carl Linnaeus, *Species Plantarum*. 2: 1187, 1189. 1753. *Genera Plantarum*. Ed. 5. 495. 1754, *Fam. Pl.* 2: 25. 1763, *Species Plantarum*, ed. 3 2: 1657. 1764, *Natürliches System des Pflanzenreichs* 317. 1832, *Sylva Tellur.*: 13–14. 1838.

Corypha umbraculifera L. (*Bessia sanguinolenta* Raf.; *Corypha guineensis* L.; *Corypha umbraculifera* Jacq., nom. illeg.)

India, Sri Lanka.

See *Sp. Pl.* 2: 1187. 1753, *Species Plantarum*, ed. 3 2: 1657. 1764, *Mant. Pl.* 1: 137. 1767, *Fragmenta Botanica* 12. 1800, *Sylva Tellur.*: 13. 1838 and *Taxon* 28: 60. 197

(Used in Ayurveda and Sidha. Roots demulcent, emollient, diuretic and stimulant, for bowel complaints. Young fruits as fish poison.)

in English: fan palm, talipot, talipot palm (talipot = from Sanskrit talapattra 'leaves of the tala'), umbrella fan

in India: alpayushi, baini, bajarbattu, bajarbatu, beesanige mara, bhajar-battu, bhajarbettu, bine, cannacakkayam, caray-intali, cirapalam, ciritali, citalam, codda-pana, coddapana, cokkappanai, cokkappanaimaram, corkappanai, dridhatalamu, dridhathalamu, drydhadala, drydhatalamu, indu, intali,

kamatenu, kanattali, karalika, kare thaale, karetel, katakali, katkali, kirikaivirutcam, kiritapam, kiritapamaram, kirutali, kodai-panei, kodapana, kode thaale, kodemara, kolumpuppanai, kontappanai, kotap-pana, kottaip-panai, kottaippanai, kudaippanai, kuntarkamuku, kutaippanai, kutapana, kutap-pana, makacittiracayanam, mirutupalam, olaiccakkaram, paccappoyvellaiyavan, pakti, panoli, panolida, perunkarrati, perunkarrattaimaram, piramatakam, pukam, satryecho-mad, shedalam, shreetalamu, shreetali, shreethaalamu, shritalam, shritalamu, shritale, shritale-mara, shritali, sidalam, sidalum, sitalam, sritala, sritalam, sritalamu, sritale, sritali, talam, talapattiram, talappam, talappamaram, talapparrumaram, talappattumaram, talappukkuntal, talappukkuntalmaram, tali, taliccu, talip-panai, talipana, talipanai, talippana, talippanai, talurappanai, tar, tevanativirutcan, thaali, tiranaputpi, tivviyavirutcam, varankanai, varitali

Corypha utan Lam. (*Corypha elata* Roxb.; *Corypha gebang* Mart.; *Corypha gembanga* (Blume) Blume; *Corypha griffithiana* Becc.; *Corypha macropoda* Kurz ex Linden; *Corypha macropoda* Linden ex Kurz; *Corypha macrophylla* Roster; *Corypha sylvestris* (Blume) Mart.; *Corypha umbraculifera* Blanco; *Gembanga rotundifolia* Blume; *Livistona vidalii* Becc.; *Sagum rumphii* Perr.; *Taliera elata* (Roxb.) Wall.; *Taliera gembanga* Blume, nom. illeg.; *Taliera sylvestris* (Lam.) Blume; *Taliera sylvestris* Blume)

India, Andaman Isl. Fan-palm, reddish sweet-smelling gum from the top

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 131. 1786, *Flora* 8: 580. 1825, *Systema Vegetabilium*, editio decima sexta 7: 1307. 1830, *Fl. Ind.* ed. 1832, 2: 176. 1832, *Hist. Nat. Palm.* 3: 233. 1838, *Rumphia* 2: 59. 1839, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 43(2): 197. 1874 and *Webbia* 1: 343. 1905, *Webbia* 5: 7. 1921

(Roots for diarrhea, wounds, tuberculosis, cough, colds, fever; juice of roots used for diarrhea; roots chewed against coughs. Irritant, dermatitis.)

in English: buri palm, gebang palm, sugar palm

in Indonesia: gebang

in Moluccas: kayu burung

in Philippines: bagatai, buli, buri, busi, ebus, ibus, piet, silad, silag, silal, sirar, taktak

Coryphantha (Engelm.) Lemaire Cactaceae

From Greek *koryphe* 'a summit, head top, crown, apex' and *anthos* 'flower', see *Species Plantarum* 1: 466. 1753, *Synopsis plantarum succulentarum* ... 177–178. 1812, *Verhandlungen des Vereins zur Beförderung des Gartenbaues in den Königlich Preussischen Staaten* 3: 420, 423. 1827, Friedrich (Frederick) Adolph(us) Wislizenus, 1810–1889, "Memoir of a tour of Northern México in 1846 and 1847." *Misc. Publ.* 26. *U.S. Senate*. Washington 1848, *Syn. Cact. U.S.* 8. post

27 May 1856, *Proceedings of the American Academy of Arts and Sciences* 3: 264. 1856, *Les Cactées* 32, 35. 1868 and *Blätter für Kakteenforschung* 1938(6): [22]. 1938, *Gentes Herbarum*; occasional papers on the kind of plants 8(4): 318. 1953, *Cactus & Succ. Journ.* 46: 74, 47: 40–43. 1974–1975 [“The publication date of Wislizenus’s memoir of a tour to northern Mexico in 1846 and 1847.”], Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997.

Coryphantha compacta (Engelm.) Britton & Rose (*Cactus compactus* (Engelm.) Kuntze; *Coryphantha compacta* (Engelm.) Orcutt; *Coryphantha compacta* Orcutt; *Coryphantha palmeri* Britton & Rose; *Mammillaria compacta* Engelm.)

Mexico.

See *Memoir of a Tour to Northern Mexico* 97, 105. 1848, *Revisio Generum Plantarum* 1: 260. 1891 and *The Cactaceae*; descriptions and illustrations of plants of the cactus family (Britton & Rose) 4: 36, fig. 33. 1923

(Hallucinogenic.)

Coryphantha macromeris (Engelm.) Lem. (*Cactus macromeris* (Engelm.) Kuntze; *Coryphantha macromeris* Britton & Rose; *Coryphantha macromeris* subsp. *runyonii* (Britton & Rose) N.P. Taylor; *Coryphantha macromeris* var. *runyonii* (Britton & Rose) L.D. Benson; *Coryphantha pirtlei* Werderm.; *Coryphantha runyonii* Britton & Rose; *Echinocactus macromeris* (Engelm.) Mexico.

See *Memoir of a Tour to Northern Mexico* 97(-98). 1848, *Allgemeine Gartenzeitung* 21: 102. 1853, *Revisio Generum Plantarum* 1: 260. 1891 and *The Cactaceae* 4: 25, 26, pl. 1, f. 1. 1923, *Rhodora* 38(455): 407. 1936, *Jahrbuch der Deutschen Kakteen-Gesellschaft* 1941(pt. 2): 61. 1942, *Die Cactaceae* 5: 2975. 1961, *Cactus and Succulent Journal* (Los Angeles) 41(4): 188. 1969, *Cactaceae Consensus Init.* 6: 15. 1998

(Hallucinogenic.)

in English: nipple beehive cactus

Coscinium Colebr. Menispermaceae

From *koskinion*, the diminutive of the Greek *koskinon* ‘a little sieve’, referring to the pierced seeds, see *Trans. Linn. Soc. London* 13(1): 51, 65. 1821 [23 May-21 Jun 1821]

Coscinium blumeianum Miers (*Coscinium blumeianum* Miers ex Hook. f. & Thomson)

SE Asia, India.

See *Ann. Mag. Nat. Hist.* ser. 2, 7(37): 37. 1851, *Flora Indica* or Descriptions of Indian plants. 2(1): 179. 1855 and Tomita, M. and Tani, C. “Alkaloids of Menispermaceae. LII. Alkaloids of *Coscinium blumeianum*.” *J. Pharm. Soc. Japan* 61: 251–257. 1941 (through *Chem. Abstr.* 44: 8601. 1950)

(Antioxidant and cytotoxic, bitter tonic, used to improve blood circulation, for skin diseases, sore, wounds. Piscicide.)

in Malaysia: daun balik angin, kayu berduri, kekunyit, sekunyit

Coscinium fenestratum Colebrooke (*Coscinium fenestratum* (Gaertn.) Colebrooke; *Menispermum fenestratum* Gaertn.)

Sri Lanka, Indonesia. Liana, woody climbing shrub, vine, straggling, wood and bark yellow, bitter sap yellow, leaves dark green to whitish, yellow flowers in clustered racemose heads, yellow globose capsules

See *Transactions of the Linnean Society of London* 13(1): 65. 1821 and Singh, G.B. et al. “Hypotensive action of a stem of *Coscinium fenestratum* stem extract.” *Journal of Ethnopharmacology* 38: 151–155. 1990, *Food and Chemical Toxicology* 44(8): 1327–1333. 2006 [Neurotoxicity of *Coscinium fenestratum* stem, a medicinal plant used in traditional medicine.]

(Used in Ayurveda and Sidha. Bark ground and used for skin diseases, sores. Root used in the form of powder and decoction to treat indigestion, food poisoning or drunkenness, flatulence, diseases of liver, worms, fever; crushed roots applied to snake, scorpion or centipede bites; roots chewed and juice swallowed for food poisoning or drunkenness. Stem hypoglycemic, hypotensive, antiinflammatory and antiseptic, antifungal, antidiabetic, antibacterial, antioxidant, laxative, used for candida, ophthalmopathy, inflammation, ulcers, wounds, skin diseases, abdominal pain, abdominal and liver disorders, jaundice, fever and general debility, to treat bleeding piles, cough, diabetes, snakebite; stem paste applied over the forehead to cure headache, also used for snake poison and skin diseases; stem and root bark decoction along with the stem of *Swietenia mahagoni* taken against jaundice. Arrow or dart-poison.)

in English: Ceylon calumba root, false calumba, false calumba root, turmeric tree

in Borneo: akar badi

in India: alakanirani, amalam, amalamanal, arasina balli, aravam, arruram, ataram, atavimancal, attaram, attucam, atturam, bhadi halad, canda, cannittitam, kanniyam, kanniyamanal, cekippotalam, cemattimaram, cemmatti, ceyapaccai, ceyapakam, ceyaparam, ceyaparamancal, ceyepacam, ceyepakam, ceyokam, ceytika, ceytikamanal, cuvacamamarukki, cuvacanturattuncuran, dadari, daru-haridra, daru-haridrakam, daruhaldi lakada, daru-haridra, daru-haridrakam, darvi, dodda maradarishna, doddamaradarasina, doddamaradarisana, haricandana, haridram,

in Malaysia: koopur, kopah, tole

in Thailand: ham, ka-min-kreu

in Tibet: tsan dan ser pa, tsan dan ser po

in Vietnam: day mo vang, hoang dang la trang, ro mo vang, vang dang

Coscinium wallichianum Miers

SE Asia.

See *Ann. Mag. Nat. Hist.* ser. 2, 7(37): 37. 1851, *Contributions to botany*, iconographic and descriptive 3: 23. 1871

(Arrow poison.)

Cosmos Cav. Asteraceae (Heliantheae)

From the Greek *kosmos* (*kosmeo* 'to rule, adorn, dress') 'ornament, decoration, form, beautiful'; see Antonio José Cavanilles, *Icones et Descriptiones Plantarum*, quae aut sponte ... 1(1): 9–10, pl. 14. 1791 and *Rhodora* 77: 171–195. 1975, *Amer. J. Bot.* 63: 1393–1403. 1976, *Fieldiana, Bot.* 24(12): 181–361, 503–570. 1976, *Taxon* 29: 366–367. 1980, *Compositae Newslett.* 27: 7–10. 1995, *Fl. Venez. Guayana* 3: 177–393. 1997, *Amer. J. Bot.* 86(7): 1003–1013. 1999. Related to the genera *Bidens* and *Coreopsis*.

Cosmos caudatus Kunth (*Bidens artemisiifolia* var. *caudatus* (Kunth) Kuntze; *Bidens berteriana* Spreng.; *Bidens berteriana* Spreng.; *Bidens caudata* (Kunth) Sch.Bip.; *Bidens caudata* Sch.Bip.; *Cosmea caudata* Spreng.; *Cosmea caudata* (Kunth) Spreng.; *Cosmos pacificus* var. *chiapensis* Melchert)

Cuba, Mexico.

See *Nova Genera et Species Plantarum* (folio ed.) [H.B.K.] 4: 188, 240. 1820[1818], *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 454, 615. 1826, *The Botany of the Voyage*

of H.M.S. ~Herald~ [Seemann] 308. 1856, *Revisio Generum Plantarum* 1: 321. 1891 and *Phytologia* 69(3): 214. 1990

(For burns, strains, muscular spasms.)

in English: Spanish needle

Malayan names: hulam raja, ulan raja

in the Philippines: lansa-lansa, onuad, turai-turai, tuktukan

Cosmos parviflorus (Jacq.) Pers. (*Cosmos parviflorus* (Jacq.) Kunth; *Coreopsis parviflora* Jacq.)

North America.

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 3: 65, pl. 374. 1798, *Synopsis Plantarum* 2: 477. 1807, *Nova Genera et Species Plantarum* (folio ed.) 4: 189. 1820[1818]

(Ceremonial.)

in English: southwestern cosmos

Cosmos sulphureus Cav. (*Bidens sulphurea* (Cav.) Sch. Bip.; *Coreopsis artemisiaefolia* Jacq.; *Coreopsis artemisiaefolia* Sessé & Moc., nom. illeg.; *Cosmea sulphurea* Willd.; *Cosmos aurantiacus* Klatt; *Cosmos sulphureus* var. *exaristatus* Sherff; *Cosmos sulphureus* var. *hirsuticaulis* Sherff)

Mexico. Herb, inflorescence solitary and terminal on stem and branches, flowers deep orange-yellow

See *Icones Plantarum Rariorum* 3: 16, t. 595. 1786–1793, *Icones et Descriptiones Plantarum*, quae aut sponte ... 1(3): 56, pl. 79. 1791, *Species Plantarum*. Editio quarta 3: 2250. 1804, *The Botany of the Voyage of H.M.S. ~Herald~* 308. 1856, Martín de Sessé y Lacasta, 1751–1808, *Plantae Novae Hispaniae...* 148. Mexici 1887 [-1890], *Leopoldina* 25: 105. 1889 and *Publications of the Field Columbian Museum, Botanical Series* 8(6): 411. 1932, *American Journal of Botany* 24: 90. 1937

(Antibacterial, antifungal, antiinflammatory, for gastric ulcer, liver inflammation, arthritis.)

in English: orange cosmos, sulphur cosmos, yellow cosmos

in Japan: kibana-kosumosu

Cosmostigma Wight Asclepiadaceae

From the Greek *kosmos* 'ornament, decoration, form, beautiful' and *stigma* 'stigma'.

Cosmostigma racemosum Wight

India.

See *Contributions to the Botany of India* 41–42. 1834 and *Taxon* 26: 257–274. 1977

(Used in Sidha. Leaves to cure ulcerous sores. Veterinary medicine, leaves juice for the treatment of neck inflammation of bullocks.)

in India: bail-dhodki, ghara hoovu gida, gharahuvvu, ghara hoovinagida, karuthhankanni, maroy, marvel, marvivel, perum kahamugan kodi, perum kamukan koti, perumkamukankoti, qharphuli, shendori, shendvel, sut-kanti, vattuvalli, wattou-valli

Costus L. Costaceae (Zingiberaceae)

Latin *costum* and *costos* for an Oriental aromatic plant, from an Oriental or Arabic name, *koost*, Greek *kostos* for a root used as spice, perhaps *Saussurea* (Theophrastus, *HP*. 9.7.3); see Carl Linnaeus, *Species Plantarum*. 2. 1753, *Genera Plantarum*. Ed. 5. 2. 1754, *Remedia guineensia*: quorum collectionem primam[-decimam] / Cons. Exp. Fac. Med. Ups. praeside Adamo Afzelio pro gradu medico p.p. Johannes Ulr. Nyberg, [Johannes Jacobus Kallstenius, Petrus Brandelius, Carolus O. Bånge, Olavus Lindbom, Daniel Ekelund, Johannes Abrah. Frestadius, Carolus Hjorth, Carolus Aug. Thelning, Gustavus Jacob. Oertenblad]. (Bark decoction applied directly to open wounds and sores.)

in Congo: mekakokako, mokakokako

in Sierra Leone: horva, horwoi, ka tha

Costus phyllocephalus K. Schum.

Congo and Angola. Herb, perennial, rhizomatous, inflorescence a terminal head, labellum pink with white throat, capsule crowned by the persistent calyx, young leaves and shoots eaten raw, young shoots cooked and eaten

See *Bot. Jahrb. Syst.* xv. (1893) 420. 1893

(The leaf sap to treat eye diseases, wounds and ulcers and it is applied as an enema to treat postpartum hemorrhoids. A root decoction is taken to treat epilepsy and mental disorders.)

Costus pictus D. Don (*Costus congestus* Rowlee; *Costus mexicanus* Liebm. ex Petersen; *Costus mexicanus* Liebm.; *Costus pictus* D. Don ex Lindl.)

Central America, Mexico. Rhizomatous perennial herb, dark green floral parts, lemon yellow labellum with reddish-brown stripes, often confused with *Costus speciosus*

See *Edwards's Bot. Reg.* 19: t. 1594. 1833, *Flora Brasiliensis* (Martius) 3(3): 59 nomen. 1890, *Bot. Tidsskr.* 18: 261, t. 16. 1893 and *Bull. Torrey Bot. Club* 49(10): 291, t. 14. 1922, *Fl. Neotrop.* 8: 74. 1972, *Acta Bot. Mex.* 33: 81–86. 1995

(Antidiabetic, diuretic.)

in English: insulin flower, insulin plant, spiral ginger, steladder

Costus scaber Ruiz & Pav. (*Costus anachiri* Jacq.; *Costus ciliatus* Miq.; *Costus cylindricus* var. *anachiri* (Jacq.) Petersen; *Costus cylindricus* Jacq. var. *ciliatus* (Miq.) Petersen; *Costus nutans* K. Schum.; *Costus puchucupango* J.F. Macbr.; *Costus quintus* Roem. & Schult., nom. inval.; *Costus scaber* Loes.; *Costus scaberulus* Rich. ex Gagnep.; *Costus tatei* Rusby)

Tropical America. Ginger-like rhizome, terminal cone-like inflorescence, bracts red or orange-red, flower with orange or yellow corolla, tubular yellow labellum, black seeds

See *Flora Peruviana* 1: 2–3, t. 3. 1798, *Fragmenta Botanica* 55, tlb 78. 1809, *Systema Vegetabilium* 1: 26. 1817, *Linnaea* 18: 73. 1844, *Flora Brasiliensis* 3(3): 54. 1890 and *Bulletin de la Société Botanique de France, Actualités Botaniques* 4(2): 99. 1902, *Das Pflanzenreich* IV. 46(Heft 20): 407. 1904, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 89. 1931, *Field Museum of Natural History, Botanical Series* 11(2): 49–50. 1931, *Phytologia* 1: 51. 1934, *Acta Botánica Mexicana* 33: 81–86. 1995

(Whole plant decoction to treat high blood pressure and bladder disorders. The juice from the stem taken orally for colds.)

in Guyana: congo-cane

Costus schlechteri Winkler

West Africa, Tropical Africa.

See *Bot. Jahrb. Syst.* 41: 275. 1908

(Stem and rhizome for fevers and diabetes. Boiled leaves applied to smallpox and also taken to treat diabetes.)

Costus spectabilis (Fenzl) K. Schum. (*Cadalvena dalzielii* C.H. Wright; *Cadalvena pistiifolia* (K. Schum.) Baker; *Cadalvena pistiifolia* Baker; *Cadalvena spectabilis* Fenzl; *Costus pistiifolius* K. Schum.; *Kaempferia spectabilis* (Fenzl) Baker; *Kaempferia spectabilis* Baker)

West Africa. Herb, leaves eaten

See *Sitzungsber. Kaiserl. Akad. Wiss., Math.-Naturwiss. Cl., Abt. 2*, 51(2): 139–140. 1865, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 422, 424. 1892, *Flora of Tropical Africa* [Oliver et al.] 7(2): 297. 1898 and *Bull. Misc. Inform. Kew* 1912: 195. 1912

(Rhizome pulp applied to abscesses, ulcers and Guinea worm to mature them.)

Costus spicatus (Jacq.) Sw. (*Alpinia spicata* Jacq.; *Amomum petiolatum* Lam.; *Costus conicus* Stokes, nom. illeg.; *Costus cylindricus* Jacq.; *Costus micranthus* Gagnep.; *Costus quartus* Roem. & Schult., nom. inval.; *Costus spicatus* Sessé & Moc.; *Costus spicatus* Sw.)

Caribbean, Mexico.

See *Selectarum Stirpium Americanarum Historia ...* 1–2, t. 1. 1763, *Nova Genera et Species Plantarum seu Prodromus* (Swartz) 11. 1788, *Fragmenta Botanica* 54, t. 77. 1809, *Naturaleza* (Mexico City) ser. 2, 2, app. 2. 1891 and *Bull. Soc. Bot. France* 50: 586. 1903

(Stems cooked and eaten to treat aching bones. Rhizome infusion and decoction for heat and venereal diseases. Sap diuretic, stem sap applied to relieve burns.)

in Central America: chula laga, ye totzi, yoyoklí, yöyoklí

Costus spiralis (Jacq.) Roscoe (*Alpinia spiralis* Jacq.; *Amomum spirale* (Jacq.) Steud.; *Costus spiralis* K. Schum.; *Gissanthe spiralis* (Jacq.) Salisb.)

Tropical America.

See *Pl. Rariorum Hort. Schoenbr.* 1: 1. 1797, *Trans. Linn. Soc. London* 8: 350. 1807, *Trans. Hort. Soc. London* 1: 279. 1812, *Nomencl. Bot.*, ed. 2, 1: 78. 1840 and *Das Pflanzenreich* 4(46): 400. 1904

(For tumor, boils, swellings.)

Costus spiralis (Jacq.) Roscoe var. ***spiralis*** (*Costus erythrothyrus* Loes.; *Costus pisonis* Lindl.; *Costus spiralis* var. *jacquini* Griseb.; *Costus spiralis* var. *roscoei* Griseb.)

Tropical America.

London* 1: 279. 1812, *Botanical Register*; consisting of coloured ... t. 899. 1825, *Nomencl. Bot.*, ed. 2, 1: 78. 1840, *Flora of the British West Indian Islands* [Grisebach] 602. 1864 and *Das*

Pflanzenreich 4(46): 400. 1904, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 713. 1929, *Fl. Neotrop.* 8: 107. 1972

(For tumors.)

Costus tonkinensis Gagnepain

China, Vietnam. Herb, inflorescence bright shiny red

See *Bull. Soc. Bot. France* 49: 248. 1903 [1902 publ. 1903]

(For skin diseases.)

in China: guang ye bi qiao jiang

Costus villosissimus Jacq. (*Costus friedrichsenii* Petersen; *Costus hirsutus* C. Presl; *Costus septimus* Roem. & Schult., nom. nud.; *Costus septimus* Aubl. ex Roem. & Schult., nom. inval.)

Tropical America.

See *Fragmenta Botanica* 55–56, t. 80. 1809, *Systema Vegetabilium* 1: 26. 1817, *Reliquiae Haenkeanae* 1(2): 112. 1827, *Botanisk Tidsskrift* 18: 260–261, t. 15. 1893 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 413–423. 2003

(Used for stomachache and diabetes.)

Cotinus Miller Anacardiaceae

Latin *cotinus* for a shrub that furnishes a purple color (Plinius), see *The Gardeners Dictionary ... Abridged ...* fourth edition. 1754.

Cotinus coggygria Scop. (*Cotinus coriaria* Duhamel; *Rhus cotinus* L.)

China, Europe.

See *Species Plantarum* 1: 265–267, 383. 1753, *Flora Carniolica*, Editio Secunda 1: 220. 1772 and *Taxon* 27: 375–392. 1978, *Acta Pharm. Hung.* 52(5): 222–7. 1982, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 107: 203–228. 1985, *Biologie-Ecologie Mediterraneenne* 10: 273–289. 1987, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Journal of Cytology and Genetics* 25: 36–42. 1990, Kültür S. “Medicinal plants used in Kirklareli Province (Turkey).” *J. Ethnopharmacol.* 111(2): 341–64. 2007

(The wood and the sap have both been reported to cause dermatitis.)

in English: fustic wood, Hungarian sumac, Hungarian yellow-wood, Indian sumac, smoke bush, smoke tree, Turkish sumac, Tyrolean sumac, Venetian sumach, wig tree

in China: huang lu

in India: gad tungla, kalmına, tung, tungoi

in Pakistan: bhan tung

Cotoneaster Medikus Rosaceae

From the Latin *cotoneus* (*cotonius*), *a, um, malum* ‘quince, *Cydonia*’ and *-aster* (an incomplete resemblance), Plinius used *cotoneum, i*; see *Species Plantarum* 1: 478–479. 1753, *Geschichte der Botanik unserer Zeiten* 85. 1793, Friedrich Kasimir Medikus (1736–1808), *Philosophische Botanik*. 1: 154. Mannheim 1789 and *Beiträge zur Phytotaxonomie* 15: 69–86. 1992.

Cotoneaster acuminatus Lindl. (*Cotoneaster bakeri* G. Klotz; *Cotoneaster kongboensis* G. Klotz; *Cotoneaster mucronatus* Franch.; *Cotoneaster nepalensis* André; *Mespilus acuminatus* Lodd.)

Europe.

See *Transactions of the Linnean Society of London* 13(1): 101, pl. 9. 1821, *Botanical Cabinet*; consisting of coloured delineations . . . 16: pl. 1522. 1829, *L'illustration horticole* 22: 95. 1875, *Plantae Delavayanae* 223. 1890 and *Bulletin of the British Museum (Natural History)*, *Botany* 1: 132. 1954, *Wissenschaftliche Zeitschrift der Friedrich-Schiller-Universität* 21: 997. 1972

(Poison.)

in China: jian ye xun zi

Cotoneaster acutifolius Turcz. var. ***lucidus*** (Schltdl.) L.T. Lu (*Cotoneaster lucidus* Schltdl.)

North America, China.

See *Linnaea* 27(5): 541. 1854 and *Flora URSS* 9: 322. 1939, *Acta Phytotaxonomica Sinica* 38(3): 277. 2000

(Cyanogenetic.)

in China: gan nan hui xun zi

Cotoneaster adpressus Bois (*Cotoneaster horizontalis* Decne. var. *adpressus* (Bois) C.K. Schneid.; *Cotoneaster taoensis* G. Klotz)

North America, China.

See *Bulletin de la Société Botanique de France* 51(Sess. Extraord.): cxlix-cl, f. p. cl. 1904[1907], *Illustriertes Handbuch der Laubholzkunde* 1: 745, f. 418 k-m. 419 e1. 1906

(Cyanogenetic.)

in China: pu fun xun zi

Cotoneaster apiculatus Rehder & E.H. Wilson

North America, China.

See *Plantae Wilsonianae* 1(2): 156. 1912

(Cyanogenetic.)

in China: xi jian xun zi

Cotoneaster bacillaris Wall. ex Lindl.

India, Himalaya.

See *Edwards's Bot. Reg.* 15: sub t. 1229. 1829 and *Silvae Genet.* 22: 188–190. 1973, *J. Cytol. Genet.* 24: 179–183. 1989 (Stolons used as astringent.)

in India: ruins

Cotoneaster dammeri C.K. Schneid.

North America, China.

See *Illustriertes Handbuch der Laubholzkunde* 1(5): 761, f. 429h-k. 1906

(Cyanogenetic.)

in China: ai sheng xun zi

Cotoneaster dielsianus E. Pritz. ex Diels

North America, China.

See *Wissenschaftliche Zeitschrift der Friedrich-Schiller-Universität* 21(5–6): 991. 1972

(Cyanogenetic.)

Cotoneaster divaricatus Rehder & E.H. Wilson

North America, China.

See *Plantae Wilsonianae* 1(2): 157–158. 1912

(Cyanogenetic.)

in China: san sheng xun zi

Cotoneaster frigidus Wall. ex Lindl. (*Cotoneaster frigidus* Wallich; *Cotoneaster himalaiensis* hort. ex Zabel)

Nepal. Tree, white flowers

See *A Numerical List of Dried Specimens* [Wallich] no. 657. 1829, *Edwards's Botanical Register* 15: pl. 1229. 1829, *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 1897(6): 271. 1897 and *Bulletin of the British Museum (Natural History)*, *Botany* 1: 139. 1954, *Silvae Genet.* 22: 188–190. 1973

(Fruit eaten to replenish blood deficiency.)

in English: tree cotoneaster

in China: nai han xun zi

in Nepal: chhar

Cotoneaster horizontalis Decne.

Europe, North America, China.

See *Annales Générales d'Horticulture* 22: 168. 1877 and *Inform. Annales Hort. Bot. Fac. Sci. Univ. Tokyo* 1967: 11. 1967, *Wissenschaftliche Zeitschrift der Friedrich-Schiller-Universität* 21(5–6): 1011. 1972

(Poison, cyanogenetic.)

in English: cotoneaster

in China: ping zhi xun zi, shui lian sha

Cotoneaster integerrimus Medik. (*Cotoneaster cotoneaster* (L.) H. Karst.; *Cotoneaster vulgaris* Lindl., nom. illeg.; *Mespilus cotoneaster* L.; *Ostinia cotoneaster* (L.) Clairv.)

North America, Europe, Asia temp.

See *Species Plantarum* 1: 479. 1753, *Geschichte der Botanik unserer Zeiten* 85. 1793, *Manuel d'Herborisation en Suisse et en Valais* 162. 1811, *Transactions of the Linnean Society of London* 13(1): 101. 1821, *Deutsche Flora. (Cyanogenetic.)

in China: wu mao xiao ye xun zi

Cotoneaster multiflorus Bunge

North America, China.

See *Flora Altaica* 2: 220–221. 1830 and *Flora URSS* 9: 329. 1939, *Bulletin of the British Museum (Natural History)*, *Botany* 1: 137. 1954

(Cyanogenetic.)

in China: shui xun zi

Cotoneaster nummularius Fisch. & C.A. Mey. (*Cotoneaster racemiflorus* Booth ex Bosse; *Cotoneaster racemiflorus* (Desf.) K. Koch; *Mespilus racemiflora* Desf.)

Iraq, Middle East.

See *Tableau de l'École de Botanique* 409. 1829 [*Cat. Pl. Horti Paris*. ed. 3, 409. 1829], *Dendrologie* 1: 170. 1869 and *Flora URSS* 9: 331. 1939

(Cyanogenetic. Stomachic, expectorant, analgesic.)

Cotoneaster praecox (Bois & Berthault) Vilmorin ex Bois & Berthault

North America.

See *Rev. Hort.* 1918, n.s. xvi. 179. 1918, *Rev. Hort.* 1931, n.s. xxiii. 584. 1931

(Cyanogenetic.)

Cotoneaster roseus Edgew. (*Cotoneaster rosea* Edgew.)

North America.

See *Trans. Linn. Soc. London* 20(1): 46. 1846 [1851 publ. 29 Aug 1846]

(Cyanogenetic.)

Cotoneaster sherriffii G. Klotz (*Cotoneaster ludlowii* G. Klotz; *Cotoneaster muliensis* G. Klotz; *Cotoneaster racemiflorus* (Desf.) K. Koch; *Cotoneaster schlechtendalii* G. Klotz)

Nepal, Himalaya. Shrub, sepal tips red, petals white

See *Dendrologie* 1: 170. 1869 and *Wiss. Z. Martin-Luther-Univ. Halle-Wittenberg, Math.-Naturwiss. Reihe* 12(10): 775–776. 1963, *Wiss. Zeitschr. Friedrich-Schiller Univ. Jena, Mat.-Naturwiss. (Beitr. Phytotax., 1)*, 17(3): 336. 1968

(Ripe fruits eaten to relieve cough.)

in China: kang ba xun zi

in Nepal: chher

Cotula L. Asteraceae

Greek *kotyle*, *kotyledon* ‘a cavity, small cup, anything hollow, any cup-shaped hollow’, in allusion to the receptacle or to the space at the base of the leaves; Latin *cotula* or *cotyla* (*cotila*, *cotyle*, *cotilla*), *ae* ‘a cup’; see Carl Linnaeus, *Species Plantarum*. 2: 891–892. 1753 and *Genera Plantarum*. Ed. 5. 380. 1754.

Cotula alba (L.) L. (*Eclipta alba* (L.) Hassk.; *Eclipta alba* fo. *erecta* (L.) Hassk.; *Ecliptica alba* (L.) Kuntze; *Eupatoriophalacron album* (L.) Hitchc.; *Verbesina alba* L.)

India. See also *Eclipta alba*

See *Species Plantarum* 2: 891–892, 902. 1753, *Systema Naturae*, ed. 12 2: 564. 1767 [15–31 Oct 1767], *Plantae Javanicae Rariores* 528. 1848, *Revisio Generum Plantarum* 1: 334. 1891, *Missouri Botanical Garden* 4: 99. 1893

(Used in Ayurveda. Hepatoprotective.)

in India: bhangra, bhringaraj, bhringraja, kalkeshi, keshraja, maka

Cotula anthemoides L. (*Cotula microcephala* DC.) (resembling *Anthemis*, Asteraceae)

Europe, Egypt. Annual small herb with yellow flowers

See *Species Plantarum* 2: 891–892. 1753, *Prodr.* (DC.) 6: 79. 1838 [1837 publ. early Jan 1838] and *Compositae Newslett.* 33: 1–18. 1999

(Aerial parts paste applied in rheumatism. Whole plant boiled in water and used for taking bath by women after delivery, a postpartum remedy; plant decoction useful for colds.)

in India: babuna, bishai nadi, bobul

in Southern Africa: tuingras; hlapi-e-nyenyane (South Sotho); umhloniyane (Xhosa)

Cotula hemisphaerica Wall. ex Benth. & Hook. f. (*Artemisia hemisphaerica* Roxb.; *Cotula hemisphaerica* Wall.; *Cotula hemisphaerica* (Roxb.) Babu; *Cotula hemisphaerica* (Roxb.) Raizada; *Machlis hemisphaerica* DC.)

India. Slender erect herb

See *A Numerical List of Dried Specimens* [Wallich] n. 3236. 1829, *Prodr.* (DC.) 6: 140. 1838 [1837 publ. early Jan 1838], *Genera Plantarum* [Bentham & Hooker f.] 2(1): 429. 1873 and *Suppl. Duthie's Fl. Upper Gangetic Plain*, etc. vi. 110. 1976, *Herb. Fl. Dehra Dun*: 258. 1977, *J. Palynol.* 16: 85–105. 1980

(Leaf extract given in cuts, wounds and skin diseases.)

Cotula prostrata (L.) L. (*Verbesina prostrata* L.)

Pantropical. See also genus *Eclipta*

See *Species Plantarum* 2: 902. 1753, *Systema Naturae*, ed. 12 2: 564. 1767–1770

(Used in Ayurveda. Hepatoprotective.)

Cotyledon L. Crassulaceae

Greek *kotyle*, *kotyledon* ‘a cavity, small cup, any cup-shaped hollow’, in allusion to the leaves of some species; Dioscorides and Theophrastus used *kotyledon* for a plant, probably navelwort, *Cotyledon* sp.; Latin *cotyledon*, *onis* applied by Plinius to a plant, navelwort; see Carl Linnaeus, *Species Plantarum*. 1: 429–430. 1753 and *Genera Plantarum*. Ed. 5. 196. 1754 and *Taxon* 41: 561. 1992, *Taxon* 44: 611–612. 1995.

Cotyledon barbeyi Schweinf. ex Baker (*Cotyledon barbeyi* Schweinf.; *Cotyledon barbeyi* Schweinf. ex Penzig; *Cotyledon sturmiana* Poelln.; *Cotyledon transvaalensis* Guillaumet; *Cotyledon wickensii* Schönland; *Cotyledon wickensii* var. *glandulosa* Poelln.; *Cotyledon wickensii* var. *rhodesica* Schönl. ex Jacobs)

Arabia, Erithrea. Shrub, succulent, strong, robust, ascending, many-branched, inflorescence cymose, flowers pendulous

See *Species Plantarum* 1: 429–430. 1753, *Gardener's Chronicle & Agricultural Gazette* ser. 3 13: 624. 1893, *Atti Congr. Bot. Genova* (1893) 341. 1893

(Plant toxic to livestock.)

in South Africa: plakkie

Cotyledon orbiculata L. (*Cotyledon orbiculata* Forssk.)

Namibia. Shrub, spreading, fast growing, woody, rigid branches, thick fleshy leaves, pendulous tubular bright red flowers

See *Species Plantarum* 1: 429. 1753, *The Gardeners Dictionary*: ... eighth edition 6. 1768, *Fl. Aegypt.-Arab.* p. cxii. 1775 and *Jahrbuch der Deutschen Kakteen-Gesellschaft* 1: 94. 1936, *Feddes Repertorium* 42: 35. 1937, *National Cactus and Succulent Journal* 10(4): 80. 1955, *Taxon* 41: 561. 1992

(Poisonous, plants toxic to livestock. Leaves used to treat corns, boils, bee stings and insect bites, inflammations, earache and warts; leaves infusion for ear abscess; mixed with *Senecio asperulus* used as a gargle for sore throats and mouth ulcers. Magic, ritual, dried leaf as a protective charm for an orphan child.)

in English: pig's ears

in Southern Africa: bergbesie, bergbossie, hondeoor-plakkie, intelezi, iPhewula, kooltrie, koterie, kotrie, kouterie, krimp-siektebos, nentabossie, plakkie, platjies, sereleli, varkiesblaar, varkoor, varkoorblare, vingerplakkie

Cotyledon orbiculata L. var. ***orbiculata*** (*Cotyledon decusata* Sims; *Cotyledon mucronata* Lam.; *Cotyledon mucronata* Baker; *Cotyledon orbiculata* fo. *dinteri* Jacobsen; *Cotyledon orbiculata* var. *ausana* (Dinter) Jacobsen, nom. illeg.; *Cotyledon orbiculata* var. *dinteri* Jacobsen; *Cotyledon orbiculata* var. *oophylla* Dinter; *Cotyledon ramosissima* Mill.; *Cotyledon ramosissima* Salm-Dyck ex Haw.; *Cotyledon ramosissima* Rothm.; *Cotyledon ramosissima* Fedde; *Cotyledon ramosissima* (Rose) Fedde)

Namibia. Shrub, spreading, woody, rigid branches, fleshy leaves, pendulous tubular bright red flowers

See *Species Plantarum* 1: 429. 1753, *The Gardeners Dictionary*: ... eighth edition n. 6, 25. 1768, *Encycl. (Lamarck)* 2(1): 142. 1786, *Bot. Mag.* 51: t. 2518. 1824, *Refugium Botanicum*; or, Figures and Descriptions from Living Specimens of Little Known of New Plants of

Botanical Interest. London, 1869–1882 [edited by W. Wilson Saunders (1809–1879), descriptions by J.G. Baker (1834–1920) and H.G. Reichenbach (1824–1889), plates by W.H. Fitch. (1817–1892)] and *Bot. Jahresber.* (Just) 31, pt. 1: 829. 1904, *Jahrbuch der Deutschen Kakteen-Gesellschaft* 1: 94. 1936, *Feddes Repertorium* 42: 35. 1937, *National Cactus and Succulent Journal* 10(4): 80. 1955, *Taxon* 41: 561. 1992

(Poisonous, plants toxic to livestock. Used to treat corns and warts.)

in English: pig's ears

in Southern Africa: bergbesie, bergbossie, hondeoor-plakkie, kooltrie, koterie, kotrie, kouterie, krimp-siektebos, nentabossie, plakkie, varkiesblaar, varkoor, vingerplakkie; intelezi (Zulu); iPhewula (Xhosa)

Coula Baillon Olacaceae

From *nkula*, a Gabon vernacular name; see *Adansonia* 3: 61, 64, t. 3. 1862, *Botanischer Jahresbericht* 23(2): 311[“313”]. 1897 and *Flora of Tropical Africa* 1: 351. 1935, J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique centrale*. CTA, Edelp/Wageningen 1989.

Coula edulis Baillon

Tropical Africa. Tree, yellow green corollas, edible seeds

See *Adansonia* 3: 61, 64, t. 64. 1862 and *Flora of Tropical Africa* 1: 351. 1935, *Biochemical Systematics and Ecology* 28(5): 489–490. 2000

(Bark applied locally for backaches.)

in English: Gaboon nuts (the seeds)

in Cameroon: égoumé, engom, ewomé, kommel, kopopo, ngoma, ngouma, mengom, woulda

in Congo: kumunu

in Gabon: ewoumeu, ngomba, noisetier, okouda

in Ivory Coast: attia, bogué

in Nigeria: ivianlegbe (Edo); udi (Igbo); ekom (Efik); okum (Ekoi)

in Zaire: dala tushila (Tshiluba), kumunu (Kiombe)

Couma Aublet Apocynaceae

From an Indian French Guiana vernacular name for *Couma guianensis* Aublet, the Galibis called it *couma*, see *Hist. Pl. Guiane* 2(Suppl.): 39, t. 392. 1775, *Repert. Pharm.* 35: 186. 1830.

Couma macrocarpa Barb. Rodr. (*Couma capiron* Pittier; *Couma caurensis* Pittier; *Couma guatemalensis* Standl.; *Couma sapida* Pittier)

Trop. America. Tree, fruits edible, latex potable

See *Histoire des plantes de la Guiane Française* 2(Suppl.): 39, pl. 392. 1775, *Vellosia* (ed. 2) 1: 32, pl. 1, f. b. 1891 and *Árboles y arbustos nuevos de Venezuela* 4–5: 69. 1925, *Tropical Woods* 7: 8–9. 1926, *Boletín de la Sociedad Venezolana de Ciencias Naturales* 5: 312–313. 1939

(A substitute for real coca. Latex amebicidal.)

in Brazil: sorva

in Colombia: juansoco

Courbonia Brongn. Capparaceae

See *Bull. Soc. Bot. France* 7: 901. 1863 [1860 publ. 1863].

Courbonia virgata Brongn.

Northeast Africa, Tropical Africa. Shrub, suffrutescent, tuber with radish scent, leaves bluish green, calyx green, in bush savanna, grassland, roots used for clearing muddy waters, seeds eaten after repeated washing, roots edible

See *Bulletin de la Société Botanique de France* 7: 901. 1863 [1860 publ. 1863].

(Roots purgative.)

in East Africa: amoyo, erur

Couroupita Aublet Lecythidaceae

From a South American local plant name, *couroupito-utou-mou*, see *Iter Hispanicum* 189. 1758, *Histoire des plantes de la Guiane Française* 1: 594, t. 238 and 2: 708–712, pl. 282. 1775, *Introductio ad Historiam Naturalem* 195–196. 1777, *Elementa botanica ...* 2: 256. 1790, *Nomenclator Botanicus*. Editio secunda 2: 381. 1841 and *Brittonia* 29: 399–410. 1977, *Fl. Neotrop.* 21(2): 1–376. 1990.

Couroupita guianensis Aubl. (*Couratari pedicellaris* Rizzini; *Couroupita acrensis* R. Knuth; *Couroupita antillana* Miers; *Couroupita froesii* R. Knuth; *Couroupita guianensis* var. *surinamensis* (Mart. ex O. Berg) Eyma; *Couroupita idolica* Dwyer; *Couroupita membranacea* Miers; *Couroupita peruviana* O. Berg; *Couroupita saint-croixiana* R. Knuth; *Couroupita surinamensis* Mart. ex O. Berg; *Couroupita venezuelensis* R. Knuth; *Lecythis bracteata* Willd., nom. illeg.; *Pekea couroupita* Juss. ex DC., nom. inval.)

Venezuela, Brazil. Tree, rounded hard-shelled fleshy fruit

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 294. 1828, *Linnaea* 27: 462. 1856, *Species Plantarum*. Editio quarta [Willdenow] 2: 1174. 1799, *Linnaea* 31: 261–262. 1861–1862, *Transactions of the Linnean Society of London* 30(2): 191, 194. 1874 and *Polygonaceae, Guttiferae and Lecythidaceae of Surinam*

65, 179–180. 1932, *Repertorium Specierum Novarum Regni Vegetabilis* 35(928/935): 341–342. 1934, *Das Pflanzenreich* IV. 219a(Heft 105): 46–47. 1939, *Annals of the Missouri Botanical Garden* 52(3): 358, f. 5. 1965, *Rodriguésia* 41: 178. 1976, *Fl. Neotrop.* 21(2): 95. 1990

(Toxic. Depilatory effects.)

in English: cannonball tree, foul coconut

in Peru: mgenoklu masne, aya-uma

in Venezuela: coco de mono, coco hediondo

in India: naglingam (nag = serpent, and lingam = symbol of Siva)

Cousinia Cass. Asteraceae

See *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 47: 503. 1827, *Mém. Acad. Imp. Sci. St.-Petersbourg*, Sér. 7. 9(2): 7–14, 19, 24–26, 29–32, 35, 38–47. 1865 and *Fl. Iranica* [Rechinger] 90: 73–75, 79–82, 97, 124, 127–129, 132, 144, 187, 197–199, 207–212, 259–260, 263, 277. 1972, *Bot. Zhurn.* (Moscow & Leningrad) 73(4): 594–597. 1988, *Feddes Repert.* 120(1–2): 28. 2009, *Willdenowia* 39(2): 268. 2010 [2009 publ. 4 Jan 2010], *Iranian J. Bot.* 16(2): 192. 2010, *Phytotaxa* 5: 16. 2010.

Cousinia thomsonii C.B. Clarke

China, Himalaya.

See Clarke, Charles Baron (1832–1906), *Compositae Indicae Descriptae et Secus Genera Benthamii Ordinatae*. Calcutta, London, 1876

(Leaves used as antiseptic.)

in China: cha yu cui que hua

in India: megtham

Crabbea Harvey Acanthaceae

After the British amateur botanist and poet Rev. George Crabbe, 1754–1832 (d. Trowbridge, Wilts), born at Aldborough [Aldeburgh], Suffolk, Rector of Muston and Trowbridge, a very prolific writer, his writings include *Poems*. London 1807 and *The Borough*. London 1810; he was nicknamed “Pope in fustian” and “the poet of the poor”. See *Species Plantarum* 2: 634–635. 1753, Dawson Turner and Lewis Weston Dillwyn, *The botanist’s Guide through England and Wales*. 537–565. 1805, *The genera of South African plants*, arranged ... 276. 1838, *London Journal of Botany* 1: 27. 1842 and James W. Holme, *The Treatment of Nature in Crabbe*. 1912.

Crabbea velutina S. Moore (*Crabbea reticulata* C.B. Clarke; *Ruellia malacophylla* C.B. Clarke)

Nigeria, Tanzania. Shrub, herbaceous, rough, erect, hairy, woody-based, spreading, rosette-forming, scrambling, creamy-white flowers, thorny fruits

See *J. Bot.* 32: 135. 1894, *Fl. Trop. Afr.* [Oliver et al.] 5(1): 119. 1899 and *Fl. Cap.* (Harvey) 5(1): 14. 1901

(Leaves and stem bark antifungal, antiinflammatory.)

in Tanzania: kumbukwa

Crambe L. Brassicaceae (Cruciferae)

From the Greek *krambe* 'cabbage'; Latin *crambe*, *es* applied by Plinius to a kind of cabbage or seakale, "occidit miseros *crambe repetita magistros*" (D. Iulius Iuvenalis); see Carl Linnaeus, *Species Plantarum*. 2: 671. 1753 and *Genera Plantarum*. Ed. 5. 301. 1754 and *Euphytica* 24: 681–689. 1975, *Botaniska Notiser* 129: 123–130. 1976, *Botaniska Notiser* 131: 391–404. 1978, *Lagascalia* 17: 161–172. 1993, *Botanical Journal of the Linnean Society* 133: 509–524. 2000.

Crambe cordifolia Steven (*Crambe cordifolia* Dufour, nom. illeg.)

China. Used as vegetable

See *Mém. Soc. Nat. Mosc.* iii. (1812) 267. 1812, *Annales Générales des Sciences Physiques* 7: 308. 1820

(Antipruritic, sedative, analgesic, for itch.)

in China: liang jie ji shu

in India: pil-ghos

Crambe hispanica L. (*Cochlearia hispanica* (L.) Crantz; *Crambe abyssinica* Hochst. ex R.E. Fr.)

Europe, Mediterranean. Annual, many-branched herb, erect, furrowed, seed oil rich in erucic acid, leaves eaten

See *Species Plantarum* 2: 647–648, 671. 1753, *Classis Cruciformium Emendata* 97. 1769 and *Crop Science* 15: 91–93. 1975, *Cancer Letters* 127(1–2): 83–88. 1998, *Botanical Journal of the Linnean Society* 133: 517. 2000

(Toxic or appetite suppressing to monogastric animals. Fruits used to treat snakebites.)

in English: Abyssinian kale, Abyssinian mustard, colewort, crambe

Crassocephalum Moench Asteraceae (Senecioneae)

From the Latin *crassus*, *a, um* 'thick' and *kephale* 'head', in allusion to the flowers; see Conrad Moench (1744–1805), *Methodus plantarum horti botanici et agri Marburgensis a staminum situ describendi*. 516–517. 1794 and James Britten (1846–1924), in *Illustrations of the Botany of Captain Cook's Voyage round the World in the H.M.S. Endeavour in 1768–1771*. 2: 52, t. 168. 1901, *Fl. Madagasc.* 189: 623–911. 1963, *Kew Bulletin* 41(4): 873–943. 1986, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 26/27: 14. 1997.

Crassocephalum crepidioides (Benth.) S. Moore (*Crassocephalum diversifolium* Hiern, nom. illeg.; *Gynura crepidioides* Benth.; *Gynura polycephala* Benth.; *Gynura sarcobasis* DC.; *Senecio diversifolius* A. Rich.; *Senecio diversifolius* Dumort.)

Tropical Africa. Erect herb, branched, glabrescent, slightly succulent, inflorescence a cylindrical head arranged in a terminal corymb, corolla tubular yellow or orange with reddish brown top, tender succulent mucilaginous leaves and stems used as a vegetable, plants eaten by livestock, pig fodder and green fodder for poultry, a pioneer species, weed of cultivation and roadsides

See *Florula belgica, opera majoris prodromus, auctore ...* 66. 1827; *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 300. 1837, *Tentamen Florae Abyssinicae ...* 1: 437. 1848, *Niger Flora* 437–438. 1849, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 3(1): 594. 1898 and *Journal of Botany, British and Foreign* 50: 211. 1912, *Proc. Roy. Soc. Queensland* 64: 55–60. 1973, *Journal of Natural Products* 66(5): 709–711. 2003

(Antimalarial. Flowers and leaves boiled together and taken for gastrointestinal problems. Leaves stomachic, used to invigorate the spleen and treat indigestion; leaves eaten raw for gastric troubles; leaf decoction to treat headache; leaves crushed and the juice taken to treat constipation and stomach disorders; crushed leaf made into a paste applied to a sore, fresh wounds, cuts and injuries, as hemostatic. Roots to treat swollen lips. A mixture of the leaf sap of *Crassocephalum crepidioides* and *Cymbopogon giganteus* used orally and externally for the treatment of epilepsy. Leaves as fish poison.)

in English: fireweed, redflower ragleaf, thickhead

in China: jia tong hao

in India: akatasu, babak, ban-sarson, harang-nimang, jali, kazhe propa, nyamnye, sla-aeroplane, tera paibi, terapibi, zonchwu wawa

in Japan: beni-bana-boro-giku

in Papua New Guinea: yogobikabika

in Yoruba: ebolo osun

Crassocephalum montuosum (S. Moore) Milne-Redh. (*Crassocephalum afromontanum* R.E. Fr.; *Crassocephalum bumbense* S. Moore; *Crassocephalum butaguensis* (Muschl.) S. Moore; *Crassocephalum luteum* (Humb.) Humb.; *Gynura lutea* Humb.; *Gynura montuosa* (S. Moore) Bullock; *Senecio afromontanum* (R.E. Fr.) Humbert & Staner; *Senecio afromontanus* (R.E. Fr.) Humb. & Staner; *Senecio butaguensis* Muschl.; *Senecio montuosus* S. Moore; *Senecio rufopilosulus* De Wild.)

Tropical Africa.

See *Species Plantarum* 2: 866–872. 1753, *Methodus Plantarum Horti Botanici ...* 516–517. 1794, *Dictionnaire des Sciences Naturelles* [Second edition] 34: 391–392. 1825

and *Journal of the Linnean Society, Botany* 35: 354. 1902, *Wissenschaftlichen Ergebnisse der zweiten deutschen Zentral-Afrika-Expedition, Botanik* 2: 403. 1911, *Journal of Botany, British and Foreign* 50: 211. 1912, *Mémoires de la Société Linnéenne de Normandie* 25: 122, 207, 302. 1923, *Journal of the Linnean Society, Botany* 47: 279. 1925, *Acta Horti Bergiani* 9: 144. 1928, *Plantae Bequaertianae* 5: 116. 1929, *Bulletin of Miscellaneous Information Kew* 1932: 499. 1932, *Bulletin du Jardin Botanique de l'État* 14: 104. 1936, *Kew Bulletin* 5: 376. 1951, *Flore de Madagascar et des Comores* 189(3): 836. 1963

(Astringent, antiinflammatory.)

Crassocephalum rubens (Juss. ex Jacq.) S. Moore (*Crassocephalum cernuum* (L.f.) Moench; *Crassocephalum cernuum* Moench, nom. illeg.; *Crassocephalum sarcobasis* (DC.) S. Moore; *Cremonocephalum cernuum* Cass.; *Gynura cernua* (Cass.) Benth.; *Gynura cernua* (L.f.) Benth.; *Gynura cernua* Benth., nom. illeg.; *Gynura rubens* (Juss. ex Jacq.) Muschl.; *Gynura rubens* Muschl.; *Senecio cernuus* L.f., nom. illeg.; *Senecio rubens* Juss. ex Jacq.)

Tropical Africa. Erect, annual herb, branched, weedy, violet-mauve or purple tubular corolla, fruit a ribbed achene with silky white pappi, mucilaginous leaves and young shoots eaten

See *Hortus Botanicus Vindobonensis* 3: 50, t. 98. 1777, *Supplementum Plantarum* 370. 1781, *Methodus Plantas Horti Botanici ...* 516–517. 1794, *Dictionnaire des Sciences Naturelles* 24: 389. 1824, *Dictionnaire des Sciences Naturelles* [Second edition] 34: 391–392. 1825, *Niger Flora* 437. 1849 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 1–74. 1909, *Journal of Botany, British and Foreign* 50: 212. 1912, *Repertorium Specierum Novarum Regni Vegetabilis* 11: 119. 1912, *Taxon* 26: 257–274. 1977, *Taxon* 31: 595–596. 1982, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 10: 177–184. 1987, *Feddes Repertorium* 101: 49–62. 1990

(Stomachic, antidote against any form of poisoning, to treat liver complaints, colds, burns, sore eyes (filaria), earache, headache, leprosy and breasts cancer. Whole plant said to repel crocodiles.)

in English: Yoruban bologi

in Sierra Leone: kikpoi

in Yoruba: ebolo, ebure, efo ebure, jaga

Crassocephalum vitellinum (Benth.) S. Moore (*Crassocephalum vitellinum* Guinea; *Gynura aurantiaca* Benth., nom. illegit., non (Blume) DC.; *Gynura vitellina* Benth.)

Tropical Africa.

See *Niger Flora* 437–438. 1849 and *Journal of Botany, British and Foreign* 50: 212. 1912, *Anales del Jardín Botánico de Madrid* 10: 305. 1951, *Opera Botanica* 121: 159–172. 1993

(Febrifuge.)

Crassula L. Crassulaceae

Latin *crassus*, *a*, *um* ‘thick’, referred to the succulent and fleshy and thick main stem and leaves and branches; see Carl Linnaeus, *Species Plantarum*. 1: 128–129, 282–283. 1753 and *Genera Plantarum*. Ed. 5. 136. 1754, *Bull. Sci. Soc. Philom. Paris* 3(49): 1. 1801, *Exposition des Familles Naturelles* 2: 123. 1805 and *New or Noteworthy North American Crassulaceae* 1. 1903, *Fl. Ecuador* 73: 4–16. 2004.

Crassula alba Forssk. var. *alba* (*Crassula recurva* N.E. Br.; *Crassula recurva* (Hook.f.) Ostenf.; *Crassula rubicunda* E. Mey. ex Harv. & Sond.; *Crassula rubicunda* Drege ex Harv.; *Crassula rubicunda* E. Mey. ex Harv.; *Crassula stewartiae* Burt Davy)

South Africa.

See *Flora Aegyptiaco-Arabica* 60. 1775, *Flora Capensis* (Harvey) 2: 341. 1862, *Gard. Chron.* (1890) ii. 684. 1890 and *Dansk Botanisk Arkiv* 2(8) 1918, *Man. Pl. Transvaal* [Burt Davy] 1: 38, 139, 140. 1926

(Used for dysentery and diarrhea.)

in South Africa: isiKelekhlane (Zulu)

Crassula muscosa L. var. *muscosa* (*Crassula anguina* Harv.; *Crassula imbricata* Burm.f.; *Crassula littoralis* (Eckl. & Zeyh.) Endl. & Walp.; *Crassula lycopodioides* Lam.; *Crassula lycopodioides* Lam. var. *pseudolycopodioides* (Dinter) Walther ex Jacobsen; *Crassula pseudolycopodioides* Dinter & Schinz; *Sedum lycopodioides* (Lam.) Kuntze; *Tetraphyle littoralis* Eckl. & Zeyh.; *Tetraphyle lycopodioides* (Lam.) Eckl. & Zeyh.; *Tetraphyle muscosa* (L.) Eckl. & Zeyh., p.p.)

South Africa.

See *Species Plantarum* 1: 129. 1753, *Plantae Rariores Africanae* 10. 1760, *Enumeratio Plantarum Phaenogamarum in Germania* 1: 994. 1827

(For burns, wounds.)

Crataegus L. Rosaceae

Krataigon, *krataigos*, ancient Greek names for a kind of flowering thorn (Theophrastus, *HP*. 3.15.6), from Greek *kratus*, *kratys* ‘strong, mighty’, *kratos*, *kartos* ‘strength’ and *akakia*, *akis* ‘tip, thorn, a sharp point’ or *aigos* ‘a goat’, Latin *crataegum* for the kernel of the fruit of the box-tree (Plinius), Latin *crataegon*, *onis* or *crataegos* for a plant called also *aquifolia* (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 475–477. 1753 and *Genera Plantarum*. Ed. 5. 213. 1754 and *Fieldiana, Bot.* 24(4): 432–484. 1946, *Canad. J. Genet. Cytol.* 21: 231–241. 1979, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995, *Ceiba* 44(2): 105–268. 2003 [2005].

Crataegus calpodendron (Ehrh.) Medik. (*Crataegus acanthocolonensis* Laughlin; *Crataegus calpodendron* (Ehrh.)

Medik. var. *gigantea* Kruschke; *Crataegus calpodendron* var. *globosa* (Sarg.) Palmer; *Crataegus calpodendron* var. *hispida* (Sarg.) Palmer; *Crataegus calpodendron* var. *hispidula* (Sarg.) Palmer; *Crataegus calpodendron* var. *microcarpa* (Chapm.) Palmer; *Crataegus calpodendron* var. *mollicula* (Sarg.) Palmer; *Crataegus calpodendron* var. *obesa* (Ashe) Palmer; *Crataegus chapmanii* (Beadle) Ashe; *Crataegus fontanesiana* (Spach) Steud.; *Crataegus globosa* Sarg.) (from the Greek *kalpis* ‘an urn, jug, a drinking cup’ and *dendron* ‘tree’)

North America. Tree or shrub, fruit eaten raw and cooked

See *Beiträge zur Naturkunde* 2: 67–68. 1788, *Geschichte der Botanik unserer Zeiten* 83. 1793

(Analgesic, tonic, stimulant; fruits for bladder ailments.)

in English: black-thorn, pear hawthorn, pear-thorn

Crataegus chrysoarpa Ashe (*Crataegus columbiana* Howell var. *chrysoarpa* (Ashe) Dorn; *Crataegus rotundifolia* Moench var. *chrysoarpa* (Ashe) Eggl.)

North America. Tree or shrub, fruit eaten

See *Bull. N. C. Exp. Sta.* 175: 110. 1900, *Rhodora* 10(113): 79. 1908, *Vascular Plants of Wyoming* 299. 1988

(Roots decoction taken for diarrhea, for gastrointestinal troubles, stomach complaints. Dried berries decoction taken as a mild laxative.)

in English: fire-berry hawthorn, fireberry hawthorn, round-leaf hawthorn

Crataegus columbiana Howell (*Crataegus columbiana* Sarg., nom. illeg.; *Crataegus quercina* Ashe)

North America.

See *A Flora of Northwest America* 2: 163–164. 1898 and *Botanical Gazette* 31(4): 229–230. 1901, *Journal of the Elisha Mitchell Scientific Society* 18(1): 27. 1902

(Shoots infusion for gastrointestinal troubles, diarrhea, swellings; poultice of chewed leaves applied to swellings. Spines for ripe boils, arthritic pain and ulcers.)

in English: Columbia hawthorn, coyote’s tree, red hawthorn

Crataegus curvisepala Lindm. (*Crataegus calycina* Peterm. subsp. *curvisepala* Franco; *Crataegus kyrtostyla* auct.; *Crataegus kyrtostyla* Fingerh. ex Schltdl.; *Crataegus monogyna* subsp. *curvisepala* Soó; *Crataegus oxyacantha* L.; *Crataegus oxyacantha* Walter; *Crataegus oxyacanthus* L.; *Crataegus pseudokyrtostyla* Klokov)

North America, Europe.

See *Species Plantarum* 1: 477. 1753, *Fl. Carol.* [Walter] 147. 1788, *Viaggio Amer. Sett.* 2: 292. 1790, *Linnaea* 4: 372. 1829 and *Bot. Soc. Exch. Club Brit. Isles* 12: 868. 1946, *Biologia* (Bratislava) 38: 853–864., *Acta Biol. Cracov., Ser. Bot.* 28: 107–122. 1986

(Cyanogenetic. Fruit extract cardiogenic, diuretic, depurative, for hypotension, dyspnea.)

in English: English hawthorn, hawthorn, may tree

in India: bar sangli, ban singh, ghingar, pangyar, rheuns, ring

Crataegus douglasii Lindley

North America. Berries eaten

See *Edwards’s Botanical Register* 8: pl. 1810. 1836, *Arboretum et Fruticetum Britannicum* 2: 823. 1838 and *Manual of Cultivated Trees and Shrubs* (second edition) 368. 1940

(Poison. Shoots infusion for gastrointestinal troubles, diarrhea, swellings; poultice of chewed leaves applied to swellings. Spines for ripe boils, arthritic pain and ulcers.)

in English: black haw, black hawthorn

Crataegus intricata Lange

North America.

See *Botanisk Tidsskrift* 19(3): 264–265. 1895 and *Manual of Cultivated Trees and Shrubs* (second edition) 363. 1940

(Cyanogenetic.)

in English: Biltmore hawthorn, Copenhagen hawthorn, entangled hawthorn

Crataegus mexicana Moc. & Sessé ex DC. (*Crataegus hypolasia* K. Koch; *Crataegus mexicana* var. *microsperma* Eggl.; *Crataegus pubescens* Steud., nom. illeg.; *Crataegus stipulosa* (Kunth) Steud.; *Crataegus stipulosa* Steud.; *Crataegus subserrata* Benth.; *Mespilus pubescens* Kunth; *Mespilus pubescens* C. Presl; *Mespilus stipulosa* Kunth)

Mexico.

See *Deliciae Pragenses* 53–54. 1822, *Nova Genera et Species Plantarum* (folio ed.) 6: 213–214, t. 565. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 629–630. 1825, *Flora Sicula* (Presl) 1: XXIV. 1826, *Arboretum et Fruticetum Britannicum* 2: 823. 1838, *Plantas Hartwegianas imprimis Mexicanas* 10. 1839, *Nomenclator Botanicus*. Editio secunda 1: 433–434. 1840, *Hortus Dendrologicus* 167. 1853 and *Bulletin of the Torrey Botanical Club* 36(9): 508. 1909, *Sida, Botanical Miscellany* 15: 26–31, f. 16–17. 1997

(Root decoction drunk as a diuretic, also against cough.)

in Central America: manzanilla

Crataegus monogyna Jacq. (*Crataegus apiifolia* Medik.; *Mespilus monogyna* (Jacq.) All.)

Europe.

See *Florae Austriacae* 3: 50, pl. 292, f.1. 1775, *Flora Pedemontana* 2: 141. 1785, *Geschichte der Botanik unserer Zeiten* 83. 1793

(Cardiotonic.)

in English: English hawthorn, may hawthorn, one-seed hawthorn, one-seeded hawthorn

Crataegus pedicellata Sarg.

North America.

See *Botanical Gazette* 31(4): 226–227. 1901

(Astringent, for diarrhea, dysentery.)

in English: scarlet haw, scarlet hawthorn

Crataegus phaenopyrum (L.f.) Medik.

North America.

See *Supplementum Plantarum* 254–255. 1781[1782], *Geschichte der Botanik unserer Zeiten* 83. 1793

(Cardiotonic.)

in English: Washington hawthorn, Washington's hawthorn, Washington's-thorn

Crataegus pubescens (C. Presl) C. Presl (*Crataegus pubescens* Steud., nom. illeg.; *Crataegus pubescens* S. Watson; *Crataegus pubescens* (Kunth) Steudel)

Europe.

See *Deliciae Pragenses* 53–54. 1822, *Nova Genera et Species Plantarum* (folio ed.) 6: 213, t. 565. 1824, *Flora Sicula* (Presl) 1: XXIV. 1826, *Nomenclator Botanicus*. Editio secunda 1: 433. 1840, *Proceedings of the American Academy of Arts and Sciences* 17: 354. 1882 and *Bulletin of the Torrey Botanical Club* 36(9): 511–512. 1909, *Sida*, Botanical Miscellany 15: 26–31, f. 16–17. 1997

(A root decoction drunk as a diuretic.)

in English: Mexican hawthorn

in Mexico: yaga belohui, yaga pelohui

Crataegus punctata Jacq. (*Crataegus collina* Chapm.; *Crataegus collina* Chapm. var. *secta* (Sarg.) Palmer; *Crataegus collina* Chapm. var. *sordida* (Sarg.) Palmer; *Crataegus collina* Chapm. var. *succincta* (Sarg.) Palmer; *Crataegus fastosa* Sarg.; *Crataegus punctata* Jacq. var. *aurea* Aiton; *Crataegus punctata* var. *canescens* Britton; *Crataegus punctata* var. *microphylla* Sarg.; *Crataegus verruculosa* Sarg.; *Mespilus punctata* (Jacq.) Dum. Cours.)

North America.

See *Hortus Botanicus Vindobonensis* 1: 10. 1770, *Arboretum et Fruticetum Britannicum* 2: 818. 1838 and *Manual of Cultivated Trees and Shrubs* (second edition) 365. 1940

(Twigs infusion stomachic; compound decoction of shoots and bark taken to stop menstrual flow. Magic, ritual, witchcraft medicine.)

in English: dotted hawthorn

Crataegus rivularis Nutt. (*Crataegus douglasii* Lindl. var. *rivularis* (Nutt.) Sarg.)

North America. perennial tree or shrub

See *A Flora of North America*: containing ... 1(3): 464. 1840

(Thorns reputed poisonous.)

in English: river hawthorn

Crataegus songarica K. Koch (*Crataegus fischeri* C.K. Schneid.)

India. Deciduous tree, greyish branches

See *Verhandlungen des Vereins zur Beförderung des Gartenbaues in den Königlich Preussischen Staaten* 1(2): 287. 1853 and *Illustriertes Handbuch der Laubholzkunde* 1: 789, f. 450 i-n, 451 y-z. 1906

(Berries to prepare cardiac tonic.)

in China: zhun ge er shan zha

Crataegus spathulata Michx.

North America. Tree or shrub

See *Flora Boreali-Americana* 1: 288. 1803

(Bark infusion for blood circulation, blood purifier. Magic, protective.)

in English: little-hip hawthorn, littlehip hawthorn, pasture hawthorn

Crataegus submollis Sarg. (*Crataegus champlainensis* Sarg.)

North America. Tree or shrub

See *Botanical Gazette* 31(1): 7–9. 1901

(Witchcraft medicine.)

in English: Quebec hawthorn

Craterispermum Benth. Rubiaceae

Greek *krater* 'crater, large bowl' and *sperma* 'seed', referring to the shape of the seeds, or from *krateros* 'strong, stout', alluding to the nature of the seeds, see *Niger Flora* 411. 1849.

Craterispermum cerinanthum Hiern (*Craterispermum brachynematum* Hiern) (from the Greek *keros* 'wax'.)

Tropical Africa. Shrub or treelet, papery leaves, white fragrant flowers, yellow greenish purple fruits

See *Fl. Tropical Africa* 3: 161. 1877

(Bark for burns and wounds. Lactogenic.)

in Congo: metea, motea

Craterispermum dewevrei De Wild. & T. Durand

Congo.

See *Bulletin de la Société Botanique de Belgique* 38: 88. 1899 and *Bulletin du Jardin botanique de l'État a Bruxelles* 2: 1–716. 1909

(Leaves to cure wounds.)

Craterispermum laurinum (Poir.) Benth. (*Canthium laurinum* (Poir.) Roberty; *Coffea laurina* Poir.; *Craterispermum laurinum* Benth.; *Craterispermum laurinum* A. Chev.)

West Africa. Small tree or shrub, twigs ridged at the nodes, leaves dark green leathery, inflorescence an axillary cyme situated slightly above leaf axil, corolla funnel-shaped yellow-white waxy, fruit a shortly stalked purple-black drupe, a source of a brownish yellow dye, forest, in deciduous forest and along stream banks in savanna

See *Encycl., Suppl.* 2: 14. 1811, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 483. 1830, *Journal of the Linnean Society, Botany* 20: 159. 1883 and *Exploration Botanique de l'Afrique Occidentale Française ...* 320. 1920, *Bull. Inst. Franç. Afrique Noire* 16: 61. 1954

(Leaves infusion drunk for the treatment of malaria and fevers, an excess can cause dizziness. A bark, leaf or root infusion or decoction taken against cough, toothache, fever, malaria, venereal diseases, high blood pressure and intestinal parasites. Powdered bark, leaves or roots applied to wounds and sores.)

in Congo: okoua, ontente

in Madagascar: amparimamy, amporimamy, hazomamy

in Sierra Leone: aforie, alum bak, an fori, nyéle, nyelei

Craterispermum schweinfurthii Hiern

Nigeria. Shrub or small tree, glabrous, grey-white warty bark, leaves opposite, inflorescence a cyme situated slightly above leaf axil, flowers bisexual sweet-scented, corolla salver- or funnel-shaped white, fruit a sessile drupe crowned with persistent calyx, seed bowl-shaped dark brown, a source of yellow and brown dyes, in evergreen fringing forest along water, swamp forest

See *Fl. Trop. Afr.* 3: 161–162. 1877

(Bark chewed to cure coughs, whooping cough, and for pain in the chest; a bark decoction is drunk in cases of stomach affections, fever, diarrhea and used in vapor baths against rheumatism, edema and sting-pain; powdered bark applied to sores and wounds. Roots, bark and fruits chewed and the juice taken against venereal diseases and as an aphrodisiac.)

in Uganda: musekera

Craterosiphon Engl. & Gilg Thymelaeaceae

From the Greek *krater* 'crater, large bowl, mixing bowl', *kratos*, *kartos* 'strength', *krateros* 'strong, stout' and *siphon* 'a tube', see *Die Natürlichen Pflanzenfamilien* 3(6a): 233. 1894, *Bot. Jahrb. Syst.* 19(2): 275. 1894 and *Fl. Gabon* 11: 35–95. 1966, *Fl. Trop. E. Africa* 1–37. 1978, *Fl. Zambesiaca* 9(3): 85–117. 2006.

Craterosiphon quarrei Staner (*Synaptolepis alternifolia* Oliv.)

Tropical Africa. Treelet, climber, woody, scrambler, sweet smelling fragrant yellow-green flowers, leaves eaten as vegetable

See *Hooker's Icon. Pl.* 12(4): t. 1194. 1876 and *Bulletin du Jardin Botanique de l'État* 13: 370–371. 1935

(Stem and leaves for lumbago, sprains. Leaves used to prevent vomiting.)

in Tanzania: chikolomoko, nkole

Crateva L. Capparaceae (Capparidaceae)

After Crateuas (flourished early 1st century BC), a Greek botanist and herbalist, pharmacologist and root-gatherer, artist, and physician to Mithradates VI, king of Pontus (120–63 BC.), he produced an herbal with coloured illustrations. See Carl Linnaeus, *Species Plantarum*. 1: 444. 1753, *Genera Plantarum*. Ed. 5. 203. 1754, *The Gardeners Dictionary ... Abridged ...* fourth edition. 1754, *Syst. Nat.*, ed. 10. 2: 1044. 1759, *Familles des Plantes* 2: 407–408. 1763, *Trans. Linn. Soc. London* 5: 222–223. 1800, *Genera Nova Madagascariensia* 13. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 243. 1824, *Sylva Telluriana* 107–108. 1838, *Krateuas*. [Fragments.] Von M. Wellman ... Mit zwei Tafeln. Berlin 1897 and *Fieldiana, Bot.* 24(4): 380–397. 1946, *Blumea* 12(2): 177–208. 1964, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 566–584. 2001, *Harvard Pap. Bot.* 13(1): 121–135. 2008.

Crateva adansonii DC. (*Capparis trifoliata* Roxb.; *Crateva axillaris* C. Presl; *Crateva erythrocarpa* Gagnep.; *Crateva guineensis* Schumach. & Thonn.; *Crateva guineensis* Schumach.; *Crateva laeta* DC.; *Crateva odora* Buch.-Ham.; *Crateva religiosa* sensu Keay; *Crateva religiosa* G. Forst.; *Crateva religiosa* var. *brevistipitata* De Wild.; *Crateva roxburghii* R. Br. var. *erythrocarpa* (Gagnep.) Gagnep.; *Crateva tumulorum* Miq.; *Crateva tumulorum* Blume)

East and West Africa, Senegal. Small tree, trunk irregular, wood and leaves strong smelling, leaves trifoliate tufted at the end of branches, at the ends of all shoots dense masses of white flowers, four green sepals, four petals, stamens numerous, green yellow fruit with a mealy pulp occasionally eaten, seeds edible, often on river banks, savanna

See *Hort. Bengal.* 41. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 243. 1824, *Transactions of the Linnean Society of London* 15(1): 118. 1827, *Beskrivelse af Guineiske planter* 240. 1827, *Flora Indica*; or, descriptions of Indian Plants 2: 571. 1832, *Reliquiae Haenkeanae* 2(2): 85. 1835 and *Annales du musée du Congo. in Togo: anomolum, camu, dengma, tschengunga

in Upper Volta: dumko, guvé, kalegaintohiga, kodra iri, koyani

in W. Africa: anawe, anuwe, bani jugu, suname

in Yoruba: egun orun, tamo labia, tani yaa

Crateva magna (Lour.) DC. (*Capparis magna* Lour.; *Crateva lophosperma* Kurz; *Crateva magna* DC.; *Crateva nurvala* Buch. Ham.; *Crateva religiosa* Blume; *Crateva religiosa* G. Forst.; *Crateva religiosa* Ainslie; *Crateva religiosa* var. *nurvala* (Buch.-Ham.) Hook. f. & Thomson; *Triclanthera corymbosa* Raf.)

India, Burma (Myanmar), southern China. Tree, white soft bark, trifoliate leaves, lanceolate leaflets shortly stalked or sometimes nearly sessile, leaflets thick and leathery or thin and flimsy, berry yellowish-grey

See *Fl. Ins. Austr.* 35. 1786, *Flora Cochinchinensis* 1: 33. 1790, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 243. 1824 [mid Jan. 1824], *Transactions of the*

Linnean Society of London 15(1): 121. 1827, *Sylva Tellur.* 108. 1838, *Journal of Botany*, being a second series of the Botanical Miscellany 12: 195, pl. 147, f. 4–6. 1874

(Used in Ayurveda. Young shoots mixed with other herbs to treat broken bones. Leaves and roots decoction used in throat infections. Bark and leaves tonic, astringent, bitter, acrid, thermogenic, carminative, anthelmintic, digestive, stomachic, laxative, diuretic, stimulant, detergent, expectorant, demulcent, anti-periodic. Fresh leaves rubefacient, febrifuge; leaves chewed for spongy gums and toothache; touch therapy, a leaf kept on the ear of the mother to expel out the retained placenta. Juice from the bitter stem or root bark used in decoction for stimulating the appetite or as a digestive, as a laxative against colic and as a febrifuge. Bark decoction given in gout and rheumatism, dysuria, toxemia, calculi; extract of fresh stem bark or root bark boiled with garlic, black pepper and seeds of *Catunaregam uliginosa* given for diphtheria. Veterinary medicine, bark extract along with leaves of *Cassia fistula*, seeds of *Ocimum basilicum*, butter and salt are pounded and given orally in tympany.)

in Burma (Myanmar): ka-tak, kadat

in China: sha li mu

in India: adhiraaja, banna, barna, barun, bilapathri, bilvaram, bitusi, chinnavulimidi, doddelanga, haravarna, hod-delenage, holenekki, holetalkki, holethumbe, holethumbi, karvan, kumla, maagalingam, maaredu, maavalanga mara, maavilanga, maavilangam, maayaa langa, madabalase, maralingam, maralingamu, mata maavu, matamoolangi, mavilingam, naaram bele, naarumbele, narave, narvala, neergini, neerunjaane, neervaala mara, neervaale, nervaala, nirmatalam, nirval, nirvala, peddamaagalingam, peddavulimidi, ramala, sethu bandhana, thellavulimidi, ulimidi, ulimiri, urumudu, usikiman, uskia manu, uskia tammidi, vaayu varuna, vaayuvarna, varanam, varun, varunah, vaveran, vay-varno, vitasi

in Indonesia: jaranan, pingos, sibaluk

in Malaysia: bulan ayer, dala

in Thailand: hoh-thoh, kum nam, ro-tha

in Vietnam: b[us]n, co c[uj]m

Crateva nurvala Buch. Ham. (*Crateva lophosperma* Kurz; *Crateva religiosa* var. *nurvala* (Buch.-Ham.) Hook. f. & Thomson; *Crateva religiosa* var. *nurvala* (Buch.-Ham.) Hook. f. & Thomson)

India. Small tree, deciduous, grey bark, lanceolate leaflets, yellow or white flowers, red stamens, berry papillate, shoots eaten cooked, often in *Crateva magna*

See *Fl. Ins. Austr.* 35. 1786, *Transactions of the Linnean Society of London* 15(1): 121. 1827, *Gen. Index to Trans. Linn. Soc. London*, vols. 1–25. 1867, *J. Bot.* 12: 195. 1874 and *Gard. Bull. Straits Settle.* 10: 17. 1939, *Biol. J. Linn. Soc.*, 2: 61–76. 1970

(Used in Ayurveda and Unani. Root bark and young shoots irritant to the skin, rubefacient. Bark extract laxative, antidote, demulcent, stomachic, diuretic, antipyretic, tonic, alterative, postpartum remedy, promotes appetite and stimulates liver; fresh bark juice given for urinary complaints, also a tonic for general weakness and given to women after childbirth, also applied on wounds and snakebite. Bark said to be contraceptive and make the woman sterile. Root bark for dysuria, lithiasis, abdominal tumor, arthritis, metrorrhagia, infections, cystitis, diabetes, inguinal lymph adenopathy, high fevers, carminative, expectorant; fresh leaves and root bark rubefacient. Leaf for arthritis, analgesic. Magico-religious beliefs, tree worshipped; contact therapy, a piece of root tied round the waist of a woman suffering from frequent miscarriage.)

in Burma (Myanmar): hkan-tak, ka-tak, kadat

in India: adicharanam, adimalam, ajapa, anjali, ashmarygna, asmarignah, barhapushpa, barna, barun, bila, bilasi, biliana, bilpatri, bilvaram, bitusi, burna, chinnaulimidi, chinnavulimidi, cinnavulimidi, haravarna, hoddelengage, inaivilai, karvan, kattumavilangai, kumla, kuvilam, kili, killi, kumara, kumaraka, kumarakah, loiyumba lei, maathalanaaranga, magalingam, mahakapittha, maluram, maralingam, maredu, marutapaha, mavilinga, mavilangai, mir-chak-chu, narave, neermaathalam, neravambe, neravele, niirvala, niravila, nirumaliyan, nirvala, nurvel, pasunadha, peddamagalingam, peddavulimidi, ramala, sadhuvriksha, satuvriksha, setuka, setuvriksha, setuvrksah, shikhimandal, shvetadru, shvetadruma, shvetavriksha, tamala, tellavulimidi, tiktasakah, tiktashak, tiktashaka, tudemadirenge, ulimidi, urumana, vaivarno, vanni, vanna, varana, varanah, varno, varun, varun chhal, varuna, varunah, varvunna, vasaha, vayavarna, vayvarna, vitusi

in Tibet: ba ra

Crateva religiosa G. Forst. (*Crataeva adansonii* DC.; *Crateva brownii* Korth. ex Miq.; *Crateva guineensis* Schumach. & Thonn.; *Crateva guineensis* Schumach.; *Crateva hansemannii* K. in Philippines: bansilai, baringkokorong, guyung-guyung, kansilai, kansilan, oringon, pagulingin, pagulingon, salingogon, uging, ugingan

Cratoxylum cochinchinense (Lour.) Blume (*Ancistrolobus ligustrinus* Spach; *Cratoxylum biflorum* (Lamarck) Turczaninow; *Cratoxylum chinense* Merrill; *Cratoxylum cochinchinense* Blume; *Cratoxylum ligustrinum* (Spach) Blume; *Cratoxylum petiolatum* Blume; *Cratoxylum polyanthum* Korthals; *Cratoxylum polyanthum* var. *ligustrinum* (Spach) Dyer; *Elodes chinensis* (Retzius) Hance; *Hypericum biflorum* Lamarck; *Hypericum chinense* Retzius, nom. illeg.; *Hypericum cochinchinense* Loureiro; *Oxycarpus cochinchinensis* Loureiro; *Stalagmites erosipetala* Miquel)

Asia. Tree, plant xerophilous, red brown bole, bark peeling off in long strips, short with numerous long horizontal branches, bright red bark, inner bark pale with watery orange-red sap, leaves opposite

See *Species Plantarum* 2: 783–787. 1753, *Systema Naturae*, Editio Decima 2: 1184. 1759, *Observationes Botanicae* 5: 27. 1789, *Fl. Cochinch.* 2: 472. 1790, *Anleitung zur Kenntniss der Gewächse* 3: 784. 1818, *Annales des Sciences Naturelles; Botanique*, sér. 2, 5: 352. 1836, *Flora* 31: 579. 1848, *Museum Botanicum* 2(1–8): 17. 1856 [Feb 1856] and *Philippine Journal of Science* 4(3): 292–293. 1909

(The roots, bark, and twigs used for colds and diarrhea; root decoction a postpartum remedy.)

in China: huang niu mu

Malay names: akar serapat, derum selunchor

Cratoxylum formosum (Jack) Dyer (*Cratoxylum formosum* (Jack) Benth. & Hook.f. ex Dyer; *Cratoxylon formosum* Benth. & Hook.f. ex Dyer; *Elodes formosa* Jack; *Elodes formosa* Ten.)

Thailand, Indonesia. Trees, papery scaly, pink sap, twigs swollen at nodes, young trees with spiny stems, membranous leaves

See *Familles des Plantes* 2: 444. 1763, *Malayan Miscellanies* 2(7): 24. 1822, *Verh. Batav. Genootsch. Kunsten* 9: 172, 174. 1823, *Journal of Botany, being a second series of the Botanical Miscellany* 1: 374. 1834, *Annales des Sciences Naturelles; Botanique*, sér. 2, 5: 171. 1836, *Cat. Ort. Bot. Nap.* 93. 1845, *The Flora of British India* [J.D. Hooker] 1(2): 258. 1874 and *Blumea* 15(2): 469. 1968, *Taxon* 32(1): 84. 1983

(Leaves eaten for food poisoning, to stop internal bleeding; boiled with *Laportea* roots and liquid drunk to treat diarrhea. For skin diseases, pound the leaves and the bark with coconut oil and poultice.)

in China: yue nan huang niu mu

Malayan names: derum, geronggang betina, mampat hitam, mempapat, mempapat, mempapat, pink mempapat, sepedas bunga

Cratoxylum formosum (Jack) Dyer subsp. ***pruniflorum*** (Kurz) Gogelein (*Cratoxylum dasyphyllum* Handel-Mazzetti; *Cratoxylum formosum* (Jack) Benth. & Hook.f. ex Dyer subsp. *pruniflorum* (Kurz) Gogelein; *Cratoxylum pruniflorum* Kurz; *Cratoxylum pruniflorum* (Kurz) Kurz; *Tridesmia pruniflora* Kurz)

India, Burma. Small deciduous tree with open crown, young trees often with long spines, dark grey bark, opposite leaves, young leaves red to pale pink and silky, mature leaves bright green and densely white hairy below

See *Flora Cochinchinensis* 540, 576. 1790, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 41(2): 293. 1872, *Journal of the Asiatic Society of Bengal* 43(2): 84. 1874, *Forest Fl. Burma* i. 84. 1877 and *Sinensia* 2(1): 4. 1931, *Blumea* 15: 15(2): 469–470, f. 5 j, k. 1968 [dt. 1967; issued 18 Jan 1968]

(Veterinary medicine, bark for diarrhea in domestic animals.)

in China: hong ya mu

Cratoxylum sumatranum Blume (*Cratoxylum sumatranum* (Jack) Blume)

Indonesia. Small tree

See *Museum Botanicum* 2(1): 16. 1856 [dt. 1852, issued Feb 1856]

(Fresh leaves heated, crushed and rubbed on skin to relieve the itch of insect bites and skin rash. Root decoction as a mouthwash for infected teeth; root scraped and placed directly in the infected part of the tooth.)

in Indonesia: duling

Cratoxylum sumatranum Blume subsp. ***neriifolium*** (Kurz) Gogelein (*Cratoxylum neriifolium* Kurz)

Indonesia, India, Burma.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural History* 41(4): 293. 1872 and *Blumea* 15: 463. 1967

(Leaves infusion drunk in indigestion, dyspepsia, stomachache.)

in India: thing-sir

Cremanthodium Benth. Asteraceae

Greek *kremao* ‘to hang, to let hang down’ and *anthodium* ‘flower-head, capitulum’, *anthodes* ‘flower-like’, referring to the flower-heads, see *Species Plantarum* 2: 866–872. 1753, *De Fructibus et Seminibus Plantarum...* 2: 453. 1791, *Bull. Sci. Soc. Philom. Paris* 1816: 198. 1816, *Hooker’s Icones Plantarum* 12: 37, t. 1141. 1873 and *Acta Biol. Plateau Sin.* 1: 51–52. 1982, *Fl. Reipubl. Popularis Sin.* 77(2): 140, 145. 1989, *Acta Bot. Boreal.-Occid. Sin.* 16(3): 310–318. 1996, *Bot. J. Linn. Soc.* 135(2): 107–112. 2001.

Cremanthodium arnicoides (DC. ex Royle) R.D. Good (*Cremanthodium arnicoides* R.D. Good; *Ligularia arnicoides* DC. ex Royle; *Ligularia arnicoides* DC.; *Senecillis arnicoides* (DC.) Kitam.; *Senecillis arnicoides* (DC. ex Royle) Kitam.)

India.

See *Numer. List* [Wallich] n. 3138. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 251, pl. 60, f. 2. 1835, *Prodr.* (DC.) 6: 314. 1838 [1837 publ. early Jan 1838], *Compositae Indicae* 207. 1876 and *Journal of the Linnean Society, Botany* 48(322): 288. 1929, *Acta Phytotaxonomica et Geobotanica* 8(2): 85. 1939

(Pounded fresh leaves to treat spit with blood and pain in the chest, skin diseases, diabetes, swelling of testicles. Stem paste mixed with shoot juice of *Delphinium cashmerianum* given for dysentery.)

in India: neelkanthi, rakta pacha, regonche, regoon cherpo mensa, regoon mensa

Cremanthodium ellisii (Hook.f.) Kitam. (*Cremanthodium ellisii* (Hook.f.) Seybold & Kull; *Cremanthodium ellisii* (Hook.f.) S.W. Liu; *Cremanthodium plantagineum* Maxim. fo. *ellisii* (Hook.f.) R.D. Good; *Cremanthodium plantagineum* Maxim. var. *maximowiczii* (Franch.) Aswal; *Werneria ellisii* Hook.f.)

India.

See *The Flora of British India* [J.D. Hooker] 3(8): 357. 1881 and *Journal of the Linnean Society, Botany* 48(322): 293–295. 1929, *Enumeration of the Flowering Plants of Nepal* 3: 22. 1982, *Bot. Jahrb. Syst.* 105(2): 269. 1985, Aswal, B.S., *Flora of Lahaul-Spiti*: (a cold desert in North West Himalaya). 348. Dehra Dun, 1994

(Extract of whole plant analgesic, given in fever, contagious diseases, swelling. Leaves used as antiseptic.)

in India: lukumentok, ming-chen-ser-po, phunchuk, rekompa

Crepidium Blume Orchidaceae

From *krepidion*, little boot, the diminutive of the Greek *krepis*, possibly for the lip, see *Nova Genera et Species Plantarum seu Prodrum* 8, 119. 1788, *Bijdragen tot de flora van Nederlandsch Indië* 6: t. 2, f. 63. 1825 and *Taxon* 30: 512. 1981.

Crepidium acuminatum (D. Don) Szlach. (*Crepidium bilobum* (Lindl.) Szlach. ex Lucksom; *Crepidium bilobum* (Lindl.) Szlach.; *Malaxis acuminata* D. Don; *Malaxis acuminata* f. *biloba* (Lindl.) Tuyama; *Malaxis acuminata* var. *biloba* (Lindl.) Ames; *Malaxis allanii* S.Y. Hu & Barretto; *Malaxis biloba* (Lindl.) Seidenf. & Smitin.; *Malaxis biloba* (Lindl.) Ames; *Malaxis parryae* (Finet) T. Tang & F.T. Wang; *Malaxis parryae* T. Tang & F.T. Wang; *Malaxis pierrei* (Finet) Bakh. f.; *Malaxis pierrei* (Finet) Tang & F.T. Wang; *Malaxis siamensis* (Rolfe ex Downie) Seidenf. & Smitinand; *Malaxis wallichii* (Lindl.) Deb; *Microstylis biloba* Lindl.; *Microstylis pierrei* Finet; *Microstylis siamensis* Rolfe ex Downie; *Microstylis trigonocardia* Schltr.; *Microstylis wallichii* Lindl.) (*Microstylis* (Nuttall) Eaton, from the Greek *mikros* 'small, tiny' and *stylos* 'a style, pillar, a column', referring to the very small and slender column.)

Tropical Asia, Australia.

See *Manual of Botany for the Northern and Middle States*. Third edition. 115, 347, 353. 1822, *Prodrum Florae Nepalensis* 29. 1825, *The Genera and Species of Orchidaceous Plants* 20. 1830 and *Bulletin de la Société Botanique de France* 54(7): 534–535, pl. 12, f. 1–12. 1907, *Orchidaceae* 2: 122. 1908, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 4: 62–36. 1919, *Bulletin of Miscellaneous Information Kew* 1925(9): 368–369. 1925, *Enum. Crepis tectorum L. (*Hieracioides tectorum* (L.) Kuntze)

China.

See *Species Plantarum* 2: 807. 1753, *Enumeratio Methodica Plantarum* 68. 1759, *Revisio Generum Plantarum* 1: 344, 346. 1891

(Antiinflammatory.)

in English: narrow-leaf hawk's beard

in China: wu gen cao

Crescentia L. Bignoniaceae

In honor of the Italian monk Pietro Crescenti (Petrus de Crescentiis), 1230–1321, author of *Il libro della agricultura* di Pietro Crescentio. Florentie [Florence] 1478, *Species Plantarum* 2: 626. 1753, *Analyse des Familles de Plantes* 20, 24. 1829 and *Bulletin de la Société Botanique de France* 92: 227. 1945–6, *Fl. Neotrop.* 25(1): 1–131. 1980, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000.

Crescentia alata Kunth (*Crescentia ternata* Sessé & Moc.; *Crescentia trifolia* Blanco; *Otophora paradoxa* Blume; *Parmentiera alata* Kunth; *Parmentiera alata* (Kunth) Miers; *Pteromischus alatus* (Kunth) Pichon)

Mexico, Central America. Small tree, branches crooked, winged petiole, flowers solitary or paired, corolla lobes brownish with brown-purple venation, berry more or less spherical, dry savannas

See *Nova Genera et Species Plantarum* (quarto ed.) 3: 158–159. 1818[1819], *Flora de Filipinas* 489. 1837, *Transactions of the Linnean Society of London* 26: 166. 1868, *Plantae Nouae [sic] Hispaniae...* 94–95. 1889 and Maximino Martínez, *Catálogo de nombres vulgares y científicos de plantas mexicanas*. 1093. México 1987

(Leaves decoction astringent, abortifacient, emollient, antimicrobial and antihemorrhagic, expectorant, laxative, in cough, hepatitis, diarrhea, dysentery. Pulp eaten as a pectoral and for diseases of the kidneys.)

in Latin America: cruz, jicara, morro, tecomate

in Mexico: ayacachuahuitl (= árbol de las sonajas), ayal, ayale, cadili, cirial, cirian, ciriani, cuatecomate, gua, guaje cirían, güiro, guit-xiga, latacadili, morro, sam-mu, sham-mu, tecomate, tuyachin, urani, tima, xicalcuahuitl (= árbol de jícaras)

in Philippines: hoja-cruz, krus-krusan

in Thailand: teenpet farang

in Vietnam: d[af]o ti[ee]n c[os] c[as]nh

Crescentia kujete L. (*Crescentia acuminata* Kunth; *Crescentia angustifolia* Willd. ex Seem.; *Crescentia arborea* Raf.; *Crescentia kujete* var. *puberula* Bureau & K. Schum.; *Crescentia cuneifolia* Gardner; *Crescentia fasciculata* Miers; *Crescentia plectantha* Miers; *Crescentia spathulata* Miers)

South America. Small low branching tree, crown open, branches crooked, petiole absent, tubular flowers solitary or

paired, corolla lobes yellowish with purple venation, berry spherical to ovoid-elliptical, large green fruits attached to the trunk and branches, hard shell of the fruit, lowlands

See *Nova Genera et Species Plantarum* (quarto ed.) 3: 157. 1818[1819], *Sylva Telluriana* 81. 1838, *Journal of Botany*, being a second series of the *Botanical Miscellany* 2: 422. 1840, *Transactions of the Linnean Society of London* ser. 1, 23: 20. 1862, *Transactions of the Linnean Society of London* ser. 1, 26: 170–171, 173. 1868, *Flora Brasiliensis* 8(2): 403. 1897 and *Taxon* 27: 53–61. 1978, *Fl. Neotrop.* 25(1): 90. 1980, Wijnands, Dirk Onno (1945–1993), *The Botany of the Commelins* 50. Rotterdam: A.A. Balkema, 1983, *International Organization of Plant Biosystematists Newsletter* 21: 3. 1993, *Taxon* 43: 274. 1994, *International Organization of Plant Biosystematists Newsletter* 26/27: 22. 1997

(Used in Sidha. Toxic pulp, dangerous, has cyanogenic glycoside, internal use not recommended. Fruits and leaves abortive, antibacterial, analgesic, antiinflammatory, purgative, for skin diseases. Dry fruit used against bronchitis, coughs, asthma, for skin infections, earache, diarrhea; fruit-pulp boiled and the thick liquor taken for respiratory troubles. Leaf tea for palpitation, hypertension, flu, pneumonia. Veterinary medicine, used for skin diseases in dogs.)

in English: calabash, calabash tree, common calabash tree, gourd tree, round calabash, tree calabash, wild calabash

in South America: ankunip, arbol de las calabazas, boch, buhango, bux, cayeira, cabaceião, cabeceira, cabaceiro, cabaço, calabash, choité, chouine, cirían, coité, couté, cuautecomate, cuauhtecomatl (= recipiente de árbol), cuia, cuieira, cuieté, kujete, cue, cuyera, gooby, gua, guaje, güiro, guiroto-tumo, guito-xiga, hom, huas, huaz, huingo mase, japt, jícara, jícara, leua, luch, mate, mimbire, moñaanhño, morro, mulul, palo de huacal, pamuco, pati, pog, poque, poto, shem, tecomate, totumo, tutumo, tzimá, xa-gueta-guia, xi, xica-gueta-nazaa, xicaltecomatl (= recipiente de jícara), zacual

in India: sokeburude, tiruvottukkai, tiruvottukkay

in Indonesia: bernuk, buah no, sikadel

in Japan: fukube-no-ki

in Malaysia: tabu kayu

in Philippines: kujete

in Thailand: namtao ton, namtao yeepun

in Vietnam: d[af]o ti[ee]n

African names: igisogba, oba

Crescentia linearifolia Miers (*Crescentia microcarpa* Bello)

Central America, Virgin Islands, Haiti.

See *Transactions of the Linnean Society of London* 26: 172. 1868, *Anales de la Sociedad Española de Historia Natural* 10: 294. 1881

(Diuretic, aphrodisiac, depurative.)

Cressa L. Convolvulaceae

From the Latin *Cres*, *Cretis* and *Cressa*, *ae* ‘Cretan’; Greek *Kres*, *Kressa* ‘Cretan’; see Carl Linnaeus, *Species Plantarum*. 1: 223. 1753 and *Genera Plantarum*. Ed. 5. 104. 1754.

Cressa cretica L. (*Cressa australis* R. Br.)

Sudan. Herb, white flowers

See *Sp. Pl.* 1: 223. 1753, *Prodr. Fl. Nov. Holland.* 490. 1810 and *Fl. Trop. Africa, Convolvulaceae* 33. 1963

(Used in Ayurveda, Unani and Sidha. Whole plant decoction a general tonic, aphrodisiac, stomachic, alterative, blood purifier.)

in English: rosinweed

in India: alukanni, amritasrava, amritsrava (amrit, sweet; srava, moist), anshalees, chanakpatri, chanapatri, chavala, chavel, dravanti, khardi, lana, madhusrava, mahamansi, mullumaddu gida, padio, palitaka, romanchika, rudanti, rudantika, rudranti, rudravanti, rusanti, sanjivani, sravanti, sravattaya, uppu senaga, uppucanaka, uppumarik koluntu, uppumarikkoluntu, uppusanaga, vuppu marikkozhunthu

Crinum L. Amaryllidaceae (Alliaceae, Liliaceae)

Greek *krinon* ‘a lily’; Plinius used the Latin name *crinon*, *i* for a red lily; see Carl Linnaeus, *Species Plantarum*. 1: 291–292. 1753, *Genera Plantarum*. Ed. 5. 141. 1754 and *Boissiera* 24: 207–213. 1975, *Cytologia* 43: 575–580. 1978, *Hereditas Genetiskt Arkiv* 91: 183–206. 1979, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 51–55. 2003.

Crinum americanum L. (*Bulbine uncinata* Moench; *Crinum americanum* subsp. *robustum* Hannibal, nom. inval.; *Crinum americanum* var. *traubii* (Moldenke) Hannibal; *Crinum caribaeum* Baker; *Crinum ceruleum* Raf.; *Crinum commelyni* DC., nom. illeg.; *Crinum commelyni* Jacq.; *Crinum conicum* M. Roem.; *Crinum cruentum* Ker Gawl.; *Crinum cruentum* var. *albidum* Kunth; *Crinum erubescens* Aiton; *Crinum erubescens* Kunth, nom. illeg.; *Crinum erubescens* var. *mexicanum* M. Res.* 3: 238, 263, 308, 320. 1972, *Cytologia* 43: 575–580. 1978

(Bulbs reputed poisonous.)

in English: Florida swamp lily, southern swamp crinum, southern swamp lily

Common names: lirio, lirio gigante

Crinum asiaticum L. (*Bulbine asiatica* (L.) Gaertn.; *Bulbine asiatica* Gaertn.; *Crinum firmifolium* var. *hygrophilum* H. Perrier)

Trop. & Subtrop. Asia. Shrub, herb, fleshy, elongated leaves, yellowish white fragrant flower, red stamen, yellow-green fruits, extremely polymorphic, in lowland forest

See *Species Plantarum* 1: 291–292. 1753, *Journal of the Linnean Society, Botany* 20: 270. 1883 and *Bulletin de la Société Botanique de France* 86: 87. 1939, Moldenke, H.N. “Amaryllid genera and species.” *Pl. Life* 18: 48–50. 1962, *Taxon* 31: 769. 1982, Wunderlin, R.P., B.F. Hansen, and D.W. Hall. “The vascular flora of central Florida: Taxonomic and nomenclatural changes, additional taxa.” *Sida* 11: 232–244. 1985, *Revista Brasileira de Genética* 9: 21–40. 1986, *Caryologia* 39: 403–407. 1986, *Cytologia* 57: 309–314. 1992, *Journal of Cytology and Genetics* 32(2): 145–149. 1997

(Used in Ayurveda, Unani and Sidha. Poisonous plant used to treat breasts infections; stem fibers used to stop bleeding; underground stem crushed used for massaging the chest for chest pain due to cough. Leaves used to treat wounds, sores, swollen joints, sprained joints and broken bones, snakebites, cuts and body swellings; leaf juice dropped into ear. Roots in a poultice for wounds, ulcers and swellings. Bulbs reputed to be poisonous, antiviral, antibacterial, anti tumor, emetic, diaphoretic, antiinflammatory, immunostimulative, for urinary troubles, earache, as antidote for snake and arrow poison, and after eating poison fish. Veterinary medicine, leaves to avoid infection in hens, coccidiosis.)

in English: Cape lily, crinum lily, poison bulb, sprain weed, tree crinum

in Fiji: viavia

in Guam: piga-palayi

in China: luo qun dai

Gondwana editions. [as *Crinum latifolium* var. *zeylanicum*]

(Bulb very acrid, causes inflammation of the skin and the mucous membranes, and is therefore used in rheumatism; bulbs known to cause severe diarrhea. Leaves applied to injuries and ulcers. Bulbs used as a rubefacient, will reportedly blister the skin of cattle; bulb decoction drunk to kill intestinal worms. Molluscicidal, plants have shown toxic effect on fishes and aquatic insects. Leaf juice pectoral, febrifuge, for relieving earache, malaria.)

in English: milk and wine lily

in Congo: ita

in Senegal: бага

in Sierra Leone: kajaba

in Sri Lanka: goda-manel

Crithmum L. Apiaceae (Umbelliferae)

Latin *crethmos* and Greek *krithmon*, *krethmon* for the sea-fennel, samphire; see Carl Linnaeus, *Species Plantarum*. 1: 246. 1753 and *Genera Plantarum*. Ed. 5. 116. 1754 and *Bol. Soc. Brot.*, ser. 2, 52: 69–77. 1978, *Inform. Bot. Ital.* 10: 80–84. 1978, *Fl. Libya* 117: 49. 1985, *Watsonia* 19: 169–171. 1993, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 20: 7–9. 1993, *Fl. Medit.* 8: 221–245. 1998.

Crithmum maritimum L.

Europe, Spain.

(Digestive, diuretic, for scurvy, obesity.)

in English: Peter's cress, rock samphire, samphire, sea fennel, sea samphire

in Arabic: shamar bahariya

Crocsmia Planchon Iridaceae

From the Greek *krokos* 'saffron' and *osme* 'a smell', in reference to the strong smell of saffron of the dried flowers immersed in warm water; Sumerian *kur-gi-rin-na*, Akkadian

kurkanu, Hebrew *karkom* or *harkom*, Arabic *kurkum*, *harkam*; see Jules Émile Planchon, *Flore des Serres et des Jardins de l'Europe*. 7: 161, t. 702. 1851–1852.

Crocsmia paniculata (Klatt) Goldblatt (*Antholyza paniculata* Klatt; *Curtonus paniculatus* (Klatt) N.E. Br.) (*Antholyza*, from the Greek *anthos* 'flower' and *lyssa* 'rage, canine madness, madness', referring to the mouth of the flower and the mouth of an enraged beast.) (*Curtonus* N.E. Br., from the Greek *kyrtos* 'curved, arched, swelling, bent, hunch-backed'.)

Zimbabwe, S. Africa. Tuber geophyte, flowers deep orange

See *Species Plantarum* 1: 37. 1753, *Flore des Serres et des Jardins de l'Europe* 7: 161. 1851, *Linnaea* 35: 379. 1867 and *Trans. Roy. Soc. South Africa* 20: 270. 1932, *J. S. African Bot.* 37(4): 444. 1971

(Root used for dysentery, cholera, diarrhea and infertility. Veterinary medicine, for diarrhea.)

in South Africa: umLunge (Zulu)

Crocus L. Iridaceae

Latin *crocum* and *crocus* and Greek *krokos* 'saffron, the yellow stamens in many flowers', Sumerian *kur-gi-rin-na*, Akkadian *kurkanu*, Hebrew *karkom* or *harkom*, Arabic *kurkum*, *harkam*, see *Botaniska Notiser* 133: 155–163. 1980.

Crossandra massaica Mildbr. (*Crossandra nilotica* Oliv. subsp. *massaica* (Mildbr.) Napper; *Crossandra puberula* Klotzsch var. *smithii* C.B. Clarke)

Kenya. Herb, softly pubescent, papery leaves, flowers red-orange

See *Journal of the Arnold Arboretum* 11: 54. 1930, *Kew Bulletin* 24: 339. 1970, *Journal of Ethnopharmacology* 83: 39–54. 2002

(Chewed leaves, the juice on wounds, snakebites, cobra bite; pounded leaves applied for venereal diseases.)

in Kenya: akudho

Crossandra nilotica Oliver (*Barleria rhynchocarpa* Klotzsch; *Crossandra nilotica* Oliv. var. *acuminata* Lindau; *Crossandra rhynchocarpa* (Klotzsch) Cufod.; *Crossandra smithii* S. Moore)

Ethiopia, Tanzania. Herb, corolla bright light orange

See *Transactions of the Linnean Society of London* 29: 128. 1875

(Chewed leaves, the juice on wounds, skin diseases, snakebites, cobra bite; crushed fresh leaves taken for abdominal cramp.)

in Ethiopia: kawo maata

in Kenya: cheberenet

Crossopteryx Fenzl Rubiaceae

From the Greek *krossos* ‘fringe’ and *pteryx* ‘wing’, the seeds have fringed margins, see Strugnell, A.M. “A checklist of the Spermatophytes of Mt. Mulanje, Malawi.” *Scripta Botanica Belgica* 34: 1–199. 2006, Sosef, M.S.M. et al. “Check-list des plantes vasculaires du Gabon.” *Scripta Botanica Belgica* 35: 1–438. 2006.

Crossopteryx febrifuga (Afz. ex G. Don) Benth. (*Chomelia angolensis* (Hiern) Kuntze; *Chomelia buchananii* K. Schum.; *Chomelia mossambicensis* (Hiern) Kuntze; *Crossopteryx africana* Baill.; *Crossopteryx febrifuga* Benth.; *Crossopteryx kotschyana* Fenzl; *Rondeletia africana* T. Winterb., nom. nud.; *Rondeletia febrifuga* Afzel. ex G. Don, nom. nud.; *Rutidea fuscescens* subsp. *fuscescens*; *Tarenna angolensis* Hiern; *Tarenna mossambicensis* Hiern)

Trop. & S. Africa. Shrub or small tree, many-branched, spreading, slender, dark rough scaly bark, twisted trunk, young branches with peeling reddish bark, papery waxy leaves opposite, terminal cymes corymb-shaped, white cream tubular sweetly fragrant flowers, slender style, soft blackish capsules, flat winged seeds, tree used for charcoal, in savanna, dry land, in open forest, in *Acacia* woodland, in gallery forest, woodland, in grassland savanna, in woodland understory, Karroo sandstone, wooded grassland, open area of savanna

See *Species Plantarum* 1: 110, 172. 1753, *Enumeratio Systematica Plantarum* 1. 1760, *De Fructibus et Seminibus Plantarum*... 1: 139, pl. 28. 1788, *A General History of the Dichlamydeous Plants* 3: 516. 1834, *Novarum Stirpium Decades* 45. 1839, *Niger Flora* 333, 381. 1849, *Flora of Tropical Africa* 3: 89, 191. 1877, *Histoire des Plantes* 7: 489. 1880, *Die Pflanzenwelt Ost-Afrikas* C: 380. 1895 and *Journal of Ethnopharmacology* 8: 257–263, 265–277. 1983, *Journal of Ethnopharmacology* 9: 237–260. 1983, *Journal of Ethnopharmacology* 14: 159–172. 1985, *Plant Systematics and Evolution* 149: 89–118. 1985, *Journal of Ethnopharmacology* 33: 143–157. 1991, *Journal of Ethnopharmacology* 48: 131–144. 1995

(Roots and stem bark antipyretic, antiviral. Roots decoction febrifuge, used for cardiac pain; roots decoction drunk for venereal diseases. Bark febrifuge and a cough medicine, after being powdered and mixed with rice used as an astringent in treating diarrhea, dysentery. Leaves febrifuge, astringent, cholagogue, used for female sterility, venereal diseases, kwashi-orkor, dysentery, diarrhea, colic, dysmenorrhea, malaria, intestinal worms, wounds, ophthalmia. Veterinary medicine.)

in English: ordeal tree, sand crown berry

in Togo: késam

in West Africa: balembo, boblan, késam, kinguéhoum, krokro, limadjougahi, oobeengbeeng

in Yoruba: aro, ayeye

Crossostephium Less. Asteraceae

From the Greek *krossos* 'a fringe' and *stephein* 'to crown', referring to the fruits or to the head of the inflorescence or to the young leaves, see *Linnaea* 6: 220. 1831 and *Taxon* 26: 557–565. 1977, *Bot. Bull. Acad. Sin.* 19: 53–66. 1978.

Crossostephium chinense (Linnaeus) Makino (*Artemisia chinensis* Besser; *Artemisia chinensis* Linnaeus; *Chrysanthemum artemisioides* (Lessing) Kitamura; *Crossostephium artemisioides* Lessing; *Crossostephium chinense* Merr.; *Crossostephium chinense* (L.) Merr.; *Crossostephium chinense* Makino; *Tanacetum chinense* A. Gray ex Maximowicz)

Japan, China. In Japan and China *moxa* are made from the leaves or the downy hairs on the leaves and stems of one or more species of *Artemisia* L. or *Crossostephium* Less.

See *Species Plantarum* 2: 849. 1753, *Linnaea* 6: 220–221, 229. 1831, *Linnaea* 15: 992. 1841, *Bulletin de l'Académie Impériale des Sciences de St-Pétersbourg* 17: 427. 1872 and *Bot. Mag.* (Tokyo) 20(229): 33–34. 1906, *Philipp. J. Sci.* 15(3): 260. 1919[1920], *Acta Phytotaxonomica et Geobotanica* 8(2): 77. 1939

(Whole plant used for treating infantile convulsion and tumor. Leaves and tops in infusion used as carminative and emmenagogue.)

in English: absinth

in China: fu rong ju, xiang ju

in Japan: ishijuku, moku-byakko

in Philippines: ajenjo

Crossostylis Forst. & Forst.f. Rhizophoraceae

From the Greek *krossos* 'a fringe' and *stylos* 'style', see *Species Plantarum* 1: 443. 1753, *Characteres Generum Plantarum* 44. 1775, *Synopsis Plantarum* 2(1): 2. 1806 and *Novon* 9(4): 550. 1999.

Crossostylis seemanii A. Schimp. (*Crossostylis seemanii* Schimper; *Crossostylis seemanii* (A. Gray) Schimper)

Pacific, Fiji.

See *Die Natürlichen Pflanzenfamilien* 3(7): 51. 1893

(For hematuria.)

Crotalaria L. Fabaceae (Crotalariaeae, Leguminosae)
