PREFACE

THE NEW PERSPECTIVE ON SECOND TEMPLE JUDAISM AND "CHRISTIAN ORIGINS"

The Dead Sea Scrolls (or Qumran Scrolls) comprise about eight hundred documents. These scrolls are actual leather or papyrus manuscripts that Jews held and read over two thousand years ago. All the Qumran Scrolls were hidden before 68 C.E., and they were discovered between the winter of 1947 (Cave 1) and February 1956 (Cave 11), in eleven caves on the northwestern shores of the Dead Sea.

Conceivably, some of the leather scrolls containing portions of the Hebrew Scriptures may have been read liturgically in the Jerusalem Temple. Many of the Qumran Scrolls were certainly the focus of intense study when the Temple was the center of Jewish worship and sacrifice (note the edges of the rolled *Isaiah Scroll* with stains left by hands of those who held and read aloud from it). Sometimes when I hold a Dead Sea Scroll–or a fragment of one that is all but lost–I pause and try to imagine the Jew who held it before me. What was his life like about two thousand years ago? What were his fears? What were his dreams? Were they so different from my own?

In these three volumes, you will hear from Jews, Roman Catholics, and Protestants. All are eminent scholars and teach in many of the elite universities in the world. From their own independent research, these luminaries in various ways attempt to share with you why they have become convinced that the Dead Sea Scrolls are essential for understanding Second Temple Judaism (i.e., the distinct forms of Judaism we find in Hillel and Jesus) and the emergence of a sect of Jews who would later be labeled "Christians."

This multivolume work entitled *The Bible and the Dead Sea Scrolls* contains the revised lectures presented at Princeton Theological Seminary. These volumes reflect the high level of discoveries and new perceptions that have emerged after fifty years of research focused on the Dead Sea Scrolls. Unless otherwise indicated, all translations are by the contributors, leading experts in editing and translating the Dead Sea Scrolls.

It has been a pleasure editing the manuscripts and correcting the proofs of each volume. I need to thank many individuals for making the symposium in Princeton possible and for the celebrations of the Jubilee Year of discovering the ancient Jewish scrolls from Cave 1. Almost all of the contributors to these volumes were also participants in the symposium held at Princeton Theological Seminary in the fall of 1997, and they have worked with me and the editors at Baylor University Press to update their chapters. They came to Princeton from throughout the United States, as well as from Canada, England, Ethiopia, Finland, France, Germany, Israel, Italy, the Netherlands, Norway, Spain, and Sweden. The presentations were superb, and these published chapters reflect what we had hoped: an authoritative statement of the various ways the Dead Sea Scrolls have helped us better understand both the documents in the Bible and the world in which they were composed, transmitted, studied, and expanded (edited). I wish to thank each of the participants for their cordiality and cooperation. We all have sacrificed much so that the three volumes in this work will be as definitive a statement of current research as the present state of scholarship may allow. This work is conceived and edited with students and nonspecialists in mind.

Numerous individuals and organizations funded both the symposium and the publication of the volumes. Major grants were received from the Luce Foundation, the Edith C. Blum Foundation, the Xerox Foundation, the Foundation on Christian Origins, and especially Princeton Theological Seminary. On behalf of all those who enjoyed the symposium and you who will read the proceedings, I wish to thank especially Hank Luce, Wilbur and Frances Friedman, Dean James Armstrong, all my colleagues in the Biblical Department, and President Thomas Gillespie. Additional grants and funding came from the Foundation for Biblical Archaeology, the PTS Biblical Department, the Jerusalem Historical Society, and private individuals who wish to remain anonymous. I am grateful to Irvin J. Borowsky and to the American Interfaith Institute and the World Alliance of Interfaith Organizations for permission to republish, in a revised form, some sections of my introduction to *The Dead Sea Scrolls: Rule of the Community–Photographic Multi-Language Edition.* To these organizations–and especially to the philanthropists and friends–I extend, on behalf of all those involved in this venture, our deepest gratitude Without the cooperative assistance of dedicated individuals–men and women, Jews and Christians–the appearance of these volumes would have been impossible.

The collection opens with a general survey of the controversy over the Dead Sea Scrolls and with an assessment of how these scrolls have impacted biblical studies. These volumes serve as more than an invaluable reference work. They are also an invitation to enter the world in which the biblical documents were shaped. They challenge us to rethink our origins and contemplate what makes us men and women of integrity and hope.

Our Western world has betrayed its origins and lost the meaning of culture. We live amidst the most biblically illiterate generation in modern times. By returning to our shared origins, perhaps we may again, correctly find our way to a better future.

Surely the future of biblical studies is bright since it is no longer controlled by dogmatism; it is now possible to ask questions to which we do not yet have answers and to pursue open and free questioning without fear of adverse judgments. Biblical research is promising because it is not only about antiquity; it also primarily entails wrestling with the perennial questions of human existence. In the Dead Sea Scrolls we encounter some perceptions obtained long ago that we have recovered only in relatively modern times (like the facts on the moon receiving its light from the sun and the flow of blood in the cardiovascular system) and perhaps some insights that we have not yet again obtained or comprehended.

The chapters in these volumes are grounded in reality, since archaeologists have opened up for us some of the world that helped to produce our emerging global culture. Thus, in Qumran, Jericho, Jerusalem, and elsewhere, we can enter the homes the ancients entered, walk on the roads they once walked upon, and touch the vessels they frequently touched. And some of those who passed that way are none other than such geniuses as Abraham, Rachel, Rebecca, Moses, Jacob, Rahab, Deborah, David, Solomon, Isaiah, Jeremiah, Ezra, Judas Maccabaeus, the "Righteous Teacher," Hillel, "Sitis," "Shael," Jesus, Mary, Gamaliel, Peter, James, Paul, and Johanan ben Zakkai.

We often hear about "the People of the Book;" but we also need to think about "the Book of the People," as S. Talmon suggested to me privately. What does that mean? It denotes that the Bible–the Hebrew Bible or Old Testament (cherished by Jews and Christians)–has been shaped by worship, study, and especially by the editing of those who lived in the Holy Land and the Levant. For example, the book of Isaiah seems to preserve traditions that represent thoughts expressed in the eighth, sixth, and perhaps fourth centuries B.C.E.

The authors of the Bible help us understand their record of the revelation of our Maker's will; and they help us comprehend what living according to God's will really means. They provide guidelines for thought and action, suggesting what true freedom entails. Our inherited and common values, so in need of reaffirmation, did not begin with the

Magna Carta. The first magna carta was evident when the prophet Nathan told David a parable. In this story the first great king in our common history confronted moral standards that condemned his own adulterous affair with Bathsheba. Then, David openly confessed his sin to Nathan (2 Sam. 11–12).

The first volume in this trilogy is focused on *Scripture and the Scrolls*. Central to this volume is the search for ways to improve, understand, translate, and explain the Hebrew and Aramaic documents collected into a canon that was closed after the destruction of Qumran in 68 C.E. The canon is, of course, entitled "the Hebrew Bible" or "the Old Testament." The authors of the chapters in volume 1 explain how and why some of the biblical texts found in the eleven caves near Qumran either help us correct the text of the Bible or prove that the texts have been faithfully copied for over two thousand years. Other scholars explain the shaping of the collection, especially the Davidic Psalter.

Three scientists working at the Xerox Corporation and the Rochester Institute of Technology in Rochester, New York, explain and demonstrate visually how new scientific methods, especially digital imaging, make it possible to see–and thus read–some consonants on leather over two thousand years old. Sometimes, prior to their scientific endeavors, some pieces of leather did not appear to have writing.

More than one specialist advances a new perspective that allows us to think about the biblical tradition and the "Rewritten Bible." One scholar helps us understand the biblical concept of war and warfare. Another expert on the Dead Sea Scrolls helps us understand the relation between the erudite Jews who composed the books of *Enoch* and the priests who authored some of the Dead Sea Scrolls.

In these three volumes, the scholars participating in this Jubilee celebration show that the Dead Sea Scrolls are no longer to be branded as representing the eccentric ideas of a distant insignificant sect of Jews living far from Jerusalem in the desert. Specialists have all moved far beyond that tendency that often characterized the period of research from 1947 to 1970 (see Jörg Frey's contribution in vol. 3, ch. 16). Most of the scrolls found among the Dead Sea Scrolls represent the views of Jews other than the Qumranites. The latter group of Jews lived for about three centuries on the northwestern shores of the Dead Sea. In essence, the Qumran Library is a depository of viewpoints from numerous Jewish groups; all the Scrolls (except the Copper Scroll) antedate the burning of the Temple in 70 C.E.

The second volume in this work focuses on *The Dead Sea Scrolls and the Qumran Community*. Collectively the Qumranologists show that there was not just one theology at Qumran; there were many theologies, reflecting a creative and intellectually alive Community.

Most importantly, the Dead Sea Scrolls reveal to us a world quite different from what our grandfathers, and in many cases, different from what our fathers imagined or assumed about the Judaism of the time of Hillel and Jesus. The world of Early Judaism was impregnated with ideas from Persia, Egypt, Greece, Rome, and even from other advanced cultures. The Temple, and its sacrificial cult, was the destiny of almost all devout Jews. Some of the early Jewish texts celebrate the grandeur and importance of Jerusalem and the Temple. This city was the navel of the earth for most Jews (esp. the author of *Jubilees*), as Delphi was for many Greeks.

The documents composed at Qumran reveal a Jewish community with high social barriers. The most important documents composed and expanded within the Qumran Community are the *Rule of the Community*, the *Thanksgiving Hymns*, the *Pesharim*, and the *War Scroll*. Inside the Community were the predestined "Sons of Light," who would inherit perpetual (or eternal) life and God's blessings. Outside the Community were the damned "Sons of Darkness." The Community was in the wilderness to prepare the "way of YHWH"; thus, the interpretation of Isaiah 40:3 was fundamental for the Qumranites' self-understanding. Time was crucial for them; God's promises and will, preserved especially in the prophets, had been revealed to only one person: the Righteous Teacher, the great mind behind Qumran thought. The pesharim–the Qumran biblical commentaries–reveal the Qumranite interpretation of Scripture. These sectarian Jews claimed that their interpretation of Scripture was infallible, thanks to God's special revelation to and through the Righteous Teacher, their own perfect knowledge, and the guidance of the Holy Spirit from God. Unlike the unfaithful priests now in control of the Temple cult in Jerusalem, these Jews–most of whom were "sons of Aaron" or "Levites"–knew and followed the solar calendar, as observed by angels and archangels.

The final and third volume is focused on *The Scrolls and Christian Origins*. Numerous scholars discuss the first century C.E.–a pivotal period in our culture–from John the Baptizer and Jesus of Nazareth in the twenties to the author of Revelation in the nineties. The contributors to this third volume indicate how and in what ways the ideas found in the Dead Sea Scrolls may have influenced the thinking of many first-century Jews, including John the Baptizer, Jesus, Paul, and others. Cumulatively, these experts reveal the new view of the emergence of "Christianity": what became known as "Christianity" was once a group, or sect, within Second Temple Judaism.

Jesus and his followers made the required pilgrimages to Jerusalem, which they knew as the "Holy City." They came to this metropolis to celebrate Passover, Pentecost, and Booths. According to the Gospel of John (10:22–39), Jesus celebrated Hanukkah. The Evangelists record many debates between Jesus and other Jewish groups, especially the Pharisees and Sadducees; often only the Dead Sea Scrolls clarify the reason why such debates were crucial among first-century Jews.

During the first decades of the twentieth century there was a consensus among many New Testament experts that Christianity had been indelibly shaped by Persian, Greek, and Roman mystery religions. The third volume seems to indicate the emergence of a new consensus: the Palestinian Jesus Movement was a part of Second Temple Judaism, and "Christianity" was once Jewish in every conceivable way. Long before the emergence of the Qumran Community, Greek thought and myths had influenced early Jewish thought (cf. the images on the *bullae* of the *Samaritan Papyri* that are self-dated to the end of the fourth century B.C.E.).

There is more than this broad perspective that is a consensus. The Dead Sea Scrolls help us to understand more fully the language and the symbolism, and sometimes the technical terms, found in Paul's letters and in the intracanonical Gospels. With only a few exceptions, the emphasis falls on the indirect ways the Dead Sea Scrolls help us understand these writings that were collected much later into a codex that would be known as "the New Testament." Now, thanks to the recovery of the Dead Sea Scrolls, we know much better the context of the apocryphal Jewish texts and of the documents preserved within the New Testament.

Sometimes more than a general Jewish context appears before our eyes. For example, it is not so much the issue of how Jesus, the Fourth Evangelist, or Paul may have been influenced by the ideas in the Dead Sea Scrolls. It is the ways that the scrolls help us understand what Jesus, the Fourth Evangelist, or Paul was trying to claim and why he was employing such an argument. Sometimes we see for the first time, or at least far more clearly, why Paul used the term "works of the law" in Galatians. The study of all the Gospels, especially the Gospel of John, has been significantly enriched by the study of the Dead Sea Scrolls. The intracanonical Gospels may have been composed in Greek, but they are not to be categorized as Greek compositions.

Numerous thoughts reappear in the chapters in volume 3. One perception unites them: John the Baptizer, Jesus, and Paul were Jews. They were also devout Jews. They were committed to the sacredness of Scripture. They claimed to have experienced the presence of God;

clearly, they learned about God's will for his creatures by studying Torah. Thus, as my colleague Donald H. Juel wisely pointed out in his contribution to the third volume, it is now misleading to talk about "Christians" in the first century C.E.

In these three volumes, we are witnessing a team of world-class scholars announcing a "paradigm shift" in the study of Early Judaism (or Second Temple Judaism), Jesus, his followers, and the world in which "Christianity" was born and was nurtured. We should not claim that Judaism and "Christianity" are separate entities in the first century by imagining the former being the crucible for the latter; a crucible is distinct and separate from what takes shape within it.

During Jesus' life and for decades after his crucifixion, the Palestinian Jesus Movement was a sect within Early Judaism. For almost a century "Christianity" developed as a part of Second Temple Judaism. This claim and perspective is a consensus that appears in these volumes.

In a deep sense, Christian theology will always be fundamentally Jewish. One should not declare that historical research discloses a "parting of the ways." If the heart of the Christian confession is that the one and only God raised his Son from the dead to eternal life, then each aspect of this confession–a continuing Creator, divine sonship, and resurrection–is now known to have been present in Second Temple Judaism. The concept of one creating God who acts within history and who loves his creatures is Jewish; this concept is significantly advanced in the Dead Sea Scrolls. In fact, the author of the *Rule of the Community* seems to claim that "He (God) is (now) creating the human for dominion of the world" (1QS 3).

Divine sonship is found in many religions, especially during the Hellenistic and Roman periods. Alexander the Great, for example, was celebrated as "the son of god." The mythical Asclepius was hailed as "the son of Apollo" by many, especially Aristides (*Oratio* 42.4) and Tertullian ("*Apollinis filius*"), although Tertullian called him a "bastard" because he was "uncertain who his father was" (*Nat.* 2.10, 14).

The concept of divine sonship is also fundamentally Jewish. It is found in Hebrew Scriptures, especially in Psalm 2, and is significantly advanced in Second Temple Judaism and later texts (e.g., God called Hanina "my son," according to *b. Ber.* 17b). In contrast to the Greek and Roman myths, which hail a miraculous birth as proof of being God's son, the Jews thought about the Creator adopting one as "the Son." One Qumran Scroll, *An Aramaic Apocalypse* (4Q246), refers not only to the "son of God," but also to the "son of the Most High"; and these titles most likely refer to angels. An evangelist did not create these terms (as some have surmised or claimed); Luke, for example, inherited ideas and terms from the Greek and Roman World and also from Second Temple Judaism. Now it is clear that Luke may have been influenced by Jewish concepts and terms when he has Gabriel tell Mary that Jesus will be called "the Son of God" (1:35) and "the Son of the Most High" (1:32).

The Jews may have created the belief in the resurrection of the dead to a new eternal life; at least, they refined it. Jesus and his disciples inherited the development of this concept. The concept of resurrection is found in manuscripts recovered from the Qumran caves. One of the Dead Sea Scrolls is now called *On Resurrection* (4Q521). Thus, it becomes obvious that when members of the Palestinian Jesus Movement claimed that God had raised his Son from the dead, they were using terms developed within Second Temple Judaism and comprehensible to Jews living in Jerusalem before 70 C.E.

Moreover, the concept of time assumed by the fundamental Christian confession is quintessentially Jewish: to claim that God raised his Son, Jesus, from the dead is an eschatological belief. Reflections on "the latter days" are encapsulated in a unique way in the Dead Sea Scrolls: time is linear (it is moving in a straight line to God's chosen end). For the Qumranites, time more than place is the medium of revelation. Time is both linear and pregnant. The future blessed day is rapidly dawning in the present world, especially within the world of Qumran and the world of those within the Palestinian Jesus Movement.

Much of the history of Jesus' time is shrouded in a thick fog that hinders our view. The Dead Sea Scrolls help us push away some of the fog from before our eyes. We may still look, as it were, on images cast on a cave's wall by a flickering fire, but the images are often rounding into meaningful shape.

These scrolls contain terms often thought unique to the New Testament, and so they help us comprehend such terms as "Messiah," "Son," "Sons of Light," "Sons of Darkness," "the Holy Spirit," "the Spirit of Truth," "Melchizedek," "the Poor Ones," "day of judgment," "day of vengeance," "congregation," "community," "oneness," "the end time," and the "Perfect Ones." In some ways, the mystic personages of the New Testament story are becoming more recognizable, and sometimes even more understandable, thanks to reflections on and research dedicated to the Dead Sea Scrolls.

What have these international experts allowed and helped many to see? It is nothing less than a clarified view of the various ways the Dead Sea Scrolls help us better understand the world in which the Righteous Teacher, Hillel, and Jesus lived and the world in which "Christianity" began to take definitive shape. There should now not be any doubt that Jesus should be studied "within" Judaism and that the Palestinian Jesus Movement (once called "the early church") was a group (or sect) that was part of Second Temple Judaism (or Early Judaism). Hence, "Christianity" developed within and evolved out of Early Judaism.

In summation, research on the Dead Sea Scrolls has sensationally enriched our understanding of the Hebrew Bible (and enabled us to improve our primary texts), the Judaism of Hillel and Jesus, and the complex creativity of Second Temple Judaism from Dan to Beersheba. Dead Sea Scrolls research has especially clarified our view of Judaism in ancient Israel before the burning of the Temple by the Roman legions in 70 C.E., just two years after they destroyed Qumran. All those who have endeavored to polish their work for these volumes will surely join with me in hoping that these discoveries and perspectives will help pave the way for a third millennium less corrupt and more livable than the twentieth century, with its barbed-wire boundaries, genocides, Holocaust, and atomic bombs.

INTRODUCTION

THE DEAD SEA SCROLLS: THEIR DISCOVERY AND CHALLENGE TO BIBLICAL STUDIES

James H. Charlesworth

Origins are fundamental. We are each what we have become because of the way we began both genetically and socially. Often our choices are dictated because of our beginnings, even though we may be only tacitly aware (if at all) of that dimension of our lives.

Readily, we comprehend that we will never know where we are and where we seem to be going until we glance back at our past, examining our paths and perceiving our origins. That axiom pertains to all of us both as individuals and also as a society. The main reason the Dead Sea Scrolls seem to fascinate so many is because they throw a rare illuminating light on the origins of our culture and the faith of Jews and Christians today. Indeed, recent examination of the Qumran Scrolls, in the judgment of a growing number of specialists, helps us comprehend in significant ways both the beginnings of rabbinic Judaism and also the origins of Christianity. On the one hand, we recognize that previous reconstructions of pre-70 C.E. Judaism are inaccurate. On the other hand, we are only now able to synthesize the knowledge obtained from Qumran research and the study of the Apocrypha and Pseudepigrapha, as well as from the vast data obtained from archaeological research, in a more informed attempt to represent the world of the time of Hillel and Jesus.

Origins, unfortunately, are also shrouded by opaqueness. Often they are hidden behind the mists–complex and changing–that cover not only time but also place, which are complex and changing. For example, it is well known that Muhammed Ed-Dib discovered the first cave fifty years ago in 1947. But who is (or was) he? In March of 1997, the *ACOR Newzette* reported that he had "died two years ago." Over three months after this obituary, however, I was introduced to an Arab who claimed to be Muhammed Ed-Dib. He explained how he threw a rock into a cave and became frightened when it echoed back after careening off pottery. He was afraid because jinn, desert demons, might be dwelling in the cave. He also knew about a cave that he found, but Jordanian soldiers shot at him and drove him away. That date would have to be before 1966, and he never went back. He even took me to the cave, and I found first-century pottery shards on the surface. To my knowledge, it has never been fully excavated by scholars. It is near Ain Feshka, where the Qumranites most likely kept their flocks by its spring and freshwater pools, only a short distance south of Qumran. Numerous Qumran specialists in Jerusalem are convinced that this old suntanned Arab is Muhammed Ed-Dib. I wonder, did I meet him in July 1997, or is the name Muhammed Ed-Dib simply a generic way some Arabs refer to those who found scrolls in caves near Qumran? Such thoughts leave us pondering the subjunctive in historiography and the accidental behind the lucky acquisition of some *realia* and writings.

If we cannot reconstruct one event that happened merely fifty years ago, in the lifetime of many of us, how can we expect again to construct conceptually a whole world that existed two thousand years ago? It is difficult and precarious to piece together leftover data in the attempt to reconstruct pre-70 phenomena in the Holy Land. Yet, virtually all of us agree that understanding our Scriptures presupposes comprehending texts within contexts. Otherwise, the texts might remain meaningless.

A sacred text without the benefit of historiography may be re-created subjectively according to the whims of a Davidian, of a member of the group that wanted a gateway to heaven, or of a distinguished professor in a celebrated institution of higher learning. No object–not even a scroll–comes already interpreted. To understand the Qumran Scrolls demands training in Qumranology: the philology, historiography, and theologies represented by these hundreds of texts. The expertise of the scholar must be in the historical area being considered. Erudition must be supplemented with perspicacity. History finally begins to emerge for comprehension when such focused research is enriched by informed historical imagination.

These caveats help set the focus of this introductory chapter. I do not propose to present a putative consensus regarding "the Dead Sea Scrolls," which is the name that has become popular to describe the hundreds of scrolls found to the west of the northwestern end of the Dead Sea in eleven caves, beginning with Cave 1 in 1947. To declare that there might be a consensus could be disastrous: First, it might not be judged accurate and thus stir up a proverbial hornet's nest among the esteemed colleagues contributing to this collection. Second, if the assessment of a consensus were precise and accurate, it might not be productive but merely encourage some scholars to gain notoriety by seeking to disprove parts of it.

Is a consensus on Qumran issues impossible? In my judgment there is more consensus and agreement on all the basic issues in the field of

Qumran studies than in many areas of biblical research. Dead Sea Scrolls research has moved into an era in which the best scholars–certainly all present in the Princeton Jubilee Symposium–use the same methodology and agree on the basic issues. Thus, there is more consensus in Qumran research than, for example, in the study of Isaiah or the Gospel of John. With regard to these two canonical books, one cannot represent a consensus while conservative scholars still tend to see each as a unity, rather than each as a product of more than one stage of writing. Some conservative scholars even affirm the unthinkable in the minds of most professors: they clearly advocate that Isaiah, all of it, comes from Isaiah, and that the Gospel of John, sometimes even including 7:53–8:11 (the pericope concerning the adulteress), derives directly from the hand of the Apostle John, the son of Zebedee. There is more agreement among Qumran experts than among those who have been publishing commentaries and monographs on Isaiah and the Gospel of John.

Far from declaring or clarifying a consensus, I wish now only to discuss some basic agreements that have been emerging over the last fifty years and more. It is certainly obvious that we all recognize how the Dead Sea Scrolls have enriched our understanding of the ideas and theologies in the Hebrew Scriptures (the Old Testament) and the New Testament. We all readily admit that the Dead Sea Scrolls are sensationally important and that they have caused a paradigm shift in understanding Early Judaism and the origins of Christianity. Most of us involved in the present symposium would also agree that the shift in understanding Scriptures has been monumental and unprecedented–and the scholars contributing to the present set of volumes represent the best research and teaching now regnant in their home countries: Canada, England, Ethiopia, Finland, France, Germany, Israel, Italy, the Netherlands, Norway, Spain, Sweden, and the United States.

Qumranology, like archaeology, has become so complex that most academic disciplines have been employed in seeking to obtain information and insights. Among the most important academic methodologies now included in Qumranology are paleography, philology, historiography, sociology, DNA analysis, digital as well as computer enhancement, thermoluminescence, and AMS C-14 technology. Qumranologists, as primarily philologists and historiographers, benefit from discussions with topography experts, anthropologists, and sociologists.[1] Together, as a team of experts dedicated to seeking a better way to reconstruct the world of Second Temple Judaism, we may continue the Herculean task of clarifying the origin and development of the Qumran Community and its place within its world.

---

[1] For further discussion, see James H. Charlesworth, "The Dead Sea Scrolls and Scientific Methodologies," in *Proceedings of the OSA/IS&T Conference on Optics and Imaging in the Information Age* (Rochester, NY, October 20–24, 1996) (ed. Society for Imaging Science and Technology; Springfield, VA: Society for Imaging Science and Technology, 1997), 266–74.

DISCOVERY AND CONTROVERSY

The Dead Sea Scrolls can be sensational. That is obvious. The tabloids and yellow journalists have clarified that fact. Dead Sea Scroll jokes have appeared in magazines, including *The New Yorker*. But why? In universities, churches, synagogues, and seminaries, seventy may attend a lecture on "Jesus," but over two thousand will break all commitments in the rush to hear a lecture on "Jesus and the Dead Sea Scrolls." Why do so many imagine that the Dead Sea Scrolls are exciting and important?

Is it because of the wild claims made about these writings? Is it because the Dead Sea Scrolls became a household name, beginning with Edmund Wilson's publications in the fifties? Surely, the answer involves something more. It entails pondering the meaning of what preceded the popularizing of the scrolls. It has to do with a Western imagination that is sparked by tales of Arabs gliding over and around rocks in a desert land, searching for buried treasures in hidden caves. It has to do with the fascination many have with Scripture, and our unending search for what is trustworthy in a record of God's revelation. Far more people than scholars search to understand within Scripture a sound of God's voice addressed to our own time.

Qumran fever, if that term is still appropriate, has to do with the freedom now being experienced, for most Christians and Jews for the first time in history. Many now feel free to query sacred traditions and to find out for themselves what might be the meaning of life. Finally, the Dead Sea Scrolls' sensational character evolves from the recognition that an ancient library has been found. And it belonged to Jews.

These Jews were neither insignificant nor living only on the fringes of Second Temple culture, as some like G. Stemberger claim.[2] Many of the

---

[2] Günter Stemberger wrote that "the Essenes," although "stimulated by discoveries made during the last few decades…were a rather radical, marginal group" (1). He even calls this position a "fact." See his *Jewish Contemporaries of Jesus: Pharisees, Sadducees, Essenes* (trans. Allan W. Mahnke; Minneapolis: Fortress, 1995). A far more accurate and representative weighing of present scholarly views, and also of the ancient data, is Anthony J. Saldarini's report that the Qumran Community, the conservative Essenes, "were part of Jewish society and quite likely had a political impact.

Qumranites were priests; in the scrolls some of these men are “the Sons of Aaron,” and others are “Levites.” The Qumranites who hid the scrolls lived during the time of the two great teachers, Hillel and Jesus. And the library was found not only in a desert, but also in the Land–the Holy Land. To these observations we add that this library bears witness to hundreds of writings unknown before 1947, that most of the documents were known and probably influential in many parts of ancient Palestine, and that most of them were deemed sacred by the Jews who read and hid them. Thereby we begin to grasp why the Dead Sea Scrolls are rightly judged to be sensationally important. Let us now turn to comprehending some particulars in this evaluation.

A scandal has been far too rampant for decades. It may be summarized in four points that I have heard in different parts of the world. First, the Dead Sea Scrolls were discovered in 1947. Second, they were given to Christian scholars to publish. Third, they have not all been published. Fourth, it must follow, therefore, that these Christian scholars came to realize that the Dead Sea Scrolls disprove the essential beliefs of Christianity. So mixed, this brew has poisoned the minds of far too many. The myth, and the general conspiracy theory behind it, even helped popularize Dan Brown’s book entitled *The Da Vinci Code*. Too many readers miss the subtitle: *A Novel.*

What are the facts? First, Cave 1 was found over fifty years ago, and it contained Hebrew and Aramaic writings that have been labeled “Dead Sea Scrolls.” Second, they have been given to Christians and Jews to publish. Third, all the full scrolls and those that are preserved in large pieces have been published. More than six hundred documents have been published so far. Fourth, many of the documents hidden in this ancient Jewish library are not extant in the approximately one hundred thousand fragments that are now mixed together; that is, what was hidden in the first century must not be equated with what was found in the twentieth century. Putting together over six hundred documents that were previously unknown and are preserved only in tiny, intermixed fragments is a Herculean task. Frequently, the script is so difficult to read that text experts need the assistance of image experts to provide them with a visible script.

They were not completely cut off from Jewish society since the area was inhabited, contained defensive installations and presumably paid taxes to the Hasmoneans and Romans” (5). See Anthony J. Saldarini, *Pharisees, Scribes, and Sadducees in Palestinian Society* (Edinburgh: T & T Clark, 1989). It is surprising to see that Stemberger disparages the Essenes and then includes them in his study, while Saldarini sees their importance but does not include them in his sociological analysis and synthesis.

Finally, it is misleading to report that the Dead Sea Scrolls were discovered in 1947. The eleven caves in which writings were recovered were found between 1947 and 1956. In 2003 and 2004 I saw fragments or images of over thirty previously unknown scrolls. The fragments contain: portions of Daniel (at least three separate pieces); a portion of the *Temple Scroll*; the beginning of the *Genesis Apocryphon*; a section of the *Rule of the Community*; a portion of the *Rule of the Congregation*; copies of Leviticus, Exodus, Isaiah, and Judges; fragments from the beginning of *1 Enoch*; and numerous unidentified fragments. Almost all these fragments are unknown to Qumran experts. Since scholars cannot publish what is not available to them and fragments continue to appear from private collections, it seems to follow that "the discovery" of the Dead Sea Scrolls continues into the future.

These facts disprove the claim that the Dead Sea Scrolls were not published by Christian scholars because they learned the ideas in them were damaging to Christian faith. It is because of the dedication of Christian scholars, like de Vaux, Benoit, Cross, Stendahl, and Burrows that the Dead Sea Scrolls have been published. While many ideas in the Scrolls challenge some of the perceptions of Greeks in the early Councils, they also deepen the faith of many who have worked on them.

A MORE ACCURATE PERCEPTION OF EARLY JUDAISM

The discovery of the Dead Sea Scrolls caused a revolution in the study of what had been called "intertestamental Judaism." Since 1947, scholars slowly and sometimes grudgingly admitted that the old portrait of a monolithic and orthodox Judaism before the destruction of Jerusalem in 70 C.E. was inaccurate. There is a wide agreement among experts today that it is misleading to describe pre-70 Judaism based on the reports found in the New Testament, Josephus, and rabbinic sources. Each of these ancient collections of documents postdate 70 C.E. and tend to be shaped by later social needs. This factor is poignantly evident in the meaning of three critical words. Two are Greek (ἀποσύναγωγος and αἵρεσεις) and one is Hebrew (סיג).

First, according to the Gospel of John, some Jews were afraid to confess who Jesus was because of fear that they would be cast out of the synagogue (9:22; 12:42; 16:2). The Greek word for "(casting) out of the synagogue," ἀποσύναγωγος, mirrors the breaking up of one great and diverse religion, Second Temple Judaism, into rabbinic Jews and Christian

Jews; that is to say, essentially the followers of Hillel and the followers of Jesus. Christian Jews in the community or school that gave definite shape to the Gospel of John were apparently being cast out of the local synagogue. They could no longer worship with fellow Jews. It is evident not only that some Jews in the Johannine community or school were being denied permission to worship in the synagogue; it is also clear that they wanted to remain faithful to the sacred liturgies that had shaped their former lives and to continue worshiping with other Jews in the local synagogue. This one word, ἀποσύναγωγος, becomes a window through which to see ostracism becoming a schism between those who followed Jesus and those who followed Hillel as well as other Pharisaic-like rabbis. As the Gospel of John attests, the cost to follow Jesus and confess him christologically (perhaps as God) was high.

Second, Josephus reported that there were "three sects (or schools of thought) among the Jews" (*Ant.* 13.171). Here the meaning of αἵρεσεις was understood by earlier historians of first-century Judaism to mean that Josephus adequately represented Judaism by three "sects": Pharisees, Sadducees, and Essenes. Today, most of us question the use of this Greek term to denote "sects." We also generally agree that there were more than three main schools of thought among the Jews in ancient Palestine. Today, we all admit this schematization is anachronistic and systematically excludes such major groups as the Samaritans, Zealots, Sicarii, Baptist groups, Enoch groups, the Jewish magical groups, the Boethusians, scribal groups, Galilean miracle-workers, Roman quislings, and many others who claimed to be faithful Torah-abiding Jews. It also excludes the group from the first century that eventually became most powerful: the Palestinian Jesus Movement.

Third, according to the Mishnah, we learn that "the Men of the Great Assembly" demanded that all Jews "be cautious in judgment, cause many disciples to stand and make a fence for the Torah (ועשׂו סיג לתורה)." That odd expression literally means "to make a fence for the Torah" (*m. ʾAbot* 1:1). In the *Sayings of the Fathers*, the Hebrew word סיג, meaning "fence," was too often understood to indicate that Judaism was cut off from Greek, Roman, and Persian influences. It is now obvious that Jews who lived during the Second Temple period were creatively stimulated by interchanges of ideas and perceptions with many, especially Greeks, Romans, and Persians. Even so, much more research needs to be devoted to discerning the transferring of ideas from one culture to another, through armies, the flow of pilgrims to Jerusalem, and the caravans that linked East with West, carrying spices, silk, jewels, and other commodities.

As it passed from East to West, the caravan social group, often consisting of two hundred camels, had to pass through the land of the Bible. Along with commercial goods, the caravan also brought intellectual commodities. The individuals in the caravan conversed with Jews in Capernaum, Beth Shean, Jericho, Jerusalem, and in other cities and towns. In the marketplace was heard talk about Zurvan, Buddha, and other deities. A statue of a Hindu goddess was unearthed at Pompeii, which was covered by volcanic ash from Vesuvius in 79 C.E.; the statue obviously was carried through the land of the Bible probably before the revolt of 66 to 70 C.E.

These three words help clarify the new paradigm emerging regarding pre-70 Jewish society and religion. First, ἀποσύναγωγος in the New Testament clarifies that in the late first century C.E. there was no definite parting of the ways among Jews and Christians, but the process was well underway, at least in the Johannine community. Second, αἵρεσεις in Josephus should not be translated "sect," and it should be interpreted in light of all the extant Jewish writings that antedate 70 C.E.; hence, there were probably over twenty groups within Judaism. Third, סיג in the *Sayings of the Fathers* (*ʾAbot*) does not hinder the observation that Judaism was a religion in Hellenistic culture and thus was influenced, sometimes significantly, by other religions and philosophies of that time.

Prior to the advent of modern Qumran research, the reconstruction of pre-70 Judaism was far too frequently called "*Spätjudentum*," "late Judaism." Often the impression–sometimes inadvertently and at other times not so inadvertently–was conveyed that one religion was dying so that Christianity could be born. Second Temple Judaism was misrepresented as being orthodox, monolithic, and often legalistic. This model is found, *mutatis mutandis*, in a great masterpiece of nineteenth-century biblical scholarship, Emil Schürer's *A History of the Jewish People in the Time of Jesus Christ.* Even the title announces that the goal is not historical scholarship but a work that serves and supports the claims of Christianity.

That old model has been shattered in many areas. Now, thanks to research on the oldest traditions preserved in the New Testament, Josephus, and rabbinic sources, and especially to the insights obtained from reading the Dead Sea Scrolls and related literatures, such as *1 Enoch*, *Jubilees*, the *Psalms of Solomon*, and *4 Ezra*–we know that Judaism must not be depicted with such categories as "orthodox," "monolithic," or "legalistic." These anachronisms also tend to suggest that "late Judaism" had fossilized.

Pre-70 Judaism was creatively alive and impregnated by advances found in all contiguous cultures, Greek, Syrian, Parthian, Nabatean, Egyptian, and Roman. Plato's depiction of a world of meaning above the earth seems to have helped shape Jewish apocalyptic thought. The concept of "the Abode/Isle of the Blessed Ones"–found in Hesiod (*Op.* 159–60), Pindar (*Ol.* 2.68–72), Herodotus (*Hist.* 3.26), Plato (*Phaed.* 109b, 111b, 111c), and Strabo (*Geogr.* 1.1.5; 3.2.13)–has indelibly left its imprint on the *History of the Rechabites*.[3] The *Testament of Abraham* bears reflections of the Egyptian drawings of the weighing of the souls after death, known from hieroglyphic texts and tomb depictions. And the Qumranic form of dualism, indeed the dualistic paradigm most refined in early Jewish thought, found in the *Rule of the Community* 3.13–4.26, was definitely shaped by Zurvanism, which we now know clearly antedates the fifth century B.C.E.

These brief examples must suffice also to make another relevant point. New Testament scholarship today, in contrast to that popular in the 1950s and earlier, is much more like Old Testament research in the sense that New Testament scholars must read more languages than merely Greek and Hebrew; and they must study other cultures besides Early Judaism, including Egyptian, Parthian, Nabatean, Greek, Syrian, and Roman cultures. This paradigm shift again is at least partly due to the study of the Dead Sea Scrolls and the renewed interest in New Testament archaeology. In fact, a Nabatean letter has been discovered among the Dead Sea Scrolls, and a bulla from a seal with a serpent in the Egyptian style has been uncovered recently in Bethsaida.[4]

Formerly, many experts claimed that the Davidic Psalter and its 150 psalms defined Jewish hymns and was the hymnbook of the Second Temple. While the Psalter was the hymnbook of the Temple, many Jewish communities found inspiration and worshipped, chanting or reading aloud from other hymnbooks. It is now clear that Jews continued to compose psalms and attribute them to David, Solomon, Hezekiah, Mannaseh, and others. The Davidic Psalter grew to include not only 150 psalms, as in most Bibles, but more than 151 psalms, as in the Septuagint. The *More Psalms of David* refers to Psalms 151 to 155.

---

[3] For bibliography and a discussion, see James H. Charlesworth, "Greek, Persian, Roman, Syrian, and Egyptian Influences in Early Jewish Theology," in *Hellenica et Judaica: Hommage à Valentin Nikiprowetzky* (ed. André Caquot et al.; Leuven-Paris: Peeters, 1986), 219–43.

[4] See Baruch Brandl's contribution "An Israelite Bulla in Phoenician Style from Bethsaida (et-Tell)," in *Bethsaida: A City by the North Shore of the Sea of Galilee* (ed. R. Arav and R. A. Freund; Bethsaida Excavations Project 1; Kirksville, MO: Thomas Jefferson University Press, 1995), 141–64, esp. 144–46.

New hymnbooks were created. These bear such modern names as the *Thanksgiving Hymns*, the *Angelic Liturgy*, *Daily Prayers*, and the *Psalms of Solomon.* Also, the *Amidah* (*Eighteen Benedictions*) functioned like a hymnbook in synagogues (or places where Jews gathered), and it took its definite shape during the period of Second Temple Judaism. These compositions help us understand not only the poetry but also the liturgical norms of early Palestinian Jews before 70 C.E. They also help us, for example, to understand the origins of the hymns that helped shape the Lucan infancy narrative and the hymns in Paul's letters and the letters attributed to him.

While Judaism before 70 C.E. was certainly not orthodox, there was a central base of authority: the Temple. During the second century B.C.E. and increasingly in the first century C.E., the sacerdotal aristocracy became exceptionally powerful. Why? It was not only because of the centrality of Jerusalem and the Temple in world Jewry; it was also because of the vast resources and pilgrims that poured into the Temple. Power poured into and emanated from the Temple. Moreover, the renovation of the Temple area, and the expansion of the Temple Mount to the west and south, enhanced not only the magnificence of the place but also increased the focus on Jerusalem and especially the Temple.

Sociologically speaking, the Temple was not only the source for some unity within Judaism; it also caused divisions within Jewish society. Samaritans, Qumranites, the Palestinian Jesus Movement, and also many other groups originated and were shaped, in no small degree, by their intermittent (or permanent) opposition to the ruling priests and, of course, the persecution they received from the reigning high priests.

These insights cumulatively give rise to a new perception of the origins of Christianity. It is beyond debate, finally, that Christianity began within Judaism and for decades existed as a Jewish group within Second Temple Judaism (in my assessment it probably can be labeled a sect). Thus, scholars are no longer portraying Christianity as primarily a Greek religion, or a movement defined primarily by Greek thought and language, as was vogue in some seminaries and universities before 1947.

On the one hand, the Palestinian Jesus Movement began as a group or sect within Second Temple Judaism. On the other hand, Greek thought (and that of other cultures) had already shaped, in some ways markedly, the various forms of Judaism that existed before 70 C.E.

What type of Greek do the Gospels represent? While the Gospels were composed in Greek, often under the influence of Aramaic (even perhaps Hebrew) traditions that were literary as well as oral, it is not the Greek of the poor and dispossessed, as A. Deissmann claimed. The authors of the Gospels and other early literature were not forced to use the Greek of the streets, or *koiné* Greek (*pace* Deissmann). Surely, the Greek preserved in the New Testament represents different levels of ability and culture. While the beginning verses in Luke and most of the Greek of Hebrews is cultured Greek, the Greek of Revelation reflects an author who wrote in Greek but was more familiar with Semitics (esp. Aramaic).

Finally, the Bultmannian school tended to think that in the beginning was the sermon, which was based on one *kerygma* (proclamation). Today, many scholars acknowledge the existence of not one *kerygma* but many *kerygmata* (proclamations), even though most early followers of Jesus proclaimed that he was the Messiah, the Son of Man, and the Savior who was crucified by evil men but resurrected by God, and shall return as Judge at the end of time.

Once it was customary to admit, often begrudgingly, that Jesus was a Jew. Now, scholars readily admit that Jesus was a profoundly religious Jew. He obeyed and honored the Torah, and he did not break the Sabbath laws, even though some leading Jews thought he did in terms of their more rigid definition of those laws. Jesus followed the Torah's rules for ritual purity and vehemently resisted the exaggerated extension of the rules for priestly purity to all Jews. He knew that only the extremely wealthy could afford large stone vessels to protect commodities from impurity and to contain the water for the Jewish rites of purification (as noted in John 2:6 and as required, for example, in the *Temple Scroll* col. 50). There is no text suggesting that Jesus, in contrast to those who were systematically raising the standards and rules for purification, probably thought that earthen vessels were inadequate for one's possessions.

Historians have rightly concluded that Jesus revered the Temple, paid the Temple tax, and followed the stipulation in the Torah to make a pilgrimage to the Temple at Passover. He worshiped and taught in the Temple, and his followers, especially Paul and John, as we know from Acts, continued to worship in the Temple. Thus, Jesus appears to have been a devout and observant Jew.[5] Jesus may even have been a very pious Jew, if that is the meaning of "the fringes" or "the tassels" of his garment.[6]

---

[5] This perspective now appears in many publications; see esp. Edward P. Sanders, *Jesus and Judaism* (Philadelphia: Fortress, 1985); James H. Charlesworth, *Jesus within Judaism* (ABRL; New York: Doubleday, 1988); James H. Charlesworth, ed., *Jesus' Jewishness* (New York: Crossroad, 1991); John P. Meier, *A Marginal Jew*, 3 vols. (ABRL; New York: Doubleday, 1991–2001); Edward P. Sanders, *The Historical Figure of Jesus* (New York: Penguin, 1993); David Flusser in collaboration with R. Stevan Notley, *Jesus* (rev. ed.; Jerusalem: Magnes, 1998); Bruce D. Chilton, *Rabbi Jesus* (New York: Doubleday, 2000); and James D. G. Dunn, *Jesus Remembered* (Grand Rapids: Eerdmans, 2003).

[6] This is the argument of Dunn, *Jesus Remembered*, 316–17.

Following the lead of Renan, some good scholars and many crackpots have tended to conclude, perhaps without adequately researching the question, that Christianity evolved out of Essenism (which most likely is the type of Judaism represented in the Dead Sea Scrolls composed at Qumran). That is myopic. Most scholars now admit that Christianity was profoundly influenced not only by Essenism, but also by Pharisaism, the baptism movements, the Enoch groups, the Jewish mystical groups, Samaritanism, and many other aspects of Early Judaism. I side with the majority of experts who have learned to shun the one-idea solution to complex origins.

The Palestinian Jesus Movement was not a form of Hillelite Pharisaism. It was not even a type of Essenism. While similar to many other Jewish groups, it was unique. Only in it is there the claim that a crucified prophet from Galilee is the Messiah, the Son of God, the Savior.

While the preceding conclusions seem dominant in the academy, I do not think there is a consensus regarding the heart of Qumran theology. I, for one, think that we must avoid systematizing Qumran phenomena. There were many competing and conflicting ideas at Qumran, from its founding around 150 B.C.E. (or later) to its demise in 68 C.E. On the one hand, we scholars need to resist the temptation to define Qumran theology narrowly and jettison all documents as non-Qumranic if they do not fit a perceived paradigm. On the other hand, we need to be inclusive of all the documents that clearly or apparently represent Qumran theology and seek to discern how diverse it appears to have been and where there might be cohesive elements, if not a core. At the same time in the Qumran Community, there were probably competing ideas and perceptions, even regarding messianology.

If there were a dominant, or core idea, in the Qumran Community, it was certainly the cosmic dualism that is articulated in the *Rule of the Community* 3–4. This dualism certainly shaped the *War Scroll.* Without doubt, the most distinct Qumran concepts are the perception of a bifurcated humanity–the "Sons of Light," who struggled against the "Sons of Darkness"–and of a bifurcated angelology: the "Spirit of Darkness," who will be ultimately defeated by "the Spirit of Light (cf. 1QS 3.13–15)."

It seems rather obvious that some Qumranites–not only during their lifetimes, but also at the same time–held conceptions that were far from consistent. It is Christianity after 325 C.E. that has misled too many scholars into thinking about an *either-or* mentality. Jews, as we know so clearly from the Mishnah, Tosefta, and the Talmudim, preferred debates within the house in which the norm tended to be a *both-and* perception.

THE IMPACT OF QUMRAN STUDIES ON BIBLICAL RESEARCH

To highlight the importance of the Dead Sea Scrolls for biblical studies and theology, I have chosen to focus on four areas. First is the Hebrew Scriptures. On the one hand, focusing on the Isaiah scrolls found in Cave 1, it is obvious that this text was carefully copied, *mutatis mutandis*,[7] for thousands of years. On the other hand, allowing one's view to include the Qumran versions of the books of Samuel and Jeremiah, it is obvious that more than one ancient version of these books was revered as God's word at Qumran. The result is a renewed interest in the canon and a growing recognition that the Hebrew canon was not closed before or during the time of Jesus. Before 70 C.E., there was, for example, no one finalized collection or ordering of the Psalms in the Davidic Psalter.

Equally exciting are some readings that definitely help us improve both the Hebrew texts and the English translations of the Hebrew Bible or Old Testament. This phenomenon is evident provisionally in both the Revised Standard Version and the New Revised Standard Version of the Bible. The Hebrew text from which all modern translations of the Hebrew Scriptures or Old Testament derive is corrupt in many places. Although it is often difficult to decide which reading is original and which is secondary, scholars agree that at least in two major places the Hebrew text can now be corrected.

First, when we read Gen 4:8 in the extant Hebrew we are left with the question, "What did Cain say to Abel before he killed him?"

The Hebrew when translated means: "And Qayin (Cain) talked with Hevel (Abel) his brother: and it came to pass, when they were in the field, that Qayin rose up against Hevel his brother, and slew him."[8] All we are told is that Cain "talked with" his brother. We are not informed what he said, and yet the abrupt and disjointed sentence leaves the impression that the text apparently told us what had been said. The Qumran library does not provide the answer. The text of Genesis that preserves Genesis 4 (4QGen^{b}) does not preserve what was said.[9]

Other ancient texts do supply what Cain said to Abel. The ancient and most likely original reading is preserved in the Samaritan Pentateuch: "Let us go (into) the field (נלכה השדה)." The Greek translation (Septuagint) also contains the quotation: “And Cain said to Abel his brother, ‘Let us go out into the field’ (or “plain”; Greek: διέλθωμεν εἰς το πεδίον); and it came to pass that when they were in the plain Cain rose up against Abel his brother, and slew him.” The Peshitta has the same reading, and it is probably dependent on the Greek: “And Cain said to Abel his brother, ‘Let us travel into the plain.’” The Targumim and the Old Latin version also preserve the full text. We now know what Cain said to Abel before he murdered him. He said, “Let us go out into the field.”

[7] See the cautions expressed and illustrated by Shemaryahu Talmon in *The World of Qumran from Within* (Jerusalem: Magnes; Leiden: Brill, 1989), esp. 117–30. Also see Emanuel Tov, *Textual Criticism of the Hebrew Bible* (rev. ed.; Minneapolis: Augsburg Fortress, 2001).

[8] *The Holy Scriptures* (Jerusalem, 1988), pp. *g* and 3 [interpolations mine]).

[9] See DJD 12:36–37 (Pls. 6–8).

Second, according to 1 Sam 11:1, we read, “Then Nahash the Ammonite came up, and camped against Yavesh-Gilʾad…”[10] The text seems strange. Who is this Nahash? It is scarcely sufficient to assume he was a “snake,” one meaning of the Hebrew נָחָשׁ. Now, we have a fuller text of this passage, thanks to the Qumran library. A Qumran text of 1 Samuel (4QSam^{a}) reports that Nahash gouged out the right eyes of all the Israelites beyond the Jordan. Textual experts should have no problem with this reading. It rings of authenticity; we know that about this time in history Israel’s enemies did put out the eyes of Israelites. The most famous example pertains to Samson, whose eyes were gouged out by the Philistines (Judg 16:21). The longer reading in 4QSam^{a} also fits the narrative style of the author of 1 Samuel, who frequently describes the character of a person when first mentioned. An ancient scribe erroneously omitted the following words:

> [And Na]hash, king of the Ammonites, sorely oppressed the children of Gad and the children of Reuben, and he gouged out a[ll] their right eyes and struck ter[ror and dread] in Israel. There was not left one among the children of Israel bey[ond Jordan who]se right eye was no[t go]uged out by Naha[sh king] of the children of [A]mmon; except seven thousand men [fled from] the children of Ammon and entered [J]abesh-Gilead. About a month later, [at this point, the medieval Hebrew manuscripts begin 11:1].[11]

This is a large omission in our Bibles. A copying scribe inadvertently missed the words and sentences. The scribe’s error is easily explained by parablepsis (oversight or looking back and forth to a manuscript) facilitated, I imagine, by homoioarcton (two lines with similar beginnings). Thus, it seems that a scribe looked back from his copy to the manuscript he was copying and let his eye return not to the נחשׁ he had just copied but to the same noun two lines farther down the column. Most likely, the scribe had an exemplar that began two lines with the same word, נָחַשׁ. As his eye strayed from one of these to the other, he omitted the intervening lines. Our extant medieval Hebrew manuscripts of 1 Samuel all reflect this error. Moreover, in the Hebrew text upon which all modern translations are based, and even in the *Biblia Hebraica Stuttgartensia*, there are two untranslatable words (ויהי כמחרישׁ) at the end of the preceding verse. It is now obvious that these should be divided so as to produce three words which mean "about a month later" (ויהי כמו חדשׁ). Thanks to the ancient copy of this biblical book found in Cave 4, we can restore not only the text but also all modern translations based upon it. This fuller reading now appears as the text of the NRSV.

---

[10] *The Holy Scriptures*, *slw* and 336.

[11] For the text, translation, and photograph, see Frank M. Cross, “The Ammonite Oppression of the Tribes of Gad and Reuben: Missing Verses from 1 Samuel 11 Found in 4QSamuel^{a},” in *The Hebrew and Greek Texts of Samuel* (ed. Emanuel Tov; Jerusalem: Academon, 1980), 105–19; also, idem, repr. in *History, Historiography and Interpretation: Studiesn in Biblical and Cuneiform Literatures* (ed. H. Tadmor and M. Weinfeld; Jerusalem: Magnes, Hebrew University, 1983), 148–58.

There is something even more exciting about this focused research. Josephus, the Jewish historian of the first century C.E., has quoted the Bible at this point; that is, he quotes what we call 1 Sam 11:1. His quotation is perfectly in line with the Qumran text (*Ant.* 6.5.1). It is likely that after the Roman soldiers captured Jerusalem in 70 C.E., Josephus took a version of the text of Samuel with him to Rome from Jerusalem, and that this version is the one we now know existed before 70 and was known to the Qumranites. It seems obvious that Titus allowed Josephus to take manuscripts from Jerusalem to Rome (cf. *Vita* 416–18).[12] We have clearly seen how the Qumran copies of the Hebrew Scriptures can sometimes help us restore and improve the Hebrew texts.

ARE THE DEAD SEA SCROLLS TO BE ASSIGNED TO THE ESSENES?

This question continues to bother some scholars. The parallels between what Josephus says about the Essenes and what the Qumranites reveal about themselves are so numerous as to lead to only two conclusions. Either the Dead Sea Scrolls represent a group of which we have no report or knowledge of any kind from Philo, Josephus, Pliny, and the other dozens of sources of early Jewish groups and this group is over 90 percent like the Essenes reported by Josephus. Or the Qumranites are Essenes. The latter is the simpler solution. Thus, the Dead Sea Scrolls most likely belonged to a type of Essenes who lived at Qumran.

---

[12] I am indebted to Eugene C. Ulrich for demonstrating this point to me. See his "The Agreement of Josephus with 4QSama," in *The Qumran Text of Samuel and Josephus* (HSM 19; Missoula, MT: Scholars Press, 1978), 165–91.

There is more to be said. Josephus reported that there were two types of Essenes. One type consisted of those who lived on the outskirts of most cities and villages in the Land and married. The other type of Essenes was extremely strict and did not marry. Only the latter group seems to apply to Qumran. Moreover, with each new publication we seem to find additional reasons to equate the Qumranites with the conservative, non-marrying branch of the Essenes.

Having drawn that conclusion, which is held by almost everyone in this symposium, I do wish to raise one caveat. We must not subsequently attribute to Qumranites what is known only from Josephus, and other earlier historians, about the Essenes. This caution is important, and we should also not attribute to Qumran what may have been characteristic of Essenes living in Jerusalem and elsewhere. The *Rule of the Community* is our best guide to what characterized the Qumran form of Essenism.

The *Damascus Document* was found not only in the Cairo Geniza but also in Cave 4 and in numerous manuscripts. It is probably our best key to the life of Essenes who entered the new covenant (cf. esp. CD MS A 8.21; MS B 19.33–34) but did not reside at Qumran or nearby.

In summation, I am impressed by how much Josephus knew about the Essenes and that virtually everything he said about the Essenes fits surprisingly well with what we know from the Dead Sea Scrolls about the Qumranites, not only their daily life, but also their beliefs.

THE SECOND AREA: THE SPIRITUALITY OF THE QUMRAN ESSENES

In the history of philosophy and in the history of philosophical theology, two sectors meet and help explain and articulate perceptions. They are the concepts of place and time. How they relate is also involved in grasping and categorizing each. In the history of philosophy, Plato stands out for stressing that meaning is tied to place; that is to say, the present world is only a mirror of another, distant world. The distant world is the source of categories and meanings; it alone is the "real." The Jewish apocalyptic thinkers also often tended to see meaning in terms of place. The present place is not the source of meaning, although history can be mined for clarification and understanding. Only the far-off heavenly world or the future world is the source of meaning and comfort for Jews defined by apocalyptic concepts. Only the world above or to come is permanent and true, whether it is perceived as distant and eschatological or shockingly close and breaking into the present.

In contrast to some Jews (including some Jews defined by apocalypticism), the Qumran Essenes were defined by where they were. They were in the wilderness preparing the way of YHWH. This place "in the wilderness" is singularly significant because of their understanding of the Voice calling them, both through Scripture (Isa 40:3) and existentially into the wilderness. That is, while many Jews and most Christians have interpreted Isa 40:3 to mean "A voice is calling in the wilderness, 'Prepare the way of Yahweh,'" the Qumranites understood it differently. The Voice had been heard calling them into the wilderness to prepare the way of Yahweh; hence, for the Qumranites the verse meant, "A Voice is calling, 'In the wilderness prepare the way of Yahweh'."[13]

As important as place was for the Qumranites, I am convinced that they placed a greater emphasis upon time. The place was understood in terms of time: the wilderness is the place of purification and preparation for the time that has been hoped for with great expectation and for centuries.[14] The Messiah was in the future but not-too-distant time, as had formerly been the case (although, in order to comprehend the time when the Messiah will arrive, one must look beyond the column and lines in which the coming of the Messiah is mentioned). God is trustworthy and God's promises are valid. The future will prove God to be reliable. For the Qumranites, meaning came from time, from the future, which sometimes broke down as if it were a presently experienced future. The present was pregnant and alive because meaning poured from the future, even if in an exasperating ebb and flow.

Unlike the authors or compilers of traditions in *1 Enoch* and *2 Enoch*, who frequently became preoccupied with journeys through the cosmos, the Qumranites concentrated on rules for admission, advancement, demotion, and expulsion from the Community ("the Eternal Planting"). They were not so much preoccupied with the chanting of angels in the heavens as with chanting thanksgiving to the Creator on earth. Their dream was not for some celestial reward; it was for a crown of glory in God's kingdom on earth, in the end of time and in the age apparently dawning in the present.

---

[13] This idea is developed further in James H. Charlesworth, "Intertextuality: Isaiah 40:3 and the Serek Ha-Yahad," in *The Quest for Context and Meaning: Studies in Biblical Intertextuality in Honor of James A. Sanders* (ed. C. A. Evans and S. Talmon; BibIntS 28; Leiden: Brill, 1997), 197–224.

[14] See Shemaryahu Talmon, "The Desert Motif in the Bible and in Qumran Literature," in *Literary Studies in the Hebrew Bible* (Jerusalem: Magnes, 1993), 216–54, esp. 253.

THE THIRD AREA: PRE-RABBINIC THOUGHT

Biblical scholars know they cannot ignore the Mishnah, the Tosefta, and Talmudim in understanding Jewish life in Palestine before 135 C.E. and even 70 C.E. But how can one use the latter documents when they are so clearly shaped by social and theological concerns that are patently much later? In the last two decades, two especially important insights have been obtained, and these help us answer the question more confidently.

First, *Some Works of Torah* (4QMMT), which clearly antedates the first century B.C.E., preserves some of the rules for living and interpreting scripture.[15] The issue seems not to be whether we can see proto-Sadducean *halakoth* (religious and ethical rules) in this document, which does not seem to be a letter. The real issue is the palpable evidence of rabbinic language, methodology, and thought long before Jamnia, the first rabbinic academy (post-70 C.E.).

Second, it has been customary to separate the rise of Jewish mysticism in antiquity from the mysticism of the seventh and later centuries C.E. Now, we know that the interest in the cosmic halls (*hekaloth*) of the Creator is a pre-Christian phenomenon. Jewish mysticism is obviously evident not only in the *Thanksgiving Hymns* but also, and more obviously, in the *Songs of the Sabbath Sacrifices.*

We should rethink the widespread contention that 70 C.E. was a barrier and a time when religious life ceased in ancient Palestine because sacrifice in the Temple was no longer possible. That may follow from studying Gamala and parts of Jerusalem. Studying the archaeology of Sepphoris and Caesarea Maritima, however, reveals that 70 C.E. was certainly a divide in history, but it was not a barrier for traditions and the continuity of life. The chronological spectrum of Jewish thought from the Maccabees to the Mishnah is not as compartmentalized as we have tended to assume.

THE FOURTH AREA: THE NEW TESTAMENT AND CHRISTIAN ORIGINS

By far, the major breakthroughs in evidence and insight pertain to our revised understanding of the origins of Christianity. Hundreds of monographs have been devoted to this area of research, and now I propose only to provide a glimpse into some broad issues.

---

[15] See James H. Charlesworth et al., eds., *The Dead Sea Scroll: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 3, Damascus Document Fragments, Some Works of Torah, and Related Documents* (PTSDSSP 3; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2005).

As most scholars on the subject have pointed out, John the Baptizer is similar in numerous ways to the Qumranites.[16] Like them, he stressed the importance of Isa 40:3, probably interpreted the verse as they obviously had, and joined them in attempting to prepare in the wilderness the way of YHWH, which probably included the appearance of the Messiah. He was as deeply eschatological as were the Qumranites; and he also stressed the impending day of judgment. He may well have once been a member of the Qumran Community, but he would have rejected their strict concept of predestination, the damnation of most of humanity, and the Qumran injunction to remain separate from others, even the members of one's own family.

If John the Baptizer had once been a member of the Qumran Community, we now can understand why he was in the wilderness. If he was the son of a priest and was in the wilderness until the beginning of his public work, as Luke reported, he might have been attracted to the dedicated priests living in the wilderness and at Qumran. If he had once been a Qumranite, we can now understand why he apparently refused to accept food or clothing from others, since Qumranites vowed to God that they would not accept food or clothing from others. As we find John portrayed in the Gospels, eating only honey and wild locusts and wearing only the skins of animals, he would have kept inviolate his vows made to God while a member, or perhaps only a prospective member, of the Qumran Community.

Popular books from the 1950s to the 1990s claim that Jesus was the Righteous Teacher of Qumran. Most scholars regard such books as simply crackpot literature, and some sensationalists are clearly more interested in becoming rich and prominent than in searching for truthful answers. There is abundant evidence to suggest that Jesus was neither an Essene nor markedly influenced by Qumran ideas. But that conclusion does not mean he never met an Essene. He knew about them and may well have spoken with Essenes daily.

Jesus shared with Essenes the same basic perspective: only God is Lord, and God deserves our total commitment. Jesus, and the Essenes, believed that time was pregnant with meaning because God was moving again decisively to act and soon on behalf of God's nation. Jesus, like the

---

[16] See James H. Charlesworth, "John the Baptizer, Jesus, and the Essenes," in *Caves of Enlightenment* (ed. James H. Charlesworth; North Richland Hills, TX: BIBAL Press, 1998), 75–103. Also, see ch. 1 in vol. 3 in the present work.

Essenes, perceived that the cosmos was shattered by a struggle between evil and good angels. He, like them, contended that a judgment day for the righteous and unrighteous was not far off. Thus, like the Qumranites and Essenes, Jesus placed emphasis on time and not place.

As we think about the Righteous Teacher and the importance of being informed of what sociologists and anthropologists have discovered about social groups and prominent figures, Jesus is best described as a charismatic who was apocalyptically influenced and fundamentally eschatological in his teaching about the dawn of God's rule.[17] He was an itinerant prophet who had powers to perform miracles and who, like the Essenes and Qumranites, opposed the Jerusalem-based sacerdotal aristocracy and their self-professed monopoly on spirituality and the meaning of purity.

According to both Luke and John, Jesus did use the term "sons of light." If he did, then he most likely used it to refer to Essenes, who may have coined that term and certainly made it their own peculiar way of referring to themselves. He most likely spoke against their elevation of Sabbath laws over the basic morality of the Torah.

Jesus must have known about some of the writings of the Essenes or at least some of their peculiar traditions. When he asked who would leave an animal in a pit, dying, on the Sabbath, he most likely spoke directly against an Essene teaching found in the *Damascus Document.* Perhaps it may be helpful to illustrate this point. According to Matt 12:11, Jesus said, "What person among you, if he has a sheep and it falls into a pit on the Sabbath, will not lay hold of it and lift it out?" This saying is hard to understand. Is it not obvious that all of us would help an animal from drowning in a pit on the Sabbath?

What could be the context of this text? We find it in a document very important to the Essenes (and surely more important to the Essene group not located at Qumran). I refer, of course, to the *Damascus Document.* The wording is surprisingly similar, even identical, to the words Matthew attributes to Jesus. Here they are: If an animal "falls into a pit or a ditch, let him not raise it on the Sabbath" (CD MS A 11.13–14).[18] It is certainly conceivable that Jesus knew this Essene teaching. In fact, I side with the scholars who conclude that he must have known it; otherwise he is left making little or no sense.

---

[17] For further reflections, see James H. Charlesworth, "Jesus Research Expands with Chaotic Creativity," in *Images of Jesus Today* (ed. J. H. Charlesworth and W. P. Weaver; Faith and Scholarship Colloquies 3; Valley Forge, PA: Trinity Press International, 1994), 1–41. Also, see the relevant chapters in vol. 3 of this work.

[18] Translated by Joseph M. Baumgarten and and Daniel R. Schwartz in, "Damascus Document," *The Dead Sea Scroll: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Documnt, War Scroll, and Related Documents* (ed. J. H. Charlesworth with J. M. Baumgarten; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 49.

When he exhorted his followers to be attentive to God, who knew the number of hairs on one's head, Jesus most likely knew and rejected the teaching in the *Damascus Document* that advised one with an ailment to shave his head so that the priest could count the number of hairs and thus discern the cause of the malady. Most emphatically, Jesus rejected the Essenes' concept of a bifurcated anthropology; that is, the damnation of some souls at birth (double predestination, which may have been an Essene creation). He also rejected their radical concern for being pure and clean and separate from lepers and others judged polluted or outcast by Jewish society.

As far as we know, no Essene or Qumranite followed Jesus and became a disciple. If John the Baptizer had once been a Qumranite, he had left the Community. And if two of his disciples left him to follow Jesus, as the Fourth Evangelist reports, then they were neither Qumranites nor Essenes.

After Jesus' death, when his disciples claimed he had been raised by God, some–perhaps many–Essenes may have joined the Palestinian Jesus Movement. We are led to that conclusion because the author of Acts reported that many priests became obedient "to the faith" (Acts 6:7). We discern this scenario because of probable Essene influences on the documents found in the New Testament. The most impressive and numerous signs of Essene influence on the documents in the New Testament are clearly in those that were composed, or took definite shape, after 70 C.E. Documents from the Pauline school (especially Ephesians), the school of Matthew (notably the Gospel of Matthew), and the school of John (obviously the Gospel of John and 1 John), show such Essene influence. The best explanation is that some Essenes, who represented the great school of writing in Second Temple times, joined the Palestinian Jesus Movement and helped shape–sometimes in significant ways–the new schools of Paul, Matthew, and John.

In the estimation of New Testament historians and theologians, the document most influenced by Essene terms and paradigms is the Gospel of John. Many of the *termini technici* and phrases we have labeled "Johannine" are now seen to have been Qumranic. Foremost among such terms would be "sons of light" and such phrases as "walking in the light." The Fourth Evangelist, who was a Jew, must have known about the Essene explanation of evil and their claim that the problems in the world are to be explained by dualism, which is a paradigm in 1QS and in John.

This dualism is between light and darkness, good and evil, righteousness and unrighteousness. As at Qumran, so also in the Gospel of John, the rewards of eternal life are for the elect, but damnation and final annihilation are for those who are not chosen (or predestined).

How should we explain the similarities in terminology and the paradigm of dualism shared by the Qumranites and the Fourth Evangelist? I cannot agree with the late Raymond Brown that the influence was indirect. I also wish to distance myself from John Ashton, who concludes that the Fourth Evangelist had been an Essene. One of them may be correct. While this is conceivable, I think it is much more likely that some Essenes, as had some Samaritans most likely, joined the Johannine school or community.[19]

When the Arab threw that rock into Cave 1 over fifty years ago, he shattered more than earthen vessels or leather scrolls. He shattered historical reconstructions that had been encapsulated within earthly categories, if not vellum codices.

The archaeological *realia* of pre-70 life has become surprisingly abundant: stone vessels for the Jewish rites of purification, arrowheads, braided hair, sandals, glassware for cosmetics, coins, woven fabrics and mats, statues, images, and even the remains of humans who lived two thousand years ago. These palpable things reveal to us the proper approach for reconstructing first-century Jewish life. It is not sitting before a text far removed from the sites, sounds, and topography that help us describe that world. The proper approach is to be seen by moving from palpable *realia* to the setting in which recorded events were lived out.

What is the most important dimension of Qumran research? Such research helps us understand a culture and time that is sufficiently different from our own as to have the power to challenge our own solutions. We are beginning to perceive the setting of past events, and we know that each ancient text must be understood in light of a specific phenomenological context.

[19] See ch. 5 in vol. 3 of this work.My translation, in "Rule of the Community," in *The Dead Sea Scroll: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 1, The Rule of the Community and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 1; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1994.), 81.

CONCLUSION

Over fifty years ago the Dead Sea Scrolls were discovered. As I have tried to summarize succinctly, these ancient Jewish documents reveal to us a world that was previously unknown. Without defining space, time, and the rules, there is meaninglessness. Contemporary society witnesses to the breaking of spaces, times, and especially rules. Hence, too many have given up on a future utopia. However, when each of these is clarified, meaning springs forth like Athena from the head of Zeus. There is enthusiasm. And for the Qumranites and the members of the Jesus sect, that much-maligned word "enthusiasm" meant devoting all so that God would be present and the human would be one in God. Feeling the leather of a Dead Sea Scroll stimulates me to reflect on two different worlds; yet each is full of meaning. I think about a cosmos in which humans unite in time and place with the promises of meaning and rewards. And so let me end by reading from the hymn that concludes the *Rule of the Community*:

> [(With) the offering of] the lip[s] I will praise him
> according to a statue [en]graved forever:
> at the heads of years and at the turning[-point of the seasons,
> by the compl]etion of the statue of their norm
> –(each) day (having) its precept–
> one after another,
> (from) the sea[son for harvest until summer;
> (from) the season of s]owing until the season of grass;
> (from) the seasons for yea[r]s until [their] seven-year periods;
> [at the beginning of] their [se]ven-year period until the Jubilee.

(4QS MS D frag. 4 lines 3–6)

The Jubilee Celebration of the discovery of the Dead Sea Scroll has passed. Over fifty years ago a Bedouin accidentally discovered a cave on the northwestern shores of the Dead Sea. In this cave, and others found nearby, Jews had hidden their most valuable possessions when the Roman armies conquered Jericho and its environs on the way to destroying Jerusalem near the end of the First Jewish Revolt (70 C.E.). In the preceding pages, we have caught a glimpse of how research focused on these and other early Jewish compositions is revolutionizing scholars' recreation of Second Temple Judaism and the understanding of our biblical texts. The following chapters and volumes provide the data and research that reveal how and in what ways the Dead Sea Scrolls are changing our understanding of the Bible and its world.

CHAPTER ONE

THE IMPACT OF THE JUDEAN DESERT SCROLLS ON ISSUES OF TEXT AND CANON OF THE HEBREW BIBLE

James A. Sanders

There are five areas of biblical study on which, in my view, fifty years worth of collective study of the scrolls have had considerable impact. Others would focus on other areas, I am sure.[1] Those five are as follows:

A. The history of early Judaism
B. The first-century origins of Christianity and rabbinic Judaism
C. The intertextual nature of Scripture and of early Jewish and Christian literature generally
D. The concept of Scripture as canon
E. Textual criticism of the First Testament

Elsewhere I have elaborated on others of the five areas.[2] I want to focus here on what study of the scrolls has done for understanding concept and method in the study of Jewish and Christian canons of Scripture.

Miqra in Judaism and the First or Old Testament in Protestant Christianity, though the same in contents, are structurally quite different; they are in fact different canons. The received canon of *Miqra* (*Miqra* denotes the Hebrew Bible) is tripartite in structure, while the received canon of the First Christian Testament is quadripartite in structure. The structure of each sets the hermeneutic by which people expect to read them in the respective believing communities. This is especially poignant in the Protestant canon of the Old Testament as over against the Tanak because they both have the same Hebrew text base. And they have the same text because of convictions held first by Jerome in the fourth century, and then by Luther in the sixteenth. Prior to Jerome, Christian communities had basically the so-called Septuagint, later its Old Latin translation, as the text of what came to be called the Christian Old Testament.

---

[1] Joseph A. Fitzmyer in his review of Geza Vermes's *The Complete Dead Sea Scrolls in English* (New York: Penguin, 1997) in the *New York Times* Book Review Section of Sept. 21, 1997 (26–27) lists four areas: the text of the Hebrew Bible, the history of Palestinian Judaism from 150 B.C.E. to 70 C.E., the Hebrew and Aramaic languages, and the Palestinian matrix of Christianity. Three of the four are in the above list.

[2] See note 17 (below).

The churches' insistence on keeping the Old Testament in the Christian canon, and indeed, on insisting on a double-testament Bible, in reaction to Marcion and others, was largely to advance the growing Christian conviction in the second and third centuries that Christianity had superseded Judaism as God's true Israel.[3] Keeping the old or first part of the double-testament Bible was anything but pro-Jewish in terms of the ongoing debates between Christians and Jews over exegesis of the First Testament–or in terms of the ongoing debates within Christianity between Jewish Christianity and Gentile Christianity. The latter, of course, had completely won out by the time of Constantine. Jerome's conviction that the churches should have a translation directly from the Hebrew was much the same as Origen's intention had earlier been in providing the Hebrew text of the Old Testament alongside the various Greek translations in the Hexapla: to counter Jewish arguments outside the church as well as pro-Jewish or Judaizing arguments within it.[4]

Despite their having the same text base and the same contents, the Protestant First Testament and the Tanak convey quite different messages precisely because of their different structures. And the Protestant structure is basically the same as all other Christian canons, Roman Catholic and the various Orthodox canons, except that the latter have more books in them than the Protestant. The two major differences between the Jewish canon and the Christian First Testament are the position of the Latter Prophets in each, and the tendency in the Christian canon to lengthen the story line, or history, that begins in Genesis, to include Ruth, Esther, Chronicles, Ezra-Nehemiah, Judith, Tobit, and the Maccabees. And each of these major differences in structure makes a clear statement of its own, even before consideration of content.

In the Jewish canon, the story line that begins in Genesis ends at the close of 2 Kings, with the defeat of the united-then-divided kingdoms of Israel and Judah. The fifteen books of the Latter Prophets then come immediately next, to explain the risings and fallings, victories and defeats, the weal and the woe that had happened since the two promises made by God to Abraham and Sarah (Gen 12:1–7), which started the venture and which were so completely fulfilled in the time of Solomon (1 Kings 10), now clearly had failed. The Prophets have the major function in the tripartite Jewish canon of explaining the uses of adversity in the hands of the One God of All. The Prophetic Corpus comes fourth or last, however, in the quadripartite Christian canon, not so much to explain God's uses of adversity as to point to Christ. Even in the Septuagint text, the words are essentially in broad perspective the same, but the intertextual structure conveys quite a different hermeneutic by which people expect to read the text in the believing community. This observation is all the more poignant when the actual text is the same in the two canons, Jewish and Protestant, because of the Jerome/Luther heritage.

---

[3] See David P. Efroymsen, "The Patristic Connection," in *Antisemitism and the Foundations of Christianity* (ed. A. T. Davies; New York: Paulist, 1979), 98–117; and J. G. Gager, *The Origins of Anti-Semitism* (New York: Oxford University Press, 1983), 160–67.

[4] See Gager, *The Origins of Anti-Semitism*, 188–89 and 162–66.

Not only is the Prophetic Corpus placed last in the Christian canon to point to the Gospel of Jesus Christ; the second or historical section also provided the churches with a story line that went from creation down in history far enough so that they could append the Gospels and Acts, the Christian sacred history, to that long-established Jewish sacred history. Such a structure served well the developing Christian argument that the God of creation was the God incarnate in Jesus Christ, the same God who had abandoned the old ethnic Israel and adopted the new universal Israel in Christ and church. In this sense, the Prophets coming last in the Christian canon not only pointed to God's work in Christ and the church; it also could serve the Christian argument that God had rejected the old Israel in favor of Christ and church, God's new Israel.

By contrast, the third section of the Jewish Tanak makes an entirely different kind of statement for surviving rabbinic Judaism. Starting with Chronicles, as in all the classical Tiberian manuscripts, or ending with Chronicles, as in *b. B. Bat.* 14b and received printed texts of the Tanak, the Ketuvim well served a Judaism that was retreating from history. The withdrawal from common cultural history came after three disastrous defeats at the hands of Rome from 4 B.C.E. to 135 C.E., thereafter to subsist in stasis in an increasingly alien world. Various parts of the Ketuvim reflect on past history, including Daniel and his friends in the foreign royal court of long-ago Babylon. The placement of Daniel in the Ketuvim provided an entirely different hermeneutic by which to read it and reflect on it, than its placement among the Prophets in Christian canons. But the Ketuvim, even with its many reflections on past history, otherwise supports the movement of surviving rabbinic Judaism to depart from history, to live in closed communities and pursue lives of obedience and service to a God who had during the course of early Judaism become more transcendent and ineffable, no longer expected to intrude into human history until the Messiah would appear.[5]

---

[5] See Lee M. McDonald and James A. Sanders, eds., *The Canon Debate* (Peabody, MA: Hendrickson, 2002), especially the latter's contribution: "The Issue of Closure in the Canonical Process," 252–63.

An area worth investigating would be the structure of Greek translations of the First Testament outside Christian control and transmission. Unfortunately, all the codices of the so-called Septuagint come to us from ancient Christian communities, precisely in the time when the Jewish/Christian debates were most acerbic, and when the debates among the churches between pro-Jewish and pro-Gentile understandings of Christianity were most formative for emerging normative Christianity. And those codices show differing orders of books in the First Testament. But one wonders if perhaps the tendency to pull all the so-called historical books into a lengthened story line might not possibly have been of interest in pre-Christian early Judaism in its ongoing dialogues with Greco-Roman culture, to bolster its image as a people with a long and worthy history, which compared well with the Greek epics of Hesiod and Homer.[6] In that case, the Christian canon of the Old Testament would already have had a start in the direction it would eventually take in this regard, and it could easily have been adapted and resignified for Christian purposes.

Because, among other reasons, the codex did not become widespread as a writing instrument until the late second century in Christianity, and as late as the sixth century in Judaism, the questions of content and order of books in a possible Qumran canon of Scripture must go without clear answers.[7] But the study of canon entails not only issues of canon as *norma normata*, with canon as a list of books in a certain order, but also those of *norma normans*, with canon as the function of authoritative traditions, even before those traditions became stabilized into certain oral or written forms. Study of canon as *norma normans* extends back into biblical history, as far as the earliest instances of repetition of stories and traditions for the purpose of establishing authority.[8] Discussions of canon in both guises have been impacted by fifty years' study of the Judean Desert Scrolls.

Up to about forty years ago, there was a widely accepted view of the history of the formation of the Jewish tripartite canon. The Pentateuch had become canon by about 400 B.C.E., the Prophets by 200 B.C.E., while the Writings were not explicitly canonized by the rabbinic council that convened at Yavneh (or Jamnia) until after the fall of Jerusalem, between the Second (115–117 C.E.) and Third (132–135; sometimes called Second) Jewish Revolts against Rome. This perspective became "canonical," so to speak, in large part after the work of Herbert E. Ryle at the end of the nineteenth century.[9] Study of the Judean Desert Scrolls in general raised the issue of canon, but especially because of the contents of Qumran Cave 11.[10] Whether the *Temple Scroll* or *Torah Scroll* from Cave 11 (11QT$^{a,\,b}$ [= 11Q19–20]) was canonical at Qumran was a question addressed by Yigael Yadin in the editio princeps.[11] Did the large scroll of Psalms from the same cave indicate a liturgical collection of psalms derivative of an already stable Psalter in Judaism, or did it mark a stage in the stabilization of the MT-150 collection of Psalms found in medieval codices?[12]

A few years before these questions took shape, a study by Jack P. Lewis had already brought the regnant view of the history of the formation of the Tanak into question.[13] Lewis investigated all the passages in rabbinic literature where the gathering of rabbis at Yavneh is mentioned and found that there was little or no support for the idea that that assembly was a canonizing council. From time to time scholars have questioned the idea of a canonizing council in Judaism at such an early date, or at any time, for that matter, but not enough to cast serious doubt on the widely accepted view. What Lewis did was to show that people had read such a view into the passages where Yavneh is mentioned. Lewis's work was almost universally accepted as a needed corrective.[14]

Flint, "Of Psalms and Psalters: James Sanders' Investigation of the Psalms Scrolls," in *A Gift of God in Due Season: Essays on Scripture and Community in Honor of James A. Sanders* (ed. R. D. Weis and D. M. Carr; JSOTSup 225; Sheffield: Sheffield Academic Press, 1996), 65–83; and idem, *The Dead Sea Psalms Scrolls and the Book of Psalms* (*STDJ* 17 Leiden: Brill, 1997), 1–12.

[13] Jack P. Lewis, "What Do We Mean by Jabneh?" *JBR* 32 (1964): 125–32.

[14] See Shaye J. D. Cohen, "The Significance of Yavneh: Pharisees, Rabbis, and the End of Jewish Sectarianism," *HUCA* 55 (1984): 27–53, in which Cohen argues that the importance of the conference at Yavneh at the end of the first century was not to settle the question of a biblical canon but to create a new "Rabbinic Judaism" headed by lay leaders (not priests, as when the temple still stood). It was intended to be a wide-enough tent to include dissent and debate, thus ending the necessity for sects or "heresies" in order to have dialogue, and putting it in sharp contrast to emerging Christian orthodoxies, which curbed such debate. Christianity has spawned "heresies" largely because of its creeds and dogma, according to the thesis of the dialogue titled *Häresien: Religionshermeneutische Studien zur Konstruktion von Norm und Abweichung* (ed. I. Pieper, M. Schimmelpfenning, et J. von Soosten; Munich: Wilhelm Fink, 2003), papers given at a conference on "Abweichung in der Kirche" at Heidelberg in September 1995; therein see James A. Sanders, "Canon as Dialogue," 151–67.

But the reassessments that came about because of it differed rather widely. David Noel Freedman, in an article on canon (in the *IDBSup*) in 1976 raised questions about the dates of the canonization of the Law and the Prophets, suggesting that those two sections of the Tanak were already basically stabilized by the end of the sixth century B.C.E., but the Ketuvim not until Yavneh.[15] Sid Leiman also in 1976 took Lewis's work to mean that the Ketuvim was probably stabilized well before Yavneh took place.[16] Then in 1985, Roger Beckwith argued that what Lewis had done should be taken to mean that the Ketuvim was already a part of the Jewish canon well before Yavneh, most likely effected by the bibliophile activities of Judas Maccabaeus in the second century B.C.E.[17]

In the same time frame, studies in biblical intertextuality began to take shape. Interest in the function of older literature in new literary compositions, oral and written, is perhaps as old as speech itself, certainly as old as writing.[18] But such interest began to take on new aspects with the discovery of the Judean Scrolls. One of the striking characteristics of Qumran literature is actually typical of Jewish literature of the period generally, especially the so-called Apocrypha and Pseudepigrapha, Philo, and Josephus. Jewish literature is markedly scriptural in composition: when writers were conceiving new literature, they would write it in scriptural terms and rhythms. My teacher, Samuel Sandmel, often remarked that Torah is Judaism and Judaism is Torah, and until one comes to terms with that observation, one cannot grasp what Judaism is about. He meant Torah in its broad sense, with the traditions that flowed from it. Jews wrote their literature traditionally and scripturally.

Along with that observation was a similar one; that Scripture at that time was still in a stage of limited fluidity. Scribes and translators were free to make Scripture comprehensible to the communities they served. In fact, it is now clear that all tradents of Scripture have had two responsibilities—whether they be scribes, translators, commentators, midrashists, or preachers—both to the *Vorlage* and to the community being served by the tradent's activity; that is, their responsibility was to the community's past and to its present. A tradent is one who brings the past into the present in contemporary terms. Everyone who reads the Bible is a tradent. The older term for tradent is traditionist, but that is sometimes confused with what is meant by traditionalist: one who wants to make the present look like the past in a static view of Scripture, ignoring the vast cultural differences between cultures today and the ancient Near Eastern and Greco-Roman cultures, in which the Bible was written.[19]

[17] Roger T. Beckwith, *The Old Testament Canon of the New Testament Church* (Grand Rapids: Eerdmans, 1985). In the 1960s Brevard Childs of Yale already began to focus his work in "exegesis in canonical context" on "the final form of the text." One assumes he means one of the classical Tiberian codices.

[18] See Julia Kristeva in *Semiotike: Recerches pour une sémanalyse* (Paris: Tel Quel, 1969), 146; and Daniel Boyarin, *Intertextuality and the Reading of Midrash* (Bloomington: Indiana University Press, 1990), 22.

Because scrolls have been found in caves and loci unrelated to the Qumran library, the observation that Scripture at Qumran was still in a stage of limited fluidity took on considerable significance in the recent reconceptualization of the art of textual criticism. Biblical literature from Murabbaʿat, Naḥal Ḥever, En Gedi, and Masada, on the contrary, showed considerably less such fluidity. A picture began to emerge that earlier biblical texts were relatively fluid, while texts dating after the end of the first century of the Common Era, like the second-century C.E. Greek translations of Scripture in Aquila, Theodotion, and even Symmachus, were markedly proto-masoretic and relatively but amazingly stable. During the course of the first century C.E., a distinct move was taking place from limited fluidity in treatment of Scripture to rather marked stability in copying and in citation.

Dominique Barthélemy's work on the *Greek Minor Prophets Scroll* from Naḥal Ḥever firmly set the shift from relative fluidity to relative stability in the first century of the Common Era.[20] There had apparently been a concomitant shift in Judaism from earlier shamanistic views of inspiration to the rather novel idea of verbal inspiration.[21] A similar shift from relative fluidity of text to relative stability would take place in NT manuscripts in the early fourth century, with the emergence of Christianity as a dominant cultural factor in the Roman Empire.[22] Through these years of study of the Judean Scrolls, it has become clear that stabilization of text and stabilization of canon are concomitant and parallel developments, indicating a view of a canon quite different from those mentioned above.[23]

The debate–precipitated by the large scroll of Psalms from Qumran Cave 11 having non-masoretic compositions mixed in it, and the Masoretic Psalms in the last third of the Psalter appearing in an order different from the MT-150 collection–has convincingly been resolved on the side of seeing the Psalter, like the Ketuvim, as being still open-ended in the first century of the Common Era.[24]

The two serious Hebrew Bible text-critical projects currently active both base concept and method in textual criticism on the history of the transmission of the text that has emerged because of the scrolls. One is the Hebrew University Bible Project (HUBP), which is producing *The Hebrew University Bible*, three volumes thus far: Isaiah in 1995, Jeremiah in 1997, and Ezekiel in 2004.[25] The other is the Hebrew Old Testament Text Project (HOTTP) sponsored by the United Bible Societies in Stuttgart, which is preparing *Biblia Hebraica Quinta* (*BHQ*), the fifth critical edition of the *Biblia Hebraica* series, which began in 1905. In the fall of 2004 the Deutsche Bibelgesellschaft published the Megillot in first fascicle of *BHQ*.

The history of the formation of the text is distinct from the history of the transmission of the text, even though text criticism since the eighteenth century has largely confused the two. The former, or "higher criticism," deals with the history of the composition of the text, while the latter, or "lower criticism," deals with the subsequent history of textual transmission through generations of believing communities. Both the HUBP and the HOTTP came to an understanding of the history of the text's transmission independently, based on the same new data provided in large part by study of the Judean Scrolls. Both agreed that to continue to base text-critical work on whether Paul Kahle or Paul Delagarde was right about whether there was a pristine early text that became fluid (Delagarde), or that fluidity preceded stability (Kahle), was misguided.[26] The history of the text's transmission for both the HUBP and the HOTTP begins (a) with the pre-masoretic period of limited textual fluidity in the earliest biblical manuscripts, moves to (b) the proto-masoretic period after the "great divide" marked by the destruction of Jerusalem and its temple by Rome, and then, finally, (c) the masoretic period, beginning with the great classical Tiberian manuscripts of the late ninth and following centuries.[27]

See the writer's review also of *Biblia Hebraica Quinta: Fascicle 18: General Introduction and Megilloth* (Stuttgart: Deutsche Bibelgesellschaft, 2004) at http://www.bookreviews.org/bookdetail.asp?TitleId=4725&CodePage=4725.

The most important single thing the scrolls have taught us is that early Judaism was pluralistic: the Judaism that existed before the end of the first century C.E., when surviving Pharisaism evolved into what we call rabbinic Judaism, existed in a variety of modes.[28] This is so much the case that Jacob Neusner and Bruce Chilton speak of the Judaisms of the period, and specifically speak of the early Christian movement as a Judaism.[29] Before the scrolls were found, the thesis of George Foot Moore had held sway, that there was a normative Judaism that found expression in Pharisaism, and over against it was heterodox Judaism, which produced what are called the Apocrypha and Pseudepigrapha.[30]

An equally important lesson learned from study of the scrolls has been the fact that significant numbers of Jewish groups disagreed with the Pharisaic/rabbinic position that prophecy or revelation had ceased in the time of Ezra and Nehemiah. This has brought Shemaryahu Talmon of Hebrew University to observe that while rabbinic Judaism has not been as illuminating of the origins of Christianity as some have thought, the Qumran community presents a Jewish sect that believed, on the contrary, as Christianity obviously did, that revelation had not ceased, but that God was continuing to reveal God's will to his people.[31] God, it was claimed at Qumran, gave the Righteous Teacher the true *rāz* whereby to interpret Scripture, just as Paul claimed a God-given mystery (*mystērion*, as in Rom 11:25; 16:25; 1 Cor 2:1; 4:1); Matthew called for special training to bring out of Scripture, which he calls "treasure," what is new and what is old (13:52); and Luke spoke of the key (*kleis*) to understand Scripture (11:52). They all, of course, claimed that Christ had special divine authority to teach and to interpret Scripture. Both Qumran and Christianity counted themselves as living at or near the end time, and both shared a common hermeneutic whereby to understand Scripture: (a) Scripture speaks to the end time; (b) they live at the end of time; and (c) therefore, Scripture speaks directly to them through special revelation.[32] Like today's dispensationalists and apocalypticists, they were uninterested in what the original contributors to Scripture said to their people in their time.

---

[26] If one insists on starting with that debate, then according to Shemaryahu Talmon, Paul Kahle was right (oral presentation at the World Congress celebrating fifty years of the Dead Sea Scrolls, in Jerusalem, July 21, 1997). Contrast the position of the Albright-Cross School as seen in P. Kyle McCarter, Jr., *Old Testament Text Criticism* (Minneapolis: Fortress, 1989); and reflected in Emanuel Tov, *Textual Criticism of the Hebrew Bible* (Minneapolis: Fortress, 1992).

[27] A facsimile edition of Aleppensis edited by Moshe H. Goshen-Gottstein appeared from Jerusalem's Magnes Press in 1977. The text of *The Hebrew University Bible* is that of Aleppensis where extant. The text of the *Biblia Hebraica Quinta*, which the publisher began releasing as fascicles in 2004, is based on new photographs taken of Leningradensis (1009 C.E.) in Leningrad in 1990 by the Ancient Biblical Manuscript Center and West Semitic Research. [30] George F. Moore, *Judaism in the First Centuries of the Christian Era* (3 vols.; Cambridge: Harvard University Press, 1927–1930).

While it remains uncertain exactly when the Jewish canon became specifically tripartite, or the Christian quadripartite, what now seems clear is that the Torah and the Prophets were relatively stable as Jewish Scripture in basic structure, if not in text, by the end of the fifth century B.C.E., while the Ketuvim did not become so defined until much later, after 135 C.E.[33]

The contents of the Ketuvim, with Daniel included, provided the new rabbinic Judaism with the scriptural basis by which to affirm that God had already departed from history and become remote, and that revelation had ceased already at the time of Ezra-Nehemiah. This would adequately explain the disastrous defeat of Bar Kokhba, despite Akiba's support of his messianic claims. It would also explain the need to close ranks around the basic concept of rabbinic Judaism: a Jew was called to the service of God, and rabbinic Judaism was the correct way to express that service (ʿăvôdâh). Until the true Messiah came, all speculation about what God would do next was essentially non-Jewish. Halakah, walking the way of God's Torah, walking the talk, one might say these days, was now the essence of Judaism. Halakah and the ongoing traditioning process, in resistance to further influence of Greco-Roman culture, were also understood as God's Torah in *sensu lato.* As shown in the acerbic and ongoing Jewish-Christian debate about which view and interpretation of Scripture was correct, rabbinic Judaism defined itself in large measure over against Christianity, which in its view had become more and more pagan, or Greco-Roman, in its self-understanding and in the churches' claims of what God had done in Christ and was doing in the early church.[34]

[33] See Sanders, "The Stabilization of the Tanak."

The Renaissance or rebirth of Greco-Roman culture immensely influenced Christianity in the fourteenth and following centuries, which helped produce Protestantism in the sixteenth century. The Renaissance also influenced official Roman Catholicism, but clearly not in the area of corporate focus on the authority and magisterium of the Catholic Church. Most forms of orthodoxy were able to resist the individualist influence of the Renaissance rather effectively, and continue to resist it today in "fundamentalist" modes of reading the Bible. European Jewry was able to remain *in stasis* and resist inroads of the Enlightenment until the mid-nineteenth century, when the birth of what has come to be known as Reform Judaism took place in Germany. David Hartman of the Shalom Hartman Institute in Jerusalem espouses the proposition that the State of Israel was born not because of the Holocaust, but because of the Enlightenment's inroads in European Judaism of the nineteenth century. Individual Jews, mostly Reform Jews, joined the Society of Biblical Literature slowly at first, but in increasing numbers early in the twentieth century. But Roman Catholics, aside from the Dominicans of the École Biblique in Jerusalem (encouraged, of course, by France's spirit of semi-independence from Rome), were not officially encouraged by their church to engage in the work of the SBL until the Encyclical of 1943 of Pius XII, the *Divino afflante Spiritu.* Some have described the SBL as the congregation of those who believe in the Renaissance and the Enlightenment and use their concept and method in biblical studies. And so it is, or has been, until the rise of postmodernism, which has called into question some of the dogmas and tenets of that belief.

My personal proposal is that we in the guild of Renaissance-derived study of the Bible keep one foot solidly in the modern period of quest for facts, and the other foot in the postmodern period of indeterminacy and human humility in the quest for truth.[35] There is no need for deconstructing every stage of advancement we have made since the Renaissance in understanding the history of formation of the biblical text. But there is need for deconstructing human overconfidence in that quest, as well as need for the willingness to acknowledge that the observer is an integral part of the observed, and that objectivity is but subjectivity under effective constraints. Clearly, the most effective constraint in research is dialogue–dialogue between differing confessional and professional points of view and between differing hermeneutics addressing the same issues. Critique of one position by another should have as its purpose not to demolish the other, but to correct and strengthen it for the sake of dialogue, the kind of dialogue that is now essential more than ever before to the success of the human enterprise. We need each other.

CHAPTER TWO

QUMRAN AND THE ENOCH GROUPS: REVISITING THE ENOCHIC-ESSENE HYPOTHESIS

Gabriele Boccaccini

Introduction: The Qumran Library

Since the Dead Sea Scrolls were discovered, there has been considerable discussion about the nature of the "Qumran library."[1] The presence of biblical material and the recognition of diverse theologies in the scrolls[2] demonstrate that the literature was not composed by the same group. However, geographical, chronological, and literary elements concur in support of the view that all the manuscripts were originally part of a single collection. The evidence is sufficient to justify the identification of the Dead Sea Scrolls as the remnants of an ancient library.[3] Indeed, it is common ownership, not common authorship, that turns any collection of books, ancient and modern, into a "library."

The essential problem consists in finding the correct criteria to classify the material, in particular, to distinguish between the documents authored by the Qumran community and those simply owned, preserved, and copied by the group. Anachronistic criteria like the threefold distinction between (a) biblical texts, (b) Old Testament Apocrypha and Pseudepigrapha, and

(c) hitherto unknown material–these criteria have been applied too often, with the result of imposing later canonical assumptions upon ancient sources. How can we assume, for example, that for the people of the Dead Sea Scrolls, *1 Enoch* or the *Temple Scroll* belonged to a different category than Genesis or Isaiah? In particular, how can we assume that a document is sectarian simply because we formerly did not know of its existence?

The first modern collections of Dead Sea Scrolls were selections of previously unknown "sectarian" documents, a practical and yet hardly scientific criterion. The biblical, apocryphal, and pseudepigraphic texts from Qumran became footnotes in the editions of the already established corpora of the Hebrew Bible, Apocrypha, and Pseudepigrapha. In one case only, the *Damascus Document*, whose sectarian features seemed too obvious to be overlooked, the overlapping was solved by removing the document from the corpus of the Pseudepigrapha, in which it had been previously included, and moving it into the Dead Sea Scrolls.[4] In other cases, notably *1 Enoch* and *Jubilees*, the recognition of sectarian features was not considered enough to justify such a dramatic change, and the documents remained in their traditional corpus. The Dead Sea Scrolls were and in common opinion still are the documents discovered at Qumran minus those belonging to other corpora. The Dead Sea Scrolls have become a scholarly and marketing label for a selected body of sectarian texts.

The most recent editions of the Qumran texts are struggling to overcome this "original sin" of Dead Sea Scrolls research. Older standard collections, like that of Géza Vermes, have gradually expanded their material, edition after edition,[5] and are now being replaced by new, more inclusive collections. Both the García Martínez and the Charlesworth editions, although still limited for practical reasons to "nonbiblical" material, have abolished the most misleading distinction between apocryphal, pseudepigraphic, and sectarian literature; they are consciously and effectively promoting a more comprehensive approach to the entire material discovered in the caves.[6]

---

[4] After the publication of the *editio princeps* by Solomon Schechter in *Fragments of a Zadokite Work* (Cambridge: Cambridge University Press, 1910), it was natural to see the *Damascus Document* in the collections of Old Testament Pseudepigrapha by Robert H. Charles, ed., *The Apocrypha and Pseudepigrapha of the Old Testament* (2 vols.; Oxford: Clarendon, 1913), 2:785–834; and Paul Riessler, *Altjüdisches Schriftum ausserhalb der Bible* (Augsburg: Benno Filser, 1928), 920–41. After the 1950s, the *Damascus Document* does not appear in any of the collections of Old Testament Pseudepigrapha.

[5] Geza Vermes, *The Dead Sea Scrolls in English* (4th ed.; Baltimore: Penguin, 1995).

[6] James H. Charlesworth, ed., PTSDSSP (Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1991–); Florentino García Martínez, *The Dead Sea Scrolls Translated: The Qumran Texts in English* (trans. W. G. E. Watson; 2d ed.; Leiden: Brill, 1996).

This change of attitude in contemporary scholarship is apparent in the attempt to classify the Dead Sea Scrolls according to more “neutral” criteria and avoid anachronistic assumptions.[7] In the most recent publications, a taxonomic consensus is emerging that groups the texts ideologically in three categories:

1. A core group of rather homogeneous texts, distinctive in style and ideology, which appear to be the product of a single sectarian community with a strong sense of self-identity. In this case, ownership is equivalent to authorship.
2. A group of texts that have only some sectarian features, and yet are compatible with the complex of ideas characteristic of the sectarian works. In this case, we must carefully weigh the evidence; ownership may or may not be equivalent to authorship.
3. A series of texts in which sectarian elements are marginal or totally absent, the most obvious examples being, of course, the “biblical” scrolls. In this case, ownership certainly is not equivalent to authorship.

My thesis is that this threefold ideological distinction is not synchronic but diachronic. The more ancient the documents are, the less sectarian. The Dead Sea Scrolls testify to the emergence of a defined community from (3) its intellectual roots in pre-Maccabean Enochic Judaism, to (2) its formative age within the Enochic-Essene movement, to (1) its establishment as a distinct social entity during the Hasmonean period. In particular, a single unbroken chain of related documents links the earliest Enochic books to the sectarian literature of Qumran. Their sharing the same generative idea of the superhuman origin of evil gives evidence of ideological continuity.

It was not by random circumstances that the community of the Dead Sea Scrolls owned a certain number of documents that they did not author. On the contrary, they consciously selected only those that represented their past and their formative age, while eliminating any synchronic document that “contradicts the basic ideas of this community or represents the ideas of a group opposed to it.”[8] Hence, what is missing in the Qumran library is not less important than what is there. While the

Dead Sea Scrolls tell us about the origins and the identity of the group that selected them, the missing texts furnish us with the key for charting a rather comprehensive map of the group's location in the pluralistic world of Second Temple Judaism.

THE ENOCHIC ROOTS OF THE QUMRAN COMMUNITY

Before the publication of the Qumran fragments, it was customary to date *1 Enoch* around and after the Maccabean crisis,[9] even though the composite nature of the document, in particular regarding the Book of the Watchers, made some scholars perceive a much older prehistory.[10] Milik's edition of the Aramaic fragments in 1976 made clear that the earliest parts of *1 Enoch* (the *Book of the Watchers* in chs. 6–36 and the *Astronomical Book* in chs. 73–82) were pre-Maccabean.[11] The paleographic analysis showed that copies of these documents went back to the end of the third or the beginning of the second century B.C.E. The actual composition might have occurred even earlier.

The importance of Enochic literature lies in the fact that it testifies to the existence, during the Zadokite period, of a nonconformist priestly tradition. Zadokite Judaism was a society that clearly defined the lines of cosmic and social structure. The priestly narrative (Gen 1:1–2:4a) tells that through creation God turned the primeval disorder into the divine order by organizing the whole cosmos according to the principle of division, light from darkness, the waters of above from the waters of below, water from dry land. The refrain, "God saw that it was good," repeats that everything was made according to God's will, until the climactic conclusion of the sixth day, when "God saw that it was very good" (Gen 1:31).

The disruptive forces of the universe, evil and impurity, are not unleashed but caged within precise boundaries. As long as human beings dare not trespass the boundaries established by God, evil and impurity are controllable. Obedience to the moral laws allows them to avoid evil, which they primarily understood as a punishment from God for human transgressions; following the purity laws brings impurity under control. The primeval history, as edited in the Zadokite Torah (Genesis 1–11), warns that any attempt to cross the boundary between humanity and the divine always results in disaster. Human beings have responsibility for, and the capability of, maintaining the distinction between good and evil, holy and profane, pure and impure. They can only blame themselves for their physical and moral failures.

E. F. Kautzsch; 2 vols.; Tübingen: Mohr Siebeck, 1900), 2:224–26.

[11] Jozef T. Milik, *The Books of Enoch: Aramaic Fragments of Qumrân Cave 4* (Oxford: Clarendon, 1976).

The Zadokite worldview regarded the Jerusalem Temple–their Temple, separated from the profane world around it–as a visual representation of the cosmos itself. As God's realm, heaven is separated from the human realm, the earth, so the earthly dwelling of God produces around the Temple a series of concentric circles of greater degrees of holiness, separating the profane world from the most holy mountain of Jerusalem. They intended the internal structure of the Temple, with its series of concentric courts around the holy of holies, to be a replica of the structure of the cosmos and the structure of the earth.[12]

Whoever wrote the documents of Enoch, their ideology was in direct opposition to that of the Zadokites. The catalyst was a particular concept of the origin of evil, which portrayed a group of rebellious angels as ultimately responsible for the spread of evil and impurity on earth.[13]

While the Zadokites founded their legitimacy on their responsibility to be the faithful keepers of the cosmic order, the Enochians argued that this world had been corrupted by an original sin of angels, who had contaminated God's creation by crossing the boundary between heaven and earth and by revealing secret knowledge to human beings. Despite God's reaction and the subsequent flood, the original order was not, and could not, be restored. The good angels, led by Michael, defeated the evil angels, led by Shemihazah and Asael. The mortal bodies of the giants, the offspring of the evil union of angels and women, were killed, but their immortal souls survived as evil spirits (*1 En.* 15:8–10) and continue to roam about the world in order to corrupt human beings and to destroy cosmic order. While Zadokite Judaism described creation as a process from past disorder to current divine order, the Enochians claimed that the current disorder had replaced God's past order. While Zadokite Judaism claimed that there were no rebellious angels, the Satan also being a member of the heavenly court (Job 1:6–12; 2:1–7; Zech 3:1–2; 1 Chr 21:1), Enochic Judaism would be ultimately responsible for creating the concept of the devil.[14] While Zadokite Judaism struggled to separate evil and impurity from the demonic and made their spread depend on human choice, Enochic Judaism alienated the control of these disruptive forces from human control.[15]

Jaffee, "Ritual Space and Performance in Early Judaism," in his book, *Early Judaism* (ed. M. S. Jaffee; Upper Saddle River, NJ: Prentice Hall, 1997), 164–212.

[13] On the centrality of the problem of evil's origin in ancient apocalypticism, see John J. Collins, "Creation and the Origin of Evil," in his book, *Apocalypticism in the Dead Sea Scrolls* (Literature of the Dead Sea Scrolls; London: Routledge, 1997), 30–51; Paolo Sacchi, *Jewish Apocalyptic and Its History* (trans. W. J. Short; JSPSup 20; Sheffield: Sheffield Academic Press, 1996).

As a result of angelic sin, human beings cannot control the spread of evil and impurity. Human beings are still held accountable for their actions, but they are victims of an evil that they have neither caused nor are able to resist. Impurity also spreads out of human control because the boundaries between the clean and the unclean were disrupted by the angels' crossing over the boundaries between the holy and the profane. Although the concepts of impurity and evil remain conceptually separated in Enochic Judaism, impurity is now more closely connected with evil. The impurity produced by the fallen angels has weakened the human capability of resisting evil.[16]

At the roots of the Qumran community, therefore, is an ancient schism within the Jewish priesthood, between Enochians and Zadokites. We do not know exactly who the Enochians were, whether they were genealogically related to the Zadokites or were members of rival levitical families. Unlike the situation with the Samaritans, we have no evidence that the Enochians formed a schismatic community, in Palestine or elsewhere. The Enochians were an opposition party within the Temple elite, not a group of separatists.

It is even more difficult to reconstruct the chronology of the schism. There is a substantial consensus among scholars that the Enochic literature is rooted in oral and literary traditions that predate the emergence of Enochic Judaism as an established movement. These traditions are as ancient as those preserved by Zadokite literature; they go back to the same Babylonian milieu of the exilic age and to the preexilic mythological heritage of ancient Israel.[17] The disagreement and, therefore, the emergence of two distinctive parties would occur only later, after the return from the exile, and would concern the modalities of the restoration. While the Zadokites claimed that God's order had been fully restored with the construction of the Second Temple,[18] the Enochians still viewed restoration as a future event and gave cosmic dimension to a crisis that for the Zadokites had momentarily affected only the historical relationships between God and Israel.

[16] Paolo Sacchi, "Il sacro e il profano, l'impuro e il puro," in his book, *Storia del Secondo Tempio*: *Israele tra sesto secolo a.c. e primo secolo d.c.* (Turin: SEI, 1994), 415–53.

[17] The antiquity of Enochic traditions and their Babylonian roots have been argued in recent and less recent studies; see James C. VanderKam, *Enoch: A Man for*

Paolo Sacchi points to the period immediately following the reforms of Nehemiah and Ezra as the time when Zadokite Judaism eventually triumphed and its opponents coalesced around ancient myths with Enoch as their hero.[19] Michael E. Stone and David W. Suter instead argue that the process of the hellenization of the Zadokite priesthood gives a more likely setting for the emergence of such an opposition party.[20]

Whether Enochic Judaism emerged in the fourth or third century B.C.E., one thing seems to me unquestionable: Enochic Judaism arose out of pre-Maccabean levitical circles that opposed the power of the Temple establishment. The myth of the fallen angels was not merely a bizarre or folkloric expansion of ancient legends; it also would disrupt the very foundations of Zadokite Judaism. By claiming that the good universe created by God had been corrupted by an angelic rebellion and by disregarding the Mosaic covenant, Enochic Judaism made a direct challenge to the legitimacy of the Second Temple and of its priesthood.

THE FORMATIVE AGE

The Enochians viewed the Maccabean crisis as the last chapter of the degenerative process initiated by the angelic sin and joined the coalition of groups who supported the Maccabees.[21] The book of *Dream Visions* (*1 Enoch* 83–90) depicts what we could call the strange case of a genetic disease that has changed and continues to change the nature of humankind, each generation being inferior to the previous one. Nobody is spared: in the metaphorical world of the *Animal Apocalypse* (*1 Enoch* 85–90), even the Jews, who are the noblest part of humankind, at first described as "cows," over time become "sheep." Only at the end of time will God purify the universe by fire and restore the original goodness of creation.

In the detailed description of the history of Israel, most striking is the methodical polemic against the tenets of Zadokite Judaism. The text in detail describes the exodus from Egypt and the march through the desert, including Moses' ascent of Mount Sinai (*1 En.* 89:29–33). It follows the narrative of the Mosaic Torah step by step, but makes no reference to the covenant, simply ignoring it. As for the Temple, its construction under Solomon is emphatically evoked (*1 En.* 89:36, 50), but the entire history of Israel in the postexilic period unfolds under demonic influence ("the seventy shepherds" of *1 En.* 89:59–72.), until God comes to the earth and inaugurates the new creation. In an era of corruption and decline, the Zadokite Temple is no exception; it is a contaminated sanctuary ("all the bread which was upon it was polluted and impure," *1 En.* 89:73). The profaning action of Menelaus and Antiochus IV adds nothing to an already compromised situation, and as a result it is not even mentioned. At the time of the judgment, the city of the Temple ("the ancient house") will be devoured by the same purifying fire of Gehenna into which the wicked are thrown. In its place God will build a "new house," in which all the elect will be reunited. "Then I went on seeing until that ancient house caught [fire].…The Lord of the sheep brought about a new house, greater and loftier than the first one.…All the sheep were within it.…And the Lord of the sheep rejoiced with great joy because they had all become gentle and returned to his house" (*1 En.* 90:28–33).

In line with the early Enochic concept of evil, *Dream Visions* did not set clear boundaries to separate the chosen from the wicked. Evil and impurity affect all human beings, including the Jews. Salvation also is not foreign to non-Jewish individuals. The text vaguely defines the chosen. In a tradition that describes the spread of evil and impurity as a plague, the chosen are those people, Jews and Gentiles, who for whatever mysterious reasons are not affected by this mortal disease and thus survive the day of the final purification of the world.

The outspoken theology of *Jubilees* suggests that, in the aftermath of the Maccabean Revolt, the Enochians must have gained confidence, perhaps popularity, to such an extent that they attempted to speak as the most authentic voice of the entire people of Israel. The decline of the House of Zadok not only confirmed the truth of their opposition but also made them look at themselves as the most obvious candidates to become the spiritual guides of Israel during the final days. The transformation of Enochic Judaism from an opposition party into a ruling movement was a concrete possibility, but it required two major steps: a reappraisal of the Mosaic Torah, which the Maccabean uprising had made the foundation of national Jewish identity,[22] and the restoration of the uniqueness of Israel as God's chosen people.

The way in which *Jubilees* mingles Enochic and Mosaic traditions is ingenious. From the Astronomical Book (*1 En.* 81:1–10) the author of *Jubilees* took up the idea that in heaven there are some tablets on which "all the deeds of humanity and all the children of the flesh upon the earth for all the generations of the world" are written down (81:2). Enoch "looked at the tablets of heaven, read all the writing (on them), and came to understand everything" (81:2). The genius of *Jubilees* is to turn this incidental detail of the *Astronomical Book* into the main source of God's revelation, and to make Moses a revealer like Enoch. Moses also was shown by "the angel the tablets of the divisions of years from the time of the creation of the law and testimony according to their weeks (of years), according to the jubilees…from [the day of creation until] the day of the new creation" (*Jub.* 1:29). Moses also received from God the command of "writing down…all the matters which I shall make known to you on this mountain" (1:26). In this way, the heavenly tablets become the center of a complex history of revelation involving several revealers (Enoch, Noah, Abraham, Jacob, Moses). The heavenly tablets were shown to them; the revealers saw, recalled, and wrote, and their work generated a written tradition eventually handed down by Levi and his sons "until this day" (45:15), a tradition that encompasses the Enochic literature and the Zadokite Torah, as well as the book of *Jubilees* itself.

---

[22] Doron Mendels, *The Rise and Fall of Jewish Nationalism* (New York: Doubleday, 1992).

The acceptance of the Mosaic Torah must not obfuscate the real intentions of the author. While acknowledging the connection between the Mosaic revelation and the heavenly tablets, *Jubilees* also denies the centrality and uniqueness of the Zadokite Torah. It is only one of several, and an incomplete version of the heavenly tablets, a version to be completed and corrected in its true meaning by comparison with what was written by other revealers who had a better glimpse at the heavenly tablets. The heavenly tablets are the only and all-inclusive repository of God's revelation.

The second important element that distinguishes *Jubilees* from the previous Enochic tradition is a special doctrine of election, based on God's predeterminism, which resulted in an identification of evil with impurity and in a strict and almost dualistic theology of separation. Commentators agree that such a sophisticated doctrine of election is the closest link to the sectarian texts of Qumran.[23]

Jubilees expresses dissatisfaction with the earlier Enochic concept that all human beings, including the Jews, were affected by evil. Harmonizing the Enochic doctrine of evil and the idea of the election of the Jewish people was by no means an easy task. In this case also, *Jubilees* was able to find a coherent innovative solution that corrects, yet does not challenge, and ultimately even strengthens, the principles of Enochic Judaism. The answer was a much stronger emphasis on God's predeterminism and God's control over the universe. Despite the angelic sin, history unfolds stage by stage, according to the times, the jubilees, that God has dictated from the beginning. The election of the Jewish people also belongs to the predestined order, which no disorder can change. Since creation, God has selected the Jews as a special people above all nations, and separated them from the other nations as a holy people (2:21). Those marked by circumcision (15:11) are called to participate with the angels in the worship of God. Those who do not belong to the children of Israel belong to the children of destruction (15:26).

The identification of evil with impurity makes *separation* the new password for salvation, in a way that was previously unknown in Judaism, both in the Enochic and in the Zadokite tradition. Purity is no longer an autonomous rule of the universe to which the chosen people also have to adjust, but instead is the prerequisite of their salvation. Since being elected means being separated from the impure world, the boundary between purity and impurity becomes the boundary between good and evil. Any violation of God's order that produces impurity is a mortal danger for the salvation of the chosen people. Hence, *Jubilees* insists on people following the ritual laws with the utmost accuracy and respecting the liturgical times that God has established since the beginning of creation (6:32–35).

---

[23] Michel Testuz, *Les idées religieuses du livre des Jubilés* (Geneva: Druz, 1960).

Although the harshest words are reserved for Jews who risk the purity of Israel (30:7–17), the separation that *Jubilees* promotes is essentially between Jews and Gentiles (22:16), and not properly within the Jewish people themselves. *Jubilees* does not use the language of the remnant. No special group appears on the scene as the recipient of divine instruction. *Jubilees* claims to represent the majority of the Jews against a minority of traitors in a time that in its view was the beginning of the *eschaton*. The theology of separation in *Jubilees* is not the last recourse of people devoured by a minority complex, who feel persecuted and isolated and struggle to defend themselves. On the contrary, it betrays a majority complex of people who were confident that their time was the time of the conversion of Israel, and that their hopes would soon be fulfilled. They expected to see the deviants persecuted and rejected. The audience of *Jubilees* is evidently to be found among the nation as a whole and not among an embattled sectarian community.[24]

Following the same trajectory, the *Temple Scroll* transposed *Jubilees*' theology of separation into a detailed and consistent constitution for the present, the final days of Israel in this world before the end of days and the world to come.[25] This constitution provides the plan for an interim Temple (11QT^a [11Q19] 29.2–10), not envisaged in *Jubilees*, as well as a new, stricter code of purity laws, which with greater accuracy meets the requirements set by *Jubilees*. The basic principle is that the Temple-city is equivalent to the camp of Israel in the wilderness, and correspondingly, the biblical laws concerning the purity of the Sinai encampment (Leviticus 13; Numbers 5; Deuteronomy 23) are strictly applied to Jerusalem (cf. 11QT^a [11Q19] 47.3–6).[26] The requirements of purity for the Temple are extended to the whole city of Jerusalem (cf. Lev 15:18 and 11QT^a [11Q19] 45.11–12), and the requirements of purity for the priests to the entire people of Israel (cf. Lev 21:17–20 and 11QT^a [11Q19] 45.12–13).

Jubilees and the *Temple Scroll* transform the oppositional ideology of the earlier Enochic literature into a platform for a new government of Israel.

In the euphoria of their victory over their Zadokite adversaries, however, the Enochians could not imagine that new adversaries and competitors soon would make their great illusion turn into disappointment.

In the pluralistic context of the newly independent Israel ruled by the Hasmoneans, the ambitious program set by *Jubilees* and the *Temple Scroll* quite disappointingly proved to be the platform of an influential and yet minority party. The situation required a reassessment of the role of the Enochic movement within the chosen people.

The message of the proto-*Epistle of Enoch* (*1 En.* 91:1–94:5; 104:7–105:2) was simple, direct, and entirely focused on the nature of Israel's election. As in *Dream Visions*, history is subjected to inexorable degeneration until the end, but as *Jubilees* claims, in this world there is a distinctive group of chosen people, "the plant of righteousness," Israel (*1 En.* 93:5; cf. *Jub.* 1:5). The proto-*Epistle* adds that, at the beginning of the final times (the present of the author), God will choose a group from among the chosen, "as witnesses of the righteousness of the plant" (*1 En.* 93:9). This group will receive special "wisdom" and will keep themselves separated from the rest of the people while acting on their behalf and thus preparing the way for the redemption of Israel and of the entire creation.

With its doctrine of double election, the proto-*Epistle of Enoch* testifies to a further stage in the development of Enochic Judaism. With the proto-*Epistle of Enoch*, the emphasis shifts from the entire people of Israel to a minority group that is the recipient of a special revelation and is called to a special mission on behalf of the entire people of Israel, as the first stage in the long series of final events.

It was a daring move and the beginning of a period of controversy marked by growing sectarian attitudes. Without betraying their loyalty to the people of Israel, the Enochians now believed they did not have to wait for the conversion of Israel in order to carry out what they thought was the true interpretation of God's will. At this point the Enochians (or at least, a significant part of their movement) became the Essenes, as we know them from ancient Jewish sources (Philo and Josephus). As the chosen among the chosen, they began developing a separate identity and building a separate society, within Judaism.

More Works of the Torah (4QMMT [4Q394–399]) testifies to this time when the Essenes decided that, as the chosen of the seventh week and the witnesses of the truth, they had to walk in the path of righteousness without mingling with the sinners, then the majority of the people. Still awaiting the conversion of the rest of Israel, the members of the group were asked to be content with, and proud of, their otherness and their separate way of life. The tone was conciliatory and nonisolationist, and yet it stirred up a dangerous mixture of pride and expectation that could easily turn into frustration and hatred, with the negative reaction of those they wished to convert. The history of the Qumran community would be the history of a lost illusion.

THE PARTING OF THE WAYS BETWEEN QUMRAN AND ENOCHIC JUDAISM

In the turmoil of those years, a group of Essenes led by a charismatic figure, the Righteous Teacher, preached that the Essenes had to separate from the entire Jewish society in even more radical terms.[27] The *Damascus Document* claims that Israel at large is living in sin and error and is caught in the "three nets of Belial:...fornication...wealth...defilement of the Temple" (CD 4.15–17). Now, "the wall is built" (4.11–12) and the members of the group have "to separate themselves from the sons of the pit... to separate unclean from clean and differentiate between the holy and the common; to keep the Sabbath day according to the exact interpretation, and the festivals and the day of fasting, according to what they had discovered, those who entered the new covenant in the land of Damascus" (6.15–19).

To a large extent the theology and sociological background of the *Damascus Document* are still presectarian.[28] The theology of the document lacks the deterministic language of the sectarian scrolls and gives a certain role to human free will (2.14–16). Dualism is not yet preeminent. Belial is God's opponent, and CD 5.18 already pairs him with an angelic counterpart, the "Prince of lights." Yet, Belial was not created evil. In line with the previous Enochic-Essene tradition, which describes a conscious plot of rebellious angels, the *Damascus Document* believes in the angels' freedom of will. "For having walked in the stubbornness of their hearts the Watchers of the heavens fell; on account of it they were caught, for they did not follow the precepts of God" (2.17–18). The reference to the Enochic myth of the fallen angels is particularly significant because it is conspicuously absent in the major sectarian texts that explicitly deny the angels' freedom of will.[29]

From a sociological perspective, the *Damascus Document* reflects the existence of people having a different way of life from the rest of the Jewish population, yet not completely isolated from the common social and religious institutions of Israel.[30] Echoing the language of the *Temple Scroll* and 4QMMT [4Q394–399], the *Damascus Document* speaks of people living in the "city of the Temple" (CD 12.1–2) or in "the camp" (10.23), as well as living in the "cities of Israel" (12.19) or in the "camps" (7.6; 19.2), people "who take women and beget children" (7.6–7; cf. 12.1–2; 15.5–6), and are "owners" of properties (9.10–16), have a job and earn a salary (14.12–17), and attend the Temple in Jerusalem and offer sacrifices (12.17–21; 16.13–14).

[27] Philip R. Davies, *Behind the Essenes*, 30.

[28] Idem, *The Damascus Covenant* (JSOTSup 25; Sheffield: JSOT Press, 1983).

[29] John J. Collins, *Apocalypticism in the DSS*, 48–50.

At the same time, however, the *Damascus Document* has an unmistakably sectarian trait that is missing in the previous Enochic literature and that makes it the forerunner of the sectarian literature of Qumran. The *Damascus Document* already presupposes the existence of a special group, that of the followers of the "Righteous Teacher," a group having its own separate identity within the Enochic-Essene movement, and it gives people no other choice but "entering" the new community "in order to atone for their sins" (4.4–10).

The best way to reconcile the evidence seems to me that of interpreting the document as the initial attempt of the community of the Righteous Teacher to define itself in relation to its parent movement. The *Damascus Document* was a pre-Qumranic document that was written by a sectarian elite in an attempt to gain the leadership of the larger Enochic-Essene movement. The parent movement is presented not as a contemporary phenomenon but as a group that belongs to the past. They are righteous precursors that have prepared the way for the preaching of the Righteous Teacher and now have to stand aside in favor of the new leadership, which fulfills the Enochic ideals. In its comprehensive approach, the *Damascus Document* is not detached and disinterested. It betrays the determination to regulate the lives of the members of the parent movement, either living in Jerusalem or in camps. No right to self-determination is assigned to them; on the contrary, they are required to accept the leadership of an elite that claims special authority from God.

The move was highly controversial and was not unchallenged within the Essene party. Credit goes to the "Groningen hypothesis"[31] for showing that the sectarian literature of Qumran, especially the pesharim, contains some intriguing allusions to the parting of the ways between Qumran and its parent movement.

---

[30] García Martínez and Trebolle Barrera, *The People of the DSS*, 58.

[31] Florentino García Martínez and Adam S. van der Woude, "A Groningen Hypothesis of Qumran Origins and Early History," *RevQ* 14 (1990): 521–41.

The growing hostility the Righteous Teacher met within and outside his own movement was probably the most immediate cause of the phenomenon we now call Qumran. The followers of the Righteous Teacher abandoned (and were forced to abandon) his initial attempt to gain the leadership of the movement. In a dramatic move, they decided to leave for the desert and form a settlement of their own (cf. 1QS 8.12–16).

On the ideological level, dualism was the answer of the Qumran community to their progressive alienation not only from Jewish society at large, but also from their parent movement, and ultimately from the traditional principles of the Enochic tradition. The experience of rejection reinforced the self-consciousness of the followers of the Righteous Teacher that membership was based exclusively on an individual call by God ("called by name," CD 4.4). Now, as the book of *Jubilees* had already understood, predestination was the only way to secure the righteousness of the chosen in this world, a world full of evil and impurity. Hence, God created the angel of darkness and the children of deceit, as well as the prince of light and the children of righteousness.

The progression toward a more and more pronounced dualism is apparent not only in the systemic analysis of the Dead Sea Scrolls, where dualism appears to be the culmination of centuries of intellectual reflection on the problem of evil; it is also clear in the redactional history of the sectarian documents, where dualism goes along with the abandonment of the Enochic myth of the fallen angels and of any reference to the freedom of human will.[32]

As the sectarians retreated into the desert and developed a theology based on cosmic dualism and individual predeterminism, a group of first-century-B.C.E. documents continued the Enochic-Essene legacy according to a different trajectory and polemically rejected the distinctive claims of the Qumran theology. None of them would be accepted in the Qumran library.

The first of these post-sectarian documents is the *Epistle of Enoch*, the result of a long interpolation (96:6–104:6) in the presectarian proto-*Epistle*. The *Epistle* does not simply lack specific Qumranic elements;[33] it also has specific anti-Qumranic elements. The most obvious is *1 En.* 98:4. The passage contains an explicit condemnation of those who state that since human beings are victims of a corrupted universe, they are not responsible for the sins they commit and can blame others (God or the evil angels) for having exported "sin" into the world. "I have sworn unto you, sinners: In the same manner that a mountain has never turned into a servant, nor shall a hill (ever) become a maidservant of a woman; likewise, neither has sin been exported into the world. It is the people who have themselves invented it. And those who commit it shall come under a great curse" (98:4).

---

[32] Jean Duhaime, "Dualistic Reworking in the Scrolls from Qumran," *CBQ* 49 (1987): 32–56.

[33] George W. E. Nickelsburg, "The Epistle of Enoch and the Qumran Literature," *JJS* 33 (1982): 333–48; Florentino García Martínez, *Qumran and Apocalyptic: Studies on the Aramaic Texts from Qumran* (*STDJ* 9; Leiden: Brill, 1992), 89.

The author of the *Epistle of Enoch* does not deny that evil has a superhuman origin; yet he holds human beings responsible for the sinful actions they commit. What the author aims to introduce is a clearer distinction between evil, which is from the angels, and sin, which is from humans, to show that the Enochic doctrine of evil does not contradict the principle of human responsibility. Evil is a contamination that prepares a fertile ground for sin (we might now use the term "temptation"), but it is the individuals themselves who have "invented" sin and therefore are responsible for their own deeds. The Qumran doctrine of individual predestination is the target of the cutting remark of the *Epistle.*

This strong and uncompromising appeal to human freedom and responsibility may seem surprising in a tradition, such as the Enochic, that from its inception had consistently repeated the view that human beings are victims of evil. However, it is much less revolutionary than it might seem at first sight. Since its origins, the major concern of Enochic Judaism was never to absolve human beings and angels from their sins. On the contrary, the scope of the myth of the fallen angels was to absolve the merciful God from being responsible for a world that the Enochians deemed evil and corrupted. In the Enochic system of thought, the two contradictory concepts of human responsibility and human victimization had to coexist between the Scylla of an absolute determinism and the Charybdis of an equally absolute anti-determinism. Accept either of these extremes, and the entire Enochic system would collapse into the condemnation of God as the source of evil or as the unjust scourge of innocent creatures.

The author of the *Epistle* also abandons the complex historical determinism on which *Jubilees*, the proto-*Epistle,* and the *Damascus Document* build their doctrines of election. The *Epistle* knows only the distinction between "now" and "those days," this world and the world to come, the present and the future of the final judgment. The author of the *Epistle* does not deny that already in this world there is a clear distinction between the chosen and the wicked. He transfers this dualism, however, onto the sociological level. The text identifies the chosen (the righteous and the wise) and the wicked (the sinners and the foolish) respectively with the poor (and powerless) and the rich (and powerful).

This leads the *Epistle* to reject the sectarian claim, made by the community of the Righteous Teacher since the *Damascus Document* appeared, that the chosen are called individually, "by name." God's election regards a broad category of people rather than named individuals, a fact that leaves more room for human freedom. God did not choose individuals to form an isolated community but elected a social category, the poor, as the recipient of God's promises. Individuals remain free to choose to which group they want to belong.

The author of the *Epistle* strenuously opposes the theology of separation as developed by the community of the Dead Sea Scrolls. In this world, the poor and the rich live side by side. The separation between the chosen and the wicked will occur only at the end of times. The emphasis on human responsibility allows the possibility of conversion. The author opposes any kind of predestination; in this world, the boundaries between the chosen and the wicked remain permeable. The door to salvation, which the *Damascus Document* keeps open only for a limited period of time and which the sectarian documents barred since the beginning for those who have not been chosen, will be open until the very last moment (cf. *1 En.* 99:10).

While the *Epistle* signals a return to some of the traditional themes of earlier Enochic Judaism, it also marks a fresh start away from those old foundations. No text of Enochic Judaism had ever before stated with such clarity that the superhuman origin of evil does not destroy and deny human responsibility. The *Epistle* had a lasting impact in shifting the emphasis from the ancient myth of the angelic sin to the mechanisms through which evil surfaces within each individual and, therefore, to the possibility of controlling the emergence of evil and resisting its temptation. It was the *Epistle*'s greatest success: the answer of Qumran was not the only possible answer to the questions raised by the earlier Enochic tradition.

That something went wrong in the relationship between the community of the Dead Sea Scrolls and Enochic Judaism is confirmed by the absence of another fundamental document of first century B.C.E. related to Enochic Judaism: the *Testaments of the Twelve Patriarchs*.[34] Interestingly, as in the case of the *Epistle of Enoch*, the *Testaments* seem to be familiar with, or to have used, some material preserved in Qumran.[35] The language of the *Testaments of the Twelve Patriarchs* presents even closer similarities with the sectarian documents of Qumran than does the *Epistle of Enoch.*

---

[34] Among the scholars who have argued for the Jewish Palestinian origin of the *Testaments*, see, in particular, Jarl H. Ulrichsen, *Die Grundschrift der Testamente der Zwölf Patriarchen: Eine Untersuchung zu Umfang, Inhalt und Eigenart der ursprünglichen Schrift* (Uppsala: Almqwist & Wiksell, 1991); Paolo Sacchi, "I Testamenti dei Dodici Patriarchi," in *Apocrifi dell'Antico Testamento* (ed. P. Sacchi; vol. 1; Turin: Unione tipografico-editrice torinese, 1981), 725–948; Anders Hultgård, *L'eschatologie des Testaments des douze patriarches* (2 vols.; Uppsala: Almqwist & Wiksell, 1977–81); David Flusser, "The Testaments of the Twelve Patriarchs," *EncJud* 13:184–86; Marc Philonenko, *Les interpolations chrétiennes des Testaments des Douze Patriarches et les manuscrits de Qoumrân* (Paris: Presses Universitaires, 1960).

However, the most typically sectarian elements are conspicuously missing in the *Testaments of the Twelve Patriarchs*, which seem rather to follow the trajectory of the *Epistle of Enoch* in emphasizing the freedom and responsibility of angels and humans. The duel between God and Belial is a real conflict, not a prestaged drama. There is no doubt that Belial will be defeated at the end (*T. Levi* 18:12–13), but until that moment, the devil is a rebellious and aggressive challenger of God's power and authority.

The human soul is the battlefield. Belial has a key for direct access to human selfhood; thus, Belial placed "seven spirits of deceit" in every human being "against humankind" (cf. *T. Reu.* 2:1–2). These seven spirits of deceit interact against the seven spirits that God placed in the human being, but more significantly, they interact with the last of these spirits, "the spirit of procreation and intercourse, with which come sins through fondness for pleasure" (2:8).

The distance of the anthropology of the *Testaments* from the Qumran doctrine of the spirits could not be greater. In the *Testaments*, God is not the source of both the good and evil spirits; the presence of evil spirits is both against God and against humankind. Not only is the internal struggle a deviation from the original plan of creation; its result also has not been preordained by God. The number of good and evil spirits is the same in each individual, which guarantees humans the fairness of the struggle and gives the last word over to human responsibility. It is the "conscience of the mind" that ultimately makes the difference. "So understand, my children, that the two spirits await an opportunity with humanity: the spirit of truth and the spirit of error. In between is the conscience of the mind which inclines as it will" (*T. Jud.* 20:1–2).

Although no longer ignoring the Mosaic Torah as done in the entire pre-Maccabean Enochic literature, the *Testaments of the Twelve Patriarchs* follow the traditional Enochic teaching that the power of evil makes obedience to the law insufficient in order to gain salvation. With Qumran, the *Testaments* share the paradox of a human being who does good but is evil. What one is becomes more important than what one does. What one is depends on the cosmic conflict between God and Belial. Yet, unlike Qumran, there is a way out. The answer is to fill the heart with an undivided love for God and the neighbor. Thus, there is no more room for desire and duplicity. "The Lord I loved with all my strength; and I love every human being. You do these as well, my children, and every spirit of Beliar will flee from you…so long as you have the God of Heaven with you, and walk with all humankind in simplicity of heart" (*T. Iss.* 7:6–7; cf. 3:6–5:3; *T. Reu.* 4:1; *T. Benj.* 3:4). In particular, in contrast to Qumran, the *Testaments* insist on the possibility of repentance and even banish any feeling of hatred toward the sinners. The twelve patriarchs provide formidable examples (cf. *T. Reu.* 1:9–10; *T. Sim.* 2:13; *T. Jud.* 15:4) and plenty of good advice. "Love one another from the heart, and if anyone sins against you, speak to him in peace. Expel the venom of hatred.…If anyone confesses and repents, forgive him.…Even if he is devoid of shame and persists in his wickedness, forgive him from the heart and leave vengeance to God" (*T. Gad* 6:3–7).

---

[35] Robert A. Kugler, *From Patriarch to Priest: The Levi-Priestly Tradition from Aramaic Levi to Testament of Levi* (Atlanta: Scholars Press, 1996).

David Flusser is the scholar who has emphasized most strongly the anti-Qumranic nature of the *Testaments of the Twelve Patriarchs.* "These people rebelled against the [Qumranic] doctrine of hatred, and abandoned its sharp dualism and its characteristically strict doctrine of predestination, and in their place developed a very humane and humanistic doctrine of love."[36] While remaining faithful to the same common foundations, the *Testaments of the Twelve Patriarchs* gave to the Enochic-Essene movement a completely different trajectory from that imparted by the community of Qumran.

The path opened by the *Epistle of Enoch* and by the *Testaments of the Twelve Patriarchs* was followed by another first-century-B.C.E. Enochic document, the *Similitudes of Enoch* (*1 Enoch* 37–71). The mystery of its absence from the Qumran library now has a perfectly reasonable explanation: the document was written after the parting of the ways between Qumran and Enochic Judaism.

Central to the *Similitudes* is what James C. VanderKam calls the "notion of reversal."[37] While this world is under the dominion of rebellious angels, in the world to come "the Elect One…would sit in the throne of Glory and judge ʿAzazʾel and all his company, and his army, in the name of the Lord of the Spirits" (*1 En.* 55:4). While in this world the well-to-do rule over and oppress the poor, "in those days, the kings of the earth and the mighty landowners shall be humiliated of account on the deeds of their hands" (48:8; cf. 46:4, 6). While light and darkness coexist in this world, in the world to come "there shall be light that has no end…for already darkness has been destroyed" (58:6).

---

[36] David Flusser, *The Spiritual History of the Dead Sea Sect* (Tel-Aviv: MOD, 1989), 79.

[37] James C. VanderKam, *Enoch: A Man for All Generations*, 134.

The "reversal" that *Similitudes* announces excludes any form of inaugurated eschatology that would annul human responsibility. *Similitudes* does not deny that the distinction between the oppressed and the oppressors is clearly set in this world, and that the righteous have the right and the duty before God to walk in their way. However, unpleasant as it may be, until that time of reversal, the righteous and the sinners have to live together. The sinners "deny the name of the Lord of the Spirits, yet they like to congregate in his houses and with the faithful ones who cling to the Lord of the Spirits" (*1 En.* 46:7–8). The later Enochic literature is clearly not isolationist. While the community of Qumran claimed to be the "house" established by God in this world, *Similitudes* reminds its readers that the "house of [God's] congregation" would be established only by God's messiah (53:6–7; cf. 38:1). While the sectarian community called itself the "righteous plant," *Similitudes* reserves this imagery for the messianic congregation that "shall be planted" when God will "reveal the Son of Man to the holy and the elect ones" (62:7–8). While the *Apocalypse of Weeks* (91:12–17; 93:1–10) had granted the gift of wisdom to the chosen among the chosen at the end of the seventh week, *Similitudes* claims that "wisdom went out to dwell with the children of the people, but she found no dwelling place" (42:1–3), and that "secrets of wisdom shall come out from the conscience of [the messiah's] mouth" (51:3; cf. 49:3–4). The gift of wisdom and the establishment of the community of the saints belong not to a preliminary stage but only to the future of the world to come, when God and God's messiah will overthrow the evil forces, angelic and human.

In *Similitudes*, the figure of the messiah gains a centrality that was unknown in the previous Enochic tradition and would remain foreign to the Qumran community. Because of the emphasis on predestination, at Qumran the messiahs were not, and could not possibly be, "the ultimate focus of the hopes of the sect";[38] messianic expectation never reached the center of the stage. *Similitudes* instead made the Danielic Son of Man a key character in the Enochic doctrine of evil.[39] As the one to whom all the eschatological gifts are related, the Son of Man strengthens the Enochic stance against any form of inaugurated eschatology, while his preexistence confirms God's foresight and control over this world without denying the freedom of angels and humans. The superhuman nature of the Son of Man enables him to defeat the angelic forces responsible for the origin and the spread of evil, a task that no human messiah (either priestly or kingly) could ever accomplish. The superhuman nature of the Son of Man also enables him to perform the judgment, a task that makes fully consistent the Enochic concern that the merciful and just God cannot be directly involved in any manifestation of evil, from its origin and spread to its final destruction.

---

[38] Collins, *Apocalypticism in the DSS*, 90.

[39] On the figure of the Son of Man in the context of middle Jewish messianic expectations, see John J. Collins, *The Scepter and the Star: The Messiahs of the Dead Sea Scrolls and Other Ancient Literature* (ABRL; New York: Doubleday, 1995); James H. Charlesworth, ed. *The Messiah: Developments in Earliest Judaism and Christianity* (Minneapolis: Fortress, 1992); Jacob Neusner, William S. Green, and Ernest S. Frerichs, eds., *Judaisms and Their Messiahs at the Turn of the Christian Era* (Cambridge: Cambridge University Press, 1987); Sigmund Mowinckel, *He That Cometh: The Messiah Concept in the Old Testament and Later Judaism* (trans. G. W. Anderson; New York: Abingdon, 1956).

Similitudes is the mature product of an anti-Qumranic Enochic stream that, drawing on the same ideological and literary background as the Dead Sea Scrolls, has now reached ideological and literary autonomy. While the redactional history of the *Epistle of Enoch* and the *Testaments of the Twelve Patriarchs* is still closely interwoven with the sectarian literature of Qumran, *Similitudes* is non-Qumranic more than anti-Qumranic. A gulf now separates the two groups.

CONCLUSION

QUMRAN, A MARGINAL SCHISMATIC COMMUNITY

A single unbroken chain of related documents unites the earliest Enochic literature to the sectarian literature of Qumran. The "Qumran chain" unfolds, link by link, from the book of the Watchers (*1 Enoch* 6–36), the Aramaic *Levi* (1Q21; 4Q213-214), and the *Astronomical Book* (4th–3rd cent. B.C.E.; *1 Enoch* 73–82); to *Dream Visions* (at the time of the Maccabean Revolt; *1 Enoch* 83–90); to *Jubilees* and the *Temple Scroll* (immediately afterward; 11Q19); to the proto-*Epistle of Enoch* (*1 En.* 91:1–94:5; 104:7–105:2) and the *Halakic Letter* (mid-second century B.C.E.; 4QMMT [4Q394–399]); and to the *Damascus Document* and the sectarian literature (from the second half of the second century B.C.E. to the first century C.E.). By sharing the same generative idea of the superhuman origin of evil, this chain of documents gives evidence of the ideological continuity between the ancient Enochic tradition and the community of Qumran.

By the time of the composition of *Jubilees* and the *Temple Scroll*, the Qumran chain took in another chain of documents, that of Zadokite literature. With the fall of the house of Zadok, many Enochians apparently accepted the Mosaic Torah as part of the common religious heritage, while exegetical interpretation allowed them to understand the once-rival tradition in light of their own principles.

In the aftermath of the Maccabean Revolt, the movement was marked by a deep crisis. The Enochians failed in their political attempt to replace the Zadokite leadership. Internally, the followers of the Righteous Teacher failed in gaining the leadership of the movement. The double experience of failure brought about, with a sense of impotence and frustration, an outburst of fanaticism that led to the foundation of the Qumran community. The chosen among the chosen became the accusers of their own people. In their view, Jews and Gentiles alike were under the dominion of Belial, and there was neither atonement for evil nor purification for impurity except for those individuals whom God had selected to step aside and enter the new community. "Anyone who declines to enter [the covenant of Go]d in order to walk in the stubbornness of his heart shall not [enter the com]munity of his truth.…He shall not be justified.…Defiled, defiled shall he be…" (1QS 2.25–3.5).

The existence of a large body of non-Qumranic documents of Enochic Judaism and the many references to "traitors" in the literature of Qumran testify that the sectarians did not achieve what they sought; their call for leadership was fiercely challenged within their movement. The Qumran chain split into two divergent lines, and the schism would neither be absorbed nor overcome. After the first polemical phase attested by the reworking of the *Epistle of Enoch* (with the interpolation of chs. 94:6–106:6) and by the composition *Testaments of the Twelve Patriarchs* on the basis of material also known by the sectarians, the two branches of Enochic Judaism ignored each other. The Qumranites developed the sectarian mentality of the despised, rejected, and abandoned outcast and became more and more predeterministic in their approach to the problem of evil and salvation. By contrast, the non-Qumran stream never lost contact with Jewish society; its theology staged the drama of responsible human beings torn between divine deliverance and the temptation of Satan, and eventually focused on a message of salvation for the "poor" at the end of times. The decreasing influence of Enochic literature on the sectarian texts and the absence of *Similitudes* from the Qumran library—two mysterious phenomena that so much have troubled modern scholars—are nothing but logical consequences of the schism between Qumran and Enochic Judaism.

From this point on, interaction of ideas and exchange of documents between the two groups cease. None of the major concerns of the later Enochic tradition make any sense in light of the Qumran sectarian theology.

Why should God warn people to convert and offer them divine help, if God's choice makes the individuals what they are? Why should God be removed from any relationship with evil, if God is the creator of both good and evil?

At Qumran, the freedom of God's decision annuls any other freedom, including God's own freedom to be merciful toward God's creatures. Enochic Judaism explores a different path; while confirming the superhuman origin of evil, it allowed them to preserve the freedom of Satan to rebel, the freedom of human beings to choose, and the freedom of God to bring deliverance. Evil is against God's will and is the unfortunate result of an act of rebellion, which only the joint efforts of God, humans, and the heavenly messiah can successfully defeat.

The parting of Qumran from its parent movement was a bad bet; withdrawing in the desert, the community may have still hoped to become the headquarters of a larger movement, but they were just as likely to turn themselves into a marginal fringe. The faith they had in predestination probably made them totally indifferent to such alternatives; they simply did what they believed God had preordained them to do. Their salvation did not depend on their being the majority or the minority.

Literary evidence does not leave any doubt about which branch was more successful, however. The popularity of the Enochic stream in Second Temple Judaism and its persistent influence in Christianity and rabbinic Judaism shine in comparison with the grim isolation of the Qumran stream. Apart from the sectarian literature, no document whatsoever, written after the end of the second century B.C.E., managed to find its way into the Qumran library; and no sectarian document whatsoever managed to find its way out of Qumran. A community that lives isolated in the desert, during two centuries neither importing nor exporting a single document, can hardly be considered a leading group.

Addendum: January 2005

I wrote this paper more than seven years ago, in the fall of 1997. At Princeton, for the first time, I was given the opportunity in an international conference to present what was to become known as the "Enochic-Essene Hypothesis" of Qumran origins.[40]

---

[40] I had already presented this hypothesis two years before the 1997 Princeton Symposium in my paper "Configurazione storica della comunità di Qumran," at a meeting of the Italian Biblical Association at L'Aquila (Sept. 14–16, 1995). See Gabriele Boccaccini, "E se l'essenismo fosse il movimento enochiano? Una nuova ipotesi circa i rapporti tra Qumran e gli esseni," *RStB* 9, no. 2 (1997): 49–67.

Since then, many things have happened. The publication of my *Beyond the Essene Hypothesis*[41] has aroused large interest and generated dozens of remarkable responses from specialists all around the world. It has made scholars think about the very existence of an ancient variety of Judaism ("Enochic Judaism") and of a social group (the "Enoch group") and drawn attention to the contribution given by this movement (and this group) to Essene and Qumran origins. A virtually ignored topic–the relationship between Enochians, Essenes, and Qumranites–has quickly become one of the central issues in the research in Second Temple Judaism.[42]

A. *The Rediscovery of Enochic Judaism*

The rediscovery of Enochic Judaism is undoubtedly one of the major achievements of contemporary scholarship.[43] That we are at the beginning of a broad and promising field of research is proved by the enthusiasm with which specialists from America, Europe, and Israel have welcomed the invitation of the University of Michigan to join the Enoch Seminar, a series of biennial meetings that step by step would cover the entire history of the movement, from its pre-Maccabean origins to its latest developments in Christianity and rabbinic Judaism.[44]

---

[41] Gabriele Boccaccini, *Beyond the Essene Hypothesis: The Parting of the Ways between Qumran and Enochic Judaism* (Grand Rapids: Eerdmans 1998).

[42] See Gabriele Boccaccini, ed., *Enoch and Qumran Origins: New Light on a Forgotten Connection* (Grand Rapids: Eerdmans 2005), which includes contributions by an international group of 47 specialists; and Gabriele Boccaccini, ed., *The Early Enoch Literature* (Leiden: Brill, forthcoming).

[43] The most recent and comprehensive introductions to Second Temple Judaism give broad recognition to this ancient Jewish movement of dissent. See Paolo Sacchi, *History of the Second Temple Period* (Sheffield: Sheffield Academic Press, 2000); Lester L. Grabbe, *Judaic Religion in Second Temple Judaism* (London: Routledge, 2000); Gabriele Boccaccini, *Roots of Rabbinic Judaism: An Intellectual History, from Ezekiel to Daniel* (Grand Rapids, Eerdmans 2002); George W. E. Nickelsburg, *Ancient Judaism and Christian Origins: Diversity, Continuity, and Transformation* (Minneapolis: Fortress, 2003). A glance at the textbooks and syllabi of courses in interbiblical, early Jewish, and early Christian studies at universities and seminaries all around the world shows how rapidly Enochic Judaism is gaining acceptance, even within the mainstream curriculum of undergraduate education. See, for example, Jeff S. Anderson, *The Internal Diversification of Second Temple Judaism* (Lanham, MD: University Press of America, 2002).

[44] Launched in 2000, the Enoch Seminar has become the laboratory for an interdisciplinary experiment that has no parallels in the field of Second Temple Jewish studies, which for centuries has been so heavily shaped and constrained by canonical boundaries. The Enoch Seminar first met at Sesto Fiorentino in 2001 ("The Origins of Enochic Judaism"), and then in Venice in 2003 ("Enoch and Qumran Origins") and Camaldoli in 2005 ("The Parables of Enoch and the Messiah Son of Man"). With the director Gabriele Boccaccini, the participants include, among others, Daniel

Thanks to the collective efforts of specialists from different countries and different fields of research, slowly but surely, the emphasis has shifted from the study of the Enoch texts to the study of the intellectual and sociological characteristics of the group behind such literature.[45] This is fully recognized by George Nickelsburg in his commentary on *1 Enoch*: "Collective terms like 'the righteous, the chosen, the holy' indicate a consciousness of community [by people]…who believed that their possession of the divinely given wisdom contained in the Enochic texts, constituted them as the eschatological community of the chosen, who are awaiting the judgment and the consummation of the end time."[46]

In summary, we now may with some confidence talk of Enochic Judaism as a nonconformist, anti-Zadokite, priestly movement of dissent, active in Israel since the late Persian or early Hellenistic period (fourth century B.C.E.).[47] At the center of Enochic Judaism was neither the Temple nor the Torah, but a unique concept of the origin of evil that made the "fallen angels" (the "sons of God," also mentioned in Gen 6:1–4) to be ultimately responsible for the spread of evil and impurity on earth, the perpetrators of a "contamination that has spoiled [human] nature and…was produced before the beginning of history."[48]

B. Enoch and Qumran Origins

The problem of Qumran origins cannot be easily dismissed simply by arguing multiple influences. In history there is no such thing as a group or movement that suddenly emerges, coming from nowhere, taking a little from everywhere. In the case of Qumran, it is apparent that both Enochic and Zadokite thought influenced the sectarian literature. However, since in the sectarian scrolls, the members of the Qumran sect

refer to themselves as "sons of Zadok," the classical Essene hypothesis maintained that the leadership at Qumran was provided by members of the priestly house of Zadok. Once they lost the power and the Maccabees became the new dynasty of high priests, they would have retreated into the wilderness in protest.

The problem with such a reconstruction was that all ancient sources agree that the descendants of the Zadokite high priests fled not to Qumran, but to Egypt, where they built a rival Temple at Heliopolis. We should in the first place have more properly spoken of a split within the Zadokite family.

The Enoch literature provides yet another major difficulty. If the Qumranites were indeed a Zadokite movement, why did they preserve not only Zadokite texts (like the Mosaic Torah) but also a large collection of anti-Zadokite texts? Why did they share the Enochic idea that the Second Temple was since the beginning a contaminated Temple, led by an illegitimate priesthood? No member of the house of Zadok would ever have dismissed the legitimacy of the Second Temple without losing their own identity and undermining their claim to be the only legitimate priesthood.

Furthermore, it is the Enochic idea of demonic origin of evil, not the Zadokite covenantal theology, that provides the foundation for the trajectory of thought from which the Qumran predestinarian theology emerged. What would have been the point of maintaining that the angels are in fact responsible for the behavior of human beings, if only in order to stress that it was God who created both the good and the evil angels, and so indirectly admitting that God was ultimately the one who predetermined the destiny of each individual? Why was it necessary to state the presence of angels in the chain of cause-and-effect elements that determine the destiny of each individual? Only if the myth of the fallen angels was in fact the starting point upon which the Qumranites built their predestinarian system of thought–only thus would such a twisted theology about the origin of evil make sense.

In spite of any other influence, the relationship between the Enochic literature and the sectarian scrolls is so close that it seems appropriate to describe the Qumran community as "a latter-day derivative of or a successor to the community or communities that authored and transmitted the Enochic texts."[49] While calling themselves the "sons of Zadok," the Qumranites seemed to despise everything the Zadokites had done, and they held in great esteem the literature of their Enochic enemies. Should we then face the impossible paradox of a Zadokite movement, rooted in an anti-Zadokite ideology? Or should we rather stop "talking Zadokite" and read the references to the "sons of Zadok" not as evidence of an actual genealogical relation but typologically, as Philip Davies already suggested many years ago?[50]

---

[49] Nickelsburg, *1 Enoch*, 65.

C. The Parting of the Ways between Qumran and Enochic Judaism

The relationship between Enoch and Qumran was not limited to the period of the origins of the community; instead, it is far more complex and fascinating. After Enochic Judaism played such an important role in Qumran origins, something happened to separate the Enoch and the Qumran group. In the library of Qumran, which preserved and cherished all Enoch books composed before the birth of the community, the later literature of Enoch is conspicuous by its absence. This suggests the existence "outside Qumran…[of] circles that transmitted" the ancient Enoch literature.[51] Furthermore, in the later Enoch literature we read statements and see the development of ideas that openly contradict the principles of individual predeterminism held by the sectarians of Qumran. We no longer need to face the mystery of the absence of the *Parables/Similitudes* of Enoch (*1 Enoch* 37–71) from the Qumran library: its exclusion is the logical consequence of the schism between Qumran and Enochic Judaism.[52]

As the Enochic movement lost its touch with Qumran, at the same time Qumran lost its interest in the Enoch literature.[53] The last quotation of Enoch is in the *Damascus Document*, therefore at a very early stage in the life of the community. The more the community strengthened its dualistic and predeterministic worldview, the more they lost interest in a literature that, although "assert[ing] deterministically, on the one hand, that…sin…had its origin in the divine realm…on the other hand, maintain[ed] that…evil originated not with God's permission, but as the result of a rebellious conspiracy that was hatched behind God's back."[54]

D. Perspectives for Future Research

The Enochic-Essene hypothesis has grown and strengthened among its readers and critics. These changes have brought a stronger awareness of the need to make a clear methodological distinction between "intellectual movements" (or Judaisms) and "social groups" as the foundation for any sound reconstruction of the history of Jewish thought. A Judaism is not a single social group but a proliferation of individuals and social groups.[55]

The chain of documents I identify in my essay does not mean that the same social group wrote, one after the other, *Dream Visions*, *Jubilees*, the *Temple Scroll*, the *Apocalypse of Weeks*, the *Halakic Letter*; and after an inner split, the sectarian literature of Qumran, on one hand; and the *Epistle of Enoch*, the *Testaments of the Twelve Patriarchs*, and the *Parables/Similitudes* of Enoch, on the other. What I have identified is an intellectual movement or a Judaism, not a single social group.

The sources themselves provide some evidence that the documents preserved in the Qumran library were the product of at least three different social groups (Enochians, urban Essenes, and Qumranites). We still struggle to define the relationships among these groups. For example, was Qumran the headquarters of the Essenes, or a marginal splinter group of Essenes, as the Groningen hypothesis has proposed?[56] Were the Enochians closer to the urban Essenes, as I suggest in my essay, or have they parted from them as well? One does not need to be a prophet to foresee that these questions will accompany us for many years to come.

It is true that none of the ancient sources speak of the Enochians or connect them to the Essene movement. Systemic analysis, however, shows that the Enoch group, the urban Essenes, and the Qumran community, although distinct social groups, were all part of the same trajectory of thought. It seems obvious to conclude that, after generating the Essene groups (and the Qumran community), the Enoch group did not lose its ideological and sociological identity, nor can we identify it *sic et simpliciter* with the urban Essenes described by Philo and Josephus. Clearly, we face a large diversity of distinct and somehow competing social groups. Does the term "Essene" apply to all?

Paolo Sacchi has recently suggested that we limit the term "Essene" to the urban Essenes and the literature related to them (*Jubilees*, *Testaments of*

---

[55] Gabriele Boccaccini, "Texts, Intellectual Movements, and Social Groups," in *Enoch and Qumran Origins: New Light on a Forgotten Connection* (ed. G. Boccaccini; Grand Rapids: Eerdmans 2005), 417–25.

[56] Florentino García Martínez, "Qumran Origins and Early History: A Groningen Hypothesis," *FO* 25 (1989): 113–36.

the Twelve Patriarchs, etc.), not to the Qumran community (and the sectarian scrolls) or the Enoch group (and its literature collected in *1 Enoch*).[57] The problem is that Pliny the Elder and Dio Chrysostom apply the term "Essene" to the Qumran group, too.

John Collins would rather limit the term "Essene" to Qumran and then use the term "apocalypticism" to denote the entire movement;[58] the problem is that Philo and Josephus apply it to the urban Essenes, too, and apocalypticism is a phenomenon that goes far beyond the boundaries of the intellectual movement of which Enochians, urban Essenes, and Qumranites were part. Since the ancient sources apply the term Essene to two of the major components of this movement, it seems reasonable to me to use the term "Essene" or "para-Essene" to denote the entire movement. After all, ancient historians also seem to be aware that "Essenism" was not a single social group but rather a large and diverse movement. Josephus speaks of different groups of urban Essenes; Pliny and Dio apply the same term to the secessionists of Qumran; Philo seems to encompass under the same label even the Egyptian Therapeutae. The link among these groups is so close that anyway we would need to create a common term to denote collectively the entire movement to which they all belong.

In this sense, I happily and unrepentantly stick to my claim that the Enochians were so closely associated to the (urban) Essenes that they can be properly labeled as an Essene (or para-Essene) group, and yet I would not say that they were *the* Essenes or the "parent group" from which the community of Qumran split. The Enochians were and remained a single social group, while in my view the term "Essene" denotes the much larger intellectual movement that historically manifested itself in a proliferation of different social groups such as the Enochians, the urban Essenes, the Qumran community, perhaps the Therapeutae, and later the Jesus movement.

Obviously, in delivering these conclusions, summarized in this postscript as points A, B, and C, my paper would have benefited by the a posteriori application of the methodological and terminological discussions that I have summarized as point D. In particular, within the non-Qumran

---

[57] Paolo Sacchi, "History of the Earliest Enochic Texts," in *Enoch and Qumran Origins: New Light on a Forgotten Connection* (ed. G. Boccaccini; Grand Rapids: Eerdmans 2005), 401–7.

[58] Collins, *Apocalypticism in the DSS*; idem, "Enoch, the Dead Sea Scrolls, and the Essenes: Groups and Movements in Judaism in the Early Second Century B.C.E.," in *Enoch and Qumran Origins: New Light on a Forgotten Connection* (ed. G. Boccaccini; Grand Rapids: Eerdmans 2005), 345–50.

Essenes, the distinction between the urban Essenes (and their literature) and the Enochic group (and their literature), a distinction somehow overshadowed in my paper by the emphasis on the schism between Qumran and Enochic Judaism, would have brought much more clarity and strength.

Facing the choice of whether to publish the text as it was or to update it, I decided for the former. This paper is a precious testimony of the first steps of a fortunate hypothesis, and as such I am proud to present it to the readers of the present volume.

CHAPTER THREE

THE BIBLICAL SCROLLS FROM QUMRAN AND THE CANONICAL TEXT

Frank Moore Cross

The finds in the Judean Desert have taught us a good deal about how and when the stabilized text and canon of the Hebrew Bible came into existence. They extend the labors and insights revealed by the intense searches and collations of medieval manuscripts carried out in the last decades of the eighteenth century.

Analysis of the collections, especially those of Benjamin Kennicott and Giovanni Bernardo de Rossi, led to the conclusion that all medieval texts—all that were extant at that time—could be traced back to a single, narrow recension, the Rabbinic Recension of roughly the turn of the Common Era. Paul de Lagarde claimed that all went back to a single manuscript or archetype, pressing fragile arguments too far, and Ernst Friedrich Rosenmueller's one-recension theory has gained scholarly consensus.

The biblical scrolls from Masada (dating from before 73 C.E.) and from the Bar Kokhba Caves, especially the great *Minor Prophets Scroll* from Murabbaʿat, dating to ca 50–70 C.E.,[1] reveal a fully fixed text and clearly postdate the Rabbinic Recension. To date, none of the biblical texts from Masada and the southern caves show any sign of the pluriform character of the biblical texts from Qumran. Indeed, even the so-called proto-rabbinic texts from Qumran show a range of variation which differs *toto caelo* from that of Masada and the southern caves.

I think it is reasonable to think that labors of fixing a text and canon—tasks that complement each other—fall in the early, not the late, first century. Josephus, writing in the last decade of the first century C.E., presumes the fixation of the text and the stabilization of the canon, a text and canon we may designate Pharisaic.

---

[1] The script of the manuscript is coeval with 4QPs^c (4Q85) and 4QDeut^j (4Q37), and considerably earlier than Mur 24 (dated to 133 C.E.). See Frank M. Cross, "The Development of the Jewish Scripts," in *The Bible and the Ancient Near East: Essays in Honor of William Foxwell Albright* (ed. G. E. Wright; Garden City, NY: Doubleday, 1961), 133–202, esp. figure 2, lines 7–10.

The "canon" of Josephus merits closer examination:[2]

> It therefore naturally, or rather necessarily follows (seeing that with us it is not open to everybody to write the records, and that there is no discrepancy in what is written; seeing that, on the contrary, the prophets alone had this privilege, obtaining their knowledge of the most remote and ancient history through the inspiration which they owed to God, and committing to writing a clear account of the events of their time just as they occurred)—it follows, I say, that we do not possess myriads of inconsistent books, conflicting with each other. Our books, those which are justly accredited, are but two and twenty, and contain the record of all time. Of these, five are the books of Moses, comprising the laws and the traditional history from the birth of man down to the death of the lawgiver. From the death of Moses until Artaxerxes, who succeeded Xerxes as king of Persia, the prophets subsequent to Moses wrote the history of the events of their own times in thirteen books. The remaining four books contain hymns to God and precepts for the conduct of human life.
>
> From Artaxerxes to our time the complete history has been written, but has not been deemed worthy of equal credit with the earlier records because of the failure of the exact succession of prophets.[3]

Josephus, writing in Rome in the last decade of the first century C.E., asserted that there was a fixed and immutable number of "justly accredited" books, twenty-two in number. The logic of their authority is rested in their derivation from a period of uncontested prophetic inspiration, beginning with Moses and ending in the era of Nehemiah. Specifically, he excluded works of Hellenistic date and, implicitly, works attributed to pre-Mosaic patriarchs.

In the subsequent paragraph, Josephus adds that the text of these works is fixed to the syllable:

> We have given practical proof of our reverence for our scriptures. For although such long ages have now passed, no one has ventured to add, or to remove, or to alter a syllable; and it is an instinct with every Jew, from the day of his birth, to regard them as decrees of God, to abide by them, and if need be, cheerfully to die for them.[4]

[4] *Ag. Ap.* 1.42 (LCL).

Even when it is recognized that Josephus not infrequently overstated his case in propagandizing to a Greek-speaking audience, one must still affirm that he regarded the Hebrew Bible as having, in theory at least, an immutable text.

Where are we to seek the origin of Josephus's assertions concerning the closed canon of Hebrew Scriptures? As we shall see, there is no evidence in non-Pharisaic Jewish circles before 70 C.E. (the Essenes of Qumran, the Hellenistic Jewish community of Alexandria and Palestine, the Jewish-Christian and Samaritan sects) for either a fixed canon or text. Until quite recently there has been a scholarly consensus that the acts of inclusion and exclusion limiting the canon were completed only at the "Council of Jamnia" (Yavneh), meeting about the end of the first century C.E. However, recent sifting of the rabbinic evidence makes clear that in the proceedings of the academy of Yavneh, at most the rabbis discussed marginal books of the canon, specifically Qohelet and Song of Songs, and asserted that they "defiled the hands."[5] The passage in *m. Yad.* 3:5 records traditions about a dispute concerning Qohelet between the schools of Hillel and Shammai, with the Hillelites insisting (against the Shammaites) that Qohelet defiled the hands. The academy of Yavneh in the days of Rabbi Eliezer ben Azariah and Yoḥanan ben Zakkai apparently upheld the Hillelite dictum on Qohelet or on both Qohelet and the Song of Songs. It must be insisted, moreover, that the proceedings at Yavneh were not a "council," certainly not in the late ecclesiastical sense.[6] Whatever decisions were taken at Yavneh, they were based on earlier opinions, and they failed to halt continued disputes concerning marginal books: Song of Songs, Qohelet, and Esther of the "included" books, and Ben Sira among the "withdrawn" or apocryphal. In any case, it is clear that Josephus in Rome did not take his cue from contemporary or later proceedings at Yavneh, nor did he manufacture a theory of canon from whole cloth.

Thinly concealed behind Josephus's Greek apologetics is a clear and coherent theological doctrine of canon. There can be little doubt that he echoes his own Pharisaic tradition and specifically the canonical doctrine of Hillel and his school. Josephus is not alone in his testimony. We are now able to reconstruct an old canonical list, the common source of the so-called Bryennios List and the Canon of Epiphanius, which must be dated to the end of the first or the beginning of the second century C.E.[7] It is a list of biblical works "according to the Hebrews" and reflects the same twenty-two-book canon we find in Josephus, echoed in the independent canonical lists of Origen and Jerome. The twenty-four-book canon mentioned in 4 Ezra (= 2 Esdras; ca. 100 C.E.)[8] and in the rabbinic sources (most elaborately set out in *b. B. Bat.* 14b–15a) almost certainly is identical in content but reckons Ruth and Lamentations separately. The uniting of Ruth with Judges, and Lamentations with Jeremiah, is quite old, to judge from its survival in the Septuagint and the explicit testimony of Origen to the Hebrew ordering. The rabbinic tradition that Samuel wrote Judges and Ruth (in addition to Samuel), and Jeremiah the book of Lamentations, may be an indirect witness. The association of Ruth and Lamentations with Qohelet, Song of Songs, and Esther in the *Five Megillot* evidently reflects a secondary development, growing out of their liturgical usage in the festivals. One notes also that Josephus and the early list place Job among the Prophets; the old list places Job in close association to the Pentateuch. The use of Paleo-Hebrew for Job alone outside the Pentateuch as a biblical hand suggests that this is an early feature, as does the rabbinic tradition attributing the authorship of Job to Moses.

---

[5] See Sid Z. Leiman, *The Canonization of the Hebrew Scripture: The Talmudic and Midrashic Evidence* (Hamden, CT: Archon Books, 1976) esp. 72–120.

[6] See Jack P. Lewis, "What Do We Mean by Jabneh?" *JBR* 32 (1964): 125–32; and more recently, David E. Aune, "On the Origins of the 'Council of Javneh' Myth," *JBL* 110 (1991): 491–93.

Evidence derived from the Kaige Recension suggests a *terminus post quem* for the fixation of the Pharisaic canon. We have noted (above) that these revisers used as their base a proto-rabbinic text-type, not the final, fixed Rabbinic Recension. Similarly, their revision extended to Baruch and a longer edition of Daniel, an effort difficult to explain if the book of Baruch and the additions to Daniel had already been excluded from the Pharisaic canon. Since their recensional labors can be dated to the late first century B.C.E. and their Pharisaic bias is clear, it follows that, as late as the end of the first century B.C.E., an authoritative canonical list had not emerged, at least in its final form, even in Pharisaic circles.[9] On the other hand, the pressures and needs leading to the final form of the text and canon of the Rabbinic Recension are well under way.

---

[7] See the study of Jean-Paul Audet, "A Hebrew-Aramaic List of Books of the Old Testament in Greek Transcription," *JTS*, NS 1 (1950): 135–54. Not all of Audet's arguments for the early date of the list are convincing, but his conclusion appears sound and even overly cautious.

[8] 4 Ezra (2 Esd) 14:44–46.

[9] See the discussion of Emanuel Tov, *The Septuagint Translation of Jeremiah and Baruch Discussion of an Early Revision of the LXX of Jeremiah 29–52 and Baruch 1:1–3:8* (HSM 8; Missoula, MT: Scholars Press, 1976), esp. 168–70; and idem, *The Greek Minor Prophets Scroll from Nahal Hever (8HevXIIgr) (The Seiyal Collection I)* (ed. E. Tov, R. Kraft, and P. J. Parsons; DJD 8; Oxford: Clarendon, 1990). On the date of this manuscript, see Peter J. Parsons's contribution to *The Greek Minor Prophets Scroll*, 19–26. Parsons and Theodore C. Skeat date the manuscript in the late first century B.C.E. Of course, *8HevXIIgr* is not the autograph.

The existence of scrolls reflecting the fixed rabbinic text from ca. 70 C.E., well before the so-called Council of Yavneh, and the presumption of a fixed Pharisaic canon and text held by Josephus in the late first century C.E., provide a *terminus ad quem* for the completion of the Rabbinic Recension. And the activity of revising the Old Greek (OG) translation by proto-rabbinic manuscripts to produce the Kaige or proto-Theodotionic Recension in the late first century B.C.E. provide a *terminus post quem.* These data place us squarely in the time of Hillel and his house.

There are also other bits of evidence that have not been used hitherto, which tend to support an early first century C.E. date for the Rabbinic Recension. There is the bizarre phenomenon of the *Qere perpetuum* in the Pentateuch, where the feminine personal pronoun *hîʾ* is spelled *hwʾ* in the Kethib. The most plausible explanation of this is that the manuscript or manuscripts copied for the Pentateuchal Recension was one in which *waw* and *yod* were not distinguished in the Jewish script. This occurs at only one time in the development of the Jewish scripts: in the early Herodian period (30–1 B.C.E.).[10] Note also the rejection by the rabbis of the Paleo-Hebrew script used at Qumran for copying Pentateuchal manuscripts and Job, in formal inscriptions from the temple areas in Jerusalem and in Samaria, in the Samaritan Pentateuch, and on Jewish coinage of the Hasmonean and Roman periods. This also involves a rejection of the common Palestinian text of the Pentateuch in use at Qumran, by the Sadducean priesthood of Mount Gerizim, and of course, in the later Samaritan Recension of the Pentateuch. This rejection is remarkable given the nationalism of the time; we can best explain it by the supposition that there were no available proto-rabbinic manuscripts inscribed in Paleo-Hebrew script.

In view of the evidence, we are inclined to posit a thesis: The same circumstances that brought about the textual crisis leading to the fixation of the Hebrew text–varied texts and editions, party strife, calendar disputes, sectarianism, the systematization of hermeneutic principles and halakic dialectic attributed to Hillel–were the occasion for a "canonical crisis" and the fixation of a Pharisaic canon. Furthermore, Hillel was a central figure in sharpening the crisis and responding to it. The fixation of the text and the fixation of the canon were thus two aspects of a single if complex endeavor. Both were essential to erect "Hillelite" protection against rival doctrines of purity, cult, and calendar; against alternate legal *dicta* and theological doctrines; and indeed, against the speculative systems and mythological excesses of certain apocalyptic schools and proto-gnostic sects.[11]

---

[10] See Cross, "The Development of the Jewish Scripts," figure 2, line 9.

[11] The *Halakhic Epistle*, 4Q394–4Q399 (4QMMT), is an excellent example of halakic debate and disagreement in this era. See now Elisha Qimron and John Strugnell,

Hillel came up from Babylon and became the dominant and most creative spirit of his day in mainstream Judaism. He was a giant whose impress on Pharisaism cannot be exaggerated and whose descendants were the principal leaders in the "normative" Jewish community for many generations. It would not be surprising if the conservative Torah scrolls that he knew, and to which he was accustomed, became under his urging the basis of the new Recension. It is not impossible too that an old saying embedded in the Babylonian Talmud preserved a memory of the role of Hillel in the events leading to the fixation of the Hebrew text and canon:

> When the Torah was forgotten in Israel, Ezra came up from Babylon and established it (*wysdh*); and when it was once again forgotten, Hillel the Babylonian came up and reestablished it (*wysdh*).[12]

This much seems certain: In Jewish history the vigorous religious community in Babylon repeatedly developed spiritual and intellectual leaders who reshaped the direction of Palestinian Judaism and defined its norms. Such was the case in the restoration of the Persian period, in the person of Hillel, and in the rise of the Babylonian Talmud.

The discovery of ancient manuscripts in the eleven caves of Khirbet Qumran in the Wilderness of Judah has provided the first full light on the ancient Hebrew text of the Bible in the era before the fixing of text and canon. There is no sign of a canon at Qumran, nor any tendency that can be perceived of the influence of the Rabbinic Recension, or of a drift toward it. Among the Dead Sea Scrolls are many manuscripts that we can label proto-rabbinic in text. But there are also manuscripts related to the *Vorlage* of the OG Bible, and pentateuchal manuscripts of the Palestinian textual family that gave rise to the Samaritan recension of the Pentateuch. The biblical manuscripts of Qumran exhibit variants of a type that differ *toto caelo* from the character of the variants found in medieval manuscripts. In the case of a number of biblical books, alternative editions or recensions (as opposed to textual families) were circulating in the several Jewish communities into the Roman period. The most stunning examples are the short text of Jeremiah (related to that

Qumran Cave 4.V: Miqsat Maʿase ha-Torah (ed. E. Qimron and J. Strugnell; DJD 10; Oxford: Clarendon, 1994); of particular interest is appendix 1, by Yaʿakov Sussmann.

[12] From *b. Sukkah* 20a. Efraim E. Urbach, *The Sages, Their Concepts and Beliefs* (trans. I. Abrahams; 2 vols.; Jerusalem: Magnes, 1975), 1:588 and 1:955n91, comments on this statement attributed to R. Simʿon bin Laqish: "It appears that he added the reference to R. Ḥiyya and his sons to a much older dictum." Lee Levine of the Hebrew University first alerted me to *b. Sukkah* 20a. Hillel's "reestablishment of the Torah" has, of course, been taken heretofore more generally to apply to his role in the interpretation of oral and written law, or even figuratively to his exemplary "living of the Torah."

used by the OG translator), and the long text of Jeremiah, ancestral to that chosen by the rabbis in their Recension. Manuscripts of proto-Samaritan type show extensive, indeed, in the case of 4QNum^b (4Q27), systematic editorial expansion.[13] In the case of Daniel, the rabbis chose a short edition, and the OG translators used a longer text edition.[14] This list of long and short editions can be extended. The plurality of text-types and editions at Qumran can be explained in part by remembering that the Zionist revival, beginning in Maccabaean times and extended by Parthian expulsions, brought a flood of Jews from Babylon, Syria, and Egypt back to Jerusalem. Indeed, the bizarre plurality of texts and editions at Qumran is a good illustration of the conditions that produced a crisis and required resolution, namely, the Rabbinic Recension of the early first century C.E.

The Qumran Scrolls force us to grapple in a wholly new way with problems of the canonical text. It is obvious that there was never an "original text" at any one moment of time. Biblical books, those with authors or editors, were revised, rewritten, expanded, truncated. These changes, moreover, took place before the later books were written or edited. Grammar, lexicon, and orthography were brought up to date. So what are we to do in the two areas of textual criticism and establishing anew a plausible doctrine of canon?

Part of the rethinking on matters of text and canon has already been forced by the development of the disciplines of historical-critical study. Historical criticism has broken the back of doctrines of inerrancy and produced a massive retreat from and debate concerning doctrines of inspiration, as reflected in two Calvinist confessions.[15]

In the Westminster Confession of 1647 we read:

> The Old Testament in Hebrew (which is the native language of the people of God of old) and the New Testament in Greek (which at the time of the writing of it was most generally known to the nations), being immediately

---

[13] See Nathan Jastram, "The Text of 4QNum^b," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill Publishers, 1992), 1:177–98.

[14] See the important study of Eugene C. Ulrich, "Pluriformity in the Biblical Text, Text Groups, and Questions of Canon," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill Publishers, 1992), 1:23–41.

[15] The texts are taken from the *Book of Confessions*, part 1 of the Constitution of the United Presbyterian Church in the United States of America (Philadelphia: Office of the General Assembly of the United Presbyterian Church, 1970).

> inspired by God, and by his singular care and providence kept pure in all ages, are therefore authentic. (6.008)
>
> The books commonly called Apocrypha, not being of divine inspiration, are no part of the canon, nor be otherwise approved, or made use of, than other human books. (6.003) The authority of the Holy Scripture, for which it ought to be believed and obeyed, dependeth not on the testimony of any man or church, but wholly upon God (who is truth itself) the author thereof; and therefore it is to be received because it is the Word of God. (6.004)

This confession comes quite close to being a doctrine of inerrancy and has been so interpreted by some conservative Calvinists. Its rootage in the doctrine of *sola scriptura* could not be clearer.

In the Presbyterian Confession of 1967 we find:

> The Bible is to be interpreted in the light of its witness to God's work of reconciliation in Christ. The scriptures, given under the guidance of the Holy Spirit, are nevertheless the words of men, conditioned by the language, thought forms, and literary fashion of the places and times at which they were written. They reflect views of life, history, and the cosmos which were then current. The church therefore has an obligation to approach the scriptures with literary and historical understanding. As God has spoken his word in diverse cultural situations, the church is confident that he will continue to speak through the scriptures in a changing world and in every form of human culture. (9.29)

Here the impact of historical criticism could not be more obvious. Although the Old Testament is declared "indispensable to understanding the New," the christocentric thrust of recent Reformed theology is apparent in the confession.

APPENDIX: PERSONAL REFLECTIONS

I doubt that the Qumran finds will force the several religious communities to alter their several canons. Tradition and authority in the churches and synagogues play too strong a role. However, the scrolls should have a serious impact on the ways in which we establish the text of biblical books. I think there are perhaps three approaches available to scholars and religious authorities.

1. Using all available materials, establish the best possible text of the Rabbinic Recension. In the great Jerusalem Bible Project, this is the stated goal of the late Moshe Goshen-Gottstein, and I suspect that it remains the goal of his successors.

2. Select the text authorized by or used by an authoritative figure and sanctioned by the religious community. One may choose the Bible of the house of Hillel, that is, the Rabbinic Recension (which is little different from the first alternative), or one may be more precise and decide on a particular manuscript, such as the Aleppo Codex presumably authorized by Maimonides, or the Hebrew underlying the Vulgate of Jerome, or the *Vorlage* of the OG Bible. One young Presbyterian, confronted with the mass of variant readings in Hebrew and Greek manuscripts, was flabbergasted. After wrestling with the problem, he finally reached an eminently reasonable solution and actually wrote a book setting it out. The canonical texts for which he argued are the Hebrew and Greek ones used and reflected in the commentaries of John Calvin. Is John Calvin not a more authoritative figure than Jerome, a Roman Catholic? Is not Calvin a superior authority to Hillel, a Jewish rabbi?
3. Using all available materials, the Qumran Scrolls, the manuscripts of the OG, the Targumim, and so on, establish an eclectic text following the text-critical methods used in establishing critical texts of all ancient works. In the case of the New Testament, scholars have accomplished this with only a little turmoil. In establishing an eclectic text of the OG Bible, resurrecting a plausible approach to the so-called proto-Septuagint, there has been heated debate, a debate now brought to an end, in my judgment, by the Qumran and other scrolls from the Judean Desert. The task of the textual critic is to ferret out inferior readings. We cannot get back to an inerrant text nor to an original text. However, the text-critic can vastly improve the traditional biblical text and pursue the goal of finding superior readings.

So far as I am aware, attempts to prepare an eclectic text of books of the Hebrew Bible using Qumran evidence along with the traditional versions have been made only in the case of the books of Samuel by Patrick W. Skehan and me in the New American Bible, and by Kyle McCarter in his Anchor Bible commentary on Samuel.[16]

Choice from among these three approaches ultimately will root in theological dogma. Meanwhile, I see no reason why biblical scholars cannot pursue the ultimate goals of textual criticism and the creation of eclectic texts of biblical books where there is sufficient data.

CHAPTER FOUR

THE DEAD SEA SCROLLS AND THE HEBREW SCRIPTURAL TEXTS

Eugene C. Ulrich

The historical evidence for our understanding of the textual character and the contents of the Bible in antiquity has multiplied greatly. As is often the case with new knowledge, our ability to understand, digest, and describe it adequately languishes somewhat behind the evidence.

At Qumran and neighboring sites in the Judean Desert, explorers discovered about 230 manuscripts of the books of the Hebrew Scriptures, providing documentary evidence that is abundant, authentic, and contemporary with the formation, in the crucial period of the origins of rabbinic Judaism and Christianity, of what has come to be our Bible.

This essay describes the advance provided by the Dead Sea Scrolls in understanding the Bible by discussing (1) the evidence available before the discovery of the scrolls, as well as the prevalent mentality and categories for understanding them; (2) the textual evidence provided by the scrolls; (3) the resulting changes in understanding the text, through a review of theories proposed to explain the history of the biblical text; and (4) a perspective outlining the development of the scriptural texts and (not the canon but) the process progressing toward the eventual canon(s).

1. Before the Discovery of the Scrolls

Before the modern discovery of the scrolls, starting in 1947, the primary sources of our knowledge concerning the text and the history of the text of the Hebrew Bible were the Masoretic Text (MT), the Samaritan Pentateuch (SP), and the Septuagint (LXX). The Targum, Peshitta, and Vulgate were also available, but they are for the most part literal translations of texts close to the MT, and so, despite a great deal of textual analysis, did not pay large dividends in terms of preferable early readings relative to the MT. In contrast, the Old Latin version was translated from an early form of the LXX, and so it not infrequently preserved solid early readings that the OG had accurately translated, even though the received forms of the developed Greek text had lost the readings when the Greek was "corrected" toward the MT on the presumption that the MT was the "original" Hebrew.[1]

The prevailing mentality was that of an "*Urtext*," a single original Hebrew text that no longer existed in its purity, but with its witnesses eventually emerging in the MT, the SP, and the LXX in discoverably modified ways. Thus, the three main collections of texts from antiquity were thought to be witnesses to a single text, and the variants displayed through a comparison of them were for the most part easily explainable as one- or two-stage developments–through classifiable errors, changes, expansions, or omissions–from that common original text. Hence, when scholars compared the MT with the SP, rediscovered in 1616, usually they (correctly) considered the SP secondary; and when they compared the MT with the LXX, more often than not they (sometimes correctly) considered the LXX "a free translation," or (incorrectly) "a paraphrase," or (often incorrectly) "erroneous," and therefore secondary.

For example, in Exod 32:10–11 the MT and SP read as follows:

> MT
>
> "…my anger may ignite against them and I may consume them;
> but I will make you a great nation."
> [11]Then Moses entreated the Lord…
>
> SP
>
> "…my anger may ignite against them and I may consume them;
> but I will make you a great nation."
> But against Aaron the Lord was very angry, enough to destroy him;
> so Moses prayed on behalf of Aaron.
> [11]Then Moses entreated the Lord…

One easily recognizes that what the SP has done is insert the statement about Aaron from the parallel passage in Deut 9:20, word for word except for the grammatically required change from the first person "I" to the third person "Moses," since Deuteronomy is a first-person speech by

---

[1] See Julio C. Trebolle Barrera, "From the 'Old Latin' through the 'Old Greek' to the 'Old Hebrew' (2 Kings 10:23–35)," *Text* 11 (1984): 17–36; and Eugene C. Ulrich, "The Old Latin Translation of the LXX and the Hebrew Scrolls from Qumran," in *The Hebrew and Greek Texts of Samuel* (ed. E. Tov; Jerusalem: Academon, 1980), 121–65; the latter has been reprinted in idem, *The Dead Sea Scrolls and the Origins of the Bible* (SDSSRL; Grand Rapids: Eerdmans, 1999), 233–74. Note also the important corroborating evidence of the Old Latin for the text of Joshua (below).

Moses. This is typical of the many major expansions that characterize the SP, and thus with respect to general text-type, the MT is an earlier, more "original" form of the text than the SP.

Similarly, scholars also saw the LXX as generally secondary to the Hebrew MT. Though there were indications that the LXX sometimes provided an earlier text, they often stoutly resisted such indications.[2]

Josephus also used some ancient form of the biblical texts as a source for his *Jewish Antiquities*. But similarly, when critics compared the MT or LXX with Josephus, they frequently branded Josephus as inserting "unscriptural details," and therefore they judged him to be less than reliable as a witness to the biblical text.[3]

Accordingly, the dominant mind-set considered the MT as basically the best-preserved text of the Hebrew Bible from antiquity, although the SP and the LXX were at times consulted in order to supply preferable readings when the MT was unclear or presented problems. This was, and is, the prevailing approach also for most translations of the Old Testament in standard Bibles.

2. ILLUMINATION AND PERSPECTIVE AS A RESULT OF THE SCRIPTURAL SCROLLS

With the discovery of over two hundred biblical manuscripts in the Judean Desert, the scene and the prevailing mentality changed dramatically though slowly. It is understandable that scholarly minds moved slowly. Epistemologically, we assess new data according to already-established concepts and categories that have been formed from previous knowledge. Thus, the evidence offered by the scrolls was at first classified according to the old categories.

---

[2] For a sample of a debate on this issue, see Dominique Barthélemy et al., *The Story of David and Goliath: Textual and Literary Criticism; Papers of a Joint Research Venture* (OBO 73; Fribourg: Éditions Universitaires; Göttingen: Vandenhoeck & Ruprecht, 1986).

[3] See the notes in Josephus, *Ant.*, 5.201 note c, 5.330–31 note a, 5.425 note c, 5.433 note a, etc. (Thackeray, LCL). Those passages, however, are all documented in the biblical MS 4QSam^a (4Q51) and thus were in the biblical text at the time of Josephus; the fact is simply that the specific form of the scriptural text current in his day, which he used for the composition of the *Jewish Antiquities*, was subsequently lost; cf. the text of the NRSV and the note at the end of 1 Samuel 10. See Eugene C. Ulrich, "Josephus' Biblical Text for the Books of Samuel," in *Josephus, the Bible, and History* (ed. L. H. Feldman and G. Hata; Detroit: Wayne State University Press, 1989), 81–96, and repr. in Ulrich, *The Dead Sea Scrolls and the Origins of the Bible*, (SDSSRL; Grand Rapids: Eerdmans, 1999), 184–201; and idem, *The Qumran Text of Samuel and Josephus* (HSM 19; Missoula, MT: Scholars Press, 1978).

1QIsa^{a} and 1QIsa^{b}

Among the first discoveries were 1QIsa^{a} and 1QIsa^{b} (1Q8).[4] Scholars quickly and lastingly classified 1QIsa^{b} as virtually identical to the MT, thus validating the MT (based on medieval manuscripts) both as resting on a text-form that was now documented a millennium earlier and as copied with amazing accuracy through the centuries. This was a valid and legitimate conclusion–not for the MT in general, but for the MT of Isaiah, since the MT collection is not a unified text, and the evidence was only from the book of Isaiah. The text-critics were also able to fit 1QIsa^{a} into the established categories insofar as it basically "agreed with the MT," though it exhibited a "baroque" orthography and a large number of variants that could be explained for the most part as deriving from the same text-type as the MT; it was just a somewhat deviant text, and some considered it as a "vulgar" text.

As many more biblical manuscripts (MSS) came to light, both phenomena continued to appear. Many texts showed intriguing variants, documenting a certain pluriformity in the text in antiquity, while many other texts showed close affinity with the corresponding books of the MT. In fact, texts in general agreement with the MT were originally claimed to "comprise some *60* percent of the Qumran biblical texts," though that number was subsequently reduced to "some *35* percent."[5] I will argue below, however, that this is not the best way to categorize and describe the texts. That view presumes that "the MT, the SP, and the LXX" are identifiable "text-types" to which we may compare other texts and accordingly classify them. But this is not the case: generally, the MT and the LXX are not "text-types," and we ought not to use them as categories for classifying other texts. Before the turn of the era, we have no evidence of people comparing the MT (or the "proto-MT") with other textual forms and judging the MT preferable. Rather, the rabbis–to the best of our knowledge–simply happened (with apparently no specifically text-critical judgment) to preserve for many, but not all, of the individual books the edition of a book that was prevalent within general Judaism. For those books they simply inherited the majority text. But for other books, again without any clear pattern discernible, they preserved textual forms that were less widely influential or were clearly textually inferior (e.g., Samuel, Ezekiel, Hosea). At any rate, it remains true that the Textus Receptus of the various books in the MT was quite accurately copied over the centuries from one form of the text tradition for each book as it existed in the Second Temple Period.

---

[4] Both MSS were published admirably quickly, though they still lack a thorough critical edition: for 1QIsa^{a}, see Millar Burrows, John C. Trever, and William H. Brownlee, eds., *The Dead Sea Scrolls of St. Mark's Monastery* (vol. 1; New Haven, CT: American Schools of Oriental Research, 1950); for 1QIsa^{b} (1Q8), see Eleazar L. Sukenik, *The Dead Sea Scrolls of the Hebrew University* (ed. N. Avigad and Y. Yadin; Jerusalem: Hebrew University, 1954 [Hebrew]; ET: 1955), plus additional fragments in Dominique Barthélemy, "Isaïe (1QIs b)," in *Qumran Cave 1* (ed. D. Barthélemy and J. T. Milik; DJD 1; Oxford: Clarendon, 1955), 66–68 + pl. 12.

[5] For the original number, see Emanuel Tov, *Textual Criticism of the Hebrew Bible* (Assen: Van Gorcum, 1992), 115, with his emphasis. For the revised number, see the 2d, rev. ed. of this same work (2001), 115.

4QpaleoExod^m (4Q22) and 4QNum^b (4Q27)

If the MT was vindicated as a collection of texts carefully preserved from one form of each book from antiquity, so too was the SP. Thus, 4QpaleoExod^m dramatically showed in reading after reading the expanded text-type so well known from the SP.[6] As a specific example, the expanded text in Exod 32:10, illustrated earlier with the insertion from Deut 9:20, is among those preserved by 4QpaleoExod^m:

MT

"…my anger may ignite against them and I may consume them;
but I will make you a great nation."
[11]Then Moses entreated the Lord…

4QpaleoExod^m

["…my anger may ignite against them and I may consume them;
but I will make] you a great nation."
[But against Aaron the Lo]rd [was] very [angry], enough to destroy him;
so Moses prayed on behalf of A[aron.]
[11]Then Moses [entreat]ed the [Lord…]

---

[6] As early as 1955 Patrick W. Skehan published fragments alerting the scholarly community to the significance of this scroll: "Exodus in the Samaritan Recension from Qumran," *JBL* 74 (1955): 435–40. The full publication is by Patrick W. Skehan, Eugene Ulrich, and Judith E. Sanderson, "4QpaleoExodus m," in *Qumran Cave 4.IV: Palaeo-Hebrew and Greek Biblical Manuscripts* (ed. P. W. Skehan, E. Ulrich, and J. E. Sanderson; DJD 9; Oxford: Clarendon, 1992), 53–130. In 1986 Sanderson published a highly detailed and useful analysis of this text: Judith E. Sanderson, *An Exodus Scroll from Qumran: 4QpaleoExodm and the Samaritan Tradition* (HSS 30; Atlanta: Scholars Press, 1986).

SP

> "…my anger may ignite against them and I may consume them;
> but I will make you a great nation."
> But against Aaron the Lord was very angry, enough to destroy him;
> so Moses prayed on behalf of Aaron.
> [11]Then Moses entreated the Lord.…

This ancient scroll from ca. 50 B.C.E. repeatedly shows, where preserved, all the major expansions exhibited by the SP. Even where fragments are not extant to decide regarding the major text differences, the scroll in general is so extensively preserved that we can confidently make judgments about the inclusion or lack of large portions of text. With one significant exception, it agrees with the SP against the MT in the major interpolations. That exception is the extra commandment, lacking in the MT and LXX but added after the traditional commandments in the SP at Exod 20:17b, to build an altar at Mount Gerizim. Moreover, insofar as the evidence is available, it appears that the scroll also agrees with the MT and the LXX against the SP in the small but important formulaically repeated variant that envisions Israel's central shrine in Jerusalem in the future ("which the Lord will choose," relative to Moses' time) as opposed to Shechem by a past decision ("which the Lord has chosen"). This means that there were (at least) two variant editions of the text of Exodus circulating in Second Temple Judaism.[7] The earlier and more widely used edition continued in use by the rabbinic and the Hellenistic Jews and thus was eventually incorporated into the MT and LXX collections. The secondary, expanded edition was taken up by the Samaritans, probably without knowledge of the specific text-type, and intentionally altered in two ways: they added a commandment in which God commands that Israel's central altar be built on Mount Gerizim, and they emphasized that this central shrine had been chosen by God.[8] But the secondary edition (evidently without the two specifically Samaritan alterations) continued to be used by Jews and was still being copied around the middle of the first century B.C.E.

---

[7] At least for Exodus 35–39 there was a third edition, yet earlier than that in the MT. The LXX is systematically different from the MT in those chapters, and Anneli Aejmelaeus, the Director of the Septuaginta-Unternehmen in Göttingen, has demonstrated that the LXX edition is earlier than the MT edition; see her "Septuagintal Translation Techniques: A Solution to the Problem of the Tabernacle Account," in *On the Trail of Septuagint Translators: Collected Essays* (Kampen: Kok Pharos, 1993), 116–30.

[8] A third intentional, but not necessarily specifically Samaritan, change illumined by 4QJosh^{a} (4Q47) is suggested below.

In confirmation, a second MS found at Qumran exhibits the same character as 4QpaleoExod^{m}. The most extensive MS of the book of Numbers, 4QNum^{b}, also provides evidence of some of the ways in which the biblical text grew at the hands of learned scribes.[9] 4QNum^{b} was copied in the early Herodian period, not far from 25 B.C.E.[10] In agreement with the SP, it frequently displays additions to the traditional text as known through the MT and LXX. One partly preserved example from Num 27:23–28:1 can illustrate the general phenomenon:

MT

…as the Lord had spoken through Moses.
[28:1]The Lord spoke to Moses…

4QNum^{b}

…as the Lord had spoken through Moses.
[And Mose]s [said] to him,
“Your eyes have seen what the Lord has done to [these] two k[ings…]

SP

…as the Lord had spoken through Moses.
And he said to him,
“Your eyes have seen what the Lord has done to these two kings.
The Lord will do the same to all the kingdoms which you will cross through.
Do not fear them, for it is the Lord your God who will fight for you.
[28:1]The Lord spoke to Moses…

Again, the secondary Jewish tradition, exemplified in 4QNum^{b} and taken up by the Samaritan tradition, expanded by incorporating a parallel text from Deut 3:21–22. The fragmentary MS breaks off in the middle of the passage, but we must reconstruct the full expansion to fit the dimensions of the scroll.[11]

Thus, the realization dawned concerning the specifically Samaritan reworking of the Pentateuchal text. It appeared that the Samaritans’ reworking extended only to those two small specifically Samaritan features mentioned above, that most of the literary creativity displayed in the expanded version was the product of general Judaism, and that both editions were probably in use by Jews in the late Second Temple period. It is gratifying to observe that this dawn has moved toward full daylight in much of the biblical community.

---

[9] For the critical edition of 4QNum^{b}, see Nathan Jastram, “27. 4QNum^{b},” in *Qumran Cave 4.VII: Genesis to Numbers* (ed. E. C. Ulrich et al.; DJD 12; Oxford: Clarendon, 1994), 205–67.

[10] Ibid., 205, 211. The date given, of course, is the date this scroll was copied, not the date of the creative compositional activity recorded in the text.

[11] For fuller discussion, see Jastram, ibid. (DJD 12), 242–45.

4QJer^b (4Q71)

If the MT and SP were vindicated as different collections of carefully preserved forms of the texts from antiquity, so too was the LXX. A fragment of Jer 9:22–10:22, for example, was discovered in Cave 4.[12] That fragment of 4QJer^b holds the ends of about thirteen lines of text at the left edge of a skin. Since we assume that the column from which it came must have been symmetrical, with each of the lines normally holding approximately the same number of words and letters per line, we can safely conclude that 4QJer^b provides a Hebrew witness to the type of parent text from which the LXX of Jeremiah was translated. The ends of lines 4–8 of the fragment are translated below, with the translations of the spatially corresponding material in the LXX and the MT:

4QJer^b (Jer 10:2–13)

[4]…the way of the nations…
[5]…with…gold they beautify it; with hammers / [and nails…]
[6]…blue and purple [are their clothes]…
[7]…will perish from the earth…
[8]…from the end of the earth. Lightnings…

LXX (Jer 10:2–13)

[4]…the ways of the nations…
[5]…with…gold they are beautified; with hammers and nails…
[6]…blue and purple will clothe them…
[7]…will perish from the earth…
[8]…from the end of the earth. Lightnings…

---

[12] A preliminary transcription of 4QJer^b (4Q71), as well as 4QJer^a (4Q70), was published by John G. Janzen in *Studies in the Text of Jeremiah* (HSM 6; Cambridge, MA: Harvard University Press, 1973). For the critical edition, see Emanuel Tov, "4QJer^b," in *Qumran Cave 4.X: The Prophets* (ed. E. Ulrich et al.; DJD 15; Oxford: Clarendon, 1997), 171–76.

MT (Jer 10:2–13)

[2]…the way of the nations…
[4]…with…gold they beautify it; with nails and hammers…
[9]… + vv. 6–8 …blue and purple are their clothes…
[11]… + v. 10 …will perish from the earth…
[13]…from the end of the earth. Lightnings…

The MT and the LXX differ in *quantity* of text and differ in *order* of the text. The MT has a much longer text, including verses 6–8 and 10, which are lacking in the LXX; in line 6 the MT adds about forty extra words that are not in the LXX and must be presumed absent from 4QJer^b. Moreover, the second half of MT verse 5 is found in the LXX after verse 9, so that the LXX order of verses is 4, 5a, 9, 5b, 11. As the column in 4QJer^b is reconstructed, verse 5b must spatially have followed the extant text from verse 9, and thus the same quantity and order of text encountered in the LXX must be assumed to have been in 4QJer^b. As a minor confirmation, observe that 4QJer^b agrees with the LXX in displaying the order "hammers [and nails…]" against the MT order "nails and hammers." As we analyze and compare the LXX and MT forms of Jeremiah, it becomes clear that the LXX is an earlier edition of the text, and that the MT is a secondary and expanded version based on the earlier edition witnessed by 4QJer^b and the LXX. In this example the status of the MT is reversed compared to what we see in the examples from 4QpaleoExod^m (4Q22), 4QNum^b (4Q27), and the SP. Finally, many other biblical scrolls, including especially 4QSam^a (4Q51), have demonstrated various examples of ancient Hebrew texts documenting individual readings attested by the LXX, and thus grounding the LXX as often a solid witness to an ancient form of the Hebrew Bible that is simply different from the Textus Receptus handed down in the MT.

More Examples: 4QJosh^a (4Q47), 4QJudg^a (4Q49), 11QPs^a (11Q5), 4QRP^a (4Q158)

Analogous examples have been presented elsewhere for numerous books spanning the entire Hebrew Bible, and so a few examples will suffice here.[13] I later explore some of the significance of this phenomenon for tracing the history of the biblical text (below).[14]

---

[13] See, e.g., Eugene Ulrich, "The Canonical Process, Textual Criticism, and Latter Stages in the Composition of the Bible," in *Shaʿarei Talmon: Studies in the Bible, Qumran,*

The earliest MS of Joshua, 4QJosh^a (4Q47), seems to present an important event in an order contrasting with that of the traditional biblical narrative.[15] Regarding the first altar constructed in the land of Canaan after Joshua led the tribes across the Jordan, 4QJosh^a places it immediately at Gilgal, just after the crossing (at the end of traditional ch. 4). The MT and the LXX relate that incident at the end of chapter 8 (early in ch. 9 in the LXX) and explicitly place it at Mount Ebal. It has long been known that the traditional narrative is strange, both because no altar or worship is ever again mentioned on Mount Ebal, which is otherwise insignificant in the Hebrew Bible except as the mountain of the curse; and because militarily Joshua marches twenty miles north into enemy territory, builds an altar, and immediately goes back south, abandoning the altar in enemy territory.

The Qumran evidence now appears to make the development clear: 4QJosh^a presents the early literary tradition, and the next earliest independent witness, Josephus, corroborates that tradition (*Ant.* 5.16–20). In Deut 27:1–8 Moses directs the people "on the day you cross over the Jordan into the land…" to "set up large stones and plaster them" (27:2). Even though we need not take "on the day" literally, a literal interpretation is quite plausible; the text does not specify a place, so the place of entrance would be a quite natural interpretation. Verse 4 then repeats that "when you have crossed the Jordan, you should set up these stones…" again suggesting immediate construction. Within the entire passage Deut 27:1–8 in MT, no locality is specified except in the single parenthetic phrase in verse 4 "on Mount Ebal," and the sentence reads perfectly smoothly without that phrase. If the phrase were absent, one would expect the altar to be built as 4QJosh^a and Josephus narrate the incident. Although it is possible that the phrase was simply lost by accident, two other texts suggest that it represents a later addition. At Deut

and the Ancient Near East Presented to Shemaryahu Talmon (ed. M. A. Fishbane, E. Tov, and W. W. Fields; Winona Lake, IN: Eisenbrauns, 1992), 267–91; and idem, "The Bible in the Making: The Scriptures at Qumran," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls [1993]* (ed. E. Ulrich and J. VanderKam; Christianity and Judaism in Antiquity 10; Notre Dame, IN: University of Notre Dame Press, 1994), 77–93; both repr. in Ulrich, *The DSS and the Origins*, 51–78, 17–33.

[14] See also the discussion in Tov, *Textual Criticism*, 313–50.

[15] For the critical edition and a discussion, see Eugene Ulrich, "4QJosh^a," in *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich et al.; DJD 14; Oxford: Clarendon, 1995), 143–52; and idem, "4QJoshua^a and Joshua's First Altar in the Promised Land," in *New Qumran Texts and Studies: Proceedings of the First Meeting of the International Organization for Qumran Studies, Paris 1992* (ed. G. J. Brooke and F. García Martínez; *STDJ* 15; Leiden: Brill, 1994), 89–104 + pls. 4–6.

27:4 the SP reads, "on Mount Gerizim," instead of "on Mount Ebal." The Old Latin version, undoubtedly based not on the SP but on an early form of the LXX, also attests "on Mount Gerizim." This double witness clarifies the missing piece. To the original unspecified text, someone–either simply knowing the ancient tradition of the sanctuary at Shechem connected with Joshua (Josh 24:1, 25–26), or from northern perspectives intentionally crediting Shechem with that first altar constructed in the newly won land–inserted "on Mount Gerizim" into the text at Deut 27:4. Then at a third stage, from a southern, or a Judean, or a rabbinic anti-Samaritan perspective, someone else changed the secondary "on Mount Gerizim" to "on Mount Ebal," and it is this third anomalous and final stage that survived in the Textus Receptus.

Although 4QJudg^a is a small fragment of the book of Judges, it also provides an educative text.[16] It contains Judg 6:2–6, 11–13, but moves directly from verse 6 to verse 11, without verses 7–10. The narrative is an old story about Midianite raids on Israel: the Israelites would plant seed, but the Midianites would repeatedly come and destroy the crops.

4QJudg^a

…[[6]And Israel was greatly impoverished by the Midianites],
and the Israe[lites] cried out [to] the Lord.
[[11]Then the messenger of the Lord came and sat under the terebinth…]
owned by Joash the Abiezrite…

MT

… [6]And Israel was greatly impoverished by the Midianites,
and the Israelites cried out to the Lord.
[7]The Israelites cried out to the Lord because of the Midianites.
[8]So the Lord sent a prophet to the Israelites, and he said to them:
Thus says the Lord the God of Israel: It was I who brought you
up out of Egypt and brought you forth from the house of slavery…
[10]…But you have not obeyed my voice.
[11]Then the messenger of the Lord came and sat under the terebinth…owned by Joash the Abiezrite…

---

[16] For the critical edition and a discussion, see Julio Trebolle Barrera, "4QJudg^a," in *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich et al.; DJD 14; Oxford: Clarendon, 1995), 161–64; and idem, "Textual Variants in 4QJudg^a and the Textual and Editorial History of the Book of Judges," in *The Texts of Qumran and the History of the Community: Proceedings of the Groningen Congress on the Dead Sea Scrolls (20–23 August 1989)*, vol. 1, *Biblical Texts* (ed. F. García Martínez; Paris: Gabalda [= *RevQ* 14/2, nos. 54–55], 1989), 229–45.

The MT uses paragraph markers to set off 6:7–10 as a self-contained section, and for over a century Wellhausen, Stade, Burney, and others have seen it as a secondary insertion by another hand, characterized by a distinctive theology (more recently identified as Deuteronomistic).[17] Again, the MT exhibits the secondary, more developed form of the text.

From its first unrolling, 11QPs^a was the subject of debate concerning whether it was a biblical scroll or a secondary (merely) "liturgical" scroll. James Sanders, who produced the critical edition of this fragmentary but large and plentifully preserved scroll, considered it a biblical MS.[18] Others, including Moshe Goshen-Gottstein, Shemaryahu Talmon, and Patrick Skehan, saw reasons to prevent its being classified as biblical and to consider it as secondary; but Eugene Ulrich and Peter Flint have recently reexamined the issue and convincingly argued that it should be classified as a biblical MS.[19] All the arguments marshaled in the early days for denying its biblical status have disappeared in light of what we have increasingly learned about the biblical text in the Second Temple Period. "Secondary" is an attribute of virtually all biblical texts. We find additions to the text, even large additions, in a variety of texts recognized as biblical. Moreover, scholars for long have recognized differences in the order of textual passages through comparisons of the MT, the LXX, and the SP, and such differences in order do not mean that the text is not biblical.

I suggest that 4QRP^a (4Q158), the so-called Reworked Pentateuch^a, also should be analyzed to assess its biblical status.[20] Just as some earlier judged 11QPs^a as nonbiblical but now arguably correctly see it as a biblical text, so too for 4QRP^a: though it is included in a "parabiblical" volume of Discoveries in the Judaean Desert, we should analyze it to see whether it may have been a third edition of the Pentateuch alongside the edition recognized in the MT-LXX and the edition recognized in 4QpaleoExod^m–4QNum^b–SP.[21]

---

[17] See, e.g., Charles F. Burney, *The Book of Judges* (London: Rivingtons, 1918; repr. as *The Book of Judges, with Introduction and Notes, and Notes on the Hebrew Text of the Books of Kings, with an Introduction and Appendix*; New York: KTAV, 1970), 176–77: "In no other section of Judges is the existence of two documents…more clearly evident, and the criteria for determining the main lines of analysis are fairly decisive."

[18] For the critical edition, see James A. Sanders, *The Psalms Scroll of Qumran Cave 11 (11QPs^a)* (DJD 4; Oxford: Clarendon, 1965).

[20] For the critical editions, see John M. Allegro, "Biblical Paraphrase: Genesis, Exodus," in *Qumrân Cave 4.I (4Q158–4Q186)* (ed. J. M. Allegro and A. A. Anderson; DJD 5; Oxford: Clarendon, 1968), 1–6 + pl. 1; and Emanuel Tov and Sidnie White, "Reworked Pentateuch," in *Qumran Cave 4.VIII: Parabiblical Texts, Part 1* (ed. H. W. Attridge et al.; DJD 13; Oxford: Clarendon, 1994), 187–351.

3. THEORIES PROPOSED TO EXPLAIN THE TEXTUAL EVIDENCE

Theories attempting to explain the diversity in textual witnesses of the Hebrew Bible naturally developed as the exciting new evidence unfolded.

In the first theory, William Foxwell Albright initiated the paradigm of different local texts as the primary explanation for the most meaningful variants in the biblical text, and Frank Moore Cross fleshed out that theory both with creative intuition and with intriguing new manuscript readings.[22] This was significant for two reasons. First, Albright raised an important new question, and Cross launched a trajectory of research that might otherwise not have been explored. Second, Cross illustrated the theory with an impressive amount of specific examples, providing examples of how we should analyze readings. The main lines of his theory suggested that the MT, the SP, and the LXX exemplified three textual families or text-types, and that those three textual families developed "in Palestine, in Egypt, and in a third locality, presumably Babylon."[23] On the assumption that different texts would likely not be tolerated within a single locality, it was envisioned that the text which had started in a uniform state, an *Urtext*, could well have spread to different localities, and then could have developed in different ways in the different localities.

With the advantages of hindsight and several more decades of published MS editions, we can recognize some of the presuppositions and categories that textual scholars had not yet sufficiently developed: (a) "Higher criticism" and "lower criticism" were often kept separate as distinct realms, treating the composition process and textual transmission respectively; (b) The so-called *Urtext* was still seen as relatively close to the extant texts; and (c) The MT, the SP, and the LXX were seen as

---

[21] See two essays in *The Dead Sea Scrolls Fifty Years after Their Discovery; Proceedings of the Jerusalem Congress, July 20–25, 1997* (ed. L. H. Schiffman, E. Tov, and J. C. VanderKam; Jerusalem: Israel Exploration Society and the Shrine of the Book, 2000): Eugene Ulrich, "The Qumran Scrolls and the Biblical Text," 51–59, esp. 56–57; and also Michael Segal, "4QReworked Pentateuch or 4QPentateuch?" 391–99.

[22] William F. Albright, "New Light on Early Recensions of the Hebrew Bible," *BASOR* 140 (1955): 27–33; Frank M. Cross, "The History of the Biblical Text in the Light of Discoveries in the Judaean Desert," *HTR* 57 (1964): 281–99.

[23] Frank M. Cross, "The Contribution of the Qumrân Discoveries to the Study of the Biblical Text," *IEJ* 16 (1966): 81–95, esp. 86; repr. in *The Canon and Masorah of the Hebrew Bible* (ed. S. Z. Leiman; New York: KTAV, 1974), pages 334–48; also repr. in *Qumran and the History of the Biblical Text* (ed. F. M. Cross and S. Talmon; Cambridge, MA: Harvard University, 1975), 278–92.

"text-types" or even called "recensions," intentionally and deliberately reworked text-types.[24]

But consideration of other dynamics that have become clearer through time allows us to adopt the contributions made by Cross and move the discussion forward. For example:

a. It was eventually recognized that the same process by which the biblical books were produced from their shadowy origins to recognizable biblical form was an organic process still in progress in the textual forms discovered at Qumran.[25] This helped eradicate the line of demarcation between the literary and the textual development of the text, and thus between literary criticism and textual criticism.
b. That same realization–that the composition stage was still in process in the late Second Temple Period–further helps us realize that the concept of *Urtext* is not equal to the task of explaining the complexity involved. Each biblical book has its own complex history of literary development, and in some instances this history of development traverses many centuries and entails major revisions. Thus, the goal of seeking "the original text" may sound like a clear idea with a clear object, but as I have argued elsewhere, it can have at least eight different levels of meaning.[26] Moreover, one can argue that we should reconsider the entire presumption that a "more original" form of the text is to be preferred to a "more developed" form of the text.[27] The various types of literary creativity seen in the variegated examples found at Qumran are representative of the types of literary creativity that have characterized the biblical text from its very beginnings and throughout its development. That is, one can now chart and describe the literary creativity that produced the expanded "proto-Samaritan" texts of Exodus and Numbers, the expanded versions of the MT both for the David-Goliath narrative of Samuel and for the book of Jeremiah, the "Additions" to the LXX of Daniel, and the expanded form of the Psalter seen in 11QPs^a. Those types of literary creativity are analogous to the literary creativity that kept contributing to the biblical books as they developed through the monarchic and postexilic periods. There are numerous examples: (i) the book of Genesis grew from mythic themes and

---

[24] Although Albright had spoken in terms of "recensions," Cross in "The Contribution," 85n21 (= *Qumran and the History*, 282), correctly softened the language, noting that the "textual families" were the product "not of conscious or controlled textual recension" but "of natural growth or development in the process of scribal transmission."

[25] See Eugene Ulrich, "The Canonical Process" (see n13 above), and "The Community of Israel and the Composition of the Scriptures," in *The Quest for Context and Meaning: Studies in Intertextuality in Honor of James A. Sanders* (ed. C. A. Evans and S. Talmon; BibIntS 28; Leiden: Brill, 1997), 327–42.

[26] Ulrich, "The Community of Israel," 337–38.

[27] Ibid., 338–41.

Aramean/Canaanite tribal stories to the national epic of the Yahwist, and to the narrative Torah of the Priestly edition, with its stories, themes, and theologies periodically updated to meet the changing needs of the historically developing communities through the centuries. (ii) The book of Isaiah, beginning with small collections of sayings and stories of the eighth-century prophet, grew by the intermittent incorporation of both large and small additions over centuries: the accumulation of anonymous oracles against the nations, a historical appendix taken from the book of Kings, a substantial section of high literary and theological poetry by the anonymous "Deutero-Isaiah" nearly two centuries later, plus numerous small accretions of a prophetic, liturgical, historical, or scribal nature. (iii) The books of Psalms and Proverbs developed organically through the occasional addition of small collections of similar materials until they reached the forms we encounter in the traditional Textus Receptus or, for Psalms, in a scroll such as 11QPs^{a}.

The organic process that characterized the growth of the biblical texts over centuries relegated the concept of an *Urtext* to a more distant and foggy position or at least into a more blurred *series* of *Urtexte*, since it becomes difficult to decide on principle which one from a series of editions should be chosen as *the* text.

c. Although in some instances clarity was maintained regarding the diverse nature of the MT collection, often it was seen or treated by scholars as a single text; that is, if one's mental image of the Hebrew Bible is a codex in form–such as *BHS*–it is easy to fail to recognize that the MT consists of a collection of text forms that are of different types for different books, just as the LXX exhibits different text forms for different books. The image of a collection of individual scrolls, rather than the image of a single codex, is more helpful for thinking clearly about the Hebrew Bible in antiquity.

Specifically, with respect to the "local-text" theory, Talmon, Tov, and I have identified its limitations.[28] Perhaps the most problematic aspect is the existence in the Qumran collection of numerous widely divergent texts used by a community that studied the Scriptures in an explicitly concentrated fashion (1QS 6.6–7) within the same isolated locality over a period of two centuries. Texts such as 4QJer^{b} (4Q71) and 4QJer^{d} (4Q72^{a}) call into question the specific Egyptian character of the Hebrew texts that

Talmon; Cambridge, MA: Harvard University, 1975), 1–41, esp. 39–41; Emanuel Tov, *Textual Criticism*, 186–87; idem, *The Text-Critical Use of the Septuagint in Biblical Research* (2d ed.; Jerusalem: Simor, 1997), 183–87; Eugene Ulrich, "Pluriformity in the Biblical Text, Text Groups, and Questions on Canon," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:23–41, esp. 26–27.

> served as *Vorlagen* for the LXX. And though it is quite probably true that there were different examples of textual growth that took place in different localities, to my knowledge there is no specific evidence that causally links any particular form of growth with any particular locality. This last remains a challenge for future research.

In contrast to Cross's local-text theory, attempting to explain how a single text developed into three, Shemaryahu Talmon developed an alternative theory, proposing a quite different perspective. Noting the diversity of textual forms in the Second Temple Period, he introduced the socioreligious aspect of *Gruppentexte*, which served to explain why the Jews, the Samaritans, and the Christians emerged with *only three* textual forms of the Scriptures out of the plethora of forms generally circulating in the first century C.E.[29] He pointed out "the necessary socio-religious conditions for the preservation of a text-tradition, namely its acceptance by a sociologically integrated and definable body."[30] This insight helped reorient the search from a "one-to-many" (= three) trajectory to a "many-to-few" (= three) trajectory, and it helped reorient the view that the MT, the SP, and the LXX were "recensions." It did not, however, provide the rationale for the selection of texts; it did not explain why any particular community should choose a particular text. For example, if the Qumran community had eventually chosen its own single text form for each book, is there any way to know which of the several available texts for a given book it would have chosen? Specifically, why did the rabbis end up with the collection found in the MT, the Samaritans with the expanded form of the text, and the Christians with the collection mostly found in the LXX? Are there any features that are group-specific in any of those texts (other than the two SP features described above)? The challenge for this theory is to discover any evidence that a group changed its form of the text in a manner attributable to the ideology of that group. Beyond the two programmatic SP features (see above), I have found only one example of an ideological change: the double instance of "Mount Gerizim" vs. "Mount Ebal" as illumined by 4QJosh^a (see above).

A third theory, put forward by Emanuel Tov, also focuses more on the multiplicity of texts than on the basic agreement between texts that would ground the notion of text-types. He first denied that there were many text-types at all, but that proved to be too reductionist.[31] He subsequently refined his ideas, helpfully and correctly articulating the point that the Qumran texts have "taught us no longer to posit MT at the center of our textual thinking."[32] This was a significant advance, but I think he needs to move yet farther, since in his generally masterful *Textual Criticism of the Hebrew Bible* he continues to use the categories of "proto-MT," "pre-Samaritan," "proto-LXX," and "non-aligned texts," and classifies MSS according to these categories.[33] There clearly are distinguishable text-types at Qumran, though I would suggest that the categories just mentioned are not the best ones for classification. In my view, we should rethink the use of such terms, since the MT and the LXX are not "texts" or "text-types"–as Tov himself had said in 1981[34]–and thus they are not consistent standards by which other manuscripts of individual books are to be measured for proper "alignment." Scholars had earlier employed the categories of "the MT, the SP, and the LXX" for classifying texts, and this was understandable when those were the principal texts available for comparison, because they appeared to be "text-types." But for the most part, they are not text-types but, rather, accidentally gathered collections of texts of variegated character, mixed collections with different types of texts for different books, shorter and longer, earlier and later. We have no reason to think that "the MT, the SP, and the LXX" were seen in the Second Temple Period as text-types or categories or standards for measurement.[35] For clear thinking, we should form categories inductively, depending on the evidence observed.[36]

[30] Ibid., 198 (= *Qumran and the History*, 40).

[31] Emanuel Tov, *The Text-Critical Use of the Septuagint* (1st ed.; Jerusalem: Simor, 1981), 274; but see Eugene Ulrich, "Horizons of Old Testament Textual Research at the Thirtieth Anniversary of Qumran Cave 4, " *CBQ* 46 (1984): 613–36, esp. 624.

---

[32] Emanuel Tov, "Hebrew Biblical Manuscripts from the Judaean Desert: Their Contribution to Textual Criticism," *JJS* 39 (1988): 5–37, esp. 7.

[33] Tov, *Textual Criticism* (both 1st and 2d eds.), 114–17.

[34] Tov, I think correctly, said that the MT, the LXX, and the SP, "do not reflect different textual types, because, with some exceptions, they do not reflect typologically different texts" (*The Text-Critical Use of the Septuagint* [1st ed.]), 274.

[35] Adam S. van der Woude has argued that the "proto-Masoretic" text was growing in dominance in the late Second Temple Period, giving as an example the systematic correction of the Greek Minor Prophets text back toward the proto-MT seen in the Naḥal Ḥever text (in *The Greek Minor Prophets Scroll from Nahal Hever (8HevXIIgr) (The Seiyal Collection I)* [ed. E. Tov, R. Kraft, and P. J. Parsons; DJD 8; Oxford: Clarendon, 1990]); see his "Pluriformity and Uniformity: Reflections on the Transmission of the Text of the Old Testament," in *Sacred History and Sacred Texts in Early Judaism: A Symposium in Honour of A. S. van der Woude* (ed. J. N. Bremmer and F. García Martínez; Kampen: Kok Pharos, 1992), 151–69. The correction of the Greek back toward a Hebrew text is clear; but is the correction toward the "proto-MT" specifically, or simply toward a Hebrew-language text? There are also counter-examples in which texts that had originally read in agreement with the MT were corrected away from the MT reading.

[36] An additional area where Emanuel Tov has done pioneering work, but where the terminology in my opinion needs correction, is that of scribal practice. Tov speaks

Finally, in a series of studies I have proposed exploring various aspects of the theory[37] (a) that the succession of revised literary editions of the individual books of Scripture is a more useful pattern for charting the main lines of the history of the biblical text; the smaller lines are to be charted secondarily by studying individual textual variants between MSS. (b) Further, the succession of revised literary editions visible in the MS tradition in the late Second Temple Period is simply the continuation of the similar process of composition that characterized the biblical texts from their very beginnings, throughout the history of Israel and Judah, up to the First Jewish Revolt (66–74 C.E.) or even up to the Bar Kochba Revolt (132–135 C.E.). (c) A third and related point is that, though there were, of course, certain books considered sacred and authoritative for Jewish belief and practice, there was no canon as yet in the first century C.E. Judaism was far into the process of forming a canon, but there was no fixed and agreed-upon list of books that were, as opposed to books that were not, acknowledged widely as sacred Scripture.[38] That is, the external shape or contents of the Scriptures was not yet fixed, just as the internal shape or text was not.

---

of "Qumran scribal practice" and "Qumran orthography" (in "The Orthography and Language of the Hebrew Scrolls Found at Qumran and the Origin of These Scrolls," *Text* 13 (1986): 31–57; and idem, *Textual Criticism*, 107–9). But because the scrolls were found at Qumran, those terms are misleading, applying the label "Qumran" to general Palestinian practice; see Eugene Ulrich, "Multiple Literary Editions: Reflections toward a Theory of the History of the Biblical Text," in *Current Research and Technological Developments on the Dead Sea Scrolls: Conference on the Texts from the Judean Desert, Jerusalem, 30 April 1995* (ed. D. W. Parry and S. D. Ricks; *STDJ* 20; Leiden: Brill, 1996), 78–105, esp. 93–96; and idem, "Orthography and Text in 4QDan^a and 4QDan^b and in the Received Masoretic Text," in *Of Scribes and Scrolls: Studies on the Hebrew Bible, Intertestamental Judaism, and Christian Origins Presented to John Strugnell on the Occasion of His Sixtieth Birthday* (ed. H. W. Attridge, J. J. Collins, and T. H. Tobin; College Theology Society Resources in Religion 5; Lanham, MD: University Press of America, 1990), 29–42. It is true that some of the MSS displaying the orthographic and scribal features are works specific to the community's "foundation documents"; but on the one hand some of those documents derive from a movement that was probably wider than the Qumran settlement (i.e., from wider Palestine), and on the other hand some MSS of the *Rule of the Community* (e.g., 4QS^b and 4QS^d) that were copied after 1QS are not inscribed in the "Qumran orthography"; see Sarianna Metso, *The Textual Development of the Qumran Community Rule* (*STDJ* 21; Leiden: Brill, 1997).

[37] Ulrich, "The Canonical Process," "Orthography and Text," "Pluriformity," "Multiple Literary Editions," and "The Community of Israel" (all now repr. in idem *The Dead Sea Scrolls and the Origins of the Bible* [SDSSRL; Grand Rapids: Eerdmans, 1999]).).

[38] Each of the features mentioned is required according to the definition of the theological *terminus technicus* "canon"; if some of the features are not present or not yet fully present, there may be sacred and authoritative books of Scripture, but there is not yet a canon.

Successive Literary Editions

From our present vantage point, I think that the template used to sketch the primary lines of the history of the biblical text should be that of the developing literary editions of the books of the Scriptures. The method for detecting successive literary editions is relatively simple but requires several stages. Not only is there a range of orthographic variety visible in virtually all MSS; and not only is there an incessant stream of textual variants for individual words visible in virtually all MSS; more importantly, there is also, beyond those, an array of variant literary editions of virtually all the books of the Scriptures. We can envision the method for studying them as a series of sieves. First, the differences in orthography and the meaningless differences in morphology should be sifted out; these differences (for which I hesitate to use the term "variants") usually happen at a level that has little interrelationship with text-type and distract from the primary lines. Second, all the variants that can be categorized as textual variants should be sifted out and studied, each as an individual variant on its own terms. Third, we should study the individual textual variants as a group, to see whether a significant number of them might display an intentional, systematic pattern. For many books now, a significant concatenation of what had usually appeared as merely individual variants has emerged, showing the same intentional work, presumably by a single individual or "school," and pointing to a variant literary edition of that book.

Scholars have described numerous examples of successive literary editions of a variety of biblical books, a few already in these pages.[39] After the ancient traditions surrounding the exodus and the wilderness wandering had already undergone repeated reformulations during the monarchic period and the early postexilic period, a Hebrew form of Exodus emerged that was eventually translated into Greek. That form can be labeled edition *n + 1*, where *n* stands for the number of revised literary editions the text had undergone prior to becoming the Hebrew *Vorlage* of the OG of Exodus. A subsequent edition, *n + 2*, was produced when some editor systematically rearranged the section with chapters 35–39 into the form present now in the MT.[40] Yet another revised edition of Exodus, *n + 3*, was formed when the many large expansions visible now in 4QpaleoExod^{m} were added to the text of edition *n + 2*. The SP of Exodus may or may not be considered a new edition, *n + 4*, dependent upon whether quantity or significance is the chief criterion, since there are only two or three small changes beyond 4QpaleoExod^{m}, but those changes determine the community's identity. We saw above that the book of Numbers somewhat parallels that of Exodus. And it is quite plausible that the so-called 4QReworked Pentateuch witnesses to yet another variant edition of the Pentateuch.

---

[39] See, e.g., Ulrich, "The Canonical Process"; and idem, "The Bible in the Making"; and Tov, *Textual Criticism*, 313–49.

[40] See Aejmelaeus, "Septuagintal Translation Techniques."

Similarly, the editions of Joshua can be traced through the witness of 4QJosh^{a} (corroborated by Josephus), the somewhat fuller LXX-Joshua, and the yet fuller MT-Joshua.[41] Some further examples are the LXX-Jeremiah enlarged into the MT-Jeremiah, the MT-Daniel enlarged into the LXX-Daniel, and the MT-Psalter enlarged into the 11QPs^{a-b}-Psalter (11Q5–6). Throughout, just as with the LXX, sometimes the MT form of a given book witnesses to the earlier edition, which is subsequently revised, while for other books its character is reversed and it witnesses to the later edition revised from previous forms of the text.

The Composition Process

For over two centuries literary critics had been demonstrating that virtually all the biblical books are the products of a long series of creative efforts by authors and tradents, editors and redactors, scribes and copyists. Now we can see that the process just described as visible in our MS tradition is the continuation of that age-old process. Our overly simplified imaginations had categorized the history of the biblical text in two neatly distinct periods: one period, comprising the composition of the text, eventually closed; another, comprising the transmission of the text, then began. That view was understandable in light of the earlier data: we saw much evidence for the second period but none for the first. From the transmission period, there was evidence of the text's development in the multiplicity of extant MSS. We saw no MS evidence for the development of the text in the compositional period; that development was knowable only through inductive literary analysis. Thus, it was easy to imagine two periods: the composition period, studied through various forms of literary criticism (termed "higher criticism") but lacking MS evidence; and the transmission period, studied through textual criticism (termed "lower criticism"), operating on MS evidence dating from the time after the composition period had closed.

---

[41] See Lea Mazor, "The Septuagint Translation of the Book of Joshua," *BIOSCS* 27 (1994): 29–38.

The biblical scrolls from Qumran illuminate many aspects of the situation. They shed light on both periods, showing that they are genetically linked as one development, not discretely separate. They provide evidence of the period when the text was still growing in its compositional stage, and they provide evidence that is helpful for assessing the factors at work in the transmission stage. Furthermore, they show that the two periods overlapped. That is, there was the type of minor development normally associated with the transmission stage operative in one given form of a book; eventually someone(or a group of persons) produced a revised edition of the same book, which then experienced its own transmissional development.

The Canonical Process

Finally, just as the texts of the Hebrew Scriptures were not fixed before the First Jewish Revolt, nor arguably before the Second Revolt, so too the set of books that form the contents of the Hebrew Scriptures was not yet fixed. Since discussion of the term "canon" tends quickly to become limitless and amorphous, I can here present only a few principal statements. The term "canon" is a theological *terminus technicus.* James Barr is correct in insisting that "when we talk about a canon of Scripture, we refer in the first place to the fact that the Bible contains certain books, while others are outside the canon and do not count as holy Scripture." He adds: "This is, and has always been, the normal meaning of the word in English when applied to Scripture." In recent discussions, "new usages of the word canon have proliferated," but this is "a regrettable innovation, without secure basis in traditional theological language; moreover, it is confusing to the point of being nonsensical."[42] Bruce Metzger makes the same point, stating that the process of canon-formation "was a task, not only of collecting, but also of sifting and rejecting," and he chides "the seemingly indiscriminate way in which the word canonical is attached to a vast range of words, creating a kind of mystique."[43] Thus, a strict definition of canon includes the concepts of comprehensive but exclusive list, conscious decision, unique authoritative status, and permanent binding.

---

[42] James Barr, *Holy Scripture: Canon, Authority, Criticism* (Philadelphia: Westminster, 1983), 49.

[43] Bruce M. Metzger, *The Canon of the New Testament: Its Origin, Development, and Significance* (Oxford: Clarendon, 1987), 36 and n84.

From the early part of the postexilic period, some form of the "Law of Moses" held a unique authority. Some books of "the Prophets" were also of high religious importance, but which books were and which were not considered among "the Prophets" is unclear to us, and it was quite likely unclear in the Second Temple Period. The book of Psalms was considered and interpreted as a prophetic book, as was the book of Daniel explicitly.[44] The closest that we can come to clarity at the end of the Second Temple Period, and perhaps as late as the Second Revolt, is that "the Scriptures" (not the "Bible," and not the "canon") included "the Law and the Prophets." The contents of the former were clear; those of the latter were unclear. Occasionally, a third item is mentioned with "the Law and the Prophets," but it is either explicitly the Psalms (which may be the explicit singling out of one specific prophetic book) or quite vague and unlikely to be considered as constituting a third category of Scripture. "The Law and the Prophets and the other books of our ancestors" mentioned in the Prologue to the Wisdom of Ben Sira quite plausibly denotes the Scriptures ("the Law and the Prophets") and a multitude of Israel's other holy books (e.g., possibly *Jubilees*, *1 Enoch*, Job, Proverbs, Tobit, Ezra, Chronicles, the *Temple Scroll*, Sirach, etc.). Some of these may have been implicitly regarded as "Scripture" by some groups, others by other groups; there is little indication that people were explicitly asking these questions or making these distinctions yet, and no indication that all the books considered by one group as "Scripture" were agreed upon by wider groups.

4. A CURRENT VIEW OF THE SCRIPTURES AND THE PROCESS TOWARD CANON IN THE FIRST CENTURY C.E.

A. The Qumran biblical scrolls present the Scriptures of general Judaism as they existed in the closing centuries of the Second Temple Period. Some were copied at Qumran, but most were probably copied in Jerusalem or wider Palestine and brought to Qumran. Thus, they are representatives of the books of the Hebrew Scriptures at the time of Hillel the Elder and Jesus the Christ. They are not the aberrant MSS of a curious sect on the fringes of Judaism and thus able to be dismissed. They are the oldest, the best, the most authentic witnesses to the text of our Bible in this crucial period. There is generally no detectable difference in scrolls thought to be copied outside Qumran from those possibly copied at Qumran. Moreover, the variety in the text of the Scriptures quoted during the late-first century by the New Testament authors and by the Jewish historian Josephus reflects the same character as that found in the Scriptures from Qumran.

---

[44] See Ulrich, "The Bible in the Making," 81–82 (repr. in *The DSS and the Origins*, 21–22).

B. The text of the Scriptures was pluriform throughout the period up to at least the First Jewish Revolt against Rome (66–74 C.E.) and possibly as late as the Second Jewish Revolt (132–135). Virtually all the MSS exhibit a range of orthographic variety, and all of them present an unpredictable quantity of textual variants for individual words; Qumran has valuably illuminated an array of variant literary editions of virtually all the books of Scripture.

C. For the past two centuries literary criticism had demonstrated that virtually all the biblical books are the products of a long series of creative efforts by many hands over many generations. Qumran has enabled us to see that this process of dynamic composition of the biblical books continued up to the late first or even the second century, until the irresistible power of Rome and the growing threat of Christianity abruptly halted that dynamic process, and eventually a single form of the text for each book alone survived within the rabbinic community. It was not so much a "stabilization" of the biblical texts as a loss of the pluriformity of the texts and the transition from a dynamically growing tradition to a uniform collection of "Scripture."

D. Finally, just as the texts of the Scriptures were not fixed prior to the First Revolt, or possibly until the Second Revolt, so too the list of books that eventually formed the contents of the Hebrew Scriptures was not yet fixed. Though the process toward the eventual canon had ancient roots, the canon of Scripture is a later, postbiblical set of decisions.

CHAPTER FIVE

THE FORMATION AND RE-FORMATION OF DANIEL IN THE DEAD SEA SCROLLS

Loren T. Stuckenbruck

INTRODUCTION

Following the discoveries in the eleven caves near Khirbet Qumran in 1947–1956, scholars have used two main ways for conceiving the relationship between the circles that produced and copied these materials, and the group in which the book of Daniel originated. First, some scholars have argued that Daniel is best characterized as early or pre-Essene;[1] along these lines, they have thought that some adherents of the group for which Daniel was written, after a period of disappointment with the longer-term consequences of Hasmonean rule, eventually separated themselves out to form the community that lived at Qumran.[2] Second, other scholars have hesitated to posit such a direct social connection. For them, although the book of Daniel no doubt was among documents (e.g., works collected into *1 Enoch* and *Jubilees*) that shared the general religious milieu reflected in the writings of the Qumran community, its ideas did not necessarily originate within the same social movement.[3] Nonetheless, any lack of social continuity did not mean that the early Jewish apocalypses could not exercise any influence, even far-reaching, on works composed at Qumran or copied and collected there. Of these two hypotheses, it is the latter that reflects a degree of necessary caution. Quite rightly, we should not confuse tradition-historical continuity with the immediate social continuity between groups. And so, until further evidence is produced that sheds more light on the respective communities behind the Jewish apocalyptic documents from the early part of the second century B.C.E., one does well to focus more intently than previously on the degree to which they influenced ideas in the Dead Sea materials.

---

[1] If this hypothesis were correct, there would be no reason to suppose that Daniel and the Enochic literature, which preserve distinguishable apocalyptic perspectives, derived from identical apocalyptic circles; see n3 (below).

[2] See, e.g., Martin Hengel, *Judaism and Hellenism* (trans. J. Bowden; 2 vols.; Philadelphia: Fortress, 1974), 1:175–218, who has argued that the Essenes who produced the sectarian literature at Qumran were, along with the Pharisees, one of the splinter groups that emerged from the "Hasideans" (cf. 1 Macc 2:42; 7:13; 2 Macc 14:6), thought to be behind the composition of both Daniel (called "wise ones" in Dan 11:33–35; 12:3, "bringers of understanding") and the *1 Enoch* literature; cf. also Frank M. Cross, *The Ancient Library of Qumran* (Sheffield: Sheffield Academic Press, 1995), 104. John C. Trevor has taken a more extreme view in "The Book of Daniel and the Origin of the Qumran Community," *BA* 48 (1985): 89–102, arguing that the visions of Daniel (chs. 7–12) were actually composed by the Righteous Teacher.

[3] In particular, see John J. Collins, *The Apocalyptic Imagination* (New York: Crossroad, 1987), 90; idem, *Apocalypticism in the Dead Sea Scrolls* (Literature of the Dead

Thus, the present essay centers around the question of the tradition-historical position and use of the book of Daniel in the Dead Sea Scrolls. Acquiring its final form in the Hebrew Bible sometime between 167 and 164 B.C.E. (during the persecution of Antiochus Epiphanes), Daniel is the latest composition to eventually be incorporated into the Jewish Scriptures. In what follows, I consider its importance among the scrolls as we inquire not only into how it inspired later authors, but also how some texts in the scrolls contain traditions that may actually have contributed to its composition.

As is also the case with the Enochic literature (except for the *Similitudes* = *1 Enoch* 37–71), there is no doubt that there was at least some relationship between Daniel and the scrolls, however it is to be construed.[4]

Sea Scrolls; New York: Routledge, 1997), 153–54; and Gabriele Boccaccini, in his challenging book, *Beyond the Essene Hypothesis: The Parting of the Ways between Qumran and Enochic Judaism* (Grand Rapids: Eerdmans, 1998), ch. 4. Boccaccini locates the Enoch sources (esp. the *Book of Dreams*, in *1 Enoch* 83–90) and Daniel in ideologically distinguishable parties.

[4] Both Daniel and the Enoch literature are abundantly attested among copies preserved from the finds of the Qumran caves. The eight MSS containing Daniel are listed below (cf. also the bibliography in nn60–63, below). At least twenty MSS copied in Aramaic have been plausibly identified as portions of the Enochic literature: these include the *Book of Watchers* (*BW*, *1 Enoch* 1–36); *Astronomical Book* (*AB*, chs. 72–82); *Book of Dreams* (*BD*, chs. 83–90, with *Animal Apocalypse* in chs. 85–90); "*Epistle*" *of Enoch* (*EE*, chs. 91–105); *Apocalypse of Weeks* (*AW*, 93:1–10; 91:12–17); the *Noahic Work* (*NW*, chs. 106–107); and the *Book of Giants* (*BG*). The MSS in question are 1Q19 (frags. 1, 3, and 8); 1Q23–24 (*BG*); 2Q26 (*BG*); 4Q201 (*BW*); 4Q202 (*BW*); 4Q203 (*BG*); 4Q204 (*BW, BD, EE, NW*); 4Q205 (*BW, BD*); 4Q206 (*BW, BD*); 4Q206a (*BG*); 4Q207 (*BD*); 4Q208 (*AB*); 4Q209 (*AB*); 4Q210 (*AB*); 4Q211 (*AB*); 4Q212 (*EE* + *AW*); 4Q530 (*BG*); 4Q531 (*BG*); 4Q532 (*BG*); 4Q533 (*BG*); 6Q8 (*BG*). For presentations and discussions of the *1 Enoch* and *BG* sources at Qumran, see Jozef T. Milik, *The Books of Enoch: Aramaic Fragments from Qumrân Cave 4* (Oxford: Clarendon, 1976); Loren T. Stuckenbruck, *The Book of Giants from Qumran: Text, Translation, and Commentary* (TSAJ 63; Tübingen: Mohr Siebeck, 1997); relevant texts published in *Qumran Cave 4.26. Cryptic Texts and Miscellanea, Part 1* 1 (ed. S. J. Pfann and P. Alexander; DJD 36;

Whether or not we are to conceive this relationship in terms of sociological continuity, the issue remains with respect to how, in terms of tradition history, we may not only identify the significance of Daniel among the Dead Sea Scrolls, but also interpret it. The present article attempts to provide a step in this direction. Since from the perspective of later Jewish and Christian communities, Daniel belongs to the canon of Scripture, an analysis concerning its function among the scrolls might seem at first to be a straightforward matter. However, it is important to keep in mind that the final composition of Daniel occurred within a century of the composition and production of many of the documents found in the Qumran caves. It should not come as a surprise, therefore, if to some extent we find that the Qumran texts arise from a period in which Daniel traditions were still fluid. Hence, a study that takes Daniel as a biblical book as its point of departure may run the risk of making a series of misleading assumptions. Such a danger presents itself, in particular, if we inquire into the extent to which we may regard the nonbiblical manuscripts as depending on the book of Daniel. Whenever the Dead Sea documents contain motifs or material shared with the book of Daniel, it is by no means clear that such instances provide examples of influence by the "biblical text." Indeed, the following possibilities merit consideration. Echoes of or similarities with Daniel may have arisen from (a) direct dependence on the book of Daniel; (b) dependence on a (Danielic) tradition that was circulating independently of the book of Daniel; and (c) dependence on other traditions that may even be said to have exerted an influence on the book of Daniel. Insofar as these alternatives actually stand up to scrutiny, we clearly should not assume that every similarity among the manuscripts and Daniel provides evidence for the primacy of the biblical text.

Taking these considerations into account, I deal with the question of Daniel among the Dead Sea Scrolls according to the following categories: (a) pre-Danielic traditions, (b) "nonbiblical" Danielic traditions, (c) manuscripts of Daniel, (d) formal citations of Daniel, and finally (e) the question

of the formative influence of Daniel on the language, motifs, and ideas (re)expressed in the Qumran texts.

A. PRE-DANIELIC TRADITIONS IN THE SCROLLS

4QPrayer of Nabonidus (4Q242)

Perhaps the first source from the scrolls to be linked with the formative background of the biblical Daniel was this much-discussed fragmentary manuscript.[5] Already twelve years before the first Dead Sea discoveries, Wolfram von Soden had advanced a plausible case that the stories associated with Nebuchadnezzar in Daniel 3 and 4 actually derive from legends that had been told about another figure, Nabonidus, the last ruler of the Neo-Babylonian Empire (556–539 B.C.E.).[6] On the basis of a comparison with Mesopotamian sources, von Soden found good reason to question the note in Dan 5:2, which identifies Nebuchadnezzar as the father of the king Belshazzar. As is well known, there is no evidence that Nebuchadnezzar ever had a son by that name. The name Bel-sharra-usur, however, does appear in materials relating to Nabonidus. Before his downfall Nabonidus is known to have been absent from the capital Babylon, residing some ten years in Taiman, Arabia, in the south; and during this period he left his son, Bel-sharra-usur, in charge of Babylon as governor.[7] According to the Babylonian inscriptions, Nabonidus's absence from Babylon, combined with his attempt to introduce the cult of the lunar deity Sin from Harran into the capital city by force, led to a perception of him as an irresponsible ruler; among the priests of Marduk, for example, he was portrayed as a "weakling."

The fragmentary text from two columns of 4Q242, first published by Jozef T. Milik in 1956,[8] refers by name to Nabonidus (written *nbny*) "king of Babylon" (frag. 1 line 1). The text shares features with both the Neo-Babylonian sources and Dan 4:22–37. The first column of 4Q242 introduces the document as "the words of the prayer which Nabunay king of Babylon prayed." While the prayer—presumably in praise of the God of Israel (cf. frag. 1 line 5; Dan 4:34–35)—is itself not preserved, the text gives Nabunay's first-person account of an "evil skin disease" that the king suffered "by the decree of God" (*bptgmʾ*]*lhʾ*) for a period of seven years in Taiman (frag. 1 lines 2, 6–7). It is further possible that the lacunae in line 3 originally described Nabunay's state as comparable to that of a beast[9] (Dan 4:25b), or that he was "set apart from human beings" (4:25a).[10]

[7] For a recent and accessible review of the Mesopotamian materials concerning Nabonidus, see Ida Fröhlich, *"Time and Times and Half a Time": Historical Consciousness in the Jewish Literature of the Persian and Hellenistic Eras* (JSPSup 19; Sheffield: Sheffield Academic Press, 1996), 19–43. The Babylonian Chronicle about Nabonidus is printed in English translation in James B. Pritchard, ed., *Ancient Near Eastern Texts* (3d ed.; Princeton: Princeton University Press, 1969), 306–11.

[8] See n5 (above). For further bibliography, see Klaus Beyer, *Die aramäischen Texte vom Toten Meer* (Göttingen: Vandenhoeck & Ruprecht, 1984), 223 (hereafter *ATTM*);

The Nabonidus sources from the sixth century B.C.E. not only provide information about the period of his residence in Taiman but also say he had an unspecified illness and recovered from it. 4Q242 represents Nabonidus's illness in physical terms ("an evil skin disease"), while Daniel 4 represents him as having had a theriomanic, (medical term from θηρίωμα), animal-like existence: "Nebuchadnezzar" is "driven from humanity" to live among the wild animals (4:23, 25, 31, 34). Significantly, regarding the period of seven years, Daniel and 4Q242 agree over against the ten-year period mentioned in the Nabonidus inscription from the earlier period. At the end of the story in Daniel 4, the text narrates the restoration of the king's sanity and supplies a prayer uttered by the king in praise of the Most High God (4:34–37). Similarly, in 4Q242 Nabunay testifies of how he was healed through the agency of a Jew (unnamed in the text; frag. 1 line 4).

In view of the coherence of 4Q242 with the Neo-Babylonian inscriptions on the one hand, and with Daniel 4 on the other, there is wide agreement that the text from the Dead Sea preserves a tradition that antedates the biblical tradition. In place of the lesser-known Nabonidus, the author or redactor of Daniel 4 applied the story to better known Nebuchadnezzar, who was associated with the destruction of the First Temple in 586 B.C.E. This substitution would have made it easier to find a more immediate analogy from the exilic period of Israel for the desecrating

Flint, "The Daniel Tradition at Qumran," in *Eschatology, Messianism, and the Dead Sea Scrolls* (ed. C. A. Evans and P. W. Flint; SDSSRL; Grand Rapids: Eerdmans, 1997), 55–59, 55n24 with bibliography. For the recent official publication, see John J. Collins, "Prayer of Nabonidus," in *Qumran Cave 4.XVII: Parabiblical Texts, Part 3* (ed. G. J. Brooke et al.; DJD 22; Oxford: Clarendon, 1996), 83–93, with bibliography on 83).

[9] See, e.g., Flint, "The Daniel Tradition at Qumran," 56.

[10] See the restoration of Frank M. Cross, "Fragments of the Prayer of Nabonidus," *IEJ* 34 (1984): 260–64.

and "destructive" activities that Antiochus Epiphanes was inflicting on the temple in the year 167 (see Dan 8:11–12; 9:26–27; 11:31; 12:11). For all its exclusive similarities with Dan 4:22–37, 4Q242 does not therefore become a direct literary source behind the biblical text.[11] Instead, it is more likely that we are dealing with an underlying story whose basic elements were being adapted in relation to kings associated with the religious catastrophes of the Jewish people.[12] Since it is highly unlikely that 4Q242 would have altered the name from Nebuchadnezzar to Nabunay while depending on Daniel 4, the text supplies strong evidence for a formative tradition that gave rise to the Nebuchadnezzar story of Daniel 4. Significantly, though the manuscript was produced well after the composition of Daniel (early Herodian period), it provides a clear example of pre-Danielic tradition.

4QEnGiants^b
(4Q530 frag. 2 cols. 2 + 6–7; cols. 1 + 8–11 + 12? lines 16a–20)[13]

Unlike 4Q242, the importance of this passage from the *Book of Giants* for the background of Daniel was not recognized at the outset. There are several reasons for this. First of all, the scribal hand for the manuscript 4Q530 is quite unusual,[14] and a number of the lines belonging to column

---

[11] So correctly, ibid., 264.

[12] It is therefore important to note that the Nabonidus legends are not only applied in this vein to Nebuchadnezzar in Daniel, but have also been related to the death of Antiochus Epiphanes as recounted in 2 Macc 9:5–27; on this, see esp. Doron Mendels, "A Note on the Tradition of Antiochus IV's Death," *IEJ* 34 (1981): 53–56. If Mendels's analysis is correct, then 2 Maccabees represents an advanced stage of applying Nabonidus legends directly to the infamous Antiochus IV; on the other hand, the connection drawn between Nabonidus, Nebuchadnezzar, and Antiochus Epiphanes in Daniel is more implicit.

[13] The designation given here includes all the fragment numbers that have been pieced together. For the sake of simplicity, however, I hereafter cite the passage as 4Q530 col. 2. For a further treatment of this passage within the context of the *Book of Giants*, see my *Book of Giants*, 119–23; see also idem, "The Throne-Theophany of the Book of Giants: Some New Light on the Background of Daniel 7, " in *The Scrolls and the Scriptures: Qumran Fifty Years After* (ed. S. E. Porter and C. A. Evans; JSPSup 26; Roehampton Institute London Papers 3; Sheffield: Sheffield Academic Press, 1997), 211–20. For the publication of the passage with photographs, see Émile Puech, "Livre des Geantsb ar" (DJD 31), 19–47, esp. 28–38 with bibliography. The comparison with Daniel 7 offered below, though drawing on these previous publications, advances the discussion further.

[14] See Frank M. Cross, "The Development of the Jewish Scripts," in *The Bible and the Ancient Near East: Essays in Honor of W. F. Albright* (ed. G. E. Wright; Garden City,

2 are difficult to read. In any case, scholars outside the official editorial team of the scrolls were not afforded the opportunity to study the script itself until the photographs were made accessible in 1991–93.[15] Furthermore, Milik's translation of 4Q530 fragments in 1976, offered without accompanying photographs, covered all the lines for column 2 with the exception of lines 17–19.[16] Finally, Milik merely summarized the content of these lines, and his description did not suggest that they preserve anything that might throw light on the background of Daniel. Instead, Milik's comment about lines 17–19 left the opposite impression: according to him, they contain a description of divine judgment "inspired by Dan 7:9–10."[17] Until other scholars could consult the photographs, it was impossible for them to attempt an independent judgment on the matter.[18] Nevertheless, in the meantime, Milik's suggestion about the tradition-historical relationship between 4Q530 and Daniel 7 was picked up by at least one scholar, Florentino García Martínez, in the context of discussing the date of the *Book of Giants*. García Martínez reasoned that if Milik's claim of literary dependence by the *Book of Giants* on Daniel 7 is correct, then its composition is to be assigned to an "upper limit by the middle of the second century BC."[19] It is now becoming clear, however, that the early suggestion of Milik is problematic. Since the available evidence is not yet well known, its significance in relation to Daniel merits some detailed discussion here.

NY: Doubleday, 1961), 149 (figure 3, line 3) and 181–88 for comparisons of the individual letters. Cross designated this manuscript as "4QPs.-Enoch^a" and characterized the script as "an unusual semicursive" to be dated somewhere between 100 and 50 B.C.E.

Jeremias, H.-W. Kuhn, and H. Stegemann; Göttingen: Vandenhoeck & Ruprecht, 1971), 122.

[17] Milik, *The Books of Enoch*, 305.

[18] As a result, Beyer, in *ATTM*, 264n1, and John C. Reeves, in *Jewish Lore in Manichaean Cosmogony: Studies in the Book of Giants Traditions* (HUCM 14; Cincinnati: HUCA, 1992), 104, could do no more than mention the similarity between lines 17–19 and the throne-theophany in Dan 7:9–10.

[19] See Florentino García Martínez, "The Book of Giants," in idem, *Qumran and Apocalyptic: Studies on the Aramaic Texts from Qumran* (*STDJ* 9; Leiden: Brill, 1992), 115, who makes this suggestion under the proviso that Milik's conclusion would need to be confirmed.

The passage in 4Q530 2.16a–20 occurs in a part of the *Book of Giants* that contains two dream visions of the giant brothers ʾOhyah and Hahyah. These siblings are identified in the story as sons of the fallen watcher-angel Shemihazah. In relation to biblical tradition, they are the offspring of the "sons of God" and the "daughters of humankind" (called nĕphilîm and "great men" in MT of Gen 6:4; LXX "giants") and as such have contributed along with the other giants to the escalation of evil during the antediluvian period (cf. *1 Enoch* 7–8; 4Q531 frag. 1). Their dream visions function in the narrative of the *Book of Giants* to underscore that they will not escape punishment, but will be held accountable and punished decisively for their insolent deeds. The earlier part of column 2 (lines 6–12) recounts an ominous dream of Hahyah about the destruction of the giants, and lines 16b–20 belong to the vision of judgment seen by ʾOhyah. To facilitate the comparison between ʾOhyah's dream and the prophet's night vision in Dan 7:9–10, it is appropriate to provide the texts in parallel columns (with italicized words and transliterations representing the texts' corresponding elements):

Book of Giants 2.16–20

[15b–16a]I too saw
(*ʾnh hzyt* [cf. 2.9[20]])
something amazing
during this night:
[16b][Be]hold,
the ruler of the heavens
descended to the earth,
[17a]and thrones (*krswn*)
were erected (*yhytiw*)
[17b]and the Great Holy One
sat d[own (*yt*[*b*).
[cf. *1 En.* 14:19–22]
[17c]A hundred hu]ndreds
(were) serving him
(*lh mšmšyn*)
[17d–18a]a thousand thousands
(*ʾlp ʾlpyn*)
[(were) worshiping?] him.
[18b][A]ll
stood [be]fore him
(*q*]*dmwhy hwʾ qʾmyn*).

---

[20] Compare with the beginning of Hahyah's dream on line 9, partially reconstructed: *ʾnh*] *hzyt ʿd d*[*y*. The text here, if correctly reconstructed, is almost identical to that of Dan 7:9a.

[18c–d]And behold
[book]s were opened
(*spr]yn ptyhw*),
[cf. *1 En.* 90:20]
and judgment (*dyn)*
was spoken;
[18e–19a]and the judgment of
[the Great One]
(was) [wr]itten [in a book]
and (was) sealed in an inscription. .[
[19b]] for every living being
and (all) flesh and upon [
[20]Here is the end of the
dream (*ʿd kʾ swp hlmʾ*).

Dan 7:9–10, 28

[9a]I was looking until
(*hzh hwyt ʿd dy*)
[9b]thrones (*krswn*)
were set up (*rmyw*)
[9c]the Ancient of Days
sat down (*ytb*).
[9d]His clothing (was)
like snow-white,
[9e]and the hair of his head (was)
like white wool.
[9f]His throne (was)
flames of fire;
[9g]its wheels (were)
a burning fire.
[10a]A river of fire flowed
[10b]and went forth from before it.
[10c]A thousand thousands
(*ʾlp ʾlpyn*)
served him (*yšmšwnh*),
[10d]and a myriad myriads
stood before him
(*qdmwhy yqwmwn*).
[10e]The court (*dynʾ*) sat down,
[10f]and books were opened
(*spryn ptyhw*).
[28]Here is the end of the
matter (*ʿd kh swpʾ dy mltʾ*).

A tradition-historical relationship between these passages in the *Book of Giants* and Daniel is suggested when we observe the following correspondences:

1. Both passages open and conclude with similar formulae (line 16 [9]–Dan 7:9; line 20–Dan 7:28).
2. Both passages have at least eight words in common (throne, sit down, serve, thousand, book, before, arise/stand, open).
3. Several common lexical items are preserved in the same grammatical form (thrones: absolute plural; sat down: G perfect third-person singular; books: absolute plural; were opened: G passive perfect third-person plural; before him: preposition with third-person pronominal suffix; thousand: absolute singular; thousands: absolute plural).[21]
4. The parallel phrases follow the same sequence–compare *Book of Giants* lines 17a, 17b, 17c–d, 18b, and 18c with Dan 7:9b, 9c, 10c, 10d, and 10f respectively.
5. The individual parts within the five parallel phrases just listed are given in the same sequence.

These correspondences leave the possibility of some relationship between the texts beyond doubt. It is a more difficult matter, however, to determine what this relationship means for the position of Daniel. We have seen (above) that Milik assigned a tradition-historical priority to Daniel 7. This is not the only possible construal, however, and we should consider several further possible interpretations: Daniel depends directly on the *Book of Giants*; Daniel depends on a tradition that is more faithfully preserved in the *Book of Giants*; or the *Book of Giants* depends on a tradition that is more faithfully preserved in Daniel.

The differences between the passages suggest that direct or indirect dependence on the book of Daniel is, on the whole, unlikely for the *Book of Giants*. At the same time, these differences may provide a clue about the nature of the texts' tradition-historical relationship. It is thus pertinent to register some of the differences between the texts: (a) The seers of the respective visions are not only different, but of a different sort: in the *Book of Giants* the visionary is a culpable figure, while such is not the case in Daniel 7. (b) The subject of the theophany is differently named: the *Book of Giants* designates it as "the Great Holy One," whereas Dan 7:9 (as well as vv. 13 and 22) refers to an "Ancient of Days." (c) The Daniel text implies that the divine judgment takes place in heaven (as suggested by the details given for the divine throne); ʾOhyah's dream, on the other hand, depicts the theophany as an advent in which the divine throne descends to earth. (d) The vision in the *Book of Giants* draws on three verbs in describing the activity of worship before the throne; (i.e., "serving," "worshipping" [restored], and "standing"); Daniel, on the other hand, uses only two ("serving," "standing"). (e) While the giant's vision restricts the sitting to "the Great and Holy One," Daniel ascribes it to both the "Ancient of Days" (v. 9c) and the heavenly court (v. 10e). (f) The number of worshippers indicated by the respective passages is different. The *Book of Giants* mentions only "hundreds" and "thousands" (lines 17c–d), while Daniel speaks more grandly of "thousands" and "myriads" (v. 10c–d). (g) Finally and obviously, unlike Daniel, the *Book of Giants* has nothing to say about a "son of man" or humanlike figure within the theophany.

---

[21] One may also note the G passive perfect equivalents *rmyw* (Dan 7:9b) and *yhytw* (4Q530 2.17a), and the correspondence between *yqwmwn* (Dan 7:10d) and *hwʾ qʾmyn* (4Q530 2.18b).

What do these observations suggest about the position of Daniel in relation to 4Q530 2.16–20? It is possible to highlight at least three points. First, if we isolate the comparison to 4Q530 2.18c–19 par. Dan 7:10e–f, the *Book of Giants* contains a longer description of the proceedings at the divine court. This does not mean, however, that ʾOhyah's dream must be an expansion of Dan 7:10, since it could be argued that Daniel's description of judgment focuses on the punishment of the beast (7:11–12).[22] Nevertheless, the longer description of the scenario of divine judgment in the *Book of Giants* is consistent with the author's emphasis on the irreversibility of God's decree against the giants.[23] This particular difference, then, may reflect the way the writer adapted the theophany tradition in the *Book of Giants*, which in its extant form would therefore not furnish us with the tradition as originally generated.

Second and more significant for the present purposes, the giant's vision is not as complicated in terms of structure and theology as the more-well-developed one in Daniel 7. For one thing, it may well be that the author of Daniel 7 has added speculative details concerning the appearance of both the seated figure (7:9d–e) and the divine throne (vv. 9f–10b).[24] Though it is possible that the author of the *Book of Giants* may not have wished to attribute visionary speculations about God's appearance to a culpable giant, it seems more likely that Daniel 7 has added such traditional material than that the *Book of Giants* has deleted it. Furthermore, Daniel 7, in contrast to its counterpart in the *Book of Giants*, introduces a figure designated "(one) like a son of man." In terms of tradition-history, this aspect of Daniel represents a development subsequent to the form as preserved in the giant's dream.[25]

---

[22] This does not mean that the *Book of Giants* is not interested in the punishment of characters described as ferocious animals; on such a connection with the giants themselves, see Loren T. Stuckenbruck, "Giant Mythology and Demonology: From the Ancient Near East to the Dead Sea Scrolls," in *Die Dämonen: die Dämonologie der israelitisch-jüdischen und frühchristlichen Literatur im Kontext ihrer Umwelt = Demons: The Demonology of Israelite-Jewish and Early Christian Literature in Context of Their Environment* (ed. A. Lange, H. Lichtenberger, and K. F. Diethard Römheld; Tübingen: Mohr Siebeck, 2003), 318–38.

[23] On the significance of this emphasis within the context of the early-mid second century B.C.E., see Stuckenbruck, *Book of Giants*, 31–40.

[24] On this see *1 En.* 14:19–20, 22. No doubt the details also reflect the importance of the vision in Ezekiel 1 for the *Book of Giants* author. Concerning the influence of the

Third, at one point where the respective texts overlap, the difference yields a clue about the direction in which the throne-theophany developed. In the *Book of Giants* text (lines 17c–18a) the worshippers are described in terms of "hundreds" and "thousands," while according to Daniel (7:10c–d) they are numbered in the "thousands" and "myriads." If we may regard a tendency toward inflating such numbers as a viable criterion, then it is more likely that the "hundreds" and "thousands" preserved in the *Book of Giants* have been transformed into the "thousands" and "myriads" of Daniel than the other way around. On the other hand, if a similar criterion of inflation is used, the three verbs in the *Book of Giants* would seem to be an expansion of the two that occur in Daniel.

It is important to stress that these comparisons do not lead to a conclusion that either the *Book of Giants* or Daniel has taken the vision directly from the other. They do suggest, however, that the throne-theophany of the giant's dream vision preserves an earlier form of the tradition. And so, Milik's view that here we have to do with a dependence on the biblical text of Daniel now seems untenable. It is not necessary to infer from this that the *Book of Giants* must be older than the composition of Daniel. Rather, it seems best to conclude that Daniel has taken up a tradition that, at least in some details, has been more faithfully preserved in the *Book of Giants*.[26]

Book of Watchers on Daniel 7 and the *Book of Giants*, I am indebted to a suggestion made to me by Devorah Dimant.

[25] The appearance of this figure in Daniel 7 is paralleled by the introduction in the *Animal Apocalypse* (in the *Book of Dreams*, *1 En.* 90:14, 20) of a humanlike angel-scribe who assists "the Lord of the sheep" within the context of the eschatological judgment. Significantly, similar to the *Book of Giants*, the judgment in the *Animal Apocalypse* is carried out inter alia against the fallen Watchers (= "stars" in 90:24). In this respect, the throne-theophanies of Daniel 7 and *1 Enoch* 90 represent a parallel development of tradition. The latter text suggests, however the "son of man" in Dan 7:13–14 is interpreted, that at its core the tradition envisioned an angelic humanlike figure.

[26] On the implications of this analysis for the question of the religious and historical background of Daniel 7, see Stuckenbruck, "The Throne-Theophany of the Book of Giants," 220n24.

B. "NONBIBLICAL" DANIELIC TRADITIONS

4QPseudo-Daniel^{a-b} (4Q243–244)

These very fragmentary manuscripts have been recently reedited by John J. Collins and Peter W. Flint for the Discoveries in the Judean Desert series (1996).[27] Since they preserve overlapping texts (4Q243 frag. 13 and 4Q244 frag. 12), the manuscripts may be assigned to the same document.[28] Although, owing to Milik's initial discussion (1956), they have often been treated together with 4Q245, it is best for us to discuss them separately (on 4Q245, see below). Containing a retelling of Israel's past history and a prediction of future, eschatological events, the fragments from 4Q243-244 are—as a whole—Danielic in character. This emerges from the following features: (a) The name "Daniel" (*dnyʾl*) occurs five times (4Q243 frags. 1–2, 5; 4Q244 frags. 1, 4). (b) The setting is the court of a foreign king (4Q243 frags. 1–3, 5–6; 4Q244 frags. 1–4; cf. Daniel 2–6). (c) One fragment mentions "Belshazzar" (4Q243 frag. 2; cf. Dan 5:1–2, 9, 22, 29–30). (d) The fragments contain eschatological prophecy (4Q243 frags. 16, 24–26, 33; cf. Dan 7:15–27; 8:25; 9:24–27; 11:40–12:3). (e) Both blame the exile on the sins of Israel (4Q243 frag. 13 + 4Q244 frag. 12; cf. Dan 9:4–19). Adding to these elements other features based on questionable readings,[29] Milik construed the evidence as leaving the impression that the fragments were written later than "the canonical book of Daniel."[30] Émile Puech and García Martínez have taken this construal one step further by suggesting that the 4Q243–244 (and 4Q245) fragments drew their inspiration directly from Daniel.[31]

---

[27] John J. Collins and Peter W. Flint, "4QPseudo-Daniel," in *Qumran Cave 4.XVII: Parabiblical Texts, Part 3* (ed. G. J. Brooke et al.; DJD 22; Oxford: Clarendon, 1996), 95–151, and pls. 7–9. See also Peter W. Flint, "Pseudo-Daniel Revisited," *RevQ* 17 (1996): 111–50. 4Q243 and 244 are extant in 40 and 14 fragments respectively.

[28] As noted early by Milik, "'Prière de Nabonide,'" 411–15.

[29] Ibid., 413, arguing that, in addition, 4Q243 frag. 16 mentions a period of "seventy years" (line 1; cf. Dan 9:2, 20–27) and refers to a "fi[rst] kingdom" (line 4; cf. Dan 2:26–45; 7:3–8, 17–24) to be construed as part of a four-kingdom scheme. As Collins and Flint have correctly argued, a look at the photographic plates shows that these readings, while not impossible, are far from clear. Even if these readings are correct, it is not necessary to conclude that the document is specifically alluding to Daniel; on this, see Collins, *Apocalypticism and the Dead Sea Scrolls*, 16, with bibliography in n3.

[30] Milik, "'Prière de Nabonide,'" 415: "…l'impression que l'ouvrage sous-jacent est postérieur à la composition du livre canonique de Daniel." Important for the date is the occurrence of the Hellenistic name *blkrws* in 4Q243 frag. 21, which Milik thinks may refer to Alexander Balas, who set himself up as Antiochus Epiphanes' successor. This identification must remain an unverifiable conjecture. Even more problematic is the possible identification of the incomplete]*rhws* in 4Q243 frag. 19 with the name Demetrius (cf. 4Q169 frags. 3 + 4 1.2: *dmy*]*trws*).

While some sort of knowledge of the book of Daniel is not impossible, none of the features that 4Q243–244 share with Daniel (as listed above) warrants a conclusion that underscores the tradition-historical priority of Daniel. As Collins and Flint have argued,[32] the names "Daniel" and "Belshazzar" could simply derive from common tradition, and the royal court setting is neither unique to Daniel[33] nor to any of the Dead Sea texts.[34] In addition, the notion of the exile as punishment for the people's sins is widespread, and so it would be tenuous to posit a relationship between the documents in terms of some form of dependence. Furthermore, in 4Q243-244 the exile is the result of God's anger at the Israelites' "sacri]ficing their children to the demons of error" (cf. Ps 106:37, 40; 4Q243 frag. 13; 4Q244 frag. 12).[35] By contrast, in Daniel the sins of Israel are more generally described in terms of transgressing the Torah (9:11).

Finally, even though the evidence is quite fragmentary, it is possible to observe that the perspective on history in these 4Q fragments differs from that of Daniel in at least one respect. Daniel's account of sacred history—presented in the form of *vaticinium ex eventu*—is concerned with events following the exile until the time of Antiochus Epiphanes. The pseudo-Danielic fragments, however, relate not only to postexilic times (including the Hellenistic period), but also cover biblical history from the primeval and patriarchal periods. To the primeval history, for instance, may be assigned the fragments that mention "Enoch" (4Q243 frag. 9),

---

[31] See Émile Puech, *La croyance des Esséniens en la vie future: Immortalité, resurrection, vie éternelle* (Paris: Gabalda, 1993), 568–70; idem, "Messianism, Resurrection, and Eschatology at Qumran and in the New Testament," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls* (ed. E. Ulrich and J. VanderKam; Christianity and Judaism in Antiquity 10; Notre Dame, IN: University of Notre Dame Press, 1994), 247–48; and Florentino García Martínez, "4QPseudo Daniel Aramaic and the Pseudo-Danielic Literature," in *Qumran and Apocalyptic: Studies on the Aramaic Texts from Qumran* (*STDJ* 9; Leiden: Brill, 1992), 137–49.

[32] Collins and Flint, "4QPseudo-Daniel," 134–36.

[33] Cf., e.g., the Joseph story in Genesis 39–41 and the book of Esther.

[34] So the Aramaic texts 4Q242 (see above), the 4Q550 manuscripts (so-called Proto-Esther), and possibly to be inferred from 4Q246 (see below).

[35] On the influence of Psalm 106 here, see Beyer, *ATTM Ergänzungsband*, 141. The association of wayward Israelites with "demons of error" is consistent with the general tone elsewhere in 4Q243; cf. frag. 24 lines 1–2, in which a group (restored by Collins and Flint as "the sons of ev]il"; cf. "4QPseudo-Daniel," 114, 148) that was "led astray" seems to be distinguished from "the elect," who "will be gathered" (cf. the "elect ones" in the *Apocalypse of Weeks* in *1 En.* 93:2, 10).

"Noah" and "the flood" (4Q244 frag. 8), Mount "Lubar" (4Q244 frag. 8), and "the h[igh?] tower"[36] (4Q243 frag. 10; 4Q244 frag. 9). Since it is likely that the one recounting the history is Daniel himself, it becomes clear that not all the events covered in 4Q243–244 relate to Daniel's ostensible future. While Collins and Flint find some precedent for this combination of past with future accounts in *Jubilees*,[37] the closest parallel for such a structure may be found in the Enochic *Animal Apocalypse* (*1 Enoch* 85–90), where Enoch's account begins with Adam and the fallen stars in his past (chs. 85–86) before covering the biblical story and eschatological events in Enoch's future. The mention of "Enoch" in 4Q243, the interest in early biblical history, and the apparent literary pattern suggest altogether that in 4Q243–244 we have to do with a more explicit blending of Danielic and Enochic traditions[38] than what surfaces in either Daniel or the *Animal Apocalypse*. If, then, the book of Daniel has wielded an influence on the pseudo-Daniel materials, it has been significantly neutralized. This, in turn, opens up the alternative possibility that 4Q243 and 244 preserve traditions reflecting a cross-fertilization between the Danielic and Enochic cycles before a time when the book of Daniel had established itself as a work to be regarded as a "biblical" composition in its own right.[39]

---

[36] Milik plausibly identified this "tower" (*mgdlʾ*) with the tower of Babel ("'Prière de Nabonide,'" 412). If Milik is correct, then the inclusion of this event may be fitting for a literary setting in the royal court of the king of Babylon, Nebuchadnezzar.

[37] "4QPseudo-Daniel," 135. Collins and Flint draw attention to the retelling of primeval and patriarchal biblical history (Genesis 1 until the giving of the Torah in Exodus 20) from Moses' perspective on Mt. Sinai and the inclusion of eschatological sections in chs. 1 and 23 of *Jubilees*. As they recognize, however, the parallels are evident only in terms of content; on the other hand, *Jubilees* as a whole is not structured as a survey of past history leading to ostensible future and eschatological events.

[38] Possibly the mention of Mt. "Lubar" (4Q244 frag. 8) could be added to this list, since it occurs not only in the 1Q *Genesis Apocryphon* (1QapGen 20 12.13) and *Jub.* 5:28; 7:1, but also in the Enochic *Book of Giants* (6Q8 frag. 26); see Stuckenbruck, *The Book of Giants*, 210–11. Concerning the possibility of cross-fertilization between the *Animal Apocalypse*, *Book of Giants*, and Daniel 7, see Loren T. Stuckenbruck, "Daniel and Early Enoch Traditions in the Dead Sea Scrolls," in *The Book of Daniel: Composition and Reception* (ed. J. J. Collins and P. W. Flint; vol. 2; VTSup 83.2; Leiden: Brill, 2001), 368–86. Determining the relationship between Daniel and the early Enochic traditions remains a desideratum for scholarship.

[39] I am aware that there is no way to demonstrate this possibility, but at the same time I am convinced that the notion of Daniel as a "biblical book" needs to be demonstrated rather than assumed.

4QPseudo-Daniel^c (4Q245)

Milik initially treated 4Q245 together with 4Q243–244, and was followed in this by García Martínez, Puech, and Beyer.[40] In favor of identifying 4Q245 with the other manuscripts might be the following details: (a) "Daniel" appears (frag. 1 1.3). (b) It contains a list of priestly names given in chronological order (frag. 1 1.5–10). (c) It refers to the priest named "Qahat" (cf. 4Q245 frag. 1 1.5; 4Q243 frag. 28 line 1–*q*[*ht*?). And (d) there is a similar emphasis on the wicked, who "have gone astray" (frag. 2 line 3). Features (a) and (c) are not decisive. Moreover, (b), the list of names for priests (from the very beginning of the priesthood—"Qahat"—until at least the time of "Simon" in the second century B.C.E.), apparently followed by a chronological list of kings (lines 11–12, including "David" and "Solomon")—all these are difficult to fit as such into the scheme of biblical history found in 4Q243–244.[41]

In addition to the reference to "Daniel," an allusion in 4Q245 to the motif of resurrection in Dan 12:2 has been suggested on the basis of the expression "they shall arise" (*yqwmwn*, frag. 2 line 4).[42] In Daniel the term used is "they will awake" (*yqysw*), and it refers to the lot to be experienced, respectively, by the righteous (eternal life) and the wicked (eternal contempt). The identity of the subject behind the verb "arise" in 4Q245 is not as clear as in Daniel. While Flint stresses that, unlike in Daniel, in 4Q245 it is the righteous who "arise" (line 4) and "will return" (line 5) as opposed to those who are "in blindness and have gone astray" (line 3),[43] the precise context will have to remain unclear. In any case, the mention of a subsequent return in line 5 suggests that it is problematic to infer that here we have to do with a technical expression referring to some form of resuscitation after death, as in Dan 12:1–3.[44] There is, then, no positive evidence suggesting that 4Q245 was in any way derived from Daniel. On the other hand, the metaphorical usage of blindness and going astray in relation to the wicked does not occur in the book of Daniel at all.[45] Along these lines, it is perhaps significant that the combination of these metaphors is found in the *Animal Apocalypse* (*1 En.* 89:32–33, 54), and the vision goes on to refer to the "dim-sightedness" or "blindness" of the unfaithful Israelite "sheep" (e.g., *1 En.* 89:74; 90:7, 26).

---

[40] García Martínez, "4QPseudo Daniel," 137–40; Puech, *La croyance*, 568; and Beyer, *ATTM Ergänzungsband*, 139–42. See also Robert H. Eisenman and Michael O. Wise, *The Dead Sea Scrolls Uncovered* (Shaftesbury: Element, 1992), 64–68; and Alfred Mertens, *Das Buch Daniel im Lichte der Texte vom Toten Meer* (SBM 12; Stuttgart: Echter KBW, 1971), 43–46, who, though regarding 4Q245 as a different work (43) or another recension (46n79), nevertheless arranges them together.

[41] So correctly observed by Collins and Flint, "4QPseudo-Daniel," 155.

[42] This is argued by García Martínez, "4QPseudo Daniel," 146; and Puech, *La croyance*, 569n12.

[43] Flint, "Pseudo-Daniel Revisited," 148.

[44] A reading in light of Isa 26:14, 19 is therefore misleading. In addition, Flint rightly avers that the wicked as described in line 3 ("in blindness and have gone astray") can hardly be thought to represent "a post-resurrection condition" ("Pseudo-Daniel Revisited," 148).

These considerations suggest that 4Q245, similar to the 4Q243–244 fragments discussed above, preserves elements found in both Danielic and Enochic traditions. This signifies either a dependence in 4Q245 on one or both literary collections, or reflects an early stage of tradition in which the tradition-historical boundaries between the earlier apocalyptic traditions are still fluid.

4QAramaic Apocalypse or "Son of God Text" (4Q246)

This manuscript, which consists of fragmentary portions in early Herodian script from two columns, was one of the most discussed texts before its official publication by Puech in 1996.[46] The reason for this interest is the text's reference to a figure designated "Son of God" and "Son of the Most High" (2.1) and its possible significance as background for Christology as preserved in Luke 1:32 and 35. Despite the fact that there has been little unanimity concerning the identity of this figure—whether the text refers to a "messianic" character or is an allusion to one of the Seleucid rulers—there is wide agreement that 4Q246 is dependent on Daniel 7. In the context of the discussion here, it is necessary to enumerate the correspondences of the text with Daniel in order to establish whether or not this is in fact a case of literary dependence and, if so, to consider the implications of such for the significance of Daniel.

---

[45] Blindness (*ʿwr*): Deut 27:18; 28:28–29; Isa 59:10; Zeph 1:17; Lam 4:14 ("Pseudo-Daniel Revisited," 148); going astray (*tʿh*; *srr*): Ps 58:4 (3 ET); 119:176; Prov 7:25; Isa 53:6; Ezek 14:11; 44:10, 15; 48:11; Hos 4:16. Among the Dead Sea texts, the *Damascus Document* includes both motifs: cf. CD 1.9, 14–15 (par. 4Q266 col. 1); 2.6, 13, 16 (par. 4Q266 col. 2); 3.1, 4, 14; and 4.1; in none of these references are the metaphors directly linked with one another.

[46] Émile Puech, "4QApocryphe de Daniel ar," in *Qumran Cave 4.XVII: Parabiblical Texts, Part 3* (ed. G. J. Brooke et al.; DJD 22; Oxford: Clarendon, 1996), 165–84; in addition to Puech's bibliography on 165n1, see Florentino García Martínez, "The Eschatological Figure of 4Q246," in *Qumran and Apocalyptic*, 162–79; John J. Collins, *The Scepter and the Star: The Messiahs of the Dead Sea Scrolls and Other Ancient Literature* (ABRL; Garden City, NY: Doubleday, 1995), 154–72; Craig A. Evans, "Jesus and the Dead Sea Scrolls from Qumram Cave 4," in *Eschatology, Messianism, and the Dead Sea Scrolls* (ed. C. A. Evans and P. W. Flint; SDSSRL; Grand Rapids: Eerdmans, 1997), 91–100, esp. 92–94; Beyer, *ATTM Ergänzungsband*, 145–49; and James D. G. Dunn, "'Son of God' as 'Son of Man' in the Dead Sea Scrolls?" in *The Scrolls and the Scriptures: Qumran Fifty Years After* (ed. S. E. Porter and C. A. Evans; JSPSup 26; Roehampton Institute London Papers 3; Sheffield: Sheffield Academic Press, 1997), 198–210.

Column 2 of 4Q246 preserves a number of elements that are also contained in Daniel. The column, together with the corresponding words in italics followed by the relevant passage in Daniel, is given in the following translation:

> [1]He will be designated "Son of God," and they will call him "Son of the Most High" [Dan 7:18, 22, 25, 27]. Like comets [2]of a vision, so their kingdom will be. They will rule years upon [3]the earth, and they will trample [Dan 7:23, also *dwš*; 7:7, 19, *rps*] (on) everything. People will trample (on) people, and province (will trample on) province [4]*vacat* until a people of God arises, and everyone rests from the sword.[47] [5]Its kingdom will be an eternal kingdom [= Dan 7:27[48]], and all its paths (will be) in truth. He will judge [6]the earth in truth, and all will make peace. The sword will cease from the earth, [7]and every province will do it homage [cf. Dan 7:27]. The great God is in its strength; [8]he will make war for it [Dan 7:21]; he will deliver peoples into its hand [Dan 7:25; cf. v. 22], and all of them [9]he will cast before it. Its dominion will be an eternal dominion [= Dan 7:14].

The difficulties of translating the ambiguous passage notwithstanding,[49] we can make some fairly certain observations. Regarding context, a seer in the setting of a royal court tells this description of events leading up to the eschatological period (1.1–2; cf. Dan 2:26–45; 4:19–27; 5:17–31).[50] With respect to the cited passage, wording in lines 5 and 9 corresponds exactly with Dan 7:27 and 7:14 respectively. As for the remaining parallels, the text overlaps with elements found in the second half of Daniel 7 (vv. 15–27). Here the correspondences pertain mostly to conflict language. Taken together, this evidence might provide a reasonable case for regarding Daniel 7 as a source of inspiration for 4Q246. To test the viability of this possibility, it is first necessary to consider some of the differences between the texts.

If one isolates the correspondences, a closer comparison shows some notable differences: (a) In line 3, it is the people (*ʿm*) who trample, whereas Daniel 7 ascribes this activity to the fourth beast. It is possible that the author of 4Q246 may have interpreted the beast of Daniel 7 to be the first "people" in line 3, to be distinguished from "a people of God" (line 4), through which a time of peace is introduced. (b) The expression "making war" is attributed to the "great God" (lines 7–8), who does this on behalf of his people;[51] this is quite different from Dan 7:21, where it is the horn from the fourth beast that wages war against the saints. This suggests that if 4Q246 is dependent on Daniel 7 at all, it is certainly not a straightforward interpretation. (c) There is no mention of "one like a son of man" in 4Q246. We cannot take this point for granted, though it is obvious; given the other correspondences with Daniel 7, it has been tempting for interpreters to look for an equivalent for the enigmatic figure of Dan 7:13 somewhere in 4Q246. So, for instance, James D. G. Dunn links Daniel's "son of man" to "the people of God" in line 4, and Collins finds its equivalent in the "Son of God" = "Son of the Most High" in line 1. In either case, 4Q246 column 2 has been read in relation to a *Vorverständnis* concerning the nature of the figure in Dan 7:13 (Dunn: a corporate interpretation;[52] Collins: a heavenly angelic figure[53]). Whatever the "Son of God" in line 1 represents–for purposes of this discussion it does not matter which interpretation is taken–the freedom vis-à-vis Daniel 7 reflected in 4Q246 should caution one from looking for corresponding elements and motifs when they are not sufficiently obvious.[54]

---

[47] Cf. *1 En.* 90:19, 34 (*Animal Apocalypse*) and 91:12 (*Apocalypse of Weeks*).

[48] The phrase also occurs in Dan 4:3; cf. 4:34.

[49] See the convenient summary of these in Dunn, "'Son of God' as 'Son of Man'?" 204–5.

[50] On this aspect of 4Q246, see the discussion of Lawrence M. Wills, *The Jew in the Court of the Foreign King* (Minneapolis: Fortress, 1990), 87–113.

The overlaps and departures between 4Q246 and Daniel neither exclude nor fully substantiate the notion of a dependence on Daniel. Even if the vision of Daniel 7 has provided some written or oral background for the Cave 4 text, the comparison above has shown that individual elements have been used rather freely, even to the point of contradictory emphases (e.g., consideration [b] in the preceding paragraph). It is therefore difficult, despite allowing for considerable freedom in interpretation, to imagine how 4Q246 could be an interpretation of Daniel as a "biblical" book.[55]

---

[51] Since the opposing forces appear in the following mention of delivering "peoples" into "its hand," I do not think *wˁbd lh* in line 8 ("he will make war for it") is to be translated in the same way as the similar construction *qrb ˁm-qdyšyn* in Dan 7:21 ("he made war against the holy ones"); see also, e.g., Puech, "4QApocryphe de Daniel ar," 177–78. Eisenman and Wise seem to have read the expression in 4Q246 as an "ethic dative" (cf. *The DSS Uncovered*, 71), which would regard the preposition *l-* as an untranslatable particle that follows some verbs; if this is so, then its use with the verb *ˁbd* is without analogy (see Beyer, *ATTM*, 613).

[52] See James D. G. Dunn, *Christology in the Making* (London: SCM, 1980), 77–78.

[53] John J. Collins, e.g., in *Daniel* (Hermeneia; Minneapolis: Fortress, 1993), 304–10.

[54] At present, I favor the view that line 1 refers to a pretender (Antiochus Epiphanes?) to whom a prerogative of God (or of God's agent) is (wrongly) ascribed; in support of this is the impression that the appearance of this figure, before a period of conflicts (lines 2–3), occurs in the pre-eschatological era not described until line 4; cf. Émile Puech, "Fragment d'une apocalypse en araméen (4Q246 = pseudo-Dan^{d}) et le 'Royaume de Dieu,'" *RB* 99 (1992): 129; and Beyer, *ATTM Ergänzungsband*, 146–47. If the figure is a pretender, then the honorific language in col. 1 does not constitute as much of a difficulty as Collins argues (*The Scepter and the Star*, 158).

4QFour Kingdoms (4Q552–553)

These two overlapping manuscripts preserve portions of a vision of "four trees," which represent four kingdoms. In the extant fragments two of the trees are identified with "Babylon" (*bbl*, in 4Q552 frag. 1 2.4; 4Q553 frag. 6 2.4) and "Persia" (*prs*, in 4Q552 frag. 1 2.6).[56] The four-kingdom scheme is, of course, a well-known feature in the book of Daniel (e.g., 2:36–45; 7:4–8), and the Babylonian and Persian Empires are prominent in Daniel as well. Similar to Daniel, the setting for the vision is, as in 4Q243–244 and 4Q246, that of an interpretation of a (king's) vision in a royal court (4Q552 frag. 1, 1.8, 10; cf. Daniel 2; 4; 5). Finally, in Daniel 4, Nebuchadnezzar's rule is similarly signified by a tree in his vision (4:10–15, 20–23); the tree's growth and cutting down to a stump represent Nebuchadnezzar's rise to power and the temporary hiatus of his reign.

It is possible that the text of 4Q552–553 develops themes found in Daniel, for instance, by extending the imagery applied only to the kingdom of Nebuchadnezzar to the four successive kingdoms. As in some of the other texts discussed above, however, this is not certain. Unlike the impression left by the Qumran fragments, the tree imagery is not used in Daniel 4 to include the description of the downfall of a kingdom as such, and in this sense, we may find a closer parallel for 4Q552–553 in Ezek 31:1–14 (cf. also Ezek. 17:1–24). The fragments share the four-kingdom scheme with Daniel and, in general, the genre of an interpretation (of a vision?) in the court of a foreign king. Any inference that we have to do with dependence on Daniel would be going beyond what the evidence allows.[57]

---

[55] For this reason the nomenclature used for 4Q246 by Puech ("Apocryphe de Daniel ar") in DJD 22 may be somewhat misleading.

[56] On the fragments, see Eisenman and Wise, *The DSS Uncovered*, 71–73 ("4Q547"!); Beyer, *ATTM Ergänzungsband*, 144–45; and García Martínez, *The DSS Translated*, 138–39.

[57] The similarity of genre has apparently led Beyer to speculate whether Daniel could have been the seer not only in 4Q552-553 but also in 4Q246 (*ATTM Ergänzungsband*, 144, 148). This suggestion, barring further evidence, remains no more than a possibility.

C. MANUSCRIPTS OF THE BOOK OF DANIEL

Perhaps the clearest evidence among the Dead Sea Scrolls for the importance of the book of Daniel is the eight copies found in Qumran Caves 1, 4, and 6:[58] these are 1Q71–72;[59] 4Q112–116;[60] and 6Q7pap.[61] Since the general contents of these manuscripts have been tabulated for Daniel according to both manuscript and the order of the canonical text of Daniel by Eugene Ulrich,[62] it is not necessary here to provide a full summary. On the basis of what is known, we may offer several considerations that relate to the high esteem in which Daniel was apparently held. First, the Hebrew and Aramaic parts as attested in the masoretic tradition are kept distinct among the manuscripts (so 1Q71 to Dan 2:2–6; 4Q112 to Dan 7:25–8:5; 4Q113 to Daniel 7–8). Second, there is no evidence that the manuscripts of Daniel contained other documents as well. It is thus quite likely that Daniel was usually copied alone and that its distinctive character was being recognized at an early stage.[63] Third, one of the manuscripts (4Q112, written in Hasmonean script) preserves text from almost every part of Daniel (except for chs. 6, 9, and 12). Moreover, the other manuscripts, if taken together, represent portions from chapters 1–11. The absence of chapter 12 in one of the Daniel manuscripts does not mean that there is no textual evidence for Daniel 12 since, as Flint has noted, 12:10 is picked up as part of a quotation of Daniel in 4QFlorilegium (see below).[64] This adds to the likelihood that before the turn of the Common Era, all twelve chapters of Daniel were being included in copies of the book.[65]

---

[58] E.g., Flint ("The Daniel Tradition at Qumran," 41) notes that the preserved evidence for Daniel exceeds that of most books of the Hebrew Bible: Jeremiah (6 MSS), Samuel (4), Kings (3), Job (3 plus, we note, the targumic materials from 4Q157 and 11Q10), Joshua (2), Proverbs (2), Chronicles (1); see also Ezekiel (6), Canticles (4), Ruth (4), Lamentations (4), Judges (3), Qohelet (2). The books of the Pentateuch, the Psalms, and Isaiah are represented in much larger numbers. For a list of the biblical MSS, see the two articles by Eugene C. Ulrich, "An Index of the Passages in the Biblical Manuscripts from the Judean Desert (Genesis-Kings)," *DSD* 1 (1994): 113–29; and "An Index of the Passages in the Biblical Manuscripts from the Judean Desert (Part 2: Isaiah-Chronicles)," *DSD* 2 (1995): 86–107 (hereafter "Index Part 2").

[59] Published initially by Dominique Barthélemy in *Qumran Cave 1* (ed. D. Barthélemy and J. T. Milik; DJD 1; Oxford: Clarendon, 1955), 150–51.

[60] A preliminary edition for these MSS is provided by Eugene C. Ulrich in "Daniel Manuscripts from Qumran: Part 1," *BASOR* 268 (1987): 17–37; and "Daniel Manuscripts from Qumran: Part 2," *BASOR* 274 (1989): 3–26; cf. also the discussion by Flint, "The Daniel Tradition at Qumran," 41–44. Especially significant is now the detailed analysis of 4Q115 by Stephen J. Pfann, "4QDaniel^{d} (4Q115): A Preliminary Edition with Critical Notes," *RevQ* 17, no. 65 (1996): 37–71, with plates. The Aramaic portions of the MSS (from 4Q112-113 and 115) are conveniently collated (with some suggested corrections) by Beyer, *ATTM Ergänzungsband*, 187–99.

[61] Edited by Maurice Baillet, in *Les 'petites grottes' de Qumrân* (ed. M. Baillet, J. T. Milik, and R. deVaux; DJD 3; Oxford: Clarendon, 1962), 114–16.

[62] Ulrich, "Index Part 2, " 106.

[63] Not too much should be made of this point without taking other considerations into account. The earliest MS of Daniel (4Q114 frags. corresponding to Daniel 10–11) is dated by Ulrich to near the end of the second century B.C.E.

As the preliminary treatments of the Daniel manuscripts show, the Aramaic and Hebrew portions of the book were being copied in a form that generally corresponds to the masoretic tradition. However, we should not dismiss as insignificant the occasional differences between the texts[66]–which still require a proper investigation. In principle, the departures are at least a reminder that the text traditions of the book of Daniel had not yet been standardized into the form that would later be recognized as canonical.[67]

D. FORMAL CITATIONS

In 1971, Alfred Mertens stated categorically that "there are no direct citations of the biblical book of Daniel among the Qumran writings published thus far."[68] For all the excellence of Mertens's careful study, this statement was misleading, even in the early 1970s. We can say that two documents, published with photographs in 1968[69] and 1965[70] respectively, contain formal citations of Daniel: 4Q174 (= 4QFlorilegium 2.3–4) and

---

[64] Flint, "The Daniel Tradition at Qumran," 43.

[65] It is possible, however, that another Hasmonaean copy of Daniel, 4Q116 (4QDan^e), contained only portions of ch. 9 (vv. 12–14, 15–16? 17?); see Ulrich, "Daniel Manuscripts: Part 2, " 18; and Flint, "The Daniel Tradition at Qumran," 43. If this is the case, then the MS would be a copy of an excerpt of Daniel rather than a copy of the entire book.

[66] For a listing of some of the textual variants, see the publications given in n60 (above) and, further, Mertens, *Das Buch Daniel*, 30–31.

[67] E.g., note the additional "all these" and "all the earth" in Dan 2:39–40 (4Q112 frag. 5 2.9), which against the masoretic tradition and the Theodotionic recension agrees with the Old Greek recension represented by the Cologne Papyrus (967); for two further such examples, see Mertens, *Das Buch Daniel*, 30–31. Moreover, the additional "sat down" for 7:22 in the very fragmentary 4Q115 suggests that *dyn*ʾ (restored) was being understood in the sense of "court"; if the context for the verb has been correctly identified, then the MS has a text in which 7:22 corresponds more closely to the scene as described in 7:9–10 ("ancient of days…the court sat down").

[68] Ibid., 51: "Nirgends in den bisher veröffentlichten Schriften von Qumran finden sich direkte Zitate aus dem biblischen Daniel-Buch."

[69] John M. Allegro, in *Qumran Cave 4.I (4Q158–4Q186)* (ed. J. M. Allegro and A. A. Anderson; DJD 5; Oxford: Clarendon, 1968), 53–57 and pls. 19–20.

[70] Adam S. van der Woude, "Melchisedek als himmlische Erlösergestalt in den neugefundenen eschatologischen Midraschim aus Qumran Höhle XI," *OtSt* 14 (1965): 354–73 and plate 1.

11Q13 (= 11QMelchizedek 2.18). In the case of 11Q13, the text is fragmentary, and there is a lacuna where there may originally have been a citation. It identifies the "messenger" of Isa 52:7 as "[the] one [ano]inted of the spirit" (*hm*]*šyḥ*) spoken of by "Dan[iel...]." 11Q13 thus probably uses Daniel 9 (in either v. 25 or v. 26) "messianically," that is, it correlates the eschatological messenger (probably Melchizedek) with an "anointed one" in Daniel.[71]

4Q174 preserves more of a text cited from Daniel; lines 3–4 from column 2 read as follows:

> [3]...wha]t is written in the book of Daniel the prophet: "[The wicked ones...] will act wickedly [4]and the righteous ones [...shall be made wh]ite and shall be refined, and the people who know God will be strong...."

The citation is a combination of Dan 12:10 ("the wicked will act wickedly"; "shall be purified, made white, and refined"; cf. 11:35: "shall be refined, purified, and made white") and 11:32 ("the people who are loyal to their God shall be strong"). The appeal to Daniel reinforces the belief of the author of 4Q174 that during the eschatological period the wicked ones will be exposed while the righteous ones who practice "the whole Torah" (line 2) will be refined. It is not clear whether the words corresponding to 11:32 represent a variant or a free adaptation of the text of Daniel. In any case, the mixed citation no doubt reflects a deliberate attempt at interpreting Daniel not only in relation to the context of the *Florilegium* but also by coordinating different passages within the book of Daniel itself. Of particular significance is, of course, the reference to Daniel as "the prophet" in the introduction to the citation. We may infer from this that the author of the text considered the book of Daniel to belong to Scripture in some way, and perhaps would have assigned it to "the prophets," one of the three divisions being distinguished among the Jewish Scriptures (cf. the Greek Prologue to Sirach; 2 Macc 2:13).[72]

E. THE INFLUENCE OF DANIEL ON MOTIFS AND IDEAS OF THE QUMRAN LITERATURE

From the preceding discussion it is clear enough that Daniel served as a tradition inspiring the authors of the Dead Sea Scrolls. At the same time, as the analysis thus far has also indicated (see esp. sections A and B), the specific use of the book of Daniel in a given instance is a matter that requires some demonstration; it is precarious to assume that the mere existence of parallel motifs or overlapping traditions must reflect the direct impact of Daniel. In this section, we extend the inquiry from the question of tradition criticism and the explicit use of Daniel into the more complicated matter of how the language and theologies of the Qumran texts may be thought to have derived from Daniel itself. As this question is quite broad and demands a more thorough investigation than is possible here,[73] I discuss briefly a few of the most-frequently-cited examples of Daniel's possible influence.

---

[71] See the discussion of the text by Émile Puech, "Notes sur le manuscrit de 11QMelkîsédeq," *RevQ* 12 (1987): 483–513.

[72] If this inference on the basis of 4Q174 is correct, then it is difficult to agree with Mertens's conclusion that at Qumran Daniel was not regarded as one of the prophetic writings of the Jewish scriptures (*Das Buch Daniel*, 97).

The Eschatological Periodization of History

Some of the early Jewish apocalyptic texts structure history from the biblical period until the end, when evil will be held accountable through divine judgment. In particular, the *Apocalypse of Weeks* (*1 En.* 93:1–10; 91:11–17) divided history into ten "weeks," while in Daniel history may be variously conceived in terms of four kingdoms (chs. 2; 7) and "seventy weeks of years" (9:1–27). The divisions of eras into ten generations and four kingdoms are known through Persian sources and, indeed, are combined in *Sibylline Oracles* book 4.[74] However, the distinctive element Daniel introduces is the reinterpretation of Jeremiah's "seventy years" for the desolation of Jerusalem under Babylonian rule (25:10–11; 29:10) as a more prolonged period of "seventy weeks of years," a period of 490 years extending into the author's own time (Dan 9:2, 24).[75] It is quite possible, therefore, that references and allusions among the Dead Sea materials to a scheme of either seventy weeks or 490 years may derive from Daniel. Scholars have argued that this is indeed the case, for example, in the *Damascus Document*, 4Q180–181, and 11QMelchizedek.

Though the *Damascus Document* contains no explicit reference to 490 years, such a period has been inferred if the work is taken in its composite form. We reach a total of 490 years if we combine the chronological details found in the Cairo Genizah manuscripts of the work with an assumed period of 40 years for the Righteous Teacher's activities:

---

[73] There now is, for instance, a need to explore the entire corpus of Dead Sea materials in relation to the influence of Daniel (and other biblical books). Mertens's study of Daniel and the Qumran texts focused predominantly on the documents from Cave 1.

[74] The *Sibylline Oracles*, book 4, assigns six generations to the period of the Assyrians ruling (4:49–53), two to the Medes (54–64), one to the Persians (65–87), and one to the Macedonians (88–101).

[75] Collins, *Apocalypticism in the DSS*, 52–53.

a. 390 years: The time from the fall of Jerusalem until the appearance of the "root of planting" (CD 1.5–8).
b. 20 years: The period of "blindness" for the group until the coming of the Righteous Teacher (CD 1.8–11).
c. 40 years: The interval between the death of the Righteous Teacher and the judgment of the Man of the Lie and his group (CD 20.13–15).
d. 40 years: The duration of the Righteous Teacher's activities between (b) and (c).

The existence of the scheme from Daniel 9 here encounters two main problems: (1) The reference to 390 years is taken from the period given in Ezek 4:4–7 for the punishment of Jerusalem. The author of this part of the *Damascus Document* is therefore not immediately concerned with the chronology of Daniel 9; at most, one would have to suppose that the 390 years, in the end redaction of the work, becomes a building block (though from Ezekiel) to produce the number 490. (2) Obviously, the period of forty years assumed for the group's leader is simply an estimate, and unless one takes Daniel's scheme of 490 years as a point of departure, it has no basis in the text. While these difficulties do not exclude the possibility that Daniel's chronology is presupposed, they undermine any notion that the author(s) drew on Daniel in an explicit, immediately recognizable way. The *Damascus Document* mentions "the book of the divisions of the times in their jubilees and in their weeks" (16.3–4), and this may suggest that the author(s) would at least have known a periodization structured around the number seven. It is questionable, though, whether the chronological details of the *Damascus Document* were coordinated with the kind of scheme presupposed in this "book,"[76] and in any case, whether Daniel 9 lies at all in the background of such a scheme.[77]

The use of Daniel's scheme in the fragmentary 4Q180–181 is likewise unclear. 4Q181 fragment 2 (line 3) does mention "seventy weeks," and the expression likely represents seventy weeks of years, as in Daniel 9. According to 4Q180 fragment 1, the document is a "commentary (pesher) on the periods," and all of this "is engraved on (heavenly) tablets"; as in Daniel, events in history are thus predetermined. Unfortunately, not enough of 4Q180–181 is extant for us to know how the scheme as a whole is structured. It is, moreover, not clear to what the "seventy weeks" (of years) refers, whether to an era from the activities of ʿAzʾazel and the other fallen watchers (see *1 En.* 7:1–8:3; 10:1–16) before the great flood until Abraham, or to some period subsequent to Abraham, or—analogous to the book of Daniel—to a period of punishment or estrangement from God, here one during which "Israel" was led astray under the influence of ʿAzʾazel, whose activities are thought to have continued after the time of the great flood.[78]

---

[76] On the possibility that CD 16.2–4 is a later insertion into the work, see Joseph M. Baumgarten and Daniel R. Schwartz, "Damascus Document (CD)," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Document, War Scroll, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 39n132.

[77] It is likely that "the book" of CD 16.3–4 refers to *Jubilees*, which views history from the creation until the giving of the Torah at Mt. Sinai as divided into some 49 "jubilees," i.e., 49 periods of 49 years; cf. Michel Testuz, *Les idées religieuses du livre des Jubilés* (Geneva: Droz, 1960), 138–40.

The chronological scheme adopted in 11QMelchizedek shares features with both Daniel 9 and the Enochic *Apocalypse of Weeks*. As in the latter, history is divided into ten periods, which in 11QMelchizedek are termed "jubilees." Although in the *Apocalypse of Weeks* the eschatological age dawns during the eighth "week," this Qumran text introduces the final period of redemption and judgment during the tenth jubilee (11Q13 2.6–9). If one "jubilee" represents 49 years, then the ten jubilees add up to 490 years, the same duration found in Daniel 9. That the author of the document was aware of and drew upon Daniel 9 directly is likely from the explicit mention of the chapter later on column 2 (2.18; see under sec. D, above). The chronological use of Daniel, however, is creative and is best explained as a combination of the length of time in Daniel 9 with the tenfold structure found in the *Apocalypse of Weeks*.

Angelification of the Faithful

In Dan 7:18–29 the faithful people of God are given the designation "holy ones" (v. 21) and "holy ones of the Most High" (vv. 18, 22, 25, 27).[79] This is in contrast with the usage of the noun adjective *qdwš* among the Hebrew Scriptures, where as such it is restricted to heavenly beings (Job 5:1; 15:15; Zech 14:5; cf. Sir 42:17). In this way, the elect are allowed to participate in an "eternal kingdom" (v. 27; cf. v. 18), similar to what in Daniel 7 has already been given to the "(one) like a son of man" (v. 14). The background for the substantivization of *qdwš* suggests that Daniel 7 is describing the faithful of Israel in terms analogous to angelic beings. A similar emphasis is suggested once again in Dan 12:1–3, where the text describes the afterlife of the righteous, who are awakened from sleep (v. 2): "Those who bring understanding [*mśklym*, v. 3] will shine like the brightness of the firmament, and those leading the people to righteousness (will be) like the stars forever and ever." That the author of Daniel has an angelic existence in mind is suggested by the so-called *Epistle of Enoch* (*1 En.* 104:1–4, 6), which promises the righteous that the heavenly angels will remember them before God. They "will shine like the lights of heaven" (v. 2) and "will make a great rejoicing like the heavenly angels" (v. 4), with whom they are to be "partners" (v. 6).

---

[78] This is according to the restoration of Milik, *The Books of Enoch*, 251. On the texts, see further Devorah Dimant, "The 'Pesher on the Periods' (4Q180) and 4Q181," *Israel Oriental Studies* 9 (1979): 77–102.

[79] In Dan 7:27, the phrase is "the people of the holy ones of the Most High."

In some of the scrolls associated with the Qumran group, there is likewise a correlation between the elect and the angels of heaven. This association goes well beyond the dimensions expressed in either Daniel or *Epistle of Enoch*, since there is an emphasis on the presence of angels in the community. The significance of the angels for the community's self-understanding is expressed in a number of ways: (a) The angels are expected to help the "Sons of Light" in the eschatological war against the forces of evil (see the *War Rule*).[80] (b) The community participates with angels in worship.[81] (c) The angels' presence means exclusion of the ritually unclean from war camps[82] and from the present and future worshipping community.[83] And (d) the angels' presence guarantees the community's physical and religious well-being.[84] While Daniel 12 and *1 Enoch* 104 have in view the form of existence in the afterlife, the Qumran texts regard the angelified life as possible for the faithful in the present.[85] Despite this difference, we may say that the earlier apocalyptic works, at the least, have provided the general milieu out of which the specific ideas of the Qumran community developed. While the question of direct influence and borrowing is as such difficult to substantiate, it is quite possible that the traditions found in Daniel and the *Epistle of Enoch* were catalytic as the community struggled to find language to articulate its self-understanding in relation to angels.

[84] 11Q14 (from *War Rule*) 1.6–13.

[85] See further Collins, *Apocalypticism in the DSS*, 119.

The Role of the Angel Michael

In addition to the matter of angelification, among the Dead Sea texts we may find a background of Daniel in the function assigned to the archangel Michael on behalf of the faithful. In Dan 10:10–12:3, the arena of political conflicts is portrayed as a battle between angelic "princes" (*śrym*) who represent nations such as Persia and Greece (10:13, 20). The heavenly counterpart for God's people is Michael, designated the "prince" (*śr*), who not only has charge over them (12:1) but is also the one who engages in battle against the other nations on their behalf (10:13, 21; 12:1). Though the figure of Michael is well known in early Jewish tradition, the nomenclature and specific function attributed to this angel are unique to Daniel.

The significance of Daniel's description of heavenly conflict is seen most clearly in the Qumran *War Rule*. Here, in the eschatological conflict between the "Sons of Light" and the "Sons of Darkness," Michael is understood in categories reminiscent of Daniel. In 1QM 17.6–7, the "majestic angel" (*mlʾk hʾdyr*) sent as "an everlasting help" (cf. Dan 10:13) to the redeemed of Israel is identified with Michael, whose authority is "in everlasting light." It is thus likely that the author(s) regarded Michael as "the Prince of light" (*śr mʾwr*; 13.10), through whose authority the forces of God are mustered against the Sons of Darkness associated with the lot of Belial. The *War Rule* thus integrates the angelology of Daniel into a more explicitly dualistic scheme.[86]

The influence of Daniel on the *War Rule*, however, runs even deeper. The prominence accorded to Michael reflects the use of a wider network of ideas, of which Michael is but a part. Interpreters have noted the numerous correspondences between the preliminary description of the war in column 1 and Daniel.[87] Broadly, they consist in the following points: (a) War will be waging between a ruler from the south and kings of the north (1QM 1.4; Dan 11:11, 14–15, 25, 40, 44). (b) The "horn" is a symbol for the forces of evil (Belial in 1QM 1.4–5; cf. Dan 7:20–25; 8:9–12). (c) There will be complete destruction of the enemy, for whom there is neither help nor escape (1QM 1.5–7; Dan 11:42, 44–45). (d) The text mentions both Egypt and the "Kittim" (1QM 1.2, 4, 6, 9, 12; Dan 11:30, 42–43). (e) It describes the war as a "time of distress" (1QM 1.11–12; cf. 15.1; Dan 12:1). And (f) the faithful will "shine" (1QM 1.8; Dan 12:3).[88] Although there are differences in the ways these shared motifs function in the respective works, the convergence of common items in both texts and the post-Danielic date of the component sections of the *War Rule*[89] demonstrate sufficiently that its authors were profoundly affected by and made use of portions of Daniel 7–8 and 10–12.

---

[86] Concerning the redaction of the *War Rule* in relation to Michael, see Jean Duhaime, "La rédaction de 1QM XIII et l'évolution du dualisme à Qumrân," *RB* 84 (1977): 44–46.

[87] The most important treatments of the influence of Daniel on the *War Rule* are in Jean Carmignac, "Les citations de l'Ancien Testament dans la 'Guerre des fils de lumière contre les fils de ténèbres,'" *RB* 63 (1956): 234–60, 375–90; Mertens, *Das Buch Daniel*, 79–83; and Gregory K. Beale, *The Use of Daniel in Jewish Apocalyptic Literature and in the Revelation of John* (Lanham, MD: University Press of America, 1984), 42–66.

CONCLUSION

The above discussion has addressed the question of the book of Daniel's influence among the Dead Sea materials in a variety of ways. The number of manuscripts of Daniel provides unmistakable evidence the work's importance for those who copied the scrolls (sec. C), and the formal use of Daniel in 11QMelchizedek and 4QFlorilegium suggests much the same (sec. D). At the same time, one cannot be certain that members of the Qumran community and copyists of scrolls collected by the community would all have shared the same posture toward the book at any given time, and even more, that it was held in as much esteem at the inception of the community's existence during the second century B.C.E. as at the end in 68 C.E. The multiplicity of allusions in the *War Rule* demonstrates that its profound influence could be reflected in a document as it was being circulated in different recensions by the end of the Common Era (sec. E).

We should not confuse the question of Daniel's significance as a canonical book with its importance as a locus for traditions that proliferated during the second century B.C.E. Although a number of writings from the Dead Sea texts contain motifs, ideas, and even phrases that occur in Daniel, this does not necessarily mean that each instance provides an example of the specific influence of the book of Daniel. In some of the literature reviewed, Danielic tradition is found in a form that corresponds to another representative of early Jewish apocalyptic tradition, most notably the emerging Enochic corpus (4Q530; 4Q243–245; 4Q180–181). The present analysis has suggested (in sections A, B, E) that the study of ideas shared by Daniel and other Dead Sea Scrolls materials may variously illuminate the tradition-historical background of the biblical book (4Q242; 4Q530 col. 2), throw light on contemporary Danielic traditions (4Q243–245; 4Q552–553), and/or represent the creative use of Daniel (4Q246? 1QM, e.g., col. 1). While the study of these sources leaves little doubt regarding the generally high esteem accorded Daniel among the scrolls, it also provides a caution against an overly canonical point of departure. In relation to the book of Daniel, we may thus conclude that the sources preserved among the Dead Sea Scrolls provide evidence for the making and remaking of what people would soon recognize as biblical tradition.

---

[88] The respective texts, however, use different verbs (Daniel: *zhr*; 1QM: *yʾyr*) and the motif of shining is associated with the faithful in different states (Daniel: the righteous raised to everlasting life; 1QM: the victorious "Sons of Light").

[89] See the discussion of composition and date by Jean Duhaime, "War Scroll," in *Damascus Document, War Scroll, and Related Documents*, 83–84.

CHAPTER SIX

THE REWRITTEN BIBLE AT QUMRAN

Sidnie White Crawford

Since the discovery of the scrolls from the Qumran caves in the late 1940s and early-to-mid 1950s, the process of sorting, identifying, and editing the fragmentary manuscripts has occupied the attention of scholars. Now, as that period in the history of scrolls scholarship draws to a close, more and more attention has turned to the contents of the texts from the eleven caves in the vicinity of Khirbet Qumran as a collection. We can say several things about this collection. First, the majority of the texts are written in Hebrew, thus pointing to Hebrew as a living language (at least in literature) in the Second Temple Period. Second, a large percentage of the texts found in the caves (about 25 percent) are copies of books later considered part of the canon of the Hebrew Bible; there are also copies of books that were later grouped into the Apocrypha and Pseudepigrapha.[1] Third, of the "previously unknown" works unearthed from the caves, the vast majority of them bear some relationship to the books that later became known as the Hebrew Bible. Scholarship now occupies itself with classifying and understanding these manuscripts, both individually and in relation to one another.

One of the groups of manuscripts that has been identified from the Qumran caves is the "Rewritten Bible" texts. We may define a "Rewritten Bible" text as a text that has a close narrative attachment to some book contained in the present Jewish canon of Scripture, and some type of reworking, whether through rearrangement, conflation, omission, or supplementation of the present canonical biblical text.[2] We should differentiate this category from the "parabiblical" texts, which may be tied to some person, event, or pericope in the present canonical text, but do not actually reuse extensively the biblical text.[3] Many of these works can be categorized into specific genres, such as Testament (e.g., *Testament of Naphtali*), while others are pseudepigraphs (e.g., *Pseudo-Ezekiel*, *Pseudo-Daniel*). A third category may be described as works loosely related to a biblical book, but with no overt tie, such as the *Prayer of Nabonidus* or *Proto-Esther* (a.k.a. *Tales of the Persian Court*). None of these categories include the commentaries (e.g., *Nahum Pesher*, *Habakkuk Pesher*), which make a clear distinction between biblical lemma and interpretation, although this genre was growing in importance during the Second Temple Period and is well attested at Qumran. For the purposes of this paper, the last two categories need not detain us. Rather, the subject under investigation will be the definition of the category "Rewritten Bible" and the classification of certain texts in it.

---

[1] It is a well-known and well-rehearsed fact that every book of the Hebrew Bible except for Esther and Nehemiah was found at Qumran, but that statement ignores the equally important fact that apocryphal and pseudepigraphical books like Tobit, *Enoch, Jubilees*, Ecclesiasticus, the Letter of Jeremiah, and Psalm 151 were found there in numerous copies, as well.

[2] Cf. Geza Vermes, "Bible Interpretation at Qumran," *ErIsr* 20 (1989): 185–88.

Before continuing, however, it is worthwhile to consider whether this category of "Rewritten Bible" is correct when describing part of the Qumran corpus. Both elements in the designation can be called into question. First, the term "Bible" is anachronistic at Qumran. A Bible, in the sense of a fixed collection of sacred books regarded as authoritative by a particular religious tradition, did not exist during the time in which the Qumran corpus was copied (roughly 250 B.C.E. to 68 C.E.).[4] First, the number of books regarded as authoritative was not fixed in this period. From the scanty evidence available, however, it is clear that certain books were generally accepted as divinely inspired and hence authoritative. This evidence includes the Prologue to the Wisdom of Jesus ben Sirach (Ecclesiasticus; ca. 135 B.C.E.), which enumerates the books to which one should devote one's study as "the Law and the Prophets and other books." From Qumran itself, 4QMMT (4Q397 frags. 7–8 line 10; dated by its editors to the middle of the second century B.C.E.) lists "the book of Moses and the books of the Prophets and (the writings of) David." Fourth Ezra (2 Esd) 14:23–48 (written shortly after 70 C.E.) states that God ordered Ezra "to make public the twenty-four books that you wrote first"; the number twenty-four corresponds to one enumeration of the present Jewish canon, indicating that for this author the canon was similar if not identical to the present canon. Josephus, in *Ag. Ap.* 1.37–43 (written sometime in the 90s C.E.), lists the books "justly accredited"; they number twenty-two, and include the Law (five books), the Prophets (thirteen books), and "the remaining four," which certainly include Psalms and Proverbs, and perhaps Job and Ecclesiastes. In all the lists, the Torah or Five Books of Moses are without doubt authoritative. The Prophets, including the historical books, probably refer to Joshua through Kings and Isaiah through Malachi. The last category, ben Sirach's "other books," undoubtedly included Psalms and Proverbs. The remaining books–Job, Ecclesiastes, Song of Songs, and Esther–are questionable. Esther, in fact, did not win general acceptance in the Jewish community until the second century C.E. So the concept of scriptural authority in the Second Temple Period was open, except in the case of the Torah or Pentateuch. The same situation obtains for the Qumran collection.

---

[3] The list of works included in the category is long. Those based on passages from the Pentateuch include *Exhortation Based on the Flood*, *Paraphrase of Genesis and Exodus*, *Apocryphon of Joseph*, *Apocryphon of Jacob*, *Testament of Judah*, *Apocryphon of Judah*, *Aramaic Levi Document*, *Testament of Levi*, *Testament of Naphtali*, *Testament of Qahat*, *Visions of Amram*, *Hur and Miriam*, *Apocryphon of Moses*, *Pseudo-Moses*, and *Words of Moses*. Those based on books of the Prophets include *Pseudo-Joshua*, *Vision of Samuel*, and *Pseudo-Ezekiel*. The one text based on books of the Writings is *Pseudo-Daniel*.

[4] For a discussion of the formation of the canon, see, e.g., James A. Sanders, "Canon, Hebrew Bible," *ABD* 1:837–52, and the literature cited there.

James VanderKam has established a set of criteria by which to determine whether the Qumran community considered a book authoritative.[5] Although VanderKam does not differentiate among his criteria, they can be divided into two categories. The first is compositional intention. VanderKam asks, "How does the book present itself?" In other words, does the author (redactor, compiler) wish the book to be understood as a divinely inspired composition? If so, then the work presents itself as authoritative. The other two criteria, "Is a book quoted as an authority?" and "Is the book the subject of a commentary?" have to do with community acceptance. That is, by quoting or commenting on a work, a community signals its acceptance of it as divinely inspired. Both of these functions, compositional intention and community acceptance, must be present for a work to be considered authoritative. By applying these criteria to the Qumran corpus, we can make strong, if not definitive, cases for the books of the Torah, at least for some of the Prophets, and for the Psalms, but the case for books such as Chronicles is ambiguous at best. Further, we can make strong cases in favor of scriptural status for books not now considered canonical, such as *1 Enoch* and *Jubilees*. Thus, the term "Bible" in the category "Rewritten Bible" is anachronistic when applied to the Qumran collection.

The second objection that can be raised is that, as the work of Cross, Talmon, Ulrich, Tov, and others has shown,[6] the text of those books we term "biblical" was not fixed in this period, but pluriform. Thus, a certain amount of fluidity in the transmission of the text of the books was both expected and accepted, and minor variants between versions did not affect the authority of the particular text. Therefore, the term "rewritten" can be called into question as well, for if a fixed text does not exist, can it be rewritten? Hence, the category itself is slippery, since at Qumran there is no easy dividing line between biblical and nonbiblical, authoritative and nonauthoritative texts. In fact, it is possible that over the period in which the collection was made, the status of some books shifted, perhaps being accorded a high status at first and then falling out of favor. It would be wise, then, to keep in mind that the term "Rewritten Bible" is an anachronism when discussing the Qumran corpus, useful only for modern readers attempting to categorize and separate these texts, and not a category that would have had much meaning for ancient readers.

[6] See the articles by Frank M. Cross and Shemaryahu Talmon in *Qumran and the History of the Biblical Text* (ed. F. M. Cross and S. Talmon, eds.; Cambridge: Harvard University Press, 1975). For Eugene C. Ulrich's views, see, for example, "Multiple

Now, after defining and raising objections to the category of "Rewritten Bible," which texts found at Qumran best fit the description? For the purposes of this article, we concentrate on texts that reuse the Torah (the Pentateuch) rather than the Prophets or the Writings. There are two texts that clearly exhibit a close attachment to the text of the Pentateuch in narrative and/or themes, while also containing straightforward evidence of the reworking of that text for theological reasons. They are *Jubilees* and the *Temple Scroll.* Two other texts may also fit into this category, although their presence there may be disputed: 4QReworked Pentateuch and the *Genesis Apocryphon.* Other, smaller texts may also fit into the "Rewritten Bible" category, but we will not consider them here.[7]

THE TEMPLE SCROLL

The *Temple Scroll*, found in Cave 11 in 1956, is the longest complete scroll found at Qumran, being 7.94 meters long in its present condition. It consists of nineteen sheets of leather preserving sixty-seven columns of

Literary Editions: Reflections toward a Theory of the History of the Biblical Text," in *Current Research and Technological Developments on the Dead Sea Scrolls: Conference on the Texts from the Judean Desert, Jerusalem, 30 April 1995* (ed. D. W. Parry and S. D. Ricks; *STDJ* 20; Leiden: Brill, 1996), 78–195. For Emanuel Tov, consult his *Textual Criticism of the Hebrew Bible* (2d, rev. ed.; Assam: Van Gorcum, 2001).

[7] A good example of this type of text is 4QCommGen A (formerly Pesher Genesis) recently published by George Brooke. It seems to combine a rewritten Bible base text with pesher-type exegesis. George J. Brooke, "4QCommentary on Genesis A," in *Qumran Cave 4.XVII: Parabiblical Texts, Part 3* (ed. G. J. Brooke et al.; DJD 22; Oxford: Clarendon, 1996), 185–207, pls. 12–13.

text; the scroll is written in Hebrew by two scribes, scribe A copying columns 1–5 and scribe B the other columns. Its editor, Yigael Yadin, assigned a date of the Herodian period (late first century B.C.E.) to the handwriting of the scroll.[8] In addition to the large scroll from Cave 11 (11Q19), one or possibly two other copies were found in Cave 11 (11Q20–21 [= 11QTemple$^{b, c?}$]); further, a mid-second century B.C.E. manuscript of the *Temple Scroll* was found in Cave 4 (4Q524). Finally, another Cave 4 manuscript may contain source material for the *Temple Scroll* (4Q365^{a}).[9]

The *Temple Scroll* presents itself as a direct revelation from God (speaking in the first person) to Moses, who functions as a silent audience. That the recipient is Moses is clear from the reference in 11Q19 44.5 to "thy brother Aaron." The text is a collection of laws, which cover the following topics:

col. 2	the covenant relationship
cols. 3–12	the temple building and altar
cols. 13–29	feasts and sacrifices
cols. 30–44	the temple courts
cols. 45–47	the sanctity of the holy city
cols. 48–51.10	purity laws
cols. 51.11–56.11	various laws on legal procedure, sacrifices, idolatry
cols. 56.12–59.21	the law of the king
cols. 60–67	various legal prescriptions[10]

The *Temple Scroll*'s legal position exhibits a particular ideology, especially in the laws regarding the purity of the temple. So, for example, defecation is not allowed within the holy city: "And you shall make them a place for a 'hand,' outside the city, to which they shall go out, to the northwest of the city–roofed houses with pits in them, into which the excrement will descend, {so that} it will {not} be visible at any distance from the city, three thousand cubits" (46.13–16); nor is sexual intercourse: "And if a man lies with his wife and has an emission of semen, he shall not come into any part of the city of the temple, where I will settle my name, for three days" (45.11–12). These purity laws were meant to safeguard the sanctity of the temple.

[10] See Sidnie White Crawford, "Temple Scroll," in *Dictionary of Judaism in the Biblical Period* (ed. J. Neusner and W. S. Green; New York: Macmillan, 1996), 626–27.

Many of the legal provisions of the *Temple Scroll* are interesting for their unusual nature. The architectural plan the scroll outlines for the temple differs from the biblical accounts of both the first and the second temple, as well as differing from the descriptions of the second temple by Josephus or the Mishnah. The festival calendar includes a number of festivals not found in the Torah or rabbinic literature, such as the festivals of New Wine and New Oil. The Law of the King contains several unique provisions, including the prohibition of royal polygamy and the subordination of the king to the high priest in matters of war. We must remember that all of this material is presented as a direct revelation from God.

The question of the sectarian nature of the *Temple Scroll* is a vexed one. As has often been remarked, the *Temple Scroll* contains no overtly sectarian vocabulary as is found in other Qumran documents: a community with a distinct hierarchical structure, predestination, dualism, or a new covenant. However, the scroll does have clear commonalities with some of the Qumran texts that have been identified as sectarian, such as the *Damascus Document* and the *Nahum Pesher*. It espouses a solar calendar and a strict interpretation of the Torah. In addition, several smaller details of the *Temple Scroll* show affinity with other Qumran documents. The festival of New Oil and the Wood Festival appear in 4QReworked Pentateuch^{c} and in 4QMMT (4Q394-399).[11] The *Damascus Document* (CD 12.1–2) forbids sexual intercourse in the holy city. The purity laws for the holy city are similar to the camp rules of the *War Scroll*, and consanguineous marriage between uncle and niece is forbidden in both the *Temple Scroll* (66.16–17) and the *Damascus Document* (CD 5.8–11). Therefore, it seems likely that the *Temple Scroll*, while not a strictly sectarian composition, is part of an older body of material (which would also include books such as *Jubilees*) inherited and used by the Qumran community.

Our interest lies in the *Temple Scroll*'s reuse of the biblical text to create a new document that is placed, not in the mouth of Moses, but in the mouth of God himself. From the beginning of *Temple Scroll* studies, commentators have recognized the redactor's reuse of the biblical material and the methods by which he reused it. Yigael Yadin, the scroll's original editor, gave a complete listing of the contents of the scroll, along with its main biblical sources, which include Exodus, Leviticus, Numbers, Deuteronomy, 1–2 Samuel, 1–2 Kings, 1–2 Chronicles, Ezra, Nehemiah, Isaiah, Ezekiel, Joel, and Song of Songs, with the preponderance of sources being Exodus, Leviticus, Numbers, and Deuteronomy.[12] In fact, the last seven columns of the scroll adhere very closely to the text of Deuteronomy. Yadin also enumerated the ways in which the author of the *Temple Scroll* reused the biblical passages: formulation of the text in the first person, merging of commands on the same subject, unifying duplicate commands (harmonization), modifications and additions designed to clarify the meaning of the commands, and appending whole new sections.[13]

Emanuel Tov and Sidnie White, "4QReworked Pentateuch^{c}," in *Qumran Cave 4.VIII: Parabiblical Texts, Part 1* (ed. H. W. Attridge et al.; DJD 13; Oxford: Clarendon, 1994), 255–318.

Michael Wise, in his source-critical study of the *Temple Scroll*, suggests that the redactor drew on several sources, including a Deuteronomy Source, a Temple Source, a Midrash to Deuteronomy Source, and a Festival Calendar.[14] All of these sources are dependent, to a greater or lesser extent, on the biblical text. Wise also observes that the redactor of the *Temple Scroll* is particularly dependent on Deuteronomy 12–26.[15]

Finally, Dwight Swanson, in his recent monograph on the subject, lists the biblical sources used by the redactor of the *Temple Scroll* and the literary devices used to mold the biblical material into an entirely new composition.[16] Both halves of this statement are important. First, the composer or redactor (depending on one's view of his compositional activity) extensively reused the already-authoritative text of the Torah and other biblical books. Anyone with any familiarity with the texts of the Bible would have, presumably, recognized this reuse. Second, in the process of this reuse, however, he created a new work, one that was the ultimate pseudepigraph, claiming God for its author. How did the composer/redactor view this text, and how did the community that preserved it understand it?

According to Swanson, the composer/redactor of the *Temple Scroll* viewed his text as authoritative and believed it would be accepted as such. "The author of the scroll appears to see his work within the continuing tradition of reinterpreting biblical tradition for a new era, with every expectation of its being accepted with the same authority as that which preceded it."[17] If this contention is correct, then the *Temple Scroll* meets VanderKam's first criterion for authoritative status: self-presentation.

[15] Ibid., 162.

[16] Dwight D. Swanson, *The Temple Scroll and the Bible: The Methodology of 11QT* (*STDJ* 14; Leiden: Brill, 1995).

Did the *Temple Scroll*, however, win community acceptance as authoritative, at least by the Qumran community? Here the evidence is less clear. Yadin was unequivocal: "[The *Temple Scroll*] was conceived and accepted by the Essene community as a sacred canonical [*sic*] work."[18] Others have sharply disagreed with this assessment. Hartmut Stegemann, for example, states: "There is not one mention of the *Temple Scroll*'s existence in any of the other Qumranic writings....There is not one quotation from the *Temple Scroll*."[19] Therefore, Stegemann argues, it is not "Scripture" for the community. What can we say regarding the *Temple Scroll*'s authoritative status at Qumran? First, it is clear that many of the legal positions and theological notions expressed in the *Temple Scroll* were congenial to the Qumran community and repeated in other documents found there (see above). However, other Qumran literature does not cite it as authoritative, as far as I am aware, and it is not the subject of a commentary. Therefore, it does not meet VanderKam's second criterion for authoritative status: clear community acceptance. Therefore, while it is entirely plausible that at some point in its history the Qumran community accepted the *Temple Scroll* as authoritative, we do not have any positive evidence that absolutely proves the case. The question thus must remain open.

JUBILEES

The book of *Jubilees*, which is an extensive reworking of Genesis 1–Exodus 12, was found in fourteen or fifteen copies in five caves at Qumran.[20] Like the *Temple Scroll*, the author of *Jubilees* had a specific purpose in mind when he reworked the biblical text; the book presupposes and advocates the use of the 364-day solar calendar. The author of *Jubilees* wishes to show that the solar calendar and the religious festivals and laws (and his particular interpretation of them) were not only given to Moses on Sinai, but were presupposed in the creation of the universe and carried out in the antediluvian and patriarchal history.[21] In his reuse of the biblical material, the author used several techniques: sometimes he quotes it verbatim, but more often he at least recasts it to show that the "angel of the presence" is actually dictating this material to Moses on Sinai (cf. Jub 1:27; 2:1). The author also condenses, omits, changes, and, most frequently, adds.[22] The purpose of most of the changes to the biblical text is quite clear. For example, since the author wishes to present Abraham as a model of righteousness, he omits the episode in which Abraham passes Sarah off as his sister, with the consequence that she is taken into Pharaoh's harem (Gen 12:10–20), and instead supplies a rather innocuous note that "Pharaoh took Sarai, the wife of Abram" (Jub 13:13).

The additions to the biblical text can be quite extensive. They most frequently function to establish the religious festivals according to the chronology of the solar calendar, or to depict the patriarchs properly observing the Torah.[23] For example, *Jubilees* 16 portrays Abraham celebrating the Feast of Booths at Beersheba. The extensive additions, as well as the clear ideological bias in favor of the solar calendar, make *Jubilees* a completely new work. Anyone at all familiar with the texts of Genesis and Exodus would have immediately recognized that this was a different work. Once again, we ask the question of how the author meant the work to be perceived, and how the group that preserved it perceived it.

There is little doubt that *Jubilees* was an authoritative text for the group at Qumran that preserved it. The *Damascus Document* (CD 16.3–4) cites it by name, as does the quite fragmentary 4Q228,[24] and CD 10.8–10 probably alludes to it. Therefore, it meets the criterion of citation (it is not, however, the subject of a commentary). It also presents itself as an authority; the fragments from Qumran make it clear that *Jubilees* claims to be dictated by an angel of the presence to Moses.[25] Thus, since the book both wishes to be seen as divinely inspired and is granted community acceptance as an authority, it is probable that *Jubilees* had scriptural status at Qumran. This conclusion indicates that we must put aside our categories of canonical and noncanonical when investigating the Qumran literature, as well as any notion of a fixed, unchangeable biblical text. In the case of *Jubilees*, the biblical text could be changed quite extensively, and the resulting work accepted as authoritative.

4QREWORKED PENTATEUCH

4QReworked Pentateuch (abbreviated here as 4QRP) is a grouping of five manuscripts from Qumran Cave 4: 4Q158 and 4Q364–367.[26] The manuscripts preserve portions of the Torah from Genesis through Deuteronomy. The scribal method used in each manuscript is transparent; the scribe or scribes began with a base text of the Torah; where we can determine it for 4Q364 and probably 4Q365, it was the proto-Samaritan text.[27] Then the scribe reworked the text in various ways, most notably by regrouping passages according to a common theme and by adding previously unknown material into the text. Two examples will suffice. First, in 4Q366 fragment 4 col. 1, the following pericopes concerning the Sukkoth festival are grouped together: Num 29:32–30:1 and Deut 16:13–14:

> [And on the seventh day, seven steers, t]w[o rams, fourteen sound year-old lambs, and their cereal offering and their drink offering for the steers, the rams, and the lamb]s according to [their] number [according to the commandment;] and one he-[go]at for the sin-offering, besides [the continual burnt offering, and its cereal offering and its drink offering.]

---

[26] John M. Allegro, *Qumrân Cave 4.I (4Q158–4Q186)* (ed. J. M. Allegro and A. A. Anderson; DJD 5; Oxford: Clarendon, 1968), 1–6, plate 1. Emanuel Tov and Sidnie White, "4QReworked Pentateuch" (DJD 13), 187–352. Michael Segal has recently argued that 4Q158 is a separate composition and that we should not classify it as a manuscript of 4QRP. See his article, "4QReworked Pentateuch or 4QPentateuch?" in *The Dead Sea Scrolls Fifty Years after Their Discovery: Proceedings of the Jerusalem Congress, July 20–25, 1997* (ed. L. H. Schiffman, E. Tov, and J. C. VanderKam; Jerusalem: Israel Exploration Society and the Shrine of the Book, 2000), 391–99. However, if I am correct in arguing that 4QRP is the result of scribal intervention into a previously established text rather than a new composition by an author, then the division into separate compositions is less meaningful. Each manuscript is simply the product of more or less scribal intervention. Also, we must consider the overlaps among the five manuscripts; for a listing, see Emanuel Tov, "Introduction," in *Qumran Cave 4.VIII: Parabiblical Texts, Part 1* (ed. H. W. Attridge et al.; DJD 13; Oxford: Clarendon, 1994), 190–91; and idem, "4QReworked Pentateuch: A Synopsis of its Contents," *RQ* 16 (1995): 653.

[27] Tov, "Introduction" (DJD 13), 192–96.

> [And on the eighth day there will be a solemn assembly for you;] you will not do [any work of la]bor. And you will present to Yahweh an offering [by fire, a pleasing odor; one steer, one ram, s]even sound lambs a year old, and their cereal offering and their drink offerings [for the steer and the ram and the lambs according to their number according to the commandment, and one he-goat for a sin-]offering, besides the continual burnt offering, its cereal offering [and its drink offering. These you shall do for Yahweh on your festivals, besides] your [votive-]offerings and your voluntary offerings, for your burnt offerings and your cereal offerings [and your drink offerings and your peace offerings. And Moses spoke] to the children of Israel according to all that Yahweh commanded [Moses.]
>
> [A festival of booths you shall make for yourself seven days, when you gather from] your [threshing floor] and from your wine vat. And you will rejoice in your festival, you and your son…

Since the text is fragmentary, it is possible that a third text concerning the Feast of Booths, Lev 23:34–43, would have been placed here as well. This pericope appears in 4Q365, followed by a large addition.

Second, an example of an addition occurs in 4Q365 fragment 6, where, following Exod 15:21, a seven-line Song of Miriam has been inserted to fill a perceived gap in the text:[28]

> [1]you despised [
> [2]for the majesty of [
> [3]You are great, a deliverer [
> [4]the hope of the enemy has perished, and he is for[gotten
> [5]they perished in the mighty waters, the enemy [
> [6]Extol the one who raises up, [a r]ansom you gave [
> [7][the one who do]es gloriously

In neither case, nor in any of the other reworkings of the biblical text, does the scribe leave any physical indication, such as a scribal mark, that this is changed or new material.[29] Therefore, it seems clear that the reader of this text was expected to view it as a text of the Pentateuch, not a "changed Pentateuch," or a "Pentateuch plus additions." In other words, if one were to place 4QReworked Pentateuch on a continuum of Pentateuchal texts, the low end of the continuum would contain the shorter, unexpanded texts such as 4QDeut^{g}; next would be a text such as 4QExod^{a} (representing the Old Greek); then the expanded texts in the proto-Samaritan tradition such as 4QpaleoExod^{m} and 4QNum^{b}; and finally the most expanded text of all, 4QReworked Pentateuch. Thus, Eugene Ulrich has contended that 4QRP is not a new composition, but rather a variant literary edition of the Pentateuch, and that the community that preserved it perceived it as such.[30]

---

[28] Tov and White, "4QReworked Pentateuch^{c}" (DJD 13), 269–72.

[29] Of course, all five manuscripts are fragmentary, so this claim is not absolutely certain. In 4Q366 there is a *vacat* (empty space) between Num 30:1 and Deut 16:13.

However, the question of 4QRP's function and status in that community is not entirely clear. Once again using VanderKam's criteria and judging by the evidence we have available, it is apparent that 4QRP simply presents itself as a Torah text and as authoritative. So 4QRP meets the first criterion for authority: compositional intention.

"Is a book quoted as an authority?" is the second criterion. Obviously, in the Qumran collection the Five Books of Moses were quoted as authorities countless times; however, there is not one clear instance where a "reworked" portion of 4QRP is cited as an authority. That is, we have no quotation from the unique portions of 4QRP preceded or followed by some common formula such as "as it is written" or "as Moses said." There are, however, two possible instances where another work alludes to or uses 4QRP as a source, and that may imply some kind of scriptural status.

The first instance occurs in 4Q364 (frag. 3 1.1–6), in the story of Jacob and Esau. Here 4QRP is expanded, probably (although the text is not extant) after Gen 28:5: "And Isaac sent Jacob, and he went to Paddan-aram to Laban, the son of Bethuel the Aramean, brother of Rebecca, the mother of Jacob and Esau." The expansion, for which we do not possess the beginning, concerns Rebecca's grief over the departing Jacob and Isaac's consolation of her:

> [1]him you shall see [
> [2]you shall see in peace [
> [3]your death, and to your eyes [...lest I be deprived of even]
> [4]the two of you. And [Isaac] called [to Rebecca his wife and he told]
> [5]her all [these] wor[ds
> [6]after Jacob her son [

The text then continues with Gen 28:6. The expansion found here in 4QRP echoes a similar expansion in *Jubilees* 27, where Rebecca grieves after her departing son and Isaac consoles her. In 4Q364 the phrases in question are "him you shall see" (line 1), "you shall see in peace" (line 2), and "after Jacob her son" (line 6), which recall Jub 27:14 and 17: "the spirit of Rebecca grieved after her son," and "we see him in peace" (unfortunately, these verses do not appear in the Hebrew fragments of

---

30. Eugene C. Ulrich, "The Qumran Scrolls and the Biblical Text," in *The Dead Sea Scrolls Fifty Years after Their Discovery: Proceedings of the Jerusalem Congress, July 20–25, 1997* (ed. L. H. Schiffman, E. Tov, and J. C. VanderKam; Jerusalem: Israel Exploration Society and the Shrine of the Book, 2000), 57.

Jubilees found at Qumran[31]). Both texts also contain a reminiscence of Gen 27:45, "Why should I be deprived of both of you in one day?" The passages are similar but not parallel. Is one alluding to or quoting the other? It seems possible, especially since this particular expansion does not occur in other reworked biblical texts of Genesis (e.g., Pseudo-Philo = *L.A.B.*).[32] If that is the case, it would seem more likely that *Jubilees* is alluding to 4QRP than the other way around, since *Jubilees* is a much more systematic and elaborate reworking of the Pentateuch than 4QRP, which has here simply expanded two biblical verses. If indeed *Jubilees* has used 4QRP as a source, this would imply that at least to the author of *Jubilees*, the text had some sort of status.[33]

The second instance is from 4Q365 fragment 23. Following Lev 24:2, the text has a long addition concerning festival offerings, including the Festival of Fresh Oil and the Wood Festival, festivals also found in the *Temple Scroll*.

> [4]saying, when you come to the land which
> [5]I am giving to you for an inheritance, and you dwell upon it securely, you will bring wood for a burnt offering and for all the wo[r]k of
> [6][the H]ouse which you will build for me in the land, to arrange it upon the altar of burnt-offering, and the calv[es
> [7]] for Passover sacrifices and for whole burnt-offerings and for thank offerings and for free-will offerings and for burnt-offerings, daily [
> [8]] and for the doors and for all the work of the House the[y] will br[ing
> [9]] the [fe]stival of fresh oil. They will bring wood two [

[31] James C. VanderKam and Jozef T. Milik, "Jubilees," in *Qumran Cave 4.VIII: Parabiblical Texts, Part 1* (ed. H. W. Attridge et al.; DJD 13; Oxford: Clarendon, 1994), 1–186, pls. 1–12.

[32] However, George W. E. Nickelsburg has called my attention to the fact that Tob 5:17–20, where Tobit and his wife bid farewell to the departing Tobias, bears a striking similarity to this scene in 4QRP and *Jubilees.* The key phrases are "and his mother wept," and "your eyes will see him on the day when he returns to you in peace." Unfortunately, most of this passage is not extant in 4QTobit^{b} ar (4Q197), so a direct comparison is not possible; cf. Joseph A. Fitzmyer, "Tobit," in *Qumran Cave 4.XIV: Parabiblical Texts, Part 2* (ed. M. Broshi et al.; DJD 19; Oxford: Clarendon, 1995), 1–76. It is probable that the author of Tobit had this Genesis passage in mind, although there is no direct evidence that he knew 4QRP's version of it, and it is improbable, based on Tobit's date of composition (250–175 B.C.E.), that he knew *Jubilees'* version; cf. Carey A. Moore, *Tobit* (AB 40A; New York: Doubleday; 1996): 40–42. I thank Nickelsburg for calling this reference to my attention.

[33] Of course, it is also possible that the two texts are drawing on a common fund of tradition. If the author of Tobit was unaware of 4QRP or *Jubilees* and yet incorporates similar material into his leave-taking scene, then the argument for a common fund of material is strengthened.

> [10]] the ones who bring on the fir[st] day, Levi [
> [11]Reu]ben and Simeon [and on t]he fou[rth] day [

In fact, as Yadin first noted in print, material in fragment 23 is parallel to columns 23–24, lines 1, 2, and 3 of the *Temple Scroll* and reads thus:[34]

> [1][...and on the first day Levi] and Judah, and on [the second day Benjamin]
> [2][and the sons of Joseph, and on the third day Reuben and Simeon, and] on the fourth day Iss[achar and Zebulon]
> [3][and on the fifth day Gad and Asher, and on the sixth day Dan] and Naphtali [

Since I have given detailed arguments elsewhere as to the similarities and differences between the parallel material in 4QRP and the *Temple Scroll*, I will not repeat them here.[35] The decisive parallel, which points to a definite relationship, is the order of the tribes bringing the wood for the Wood Festival, an order that occurs only here in 4QRP and in the *Temple Scroll*, and nowhere else. The question of concern is whether one text is citing or alluding to the other. John Strugnell, the original editor of 4QRP, suggested the possibility,[36] and Hartmut Stegemann has argued outright, that 4QRP is a source for the *Temple Scroll*.[37] Michael Wise believed that fragment 23, for which he did not have the context of the rest of 4Q365, was part of his "Deuteronomy Source" for the *Temple Scroll*.[38] What is important for our purposes is that it is the unique material in 4QRP that is paralleled in the *Temple Scroll*. It is possible, of course, that the two works are drawing on a common fund of tradition, but that tradition is hypothetical, and the fact that both documents were found at Qumran makes a closer relationship more likely. Thus, it once again seems most reasonable to argue from the simpler to the more complex: The *Temple Scroll*, a more thorough reworking of the Torah with a clear ideological bias, has borrowed material from the expansionistic 4QRP. Hence, we have two possible examples of the use of 4QRP as a source. However, since neither *Jubilees* nor the *Temple Scroll* indicates it is borrowing material, or cites a text that might be 4QRP, we are still in the realm of likelihood. We have no unquestionable instances of 4QRP being cited as an authoritative text, although the evidence from 4Q365 fragment 23 may point in that direction.

---

[34] Yadin, *The Temple Scroll*, 2: 103.

[35] See my article "Three Fragments from Qumran Cave 4 and Their Relationship to the Temple Scroll," *JQR* 85 (1994): 259–73.

[36] As quoted by Ben Zion Wacholder, *The Dawn of Qumran: The Sectarian Torah and the Teacher of Righteousness* (HUCM 8; Cincinnati: Hebrew Union College, 1983), 205–6.

[37] Hartmut Stegemann, "The Literary Composition of the Temple Scroll," 135.

[38] Wise, *A Critical Study of the Temple Scroll*, 58–59.

To return to the criteria for authority, the third criterion, "Is the book the subject of a commentary?" is not met by 4QRP. Thus, by failing beyond a reasonable doubt to meet the second and third criteria, 4QRP does not meet the second large requisite for scriptural status: community acceptance. This is not to say that 4QRP never, by anyone or at any time, was considered to have some type of scriptural status. The fact that it is found in five similar copies would indicate some degree of interest, and its existence testifies to the importance of and fascination with the books of the Pentateuch in various forms in Second Temple Judaism, as exemplified by the Qumran community. What is lacking for 4QRP, however, is the desirable instance of absolutely certain citation; on this we base our caution concerning its authoritative status, similar to our caution concerning the *Temple Scroll*.

THE GENESIS APOCRYPHON

With the *Genesis Apocryphon* we move slightly outside the genre confines established above, for the *Genesis Apocryphon*, unlike the three works already discussed, was composed in Aramaic.[39] Thus, it is not only a rewriting of the biblical narrative, but also a translation. As such, it could not maintain the fiction that it was written by or dictated to Moses (as in 4QRP and *Jubilees*), much less spoken by God (as in the *Temple Scroll*). Therefore, the question of authority is less important for the *Genesis Apocryphon*, since it does not, as far as can be determined from the extant columns, attempt to present itself as authoritative. However, the *Genesis Apocryphon* has several important connections to the book of *Jubilees* as well as other texts found at Qumran.[40] It testifies to the vast collection of exegetical material available on the text of the Pentateuch, some of which was incorporated into the Rewritten Bible texts.

The *Genesis Apocryphon* is extant in twenty-one fragmentary columns, the best preserved of which are columns 2 and 19–22. The narrative in column 2 begins with the story of Lamech (Gen 5:28) and ends amid the story of Abraham (Gen 15:1–4). The author freely paraphrases his Hebrew base text, often recasting the narrative in the first-person singular, to tell the story from the point of view of the main character. Numerous parallels with the book of *Jubilees* indicate that the author of the *Genesis Apocryphon* may have used *Jubilees* as a source.[41] But, while the author of *Jubilees* uses his rewriting to drive home his legal position on the solar calendar and festivals, the author of the *Genesis Apocryphon* has no such agenda. In fact, he shows little interest in legal matters at all. Instead, his interest lies in the emotional drama of the text, and his sometimes extensive additions usually serve to heighten the dramatic tension dormant in the biblical story. A case in point is the contrasting ways in which *Jubilees* and the *Genesis Apocryphon* handle the story of Abram and Sarai in Egypt (Gen 12:10–20). A problem with the Genesis story is that Abram requests that Sarai lie about her relationship to him (12:12–13). This is a troubling peccadillo in the otherwise upright and righteous Abraham. *Jubilees* deals with the problem by simply omitting it: Abram and Sarai enter Egypt, and Sarai is taken willy-nilly by the Pharaoh:

---

[39] The *Genesis Apocryphon* was found in one copy in Cave 1. Its composition probably dates to the middle of the second century B.C.E. For the first publication, see Nahman Avigad and Yigael Yadin, *A Genesis Apocryphon* (Jerusalem: Magnes, 1956). See also Joseph A. Fitzmyer, *The Genesis Apocryphon of Qumran Cave I (1Q20)* (3d ed.; BibOr 18B; Rome: Biblical Institute, 2004).

[40] Most notably *1 Enoch*.

> And Abram went into Egypt in the third year of the week and he stayed in Egypt five years before his wife was taken from him. And Tanis of Egypt was built then, seven years after Hebron. And it came to pass when Pharaoh took Sarai, the wife of Abram, that the Lord plagued Pharaoh and his house with great plagues on account of Sarai, the wife of Abram. (13:11–13)

The *Genesis Apocryphon*, on the other hand, adds into the text a dream of Abraham, in which he foresees what will happen and what should be done:

> I, Abram, dreamt a dream, on the night of my entry into Egypt. And in my dream I saw a cedar and a palm-tree.…Some men arrived intending to cut and uproot the cedar, leaving the palm-tree alone. But the palm-tree shouted and said: Do not hew down the cedar, because both of us are of the same family. And the cedar was saved thanks to the palm-tree, and was not hewn down. I woke up from my slumber during the night and said to Sarai, my wife: I have had a nightmare […and] I am alarmed by this dream. She said to me: Tell me your dream so that I may know it. And I began to tell her the dream. [And I let her know the interpretation] of the dream. I said: […] they want to kill me and leave you alone. This favor only [must you do for me]: every time we [reach a place, say] about me: He is my brother. And I shall live under your protection and my life will be spared because of you. […] they will try to separate you from me and kill me. Sarai wept because of my words that night. (19:14–21)

---

[41] See Nickelsburg, "Bible Rewritten and Expanded," 106; and Fitzmyer, *Genesis Apocryphon*, 16–17.

The implication of the text is that dreams are given by God, and Sarai's lie is thus divinely sanctioned. Abram and Sarai therefore become more human and interesting characters. In its emphasis on the human drama, the *Genesis Apocryphon* is similar to other Aramaic texts from Qumran such as *Tobit* (4Q196–200), the *Prayer of Nabonidus* (4Q242), and *Tales of the Persian Court* (4Q550),[42] which are stories or tales, interested in the human element and not in technical questions of law. But the *Genesis Apocryphon* is dependent on its biblical base text for its essential plot structure and themes, and thus has a foot in both genres.

CONCLUSION

The *Temple Scroll*, *Jubilees*, 4QReworked Pentateuch, and the *Genesis Apocryphon* are all related to one another, first by the mere fact that they were all found in the caves at Qumran, and second by the fact that all four are closely related to the Torah. Thus, 4QRP is the product of scribal intervention resulting in an expanded text, the *Temple Scroll* and *Jubilees* are more thorough reworkings with theological agendas, and the *Genesis Apocryphon* is a translation and haggadic rewriting. The connections, however, are even more significant: 4QRP and the *Temple Scroll* both mention the Fresh Oil Festival and the Wood Festival in their legal sections, while the *Temple Scroll* presupposes the 364-day solar calendar advocated by *Jubilees*.[43] In addition, as stated above, it is possible that both the *Temple Scroll* and *Jubilees* draw on 4QRP as a source, and that the *Genesis Apocryphon* knew *Jubilees*. James VanderKam has stated concerning *Jubilees* and the *Temple Scroll*, "The authors of the two are drawing upon the same exegetical, cultic tradition."[44] To these two texts I would add 4QRP and the *Genesis Apocryphon*.[45] This common tradition, evinced by four major texts from Qumran, is further evidence that the manuscripts from Qumran are not eclectic, but a collection, reflecting the theological tendency of a particular group, some of whom at least resided at Qumran during the Second Temple period.

[45] We could also discuss the books of *Enoch*, to which at least *Jubilees* and the *Genesis Apocryphon* have extensive parallels, but unfortunately that is beyond the scope of this paper.

CHAPTER SEVEN

QUMRAN AND A NEW EDITION OF THE HEBREW BIBLE

Ronald S. Hendel

INTRODUCTION

In 1616, the Italian traveler Pietro della Valle acquired in Damascus a copy of the Samaritan Pentateuch, which was brought to Paris seven years later.[1] This discovery caused a sensation among biblical scholars, because in the Samaritan Pentateuch they now had a biblical text in Hebrew that differed in many instances from the traditional Hebrew Bible, the Masoretic Text. Moreover, many of the Hebrew variants in the Samaritan Pentateuch agreed with readings in the Old Greek translation, the Septuagint. Up to this time, the Septuagint had been generally regarded as an unreliable translation of the Masoretic Text, but now there was evidence that it may have been based, at least in part, on Hebrew texts that differed from the Masoretic Text. To biblical scholars, the intricate pattern of agreements and disagreements among these three texts–MT (Masoretic Text), SP (Samaritan Pentateuch), and LXX (Septuagint)–posed a challenge to the notion that MT was the *hebraica veritas*, the unchanging "Hebrew truth." Scholars began to consider the possibility that some of the variant readings in SP or LXX may preserve a better or more original biblical text than the corresponding reading in MT. Thus, the modern scholarly discipline of the textual criticism of the Hebrew Bible was born. Its first major landmark was the *Critica sacra* by the French scholar Louis Cappel, published in 1650.[2] Though Cappel's work was loudly denounced at the time as heretical, it was not long before biblical scholars began to adopt his methods.[3]

---

[1] Pietro della Valle gave the manuscript as a gift to Signore de Sancy, the French ambassador in Constantinople; see his account in *The Pilgrim: The Travels of Pietro Della Valle* (trans. and ed. G. Bull; London: Hutchinson, 1990), 88–89. The editio princeps, by Jean Morin, appeared in the Paris Polyglot of 1645; it is MS B in the critical edition of August F. von Gall, *Der Hebräische Pentateuch der Samaritaner* (5 vols.; Giessen: Töpelmann, 1914–18).

[2] Louis Cappel had completed the work in 1634 but until 1650 was unable to find a publisher willing to print it. On the history and the impact of this work, see François Laplanche, *L'écriture, le sacré et l'histoire: Érudits et politiques protestants devant la Bible en France au XVIIe siècle* (Amsterdam: Holland University Press, 1986), 224–44, 299–327.

Fifty years ago, a second great discovery of texts of the Hebrew Bible that differ from MT took place. This discovery–by the shores of the Dead Sea–eventually encompassed the eleven caves of Qumran and yielded over two hundred biblical manuscripts, most in fragmentary condition. The biblical texts from Qumran have revitalized the modern study of the text of the Hebrew Bible. Not only have the Qumran Scrolls produced new readings, but, perhaps more important, they also share numerous readings with variants in SP and LXX, demonstrating that in many places SP and LXX accurately represent ancient Hebrew biblical texts. The intricate pattern of agreements and disagreements among MT, SP, and LXX has taken on a new dimension in the light of the Qumran Scrolls, because now we must reckon with the demonstrable antiquity of many of these agreements and disagreements. In the light of the Qumran Scrolls, the textual criticism of the Hebrew Bible has experienced a rebirth of interest and activity.[4]

In the last few years, the biblical manuscripts from the richest source, Qumran Cave 4, have been published in scholarly editions in *Discoveries in the Judaean Desert*.[5] With the publication of the biblical scrolls complete, it is worthwhile to assess the importance of the new textual data and to consider how the field of textual criticism might proceed from here. The new readings and the new understandings of old readings (particularly from SP and LXX) have transformed the field; yet a question that has not been adequately addressed is what textual critics ought to do with them. In the cases where we can ascertain better readings of the Hebrew text, should these be lumped with the inferior or secondary readings in the margins of editions of MT–as is currently the practice in scholarly editions of the Hebrew Bible–or is it possible to produce a new critical edition that will incorporate these better readings into the text itself, that is, in a critical text? Louis Cappel, the modern founder of the textual criticism of the Hebrew Bible, was the first to call for a critical edition that selected the best readings from the manuscript evidence and incorporated them into a critical text.[6] It may be time to reconsider the viability of this proposal.

---

[3] See Bishop Brian Walton's defense of textual criticism in his response to critics of the London Polyglot: *The Considerator Considered: Or, A Brief View of Certain Considerations Upon the Biblia Polyglotta, the Prolegomena and Appendix Thereof* (London: Roycroft, 1659; repr. in vol. 2 of Henry J. Todd, *Memoirs of the Life and Writings of the Right Rev. Brian Walton* [London: Rivington, 1821]). On the rise of textual criticism of the Hebrew Bible, see Moshe H. Goshen-Gottstein, "The Textual Criticism of the Old Testament: Rise, Decline, Rebirth," *JBL* 102 (1983): 365–99, esp. 365–79.

[4] Goshen-Gottstein, "Rise, Decline, Rebirth," 386–99. See also the superb recent introductions to the field by Peter Kyle McCarter, Jr., *Textual Criticism: Recovering the Text of the Hebrew Bible* (Philadelphia: Fortress, 1986); and Emanuel Tov, *Textual Criticism of the Hebrew Bible* (Minneapolis: Fortress, 1992).

[5] Eugene Ulrich et al., eds., *Qumran Cave 4.VII: Genesis to Numbers* (DJD 12; Oxford: Clarendon, 1994); Eugene Ulrich et al., eds., *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (DJD 14; Oxford: Clarendon, 1995).

In the following, I will survey the impact of the textual data from Qumran by choosing one passage from each biblical book from Genesis to Kings where the scrolls help us to ascertain a better reading of the Hebrew text.[7] In the following discussion, I will suggest that the field of textual criticism of the Hebrew Bible is sufficiently mature to warrant the production of a new critical edition that will incorporate these (and other) superior readings into a fully critical text.

NEW LIGHT FROM THE CAVES

Genesis 1:9

4QGen^{k}

ותרא הי[בׯשה]

and dr[y land] appeared

LXX

καὶ συνήχθη τὸ ὕδωρ τὸ ὑποκάτω τοῦ οὐρανοῦ εἰς τὰς συναγωγὰς αὐτῶν καὶ ὤφθη ἡ ξηρά

(≈ויקוו המים מתחת השמים אל מקויהם ותרא היבשה)

and the waters below heaven gathered into their gathering place and dry land appeared

MT/SP: lacking

The new reading from 4QGen^{k} [= 4Q10] shows what the best textual critics have long surmised, that the textual plus in LXX at the end of Gen 1:9 stems from an ancient Hebrew text that differed from MT.[8] The chief remaining question is whether the longer or the shorter reading is to be preferred. The editor of the Qumran fragment, James Davila, argues that a simple scribal error can account for the shorter reading in MT:

---

[6] Louis Cappel, *Critica sacra, sive, De variis quae in sacris Veteris Testamenti libris occurrunt lectionibus libri sex* (ed. Jean Cappel; Paris: S. Cramoisy & G. Cramoisy, 1650), bk. 6, ch. 10.

[7] In the examples that follow the textual variations are italicized in English.

[8] Note the obvious Hebraism in Greek αὐτῶν referring to plural מים rather than singular ὕδωρ, as noted by Julius Wellhausen and others; see Ronald S. Hendel, *The Text of Genesis 1–11: Textual Studies and Critical Edition* (New York: Oxford University Press, 1998), 26. On the practice of retroverting Greek readings into Hebrew, see the methodological cautions and guidelines in Emanuel Tov, *The Text-Critical Use of the Septuagint in Biblical Research* (2d ed.; Jerusalem: Simor, 1997).

> The phrase was lost in the manuscript tradition represented by [MT] by haplography. The first Hebrew word of the missing phrase can be retroverted from the Greek as ויקוו, "and [the waters] were gathered." The first word of v. 10 is ויקרא "and [God] called." The scribe's eye skipped from the first letter-cluster—ויק to the second, leaving out the intervening material.[9]

In this scenario, we can readily understand the difference between the variant readings of Gen 1:9. The other possibility, that the longer reading is a harmonizing expansion of the originally short text, is far less likely, since it does not conform to the ordinary procedures of such scribal harmonizations. Furthermore, the style of the longer reading is fully consistent with the prose style of Genesis 1.[10] In this plus in LXX, now partially preserved in 4QGen^{k}, we probably have the original text of Gen 1:9, which was accidentally lost by scribal error in the textual tradition ancestral to MT.

Exodus 1:3

4QExod^{b}

יוסף ובני[מן]

Joseph and Benja[min] [italics mine]

MT/SP/LXX

ובנימן

and Benjamin

The reading of Exod 1:3 in 4QExod^{b} [= 4Q13] may preserve a more original reading of this verse than either MT, SP, or LXX. This verse is part of a list of "the sons of Israel who came to Egypt with Jacob" (Exod 1:1). The list is an abbreviation of the fuller catalog in Gen 46:8–27, which names all of Jacob's household who came to Egypt, a total of seventy (Gen 46:27). Exodus 1:5 presumes this fuller catalog in its statement that "all the persons descended from Jacob were seventy persons."

The chief variation in the textual versions of this list concerns the place of Joseph. 4QExod^{b} includes Joseph with his brother Benjamin in Exod 1:3, as in the corresponding placement in Gen 46:19 (יוסף ובנימן). The reading of Exod 1:3 in MT, SP, and LXX lacks Joseph, and each of these texts states elsewhere that "Joseph was in Egypt." MT and SP have this comment at the end of Exod 1:5, whereas LXX has this comment at the end of Exod 1:4.

---

[9] James R. Davila, "New Qumran Readings for Genesis One," in *Of Scribes and Scrolls: Studies on the Hebrew Bible, Intertestamental Judaism, and Christian Origins Presented to John Strugnell on the Occasion of His Sixtieth Birthday* (ed. H. W. Attridge, J. J. Collins, and T. H. Tobin; College Theology Society Resources in Religion 5; Lanham, MD: University Press of America, 1990), 11.

[10] For full discussion of these issues, see Hendel, *Text*, 25–27.

Where does Joseph belong–in the list with his younger brother, Benjamin, or after the list because he is already in Egypt? The editor of 4QExod^b, Frank Cross, makes a cogent argument for preferring the Qumran reading:

> Perhaps the easiest explanation of the textual history of these readings is to suppose that the reading יוסף in v 3…together with the omission of the phrase ויוסף היה במצרים belongs to one textual tradition, the omission of יוסף in v 3 together with the insertion of ויוסף היה במצרים to another, surviving in the tradition preserved by MT. It is probable that "Joseph" once appeared in the list in v 3. Later the discrepancy was noticed, יוסף suppressed, and the phrase ויוסף היה במצרים inserted. If the phrase is taken to be secondary, then the uncertain position of the phrase, inserted at one point in LXX, at another in MT–omitted in 4QExod^b–is readily explained. In this case 4QExod^b preserves the earliest set of readings.[11]

If Joseph was originally in the list with his brother Benjamin, we can understand why a scribe would sense a difficulty here–since Joseph did not "come to Egypt with Jacob"–and would adjust the list accordingly. But the total of "seventy persons" still presumes the inclusion of Joseph and his two sons (as in Gen 46:19–22), and this number escaped revision. There are sufficient clues in the textual evidence and in the comparison with Genesis 46 to indicate that the placement of Joseph outside of the list in Exodus 1 is a secondary scribal revision. In sum, Joseph belongs with his brother Benjamin in the original list–as preserved in 4QExod^b–and an exegetical difficulty accounts for the secondary revision preserved (with some variation) in MT, SP, and LXX.

Leviticus 22:18

4QLev^b/SP/LXX

הגר הגר בישתאל

the sojourners *who sojourn* in Israel

MT

הגר בישראל

the sojourners of Israel

---

[11] DJD 12:85. This explanation was earlier advanced in Frank M. Cross, *The Ancient Library of Qumran* (3d ed.; Minneapolis: Fortress, 1995), 135n1 (essentially unchanged from the 1961 ed.).

This variant is probably the result of an accidental haplography ("single writing" of something earlier double) in the proto-M tradition. The legal formulation in Lev 22:18 referring to the "sojourner" (הגר) is nearly identical to formulations elsewhere in Leviticus:

Lev 17:10

איש איש מבית ישתאל ומן הגר הגר בתוכם

anyone from the house of Israel or from the sojourners who sojourn among you

Lev 17:13

ואיש איש מבני ישראל הגר הגר בתוכם

anyone from the children of Israel or from the sojourners who sojourn among you

Lev 20:2

איש איש מבני ישראל ומן הגר הגר בישראל

anyone from the children of Israel or from the sojourners who sojourn in Israel

Lev 22:18

איש איש מבית ישראל ומן הגר <הגר> ביראל

anyone from the house of Israel or from the sojourners <who sojourn> in Israel

The textual problem concerns the second הגר, "who sojourn," in Lev 22:18–does it originally belong in the text, as in 4QLev^{b} [= 4Q24], SP, and LXX, or is the shorter reading in MT to be preferred? The parallel texts in Leviticus present a strong argument for an original reading הגר הגר in this passage, which has been accidentally simplified to הגר in MT. While it is possible that an original shorter reading has been expanded by a harmonization with the parallel passages, it is more likely that the legal style referring to the sojourner is generally consistent in Leviticus. Biblical texts amply attest the kind of scribal error–an accidental haplography–that plausibly accounts for the MT reading.[12]

Numbers 36:1

4QNum^{b}/LXX

[לפני מושה ולפני אל]עזר הכוהן ולפני ה[נשיאים]

before Moses *and before Eleazar the priest* and before the chiefs

---

[12] See McCarter, *Textual Criticism*, 38–39; Tov, *Textual Criticism*, 237–38. The 4QLevb (= 4Q214) text was published by Eugene Ulrich, "4QLev^{b}," in *Qumran Cave 4.VII: Genesis to Numbers* (ed. E. Ulrich et al.; DJD 12; Oxford: Clarendon, 1994), 182–83.

MT/SP

לפני משה ולפני הנשאים

before Moses and before the chiefs

This textual variation concerns the presence of Eleazar the priest in the legal dispute over Zelophehad's inheritance. In Num 27:2, Zelophehad's daughters bring their legal claim "before Moses and before Eleazar the priest and before the chiefs." In the sequel to this story in Numbers 36, the identical sequence is found in 4QNum^b [= 4Q27] and LXX, but the phrase "and before Eleazar the priest" is lacking in MT and SP. The editor of 4QNum^b, Nathan Jastram, has observed that the longer reading of Num 36:1 is "conducive to haplography by homoioteleuton," that is to say, a scribe's eye could easily have skipped from one ולפני ("and before") to the next, thereby producing the shorter text of MT.[13] This is a cogent solution to the textual variation. According to the P source, Eleazar the priest, Aaron's son, assumed Aaron's authority after Aaron's death (Num 20:28), and thereafter he and Moses led the people together. Hence, there are both text-critical and contextual reasons for preferring the longer sequence with Eleazar in Num 36:1.

Deuteronomy 32:8

4QDeut^j/LXX

[למספר] בני אלוהים

according to the number of the sons of *God*

MT/SP

למספר בני ישראל

according to the number of the sons of *Israel*

The variation of "sons of God" versus "sons of Israel" in the versions of this passage is not likely to have been produced by a scribal accident. Rather, this is probably a case of theological revision.[14] The context of this passage, in which the Most High (apparently a title of Yahweh) divides the nations and then chooses Israel to be his own portion, seems linked with the old notion that each nation has its own tutelary god (in later tradition, guardian angel). The statement in this passage–"He divided the sons of Man / He established the boundaries of the peoples / according to the number of the sons of God" (i.e., the divine beings)[15]–makes sense in this context, while the alternative reading, "sons of Israel," makes no sense in context. The latter reading is easily understood as a theological revision made at a time when the idea of the existence of gods of other nations was unacceptable. A simple change from "God" to "Israel" solved this problem for a pious scribe. A contributing factor may have been the tradition that the "number of the sons of Israel" who went down to Egypt was seventy (see Exod 1:1, 5), since this corresponds to the number of nations in some ancient traditions. It is difficult to see how "Israel" could have been the original reading in Deut 32:8, however, and it is more difficult to conceive of a motive for a later scribe to change "Israel" to "God," thereby creating the theological problem. As scholars have concluded with near unanimity, the reading of 4QDeut^j [= 4Q37] and LXX is to be preferred in this passage.[16]

---

[13] Nathan Jastram, "The Text of 4QNum^b," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:181.

[14] See Tov, *Textual Criticism*, 269; Ronald S. Hendel, "When the Sons of God Cavorted with the Daughters of Men," in *Understanding the Dead Sea Scrolls* (ed. H. Shanks; New York: Random House, 1992), 169–72; M. Lana, "Deuteronomio e angelologia alla luce di una variante qumranica (4Q Dt 32, 8)," *Hen* 5 (1983): 179–207. The reading of 4QDeut^j (= 4Q37) was first presented by Patrick W. Skehan, "Qumran and the Present State of Old Testament Text Studies: The Masoretic Text," *JBL* 78 (1959): 21, correcting his earlier report in idem, "A Fragment of the 'Song of Moses' (Deuteronomy 32) from Qumran," *BASOR* 136 (1954): 12. See now the

An important support for this position is found in Deut 4:19–20. This passage refers to the "host of heaven" which Yahweh "distributed" (*hālaq*) among the "peoples" (*ʿammîm*), whereas Yahweh chose Israel to be his own "portion" (*naḥălâ*). The resemblance of these words and ideas to Deut 32:8–9 is striking. Because of these and other similarities, scholars have argued that Deut 4:19–20 (and ch. 4 generally) is dependent on the older poem of Deuteronomy 32. In light of this probable relationship, it appears that Deut 4:19–20 is dependent on a version of Deut 32:8 that read "sons of God" (with 4QDeut^j and LXX).[17] This inner-biblical evidence supports the text-critical judgment that "sons of God" is the original reading in Deut 32:8.

---

edition by Julie Ann Duncan, "4QDeut^j," in *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich et al.; DJD 14; Oxford: Clarendon, 1995), 75–92.

[15] See Job 1:6; 2:1; 38:7; Ps 29:1; 89:7; Gen 6:1–4; and Hendel, "Sons of God."

[16] See references in Lana, "Angelologia." Most modern translations have also incorporated this reading.

[17] See Patrick W. Skehan, "The Structure of the Song of Moses in Deuteronomy (32:1–43)," *CBQ* 13 (1951): 157–59; Jon D. Levenson, "Who Inserted the Book of the Torah?" *HTR* 68 (1975): 215, 221n38; and recently, Jeffrey H. Tigay, *Deuteronomy* (JPS Torah Commentary; Philadelphia: Jewish Publication Society, 1996), 514–15.

Joshua 8:34–35

4QJosh^{a} (at Josh 5:1)

[בספר] התורה לא היה דבר מכל צוה משה
[ואת יה]ושוע אשר לא קרא יהשע
נגד כל [ישראל בעברו] את הירד[ן] והשים
והסף והג[ר] ההלך בקרבם

…[the book of] the Torah. There was not a word of all Moses had commanded *Joshua* that Joshua did not read before all the assembly of [Israel *when they crossed*] *the Jordan*, and the women and children and aliens who resided among them.

MT

בספר התורה לא היה דבר מכל אשר צוה משה אשר לא קרא יהושע
נגד כל קהל ישראל והנשים והטף והגר ההלך בקרבם

…the book of the Torah. There was not a word of all *that* Moses had commanded that Joshua did not read before all the assembly of Israel, and the women and children and aliens who resided among them.

LXX (at Josh 9:7–8) …the Torah *of Moses*. There was not a word of all *that* Moses had commanded *Joshua* that Joshua did not read before all the assembly of Israel, and the women and children and aliens who resided *in Israel*.

The reading of 4QJosh^{a} (= 4Q47) is remarkable not for what it says but where it says it. The paragraph about Joshua's construction of an altar–Josh 8:30–35 in MT–is located at the beginning of Joshua 5 in the Qumran text. The place of this paragraph was already known to be a problem, since LXX has it at Josh 9:7–8. The Qumran fragment shows us that the problem of where this paragraph belongs is even more complicated than we knew.

The editor of 4QJosh^{a}, Eugene Ulrich, has argued that the place of this paragraph at the beginning of Joshua 5 is plausibly the earliest or original textual sequence, and that the differing placements in MT and LXX are secondary.[18] He observes that Moses' command (in Deut 27:4–5) to build this altar specifies that it be done "when you cross the Jordan," which fits the context of Joshua 5 but not Joshua 8 or 9. Further, the placement in MT interrupts the continuity of the surrounding sequence (Josh 8:29–9:1). He also observes that Josephus is familiar with the sequence attested in 4QJosh^{a}, indicating that this fragment belongs to a wider textual tradition. For these reasons, he tentatively concludes that "4QJosh^{a}-Josephus preserve the earlier and/or preferable form."[19]

---

[18] See Eugene Ulrich's introduction to the edition of the text, "4QJosh^{a}," in *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich et al.; DJD 14; Oxford: Clarendon, 1995), 145–46; and idem, "4QJoshua^{a} and Joshua's First Altar in the Promised Land," in *New Qumran Texts and Studies: Proceedings of the First Meeting of the International Organization for Qumran Studies, Paris 1992* (ed. G. J. Brooke and F. García Martínez; *STDJ* 15; Leiden: Brill, 1994), 89–104.

[19] Ulrich, "Joshua's First Altar," 96.

While this position is possible and solves several problems, another interpretation of the textual data is also available. Alexander Rofé has observed that some features in this paragraph indicate that it may be a late scribal composition, and therefore it may be secondary in all of its contexts (MT, LXX, and 4QJosh^{a}).[20] He suggests that the author of this paragraph was "a late Deuteronomistic (= Dtr) scribe, perhaps even a post-Dtr one."[21] The most striking reason that he gives is that the author of this paragraph misunderstood Moses' instructions about the altar in Deuteronomy 27.

The present story is wholly dependent on the text of Deuteronomy 27: the laws there (vv. 2–3, 4 + 8, 5–7) ordered the erection of big stones and their inscription with the words of the Torah; separately they prescribed the building of an altar; however, the author of Josh 8:30–35 was already familiar with the present, garbled, text of Deut 27:2–8 and therefore described Joshua as writing the Torah on the stones of the altar.[22]

The author of this paragraph equated the phrase "big stones" (אבנים גדלות), which were to be coated with plaster and inscribed with the words of the Torah, and the "whole stones" (אבנים שלמות), which were to be made into the altar. To be sure, the text of Deut 27:1–8 is confusing (the combination of the inscribed stones and the stone altar may be an editorial embellishment),[23] but the secondary quality of the Joshua passage is nevertheless indicated by its unifying reading of the originally different stones. Moshe Weinfeld has observed that the author of Josh 8:30–35 treated the whole section [of Deut 27:1–8] as an organic literary unit and therefore found it necessary to remove the friction between the two traditions by describing the stones upon which the law was inscribed as those from which the altar was constructed.[24]

The construction of Joshua's altar from the inscribed stones shows that the author (perhaps understandably) misread Deuteronomy 27, and was therefore writing at a later period; that is, he was a late or post-Deuteronomistic scribe.

[20] Alexander Rofé, "The Editing of the Book of Joshua in the Light of 4QJosh^{a}," in *New Qumran Texts and Studies: Proceedings of the First Meeting of the International Organization for Qumran Studies, Paris 1992* (ed. G. J. Brooke and F. García Martínez; *STDJ* 15; Leiden: Brill, 1994), 73–80. Cf. the similar position (before the availability of 4QJosh^{a} (= 4Q47) in Emanuel Tov, "Some Sequence Differences between the MT and LXX and Their Ramifications for the Literary Criticism of the Bible," *JNSL* 13 (1987): 152–54; see also Leonard J. Greenspoon, "The Qumran Fragments of Joshua: Which Puzzle Are They Part of and Where Do They Fit?" in *Septuagint, Scrolls, and Cognate Writings* (ed. G. J. Brooke and Barnabus [Barnabas] Lindars; SBLSCS 33; Atlanta: Scholars Press, 1992), 173–74; Richard D. Nelson, *Joshua* (OTL; Louisville: Westminster John Knox, 1997), 116–20.

[21] Rofé, "Editing," 76.

[22] Ibid.

[23] See Moshe Weinfeld, *Deuteronomy and the Deuteronomic School* (Oxford: Clarendon, 1972), 165–66.

[24] Ibid., 166.

I think that Rofé's arguments hold weight, and therefore the "floating" paragraph in Joshua is most plausibly a supplement to the text in all the extant textual traditions. It responds directly to the scribal desire to fill in or harmonize discrepant textual details. If Moses commanded something, no matter how confusing, the text must say that it is accomplished, even if this requires some textual supplementation.[25]

Judges 6:6–11

4QJudg^{a}

ויזעקו בני יש[ראל אל] יהוה [ויבא מלאך יהוה וישב
תחת האלה אשר בעפגה] אשר ליואש האביעזרי

The Israe[lites] cried out [to] Yahweh. [An angel of Yahweh came and sat beneath the oak in Oprah,] which belonged to Joash the Abiezrite.

MT/LXX[26]

ויזעקו בני ישראל אל יהוה ויהי כי זעקו בני ישראל אל
יהוה על אדות מדין וישלח יהוה איש נביא לא בני ישראל ויאמר
להם כה אמר יהוה אלהי ישראל אנכי העליתי אתכם ממצרים
ואציא אתכם מבית עבדים ואצל אתכם מיד מצרים ומיד כל
לחציכם ואגרש אותם מפניכם ואתנה לכם את ארצם ואמרה לכם
אני יהוה אלהיכם לא תיראו את אלהי האמרי אשר אתם יושבים
בארצם ולא שמעתם בקולי ויבא מלאך יהוה וישב תחת האלה אשר
בעפרה אשר ליואש אבי העזרי

The Israelites cried out to Yahweh. *When the Israelites cried out to Yahweh on account of Midian, Yahweh sent a prophet to the Israelites who said to them, "Thus says Yahweh, God of Israel: It was I who brought you up out of Egypt and freed you from the house of bondage. I rescued you from the Egyptians and from all your oppressors. I drove them out before you and gave you their land. And I said to you, 'I am Yahweh, your God. Do not worship the gods of the Amorites in whose land you dwell.' But you did not heed my voice."* An angel of Yahweh came and sat beneath the oak in Oprah, which belonged to Joash the Abiezrite.

---

[25] According to Tov's classification of the types of scribal harmonizations, this is an example of "command and fulfillment," wherein the missing fulfillment is supplied by the scribe; see Emanuel Tov, "The Nature and Background of Harmonizations in Biblical Manuscripts," *JSOT* 31 (1985): 7; see also idem, "Sequence Differences," 153n8.

[26] LXX lacks Judg 6:7a, perhaps due to a haplography from אל־יהוה of v. 6 to אל־יהוה of v. 7.

4QJudg^{a} [= 4Q49] differs strikingly from MT and LXX in its lack of Judg 6:7–10. Julio Trebolle Barrera, the editor of this fragment, notes that these missing verses have long been identified as a literary insertion in this chapter and are generally attributed to a Dtr editor.[27] The independence of these verses is accepted in most commentaries, as in Alberto Soggin's recent commentary: "A new element appears in vv. 7–10: the message of an unknown prophet. It is a typically Dtr message, and does not have any connection with the context."[28] The fact that these verses are lacking in 4QJudg^{a} leads Trebolle Barrera to conclude that "4QJudg^{a} can confidently be seen as an earlier literary form of the book than our traditional texts."[29] Since there are no features that might have motivated a haplography in this text, Trebolle Barrera's conclusion is warranted.

In this instance we can clearly see the history of a scribal expansion of the biblical text: the Qumran text preserves the unexpanded text, while MT and LXX preserve the later expanded text. This fragment is helpful not only for recovering the textual history of Judges 6, but also for providing empirical data for our models of the nature and history of biblical literature.

1 Samuel 10:27

4QSam^{a}/LXX about a month later	ויהי כמו חדש
MT *he was like someone who is silent*	ויהי כמחריש

This phrase occurs in MT immediately after the statement that "evil men" (בני בליעל) despised Saul and did not bring him gifts. The idea that Saul was "like someone who is silent" in the face of such rejection is plausible, but it is odd in its context since Saul has already gone home to Gibeah (1 Sam 10:26). Most commentators understand this phrase to be connected with the following story of Saul's military victory over Ammon and read with LXX–and now 4QSam^{a} [= 4Q51]–"about a month later."[30] The difference between these two readings rests primarily on the difference between ר and ד, two letters easily confused. The other differences–the presence or absence of the vowel markers ו and י and the word division–are probably dependent on the ר / ד interchange. When two readings are differentiated by a simple graphic error, it is best to assume that the garbled text is secondary.

---

[27] Julio C. Trebolle Barrera, "4QJudg^{a}," in *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich et al.; DJD 14; Oxford: Clarendon, 1995), 162; and idem, "Textual Variants in 4QJudg^{a} and the Textual and Editorial History of the Book of Judges," *RevQ* 54 (1989): 238.

[28] J. Alberto Soggin, *Judges: A Commentary* (OTL; Philadelphia: Westminster, 1981), 112.

[29] Trebolle Barrera, ibid. (DJD 14), 162. I would add a linguistic note to Trebolle Barrera's analysis: the linguistic forms ואתנה and ואמרה in Judg 6:9–10 are characteristic of Late Biblical Hebrew, lending further plausibility to the late dating of this passage. Such forms are common in Ezra, Nehemiah, and later texts; see Shelomo Morag, "Qumran Hebrew: Some Typological Observations," VT 38 (1988): 148–64, esp. 154–55 with its references.

A more interesting issue is what takes place in the month between Saul's accession and his victory over Ammon. Immediately before the phrase in question, the 4QSam^{a} text preserves a paragraph that was lost in MT and LXX. The full story, according to 4QSam^{a}, is as follows:

> [Now Na]hash, king of Ammon, harshly oppressed the Gadites and Reubenites, and he gouged out a[ll] their right eyes and struck terror and fear in Israel. There was not left a man among the Israelites bey[ond the Jordan who]se right eye was not gouged out by Naha[sh, king] of Ammon, except seven thousand men fled from Ammon and entered Jabesh Gilead. About a month later…[31]

The most probable explanation for the absence of this paragraph in MT and LXX is a scribal accident, perhaps "the scribe's eye jumping from one paragraph break to another (both with Nahash as subject)," as Frank Cross, the editor of this text, has suggested.[32] A break before "Now Nahash" and before "About a month later" would supply the visual cues for such a scribal error.[33] It has also been suggested that the longer text in 4QSam^{a} is a secondary scribal expansion; but there are stronger reasons for regarding it as the earlier text.[34]

---

[30] See Frank M. Cross, "The Ammonite Oppression of the Tribes of Gad and Reuben: Missing Verses from 1 Samuel 11 Found in 4QSamuel^{a}," in *History, Historiography and Interpretation: Studies in Biblical and Cuneiform Literatures* (ed. H. Tadmor and M. Weinfeld; Jerusalem: Magnes, 1983), 155–56; Eugene C. Ulrich, *The Qumran Text of Samuel and Josephus* (HSM 19; Missoula, MT: Scholars Press, 1978), 69–70; P. Kyle McCarter, Jr., *I Samuel* (AB 8; New York: Doubleday, 1980), 199–200; Tov, *Textual Criticism*, 343–44. Some scholars do not connect this phrase with the following story and maintain a preference for the M reading; so Alexander Rofé, "The Acts of Nahash according to 4QSam^{a}," *IEJ* 32 (1982): 132–33; and Alessandro Catastini, "4QSam^{a}: II. Nahash il 'Serpente,'" *Hen* 10 (1988): 24–30.

[31] Cross, "Ammonite Oppression," 149.

[32] Ibid., 153; see also Frank M. Cross, "Light on the Bible from the Dead Sea Caves," in *Understanding the Dead Sea Scrolls* (ed. H. Shanks; New York: Random House, 1992), 156–62.

[33] 4QSam^{a} (= 4Q51) does have a paragraph break before "Now Nahash," though not before "About a month later" (which the scribe inserted in a supralinear correction). Paragraph breaks are fairly fluid in biblical manuscripts, even among Masoretic manuscripts.

[34] Rofé argues that in the longer text "Nahash's gouging out of the eyes of all Reubenites and Gadites is left unexplained. They had not given shelter to his former

1 Kings 8:16

4QKgs

[ל]היות נגיד על עמ[י]

…[*to*] *be ruler over* [*my*] *people*…

2 Chr 6:5–6

להיות שמי שם ולא בחרתי באיש להיות נגיד על עמי
ישראל ואבחר בירושלם להיות שמי שם

…so that my name may be there, *and I have not chosen anyone to be ruler over my people Israel. But I have chosen Jerusalem so that that my name may be there*

LXX

εἶναι τὸ ὄνομά μου ἐκεῖ καὶ ἐξελεξάμην ἐν Ἰερουσαλὴμ εἶναι τὸ ὄνομά μου ἐκεῖ

(≈להיות שמי שם ואבחר בירושלם להיות שמי שם)

…so that my name may be there. *But I have chosen Jerusalem so that my name may be there*

MT

להיות שמי שם

…so that my name may be there

A fragment of 4QKings [= 4Q54] partially preserves a reading that has been lost in MT and LXX, but that has been preserved intact in 2 Chronicles. The Chronicles passage reads as follows (with the material lacking in MT italicized):

> From the day that I brought my people out *of the land of* Egypt, I have not chosen a city out of all the tribes of Israel to build a house so that my name may be there, *and I have not chosen anyone to be ruler over my people Israel. But I have chosen Jerusalem so that my name may be there*, and I have chosen David to be over my people Israel. (2 Chr 6:5–6)

As scholars have noticed, MT has apparently suffered a haplography between the identical phrases, "so that my name may be there" (להיות שמי שם).[35] The 4QKings fragment preserves part of the sequence lacking in MT, indicating that Chronicles was accurately quoting a Hebrew text of Kings. Interestingly,

---

enemies" ("Acts of Nahash," 131). However, such a punishment–the blinding of rebels, such as the Philistines' blinding of Samson–is explicable on the (Ammonite) view that the Reubenites and Gadites were "ancestral enemies … who occupied Ammonite soil" (Cross, "Ammonite Oppression," 157). Hence, Rofé's chief historical-literary objection to the primacy of the longer text does not carry weight.

[35] See Steven L. McKenzie, *The Chronicler's Use of the Deuteronomistic History* (HSM 33; Atlanta: Scholars Press, 1985), 89; Tov, *Textual Criticism*, 238–39; and the comments in Trebolle Barrera's edition, "4QKgs," in *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich et al.; DJD 14; Oxford: Clarendon, 1995), 177.

LXX has suffered a slightly different haplography, beginning with the phrase, "and I have not chosen" (ולא בחרתי), until the similar phrase, "and I have chosen" (ואבחר). Hence, LXX preserves part of the sequence lacking in MT.

The editor of 4QKings, Julio Trebolle Barrera, observes that this fragment preserves "a substantial original reading of Kings."[36] The textual relationships among MT, LXX, 4QKings, and Chronicles are best comprehended by this solution, and hence the longer reading should be preferred.

A NEW EDITION

For the textual critic of the Hebrew Bible, the Dead Sea Scrolls are indeed "the greatest manuscript discovery of modern times," as William F. Albright proclaimed fifty years ago. The examples surveyed above of new Qumran readings and new understandings of old readings (primarily from SP and LXX) demonstrate their significance for our understanding of the biblical text. The chief question that remains is, What should we do with these new readings and new understandings? The discipline of textual criticism is founded on the desire for better editions of texts. In every literature for which textual criticism is practiced, the ultimate goal is the production of new and better critical texts, meaning the best text that the editor can reconstruct through using the available textual evidence and sound critical methods. Such is the normal practice in the textual criticism of the other literatures of antiquity, including the Septuagint and the New Testament. Only in the study of the Hebrew Bible is this goal not commonly held. In light of the advances in practicing textual criticism in the post-Qumran era, it is worth reconsidering whether this position is justifiable.

The most extensive rationale for a critical edition of the Hebrew Bible is that of Rudolf Kittel, who founded the Biblia Hebraica Project, now in its fifth incarnation. In his 1902 monograph, "On the Necessity and Possibility of a New Edition of the Hebrew Bible," Kittel conceded:

> In principle one must therefore absolutely agree that this arrangement [viz., a critical, eclectic text, with apparatus] is the only proper one; the question can only be whether it is practical as well as easily accomplished, compared to the other, basically inferior alternative.[37]

---

[36] Trebolle Barrera, ibid. (DJD 14), 183; see also idem, "A Preliminary Edition of 4QKings (4Q54)," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:246.

[37] Rudolf Kittel, *Über die Notwendigkeit und Möglichkeit einer neuen Ausgabe der hebräischen Bibel* (Leipzig: Deichert, 1902), 77–78

The "basically inferior alternative" referred to by Kittel is a diplomatic edition, featuring a text of MT and an apparatus of selected variants. Kittel decided that the practicality of a diplomatic edition was preferable to the difficult judgments and uncertainties involved in establishing a truly critical edition. His scholarly heirs in the Biblia Hebraica Quinta Project—the new revision (of the old revision) of Kittel's diplomatic edition—hold to the same position:

> Indeed it seems to us premature to produce a critical text of the Hebrew Bible. The complexity of the textual situation does not yet allow such a reconstruction at the present time.[38]

This view is also reflected in the position of the Hebrew University Bible Project, for which the ultimate goal is not a critical text, but a comprehensive anthology of possible textual variants. The chief editor, Moshe Goshen-Gottstein, announced that the goal of this project is "to present nothing but the facts," eschewing as far as possible all subjective judgments.[39]

It is difficult to say whether a clear case has been established for excluding the production of critical texts from the business of the textual critic of the Hebrew Bible.[40] In fact, as Emanuel Tov has pointed out, most modern translations and scholarly commentaries incorporate their own critical texts of the Hebrew Bible,[41] though their text-critical decisions are rarely defended in detail. These "stealth" critical texts of the Hebrew Bible are probably the dominant form in which the Bible is known in modern culture. Is it justifiable for textual critics to abdicate the task of producing critical texts, with the result that the most difficult and delicate work of textual criticism is ceded to translation committees?

I suggest that Louis Cappel was correct in calling for the production of critical texts of books of the Hebrew Bible, and I further propose that the field of textual criticism may now be sufficiently developed—in terms of adequacy of method and abundance of data—to undertake such a task. The text-critical knowledge gained by the study of the Qumran texts, along with parallel advances in the study of LXX and the other versions, ought to be put to good use. This means doing what textual criticism is supposed to do: produce better texts and editions of works that are important to us. Surely the Hebrew Bible deserves no less.

---

[38] Adrian Schenker, "Eine Neuausgabe der Biblia Hebraica," *ZAH* 9 (1996): 59.

[39] Moshe H. Goshen-Gottstein, *The Book of Isaiah: Sample Edition with Introduction* (Hebrew University Bible Project; Jerusalem: Magnes, 1965), 7.

[40] For further discussion, see Hendel, *Text*, ch. 7.

[41] Tov, *Textual Criticism*, 373–74.

It is important to stress that such a critical edition will not be a "new revelation from Sinai"–it will be a work of human hands and as such, imperfect. But with care and effort it can be a better text, incorporating the best readings available, and it can be criticized and improved. Such an edition can serve as a stimulus for the textual study of the Hebrew Bible,[42] and it can mediate the riches gained from Qumran to a new generation of scholars and students.

---

[42] One important area that such an edition would stimulate is the study of expansions and parallel editions of biblical books. In cases where such scribal activity is discernible–such as Josh 8:30–35; Judg 6:6–11; or 1 Kgs 8:16, each discussed above–a critical text ought to include the different editorial layers in parallel columns or some similar arrangement. In this manner the multiform nature of the biblical text would be better understood and more accessible for study. See further Ronald S. Hendel, "The Oxford Hebrew Bible: Prologue to a New Critical Edition," *TC: A Journal of Biblical Textual Criticism*" (http://purl.org/TC) (forthcoming).

CHAPTER EIGHT

4QSAM^a (= 4Q51), THE CANON, AND THE COMMUNITY OF LAY READERS

Donald W. Parry

INTRODUCTION

The topic of the biblical "canon" is complex and enigmatic. Sometimes in a puzzling manner, scholars and theologians use a variety of expressions to describe aspects of the canon, including *scripture, authoritative text, sacred book, canonical criticism, canonical process, open/closed canon*, and *canonical text.* Scholars do not always agree on the definition of canon,[1] its historical and sociopolitical framework, its original composition, or its meaning to different religious sects.[2] Other puzzling items connected to the canon pertain to our uncertainty as to what rules fixed the canon, what authorities or council(s) established it, who was authorized to include/exclude texts, which variant versions were considered, or how the content of the collection was determined. None of the texts of the Bible speak directly about the establishment of a canon, none of the prophets revealed guidelines, and the Torah itself is silent on the subject. The canonization occurred centuries after the texts of the canon were created, perhaps in the last literary stages of the various texts. Also, as is well known, *canon* is a Greek term used by Christian theologians for a Christian collection of sacred works. There is no equivalent term in the Hebrew Bible or early Jewish literature–Jewish authorities refer to scriptural books as works that "defile the hands" (*m. Yad.* 3.5; 4.6).

---

[1] On the problems with the definition of canon, see Thomas A. Hoffman, "Inspiration, Normativeness, Canonicity, and the Unique Sacred Character of the Bible," *CBQ* 44 (1982): 463–65 and the bibliography in nn48-49. See also Eugene C. Ulrich, "The Canonical Process, Textual Criticism, and Latter Stages in the Composition of the Bible," in *Shaʿarei Talmon: Studies in the Bible, Qumran, and the Ancient Near East Presented to Shemaryahu Talmon* (ed. M. A. Fishbane, E. Tov, and W. W. Fields; Winona Lake, IN: Eisenbrauns, 1992), 269–70.

[2] See James A. Sanders, "Biblical Criticism and the Bible as Canon," *USQR* 32 (Fall 1976): 157–65, esp. 160–62.

Further, the discovery of the Dead Sea Scrolls has created a new set of questions about the canon: How did members of the Qumran community view the canon? What did they consider a sacred, authoritative text? Did they have an open or closed canon? What sacred books were included in their canon? How does the discovery of the scrolls change our view of the history of the canon? For what sociopolitical or religious reasons was the canon closed to the Jewish community during the first century C.E.? What is the present role of the newly discovered versions of the Bible, such as 4QSam^a, in the context of an already two-thousand-year-old canon? To attempt to answer all of these questions in a brief conference paper would be folly.

The chief goal of this paper is to discover, insofar as possible, the role of 4QSam^a, an ancient version of 1 and 2 Samuel, in the present-day canon of Scripture and to attempt to determine the extent that its readings should be used by the community of believers in our generation. This is not a position paper, but an exploratory piece designed to open a set of questions regarding the significance of 4QSam^a for contemporary Judaism and Christianity.

CANON AS SACRED BOOKS

For the purposes of this paper, I refer to Professor Ulrich's significant clarification that first the canon (as it pertains to the Hebrew Bible) represents a "reflexive judgment," "a judgment that is made in retrospect, self-consciously looking backward and recognizing and explicitly affirming that which has already come to be.... The reflexive judgment when a group formally decides that it is a constituent requirement that these books which have been exercising authority are henceforth binding is a judgment concerning canon."[3] Second, "canon denotes a closed list. Exclusion as well as inclusion is important.... I would argue that it is confusing to speak of an open canon. The fact that there were disagreements on the extent of the canon was not so much a toleration of an open canon as a lack of agreement concerning which particular closed list was to be endorsed."[4] Third, "canon concerns biblical books, not the specific textual form of the books. One must distinguish two senses of the word "text": a literary opus and the particular wording of that opus. It is the literary opus, and not the particular wording of that opus, with which the canon is concerned."[5] In a second publication, Eugene C. Ulrich develops this idea: "It was the sacred work or book that was important, not the specific edition or specific wording of the work. In discussion of the canon, it thus becomes important to remember that, for both Judaism and Christianity, it is books, not specific textual forms of the books, that are canonical."[6]

---

[3] Ulrich, "The Canonical Process," 272.

[4] Ibid., 272–73. When we speak of canon as a "closed list," we must remember that "there were probably as many canons as there were communities, a situation not entirely different from the case today, where the canons of the various communities: the Jewish, the Roman Catholic, the various Orthodox communions, and the Protestant, differ in significant ways," reports James A. Sanders in "Scripture as Canon for

By "biblical book," then, we refer to the sacred work itself, not the specific version. The books known as 1 and 2 Samuel are canonized, sacred works of Scripture, but many versions of Samuel exist that were or are now being used by different religious groups. In antiquity, the Qumran covenanters used 4QSam^a, 4QSam^b (= 4Q52), and 4QSam^c (= 4Q53); late Second Temple rabbinic authorities preferred a proto-Masoretic or MT of Samuel; and early Christian communities preferred Greek, Latin, Syriac, or Ethiopic translations of Samuel. The books of Samuel, of course, are manifest in many modern languages; some are grounded upon the Hebrew Bible; others are eclectic works.

Each of these versions, ancient and modern, was produced by one or more individuals who were subject to their own cultural, religious, social, and political background, which most assuredly influenced to some degree the readings of the respective versions. Each version has its own set of independent variant readings, no matter how minor. The great majority of such readings were introduced into the text through scribal transmission, although there are occasions of intentional glossing and theological articulation.

This approach to biblical canon–that it is sacred work that is canonized and not simply the versions of that sacred work–is agreeable to the concepts of textual criticism; it accepts individual variant readings belonging to extant witnesses, placing the variant or distinct readings (when warranted) in a previously established canon. Hence, the Samuel

Post-Modern Times," *BTB* 25 (1995): 56–63, esp. 58. The Ethiopian Orthodox canon, for instance, is comprised of 81 books; see Robert W. Cowley, "The Biblical Canon of the Ethiopian Orthodox Church Today," *Ostkirchlichen Studien* 23 (1974): 318–23. For a different perspective of canon as a closed list, see also William D. Davies, "Reflections on the Mormon 'Canon,'" *HTR* 79:1–3 (1986), 44–66.

5. Ulrich, "The Canonical Process," 273.

6. Eugene C. Ulrich, "Pluriformity in the Biblical Text, Text Groups, and Questions of Canon," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:36.

witnesses from Qumran Cave 4 (4QSam^a, 4QSam^b, and 4QSam^c) contain legitimate readings for contemporary religions, even though authorities closed the canon almost two millennia ago. The approach also welcomes future manuscript discoveries that may reveal previously unknown variant readings.

Which elements of the Bible are not canonized? First and foremost, the Hebrew consonantal text itself never received canonical status,[7] for it was the sacred work that was canonized, not the specific wording of that work. It is a false notion to believe that the consonantal text of the Hebrew manuscripts or any of the versions were determined and fixed at the same time the selection and number of books were set (sometime during the first or second centuries of the Common Era), for the readings of the ancient versions demonstrate great fluidity.[8] Further, evidence for the fluidity of readings during this time period exists in the biblical quotations found in the rabbinic literature,[9] Pseudepigrapha, and New Testament, readings that sometimes depart from the MT.

The medieval Masoretic manuscripts also exhibit a variety of readings. Emanuel Tov, summarizing the work of Moshe H. Goshen-Gottstein, Harry M. Orlinsky, and many others, has characterized the MT as "an abstract unit reflected in various sources which differ from each other in many details."[10] Orlinsky hardly exaggerated when he wrote that "there never was, and there never can be, a single fixed Masoretic Text of the Bible! It is utter futility and pursuit of a mirage to go seeking to recover what never was."[11] In view of this, some scholars recommend that we do not make reference to the MT and instead speak and write of an MT, Masoretic texts, or the Masoretic family of texts. Regardless of what we name the Bible at any point in history, there never existed a fixed, consonantal text that we could call a canonized text.

---

[7] Orlinsky made this interesting observation: "What scholars have done is to confuse the fixing of the Canon of the Bible with the fixing of the Hebrew text of the Bible." Harry M. Orlinksy, "Prolegomenon: The Masoretic Text: A Critical Evaluation," in *Introduction to the Massoretico-Critical Edition of the Hebrew Bible* (ed. C. D. Ginsburg; New York: KTAV, 1966), xviii.

[8] On this subject, much can be gleaned from Emanuel Tov's fine discussion on the textual witnesses of the Bible; see his *Textual Criticism of the Hebrew Bible* (Minneapolis: Fortress, 1992), 21–154.

[9] The biblical citations in the rabbinic literature often depart from the Masoretic tradition. See Orlinsky, "Prolegomenon," xx; see also, Victor Aptowitzer, *Das Schriftwort in der rabbinischen Literatur* (5 vols.; Vienna, 1906–15).

[10] See Tov, *Textual Criticism*, 22.

[11] Orlinsky, "Prolegomenon," xviii. Orlinsky adds: "[What] we might hope to achieve, in theory, is 'a Masoretic Text,' or 'a text of the Masoretes,' that is to say, a text worked up by Ben Asher, or by Ben Naftali, or by someone in the Babylonian tradition, or a text worked up with the aid of the masoretic notes of an individual scribe or of a school of scribes. But as matters stand, we cannot even achieve a clear-cut text of the Ben Asher school, or of the Ben Naftali school, or of a Babylonian school, or a text based on a single masoretic list"; idem, xxiii–xxiv.

Beyond the "consonantal framework" of the Hebrew Bible, vowel letters,[12] the system of diacritical marks for cantillation and accentuation,[13] Qere readings,[14] pausal marks, Masorah, critical apparatus, the end of the book summary (סכום), and other paratextual elements–these have never been canonized by religious authorities. Many or most of these elements did not exist when the canon of sacred books was fixed.

With reference to all the versions of the Bible, ancient and modern, the arrangement or order of the individual books,[15] the combinations of books (such as 1 and 2 Kings as a single book), and the creation of pericopes or literary units, such as chapters, paragraphing, versification, the books' names, explanatory notes (footnotes, sidenotes, endnotes, intercolumnal notes), chapter headings, marginal scriptural references, and page headings—all these are not considered to be canonized, since most of these elements did not exist in the earliest extant biblical manuscripts. Such elements are post-canonization-period inventions that serve as useful resources and tools to assist the reader in accessing the biblical text.

---

[12] J. Solomon wrote: "Conflicts are legion; the Torah has become, not two Torot, but numberless Torot owing to the great number of variations found in our local books–old and new alike–throughout the entire Bible. There is not a passage which is clear of confusion and errors in the vowel letters, in accents and vowel signs, in the qre and ktib, in dages and rafe…so that if a man undertake to write a Torah scroll according to law, he must necessarily err in respect of the vowel letters, and be like a blind man groping in pitch darkness"; cited in Moshe Greenberg, "The Stabilization of the Text of the Hebrew Bible, Reviewed in the Light of the Biblical Materials from the Judean Desert," *JAOS* 76 (1956): 158 (see also n3); reprinted in *The Canon and Masorah of the Hebrew Bible* (ed. S. Z. [Shnayer] Leiman; New York: Ktav, 1974), 300. 319n3; also reprinted in the collection of Greenberg's essays, *Studies in the Bible and Jewish Thought* (Philadelphia: JPS, 1995), 192.

[13] Greenberg writes: "The text of the Hebrew Bible is made up of three historically distinct elements: in order of antiquity and stability they are the consonants, the vowel letters, and the system of diacritical marks for vowels and cantillation. The present system of diacritical marks was developed by the Masoretes–the preservers of the text tradition–of the Palestinian school at Tiberias in the 9th century. It is the product of two centuries of intensive text-critical work in the schools of Palestine and Babylonia, whose object was the establishment of the correct pronunciation and text"; ibid., 299.

[14] On the development and history of Kethib and Qere readings, see Harry M. Orlinsky, "The Origin of the Kethib-Qere System: A New Approach," *VTSup* 7 (1959): 184–92.

[15] On the variation of the ordering of the books in various Hebrew Bibles, see William H. Brownlee, *The Meaning of the Qumran Scrolls for the Bible* (New York: Oxford University Press, 1964), 27–28; Orlinsky, "Prolegomenon," xviii–xix; and Israel Yeivin, *Introduction to the Tiberian Masorah* (trans. E. J. Revell; Missoula, MT: Scholars Press, 1980). The *Non-Masoretic Psalms* scroll from Cave 11 (11QPs^a [11Q5]), as is well known, presents a different sequence of its 48 compositions than does the Masoretic Text. On this, see James A. Sanders, "Cave 11 Surprises and the Question of Canon," *McCQ* 21 (1968): 284–98. For a look at the ordering and sequence of biblical books by the early Eastern and Western Churches, see Albert C. Sundberg, Jr., *The Old Testament of the Early Church* (Cambridge: Harvard University Press, 1964), 58–59.

4QSAM^{a} VERSUS MASORETIC SAMUEL

Over the last two centuries a number of textual critics have recognized that the MT of 1 and 2 Samuel has experienced transmissional corruption.[16] Various introductions to works on Samuel have summarized problems with the MT of Samuel, followed by seriatim treatments of variant readings in the ancient witnesses. As early as 1842, Otto Thenius[17] systematically identified corruptions in the Samuel MT and argued for restorations and emendations based on the LXX. His groundbreaking work was accepted and used by Heinrich Ewald,[18] followed by Friedrich Böttcher;[19] but later scholars believed that Thenius lacked discrimination in his use of the LXX. In 1871, Julius Wellhausen,[20] with a proper critical eye and perhaps a well-developed sixth sense, created a work that sought to understand and articulate the underlying rules and principles that may have governed the LXX translators; he also succeeded in comprehending, to a point, the challenges connected to the textual critic's understanding of the transmission of the Bible. At the close of the nineteenth century, Samuel R. Driver, author of the first serious English work on the books of Samuel,[21] asserted that the Samuel books "have suffered unusually from transcriptional corruption."[22] Present scholars have also observed weaknesses in the MT of Samuel, using descriptions such as

"slightly corrupt,"[23] "particularly faulty,"[24] "incomplete and difficult,"[25] or of "poor repair."[26] We must read and understand such statements in their full context.

I will not attempt to repeat the lengthy discussions of the nineteenth- and twentieth-century textual critics concerning the textual weaknesses of the books of Samuel in the Masoretic textual family; rather, I refer to Driver's summary.[27]

DISCOVERY OF THE QUMRAN SAMUEL TEXTS

In September 1952, archaeologists Roland de Vaux and Lankester Harding unearthed three manuscripts of Samuel[28] in Qumran Cave 4, now known as 4QSam^a, 4QSam^b, and 4QSam^c. 4QSam^a was buried under more than three feet of deposit. Its darkened leather was reinforced with glued papyrus backing, an indication that the scroll was well worn before its deposit. In 1953, Professor Frank Moore Cross cleaned the fragments, sorted and arranged them onto museum plates, and published representative fragments. In subsequent years, he presented other parts of 4QSam^a to various audiences, both scholarly and popular.[29] Other scholars have contributed to the study of the Qumran Samuel texts, especially Ulrich[30] and P. Kyle McCarter.[31] In spite of its obvious wear and fragmented condition, 4QSam^a is the best preserved of the biblical manuscripts from Cave 4. Approximately 10 percent of the text of 1 and 2 Samuel is extant.

M. Cross and S. Talmon; Cambridge, MA: Harvard University Press, 1975), 147–76; and Frank M. Cross and Donald W. Parry, "A Preliminary Edition of a Fragment of 4QSam^b (4Q52)," *BASOR* 306 (1997): 63–74; Eugene C. Ulrich, "4QSamuel^c: A Fragmentary Manuscript of 2 Samuel 14–15 from the Scribe of the Serek Hay-yahad (1QS)," *BASOR* 235 (1979): 1–25, a preliminary report on the full text of 4QSam^c (= 4Q53). The three manuscripts–4QSam^a (= 4Q51), 4QSam^b (= 4Q52) and 4QSam^c–are in *Qumran Cave 4.XII: 1 and 2 Samuel* (ed. F. M. Cross et al.; DJD 17; Oxford: Clarendon, 2005); F. M. Cross, D. W. Parry, and Richard J. Saley are the editors of 4QSam^a and 4QSam^b, and E. Ulrich is the editor of 4QSam^c.

[29] Frank M. Cross, "The Contribution of the Qumrân Discoveries to the Study of the Biblical Text," *IEJ* 16 (1966): 81–95; repr., in *The Canon and Masorah of the Hebrew*

Like other books of the Bible discovered in the Judean Desert, 4QSam^a has contributed to our knowledge of ancient biblical writing materials as well as the practices of the scribes and their transmissional errors, orthography, and paleography. More significantly, 4QSam^a contributes to biblical studies in the following six ways:

1. A number of the individual variant readings of 4QSam^a establish that the Old Greek Bible is based on a *Vorlage* that is similar to 4QSam^a. Professors Cross and Ulrich have demonstrated this in a number of publications. Under the title "A New Qumran Biblical Fragment Related to the Original Hebrew Underlying the Septuagint,"[32] Cross concludes:

> Our fragment (4QSam^a) stands in the same general tradition as the Hebrew text upon which the Septuagint was based. The divergences between 4QSam^a and LXX are sufficiently explained by the century or so between the translation of Samuel into Greek, and the copying of our MS, during which time there was certainly some cross-fertilization between Hebrew textual traditions current in Palestine.[33]

Although this statement was authored almost half a century ago, the claim that the Old Greek Bible was translated from an ancestor of the 4QSam^a text is still accepted by most scholars. This close connection between the two texts often manifests itself.[34]

Bible, 334–48; and in *Qumran and the History of the Biblical Text*, 278–92; and as "Der Beitrag der Qumranfunde zur Erforschung des Bibeltextes," in *Qumran* (ed. K. E. Grözinger et al.; trans. E. Grözinger; Darmstadt: Wissenschaftliche Buchgesellschaft, 1981), 365–84; idem, "'Textual Notes' on 1-2 Samuel," in *The New American Bible* (Paterson, NJ: St. Anthony Guild, 1970), 342–51; idem, "The Ammonite Oppression of the Tribes of Gad and Reuben: Missing Verses from 1 Samuel 11 Found in 4QSamuel^a," in *History, Historiography and Interpretation: Studies in Biblical and Cuneiform Literatures* (ed. H. Tadmor and M. Weinfeld; Jerusalem: Magnes, 1983), 148–58; repr., in *The Hebrew and Greek Texts of Samuel* (ed. E. Tov; Jerusalem: Academon, 1980), 105–19.

[30] Eugene C. Ulrich, "4QSam^a and Septuagintal Research," *BIOSCS* 8 (1975), 24–39; idem, *The Qumran Text of Samuel and Josephus* (HSM 19; Missoula, MT: Scholars Press, 1978).

[31] P. Kyle McCarter, Jr., *II Samuel: A New Translation with Introduction, Notes and Commentary* (AB 9; Garden City, NY: Doubleday, 1984).

[32] Cross, "A New Qumrân Biblical Fragment," 15–26.

[33] Ibid., 23.

[34] For a host of examples, see the variants set forth Cross et al., eds., *Qumran Cave 4.XII: 1 and 2 Samuel* (DJD 17).

2. In approximately half a dozen occasions, Josephus presents readings of Samuel in his *Antiquities* that correspond with 4QSam^{a} but are not extant in either the MT or the LXX. In addition, Josephus, 4QSam^{a}, and the LXX share almost three dozen readings against those in the MT. These numbers are significant because they indicate that Josephus used a Greek Samuel text that was similar to the *Vorlage* of 4QSam^{a}.
3. Where the book of Chronicles parallels 1 Samuel and 2 Samuel, the readings of Chronicles clearly belong to the 4QSam^{a} rather than the Masoretic textual tradition.[35] In *The Qumran Text of Samuel and Josephus*, Ulrich calculates that “Chronicles never agrees with [the MT] against 4QSam^{a}, except for [a single reading]. On the other hand, Chronicles agrees with 4QSam^{a} against [the MT] in 42 readings, some of which are quite striking.”[36]
4. On more than ninety occasions, 4QSam^{a} exhibits a reading that stands nonaligned with other ancient textual witnesses. These independent readings may provide insight into the scribal practice of this scroll’s copyist; they may also tell us something about the socioreligious background of the MT, the proto-Masoretic Text, or 4QSam^{a}. Many of these readings are minor; others are significant.
5. 4QSam^{a} is a significant Hebrew witness whose readings frequently depart from the MT. A number of the departures are simple variants where both witnesses present the correct reading. For example, in 1 Sam 28:23, the MT has the configuration מהארץ with the attached preposition (the scribe of the MT always prefers the attached preposition; see 1 Sam 28:3, 23; 2 Sam 12:20), while 4QSam^{a} reads מן־[הא]רץ. Both are correct readings and both have the same translational value. On other occasions both 4QSam^{a} and the MT share the same reading that textual critics may label as inferior. Such is the case in 1 Sam 25:5, where the Hebrew traditions present the superfluous reading of דוד (an explicatory plus), the subject of the sentence already introduced in the opening coordinate clause. Such examples, of course, could be multiplied.
6. Three principal points should be made regarding the orthographic system of 4QSam^{a}:[37] (a) Although 4QSam^{a} and MT have similar orthographic systems, 4QSam^{a} is persistently fuller than MT, where orthographic variants exist; (b) the orthographic system of 4QSam^{a} corresponds in a general way with parallel passages in Chronicles–the orthographic systems of both show a fuller system than that of the MT; (c) the orthography of

[36] Ulrich, *The Qumran Text of Samuel*, 163.

[37] For an extensive discussion of the orthographic system of 4QSam^{a}, see the introduction and accompanying tables in Cross, et al., eds., *Qumran Cave 4.XII* (DJD 17).

> 4QSam^a is different from the "baroque" or "Qumran" orthography,[38] an orthographic system that is now extant primarily in the sectarian scrolls of Qumran and a few biblical texts that were copied by Qumran scribes (e.g., 1QIsa^a and 4QSam^c). This orthographic system contains many distinguishable features that set it apart from 4QSam^a and other presumably imported texts.

Many variant readings of 4QSam^a are significant and add to our understanding of the biblical text. Here I list a few readings in 4QSam^a that provide such an understanding.[39]

They are representative examples; additional examples in the Qumran witness may be found in the critical apparatus of *Biblia Hebraica Stuttgartensia, Discoveries in the Judaean Desert*, volume XVII, or several publications dealing with 4QSam^a.

1 Sam 2:16

MT: לו כי (cf. MT *ketiv*, Tg.; Syr. is conflate with לו לא כי)
4QSam^a: לא כי (cf. LXX, MT *qere*)

The negative particle belongs to the reading, as evidenced by 4QSam^a and MT *qere*.[40]

1 Sam 10:27–11:1

MT: lacking
4QSam^a: large plus (cf. Josephus, *Ant.* 6.68–70)

4QSam^a contains a large paragraph, translated as follows:

---

[38] Three articles speak concerning 4QSam^a and its orthography: Frank M. Cross, "Some Notes on a Generation of Qumran Studies," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:3–6; Emanuel Tov, "The Orthography and Language of the Hebrew Scrolls Found at Qumran and the Origin of These Scrolls," *Text* 13 (1986): 31–57; idem, "Hebrew Biblical Manuscripts from the Judaean Desert: Their Contribution to Textual Criticism," *JJS* 39 (1988): 23–25.

[39] The MT, of course, exhibits a great number of variant readings that are to be preferred over the Qumran witness. See, for example, the readings at 1 Sam 2:24; 2:34; 5:9; 6:2; 15:29; 2 Sam 3:29; 10:6.

[40] See Driver, *Notes on the Hebrew Text*, 31–32.

> And Nahash, king of the Ammonites, harshly oppressed the Gadites and the Reubenites. He would gouge out the right eye of each of them and would not grant Israel a deliverer. No one was left of the Israelites across the Jordan whose right eye Nahash, king of the Ammonites, had not gouged out. But there were seven thousand men who had fled from the Ammonites and had entered Jabesh-Gilead.

Josephus reflects the plus of 4QSam^a, although it is lacking in the other witnesses. The reason for the loss in the Hebrew textual transmission is not immediately evident. In copying the text, the scribe's eye may have skipped from the beginning of one paragraph to another, both having Nahash as the subject.[41] Or a haplography occurred when the scribe skipped from יבש to יביש. He then corrected himself by copying ויהי כמו חדש ויעל נחש העמוני ויחן על יביש above the point of the omission. The book hand of the supralinear correction is *manu prima.*

A third possible example of haplography may be connected with the words ויהי כמו חדש in 4QSam^a; this phrase may have once occurred in the Hebrew text at the end of 1 Sam 10:27 and again in 11:1. Thereby, in the Dead Sea Scrolls text, the whole paragraph seems to have been lost. Regardless of what scribal mechanism caused the different readings in the two Hebrew witnesses, ויהי כמחריש in the MT is best seen as a variant of 4QSam^a's ויהי כמו חדש.

Although many textual critics accept the plus as belonging to the narrative, others believe it to be a late midrash and consequently prefer the MT.[42]

1 Sam 14:30

MT: רבה מכה
4QSam^a: ר̊בה המכ̊ה̊ (cf. LXX)

The noun *makkā* requires the definite article (cf. 1 Sam 4:10; 14:14), which was perhaps lost from the MT when a scribe misdivided the words. This misdivision of words was first pointed out by Ulrich.[43]

---

[41] Cross, "The Ammonite Oppression," 153–54.

[42] Alexander Rofé, "The Acts of Nahash according to 4QSam^a," *IEJ* (1982): 129–33, sees this plus as a midrash. James A. Sanders, "Hermeneutics of Text Criticism," *Text* 18 (1995): 22–26, prefers the Masoretic reading at 1 Sam 10:27–11:1 and presents five arguments in favor of such.

[43] Ulrich, *The Qumran Text of Samuel*, 53–54.

1 Sam 14:47

MT: ובמלכי (cf. Tg., Vg.; ובמלכות Syr.)
4QSam^a: ובמלך (cf. LXX, Josephus, *Ant.* 6.129)

On the basis of several readings of the singular "king of Zobah" in 2 Sam 8:3, 5, 12; 1 Kgs 11:23; and 1 Chr 18:3, 5, 9, there is no reason to prefer a plural here.

1 Sam 15:27

MT: ויחזק (cf. Vulg.)
4QSam^a: [ו]יחזק שאול (cf. LXX, Syr., Josephus *Ant.* 6.152)

4QSam^a clarifies the subject; Saul grabbed the garment, not Samuel.

1 Sam 17:4

MT: שש (cf. LXX^O, Vg., Syr.; חמש LXX^{mss})
4QSam^a: א̊רבע (cf. LXX^{BL}, Josephus, *Ant.* 6.171)

Michael Coogan proposes that a scribe wrote "six cubits" (שש אמות), anticipating "six hundred" (שש מאות) in verse 7.[44] This proposal is appealing since most copyist errors are unintentional. A deliberate effort by a copyist to lower Goliath's height is highly unlikely, for reducing the Philistine's height serves only to diminish David's victory.[45]

1 Sam 24:14 (13 ET)

MT: הקדמני מרשעים (cf. LXX, Vg.)
4QSam^a: הקד]מניים [מרשעים] (cf. Tg., Syr.)

"As commentators have observed, the plural, 'ancients,' is expected. The reading of MT arose from haplography, the final *mêm* of הקדמנים being lost before the initial *mêm* of the following מרשעים. The loss almost certainly took place before the development of medial forms of the letter."[46]

---

[44] McCarter, *I Samuel*, 286.
[45] On this see ibid., 286.
[46] Cross et al., eds., *Qumran Cave 4.XII: 1 and 2 Samuel* (DJD 17). 81.

2 Sam 5:8

MT^{ketiv}: שנאו (cf. שנאי MT^{qere}, LXX, Vulg.)
4QSam^{a}: שנאה (cf. Tg., Syr.)

The Hebrew witnesses exhibit three readings of the verb: "those who hate (שנאי) the soul of David"; they "hated (שנאו) the soul of David"; and "the soul of David hated (שנאה)." David is the object of hatred in the first two readings and the agent in the third, as in 4QSam^{a}. Ulrich argues persuasively that the reading of 4QSam^{a} represents the "superior variant."[47]

2 Sam 6:3

MT: חדשה וישאהו מבית אבינדב אשר בגבעה+ (cf. LXX^{O} Tg., Syr., Vg.)
4QSam^{a}: עג]לה (cf. LXX^{BL})

The MT has a six-word dittography occasioned by the double occurrence of the word עגלה.

2 Sam 10:5

MT: lacking (cf. Tg., Syr., Vg.)
4QSam^{a}:]על [ה̊אנשים (cf. LXX, 1 Chr 19:5)

The *hiphʿil* verb נגד prefers an object, although Hebrew grammar does not always require it.[48] The preferred reading here is על האנשים, since those sent cannot be the subject of the verb.[49]

2 Sam 11:16

MT: בשמור
4QSam^{a}: בשו̊ר̊

---

[47] See Ulrich, *The Qumran Text of Samuel*, 136; see also Driver, *Notes on the Hebrew Text*, 260–61.

[48] See Dominique Barthélemy, "La qualité du Texte Massorétique de Samuel," in *The Hebrew and Greek Texts of Samuel: Proceedings of the Congress of the International Organization for Septuagint and Cognate Studies (Vienna, 1980)* (ed. E. Tov; Jerusalem: Academon, 1980), 24–25.

[49] See Wellhausen, *Bücher Samuelis*, 179.

The rarer verb of 4QSam^{a} ("and when Joab carefully observed the city") is preferred over the common verb of the MT. Graphic similarity probably caused the substitution of the Masoretic reading.

2 Sam 12:17

MT: ויקמו (cf. LXX^{BO}, Syr.)
4QSam^{a}: ויקר֯מ֯[ו] (cf. LXX^{L}, Vg.)

McCarter[50] rightly points out that graphic confusion between *wāw* and *rêš*, on the one hand, and *mêm* and *bêt*, on the other, may account for the variant reading. The verb of the MT (ויקמו) with its locational preposition (עליו) is irregular in this setting.

OTHER VIEWS OF 4QSAM^{a}

Not everyone would agree with these assessments of 4QSam^{a} regarding its five contributions to biblical study. Hans J. Stoebe, Stephen Pisano, and Alexander Rofé, for example, prefer generally the readings of the MT over 4QSam^{a}.[51] Pisano, who conducts the most in-depth work in favor of the MT versus 4QSam^{a} and LXX, sees the majority of pluses found in 4QSam^{a} and the LXX as the result of "further literary activity"[52] by scribes and editors who deliberately inserted new words or phrases into the existing text.[53] If the plus is found in LXX and 4QSam^{a}, this was created when an "editor who wished to expand his text took advantage of one word in the verse around which he made his insertion, and concluded the insertion with the same word, leaving in his wake a text which appears to have given rise to a textual accident in MT's shorter text, but which in reality is simply the result of an expansion."[54] Pisano calls this editorial activity a "scribal technique." If, however, the plus is found in the MT, then it is caused by "an error in the Greek text [and 4QSam^{a}] due to homoioteleuton or homoioarkton."[55]

SHARING MAJOR VARIANT READINGS WITH LAY READERS

Up to this point I have set forth six major contributions of 4QSam^a to biblical studies. These contributions are appreciated by a number of scholars, professors of religion, and advanced students–a small group in contrast to the millions who belong to the community of lay readers. To what extent have the variant readings of 4QSam^a been introduced to the community of lay readers?

In *The Dead Sea Scrolls and Modern Translations of the Old Testament*, Harold Scanlin determines that 4QSam^a has impacted recent translations of the Bible in two major ways: (1) a number of translators believe that this text provides significant readings that are not equal to those of other ancient witnesses, including the MT; and (2) inasmuch as 4QSam^a supports readings from the LXX, many translators now accept individual variant readings from the LXX even where 4QSam^a is not extant.[56] Scanlin illustrates the influence of all three Qumran Samuel scrolls by showing that from them the New American Bible has welcomed 230 readings, the New English Bible accepted 160 readings, the New Revised Standard Version accepted about 110, the Revised Standard Version used about 60, Today's English Version used 51, and the New International Version accepted 15.[57] In my view, these statistics offer an optimistic outlook as to how recent biblical translation committees are showing consideration for the scrolls.

A significant work has been published subsequent to Scanlin's 1993 publication. In 1999, professors Martin G. Abegg, Jr., Peter W. Flint, and Eugene C. Ulrich published *The Dead Sea Scrolls Bible*.[58] This notable work comprises a translation of the biblical Dead Sea Scrolls, highlights numerous important readings, and indicates hundreds of variant readings (in user-friendly and accessible footnotes) between the MT and the Dead Sea Scrolls. The recent translations of the Bible, together with *The Dead Sea Scrolls Bible*, mark a beginning point for lay readers' access to significant variant readings.

---

[56] Harold P. Scanlin, *The Dead Sea Scrolls and Modern Translations of the Old Testament* (Wheaton, IL: Tyndale House, 1993), 115.

[57] Statistics are from ibid., 26. On the one hand, Scanlin states that "every major Bible translation published since 1950 has claimed to have taken into account the textual evidence of the Dead Sea Scrolls" (27). On the other hand, he says: "Most people will be surprised to learn that there are relatively few passages in modern English translations of the Old Testament that have been affected" by the biblical Dead Sea Scrolls (107).

[58] Martin G. Abegg, Jr., Peter W. Flint, and Eugene C. Ulrich, *The Dead Sea Scrolls Bible: The Oldest Known Bible* (San Francisco: HarperSanFrancisco, 1999).

As a version, 4QSam^a will never replace the MT (speaking of the Masoretic family, i.e., the proto-Masoretic, the Masoretic texts of the ninth and tenth centuries, and so forth), which has been used by religious communities for approximately two millennia and is of inestimable value for both Judaism and Christianity. Something must be said for a received text that has been part of a long-standing tradition of both tradents (copyists, scribes, redactors) and tens of millions of lay readers.

Accepting variant readings from 4QSam^a will not change the shape of the biblical canon, which consists of sacred books, nor will acceptance destroy our long-standing appreciation for the MT. Acceptance of selected major variant readings from 4QSam^a, however, will be of some consequence with the believing community over time, because the details of people, places, and events are of great worth to the reader. The real authority of the Scriptures comes in the individual words and expressions that mold the life and faith of whoever reads them.

CHAPTER NINE

THREE SOBRIQUETS, THEIR MEANING AND FUNCTION: THE WICKED PRIEST, SYNAGOGUE OF SATAN, AND THE WOMAN JEZEBEL

Håkan Bengtsson

One of the distinctive features of the sectarian literature in the Qumran texts is the frequently occurring sobriquets. Names such as "The Righteous Teacher," "The Wicked Priest," "The Man of Lie," and "The Kittim" appear to have been used in a systematic way, above all in the pesharim. These names apparently are designations used by the Qumran community for persons and groups, either friendly or hostile toward the community. To the outside reader, these sobriquets appear as a conglomerate of cryptograms,[1] fully discernible only for those who know the original context. This state of things also occurs in Revelation 2–3. There different opponents of the churches in Minor Asia are depicted in unfavorable terms: "synagogue of Satan," "the woman Jezebel," and so on.

The Problem

The sobriquets in the pesharim have mostly been dealt with in order to identify the historical person behind the cryptogram. Not surprisingly, the historical identifications differ from scholar to scholar; for example, Vermes and Jeremias have identified "the Wicked Priest" as Jonathan Maccabaeus. Cross prefers his brother Simon, while Carmignac suggests Alexander Jannaeus.[2] Often a specific identification is grounded on a particular passage in the pesharim describing a characteristic quality or deed connected with the sobriquet. This passage is then matched with material in Josephus or 1–2 Maccabees.

---

[1] By the designation "cryptogram" I understand a much broader concept than with a "sobriquet." By the term "sobriquet" I mean a nickname systematically attached to a specific person or group. A cryptogram is considered to be a designation somewhat nebulous to the reader, but not elaborately used for specific groups or persons.

[2] The summary is taken from Adam S. van der Woude and will be elaborated. See his "Wicked Priest or Wicked Priests? Reflections on the Identification of the Wicked Priest in the Habakkuk Commentary," *JJS* 33 (1982): 349–59, esp. 349.

A presumption that scholars have been working under is that different sectarian texts, especially the pesharim, disclose historic information about the Qumran community. On the whole, this may be a plausible presumption, but we have to give more precaution and consideration to the specific features and functions of the sobriquets.[3] Scholars have even expressed careful doubts about the historical basis for the pesharim.[4]

This study will first elucidate some features concerning proper names and sobriquets. Second, an analysis of the sobriquet "the Wicked Priest" in the pesharim will be conducted. Finally, a short comparison with similar cryptograms in the Book of Revelation will be outlined.

Here I pursue several questions: Why are these sobriquets used? What is the function of a sobriquet? What qualities and circumstances are attributed to the sobriquet? Which overall characteristic of the person designated as "the Wicked Priest" is pursued in the pesharim? And which similarities and differences are there between the sobriquets "synagogue of Satan" and "the woman Jezebel" in Revelation, compared to "the Wicked Priest" in the pesharim?

SOBRIQUETS IN THE PESHARIM

The most elaborate use of sobriquets is found in the pesharim. It is, in fact, one of the features that makes this genre unique. There are also some occurrences in other Qumran documents, as in CD and in the Hodayoth. A few of the names below are represented either in both CD and the pesharim, or in the Hodayoth and in the pesharim.[5] Callaway gives examples of about twenty different sobriquets, all occurring in the pesharim:[6]

---

[3] The publications of Brownlee and Horgan move the focus of discussion away from the historical implications; instead, they discuss the purpose and function of the pesharim. See William H. Brownlee, *The Midrash Pesher of Habakkuk* (SBLMS 24; Missoula, MT: Scholars Press, 1979), 35–36; and Maurya P. Horgan, *Pesharim: Qumran Interpretations of Biblical Books* (CBQMS 8; Washington, DC: Catholic Biblical Association of America, 1979), 244–59.

[4] Philip R. Davies, *Behind the Essenes: History and Ideology in the Dead Sea Scrolls* (BJS 94; Atlanta: Scholars Press, 1987), 90–91.

[5] E.g., "the Righteous Teacher" in CD and the pesharim, and "the Seekers of smooth things" in the *Hodayoth* and 4QpNah (4Q169).

[6] Phillip R. Callaway, *The History of the Qumran Community: An Investigation* (JSPSup 3; Sheffield: JSOT Press, 1988), 135.

“the Righteous Teacher” (מורה הצדק)
“the Priest” (הכוהן)
“the Men of Truth” (אנשי האמת)
“the Doers of the Law” (עושי התורה)
“the Poor” (הפתאים or אביונים)
“Lebanon” (הלבנון)
“the Council of the Yahad” (עצת היחד)
“the Returnees from the Wilderness” (שבי המדבר)
“the Wicked Priest” (הכוהן הרשע)
“the Liar” (איש הכזב)
“the Spouter of Lies” (מטיף הכזב)
“the Traitors” (הבגדים)
“those Violent to the Covenant” (עריצי הברית)
“the Seekers of Smooth Things” (דורשי החלקות)
“the Last Priests of Jerusalem” (כוהני ירושלים האחרים)
“the Evil Ones of Ephraim and Manasseh” (רשעי אפרים ומנשה)
“the Evil Ones of Israel” (רשעי ישראל)
“the Kittim” (הכתיםor הכתיאים)
“the Rules of the Kittim” (מושלי הכתים)
“the Kings of Yavan” (מלכי יון)
“the Lion of Wrath” (כפיר החרון)
“the House of Peleg” (בית פלג)
“the House of Absalom” (בית אבשלום)

It goes without saying that the sobriquets above should not be considered as all having the same function or belonging to an elaborate system. Here is a preliminary subdivision of these names in four categories:

1a. Individual personal sobriquet, assumed to refer to an individual person such as “the Righteous Teacher” (= the founder of the community), “the Lion of Wrath” (= Alexander Jannaeus?).
1b. Individual impersonal sobriquet, assumed to refer to an impersonal single entity such as an office or a teaching.
2a. Collective specific sobriquet, assumed to refer to a specific group such as “the Kittim” (= Romans or Seleucids?), “the Seekers of smooth things” (= Pharisees?).

2b. Collective unspecific sobriquet, assumed to refer to qualities or entities attached to a group or a general collective such as "the Traitors," "the Evil Ones in Israel."[7]

It is not unproblematic to discern if "the Wicked Priest" should be fitted in under 1a or under 1b. The notion put forward by van der Woude, García Martínez, and other adherents to the Groningen hypothesis is that "the title 'Wicked Priest' is not a nickname assigned to the High Priest. Instead, it is an honorary title applied to the various Hasmonean High Priests, from Judas Maccabaeus to Alexander Jannaeus, following exact chronological sequence."[8] This is one of the implications of the Groningen hypothesis, which largely draws a picture of the Qumran group as distinct from the larger Essene movement.[9]

Nevertheless, we can draw a few preliminary conclusions from the distinctions above. First, the linguistic information contained in the sobriquet is important. The more elaborate features contained in the sobriquet, the more we can tell about the name; "the Wicked Priest" is more tangible than "the Priest," which in fact could have several references. Moreover, the textual context in the pesharim must be decisive when making conclusions about the referent.

WHAT IS IN A NAME?

In biblical contexts, the name should say something specific about its bearer. Raymond Abba has articulated this common notion:

> A name is regarded as possessing an inherent power which exercises a constraint upon its bearer: he must confirm to his essential nature as expressed in the name.[10]

Moral and ethical qualities could be attributed to a name, as in the case of Jacob, referred to above. In Gen 27:36, the author wants the reader to associate the name Yaᶜaqob with the root עקב, "deceive." Further, in 1 Sam 25:25, the name Nabal: gives an association to the adjective נבל, "fool":

---

[7] The positions 1b and 2b are more difficult to analyze in historically identifiable categories.

[8] Florentino García Martínez, *The Dead Sea Scrolls Translated: The Qumran Texts in English* (trans. W. G. E. Watson; 2d ed.; Leiden: Brill, 1996), lv, in the introduction. Van der Woude, "The Wicked Priest or Wicked Priests?" 349–50, puts forward the same notion.

[9] Florentino García Martínez and Julio C. Trebolle Barrera, *The People of the Dead Sea Scrolls: Their Writings, Beliefs and Practices* (trans. W. G. E. Watson; Leiden: Brill, 1995), 86–96.

[10] Raymond Abba, "Name," *IDB* 3:500–508, esp. 501.

אֶל־אִישׁ הַבְּלִיַּעַל הַזֶּה עַל־נָבָל כִּי כִשְׁמוֹ
כֶּן־הוּא נָבָל שְׁמוֹ וּנְבָלָה עִמּוֹ

Now, is "Nabal" this man's proper name, or is it a disparaging nickname? Stamm shows that it is quite possible that Nabal was his proper name from the beginning; however, it was not associated with foolishness, but with another Semitic root meaning "noble."[11] This particular passage makes the association with "foolishness." Stamm gives a parallel to the Latin name Brutus; a person called "Brutus" does not have to be stupid and thus encapsulate the etymological sense of the name.[12] (This is said without referring to the negative historical connotations connected with this particular name!) Consequently, here we cannot keep the linguistic notion that a proper name does not have sense. Hebrew names have a sense, but this particular sense is not a priori connected with the character of the bearer. On the other hand, when the sense of the name coincides with the bearer's character,[13] the effect becomes striking. What about nicknames?

Names like "Ish-bosheth" in 2 Sam 2:8–11 and "Eshbaʿal" in 1 Chr 8:33; 9:39 apparently function as disparaging nicknames. These names are probably not their own, but attributed to them by the author. In these instances, the person's loyalty or qualities are the facts upon which their names are constructed. Another historical example given is "bar-Kokhba." Rabbi Akiba attributed this well-known name to Simeon bar-Kosiba, the leader of the Second Jewish Revolt (132–135 C.E.). The rabbi's messianic sympathies for bar-Kosiba were expressed by alluding to the Aramaic word for "star," כוכבא. This allusion, along with the prophecy in Num 24:17, makes a clear messianic reference. Further, the notion put forth in the later rabbinical writings that bar-Kokhba was a false Messiah was expressed by changing the *sāmek* to a *zayin.* The meaning then became "bar-Koziba," "son of a lie."[14] This wordplay has, in my view, a parallel phenomenon in the sobriquet הכוהן הרשע / הכוהן הראש, "the Wicked Priest" / "the High Priest."[15] By changing a radical or with a different vocalization, a striking wordplay is achieved. The sobriquets in the pesharim and in Revelation 2–3 are probably more similar to the features of a nickname.

PROPER NAMES IN THE PESHARIM

The fact that proper names are used in the pesharim should also be considered here. In one passage in the *Nahum Pesher*,[16] two names of Seleucid rulers occur: Demetrius and Antiochus ([דמי]טרוס מלך יון . . . מאנתיכוס). Demetrius stands as the object of the interpretation: "[Interpreted this concerns Deme]trius king of Yavan."

Apparently, there was no need to replace Demetrius's name with a sobriquet. I suggest that "Demetrius" is just referred to as another Seleucid ruler here. His name and his deeds, referred to in the exegesis, may be looked upon with dislike, but he is no immediate threat to the Qumran community.

Interestingly enough, in this passage the name "Demetrius" stands in apposition to "king of Yavan."[17] In a way, the apposition says more about Demetrius than his proper name does, identifying him as king of Yavan. Moreover, in 4QpPs^{a} (4Q171) 3.15 on Ps 37:23–24, "the Righteous Teacher" stands in apposition to "the Priest" (הכוהן מורה ה[צדק]). This means that הכוהן had to be clarified here. In these passages, the sobriquets stand as appositional phrases.

THE SEMANTICS OF SOBRIQUETS

A sobriquet is used instead of a proper name. The person referred to by the sobriquet is renamed because of a quality inherent in that person. This special quality is generally expressed in the sobriquet.

Consequently, a sobriquet has a denotation: someone is referred to. Sobriquets also have connotations; good or bad associations are connected with the name. Finally, sobriquets have a sense; they say something about their bearer. Let us consider the example of the Wicked Priest.

The sobriquet הכוהן הרשׁע, "The Wicked Priest," says basically two things about its bearer: first, the bearer of the name is a priest, and second, he is a wicked person.[18] Naturally, the sobriquet as a whole is supposed to give the reader negative connotations.

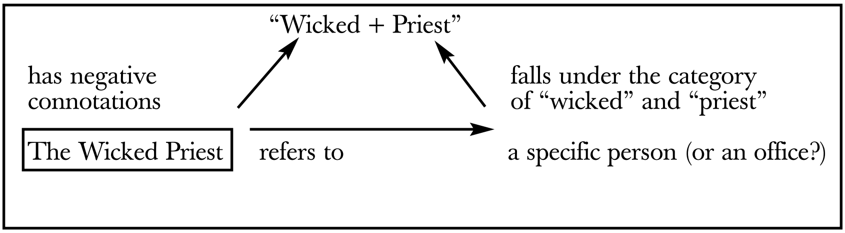
---

[16] 4QpNah (4Q169) frags. 3–4 1.2–3

[17] יון probably denotes Greece or the Seleucid kingdom in Dan 10:20; 11:2. In Gen 10:2, Yavan (Javan) is one of Japhet's sons.

[18] In this context, רשׁע could also mean "illegitimate." Further, רשׁע could also denote the priesthood or priestly dynasty and not necessarily a single person.

Of course, it is the writer (and the Qumran community) who invented this notion, that the priest is wicked. By itself the designation is an oxymoron since a priest is not expected to be wicked. Subsequently, the sobriquet "The Wicked Priest" has its validity among a limited group. Still, this group cannot deny that he is a priest.



"Wicked + Priest"
has negative connotations
falls under the category of "wicked" and "priest"
The Wicked Priest
refers to
a specific person (or an office?)

THE FUNCTION OF A SOBRIQUET

Considering the position of the sobriquets in the exegetical passages in the pesharim, in most occurrences, they stand as an intermediary link between the lemma and the exegesis. They follow after פשׁרו / פשׁר הדבר. In this textual level, a sobriquet is naturally a textual expression with a sense. It could further be considered whether the sobriquet has a didactic function here. The phrase "the interpretation concerns the Wicked Priest" is close to a "didactic nomination."[19]

The sobriquet is often attributed with deeds or qualities that are inherent in the person referred to; for example, "the Wicked Priest who (אשׁר) pursued the Righteous Teacher…" This deed is undoubtedly considered bad. I propose that what is done here is a "descriptive backing" of the sobriquet. The sobriquet is, so to speak, connected with the characteristics attached to it.[20] This gives the sobriquet an evaluating function.

On the other hand, scholarly work has mostly dealt with the referential function of a sobriquet, trying to identify the referent of the sobriquet for this historical character. Now, it may be useful to make distinctions between these three levels (see figure 2 below). In the following analysis, I will deal mostly with the second, symbolic, or ideological level.[21]

---

[19] John Lyons, *Semantics* (2 vols.; Cambridge: Cambridge University Press, 1977), 1:217: "By didactic nomination we mean teaching someone, whether formally or informally, that a particular name is associated by an already-existing convention with a particular person, object, or place."

[20] Ibid., 220: "The descriptive backing of a name may serve as the basis for the use of the name predicatively in such sentences as 'He is no Cicero.'"

Textual level	“The Wicked Priest”	A textual expression, between the lemma and the exegesis
Symbolic level	“The Wicked Priest”	An evaluation, “bad,” “wicked,” the enemy of the righteous community
Historical level	“The Wicked Priest”	A reference to a Hasmonean high priest (or priesthood)

THE WICKED PRIEST IN THE PESHARIM

The designation “the Wicked Priest” occurs nine times in the 1QpHab and once in 4QpNah.[22] The first mention of the Wicked Priest is in 1QpHab 1.13, but only as a conjecture since the right part of the first column is missing. But the presumed lemma cited in line 12 from Hab 1:4 contains the words רשׁע . . . צדק in the MT. In the exegesis, the Righteous Teacher is clearly mentioned in line 13, so it is not unlikely that the Wicked Priest should also be mentioned here, together with the Teacher.[23] They are mentioned together in other passages such as 1QpHab 9.9–10; 11.4–5. No further information could be extracted from this passage.

The other 1QpHab occurrences of הכוהן הרשׁע are in 8.8; 9.9; 11.4; 12.2; 12.8. From the end of column 8, there are three instances, 8.16; 9.16 (emendation); and 11.12, where only the noun הכוהן is mentioned. Now, the question is whether הכוהן is a short form for הכוהן הרשׁע; do these two designations refer to the same identity? I suggest that they do. These designations are not used arbitrarily; instead, the mentioning of “the Priest” without the adjective is “sandwiched” in between appearances of the term “the Wicked Priest” as follows:[24]

---

[21] I have taken this model from Kari Syreeni’s “three-world model,” in “Separation and Identity: Aspects of the Symbolic World of Matt 6:1–18, ” *NTS* 40 (1994): 522–41, esp. 522–23.

[22] The title “the Priest” occurs three times (once as an emendation 1QpHab 9.16), and the full title “the Wicked Priest” occurs six times.

[23] Elliger, Habermann, and Lohse support this emendation.

[24] In all passages except the last one, the sobriquet stands absolute, after the פשרו פשר / הדבר as the direct reference to the lemma just quoted.

"The Wicked Priest," 8.8

"The Priest," 8.16

"The Wicked Priest," 9.9

"The [Priest]," 9.16

(New object of interpretation: "the Spouter of Lies," 10.9)

"The Wicked Priest," 11.4

"The Priest," 11.12

"The Wicked Priest," 12.2

Plus "The Wicked Priest," 12.8 (in a relative clause connected to "the city")

There seem to be two chains of interpretation concerning the Wicked Priest, the first starting in 8.8 and the second in 11.4. The easiest way to understand the interchange of the two designations is to look upon הכוהן as referring back to הכוהן הרשׁע. In this context, "the Priest" could be no one except the wicked one.

The question of whether the sobriquet "the Wicked Priest" refers to the same historic person in all passages above or not is a matter of concern.[25] My presumption will be that they do refer to the same person, a matter later to be argued.

1QpHab 8.3–13, with Commentary on Hab 2:5–6

> Interpreted, this concerns the Wicked Priest, who was called by the name of truth when he first arose. But when he ruled over Israel his heart became proud, and he forsook God and betrayed the precepts for the sake of riches. He robbed and amassed the riches of the men of violence who rebelled against God, and he took the wealth of the peoples, heaping his sinful iniquity upon himself. And he lived in the ways of abominations amidst every unclean defilement.[26]

This exegesis of Hab 2:5–6 breathes of disappointment. In the beginning of his public career the Wicked Priest was an honest character. Later, his moral qualities deteriorated. In what way is he said to be honest?

Some Hebrew expressions are difficult to understand. There are at least two difficult phrases. The first instance is נקרא על שׁם האמת, "who was called by the name of truth." How should this phrase be understood in relation to the Wicked Priest? Brownlee records nine possible ways to understand the phrase.[27] The two most probable suggestions are these: (1) "Had a name for being true, or faithful." Van der Ploeg, van der Woude, and Cross support the general idea of this translation.[28] (2) "Called by the right, or true title." Both Carmignac and Elliger suggest this translation.[29] Horgan accepts both interpretations.[30] The first suggestion would fit well into the context since the purpose of the commentary is to draw a picture of a character who in the beginning of his office had a good reputation, but later was ensnared in the toils of power and riches. The second possibility is more tempting, though. There is a possibility that "called by the true title" could allude to the background of the sobriquet at hand. The Hebrew designation for high priest is הכוהן הראשׁ and with a slight alteration it becomes הכוהן הרשׁע.[31] Elliger says that since the word אמת in this passage lacks any theological meaning, it is quite probable that the whole phrase alludes to this wordplay.[32] Further, a clause from the Habakkuk text describes a situation where a person is mocked by the chanting of a משׁל, "parable," "riddle."[33] This passage in Habakkuk makes good sense for the assumed allusion to the wordplay הכוהן הרשׁע–הכוהן הראשׁ in the commentary.

---

[25] The adherents to the Groningen hypothesis raise this question.

[26] The translation quoted in the following passages is from Géza Vermes, *The Dead Sea Scrolls in English* (4th ed.; Baltimore: Penguin, 1995).

The other problematic phrase is משׁל בישׂראל, or, rather, the word משׁל again. Elliger suggests that the verb משׁל is a technical term for the possession of priesthood in postexilic times.[34] A parallel use of משׁל is found in 1QS 9.7, where the verb is used in the rule of sons of Aaron. Many commentators want to see a clear distinction between two periods in the life of the Wicked Priest. "When he first arose" indicates the good period, "but when he ruled…" his moral status deteriorated.

Undoubtedly, the further description of his deeds is clearer, when it is said that he "betrayed the precepts." The verb used here is בגד, "betray."[35]

---

[27] Brownlee, *The Midrash Pesher*, 134–37.

[28] Cross suggests reading "was called by a trustworthy name," and Gaster has a similar interpretation: "enjoyed a reputation for truth."

[29] Karl Elliger, *Studien zum Habakuk-Kommentar vom Toten Meer* (BHT 15; Tübingen: Mohr Siebeck, 1953), 197: "…er berufen wurde unter dem rechten Namen."

[30] Horgan, *Pesharim*, 41.

[31] Helmer Ringgren, *The Faith of Qumran: Theology of the Dead Sea Scrolls* (ed. J. H. Charlesworth; trans. Emilie T. Sander; New York: Crossroad, 1995), 35.

[32] Elliger, *Studien zum Habakuk-Kommentar*, 198.

[33] משׁל is a root of many meanings. Here we likely prefer the noun with the meaning of "riddle," "parable."

[34] Elliger, *Studien zum Habakuk-Kommentar*, 198–99.

[35] Also mentioned in the lemma cited from Habakkuk: "Moreover riches will betray (יבגוד) the arrogant man." But MT is probably corrupt here, and other translations are possible.

Earlier the *Habakkuk Pesher* mentions a group of “unfaithful,” or “traitors” (הבגדים, in 2.1). The Wicked Priest is described in the past tense[36] as a traitor (8.10). Apart from betraying the precepts (of God), he has robbed riches from his opponents and lived in abomination and defilement.

Conclusion for 1QpHab 8.3–13

The person referred to in the commentary as “the Wicked Priest” is a contradiction in terms. He is a priest, but an evil one. A priest is not supposed to be evil.[37] He is not to rob riches and live in defilement. Moreover, I would consider the possibility that “who was called by the name of truth” alludes to the wordplay of the sobriquet הכוהן הרשע, compared to the proper title הכוהן הראש. In other words, this is not a person to be trusted!

1QpHab 8.13–9.3, with Commentary on Hab 2:7–8a

> [Interpreted this concerns] the Priest who rebelled [and violated] the precepts [of God…to command] his chastisement by means of the judgments of wickedness. And they inflicted horrors of evil diseases and took vengeance upon his body of flesh. And as for that which He said, (quote Hab 2:8a), interpreted this concerns the last Priests of Jerusalem, who shall amass money and wealth by plundering the peoples. But in the last days, their riches and booty shall be delivered into the hands of the army of the Kittim…

In this passage, the Priest is not attributed with the adjective “wicked,” but nevertheless he is. He rebelled against God, an action already mentioned in 8.13 (מרד). Although the end of column 8 is badly damaged, the general theme of this passage is vengeance. But the description of the vengeance is somewhat unclear. The formal subject for “they inflicted horrors of evil diseases…upon his body of flesh” is unclear. A qualified assumption will supply the subject from an emendation of the end of column 8. Brownlee suggests that some pain-afflicting angels attack the Wicked Priest.[38] Nevertheless, the Priest is inflicted with some bodily disease, a punishment worthy of a wicked person. The torment is described in the past tense (רעיהם עשׂו בו), but here the text does not mention the final defeat or death of the Priest.

---

[36] The emending of [וי]בגוד is very probable.

[37] See the Levitical rules in Leviticus 6 and 21, especially the ordinances for atonement for the priest and the ruler in ch. 4.

[38] Brownlee, *The Midrash Pesher*, 145.

In the last part of this section, another priestly category is mentioned: "the last Priests of Jerusalem." The deeds attributed to the last priests of Jerusalem are about the same as were attributed to the Wicked Priest above–they unjustly gather wealth and booty. Moreover, it is stated that the iniquities of the last Priests will be punished. In the last days, they will be delivered into the hands of the Kittim (ינתן . . . ביד . . . הכתיאים). The verb form is imperfect, so their destiny is not yet completed.

One of van der Woude's arguments for seeing a plurality in the concept of "the Wicked Priest" concerns this passage.[39] Van der Woude makes a good argument for the fact that "the last Priests of Jerusalem" probably refers to the high priests in Jerusalem, meaning the Hasmonean rulers, since no others would have been in the position to do such a thing. The text mentions a "last Priest who shall stretch out his hand to strike Ephraim" in 4QpHos^b.[40] Because of the allusion to "a lion to Ephraim and a young lion in the house of Judah" in Hos 5:14a, van der Woude connects this with the sobriquet "the Lion of wrath" in the *Nahum Pesher* (4Q169 frags. 3–4 1.6–8) and identifies it with Alexander Jannaeus. Consequently, "the Lion of wrath" and "the last Priest" is the same person, according to van der Woude. According to his argument, it would be natural to infer that the last Priests of Jerusalem are "the last wicked Priests."

The arguments above rest on the assumptions that

1. "the Lion of wrath" in *Nahum Pesher* is Alexander Janneus,"[41]
2. "the last Priest" in 4pHos^b is connected with the sobriquet "the Lion of wrath," and
3. these writers of the pesharim actually knew that Alexander Jannaeus was the last priest.

In my judgment, these designations of the last Priests express more of a vengeful attitude of "may these be the last of the infidels." Fixed chronological sequences play a secondary role here, I believe. Van der Woude's arguments might be somewhat overly elaborate, and in fact too good to be true, considering the semantic level of these texts. Why should the writer make use of different designations if in fact he is deliberately referring to the same person or entity?

---

[39] Van der Woude, "Wicked Priest or Wicked Priests?" 352.

[40] 4QpHos^b (4Q167) frag. 2 line 3.

[41] This is likely since he dealt cruelly with the Pharisees, concealed under the sobriquet "Seekers of smooth things," a matter probably alluded to in *Nahum Pesher* (4Q169 frags. 3–4 1.6–8).

Conclusion for 1QpHab 8.13–9.3

Again, the description of the Priest as a traitor to the godly precepts fits the connotations of the sobriquet "the Wicked Priest" very well. Moreover, a new theme is introduced here: vengeance. The first part of the vengeance, bodily affliction, is described as a fact that has already happened. I prefer to see "the Last Priests of Jerusalem" as a collective sobriquet for the ruling priestly class in Jerusalem. They also commit abominable deeds, but when the commentary was written, they were "still alive and kicking," and vengeance had not yet reached them; thus, the implications of these descriptions are mostly ideological.

1QpHab 9.7–12, Commentary on Hab 2:8a

> Interpreted, this concerns the Wicked Priest whom God delivered into the hands of his enemies because of the iniquity committed against the Righteous Teacher and the men of his Council, that he might be humbled by means of a destroying scourge, in bitterness of soul, because he had done wickedness to His elect.

Here the interpretation begins with an assertion that God has delivered the Wicked Priest into the hands of the enemies, and this retaliation was due to the fact that the Wicked Priest offended the Righteous Teacher and the men of his council. Likewise, the interpretation closes with the expectation of an imminent revenge upon the Priest. The divine revenge is expressed in the perfect form, נתנו אל, "God gave him," but the imminent punishment is expressed with infinitive לענותו, "to humble him," and has no temporal meaning in itself. Still, some translations prefer to see the humbling in the future;[42] others connect it with the perfect form in 9.10.[43]

I find it quite likely that the Wicked Priest was inflicted with some physical misfortune, although his death, his final humiliation, had not yet occurred. The author of the pesher expresses this notion with the Hebrew perfect form, assuring the reader that God has already begun his retaliation against the Wicked Priest. But since the Priest probably is still alive, the final punishment is yet to be expected. This assumption of mine is supported by the following passages, where the retaliation is expressed as a future concept.

---

[42] See Brownlee, *The Midrash Pesher*, 153; Eduard Lohse, *Die Texte aus Qumran: Hebräisch und Deutsch* (Munich: Kösel, 1964), 239.

[43] See Horgan, *Pesharim*, 18.

Conclusion for 1QpHab 9.7–11

In this passage an unjust act done against the Righteous Teacher is alluded to. And, of course, since an act like this against "the righteous in the community" cannot be tolerated, vengeance must be assured.

1QpHab 9.12–10.1, Commentary on Hab 2:9–11

> [Interpreted, this] concerns the [Priest] who…that its stones might be laid in oppression and the beam of its woodwork in robbery. And as for which He said (quote Hab 2:10b), interpreted this concerns the condemned House whose judgment God will pronounce in the midst of many peoples. He will bring him thence for judgment and will declare him guilty in the midst of them, and will chastise him with fire of brimstone.

The next passage is severely damaged at the beginning of column 10. Nevertheless, the interpretation first deals with an elaboration of the metaphor in the cited lemma in Hab 2:11, of the crying stone and the answering beam. The interpretation implies the picture of a building in which the stones and a beam suffer under oppression and robbery. After repeating a lemma from verse 10b, the judgment theme is taken up again. The text makes a reference (unclear for us) to בית המשׁפט, "the house of judgment, or justice." Later, a pronoun in third person (sing. masc.) appears: יעלנו, "he (God) will bring him (?)." If the pronoun refers to the Priest, then again, it alludes to the future condemnation.

Conclusion for 1QpHab 9.12–10.1

I suggest that 10.4–5 implies the condemnation of the Wicked Priest. Moreover, this time the condemnation is thought of in future terms; the message is that "justice has not yet been done, but it is on its way!"

1QpHab 11.2–8, Commentary on Hab 2:15

> Interpreted, this concerns the Wicked Priest who pursued the Righteous Teacher to the house of his exile that he might confuse him with his venomous fury. And at the time appointed for rest, for the Day of Atonement, he appeared before them to confuse them, and to cause them to stumble on the Day of Fasting, their Sabbath of repose.

Here 11.4 takes up the second chain of interpretation concerning the Wicked Priest. In the next two passages, the Priest and his abominable acts and qualities are in focus. The thematic features are much the same as above. The last passage (col. 12) where the Wicked Priest is mentioned is very peculiar. It seems to be an allegorical elaboration of Hab 2:17, mixed with the ordinary "pesheristic" way of interpreting.

In the section of 11.4–8, we for the first time meet a description of a confrontation between the Wicked Priest and the Righteous Teacher. The Wicked Priest is said to have persecuted the Righteous Teacher at the latter's abode. Moreover, the Wicked Priest confronted the Righteous Teacher and his followers on the very day of Yom ha-Kippurim, the most solemn day in the Jewish calendar. These actions are all in the perfect tense.[44] Moreover, the purpose behind the persecution and the confrontation is to cause harm and disorder; לבלעו "in order to swallow him up," לבלעם ולכשׁילם[45]: "in order to swallow them up and to make them stumble." There is no mention of whether this terror was successful.

Further, there is at least one difficult reading that requires comment: אבית גלותו. The reading of an א before בית is uncommon, if the expression is supposed to be a noun with a preposition "to the house." If not regarded as a scribal error, there is an analogy of using א as a preposition in popular rabbinic Hebrew. This use was even supported by the *Beth Mashko* document found in Wadi Murabbaʿat (*Beit-Mashiko*; Mur 42).[46] Subsequently, the translation "to the house" is possible.

How, then, is the word גלותו to be understood? If understood as a verb, two meanings are possible: "go into exile" (*qal* inf.) or "to uncover" (*piʿēl* inf.). Another possibility is to understand it as a noun, "his exile," and this is the translation commonly preferred.[47]

Undoubtedly, this passage is one of the most crucial ones concerning the reconstruction of the history of the Qumran community. Here the assumption is that the *Habakkuk Pesher* records an episode where two opponents met and the Righteous Teacher was humiliated. Considering the presupposition that the Teacher himself was a priest, this is a meeting of two men of rank. In the pesher to Psalm 37 (4Q171) 3.15, the Righteous Teacher stands in apposition to the title הכוהן, and both titles obviously refer to the same person:

> פּשׁרו על הכוהן מורה ה[צדק].[48]

---

[44] רדף, "he followed him" … הופע (*hiphʿil*), "and appeared."

[45] In the reading ולכשׁילם, the ה is missing for ולהכשׁילם.

[46] Brownlee, *The Midrash Pesher*, 182.

[47] Ibid., 182.

[48] Another reference to the Righteous Teacher, designated הכוהן, is probably found in 4QpPs^a (4Q171) 2.18–19 on Ps 37:14–15.

The positive allusions to the title הכוהן here make it impossible to interpret these instances as referring to the Wicked Priest.[49]

The confrontation between the two priests on Yom ha-Kippurim suggests further implications. Since a priest was expected to fulfill the priestly obligations on the Day of Atonement, both of them were, so to speak, out of place. The Righteous Teacher had obviously withdrawn to somewhere away from Jerusalem, and he and his companions were supposed to celebrate Yom ha-Kippurim (שבת מנוחתם, "Sabbath of their repose") at their place of resort. It can be inferred from this passage that the Wicked Priest was not due to celebrate the Day of Atonement on this particular occasion. Consequently, the Wicked Priest must have followed a different calendar.[50] This conclusion is supported by other documents in the Qumran texts. In the fragments of *Jubilees* and in *1 Enoch* found at Qumran, a solar calendar of 364 days is presupposed.[51] Furthermore, this calendar issue may be one of the reasons for the hostility between these two parties.[52]

It appears that the Wicked Priest was successful in his disturbance on Yom ha-Kippurim. The first part of the lemma, cited from Hab 2:15, reads "Woe to him who causes his neighbors to drink" (1QpHab 11.2). This could well be an allusion to the fact that the party of the Righteous Teacher was forced to break the fast on Yom ha-Kippurim.[53] At least this might be the idea that the writer had in mind when he combined Hab 2:15 with the stumbling of the Righteous Teacher's party on the Day of Atonement. Notably, it is not stated anywhere that the Wicked Priest specifically violated the Torah on this occasion; instead, the infliction fell upon the Righteous Teacher and his adherents.[54]

Conclusion for 1QpHab 11.2–8

Beyond doubt, in this passage a strong indignation is expressed toward the Wicked Priest for disturbing the celebration on Yom ha-Kippurim. As in the other passages above, he qualifies as "the Wicked Priest," both because of his deeds and his qualities. Moreover, if the interpretation of the disturbing appearance on Yom ha-Kippurim caused the Righteous Teacher's adherents to break the fast, the iniquity of the Wicked Priest is considered to be beyond measure. Unsurprisingly, the following passage deals with this feature.

---

[49] Here the textual context decides which reference this particular sobriquet should have.

[50] Shemaryahu Talmon, "Yom Hakippurim in the Habakkuk Scroll," Biblica 32 (1951): 549–63; repr. in idem, *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 186–89.

[51] James C. VanderKam, *The Dead Sea Scrolls Today* (Grand Rapids: Eerdmans, 1994), 114.

[52] Depending on how the document 4QMMT (= 4Q394–399) is regarded, it may be evidence for an early converging view upon calendrical issues.

[53] Talmon, "Yom Hakkippurim," 190.

[54] Ibid., 189.

1QpHab 11.8–15, Commentary on Hab 2:16

> Interpreted, this concerns the Priest whose ignominy was greater than his glory. For he did not circumcise the foreskin of his heart, and he walked in the ways of drunkenness that he might quench his thirst. But the cup of the wrath of God shall confuse him, multiplying his…and the pain of…

The first observation made to this passage is the existence of a *Stichwort* between the Habakkuk text and the commentary: קלון, "ignominy." In the lemma, someone is said to have filled himself with "ignominy more than with glory" (Hab 2:16a). The same is said about the Priest, "whose ignominy was greater than his glory" (1QpHab 11.12). Moreover, the concept of drinking and drunkenness makes a connection between the text and the interpretation,[55] and so does the cup of the Lord (Hab 2:16b) and the cup of wrath of God (1QpHab 11.14).

The focus of interest in the commentary is again the bad character of the Priest, described here, inter alia, with a metaphor: "He did not circumcise the foreskin of his heart." This metaphor is known from the OT[56] and is used in connection with repentance of the Israelites and turning away from a sinful life. An uncircumcised heart stands in the way of God.

By mentioning the cup of the Lord, another OT metaphor,[57] the theme of vengeance is once again taken up. The wrath of the Lord will engulf the Wicked Priest, a fact not yet accomplished.

It is a matter of dispute whether or not the allusions to the Priest's drunkenness (11.13–14) should be taken literally.[58] They might as well be interpreted on the same level as the accusations of the uncircumcised heart: these are evil qualities attributed to "the wicked." But if the drunkenness is taken as a historical allusion, two suitable candidates are to be found in Alexander Jannaeus and Simon Maccabaeus.[59] It is known that illness caused by excessive drinking afflicted Alexander Jannaeus. The relevant passage is to be found in Josephus, *Ant* 13.398. Still another notorious drinker, Simon Maccabaeus, is known from 1 Macc 16:16. Of course, it could be argued whether it is really possible to conclude that these persons actually were known as heavy drinkers, based only on this fragmentary material.

---

[55] Between Hab 2:16, שׁתה גם אתה והרעל, and the interpretation: וילך דרכי הרויה למען ספות הצמאה.

[56] Lev 26:41; Deut 10:16; 30:6, Jer 4:4; 9:26; and Ezek 44:9. In the NT the metaphor is used in Acts 7:51.

[57] Isa 51:17, 22.

[58] Brownlee, *The Midrash Pesher*, 194.

Nevertheless, the problem hinted above is symptomatic for the discussion of the historical identifications of the Qumranic sobriquets. An allusion in the pesher texts is fitted into other historical material available, generally from Josephus and 1–2 Maccabees. The implications to be discussed are more or less plausible theories, but still we have to take into account that the evidence is fragile. Above all, I consider it quite unlikely that diversities in the allusions in the exegesis should be taken as evidence for a plural notion of the Wicked Priest.[60]

Conclusion for 1QpHab 11.8–15

In sum, the allusions made to the Priest in this passage reinforce the notion of the Priest as an evil character. But the clauses "his ignominy was greater than his glory" and "he did not circumcise the foreskin of his heart" show, as the passage "he was called by the name of truth" in 8.9 does, that the Priest in an earlier period had a better reputation. Further, the mention of divine retaliation in the imperfect tense[61] makes it a strong possibility that his destiny is not sealed.

1QpHab 11.16–12.10, Commentary on Hab 2:17

> Interpreted, this saying concerns the Wicked Priest, inasmuch as he shall be paid the reward, which he himself tendered, to the Poor. For Lebanon is the Council of the Community; and the beasts are the simple of Judah who keep the Law. As he himself plotted the destruction of the Poor, so

---

[59] Ibid., 195.

[60] Representatives for a plural notion are van der Woude, "Wicked Priest or Wicked Priests?" and Igor R. Tantlevskij, *The Two Wicked Priests in the Qumran Commentary of Habakkuk* (Kraków: Enigma, 1995).

[61] תבלענו, "shall confuse him." The same root, בלע, was used in relation to the Wicked Priest's terror against the Righteous Teacher and his followers in 11.5, 7.

> will God condemn him to destruction. And as for that which He said, Because of the blood of the city and the violence done to the land: interpreted, the city is Jerusalem, where the Wicked Priest committed abominable deeds and defiled the Temple of God. The violence done to the land: these are the cities of Judah where he robbed the Poor of their possessions.

This passage continues the unfavorable description of the Wicked Priest. In the first statement, a reassurance of the Priest's retaliation is made. He has done wrong to the Poor (אביונים). It has been discussed whether "the Poor" could be a self-designation for the Qumran community; for example, in the *War Scroll*, "the Sons of Light" are called אביונים.[62] The following allegorical interpretation focuses on different words and phrases in the lemma and applies them to the community and its adherents. "For Lebanon (הלבנון) is the Council of the Community; and the beasts (הבהמות) are the simple of Judah who keep the Law." At first glance, these applications certainly look arbitrary. They do not follow the earlier pattern in which there was correspondence in thought, theme, or etymological root between the lemma and interpretation.[63] Many different theories have been suggested to solve this enigma. Is the etymological root לבן alluded to because the community wore white garments? In two passages, Josephus clearly states that the Essenes did so.[64] Or is הלבנון a "cryptogram" for the temple, and, since the community considered itself as a sacred building, does the temple allusion apply to the community?[65]

Here I can only hint at some of the different suggestions. Still, our analysis presents the main point: the exegesis hints that the community has been subjected to pressure and perhaps even persecution, and that this shall be vindicated. Whether the vindication lies in the future or not is difficult to discern here. In the first mention of vindication, the לשלם ("to repay him") has no tense attached to it, but in the second instance, ישופטנו אל לכלה ("God condemned him to destruction"), the imperfect could be translated as future tense.

Further, with the second lemma recited from the Habakkuk text, two additional allegorical implications are made. "The city is Jerusalem" and "The violence done to the land: these are the cities of Judah." Once again, the focus is not specifically on the allegory itself. The Wicked Priest is said to have committed terrible deeds in Jerusalem and even defiled the temple! In addition to that, he robbed the poor of their possessions in the cities of Judah. Here the text mentions two geographical names: Jerusalem and Judah. There is no need to assume that these would be part of the cryptic language. Still, the symbolical value of "Jerusalem" and the mention of the defilement of the temple cannot be underestimated. A priest who defiled the temple in Jerusalem is wicked indeed!

---

[62] 1QM 11.9, 13; 13.13–14. Brownlee, *The Midrash Pesher*, 198.

[63] Horgan, *Pesharim*, 244–45.

[64] Josephus, *J.W.* 2.123.

[65] Holding this view are both Geza Vermes, "The Symbolical Interpretation of Lebanon in the Targums: The Origin and Development of an Exegetical Tradition," *JTS* 9 (1958): 1–12; and Bertil E. Gärtner, *The Temple and the Community in Qumran and the New Testament: A Comparative Study in the Temple Symbolism of the Qumran Texts and the New Testament* (Cambridge: Cambridge University Press, 1965).

Conclusion for 1QpHab 11.16–12.10

Taken together, the lemma, the Wicked Priest, and the allegory say that even though terrible misdeeds from the Wicked Priest have afflicted the community and its adherents, God will punish the Priest. The question is, has the revenge already taken place, or is it to come? This issue repeatedly comes up. My preliminary suggestion would be, as already said, that some disease had afflicted the Priest, but his death had not yet occurred when the *Habakkuk Pesher* was written. As van der Woude argues, it is disputable whether passages using the perfect tense for the vindication of the Wicked Priest must be understood separately from the future passages, mainly in columns 11–12.[66]

It has, of course, been suggested that these vindication statements could be seen as *vaticinia ex eventu*. On the other hand, it is reasonable to assume that if the original author had the one and living Wicked Priest in mind and his final defeat had not yet occurred, he would have used the imperfect tense for his coming vindication. This does not exclude the fact that these utterances could have been interpreted as prophetic words for readers to follow in the community.

4QpPsa (4Q171) 4.7–10, Commentary on Ps 37:32–33

> Interpreted, this concerns the Wicked [Priest] who [watched the Righteous Teacher] that he might put him to death [because of the ordinance] and the law which he sent to him. But God will not aban[don him and will not let him be condemned when he is] tried. And [God] will pay him his reward by delivering him into the hand of the violent of the nations, that they may execute upon him [judgment].

---

[66] Van der Woude, "Wicked Priest or Wicked Priests?" 351.

This last passage to be discussed in the pesharim is badly damaged. The translation of Vermes (above) is based on two rather daring conjectures. First of all, the conjecture that מורה is understood as coming before הצד[יק] (4.8) This is impossible, as the emendations of Allegro and Lohse show for 4.8. Anyway, the Wicked Priest watched a righteous person. That is all that possibly can be inferred here. The other emendation, though more plausible, would, so to speak, overrule the objections to Vermes's first reading.[67] The text is damaged before the word והתורה, and only an uncertain *tāw* can be discerned at the end of 4.8. The emendation must then be a qualified guess. If a word like "precept" (הוק) is presupposed, it is intriguing because then this passage could be an allusion to the *Halakic Letter*, 4QMMT (= 4Q394–399).[68]

Anyhow, this passage does not give any further information that is not given in 1QpHab. The triad the Wicked Priest, the Liar, and the Righteous Teacher is present in the *Psalms Pesher* to Psalm 37, as in the *Habakkuk Pesher*.[69] The Wicked Priest and the Liar are opponents of the Righteous Teacher. In this passage the description of the Wicked Priest is very much in the same line as in 1QpHab 9.7–11, which says he acted in a hostile manner toward the community, but eventually he will receive retaliation from God. The punishment is more detailed in this passage: the Wicked Priest will be given into the violent hand of the Gentiles, a description quite similar to 1QpHab 9.7.

Conclusion for 4QpPs^a 4.7–10 on Ps 37:32–33

It seems that the unfavorable picture of the Wicked Priest is also reflected in the *Psalms Pesher* to Psalm 37. The overall picture given in 4QpPs^a (4Q171) 4.7–10 does not contradict the description given of the Wicked Priest in 1QpHab.

---

[67] If precept (חוק) is meant, it may still refer to the *Halakic Letter*, 4QMMT, presumably sent by the Righteous Teacher.

[68] Elisha Qimron, "Miqṣat Maʿase HaTorah." *ABD* 4:843–45 (esp. 844).

[69] *Psalms Pesher^a* (4Q171): "The Wicked Priest," 4.8; "The Liar," 1.26; 4.14; "The Righteous Teacher," 3.15; 4.26. *Habakkuk Pesher* (1QpHab): "The Wicked Priest," 8.8–9 et passim; "The Liar/Spouter of Lies," 2.1–2 et passim; "The Righteous Teacher," 1.13 et passim.

General Observations

- Taken as a whole, the passages describing the Wicked Priest give a more or less coherent picture of a once-trustworthy character who turned into a villain.
- There is a general emphasis on evil deeds and the wicked character. Retaliation is yet to be fulfilled. Some of these descriptions come close to similar features in, for example, the book of Revelation. They are close to a typological description of "the wicked."
- There is no mention of triumphant victory or justice shaped on the behalf of the Righteous Teacher. Some of these passages where vengeance is still expected might be written in order to reassure the community of an imminent justification.

Conclusions and Implications

The sobriquet "the Wicked Priest" is used (1) as a presentation and (2) as a counterpart to the Righteous Teacher. The designation "the Priest" is used in a passage that follows one in which "the Wicked Priest" is mentioned and thus is a short form for "the Wicked Priest." I suggest that we must consider "the Wicked Priest"/"the Priest" as individual personal sobriquets.

Further, several passages allude to a conflict between the Wicked Priest and the Righteous Teacher. Most likely, the Wicked Priest is described in unfavorable terms because he has been a real threat to the community.

SYNAGOGUE OF SATAN AND THE WOMAN JEZEBEL IN REVELATION 2–3

Occurrences of personal sobriquets can also be found in the Letters to the Seven Churches in Asia Minor. Mixed among other unfavorable references to enemies and notions connected with them, two designations are quite similar to some of the sobriquets found in the pesharim, namely, "a synagogue of Satan" (συναγωγὴ τοῦ σατανᾶ, Rev 2:9; 3:9) and "the woman Jezebel" (τὴν γυναῖκα Ἰεζάβελ, 2:20). I will deal with them here.

The Letters to the Seven Churches mention other "cryptograms": "Those who claim to be apostles but are not, and have found them to be false" (τοὺς λέγοντας ἑαυτοὺς ἀποστόλους καὶ οὐκ εἰσίν, Rev 2:2), "the works/the teaching of the Nicolaitans" (τὰ ἔργα τὴν διδαχὴν τῶν Νικολαιτῶν, Rev 2:6, 15), and "the teaching of Balaam" (τὴν διδαχὴν Βαλαάμ, Rev 2:14).

"A synagogue of Satan" occurs in the letter to Smyrna and the one to Laodicea, and "the woman Jezebel" in the letter to Thyatira. Without doubt, these designations are meant to be disparaging. Moreover, in both are biblical phrases and names ("Satan" and "Jezebel"). The context in which these are used is highly polemical. The text uses the epistolary form to bring forth an authoritative message.

Synagogue of Satan

The church in Smyrna had, according to the first passage (2:9–10) below, been subjected to abuse from this community called "synagogue of Satan," which is a collective specific sobriquet, designating a group. In the second passage (3:9), the existence of a "synagogue of Satan" is not implied in the town of Philadelphia; rather, they are understood as coming (ἥξουσιν) to the church in Philadelphia.

Rev 2:9–10

> [9]"I know your tribulation and your poverty (but you are rich) and the slander of those who say that they are Jews and are not, but are a synagogue of Satan. [10]Do not fear what you are about to suffer. Behold, the devil is about to throw some of you into prison, that you may be tested, and for ten days you will have tribulation.[70]

Rev 3:9

> Behold, I will make those of the synagogue of Satan who say that they are Jews and are not, but lie–behold, I will make them come and bow down before your feet, and learn that I have loved you.

The designation "synagogue of Satan" seems to be connected with the phrase τῶν λεγόντων ἑαυτοὺς Ἰουδαίους εἶναι, καὶ οὐκ εἰσίν. This assurance is quite similar to the phrase in 2:2, "those who claim to be apostles but are not." In both instances these formulas imply that the designation given to these groups (by themselves or others) is misleading.

---

[70] Here and below, citing the Revised Standard Version.

But the question here is, what is meant by Ἰουδαίους in 2:9? Most commentators claim that this statement must be understood rhetorically. Some suggest that the legitimacy of the local Jewish community is put into question.[71] If so, then we must count Ἰουδαίοι as a positive designation, expressing the genuine heritage from Israelite times. In this case, the sobriquet "synagogue of Satan" would refer to the local Jewish community.

The second passage from the letter to Philadelphia says that "the synagogue of Satan" should bow down before the church in Philadelphia. This expresses the hope of a final defeat of "the synagogue of Satan." In my view, then, "the synagogue of Satan" was a real threat to the local church in Smyrna.

As stated above, the word "synagogue" makes it most probable that a community is referred to. It would then stand as a counterpart to the designation of the Christian community here: ἐκκλησία.[72]

Further, the appositional genitive τοῦ σατανᾶ gives a negative connotation to the synagogue. Examples of a positive variant, "the assembly of the Lord," συναγωγὴ τοῦ κυρίου τοῦ θεοῦ, can be found in the Septuagint, in Num 16:3; 20:4; 27:17; 31:16; et passim. The name "Satan" would, in a New Testament perspective, be understood as "the enemy."[73] In sum, "synagogue of Satan" in these passages is best interpreted as "the enemy's community."

Conclusion

The sobriquet "synagogue of Satan" is probably a designation used to refer to the local Jewish community in Thyatira: a group of people opposed to the church addressed. Since they are so utterly slandered, we assess the threat coming from "the synagogue of Satan" to be major.

The Woman Jezebel

When dealing with a female sobriquet, we should first recall some of the metaphors applied to women in a disparaging way in Revelation. In Rev

---

[71] See Bousset, Charles, et al.; from Adela Y. Collins, "The Apocalypse (Revelation)," *NJBC* (rev. ed., 1990), 996–1016, esp.§ 63.23–25.

[72] Hubert Frankenmölle's article, "συναγωγή," *EDNT* 3:294a.

[73] Otto Böcher's article, "σατανᾶς," *EDNT* 3:243; cf. the Greek equivalent ὁ διάβολος and the following passages: Mark 3:23, 26; Luke 22:3; and 2 Cor 12:7.

14:4, some male "virgins" are mentioned, and they are said not to have defiled themselves with women. Further, we have the harlot equated with Babylon, the wicked city, in chapters 17–18. In sum, evil women and defilement are two prominent themes in Revelation.

The name "Jezebel" comes from the stories about King Ahab and Jehu in 1–2 Kings. Jezebel was the princess from Tyre who married Ahab. She is infamous for her support of the cults of Baal and Asherah and for killing the prophets of Yahweh (1 Kgs 18:4, 13). Further, she plotted against Naboth, acquired his vineyard on Ahab's behalf, and finally she had Naboth killed (1 Kings 21). Last but not least, her violent death in Jehu's revolution–when she was thrown down from a window, run over by Jehu's chariot, and her corpse left for the dogs (2 Kgs 9:30–37)–is the typical death for a wicked person.

Moreover, 2 Kgs 9:22 describes her deeds, especially her support for the Canaanite gods, as "whoredoms and sorceries" (לנוני איזבל .... וכשׁפיה). The concept of whoredom (זנות) is taken up in the letter to the church in Thyatira: "to practice immorality (πορνεῦσαι)."[74] In short, Jezebel is the quintessential evil woman in the Hebrew Bible. In fact, outside the Bible she is only rarely mentioned in Jewish writings.[75]

Rev 2:20–23

> [20]But I have this against you, that you tolerate the woman Jezebel, who calls herself a prophetess and is teaching and beguiling my servants to practice immorality and to eat food sacrificed to idols. [21]I gave her time to repent, but she refuses to repent of her immorality. [22]Behold, I will throw her on a sickbed, and those who commit adultery with her I will throw into great tribulation, unless they repent of her doings; [23]and I will strike her children dead. And all the churches shall know that I am he who searches mind and heart, and I will give to each of you as your works deserve. (RSV)

In this passage, the sobriquet "Jezebel" probably refers to a prophetess in Thyatira. "Prophetess" is likely the designation others give to her, and 2:20 denies its suitability. The sobriquet here is individual and personal.

Her proper name is not used; instead, she is labeled with the sobriquet ἡ γυνὴ Ἰεζάβελ. I understand these constant denials as a struggle over authority. Collins sees a typological relationship implied here between a local Christian leader and "Jezebel."[76]

---

[74] Rev 2:20.

[75] Hugo Odeberg, "Ἰεζάβελ," *TDNT* 3:217–18, esp. 217.

[76] Collins, "The Apocalypse," §63.25

The actions attributed to the prophetess are almost copied from the story in 1–2 Kings: immoral acts and eating food connected with idolatry. Moreover, the accusations of immoral acts and improper food are the same ones leveled against the consequences of the trap made by Balaam in 2:14. A connection between these two is therefore not impossible.[77] But since she did not repent, she and her adherents will be inflicted with the punishment of sickness (2:21–22). Verse 23 keeps the metaphorical language and describes her followers as "children." In summation, the church should not tolerate this woman (2:20) because she is wicked and will be severely punished.

Conclusion

"The woman Jezebel" is indeed a vivid designation for a female opponent. With the background from 1-2 Kings, it becomes a very disparaging sobriquet. Moreover, the metaphorical language of harlotry is connected with the name "Jezebel." The text also attributes to her deeds described in a similar manner. It even suggests a forthcoming vindication. Finally, I suggest that this letter uses "the woman Jezebel" as a sobriquet for a successful and threatening opponent in the church in Thyatira. Again, it implies a struggle for power and authority.

SUMMARY

In sum, the polemical feature of these three sobriquets has implications above all on a symbolic or ideological level. The disparaging sobriquets and the wicked deeds attributed to these characters put into question any acceptable status for them. These texts draw a picture of the evil enemy. Moreover, the enemy poses a real threat to the communities addressed. The most serious threat and debate on authority are found in the passages in Revelation. The character of the Wicked Priest is really abominable, but he poses no immediate threat to the Qumran community.[78]

CHAPTER TEN

THE BIBLICAL AND QUMRANIC CONCEPT OF WAR

Philip R. Davies

Warfare in the Hebrew Bible

The extent of military discourse in the Hebrew Bible is not particularly surprising, for warfare constituted (and has constituted until quite recently) a major activity of the ruling classes. The extension of territory, protection of taxpaying peasants and of the assets of king and courtiers, and the diminution of the power of neighbors–all justified and guaranteed the existence of monarchy and of the individual monarch. Given that religion was an element of virtually all social and political behavior, it follows that deities were deeply implicated in the ideology of warfare. Gods often practiced warfare among themselves as well as offering military protection to their patron kings and peoples. In these respects, the Hebrew Bible accurately reflects the worldviews of the civilizations of the ancient Near East and of ancient Greece–indeed, of every ancient society.

That warfare was a means of conduct between the gods was taken for granted. Through warfare many creator gods were believed to have established their rule over the world, and only by military power could they sustain that rule. Heavenly governance mirrored earthly governance; gods were kings, and as kings, warfare was a major preoccupation. A monotheistic/syncretistic canon, the Hebrew Bible celebrates the monarchic rule of Yahweh over the entire earth, a rule that is exercised mainly through acts of war.

Warfare

A survey of war in the Hebrew Bible can be divided into two aspects: the human institution of war as a cultic or ritual act; and the depiction of the Deity as a warrior. These two aspects regularly overlap, for human warfare is often represented as being led by a divine commander or accompanied by divine troops. Heavenly and earthly activities are no more clearly distinguished in warfare than in any other aspect of life. We begin with a consideration of "holy war," which we define as warfare undertaken as a religious activity and thus associated with certain ritual practices and a religious ideology.

The Hebrew Bible contains descriptions of such an institution. Much of it belongs to what are called the "Deuteronomic" or "Deuteronomistic" books (Deuteronomy and the "Deuteronomistic History" of Joshua-Kings excluding Ruth); Deuteronomy 20 and 23 present blocks of rules for such warfare. Thus, Deuteronomy 20 prescribes that a priest will address the troops before battle, encouraging them not to fear, because their God is fighting for them (vv. 2–4); after this, appointed officers will permit those who have just built houses or planted a vineyard or married to leave, so that, if they die, their property (including the wife) will not pass to another (vv. 5–8). Then, the commanders of the army are appointed (v. 9).

The rest of the chapter deals mostly with the treatment of the enemy. When attacking cities that do *not* belong to those nations being displaced, Deuteronomy stipulates that if the inhabitants surrender, they are to be made subject, and if they resist, all males are to be slaughtered. The women, children, and livestock may be taken as property (20:10–15). But "as for the towns of these peoples that Yahweh your God is giving you as an inheritance, you must not let anything that breathes remain alive. You shall annihilate them—the Hittites and the Amorites, the Canaanites and the Perizzites, the Hivites and the Jebusites—just as Yahweh your God has commanded, so that they may not teach you to do all the abhorrent things that they do for their gods, and you thus sin against Yahweh your God" (vv. 16–18).[1] The remaining rules (vv. 19–20) require that trees bearing edible fruit should not be destroyed in the event of a long siege (so that the besieging army may eat during the operations). Other trees may be used for building ramps against the city.

In Deut 23:9–14, the regulations deal with the holiness of the military camp: every offensive thing must be removed; any warrior who has made himself ritually unclean through nocturnal emission of sperm must leave the camp and wash, returning the next day; and toilets must be outside the camp. The reason given for these regulations is that "Yahweh your God travels along with your camp, to save you and to hand over your enemies to you, therefore your camp must be holy, so that he may not see anything indecent among you, and turn away from you" (23:14

---

[1] All quotations from the Bible are taken from the NRSV, except for the substitution of "Yahweh" for "the LORD."

NRSV adapted). In both sets of legislation the overriding ideology is basically identical: the "ethnic cleansing" of Canaanites and camp rules guarantee the purity of the chosen nation and maintain its ties to its god.

The book of Joshua describes the fulfilling of these requirements as the Canaanites are exterminated by warfare and Israel occupies the land. But the necessity for internal discipline is also emphasized, as the family of Achan and his property is wiped out because of an infringement against the rule that booty taken from a war against Canaanites is the property of the deity (Joshua 7). But if, in Joshua, the deity fights for Israel, in Judges, he can fight also against them by means of military aggression from neighbors, when they are punished time and again for abandoning the deity to whom they have a treaty obligation. Yet these episodes are followed by acts of deliverance as Yahweh raises "judges," who time and again deliver Israel. These men are frequently imbued with the "spirit of Yahweh," while, in the case of Deborah, the battle is said to be fought by heavenly as well as earthly forces.

The image of a coordinated exercise of holy war by all Israel is largely displaced in Judges by two other important ideas: Yahweh uses other nations for a divine war against Israel when the latter abandons its treaty obligations; and Yahweh delivers Israel by using charismatic leaders, either through concerted military action (Gideon, Deborah, Jephthah) or through individual valor (Ehud, Samson). Yet Judges nevertheless ends with a "holy war," not against foreigners but against a single Israelite tribe (chs. 20–21). This civil war is waged under divine guidance, for twice, in 20:23 and 26–28, a divine oracle urges the Israelite tribes to attack. At last (20:35), "Yahweh defeated Benjamin before Israel," and finally (v. 48), "the Israelites turned back against the Benjaminites, and put them to the sword–the city, the people, the animals, and all that remained. Also the remaining towns they set on fire." The ideology and the rituals of holy war in the Old Testament can thus be used, as with Achan and Benjamin, as a mechanism of internal discipline.

The books of Samuel and Kings develop these two themes in several ways. The course of Israel's and Judah's military fortunes is governed by Yahweh, who continues to control foreign invasion as well as instigate deliverance from it. But the mechanism of charismatic leadership, explicit in the appointment of Saul–who like the judges is anointed to protect from enemies as well as to "judge" (1 Sam 8:20)–gives way to an institutionalized monarchy in which a Davidic dynasty is permanently favored. Throughout, there is no doubt that the deity is closely involved in the outcome of these battles, giving David an oracle (2 Sam 5:23–24), inciting Ahab to his death (1 Kings 22), and sending an angel to destroy a besieging Assyrian army (2 Kgs

19:35). Nevertheless, the conduct of war is the business of the dynastic kings, and the all-Israelite militia (which may include mercenaries, such as David's Cherethites and Pelethites, or Uriah the Hittite) replace the king's "servants."

Despite these changes in the presentation of Israelite and Judean warfare, it is perhaps true that Kings finally reinforces the Deuteronomic link of adherence to the treaty, land possession, and war, with the land once gained by military invasion being lost by military invasion. Nevertheless, the final note (2 Kgs 25:27–30) rests on the exiled king as symbol of national survival. The anointed king remains a central figure in biblical warfare and figures prominently (as an anointed war-leader) in speculations about the war to end all wars, when Yahweh will impose his solution for the world's problems.

Now we briefly look at non-Deuteronomistic material. The books of Chronicles, reflecting as they do a worldview colored by the temple priesthood and cult, offer in one chapter (2 Chronicles 20) a vision of warfare in which the king and the militia both play a thoroughly liturgical role. In this story (absent from Kings), Jehoshaphat summons not to war but to worship, and the people of Judah and Jerusalem gather, not to form a militia, but to pray and fast. The speech of encouragement is given by a Levite-cum-prophet, and the army, once assembled, marches out playing music; the enemy is defeated by divine power alone, and an outbreak of musical celebration ensues. This interesting episode exaggerates a theme that runs also throughout the Deuteronomistic history: it is Israel's god who fights its battles and determines its victories, even without human intervention.

In the prophetic books, war is again the major instrument by which the deity maintains moral order in history, through punishing or rescuing Israel, Judah, and other nations. In Ezekiel 38–39 and Zechariah (e.g., chs. 9–10) the idea of a divine order imposed by military force is taken to a (theo)logical conclusion by depicting an eschatological conflict in which God definitely vanquishes all his enemies and establishes world order finally forever. In Ezekiel, the motivation for this final assault is vindication of Yahweh's honor; in Zechariah, as in Obadiah and Nahum, the motif of vengeance also emerges quite prominently, and the ultimate victory over other nations is presented as a recompense for the suffering of the divinely chosen people at their hands. The issue of honor was always, of course, at the heart of warfare in the ancient Near East and in Greece—the honor of heroes, kings, and gods.

Neither the ideology nor practice of "holy war" died out in Judean history and literature. In 1 Maccabees, the Deuteronomic concept of war is invoked in the description of the battles of Judah (Maccabee). Whether such an ideology was in fact consciously revived by the Maccabees or is a literary embellishment of the pro-Hasmonean author of this history, it follows that the Hasmoneans were prepared to see their own dynasty and its exploits in terms of the scripturally recorded history of Israel and Judah. Indeed, since they had fought as defenders of an ancestral religion, it was appropriate that they should be seen to follow the scriptural rules of warfare. Thus, the events provoking the revolt are expressed in the Deuteronomic language of aggression from the "nations round about" (1 Macc 1:11; cf. 5:1), while the family of Mattathias is portrayed as being raised up by God, like the judges of old, to deliver Israel. Two army leaders, Joseph and Azariah, are defeated by the enemy because, "they did not belong to the family of those men through whom deliverance was given to Israel" (5:62). The rituals of Deuteronomic warfare are followed in the account of the assault on the city of Ephron (5:46–54), where the city, refusing to submit to Judah, is besieged and "delivered into his hands. He destroyed every male by the edge of the sword, and razed and plundered the town."

Were Israel and Judah, in fact, particularly militaristic states? Probably not, but the book of Numbers describes Israel as a martial society. According to the portrait given of the "wilderness period," the tribes of Israel wandered between Mount Sinai and the borders of Canaan as a campaigning army, counted (numbered) by means of a military-type census, camping in military formation, and waging war on all fronts. At the center of the camp stood the tent containing the treaty box ("ark of the covenant"), housed (like the military commander of a campaign) in a tent. This "ark," according to Num 10:35, seems to have been the totem of a warrior Deity: "Whenever the ark set out, Moses would say, 'Arise, Yahweh, let your enemies be scattered, and your foes flee before you.'" As with Joshua, there is also a warning against disobedience in the fate of Nadab and Abihu (Num 3:2, 4; 26:60–61) and insubordination in the case of Korah, Dathan, and Abiram (Numbers 16).

The idealization of Israel as a kind of Sparta may have some basis in history, though hardly in the fictitious wilderness period. (According to 1 Macc 12:1–23, the Hasmoneans claimed Sparta as an ancient ally). From the Assyrian period onward, Judeans were used as mercenaries: the Assyrians probably established the military colony at Elephantine in Egypt, letters from which date from the fifth century B.C.E., as a garrison in the seventh century. Jewish mercenaries were also widely used in the Greco-Roman period, and there were Jewish military garrisons in North Africa, Syria, and Asia Minor.[2] The success of the Hasmoneans may in part be due to a Judean culture that preserved a strong military character, and perhaps to the assistance of Jewish mercenaries.[3]

The Divine Warrior

A second important strand of war ideology in the Hebrew Bible is the depiction of Yahweh as a warrior, both a military commander and an individual combatant. It is to be expected that Yahweh, who in the Hebrew Bible is a composite of many different divinities (Elyon, El, Baal, Ahura Mazda), should have a strong military element in his characterization. Some have suggested that the most ancient cult of Yahweh worshipped him as a god of war who used natural phenomena such as rain, thunder, and earthquakes in his battles. Although this conclusion remains debated, the title *Yahweh Sebaoth* probably means "Yahweh of armies," and whether the armies in question are terrestrial or superterrestrial (or both) is not especially important. But various ingredients of Yahweh's military character need to be distinguished. He is a creator who vanquished a serpent/dragon at the time of creation (see Ps 74:14; Isa 51:9), in which respect he can be compared with myths featuring Baal or Marduk; he is also frequently celebrated as a king (e.g., Psalms 10, 24, 44, 47), and the importance of warfare to monarchy is obvious. Ezekiel's vision of the heavenly throne (ch. 1) depicts Yahweh as sitting on a chariot-throne, and chapter 10 describes the departure of the chariot from the city, as the protective deity abandons it to its fate. A remarkable confirmation of the image of Yahweh as a warrior is found on a coin from Persian period Yehud, showing the deity seated on a chariot. Though there remains some doubt, it is probable that the deity is Yahweh.[4]

But to return to the biblical imagery, two poems in particular, the Song of the Sea in Exodus 15 and the "Song of Deborah" in Judges 5, celebrate martial acts of the deity in liberating the people of Israel from their enemies. They also invoke mythological themes, in that Yahweh's enemies are not merely Israel's earthly foes but cosmic forces. In Exodus 15, with its introductory acclaim "Yahweh is a warrior," Yahweh destroys the Egyptian soldiers through wind and sea (vv. 8–12):

---

[3] According to Hecataeus of Abdera (300 B.C.E.), the Judeans gave their children a military education. For discussion, see Doron Mendels, "Hecataeus of Abdera and a Jewish 'patrios politeia,'" *ZAW* 95 (1983): 96–110.

[4] For the coin, see Yaʿakov Meshorer, *Ancient Jewish Coinage* (2 vols.; Dix Hills, NY: Amphora Books, 1982), 1:21–30 and plate 1.1.

> At the blast of your nostrils the waters piled up, the floods stood up in a heap; the depths congealed in the heart of the sea. The enemy said, "I will pursue, I will overtake, I will divide the spoil; my desire shall have its fill of them. I will draw my sword, my hand shall destroy them."
> You blew with your wind; the sea covered them; they sank like lead in the mighty waters.
> Who is like you, O Yahweh, among the gods? Who is like you, majestic in holiness, awesome in splendor, doing wonders?
> You stretched out your right hand, the earth swallowed them.

In Judges 5, Yahweh marches out from his home in the Sinai, accompanied by terrible manifestations, and the battle is joined by heavenly armies as well as earthly. Again, Yahweh uses the power of water to overwhelm the enemy (vv. 4–5, 19–21):

> Yahweh, when you went out from Seir, when you marched from the region of Edom, the earth trembled, and the heavens poured, the clouds indeed poured water. The mountains quaked before Yahweh, the One of Sinai….
>
> The kings came, they fought; then fought the kings of Canaan, at Taanach, by the waters of Megiddo; they got no spoils of silver.
>
> The stars fought from heaven, from their courses they fought against Sisera. The torrent Kishon swept them away, the onrushing torrent, the torrent Kishon….

The notion of a victorious warrior deity extends in the Hebrew Bible to include the expectation of a final great victory over all opposing forces. In some apocalyptic passages of the Bible (such as Zechariah 14) we find a celebration of a victorious "day of Yahweh," which will recapitulate the deity's victory over chaos/evil in creation. An important motif of many apocalyptic passages in the Hebrew Bible (and outside) is the deity's final defeat of evil in battle, sometimes by a heavenly army, by earthly armies, or a combination of both, but usually as a manifestation of divine power over all things.

BIBLICAL WARFARE IN RECENT SCHOLARSHIP

"Holy War"

The topic of warfare in the Hebrew Bible has been tackled, broadly, on two fronts. The first is historical, with the aim of revealing the institutions of warfare in ancient Israel and Judah, and in particular that of "holy war," the institution depicted especially in the books of Deuteronomy, Joshua, and Judges, relating to a premonarchic era. This agenda also includes a study of Israel's construction of Yahweh as a warrior god.

The second approach is theological, and this may in turn be divided into descriptive and prescriptive programs, the former aiming to define the theology of warfare expressed in the Hebrew Bible, the latter dealing with the problem of integrating that theology into a systematic Christian theology of war. The experiences of the twentieth century have cast a shadow over the Hebrew Bible's celebration of war, and a number of studies have been devoted to confronting this problem, though perhaps not as many as a responsible theological discipline might be expected to generate.

Let us first deal with the historical agenda. It appears to have been Friedrich Schwally who coined the term "holy war" to describe an institution that expressed, in his view, the cultic nature of much of ancient Israel's warfare.[5] The investigation of a second agenda, Yahweh's character as a warrior god, was initiated rather later, by Henning Fredriksson.[6] Both lines of study have been vigorously pursued in the last forty years, prompted by the influential monograph of Gerhard von Rad.[7] Von Rad's study is a convenient starting point for our survey.

Von Rad attempted an account of the institution of holy war as it evolved through Israel's and Judah's history. In his view, holy war originated as an amphictyonic institution, as an activity of a sacral tribal league: it was defensive, not aggressive, and fought by a militia, not by a professional standing army. The major features of this institution were the designation of a charismatic leader bearing the divine "spirit," the sounding of the trumpet, the call to the warriors not to fear, the assurance of Yahweh's presence, the sacred ban (*ḥerem*) on booty, annihilation of the enemy, and the final dispersal of the warriors to their tribes. As several scholars had previously noted, the Hebrew Bible presents warfare as intrinsically bound up with Israelite religion, and von Rad located it at the center of the covenant and the social structure of the nation. For him, as for Wellhausen, the armed camp was Israel's first "holy of holies."

However, von Rad departed from his predecessors in recognizing this "institution" as somewhat idealized. As elsewhere in the Old Testament, von Rad found here not unmediated historical data, but the written form of "traditions" that enshrined "Israel's faith." Thus, in his view, while the premonarchic tribal league had conducted its communal warfare as a sacral institution, the monarchy under David and Solomon already practiced warfare as an essentially secular arm of royal diplomacy, using hired mercenaries and a royal corps. Thereafter, the idea of a cultic war persisted only as a theological doctrine. Traces of older holy war ideas and practices are still, according to von Rad, visible in the prophetic books, notably the "Fear not!" oracle, derived from a speech of encouragement and assurance of divine help before battle, and references to a "day of Yahweh" in prophetic oracles. For him, this "day of Yahweh" was originally a day of battle, in which the Deity acted mightily in defeat of his enemies. But von Rad regarded the fully elaborated "holy war" as an ideological construction of the book of Deuteronomy, followed by the Deuteronomists, who applied it to narratives of Israel's early conflicts in the land of Canaan. The inspiration for the resurgence and development of such an ideology lies, according to von Rad's theory, in the reign of Josiah (late seventh century B.C.E.), at a time when the Judean militia was, he argued, reconstituted and policies of national expansion formulated and pursued. After the failure of Josiah's attempt to restore a greater Israel, however, there ceased to be any connection between the practice of war and the ideology of "holy war," at least within the time frame of the Old Testament.

---

[5] Friedrich Schwally, *Der heilige Krieg im alten Israel* (Leipzig: Dieterich, 1901).

[6] Henning Fredriksson, *Yahwe als Krieger: Studien zum alttestamentlichen Gottesbild* (Lund: Gleerup, 1945).

[7] Gerhard von Rad, *Der heilige Krieg im alten Israel* (1951; 3d ed., Göttingen: Vandenhoeck & Ruprecht, 1958).

This thesis, though elegant and in harmony with von Rad's general separation of Old Testament theology and Israelite history, has met criticism from several quarters. The idea that in the ancient Near East generally, cultic and secular warfare are distinguishable is improbable, and even if a practical "secularization" of warfare under the monarchy took place, divine legitimization will have remained fundamental to the royal ideology of warfare. The theory of an ancient tribal league has also been abandoned (as has von Rad's thesis that there was a "Solomonic enlightenment," a key element in his entire tradition history of the Old Testament). Scholars have also sharply questioned von Rad's suggestion that holy wars (even in theory) were purely defensive; and they have always disputed whether the "day of the Lord" found in the prophetic literature really has its basis in divine military victory rather than, for example, a cultic theophany.[8]

Millard Lind has attacked both von Rad's thesis of a relatively late theological concept of holy war and also the suggestion that its roots are found in early mythological conceptions.[9] Instead, he argues that the Exodus served as a paradigm event in shaping biblical accounts of divine warfare, and in all such cases Yahweh alone undertook the fighting. But it is not clear whether Lind regards himself as offering a literary or a historical analysis; nor whether Israel and Judah should be imagined as having fought any wars with a religious ideology attached. It may indeed be true that there exists within the Hebrew Bible a prominent theological strand in which the Deity alone fights. But such a strand is only one of several.

[8] Gerhard von Rad, "The Origin of the Concept of the Day of Yahweh," *JSS* 4 (1959): 97–108.

[9] Millard C. Lind, *Yahweh Is a Warrior: The Theology of Warfare in Ancient Israel* (Scottdale, PA: Herald Press, 1980).

A more valuable contribution to the discussion has been made by Sa-Moon Kang.[10] He not only provides a thorough survey of the ancient Near Eastern background, but also discusses two important distinctions: one is between "holy war" and "Yahweh war," an issue already pressed in an earlier study by Gwilym Jones.[11] In respect of holy war in the history of Israel and Judah, he modifies von Rad's account: there was no institution of a "Yahweh war" until the monarchy, when it began to be introduced as a dimension of battle. The exodus and conquest narratives have been subsequently shaped under the influence of that idea. Despite these more recent studies, von Rad's articulation of an essentially Deuteronomic concept of holy war remains essentially convincing and, as we have seen, was influential on Hasmonean propaganda and, of course, on the authors of the Qumran *War Scroll*. What is unclear is the relationship of this literary concept to historical practice, and the historical context for the creation of the Deuteronomic idea.

The "Divine Warrior"

Research on the idea of Yahweh as a warrior god begins with Fredriksson's taxonomy of the martial images of Yahweh under several headings, such as leader of a human and a heavenly army and as individual warrior with various kinds of weapons. He also carefully listed the vocabulary associated with these images.[12] Frank Cross, however, took a further step with his thesis, and like so many of his other theses, it was pursued by subsequent Harvard-trained scholars.[13] Cross identifies the theme of Yahweh's martial character in what he regarded as the earliest poetry of the Hebrew Bible, the Song of the Sea (Exodus 15) and the Song of Deborah (Judges 5; both mentioned earlier). To these we can add Deut 33:2–3. Patrick Miller elaborates the topic and notes the prevalence of cosmic conflict in the Ugaritic texts, where deities fight one another and also fight against and with humans.[14] Miller argues that the "divine assembly" (or parts of it) functioned as an army aiding the chief gods. In this he saw the cultural background to the religion of Israel. However, although it is Baal who represents the warrior god, Miller follows Cross in associating Yahweh with the nonmilitary "high god" El, primarily as leader of the heavenly army. From the merger of this profile with a "god of the fathers," a tutelary clan Deity, Miller sees the emergence of Israel's conceptions of Yahweh as a military commander/cosmic creator and as an individual warrior. Central to the mythology of the cosmic creator is his battle with the forces of chaos.

[11] Gwilym Jones, "'Holy War' or 'Yahweh War'?" *VT* 25 (1975): 642–58.

[12] Fredriksson, *Yahwe als Krieger*.

[13] Frank M. Cross, *Canaanite Myth and Hebrew Epic* (Cambridge, MA: Harvard University Press, 1973), 91–111, "The Divine Warrior"; and 112–44, "The Song of the Sea and Canaanite Myth."

Thus, Miller's review of divine warfare in the Hebrew Bible focuses on the role of the "divine council" or "assembly." Again following Cross, Miller sees in the Bible evidence that Israel historicized the mythological traditions in presenting its Deity as defending Israel from its earthly (and sometimes heavenly) enemies in service of his election of the nation and the covenant between them.

Several aspects of this theory are dubious. The historicity of a nomadic-patriarchal period in Israelite origins is now all but discarded, while the relationship of the Ugaritic texts to the religion of the Canaanite population remains disputed. It is widely held that the mythological poetry of Judges 5 and Exodus 15 is ancient, but that is far from a proved fact. (The mythological imagery of Habakkuk 3, for instance, does not of itself prove that this poem is ancient). Finally, more recent research on the formation of the Pentateuch has displaced Cross's suggestion of an early "Israelite Epic" underlying the Pentateuchal narrative. Nevertheless, the observation of a range of military images and roles assigned to Yahweh in the Hebrew Bible remains sound; what is presently unclear is how these features relate to a historically reconstructed "early Israel."

A second strand of the Harvard "divine warrior" thesis, represented chiefly in the work of Paul D. Hanson and John J. Collins, has considered the motif in Hebrew apocalyptic literature. The theory holds that the cosmic battles of the gods and the defeat of chaos at creation are projected onto the *eschaton* and, reflecting Judah's loss of political and military independence, focus on divine activity. In this process, ancient mythical motifs are resurrected. Hanson and others have tended to stress that divine initiative is strongly emphasized. But it is important to recognize that human conflict is not as a rule excluded, even if it may sometimes extend only as far as collecting booty, as in Ezek 38:21–22; 39:9:

---

[14] Patrick D. Miller, *The Divine Warrior in Early Israel* (HSM 5; Cambridge, MA: Harvard University Press, 1973).

> I will summon the sword against Gog in all my mountains, says the Lord Yahweh; the swords of all will be against their comrades. With pestilence and bloodshed I will enter into judgment with him, and I will pour down torrential rains and hailstones, fire and sulfur, upon him and his troops and the many peoples that are with him.…
>
> Then those who live in the towns of Israel will go out and make fires of the weapons and burn them—bucklers and shields, bows and arrows, handspikes and spears—and they will make fires of them for seven years.

In Daniel 12 the heavenly prince Michael apparently defeats the "king of the north," and no human intervention is envisaged. By contrast, *1 Enoch* 90:19, reflecting the early victories of the Maccabean militia, envisages human warfare: "I saw, and behold, a great sword was given to the sheep [the righteous], and the sheep proceeded against the beasts of the field [the wicked] in order to kill them." Such texts demonstrate that the theology of divinely led human warfare was sustained throughout the Second Temple period, just as the evidence of 1 Maccabees shows that the institution of holy war was also recalled. Because the Harvard school accepts an early dating for the mythological poetry describing Yahweh as warrior, it represents the motif in apocalyptic texts as a revival. However, the idea that mythological ideas gave way to historical ideas in a simplistic sequence is improbable. It may be more reasonable to suggest, rather than an artificial revival of myth, a much greater continuity of mythical ideas about Yahweh as essentially a warrior Deity. The same is possibly true of military activity itself: the fact that Judah did not itself fight any national wars from the sixth century onward does not mean that its experience of warfare disappeared since, as mentioned earlier, Jews continued to perform military service for their imperial rulers, no doubt in the name of their own Deity, the one who had, after all, chosen Cyrus (and his successors) as the anointed kings of Judah.[15] Ideologies of "holy war" and "Yahweh war" cannot necessarily be confined to an "early" period.

---

[15] See Isa 45:1, which indeed also reflects the ideology of Yahweh as a military ruler of the world, with Cyrus his lieutenant. It is not really remarkable that among the deities criticized in the Hebrew Bible, Mazda is never mentioned; Persian kings are never treated with disdain, nor are there any oracles against Persia in the considerable number of oracles against foreign nations in the prophetic literature. It is remarkable that scholarship has so infrequently sought to understand and explain this.

An important feature of much of the apocalyptic literature's use of holy war and divine warrior themes is that the ethical dimension tends to be emphasized. Not only is chaos equated with (moral) wickedness, but the victors may also, as in both *Enoch* and Daniel, constitute not the nation of Israel but the righteous. On the side of the wicked, accordingly, fall a number of members of Israel. The ethical developments that have led to this are too complicated to discuss here: they include almost certainly some influence of Persian and Greek ideas, but also the reverberations of serious social unrest and the emergence of political competition among different parties within Judah. Thus, war themes came to be coopted into theological discourse about individual life (as in, e.g., the writings of Paul) and also in inner-Jewish disputes. The latter can be seen in the *War Scroll*; the former cannot, though it is already hinted at in the dualistic discourse of the *Community Rule*, in part of which the struggle between light and darkness is waged within each person.

Evaluation

The theme of divine warfare in the Bible has understandably attracted criticism from some scholars, especially those from the Mennonite and Quaker traditions. Both Peter Craigie and T. Raymond Hobbs have recognized this, though only Hobbs has really engaged the problem.[16] Even so, he did not succeed in resolving it satisfactorily. He partly neutralizes the problem by historicizing the institution, pointing out that the values of an ancient agrarian society are not those of today; and partly by invoking the New Testament as a corrective. But to use the New Testament as a corrective to the Old Testament is not a Jewish solution, nor does it respect the Hebrew Bible as an autonomous theological document, or Old Testament theology as an autonomous discipline. The problem will, in fact, remain so long as the agenda of biblical scholarship is to excuse the Bible. That is the task of the church, not the academy. There is, of course, no reason to condemn the Bible either. Its general treatment on war, as on slavery, xenophobia, or the status of women, need only be stated. However, the authority accorded to the Jewish/Christian Scriptures tends to induce a positive and even apologetic approach to matters that should not be defended.

It is, not surprisingly, from the direction of feminism that direct criticism of the extent of martial language and concepts and values in the Bible has come (see, e.g., Carol P. Christ).[17] War games are typically masculine games, and the values of the battlefield typify those of the male gender. Disappointingly, much liberation theology has in fact claimed divine acts of military aggression as symbols of liberation, glorifying precisely those mechanisms by which they themselves were oppressed by colonial powers. To deplore human aggression while celebrating divine aggression is a precarious theological position to sustain. Nevertheless, efforts such as that by Tremper Longman III and Daniel Reid–which tend to emphasize New Testament theology as presenting the divine conquest of evil rather than the Old Testament theology of aggression against nations that have not been "elected"–will probably continue to represent the norm, since the purpose of much writing on Old Testament theology is to vindicate its values.[18]

But the presentation of the Deity in the Hebrew Bible as a violent, monarchic, and vengeful one, defending his chosen nation against all others, and legitimizing its own (usually unfulfilled) domination of its neighbors is not necessarily an embarrassment. The prevalence of the values of military glory, revenge, and conquest in ancient civilizations makes it both natural and inevitable that the Hebrew Bible will reflect them. Protest against these values should be unnecessary. Unfortunately, the perpetuation of the military language and ideology of the Bible in forms of modern Christianity and Judaism (and Judaism is on the whole far less guilty in this respect) makes it necessary for us periodically to point out the incompatibility (for very many people) of biblical and modern civilized values. After a century characterized by so much genocide (of Armenians, gypsies, Jews, Cambodians, Serbian Muslims, Hutus), racism, and mass slaughter, we should not take lightly the perpetuation of military images supported by scriptural authority.

THE QUMRAN *WAR SCROLL*

The presentation of warfare in the Hebrew Bible thus encompasses a wide range of notions: charisma, monarchy, vengeance, world order, holiness, internal discipline, and, above all, divine activity. Most of these ingredients are found in the Qumran *War Scroll.* This manuscript (1QM[ilḥamah]) was among those found initially in Cave 1, and a number of fragments later published from Cave 4 represent either other recensions of this work or materials used in its composition. The fragments also confirm that 1QM is a composite work, edited from a number of different sources that reflect various traditions. But a single overarching conception has been forged from these sources, that of a final war between the equally matched and permanently opposed forces of light and darkness, which are each led by "spirits" (*ruḥoth*) created by God from the very beginning. Such a strong and formal dualistic view of the world is spelled out in the *Community Rule* (1QS), and there is little doubt that the *War Scroll* is the product of the sect that called itself the *Yaḥad.* However, the characteristic light-darkness dualism of this sect is harnessed in 1QM to two other themes. One is the more biblical dualism of Israel and the nations: 1QM narrates how, after the initial victory of light over darkness, Israel will conquer the other nations of the world. The other theme with roots in the Hebrew Bible is that of the "evil empire" (a role filled successively by Assyria, Babylon, and the Seleucid kingdoms, though never Persia). Using the term "Kittim," which in the Hebrew Bible is applied to Greeks and then (in Daniel) to Romans, it transparently identifies the Roman Empire as the ally of Belial, the spirit/angel of darkness, and of the "Children of Darkness," and describes their defeat in a great seven-stage battle.

[18] Tremper Longman, III, and Daniel G. Reid, *God Is a Warrior* (Studies in Old Testament Biblical Theology; Grand Rapids: Zondervan, 1995).

The historical background is also important for understanding the composition and ideology of the *War Scroll.* From the beginning of the Persian period, and through to the end of the third century B.C.E., the province of Judah had been part of a larger empire or kingdom (Persia, Egypt, Syria). But between the middle of the second century B.C.E. and the middle of the first, this situation was interrupted. As a result of various factors, such as party factionalism, rivalry between priestly houses, warfare between neighboring Hellenistic kingdoms, and the erratic Syrian ruler Antiochus IV, Jerusalem's temple cult was forcibly suppressed. The second half of the book of Daniel, written in this period of oppression, reflects on the centuries after Nebuchadnezzar as an epoch of world history characterized by ever more brutal earthly kingdoms, the succession of empires being determined not only by conquest on earth but also by struggle between patron deities in heaven. It sees in Antiochus IV (pictured as a "little horn" on a goat representing the Greek Empire) a final direct challenge to the divine realm, culminating in the final confrontation in which the heavenly prince Michael is triumphant.

Using a cycle of stories already in circulation, the book of Daniel was written in the middle of the second century B.C.E., a century to a century and a half before the *War Scroll*, which it has influenced in several ways. The actual outcome of the crisis to which the book of Daniel refers was not a heavenly intervention, as chapter 12 envisages, but a human victory. The family of Mattathias (of the priestly house of Hashmon) led a Judean militia army to victory over the Syrians. This renewed resort to armed conflict met with further success as successive members of this dynasty ruled an independent Judea that expanded its borders to cover Idumea (Edom), the coastal plain, Galilee, and some parts of Transjordan. The biblical "promised land" was gained for a united Judean kingdom for the first and only time in history. But independence was short-lived: the dynasty broke up under the internal pressure of internal rivalry and the external pressure of Roman expansion. Under the Herods and then under direct Roman administration, the Judeans, or at least some of them, continued to nurture both the traditions of warfare present in their Scriptures and also the successes of their recent history; they ultimately launched a war against Rome, which ended with the capture of Jerusalem and destruction of the temple. It was during the period of independence and then subjection to Rome that the Qumran Scrolls were written.

The *War Scroll*, then, was produced within the *Yaḥad* during the period between the advent of Roman armies in Judah (63 B.C.E.) and the defeat of the First Jewish Revolt (73 C.E.), and it drew not only upon scriptural traditions but also upon a recent history of military activity in which those traditions had been richly exploited, harnessing these to its own peculiar dualistic view of the world as a struggle between itself and the darkness that lay outside its own boundaries. It is a curious, fantastical blend of the idealistic and the pragmatic.

The *War Scroll* opens with an account of the context in which a final war takes place between two sets of antagonists. This war, it seems, occupies the first six years of a forty-year war, in which each seventh year is observed as a Sabbath, with no fighting. In column 2, the seventh year of the war, the temple cult is restored in accordance with the (solar) calendar and regulations of the author's own society. Columns 3–4 describe the trumpets and banners of the warriors, and 5.1–7.7 tells of the weapons and the various classes of warriors, noting those eligible and ineligible to fight. Then columns 7–9 sketch various military maneuvers and tactics, including the pitched battle and the ambush.

Columns 10–14 comprise a medley of liturgical items with no discernible order and no consistent ideology. Columns 15–19 describe the seven engagements between the forces of light and darkness, ending with the final victory, the despoiling of the slain, and the song of the returning victors. Whether or not a substantial amount of material has been lost from the end of the scroll, the preserved ending lies on an appropriate note and allows the modern reader to gain a view of an entire eschatological war.

History of Scholarship

Initial impressions of the *War Scroll* were that it was a unified composition; and the earliest commentary, that of Jean Carmignac, even attributed the work to the Righteous Teacher.[19] Yigael Yadin, in what remains the most complete analysis to date, also upheld the unity of the work.[20] From an evaluation of the armory and tactics described, he argued that it reflected Republican (but not Imperial) Roman warfare, and that the author used a number of sources.

The commentary of Johannes van der Ploeg accepted, however, that the manuscript was composite and that columns 1 and 15–19, which present a coherent account of a seven-stage battle, were supplemented by other material expressing a nationalistic viewpoint, in which Israel defeated the other nations of the world.[21] The monograph of Peter von der Osten-Sacken on Qumran dualism in general included a more rigorous analysis of the literary composition of 1QM and concluded that the war dualism of 1QM represented the earliest stage of dualism in the Qumran literature, with column 1 as the earliest stratum.[22]

Philip R. Davies argued, however, that on internal literary-critical grounds, the dualistic material in columns 15–19 was later than the nationalistic material in 2–10.[23] He pointed out that column 14 contains an earlier form of the dualistic rule in 15–19, in which the foes are Israel and the nations, and suggested that column 1 represents a harmonizing introduction (and thus the *latest* stratum), which places a seven-stage battle between the major forces of light and darkness at the beginning of a global war. He also called attention to the influence of Hasmonean military practices (banners, hymns, ambushes) on the "nationalistic" material and argued for a dualistic redaction of earlier nondualistic material, challenging the consensus that the dualism of the Qumran texts was primary.

In 1988, Jean Duhaime compared the genre of 1QM with military texts from the Greco-Roman world and concluded that 1QM is best classified as a "tactical treatise." At present, there is little consensus on the literary history, though a date in the last quarter of the first century B.C.E. is widely accepted, as is the identification of the Kittim, allies of the "Children of Darkness," as the Romans. Maurice Baillet has published fragments of similar materials from Cave 4 and has suggested, rather implausibly, that they belonged to a more concise recension of 1QM.[24] Duhaime published a critical text of 1QM, with an introduction and commentary.[25]

The Themes of the War Scroll

As just stated, the *War Scroll* combines both an ethical-dualistic and a nationalistic perspective on the Final War. It also balances human with divine activity in a way that allows elements of "holy war" to coexist with the presentation of Yahweh as the victorious divine warrior. Since I have already offered some account of the overall structure of the *War Scroll*, I can perhaps best cover the many ingredients of its vision in the order in which they appear.

The conditions for the onset of the war are given in column 1. Here, the "Children of Light" comprise the "Levites, Judahites, Benjaminites, and the 'exiles of the wilderness,'" and the "Children of Darkness" are made up of the "army of Belial, the troop of Edom, Moab, Ammonites…Philistia, and the troops of the Kittim of Asshur as well as 'violators of the covenant.'" It is noteworthy that the forces of light are not simply identified with Israel, while the forces of darkness comprise a mixture of human and superhuman elements, including some renegade Israelites/Judeans. The "Kittim" and "violators of the covenant" probably betray the influence of the book of Daniel, though the *War Scroll* as a whole exhibits little dependence on this book otherwise (the appearance of Michael in col. 17 is the only other possible instance). The human forces include those nations inhabiting Canaan, and so the first phase of the war constitutes the recapture of the promised land. A confusion of nationalistic and "sectarian" perspectives is already present; the intention of the author may have been to depict the "Children of Light" as the true Israel. But Israel's enemies are also the demonic forces of evil.

Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 80–203; cf. idem, "The *War Scroll* from Qumran and the Graeco-Roman Tactical Treatises," *RevQ* 13 (1988): 133–51, and most recently *The War Texts* (Companion to the Qumran Scrolls 6; London: T & T Clark, 2004.

This first column also indicates that the battle is preordained and that its aim is twofold: the spread of the glory of God but also to achieve the deserved reward for the righteous (lines 8–9):

> At the appointed time of God, the height of his greatness shall shine to all the ends of the [earth], for peace and blessing, glory, joy and long life for all the Children of Light.

The material in columns 2–9 in effect underlines the fact that the war is to be fought according to detailed instructions, and this because it is a war ordained by God. The restoration of the temple in the seventh year (presumably) and the engraving of attributes of God on trumpets and banners reinforce the cultic nature of the enterprise and its focus on God as the ultimate leader. The military weapons are effectively cultic vessels. The same point is made by insisting that the conduct of the battle is left in the hands of priests. For despite the mention in 5.1 of a "shield of the Prince of the congregation," such a figure is omitted entirely from any description of the conduct of battle. The omission is strange and, although most commentators are happy to gloss over it, significant, not least because the role is usurped by the priesthood. The movements of the troops are directed by priests blowing on trumpets, and in such a way that the function of a war leader is redundant. Strategy is prescribed by a written text; instructions conveyed by musical code, and the entire war in divine hands. The sacerdotal choreography turns the battles into a ritual mime. Throughout the war, the camp must be kept holy, so that none of those excluded from the congregation (i.e., with any physical defect) can be allowed, nor women or young children, nor anyone having a nocturnal discharge; and no nakedness in the vicinity, "for holy angels are with their troops" (7.6). In all this, the legislation of Deuteronomy is clearly being applied.

The inspiration for the depiction of Israel as an army, however, is Num 1:1–10:10. This eschatological army is divided into camps and further into tribes, thousands, hundreds, fifties, and tens. Whether there is a further link between the two texts in depicting the final war as a renewed march toward the promised land can hardly be settled. But a reference to Nadab and Abihu's disobedience in 1QM 17:2 betrays the influence of Numbers elsewhere in the manuscript.

In the liturgical poems that form the central part of 1QM (cols. 10–14), the theology/theologies of the war are most explicit. It is not clear how some of these liturgical pieces are supposed to fit into the activities described elsewhere. The hymn of column 12 is repeated in 19, following the end of the great seventh engagement, and 14 contains rubrics explaining when its liturgy is to be performed; but the rest of the material is offered without any context.

In column 10, God is addressed, first in recalling the speech of the priest before battle given in Deuteronomy 20. Then God's strength, wisdom, and creative energy are celebrated, linked to the prowess of his chosen people. The poem in column 11, also addressed to God, opens with "Yours is the battle" (11.1) and emphasizes (11.5), "Neither our might nor the power of our hands has produced the valor, but only by your power and the strength of your valor." The famous oracle of Num 24:17 ("a star shall arise from Jacob"), often used in other Jewish texts as a prediction of a warrior messiah, is here, uniquely, applied to Yahweh himself, and his exploit at the Sea of Reeds is invoked, as is the prediction of his defeat of Gog (from Ezekiel 38–39). Thus, rather than point to a messiah of Israel/prince of the congregation, this rather unusual exegesis reinforces his absence and strengthens the impression that while the figure Prince did play a role in some of the sources of 1QM (see 5.1), the author of this particular composition has clearly removed him. The divine victory will be won with the aid of the "poor ones," a (probably sectarian) self-designation, but under no human commander.

Column 12 describes the heavenly army that will accompany the righteous warriors to battle: "the Hero of War is in our congregation and the host of his spirits as we march" (12.9). The sentiments here are entirely nationalistic (nations, Zion, Israel), whereas the following hymn(s) in column 13 are formally dualistic. Here priests and Levites curse Belial and his followers, while on the other side are "the Prince of light…the spirits of truth" (13.10). The text also mentions God's preordaining of a "day of battle," when "guilt" will be finally exterminated (13.15).

Column 14 specifies the liturgy for the aftermath of victory. After leaving the slain, they sing a hymn of return, in the morning wash themselves and their clothing, and then return to the battlefield and bless "the God of Israel, who keeps mercy for his covenant" (14.3–4), for he has "gathered an assembly of nations for destruction without remnant" (14.5). References to "Belial" and "Children of Darkness" toward the end of the column suggest, however, that this piece has been edited in a dualistic direction (14.9, 17). (This is not a convenient speculation, for a parallel text of the hymn from Cave 4 lacks any sectarian vocabulary at all.)

The final section, columns 15–19, describes a seven-stage battle in which the forces of light and darkness are alternately successful. The battle sequences are developed from those of columns 7–9 and simply repeated the necessary number of times. But interspersed are framing passages, speeches, and hymns that sustain the dualistic presentation. The opening speech of the priests is not that from Deuteronomy but a short discourse on the character of the enemy.

The text presents the battle as taking place according to a precise and preordained plan, according to which even the enemy falls dead at the required moment. Yet in the second engagement, the children of darkness rally and the forces of light withdraw. This necessitates another speech (16.15–17.9), explaining that the righteous slain have fallen "according to the mysteries of God," and that the final victory is nevertheless assured. The setback is a "test": God will send help. But this help apparently comes in the person of the heavenly prince Michael. It is to be assumed that Michael and the "Prince of light" are here identified, but although Michael is the agent of Israel's deliverance in the book of Daniel, the "Prince of light" is generally unnamed.

In column 18, the final victory is described, as "Asshur," the "children of Japhet," and the Kittim are finally routed by the "great hand of God" (18.1). Perhaps in a reminiscence of the battle of Aijalon near Gibeon in Joshua 10, as the sun hastens (or does not hasten–there is a gap in the text), a final blessing of the "God of Israel" is uttered (18.6). Next comes the hymn earlier given in column 12, glorifying God as the "glorious king" (19.1) whose sword "devours flesh" (19.4). Whether or not the *War Scroll* originally ended here, or shortly after, is unknown, but the extant text concludes aptly with ascription of victory to God.

Evaluation

The *War Scroll* is curious not only in its literary complexity and its not always elegant combination of so many different ideological perspectives. It displays two particularly interesting paradoxes. One is its rather clumsy overlaying of an ethical/sectarian perspective over a nationalistic one. But this is a feature shared by a great deal of early Jewish literature. One suspects that "all Israel" never did exist except as an idea, and that continuity with this "Israel" was always claimed by each group or sect (Samaritans, "children of the *golah* [Diaspora]," so-called "Hellenizers," Hasmoneans, Christians, as well as the authors of the Qumran literature).

A second paradox, and one of more immediate cultural relevance, lies in the *War Scroll*'s choreography. Because this is the final great war, and necessarily a holy one, a cultic liturgy, and preordained from the moment of creation, everything that happens in it conforms to the plan laid down for it. Rather than a real test of valor or strength, a test of strategies, it has a foregone conclusion. Not only the outcome, but also the entire sequence of events is beyond human control, at least in the description given in columns 15–19. Commentators have noted the attention to detail lavished on the trumpets, banners, weapons, and tactics, many of which probably derive from actual military manuals, possibly including some Hasmonean ones, and have asked whether the author of this scenario is trying to be realistic or is simply rehearsing a fantasy. In the end, the mixture of realistic detail and absurd overall conception (such as the enemy obligingly observing sabbatical years) leaves what appears to be an insoluble contradiction between reality of detail and fantasy of conception.

Nevertheless, fantasy often does indulge in realistic detail, and such detail somehow allows the fantasy to work, redeeming it from total incredulity. It is, perhaps, possible to argue that the author(s) *did* believe that the final war would soon come and would see all evil obliterated and the true Israel triumphant, and even that a war with mighty Rome was inevitable and would represent the eschatological conflict between God and the greatest human earthly power, a fitting final opponent. Nor should we underestimate the limits of such an imagination: Jews did make war with Rome, and some may have believed their God would secure victory for them. When played out in 66–73 C.E., the events did not conform to the script of 1QM. Even so, a second war against Rome was launched six decades later.

We almost certainly need to interpret the *War Scroll* as a document of fantasy, but that is not to dismiss it. On the contrary, fantasy is an important ideological mechanism, and in our own culture too. The biblical notions of monotheism, justice, election, order, and meaning in history induce a "cognitive dissonance" to any observer of a world that is pluralistic/secular, unjust, relatively egalitarian in its principles and in relative disorder. The desire for a convergence between the biblical values (which to an extent moderns also share) and the obvious reality can give rise to a resolution on the level of fantasy, similar in kind, though not in scale, to the daily fantasies in which police catch criminals, virtue is rewarded, and only just violence wins the day. The *War Scroll* can certainly be interpreted in much the same way as a typical movie by Michael Winner (both share the theme of vengeance), releasing the violent tensions occasioned by the recognition of unrequited evil in society, by means of a narrative largely divorced from reality, though full of realistic detail.

SUMMARY

The idea of a war as a sacral, cultic act, and the presentation of the Deity as a warrior god and a god of armies—these are present in much of the Hebrew Bible, and both notions can be found in the late Second Temple period as well. These features are pervasive in ancient Near Eastern and Greek literature, and they are presumably characteristic of agrarian states, in which warfare is the major activity of ruling classes (including gods and goddesses). A militarized nation is reflected in the book of Numbers, where Israel is idealized as a warrior society.

The Hebrew Bible treats three major respects of the "divine warrior" imagery: mythologically, with the creator Deity as triumphant over the forces of chaos; historically, with a warrior god invoked in battles; and eschatologically, where the two are often combined in the final defeat of chaos and evil, bringing the vindication of either the nation or the righteous over the other nations or the wicked respectively. The eschatological scenario of the *War Scroll* combines virtually all the elements just mentioned. The war is both divine and human, both nationalistic and sectarian, both cosmic and ethical. Not least, it combines practical detail with fantastical conception.

Key Issues

Two issues may be singled out for attention, one specific and one general. The specific issue is the absence of any warrior messiah from the most comprehensive and detailed account of the eschatological war, and his replacement by a combination of divine instruction and priestly musicality. The particular anti-messianic stance needs some explanation.

The second issue is perhaps more fundamental. Once one moves from a descriptive to a prescriptive evaluation of the biblical theologies of war, the prevalence of war language and imagery and the martial characterization of the Deity become problematic. An age in which war has been used to decimate generations and races has learned that military values are not appropriate for our civilizations. The pervasive martial rhetoric, values, and language of the Bible create a serious problem for those committed to the religious authority of the Bible.

One solution is to examine the social function of fantasy. Fantasy is surely as widespread in our own cultures as in any others past or present. It takes the form of movies, books, and TV series in which realistic detail is used in the service of an ideology that defies our experience of reality: that good conquers evil, that justice eventually triumphs, that progress and history have a meaning. The blurring of reality and fantasy through fictionalized documentary, infotainment, computer games, and "virtual reality" is encouraging us to interpret our existence increasingly in terms of fantastical narratives, without denying us the knowledge (at least so far) that they remain fantasy. For Feuerbach and Marx, of course, religion is the ultimate fantasy.

Much of our modern fantasy is about war (terrestrial, interplanetary), and in this respect, we are no different from the culture that produced the biblical literature, where war was a preoccupation of rulers and ruled (as protagonists and victims). That such wars participated in a transcendental narrative implicating deities was an ideology that assisted rulers in sustaining warfare as the major agenda of their rule. The emergence of feminism, postcolonialism, and cultural analysis into biblical studies enables the theme of warfare finally to be critically evaluated.

CHAPTER ELEVEN

PSALMS AND PSALTERS IN THE DEAD SEA SCROLLS

Peter W. Flint

Among the almost nine hundred scrolls that were discovered in the Judean desert, no book is represented by more manuscripts than the book of Psalms—a clear indication of the importance of the Psalter in the Qumran community. This essay has five sections:

1. Description of the Psalms scrolls and pertinent observations
2. Early proposals concerning the Psalms scrolls
3. An assessment of the "Qumran Psalms Hypothesis"
4. Conclusions
5. Three appendices, including translations of the "apocryphal" psalms and a listing of contents of the Psalms scrolls

1. DESCRIPTION OF THE PSALMS SCROLLS AND PERTINENT OBSERVATIONS

As specified in Appendix 1, the Dead Sea Scrolls include forty Psalms scrolls or manuscripts that incorporate psalms. Thirty-seven of these were found in eight locations at Qumran: three in Cave 1, one each in five minor caves (2, 3, 5, 6, and 8), twenty-three in Cave 4, and six in Cave 11. Three more scrolls were discovered further south: two at Masada (1963–64) and one at Nahal Hever (1951–60).[1]

Careful study of this material reveals several features that contribute to our understanding of the book of Psalms and its completion as a collection or book of Scripture.[2]

---

[1] Part of this manuscript was previously thought to be from Wadi Seiyal, which is further south.

[2] The following comments are made with reference to appendix 1.

1.1 Contents of the Psalms Scrolls

a. Quantity Preserved

In decreasing order, the manuscripts with the highest number of verses preserved (whether wholly or in part) are: 11QPs^a (= 11Q5), 4QPs^a (= 4Q83), 5/6ḤevPs (= 5/6Ḥev 1b), 4QPs^b (= 4Q84), 4QPs^c (= 4Q85), and 4QPs^e (= 4Q87).

b. Biblical Compositions in the Psalms Scrolls

Of the 150 psalms found in the MT-150 Psalter,[3] 126 are at least partially preserved in the forty Psalms scrolls or other relevant manuscripts such as the pesharim. All the remaining twenty-four psalms were most likely included, but are now lost because of the damaged state of most of the scrolls. Of Psalms 1–89, nineteen no longer survive (3–4, 20–21, 32, 41, 46, 55, 58, 61, 64–65, 70, 72–75, 80, 87), and of Psalms 90–150, five are not represented (90, 108?, 110, 111, 117). The reason for this discrepancy is because the beginnings of scrolls are usually on the outside and are thus far more prone to deterioration. For a complete list of contents of the Psalms scrolls, see Appendix 3.

c. Nonbiblical Compositions

At least fifteen "apocryphal" psalms or compositions are distributed among four manuscripts (notably 11QPs^a [= 11Q5], also 4QPs^f [= 4Q88], 11QPs^b [= 11Q6], 11QapocrPs [= 11Q11]).[4] Six were previously familiar to scholars: Psalms 151A, 151B, 154, and 155; David's Last Words (= 2 Sam 23:1–7); and Sir 51:13–30. Nine were unknown before the discovery of the Dead Sea Scrolls: *Apostrophe to Judah, Apostrophe to Zion, David's Compositions, Eschatological Hymn, Hymn to the Creator, Plea for Deliverance*, and three *Songs against Demons.* One further piece, the Catena of Psalm 118, is not really a distinct composition, but constitutes a longer ending for Psalm 136. An English translation of all fifteen texts plus the Catena is provided in Appendix 2.

---

[3] I.e., as found in the Masoretic Text (MT) of Psalms.

[4] This document, "the Apocryphal Psalms," has been identified variously as apocrPs^a, apocrPs, 11QPsAp^a, and eventually numbered 11Q11. Within the PTSDSSP numbering scheme, this text retains the number 11Q11 and is named *A Liturgy for Healing the Stricken.* Herein we refer to the text as 11QapocrPs.

1.2 Format, Superscriptions, Comparative Datings

a. Format of the Psalms Scrolls

At least ten manuscripts are arranged stichometrically, while twenty-one are written in prose format: two from Cave 1, two from the Minor Caves, fourteen from Cave 4, and three from Cave 11. At least one scroll is a prose collection with one psalm written in stichometric format.[5]

Stichometric	Prose	Mixed
1QPs^{a} (= 1Q10)	1QPs^{b} (= 1Q11)	11QPs^{a} (= 11Q5)
3QPs (= 3Q2)	1QPs^{c} (= 1Q12)	
4QPs^{b} (= 4Q84)	2QPs (= 2Q14)	
4QPs^{c} (= 4Q85)	pap6QPs? (= 6Q5)	
4QPs^{g} (= 4Q89)	4QPs^{e} (= 4Q87)	
4QPs^{h} (= 4Q90)	4QPs^{f} (= 4Q88)	
4QPs^{l} (= 4Q93)	4QPs^{j} (= 4Q91)	
5QPs (= 5Q5)	4QPs^{k} (= 4Q92)	
8QPs (= 8Q2)	4QPs^{m} (= 4Q94)	
MasPs^{a} (= Mas1e)	4QPs^{n} (= 4Q95)	
	4QPs^{o} (= 4Q96)	
	4QPs^{p} (= 4Q97)	
	4QPs^{q} (= 4Q98)	
	4QPs^{r} (= 4Q98a)	
	4QPs^{s} (= 4Q98b)	
	4QPs^{w} (= 4Q98f)	
	4QapocrJosh^{c}? (= 4Q522)	
	11QPs^{b} (=11Q6)	
	11QPs^{c} (= 11Q7)	
	11QPs^{d} (= 11Q8)	

b. Psalm Titles or Superscriptions

In comparison with the MT-Psalter, the extant superscriptions reveal little variation, but with two interesting exceptions. The first is an additional Davidic title for Psalm 123 in 11QPs^{a} (= 11Q5) ("[A Song of] David. Of Ascents")[6] where the MT has no superscription. The second is a different title for Psalm 145 ("A Prayer. Of David"),[7] also in 11QPs^{a}, where the MT reads "A Song of Praise. Of David."[8]

c. Comparative Datings

At least fourteen manuscripts were copied before the Common Era (cf. appendix 1). The oldest of these date from the second century and eleven were copied in first century B.C.E., with one more loosely classified as "Hasmonean." A further six scrolls are generally classified as "Herodian" and four are assigned to the first century C.E. More specifically, ten others are dated from the early to mid-first century C.E. and four from the mid-first century C.E. onward.

4QPs^{r} (= 4Q98a)		11QPs^{a} (= 11Q5)	
		11QPs^{b} (= 11Q6)	
		11QPs^{c} (= 11Q7)	
		11QPs^{d} (= 11Q8)	
		MasPs^{a} (= Mas1e)	

1.3 Scrolls in Disagreement with the Masoretic Psalter

a. Major Disagreements

In comparison with the MT-150 Psalter, twelve scrolls contain major disagreements, which may be termed "macrovariants."[9] The first type of difference is in the *arrangement* of psalms, which occurs in seven manuscripts from Cave 4 (4QPs^{a} [= 4Q83], 4QPs^{b} [= 4Q84], 4QPs^{d} [= 4Q86], 4QPs^{e} [= 4Q87], 4QPs^{k} [= 4Q92], 4QPs^{n} [= 4Q95], 4QPs^{q} [= 4Q98]).[10] The second type involves variations in content (i.e., the inclusion of compositions not found in the MT), found in two scrolls from Cave 4 and another from Cave 11 (4QPs^{f} [= 4Q88], 4Q522, 11QapocrPs [11Q11]).[11] Both types of difference are present in two further scrolls, both from Cave 11 (11QPs^{a} [= 11Q5], 11QPs^{b} [= 11Q6]).

---

[9] For this term, see Peter W. Flint, *The Dead Sea Psalms Scrolls and the Book of Psalms* (*STDJ* 17; Leiden: Brill, 1997), 153–55.

[10] For example, Ps 31→33 in 4QPs^{a} and 4QPs^{q} (= 4Q98). Here the siglum "→" indicates that the second composition in a sequence directly follows the first.

[11] For example, the *Apostrophe to Zion* in 4QPs^{f} (= 4Q88) and 11QPs^{a}.

b. Other Disagreements

In addition to macrovariants, the Psalms scrolls contain hundreds of variant readings[12] that usually involve single words but sometimes extend to entire verses. Although many such variants are minor, several more are significant for our understanding of the text of the Psalter. For example, the MT of Ps 22:17 (16 ET) reads "like a lion (כארי) are my hands and feet," which hardly makes good sense. The Septuagint (21:17 LXX)–supported by a few medieval Hebrew manuscripts–has a very different reading: "They have pierced (ὤρυξαν) my hands and feet," which is of interest to many Christian exegetes.[13] Although 4QPs^{f} (= 4Q88) contains much of Ps 22:15–17, the key letters are unfortunately not preserved–but they are found in 5/6ḤevPs (= 5/6Ḥev 1b): "They have pierced my hands and feet!"[14] A second example occurs in Psalm 145, which is an acrostic poem and should thus have twenty-two verses beginning with successive letters of the Hebrew alphabet. But the Masoretic Psalter completely omits one verse (beginning with *nûn*), thus containing only twenty-one verses. This psalm is preserved in only one Psalms scroll, 11QPs^{a} (= 11Q5)–which contains the missing *nûn* verse at the end of verse 13: "God is faithful in all his ways, and gracious in all his deeds."[15] This reading, supported by the Septuagint[16] and one medieval Hebrew manuscript,[17] is a compelling example of the value of the Psalms scrolls for determining the earliest or best text of Scripture in specific cases.

1.4 Original Contents of the Psalms Scrolls; the Large Psalms Scroll

a. Original Contents

Most of the Psalms scrolls are fragmentary and were much larger when copied; but several never contained more than a few compositions or parts of a Psalter. For example, 4QPs^{g} (= 4Q89), 4QPs^{h} (= 4Q90), and 5QPs (= 5Q5) probably contained only Psalm 119, and 4QPs^{b} (= 4Q84) may have ended with Psalm 118. Of all forty manuscripts, only five (1QPs^{a} [= 1Q10],

---

[12] Not counting orthographic differences.

[13] Such a reading can be interpreted as alluding to crucifixion.

[14] כארי 5/6ḤevPs (= 5/6Ḥev 1b) MT$^{mss, edd}$, LXX (ὤρυξαν)] כארו MT$^{mss, edd}$.

[15] נאמן אלוהים בדבריו וחסיד בכול מעשיו.

[16] Πιστὸς κύριος ἐν[+ πᾶσιν = בכול LXX^{mss}] τοῖς λόγοις αὐτοῦ καὶ ὅσιος ἐν πᾶσι τοῖς ἔργοις αὐτοῦ.

[17] Listed as Kennicott #142.

4QPs^{e} [= 4Q87], 4QPs^{f} [= 4Q88], 11QPs^{b} [= 11Q6], 11QPs^{d} [= 11Q8]) now preserve material from both Psalms 1–89 and 90–150. While this may be the result of severe damage, it may also suggest that some scrolls originally contained material from only the earlier part of the book of Psalms, while others presented material from the later part.

b. The Large Psalms Scroll from Cave 11

As the largest of all the extant Psalms manuscripts, 11QPs^{a} [= 11Q5] features prominently in discussions concerning the book of Psalms at Qumran. The manuscript was copied around 50 C.E. and preserves forty-nine compositions—with at least one more (Psalm 120) now missing but originally present—in the following order:[18]

> Psalm 101 → 102 → 103; 109; 118 → 104 → 147 → 105 → 146 → 148 [+ 120] → 121 → 122 → 123 → 124 → 125 → 126 → 127 → 128 → 129 → 130 → 131 → 132 → 119 → 135 → 136 (with Catena) → 145 (with postscript) → 154 → *Plea for Deliverance* → 139 → 137 → 138 → Sirach 51 → *Apostrophe to Zion* → Psalm 93 → 141 → 133 → 144 → 155 → 142 → 143 → 149 → 150 → *Hymn to the Creator* → *David's Last Words* → *David's Compositions* → Psalm 140 → 134 → 151A → 151B → blank column [*end*]

Such an arrangement is obviously quite different from that found in the MT and LXX Psalters. This single manuscript would soon give rise to heated debate, as outlined and assessed in the next section.

2. EARLY PROPOSALS CONCERNING THE PSALMS SCROLLS

2.1 A Note on Terminology

Terminology commonly used with respect to the Psalter is often inadequate for discussing this book in the Dead Sea Scrolls. Because the masoretic collection is the only Hebrew Psalter to have survived in its complete form, the MT is used as the basis for comparison with the various Psalms scrolls. This easily leads to the false supposition that the MT-150 Psalter is normative, while all others are aberrant or secondary. It is essential that we use neutral language as far as possible, which requires avoiding terminology inappropriate to the Second Temple period. In particular, the terms "biblical," "canonical," "noncanonical," and "masoretic" should not be employed with reference to the Qumran era, since they presuppose the closure of the Hebrew canon, which took place later. Terms such as "Scripture," the "MT-150 Psalter" (the received MT), and the "11QPs^a-Psalter" (the Psalter represented by 11QPs^a [= 11Q5]) are more neutral and thus better suited for describing the material under discussion.

---

[18] For the siglum "→" see n10 (above).

2.2 James Sanders's "Qumran Psalms Hypothesis"

The first Psalms manuscripts discovered did not arouse great excitement among scholars, since they were quite fragmentary and seemed very similar to the Masoretic Psalter. But with James Sanders's edition of 11QPs^a (= 11Q5) in 1965, the situation changed decisively.[19] This scroll diverges radically from the MT-150 Psalter both in the ordering of contents and in the presence of additional compositions.[20] In several articles commencing in 1966,[21] Sanders developed several conclusions that challenge traditional views on the text and canonization of the book of Psalms. According to Sanders, 11QPs^a (= 11Q5) is part of the "Qumran Psalter," an earlier form of the Hebrew Psalter before its finalization and viewed by the community at Qumran as a true Davidic Psalter. He also proposed that the Qumran Psalter was regarded by its readers as "canonical" (since it incorporated Psalms 1–89, which had been finalized–yet also as "open" (able to admit additional contents or arrangements, since Psalm 90 onward was still fluid). This process of stabilization was arrested when the founders of the Qumran community left Jerusalem, at a time when Psalms 1–89 had reached finalization. The gathering of Psalm 90 and beyond then developed independently in two directions, resulting in two collections that had Psalms 1–89 in common but differed from Psalm 90 onward. These are what Sanders termed the "Qumran Psalter," of which almost all the second half is represented by 11QPs^a (= 11Q5), and the Psalter found in the MT, whose second half comprises Psalms 90–150.

If these proposals are correct, the evidence from Qumran attests not to a single, finalized Psalter, but to more than one edition–which would mean that there was no closed and generally accepted form of the Psalter among

Sanders, "Variorum in the Psalms Scroll (11QPs^a)," *HTR* 59 (1966): 83–94; idem, "Cave 11 Surprises and the Question of Canon," *McCQ* 21 (1968): 1–15; idem, "The Qumran Psalms Scroll (11QPs^a) Reviewed," in *On Language, Culture, and Religion: In Honor of Eugene A. Nida* (ed. M. Black and W. A. Smalley; The Hague: Mouton, 1974), 79–99.

[22] Sanders, *Dead Sea Psalms Scroll*, 8.

Jews in the first half of the first century C.E. Subsequent discussion surrounding the Psalms scrolls concerns four theses developed by Sanders, constituting what Peter Flint terms the "Qumran Psalms Hypothesis."[22]

- *Gradual Stabilization*: 11QPs^{a} (= 11Q5) witnesses to a Psalter that was being gradually stabilized, from beginning to end.
- *Textual Affiliations*: Two or more Psalters are represented among the scrolls from the Judean Desert.
- *Status*: 11QPs^{a} (= 11Q5) contains the latter part of a true scriptural Psalter. It is not a secondary collection that is dependant upon Psalms 1–150 as found in the Received Text [MT].
- *Provenance*: 11QPs^{a} (= 11Q5) was compiled at Qumran and thus may be termed the "Qumran Psalter."

3. ASSESSMENT OF THE "QUMRAN PSALMS HYPOTHESIS"

3.1 Stabilization of the Psalter

The first thesis states that 11QPs^{a} (= 11Q5) witnesses to a Psalter that was being gradually stabilized, from beginning to end. Any evaluation must recognize that various groupings of psalms are present in 11QPs^{a} (= 11Q5), other Psalms scrolls, and the Masoretic Psalter. We may regard agreement between the MT and the scrolls as indicative of stability (e.g., Psalms 49 → 50 in 4QPs^{c} [= 4Q85]), while disagreement in order or content provides evidence of fluidity (e.g., Psalms 103 → 112 in 4QPs^{b} [= 4Q84] illustrates fluidity in *order*, and Psalm 109 → *Apostrophe to Zion* in 4QPs^{f} [= 4Q88] shows fluidity of *content*). Using the criteria of order[23] and content,[24] statistics emerge that provide two bases for comparison between Psalms 1–89 and Psalms 90–150.[25] These are the proportion of agreements and conflicts with the order of the MT (table 1), and the overall number of times that specific psalms are joined to nonmasoretic compositions (table 2). When viewed together, these results provide a firm basis for comparing the stability and fluidity of Psalms 1–89 and 90–150 in relation to each other.

---

[23] I.e., differing arrangements of adjoining psalms.

[24] I.e., the linkage with compositions present in or absent from the Masoretic Psalter.

[25] This methodology derives from Gerald H. Wilson's pioneering investigation of the consecutive arrangement of Psalms in the scrolls, in "The Qumran Psalms Manuscripts and the Consecutive Arrangement of Psalms in the Hebrew Psalter," *CBQ* 45 (1983): 377–88. Wilson's work reinforced the thesis that these manuscripts attest to overall stability for Psalms 1–89, and to general fluidity for Psalm 90 onward.

Table 1. Agreements and Conflicts with the Masoretic Text in Arrangement

Books (Psalms)	*Consecutive Joins*	*Agreements with MT*	*Conflicts with MT*
I (1–41)	20	18 = 90%	2 = 10%
II (42–72)	13	12 = 92%	1 = 8%
III (73–89)	6	6 = 100%	0
IV (90–106)	18	7 = 39%	11 = 61%
V (107–150)	62	24 = 39%	38 = 61%

When we compare the evidence for books I–III with that for books IV–V,[26] the small number of disagreements with the MT-150 Psalter for Psalms 1 to 89 contrasts markedly with the high incidence of variation for Psalms 90 to 150. For books I–III, thirty-six psalms are found in the same arrangement as in the MT, which represents 92 percent of the total, as opposed to only three psalms in a conflicting order (8 percent). For books IV–V, only 31 psalms support the masoretic arrangement (39 percent), while 49 are in a conflicting order (61 percent).

Table 2. Conflicts with the Masoretic Text in Content

Books (Psalms)	*"Apocryphal" Psalms*
I (1–41)	0
II (42–72)	0
III (73–89)	0
IV (90–106)	2
V (107–150)	11

The second correlation involves *content*, meaning the presence or absence of compositions that are not found in the Masoretic Psalter. These additional pieces are never joined with any of Psalms 1–89, but are linked thirteen times with compositions that appear in Psalms 90–150 of the MT. The order and content of Psalms 1–89 thus vary little from that of the MT-150 Psalter, while many divergences are evident for Psalm 90 and beyond. These data support Sanders's thesis that during the Qumran period Psalms 1–89 were stabilized over time, but Psalms 90 onward remained fluid (the precise cutoff point is not certain, since we probably should not speak of "books" of the Psalter even as late as the first century C.E.). However, comparison of the older and later Psalms scrolls indicates that this stabilization did not take place gradually, but in two distinct stages: Psalms 1–89 (or so) prior to the first century B.C.E., and 90 onward toward the end of the first century C.E.

---

[26] The traditional division of the Psalter into five "books" is used here for convenience only; it is not clear whether this division was known at Qumran or had even been finalized by the beginning of the Common Era.

3.2 Two or More Editions of the Psalter

Sanders's second thesis states that the Psalms scrolls attest not to one finalized Psalter, but to more than one edition of the book of Psalms: the "11QPs^a-Psalter," probably the "MT-150 collection," and possibly others besides. Evaluation of this proposal entails investigation of the differences between the various Psalms scrolls. Eugene Ulrich divides the textual variations between manuscripts into three principal groups: orthographic differences, individual variant readings, and variant literary editions.[27] Of particular significance for this article is the third group, which Ulrich defines as "an intentional reworking of an older form of the book for specific purposes or according to identifiable editorial purposes."[28] Deciding whether a particular book or passage constitutes a literary edition entails an assessment of individual variant readings, which may be quite limited in scope (involving a letter or word), or more extensive (involving several words or different arrangements of material). With respect to many of the Psalms scrolls and the Masoretic Psalter, two types of variation are prominent: differences in order of adjoining psalms, and the presence or absence of entire compositions.[29] When we have carefully collated all forty Psalms scrolls, a comparative analysis indicates the existence of three major collections, as well as several minor ones. The three main groups are an early Psalter comprising Psalms 1 to 89 (or thereabouts), the MT-150 Psalter, and the 11QPs^a-Psalter.

---

[27] Eugene C. Ulrich, "Pluriformity in the Biblical Text, Text Groups, and Questions of Canon," in *Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols., *STDJ* 11; Leiden: Brill, 1992), 1:23–41, esp. 29; cf. idem, "Double Literary Editions of Biblical Narratives and Reflections on Determining the Form to Be Translated," in *Perspectives on the Hebrew Bible: Essays in Honor of Walter J. Harrelson* (ed. J. L. Crenshaw; PRSt 15; Macon, GA: Mercer University Press, 1988), 101–16.

[28] Ulrich, "Pluriformity in the Biblical Text," 32; cf. idem, "Double Literary Editions," 103–4. The longer MT and shorter LXX versions of the David and Goliath story (1 Samuel 17–18) are two variant editions of the same passage.

[29] See section 1.3 (above).

a. An Early Psalter

As seen above,[30] the Psalms scrolls bear witness to an early collection of psalms whose arrangement was virtually stabilized well before the second century B.C.E., which represents one milestone in the formation of the book of Psalms. The lack of complete evidence makes it unclear where the cutoff point between the largely stabilized collection and the fluid part of the Psalter should be; Psalm 89 is likely, but the earlier collection may have ended with another psalm such as 72. It is possible that specific Psalms scrolls originally contained only this shorter collection of psalms, but this seems impossible to demonstrate.

b. The 11QPs^{a}-Psalter

This Psalter contains both Psalms 1–89 and the arrangement found in 11QPs^{a} (= 11Q5). The collection is found in at least three manuscripts on the basis of a common arrangement of key compositions or blocks of material: 11QPs^{a} (= 11Q5), 11QPs^{b} (= 11Q6) (Catena, *Plea*, *Apostrophe to Zion*, the sequence 141 → 133 → 144, other specific variants), and 4QPs^{e} (= 4Q87) (the sequence 118 → 104 → [147] → 105 → 146, other individual variants). While the earlier part of the 11QPs^{a}-Psalter is not found in 11QPs^{a} (= 11Q5), material from Psalms 1–89 (as well as the later part) is preserved in both 4QPs^{e} (= 4Q87) and 11QPs^{b} (= 11Q6).[31]

c. The MT-150 Psalter

Although several of the thirty-six manuscripts found at Qumran support the general arrangement of Psalms 1–89, it is surprising that none *unambiguously* confirms the longer order of the received MT (1–150) against 11QPs^{a} (= 11Q5). Appealing to arrangements such as Psalms 125–130[32] in 4QPs^{e} (= 4Q87) in support of the MT-150 Psalter is inconclusive, since we find this also in 11QPs^{a} (= 11Q5). It is both misleading and unscientific for scholars to presume that all biblical scrolls originally contained the order found in the MT unless otherwise proved! For firm evidence of the MT-150 collection, we must turn to Masada, where MasPs^{b} (= Mas1f)–dated to the second half of the first century B.C.E.–clearly supports this structure (ending in Psalm 150) against that of 11QPs^{a} (= 11Q5) (Psalm 150 → *Hymn to the Creator*). It is possible that some smaller scrolls (e.g., 1QPs^{b} [= 1Q11])[33] may have supported the MT-150 Psalter when fully extant, but these are either quite fragmentary or ambiguous in that they also support the structure of 11QPs^{a} (= 11Q5). Thus, no Qumran manuscript supports the MT-150 arrangement against 11QPs^{a} (= 11Q5) on the macrolevel; however, it may be possible to demonstrate the affinity of some Qumran Psalms scrolls with the MT on the basis of key individual variants. Two likely candidates are 4QPs^{c} (= 4Q85) and 5/6ḤevPs (= 5/6Ḥev 1b), which contain very few textual variants against the MT, although neither preserves material beyond Book II of the Psalter.[34]

---

[30] In section 3.1.

[31] In 4QPs^{e} (= 4Q87): Pss 76:10–12; 77:1; 78:6–7, 31–33; 81:2–3; 86:10–11; 88:1–5; 89:44–48, 50–53. In 11QPs^{b} (= 11Q6): Pss 77:18–21; 78:1.

[32] 4QPs^{e} (= 4Q87) does not actually preserve all these Psalms, but reconstruction suggests 125 → 126 [+ 127 + 128] → 129 → 130.

d. Additional Collections of Psalms

Further arrangements of psalms appear in several manuscripts from Qumran. The most prominent are: 4QPs^{b} (= 4Q84) (with Psalms 103 → 112, but 104–111 lacking); 4QPs^{d} (= 4Q86) (Psalms 106 → 147 → 104); 4QPs^{f} (= 4Q88) (with Psalms 107 [+ 108?] + 109 and several "apocryphal" compositions); 4QPs^{k} (= 4Q92) (preserves the bottoms of two adjoining columns, the first containing parts of Ps 135:6–16 and the second portions of Ps 99:1–5); 4QPs^{n} (= 4Q95) (Ps 135:11–12 followed directly by 136:22–23); and 11QapocrPs (= 11Q11; contains three "apocryphal" compositions followed directly by Psalm 91–see Appendix 2, section 2).

e. Secondary Collections and Three Editions

As occurs in other manuscripts,[35] some Psalms scrolls most likely contain "secondary collections" (compositions selected from a fixed scriptural collection and then rearranged for secondary purposes). Two examples are 5Q522 ("apocryphal" compositions followed by Psalm 122); and 11QapocrPs (= 11Q11; with Psalm 91 excerpted from a larger collection of psalms). On the other hand, the existence of multiple literary editions of other biblical books at Qumran or in the LXX (notably Exodus, Samuel, Jeremiah, Daniel)[36] lends support for the existence of variant editions of the Psalter.

The three main psalms groupings identified above may be classified as Edition I (an early edition of the Psalter containing Psalms 1 or 2 to 89),

---

[33] This scroll contains Pss 126:6; 127:1–5; 128:3.

[34] Ending with Pss 53:1 and 31:22, respectively.

[35] See section 3.3.

[36] See section 3.3.

Edition IIa (the 11QPs^a-Psalter, consisting of Edition I plus the arrangement found in the large Psalms scroll), and Edition IIb (the MT-150 Psalter, comprising Edition I plus Psalms 90–150 as found in the MT). It appears that IIa and IIb were both completed before the Qumran period, although one is hard-pressed to find firm evidence of Edition IIb in any Hebrew manuscript before the second half of the first century B.C.E. (when MasPs^b was copied). We cannot rule out the existence of yet further editions of the Psalter among the Psalms scrolls (e.g., the collection in 4QPs^f [= 4Q88], whose arrangement differs from both the MT and 11QPs^a [= 11Q5]), but this seems impossible to prove owing to the fragmentary state of the manuscript evidence.

3.3 11QPs^a as Part of a Scriptural Psalter

a. Early Developments

The third thesis of the "Qumran Psalms Hypothesis" involves the status of 11QPs^a (= 11Q5): that it contains the latter part of a true scriptural Psalter and is not a secondary collection dependant upon Psalms 1–150 as found in the MT. Reactions to this proposal have been sharp and numerous. In 1966, Shemaryahu Talmon and Moshe H. Goshen-Gottstein published separate articles asserting that 11QPs^a (= 11Q5) is not part of a true scriptural Psalter at all, but a secondary or nonbiblical collection.[37] Marshalling arguments–such as the incompatibility of "David's Compositions"[38] with a scriptural Psalter (Goshen-Gottstein), or that 11QPs^a (= 11Q5) contains material supplementary to Scripture (Talmon)–both scholars sought to demonstrate that the "Qumran Psalter" is a liturgical compilation of psalms selected from an already finalized arrangement of 150 psalms as found in the received Psalter. More opposition followed. In a series of articles from 1973 to 1980,[39] Patrick Skehan also advocated the secondary status of 11QPs^a (= 11Q5), which he classified as a "library edition" or an "instruction book" containing the supposed works of David. Reiterating several arguments put forward by his two Israeli counterparts, Skehan went further by seeking to demonstrate that the MT-150 Psalter is chronologically earlier than 11QPs^a (= 11Q5). Shortly before his death, Skehan offered his final assessment of the Psalms scroll as "an instruction book for budding Levite choristers" at the temple, during the Oniad high priesthood (ca. 200 BC).[40] In more recent times, Ben Zion Wacholder[41] and Menahem Haran[42] have supported the view that 11QPs^a (= 11Q5) contains a rearrangement or supplementation of the MT-150 Psalter.

[38] This prose composition is found in col. 27 of 11QPs^a (= 11Q5).

[39] Especially Patrick W. Skehan, "A Liturgical Complex in 11QPs^a," *CBQ* 35 (1973): 195–205; and idem, "Qumran and Old Testament Criticism," in *Qumrân: Sa piété, sa théologie et son milieu* (ed. M. Delcor; BETL 46; Paris: Duculot, 1978), 163–82.

The debate between Sanders and these opponents constitutes the first phase of the Psalms debate, focusing almost exclusively on a single manuscript. We may concur with George Brooke that this phase (up to ca. 1980) largely resulted in an impasse.[43] It became increasingly clear that the Qumran Psalms Hypothesis (especially the fourth thesis) could only be properly evaluated with recourse to additional data. This evidence was forthcoming in the Psalms scrolls from Cave 4 and—to a lesser extent—Cave 11. Although most of these texts are fragmentary, they would provide the fuller data needed for evaluating the Psalms Hypothesis.

b. Gerald Wilson on the Structure of 11QPs^a (= 11Q5)

The second phase was ushered in by a series of articles and a Yale dissertation by Gerald H. Wilson, which appeared from 1983 to 1985.[44] Since Skehan had given him access to his own notes and transcriptions, Wilson was able to take into consideration not only 11QPs^a (= 11Q5), but also almost all of the Cave 4 scrolls as well. His research expanded the Psalms debate and contributed significantly to the discussion. Wilson's conclusions support several elements of the Qumran Psalms Hypothesis, especially those of stabilization over time[45] and the status of 11QPs^a (= 11Q5) as a true scriptural Psalter rather than a secondary collection. With respect to the scriptural status of 11QPs^a^ (= 11Q5), Wilson's analysis shows that this collection was organized in accordance with principles similar to those found in books IV and V in the MT-150 Psalter. Such organization is most evident in the juxtaposition of superscripts and postscripts[46] that highlight different kinds of groupings in 11QPs^a^ (= 11Q5). One example is found in fragments e 1–3 and columns 1–2:

---

[40] Patrick W. Skehan, "The Divine Name at Qumran, in the Masada Scroll, and in the Septuagint," *BIOSCS* 13 (1980): 14–44, esp. 42.

[41] "David's Eschatological Psalter: 11QPsalms^a," *HUCA* 59 (1988): 23–72. Wacholder views 11QPs^a (= 11Q5) as a rearrangement of the MT-150 Psalter supplemented by additional material.

[42] "11QPs^a and the Canonical Book of Psalms," in *'Minhah le-Nahum': Biblical and Other Studies Presented to Nahum M. Sarna in Honour of His 70th Birthday* (ed. M. Zvi Brettler and M. A. Fishbane; JSOTSup 154; Sheffield: JSOT Press, 1993), 193–201, esp. n52.

[43] George J. Brooke, "Psalms 105 and 106 at Qumran," *RevQ* 54 (1989): 267–92, esp. 269.

[44] Gerald H. Wilson, "Qumran Psalms Manuscripts and Consecutive Arrangement," *CBQ* 45 (1983): 377–88; idem, "The Qumran Psalms Scroll Reconsidered: Analysis of the Debate," *CBQ* 47 (1985): 624–42; idem, *The Editing of the Hebrew Psalter* (SBLDS 78; Chico, CA: Scholars Press, 1985).

[45] See section 3.1 (above).

Psalm	*Superscript*	*Postscript*
118	[הודו ל𐤉𐤄𐤅𐤄 כי־טוב][47]	————
104	לדויד	הללויה
147	[————]	[הללו יה]
105	הודו ל𐤉𐤄𐤅𐤄 כי־טוב	[?]
146	[?]	הללויה
148	————	[הללו יה]

Since no two of these psalms occur in their traditional order, Wilson emphasizes the regularity of this structure but also its variation from the MT-150 Psalter. He also regards the alternation between הודו and הללו־יה psalms as systematic, since the הודו phrase in Psalm 105 is an "addition" when compared to the MT-150 Psalter. Wilson concludes that this addition was intentionally made because it serves to fill out the symmetry of the grouping in 11QPs^a^ (= 11Q5).[48] The similarity in organization to the Received Psalter (MT) is apparent; for instance, there the principle of juxtaposing הללו־יה psalms is found in the grouping of Psalms 104–106 which concludes book IV, and in the grouping of 146–150 which concludes book V:[49]

Psalm	*Superscript*	*Postscript*
104		הללויה
105		הללויה
106	הודו–הללויה	Doxology–הללויה
146	הללויה	הללויה
147	הללויה	הללויה
148	הללויה	הללויה
149	הללויה	הללויה
150	הללויה	הללויה

---

[46] The term "postscripts" as used here by Wilson is loosely defined, since the hallelujahs and doxologies that he cites do not strictly qualify.

[47] This doxology is not preserved on frag. e, but Wilson supplies it on the basis of its appearance in the MT and the Catena in col. 16.

[48] Wilson, *Editing of the Hebrew Psalter*, 126.

[49] For further comments and examples, see ibid., 126–27.

c. Peter Flint on 11QPs^a (= 11Q5) as the Foremost Psalter at Qumran

Perhaps the most thorough analysis so far is that of Peter W. Flint (1997),[50] who examines the issues with recourse to all forty Psalms scrolls from Qumran and other Judean sites. He first observes that both different editions of scriptural books and secondary liturgical compilations are attested in antiquity. For example, there are two Jewish editions of Exodus (the first represented in 4QpaleoExod^m [= 4Q22] the second in the MT), and two forms of Jeremiah (a shorter form in 4QJer^b [= 4Q71] and the LXX; and a longer form in the MT, 2QJer [= 2Q13], 4QJer^a [= 4Q70], 4QJer^c [= 4Q72]). Conversely, secondary liturgical compilations are represented by the phylacteries found at Qumran and manuscripts such as 4QDeut^j (= 4Q37), which contains a liturgical reordering of previously finalized poetic texts from Exodus and Deuteronomy. Thus, the Judean data in general allow for both possibilities: that 11QPs^a (= 11Q5) belongs to an edition of the book of Psalms, or that it is a collection drawn from a Psalter that had previously been finalized. The challenge, then, is deciding how to determine whether or not a collection such as this was viewed as Scripture at Qumran.

With respect to the Psalms as "Scripture" at Qumran, Flint first considers whether there are any formal indications of scriptural status for the Psalter. One relevant text is 4QMMT^d (= 4Q397), which according to the editors points to "David" (i.e., the Psalms) as the most prominent component in the third part of the Jewish canon, which was still in the process of formation:

> [And] we have [also written] to you that you should examine the book of Moses [and] the book[s of the Pr]ophets and Davi[d]...
> (4Q397 frags. 14–21 C lines 9–10; cf. Luke 24:44)

Another important passage is in the *War Scroll* (4Q491), which specifically refers to the Psalter as a "book" (ספר־התהלים).[51] However, while it seems clear that the "Psalter" or "Book of Psalms" was viewed as Scripture at Qumran, additional evidence is required for determining which specific form(s) of the Psalter were regarded as such. For Flint, the attempts by earlier scholars to show that 11QPs^a (= 11Q5) is not a true scriptural Psalter but a secondary liturgical compilation prove to be unconvincing because all presume that the arrangement of the MT-150 Psalter or its textual form had been finalized and was accepted by virtually all Jews as the "Book of Psalms" well before the second century B.C.E.

---

[50] Flint, *Dead Sea Psalms Scrolls*, esp. 202–27. The recent work by Ulrich Dahmen is noted but not examined in the present article—*Psalmen- und Psalter-Rezeption im Frühjudentum. Rekonstruktion, Textbestand, Struktur und Pragmatik der Psalmenrolle 11QPs^a aus Qumran* (*STDJ* 49; Leiden: Brill 2003).

[51] 4Q491, frag. 17 line 4.

On the contrary, he accepts the 11QPs^{a} (= 11Q5) collection (Edition IIa) as a true scriptural Psalter on three main grounds: the attribution to David, structural principles, and usage (i.e., quotations and allusions). The explicit statement in "David's Compositions" that 4,050 compositions–undoubtedly including those in 11QPs^{a} (= 11Q5)–were spoken by David "through prophecy"[52] is reinforced by the arrangement of compositions in 11QPs^{a} (= 11Q5), which forms clusters dominated by psalms with Davidic titles. Flint also endorses Wilson's view that similar organizing principles lie behind these clusters in the scroll and behind the compilation of the latter part of the MT-150 Psalter, but regards this feature as only one of several pillars supporting the scriptural status of this collection. These factors, plus the absence of any Psalms scroll from Qumran that clearly confirms the longer order of the received MT-150 against 11QPs^{a} (= 11Q5), leads him to conclude that the 11QPs^{a}-Psalter (Edition IIa) is the foremost representative of the book of Psalms in the Dead Sea Scrolls.

3.4 Provenance of the 11QPs^{a}-Psalter

The final element in James Sanders's Qumran Psalms Hypothesis is that 11QPs^{a} (= 11Q5) was compiled at Qumran and thus may be termed the "Qumran Psalter." Four possible arguments–which are unconvincing to this author–could be used in support: (a) This Psalter is found in at least three manuscripts (4QPs^{e} [= 4Q87], 11QPs^{a} [= 11Q5], and 11QPs^{b} [= 11Q6]), which shows that it played a significant role in the life of the community. (b) The *Four Songs for Making Music over the Stricken* mentioned in *David's Compositions*[53] most likely refer to the collection found in 11QapocrPs, which was used at Qumran. (c) The 364-day solar calendar evident in *David's Compositions*[54] is indicated in other writings that are undoubtedly of Qumranic origin (e.g., 4QMMT). (d) 11QPs^{a} (= 11Q5) displays what Emanuel Tov terms the expanded "Qumran orthography" or the "Qumran practice" (which for some scholars is indicative of Qumran provenance).[55]

---

[52] בנבואה (11QPs^{a} 27.11). An English translation of *David's Compositions* is provided in appendix 2.

[53] 11QPs^{a} 27.9–10.

[54] Note the 364 songs for the days of the year and 52 songs for Sabbath offerings (11QPs^{a} 27.6–7).

[55] Cf. Emanuel Tov, "Hebrew Bible Manuscripts from the Judaean Desert: Their Contribution to Textual Criticism," *JJS* 39 (1988): 23–25; idem, *Textual Criticism of the Hebrew Bible* (Assen: Van Gorcum, 1992), 108–9.

While these arguments admit the possibility that the Qumran covenanters assembled the 11QPs^{a}-Psalter, they do not prove this to be so. Several other factors indicate that the collection was in fact compiled and used by wider Jewish circles–including those at Qumran–who advocated the solar calendar: (a) The individual compositions in 11QPs^{a} (= 11Q5) all seem to predate the Qumran period. (b) The absence of "sectually explicit" Qumranic indicators[56] in 11QPs^{a} (= 11Q5) suggest that none of the pieces was actually composed there. (c) Expanded orthography is by no means a sure indicator of necessarily Qumran provenance.[57] (d) The 364-day solar calendar evident in this collection is not restricted to Qumran but is also attested in other Jewish works written before the founding of the community (e.g., *1 Enoch*, *Jubilees*, the *Temple Scroll*).

The evidence suggests that as a collection the 11QPs^{a}-Psalter originated before the Qumran period; there is no convincing proof that it was compiled by the covenanters. More recently, Sanders has stated that 11QPs^{a} (= 11Q5) did not originate at Qumran but was brought there from the outside, possibly as the *hôn* (substance/wealth) offered as surety by a novice on entering the community.[58] The notion of an 11QPs^{a}-Psalter that was used not only at Qumran, but also among other Jewish circles advocating the solar calendar, attests to a widespread type of Judaism that possibly included the Sadducees. This is in marked contrast to the Pharisees and rabbis with their 354-day lunar calendar, and thus it cannot be viewed as sectarian. Restricting the solar calendar to "Qumran or other sects" (as termed by Moshe H. Goshen-Gottstein)[59] is inappropriate and constitutes a retrospective judgment from the standpoint of a later status quo.

Yet we must draw a distinction between the origin of collections and the production of individual scrolls. While the 11QPs^{a}-Psalter was compiled among wider circles that embraced the 364-day solar calendar, it seems likely that at least some or all of the representative manuscripts (11QPs^{a} [= 11Q5], 4QPs^{e} [= 4Q87], 11QPs^{b} [= 11Q6]) were copied at Qumran in view of the apparent popularity of this Psalter among the covenanters and because scrolls were produced at the site.

---

[56] For example, references to the Righteous Teacher.

[57] For evidence on why the thesis of "Qumran orthography" is to be regarded as far from convincing, see Ulrich, "Pluriformity in the Biblical Text," 1:31–32. Ulrich disputes Tov's position on two main grounds: (a) Examples of expanded orthography are found in Palestine outside of Qumran and in Egypt. (b) The tendency of "copyists" at Qumran to reproduce texts exactly as they found them. See now his "Multiple Literary Editions: Reflections toward a Theory of the History of the Biblical Text," in *Current Research and Technological Developments on the Dead Sea Scrolls: Conference on the Texts from the Judean Desert, Jerusalem, 30 April 1995* (ed. D. W. Parry and S. D. Ricks; *STDJ* 20; Leiden: Brill), 78–105 + pls. 1–2, esp. 93–96.

[58] James A. Sanders, "Psalm 154 Revisited," in *Biblische Theologie und gesellschaftlicher Wandel für Norbert Lohfink S.J.* (ed. G. Braulik, W. Gross, and S. E. McEvenue; Freiburg: Herder, 1993), 296–306, esp. 301–2 and n22. In this more recent article, Sanders focuses on the "acquisition policy" of the Qumran community for its library.

[59] Goshen-Gottstein, "The Psalms Scroll (11QPs^{a})," 28.

On the question of provenance, Sanders's earlier thesis that 11QPs^{a} (= 11Q5) was compiled at Qumran has been found wanting, but his more recent proposal that it was brought there from outside is to be welcomed. The view offered above–that the three relevant scrolls were copied at Qumran–is still somewhat at variance with Sanders' more recent position, but this is in fact a minor point. The conclusion reached here accords with his larger vision by affirming that the 11QPs^{a}-Psalter was used by wider Jewish circles rather than one small group or "sect" living in the Judean desert.

4. CONCLUSIONS

Several findings emerge when we consider all forty Psalms scrolls. With respect to the manuscripts themselves, the following items seem clear: the Psalter is the book most attested among the scrolls; this material is significant for our understanding of early prose and stichometry; the superscriptions are uniformly present from the earliest scroll (4QPs^{a} [= 4Q83], ca. 150 B.C.E.) onward; several manuscripts contain material and/or arrangements at variance with the MT-150 Psalter; the arrangement of Psalms 90–150 as found in the Received Text is not clearly confirmed by any Qumran scroll but by a single one from Masada; and the 11QPs^{a}-Psalter is attested by at least three scrolls (4QPs^{e} [= 4Q83], 11QPs^{a} [= 11Q5], 11QPs^{b} [= 11Q6]). These data draw attention to the need for terminology that is suitable for the Second Temple period. Accordingly, this essay has avoided "biblical," "canonical," "noncanonical," and "Masoretic" as far as possible because they prematurely assume the closure of the Hebrew canon. I have used terms such as "Scripture," "MT-150 Psalter," and "11QPs^{a}-Psalter" since they are more neutral and thus more appropriate.

With respect to the Qumran Psalms Hypothesis, unanimity may never be reached, because some of its components challenge deep-seated theological beliefs held by various scholars and faith communities. Nevertheless, the evidence from the Judean desert generally confirms the four theses comprising this hypothesis.[60] First, collation and analysis of the Psalms scrolls show that the Psalter was stabilized not gradually, but in at least two distinct stages. Second, we may conclude–in the light of multiple literary editions of other books among the scrolls–that the Psalms manuscripts attest to different editions of the book of Psalms as late as the mid-first century C.E.: the 11QPs^{a}-Psalter, the MT-150 collection (at least in MasPs^{b} [= Mas1f]), and maybe others besides (e.g., represented by 4QPs^{f} [= 4Q88]). Third, 11QPs^{a} (= 11Q5) contains the latter part of a true scriptural Psalter, and it is not a secondary collection dependent upon Psalms 1–150 as found in the Received Text. Clearly represented by at least three manuscripts, and with no conclusive support for the MT-150 arrangement at Qumran, the 11QPs^{a} (= 11Q5) collection is the foremost representative of the book of Psalms among the Dead Sea Scrolls. Fourth, 11QPs^{a} (= 11Q5) was not compiled at Qumran and thus should not be termed the "Qumran Psalter." While most likely copied there, it was compiled before the Qumran period and is one representative of the "11QPs^{a}-Psalter" used at Qumran and in some other Jewish circles that advocated the solar calendar.

---

[60] These are listed in section 2.2.

Several other issues pertaining to the Psalms scrolls are merely listed here due to lack of space, but each is worthy of further investigation: (a) The relationship between the Psalms scrolls and the LXX Psalter (e.g., 11QPs^{a} [= 11Q5] and the Greek Psalter share some distinctive readings and end with Psalm 151).[61] (b) The nature and structure of smaller collections within the larger Psalters in certain scrolls (e.g., the Psalms of Ascent). (c) Links between the Psalms manuscripts and other documents or collections of related material that quote or allude to specific Psalms (e.g., the *Damascus Document*, 4Q174 and 4Q177, 4Q380 and 4Q381, *11QMelchizedek*). (d) A possible relationship between scrolls such as 11QPs^{a} (= 11Q5) and the Syriac Psalter (e.g., with readings and entire compositions [Psalms 151, 154, 155] common to both).

APPENDIX 1
PSALMS SCROLLS FROM THE JUDEAN DESERT

Details of the forty scrolls are summarized below. Column 3 (Variant Order) specifies which scrolls contain Psalms in an order at variance with the masoretic sequence. Column 4 (Different Content) denotes manuscripts that contain "apocryphal" compositions in addition to psalms found in the MT. Column 5 (Range of Contents) lists the earliest and latest verses occurring in a scroll in terms of their masoretic order. However, many manuscripts are quite fragmentary and thus contain only part of the specified content. Moreover, in several scrolls the order of preserved material differs from that of the Received Psalter (cf. col. 3). Column 6 (Date or Period When Copied) indicates the approximate paleographical dating of each manuscript.

---

[61] See Flint, *Dead Sea Psalms Scrolls*, 228–36.

Scroll by Siglum	*Scroll by Number*	*Variant Order*	*Different Content*	*Range of Contents (Using MT Order)*	*Date or Period When Copied*
1QPs^{a}	1Q10			86:5 to 119:80	Herodian
1QPs^{b}	1Q11			126:6 to 128:3	Herodian

APPENDIX 2

"APOCRYPHAL" PSALMS AND OTHER COMPOSITIONS IN THE PSALMS SCROLLS

This appendix presents all the texts from the Psalms scrolls that are classified as "apocryphal." The English translations are taken from previously published sources (see Bibliography). The material is presented in two parts, the first containing pieces that were previously familiar to scholars (items 1.1–1.6). One of these—*David's Last Words*, from 11QPs^{a} (= 11Q5)—has been taken mostly from the *New Revised Standard Version* of 2 Sam 23:1–7, since only the last six Hebrew words of verse 7 are extant in the scroll. Of the other five, three were known in Greek, Syriac, and Latin (Psalm 151A–B; Sir 51:13–30), and two only in Syriac (Psalms 154–155). The second section features compositions previously unknown (items 2.1–2.10, in alphabetical order). These are found in four scrolls: 4QPs^{f} (= 4Q88), 11QPs^{a-b} (= 11Q5-6) and 11QapocrPs (= 11Q11).

Two additional points: (a) In many translations verse numbers have been given as possible; otherwise, line numbers are provided. (b) It was pointed out above (in section 1.1) that the *Catena* forms a single composition with Psalm 136 in column 16 of 11QPs^a [= 11Q5], but I include it here because some scholars classify it as a separate piece.

1. SIX PREVIOUSLY KNOWN COMPOSITIONS

1.1 David's Last Words (= 2 Sam 23:1–7)
(11QPs^a [= 11Q5] 27, line 1, only line 1 preserved)

[1]Now these are the last words of David: The oracle of David, son of Jesse, the oracle of the man whom God exalted, the anointed of the God of Jacob, the favorite of the Strong One of Israel:
[2]The spirit of the LORD speaks through me, his word is upon my tongue.
[3]The God of Israel has spoken, the Rock of Israel has said to me: One who rules over people justly, ruling in the fear of God,
[4]is like the light of morning, like the sun rising on a cloudless morning, gleaming from the rain on the grassy land.
[5]Is not my house like this with God? For he has made with me an everlasting covenant, ordered in all things and secure. Will he not cause to prosper all my help and my desire?
[6]But the godless are all like thorns that are thrown away; for they cannot be picked up with the hand;
[7]to touch them one uses an iron bar and the wood of an outside room, and they are utterly consumed with fire in the sitting.

(Verses 1–7a reconstructed from NRSV*,*
v. 7b from J. Sanders, The Dead Sea Psalms Scroll*, 87)*

1.2 Psalm 151A:1–7 (11QPs^a 28, lines 3–12)

A Hallelujah of David the Son of Jesse
[1]Smaller was I than my brothers and the youngest of the sons of my father, so he made me shepherd of his flock and ruler over his kids.
[2]My hands have made an instrument and my fingers a lyre; and (so) have I rendered glory to the LORD, thought I, within my soul.
[3]The mountains do not witness to him, nor do the hills proclaim; the trees have cherished my words and the flock my works.
[4]For who can proclaim and who can bespeak and who can recount the deeds of the LORD? Everything has God seen, everything has he heard and he has heeded.

[5]He sent his prophet to anoint me, Samuel to make me great; my brothers went out to meet him, handsome of figure and appearance.
[6]Though they were tall of stature and handsome by their hair, the LORD God chose them not.
[7]But he sent and took me from behind the flock and anointed me with holy oil, and he made me leader of his people and ruler over the sons of his covenant.

(trans. J. Sanders, The Dead Sea Psalms Scroll*, 89)*

1.3 Psalm 151B:1–2 (11QPs^a 18, lines 13–14)

[1]At the beginning of David's power after the prophet of God had anointed him.
[2]Then I [saw] a Philistine uttering defiances from the r[anks of the enemy]. I…the…

(trans. J. Sanders, The Dead Sea Psalms Scroll*, 89)*

1.4 Sirach 51:13–23, 30 (11QPs^a 21, lines 11–18 to 22.1)
[See English versification in brackets]

[13]I was a young man before I had erred when I looked for her.
[14]She came to me in her beauty when finally I sought her out.
[15]Even (as) a blossom drops in the ripening of grapes, making glad the heart,
[16[15b]](So) my foot trod in uprightness; for from my young manhood have I known her.
[17[16]]I inclined my ear a little and great was the persuasion I found.
[18[17]]And she became for me a nurse; to my teacher I give my ardor.
[19[18]]I purposed to make sport: I was zealous for pleasure, without pause.
[20[19]]I kindled my desire for her without distraction.
[21[20]]I bestirred my desire for her, and on her heights I do not waver.
[22[21]]I opened my hand(s) […] and perceive her unseen parts.
[23[?]]I cleansed my hands [……
[30[30]]……………………………] your reward in due season.

(trans. J. Sanders, The Dead Sea Psalms Scroll*, 75, 77)*

1.5 Psalm 154:3–19 (11QPs^a 18, lines 1–16)

[3]… your souls with the good ones and with the pure ones to glorify the Most High.
[4]Form an assembly to proclaim his salvation, and be not lax in making known his might and his majesty to all simple folk.
[5]For to make known the glory of the LORD is wisdom given,
[6]and for recounting his many deeds she is revealed to man:
[7]to make known to simple folk his might, to explain to senseless folk his greatness,
[8]those far from her gates, those who stray from her portals.
[9]For the Most High is the LORD of Jacob, and his majesty is over all his works.
[10]And a man who glorifies the Most High he accepts as one who brings a meal offering,
[11]as one who offers he-goats and bullocks, as one who fattens the altar with many burnt offerings, as a sweet-smelling fragrance from the hand of the righteous.
[12]From the gates of the righteous is heard her voice, and from the assembly of the pious her song.
[13]When they eat with satiety she is cited, and when they drink in community together,
[14]their meditation is on the law of the Most High, their words on making known his might.
[15]How far from the wicked is her word, from all haughty men to know her.
[16]Behold the eyes of the LORD upon the good ones are compassionate,
[17]and upon those who glorify him he increases his mercy; from an evil time will he deliver [their] soul.
[18][Bless] the LORD who redeems the humble from the hand of stranger[s and deliv]ers the pure from the hand of the wicked.
[19][who establishes a horn out of Ja]cob and a judge…
(trans. J. Sanders, The Dead Sea Psalms Scroll*, 69)*

1.6 Psalm 155:1–18 (11QPs^a 24, lines 3–17)

[1]O LORD, I called unto thee, give heed to me.
[2]I spread forth my palms toward thy holy dwelling.
[3]Incline thine ear and grant me my plea,
[4]And my request withhold not from me.
[5]Edify my soul and do not cast it down,
[6]And abandon (it) not in the presence of the wicked.
[7]May the Judge of Truth remove from me the rewards of evil

[8]O LORD, judge me not according to my sins; for no man living is righteous before thee.
[9]Grant me understanding, O LORD, in thy law and teach me thine ordinances,
[10]That many may hear of thy deeds and peoples may honor thy glory.
[11]Remember me and forget me not, and lead me not into situations too hard for me.
[12]The sins of my youth cast far from me, and may my transgressions not be remembered against me.
[13]Purify me, O LORD, from (the) evil scourge, and let it not turn again upon me.
[14]Dry up its roots from me, and let its leaves not flourish within me.
[15]Thou art (my) glory, O LORD. Therefore is my request fulfilled before thee.
[16]To whom may I cry and he would grant (it) me? And the sons of man—what more can [their] pow[er] do?—
[17]My trust, O LORD, is befo[r]e thee. I cried "O LORD," and he answered me, [and he healed] my broken heart.
[18]I slumbered [and sl]ept, I dreamt; indeed [I woke…]

(trans. J. Sanders, The Dead Sea Psalms Scroll*, 81)*

2. TEN PREVIOUSLY UNKNOWN COMPOSITIONS

2.1 Apocryphal Psalm 1: Against Demons, or A Liturgy for Healing the Stricken *(11QapocrPs [= 11Q11] 1, lines 2–11*

[1.1][…] and who weeps for him [2][…] the oath [3][…] by YHWH [4][…] the dragon [5][…] the ea[rth … [6]…] exor[cising… [7]…] to [… [8]…] this [… [9]…] to the dev[ils … [10]…] and he will dwe[ll…]

(trans. F. García Martínez, The Dead Sea Scrolls Translated*, 376)*

2.2 Apocryphal Psalm 2: Against Demons (11QapocrPs [= 11Q11] 2, lines 2–5.3—formerly 1, lines 2–4.3)

[2.2][Of David. Concerning the words of the spell] in the name of [YHWH … [3]…] of Solomon, and he will invoke [the name of YHWH [4]to set him free from every affliction of the sp]irits, of the devils, [Liliths, [5]owls and jackals]. These are the devils, and the pri[nce of enm]ity [6][is Belial], who [rules] over the abyss [of dark]ness. [7][…] to […] and to mag[nify the] God of [8][wonders … the sons of] his people have completed the cure, [9][… those who] have relied on your name. Invoke [10][… guardian of] Israel. Lean [11][on YHWH, the God of gods, he who made] the heavens [12][and the earth and all that is in them], who separated [light [13]from darkness …] … […]

[3.1][… And you shall say to him: Who] [2]are you? [Did you make the heavens and] the depths [and everything they hold], [3]the earth and every[thing there is upon the] earth? Who has ma[de these portents] [4]and these won[ders upon the] earth? It is he. YHWH, [the one who] [5]has done a[ll this by his power], summoning all the [angels to come to his assistance], [6]every [holy se]ed which is in his presence, [and the one who judges] [7][the sons of] heaven and [all the] earth [on their account], because they sent [8]sin upon [all the earth], and [evil] upon every ma[n. But] they know [9][his wonder]ful [acts], which none of them [is able to do in front of YHW]H. If they do not [10]tremble] before YHWH, so that [… and] obliterate the soul, [11]YHWH [will judge them] and they will fear that great [punishment(?)]. [12]One among you [will chase after a thousand …] of those who serve YHWH [13][…] great. And […] … […]

[4.1][and] great […] summoning […] [2]and the great [… And he will send a] powerful [angel] and will ev[ict] you [from] [3]the whole earth. […] heavens […] [4]YHWH will strike a [mighty bl]ow which is to destroy you [for ever], [5]and in the fury of his anger [he will send] a powerful angel against you, [to carry out] [6][all his comm]ands, (one) who [will not show] you mercy, who [… [7]…] above all these, who will [hurl] you to the great abyss, [8][to the] deepest [Sheol]. Fa[r from the home of light] shall you live, for [9]the great [abyss] is utterly dark. [You shall no] longer [rule] over the earth [10][but instead you shall be shut in] for ever. [You shall be cursed] with the curses of Abaddon, [11][and punished by] the fury of Y[HWH]'s anger. [You shall rule over] darkness for all [12][periods of] humiliation […] your gift [13][…]

[5.1][…] … […] [2]which […] those possessed […] [3]the volunteers of your tr[uth, when Ra]phael heals them. [… …]

(trans. F. García Martínez, The Dead Sea Scrolls Translated*, 376–77)*

2.3 Apocryphal Psalm 3: Against Demons (11QapocrPs [= 11Q11] 5, lines 4–6.3—formerly 4, lines 4–5.3)

[5.4]Of David. Conc[erning the words of the spe]ll in the name of YHWH. [Call on] [5]the heavens [at a]ny time. [When] Beli[al] comes upon you, [you] shall say to him: [6]Who are you, [accursed amongst] men and amongst the seed of the holy ones? Your face is a face [7]of futility, and your horns are horns of a wre[tch]. You are darkness and not light, [8][s]in and not justice.

[Against you], the chief of the army. YHWH will [shut] you [9][in the] deepest She[ol, he will shut] the two bronze gates through which] no [10]light [penetrates. On you] there shall not [shine the light of the] sun, which [rises [11]upon the] just man [to illuminate his face]. You shall say to him: [Is there not] perhaps [an angel] [12][with the just] man, to go [to judgment when] Sa[tan] mistreats him? [And he will be freed] from dark[ness by [13]the spirit of tru]th, [because jus]tice is with him [to uphold him at the judgment. [14]…] not […]

(trans. F. García Martínez, The Dead Sea Scrolls Translated*, 377)*

2.4 Apostrophe to Zion 1–18 (11QPs^{a} [11Q5] 22, lines 1–15)

[1]I remember thee for blessing, O Zion; with all my might have I loved thee. May thy memory be blessed forever!
[2]Great is thy hope, O Zion; that peace and thy longed-for salvation will come.
[3]Generation after generation will dwell in thee and generations of saints will be thy splendor;
[4]Those who yearn for the day of thy salvation that they may rejoice in the greatness of thy glory.
[5]On (the) abundance of thy glory they are nourished and in thy splendid squares they will toddle.
[6]The merits of thy prophets wilt thou remember, and in the deeds of thy pious ones wilt thou glory.
[7]Purge violence from thy midst; falsehood and iniquity will be cut off from thee.
[8]Thy sons will rejoice in thy midst and thy precious ones will be united with thee.
[9]How they have hoped for thy salvation, thy pure ones have mourned for thee.
[10]Hope for thee does not perish, O Zion, nor is hope in thee forgotten.
[11]Who has ever perished (in) righteousness, or who has ever survived in his iniquity?
[12]Man is tested according to his way; every man is acquitted according to his deeds;
[13]all about are thine enemies cut off, O Zion, and all thy foes have been scattered.
[14]Praise of thee is pleasing, O Zion, cherished through all the world.
[15]Many times do I remember thee for blessing; with all my heart I bless thee.
[16]Mayst thou attain unto everlasting righteousness, and blessings of the honorable mayst thou receive.
[17]Accept a vision bespoken of thee, and dreams of prophets sought for thee.

[18]Be exalted, and spread wide, O Zion; praise the Most High, thy savior: let my soul be glad in thy glory.

(trans. J. Sanders, The Dead Sea Psalms Scroll*, 77)*

2.5 Apostrophe to Judah (4QPs^f [4Q88] 10, lines 4–15)

… … [5]… …

Then let the heavens and earth give praise, [6] give praise in unison all the stars of dusk.
[7]Rejoice, Judah, in your joy; [8]rejoice in your joy and dance in your dance.
[9]Celebrate your pilgrim feasts, fulfill your vows, for there is [10]in your midst no scoundrel.
May your hand be exalted! [11]May your right hand prevail!
See, the enemy [12]perish, and scattered are all [13]evildoers.
But you, Lord, forever [14]are; your glory is forever and ever.
[15]Praise the Lord!

(trans. P. Skehan, Qumran Cave 4.XI: Psalms to Chronicles *[DJD 16], 106)*

2.6 Catena (11QPs^a [11Q5] 16, lines 1–6)

[1]O give thanks to the LORD, for he is good; for his steadfast love endures for ever!
[15]Hark, glad songs of victory in the tents of the righteous: "The right hand of the LORD does valiantly.
[16]The right hand of the LORD is exalted, the right hand of the LORD has wrought strength!"
[8]It is better to trust in the Lord than to put confidence in man.
[9]It is better to take refuge in the Lord than to put confidence in princes.
[10]It is better to trust in the LORD than to put confidence in a thousand people.
[29]O give thanks to the LORD, for he is good; for his steadfast love endures for ever! Praise the LORD!

(trans. J. Sanders, The Dead Sea Psalms Scroll*, 65)*

2.7 David's Compositions (11QPs^a [11Q5] 27, lines 2–11)

[2]And David, the son of Jesse, was wise, and a light like the light of the sun, and literate,
[3]and discerning and perfect in all his ways before God and men. And the Lord gave
[4]him a discerning and enlightened spirit. And he wrote
[5]3,600 psalms; and songs to sing before the altar over the whole-burnt
[6]perpetual offering every day, for all the days of the year, 364;
[7]and for the offering of the Sabbaths, 52 songs; and for the offering of the New
[8]Moons and for all the Solemn Assemblies and for the Day of Atonement, 30 songs.
[9]And all the songs that he spoke were 446, and songs
[10]for making music over the stricken, 4. And the total was 4,050.
[11]All these he composed through prophecy which was given him from before the Most High.
(trans. J. Sanders, The Dead Sea Psalms Scroll*, 87)*

2.8 Eschatological Hymn (4QPs^f [4Q88], lines 1–15)

[4]many …………………… And let them praise [5]the name of the LORD,
for he comes to judge [6]every deed, to extirpate the wicked [7]from the earth;
and the guilty [brood] will be nowhere [8]found.
And the heavens will give their dew, [9]and there will be no searing drought within their borders;
And the earth [10]will give its fruit in its season, and will not [11]cheat of its produce.
The [12]fruit trees …………………… and will not [13] ………………………
the [14]lowly will eat and be filled, …… those who fear the LORD ……
(trans. P. Skehan, Qumran Cave 4.XI: Psalms to Chronicles *[DJD 16], 104)*

2.9 Hymn to the Creator (11QPs^a [11Q5] 26, lines 9–15)

[1]Great and holy is the LORD, the holiest of holy ones for every generation.
[2]Majesty precedes him and following him is the rush of many waters.
[3]Grace and truth surround his presence; truth and justice and righteousness are the foundation of his throne.

[4]Separating light from deep darkness, he established the dawn by the knowledge of his mind.
[5]When all his angels had witnessed it they sang aloud; for he showed them what they had not known:
[6]Crowning the hills with fruit, good food for every living being.
[7]Blessed be he who makes the earth by his power, establishing the world in his wisdom.
[8]In his understanding he stretched out the heavens, and brought forth [wind] from his st[orehouses].
[9]He made [lightning for the rai]n, and caused mist[s] to rise [from] the end [of the earth].

(trans. J. Sanders, The Dead Sea Psalms Scroll*, 85)*

2.10 Plea for Deliverance (11QPs^a [11Q5] 19, lines 1–18)

[1]Surely a maggot cannot praise thee nor a grave-worm recount thy loving-kindness.
[2]But the living can praise thee, all those who stumble can laud thee.
[3]In revealing thy kindness to them and by thy righteousness thou dost enlighten them.
[4]For in thy hand is the soul of every living thing; the breath of all flesh hast thou given.
[5]Deal with us, O LORD, according to thy goodness, according to thy great mercy, and according to thy many righteous deeds.
[6]The LORD has heeded the voice of those who love his name and has not deprived them of his loving-kindness.
[7]Blessed be the LORD, who executes righteous deeds, crowning his saints with loving-kindness and mercy.
[8] My soul cries out to praise thy name, to sing high praises for thy loving deeds,
[9]To proclaim thy faithfulness—of praise of thee there is no end.
[10]Near death was I for my sins, and my iniquities had sold me to the grave;
[11]but thou didst save me, O LORD, according to thy great mercy, and according to thy many righteous deeds.
[12]Indeed have I loved thy name, and in thy protection have I found refuge.
[13]When I remember thy might my heart is brave, and upon thy mercies do I lean.
[14]Forgive my sin, O LORD, and purify me from my iniquity.
[15]Vouchsafe me a spirit of faith and knowledge, and let me not be dishonored in ruin.
[16]Let not Satan rule over me, nor an unclean spirit;
[17]neither let pain nor the evil inclination take possession of my bones.

> [18]For thou, O LORD, art my praise, and in thee do I hope all the day.
> [19]Let my brothers rejoice with me and the house of my father, who are astonished by thy graciousness……
> [20][For e]ver I will rejoice in thee.
>
> *(trans. J. Sanders,* The Dead Sea Psalms Scroll*, 71)*

APPENDIX 3

THE CONTENTS OF THE PSALMS SCROLLS AND RELATED MANUSCRIPTS

For each entry, the Psalms passage indicated in column 1 is followed by an abbreviated title for the relevant scroll (col. 2), and an alternative designation (col. 3). Compositions not found in the Masoretic Psalter appear at the end of the listing.

Two types of sigla are used in this appendix: (a) The sign X denotes the presence of an additional word, verse, or section not present in the Masoretic Psalter: for example, Ps 145:13, X, 14–21, X in col. 17 of 11QPs^{a} (= 11Q5). (b) The sign (?) indicates that some doubt exists as to the identification of a particular verse or reading. When it stands to the *left* of an entry, this siglum denotes that the complete entity is not certain: for instance, (?)99:1–2, 5 in 4QPs^{k} (= 4Q92). When written to the *right* of an entry, it indicates that only the specified quantity–usually a single verse–is not certain: for example, 79:1(?), 2–3 in 4QTanḥ (= 4Q176).

CHAPTER TWELVE

THE IMPORTANCE OF ISAIAH AT QUMRAN

J. J. M. Roberts

My assigned topic is the importance of Isaiah at Qumran.[1] Here I explore three indications of that importance: (1) the number and nature of the manuscripts of Isaiah found at Qumran, (2) the number and nature of the allusions and citations from Isaiah found in other Qumran literature, and (3) the exegetical approach to Isaiah reflected in the commentaries on Isaiah produced at Qumran. In discussing these indications, I take a hint from the original oracles of Isaiah of Jerusalem, for which double entendre is a significant feature.[2] Following the lead of the prophet's intentional ambiguity, I will address the issue of the importance of Isaiah at Qumran from two different perspectives: (1) the importance of Isaiah for the Qumran community and (2) the importance of the Qumran community's use of Isaiah for the contemporary community of biblical scholars.

MANUSCRIPTS OF ISAIAH AT QUMRAN

One quite clear indication of the importance of the book at Isaiah at Qumran is the sheer number of manuscripts of Isaiah found at Qumran. With the recent publication of the numerous fragmentary scrolls of Isaiah from Cave 4, [3] it now appears that there were at least twenty separate scrolls of Isaiah in use in the Qumran community. Two of those scrolls come from cave 1: The large, basically complete scroll of Isaiah, 1QIsa^{a}, was among the first scrolls discovered and helped to create the original excitement about Qumran.[4] And 1QIsa^b (1Q8), the scroll acquired and published by Sukenik,[5] as supplemented by additional fragments published later,[6] consists of fragments of chapters 7–66 that are extensive only for the last part of the book. From Cave 5 comes the remains of another scroll, 5QIsa (5Q3), a rather small fragment containing only a few words of Isa 40:16, 18–19.[7] From one of the caves at the related site at Murabbaᶜat comes another scroll fragment containing portions of Isa 1:4–14.[8] And, finally, from Cave 4 at Qumran comes a number of fragments, some rather extensive, from about eighteen additional scrolls of Isaiah, 4QIsa$^{a\text{–}r}$ (4Q55–69b), one of which, pap4QIsa^p (4Q69), was written on papyrus.[9] These numbers alone place Isaiah alongside the Pentateuchal books Genesis, Exodus, and especially Deuteronomy, and the book of Psalms as one of the most popular biblical books at Qumran. The date of the Isaiah manuscripts from Cave 4, all of which fall between the first half of the first century B.C.E. and the first third of the first century C.E., also suggests that many of these manuscripts could have been copied at Qumran.[10]

---

[1] I presented this paper as one of the plenary addresses at The Second Princeton Symposium on Judaism and Christian Origins: "Biblical Theology and the Dead Sea Scrolls: A Jubilee Celebration," Nov. 9–12, 1997. I shared an earlier version of some of these same ideas in Austin, Texas, Feb. 25, 1994, at the "Symposium on Isaiah and the Qumran Materials," hosted by the University of Texas and the Institute for Christian Studies.

[2] J. J. M. Roberts, "Double Entendre in First Isaiah," *CBQ* 54 (1992): 39–48.

[3] Eugene C. Ulrich et al., eds., *Qumran Cave 4.X: The Prophets (DJD 15; Oxford: Clarendon, 1997).*

Yet despite these impressive numbers, the importance of these manuscripts for contemporary biblical scholars is somewhat disappointing. It is true that the numerous marginal notations and corrections in the first Isaiah scroll discounted exaggerated notions based on much later rabbinic sources about the absolutely meticulous care with which biblical scrolls were copied. It is also true that the numerous Isaiah scrolls from Qumran reflect a wide variety of orthographic practice in the fullness with which they represent vowel letters. The scrolls are certainly helpful in tracing the development of the Hebrew language, orthography, and paleography. But compared to the Qumran contribution to the textual criticism of such books as Samuel and Jeremiah, the texts of Isaiah are a disappointment. The variant readings in the Isaiah scrolls do not point to a textual family or recension distinct from that represented in the MT. In my opinion, Patrick Skehan's judgment still stands: "There remains only a single channel of transmission of this book, narrowly controlled from 300 B.C.E. until much later."[11]

THE CITATIONS OF ISAIAH AT QUMRAN

The importance of Isaiah at Qumran is also indicated by the number of allusions and citations of the book found in other Qumran texts. It can be quite difficult to prove the existence of a literary allusion, but the explicit citations of Isaiah in the other texts from Qumran are too numerous to ignore. In one of the appendices to his doctoral dissertation, Francis J. Morrow gives a nine-page list of passages from Isaiah cited in part in extrabiblical texts from Qumran.[12] In light of the new publications that have appeared in the twenty-four years since his dissertation was finished, there is little doubt that Morrow's list could be significantly expanded. What these numbers actually mean for the Qumran community could perhaps be disputed, but it does seem clear that their experience of reality and self-identity was shaped by the biblical text. Morrow tried to express that by a perhaps overly schematic treatment of what he saw as the four most frequently quoted passages from Isaiah at Qumran. According to Morrow, the Qumran community identified itself as "those in Jacob who turn from transgression" (שבי פשע ביעקב; Isa 59:20), identified the ideal of the group as "those of steadfast mind" (יצר סמוך; Isa 26:3), identified the enemy of the group as "the men of scoffing" (אנשי לצון; Isa 28:14), and identified the hope of the group as somehow tied up with "the shoot from the stock of Jesse" (Isa 11:1–16).[13]

One very rich source for exploring the imagery that expresses the self-identity of the Qumran community and its individual members are the *Hôdāyôt* (hereafter *Hodayot*), the hymns of the community. I have been struck by the different use two of these hymns make of Isa 28:16, in which God promises to lay a firm foundation stone in Jerusalem. 1QH 14.24–30 (6.24–30 Sukenik) uses this text to suggest that the Qumran community is like a strong fortress into which the individual member flees to find God's protection. 1QH 15.8–10 (7.8–10), in contrast, uses the same passage from Isaiah to suggest that God has made the individual member like a strong fortress, unmovable in the face of threatening evil.

The importance of such material for the contemporary community of scholars is twofold. On the one hand, looking at the use the Qumran community made of Isaiah is part of what is involved in coming to understand the Qumran community for its own sake. On the other hand, there are times when the Qumran community's interpretation of the biblical text may provide fresh insight for the contemporary scholar's attempt to explain these same ancient texts. My own exegetical treatment of Isa 28:16 was deeply influenced by the interpretation of this text in the Qumran *Hodayot*.[14] Perhaps this last point can be best elaborated, however, by a closer look at the exegetical practice at Qumran as reflected in their biblical commentaries, or pesharim.

THE COMMENTARIES

The Qumran commentaries, or *pĕšārîm* (pesharim), on Isaiah have been treated extensively in an excellent monograph Maurya Horgan published in 1979.[15] I am not aware of any new or unpublished pesharim on Isaiah, and I do not propose to offer any improvements on the Hebrew text of the pesharim as read by Horgan. Instead, after a brief introduction, I offer critical reflections on her treatment of the exegetical method in the pesharim. Then I focus on the issue of the degree to which we can see the approach found in the pesharim as in continuity with inner biblical processes of reinterpretation. Here I follow up on an observation made by William Holladay years ago in what he referred to as a self-extended oracle.[16]

Among the different literary genres represented among the Qumran documents are a group of fifteen texts that Horgan would classify as belonging to the genre of the pesharim.[17] Each of these texts offers a more or less continuous commentary on a single biblical book. They follow the same basic pattern of citing the biblical book, section by section, each section of citation being followed by a section, sometimes relatively short, of interpretation.[18] The interpretation is typically introduced with one of several formulas using the word *pēšer*, "interpretation," hence the designation of these texts as *pĕšārîm*, the plural of *pēšer*.[19] While other genres at Qumran also use the same or similar formulas with *pēš\er* to introduce an interpretation of biblical material, it is the combination of the continuous commentary on a single biblical book with this manner of introducing the sections of interpretation that Horgan requires to classify texts as pesharim.[20] Within the pesharim sections of interpretation, however, short snippets of the previously cited biblical text may be cited again, sometimes more than once, and the interpretation of these short snippets are often introduced with other formulas that do not employ the term *pēšer*.[21]

[16] William L. Holladay, *Isaiah: Scroll of a Prophetic Heritage* (Grand Rapids: Eerdmans, 1978), 59, 84.

[17] Horgan, *Pesharim*, 1.

By Horgan's criteria there are five pesharim on Isaiah, all from Cave 4 and all of which are extremely fragmentary.[22] These pesharim are as follows:

(1) 4QpIsa^{a} (4Q161) consists of a group of ten fragments that preserve parts of three columns with citation of portions of Isa 10:22–11:5 and accompanying commentary.
(2) 4QpIsa^{b} (4Q162) is one large fragment that treats portions of Isa 5:5–30.
(3) pap4QpIsa^{c} (4Q163) designates a group of sixty-one fragments, written on papyrus, of which only a small number provide sufficient material for a connected reading.
(4) 4QpIsa^{d} (4Q164) consists of three fragments that treat Isa 54:11–12.
(5) 4QpIsa^{e} (4Q165) consists of eleven fragments that preserve portions of the biblical text of Isaiah 11, 14, 15, 21, 32, and 40, but almost nothing of the interpretation is preserved.

Others have classed one text from Cave 3 (3QpIsa [3Q4]) among the pesharim on Isaiah, but Horgan demurs. It is a single fragment that cites Isa 1:1–2, but no formula of interpretation is actually preserved, and thus it does not clearly meet her criteria for pesharim.[23]

---

[18] Ibid., 237–38.

[19] Ibid., 239–43.

[20] Ibid., 3.

[21] Ibid., 238.

[22] Ibid., 70–138.

[23] Ibid., 260–61. Horgan includes this text among the Isaiah *pesharim* in her translation, "Isaiah Pesher 1 (3Q4 = 3QpIsa)"; see idem, "Pesherim" (PTSDSS 6B), 35–37, where she plausibly restores the formula, but she still regards it as a different type from the other Isaiah *pesharim*.

Horgan's criteria seem a bit rigid, however, considering the quite fragmentary state of these texts and the actual variations from her ideal represented in the texts themselves. Among the Isaiah pesharim, for instance, Horgan considers 4QIsa^c (4Q57) anomalous, because it does not limit its biblical citations to the continuous sections of Isaiah, but rather cites passages from Jeremiah and Zechariah and alludes to other passages from Hosea and Zechariah.[24] Moreover, there are places in pap4QpIsa^c (4Q163) where verses or whole sections of Isaiah are skipped, and Horgan concludes that "the omissions seem to be deliberate."[25] One may question whether either of these features are as anomalous as Horgan implies. One should not make too much of the lack of citations of other biblical books in the pesharim given the very limited corpus and the extremely fragmentary state of the preserved texts. Moreover, the omission of significant sections of the biblical book being commented on is by no means unique to pap4QpIsa^c. The famous *Habakkuk Pesher* (1QpHab) limits itself to the first two chapters of Habakkuk, and 4QpIsa^b (4Q162) skips from Isa 5:14 to 5:24. This last example is worth looking at in more detail.

After citing Isa 5:11–14, 4QpIsa^b 2.6–7 simply identifies the pleasure-loving inhabitants of Jerusalem addressed in these verses with the "men of scoffing who are in Jerusalem." This identification is not introduced with any of the formulas containing the word *pēšer*, but with a simple nominal clause introduced by the demonstrative pronoun: "these are the men of scoffing who are in Jerusalem" (אלה הם אנשי הלצון אשר בירושלים). Though Horgan curiously fails to mention it, this designation for the Jerusalemite opponents of the Qumran community is clearly derived from Isa 28:14, where Isaiah addresses his opponents in Jerusalem with the following words: "Therefore, hear the word of Yahweh, *you men of scoffing*, You rulers of this people *who are in Jerusalem*" (לכן שמעו דבר־יהוה אנשי לצון משלי העם הזה אשר בירושלים). Having made this identification by the allusion to Isa 28:14, the Qumran commentator then returns to his treatment of Isaiah 5 by identifying the scoffers of Isa 28:14 with those mentioned in Isa 5:24c who reject the teaching of Yahweh. The transition is again accomplished by using a simple nominal clause to introduce a slightly modified citation of the biblical text: "They are those who reject the teaching of Yahweh and spurn the word of the Holy One of Israel" (הם אשר מאסו את תורת יהוה ואת אמרת קדוש ישראל נאצו). The commentator then continues the citation of the biblical text with Isa

[24] Horgan, *Pesharim*, 237–38.

[25] Ibid., 238.

5:25, before again identifying those being judged by allusion to Isa 28:14: "It is the congregation of the men of scoffing who are in Jerusalem" (היא עדת אנשי הלצון אשר בירושלים). It is unclear whether the Qumran commentator's identification of the wrongdoers of Isa 5:11–14 with those mentioned in Isa 28:14 and 5:24c resulted in his unintentional omission of any treatment of Isa 5:12–24b, or whether this was an intentional bridging tactic to avoid commenting on these verses. This example does suggest, however, that the pesharim were not as rigid in the formulas used to introduce their interpretations, and in citing biblical texts, not as restricted to the continuous text of the biblical book being treated as Horgan's discussion implies. It also suggests the possibility that the authors of the pesharim exercised a certain freedom in selecting how much of the continuous text of a biblical book they chose to cite and comment on.

From even the most cursory reading of the pesharim, it is clear that the Qumran interpreters reinterpreted the biblical texts to make them refer to events of their own time. An interpretation is often characterized as "for the last days" (לאחרית הימים), but the Qumran community thought of itself as living in the last days, and the expression is actually used to refer to events happening over a somewhat extended range of time–from important events in the past history of their sect, to more recent events and current situations, and finally to the expected soon-to-be eschatological events of the final war, judgment, and vindication of the righteous. Of course, this contemporizing interpretation of the prophetic text did not arise out of any objective or quasi-objective attempt to discover the original meaning of the text. It is not historical-critical interpretation. Rather, as Geza Vermes remarked, "Dogmatic assumptions govern the whole process [of Qumran exegesis] and prompt an existential interpretation of Scripture. The history and teaching of the community were announced in prophetic writings; the latter must in consequence be explained in the light of the former."[26] Moreover, according to Vermes, "Qumran inherited from the apocalyptic *milieux* the concept that prophecy is a mystery and that new revelation is required for its proper understanding." Since that new revelation was given only to the Qumran community through its leaders, the first and foremost of whom was the Righteous Teacher, the meaning of biblical prophecy was accessible only within the community.[27] In elaborating that meaning, however, "the

[27] Vermes, "Qumran Interpretation," 91–92.

Qumran interpreters took over from pre-sectarian Judaism a body of exegetical tradition already fully developed and in advance of the purely literal significance of Scripture."[28]

CONTINUITIES WITH INNER BIBLICAL EXEGESIS

Yet, despite the sharp discontinuities between Qumran exegesis and the critical exegesis of the contemporary academy, one should recognize that there are many points of continuity between Qumran exegesis and the internal development of the very biblical texts that the Qumran exegetes were interpreting. This point may be illustrated by particular attention to the treatment of Isaiah 10 in 4QpIsa^a (4Q161) and pap4QpIsa^c (4Q163). The present biblical text of Isa 10:5–34 may be divided into four sections. First, 10:5–15 contains a *hôy*-oracle directed against Assyria for its arrogance in thinking its victories were the result of its own power rather than acknowledging its role as simply a tool in the hand of God. Next, 10:16–19 threatens this state, therefore, with a wasting sickness among its warriors and a decimation of its forest–a common metaphor in First Isaiah for human population. Then, 10:20–27c promises the inhabitants of Zion ultimate deliverance from the Assyrian yoke after a decimating judgment on Israel. Finally, 10:27d–34 describes the march of an enemy army up to the very gates of Jerusalem, where God destroys the enemy host. The present arrangement of the biblical text of Isa 10:5–34 thus seems to suggest an extended prophetic speech or a series of prophetic speeches directed to the Assyrian threat to Judah in the last quarter of the eighth century.

The Qumran commentaries, however, identify the enemy spoken of in Isaiah 10 quite differently. To begin with pap4QpIsa^c frags. 6–7 2.3 cites Isa 10:19, which relates how the trees of the enemy forest will be so few that even a child could count them, and then the next line in the commentary says, "The interpretation of this word concerns the region of Babylon" (פשר הדבר על חבל בבל). This identification of the enemy as Babylon, despite the explicit mention of Assyria in the biblical text at verses 5, 12, and 24, is striking. In a similar way, in its interpretation of Isa 30:27–33, which explicitly mentions Assyria as the enemy (v. 31), pap4QpIsa^c fragment 25 lines 1–3 identifies the enemy as "the king of Babylon." The reason for this identification of the enemy as Babylon is not entirely clear. The interpretation of Isa 10:20–22 in pap4QpIsa^c

---

[28] Ibid., 93.

frags. 6–7 lines 10–11, 14–15 speaks of the "returnees of Israel," however, and the historical impact of the return from Babylonian exile may have suggested the identification of the enemy from whom deliverance was promised as the Babylonians. Moreover, the 4QpIsa^{a} (4Q161) interpretation of the continuation of the same context suggests a similar connection to the Babylonian exile. After citing Isa 10:24–27, which promises deliverance to the inhabitants of Zion from the Assyrian yoke, the pesher offers an unfortunately broken interpretation of the passage, which contains the line, "when they return from the wilderness of the peoples" (בשובם ממדבר העמים). The expression, "wilderness of the peoples" (מדבר העמים), is derived from Ezek 20:35. Ezekiel is visualizing the return from Babylonian exile as a kind of new exodus, and in Ezekiel the wilderness of the people is analogous to the "wilderness of the land of Egypt" of the first exodus (v. 36), as a place where God can judge his people and weed out the rebels before bringing the righteous remnant to his holy mountain. This judgment involves bringing his people "under the rod" (תחת השבט), to discipline them (v. 37). It seems clear that the mention of both the "rod" of discipline and the allusion to the "way of Egypt" in Isaiah 10 triggered an association with the Ezekiel passage for the Qumran interpreter, and he read Isaiah through the eyes of Ezekiel's promise of a return from Babylonian exile.

Nevertheless, it is doubtful whether either pap4QpIsa^{c} (4Q163) or 4QpIsa^{a} (4Q161) were thinking of the historical Babylon. The reference to Babylon in pap4QpIsa^{c} (4Q163) is probably to be understood as a code word for the more contemporary foreign enemies of the Qumran community, either the late Seleucid state or Rome. 4QpIsa^{a} (4Q161) identifies the enemies that march up to Jerusalem to threaten it with the "Kittim" (כתיאים), a designation that can be used of Seleucid or Ptolemaic Greeks (the "Kittim of Asshur" and the "Kittim in Egypt" of 1QM 1.2–4), but which the pesharim generally use to refer to the Romans. In any case, for the Qumran commentator, the enemy army portrayed in Isaiah 10, which has or will threaten Jerusalem before the city's final deliverance, is neither the historical Assyria mentioned in the text of Isaiah 10, nor the later Babylon; it is most likely a Roman army.

Such reinterpretation of the biblical text is clearly an attempt to make it relevant to the time of the interpreter, but this process of contemporizing reinterpretation can already be detected within the biblical text of Isaiah itself. The same process of reinterpreting Assyria as Babylon that one finds in pap4QpIsa^{c} (4Q163), for instance, is already anticipated at a number of points in the biblical text of Isaiah. Isaiah 40–55, of course, comes from the period of the Babylonian exile, and Babylon is clearly mentioned as the enemy from which Israel needs to be delivered in this section of the book. Even in chapters 1–39, however, Babylon already figures as a significant enemy of God's people. In this section of Isaiah, some of the passages mentioning Babylon may also have been composed during the period of the Babylonian exile. That is the dominant view concerning such passages as Isaiah 13. Other passages, however, such as the oracle in Isaiah 21 that mentions the fall of Babylon (v. 9), may in fact date originally from the time of Isaiah and have in view Sennacherib's destruction of Babylon.[29] A later reader, nonetheless, would certainly be inclined to associate this prophecy with the fall of Babylon at the end of the Babylonian exile, even if the details in the text do not fit that later event.

But an even more compelling inner-Isaianic example of such contemporizing reinterpretation can be seen by taking a closer look at Isa 10:5–34 itself. Despite initial appearances, the four units in this loose collection do not fit well together, and several of them show traces of having been composed originally against a quite different enemy than Assyria.[30] While 10:16–19 is linked to the preceding material with a "therefore" that suggests it introduces an explicit judgment against Assyria's arrogance detailed in verses 5–15, verses 16–19 do not share any imagery in common with the preceding verses. If one may judge from the continuity and consistency of imagery, the original conclusion to 10:5–15 is to be found in 10:24b–27a, where similar imagery of a punishing "staff" is used in an explicit word of judgment on Assyria. The quite different imagery in verses 16–19, by contrast, has its closest parallels in the oracle against Damascus and Ephraim in 17:1–6. There as here, Isaiah speaks of a "wasting away" (רזון par. ירזה) of the enemy's "fatness" (משמניו par. משמן),[31] a loss of his glory,[32] and a destruction expressed in terms of arboreal or horticultural imagery. Moreover, a similar description of the destruction of a people under the image of a brush fire is also found in the oracle against the northern kingdom in 9:17 (ET 18). These parallels suggest that the present placement of 10:16–19 may represent a secondary use of part of an oracle originally directed against Syria and Israel at the time of the Syro-Ephraimitic war, and this suggestion is strengthened by a number of details in the following verses 20–24a.

[29] See the discussions in Andrew A. Macintosh, *Isaiah XXI: A Palimpsest* (Cambridge: Cambridge University Press, 1980); and Seth Erlandsson, *The Burden of Babylon: A Study of Isaiah 13:2–14:23* (ConBOT 4; Lund: Gleerup, 1970), 81–92.

[30] For the following argument, see my earlier discussion in J. J. M. Roberts, "Isaiah and His Children," in *Biblical and Related Studies Presented to Samuel Iwry* (ed. A. Kort and S. Morschauser; Winona Lake, IN: Eisenbrauns, 1985), 193–203.

[31] Cf. Isa 10:16 and 17:4.

[32] Cf. Isa 10:18 and 17:4.

First of all, verse 21 begins with a clause, “a remnant will return” (שאר ישוב), which is identical to the name of Isaiah’s first son, Shear-jashub. In 7:3, which first mentions this child, Isaiah is told to take the child with him when, with his prophetic message, he goes to confront Ahaz in response to the threatened attack on Jerusalem from Damascus and Israel. There is no apparent reason for the presence of the child other than as a visible embodiment of the prophet’s message, an embodiment incorporated in the symbolic name the child bears. Surprisingly, however, Isaiah 7 offers no interpretation of the meaning of the name Shear-jashub, though the immediate context explains the meaning of the symbolic names of the other two children mentioned in chapters 7 and 8 (7:14; 8:3): Immanuel in 8:8b–10, and Maher-shalal-hash-baz in 8:4. Unless 10:20–23 is understood as the explanation of the name Shear-jashub, there is no explanation for the name preserved in the book of Isaiah. But if 10:20–23 was the original explanation for the name, its original thrust, like that of Immanuel and Maher-shalal-hash-baz, would have been against the northern kingdom of Israel as the enemy of Judah. Such an antinorthern polemic is still evident in 10:20–23. The expression “a remnant will return” (שאר ישוב) is repeated in verse 22, and there is further play on the expression in 10:20–21, where the “remnant” is specified as the “remnant of Israel” (שאר ישראל), “the survivors of the house of Jacob” (ופליטת בית־יעקב), and “the remnant of Jacob” (שאר יעקב). The designation “Israel” is ambiguous, but First Isaiah normally uses “Jacob” to refer to the northern kingdom, and that here the text originally meant the northern kingdom is underscored by the contrast the passage draws between north and south. Note God’s contrasting use of the personal pronoun between “your people, O Israel” in verse 22 and “my people who dwell in Zion” in verse 24a.

In other words, Isa 10:16–24a appears to be prophetic material originally intended to reassure Judah in the face of a threat from Syria and Israel at the time of the Syro-Ephraimitic War (734–732 B.C.E.), but sometime later when Assyria was the major threat to Judah, perhaps at the time of Sennacherib’s invasion in 701 B.C.E., this material was slightly reworked and put into a new context of an oracle against Assyria. Moreover, we must say something similar of the final section of this chapter, 10:27b–34.

Verses 27b–32 describe the march of an enemy army against Jerusalem until it stops just before the walls of Jerusalem and the enemy waves his hand in a gesture of derision against the city. Given the preceding context, the natural assumption is to identify this enemy with the Assyrian foe mentioned in 10:24b–27a. There are serious difficulties with that identification, however. No known Assyrian advance against

Jerusalem took the route outlined in these verses. Sennacherib's well-documented third campaign in 701 B.C.E. took the normal invasion route for Assyrian and later Babylonian armies, first marching down the coast through Philistine territory, to secure the Assyrian's southern flank from the threat of any possible Egyptian relief force. Then, once it secured this flank, the Assyrian force systematically reduced the outlying fortresses in the Judean Shephelah to open its way for an attack on Jerusalem. There is absolutely no indication in any of our sources, Assyrian or Israelite, that Sennacherib launched a surprise attack on Jerusalem from the north. Because of this difficulty, scholars have postulated an unrecorded Assyrian advance against Jerusalem in 715 or 711 B.C.E., but there is no evidence that such an advance even took place, much less that it followed the route described in Isaiah 10. Nor is there any reason to believe that this description simply adapts an old pilgrimage route in an imaginative portrayal of God's threat to Jerusalem.[33]

There is only one historically verifiable march of an enemy army against Jerusalem both taking place during Isaiah's lifetime, and for which the line of march portrayed in this account is probable–Syria and Israel's joint attack on Jerusalem during the Syro-Ephraimitic war (Isa 7:1–9; 2 Kings 16:5).[34] The natural road for such an attack was the north-south road from Shechem to Jerusalem, which followed the spine of the central ridge; where this account deviates from that road, tactical considerations uniquely appropriate to the Syrian-Israelite objectives in that war account for the deviation. According to Isa 10:28, at Michmash the enemy made final preparations for battle before crossing over the pass and making camp for the night at Geba. The route described here suggests that the attacking army made a wide swing to the east of the main north-south road somewhere in the vicinity of Bethel and did not rejoin it until somewhere south of Ramah. The purpose for choosing this unusual and more-difficult route was apparently to avoid the Judean border fortress at Mizpeh. This would fit the Syrian-Israelite strategy in their attempt on Jerusalem. They were interested in a surprise attack against Jerusalem that would enable them to isolate the city, quickly breach its defenses, capture Ahaz, and replace him with a king of their own choosing. All of this had to be accomplished in time to regroup their forces and redeploy to the north in order to meet the threat of an Assyrian invasion. Unlike Sennacherib, who boasted of systematically reducing forty-six of

---

[33] Duane L. Christensen, "The March of Conquest in Isaiah X 27c–34, " *VT* 26 (1976): 385–99.

[34] See the discussion in Herbert Donner, "Der Feind aus dem Norden: Topographische und archäologische Erwägungen zu Jes 10:27b–34, " *ZDPV* 84 (1968): 46–54.

Judah's walled cities, Syria and Israel could not afford to become bogged down in long, drawn-out siege warfare with Judah's major border fortifications on the main road, so a flanking move to bypass the border strongholds was in order; crossing the pass between Michmash and Geba seems to reflect that strategy.

The climax of this description, but not the end of the oracle, is reached in 10:32, when the enemy stops at Nob just north of Jerusalem, perhaps to be located on the present Mount Scopus, and shakes his fist at Jerusalem. As I have demonstrated elsewhere, this gesture, whether it is actually "shaking the fist" or some other movement of the hand, is clearly an expression of contempt for Mount Zion.[35] That makes it impossible to accept the attempt of Clements and other scholars to find the original conclusion of the oracle here.[36] Given Isaiah's view that Yahweh lives on Mount Zion (8:18), one would hardly expect an Isaianic oracle to end with a foreign enemy disparaging God's city with apparent impunity; and if that foreign enemy were the leader of the Syro-Ephraimitic coalition, then it is simply out of the question. Isaiah's well-known attitude toward those two powers excludes such an ending.

The ending, in 10:33–34, gives God's response to the arrogant presumptuousness of this enemy. It portrays the enemy under the image of a forest of tall, majestic trees, which God violently cuts down with an iron tool. The word translated "ax" by the NRSV is not the same Hebrew word used in 10:15, so there does not appear to be a direct connection between 10:33–34 and the Assyrian oracle in 10:5–15 + 24b–27a, though the theme of God's humiliation of a foolishly arrogant enemy is the same. The description of the enemy's destruction uses a similar metaphor to the one used for the destruction of Israel in 9:17 (ET 18) and 10:16–19, and it also has close parallels to 2:12–13. The reference to the Lebanon may be an allusion to the Syrian element in this enemy coalition, since Syria apparently exercised some political influence in the Lebanon region, and some of the Phoenician cities were part of their anti-Assyrian front.

If this analysis of Isa 10:16–34 has any merit, it suggests that the kind of contemporizing reinterpretation of Scripture done at Qumran was already being done within the biblical text itself, and in the case of the Isaiah passage, quite likely by the prophet Isaiah himself. One should remember that Isaiah's prophetic activity extended over a period of at least thirty-seven years—from the death of Uzziah to Sennacherib's attack on Jerusalem. At least twice during this period Isaiah claims to have received a divine command to write down his words to await their future relevance (8:1, 16; 30:8). Given these facts, it should not be surprising if Isaiah adapted some of his own earlier oracles to address new situations in the life of his people.

---

[35] J. J. M. Roberts, "Isaiah 2 and the Prophet's Message to the North," *JQR* 75 (1985): 301–2n29.

[36] Ronald E. Clements, *Isaiah 1–39* (NCB; Grand Rapids: Eerdmans, 1980), 120.

Because in many ways Sennacherib's attitude toward Jerusalem and Yahweh was similar to that exhibited by the earlier Rezin and Pekah, the prophet felt free to rework an earlier prophecy to reapply it to a new embodiment of human arrogance. This partial reworking to address a new situation has obscured some of the oracle's original historical particularity and leaves many details unexplained and unexplainable. Nevertheless, the theological point of the oracle remains clear and can be applied to analogous situations in the life of God's people over and over again. Despite appearances to the contrary, the boastful disparagement of God by the powerful enemies of God's people is not the last word. Those who lift themselves up against God will in time be cut down, and God's people can continue to trust in God as the source of their security.

CHAPTER THIRTEEN
BIBLICAL INTERPRETATION AT QUMRAN

George J. Brooke

I. Introduction

The purpose of this chapter is to outline the principal aspects of biblical interpretation at Qumran. After a brief consideration of the history of research in this area, I focus on two areas, the types of biblical interpretation found in the compositions most clearly to be associated with the Qumran community or the wider movement of which it was a part, and the theological issues that lie behind discerning the variety of types of interpretation taking place in the Qumran texts.

An initial problem needs to be mentioned. It is all too easy for both the general reader and the scholar to assume that in the two hundred years before the fall of the temple in 70 C.E. there was some general agreement among Jews concerning both the number of compositions taken to be authoritative and the form of the text in which each composition was accepted. But such an assumption imposes an anachronistic perspective on the whole endeavor. In the period when the Qumran community[1] flourished there seems to have been some general agreement about the status of the five books of the Torah, though it is unlikely that they ever featured together on a single scroll, and about the status of some of the historical works[2] and of the literary prophets as well as the Psalms. Concerning other compositions now included in Jewish and Christian Bibles, there may have been some disagreement; the work most often cited in this respect is Esther, which has not yet been identified in any of the fragments found in the Qumran caves but which may have been taken as authoritative elsewhere in Judaism.[3] Furthermore, yet other compositions, such as the book of *Jubilees*, may have been deemed authoritative, even though subsequently they were not universally accepted by Jews or Christians.

---

[1] Or communities, if one is to suppose that there was considerable change and development over the years the site was occupied, especially between what may be commonly taken as periods Ib and II, whenever the precise abandonment of the site and its reoccupation took place. On some of the changes that may have taken place during the life of the community, see, e.g., James H. Charlesworth, "The Origin and Subsequent History of the Authors of the Dead Sea Scrolls: Four Transitional Phases among the Qumran Essenes," *RevQ* 10 (1979–81): 167–202, 213–33; idem, "Reflections on the Text of *Serek Ha-Yaḥad* Found in Cave IV," *RevQ* 17 (1996): 403–35; on the reevaluation of the periods of occupation of the site, see especially Jodi Magness, "The Chronology of the Settlement at Qumran in the Herodian Period," *DSD* 2 (1995): 58–65; this important essay is reworked in idem, *Archaeology of Qumran and the Dead Sea Scrolls* (Grand Rapids: Eerdmans, 2002), esp. ch. 4; repr. in idem, *Debating Qumran: Collected Essays on Its Archaeology* (Interdisciplinary Studies in Ancient Culture and Religion 4; Leuven: Peeters, 2004), 41–48.

In addition to the anachronistic use of the terms "Bible" and "biblical," there is a problem with what those terms imply about these authoritative works as artifacts. The term "Bible" comes from the Greek word most commonly rendered as "book," but the authoritative works in the Qumran library were never books in the strict sense of being codices all bound together. For the most part each composition was apparently written on a separate scroll and on only one side of the parchment. This consideration of the scrolls as artifacts should surely effect the way we understand the authoritative works at Qumran as a collection: if everything is not bound together in a single book, then there is much more chance of such a collection being perceived as somewhat open-ended and expandable. Some scholars have been so concerned that modern readers of this ancient material should understand that we are not dealing with books that they have preferred to use the terms "Scripture" or "Scriptures" of those writings which were deemed authoritative.[4]

---

[2] That is, the so-called "Former Prophets." Christian readers should be aware that the books of Chronicles were not included in the Jewish collection of historical books. Furthermore, it is far from clear whether the books of Chronicles were deemed authoritative at Qumran, since the quite small amount of text preserved in 4Q118, apparently the only copy of Chronicles found in the caves, does not correspond with any known version of Chronicles: see Julio C. Trebolle Barrera, "118. 4QChr," in *Qumran Cave 4.XI: Psalms to Chronicles* (ed. E. Ulrich et al.; DJD 16; Oxford: Clarendon, 2000), 295–97.

[3] Even Esther may well have been known at Qumran, as has been argued by Shemaryahu Talmon, "Was the Book of Esther Known at Qumran?" *DSD* 2 (1995): 249–67.

[4] See especially Eugene C. Ulrich, "Jewish, Christian, and Empirical Perspectives on the Text of Our Scriptures," in *Hebrew Bible or Old Testament? Studying the Bible in Judaism and Christianity* (ed. R. Brooks and J. J. Collins; Notre Dame, IN: University of Notre Dame Press, 1990), 69–85; Eugene C. Ulrich, "The Canonical Process, Textual Criticism, and Latter Stages in the Composition of the Bible," in *Shaᶜarei Talmon: Studies in the Bible, Qumran*, and the Ancient Near East Presented to Shemaryahu Talmon (ed. M. A. Fishbane, E. Tov, and W. W. Fields; Winona Lake, IN:

II. THE HISTORY OF RESEARCH

Over the last fifty-five years there have been many studies on various aspects of biblical interpretation in the Qumran Scrolls, but there has been no large-scale comprehensive study of the phenomenon. It is noteworthy that the earlier classified bibliographies of scholarly writings on the Qumran Scrolls contain no section devoted solely to biblical interpretation.[5] Nevertheless, some presentations of biblical interpretation have been influential.

As in many scientific endeavors, work on Qumran biblical interpretation began with a series of detailed and technical articles. Perhaps because the most explicit interpretation in the first scrolls coming to light was to be found in the *Habakkuk Pesher* (1QpHab), several early studies were devoted to analyzing that work and others like it. William H. Brownlee's article on "Biblical Interpretation among the Sectaries of the Dead Sea Scrolls"[6] prompted scholars to focus on the detail of how the Qumran commentators derived their interpretations from the biblical

---

Eisenbrauns, 1992), 267–91; and Eugene C. Ulrich, *The Dead Sea Scrolls and the Origins of the Bible* (SDSSRL; Grand Rapids: Eerdmans, 1999), chs. 1–6.

[5] E.g., there is no such section in William S. LaSor, *Bibliography of the Dead Sea Scrolls 1948–1957* (Fuller Theological Seminary Bibliographical Series 2; Fuller Library Bulletin 31; Pasadena, CA: Fuller Theological Seminary, 1958), nor in Bastiaan Jongeling, *A Classified Bibliography of the Finds in the Desert of Judah 1958–1969* (*STDJ* 7; Leiden: Brill, 1971). The index in Florentino García Martínez and Donald W. Parry, *A Bibliography of the Finds in the Desert of Judah 1970–1995* (*STDJ* 19; Leiden: Brill, 1996), is not sufficiently exhaustive to be a substitute for a classified bibliography; e.g., the index does not list my own work *Exegesis at Qumran: 4QFlorilegium in Its Jewish Context* (JSOTSup 29; Sheffield: JSOT Press, 1985) under "Bible, Exegesis" nor under "Bible, Interpretation." An exception is Joseph A. Fitzmyer's section entitled "Old Testament Interpretation in Qumran Literature," in *The Dead Sea Scrolls: Major Publications and Tools for Study* (SBLSBS 8; Missoula, MT: Scholars Press, 1975), 110–11; revised ed. (SBLRBS 20; Atlanta: Scholars Press, 1990), 160–61.

[6] William H. Brownlee, "Biblical Interpretation among the Sectaries of the Dead Sea Scrolls," *BA* 14 (1951): 54–76; repr. in abbreviated form, in idem, "Twenty-Five Years Ago: William H. Brownlee Demonstrates Thirteen Principles for the Interpretation of Scripture Commentaries from Qumran," *BA* 39 (1976): 118–19. Brownlee went on to work in detail on 1QpHab, writing on the biblical text and the commentary proper: *The Text of Habakkuk in the Ancient Commentary from Qumran* (SBLMS 11; Philadelphia: SBL, 1959; repr., 1978); idem, *The Midrash Pesher of Habakkuk: Text, Translation, Exposition with an Introduction* (SBLMS 24; Missoula, MT: Scholars Press, 1979). Brownlee also wrote a number of studies on the principles behind biblical interpretation in the Qumran Scrolls, notably "The Background of Biblical Interpretation at Qumran," in *Qumrân: Sa pieté, sa théologie et son milieu* (ed. M. Delcor; BETL 46; Paris: Duculot, 1978), 183–93.

text before them.[7] However, F. F. Bruce's *Biblical Exegesis in the Qumran Texts*[8] set out more broadly what were to become the parameters of the topic. Notably characteristic of Bruce's book and of other discussions of biblical interpretation in the Qumran Scrolls is the way it begins. For Bruce it was the pesharim that most obviously characterized Qumran exegesis.[9] They provided the underlying principles of Qumran biblical interpretation: that the prophets could only be properly understood as they were given meaning by the Righteous Teacher, that whether or not they knew it, the prophets all spoke of the end, and that for the Qumran exegete the end was at hand. In realizing these principles, the Qumran commentators atomized the text, fitting it into the new historical context of their own experiences, regardless of its contextual meaning; they selected variant readings to suit their own purposes, occasionally allegorized the text, and read everything eschatologically, often with the imminent coming of the messiahs in mind. Shortly after Bruce's work, Otto Betz presented his *Offenbarung und Schriftforschung in der Qumransekte*.[10] Somewhat like Bruce, Betz argued that revelation should be the starting point for viewing both the prophetic oracle and the Qumran interpretation. The Qumran interpreter's authority rested not on the careful application of exegetical techniques to derive interpretation from the prophetic text, as Brownlee had suggested, but in the interpreter's inspired insight into the text of Scripture as he ably perceived the prophetic texts speaking directly to the circumstances of the imminent end time, with which the community identified its own experiences.

---

[7] The most detailed follow-up to Brownlee's article, including an extensive critique of it, was the monograph by Karl Elliger, *Studien zum Habakkuk-Kommentar vom Totem Meer* (BHT 15; Tübingen: Mohr Siebeck, 1953), esp. 118–64.

[8] Frederick F. Bruce, *Biblical Exegesis in the Qumran Texts* (Exegetica 3.1; Den Haag: van Keulen, 1959). Bruce's approach developed little over the years; one can still read most of *Biblical Exegesis in the Qumran Texts* as outlined in his study "Biblical Exposition at Qumran," in *Studies in Midrash and Historiography* (ed. R. T. France and D. Wenham; Gospel Perspectives 3; Sheffield: JSOT Press, 1983), 77–98.

[9] This perspective has remained a persistent and limiting element in the presentation of Qumran biblical interpretation. For example, see Hervé Gabrion, "L'interprétation de l'Écriture dans la littérature de Qumrân," *ANRW* 19.1 (1979): 779–848, esp. 783: "Les *pešarim* offrent certainement le type d'exégèse le plus original et le plus caractéristique pratiqué par la communauté de Qumrân." In one 1986 volume, various sections refer to some few Qumran scrolls, but because of the way editors made assignments, the only explicit presentation of Qumran interpretation is limited to Maurya P. Horgan's contribution on the pesharim: "The Bible Explained (Prophecies)," *Early Judaism and Its Modern Interpreters* (ed. R. A. Kraft and G. W. E. Nickelsburg; Atlanta: Scholars Press, 1986), 247–53. Likewise, there is no place for the breadth of Qumran biblical interpretation in the *ABD*; instead, in the article on "Interpretation, History of," there is simply a cross-reference to Devorah Dimant's excellent and detailed study on the pesharim ("Pesharim, Qumran," *ABD* 5:244–51), as if that were sufficient for coverage of the topic. Again, note the remarkable statement that the pesharim "contain the bulk of Qumran exegesis," by David I. Brewer, *Techniques and Assumptions in Jewish Exegesis before 70 CE* (TSAJ 30; Tübingen: Mohr Siebeck, 1992), 187. Also, Philip S. Alexander mentions 1QapGen and the *Temple Scroll* as rewritten Bible texts, but singles out the pesharim alone in relation to Qumran interpretation: "Jewish Interpretation," *The Oxford Companion to the Bible* (ed. B. M. Metzger and M. D. Coogan; Oxford: Oxford University Press, 1993), 305. The concern to give high priority to the pesharim in discussions of biblical interpretation at Qumran is also evident in James H. Charlesworth, *The Pesharim and Qumran History: Chaos or Consensus?* (Grand Rapids: Eerdmans, 2002); and in the series Companions to the Qumran Scrolls allocating a separate volume to them: Timothy H. Lim, *Pesharim* (Companion to the Qumran Scrolls 3; London: Sheffield Academic Press, 2002).

The study of the pesharim has continued to dominate the scholarly discussion of biblical interpretation at Qumran.[11] The major advances recently have been in the better understanding of pesher as a genre with regard to both form and content, in the appreciation that there is a spectrum of pesherite exegesis rather than just the two forms, continuous and thematic, as described by Jean Carmignac,[12] and in the closer analysis of a range of exegetical techniques used in the pesharim. Alongside this ongoing study of the pesharim, in the last twenty-five years or so the overall breadth of biblical interpretation in the Qumran Scrolls has also gradually come to the fore. To show this, I consider the history of research into Qumran biblical interpretation by reviewing briefly the salient features of various significant surveys.

---

[10] Otto Betz, *Offenbarung und Schriftforschung in der Qumransekte* (WUNT 6; Tübingen: Mohr Siebeck, 1960).

[11] Scholars have done much significant work, and discussion of the genre pesher is ongoing; here are a few examples in chronological order: Maurya P. Horgan, *Pesharim: Qumran Interpretations of Biblical Books* (CBQMS 8; Washington, DC: Catholic Biblical Association, 1979); George J. Brooke, "Qumran Pesher: Towards the Redefinition of a Genre," *RevQ* 10 (1979–81): 483–503; Elio Jucci, "Il pesher, un ponte fra il passato e il futuro," *Hen* 8 (1986): 321–38; Heinz Feltes, *Die Gattung des Habakukkommentars von Qumran (1QpHab): Eine Studie zum frühen jüdischen Midrasch* (FB 58; Würzburg: Echter Verlag, 1986); Ida Fröhlich, "Le genre littéraire des *pesharim* de Qumrân," *RevQ* 12 (1985–87): 383–98; Elio Jucci, "Interpretazione e storia nei pesharim," *BibOr* 154 (1987): 163–70; Ida Fröhlich, "Caractères formels des pesharim de Qumrân et la littéraire apocalyptique," in *"Wünschet Jerusalem Frieden": Collected Communications to the XIIth Congress of the International Organization for the Study of the Old Testament, Jerusalem 1986* (ed. M. Augustin and K.-D. Schunck; Frankfurt: Lang, 1988), 449–56; Elio Jucci, "Il genere 'pesher' e la profezia," *RStB* 1 (1989): 151–68; Ida Fröhlich, "Pesher, Apocalyptical Literature and Qumran," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid, 18–21 March 1991* (ed. J. C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; STDJ 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:295–305; Heinz-Josef Fabry, "Schriftverständnis und Schriftauslegung der Qumran-Essener," in *Bibel in jüdischer und christlicher Tradition: Festschrift für Johann Maier* (ed. H. Merklein, K. Müller, G. Stemberger; BBB 88; Frankfurt: Anton Hain, 1993), 87–96; Moshe J. Bernstein, "Introductory Formulas for Citation and Recitation of Biblical Verses in the Qumran Pesharim: Observations on a Pesher Technique," *DSD* 1 (1994): 30–70; George J. Brooke, "The Pesharim and the Origin of the Dead Sea Scrolls," in *Methods of Investigation of the Dead Sea Scrolls and the Khirbet Qumran Site: Present Realities and Future Prospects* (ed. M. O. Wise et al.; Annals of the New York Academy of Sciences 722; New York: New York Academy of Sciences, 1994), 339–54. Most significantly, the detailed commentary on 4QpNah (= 4Q169) by S. Berrin contains a nuanced approach to the text that will become a touchstone for future studies of texts in the genre: Shani L. Berrin, *The Pesher Nahum Scroll from Qumran: An Exegetical Study of 4Q169* (STDJ 53; Leiden: Brill, 2004).

In 1976 Geza Vermes presented a brief but significant summary of interpretation at Qumran,[13] proposing a six-part classification of the forms of Qumran exegesis: pesher; the midrashic paraphrase of large units (such as in 1QapGen); the midrashic interpretation of small units (e.g., the use of Mal 1:10 in CD 6.11–13); collections of proof texts (4Q175); collections of legal texts arranged according to content (e.g., CD 4.20–5.2 on marriage); and collections of doctrinal texts arranged thematically (e.g., CD 6.3–8; 4Q174). Vermes also proposed that there were basically three methods of exegesis discernible in these six forms: haggadic interpretation, which commonly supplemented the biblical narrative for a particular reason; halakic reinterpretation of various kinds; and the fulfillment of prophecy, in which various techniques were used to identify the correct eschatological message of the prophets. It is clear that this survey was concerned primarily with content.

In a later general survey published in 1986,[14] Vermes altered his categorization by focusing on content and methods of exegesis at the same time. He divided biblical interpretation in the Qumran community into three classes: interpretations supporting doctrinal claims; paraphrastic rewordings; and exposition proper, which was of two sorts, the interpretation of particular biblical books and midrashim devoted to various themes. By mixing content and method, some items that had been explicit in his earlier classification were lost to view, notably the halakic exegesis of the community texts. In a further summary article of 1989,[15] he revised his approach yet again, proposing that Qumran exegesis was of three types: implicit exegesis of an editorial type, most of which he described on the basis of the *Temple Scroll*; the exegesis of individual biblical books, which for him included both narrative interpretation (e.g., 1QapGen) and the pesharim; and thematic exegesis, which in part he described as "fully fledged midrash"[16] (e.g., 4Q174). For Vermes, all three kinds begin with the Bible and accompany it with various kinds of interpretation.[17]

---

[12] Jean Carmignac, "Le document de Qumran sur Melkisédeq," *RevQ 7* (1969–71): 360–61; the distinction between continuous and thematic pesharim is still followed, but in a qualified way, by Shani L. Berrin, "Pesharim," *EDSS* (ed. L. H. Schiffman and J. C. VanderKam; New York: Oxford University Press, 2000), 644–47.

[13] Geza Vermes, "Interpretation, History of: At Qumran and in the Targums," *IDBSup* (1976), 438–41.

[14] Geza Vermes, "Bible Interpretation," in the revised edition of Emil Schürer's, *The History of the Jewish People in the Age of Jesus Christ* (rev. and ed. G. Vermes et al,; 3 vols.; Edinburgh: T & T Clark, 1986), 3.1:420–51.

[15] Geza Vermes, "Bible Interpretation at Qumran," *ErIsr* 20 (1989): 184–91.

Vermes's breadth of knowledge in early Jewish exegesis[18] makes this consideration of his various survey articles particularly significant. Over the years he has clearly wrestled with the problem of whether we should understand Qumran exegesis primarily on the basis of its content, or rather on the basis of the exegetical methods used. Both approaches remain possible, but since the same or similar exegetical techniques can be used variously in exegetical passages based on different content, the dilemma is resolved in this present chapter by categorizing Qumran exegesis according to content and noting methods and techniques along the way.

In 1979 Hervé Gabrion's extensive analysis appeared.[19] Gabrion highlighted several features that had been pointed out in learned articles and papers but had not been seen as part of a larger whole: now Gabrion could say with little qualification that every scroll from Qumran reflected the Bible in some way or other. To begin with, he stressed that the biblical manuscripts from Qumran provide many examples of exegetical variants. Then, after consideration of the use of Scripture in the *Rule of the Community* (1QS), the *Hodayot* (1QH, *Thanksgiving Hymns*), and the *War Scroll* (1QM), Gabrion came to several important conclusions. He observed that for the most part in those scrolls, the use of biblical material reflects, often rather closely, the concerns of the original context; the use of Scripture was not arbitrary, and in identifying themselves as the true remnant of Israel, the Qumran exegetes seem to have paid particular attention to passages describing the history and institutions of Israel or those with obvious eschatological (especially messianic) implications. They did not perceive the biblical material to be limiting, but merely the basis for all kinds of rich typological developments that might reflect particular concerns, such as a dualistic worldview or the place of the Teacher, which are both reflected in what Gabrion labels the anthological style of the use of Isaiah, Genesis, Hosea, and Joel in 1QH^a 16.4–18 (8.4–18 Sukenik). Gabrion's study remains important because he pointed out clearly that the presuppositions of much Qumran biblical interpretation rest in the community's view of itself as the sole heir of Israel in the last days, a view that it could confirm by reference to its distinctive control of the interpretation of commandments that either were not expressed in Scripture at all, or if expressed there, were not presented with sufficient detail. The disclosure of these hidden things, נסתרות (*nistārôt*), is the subject matter of much Qumran legal interpretation that Gabrion has correctly described as not esoteric but exegetically justified.

---

[16] Ibid., 191.

[17] In a further study published in the same year, Vermes offered an analysis of passages in Qumran literature where the discourse is based on other grounds but supported with proof texts of various kinds: Geza Vermes, "Biblical Proof-Texts in Qumran Literature," *JSS* 34 (1989): 493–508.

[18] See the oft-quoted studies collected in Geza Vermes, *Scripture and Tradition in Judaism: Haggadic Studies* (2d, rev. ed.; StPB 4; Leiden: Brill, 1983); and in idem, *Post-Biblical Jewish Studies* (SJLA 8; Leiden: Brill, 1975).

[19] Hervé Gabrion, "L'interprétation de l'Écriture dans la littérature de Qumrân," *ANRW* 19.1: 779–848, based on work completed in 1975 under the supervision of Valentin Nikiprowetzky.

Gabrion's attention to the biblical basis of the Qumran interpreters' presuppositions was reflected in a slightly different way in my work of 1985.[20] There the focus was not so much on presuppositions as on exegetical methods. I set one particular Qumran composition (4Q174) in the context of the exegetical techniques used in a number of other related works, some emanating from Qumran and others belonging to a much broader spectrum of Jewish exegetical literature. Once Qumran biblical interpretation has been set in a broader context, it becomes clearer that there is little that is distinctive about its methodology. The result of such an observation suggests that–rather than identifying all or most of such interpretation as simply continuous with what is already taking place in the Scriptures themselves, as may be reflected in the Qumran presupposition that the community is the only rightful continuity of biblical Israel–it is just as likely that we should see some Qumran interpretation as a postbiblical phenomenon, needing to be described in nonbiblical terminology. The question then arises whether we should approach the exegetical methodology of the Qumran interpreters primarily from the standpoint of the Scriptures themselves or from the more elaborately explicit systems of later Jewish writings. This problem is well represented in the scholarly use of the very word "midrash." More than one Qumran composition uses it in a technical sense. It refers to whole interpretative compositions[21] or individual pericopae.[22] Its use encourages one to think of Qumran biblical interpretation in terms of later Jewish exegetical traditions, though perhaps that is not entirely justified, since such later exegesis is more self-conscious and certainly works with a more rigid definition of what might constitute the set of authoritative texts.[23]

---

[20] Brooke, *Exegesis at Qumran.*

[21] As in the title of 4Q249, *Midrash Sepher Moshe.*

[22] As in 4Q174 3.14; using the numbering system of Annette Steudel, *Der Midrasch zur Eschatologie aus der Qumrangemeinde (4QMidrEschat$^{a\,b}$): Materielle Rekonstruktion, Textbestand, Gattung und traditionsgeschichtliche Einordnung des durch 4Q174 ("Florilegium") und 4Q177 ("Catena A") repräsentierten Werkes aus den Qumranfunden* (STDJ 13; Leiden: Brill, 1994), 23–29.

Michael Fishbane's key study of 1988 has changed the parameters of the debate considerably.[24] His presentation has three parts. In the first he briefly describes some of the artifactual evidence of the biblical scrolls from Qumran. In the very writing of a scroll, a scribe has to make a host of interpretative decisions, including word spacing, paragraphing, the representation of the Tetragrammaton, stylistic improvements, harmonizations. In considering the common uses for such scrolls, Fishbane sees virtually no evidence for any cultic usage,[25] but does notice several remarks in the community compositions about the study of the Scriptures, especially the Law.[26] Citations from the Scriptures are often introduced formulaically, also strongly suggesting which texts were authoritative for the community and the wider movement of which it was a part. Fishbane lists citations that are secondary to the main argument of a passage, such as some legal (e.g., CD 10.14–15), some nonlegal (e.g., 1QS 5.7–20), and some prophetic ones (e.g., CD 3.18–4.4). He also lists citations that precede the commentary and in form are pseudepigraphic (e.g., the *Temple Scroll*), pesherite, variously anthological, or explicatory. Fishbane sees the authority of various scriptural passages in the way in which many Qumran compositions use biblical language, work with biblical models (such as Num 6:24–26 in 1QS 2.2–4), and apply biblical models to community practice such as in the covenant initiation ceremony of 1QS column 2. "Virtually the entirety of Mikra is used and reused by the writers of the Qumran scrolls in order to author, reauthor, and–ultimately–to authorize their practices and beliefs."[27]

---

[23] Thus, for example, William H. Brownlee has actually labeled 1QpHab a midrash pesher, as in *The Midrash Pesher of Habakkuk.* Yet Timothy H. Lim, reflecting more recent caution in this respect, has preferred to conclude that it is best to leave the genre midrash out of consideration: "At most, it may be said that the pesharim are midrashic, in the general and non-specific meaning of the word"; see his *Holy Scripture in the Qumran Commentaries and Pauline Letters* (Oxford: Clarendon, 1997), 129.

[24] Michael A. Fishbane, "Use, Authority and Interpretation of Mikra at Qumran," in *Mikra: Text, Translation, Reading and Interpretation of the Hebrew Bible in Ancient Judaism and Early Christianity* (ed. M. J. Mulder; CRINT: sec. 2, LJPSTT 1; Assen: van Gorcum, 1988), 339–77.

[25] The exception may be the references to the book of Hagu (Hagy? Meditation? e.g., CD 13.2–3), which may imply that some authoritative works were used liturgically, cultically, or in meditation. An alternative view of the book of Hagu as reflections on creation and history is offered by Cana Werman, "What Is the *Book of Hagu*?" in *Sapiential Perspectives: Wisdom Literature in Light of the Dead Sea Scrolls; Proceedings of the Sixth International Symposium of the Orion Center, 20–22 May, 2001* (ed. J. J. Collins, G. E. Sterling, and R. E. Clements; STDJ 51; Leiden: Brill, 2004), 125–40.

[26] E.g., 1QS 1.3, 8, 12; 6.6–8, 14; CD 12.2–3; 16.1–2. The possibility of a school setting for the exegesis at Qumran has been reviewed by André Lemaire, "L'enseignement essénien et l'école de Qumrân," in *Hellenica et Judaica: Hommage à Valentin Nikiprowetzky* (ed. A. Caquot, M. Hadas-Lebel and J. Riaud; Leuven: Éditions Peeters, 1986), 191–203.

In a brief second section Fishbane describes the chain of authority in Qumran interpretation: God is the principal source of authority for the community, and authoritative spokesmen make his purposes known with respect to both the Law and the prophecies. In this respect the handling of the Law at Qumran is especially intriguing: sometimes new rules can be put alongside the Law; at other times new rules are presented as if they are by Moses himself. In the third part of his survey Fishbane presents a classification of biblical interpretation at Qumran in four kinds of exegesis: scribal, legal, homiletical, and prophetic. However, Fishbane does not make it clear that these are not mutually exclusive categories, since we can find forms of scribal exegesis in the other three kinds. Nevertheless, his detailed comments have widened the discussion of what constitutes biblical interpretation at Qumran, have given pride of place to the interpretation of the Law over the Prophets, and have provided the beginnings of a framework into which all the material available since 1991 can be located.[28]

In light of the increasing number of Qumran legal compositions that are becoming available in preliminary editions, it is not surprising to find that Johann Maier's 1996 study on "Early Jewish Biblical Interpretation in the Qumran Literature"[29] is mostly concerned with the interpretation of the Law at Qumran. This has built suitably on the correct focus of Fishbane's survey, but Maier has also asked some hard questions of the evidence. Whereas most scholars working on the Law at Qumran have assumed that "Torah" was used virtually synonymously with the first five scriptural books,[30] Maier has tried to tease out precisely what may be referred to as Torah or Law in any instance. He has suggested that it may not be appropriate always to think of Law and Pentateuch as synonyms during the late Second Temple period. Many of the compositions found in the Qumran library, such as the *Temple Scroll*, may have been considered as Torah,[31] though it is equally clear that the community distinguished between Torah and its own rules for disciplinary and organizational purposes. Having analyzed the various uses of the Hebrew root דרשׁ (*drš*), he has proposed that normally it means "to seek a verdict or ruling," rather than "to interpret." However, after raising this question of fundamental importance, Maier has failed to recognize two equally fundamental and related matters: (1) The person from whom a verdict or opinion is sought must have some source from which he derives his opinion. (2) Given that on legal matters no sources are explicitly cited in what may be identified as Qumran compositions other than those known to us as part of the Pentateuch, it is likely that any verdict or opinion delivered in a Qumran forum depended on an understanding of the relevance of certain scriptural passages to particular issues. Thus, despite Maier's partially justified skepticism that all legal matters in the Qumran texts were derived from scriptural prescriptions, it still remains that Scripture must have been the dominant resource for determining legal opinion.

---

[27] Fishbane, "Use, Authority and Interpretation of Mikra," 359.

[28] Trebolle Barrera's brief study is suggestive of the new breadth of categories needed for biblical interpretation at Qumran: Julio C. Trebolle Barrera, "Biblia e interpretación bíblica en Qumrán," in *Los hombres de Qumrán: Literatura, estructura social y concepciones religiosas* (ed. Florentino García Martínez and Julio C. Trebolle Barrera; Madrid: Editorial Trotta, 1993), 121–44; ET: "The Bible and Biblical Interpretation in Qumran," in *The People of the Dead Sea Scrolls: Their Writings, Beliefs and Practices* (ed. F. García Martínez and J. C. Trebolle Barrera; trans. W. G. E. Watson; Leiden: Brill, 1995), 99–121.

[29] Johann Maier, "Early Jewish Biblical Interpretation in the Qumran Literature," in *Hebrew Bible/Old Testament: The History of Its Interpretation*, vol. 1, *From the Beginnings to the Middle Ages (until 1300)*, part 1, *Antiquity* (ed. M. Sæbø; Göttingen: Vandenhoeck & Ruprecht, 1996), 108–29.

[30] Even though, of course, all would acknowledge that there are various textual forms of all five books.

Maier's work represents a consolidation of the view that the Law should be given pride of place in Qumran ideology and in the compositions that reflect such ideology. This view is represented in the survey by Fishbane, which in turn builds especially on the work of Joseph M. Baumgarten and Lawrence H. Schiffman.[32] However, his insistence that much in Qumran law is not exegetically derived from scriptural texts, and that by implication scriptural interpretation therefore was a secondary occupation among the Qumranites does not do justice to the evidence. What emerges in Maier's presentation is a description of the powerful roles of the Qumran Teacher and the priests in the community, who could directly declare the will of God as they understood it. In this, Maier's presentation has returned to a dominant motif in the work of the scholars writing on biblical interpretation at Qumran in the first two decades of research. The emphasis then, and now in Maier, was on the direct inspiration of the Teacher (and others) in understanding what the community should practice and in appreciating the prophets aright. Hence, Maier and others do not pay much attention to the exegetical methodology through which the Teacher has come to his insights, because they were given directly by God, as the oft-quoted 1QpHab 7.3–5 suggests: the Teacher is the one to whom God has made known all the mysteries of the words of his servants the prophets.

---

[31] Maier lists 2Q25; 4Q159; 4Q185; 4Q229; 4Q251; 4Q256–265; 4Q274–283; 4Q294–298; 4Q394–399; 4Q512–514; 4Q523–524; 5Q11–13; 11Q19–20. He especially claims that the *Sepher ha-Tôrah* of 11Q19 56.3 is certainly not the Pentateuch but a book of the Law proper, a collection of legal rulings.

[32] Especially see Joseph M. Baumgarten, *Studies in Qumran Law* (SJLA 24; Leiden: Brill, 1977); and the series of studies referred to in idem, *Qumran Cave 4.XIII: The Damascus Document (4Q266–273)* (DJD 18; Oxford: Clarendon, 1996), xv–xvi, 6; Lawrence H. Schiffman, *The Halakhah at Qumran* (SJLA 16; Leiden: Brill, 1975); idem, *Sectarian Law in the Dead Sea Scrolls: Courts, Testimony and the Penal Code* (BJS 33; Chico, CA: Scholars Press, 1983); idem, *The Eschatological Community of the Dead Sea Scrolls: A Study of the Rule of the Congregation* (SBLMS 38; Atlanta: Scholars Press, 1989); all revised in idem, *Law, Custom and Messianism in the Dead Sea Sect* (Hebrew ed.; Jerusalem: Zalman Shazar Center for the History of Israel, 1993).

Maier's study has been helpful in reminding scholars and others that it is not adequate to approach the matter of biblical interpretation at Qumran with the assumption that the canon, especially the content of the Torah or Pentateuch, was viewed at Qumran as fixed and closed and the sole point of reference in legal matters. Maier's work is also a sober attempt at suggesting that modern assumptions about the canon should not be loaded onto the Qumran covenanters, nor should postbiblical assumptions about particular terms, such as "midrash," lead modern analysts into assuming that a complete objectively justified hermeneutical system was in place at Qumran. Clearly, he is correct also to point out that the close definition of the Qumran way of life was a matter of power politics, within the community, in the wider movement of which it was a part, and between the community and other Jews. Clearly too, it is correct to acknowledge that not everything in the Qumran compositions is explicitly derived from authoritative scriptural texts, though this has been widely accepted over the years. However, Maier's rather minimalist view of the role of the Scriptures in Qumran compositions does not appear to be an adequate assessment of the evidence.

For long scholars have admitted that factors other than Scripture itself contributed to the worldview of the Qumran covenanters. The historical circumstances of the last two centuries before the fall of the temple in 70 C.E. contributed much.[33] The eschatological sensitivities of those centuries were especially significant in motivating a particular reading of Scripture.[34] The attitude of a predominantly priestly group to sacred space and its accompanying view of purity were also significant.[35] These views on purity are also reflected in some matters of ethics, such as the attitude to riches and זנות (*zĕnût*).[36] Nevertheless, study of the full range of compositions that can be associated directly with the Qumran community and the wider movement of which it was a part has shown that even if not everything in the Qumran world view was derived from Scripture, scriptural texts often provided the parameters for nonscriptural discourse. Often appeal was made to them for secondary support for conclusions reached on other grounds. In fact, it was such supportive use of Scripture that attracted scholarly attention from the outset. The classic study by Joseph A. Fitzmyer remains of use.[37] With regard to the Qumran texts alone, in some ways Fitzmyer's observations have been refined by Geza Vermes.[38]

---

[33] See, notably, Geza Vermes, "The Qumran Interpretation of Scripture in Its Historical Setting," *ALUOS* 6 (1966–68): 85–97; repr. in idem, *Post-Biblical Jewish Studies* (STLA 8; Leiden: Brill, 1975), 37–49.

[34] See, e.g., Brownlee, "Background of Biblical Interpretation at Qumran," 183–93.

[35] Note the comment of M. Wise on parts of the purity regulations of the *Temple Scroll*: in 4Q512 there is "concrete evidence for the suggestion that the CD community had legal resources which could fill the gaps of the TS laws." Michael O. Wise, *A Critical Study of the Temple Scroll from Qumran Cave 11* (SAOC 49; Chicago: Oriental Institute of the University of Chicago, 1990), 151.

Undoubtedly, in their concern with explicit scriptural interpretation in the scrolls, scholars have especially focused on the biblical commentaries, the pesharim, so that they sometimes see Qumran biblical interpretation and the pesharim as synonymous. Even with the pesharim controlling the discussion, we may deem several features to have emerged in the research on biblical interpretation in the Qumran Scrolls over the last half century: (1) With regard to the better understanding of Qumran biblical interpretation, most scholars have tended to trace things forward from biblical models, notably for the pesharim from the handling of prophetic dream materials in Daniel, rather than to trace things backward from later Jewish texts. Thus, with regard to the exegesis apparent in the scrolls, the term "midrash," has largely fallen out of use, especially as a reference to a particular genre of interpretation; in its strict sense the term is both inappropriate and anachronistic.[39] (2) The focus on exegetical techniques has been similarly debated: some see a natural progression from the scribal traditions of the early Second Temple period, which sought to improve the presentation of authoritative texts; others stress that in the Qumran compositions we can see early forms of exegetical rules later defined explicitly in traditions associated with various rabbinic authorities.[40] Again, the tendency in current descriptions of exegetical method is against using later rabbinic terminology, except where it may be a helpful shorthand for exegetical features that appear throughout Jewish literature, such as the argument from analogy. (3) The widespread acknowledgment of the use of exegetical techniques in Qumran interpretation has prevented most scholars from asserting that Qumran exegesis was merely arbitrary, the result of inspired utterances made by teachers and priests on the basis of their authoritative position, which had been established on other grounds. However, even though most scholars now readily acknowledge the role of exegetical techniques in the Qumran literature, many studies still do not give adequate attention to the way the Qumran commentators were alert to the original context of the texts they interpret. (4) It has become apparent that any taxonomy of biblical interpretation at Qumran must allow for several kinds other than that of the pesharim alone.[41] Even for the pesharim, there is need for redefinition.[42] (5) It is widely acknowledged that to appreciate the full range of biblical interpretation at Qumran, the implicit use of Scripture needs as much attention as its explicit citation.[43]

---

[36] The term *zĕnût* is almost impossible to translate; sometimes it is rendered with the blanket term "fornication," but that modern term seems not to catch the breadth of the word, which covers all kinds of inappropriate sexual behavior.

[37] Joseph A. Fitzmyer, "The Use of Explicit Old Testament Quotations in Qumran Literature and in the New Testament," *NTS* 7 (1960–61): 297–333; repr. in idem, *Essays on the Semitic Background of the New Testament* (London: Chapman, 1971), 3–58; and in later editions of the same.

[38] Vermes, "Biblical Proof-Texts," *JSS* 34 (1989): 493–508.

[39] As argued especially by Timothy H. Lim, "Midrash Pesher in the Pauline Letters," in *The Scrolls and the Scriptures: Qumran Fifty Years After* (ed. S. E. Porter and C. A. Evans; JSPSup 26; Sheffield: Sheffield Academic Press, 1997), 280–92.

III. THE KEY ISSUES

A. The Authoritative Compositions at Qumran

I have already mentioned the problem in the very use of the term "Bible" in relation to the Qumran Scrolls. It wrongly implies a fixed canon. It is worth saying a little more about the character of the canon at Qumran. The list of authoritative works can only be proposed on the basis of several factors taken together.

---

[40] The work of E. Slomovic is a standard reference point for those concerned to trace continuities from later rabbinic techniques back to Qumran literature: Elieser Slomovic, "Toward an Understanding of the Exegesis in the Dead Sea Scrolls," *RevQ* 7 (1969–71): 3–15.

[41] As indicative of this, see the helpful survey statements by Moshe J. Bernstein, "Interpretation of Scriptures," in *EDSS* 1:376–83; Philip S. Alexander, "The Bible in Qumran and Early Judaism," *Text in Context: Essays by Members of the Society for Old Testament Study* (ed. A. D. H. Mayes; Oxford: Oxford University Press, 2000), 39–46; and the range of essays in Matthias Henze, ed., *Biblical Interpretation at Qumran* (Studies in the Dead Sea Scrolls and Related Literature; Grand Rapids: Eerdmans, 2005).

[42] See the helpful suggestions in this direction by Bernstein, "Introductory Formulas for Citation and Recitation."

[43] The classic analysis of the possible implicit use of Scripture in a Qumran composition is that by Svend Holm-Nielsen, *Hodayot: Psalms from Qumran* (ATDan 2; Århus: Universitetsforlaget, 1960). A more recent example of a detailed and quite suggestive analysis of the implicit use of Scripture in a Qumran composition is Jonathan G. Campbell, *The Use of Scripture in the Damascus Document 1–8, 19–20* (BZAW 228; Berlin: Walter de Gruyter, 1995).

The number of copies of a work suggests something of its popularity and importance. By this criterion we can note that from the eleven manuscript-bearing Qumran caves, we seem to have more than twenty copies each of Genesis, Deuteronomy, Isaiah, and the Psalms. There are approximately seventeen copies of Exodus and at least fifteen of the book of *Jubilees*. There are more than ten of Leviticus, the *Hodayot*, and the *Rule of the Community*. The number of explicit quotations of a work suggests that the community could appeal to it as an authority; of the compositions just listed, there may be some doubt about whether the Qumranites used the *Hodayot* and the *Rule of the Community*[44] in this way; yet most of the works which are now called biblical are used explicitly as proof texts in the Qumran literature. The number of implicit allusions to a work implies how much it may have been part of the consciousness of a particular author or group. In all this explicit and implicit use of earlier authoritative texts, we must remember that certain genres are more likely to use certain texts explicitly, while others work implicitly. Thus, legal texts are likely to make explicit use of texts from the Torah; whereas poetry is likely to make implicit use of prophetic and cultic poems. How many times might one expect a legal interpreter to quote a psalm as a proof text or a poet to cite part of a legal tradition? What stands out as remarkable in the Qumran literature is that, in one way or another, the Qumran community compositions quote most of what is included in the later Hebrew canon as authoritative, but there are some uncertainties.[45] Furthermore, they give similar treatment to only a few other writings: the *Words of Levi* (CD 4.15–17)[46] and the book of *Jubilees* (CD 16.3–4), and possibly some of the Enochic corpus. If rightly reconstructed and construed, the so-called canon list in 4QMMT^d (4Q397 frags. 7–8 lines 10–11; cf. composite text, lines 95–96) may also suggest what may have been deemed authoritative by the Qumran community and its wider movement: "We have [written] to you so that you may study (carefully) the book of Moses and the books of the Prophets and (the writings of) David [and the]/[events of] ages past."[47]

---

[44] For the authoritative use of the *Hodayot*, see the very suggestive treatment by Philip R. Davies, *Behind the Essenes: History and Ideology in the Dead Sea Scrolls* (BJS 94; Atlanta: Scholars Press, 1987), 87–105; on the possible authoritative use of the *Rule of the Community* in 4Q265, see Joseph M. Baumgarten, "The Cave 4 Versions of the Qumran Penal Code (compared to the Community Rule [1QS])," *JJS* 43 (1992): 268–76.

[45] Most well known is lack of any manuscript copy of Esther and the concomitant absence of the Feast of Purim from all calendrical and festival texts coming from the Qumran caves. However, note the study of S. Talmon in which he has convincingly argued that the Qumran authors knew of the book of Esther: Shemaryahu Talmon, "Was the Book of Esther Known at Qumran?" *DSD* 2 (1995): 249–67.

[46] Especially see Jonas C. Greenfield, "The Words of Levi Son of Jacob in *Damascus Document* IV, 15–19, " *RevQ* 13 (1988): 319–22.

B. Interpretation within Biblical Manuscripts

As Fishbane for one has pointed out,[48] all biblical manuscripts found at Qumran are interpretative in the way in which they physically represent the text and often in other ways too. In addition, the Qumran biblical manuscripts have shown that in many instances the scribes who copied them tried to improve their texts. Before the scrolls were discovered, this phenomenon was known most obviously in the Samaritan Pentateuch. In addition, scholars have widely held that where the Jewish translations into Greek differ extensively from the Masoretic Text, translators must be considered sometimes to have worked interpretatively on the text from which they translated.

Although many of the biblical manuscripts at Qumran were probably copied elsewhere and brought to Qumran for one reason or another, some have the full orthography that has come to be recognized as a hallmark of the scribal tradition in which those sectarian texts were written, probably at Qumran itself. Thus, there is a small group of biblical manuscripts that we may associate more directly with the Qumran community. Like the other biblical manuscripts, these display nonsectarian exegetical variants of several kinds. One famous example must suffice: in 1QIsa^a in Isa 52:14 instead of the MT's משחת (*mšḥt*), "marred," 1QIsa^a reads משחתי (*mšḥty*), "I anointed." This provides a positive reading for the verse as a whole and better fits the context in describing the status and role of the servant. The reading is not directly attested anywhere else, so it would appear to be a secondary improvement of a difficult text, perhaps the responsibility of a Qumran exegete, though the reading is not sectarian.[49]

---

[47] Elisha Qimron and John Strugnell, *Qumran Cave 4.V: Miqsat Maʿaśe Ha-Torah* (DJD 10; Oxford: Clarendon, 1994), 58–59. See my comments on the elusiveness of this reference: George J. Brooke, "The Explicit Presentation of Scripture in 4QMMT," in *Legal Texts and Legal Issues: Proceedings of the Second Meeting of the International Organization for Qumran Studies, Cambridge 1995; Published in Honour of Joseph M. Baumgarten* (ed. M. J. Bernstein, F. García Martínez, and J. Kampen; *STDJ* 23; Leiden: Brill, 1997), 85–88. James C. VanderKam, in *The Dead Sea Scrolls Today* (London: SPCK, 1994), 142–57, has provided a comprehensive collection of references in relation to information on the extent and character of the "canon" at Qumran. On whether MMT really refers to a two-part, three-part, or even four-part canon, there has been much debate. Many prefer to see a reference to just two sets of authoritative Scriptures, with the second set being further defined and extended; see, e.g., Eugene C. Ulrich, "The Non-attestation of a Tripartite Canon in 4QMMT," *CBQ* 65 (2003): 202–14. Others adopt the view of the editors: Qimron and Strugnell consider that the relevant line "is a significant piece of evidence for the history of the tripartite division of the Canon" (DJD 10:59). The suggestion for a four-part canon particularly comes from Gershon Brin in his review of DJD 10 in *JSS* 40 (1995): 341–42.

[48] Fishbane, "Use, Authority and Interpretation of Mikra," 367–68.

In addition, the explicit quotations from biblical compositions in the sectarian scrolls commonly show interpretative adjustments. In many places it is hard to be sure that such adjustments are the work of the Qumran sectarians rather than of those responsible for passing the texts on,[50] but in several places it seems clear that the adjustment has been made to facilitate the use of a particular text in a new context. A couple of examples make the point. In Ps 37:20 the MT reads: "The enemies (איבי, *ʾyby*) of the Lord are like the glory of the pastures; they vanish—like smoke they vanish away" (NRSV). The *Psalm Pesher 1* (4Q171) 3.5a, a sectarian commentary, divides the verse; it gives the first half a positive reading and referent: "'And those who love (אוהבי, *ʾwhby*) the Lord shall be like the pride of pastures.' Interpreted, [this concerns] the congregation of His elect."[51] In the second part of the verse, the pesher gives the expected negative reference. Or again, Hab 2:15 in the MT contains the phrase "in order to gaze on their nakedness (מעוריהם, *mʿwryhm*)." In 1QpHab 11.3, the *Habakkuk Pesher*, the same phrase is written as "in order to gloat at their festivals (מועדיהם, *mwʿdyhm*)," which is probably an adjustment of the text of Habakkuk to facilitate the interpretation of the verse as referring to the festival (מועד, *mwʿd*; 1QpHab 11.6) of the Day of Atonement. Apart from vowel letters, only a single exegetical letter change is involved in either of these examples.

---

[49] For the details regarding this reading and its significance, see William H. Brownlee, *The Meaning of the Qumrân Scrolls for the Bible with Special Attention to the Book of Isaiah* (New York: Oxford University Press, 1964), 204–15; Brownlee has recently been largely supported by Paolo Sacchi, "Ideologia e varianti della tradizione ebraica: Deut 27, 4 e Is 52, 14," in *Bibel in jüdischer und christlicher Tradition: Festschrift für Johann Maier zum 60 Geburtstag* (ed. H. Merklein, K. Müller, and G. Stemberger; Athenäums Monografien, Theologie 88; Frankfurt: Hain, 1993), 13–32.

[50] This problem is addressed in George J. Brooke, "The Biblical Texts in the Qumran Commentaries: Scribal Errors or Exegetical Variants?" in *Early Jewish and Christian Exegesis: Studies in Memory of William Hugh Brownlee* (ed. C. A. Evans and W. F. Stinespring; SBL Homage Series 10; Atlanta: Scholars Press, 1987), 85–100.

[51] Trans. Geza Vermes, *The Complete Dead Sea Scrolls in English* (5th ed.; London: Penguin, 1997), 489.

C. Types of Biblical Interpretation in the Qumran Sectarian Texts[52]

1. Legal Interpretation

As already pointed out, a large amount of legislation in the Qumran sectarian texts is not derived from scriptural sources. Indeed, this seems to be the case for much of the codes of behavior and organization of the community in its various activities. The rules may be understood as in keeping with scriptural principles but derived from sources other than Scripture, whether from accumulated customary practice in the community or from more obvious systems of organization in other contemporary groups. Nevertheless, there remains a substantial amount of legal commentary or interpretation that the community texts primarily derive from or justify by reference to Scripture.

The principal characteristic of legal interpretation in the sectarian compositions, as elsewhere in Jewish literature, is the way in which two or more biblical passages are combined to produce the basis for or justification for a legal ruling. Commonly, the Qumran texts do this to extend the field in which biblically based legislation can be applied.[53] Two examples must suffice, both from the *Damascus Document*, one from the section of Admonitions and one from the section of Laws. In CD 4.21–5.2 we read: "…the foundation of creation is 'male and female he created them' (Gen 1:27). And those who entered (Noah's) ark went two by two into the ark. And of the Prince it is written, 'Let him not multiply wives for himself' (Deut 17:17)."[54] This passage propounds marriage law for the community, whether concerning monogamy or divorce or both.[55] In presenting their position, the authors juxtapose two texts from the Torah in explicit quotations and allude to a third, the Noah story.

---

[52] I have used the classification offered here in a number of studies in order to show the breadth of biblical interpretation in the scrolls; see, e.g., George J. Brooke, "Biblical Interpretation in the Qumran Scrolls and the New Testament," in *The Dead Sea Scrolls Fifty Years after Their Discovery: Proceedings of the Jerusalem Congress, July 20–25, 1997* (ed. L. H. Schiffman, E. Tov and J. C. VanderKam; Jerusalem: Israel Exploration Society and the Shrine of the Book, 2000), 60–73; idem, "Biblical Interpretation in the Wisdom Texts from Qumran," in *The Wisdom Texts from Qumran and the Development of Sapiential Thought* (ed. C. Hempel, A. Lange, and H. Lichtenberger; BETL 159; Leuven: Peeters, 2002), 201–20.

[53] Often legal interpretation is done explicitly, but it is also done through the implicit juxtapositioning of texts to create new and improved rulings, a process Jacob Milgrom has designated "homogenization": Jacob Milgrom, "The Qumran Cult: Its Exegetical Principles," in *Temple Scroll Studies: Papers Presented at the International Symposium on the Temple Scroll, Manchester, December 1987* (ed. G. J. Brooke; JSPSup 7; Sheffield: JSOT Press, 1989), 165–80.

[54] Trans. Joseph M. Baumgarten and Daniel R. Schwartz, "Damascus Document (CD)," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Document, War Scroll, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 19–21.

A second example is the oft-cited extension of the Sabbath law in CD 10.16–20 (4Q270 frag. 10 5.3–4).

> "Guard the Sabbath day to make it holy." And on the Sabbath day a man shall not talk disgraceful and empty talk. He shall not demand payment from his neighbor for anything. He shall not make judgments concerning wealth and gain. He shall not talk about the work and the task to be done the next morning. Let no man walk in the field to do his workday business (on) the Sabbath.[56]

As Michael Fishbane (for one) has pointed out and expounded in detail,[57] the ongoing exposition of Deut 5:12 is based largely in the language of Isa 58:13: "If you refrain from trampling the sabbath, from pursuing your own interests on my holy day; if you call the sabbath a delight and the holy day of the Lord honorable; if you honor it, not going your own ways, serving your own interests, or pursuing your own affairs…" (NRSV). But more than that, through the careful use of analogy, the Sabbath law is justified by reference to sections of Deuteronomy:

> For just as דבר is used in Deut 32:47 with ריק ("empty word"), and in Deut 15:2 with ישה ("lend"), and in Deut 17:2 with משפט ("judgment"), so are these three terms found in *CD* 10:17 as well. In this way, the explicit uses of these terms in Deuteronomy serve to extend the sense of the phrase דבר דבר in Isa 58:13 and thereby generate new Sabbath rules.[58]

This phenomenon is widespread in both the sectarian and nonsectarian legal texts from Qumran; we could cite many examples.

2. *Exhortatory Interpretation*

Scripture is used in various ways in exhortatory compositions, but the chief characteristic that underlies its use is the way these scrolls recall history so as to serve as either warning or promise to those who may be supposed to form the audience for such homiletic pieces. I can again cite two examples to provide something of the flavor of this category of biblical interpretation.

---

[55] An extensive bibliography has built up on this and related texts: see famously, Geza Vermes, "Sectarian Matrimonial Halakhah in the Damascus Rule," *JJS* 25 (1974): 197–202; repr. in *Post-Biblical Jewish Studies*, 50–56; Davies, *Behind the Essenes*, 73–85.

[56] Trans. Baumgarten and Schwartz, "Damascus Document (CD)," 47.

[57] Fishbane, "Use, Authority and Interpretation of Mikra," 370.

[58] Ibid., 370. It seems that there are two minor typographical errors in this citation from Fishbane's article: Deut 17:2 should be Deut 17:8, and the three roots occur in CD 10.18, not 10.17.

In the *Damascus Document* are several sermonic sections, notably at the opening of the so-called Admonition (CD 1–8, 19–20). One of these sections begins as follows:

> And now, O sons, hearken to me and I will uncover your eyes so you may see and understand the works of God and choose that which he wants and despise that which he hates: to walk perfectly in all his ways and not to stray in the thoughts of a guilty inclination and licentious eyes. For many have failed due to them; mighty warriors have stumbled due to them, from the earliest times and until today. (Thus, for example,) walking after the wantonness of their heart(s), the Watchers of heaven fell. They were held by it (the wantonness of heart), for they did not keep God's ordinances; and so too their sons, who were as high as the lofty cedars and whose corpses were as mountains. For all flesh which was on dry land fell, for they died and were as if they had not been, for they had done their (own) will and had not kept the ordinances of their Maker, until his wrath was kindled against them. Through it strayed the sons of Noah and their families; through it they are cut off. Abraham did not walk in it and he was acce[pted as a lo]ver, for he kept God's ordinances and did not choose (that which) his (own) spirit desired. (CD 2.14–3.3)[59]

In this elaborate passage, part of a section that continues in the same vein, the audience is clearly encouraged to take note of both negative and positive examples from the past in order to warn them of the life-threatening dangers that come upon those who stray, and the benefits that belong to those who follow the model of Noah or Abraham. The historical recollection is not presented in explicit and extensive quotations but in a summary paraphrase, the basis of which the audience would be able to recognize. It is likely that here, as elsewhere, allusion is also being made to nonscriptural passages that may have been understood as authoritative within the Qumran community and its wider movement. In this instance, perhaps, there is an allusion to the whole cycle of stories in the Enoch corpus involving the Watchers; the Watchers themselves do not feature directly in the narrative of Genesis as it stands, which the author of CD is clearly summarizing at this point. Daniel 4:13, 17, 23 uses the term for some heavenly beings and the Enoch corpus uses it more particularly of those who rebelled and were expelled from heaven (cf. Gen 6:1–8). The paraphrase reproduces the order of the narrative in Genesis, even if it derives some referents from other significant sources.

---

[59] Trans. Baumgarten and Schwartz, "Damascus Document (CD)," 15–17. Parts of this section of CD are also found in 4Q266 frag. 2 2.13–22; and in 4Q270 frag. 1 1.1–3.

We can see a second example of the exhortatory use of Scripture in the closing section of 4QMMT (cf. composite text, lines 100–12):

> [13]And it [14][shall come to pas]s when all these {things} (4Q397 lines 14–21) [be]fall you in the en[d] of days, the blessing [15]and the curse, [then you will call them to mind] and retu[rn to Him with all your heart [16]and all your soul (Deut 30:1–2) at the end of days. [17][And it is written in the Book] of Moses and in the Boo[ks of the prophet]s that there shall come … [18][and the blessings came] in the days of Solomon the son of David. And the curses [19]came from in the days of Jeroboam the son of Nebat [20]until Jerusalem and Zedekiah king of Judah were exiled that he will br[in]g them to … And we recognize that some of the blessings and curses which are [21]written in the B[ook of Mo]ses have come. And this is at the end of days when they will come back to Israel [22]for [ever] … and shall not turn backwar[ds]. And the wicked shall act [23]wickedly and … Remember the kings of Israel and understand their works that each of them who [24]feared [the To]rah was saved from troubles, and to those who were seekers of the Law, [25]their iniquities were [par]doned. Remember David, that he was a man of piety, and that [26]he was also saved from many troubles and pardoned.[60]

It is not entirely clear whom the exhortation is addressing, but for the purposes of this analysis, we only need to note that the writer bases the homily in the explicit citation of Deut 30:1–2, and then adds allusions to Israelite kings. The message is clear: those who feared and sought the Law were saved and pardoned. All the others fell under the curses. David, in particular, is held up as an example to be followed: he was a man of piety who was saved from many troubles. The text exhorts its hearers that to be saved from troubles and the devastation of the divine curses, they must follow a way of piety and obedience, which will keep them within the realm of blessing. Naturally, in the context of a sectarian document, blessing involves following not just the Law but a particular interpretation of it. As with the previous example from the *Damascus Document*, the exhortatory section of 4QMMT provides an appeal to Scripture that is primarily a matter of historical recollection.

3. *Narrative Interpretation*

In the scrolls from the Qumran caves, we know narrative interpretation best from the *Genesis Apocryphon* (1QapGen). That composition provides a rewritten form of several of the stories of Genesis, including extra haggadic details and explanations for the behavior of the various characters.[61] As such, the new narrative deals exegetically with various problems in the base text upon which it chiefly relies. Incidentally, details from other traditions are introduced into the rewritten form of the text. So, for example, some of the geographical information in the *Genesis Apocryphon* seems to be more closely related to traditions also known from the book of *Jubilees* than to material in the book of Genesis itself. However, the purpose of this study is to talk about biblical interpretation in the sectarian Qumran Scrolls, rather than more broadly in the literary collection from Qumran, even though a composition such as the *Genesis Apocryphon* shares features with the form of Judaism most obviously represented in *Jubilees* and the sectarian Qumran texts.

---

[60] Trans. Vermes, *Complete Dead Sea Scrolls in English*, 227–28; Vermes offers translations of the separate groups of fragments, with 4Q398 frags. 14–17 1.11–13; and frags. 14–17 col. 2; conflated with 4Q399.

The kind of explanation that is so characteristic of narrative exegesis can be seen in several sectarian texts. Even if some of its constituent parts are from nonsectarian sources, in its final form 4Q252, *Commentary on Genesis A*, is clearly sectarian since it refers to the "men of the community" (5.5). The commentary opens with a rewritten form of the flood narrative, retelling the story in words quite close to those of Genesis itself, though often whole sections are much abbreviated, and at significant points there are explanatory glosses. Here I quote the opening section extensively so that we can discern something of the interpretation. The Hebrew text that is identical to or almost the same as that of Genesis itself is shown in italics, to make the interpretative glosses all the more apparent:

> [In] the four hundred and eightieth year of Noah's life their end came for Noah *and* God *said, "My spirit will not* dwell *among humanity forever"* (Gen 6:3a); and their days were determined at one hundred and twenty years until the time/end of (the) waters of (the) flood. *And (the) waters of* (the) *flood were upon the earth* (Gen 7:10b) *in the year of the six hundredth year of Noah's life, in the second month*, on the first day of the week, *on* its *seventeenth day* (Gen 7:11a); *on* that *day all (the) fountains of (the) great deep burst forth and the windows of the heavens were opened* (Gen 7:11b) *and there was rain upon the earth for forty days and forty nights* (Gen 7:12) until the twenty-sixth day in the third month, the fifth day of the week. *And the waters swelled upon the earth for one hundred and fifty days* (Gen 7:24), until the fourteenth day *in the seventh month* (Gen 8:4a) on the third day of the week. *And* at the end of *one hundred and fifty days* (Gen 8:3b) *the waters decreased* (Gen 8:3b) for two days, the fourth day and the fifth day, and on the sixth day *the ark came to rest on the mountains of Hurarat; i[t was the] seventeenth [da]y in the seventh month* (Gen 8:4). *And the waters continued to decrease until the [te]nth month* (Gen 8:5a), its *first* day, the

---

[61] On the interpretation of Genesis in 1QapGen, see notably Moshe J. Bernstein, "Re-Arrangement, Anticipation and Harmonization as Exegetical Features in the Genesis Apocryphon," *DSD* 3 (1996): 37–57.

> fourth day of the week *the tops of the mountains appeared* (Gen 8:5b). *And it was at the end of forty days* (Gen 8:6a) when the tops of the mountain[s] were visible [that] *Noah [op]ened the window of the ark* (Gen 8:6b), on the first day of the week, that is, the tenth day in the ele[venth] month. (4Q252 1.1–14)[62]

In this quotation from the *Commentary on Genesis A*, we need to notice how the narrative interpretation works. It closely follows the sequence of the narrative. This is as much as anyone would expect, since to dislocate the narrative would require justification. Second, it quite considerably abbreviates the text of Genesis, retelling the narrative with a point in mind. The purpose is clearly motivated by an interest in defining all the events in the flood story according to a particular calendar. Third, making that calendrical interest explicit are short explanatory statements either intricately woven into the narrative itself or indicated explicitly with pronouns. The calendrical interest in this text is distinctive: not only does it sort out the events in relation to the 364-day ideal solar calendar, which requires a particular addition of two days at one point,[63] but also it describes the events in the dual system of days of the week as well as days of the month. Narrative interpretation in the sectarian compositions from Qumran, as in other rewritten Bible texts in early Jewish literature, is primarily concerned with the explanatory glossing of biblical stories to make them consistent, coherent, and credible; it primarily addresses the problems in the plain meaning of the text.[64] Within such glosses the particular polemical bias of the exegete is usually clear.

4. *Poetic Interpretation*

Within poetic compositions the use of Scripture is almost always entirely implicit. Scriptural base texts act as sources for the phraseology of the new composition, which in its final form can often read as if it is a kind of allusive anthology of memorable scriptural phrases. With regard to poetic interpretation, one important matter needs explicit mention, and that concerns the extent to which it is possible to be sure that the poet was consciously alluding to particular biblical phrases and their contexts, or whether the writing of poetry in the late Second Temple period was largely a matter of playing games with one's memory, only some of which one's audience might ever appreciate. With legal interpretation, exhortatory interpretation, and narrative interpretation, it is clear that the writers are consciously respecting and working with the original context of the scriptural passage or passages they are interpreting, at least in the overwhelming majority of cases. But with poetic interpretation, it is far less clear when a poet is using, reusing, and exegetically renewing a particular base text. There are examples of sectarian poetic compositions where at least in part the use of Scripture seems carefully deliberate and with attention to the scriptural text's original context.

---

[62] Trans. George J. Brooke, "4QCommentary on Genesis A," in *Qumran Cave 4.XVII: Parabiblical Texts, Part 3* (ed. G. J. Brooke et al.; DJD 22; Oxford: Clarendon, 1996), 196.

[63] After Gen 8:3b two days are added. Even before 4Q252 was known, the need for these extra days was recognized: see, e.g., Joseph M. Baumgarten, "The Calendars of the Book of Jubilees and the Temple Scroll," *VT* 37 (1987): 76.

[64] See especially George J. Brooke, "Reading the Plain Meaning of Scripture in the Dead Sea Scrolls," in *Jewish Ways of Reading the Bible* (ed. G. J. Brooke; JSSSup 11; Oxford: Oxford University Press, 2000), 67–90 and 84–86 are particularly concerned with 4Q252.

Two examples must suffice to show that the poetic or liturgical use of Scripture merits a separate entry in any taxonomy of biblical interpretation at Qumran. The first comes from the second appendix to the Cave 1 version of the *Rule of the Community*: the *Blessings* (1Q28b 5.23–27):

> May the Lord ra[ise y]ou to an everlasting height
> and like a stro[ng] tower on a high wall
> And you will be like […] by the power of your [mouth]
> by your scepter you will destroy the earth
> and by the breath of your lips you will the kill the wicked.
>
> May He giv[e you a spirit of couns]el and everlasting might,
> a spirit of knowledge and of the fear of God.
> And righteousness shall be the girdle of [your loins
> and fai]th the girdle of your [haun]ches.
>
> May He make your horns iron
> and your hooves bronze.
> May you toss like a bu[ll many peoples
> and trample nat]ions like mud in the streets.[65]

The extant part of this blessing seems to contain three stanzas. It is the blessing of the Prince of the congregation. In each stanza the first half has God as subject, and the second directly addresses the Prince. This deliberate structural technique helps to explain why the allusions to Isa 11:2–5 that rest behind the poem are not in the order of Isaiah itself. In the first stanza the second element, addressing the Prince, is based on Isa 11:4. In the second stanza the first part, with God as subject, uses Isa 11:2; the second part, again addressing the prince, comes from Isa 11:5. The text's principal editor, Jozef T. Milik, has pointed out other scriptural allusions in this blessing.[66] The opening part of the first stanza matches scriptural phrases in Ps 61:4 (3 ET); Isa 30:13; and Prov 18:10–11. The third stanza is based particularly on Mic 4:13 and 7:10. Some of these scriptural verses are linked with catchwords to one another. Isa 11:1–5 is directly applicable to the subject matter of the blessing, being about the shoot that shall come from the stem of Jesse. The other passages belong in contexts that can be related to the Prince indirectly; for example, Mic 4:13 addresses the daughter of Zion who, like the Prince, will ultimately be triumphant. Thus, the blessing is a thoroughly suitable collection of phrases and sentences from a range of prophetic and poetic passages, woven together to make a new whole that has the cumulative force of all the allusions together.

---

[65] Trans. George J. Brooke and James M. Robinson, "A Further Fragment of 1QSb: The Schøyen Collection MS 1909," *JJS* 46 (1995): 120–33.

A second example also shows that to some extent the original context of the scriptural allusions is significant. In the hymn in 1QH^a 12 many have discerned something of the life and times of the Righteous Teacher, seeing the poem as autobiographical. Whatever the case concerning authorship and subject matter, it is likely that the figure portrayed in the poem is modeled to some extent on the servant figure of Isa 52:13–53:12. It is especially likely that the description in 1QH^a 12.22–23 is based on some phrases from the servant poem of Isaiah:

> But I, when I hold fast to Thee, I stand upright and rise against them that scorn me; and mine hands are against all who despise me, for they esteem me not [although] Thou showest strength through me and revealest Thyself unto me in Thy strength unto a perfect light. (1QH^a 12.22–23)[67]

Even if some motifs, such as light (cf. Isa 53:11), are too general to be of much value, the combination of being "despised" (בזה, *bzh*) and not "being esteemed" (חשב, *ḥšb*), which are the opening and closing words of Isa 53:3, strongly suggest that the servant poem is in mind. Beyond this single allusion the servant poem may then become significant for the overall structure of the hymn in 1QH^a 12. Thus, 1QH^a 12.8 uses the same idea of not being esteemed, and then the passage plays out the whole idea of being oppressed, expelled, and reviled. This is surely significant, not so much in terms of the detailed parallels of vocabulary, one of which is pointed out above, but also because the allusions to Isa 53:3 both appear at structurally significant parts of the hymn: at the beginning as the poet opens the description of his plight, and at the opening of the

66. See the principal edition by Jozef T. Milik, "Recueil des bénédictions," in *Qumran Cave 1* (ed. D. Barthélemy and J. T. Milik; DJD 1; Oxford: Clarendon, 1955), 129. Milik also cites several other passages.

67. Trans. Holm-Nielsen, *Hodayot*, 77.

second part of the hymn as the poet begins to describe a sense of being able to stand and rise with some measure of confidence despite all his persecutions. This structural observation enhances the likelihood that the many other allusions in the hymn as a whole are hung on the structure that is derived at least in part from the model of this servant poem of Isaiah.[68] The poetic and liturgical interpretation of Scripture in the Qumran sectarian literature, as elsewhere in early Jewish hymnic and poetic texts, is allusive and anthological.

5. Prophetic Interpretation

As stated, scholars have often considered biblical interpretation in the sectarian texts from Qumran to be synonymous with the pesharim. We now turn to prophetic interpretation. We can indeed see much of the particularism of the Qumran worldview in the way the Qumran scribes handle legal texts from the Scriptures and often extend them to bring out the strictest possible meanings. Nevertheless, in the pesharim we can best see the eschatological outlook of the Qumran community and the movement of which it was a part. No longer should we restrict prophetic interpretation to the commentaries that contain continuous or thematic interpretations of the texts of Isaiah, some of the Twelve Minor Prophets, and the Psalms. Alongside all those texts we must also put all unfulfilled promises, blessings, and curses. The Qumran community considered that the prophecies, promises, and blessings were being completed in their own experiences, and as such, those experiences form a major part of the starting point for the interpretation of the texts.[69]

To make this point, the first example of pesherite exegesis comes from 4Q252, the *Commentary on Genesis A*:

> The blessings of Jacob: '*Reuben, you are my firstborn and the firstfruits of my strength, excelling in destruction and excelling in power. Unstable as water, you shall no longer excel. You went up onto your father's bed. Then you defiled it* (Gen 49:3–4a). On his bed he went up!' *vacat* Its interpretation is that he reproved him for

---

[68] For a recent summary survey of the use of the Isaianic servant in the Qumran literature, especially the hymns, see Otto Betz, "The Servant Tradition of Isaiah in the Dead Sea Scrolls," *JSem* 7 (1995): 40–56; on the Isaianic servant tradition behind an Aramaic text, see George J. Brooke, "4QTestament of Levi^{d}(?) and the Messianic Servant High Priest," in *From Jesus to John: Essays on Jesus and New Testament Christology in Honour of Marinus de Jonge* (ed. M. C. de Boer; JSNTSup 84; Sheffield: Sheffield Academic Press, 1993), 83–100.

[69] Similarly, the experience of the continuing presence of Jesus in the early Christian communities was the basic starting point for much New Testament interpretation of the Old Testament.

> when he slept with Bilhah his concubine. And he [s]aid, 'Y[ou] are [my] firstbo[rn] Reuben, he was the firstfruits of …' [… (4Q252 4.3–7)[70]

Here something of the formal structure of pesher is clearly visible. The passage has an overall title, "Blessings of Jacob," which suggests that the compiler of 4Q252 had in mind that much in the blessings of Jacob remained unfulfilled and was to be completed in the life and experiences of the community. After the title, the lines explicitly cite the scriptural text. In this instance the text of Gen 49:3–4a seems to be furnished with a text in a slightly different form from that in the MT or Samaritan Pentateuch. The interpretation is introduced formally by the technical phrase "Its interpretation is that" (פשרו אשר, *pšrw ʾšr*);[71] the term pesher strongly suggests a link with the tradition of interpreting dreams in Daniel and elsewhere. Just as Daniel interpreted dreams, so the Qumran interpreter of these unfulfilled texts shows how their meaning will be made real. In the instance cited here, the focus of the interpretation is a retelling of the scriptural text, but in the following sentences one would expect to discover how the author related the text to the audience's present experiences. The chief characteristic of prophetic exegesis is just such identification.

Though such identification of items in the prophetic text or blessing may seem arbitrary to the modern reader, this is actually far from the case since the Qumranites understood Scripture to be providing a pattern for all aspects of the community's life and experiences. The following example makes this clear by suggesting how the biblical extract and the interpretation are linked:

> Alas for [those who say] to wood, "Wake up!" "[Bestir!"] to dumb [sto]ne—[it will teach! Though indeed it be plated with gold and silver, there is no spirit at all within it! But the Lord is in His holy palace;] hush all earth, at His presence! Its prophetic meaning concerns all the nations who worship "stone" and "wood"; but on the Day of Judgment, God will eradicate all the idolaters and the wicked from the earth. (1QpHab 12.14–13.4)[72]

This closing section of the *Habakkuk Pesher* contains the explicit citation and then the interpretation of Hab 2:19–20. Much in the biblical text is simply reused in the interpretation. The identification that takes place is merely that the text will become true on the day of judgment; this commentary gives Habakkuk's prophecy an eschatological reading. But the text and its interpretation are also linked through a wordplay: the Lord's "palace" or "temple" (היכל, *hykl*) does not feature explicitly in the interpretation, but another word using the same letters does occur there, "will eradicate" (יכלה, *yklh*), and in similar fashion such eradication is not actually indicated in the text of Habakkuk.[73] The two points belong together: for the Qumran interpreter, the clear message of Habakkuk was that when God is in his eschatological temple, idolaters will be destroyed. This passage is a good example of the way in which prophetic exegesis at Qumran is not atomistically arbitrary, but links text and interpretation carefully so that exegetical techniques enable theological insight into the text.

[71] A comprehensive listing of the various forms of these formulae is provided by Casey D. Elledge, "Exegetical Styles at Qumran: A Cumulative Index and Commentary," *RevQ* 21 (2003–4): 165–208.

[72] Trans. Brownlee, *Midrash Pesher of Habakkuk*, 212.

D. Theological Issues

1. Copying the Divine Initiative

It is clear from the books of the Torah that God is a communicator. In the first creation account (Gen 1:1–2:4a) order is established through divine command, and at Sinai God expresses his will for his people, and even his words are relayed indirectly by Moses. The way in which the Qumran covenanters privileged certain writings as authoritative, especially the Torah, and then continued to offer interpretations and new understandings of them that supposedly had been hidden from the outset—all this suggests that the Qumran exegetes saw themselves as imitating the divine initiative, as continuing the ongoing process of revelation. Scripture for them was not a closed affair only to be supplemented by an oral law whose authority had to be asserted rather than proved. The Qumran covenanters thought of themselves as participating in the process of revelation itself. It is not surprising that the *Temple Scroll* is presented as a literary fiction, as if God himself is speaking; such a device is not just a neat trick to try to claim authority for the contents of the composition, it is also a hint that is to be found in the Torah itself, that God continues to communicate with those who would obey him. Just as Deuteronomy was a rewrite of much in Exodus, so several *Reworked Pentateuch* texts (4Q158; 4Q364–367) have come to light in the Qumran library. Thus, the community at Qumran apparently believed "in the progressive revelation of the meaning of the Mikra; indeed this revelation was the sole basis for the comprehension of Mikra until the End of Days."[74]

---

[73] This was the intriguing suggestion of John V. Chamberlain, "An Ancient Sectarian Interpretation of the Old Testament Prophets: A Study in the Qumran Scrolls and the Damascus Fragments" (Ph.D. diss., Duke University, 1955), 115–16.

2. *Reflecting Divine Coherence*

The books of the Torah (and indeed others[75]) contain more than one description of some events. These descriptions never entirely agree with one another. The problem is obvious: how can both authoritative versions of an event be correct? The problem concerns the character of God himself from two perspectives. On the one hand the Jew of the Greco-Roman period might want to demonstrate that God is consistent in himself and in what he communicates to others, especially his chosen people. This means that a proportion of the scriptural exegesis visible in the Qumran Scrolls is concerned with consistency, bringing one authoritative text into line with another.[76]

On the other hand, the authoritative status of more than one version of the same event or divine saying allows for the assumption that revelation is ongoing, not as God in himself increases in integrity, but inasmuch as his people continuously improve in how they hear and perceive him. Thus, reflecting divine coherence is another aspect of copying the divine initiative. Most especially, the ongoing processes of divine disclosure evident in the various forms of text now so apparent as part of the Qumran library also implicitly justify the function of the interpreter. The content of interpretation is to show that God is consistent in himself, whether in terms of making legal pronouncements or in terms of how history, especially the eschatological experience of the community, matches his original purposes. We can thus see the act of interpretation as an extension of Scripture itself, rather than something that is a secondary afterthought. The direct interplay of scriptural citation and interpretation in the pesharim is an illustration of this interdependence of authoritative text and interpretation.

3. *The Biblical Community*

Without a doubt various authoritative books played a significant part in the community's self-definition. On the one hand, it seems clear that the community considered itself to be the rightful and sole continuation of biblical Israel. The community lived under "the renewed covenant,"[77] of which only community members were the beneficiaries. Only the community had access to the hidden things of God. On the other hand, the scrolls take over many terms used in scriptural works and give them new coinage in relation to the community. The most well-known example of this is the term *Yaḥad*, which is used almost exclusively adverbially in biblical texts; yet in the Qumran sectarian compositions, *Yaḥad* is not just a noun but also the dominant self-designation of the community.[78] This creates something of an anomaly for all those who study biblical interpretation in the Qumran Scrolls: the community texts are both dependent on earlier authoritative Scriptures in so many ways, but also in themselves are the authoritative extension and continuation of those Scriptures. There seems to be both progressive revelation and an emerging set of authoritative works to which the scrolls constantly make reference. The community itself sums up this conundrum: it is both a continuation of biblical Israel and an example of a form of postbiblical early Judaism.[79]

---

[74] Fishbane, "Use, Authority and Interpretation of Mikra," 365

[75] Such as Samuel-Kings and Chronicles.

[76] See, notably, Emanuel Tov, "The Nature and Background of Harmonizations in Biblical Manuscripts," *JSOT* 31 (1985): 3–29.

4. The Reception of Interpretation

From the examples studied above, it is clear that the Qumranites seldom directly used the authoritative scriptural books by themselves. In a whole range of ways, they mediated and interpreted the Scriptures for the community. How did they justify these interpretations? Three mechanisms show themselves in the Qumran texts. First, several passages speak of the authority of the one who does the interpreting. The clearest case of this is in *Habakkuk Pesher*. There the Righteous Teacher is described as the one to whom God made known all the secrets of his servants the prophets (1QpHab 7.4–5). But it is not likely to be of much use, especially away from Jerusalem, to assert one's authority as a teacher, unless one's interpretations can be recognized as valid. In small groups community members commonly leave or form splinter groups when they can no longer accept the leader's authority.

---

[77] To use the label that reflects S. Talmon's important insight into the continuity of the community with its forebears: see Shemaryahu Talmon, "The Community of the Renewed Covenant: Between Judaism and Christianity," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls (1993)* (ed. E. Ulrich and J.C. VanderKam; Christianity and Judaism in Antiquity 10; Notre Dame, IN: University of Notre Dame Press, 1994), 3–24.

[78] See especially Shemaryahu Talmon, "Sectarian יחד – A Biblical Noun," *VT* 3 (1953): 133–40; repr. as "The Qumran יחד–A Biblical Noun," in idem, *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 53–60; also James C. VanderKam, "Sinai Revisited," in *Biblical Interpretation at Qumran* (ed. M. Henze; Studies in the Dead Sea Scrolls and Related Literature; Grand Rapids: Eerdmans, 2005), 44–60.

[79] By showing how nearly every composition in the Qumran library is dependent on Scripture in some way, I have suggested something of the community's use of Scripture for its identity in George J. Brooke, "The Dead Sea Scrolls," in *The Biblical World* (ed. J. Barton; London: Routledge, 2002), 250–69.

Thus, second, several places in the community's own texts, as has been variously described above, imply a theory of Scripture: these scrolls claim that without the correct interpretation, Scripture is worth little, or rather, that Scripture and interpretation, the revealed and the hidden that is being made known only to the initiated, belong inseparably together.

Third, as mentioned (above), the exegesis offered in many different contexts is far from arbitrary. Most especially, the Qumranites used all kinds of interpretative techniques as they made authoritative writings relevant to the community's contemporary circumstances. The use of exegetical techniques allowed the interpreter's authority to be established and recognized since others could verify and repeat his interpretations. Even the biblical manuscripts preserved at Qumran reflect exegetical practices, so we may assume that knowledge and use of a wide range of exegetical techniques was not just the preserve of a single teacher.

5. The Varying Letter of the Biblical Texts

It is clear from the biblical manuscripts from Qumran, especially those written in so-called Qumran orthography, that there were a variety of forms of text for each and every authoritative written work in use at Qumran. As we have also seen, the explicitly exegetical compositions from the Qumran community may present biblical quotations with variants, some of which scribes may have introduced exegetically. The interpreters of Qumran were very concerned with the details of the authoritative texts that they interpreted since attention to the letter of the text facilitated interpretation. However, it is clear that these interpreters, as well as others in early Judaism and early Christianity, lived with authoritative texts in fluid forms. The very variety of textual forms in just one place speaks of the liveliness of the text; the writers gave such texts interpretations to enhance their liveliness and make them continuously contemporary and relevant as divine revelation.

IV. SUMMARY

The history of research into biblical interpretation has shown that gradually scholars have become aware of the full range of exegetical activity in the Dead Sea Scrolls and in the texts to be linked with the Qumran community and the wider movement of which it was a part. Over the years the Qumran exegetes have become increasingly freestanding, discussed in relation to other forms of biblical interpretation in both Judaism and Christianity, but no longer forced into the molds already made for describing those other phenomena.

The availability since 1991 of all the compositions to be found in the Qumran materials has brought the Law back into pride of place in the modern understanding of this particular example of early Judaism. But alongside the Law and its interpretation belong a number of other factors that influenced the Qumran covenanters' attitudes to their authoritative texts. Chief among these is the sense that the end times were near, indeed had already been inaugurated in the experiences of the community. The community's view of history, derived in part from its understanding of the Prophets, Psalms, and unfulfilled blessings and curses, and in part from contemporary political circumstances, made the correct interpretation of the Law and Israel's broader history a matter of urgency.

Though the Law and the Prophets dominate biblical interpretation in the Qumran community's own writings, there are other forms of interpretation alongside the legal and the pesherite. The narrative interpretations discernible in various texts and the new community poems show how much the whole of what was received from earlier generations was respected and reused. The five types of exegesis offered in this essay provide sufficient breadth of categories to accommodate the richness of biblical interpretation at Qumran.

The large amount of material from Qumran never comprehensively surveyed with regard to biblical interpretation has also permitted us to uncover much information about the presuppositions and assumptions that the community had over several generations concerning the process of interpretation itself: the character and number of the authoritative writings, the view of progressive and ongoing revelation, the function of the interpreter, the authority of the interpretation, the use of exegetical techniques. The Qumran Scrolls have truly transformed the landscape of the modern understanding of biblical interpretation in early Judaism.

V. CONCLUSION

The Qumran Scrolls continue to fascinate. A large part of the ongoing interest in the Qumran Scrolls surely derives from their connection with the Hebrew Bible. The biblical scrolls tell us more about the history of the transmission of the biblical text than was thought possible fifty years ago; part of that history is exegetical. The scrolls that reflect the life of the Qumran community and the wider movement of which it was a part are replete with implicit and explicit references to Israel's earlier literature. That authoritative literature provided the very terminology through which the community expressed its own self-understanding, lived its life, and described its destiny. More broadly, these ancient scrolls from the lowest point on earth contain some of humanity's highest ideals, the very ideals that were to be enshrined in Jewish and Christian canons, the literary corpora that have been the most influential in the history of the world.

CHAPTER ONE
DIGITAL MIRACLES: REVEALING INVISIBLE SCRIPTS

Keith T. Knox, Roger L. Easton, Jr., Robert H. Johnston

Introduction

Since their discovery in 1947, the Dead Sea Scrolls have been recorded and studied using photographic imaging techniques. Although much has been learned from the study of these photographs in the last five decades, there is a limit to what a magnifying glass can reveal. In the commercial world, great strides have been made in the last ten years in the capture, storage, and processing of digital images. These digital imaging technologies have matured to the point where they are now readily available at a reasonable cost. Scholars have only recently started applying these techniques to the task of uncovering and deciphering degraded writings. We have been fortunate to have been involved in this exciting integration of imaging science and the study of ancient documents.

In our studies, we have explored several methods for revealing characters in degraded texts. Some involve illuminating the document with light that is invisible to humans; others involve computer processing of the image to reveal or enhance text characters. The choice of method (or combination of methods) depends upon the particular artifact or document being studied. In cases where the inks have faded, images obtained under illumination from ultraviolet light may reveal characters that are either difficult to distinguish or totally unreadable when viewed by eye. If the parchment has darkened due to the effects of age or exposure, illumination with infrared light may reveal otherwise unreadable characters.

Both of these techniques require that the original scrolls be available to be imaged, and the images may be further enhanced using digital imaging techniques. Even if scrolls are not available for direct examination, photographs may be processed in a digital computer to enhance subtle color differences between ink and parchment and may reveal new characters. In the work reported here on the Dead Sea Scrolls, we have used images of actual documents obtained under infrared illumination and color digital image processing of photographs taken by others. In both cases, additional characters have been revealed.

THE ROLE OF ILLUMINATION IN IMAGING

Images are representations of objects or scenes that are created by measuring the amount of light that was reflected from objects in the scene. Before discussing the form of the images, it is useful to first describe the physical model of light itself. *Light* is a wave of the combined electromagnetic field. A wave is described by two primary characteristics: its maximum "height," which is called the *amplitude*, and the distance between adjacent maxima, which is the *wavelength.* For light, the amplitude describes the "brightness" or "intensity" of the light, and the wavelength determines the *color.*

The perceived color at each location in the scene is determined by the distribution of intensity of the light that reaches the detector over all wavelengths. The shortest visible wavelength is perceived as blue; as the wavelength increases, the color progresses through green to orange to red, which is the longest visible wavelength. The range of visible colors ordered by wavelength is the familiar spectrum seen in the rainbow. Colors perceived by the eye are based on the different responses induced by light in receptors in the retina. There are three types of color-sensitive receptors known as "cones" that are sensitive to different ranges of visible wavelengths. This fact makes it possible to display images in three appropriate colors that will be perceived in "full color" by the eye. This "trichromatic" response of the eye is exploited by all common color imaging systems such as television, which transmits images in the three additive primary colors (red, green, and blue) to the receiver. The red, green, and blue images are recombined to create an image perceived as identical to the original scene. "Black-and-white" (often called "monochrome") images are created by measuring or displaying the reflected light over the entire range of visible wavelengths simultaneously.

IMAGING OF DOCUMENTS

When reading text, the "contrast" between characters and parchment is the most critical determinant of the clarity of the document. The contrast is determined by the relative reflectances of the ink characters and parchment. Materials used as inks absorb most wavelengths of visible incident light (and thus reflect little light); this is why ink appears "black." On the other hand, parchment in good condition reflects all wavelengths of visible light well, and thus appears to be "lighter" in shade. The resulting high contrast between characters and the background parchment ensures that the document is easy to read.

Unfortunately, many ancient documents suffered damage during storage that has darkened the parchment (by decreasing its reflectance). In turn, this reduces the contrast between ink and parchment and hence the readability as seen by the human eye in "visible" light. One of the ways to increase the contrast of the parchment in the degraded regions is to illuminate the text with "invisible" light, where the contrast of the text may be better than what can be seen by the eye.

Because light is a wave, it is evident that wavelengths exist that are longer or shorter than those visible to the eye. Waves just shorter than visible blue light are classified as "ultraviolet," while still shorter waves range to the very short X-rays. Waves just longer than visible red light constitute "infrared" light, and the length may be increased still farther to *radio* waves. "Invisible light" at these other wavelengths often conveys information about the object that is not apparent to human eyes. For example, the temperature of an object is the primary determinant of the amount of light measured in the "thermal infrared" region of the spectrum, where the wavelength is approximately twenty times longer than the eye can see. Until fairly recently, the best example of a technology for creating images using these "invisible" wavelengths was infrared film, which was developed during World War II and has been applied to forensic imaging tasks, including imaging of the Dead Sea Scrolls. However, modern sensor and imaging technologies now make it possible to create images over a wide range of "invisible" wavelengths, making possible what is now called *"multispectral"* imaging.

TRENDS IN MODERN IMAGING AND COMPUTING TECHNOLOGIES

The capabilities of both digital computer and imaging technology have exploded in the last decade or so, and largely for the same reasons: the advances in the microelectronics industry. Imaging systems are available now that combine portability with capabilities that were barely imagined only a few years ago. A primary example is the digital camera; relatively inexpensive high-resolution sensors based on *charge-coupled devices (CCDs)* are now quite common, and the number of picture elements (pixels) of these sensors is now sufficiently large to create high-resolution images. Also, computer technology has advanced to the point where users now have access to notebook computers whose capabilities would have challenged the mainframe computers of only a few years ago. Part of the reason is advances in the technology for data storage. Magnetic and optical storage technologies are such that it is common for a notebook computer to have one hundred times the storage capacity of a 5-year-old desktop personal computer. Of course, that same technology introduced commensurate advances in the capabilities of larger computers, as well. Desktop computer workstations combined with new imaging algorithms allow very large images to be enhanced, combined, segmented, and otherwise processed very rapidly. Other advances in the peripheral technology for computer networking has had very significant impact on the imaging industry. Use of the Internet for transmitting messages and images is now commonplace, though it did not exist in 1990.

These advances in computing and imaging devices have opened an exciting new window for scholars of ancient texts. It is now possible to assemble a complete multispectral digital image gathering and processing laboratory in a single suitcase. This laboratory may be carried to an archaeological site or repository of documents for creation and processing of images at the site of actual documents.

OUR COLLABORATION

The genesis of our work in this field grew out of the interests of Robert Johnston, an archaeologist and one of the authors of this essay. During a visit to Jerusalem and Qumran in 1992, Johnston met Emanuel Tov at the Albright Institute, who described the many problems facing translators of the various Dead Sea Scrolls as they struggled to reclaim additional characters from degraded texts. Tov presented the challenge to make more characters visible. This has become our mission and goal.

Upon returning to the Chester F. Carlson Center for Imaging Science in Rochester, New York, Johnston shared these ideas with a number of colleagues, including Roger Easton, whose background is in astronomy, optics, and digital processing for image enhancement and clarification. Easton had earlier collaborated on research in digital imaging with Keith Knox, Principal Scientist at the Xerox Digital Imaging Technology Center in Webster, New York, whose background is in electrical engineering and optics. Knox advocated submitting a grant proposal to the *Center for Electronic Imaging Systems*, part of the New York State Center for Advanced Technology. The grant was secured in 1993. This trio of collaborators has been working on the application of imaging technologies to various digital image restoration applications ever since. Several students also have participated in this research, including Monica Barbu, Mithra Moosavi, and Joseph Tusinski.

Because we are neither linguists nor biblical scholars, we deemed it essential to find a scholar with these skills who could suggest appropriate documents for analysis and could assess the success of the techniques. Into that void stepped James H. Charlesworth of the Princeton Theological Seminary, with whom fortunately we made contact in 1996. We have greatly benefited from his wisdom, knowledge, enthusiasm, and support, as well as that of his student, Henry Rietz.

OUR TOOLS

We have assembled an armory of tools that are useful for diverse tasks in digital image restoration. To gather our own multispectral imagery, we obtained a specialized DCS digital camera through a generous donation from Eastman Kodak Company. The camera has a CCD sensor of size 1,280 (1,024 pixels that is sensitive to light over a range of wavelengths from the ultraviolet to the near infrared). The camera housing accepts standard Nikkor lenses, of which we have a small assortment, including a lens with quartz elements (instead of glass) that may be used to gather images in ultraviolet light. The DCS camera system is controlled from a notebook computer and is quite portable.

An important feature of this camera system is its ability to display images immediately, which allows the user to assess quality and to reshoot the images if necessary. Exposure times typically are quite short (under 1 second), which limits exposure of documents to potentially harmful illumination. The range of wavelengths (and thus color) of the imaged light is constrained by placing colored-glass filters over the lens during exposure. We have used a set of standard astronomical filters, which restrict transmitted light to six bands: one each for red, green, and blue visible light, one band in the ultraviolet region, and two infrared bands. The images are in digital form and may be processed in digital computers using commercial software, such as Adobe *PhotoShop*, or Xerox proprietary software at the Digital Imaging Technology Center. A schematic view of the general image gathering and processing system is shown in figure 1.

We also have utilized photographic images obtained from other researchers, including Bruce and Kenneth Zuckerman of the West Semitic Research organization. These images usually have been supplied as 8″ (10″ transparencies, which are converted to digital form using scanning equipment at the Carlson Center). Further, we have access to a number of image input and output devices at the Xerox Digital Imaging Technology Center in Webster, New York, including flatbed color image scanners and high-quality color output printers that use electrophotographic, ink-jet, and dye-sublimation imaging engines.

APPLICATION OF INFRARED IMAGING TO THE DEAD SEA SCROLLS

The capability of modern imaging technologies to create images at "invisible" wavelengths may be exploited to clarify damaged documents such as the Dead Sea Scrolls. Through the kindness of Father John Peter

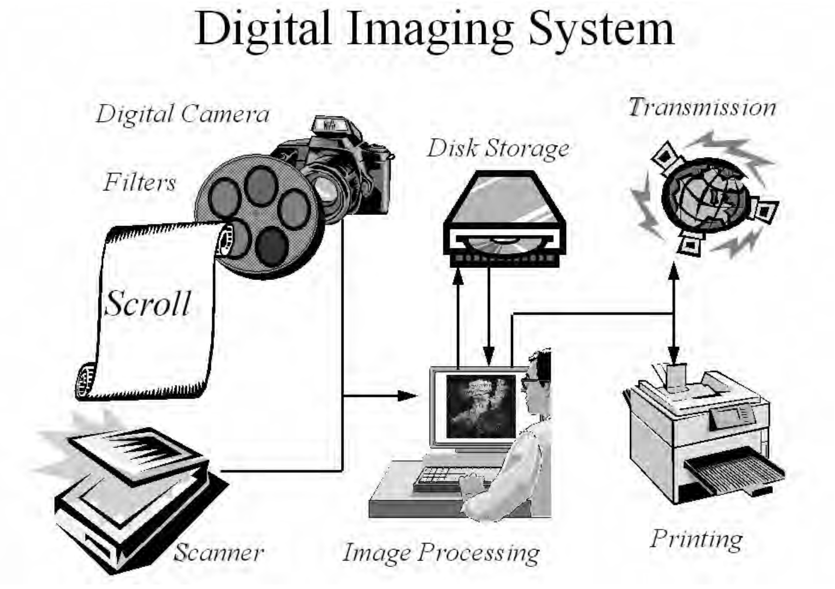

Figure 1: Digitizing scrolls and scroll fragments enables them to be easily processed with a computer and distributed for collaborative study.

Meno, the Archdiocesan General Secretary at St. Mark's Syrian Orthodox Cathedral in Teaneck, New Jersey, several fragments of scrolls were made available to be imaged in June of 1997. These fragments originally were acquired in 1947 by Mar Athanasius Yeshue Samuel, who was the archimandrite of the Syrian Orthodox Monastery of Saint Mark's in Jerusalem. He purchased the fragments from the Bedouin shepherds who originally discovered them in caves near Qumran.

These fragments exhibit regions of parchment that have darkened significantly due to the absorption of water over the years. The text in these areas is very difficult or impossible to read by eye. Images of these fragments were created in the several available bands of wavelengths (both "visible" and "invisible") with the DCS Kodak digital camera and the set of glass filters under tungsten-light illumination. Because the fragments were encased in glass, which is opaque to ultraviolet light, no images were generated in this band. It was hoped that the contrast in the darkened sections of the parchment would be enhanced when imaged with infrared light.

The benefit of infrared imagery is evident from figure 2, which shows a fragment of the "liturgical" scroll, 1Q34^{bis}. Figure 2(a) is the image in visible light. The darkened section of parchment is evident in the lower-right section of the fragment. In image figure 2(b) taken in infrared light, the text in this darkened region is readily visible. Also note that additional characters are visible that were written at a different orientation. Again, we emphasize that the images are available immediately; no processing is required for viewing. This result provides evidence that imagery taken

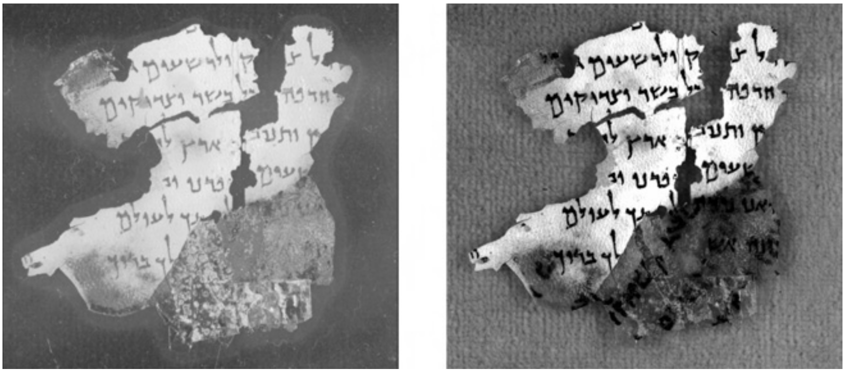

Figure 2: Scroll fragment imaged in visible light (left), infrared light (right). Darkened regions, which are illegible to the naked eye, dramatically reveal new information under infrared light.

in infrared light may be immediately useful in clarifying text in ancient documents.

APPLICATION OF DIGITAL IMAGE PROCESSING TO ENHANCE READABILITY

Additional clarification of the ancient text may be possible by applying image processing techniques to the image data using digital computers. A digital image is an array (often called a "matrix") of numbers that represent the "brightness" of the scene at each location. The locations often are called "pixels" (for "picture elements") and the numerical brightnesses are the "gray values." In the usual convention, small or large gray values correspond to "dark" and "bright" pixels, respectively.

The numerical gray values may be manipulated in a digital computer to create new images with different characteristics, such as enhanced contrast. Algorithms have been developed to enhance the contrast of the images, to align and combine different images to create larger image arrays, and to combine images created in different bands of wavelengths.

This section will describe the application of specific techniques to enhance the local image contrast of a fragment of a scroll of 1QDaniel^{a} (1Q71). An image of the fragment taken in infrared light is shown in the upper left of figure 3. Though the characters are easier to distinguish in this infrared image than they were to the eye, the contrast is still low in some sections of the parchment, particularly near the edges, and characters in these regions are difficult to read. A local contrast enhancement technique was developed and applied to this image.

The contrast enhancement process used is shown schematically in figure 3. First, a copy of this image was "blurred" by averaging the gray values of the image over areas larger than individual text characters. This image is shown in the lower left of the figure. This averaged image provides a measure of the local brightness of the parchment. Locally dark regions of parchment have small gray values, and locally bright regions have large gray values.

This averaged image was used to compensate the original infrared image. At each location, the ratio of gray values of the original image and the "blurred" copy was computed. There are four general cases of the ratio: regions of bright parchment alone, dark inked character on bright parchment, dark parchment, and dark inked character on dark parchment. In the two cases of bright or dark parchment alone, the computed ratios are of two “large” gray values or two “small” gray values, respectively. Both ratios result in values approximately equal to one. In regions of darkened background and still darker text, the value of the ratio will be less than one and the contrast of the text-to-background is enhanced. The result of the process is shown on the right of figure 3; the contrast of the image is approximately uniform throughout and the readability of text characters in the dark regions near the edges of the parchment is improved.

ENHANCING PHOTOGRAPHS OF THE *TEMPLE SCROLL*

Since we have not had access to other scrolls, we also have applied the techniques of color digital image processing to photographs of ancient documents, specifically the *Temple Scroll.* These techniques have revealed new characters that are not visible in the photographs. Careful measurements

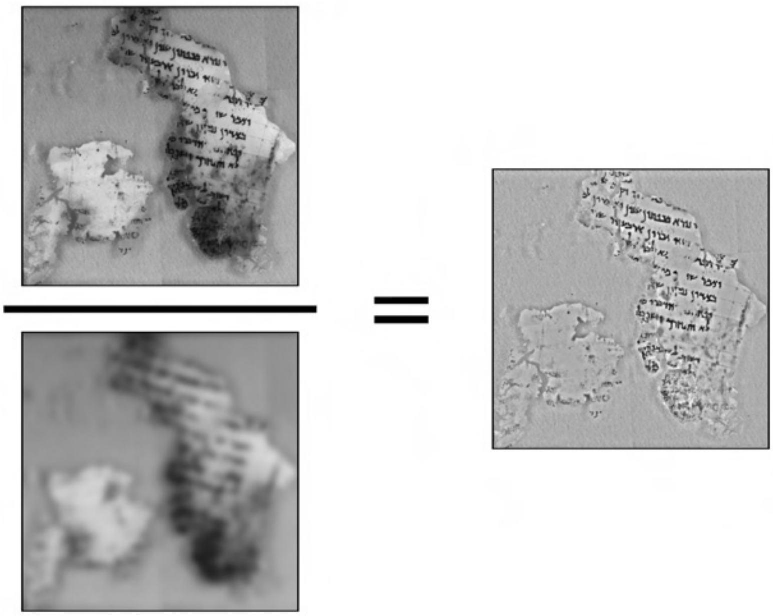

Figure 3: The original image is at the upper left. A “blurred” copy is created by computing local averages of the gray values and is shown in the lower left. The ratio of the gray values of corresponding pixels is computed and is shown at the right. Note that all background pixels have approximately the same gray level.

of the text columns and the distance from neighboring columns of the scroll have pinpointed the origin of the newly revealed characters. Since we are not biblical scholars, we will not try to define or interpret the new information. We will restrict ourselves to describing how these characters and their origins were discovered.

The *Temple Scroll* has regions where the parchment is in good condition and regions where it has degraded. Consider figure 4, which shows the scroll from column 15 (on the right) to column 18 (on the left). In the degraded regions, the parchment is very dark, and the low contrast makes the characters difficult to distinguish, let alone to read. Without access to the actual scroll, the technique of generating images in "invisible" infrared light cannot be used to improve the legibility of the characters. Instead, we were able to enhance the characters in the degraded regions by scanning and digitally enhancing the photographs of the scroll.

The key to the digital enhancement technique lies in the nature of the degradation–it is a change in color of the parchment. Although it cannot be seen in figure 4, the background in the degraded regions is a dark orange, while the characters are black. It is the similarity in brightness between the characters and the background that makes the characters difficult to see. The key to digitally enhancing the characters is to recognize that there may be a significant color difference between characters and background even where there is little difference in brightness. This color

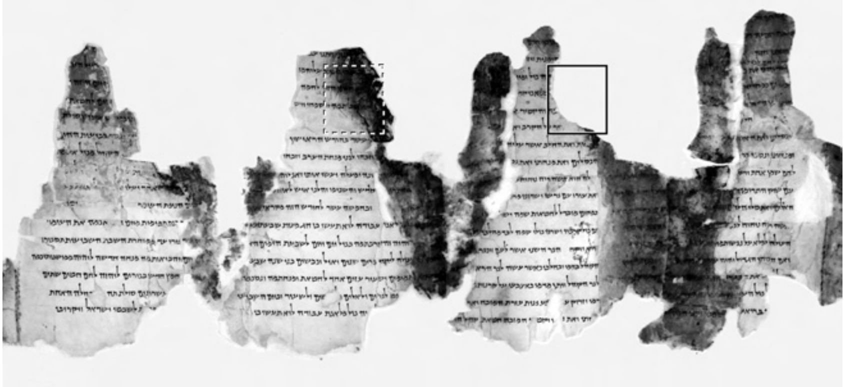

Figure 4: These four columns of the Temple Scroll were scanned from two photographs provided by Ken and Bruce Zuckerman and electronically combined to form one image. On the far left is column 18 and on the right is column 15. The dashed lines indicate where new characters were found, while the solid lines indicate their origin.

information can be extracted from the digital image of the photograph and enhanced to reveal characters in the degraded regions that could not be seen otherwise.

DISCOVERY OF NEW CHARACTERS IN THE *TEMPLE SCROLL*

In a digital image, color information is stored in the three "separations," called red, green, and blue. The camera or input scanner "sees" these separations by imaging through red, green, and blue filters, in a manner very similar to color-sensitive sensors in the human eye. The signals from the three sensors in the eye are combined before being transmitted to the brain, to produce three other signals: one proportional to the "brightness" of the scene and two proportional to the "color." The color, or "chrominance," is the difference of the red and green signals and of the blue and a "yellow" signal (formed by summing the red and green signals).

Color "spaces" are mathematical constructs used to represent the colors in a manner similar to that used in the eye. One example is the Xerox "YES" color space. The Y-component contains the brightness information and is the analogue of a color video image viewed with a black-and-white television set. The chrominance components E and S contain the color information, in the form of red-minus-green and blue-minus-yellow components, respectively. The equations that compute the YES components from the original RGB (red, green, and blue) components are:

Formula 1: $Y = (0.253 \times R) + (0.684 \times G) + (0.063 \times B)$

Formula 2: $E = (0.500 \times R) - (0.500 \times G) + 0.000 \times B)$

Formula 3: $S = (0.250 \times R) + (0.250 \times G) - (0.500 \times B)$

To extract the color information from these photographs of the *Temple Scroll*, the Y, E, and S separations of the image were generated using the three formulae from the R, G, and B outputs of the scanner. We found that the legibility of the text in the degraded sections of the scroll was much improved when viewed in the E separation.

In figure 5, an enlarged section of column 17 is shown. On the left is the original scanned image. On the right is the E-channel separation, which represents the differences between red and green in the image. Some remarkable information has appeared in the processed image. Additional characters can be seen in the top four lines superimposed on the characters in the original. In the blank space below the fourth line, a new line of characters has appeared.

Some of these characters can be explained by inspecting the photograph of the reverse side of this column: the new characters visible in the fifth line appear in reverse very clearly. On the other hand, in the region of the top four lines where the superimposed characters appear on the front, nothing is visible from the back except that the scroll is very dark in that region. One explanation is that a piece of scroll torn from another column is stuck on the back (reverse) side of column 17. Clearly, the YES processing has allowed the characters of the "fifth" line on the back to be seen through the parchment. It is our conclusion that the superimposed characters in the top four lines are being seen through the parchment and that they are written on the piece of scroll stuck to the reverse side. If this assumption is true, the task remains to determine the origin of this piece of scroll.

ORIGIN OF THE NEW CHARACTERS

The most likely source of the new characters found in column 17 is a neighboring column. Since the scroll was rolled from the left to right (the

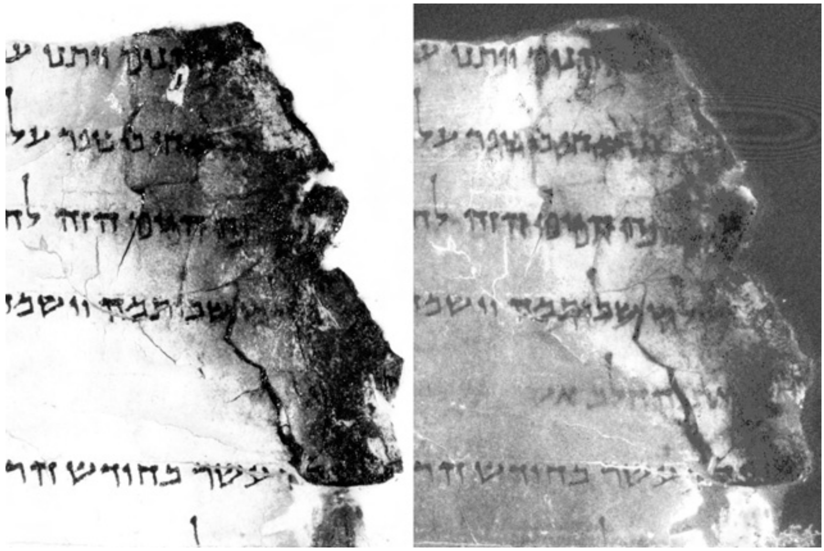

Figure 5: An enlarged image of the top of column 17 of the *Temple Scroll* is shown on the left. After processing through the YES color space, the enhancement is shown on the right. A fifth line of characters is now visible.

columns are numbered from right to left), the column that lay behind column 17 in the rolled scroll would be a lower numbered column from the right.

We communicated the discovery of these new characters and the possibility that they were transferred in some way from another part of the scroll to Professor James Charlesworth. He and Henry Rietz studied the characters and the images of the scroll to determine their origin. After careful consideration, they concluded that the "new" characters originated from a section of the scroll adjacent to the existing portion of line 6 in column 16. In other words, the source of these characters is a section of the scroll that no longer exists.

We made additional measurements of the scroll to confirm their conclusion. The periodicity of the crenulation was used to determine how tightly the scroll was rolled. We obtained several photographs of this region of the *Temple Scroll* from the Zuckermans. Each frame of their photographs shows two adjacent columns of the scroll, with some overlap from frame to frame. Using the overlapping regions as guides to align adjacent images in size, rotation angle, and lateral shift, columns were "stitched" together digitally to create a single large image.

Figure 6 shows an example of aligning and digital "stitching" of the photographs of adjacent columns. The two columns on the left (18, 17) are from one photograph and the two columns on the right (16, 15) are from another. The overlapped regions were matched and the images joined together to create a single larger image file in the computer. In the regions where the two images overlapped, a soft transition was made by smoothly varying the relative contributions of the two images across the seam. The background colors of the individual photographs were also adjusted to a common color to minimize the visibility of the seam.

The periodicity of the degradation can be easily seen from figure 6. Note the lines on the bottom of the figure, which indicate the locations of three holes that were created as a single puncture in the rolled scroll. These locations provide a measure of the diameter of the rolled scroll and also determine the location of origin of the torn piece of scroll measured from its "new" location behind column 17.

From the line at the top of figure 6, it is evident that a single period to the right of the location of the new characters is the gap in column 16 that has approximately the same shape as the darkened region in column 17. This is the region from which we believe the piece stuck on the back of column 17 was torn.

By digitally joining the two images, the vertical and horizontal alignments of the lines of text are established. This indicates that the fifth line

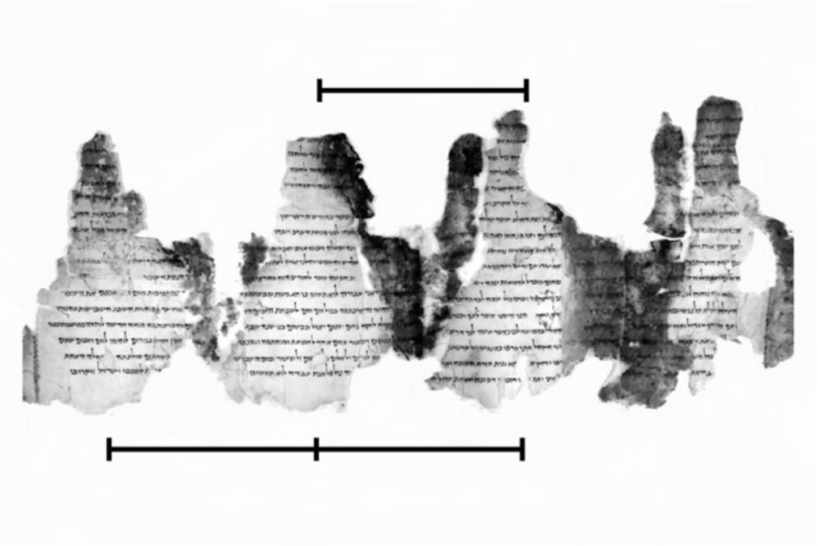

Figure 6: The bottom lines demark the periodicity of the degradation, which indicates the diameter of the rolled scroll. The upper line measures the same distance from the discovered characters to their origin in column 16 of the *Temple Scroll.*

in column 17 (counted from the top) is aligned with the sixth line in column 16. The measured horizontal separation places the new characters within the missing region of column 16.

At the left edge of the "missing" region of column 16 is the left half of the character *sin.* Also, one of the characters that appears in reverse on the back side of column 17 is the right half of a *sin.* When the new characters visible in column 17 are moved to the position indicated from the measurements of the period of the rolled scroll, the two halves of the *sin* match precisely and the character is reformed as seen through the parchment from the front. This merging of characters from columns 16 and 17 is shown in figure 7. Our measurements, as shown in this figure, confirm Professor Charlesworth's conclusion that these new characters originated in the gap in column 16 and constitute previously unknown text.

At this time, we have examined only a very few columns of the *Temple Scroll* using these digital imaging techniques. Preliminary investigation of a few other columns indicates that other discoveries are likely.

CONCLUSIONS

Modern imaging technologies may be applied to many problems faced by scholars of ancient documents. In this paper, we have described one major benefit of these new technologies–the ability to reveal previously unknown characters. Dramatic results were obtained using a specially designed digital camera with enhanced sensitivity at wavelengths invisible to the eye. New characters were discovered in photographs of the *Temple Scroll* by enhancing subtle color differences in the scanned images in the degraded regions of the scroll. Yet to be investigated is whether these techniques can be applied to the study of other antiquities, such as overwritten parchments, cuneiform tablets, ostraca, and pottery shards.

Other tasks faced by scholars today may be facilitated by working with digital images of the scrolls. Techniques may be developed to use the computer to recognize partial characters, to assemble fragments together into larger pieces, and to reconstruct larger documents from individual pieces. Another benefit of digital imaging is that, once gathered, digital images could be distributed conveniently to scholars worldwide

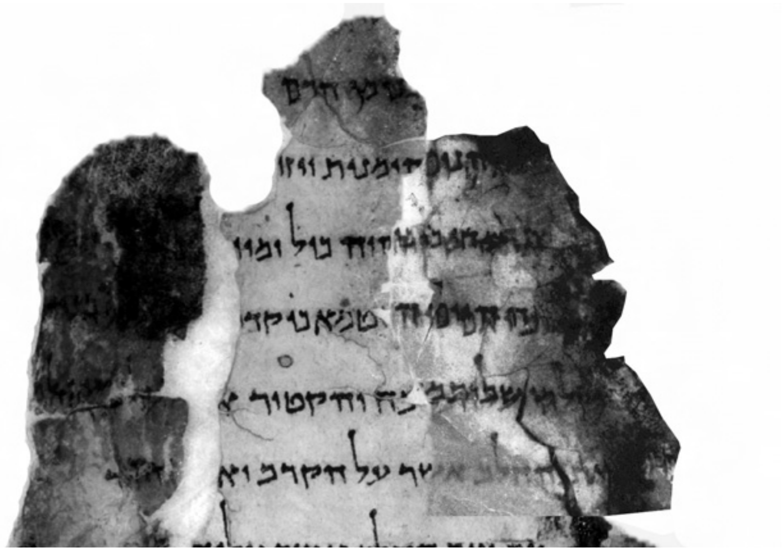

Figure 7: The top of column 16, the origin of the new characters, is shown merged with the enhanced image of column 15. The new characters line up with the existing text in column 15. Note the sin in line 6, which consists of two halves, one from each column.

by electronic transfer over the Internet. This would allow access for a wider base of scholars to important documents without traveling to central repositories or handling fragile scrolls, thereby preserving our heritage for future generations.

ACKNOWLEDGMENTS

The authors wish to thank Dr. James Charlesworth and Henry Rietz of the Princeton Theological Seminary for their assistance in this work. This project was supported in part by the New York State Center for Advanced Technology in Electronic Imaging Systems.

CHAPTER TWO
ANOTHER STAB AT THE WICKED PRIEST

David Noel Freedman and Jeffrey C. Geoghegan

Attempts to identify the Wicked Priest have been numerous, with proposals ranging roughly from Jason to Jesus.[1] There is one candidate, however, who has not received much attention, yet whose tenure as High Priest corresponds to the time period described by the Dead Sea Scrolls community when recounting its own beginnings, and whose person matches several significant descriptions of the Wicked Priest. Before discussing this person and the basis for his identification as the Wicked Priest, a few observations about the Qumran community are in order.

---

[1] Most scholars congregate around the Maccabaean High Priests Jonathan and Simon. For Jonathan, see, Jozef T. Milik, *Ten Years of Discovery in the Wilderness of Judaea* (trans. J. Strugnell; SBT 26; London: SCM Press; Naperville, IL: Allenson, 1959), 65–71; Geza Vermes, *The Dead Sea Scrolls: Qumran in Perspective* (Cleveland: Collins World, 1978; repr. Philadelphia: Fortress, 1981), 151; Gert Jeremias, *Der Lehrer der Gerechtigkeit* (SUNT 2; Göttingen: Vandenhoeck & Ruprecht, 1963), 36–78; Jerome Murphy-O'Connor, "The Essenes and their History," RB 81 (1974): 229–33. For Simon, see Frank M. Cross, Jr., *The Ancient Library of Qumran and Modern Biblical Studies* (Garden City, NY: Doubleday, 1961); George W. E. Nickelsburg, "Simon–A Priest with a Reputation for Faithfulness," *BASOR* 223 (1976): 67–68. However, there is no lack of proposals. For Alexander Jannaeus, see Mathias Delcor, "Le Midrash d'Habacuc," *RB* 58 (1951): 521–48; Bilhah Nitzan, *Megilat Pesher Habakkuk: Mi-megilot Midbar Yehudah* (Jerusalem: Mosad Byalik, 1986), 132–33 [Hebrew]; Jean Carmignac, Edouard Cothenet, and Hubert Lignée, *Les textes de Qumran traduits et annotés* (2 vols.; Paris: Letouzey et Ané, 1961), 2:361–68. For Hyrcanus II, see André Dupont-Sommer, *Les écrit esséniens découverts près de la mer Morte* (Paris: Payot, 1980), 274. Adam S. van der Woude, "Wicked Priest or Wicked Priests? Reflections on the Identification of the Wicked Priest in the Habakkuk Commentary," *JJS* 33 (1982): 349–59, has argued that the Wicked Priest is no one person, but successive Jerusalem High Priests from Judas Maccabaeus to Alexander Jannaeus, a theory now referred to as the "Groningen hypothesis." See also, Florentino García Martínez, "Qumran Origins and Early History: A Groningen Hypothesis," *FO* 25 (1988): 113–36; Florentino García Martínez and Adam S. van der Woude, "A Groningen Hypothesis of Qumran Origins and Early History," *RevQ* 14 (1990): 521–41. William H. Brownlee, "The Wicked Priest, The Man of Lies, and the Righteous Teacher–The Problem of Identity," *JQS* 73 (1982): 1–37, has also suggested that the Wicked Priest refers to more than one person. Similarly, Igor R. Tantlevskij, *The Two Wicked Priests in the Qumran Commentary on Habakkuk* (*The Qumran Chronicle* Appendix C; Kraków-St. Petersburg: Enigma, 1995) has identified the Wicked Priest with two figures: Jonathan and Alexander Jannaeus. For a critique of the Groningen Hypothesis, see Timothy H. Lim, "The Wicked Priests of the Groningen Hypothesis," *JBL* 112/3 (1993): 415–25. For a rebuttal, see Adam S. van der Woude, "Once Again: The Wicked Priests in the Habakkuk Pesher from Cave 1 of Qumran," *RevQ* 17 (1996): 375–84.

I. THE DEAD SEA SCROLLS COMMUNITY AND EZEKIEL

A dominant feature of the Dead Sea Scrolls community is its acceptance of and devotion to the principles expounded by the prophet Ezekiel. Briefly put, the Dead Sea Scrolls community adopts Ezekiel's geography, his chronology, his views on the Priesthood, and the famous *Temple Scroll* seems a page right out of Ezekiel, especially the visions of the new Jerusalem and Temple described in Ezekiel 40–48.

Geographically, the Qumran community's choice of the Dead Sea seems influenced, at least in part, by Ezekiel's vision of the last days when a mighty river would flow from the Temple in Jerusalem to the Dead Sea (Ezek 47:1–12).[2] This lifeless body of water would one day become the location of an apocalyptic outpouring of divine blessing, and the people at Qumran were perfectly situated to participate in its abundance.

Chronologically, the Damascus Document provides the timeframe of the Dead Sea Scroll sect, which is also taken from Ezekiel (4:5, 9). CD 1 states that God caused "a root of planting to spring from Israel and Aaron" 390 years after the fall of the First Temple, that is, 586 B.C.E. minus 390 years, or ca. 196 B.C.E.[3] The community then wandered for twenty years "like blind men" until the appearance of the Teacher of Righteousness, which brings us down to ca. 176 B.C.E. While these numbers may be inexact due to rounding and perhaps even miscalculation,[4] we should not underestimate their value for determining approximate dates, and, in the end, they may be quite accurate.

---

[2] Although, cf. 1QS 8, which relates the choice of the desert to Isa 40:3. We should not overlook the practical appeal of this location, given its remoteness and relative safety in light of the dangers posed to the community by the Jerusalem establishment.

[3] For a different understanding of these numbers, see W. H. Brownlee, "The Wicked Priest," 15–16, who argues that this passage refers to the independence of the Jewish state that was gained in 143 B.C.E. under Simon (1 Macc 13:36–40). For the difficulties involved in determining dates for the Teacher, the texts, and the settlement, see most recently Michael O. Wise, "The Dating of the Teacher of Righteousness and the *Floruit* of His Movement," *JBL* 122/1 (2003): 53-87.

[4] In this regard, see the comments of Geza Vermes, *The Dead Sea Scrolls in English* (4th ed.; London: Penguin, 1995), 32.

Genealogically, the Dead Sea Scrolls community accepted Ezekiel's teaching that only Zadokite priests could serve in the Temple (Ezekiel 44–45). This point alone would make it highly unlikely, if not impossible, for the Qumran community to acknowledge the Hasmoneans as legitimate High Priests, or even as having the right to function at the Temple in any capacity. Therefore, the notion that Jonathan or Simon could be the Wicked Priest seems improbable.[5] These individuals were never legitimate in any sense for the Qumran community, and since it is stated in the Habakkuk Pesher that the Wicked Priest started his career in truth or, more literally, "called by the name of the truth," *niqrāʾ ʿal šēm hāʾĕmet* (namely that he belonged in the position[6]), we should look to the Zadokite line for the Wicked Priest.[7]

Further evidence that the Wicked Priest was Zadokite is found in *Miqṣat Maʿase ha-Torah* (4QMMT [= (4Q394–399]). Based on the letter's tone and content, it seems certain that 4QMMT reflects an early stage of the conflict between the Jerusalem authorities and the separatists, whose main disagreements were over the correct liturgical calendar and various *halakot* surrounding the Temple.[8] Yet there is no hint at this stage of any objection to or question about the legitimacy of the then ruling High Priest,[9] who is most likely the recipient of the epistle and who, as we will discuss below, seems to be the one later designated as the Wicked Priest.[10] Although the differences between these two groups were very serious and could not be easily dismissed (since the observance of sacred times and seasons on different days was intolerable), 4QMMT reflects a quarrel *within the legitimate priesthood.*

---

[5] While we disagree with van der Woude's overall conclusion that the title Wicked Priest refers to a number of successive Jerusalem High Priests, we agree with his comments regarding 1QpHab 8:8–13: "Jonathan and his successors, let alone the Hellenistic-minded high priests of the Maccabean period, [have] to be ruled out because the Hasmonean high-priesthood was repugnant to the Zadokite priests of Qumran" ("Wicked Priest or Wicked Priests?" 354). For similar remarks, see Vermes, *Dead Sea Scrolls in English*, 35.

[6] Cf. Ezra 2:61; Neh 7:63; 1 Chr 23:14.

[7] Given the Qumran community's emphasis on the sole legitimacy of the Zadokite line, as well as the theological import of the term "truth" in the Qumran documents (William H. Brownlee, *The Midrash Pesher of Habakkuk* [SBLMS 24; Missoula, MT, 1979], 135–36), it seems to us that the author here could only be referring to a Zadokite. Although, cf. the contrary remarks of Brownlee, "The Wicked Priest," 1; and van der Woude, "Wicked Priest or Priests," 353–54.

[8] Elisha Qimron and John Strugnell, in *Qumran Cave 4.V: Miqsat Maʿase ha-Torah* (DJD 10; Oxford: Clarendon, 1994), 113.

[9] Qimron and Strugnell, *Miqsat Maʿase ha-Torah*, 117.

[10] 4QpPs^{a} (4Q171).

If the Wicked Priest was, in fact, Zadokite, then this leaves us with two candidates: Onias III and Jason, Onias' brother.[11] As for the latter, his purchase of the High Priesthood from Antiochus Epiphanes (ca. 174 B.C.E.),[12] his ultra-Hellenist leanings, and his highly questionable behavior before and during his High Priesthood[13] make it difficult to imagine that the Qumran community would have regarded him as legitimate at any point. Moreover, if the comments in the Habakkuk Pesher are interpreted correctly to mean that the Wicked Priest was murdered by foreign agency,[14] Jason is again excluded since he was not murdered by foreigners, but rather died in exile.[15] This leaves us with Onias III, who actually fits the role quite well as he was murdered by foreign agency (the Syrian governor, Andronicus, at Daphne near Antioch[16]), and his tenure as High Priest (ca. 196[?]–175 B.C.E.) corresponds to the time the Dead Sea Scrolls community calculated its own inception.[17]

If we allow for the moment the identification of Onias III as the Wicked Priest, then we might reconstruct the birth of the Qumran community as follows.

As reflected in MMT, disagreements arose (or perhaps were already present, but merely escalated) after the accession of Onias III to the High Priesthood, disagreements that were in part due to new (or renewed) policies involving calendrical and liturgical alterations. These disagreements were sharp enough to result in the defection of those who would later make up the Dead Sea community, and may have also included those who would form the other major Sects of the Second Temple period (see discussion below).

After a period of about 20 years (the time referred to as "groping for the way"[18]), the Teacher of Righteousness emerged, providing much needed direction and instruction for this still fledgling movement.[19] Perhaps the Teacher of Righteousness was the one behind the move to Qumran, which may help to explain the seemingly conflicting reports that the Teacher of Righteousness was both a late comer and yet the founder of the community.[20] In any case, the community now had a leader who possessed both the necessary charisma and Zadokite lineage to prove a formidable threat to the ruling High Priest in Jerusalem.

---

[11] Onias IV might qualify as well, since he was a legitimate Zadokite. However, he never seems to have been recognized by anyone as High Priest of the Jerusalem Temple, rather he established his own temple in Egypt at Leontopolis (*Ant.* 12.387–88; 13.62–73; 20.236). Although, Paul A. Rainbow, "The Last Oniad and the Teacher of Righteousness," *JJS* 48 (1997): 30–52, has argued that the Onias who built the temple at Leontopolis was not the son of Onias III, but of Menelaus' brother, Simon.

[12] 2 Macc 4:7–8.

[13] 2 Macc 4:7–22.

[14] 1QpHab 9:8–12.

[15] 2 Macc 5:7–10.

[16] 2 Macc 4:33–34. Although, cf. Menahem Stern, "The Death of Onias III," *Zion* 25 (1960): 1–16 (Hebrew), for an evaluation of the conflicting reports surrounding Onias' death. For a discussion of the conflicting reports of the Wicked Priest's death, see W. H. Brownlee, "The Wicked Priest," 4–8.

[17] Patrick W. Skehan and Alexander A. Di Lella, *The Wisdom of Ben Sira* (AB 39; New York: Doubleday, 1987), 9.

[18] CD 1.10.

Still hoping to win the High Priest over to his point of view, the Teacher of Righteousness sent what is now known as the MMT epistle. As 4QpPs^{a} (4Q171) informs us, though, the epistle had the opposite effect.[21] The Jerusalem High Priest, soon to be known as the Wicked Priest, was outraged by this affront, and decided to take action against the community while it was still in its infancy. The Habakkuk Pesher describes the dramatic climax of this confrontation when the High Priest raided the community's quarters on their Day of Atonement.[22] The battle lines were now drawn, reconciliation was out of the question, and subsequent *pĕšārîm* especially those on the book of Habakkuk, would describe the ensuing animosity between these two groups in apocalyptic terms.

Not long after this confrontation, Onias III encountered other problems closer to home. His ongoing clash with the Tobiads over jurisdiction of the *agoronomia* and other matters resulted in his trip to Antioch to defend himself before Seleucus IV. This backfired, as the king was murdered, and Jason, taking advantage of his brother's absence and the changing political landscape, purchased the High Priesthood from the new king, Antiochus Epiphanes (ca. 175). Onias, though still the legitimate High Priest by right of succession, now found himself indefinitely detained in a foreign land. That the Habakkuk Pesher could speak with such confidence of the Wicked Priest's impending doom at the hands of foreigners might be explained by this period of confinement.[23] In less than 5 years Onias would be murdered by the Syrian governor Andronicus at the instigation of Menelaus, whose hold on the pontificate was in danger while Onias remained alive.

---

[19] CD 1.11.

[20] Cf. CD 1.9–11 and 4QpPs^{a} (4Q171) 3:15–16.

[21] Though partially reconstructed, the text reads, "Its interpretation concerns the Wicked Priest who spied on the Teacher of Righteousness to put him to death because of the precepts and the law which the latter had sent to the former" (John M. Allegro, "Commentary on Zephaniah," *Qumran Cave 4.I [4Q158–4Q186]* [ed. J. M. Allegro and A. A. Anderson; DJD 5; Oxford: Clarendon, 1968], 45). Whether or not the letter referred to here is MMT is not totally clear, but this identification is, in our opinion, the most probable.

[22] 1QpHab 11:2–8. See also Shemaryahu Talmon, "Yom Hakkippurim in the Habakkuk Scroll," *Biblica* 32 (1951): 549–63; repr. in idem, *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 186–99.

[23] This period of confinement might also explain the apparent contradictions among the accounts of the Wicked Priest's death, especially if Onias endured (or was

II. THE DEAD SEA SCROLLS COMMUNITY AND THE SECTS

As suggested above, we might also trace the origin of the other Sects to this same general period. Cross seems to be correct in arguing that the basic reform group from which all three Sects derived was the Hasidim.[24] The Sadducees were identified with the Zadokites originally, if that is what the name means.[25] The Essenes also derived from this group, as the literature shows, so there must have been a split among the Zadokites, with one group (i.e., those who would become the Essenes) being more extreme and eventually departing from the Temple. Then there were the "separated ones," who emerge as the Pharisees.[26] The verbal root *pāraš* appears first in MMT to describe, more generally, the community's separation from the Temple and its liturgy.[27] Later the Qumran community preferred to describe their defection by the phrase *sûr midderek haʾam*, no doubt to "biblicize" their action and to distinguish themselves from the group whose name had since become connected with the verbal root *pāraš*, the *pěrûšîm* or Pharisees.

Thus, the Hasidim came first, who then split three ways, one group absenting themselves from Jerusalem and eventually settling down at Qumran. The Sadducees and Pharisees went their separate ways with their separate emphases, but sharing the same basic zeal of the reformers, which stemmed, in part, from the deep schism in the Jewish community as a result of its explosive contact with Hellenism.

---

thought to endure) harsh treatment and sickness prior to his execution. See esp. 1QpHab 9:8–12 and 4QpPs^{a} 4:7–10.

[24] Cross, *Ancient Library of Qumran*, and more recently Roger T. Beckwith, "The Pre-history and the Relationship of the Pharisees, Sadducees and Essenes: A Tentative Reconstruction," *RevQ* 11 (1982): 3–46. See 1 Macc 2:42; 7:12–13; 2 Macc 14:6.

[25] For a helpful discussion of the various scholarly opinions on the origins and makeup of the Sadducees, see Gary G. Porton, "Sadducees," *ABD* 5:892–95.

[26] Albert I. Baumgarten, "The Name of the Pharisees," *JBL* 102 (1983): 411–28.

[27] Qimron and Strugnell, *Qumran Cave 4V*, 111.

III. THE DEAD SEA SCROLLS COMMUNITY AND THE SETTLEMENT AT QUMRAN

As to the discrepancy between the dating of the sectarian settlement at Qumran (ca. 135–100 B.C.E. or even later) and the tenure of Onias III as the High Priest (ca. 196–175 B.C.E.), the most likely explanation is that the original location of the settlement was elsewhere, or even of various locales, a proposal that is supported by the ancient sources, including the community's own account of its origins.[28] Perhaps the attack on the community on their Day of Atonement became the impetus behind their eventual move to the Dead Sea region, a move that took a couple of decades from its inception to its completion. Whatever the exact scenario, we should not allow the dating of the Qumran settlement to cause us to dismiss Onias III as a candidate for the Wicked Priest.

IV. CONCLUDING MATTERS

If we knew more about Onias III's tenure as High Priest, then we might be able to relate the other descriptions of the Wicked Priest to the events of his life with more precision. For example, the description of the Wicked Priest's love of money and his amassing of riches[29] may correspond to Onias III's supervision of the marketplace and/or his control over the Temple treasury. After all, Onias' grandfather, Onias II, had a reputation for greed and thievery,[30] and Onias III's own close association with the Tobiad publican, Hyrcanus, might have been sufficient cause for ascribing to him similar characteristics (perhaps with some merit). In addition, both later pro-Hasmonean sources and Josephus viewed Onias III as abject,[31] and it is not difficult to imagine that this sentiment was shared by the Qumran community, especially if exacerbated by liturgical and theological differences. The fact that 2 Maccabees 3–4 presents Onias III in a positive light should not dissuade us from considering him as a candidate for the Wicked Priest, since this was his reputation among foreign nations and "the people" of Jerusalem, groups with whom the Dead Sea Scrolls community would hardly see eye-to-eye. As for the comment that the Wicked Priest "ruled over Israel,"[32] it is well known that the High Priest exercised considerable authority within the Jewish community, so to describe his activity in such terms is understandable and does not, by necessity, imply a Hasmonean High Priest.

---

[28] Roland de Vaux, *Archaeology and the Dead Sea Scrolls* (Schweich Lectures 1959; rev. ed.; Oxford: Oxford University Press, 1973), 5, dated the initial settlement to the second half of the second century B.C.E. (ca. 130 B.C.E.). For evidence supporting a later initial settlement (ca. 100 B.C.E.), see the discussion and bibliography in Jodi Magness, *The Archaeology of Qumran and the Dead Sea Scrolls* (Grand Rapids: Eerdmans, 2002).

[29] 1QpHab 8:8–12.

[30] So Josephus, *Ant.* 12.4.1–2.

[31] Jonathan A. Goldstein, "The Tale of the Tobiads," in *Christianity, Judaism and Other Greco-Roman Cults: Studies for Morton Smith at Sixty* (ed. J. Neusner; Leiden: Brill, 1975), 83–123. Cf. Jonathan A. Goldstein, *I Maccabees* (AB 41; Garden City, NY: Doubleday, 1976), 57–61, 73.

As it stands, however, there are still a number of unknowns (not the least of which is the identity of the Teacher of Righteousness[33]), and the proposal that Onias III is the Wicked Priest raises about as many questions as it answers (although no more than for any other candidate or candidates). Yet, based on what we *do* know about the Wicked Priest, especially that he was initially considered legitimate (i.e., Zadokite) in the eyes of the Dead Sea Scrolls community, that he was active during the formative years of this community (ca. 196–175 [d. ca. 171] B.C.E.), and that he was killed by foreign agency (the Syrian governor, Andronicus), Onias III deserves more attention than he has yet received.

---

[32] 1QpHab 8:9.

[33] Ironically, several scholars have identified Onias III as the Teacher of Righteousness; see, for example, Harold H. Rowley, "The Teacher of Righteousness and the Dead Sea Scrolls," *BJRL* 40 (1957): 114–46. P. A. Rainbow's suggestion that the Teacher of Righteousness was a son of Onias III ("The Last Oniad and the Teacher of Righteousness," 30–52), along with our conclusion that Onias III may have been the Wicked Priest, makes for a provocative reconstruction of the dynamics of the conflict between the Wicked Priest and the Teacher of Righteousness.

CHAPTER THREE

WHAT'S IN A CALENDAR? CALENDAR CONFORMITY AND CALENDAR CONTROVERSY IN ANCIENT JUDAISM: THE CASE OF THE "COMMUNITY OF THE RENEWED COVENANT"

Shemaryahu Talmon

I chose to break this discussion into four parts:

1. The essay begins with a necessarily compressed introduction concerning issues of method in the study of the *yaḥad*;
2. Following the introduction, I supply illustrations of the divisive impact of calendar nonconformity on socioreligious entities and of the importance of a common calendar for ensuring internal cohesion of a society generally, and in particular of Judaism in various stages of its history;
3. In the third part, I propose to discuss concisely pivotal characteristics of the calendrical documents of the "Community of the Renewed Covenant";[1]
4. Finally, the community's "calendar controversy" with contemporary mainstream Judaism will be brought under scrutiny in the overall context of Qumran studies.

---

[1] By this appellative the authors of the *yaḥad's* "Foundation Documents" (see below) refer to their community (CD 6.19; 8.29 et passim). See Shemaryahu Talmon, "The Community of the Renewed Covenant: Between Judaism and Christianity," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls (1993)* (ed. E.C. Ulrich and J.C. VanderKam; Christianity and Judaism in Antiquity 10; Notre Dame: Notre Dame, IN: University of Notre Dame Press, 1994), 3–24. This term should be adopted in research instead of the misleading names "Qumran Sect," "Qumran Essenes," etc. An alternative designation derives from the Hebrew root *yḥd* which is profusely employed in the Covenanters' literature in verbal and adverbial forms. Authors apply the noun *yaḥad* exclusively to their own community in terms like "ʿ*adat*" or "ʿ*asat hayaḥad,*" often using the apocopated form *hayaḥad* with the def. article, as in "ʾ*anšê hayaḥad*" = the members of the *yaḥad.* The noun *yaḥad* occurs occasionally in biblical Hebrew, but is not used in rabbinic literature. See: Shemaryahu. "Sectarian יחד–A Biblical Noun," *VT* 3 (1953): 133–40; repr. as "The Qumran יחד– A Biblical Noun," in idem, *The World of Qumran From Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 53–60.

THE COVENANTERS' CALENDAR IN CONTEXT

The completion of the publication of all scrolls and scroll fragments found at Qumran is an appropiate *point d'appui* for a review of the essential aspects of the world of ideas of the *yaḥad* and its particular place in the Jewish society at the turn of the era. However, we should bear in mind that many, possibly most Qumran manuscripts, such as the copies of biblical books, prayer compilations and wisdom writings, are not marked by the Covenanters' idiosyncratic concepts, but rather represent what may be considered the literary *Gemeingut* of Judaism at the height of the Second Temple period. The prerequisite building stones for tracing the *yaḥad*'s peculiar socioreligious profile "from within" can only be won from "Foundation Documents" which directly address the membership of the *yaḥad*, and detail the main tenets of its theology and communal structure. These documents were mostly found in Cave 1, painstakingly secured in covered jars, with additional fragments recovered from Cave 4: the *Rule of the Community* (1QS) and the *Rule of the Congregation* (1Q28a) and the *Messianic Rule* (or *Blessings* –1Q28b),[2] in conjunction with fragments of the *Damascus Document* (CD);[3] the *Pesher Habakkuk* (1QpHab); the *War Scroll* (1QM) and to some extent the *Thanksgiving Hymns*–formerly called *Hôdāyôt* (1QH). To these extensive manuscripts must be added the *Temple Scroll* (4Q524, 11Q19-20 [= 11QT]), the numerous fragments of calendrical documents,[4] and occasional calendar-related references in other works, which will be brought under scrutiny in the present paper.

What were the Covenanters' societal and religious aims, and how can one define the specificity of their community in relation to other socioreligious groups and streams in Second Temple Judaism, foremost to Pharisaism *in statu nascendi*? I have endeavored to answer some of these questions by identifying the Covenanters' "biblical ethos" as the focus of their conceptual universe and as the *causa causans* of their segregation from the mainstream community. The existential significance of this pronounced characteristic becomes manifest, *inter alia*, in their conception of the *yaḥad* as the youngest link in the generation chain of ancient Israel that had snapped in 587 B.C.E. in the wake of the Babylonians' conquest

---

[2] See: Philip S. Alexander and Geza Vermes, *Qumran Cave 4.XIX: 4QSerekh Ha-Yaḥad* (DJD 26; Oxford: Clarendon, 1998).

[3] Joseph M. Baumgarten, *Qumran Cave 4.XIII: The Damascus Document (4Q266-273)* (DJD 18; Oxford: Clarendon, 1996).

[4] Shemaryahu Talmon, with the assistance of Jonathan Ben-Dov, "Calendrical Texts," *Qumran Cave 4.XVI,* (ed. S. Talmon, J. Ben-Dov, and U. Glessmer; DJD 21; Oxford: Clarendon, 2001); Shemaryahu Talmon, "Calendars and Mishmarot," *EDSS* 1:108–17.

of Judah and the destruction of the Temple of Jerusalem, and the deportation to Mesopotamia of large segments of the Judean population.[5] The Covenanters present themselves as "the people who returned from the exile," with whom God reestablished his covenant of old with Israel (CD 1.1–11), as foretold by the prophet Jeremiah:

> The time is coming, says YHWH, when I will renew (literally: make a new) my covenant with Israel and Judah…I will (again) set my law within them and write it on their hearts. I will become their God and they shall become my people. (Jer 31:31–33)

This self-identification is shown in their vicarious re-experience of biblical Israel's "three-stage" past history: exile–as in Egypt and Babylonia; sojourn or wanderings in the desert–as after the Exodus from Egypt; conquest of the land–as in the days of Joshua. It finds an expression in the reenactment of the Deuteronomic "curse and blessing" ceremony (Deut 27:11–28:14; cf. Josh 8:30–35 and chs. 23–24) in the induction ritual of novices (1QS 1–2).[6] It is reflected in their expectation of the future rise of the "twin anointed," which derives from the prophet Zechariah's portrayal of the Davidic scion Zerubbabel and Joshua the high priest as coregents of the reconstituted Jewish body politic (Zechariah 3–4).[7]

The Covenanters' distinctive "biblical ethos" is diametrically opposed to the emphatic "postbiblical" stance of the Jewish Sages. It constituted the most decisive ideational factor that divided their community, which crystallized in the early second or possibly already in the third or fourth century B.C.E., from the rabbinic or proto-pharisaic movement[8] that consolidated in that same period. It is my thesis that the rift between the two factions initially arose from a dissent on matters of an internal "ideational" nature and ritual prescriptions. However, triggered by the Covenanter's adherence to a solar calendar of 364 days per annum, which is indeed rooted in the tradition of biblical Israel and differs substantially from the 354-day lunar calendar to which mainstream Judaism adhered. The theological-cultic dissent ultimately hardened into a "socioreligious schism." The *yaḥad's* observance of the "holy seasons"—of Sabbaths and festivals—according to an unconformable time-schema,[9] effected an unbridgeable parting of the ways, which culminated in the establishment of their community as a socioreligious *corpus separatum.*[10]

---

CALENDAR AND SOCIETAL COHESION

I propose to put in relief the signal importance of a shared ephemeris for the coordination of communal life by quoting once again Emile Durkheim's appreciation of a common calendar as a pivotal factor of socialization, which "expresses the rhythm of the collective activities while at the same time its function is to assure their regularity."[11] In the application of the societal significance of calendar for clearly circumscribed political and/or religious entities, we must pay attention to an additional aspect: while a common calendar is an indispensable instrument for securing internal unity of a given body politic or a religious community, calendrical dissent of a section of a societal entity palpably manifests schismatic intentions.

Some well-known historical instances will suffice to illustrate the adherence to an unconformable calendar as a symbolic and, at the same time, exceedingly tangible medium of segregation aimed at the achievement of political and/or religious independence.

Faith communities tend to adopt a particular and exclusive time schema that serves them, on the one hand, as a centripetal means for achieving internal cohesion and, on the other hand, for serving as a boundary marker setting them off against outsiders. Thus, Judaism, Christianity and Islam each continue to adhere to a separate calendar, which they espoused from early on. Nascent Christianity interpreted the singular mission of Jesus as signifying the onset of a new creation, and the Muslim faithful venerated Muhammad as the founder of a new world order. In both cases the inception of the new creedal system was bound up with the incipience of a special and exclusive time schema.

[11] Emile Durkheim, *The Elementary Forms of the Religious Life* (trans. J. S. Swain; London: Allen & Unwin; New York: Macmillan, 1915), 11.

In the course of their history, religious entities experience internal diversifications and calendaric schisms. In reference to ancient Israel the process can be illustrated by the split of the Samaritan community from Judaism in the Persian or Hellenistic era, and the secession of the Karaites who separated from the Rabbanites in the seventh or the eighth century C.E., and persist as a schismatic denomination to this day. The Samaritans, like the Karaites, gear their communal and individual pace of life each to a particular lunar calendar, which constitutes a visible demarcation line between their communities and contemporary Judaism. For example, the Samaritan sacrifice of the paschal lamb rarely coincides with the Jewish *Seder* on the first night of the Feast of Unleavened Bread (Mazzot), although both observe the ritual on the date prescribed by biblical law, namely the fourteenth of the first month (Nissan). Likewise, the Orthodox Churches celebrate Christmas, Easter, and Palm Sunday at different times from their observance in the Western Churches,[12] although all depend on the dates prescribed in the hallowed Scriptures.[13]

Differences within a Common Ephemeris

In the orbit of Judaism, the high esteem of the positive unifying effect of a common ephemeris and, in contrast, the disapprobation of the divisive impact of calendar contumacy, come to light in episodes and texts relating to events in various stages in Jewish history.

---

[12] Hans Maier, *Die christliche Zeitrechnung* (Freiburg: Herder, 1991), provides a concise and illuminating survey of calendar controversy in Christendom throughout history.

[13] A comparable situation obtains in the political arena. The nineteenth century French revolutionaries made the foundation of their "new regime" the launching pad of an equally new ephemeris commencing on 18 Brumaire 1798. In the twentieth century a similar attempt was made after the Russian revolution. In our own days, the introduction of a new calendar as a symbol of "otherness" is not feasible anymore. As a result, the quest for visible expressions of socio-political separateness generated surrogate measures involving "time." Here are two recent illustrations. Before the reunification with West Germany, the East German government consistently maintained a one hour difference between their and the West-German daylight savings time. Similarly during the "Intifada" uprising, the Palestinian-Arab leadership signaled independence from the Jewish state by introducing daylight savings time in East Jerusalem at a date that differed from its introduction in the western part of the city, and by imposing upon the Arab population a midday closing of shops at hours that did not coincide with the "siesta" hours in the Jewish sector.

a. A married woman's adherence to her holy seasons

A special clause in medieval marriage contracts between Rabbanite men and Karaite women from the Cairo Genizah highlights the importance attaching to the wife's right to adhere to her schedule of holy seasons, while also observing her husband's. In addition to the routine, foremost economic stipulations detailed in such an agreement (Cambridge, Taylor-Schechter Collection T-S 24.1), the Rabbanite bridegroom David Hanasi son of Daniel Hanasi, evidently a man of distinction, "also takes upon himself not to force his wife Nasia to sit with him by the (light of the) Sabbath candle,[14] to eat the fat covering the rump,[15] or desecrate her festivals (which she is wont to keep in accordance with the Karaite calendar), under the condition that she observes with him the (viz., his) festivals." The wife's right to keep the holy seasons according to the Karaite calendar and her duty to observe them also on the dates fixed in the rabbanite cultic year guarantees that peace will reign in their home.

b. Priority of common time of observance

The timing of the "holy seasons" by schismatics in conformity with the dates of their observance in the Jewish year was considered to outweigh the divisive impact of dissent, even in respect to basic tenets of faith.

In his description of the seventh-century Karaite sect led by Abū ʿIsā al-Isfahani, the tenth-century historian al-Qirqîsānî relates the following dialogue: "I asked (the Rabbanite) Jacob ibn Ephraim al-Shami 'Why do you encourage association with the followers of ʿIsā and intermarry with them, although they attribute prophecy to men who are not prophets?' He answered me: 'Because they do not differ from us in the keeping of the festivals.'" Qirqîsānî then mocks the Rabbanites who attach greater importance to the observance of the festivals on the basis of a shared calendar than to profound disagreements on issues of fundamental religious significance.[16]

In contrast, a full-fledged *bona fide* Israelite who does not join in the observance of the hallowed seasons at the ordained times and adheres to a different ephemeris is bound to forfeit his membership in the community. The deviation from accepted norms is viewed as civic rebellion bound to lead to a parting-of-the-ways, and ultimately to the establishment of a socioreligious *corpus separatum.*

---

[14] In strict adherence to the biblical commandment, "you shall not light a fire in all your homes on the Sabbath day" (Exod 35:3), Karaite law prohibits the use of candles on Friday night even if they were lit before the onset of the Sabbath, whereas rabbinic halakah allows it.

[15] Forbidden by ritual law and permitted by rabbinic halakah.

[16] See Leon Nemoy's translation of Abu Yusuf Yaʿqub ibn Ishaq Qirqîsānî, *Kitab al-Anwar wal-Maraqib*: Code of Karaite Law. I, 52. *HUCA* 7 (1930): 382. I am indebted to Prof. Z. Ankori for bringing this text to my attention.

The following episodes, which occurred in diverse historical periods, illustrate the adverse impact on the Israelite society of the rejection of the previously shared calendar by a constituent member-group:

The earliest example of the divisive effect of calendar divergence in the history of biblical Israel is the cult and calendar reform initiated by Jeroboam I ben Nebat, the rebellious founder of the northern kingdom (1 Kgs 12:25–33). The author of the Book of Kings reports that Jeroboam "instituted the (pilgrimage) Feast (of Booths) in the *eighth* month, on the fifteenth day of the month, like the feast in Judah (which was observed there on the fifteenth of the *seventh* month)…and sacrificed upon the altar which he had made at Bethel on the fifteenth day of the *eighth* month, in a month of his own choosing" (12:32–33), viz., on a date that he is said to have fixed willfully. The different timing of the pilgrim-festival reveals Jeroboam's intention to bolster his other actions pertaining to the cult so as to dissolve the political union of Judah and the northern tribes, which David and Solomon had achieved: the reestablishment of the ancient holy places at Bethel and Dan as rival shrines of the Temple of Jerusalem (12:27–30);[17] the installation of the calf-cult at these sites (12:28–32); and the investiture of priests of his own choice from the "elite of the people," *miqṣôt haʿam* (12:31–32; 13:33; contrast 2 Chr 13:8–9). Jeroboam's calendar reform effected not only a different timing of the Feast of Tabernacles at that specific occasion, but rather brought about the deferment by one month of all cultic festivals in the northern kingdom from that time on (ca. 900 B.C.E.) until after the days of King Hezekiah of Judah (727–698; 2 Chr 30:1–27). A realignment of the Ephraimite calendar with the Judean one only came into effect when King Josiah (639–609; see 2 Chronicles 34–35) forcefully imposed the Judean schedule of holy seasons on the Israelites who had remained in the northern territories after the destruction of Samaria (34:6–7, 33; 35:17–19).[18]

---

[17] The tale of Jacob's night-vision at a "certain place," which he named Bethel (Gen 28:10–22; 35:1–8), like the report of the Danites' migration in the period of Israel's conquest of Canaan and the tribe's settlement in the northern part of the land (Judges 17–18) where they set up an "idol" at Dan and installed a priesthood of the "sons of Moses" (18:30–31), in which Bethel is referred to by the designation *har Ephraim* (17:1–13; 18:2, 13), reflect elements of the *hieros logos* of the twin-sanctuaries Dan and Bethel.

[18] See Shemaryahu Talmon, "Divergences in Calendar-Reckoning in Ephraim and Judah," *VT* 8 (1958): 48–74; reprinted in a collection of Talmon's work as: "The Cult

c. Importance of a recognized authority

The secessionist adherence to an unconformable calendar constitutes an especially acute danger for a community deprived of political sovereignty, as the Jewish people was at the height of the Second Temple period and after the Roman conquest of Judah in 70 C.E. Due to the lack of coercive instruments for safeguarding national unity, and of effective punitive measures for dealing with recalcitrants, internal cohesion hinged on the voluntary submission of all members of the community to the decisions of the religious authorities. The prerogative of the Sanhedrin, the High Court, to determine the dates of the annual sacred seasons, which in fact meant regulating all facets of communal life, was justifiably considered an indispensable instrument of self-government, and the acceptance of the common calendar was seen as a *sine qua non* requirement of membership in the community.

On these issues revolves the discord in the early second century C.E. between two Tannaim of the second generation, Rabban Gamaliel, the president of the Sanhedrin and the renowned Rabbi Joshua (*m. Roš. Haš.* 2:8–9). Although astronomical computation of the moon's orbit was already known in their days (see ibid. and cf. *b. Roš. Haš.* 25a),[19] the annual rotation of the holy seasons was officially determined on the basis of the actual sighting of the new moon. Rabban Gamaliel had proclaimed the beginning of the month, evidently the first month of the year (*tišrē*), and *eo ipso* the commencement of the annual cycle of the festivals, on the evidence of two men who affirmed that they had espied the new moon. Using a pungent simile, R. Dosa ben Horkinas, another prominent sage, declared these men false witnesses since his observations proved that the moon was still full: "How can one say (today) of a woman that she has given birth, and on the next day she is still visibly pregnant." R. Joshua also invalidated these men's claim and presumably demanded that the proclamation of the new moon, and the onset of the new cultic year, be deferred. However, Rabban Gamaliel stood by his decision, evidently apprehensive of the danger lest his colleagues' dissenting opinion could

---

and Calendar Reform of Jeroboam I," in *King Cult and Calendar in Ancient Israel* (Jerusalem: Magnes, 1986), 113–39.

[19] The discovery of an astronomical measuring instrument at Qumran proves that computations pertaining to the revolution of the sun were equally known. See Matthias Albani and Uwe Glessmer, "Un instrument de mesures astronomiques à Qumrân," *RB* 104 (1997): 88–115 (ET: "An Astronomical Measuring Instrument from Qumran," in *The Provo International Conference on the Dead Sea Scrolls, Technological Innovations, New Texts and Reformulated Issues* (ed. D. W. Parry and E. Ulrich; Leiden: Brill, 1999), 407–42.

cause a rift in the community with some observing the holy seasons according to his adjudication, and others abiding by R. Joshua's calculations. He therefore ordered R. Joshua to present himself at the seat of the High Court in Jabneh (=Jamnia) on the day on which according to the latter's computation the Day of Atonement would fall, ostentatiously carrying his staff and his purse so as to publicly desecrate *his Yom Hakkippurim*, the holiest day in the cultic year. R. Joshua bowed to Rabban Gamaliel's authority and acted as ordered. Thus the unity of the community was preserved.[20]

The episode vividly illustrates the appreciation of the calendar as a signal manifestation of the power invested in the High Court and its president. The decisions of this body concerning the progress of the cultic and civic year were understood as expressions of this institution's commonly acknowledged power to determine the private and public conduct of life, irrespective of whether its ruling agreed or disagreed with cosmic data. Even if it should transpire after the fact that the members of the court had been mistaken in their judgment, their decision was still upheld:

> If they hallowed the moon, and subsequently the witnesses were found to have been in conspiracy (viz., to have intentionally misled them), it is still hallowed…or if they erred, it is still hallowed. (ibid.; cf. *t. Roš. Haš.* 2:1)[21]

Differences between Two Calendars

The above reports of calendrical contumacy relate to differences of timing in the framework of the lunar ephemeris, which regulated the progress of religious and civic life of the dissenting parties involved. However, in the course of history calendrical controversy assumed an added dimension in the confrontation of adherents to a solar ephemeris on the one hand and followers of the lunar calendar on the other. The substantial difference between the two time systems prevents a common observance of the "holy seasons." Therefore, one who does not observe the festivals in accord with the schedule to which adheres the community in the midst of which he lives per force becomes an outsider with the status of a mere *metoikos*.

---

[20] In contrast, the "Teacher of Righteousness" and his followers insisted on observing the Day of Atonement in accord with their solar calendar. Their defiance caused the "Wicked Priest" to take preventive measures against them (see below). Cf. Shemaryahu Talmon, "Yom Hakkippurim in the Habakkuk Scroll," Biblica 32 (1951): 549–63; repr. in idem, *The World of Qumran From Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 186–99.

[21] See Moshe D. Herr, "The Calendar," in *The Jewish People in the First Century: Historical Geography, Political History, Social, Cultural and Religious Life and Institutions* (ed. S. Safrai, M. Stern, D. Flusser, and W. C. van Unnick; vol. 1 of *Compendia Rerum Iudaicarum ad Novum Testamentum*; Assen: van Gorcum; Philadelphia: Fortress, 1974), 835–64, esp. 848.

a. Tannaim

In an anecdote variously ascribed to Tannaim of the first, second or third generation, the observance of a solar calendar is held up as a criterion that separated Jews from non-Jews:

> Once a pagan asked R. Johanan ben Zakkai (end of first century C.E.): "we have *kalenda*, *saturnalia* and *kartosis*; and you have *Pesah* (Passover), ʿ*Aseret* (a rabbinic designation of *Šābuʿōt*–Feast of Weeks or Pentecost) and *Sukkot* (Feast of Booths). When you rejoice we do not rejoice; and when we rejoice you do not rejoice. And when do we both together rejoice?" Said R. Johanan ben Zakkai to him (mockingly): "On a day on which rains fall."

b. Second Temple

"The Book of Heavenly Luminaries" (*1 Enoch* chs. 72–82) and the Book of *Jubilees* (especially chapters 6 and 2) prove that in the Second Temple period the adherence to a solar rather than to a lunar cultic calendar also was a bone of contention between rival sectors in the Jewish community. The apocryphal works extol the immutability of the sun, which does not decrease or increase, in contrast to the instability of the moon, which is subject to a monthly process of waxing and waning (*1 En.* chs. 73–74). The author of *Jubilees* cannot deny the moon its part in the divinely established alternation of light and darkness, of day and night (Gen 1:14–19). However, whereas in the biblical tradition both "great luminaries" were created to "serve as signs for festivals and for seasons and years" (Gen 1:14), in *Jubilees* only the sun is assigned a role in the revolution of the divinely established seasons:

> And on the fourth day he (God) made the sun and the moon and the stars. And he set them in the firmament of heaven so that they might give light upon the whole earth…And God set the sun as a great sign upon the earth for days, Sabbaths, months, feast (days), years, sabbaths of years, jubilees and for all the (appointed) epochs of years.

As against this, in his praise of God's mighty deeds at Creation the author of Ps 8:3 mentions the moon and the stars, but omits any reference to the sun:

> When I look up at your heavens, the work of thy fingers, the moon and the stars set in their place by thee, what is man that you shouldst remember him.

Again, in Ps 104:19 the moon is explicitly lauded as the divinely appointed source of the seasonal cycle: "You have made the moon to mark the seasons."

The laudation is picked up in Ben-Sira's description of the role accorded to the moon at Creation (43:6–8), which is couched in terms that bring to mind the Covenanters' vocabulary pertaining to the sun and the solar calendar:

> The moon prescribes the periods, ʿitôt, (his is) the rule over appointed time (*qēs*), and an everlasting sign (ʾôt ʿolam). His is (every) festival (*môʿēd*), and from him (every) feast.

The authors of *1 Enoch* and *Jubilees* never tire of propagating a solar calendar of 364 days per annum[22] as the exclusively legitimate time schema:

> The computation of the days in which the sun goes its course in the sky. It comes in through a door and rises for thirty days (in each month)…together with the four which are added to determine the intervals (in the year) between the four seasons (viz., the four quarters of the year)…The year is completed in three hundred and sixty-four days (*1 En.* 82:4–6; cf. 72:32; 74:10, 12, 17; 75:2 et al.).
>
> And all of the days which will be commanded will be fifty-two weeks of days, and all of them are a complete year.…Command the children of Israel so that they shall guard the years in this number, three hundred and sixty-four days, and it will be a complete year (*Jub.* 6:30–32 et al.).

Concomitantly they disenfranchise the lunar calendar, which caused Israel to stray from the correct course of times, as God had warned Noah:

> All the Israelites will forget and will not find the way of the years. They will forget the first of the month, the season(s) and the Sabbath(s); they will err in respect to the entire prescribed pattern of the year…There will be people who carefully observe the moon…it is corrupt (with respect) to the seasons…Everyone will join together both holy days with the profane and

---

[22] It has been suggested that this ephemeris had its origin in a Mesopotamian ideal lunar year of 364 days. See the recent discussion of the matter by Wayne Horowitz, "The 360 and 364 Day Year in Ancient Mesopotamia," *JANES* 24 (1997): 35–44.

> a profane day with the holy day…and will not make a year (exactly) three hundred and sixty-four days. (*Jub.* 6:36–38)[23]

The juxtaposition of a passage from *Jubilees* and excerpts from a Qumran fragment of Pseudo-Moses (4Q390 frag. 1, lines 8–10)[24] shows the latter to echo the concerns of the former:[25]

4Q390 frag. 1 lines 8–10	*Jub.* 1:12–14
they will forget ordinance and	
appointed times, sabbaths of	
the covenant.	
And they will violate everything	They will abrogate everything
and they will do	and will begin to do
what I consider evil.	what I consider evil…
Consequently, I will hide my face	Then I will hide my face
from them. I will hand them over	from them. I will deliver them
to the hand(s) of their enemies,	into the hands of the nations
and deliver [them] to the sword	for captivity, for booty
	and for being devoured…
	They will forget all my law,
	all my commandments and all my
	verdicts. They will err
	regarding the beginning of the
	month, the sabbath, the
	festival, the jubilee and the
	decree.

Since *1 Enoch* and *Jubilees* could not be unequivocally related to a definable socioreligious entity, scholars tended to view their authors' statements concerning calendar and calendar controversy as pertaining to a theoretical-scientific dispute. It was only after the discovery at Qumran of remains of a considerable number of calendrical compositions and calendar-related statements that the momentous religious and civic importance of the solar-versus-lunar calendar controversy at the height of the Second

---

Begegnungen mit dem Neuen Testament und seiner Umwelt, Festschrift für H.-W. Kuhn zum 65. Geburtstag* (ed. M. Becker and W. Fenske; AGJU 44; Leiden: Brill, 1999), 29–40.

[24] Devorah Dimant, "New Light from Qumran on the Jewish Pseudepigrapha: 4Q390," in *The Madrid Qumran Congress; Proceedings of the International Congress on the Dead Sea Scrolls, Madrid 18–21 March 1991* (ed. J.C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense;Leiden: Brill, 1992), 405–48.

[25] *Jubilees* exhibits a chiastic order of components relative to 4Q390.

Temple period came into full view. Approximately 20–25% of the documents found at Qumran presuppose the *1 Enoch/Jubilees* 364-day solar ephemeris: fragments of over twenty calendrical works (4Q320–330, 335–337; 6Q17),[26] the tail piece of a calendar preserved in one fragment of *Miqṣat Maʿaśe ha-Torah* (4QMMT [= 4Q394]);[27] a detailed exposition of a register of "holy seasons" in the *Temple Scroll* (11Q19–20); calendar-related references in major *yaḥad* works—*Rule of the Community* (1QS); *Damascus Document* (CD); *Pesher Habakkuk* (1QpHab); the *Psalms Scroll* from Cave 11 (11Q5); *Songs of the Sabbath Sacrifice* (also called *Angelic Liturgy*—4Q400-407; 11Q17; Mas1k),[28] *Phases of the Moon* (4Q317) and other writings, and furthermore fragments of eleven copies of *Enoch* in Aramaic, and twelve copies of *Jubilees* in Hebrew.

The author of the *Damascus Document* (16.1–4) declares the Book of *Jubilees* to be as authoritative in matters calendrical as the Law of Moses is in matters of legal and cultic import:

> Therefore, a man (who joins the community) shall take upon himself (by oath), to return to the Law of Moses for in it all is (exactly) defined
>
> And the exposition of their periods (in history) of Israel's blindness in all these matters, behold it is exactly defined in the Book of the Division of the Periods according to their jubilees (viz., periods of fifty years) and their weeks (viz., periods of seven years).

The combination of the "Book of the Division of the Periods" with the "Law of Moses" appears to echo the prologue of the Book of *Jubilees*:

> These are the words regarding the division of the times of the law and of the testimony, of the events of the years, of the weeks of their jubilees throughout all the years of eternity as he related (them) to Moses on Mount Sinai when he went up to receive the stone tables.

THE COVENANTERS' CALENDAR

The proliferation of calendrical works and calendar-related statements attests to the dependence of the *yaḥad's* messianic-millenarian expectations upon a foreordained sequence of "divine(ly established) periods" in history, (*qiṣê ʾel*, 1QpHab 7:12–13), "eternal periods," *qiṣĕ neṣaḥ* or *qiṣĕʿōlāmim* (1QH 1.24–25; 1QM 1.8–9), and so forth, which are expected to culminate in a future "cut off period" and the onset of the fervently awaited establishment of the new (age) *qēṣ neḥrāṣāh waʿaśôt ḥadāsa* (1QS 4.25). The Covenanters' adherence to the unconformable solar calendar of 364 days soon emerged as a major factor that precipitated their final separation from mainstream Judaism.

The controversy revolved on several basic issues:

a. The difference of ten days between the Jewish 354-day lunar year and the *yaḥad's* 364-day solar year caused the Covenanters to abstain from participation in the temple cult, because according to their timetable the sacrifices were offered there on profane days (cf. *Jub.* 6:32–38), and therefore were sacrilegious:

> All those who have been brought into the Covenant shall not enter the sanctuary to kindle his alter in vain (Mal 1:10)…(but rather are) to distinguish between the impure and the pure and make known (the difference) between the holy and the profane; and to observe the Sabbath in its exact detail, and the festivals and the day of fasting (viz., the Day of Atonement) according to the findings (or instruction) of those who entered into the (re)new(ed) covenant in the land of Damascus. (CD 6.11–19)

The abstention from the sacrificial service in the temple created a situation in the Covenanters' cultic life, comparable to the circumstances that shaped the cultic life of "normative" Judaism in the wake of the destruction of the temple. In both instances the discontinuance of the sacrificial cult was conducive to the emergence of institutionalized devotional prayer to fill the void,[29] although neither community despaired of the hope of a future restitution of the sacrificial cult (see below).

b. In the Jewish lunar calendar the day is reckoned from one appearance of the moon to the other, viz., from sundown to sundown. In contrast, in the Covenanters' time schema the day was reckoned from sunrise to sunrise, as is to be expected in a solar ephemeris.[30]

---

[29] Shemaryahu Talmon, "The Emergence of Institutionalized Prayer in Israel in the Light of Qumran Literature," in Qumrân: *Sa Piété, sa Théologie et son Milieu* (ed. M. Delcor; BETL 46; Paris: Duculot, 1978), 265–84; repr., in *The World of Qumran From Within* (Jerusalem: Magnes; Leiden: Brill, 1989), 200–43; Maurice Baillet, "Textes Liturgiques," in *Qumrân Grotte 4.III (4Q482–4Q520)* (ed. M. Baillet; DJD 7; Oxford: Clarendon, 1982); Bilhah Nitzan, *Qumran Prayer and Religious Poetry* (trans. J. Chipman; *STDJ* 12; Leiden: Brill, 1994).

c. The system of intercalation of the 354-day lunar with the true solar year of 365 days and eight hours is known, but the intercalation system of the 364-day Qumran calendar with the true solar year still escapes our knowledge.[31]

d. It also remains an open question whether the Covenanters developed a system of synchronization of their solar calendar with the Jewish lunar one.

The Structure of the Covenanters' Calendar

At this juncture it is appropriate to recapitulate in broad outline the salient features of the *yaḥad's* solar calendar and to highlight significant deviations from the lunar calendar of mainstream Judaism. As said, the Qumran time schema is basically identical with the 364-day ephemeris propagated by the authors of *1 Enoch* and *Jubilees*. Some minor discrepancies probably were caused by *lapsus calami* in the transmission of the original Hebrew or Aramaic text, or in the translation process of the apocryphal books, and/or by the translators' incomplete comprehension of the ancient time register. At this juncture it is of interest to quote R. H. Charles's depreciating comments concerning the authors of *1 Enoch*'s understandings of the issue, written long before the discovery of the Covenanters' calendrical literature:

---

[30] See Shemaryahu Talmon, "The Calendar of the Covenanters of the Judean Desert," in *The World of Qumran From Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 147–85; repr. of rev. ed. from "The Calendar Reckoning of the Sect from the Judaean Desert," in *Aspects of the Dead Sea Scrolls* (ed. C. Rabin and Y. Yadin; ScrHier 4; Jerusalem: Magnes, 1958; 2d ed. 1965), 162–99. My thesis encountered opposition from diverse quarters, *inter alia* from Joseph M. Baumgarten, "The Beginning of the Day in the Calendar of *Jubilees*," *JBL* 77 (1958): 355–60; repr., in *Studies in Qumran Law* (Leiden: Brill, 1977), 124–30; and Moshe D. Herr, "The Calendar," 861–4, but can be buttressed by pertinent biblical texts and *yaḥad* documents. See Shemaryahu Talmon, "The Reckoning of the Day in the Biblical and the Early Post-Biblical Period: From Morning or From Evening?" in *The Bible in the Light of its Interpreters. Sarah Kamin Memorial Volume* (ed. S. Japhet; Jerusalem: Magnes, 1994), 109–29 (Hebrew).

[31] Neither *1 Enoch*, nor *Jubilees*, nor the Qumran sources provide information as to whether the 364-day year was at all intercalated with the true solar year of 365 days, plus approximately six hours. If intercalation was practiced, it necessarily involved the periodical interpolation of a full week or full weeks, since only thus could the uniform progress of the annual festivals and the cycle of priestly watches in the temple be ensured (see below).

> The chronological system of this book is most perplexing. It does not in its present form present a consistent whole, and probably never did. We are not to regard it as anything more than an attempt of an individual to establish an essentially Hebrew calendar over against the heathen calendars in vogue around. In itself this calendar cannot be said to have any value.[32]

In distinction, the Covenanters' ephemeris is wholly consistent. Although not one Qumran document exhibits all facets of their calendar, it can be fully reconstructed by combining its distinctive features collated from diverse documents. The year comprises 364 days and subdivides into eight months of 30 days, and four months–the third, sixth, ninth, and twelfth–which have an added day (*yôm nôsāp̄*) of special importance, and thus number 31 days each. Months are consistently indicated by ordinal numbers, like in the ancient Israelite tradition (e.g., Gen 8:4, 13, 14; Exod 12:2; Leviticus 23 passim; Hag 1:1; Zech 1:1) and occasionally in the Books of Maccabees. Only seldom are found Babylonian month names,[33] which predominate in post-exilic books (e.g., Zech 1:7; Esth 3:7, 13; Neh 2:1) and in the rabbinic vocabulary, which the returners from the exile are said to have brought back with them (*y. Roš. Haš.* 1.56d). In several documents the number of days in each of the recorded months is also given. At times, these details are combined with a summary reference to the number of days in an annual quarter (see below). The twelve months of the year are arranged in four triads, designated *teqûpâ*,[34] each comprising 91 days, which make up exactly thirteen weeks.

The sequence of the four annual quarters parallels the progression of the major agricultural seasons: "the season of reaping to (that of) summer (fruits), the season of sowing to the season of (cutting) green fodder" (*môʿêd qaṣir leqayiṣ wmôʿêd zeraʾ lemôʿêd dešeʾ* 1QS 10. 7). The terms employed echo the appellatives of the same seasons in Amos 7:1–3; 8:1–2 and the Gezer Calendar (ca. 900 B.C.E.).[35] The beginnings of the quarters, possibly observed as festivals and marked by special prayers (cf. 1Q34 and 34bis; *Jub.* 6:23–25), coincide with the onset of the astronomical seasons–vernal equinox, summer solstice, autumnal equinox and winter solstice–which are paraphrastically referred to in *1 Enoch* (82:16–19):

---

[32] Robert H. Charles, "The Book of the Courses of the Heavenly Luminaries," in *The Book of Enoch or 1 Enoch* (Oxford: Clarendon, 1912), 149.

[33] The month names *tišrê*, *šebat*, and *ʾadār* turn up in a fragmentary astrological text: *Zodiology and Brontology ar* (4Q318 4.9; 7.4; 8.1). The term *šebat* is also mentioned in a fragment of a historical text: see Joseph A. Fitzmyer, "4QHistorical Text D, 4Q332, Frag. 2.2," in *Qumran Cave 4.XXVI: Cryptic Texts and Miscellanea, Part 1* (ed. S. J. Pfann and P. Alexander; DJD 36; Oxford: Clarendon Press, 2000), 283. The month name *marḥešwan* (מרחשון turns up once. See Eibert J. C. Tigchelaar, "4QHistorical Text H?" in *Wadi Daliyeh II: The Samaria Papyri from Wadi Daliyeh and Qumran Cave 4.XXVIII: Miscellanea, Part 2* [ed. D. M. Gropp et al.; DJD 28; Oxford: Clarendon, 2001], 127).

[34] This calendrical term is also known from rabbinic sources.

[35] See Shemaryahu Talmon, "The Gezer Calendar and the Seasonal Cycle of Ancient Canaan," *JAOS* 83 (1963): 177–87; repr. in *King Cult and Calendar in Ancient Israel* (Jerusalem: Magnes, 1986), 89–112.

> these are the signs of the days…glowing heat and dryness…all the trees bear fruit.…The wheat is ripe for harvest…and the trees produce their fruits ripe and ready…and all the fruits of the earth are gathered in.

Types of Calendrical Documents

Like in other documents, such as a *Biblical Chronology* (4Q559) and in scrolls of "priestly watches," e.g., 4Q320, 4Q321 and 4Q321^{a} (see below), figures often are not given in numerals but in symbols known from inscriptions and weights of the monarchic period, from Aramaic papyri of the fifth–forth century B.C.E. from Elephantine in Egypt, and other documents: A slanted stroke / signifies "one"; a hook (¬) developed from a horizontal stroke stands for "ten"; two superimposed hooks (∃) indicate "twenty." In totals of three, four or larger figures the closing stroke sometimes is turned in the opposite direction: \/, \//, \¬∃.

The basic calendrical schema shows in a "Fragment de Calendrier" (6Q17). The partially preserved first two lines of the fragment can be restored with much certainty to read:

1 [החדש הרישון בו ∃¬ יום החדש ה]שני בו ∃¬
2 [יום החדש השלישי בו ∃¬\ יום] ותם ימי [התקופה]

> [the first month, in it {are} 30 days; the] second [month], in it {are} 30 [days; the third month, in it {are} 31 days], and {thus} are completed[36] the days [of the {annual} quarter],

The enumeration of the number of days in the three-month quarter was possibly followed by the summary: יום \¬∃∃∃∃, viz., "ninety-one days."

In a similar register, partly preserved in a fragment of an extensive and complex scroll (4Q320 frag. 3 col. 2 lines 11–14; frag. 4 col. 1 lines 11–14), all twelve months of the year were presumably enumerated in the same fashion, with numbers again expressed by symbols, together with the name of the priestly watch, which headed each month:

---

[36] The sing. *wtm* is probably a *lapsus calami* for *wtmw* and not the remnant of the name Jotham (*Ywtm*) of an otherwise unknown priestly course, nor an emphatic *hm*, as tentatively suggested by Maurice Baillet, "Fragment de Calendrier," in *Les "Petites Grottes" de Qumrân* (ed. M. Baillet, J. T. Milik, and R. de Vaux; DJD 3; Oxford: Clarendon, 1962), 132–33.

...[הרישון ∃⊐ גמול]
השני ∃⊐ [ידעיה]
השלשי ∃⊐[/הקוץ]
הרבעי ∃⊐ [אלישיב]
[...]
[התשיעי ∃⊐ /]יירי[ב]
[העשירי ∃⊐] מלכיה
[העשתי עשר ∃⊐ י]שוע
[השנים עשר ∃⊐ /]ישבאב

[the first {month has} 30 {days and is headed by} *Gamul*]
the second {month has} 30 {days} [{and is headed by} *Jedaᶜiah*]
the third {month has} 3[1 {days and is headed by} *Haqqos*]
the fourth {month has} 30 {days} [{and is headed by} *Eliashib*].
[...]
[the ninth {month has} 31 {days and is headed by}] *Joiari[b]*
[the tenth {month has} 30 (days and is headed by}] *Malkiah*
[the eleventh {month has} 30 {days and is headed by} *Je]shuᶜa*
[the twelfth (month has) 31 (days and is headed by)] *Jeshebab*[37]

The first and equally the fifteenth day of the first month of each quarter–viz., the first, fourth, seventh, and tenth months–falls invariably on the fourth day of the week. The Covenanters certainly attached exceeding significance to this fact, since on the fourth day God created the "great luminaries" (Gen 1:14–19)–the sun and the moon–which rule the solar and the lunar year respectively. The system ensures that year in year out all Sabbaths fall on the same monthly dates, and each festival on the same day of the week. The Feast of Weeks (*šābūᶜōt*) is uniformly observed on Sunday, the fifteenth of the third month, 50 days after the "Waving of the (first) Sheaf" (*hanēp/hanāpat hāᶜōmer*) or "Feast of the (first) Grain" (*môᶜēd seᶜôrim*). Four other major cultic feasts equally fall always on the fourth day of the week: "the beginning(s) of the year," *rāʾšê šānîm* (1QS 10.6) on the first of the first month, and Passover on the fifteenth; "the day of (*shofar*) blowing for remembrance" *šabbātôn zikrôn terûᶜâ* (11QT [= 11Q19] 25.2–3 et al.; cf. Lev 23:24)[38] on the first of the seventh month, and the Feast of Booths on the fifteenth. Only in this system, the Day of Atonement falls invariably on Friday the tenth of the seventh month, immediately preceding a Saturday. The Covenanters probably hailed this propinquity as the most accurate realization of the designation of the Day of Atonement in the priestly code as *šabbāt šabbātôn* (Lev 16:31; 23:32), taking it to mean "a double Sabbath" or "one Sabbath after the other."

---

[37] See Shemaryahu Talmon, *Calendrical Texts*, 51–52.

[38] In the lunar calendar the first day of the seventh month marks the beginning of the New Year. This day is designated in rabbinic terminology *Roš ha-šānâ*, but is not so named in Qumran texts or in *1 Enoch* and *Jubilees*.

It is of significance that in the tradition of "normative" Judaism the Day of Atonement never falls on a Friday. Since on this holiest day in the cultic year all work is forbidden no preparations could be made then

Days of the Week

		S	M	T	W	T	F	S
					1	2	3	4

		29	30	31				

for the ensuing Sabbath on which work is also not permitted. Similarly, in the Covenanter's solar calendar the Day of Remembrance (New Year's Day) and the first day of the Mazzoth Festival are always observed on the fourth day of the week, whereas in the rabbinic lunar year they will never fall on one of three workdays, among them, *nota bene*, the fourth day of the week, the Mazzoth Festival never on the second, fourth, or sixth day of the week and New Year's Day never on the first, fourth, and sixth.

In the mainstream tradition the night of the *Seder* celebration, which commemorates the historical Passah (Pesach) lamb ritual in the Jerusalem Temple, is observed on the eve of the fourteenth day in the first month as the opening ceremony of the Mazzoth Feast. In distinction, according to the *yaḥad* time schema the Passah lamb is to be sacrificed in the afternoon of the fourteenth as a separate ritual, with the Mazzoth Feast beginning in the morning of the fifteenth, as explicated in the *Temple Scroll* (11QT [= 11Q19] 17.6–11):

> On the f]ourteenth of the first month [at twilight] (they shall celebrate) the Passah of YHWH and shall sacrifice, prior to the evening offering they shall sacrifice [it, all males] twenty years old and over shall celebrate it and shall consume it at night in the courtyards of the sanctuary. (Then) they shall get up early and go each one to his tent.

After a blank at the beginning of the next line, which indicates the opening of a new paragraph pertaining to the Mazzoth Feast, the text reads:

> And on the fifteenth of this month there will be a ho[ly] assembly (and) you shall not do any work on it. It is the Feast of Mazzoth (over) seven days for YHWH.[39]

The conclusions drawn from this passage in the *Temple Scroll* gain support from the restored text of a fragment of another calendrical document (4Q326) which reads:

> In the first (month) on the four[th (day) in it Sabbath,…………………]
> on the eleventh in it Sabba[th, on the fourteenth in the Passah on the third day (of the week), on the fifteenth in it],
> the Mazzoth Feast on the four[th] day (of the week), [on the eighteenth in it Sabbath, on the twenty-fifth in it],
> Sabbath, on the twenty-sixth in it the Feast of (the first) g[rain[40]

---

[39] Translation by Wilfred G. E. Watson in F. García Martínes, *The Dead Sea Scrolls Translated* (Leiden: Brill; Grand Rapids: Eerdmans, 1996), 157, with adjustments to the Hebrew text published by Elisha Qimron, *The Temple Scroll. A Critical Edition with Extensive Reconstructions* (Beer Sheva: Ben-Gurion University Press; Jerusalem: IES, 1996), 27.

[40] In other sources (e.g., 4Q321 4 frag. 4.9) this feast is named "Waving of the Omer."

באחד ברביע]י בו שבת [
בא¬\ בו שב]ת ב¬//V בו הפסח יום שלישי ב¬///V בו[
חג המצות יום רביע]י ב¬////V\\ בו שבת בƎ//// בו[
[41]שבת בƎ////V בו מועד ש]עורים אחר השבת

The restoration in 1.2 of V//¬ "on the fourteenth in it (viz., the first month) the Passah on the third day (of the week)," is suggested by the ensuing extant text in 1. 3 חג המצות יום רביעי, the Mazzoth Feast on the four[th] day (of the week)," viz., on the fifteenth of the first month, and by the required restoration of the latter half of the line.

In Qumran calendrical documents only the first day of the week-long Mazzoth Feast, like the first day of the week-long Feast of Booths, is recorded. There is no mention of the last day, which biblical law designates *miqrāʾ qôdeš*, "sacred assembly" (Exod 12:16; Lev 23:8, 36; Num 28:25) or ʿaṣeret (Lev 23:36; Num 29:35; Deut 16:8; Neh 8:18; 2 Chr 7:9). Further, in the Covenanters' time schema the last three "holy seasons" of the year fall in the seventh month: the Day of Remembrance on the first, the Day of Atonement on the tenth, and the Feast of Booths on the fifteenth. The post-biblical festival of Ḥanukkah and the biblical festival of Purim, which mainstream Judaism observes in the ninth month (Kislev) and the twelfth (Adar) respectively, are not listed.[42]

The *yāḥad* schema of "holy seasons," which resembles a type of festival-roster termed סדר מועדות in the rabbinic tradition (*y.* ʿErub. 21c), can be illustrated by a calendrical document, which originally appears to have contained thirteen extremely narrow columns with lines containing between three and ten letters and interword spaces (4Q394 frags. 1–2 cols. 1–5).[43] Although only fragments of five columns are preserved, the missing parts can be conjecturally reconstructed on the basis of information gleaned from other pertinent texts. In this item the dates of every single Sabbath and all biblical feasts throughout the year are detailed, together with the dates of the Covenanters' particular harvest festivals of the (New) Wine and the (New) Oil, which occur at intervals of fifty days, and the feast of the "Wood Offering" (cf. 4Q394 frags. 1–2 col. 5

---

[41] Restored on the basis of 4Q325 1.3: [מוע]ד שעורים בעשרים וששה בו אחר השבת; cf. 4Q394 1–2 and 3–7: בעשרים ושנים בו מועד השמן אח[ר הש]בת.

[42] Not one fragment of the book of Esther, the biblical source of Purim, is extant among the Qumran finds. But the book was probably known to *yaḥad* authors. See Shemaryahu Talmon, "Was the Book of Esther Known at Qumran?" *DSD* 2 (1995): 249–67; Jonathan Ben-Dov, "A Presumed Citation of Esther 3:7 in 4QD^{b}," in *DSD* 6 (1999): 282–84.

[43] See Shemaryahu Talmon, "4Q 394 1–2 (Re-edition)," in *Qumran Cave 4.XVI. Calendrical Texts* (ed. S. Talmon, J. Ben-Dov, and U. Glessmer; DJD 21; Oxford: Clarendon, 2001), 157–66.

line 9; partly restored in 4Q325 frag. 2.7). These particular "holy seasons" lack an explicit biblical base. However, they are seemingly anchored in pertinent scriptural texts in which the "wood offering" and the offerings of "new wine and (new) oil" are mentioned next to "first-fruits of corn" and "trees," etc. (Num 18:12; Deut 18:4; Neh 10:35–40). It is plausible that also the summaries of the number of days in each annual quarter (of which only one is partly preserved in col. 2 lines 6–11) were originally recorded in 4Q394 frags. 1–2, and presumably also the annual total of 364 days (4Q394 frags. 3–7 lines 1–3), as suggested by the following passage:

> On the twenty-third in it (the second month) Sabbath. The thirty[e]th [in it] Sabbath. On the seventh of the third (month) Sabbath. On the fourteenth in it Sabbath. The fifteenth of it is the feast of Weeks. The [twenty-fir]st [in] it Sabbath. On the twenty-eight [in it] Sabbath. After the Sabbath [the first and] the second day (of the week) a day is added, (יום נוסף), and the quarter is completed in ninety-one days.…[On the twenty-fir]st in it (the sixth month) Sabbath. On the twenty-second in it the festival of the (New) oil…

As said, the smooth rotation of fifty-two weeks annually and the permanent congruence of every day of the week with fixed dates in the annual cycle, ensure that all feasts are riveted forever to the same day of the week, and that year in year out all Sabbaths will unvaryingly fall on the same monthly dates. This diurnal order can be achieved only in a time register of 364 days per annum, in which the year and its constituent quarters subdivide neatly into units of seven days. In this respect the Qumran/*Jubilees*/*Enoch* solar calendar compares to advantage with the Jewish lunar calendar of 354 days which requires special computations of the weekdays on which the festivals will fall in a given year.

The Cycles of Priestly Watches

It should be noted that the *yaḥad's* calendrical works are not in the form of an almanac in which all days of the year are enumerated. Only "holy seasons," that is to say Sabbaths and festivals, are registered. Secular workdays are altogether omitted, with the exception of the twenty-ninth and the thirtieth day of every third month which intervene between the last Sabbath on the twenty-eighth of the month and the "added day" יום נוסף, at the end of every quarter.

This particularity highlights the decidedly cultic character of these sources, and prompts the conclusion that, for the *yaḥad*, calendrical computations were foremost the concern of the religious authorities, and calendar controversy the battle ground of priestly families.

To the priests' prerogatives also relate tables in which the service cycle of the "Priestley Watches" or "Courses" (*mišmārôt*) are detailed. These registers evince the Covenanters' conviction that their abstention from participation in the Temple cult was of only a temporary nature. They fervently awaited the rebuilding of a new temple in which their own priesthood would conduct the holy service in accord with their solar calendar and their ritual rulings, as foreseen in the *Temple Scroll* and in a work entitled "New Jerusalem" (2Q24;[44] 4Q554; 4Q555;[45] 11Q18[46]). The various tables in which the service cycle of the *mišmārôt* in the Temple is detailed relate to this cultic domain. The schema is based on a list of twenty-four priestly watches with whose appointment the author of Chronicles credits King David (1 Chr 24:7–31). In *yaḥad* documents the genesis of this arrangement is traced to the very creation of the universe. This ascription is echoed in the composite calendrical scroll 4Q320.[47] A fragmentary account of the Creation tradition culminates in a reference to the fashioning of the great luminaries on the fourth day (cf. *Jub.* 2:8–9). Of this exposé only the closing remark is preserved, which, according to the prevailing interpretation, speaks of the moon's "appearing from the east…in the midst of heaven…from evening until morning" (4Q320 frag. 1 cols. 1–3). The cosmic event ensuingly is linked with concordant dates in the lunar and the solar calendar, and the corresponding days in a 3-year service cycle of the priestly watches (frag. 1 col. 1 lines 3–5):

> On the fourth (day) in the week (of service) of the sons [of (*mišmār*) *Ga*]*mul*, in the first month in [the fir]st (solar) year (*vacat*) (cf. frag. 3 col. 1 line 12: [the sons] of *Gamul* at the head of all years).

Mišmārôt lists fall in several subcategories which answer to the particular requirements of the priestly hierarchy:

[44] Jozef T. Milik, "Description de la Jérusalem Nouvelle," in *"Les Petites Grottes" de Qumrân* (ed. M. Baillet, J. T. Milik, and R. de Vaux; DJD 3; Oxford: Clarendon, 1962), 184–89.

[45] To be definitively published by É. Puech in *Qumran Grotte 4.XXVII: Textes Arameens, deuxième Partie: 4Q550-575, 580–582* (DJD 37; Oxford: Clarendon, forthcoming). For the present, see É. Puech, "Apropos de la Jérusalem Nouvelle d'apres les manuscripts de la Mer Morte," *Sem* 43–44 (1995): 87–102.

[46] Florentino Garcia Martinez, Eibert J. C. Tigchelaar and Adam van der Woude, *Qumran Cave 11* II 11Q2-18, 11Q20-31, *DJD XXIII* (Oxford: Clarendon, 1998), 305–355.

[47] Shemaryahu Talmon, "4QCalendrical Document/Mishmarot A," in *Qumran Cave 4.XVI: Calendrical Texts* (ed. S. Talmon; DJD 21; Oxford: Clarendon, 2001), 37–63.

a. Enumerations of the names of the watches that serve in rotation two weeks annually, one week in every half-year. Their names accord with the roster of twenty-four families of priests in 1 Chr 24:7–19. However, the number of twenty-four units does not tally with the twice twenty-six watches required to cover the fifty-two weeks of the 364-day solar year. The Covenanters solved the problem by establishing a six-year cycle with a staggered rotation system. The four weeks by which the solar year exceeds the lunar year are taken care of by four watches that serve three spells of duty–two at the beginning of every half-year and two at its end. The names of these watches are given here in italics:

> First half-year: *Gamul Delaiah Maoziah Joiarib Jedaiah Harim Seorim Malkiah Mijamin Haqqos Abiah Jeshua Shekaniah Eliashib Jaqim Huppah Jeshebab Bilgah Immer Hezir Happisses Petahaiah Jehezkel Jakin Gamul Delaiah*
>
> Second half-year: *Maoziah Joiarib Jedaiah Harim Seorim Malkiah Mijamin Haqqos Abiah Jeshua Shekaniah Eliashib Jaqim Huppah Jeshebab Bilgah Immer H9ezir Happissess Petahaiah Jehezkel Jakin Gamul Delaiah Maoziah Joiarib.*

This arrangement is reflected in a statement in the *War Scroll* (1QM 2.1–2):[48]

> The fathers of the community (are) *fifty-two*, and the heads of the priests they shall arrange behind the High Priest and his second (in rank) *twelve* to serve perpetually before God. And the *twenty-six heads of the courses* are to serve in divisions.

The seemingly contradictory reference to "twelve courses" next to "twenty-six heads of courses" actually tallies with the number of turns of duty of twenty watches that served twice annually and thus covered 40 weeks, and four that served three times and thus covered twelve weeks, which together add up to fifty-two weeks. The "heads" of the overall number of units actually serving in the Temple in rotation, therefore are correctly termed the "fifty-two fathers of the community."

In 1 Chr 24:7–19 the priestly watches are listed by name and ordinal number: "the first (is) *Joiarib, Joiada* the second etc.…*Maoziah* the twenty-fourth." In *yaḥad* rosters only the names of the watches are given. The ordinal numbers 1–24 adduced in the biblical list presumably were dropped in the Covenanters' documents because they did not agree with the total of twenty-six watches that came on duty twice annually in their 364-day solar year.

---

[48] Yigael Yadin, *The Scroll of the War of the Sons of Light Against the Sons of Darkness* (trans. B. Rabin and C. Rabin; Oxford: Oxford University Press, 1962).

b. In some documents the years, the four annual quarters, the months and the first day of a quarter are identified by the name of the first watch then on duty in the Temple. In 4Q328 and 4Q329 a schedule of the courses that served at the beginning of each year in a 6-year cycle is followed by a (restored) roster of courses that officiated at the incipience of each quarter.

> [In the first (year) *Gamul*, in the second *Jedaiah*, in the third *Mijamin*, in the fourth *Shekaniah*, in the fifth *Jesheb*]*ab*, in the sixth *Happisses*. These are the (watches at the) beginnings of the years.

There follows a list of the watches on duty at the beginnings of each annual quarter in the 6-year cycle.

> [In] the first [year] *Gamul Eliash*[*ib*] *Maozia*[*h Huppah*; in the] second *Jedaiah Bilgah Še*[*o*]*rim He*[*zir*; in the third *Mija*]*m*[*in*] *Petahiah Abi*[*ah Jakin*; in the fourth *Shekaniah De*]*laiah Jaqim Jeh*[*oiarib*; in the fifth *Jeshebab Harim Immer*] *Malkiah*; in the si[xth *Happisses Haqqos Immer Jeshua*. . . .]

4Q320 frag. 3 col. 2–frag. 4 col. 1 contains a fragmentary register which details the names of the watches that served at the commencement of each of the twelve months in a given year, together with the number of days in each month. 4Q325 lists the fifty-two Sabbaths in a year, named after the watch that enters the temple on Saturday afternoon, with its week of service reckoned from Sunday morning, together with the "Beginnings of the Months," the biblical feasts, the special feasts of the "(First) Wine," "(First) Oil" and the "Wood Offerings," next to the biblical "Festival of the '(First) grain." 4Q320 frag. 4 col. 3 preserves a roster of the annual biblical festivals and the names of the *mišmār* in whose week of service they fall.

However, the special Covenanters' feasts are not recorded. On the evidence culled from other documents the roster can be fully restored to read as follows:

> The first year (of the six year cycle) its festivals
> on the third (day) in the week of the sons of *Maʿoziah* (falls) the Passah (lamb)
> on the first (day) [in] *Jeda*[*ʿiah*] (falls) the Waving of the[ʿOmer]
> on the fifth (day) in *Šeʿorim* (falls) the [Second] Passah
> on the first (day) in *Jeshuʿa* (falls) the Festival of Weeks
> on the fourth (day) in *Maʿoziah* (falls) the Day of Remembrance
> [on the six]th (day) in *Joiarib* (falls) the Day of Atonement
> [on the tenth in the]seventh (month) *vacat*
> [on the fourth (day) in *Jed*]*aʿiah* (falls) the Feast of Booths.

There follows an equally itemized roster of each of the other five years in the cycle.

It should be noted that there is no mention whatsoever of the Mazzoth Feast which begins on the fourth service day of *Maoziah* (line 2), the waving of the ᶜOmer on the first service day of *mišmār Jedaᶜiah* on Sunday the twenty-sixth of the month (line 3). Furthermore, if the proposed restoration is correct only the Day of Atonement is identified by a calendrical date, the tenth of the seventh month (line 8), in addition to the day on which it falls in the service week of *Joiarib*.

c. 4Q239^{a} preserves remains of a schedule which may have originally contained a list of all festivals in every year of a six-year cycle, but in actual fact only the names of the rotating watches in whose week of service the Passah falls are preserved:

> [The first year, its festivals, on the third (day)in] the week of [*Maᶜoziah* the Passah; the seco]nd (year), its fe[stivals, on the third (day) in *Śeᶜorim* the Passah; the th]ird (year), its festivals, on the third (day) [in the week of *Abiah* the Pass]ah; the fourth (year), its festivals, on the third (day) of [*Jakim* the Pass]ah; the fifth (year), its festivals, [on the third (day) of [*Immer* the Passah; the sixth (year), its festivals]

d. Equation tables of one or two phases of the moon’s monthly revolution in a six-year cycle, identified by days in the week of service of the pertinent watch of priests, and concordant dates in the solar year (4Q320 frag. 1 cols. 1–2). In 4Q321^{a} the first phase is defined only by date, and therefore was designated {x}, the second is defined by date and the otherwise unknown technical term *dôqâ* or *dûqo/ah.* Most scholars derive the term from *duq/dyq*, signifying “exactitude” (Baumgarten,[49] Milik,[50] VanderKam,[51] Wise[52] et al.) whereas I suggested to connect it with *dqq* “to be thin.”[53] 4Q321 1.1–2 illustrates this schema:

Hurwitz; Winona Lake, IN: Eisenbrauns, 1995), 267–301; Shemaryahu Talmon, “Calendrical Documents and Mishmarot,” 13–14, 35–36.

> {x} is on the second (day) in (the week of) *Abiah* (which falls) on the twenty-fifth (of the eighth lunar month); and *duqah* is on the third day in *Mijamin* (which falls) on the twelfth in it (the eighth solar month).

According to the prevailing opinion this roster evinces an intention to fully synchronize the solar with the lunar year, singling out the propitious nights of the new and the full moon. In contrast, I maintain that the alignment of only two specific days in every lunar month with concordant dates in the solar calendar is intended to specify the ominous days (actually nights) of the moon's waning and total eclipse. These phases are identified by dates in the solar calendar to enable the Covenanters to beware of them. This interpretation of the text is supported by *1 Enoch* 72:37. The author holds up the moon's inconstancy, which can be most clearly observed twice every month, as a sign of its inferiority to the sun, which never changes: the sun "does neither diminish (in respect to its brightness)," as the moon does in the night of *duqa/oh* when it begins to wane, "nor take rest," like the moon at its total eclipse in the night of x, "but continues to run day and night."[54]

The advocates of the solar calendar decried the observance of the lunar ephemeris as adherence to "the feasts of the gentiles, after their errors and their ignorance" (*Jub.* 6:35). Rabbinic tradition turned the accusation around: "Israel reckons by the moon and the Gentiles reckon by the sun,"[55] and stressed the exclusive legitimacy of the lunar calendar by quoting Ps 28:5:

> "Because they do not pay heed to the deeds of YHWH nor the work of his hands, he shall destroy them," the "deeds of his hands," these are the new moons, as is written "he made (appointed) the moon for (determining the) seasons" (Ps 104:19)..."he shall destroy them," these are the heretics who do not observe either appointed days or periods...he will destroy them in this world and will not build them up in the world to come.[56]

The Origin of the Qumran Calendar

The 364-day solar calendar was neither an invention nor was it an innovation of the Covenanters.[57] Rather, as said, there is reason for assuming that roots of this ephemeris reach down into the biblical age and that also in the Second Temple period it had a wide currency among the Jewish population in "the Land" before the introduction of the lunar calendar by the returners from the Babylonian exile.

A stemmatic arrangement of relevant sources evinces the interdependence of the Covenanters' calendrical system with the ephemeris propagated in the Book of *Jubilees*, and the latter's dependency on *1 Enoch*, and reveals the deep roots of the 364-day calendar in the Jewish tradition:[58]

The above cited reference to the Book of *Jubilees* in the *Damascus Document* (CD 16.1–4) strongly suggests that when this work was authored, most probably not later than the middle of the second century B.C.E., *Jubilees* was already considered as authoritative a source in matters calendrical as the Torah of Moses in cultic and secular legislation generally. *Jubilees* must have been known and widely accepted for several generations to attain such a distinctive status. Therefore, we cannot be far off the mark in positing that the book was composed at the latest in the second half of the third century B.C.E., and that at that time the lunar versus solar calendar controversy already was in full force (*Jub.* 6:32–38).

On his part, the author of *Jubilees* traces the roots of the 364-day solar calendar to the Book of *Enoch* and to the antediluvian patriarch whom biblical tradition praises for having "walked with god" until "he was no more, for God took him" (Gen 5:21–24):

> He (Enoch) was the first of mankind who were born on the earth who learned (the art of) writing, instruction, and wisdom and who wrote down in a book the signs of the sky in accord with the fixed pattern of their months so that mankind would know the seasons of the years according to the fixed patterns of each of their months. He was the first to write a testimony. He testified to mankind in the generations of the earth: the weeks of the jubilees he related, and made known the days of the years; the months he arranged, and related the Sabbaths of the years, as we had told him…he wrote a testimony for himself and placed it upon the earth against all mankind and for their history. (*Jub.* 4:17–19)

---

[57] Reformers always are wont to claim that they and only they preserve authentic traditions.

[58] The issue continues to remain under scholarly debate. See, e.g., Jan van Goudoeuer, *Biblical Calendars* (Leiden: Brill, 1959); James C. VanderKam, *Calendars*, 3–14; Sacha Stern, *Calendar and Community: A History of the Jewish Calendar, Second Century B.C.E.–Tenth Century C.E* (Oxford: Oxford University Press, 2001).

The gist of this statement is echoed in *Jubilees* (4Q227), a fragment of a Qumran composition which evidently is related to *Jubilees*.[59] There Enoch is presented as having received divine instruction pertaining to the movements of the luminaries in the heaven and the (progress) of the months, which he passed on to his descendants:

> E[noch] after we taught him…six jubilees of years[…the ea]rth among the sons of mankind. And he testified against all of them…and also against the Watchers. And he wrote all the…sky and the paths of their hosts and the [mon]ths…s]o that the ri[ghteous] should not err…

The reliance of the author of *Jubilees* on the Book of *Enoch* or rather the "Book of the Heavenly Luminaries" (*1 En.* 72–82) in matters calendrical implies that in his days this book was as much appreciated as was *Jubilees* when CD was composed, and that it was most probably authored several generations before *Jubilees*, viz., not later than in the late fourth century. Milik considers chapters 72–82 (Astronomical Enoch, or *Books of Enoch ar* [= 4Q208-211]) the earliest component of *1 Enoch*, dating it to the end of the third or the beginning of the second century B.C.E.[60] However, the fragments of several manuscripts of the book found at Qumran evidently do not stem from an autograph, but rather from secondary copies. Therefore, it is plausible to date the original composition much earlier.

The "Book of the Heavenly Luminaries" reports that when Enoch felt his death approaching, he entrusted the knowledge of the proper "computation of the days" to his son Methuselah, and enjoined him to pass it on to all future generations:

> And now, my son Methuselah, all these things I recount to you and write down for you.[61] I have revealed everything to you and have given you

---

[59] See James C. Vanderkam and Jozef T. Milik, "4QPseudo-*Jubilees*^{c} Frag. 2, " in *Qumran Cave 4.VIII: Parabiblical Texts, Part 1* (ed. H. W. Attridge et al.; DJD 13; Oxford: Clarendon, 1994), 173–75.

[60] Jozef T. Milik, *The Books of Enoch: Aramaic Fragments of Qumran Cave 4* (Oxford: Clarendon, 1976). However, scholars have sounded caveats concerning Milik's identifications of the 4QEnastr fragments (= 4Q208-211) with the Astronomical Enoch since they are, "very different from the Ethiopic text, and sometimes impossible to bring into relationship with it" (S. Stern, *Calendar and Community*, 6). See also Michael A. Knibb, *The Ethiopic Book of Enoch: A New Edition in the Light of the Aramaic Dead Sea Fragments* (Oxford: Clarendon, 1978), 2:11–13.

[61] It stands to reason that by having Enoch bequeath his wisdom to Methuselah both orally and in writing, the author intended to draw a parallel between Enoch's testament and that of Moses (Deut 31:1–13, 24–30). At the same time, the insistence on "dual" transmission may reflect literary standards of the Persian era, which also permeate postexilic biblical writings (cf. Ezra 1:1; Neh 6:1–9; 2 Chr 30:1, 10; Esther

> books about all these things. Keep, my son Methuselah, the books from the hand of your father, that you may pass them on to the generations of eternity…Blessed are all those who walk in the way of righteousness and do not sin like the sinners in the numbering of all their days in which the sun journeys in heaven coming out through the gats for thirty days with the heads over thousands of this order of stars, and with the four epagomenal days which are added and divide between the four parts of the year…for the men go wrong in respect of them and do not know them exactly…And the year is completed in three hundred and sixty-four days.[62] And the account of it is true, and the recorded reckoning of it is exact, for the lights (viz., the sun and the moon), and the months, the feasts and the years, and the days Uriel showed me. (*1 En.* 82:1–7)

The prologue of the Book of *Jubilees* (1:26–29) states that in this transmission chain the calendar was given to Moses on Mount Sinai engraved on "heavenly tables" together with the tables of the Decalogue:

> Moses remained on the mountain for forty days and forty nights while the Lord showed him what (had happened) before as well as what was to come. He related to him the divisions of all the times–both of the law and of the testimony (*Jub.* 1:4)…Now you write all these words which I will tell you on this mountain: what is first and what is last and what is to come during all divisions of time which are in the law and which are in the testimony and in the weeks of their jubilees until eternity…

By tracing the roots of the 364-day solar calendar to the creation of the universe (cf. 4Q320 frag. 1 cols. 1–3), and by presenting the "heavenly tables" on which it was engraved as a twin set of the tables of the Decalogue, its exclusive legality and its superiority over the lunar calendar were established for eternity.

THE COVENANTERS' VERSUS MAINSTREAM CALENDAR CONTROVERSY IN CONTEXT

Shortly after the publication of the *Pesher Habakkuk*, I drew attention to a resemblance to the above-mentioned episode. Related in the tractate *Roš*

---

passim), and are echoed in Qumran literature. See Shemaryahu Talmon, "Oral Tradition and Written Transmission, or the Heard and the Seen World in Judaism of the Second Temple Period," in *Jesus and the Oral Gospel Tradition* (ed. H. Wansbrough; JSNTSup 64; Sheffield: Sheffield Academic Press, 1991), 121–58.

[62] The English rendition reflects the summary line of the calendar of Sabbaths and feasts partially preserved in MMT^{a}, lines 20–21 (4Q394 3-7i), mediated by the ancient Ethiopic and/or Greek translation of the original Astronomical Enoch (*Books of Enoch ar* [= 4Q208-211]): ושלמה השנה שלוש מאת וש[שים וארבעה] יום.

ha-šānâ in which were involved two Sages, Rabban Gamliel and R. Joshua, and an incident reported in the *Pesher* (1QpHab 11:4–8), namely the Wicked Priest's pursuit of the Righteous Teacher and his followers to the place of the latter's (self imposed) exile, most probably his refuge in Qumran:

> To devour him in his burning anger. And at the appointed time of the rest of the Day of Atonement he (viz., the priest) appeared before them to devour them and make them stumble on the Day of the Fast, the Sabbath of their rest.

I argued that there is only one possible explanation of the Priest's inimical intervention: he pursued the Teacher to prevent him and his confrères by force from observing the Day of Atonement in conformity with "the instruction (or findings) of the members of the Renewed Covenant" (CD 6.19), that is to say, according to their particular calendar, which did not coincide with the calendrical time table by which he and his party abided. This understanding of the incident goes a long way to prove my thesis that the calendar[63] controversy was the very pivot of the *yaḥad's* dispute with the "Wicked Priest," that is to say with the high priest of Jerusalem and his followers.

A close reading of pertinent texts throws light on the gradual hardening of the Covenanters' stance in their calendar controversy with mainstream Judaism and the concomitantly increasing aggressiveness of their opponents. The progressively intensifying mutual animosity shows in the changing phraseology which diverse *yaḥad* authors employ in referring to this double-edged process.[64]

Here is my thesis in broad outline: The unknown author (A) of *Miqṣat Maᶜaśe ha-Torah* (MMT) prefaced the enumeration of laws or ritual tenets which he interprets differently from the equally unnamed addressee (B),[65] and from a third party (C) to which he indirectly refers, with a disposition of the 364-day calendar of which, though, only the tail end is preserved in one of the six partially extant manuscripts (4Q394 frags. 1–2 cols. 1–5). However, the original text of parts of that lost calendrical roster can be restored with much confidence with the help of information gleaned from other calendrical documents.[66]

---

[63] Although admitting that "This is probably the closest we can get to evidence of calendar sectarianism," S. Stern maintains that, "even here, there are other interpretations....If the Teacher of Righteousness and the Wicked Priest were both observing, for instance, a calendar based on sightings of the moon, then on this occasion they may simply have sighted the new moon on different days," in *Calendar and Community*, 17. In this rather feeble attempt to undermine my theory that the calendar controversy is at the very heart of the Covenanters' dispute with mainstream Judaism, Stern forgets that he repeatedly stresses that elements of a lunar or lunisolar calendar are always only implicit in *Enoch*, *Jubilees*, and the Covenanters' literature, which is closely connected with these works.

[64] The presumed development cannot be verified by any other criteria. History, paleography, radiocarbon tests, and so forth, are of no help in this matter. The dating of the parchment of the pertinent scrolls and fragments does not yet make possible sequential chronological arrangement of the works that they represent, because the extant manuscripts are not necessarily autographs. Rather, in most instances they are copies of texts that had been in circulation over a considerable length of time.

The editors of MMT justifiably draw attention to the conciliatory tone in which (A) presents his case, intent on drawing (B) into his camp by convincing him of the exclusive legitimacy of his interpretation of the statutes itemized. Because of the misleading explication of those statutes by an evidently official authority, he and his followers had "separated from the multitude of the people" (MMT 100.7–8). The comparatively low-key description of the dispute with the unnamed opponents over issues of halakic-ritual import agrees well with (A)'s intention to persuade (B) to adopt his explication of the statutes in question. I submit that this passage in MMT reflects an early stage in the Covenanters' calendar controversy with the (proto)-rabbinic mainstream in which *halakic* disputes could be discussed with relative equanimity, leaving the door open for a rapprochement.[67]

However, the conciliatory tone did not produce the results which (A) had hoped to achieve. (B) and his party presumably refused to accept (A)'s teachings. In consequence, the relations between the *yaḥad* and its opponents deteriorated. The change shows in the *Damascus Document* whose author strikes a quite different note. For him the rigorous dissent from mainstream Judaism had become unavoidable and the establishment of the Community of the Renewed Covenant as a *corpus separatum* was now the order of the day (CD 4.10–12):

> But with the completion of the appointed time according to the number of these years, there will no longer be any joining the house of Judah. Rather, each must stand on his watchtower. The fence is built, the boundary far away.

The Covenanters' dispute with their opponents hardened into an unbridgeable rift.

---

[65] The suggestion that (A) is the "Teacher" or a prominent *yaḥad* member, and (B) the "Priest" or another representative of the opposing faction, has merit, but cannot be proven.

[66] See my reedition of the text in "Calendrical Documents and Mishmarot," 157–66.

[67] For different reasons, the editors of MMT and other scholars came to the same conclusion regarding the entire document. See Elisha Qimron and John Strugnell, "The Literary Character and The Historical Setting," in *Qumran Cave 4.V: Miqsat Maᶜaśe ha-Torah* (DJD 10; Oxford: Clarendon, 1994), 109–21.

In reaction to this declaration of a final "parting of the ways," the Covenanters' opponents reacted with retaliatory action. This stage of the conflict is reflected in the episode of the "Priest's pursuit of the 'Teacher'" to his abode at Qumran to prevent him and his followers from establishing an independent socioreligious entity (CD 4.10–12), and gear their particular life-style and observance of the holy seasons to their discordant solar calendar (1QpHab). This aspect of the blanket declaration of dissent in MMT is alluded to in a passage in the *Damascus Document* (CD 4.18). Here special mention is made of their opponents' "defilement of the sanctuary" by not refraining from "lighting his altar in vain" (CD 6.11–14). They did not "distinguish between the pure and the impure" and "between the holy and the profane" nor did they "observe the Sabbath day in its exact details, and the appointed times,[68] and *the day of the fast*" viz., the Day of Atonement, on the dates detailed in the exclusively legitimate 364-day solar calendar by which abided "those who entered in the (re)new(ed) covenant" (CD 6.17–20).

CONCLUSION

In conclusion, I wish to underline once again two facets which highlight the exceeding importance of the calendar controversy in the *yaḥad's* confrontation with mainstream Judaism:

a. The calendar figures prominently in all major scrolls of evident *yaḥad* vintage. Like their biblical precursors *yaḥad* authors have a predilection for placing matters of "memorable" import at the beginning or at the end of their works. The significance that attaches to the calendar issue shows in the placement of calendrical notations at the opening or at the ending of a document, e.g., in the Rule of the Community (1QS 9–10), the *Temple Scroll*, and MMT.

b. The momentous importance of adherence to the exclusively legitimate 364-day solar ephemeris is further evinced by the considerable number and the variety of calendrical compositions found at Qumran, which are apparently attuned to the diverse needs of discrete strata of the community. Next to "scientific" astronomical treatises in which Sabbatical Years and *Jubilees* are listed over a period of hundreds of years, as in 4Q319,[69] there are the detailed *mišmārôt* texts, which are the special concern of the priesthood; as well as practical schedules of the annual "holy seasons" manifestly directed to the entire membership; and simple, possibly mnemotechnical enumerations of the months with the number of the days which each one holds.

---

[68] A resounding echo of God's admonition to Noah, which he is to command to his descendants in *Jub.* 6:17–18.

[69] See Jonathan Ben-Dov, "319.4QOtot," in *Qumarn Cave 4.XVI: Calendrical Texts*, (ed. S. Talmon, J. Ben-Dov, and U. Glessmer; DJD 21; Oxford: Clarendon, 2001), 195–244.

In distinction, the Book of *Jubilees* and the "Book of the Heavenly Luminaries" (*1 En.* 72–82) contain predominantly general references to the 364-day solar calendar but no breakdowns of details such as are explicated in the Covenanters' calendrical documents. I agree with Stern's endorsement of Milik's argument that the 364-day Calendar of Enoch was only an *idealistic* model, possibly never intended to be used in practice,[70] echoed by other scholars, which is also relevant for the calendar of *Jubilees*, but not for the Covenanters' ephemeris. In both these instances no structured community can be defined, which regulated the life of its members by such a calendar. The "Community of the Renewed Covenant" is altogether different. The authors of the apocryphal works seemingly do not address the everyday needs of the members of an identifiable community. They are primarily concerned with "calendar orthodoxy." In distinction, the overriding concern of the *yaḥad* authors is "calendar orthopraxis," viz., the application of the calendar in actual life situations.

The Covenanters' secession from mainstream (proto-pharisaic) Judaism, which riveted the life of the individual Jew and the Temple cult to the 354-day lunar ephemeris was ultimately triggered by their adamant adherence to the 364-day solar calendar, in their fervent hope that in the New Jerusalem, the sacrificial service in the New Temple will be conducted by their priests in accordance with their exclusively legitimate solar calendar.

CHAPTER FOUR
THE COVENANT IN QUMRAN

Moshe Weinfeld

1. The Covenantal Ceremony

The *Rule of the Community*, which contains the rules and legal structures of the Qumran community,[1] opens with the theme of the covenant, since the covenant served as the basis of the Qumran sect and its ideology. The opening chapter of the Manual deals indeed with the ceremony of entering the covenant. The covenantal ceremony is actually a procession in which all the members of the sect participate, while the priests and the Levites proclaim blessings and curses. The blessings and the curses are patterned after the ceremony between Mount Gerizim and Mount Ebal, as described in Deuteronomy 27.[2] But, unlike Deuteronomy 27 that constitutes a one-time foundation ceremony that is performed by the Israelites while crossing the Jordan (cf. Josh 8:31–35), the ceremony of the *Rule of the Community* is but an act of ceremony performed, year by year, on the day of Pentecost.[3]

Such ceremonies belong to the general heritage of the covenant making that is attested in the ancient Greek sources. Thus we read in the episode told by Critias (Plato):[4]

> When they [the ten princes] who govern the territory were about to give judgment they first gave pledges one to another of the following description. In the sacred precincts of Poseidon there were bulls at large; and the ten princes, being alone by themselves, after praying to the God that they

[2] See Moshe Weinfeld, "The Emergence of the Deuteronomic Movement," in *Das Deuteronomium, Entstehung, Gestalt und Bothschaft* (ed. N. Lohfink; BETL 68; Leuven: Leuven University Press, 1985), 76–78.

[3] Moshe Weinfeld, "Pentecost as Festival of the Giving of the Law," *Immanuel* 8 (1975): 7–18.

[4] Plato, *Critias*. 119d–120b (Bury, LCL).

> might capture a victim well pleasing to him, hunted after bulls with staves and nooses, **but with no weapon of iron**;[5] and whatsoever bull they captured, they led up to the pillar and cut its throat over the top of the pillar, raining down blood on the inscription. *And inscribed upon the pillar*, besides *the laws, was an oath which invoked mighty curses upon them that disobeyed.* When, then, they had done sacrifice according to their laws and were consecrating all the limbs of the bull, they mixed a bowl of wine and poured on behalf of each one a gout of blood, and the rest they carried to the fire when they had first purged the pillars roundabout. After this they drew out from the bowl with the golden goblets, and making libation over the fire, swore to give judgment according to the laws upon the pillar and to punish whosoever had committed any previous transgression; and moreover, that henceforth they would not transgress any of the writings willingly, nor govern, nor submit to any governor's edict that is not in accordance with their fathers' laws. And when each of them had made this invocation both for himself and for his seed after him, he drank of the cup and offered it up as a gift in the temple of the God.

Similar elements are found in Deuteronomy 27, where the participants: 1. inscribe the laws on stones (vv. 1–3, 8); 2. sacrifice (vv. 6–7); 3. prevent the usage of iron during building the altar (v. 5; compare Exod 20:25); and 4. invoke mighty curses upon the disobedient (Deut 27:11–26; 28:1–19).

It is true, in contrast to the Critian episode, that in Deuteronomy 27 we do not hear anything about a blood ceremony. This appears, however, in the foundation ceremony at Mount Sinai (Exod 24:3–8), which parallels the Shechemite foundation ceremony.[6]

In Exod 24:3–8 we find the following elements: 1. inscribing the law; 2. the erection of pillars; 3. offering sacrifices; 4. sprinkling the blood on both parties.[7]

A blood covenant of this type was discovered in Mari of the Old Babylonian period. There we read: "After they come to an agreement and concluded a pact, a donkey was slaughtered. They swore each to one another an oath on the deity and set down to drink. After they had cut up (the meat) and drunk the goblet one gave the other a present." [8] That ritual included the following elements: 1. offering a sacrifice (a donkey); 2. swearing an oath; 3. drinking a goblet (of blood and wine); 4. exchanging presents.[9]

---

[5] Cf. Paul Heger, "Comparison and Contrast between the two Laws of Altar; Exod 20:25 כי חרבך הנפת עליה and Deut 27:5 לא תניף עליהם ברזל in Consideration of Their Historical Setting," in *Proceedings of the Twelfth World Congress of Jewish Studies. Division A, The Bible and its World* (Jerusalem: World Union of Jewish Studies, 1999), *95–*106; Saul M. Olyan "Why an Altar of Unfinished Stones? Some Thoughts on Ex. 20, 25 and Deut. 27, 5–6." *ZAW* 108 (1996): 1161–71.

[6] Verses 9–11 belong to a different tradition, cf. F. M. Polak "The Covenant of Mount Sinai in the Light of Texts from Mari," in *The Moshe Weinfeld Jubilee Volume* (ed. S. Moshe; Winona Lake, IN: Eisenbrauns, 2004), 119–34.

[7] A blood ceremony is attested in the Drama of Aeschylus, *Seven against Thebes* (21–48) where the warring princes take an oath by touching the blood of the slaughtered bull.

This ceremony explains the expression found in Mari. *ul sa damiya atta* "aren't you of my blood," to indicate an ally who participates in a covenant ritual.

A Shechemite foundation ceremony ascribed to Joshua contains the following elements: 1. inscribing the law (Josh 24:25–26); 2. the erection of a stone monument under a tree (v. 26); 3. the commitment to keep loyalty to God (v. 24).

Among the covenants cited, this is the only instance of a covenant that is not accompanied by sacrifice. It seems therefore that the covenant of Joshua is the latest, i.e., that it belongs to the type of covenant that is based on an oath and not on a ritual. As I have shown elsewhere,[10] in the covenants of the first millennium B.C.E. the sacrifice was completely absent. The treaties of the Neo-Assyrian period became valid and binding by virtue of the oath and imprecation that accompanies the ceremony and not by the act of a sacrifice.

The ceremony of the Qumran community is also freed altogether of ritual action and is left only with the fealty oath sworn by the participants of the covenant and with the proclamation of blessings and curses. These are a characteristic feature of the Greek treaties that might have had an influence on the Hebrew tradition.

The blessings and curses in Deuteronomy 27–28 are of three kinds:

1. 27:14–26 cursing transgressors who perpetrate crimes clandestinely;
2. 28:3–6; 16–19 blessings encompassing daily life, balanced by curses:

> Blessed shall you be in the city and blessed shall you be in the country.
> Blessed shall be the fruit of your womb, the fruits of your soil and the offspring of your cattle, the calving of your herd and the lambing of your flock;
> Blessed shall you be in your comings and blessed shall you be in your goings.
>
> Their reversal are the curses:
>
> Cursed shall you be in the city and cursed shall you be in the country, etc.

---

[8] *ARMT* 26.2:33. See recently Moshe Anbar, "Deux Ceremonies d. alliances dans Ex. 24 a la lumiere des Archives royales de Mari," *UF* 30 (1999): 1–4.

[9] For this element in the covenants between kings see Moshe Weinfeld, "Initiation of Political Friendship in Ebla and its later developments," in *Wirtschaft und Gesellschaft von Ebla* (ed. H. Waetzoldt and H. Hauptmann; Heidelberg: Heidelberger Orientverlag, 1988), 345–48.

[10] Moshe Weinfeld, *Deuteronomy and the Deuteronomic School* (Oxford: Clarendon, 1972), 102–104. Hereafter Weinfeld, *DDS*.

3. 28:7–14, 20–68 elaboration by the Deuteronomic author.

That the ceremony of blessings and cursings on Mt. Gerizim and Mt. Ebal (27:11–13) respectively refer to the series of blessings and curses in Deut 28:3–6, 16–19 was already observed by Ibn Ezra. It was also Ibn Ezra who saw that the curse proclamations in Deut 27:14–26 apply to transgressions perpetrated in secrecy.

It is indeed interesting that both types of anathema–cursing the violators of the oath and banning transgressors–are attested in Greek covenantal oaths.

Thus, for instance, in the oaths taken by the members of the amphictyony against Cirrha (the first "holy war," 590 B.C.E.) we read (Aeschines, *Ctes.* 3.109–111):

> If anyone should violate this, whether city, private man or tribe,[11] let them be under the curse…that their land have no fruit; that their wives have children not like those who begat them, but monsters; that their flocks yield not their natural increase; that defeat await them in court and camp and their gathering place.

Similarly in the Greek's oath at Plataea[12] before the battle with the Persians (479 B.C.E.):

> If I observe what is written in the oath my city will be free of disease; if not it shall be such…and the earth shall bear fruits; if not it shall be barren; and the women shall bear children like their parents, if not, they shall bear monsters; and the flock shall bear like the flock; if not they shall be monsters.

These blessings and curses are strikingly similar to the series of blessings and curses in Deut 28:3–6, 16–19 quoted above. As in the Greek's oath of Plataea every blessing in Deut 28:3–6 has its corresponding curse. And the content of the series is identical with that of the Greek oath: fertility of the soil, women and the flock. The element of "coming and going" in Deuteronomy is identical with the element of success or failure in camp, court, and agora in the Greek oath.[13] Furthermore the element of sickness, which occurs in the oath of Plataea, is identical with the series of blessings and curses in the ancient epilogue to the Covenant Code. In Exod 23:25–26:

---

[11] Compare Deut 29:17 in connection with the oath at the plains of Moab: "perhaps there is among you some man or woman or some clan or tribe." In Deuteronomy 13 we also find warning against instigators from a family or city. For similar warning in ancient Near Eastern treaties, see Weinfeld, *DDS*, 91–116.

[12] Cf. Peter Siewart, *Der Eid von Plataiai*, (Munich: Beck, 1972), 5–7.

[13] The coming and going בואך וצאתך in Deut 28:6, 19 refer to war activities (see Num 27:17, Josh 14:11; 1 Sam 18:16; 29:6 as well as the participation in judicial procedure in Gen 23:18; 34:24).

> I shall remove illness from your midst. None will miscarry or go barren in your land.

This is elaborated in Deut 7:13–26 in a chapter which depends on the peroration in Exod 23:20–33.[14] Here we read:

> He will bless the fruit of your womb and the fruit of your soil…the increase of your herds…and your flocks of sheep; there will be neither male nor female barren among you and your livestock. And the Lord will remove from you all sickness.

To all appearance, this genre of blessings and curses has its origin in the tribal confederation based on covenant; hence the similarity to the blessings and curses of amphictyonic oaths in Greece. The stereotyped series of blessings and curses in Deut 28:3–6, 16–19, thus belongs to the ancient covenant ceremony that is elaborated by the Deuteronomic author of 28:7–14, 20–68. The Deuteronomic expansions have a lot in common with the Assyrian and Aramaean treaties of the eighth–seventh centuries B.C.E. and thus are much later than the short stereotypic blessings and curses that have their parallels in the Greek tribal milieu.[15]

The "curses" in 27:14–26 represent a different genre. These are not threats of punishment as are those in 28:16–19, but legal proclamations accompanied by a curse and addressed to those who commit crimes clandestinely, which cannot be punished by the civil or religious authority. Such "curses" are also attested in the Greek tribal culture. In Greece those who violated the law were reviled by the leaders and priests of the polity and were made "accursed" (Gk. *eparatoi*). So, for example, it is related of Alcibiades (Plutarch, *Alc.* 27) that he was found liable at law for desecrating the sacra of Demeter. After placing his property under the "ban," his judges decided that the priests and priestesses should curse him.

Aristides is said to have suggested that the priests should cast curses on anyone who abandoned the war-treaty with the Greeks (Plutarch, *Arist.* 10). As in Greece so in Israel it is the sacred group (the Levites) who have the authority to "revile," i.e., excommunicate the transgressors.

Our analysis of the covenant and especially the Shechemite covenant has shown that the blessings and curses constitute the most important element of the covenant and hence the stress laid upon the covenant in the *Rule of the Community*. The covenantal nature of the Manual of Discipline comes to bold expression in 1QS 2.12–17, citing the pericope of Deut 28:69–29:28.

---

[14] See Weinfeld, *DDS*, 46–48.

[15] Ibid, 186–187.

> Cursed be the man who enters this covenant while walking among the idols of his heart, who sets up before himself his stumbling block of sin so that he may backslide; hearing the words of this covenant, he blesses himself in his heart and says "Peace" be with me even though I walk in the stubbornness of my heart whereas his spirit parched and watered shall be destroyed without pardon. God's wrath and his zeal for his commands shall consume him in everlasting destruction. All the curses of the Covenant shall cling[16] to him:

ארור בגלולי לבו לעבור בברית הזות ומכשול עוונו ישים לפניו
להסוג בו
והיה בשומעו את דברי הברית הזות יתברך בלבבו לאמור:
שלום יהי לי כיא בשרירות לבי אלך
ונספתה רוחו הצמאה עם הרויה לאין סליחה
אף אל וקנאת משפטיו יבערו בו לכלת עולמים
ודבקו כול אלות הברית הזות

> This is totally dependent on Deut 29:18–20.

והיה בשמעו את דברי האלה הזאת
והתברך בלבבו לאמר שלום יהיה לי כי בשרירות לבי אלך
למען ספות הרוה את הצמאה
לא יאבה יהוה סלוח לו
כי אז יעשן אף והיה קנאתו באיש ההוא
ורבצה בו כל האלה הכתובה בספר הזה

> When such a one hears the words of these sanctions, he may fancy himself immune, thinking "I shall be safe so I follow my own willful heart" to the utter ruin of moist and dry alike. The Lord will never forgive him; rather will the Lord's anger and passion rage against that man, till every sanction recorded in this book comes down upon him.

This pericope contains a warning against harboring of treasonable thoughts. These persons delude themselves in thinking that since they are committing no actual transgression no harm will befall them (29:18), שלום יהיה לי כי בשרירות לבי אלך. This idea appears in ancient treaties.

Thus, for example, in the treaty between Suppiluliumas and Huqqanas we read:

> If a Hittite man will do evil against me and you will not report it and you will even say: "I have sworn an oath-imprecation, I shall not speak and I

---

[16] ודבקו instead of ורבצה in Deut 29:18 LXX is identical with the Qumran versions, cf. the discussion by Alexander Rofé , *Introduction to Deuteronomy* (Jerusalem: Akademon, 1986), 197.

> shall not act but he may do as his heart desires"…these curses will destroy you.[17]

Likewise we find in the treaty between Suppiluliumas and Tette:

> If somebody acts treacherously and says: "I am bound by the covenant that if the enemy kills him or he kills the enemy, I cannot (or will not) know, he violates the oath.[18]

The four motifs occurring in Deut 29:19 are 1. the divine wrath; 2. the curse that settles upon the malefactors; 3. the oath imprecation that overtakes the transgressor; and 4. the obliteration of the malefactor's name and his memory appear also in the *Rule of the Community.*

In Deut 29:21–28 we find two additional factors in the annihilation of the transgressors: 1. the burning to the ground of the city that violates the oath, "the city was to remain wasteland;" 2. the astonishment of the nations who will see the ruins of that land and its explanation, "because they violated the solemn treaties." Both these motifs are found in the Neo-Assyrian texts[19] in connection with the breach of the treaty. These motifs are old and relate to the destruction of Samaria and have therefore no place in a population of sectarian nature.

2. EXPRESSIONS OF LOYALTY

A frequent demand in the Hittite and Ugaritic treaties is "to be a friend to friends and an enemy to enemies."[20] This formula, which is attested in the treaty of Naram-Sin with Elam of the third millennium[21] and has its roots in familial alliances, was widespread in later Greek and Roman treaties, as well. Since the discovery of the Hittite treaties, classical scholars have claimed that this is a loan formula from Anatolia. Thus Schwann in his article "Symmachia," in *Paulys Realencyclopädie der classischen*

[21] W. Hinz, "Elams Vertrag mit Naram-Sin," *ZA* 58 (1976): 66–96.

Altertumswissenschaft (PW),[22] says that the Greeks must have learned this formula as well as other formalities of making and structuring covenants from the Lydians. Today we know that the Acheans (= people of Ahhiyawa) had covenantal relationship with the Hittites and apparently used diplomatic conventions commonly used in the eastern political sphere of the mid-second millennium.[23]

From biblical usage we can learn that this formula was prevalent in the first millennium B.C.E. Thus, we read in 2 Sam 19:6, "You love those that hate you and hate those who love you"–love and hate expressing loyalty and disloyalty to the king. Such is the case of Exod 23:22, "then I will be enemy to your enemies and I will harass those who harass you," which speaks about recompense for observing the covenant. This formula is reflected in 2 Chr 19:2 in connection with the pact between the King of Judah and the King of Israel, "do you take delight in helping the wicked and befriending the enemies of the Lord?" Compare also Ps 139:21–22, "I hate those who hate you and loath adversaries, I hate them with undying hatred; I call them all my enemies."

Similarly we find in the covenant ceremony in the *Rule of the Community* this language, "to love all that he has chosen and to hate all that he has rejected, keeping away from all evil and adhering to all good works" (1QS 1.3–4), and in the following lines we read, "to love all the sons of light, each according to his lot in the council of God, and to hate all the sons of darkness, each according to his guilt" (1QS 1.10–11). Similarly we read in the *Damascus Document*: "to choose him in whom he delights and to reject him whom he hates" (2.15). It is also found in Josephus' account of the Essene vows: "that he will forever hate the unjust and fight the battle of the just" (*J.W.* 2.139). Compare Matt 5:43 "You have learned that they were told: 'love your neighbor and hate your enemy.' But what I tell you is this: 'love your enemies and pray for your persecutors.'"

---

[22] 4.A1:1109.

3. "BRINGING ALL THEIR KNOWLEDGE AND THEIR STRENGTH AND THEIR PROPERTY INTO THE COMMUNITY OF GOD" (1QS 1.11–12)

On other occasions I tried to show that loyalty and devotion were expressed in the ancient Near East by such expressions as: "to love with all your heart and with all your soul, with all your property and with all your ability."[24] Generally we find these expressions in the oath of the vassals to their sovereigns. In the Bible, where the relationship between God and Israel is described as a relationship between the vassal and the sovereign, we find these expressions in the context of the relationship between God and his people. Furthermore, as I showed in my studies on this subject, the command to love God "with all your heart, with all your soul and with all your might" in Deuteronomy 6 has been interpreted by the Targums and the rabbinic literature as devotion that includes not only love in the heart but readiness to sacrifice life ("with all your soul" = "even if he takes your soul"), so much more "to give your money and property."

We have to see this formula in the Qumran Scrolls as a formal expression of loyalty or devotion to the organization that the speaker is joining, but more important are the formulae that appear at the beginning of the *Rule of the Community* in close proximity to the expressions, "to love…and to hate…" particularly the following paragraph:

> Bringing all their knowledge and their strength and their property into the community of God in order to strengthen their knowledge (דעתם) by the truth of God's statutes, and discipline their strength (כוחם) according to the perfection of his ways, and all their property (אונם) according to his righteous council (1QS 1.12–13; compare 11–12).

Similarly we read in connection with joining the sect in the *Damascus Document*, "and whoever joins his congregation, let him examine him with regard to his…intelligence, his strength and might and his wealth ושוכלו וכוחו וגבורתו והונו" (13.11). "Intelligence" here undoubtedly overlaps the "knowledge" (דעת) of the *Rule of the Community*; to the "strength" (כח) we find here added "might" (גבורה), and both express the same concept.

What is the meaning of this command for the new member to bring with him his "knowledge" (or his "intelligence"), his "strength" and "wealth?" According to our opinion this command overlaps the command in Deuteronomy 6, "to love God with all your heart, with all your soul and with all your might" (מאדך), as it was interpreted in the Second Temple period by the translators, the rabbinic sages, and the Gospels. I propose that there are three nuances of meaning in these texts.

---

[24] See Weinfeld, "The Loyalty Oath."

First, "Knowledge" (דעת) in early rabbinic usage comes in place of the "heart" in the Bible. So, for example, we find instead of directing one's heart to the Lord (Mishnah, *Berakot* 5:1), "directing his knowledge to heaven" (Mishnah, *Menaḥot* 13:1). Indeed Abraham Ibn-Ezra in his interpretation of "with all your heart (לבבך)" says, "the heart is the knowledge and it marks the spirit of intelligence." Similarly, we read in Mark 12:33 that the Israelites were required to love God with all the heart, with all the knowledge (Gk. *synesis*), with all the soul and with all the might (Gk. *ischys*). And as we shall see later the rabbinic discussions of "with all your heart, with all your soul and with all your might" in Deuteronomy 6 are reflected in the New Testament.

In the Gospels, in addition to the heart, knowledge, soul and strength (Gk. *ischys*), we find also Gk. *dianoia* (Mark 12:30; Matt 22:37; Luke 10:27). It seems that *dianoia* renders here the term יצר טוב that according to the sages is learned from בכל לבבך: "with the two of your inclinations יצרים good inclination יצר טוב and bad inclination יצר רע." The Hebrew term יצר is translated in the Septuagint by *dianoia* (in Gen 6:5, 8:21 and in 1 Chr 29:18). Similarly *dianoia* occurs in the verses where the heart denotes the יצר רע, as for example in Num 15:39, "So that you do not follow your heart and eyes in your lustful urge."

In the second place, the strength and the wealth in the *Rule of the Community* and the strength and the might in the *Damascus Document* are translations for the biblical מאד. This might be learned from the diverse versions and from rabbinic literature. Thus we find that בכל מאדך is translated by the Septuagint to Deut 6:5 "with all your strength," and "with all your might" in the Septuagint to 2 Kgs 23:25. Similarly in the New Testament מאד is translated by *ischys* (Mark 12:33, Luke 10:27).

The Aramaic versions and the rabbinic tradition rendered as property or wealth ממון, which equals הון in the Qumran writings. In Targum Onkelos: "with all your property נכסך בכל"; in Targum Pseudo-Jonathan and Targum Neofiti: "with all your money" בכל ממונכון and so renders Rabbi Eliezer in the *Sifre* to Deuteronomy (section 32, 58) and in the Mishnah (*Berakhot* 9:5). In fact, *ischys* and *dynamis* in the Septuagint connote the meanings of wealth and money, as כח and חיל in the Bible mark might and property. Thus, for example, in Ezekiel 27 alone the Hebrew word הון denotes once *ischys* (v. 12) and twice *dynamis* (vv. 18, 27). The כח and הון that the members of the sect are obliged to bring to the יחד אל are rendered by כל מאדך.

מאד in the sense of property, wealth, and money appears in Sirach (Ben Sira) and in the Qumran Scrolls. Sirach says, “Love your maker with all your might מאדך and do not abandon his servants, honor God and respect the priests and give them their dues as you are commanded” (Sir 7:30–31). According to this context, it is clear that מאד means gifts given to the priests. Indeed, there is a close relationship in content and in form between this instruction and the one in Prov 3:9, “Honor God with your wealth הון and with the firstlings of your harvest,” only that instead of the הון of Proverbs we find מאד in Sirach. Similarly we read in the *Damascus Document* about stealing the מאד of the camp, i.e., the property of the camp (9.11), and one is commanded not to sell from whatever he possesses בכל מאודו—his animals, his threshing floor and wine press—to the Gentiles (12.10).

Worship of God by דעת, כח, and הון is expressed by the members of the Qumran sect in a practical manner; i.e., the member is obliged to contribute to the sect from his knowledge, his strength, and his property. The obligation of the member concerning these things is clearly expressed in the *Rule of the Community*: “the lesser one shall obey the greater with respect to work and money” (1QS 6.2) and “both his property and his possession shall be given to the hand of the man who is the Examiner over the possession of the many” (1QS 6.19). The member is commanded to deliver his possession and the produce of his hand to the sect.

Finally, we thus find at the sect a concrete interpretation of בכל לבבך and of בכל מאדך. What then is the meaning of בכל נפשך, which is also found in the Qumran Scrolls (1QS 5.8–9; 6.15; CD 15.8)? בכל נפשך was apparently interpreted as the sages also conceived of it: “even if he takes your life (אפילו נוטל נפשך).” Indeed Josephus tells us that the Essenes would not betray their sect even at pains of death (*J.W.* 2.141).

Loyalty to the company, which is יחד אל, is like loyalty to God himself, that should be בכל לבבך, בכל נפשך, בכל מאדך (Deut 6:5). Knowledge, strength, and wealth are the practical interpretation of לב and of מאד of Deuteronomy, in the Qumran sect.

CHAPTER FIVE

WHAT WAS DISTINCTIVE ABOUT MESSIANIC EXPECTATION AT QUMRAN?

John J. Collins

In an article published in 1979, James Charlesworth surveyed the references to “the messiah” in the Jewish Pseudepigrapha from the period around the turn of the era.[1] Although much of this literature is concerned with eschatology, or the expectation of an end to the present order and a utopian future, he found only five texts that anticipated a messiah. Only one of these, the *Psalms of Solomon*, could be dated before the time of Christ. Another, the Similitudes of Enoch (*1 Enoch* 37–71), is of uncertain date but probably comes from the first century C.E., before the destruction of the temple in the year 70. Two messianic texts, *4 Ezra* and *2 Baruch*, date from the end of the first century and are roughly contemporary with the book of Revelation. The fifth, *3 Enoch* or ספר הכלות, is several centuries later and is not relevant to the period under discussion. The absence of any messiah in several texts from the period was striking. Charlesworth’s study signaled a revision of traditional assumptions about the importance of messianic expectation in ancient Judaism. This revision reached its climax in the late nineteen eighties. A volume edited by Jacob Neusner, William Scott Green, and Ernest Frerichs proposed to ditch the old consensus and to speak instead of “Judaisms and their Messiahs,” emphasizing the lack of uniformity.[2] In his introduction to the proceedings of the first Princeton Symposium on Judaism and Christian Origins in 1987, Charlesworth claimed that “No member of the Princeton Symposium on the Messiah holds that a critical historian can refer to a common Jewish messianic hope during the time of Jesus.”[3]

---

[1] James H. Charlesworth, “The Messiah in the Pseudepigrapha,” in *ANRW* 19.1:188–218. Charlesworth extended his survey to early Christian pseudepigrapha. See also his more recent study, “Messianology in the Biblical Pseudepigrapha,” in *Qumran-Messianism: Studies on the Messianic Expectations in the Dead Sea Scrolls* (ed. J. H. Charlesworth, H. Lichtenberger, and G. S. Oegema; Tübingen: Mohr Siebeck, 1998), 21–52.

[2] Jacob Neusner, William S. Green, and Ernest S. Frerichs, ed., *Judaisms and Their Messiahs* (Cambridge: Cambridge University Press, 1987). See Green’s introduction, 1–13.

[3] James H. Charlesworth, “From Messianology to Christology: Problems and Prospects,” in *The Messiah: Developments in Earliest Judaism and Christianity* (ed. J. H. Charlesworth; Minneapolis: Fortress, 1992), 5.

While Charlesworth's survey of the Pseudepigrapha was both accurate and illuminating, however, it was also a little misleading. Charlesworth acknowledged, of course, that there were other corpora of Jewish literature from this period, and that messianic references can be found in the Dead Sea Scrolls and Targums.[4] But by isolating the Pseudepigrapha, his study could give the impression that they were representative of Judaism in the period between the Testaments.[5] When the Scrolls are taken into account, the number of messianic references is increased, although it is still not great. More importantly, however, the Scrolls show something of the distribution of messianic beliefs in late Second Temple Judaism, specifically that these beliefs were not peculiar to any one group, but are found across the boundaries of various sects and movements.

The release of the Scrolls in 1991 triggered a new consideration of the extent and nature of Jewish messianic beliefs. The "new" texts that were published in the following years included several that are directly relevant to the study of messianism, notably 4Q246, *An Aramaic Apocalypse ar* or "Son of God" text,[6] 4Q521, which was dubbed a "Messianic Apocalypse" by its editor,[7] and 4Q285, which seems to be a fragment of the War Rule, and which was thought, for a time, to speak of a "dying messiah," although it is now clear that the messiah is the one who kills.[8] These texts stimulated several new surveys of messianism in the Scrolls.[9]

Oegema, *The Anointed and his People* (JSPSup 27; Sheffield: Sheffield Academic Press, 1998); idem, "Messianic Expectations in the Qumran Writings: Theses on their Development," in

Moreover, there is now an increasing awareness that not all texts found at Qumran were products of the Dead Sea sect, and that some of them may reflect beliefs that were widespread in Judaism at the time. The interpretation of several texts remains in dispute, but it is clear that messianism was a topic of significant interest, even if it was never as central in ancient Judaism as older Christian scholarship had claimed. There was never any orthodoxy on the subject of messianism and the Hebrew word משיח (anointed one) and its cognates could be used in various ways. Yet some ideas and expectations were widely shared. In my own monograph on messianism, *The Scepter and the Star*, I have argued that we may speak of a common Jewish hope for a royal messiah from the Davidic line and of a distinctive sectarian hope in the Dead Sea Scrolls for a priestly messiah, who would take precedence over the Davidic king. The figure of an eschatological prophet, who might also be called an anointed one, is more elusive and controversial. The Scrolls also provide several instances of a heavenly savior figure (e.g., Melchizedek), who is not called a messiah, although we do find a heavenly messiah in some other Jewish texts, most notably the Similitudes of Enoch.

"MESSIAH" OR "ANOINTED"?

An objection has been raised against the renewed interest in messianism in the Scrolls by the distinguished German scholar Johann Maier, who argues that it reflects a projection of Christian interests onto the Scrolls.[10] Christianity claims that all expectations of salvation were fulfilled in Christ, who is portrayed in a way that embodies several different strands of Jewish, and some non-Jewish, expectation. Maier contends that scholars who write about "the Messiah" (especially when the noun is capitalized in languages other than German) imply a composite picture of the messiah, which derives from Christianity. He objects to the vague way the term is often used, so that "messianic" becomes equivalent to "eschatological."[11]

Qumran-Messianism (ed. J. H. Charlesworth, H. Lichtenberger, and G. S. Oegema; Tübingen: Mohr Siebeck, 1998), 53–82; Geza G. Xeravits, *King, Priest, Prophet: Positive Eschatological Protagonists of the Qumran Library* (*STDJ* 47; Leiden: Brill, 2002).

[10] Johann Maier, "Messias oder Gesalbter? Zu einem übersetzungs–und Deutungsproblem in den Qumrantexten," *RevQ* 17 (1996): 585–612. Xeravits, *King, Priest, Prophet*, 2, also proposes that the term "messiah" be avoided, because he wants to emphasize the variety of "positive eschatological protagonists."

[11] Maier attributes a preference for vagueness to theological interest: "Begriffe die gerade dank ihres ungeklärten Charakters lange Zeit Lieblingsvokabeln der Theologie gewesen sind" (ibid., 586).

Consequently he proposes that that the words "messiah," "messianic," etc. be banned from the discussion. Instead, he proposes to translate the Hebrew משיח and related words with the less theologically laden word "anointed." In Maier's view, the word "messiah" entails a focus on the *person* of the referent, and this focus is distinctively Christian. The Jewish concern is typically with *functions* and *institutions* in the state of Israel, in a time that is eschatological, in the sense that it represents the goal of history, but is nonetheless within history and not part of an otherworldly afterlife.[12]

Maier's objections are based on some valid considerations and concerns. First, his objections to vague usage, whether of "messianism" or of any other terminology, must be seconded. The proper response to vague terminology, however, is to clarify it. A proposed ban on selected terms is only the lazy way out, and it typically makes way for seven demons worse than the first. I agree with Maier, however, that one should no longer speak of "the Messiah" without qualification, and that we should be alert to the danger of reading a Christian concept of messiah back into Jewish texts. I also agree with Maier that Jewish concepts of messiah are typically functional and must be seen in the context of the final restoration of Israel.[13] It does not seem to me, however, that this point would be clarified by speaking of an "anointed" rather than a "messiah." In the texts that are considered messianic, the anointing is metaphorical in any case. It seems to me more helpful to use "anointed" in cases where the reference is to an historical, not eschatological, situation (e.g., the anointed high priest in Daniel chapter 9) and to retain the traditional term "messiah" when the reference is to the final, eschatological, restoration of Israel.

There are, however, broader issues at stake in Maier's essay, specifically, the relationship between the Dead Sea Scrolls and Rabbinic Judaism, on the one hand, and their relationship with early Christianity on the other.

Maier appears to assume a rather monolithic Judaism in the Second Temple period, uniformly dominated by obedience to the Torah.[14] An "anointed" (or institutionally legitimate) king is necessarily characterized by obedience to the Law. This view can in fact be defended in the case of the Dead Sea sect, but it is gratuitous to suppose that it was necessarily always the primary consideration in Second Temple Judaism. While the Scrolls provide plenty of evidence of continuity with the later rabbinic forms of Judaism, they also provide plenty of motifs and ideas that we would never have expected to find on the basis of the rabbinic writings alone. This is especially true in matters of eschatology and in the mythological elements that frame the more practical or halakic teachings of the Scrolls. It seems to me that Maier does not make sufficient allowance for the pluriform character of Judaism in this period.

---

[12] Ibid., 588.

[13] See my essay, "'He Shall Not Judge by What His Eyes See:' Messianic Authority in the Dead Sea Scrolls," *DSD* 2 (1995): 145–64.

[14] Maier, "Messias oder Gesalbter?" 591: "Für das frühe Judentum war aber der Gotteswille bereits identisch mit der Torah, was immer die einzelnen Gruppen damals noch unter 'Torah' verstanden haben." ("For early Judaism, the will of God was already identical with the Torah, whatever the individual groups understood by Torah.")

It was precisely the pluriform character of Judaism that allowed the emergence of early Christianity as a Jewish sect, sharply at variance with other Torah-oriented groups. Consequently, it is as legitimate to trace lines of continuity from the Scrolls to early Christianity as study their links to rabbinic Judaism. Second Temple Judaism was the extraordinarily fertile soil from which both rabbinic Judaism and early Christianity sprang. Consequently, while the few passages in the Pseudepigrapha that speak of a "son of man" figure may not be of great interest for the history of later Judaism,[15] they are of enormous interest for the historian of religion, and not only for the Christian theologian. Continuity, of course, is not identity, and we must also be conscious of the differences from one period to another. But this is as true in the case of rabbinic Judaism as in the case of the New Testament.

In the remainder of this essay I will review the various messianic figures in the Scrolls with two questions in mind: first, was this idea typical or atypical of the Judaism of the day? and second, how does it relate to the messianic ideas of early Christianity? By a messianic figure I mean one who plays a role in the final, eschatological, restoration of Israel and who is sometimes, but not necessarily always, designated by the word משיח or its translation equivalents.[16] I exclude, on the one hand, anointed figures who are not in an eschatological context, such as the historical high priests, and on the other figures like Melchizedek in 11Q13 (*Melchizedek*), who are never called משיח in the texts. I also recognize that phrases like "branch of David" and "prince of the community" often function as variant ways of referring to the eschatological Davidic king.[17]

---

[15] So Maier, ibid., 587.

[16] Collins, *The Scepter and the Star*, 12. Joseph A. Fitzmyer, *The Dead Sea Scrolls and Christian Origins* (Grand Rapids: Eerdmans, 2000), 73–110, tries to limit the discussion of messianism to passages where the word משיח occurs.

[17] John J. Collins, "Method in the Study of Messianism," in *Methods of Investigation of the Dead Sea Scrolls and the Khirbet Qumran Site: Present Realities and Future Prospects* (ed. M. Wise et al.; Annals of the New York Academy of Sciences 722; New York: New York Academy of Sciences, 1994), 213–29. Maier also recognizes this point.

In view of Maier's objections, I should emphasize that "messianic" as I use the word is by no means coterminous with "eschatological." A messiah has a role in the drama of the end-time, but this role is not found in all eschatological texts. We have many notable scenarios for the salvation of Israel that have no place for a "messiah" as defined here.

THE DAVIDIC MESSIAH

The hope for a Davidic messiah is based on God's promise to David in 2 Sam 7:12–16:

> When your days are fulfilled and you lie down with your ancestors, I will raise up your offspring after you, who shall come forth from your body, and I will establish his kingdom. He shall build a house for my name, and I will establish the throne of his kingdom forever. I will be a father to him and he shall be a son to me. When he commits iniquity, I will punish him with a rod such as mortals use, with blows inflicted by human beings. But I will not take my steadfast love from him…Your house and your kingdom shall be made sure forever before me; your throne shall be established forever.

Despite this promise, the Davidic line had in fact come to an end at the time of the Babylonian exile (586–539 B.C.E.). Some prophetic oracles from the exilic period or shortly thereafter entertain the hope of restoration.[18] According to Jer 23:5–6: "The days are surely coming, says the Lord, when I will raise up for David a righteous Branch, and he shall reign as king and deal wisely, and shall execute justice and righteousness in the land. In his days, Judah will be saved and Israel will live in safety."

When the Jewish exiles were allowed to return to Jerusalem under the Persians, there was naturally an upsurge of expectation in this regard.[19] The governor Zerubbabel was a descendant of the Davidic line (1 Chr 3:16–19), and some people hoped that he would restore the kingdom. The prophet Haggai uses the image of a signet ring to indicate that Zerubbabel was authorized representative of the Lord: "I will take you, O Zerubbabel my servant, son of Shealtiel, says the Lord, and make you like a signet ring; for I have chosen you, says the Lord of hosts" (Hag 2:21–24). His contemporary Zechariah expressed a similar hope when he referred to

---

[18] See Kenneth E. Pomykala, *The Davidic Dynasty in Early Judaism: Its History and Significance for Messianism* (Atlanta: Scholars Press, 1995), 69–126; William M. Schniedewind, *Society and the Promise to David: The Reception History of 2 Samuel 7:1–17* (New York: Oxford University Press, 1999), 119–39.

[19] See further Collins, *The Scepter and the Star*, 29–31, and the literature there cited.

Zerubbabel as "my servant, the Branch," in an allusion to Jeremiah's prophecy (Zech 3:8; cf. 6:11–12). He also referred to Zerubbabel and the High Priest Joshua as "two sons of oil," or anointed ones (Zech 4:14). But Zerubbabel was never crowned king in Jerusalem. In Zech 6:11–12, the prophet is told to place a crown on the head of the High Priest Joshua. The passage continues, however: "say to him: Thus says the Lord: Here is a man whose name is Branch…he shall bear royal honor and shall sit and rule on his throne. There shall be a priest by his throne, with peaceful understanding between the two of them." It seems clear that this passage originally instructed the prophet to place a crown on the head of Zerubbabel, the Branch who is distinguished from the priest, but the reference to Zerubbabel was excised from the text, presumably for reasons of political caution.[20]

The hope for a restoration of the monarchy gradually receded into the future. In Jer 33:14–16 the prophet reassures his listeners: "The days are surely coming says the Lord when I will fulfill the promise I made to the house of Israel and the house of Judah. In those days and at that time I will cause a righteous branch to spring up for David…"[21] We occasionally find similar messianic oracles in other prophetic writings of the Second Temple period (e.g., Zech 9:9–17: "Rejoice greatly O daughter Zion! Shout aloud, O daughter Jerusalem! Lo your king comes to you; triumphant and glorious is he, humble and riding on a donkey, on a colt, the foal of a donkey"). These texts are difficult to date, and we do not know what segment of Jewish society they represent.

It is possible that hope for a restoration of the monarchy persisted; it could certainly be found in the Scriptures, which became increasingly important in Jewish life in this period.[22] But messianic hope is remarkably lacking at the time of the Maccabean revolt, in a context where we might have expected to find it. Ben Sira praises David at some length (Sir 47:1–11) but does not speak of the restoration of the Davidic line.[23] Neither is there any place for the Davidic messiah in the early Enoch apocalypses that were written before and during the Maccabean revolt. Some scholars identify the "white bull" of *1 Enoch* 90:37 (the "Animal Apocalypse") as the messiah, but he does not seem to be an agent of salvation, and seems rather to be a new Adam.[24] The book of Daniel envisions a figure who will come on the clouds of heaven and be given a kingdom (Dan 7:13). In later tradition this figure was most often identified as the Davidic messiah, but in the context of Daniel he is more plausibly identified as the archangel Michael.[25] It seems likely then that the expectation of a Davidic messiah was dormant at least in the Maccabean period, and possibly for much of the Persian and early Hellenistic eras.

---

[20] See David L. Petersen, *Haggai and Zechariah 1–8* (Philadelphia: Westminster, 1984), 275–76. The Masoretic text says that the prophet is told to make crowns, in the plural. The ancient versions correct this to the singular "crown." See John J. Collins, "The Eschatology of Zechariah," in *Knowing the End from the Beginning* (ed. L. L. Grabbe and R. D. Haak; Library of Second Temple Studies 45; London: T & T Clark International, 2003), 74–84.

[21] On the relationship of this oracle to Jeremiah 23, see Michael Fishbane, *Biblical Interpretation in Ancient Israel* (Oxford: Clarendon, 1985), 471–74.

[22] So especially William Horbury, *Jewish Messianism and the Cult of Christ* (London: SCM, 1998), 36–63.

[23] Pomykala, *The Davidic Dynasty*, 131–52.

It may be noted that none of the passages we have cited from the exilic and early postexilic periods use the word משיח with reference to the future king. (Ezekiel typically refers to the future ruler as a "prince" (נשיא). There were precedents for referring to the king as משיח (Saul is called "the anointed of the Lord" in 1 Sam 24:6; the king is called "his [the Lord's] anointed" in Ps 2:2). Moreover, the Persian king Cyrus is called the anointed (משיח) of the Lord in Isa 45:1 ("Thus says the Lord to his anointed, to Cyrus, whose right hand I have grasped…"). The prophet we know as Second Isaiah indicated thereby his belief that Cyrus enjoyed legitimate divine authority. The word messiah only becomes associated with the future king who will restore the Davidic dynasty in the Hellenistic period. As we have seen, however, the hope for such a king, by whatever name, is found in several texts from the early postexilic period.

THE HASMONEAN PERIOD

The revival of messianic hope, or hope for the restoration of an ideal Jewish kingdom, coincided with the restoration of an actual Jewish kingdom by the Hasmoneans, descendants of the Maccabees, that was very much less than ideal. According to Josephus, the first Hasmonean ruler to proclaim himself king was Aristobulus (104–103 B.C.E.),[26] and even he did not claim his royal title on his coins. The first coins of a Jewish king are those of Alexander Jannaeus (103–76 B.C.E.), some of which read, in Hebrew and Greek, “Yehonathan the King–King Alexander.”[27] It may be said that the earlier Hasmonean rulers, Simon and Jonathan Maccabee and John Hyrcanus, were *de facto* monarchs. 1 Maccabees extols Simon in terms that imply that prophecy was fulfilled in his rule: “The land had rest all the days of Simon…All the people sat under their own vines and fig trees and there was none to make them afraid…” (1 Macc 14:4, 12; cf. Mic 4:4). Yet neither he nor his immediate successors claimed the title of king, and there is no reason to say that they had messianic aspirations.

[24] See George W. E. Nickelsburg, "Salvation without and with a Messiah: Developing Beliefs in Writings Ascribed to Enoch," in *Judaisms and Their Messiahs* (ed. J. Neusner, W. S. Green, and E. S. Frerichs; Cambridge: Cambridge University Press, 1987), 49–68; Patrick A. Tiller, *A Commentary on the Animal Apocalypse of 1 Enoch* (SBLEJL 4; Atlanta: Scholars Press, 1993), 20, 384.

[25] John J. Collins, *Daniel* (Hermeneia; Minneapolis: Fortress, 1993), 304–10.

[26] *Ant.* 13.301.

The relationship of the Hasmoneans to messianic hope can be seen clearly in the *Psalms of Solomon*.[28] These Psalms were written after the Roman general Pompey had conquered Jerusalem in 63 B.C.E. and had insisted on entering the Holy of Holies. More precisely, they were written after the death of Pompey in Egypt in 48 B.C.E. They celebrate his downfall in *Pss. Sol.* 2:26–28: “and I did not wait long before God showed me his body, stabbed, on the mountains of Egypt…” But much of the blame for what had befallen is laid on Jewish shoulders: “Foreign nations went up to thine altar; in pride they trampled it with their sandals; because the sons of Jerusalem had defiled the sanctuary of the Lord…” Specifically, the blame rests on the illegitimate Jewish rulers:

> “Thou, Lord, didst choose David as king over Israel,
> and thou didst swear to him concerning his posterity for ever,
> that his kingdom would never fail before thee.
> But for our sins, there rose up against us sinners:
> they assailed us and thrust us out,
> they took possession with violence, and did not praise thy honorable name.
> They set up in splendor a kingdom in their pride,
> They laid waste the throne of David in the arrogance of their fortune.” (*Pss. Sol.* 17:1–6)

The psalmist prays for a legitimate ruler in contrast to these non-Davidic usurpers:

> “Behold, O Lord, and raise up for them their king, the son of David,
> For the time which thou didst foresee, O God, that he may reign over Israel thy servant.

[28] Gene L. Davenport, “The ‘Anointed of the Lord’ in Psalms of Solomon 17,” in *Ideal Figures in Ancient Judaism* (ed. G. W. Nickelsburg and J. J. Collins; Chico, CA: Scholars Press, 1980), 67–92; Pomykala, *The Davidic Dynasty*, 159–70. See the thorough study of Kenneth Atkinson, *I Cried to the Lord. A Study of the Psalms of Solomon's Historical Background and Social Setting* (JSPSup 84; Leiden: Brill, 2004), 129–79.

> And gird him with strength, that he may shatter unrighteous rulers;
> And purify Jerusalem of the nations which trample her down in destruction.
> In wisdom, in righteousness, may he expel sinners from the inheritance:
> May he smash the sinner's arrogance like a potter's vessel.
> With a rod of iron may he break in pieces all their substance.
> May he destroy the lawless nations by the word of his mouth,
> So that at his rebuke, nations flee before him;
> And may he reprove sinners by the word of their own hearts.
> And he shall gather together a holy people, whom he shall lead in righteousness,
> And he shall judge the tribes of the people which has been sanctified by the Lord his God…
> And he shall be a righteous king, taught by God, over them…
> For all shall be holy, and their king the anointed of the Lord…
> And he himself is pure from sin so that he may rule a great people…
> For God created him strong in the holy spirit,
> and wise in prudent counsel, together with strength and righteousness;
> And the blessing of the Lord is with him, providing strength…
> His words are as the words of holy ones in the midst of sanctified peoples…
> The Lord is our king for ever and ever." (*Pss. Sol.* 17:21–46).

This prayer is full of biblical allusions, especially to Isa 11:1–4:

> "A shoot shall come out from the stump of Jesse,
> and a branch shall grow out of its roots.
> The spirit of the Lord shall rest on him,
> the spirit of wisdom and understanding,
> the spirit of counsel and might,
> the spirit of knowledge and the fear of the Lord.
> His delight shall be in the fear of the Lord.
> He shall not judge by what his eyes see,
> or decide by what his ears hear;
> but with righteousness he shall judge the poor,
> and decide with equity for the meek of the earth;
> he shall strike the earth with the rod of his mouth,
> and with the breath of his lips he shall kill the wicked."[29]

The provenance of the Isaianic oracle is uncertain. The reference to the stump of Jesse might be taken to indicate that the line had been cut off, but it is also possible that the oracle was uttered in the Assyrian period, when Jerusalem had been brought to its knees but not destroyed.[30] In any case, this passage becomes a major proof-text of messianic prophecy in the Hellenistic period. In *Psalms of Solomon* 17, the king who would fulfill Isaiah's prophecy is explicitly called "anointed" (Gk. *christos* = Heb. משיח) in v. 32.

---

[29] Find further allusions to this passage in *Pss. Sol.* 18:6–8.

[30] See J. J. M. Roberts, "The Old Testament's Contribution to Messianic Expectations," in *The Messiah* (ed. J. H. Charlesworth; Minneapolis: Fortress, 1992), 45; cf. Horst Seebass, *Herrscherverheissungen im Alten Testament* (Neukirchen-Vluyn: Neukirchener Verlag, 1992), 34–36.

The king in question is filled with a spirit of wisdom, and he is, remarkably, said to be pure from sin, but his role is undeniably violent. The Psalm follows the Greek translation of Isaiah 11 in referring to "the word of his mouth," rather than "the rod of his mouth" as in the Hebrew, but his mission is "to shatter unrighteous rulers, and purify Jerusalem of the nations" (17:22). The Psalm also borrows phrases from Psalm 2, especially v. 9: "you shall break them with a rod of iron and dash them in pieces like a potter's vessel." The task of the Davidic messiah is to kill the wicked, drive out the Gentiles and pave the way for the kingdom of God. The renewed interest in a king as the agent of God in this process must be seen as a reaction to the failure of the Hasmonean kingship, which was not sanctioned by divine authority.

THE DAVIDIC MESSIAH IN THE SCROLLS

The expectation of a Davidic messiah in the Dead Sea Scrolls should also be seen as a reaction against the kingship of the Hasmoneans. This is suggested by two factors. First, the "messiah of Israel" in the Scrolls is paired with a priestly "messiah of Aaron," who takes precedence over him. The separation of functions can be seen as an implicit critique of the Hasmoneans, who, notoriously, combined the kingship and the priesthood.[31] Second, 4Q175 *Testimonia* strings together a series of biblical passages that have rightly been seen as proof-texts for messianic expectation. These are Exod 20:21 in the Samaritan recension (= Deut 5:28–29 + Deut 18:18–19 in the MT), which promises that "I will raise up a prophet like you from among their brethren"; Num 24:25–27 (Balaam's oracle about the star and the scepter); Deut 33: 8–11 (the blessing of Levi); and a passage from the Psalms of Joshua, including Josh 6:26 ("cursed be the man who rebuilds this city"), which refers to "an accursed man, a man of Belial." The first three passages have usually been understood to refer to the prophet and the messiahs of Israel and Aaron, mentioned in 1QS

---

[31] Maier argues that the Zadokites of Qumran would not have objected to the combination, because of the precedents of Levi and Moses ("Messias oder Gesalbter?" 604). But neither Levi nor Moses was king, and both exercised their power before the promise to David, according to biblical chronology.

9.11. The final quotation refers to the rebuilding of Jericho. It now appears that Jericho was rebuilt by John Hyrcanus (134–104 B.C.E.).[32] According to Josephus, Hyrcanus "was accounted by God worthy of three of the greatest privileges, the rule of the nation, the office of High Priest and the gift of prophecy" (*Ant.* 13.299–300). Even though he never proclaimed himself king, he combined the functions of prophet, priest and ruler. It seems plausible, then, that the messianism of the Scrolls, like that of the *Psalms of Solomon*, originated as a critique of the current rule of the Hasmoneans, specifically with reference to their combination of functions that ought to be kept separate. This thesis is not negated by the discovery of a text (4Q448) at Qumran that is a prayer for "Jonathan the King" (Alexander Jannaeus). The Dead Sea sect may well have prayed for Alexander when he was embroiled in struggles against foreign enemies, and against their own opponents, the Pharisees.[33] A temporary alliance in war-time, however, would not necessarily remove their objection to the combination of kingship and priesthood by the Hasmoneans.

The role of the royal messiah in the Dead Sea Scrolls is virtually identical to his role in the *Psalms of Solomon.* The prayer for "the Prince of the Congregation" in the *Blessings* (1Q28b) may serve to illustrate the point:

> The Master shall bless the Prince of the Congregation…and shall renew for him the covenant of the Community that he may establish the kingdom of His people for ever…to dispense justice with [equity to the oppressed] of the land (Isa 11:4a)…
>
> (May you smite the peoples) with the might of your hand and ravage the earth with your scepter; may you bring death to the ungodly with the breath of your lips! (Isa 11:4b)…and everlasting might, the spirit of knowledge and of the fear of God (Isa 11:2); may righteousness be the girdle (of your loins) and may your reins be girded (with faithfulness) (Isa 11:5). May He make your horns of iron and your hooves of bronze; may you toss like a young bull [and trample the peoples] like the mire of the streets! For God has established you as the scepter. The rulers…nations shall serve you.

The resemblance between this passage and *Psalm of Solomon* 17 is twofold. On the one hand, it draws heavily on biblical prophecy, especially Isa 11:1–4. On the other hand, it casts the "prince" in a militant role. He is to restore the kingdom, and in the process to bring death to the ungodly.

---

[32] Hanan Eshel, "The Historical Background of the Pesher Interpreting Joshua's Curse on the Rebuilder of Jericho," *RevQ* 15 (1992): 409–20.

[33] *Ant.* 13.372–383. See Hartmut Stegemann, *Die Essener, Qumran, Johannes der Täufer und Jesus* (Freiburg: Herder, 1993), 187–88.

The miraculous manner of slaying the wicked, with the breath of his lips, does not mitigate the violence of his role.

The blessing of the Prince of the Congregation fits a consistent pattern in the messianic texts in the Dead Sea Scrolls. These texts are based on a small number of biblical prophecies: Isaiah 11 (4QpIsa^a [= 4Q161], 4Q285), Balaam's Oracle in Numbers 24 (CD 7.19–20; 1QM 11.6–7), Genesis 49 (4Q252), 2 Samuel 7 (4Q174) and a few others.[34] These same texts are also interpreted as messianic in other contexts that are remote from Qumran.[35] Philo of Alexandria cites Balaam's oracle from the Greek Bible (the Septuagint or LXX) as a prophecy of a man who will lead his host to war and subdue great and populous nations.[36] The same oracle was cited by Rabbi Akiba when he allegedly hailed Simeon bar Kosiba as messiah in the revolt against Rome in 132 C.E.[37] The fact that the same text is interpreted as messianic in such diverse locations shows that this was a well-established exegetical tradition. Similarly, it is important that the *Psalms of Solomon* are not found at Qumran, and indeed are often thought to derive from the Pharisees, the archenemies of the Dead Sea sect. Here again we see that the expectation of a Davidic messiah was not a peculiarly sectarian idea, but was grounded in an exegetical tradition that was widely known across sectarian lines. Equally, the role of the Davidic messiah is consistently understood as that of militant liberator, from Qumran to Alexandria, and from the *Psalms of Solomon* to the later apocalypses of *4 Ezra* and *2 Baruch*. It was also enacted with tragic consequences by a series of messianic pretenders, culminating with Bar Kochba, in the Roman period.[38]

Was there then anything distinctive about the understanding of the Davidic messiah in the Scrolls? Most scholars would say that the distinctive element lies in the way the kingly messiah is paired with a priestly counterpart, who takes precedence over him. It has long been recognized that this kind of dual messianism corresponds to the organization of the Jewish community in the early postexilic period, as reflected in the latter part of the book of Ezekiel, as well as Zechariah and Chronicles.[39] Ezekiel 40–48 relegates the prince to a cultic role, subordinate to the High Priest.

[38] Collins, *The Scepter and the Star*, 195–214.

[39] See especially Shemaryahu Talmon, "Waiting for the Messiah. The Spiritual Universe of the Qumran Covenanters," in *Judaisms and Their Messiahs* (ed. J. Neusner, W. S. Green, and E. S. Frerichs; Cambridge: Cambridge University Press, 1987), 111–37.

The two "sons of oil" in Zechariah reflect the dual leadership of Zerubbabel and the High Priest Joshua at the time of the restoration. It is possible that the sectarians of the Scrolls had this early postexilic period in mind as an ideal, but the evidence is sparse. (There is only one reference to Zech 4:14 in the Scrolls, in 4Q254 frag.4 line 2, which is a very fragmentary text).[40] Closer to the world of the Scrolls is the *Temple Scroll*, which is probably not a product of the Dead Sea sect but part of the corpus of related literature. There we read that the king is not granted independent authority: "He shall not go until he has presented himself before the High Priest, who shall inquire on his behalf for a decision by the Urim and Tummim. It is at his word that he shall go and at his word that he shall come, he and all the children of Israel who are with him. He shall not go following his heart's counsel until he has inquired for a decision by Urim and Tummim" (11Q19 58.18–21). The *Temple Scroll* is here indebted to Deuteronomy 17, which also limits the authority of the king. In the *Temple Scroll*, however, the king is not an eschatological messiah. His rule is conditional and he is not said to fulfill messianic prophecy. The relation between the king and the priests, however, is quite in line with what we find in the sectarian scrolls. The *Isaiah Pesher* (4QpIsa^a [= 4Q161]) frags. 8–10, col. 3.22–25 interprets Isa 11:3 ("he shall not judge by what his eyes see, or decide by what his ears hear") as "according to what they teach him, he will judge…with him will go out one of the priests of renown."

The subordination of the king to the High Priest is readily intelligible in view of the history of Second Temple Judaism, where the High Priest was nearly always the ultimate authority. Moreover, it is scarcely possible to imagine an eschatological restoration of Israel without a High Priest. Nevertheless, none of the Pseudepigrapha that mention a messiah, *Psalms of Solomon*, the Similitudes of Enoch (*1 Enoch* 37–71), *4 Ezra*, *2 Baruch*, mention a priest in conjunction with him. Consequently, it is reasonable to conclude that the Dead Sea sect gave a higher rank to the High Priest of the end time than was customary in messianic writings from other sources. It is true, of course, that not all messianic texts found at Qumran mention two messiahs.[41] But several do, and dual messianism is especially characteristic of the major rule books, the *Rule of the Community* and *Damascus Document*. It is still disputed whether the expression "messiah of

---

[40] See Craig A. Evans, "'The Two Sons of Oil:' Early Evidence of Messianic Interpretation of Zechariah 4:14 in 4Q254 4 2, " in *The Provo International Conference on the Dead Sea Scrolls* (ed. D. W. Parry and E. Ulrich; *STDJ* 30; Leiden: Brill, 1999), 566–75.

[41] Martin G. Abegg, Jr., "The Messiah at Qumran: Are We Still Seeing Double?" *DSD* 2 (1995): 125–44.

Aaron and Israel" in the *Damascus Document* should be interpreted as referring to one figure or two. But it should be noted that Balaam's Oracle is interpreted with reference to two figures in CD 7.18–20. 1QS^a (*Rule of the Congregation*), 1QS^b (*Blessings*), 4Q174 (*Florilegium*) and 4Q175 (*Testimonia*) are all plausibly interpreted as reflecting dual leadership in the eschatological community. Some of the texts that mention only one messianic figure (4Q246, 4Q521) may not be products of the Dead Sea sect, but part of a wider corpus of literature.

The relation of the Scrolls to early Christianity on the subject of the Davidic messiah is more complex. The New Testament claims unambiguously that Jesus was the Davidic messiah, the fulfillment of the prophecies of old. Yet there is little correspondence between the career of Jesus, as described in the Gospels, and the kind of role that the Davidic messiah was expected to play. Jesus did not drive out the Gentiles or slay the wicked. How Jesus came to be identified as the Davidic messiah remains one of the great puzzles of early Christianity. While filling out our understanding of what a Davidic messiah was supposed to be, the Scrolls only exacerbate the problem of the discrepancy between that role and the actual career of Jesus. Contrary to Johann Maier, nobody could have come up with the description of the Davidic messiah given above on the basis of a retrojection from the New Testament. The understanding of the Davidic messiah at Qumran is an embarrassment for New Testament scholarship, since it is clear that Jesus did not fit the role of the Davidic messiah as it was generally understood.

The ambiguity of the relationship between the messianic texts from Qumran and the New Testament may be illustrated with reference to 4Q246, the so-called *An Aramaic Apocalypse ar* or "Son of God text." There we read of a figure who will be called "Son of God" and "Son of the Most High" in language that corresponds exactly to that applied to Jesus in the Gospel of Luke. The Lukan parallel argues powerfully that the figure in question is the Davidic messiah: "He will be great, and will be called the Son of the Most High, and the Lord God will give to him the throne of his ancestor David" (Luke 1:32). Moreover there is a clear basis for referring to the messiah as "Son of God" in 2 Sam 7:13 ("I will be a father to him and he will be a son to me," which is interpreted in the *Florilegium*: "he is the Branch of David…") and in Psalm 2 ("you are my son, this day I have begotten you").[42] But if this figure is interpreted as the Davidic messiah in 4Q246, then his role conforms well to that of the Davidic messiah in *Psalms of Solomon* 17: "He will judge the earth in truth and all will make peace. The sword will cease from the earth and all cities will pay him homage. The great God will be his strength. He will make war on his behalf, give nations into his hand and cast them all down before him…" So while the language of this text is applied to Jesus in the Gospel of Luke, the concept of messiah in the Gospel is very different. The Aramaic text confirms the picture that has already emerged of the Davidic messiah as the warrior liberator of Israel. The title "Son of God" carries no implication of virgin birth or trinitarian (or binitarian) status in a Jewish context.[43]

---

[42] Some scholars argue that the "Son of God" figure is a negative figure, possibly a Syrian king. The argument rests on a lacuna in the text before the rise of the people of God in column 2, and contends that everything prior to this lacuna must be negative. This reasoning is not compelling. So, e.g., Émile Puech, "Some Remarks on

A final question about the role of the Davidic messiah should be addressed. Maier has argued persuasively that in Jewish understanding the role or function is more important than the person of the messiah. This holds true for the Davidic messiah. We are told nothing whatever about his personality. (Presumably, he had not yet come.) It scarcely matters whether the mission is accomplished by a single messiah, or whether a new dynasty is imagined. The Scrolls do not discuss what happens to the messiah after his mission is accomplished. Presumably, he establishes a kingdom of Israel on earth. A few passages in the Scrolls suggest that this is not the end. A hymn in the Hodayot anticipates a final conflagration, when "the torrents of Belial shall reach to all sides of the world…and shall consume the foundations of the earth and the expanse of dry land" (1QH 11.29, 31). But in fact the Scrolls show little interest in describing what will eventually take place on earth, and pay greater attention to the fellowship that the elect enjoy with the angelic host.[44] It is enough that the wicked are defeated, and that individuals are rewarded or punished. It is not clear whether the messianic kingdom will last forever. The analogy of other apocalyptic writings, such as *4 Ezra* and Revelation, suggests that it will not. (In *4 Ezra* 7 the messiah reigns for 400 years and then dies. Revelation anticipates a 1,000 year reign of Christ.) But this question is not clearly addressed by the Scrolls. It must

4Q246 and 4Q521 and Qumran Messianism," in *The Provo International Conference on the Dead Sea Scrolls* (ed. D. W. Parry and E. Ulrich; *STDJ* 30; Leiden: Brill, 1999), 545–65. The most developed argument for the negative view is provided by Edward M. Cook, "4Q246," *BBR* 5 (1995): 43–66. See my rejoinder, "The Background of the 'Son of God' Text," *BBR* 7 (1997): 1–12.

[43] While the expression "son of God" is sometimes used with reference to angelic beings (cf. Genesis 6), it is also applied collectively to the people of Israel (Exod 4:22–23; Hos 11:1) and to the righteous man (Wis 2:13, 16).

[44] See further John J. Collins, *Apocalypticism in the Dead Sea Scrolls* (London: Routledge, 1997), 110–29.

suffice to say the messianic kingdom is a necessary stage in the fulfillment of prophecy, but it is not necessarily the end of history.

THE PRIESTLY MESSIAH

The messiah of Aaron was expected to atone for the sin of the people (CD 14.19). According to 4Q541 (*Testament of Levi ar*) "He will atone for the children of his generation, and he will be sent to all the children of his people." The atonement is presumably made by offering the appropriate sacrifices; there is nothing to suggest that he was expected to make atonement by his own sufferings.[45] There is no place for such a cultic functionary in early Christian eschatology. When the Epistle to the Hebrews identifies Jesus as high priest (Heb 8:1–7), it is at pains to point out that he is a heavenly priest, and to contrast him with "priests who offer gifts according to the Law," and who "offer in a sanctuary that is a sketch and shadow of the heavenly one."

The eschatological high priest also had an important role as teacher. 4Q541 continues: "His word is like a word of heaven, and his teaching conforms to the will of God. His eternal sun will shine, and his fire will blaze in all the corners of the earth." The blessing of the priests in 1QS^b, the scroll of *Blessings*, describes them as those whom God has chosen "to confirm his covenant forever and to inquire into all his precepts in the midst of all his people, and to instruct them as he commanded" (1QS^b 3.23–24). The *Testimonia* (4Q175) represents the priestly messiah by the blessing of Levi from Deuteronomy 33: "They shall cause thy precepts to shine before Jacob and thy Law before Israel. They shall send up incense towards thy nostrils and place a burnt-offering upon thine altar." When the *Florilegium* (4Q174) says that the branch of David will arise with the Interpreter of the Law at the end of days, this should be taken as another way of referring to the messiahs of Israel and Aaron.

Johann Maier, however, has argued that the office of Interpreter of the Law was distinct from that of the High Priest.[46] This office had its alleged biblical basis in Deuteronomy 18:15 (the prophet like Moses) and Exodus 18, where Moses judges the people. The evidence that such an office persisted in the Second Temple period is supplied by the paraphrase of Deuteronomy in Josephus, *Ant.* 4.218: "But if the judges see not how to pronounce upon the matters set before them…let them send up the case entire to the holy city and let the high priest and the prophet and the council of elders meet and pronounce as they think fit." The corresponding text in Deut 17:8–9 reads: "If a judicial decision is too difficult for you…then you shall go up to the place the Lord your God will choose, where you shall consult with the levitical priests and the judge who is in office in those days…" The "council of elders" is patently an anachronistic reference to Josephus' own time. Maier assumes that the "prophet" is likewise a contemporary institution, which determines authoritative legal rulings. It is very doubtful, however, whether such an office can be inferred from a paraphrase of the Pentateuch in Josephus. Maier argues that this office is implied in 1 Macc 4:46, where the altar stones are stored "until a prophet should come to tell what to do with them," and in 1 Macc 14:41, where Simon is appointed leader and high priest "until a trustworthy prophet should arise."[47] Allegedly, the office had been disrupted during the Maccabean crisis, and was temporarily vacant. Most scholars, however, think that the prophet in question is eschatological, and that Simon's appointment as high priest was, in effect, indefinite, since this prophet was not expected to come any time soon.

---

[45] See idem, "The Suffering Servant at Qumran?" *BRev* (December, 1993): 25–27, 63.

[46] Johann Maier, *Der Lehrer der Gerechtigkeit* (Franz Delitzsch Vorlesung, 1995; Münster: Institutum Judaicum Delitzschianum, 1996), 12–17.

The office of "Interpreter of the Law" is otherwise attested only in the Dead Sea Scrolls. A famous passage in CD 6.11 distinguishes between an Interpreter of the Law who is clearly past and "he who comes to teach righteousness in the end of days."[48] Elsewhere, the Teacher of Righteousness is a figure of the past, and the Interpreter of the Law is expected in the messianic age in the *Florilegium* (4Q174, frags. 1–3 col. 1.11–12). This fluctuation in terminology is only intelligible if Interpreter and Teacher were identified as offices which might be held at various times by different individuals. The Teacher of Righteousness who played an important part in the history of the Qumran community was clearly a priest. (He is explicitly so identified in the pesher on Psalm 37 (4Q171 4.15). There is no good evidence that he ever functioned as high priest in Jerusalem, but his followers may well have regarded him as the legitimate high priest.[49] But the institution of Teacher/Interpreter seems to be distinctive to the Dead Sea sect. Since the one known historical Teacher was a priest, it is probable that his eschatological counterpart would be the eschatological messiah of Aaron, but it is also possible that he was identified with the prophet like Moses, or that the eschatological priest and prophet were not always clearly distinguished.[50]

THE PROPHET

Despite the famous reference in 1QS 9.11 to the prophet and the messiahs of Aaron and Israel, the eschatological prophet remains a shadowy figure in the Scrolls. He appears most clearly in 11Q13 (*Melchizedek*), as the herald of good tidings (מבשר) of Isa 52:7. There he is identified as "the anointed of the spirit" (משיח הרוח) of whom Daniel spoke (Dan 9:25 or 26). This phrase is an allusion to Isa 61:1 where the prophet declares: "The spirit of the Lord God is upon me, because the Lord has anointed me; he has sent me to bring good news to the oppressed, to bind up the brokenhearted, to proclaim liberty to the captives, and release to the prisoners…"

The function of preaching good news to the poor also figures prominently in 4Q521: "and the glorious things that have not taken place the Lord will do as he s[aid] for he will heal the wounded, give life to the dead, and preach good news to the poor…" In this case God is the grammatical subject, but such preaching is usually the work of a herald or messenger. In fact, the fragment in question begins: "heaven and earth will obey his messiah [and all th]at is in them will not turn away from the commandments of holy ones." I have argued that the messiah in question is the "anointed of the spirit," the prophet who preaches good news in Isaiah 61 and 11Q13 (*Melchizedek*).[51] Since his functions here include giving life to the dead, I have suggested that he has taken on the characteristics of Elijah, who was expected to return before the great and terrible Day of the Lord (Mal 4:5).

---

[50] Michael O. Wise, in *The First Messiah* (San Francisco: HarperCollins, 1999), argues that the Teacher of Righteousness was a messiah, and that he identified himself as the Suffering Servant of Isaiah's prophecies. See my critique, "Teacher and Servant," *RHPR* 80 (2000): 37–50. Israel Knohl, in *The Messiah Before Jesus* (Berkeley: University of California, 2000), argues that an Essene teacher, Menahem, was regarded as a messiah. See my review in *JQR* 91 (2000): 85–90.

[51] John J. Collins, "The Works of the Messiah," *DSD* 1 (1994): 98–112; idem, "A Herald of Good Tidings: Isaiah 61:1–3 and Its Actualization in the Dead Sea Scrolls," in *The Quest for Context and Meaning: Studies in Biblical Intertextuality in Honor of James A. Sanders* (ed. C. A. Evans and S. Talmon; Leiden: Brill, 1997), 225–40.

Against this interpretation of 4Q521, some scholars have objected that since "his messiah" (משיח) is in parallelism with "holy ones" it should be read as a plural (משיחיו: anointed ones) spelled defectively, and so the reference is not to an individual "messiah" at all.[52] This argument is not necessarily compelling. There is a striking parallel to these lines in *Pss. Sol.* 17:43, where it is said of the Davidic messiah that "his words are as the words of holy ones (*hōs logoi hagiōn*) in the midst of sanctified peoples." "Holy Ones" are normally angels in Jewish texts of this period.[53] The comparison exalts the authority of the messiah. It is quite plausible then that the authority of an individual messiah is paralleled with that of angelic "holy ones" in 4Q521. But we should bear in mind Maier's valid observation that in Jewish texts the focus is on the office rather than on the individual person. The purpose of 4Q521 is not to announce the coming of an eschatological prophet, but to proclaim the "works of the Lord" which include the preaching of good news, which is usually accomplished through a prophet or herald. This is most probably the "messiah" or "anointed one" mentioned at the beginning of the fragment, but this figure is not the focus of attention in 4Q521.

There were two possible paradigms for an eschatological prophet in Second Temple Judaism: the prophet like Moses of Deuteronomy 18 and the return of Elijah, promised in Mal 4:5. We have seen that Deuteronomy 18 is cited in the Testimonia, and it is possible that the "Interpreter of the Law" (דרש התורה) is associated with this figure. The prophet like Moses, however, is not well attested in Jewish texts from the Second Temple period, apart from Qumran.[54] While Jesus is cast in this role in the Gospel of Matthew,[55] the Torah never occupies as central a place in Christianity as it does in Judaism.

Neither is the expectation of Elijah widely attested, although Ben Sira, who has little eschatological interest, says that "at the appointed time" he will return to calm the wrath of God, turn the hearts of parents to their children and restore the tribes of Jacob (Sir 48:10). His role is well developed in later Jewish tradition,[56] and is mentioned explicitly in a very fragmentary text from Qumran (4Q558).[57] In the Gospels, the disciples ask Jesus "why do the scribes say that Elijah must come first?" but Jesus replies that Elijah has already come, apparently with reference to John the Baptist.[58] There is some evidence that Jesus was initially thought to be Elijah or a prophet (Mark 8:27: "who do people say that I am? And they answered him, 'John the Baptist,' and others, 'Elijah,' and still others 'one of the prophets'"; cf. Mark 6:15). But the Gospels insist that Jesus is greater than these.

CONCLUSION

Johann Maier has performed a useful service in calling attention to the functional, institutional focus of Jewish eschatology, but his claim that the scholarly reconstructions of messianism in the Scrolls are unduly influenced by Christian interests is unfounded. The Dead Sea sect expected that the kingship and priesthood would be restored in the end of days, and made a qualitative distinction between the "messiahs" who would fulfill the prophecies of old and the historical anointed rulers of the past. While the Hebrew texts use the same word משיח with reference to the historical past and the eschatological future, the difference is clear from contextual usage. The scholarly convention by which the word "messiah" refers to figures of the end-time is helpful in clarifying this distinction.

The expectations of the Dead Sea sect with regard to ruler figures were not greatly different from those of other Jews of the period. The hope for a warrior messiah from the line of David, who would drive out the Gentiles, was widespread among various groups. The Dead Sea sect gave distinctive prominence to the high priest of the end-time, the messiah of Aaron, and emphasized his teaching role, but all of this was based on scriptural precedent. It would scarcely be possible to imagine a restoration of Israel without an eschatological high priest; only his prominence here is distinctive. The eschatological prophet has only a minor role in the Scrolls, and this, again, is in accordance with what we know of Second Temple Judaism in general.

[57] Émile Puech, *La Croyance des les Esséniens en la Vie Future* (Paris: Gabalda, 1993), 676–77.

[58] Mark 9:11; Matt 17:10.

Early Christianity was heir to the same expectations as other Jews of the time, but modified its expectations in light of the experience of Jesus. The New Testament dispensed with the messiah of Aaron, at least insofar as he was expected to preside over cultic worship in Jerusalem. Much of the earthly career of Jesus suggests a prophet in manner of Elijah, but ultimately the Gospels reject this role and insist that Jesus is the messiah son of David. The role of the Davidic messiah, however, was radically redefined.[59] Jesus did not drive the Gentiles out of Jerusalem or restore the kingdom of Israel. To a great degree, however, the militant role of the messiah was transferred in Christianity to the Second Coming. The portrayal of Jesus in the New Testament that corresponds most closely with Jewish expectations is found in the book of Revelation, where he comes from heaven to strike down the nations with the sword of his mouth (Rev 19:11–16).

The Dead Sea Scrolls shed much light on the messianic expectations of early Christianity by clarifying the expectations that were current at the time. But the relationship of Christianity to its Jewish heritage is ambiguous. On the one hand, the understanding of Jesus as Christ, or Messiah, is incomprehensible apart from its Jewish context. On the other hand, Christianity to a great extent defined itself over against Judaism as the parent religion, and in the process redefined the categories of messianism. Contrary to the argument of Johann Maier, our understanding of the messianism of the Scrolls is very far from a retrojection of Christian understandings. The contrasts with early Christianity are often more illuminating than the continuities. But this is also true of the relationship between the Scrolls and rabbinic Judaism. The importance of the Scrolls is precisely that they illuminate a period of Jewish history before Christianity and rabbinic Judaism went their separate ways. They should not be assimilated to either tradition, but the continuities with both traditions must be of equal importance to the historian of religion.

CHAPTER SIX

THE LAW AND SPIRIT OF PURITY AT QUMRAN

Joseph M. Baumgarten

Half a century marks a prominent milepost in the saga of the Dead Sea Scrolls, but for some of us, contemporaries of the generation of Mohammed ed Dhib, it is also the natural time to evaluate what we have accomplished and seriously consider the benefits of retirement. In fact according to CD 10 our continued participation in deliberations on the nature of the Qumran community may be downright illegal: ואל יתיצב עוד מבן ששים שנה ומעלה לשפוט את העדה. Those who are sixty years old or older shall no longer stand to judge the congregation. The reason given is rather blunt and lacking in polite deference to the dignities of age: "For through the burning wrath of God against those who dwell on earth he has decreed that their intelligence should depart before they complete their days" (this would be an appropriate time to sit down). If I nevertheless stand before you it is because the organizer of this symposium could not find anyone foolhardy enough to hold forth on the fascinating subject of ancient purity laws in an after-dinner setting at eight o'clock in the evening. In a vain effort to add some excitement to the topic, he suggested phrasing the title "The Threat of Purity." I don't know precisely what "threat" he had in mind, but I would have none of it.

The word "threat" reminded me of a piece that I wrote many years ago in response to a prominent rabbinic historian who depicted the Scrolls as a threat to halakah. He was concerned about the deviations in the Scrolls from normative rabbinic law and found solace in the stalwart view of Solomon Zeitlin that the Scrolls were not ancient at all, but were the products of obscure Jewish dissidents of the medieval period. I recall asking him rhetorically whether he was equally concerned about the similar halakic deviations found in the *Book of Jubilees*, which even Zeitlin deemed to be ancient, though its Qumran Hebrew fragments were at that time as yet unpublished. The question remained unanswered, but the episode serves for me as a reminder that involvement in the study of Qumran law by erstwhile Yeshiva students was in those days viewed as somewhat hazardous.

The views about Qumran legalism among some historians of religion have up to the present remained equivocal. For a long time the only significant corpus of sectarian religious law was that embedded in the *Damascus Document* and there are still scholars with lingering doubts as to whether it is original. Hopefully the recently published Cave 4 manuscripts will dispel these doubts and also put an end to the strange phenomenon of truncated editions of this foundational communal text from which the central core of laws is missing.

Even those scholars who were aware of the extent and centrality of Qumran legal writings appear to have had difficulty with understanding how this fact could be reconciled with the spiritualistic fervor and eschatological tension characteristic of the community. The suggestion was made that the nomistic concerns with family life, the Sabbath, and purity may be attributed to the influx of newcomers with Pharisaic tendencies during the sect's exile in Damascus. This reflects the rather dubious notion that the Essenes were not themselves concerned with the rigors of the Law.

Another approach commences from the premise that intense eschatological expectation must inevitably lead toward the relaxation of law. This, it is claimed, is phenomenologically illustrated not only by the teachings of Paul but by certain dicta concerning halakic innovations in the "future to come" found in late rabbinic sources. W. D. Davies in his *Torah in the Messianic Age* has drawn attention to these dicta and Gershom Scholem has explored their possible influence on radical Sabbatian messianism in the seventeenth century. Aside from the huge chronological gap which separates these dicta from the Second Temple period, their problematic and speculative nature may be illustrated by one found in *Midrash Tehillim* on Ps 146:7:

> The Lord loosens the bonds מתיר אסורים. What does the verse mean by the words loosen the bonds? Some say that every animal whose flesh it is forbidden to eat in this world, the Holy One, blessed be he, will declare in the time-to-come that the eating of its flesh is permitted....Others say though nothing is more strongly forbidden than intercourse with a menstruant...in the time-to-come, God will permit such intercourse...Still others say that in the time-to-come sexual intercourse will be entirely forbidden. You can see for yourself why it will be. On the day that the Holy One, blessed be he, revealed Himself on Mount Sinai to give the Torah to the children of Israel, He forbade intercourse for three days...Now since God, when He revealed Himself for only one day, forbade intercourse for three days, in the time-to-come, when the presence of God dwells continuously in Israel's midst, will not intercourse be entirely forbidden?

Whether or not one finds this syllogism persuasive, the midrash clearly demonstrates that speculation about the eschaton does not lead unequivocally toward the abrogation of the law. For some it may evoke the opposite, a conscientious search for greater rigor in complying fully with the standards of purity thought to be implicit in the Law.

Which direction was the one that predominated at Qumran? Rather than offering our own *a priori* theories we would be well advised to see what the Qumran texts themselves have to say about the eschatological status of the laws.

4QpIsa^{b}(= 4Q162) col. 2, *Isaiah Pesher 2* about the end of days אחרית הימים applies the prophet's castigation of those who "rejected the law of the Lord" (5:24) to the congregation of "scoffers" *of* Jerusalem. Another pesher (4QpIsa^{c} [= 4Q163] 23 2), *Isaiah Pesher 3*, also pertaining to the end of days, identifies this congregation as that of the Seekers After Smooth Things, the well-known sobriquet for the Pharisees. Their lenient interpretation of the Torah was ostensibly viewed as corrupt even in the end of days, or more precisely, especially in the end of days.

The latter emerges emphatically from the conclusion of the halakic letter known as MMT (aka *Some Works of the Torah*, 4QMMT^{a-f} [= 4Q394–399]). The anonymous writer believed his generation to be that of the end of days אחרית הימים, the Mosaic warnings about which had already been fulfilled. "And this is the end of days when they will repent in Israel fore[ever]." He therefore appealed to his correspondent not to delay his acceptance of the true interpretation of the priestly laws of the Torah: הישר והטוב ונחשבה לך לצדקה בעשותך "and it shall be reckoned for you as righteousness when you do that which is upright and good." The editors of MMT did not deal with the theological dimensions of the text, but they were certainly aware of the fact that the phraseology of this passage derives from Gen 15:6, "And [Abraham] believed in God and it was reckoned to him as righteousness" ויחשבה לו צדקה. Interestingly, this *locus classicus* of later Pauline exegesis is here applied to the proper performance of deeds of the Law in the time of the eschaton.

This, of course, does not mean that the laws were thought of as totally unaffected by the progress of time. It was recognized early on that Qumran teaching involved a concept of progressive revelation as the source for the unfolding knowledge of the Torah. As the *Rule of the Community* puts it, "It (the clearing of the highway in Isaiah 40:3) is the searching of the Torah מדרש התורה which He commanded through Moses to do according to everything which is revealed from time to time עת בעת and as the prophets have revealed by his holy spirit" (1QS 8.15–16). The searching מדרש התורה was continuing in the life of the community, resulting in rules classified as משפטים ראשונים ואחרונים, the "earlier" and the "later" laws.

This developmental concept has led some scholars to speak of the "relativization" of the Law in which Moses is only the first of an ongoing series of inspired lawgivers. W. D. Davies observed some years ago that, "there are passages which imply that the Law under which the sect is living is not completely adequate" in contrast with "the prevailing view in Judaism…that the Law given on Sinai was perfect and eternal." He took this as a sign of a "Judaism at the boiling point" and "straining at the leash of the Law."[1]

The projection of such antinomian misgivings upon the Qumran community lacks support from their writings. It is true that they believed in ongoing illumination of the true meaning of the law, culminating with the coming of the messiah of Aaron and Israel, when their previous misapprehensions of its hidden aspects would be forgiven (CD 12.22–13:1; 14, 18–19). This, however, hardly means that they looked forward to the ultimate abrogation of the legal force of the Torah. To the contrary, they expected their hypernomistic interpretation of the law of Moses to be ultimately recognized as truth.

Some scholars have claimed to find symptoms of theological conflict in the lack of references to religious laws in the lyrical hymns and moralistic Qumran works. Actually there is an appreciable number of references to the Law, but the scarcity of legal details in the *Thanksgiving Hymns* and prophetic commentaries reflects their genres, not any tension between legal tradition and perfectionist piety. What is noteworthy about the Qumran literature is the coexistence of these ostensibly contrasting genres as the creations of the same religious community. This would appear to call for a reconsideration of the conventional view, which assumes legal and pneumatic concerns to be irreconcilable.

I should now like to illustrate how these considerations may apply to purity, a phase of religious law, which emerged with unprecedented prominence in the Second Temple period. While the biblical rules of purity were primarily centered around the sacred sphere of the Temple, there was in Second Temple times a pious trend to extend their applicability beyond the priesthood and into the daily life of the home. This trend is likewise reflected in Tannaitic sources, which is indispensable for the understanding of the supererogatory standards espoused by the legists of the Qumran community. We have been engaged in editing the Qumran Cave 4 fragments concerning purity and attempting to define their departures from Pharisaic halakah.[2] Much of this work involves technical aspects of purity and the effort to formulate the exegetical principles that were involved. However, this work should not be without interest for students of early Christianity. Allow me two brief illustrations.

---

[1] William D. Davies, "Paul and the Dead Sea Scrolls: Flesh and Spirit," in *The Scrolls and the New Testament* (ed. K. Stendahl; New York: Harper, 1957), 281n86.

[2] Joseph Baumgarten et al., eds., *Qumran Cave 4.XXV: Halakhic Texts* (DJD 35; Oxford: Clarendon, 1999), 35.

1. The *Epistle of Barnabas*, a Christian theological tract thought to stem from about the end of the first century C.E., contains the following interpretation of the red cow ritual:

> But what do you think it typifies, that the commandment has been given to Israel that the men in whom sin is complete offer a heifer and slay it and burn it, and that boys then take the ashes and put them into vessels and bind scarlet wool on sticks (see again the type of the Cross and the scarlet wool) and hyssop, and that the boys all sprinkle the people thus one by one in order that they all be purified from their sins?[3]

A comparison of the details of this description with the halakah found in the Mishnah and *Tosefta* was already initiated by an historian of the rabbinic age, Gedalia Alon.[4] The following is the perhaps somewhat embellished description of the procedure preserved in *m. Parah* 3:2:

> There were courtyards in Jerusalem built upon rock, with hollow space under them (thus avoiding the concern) for underground graves. They would bring pregnant women and they would give birth there and rear their sons there. They would bring oxen with doors upon their backs, and the children would sit upon them, with cups of stone in their hands. When they arrived at the Siloam, they descended and filled them.

After they mixed ashes kept from previous red cow rites with the water, the children would sprinkle it upon the priest who was to perform the current rite (*m. Parah* 3:1). The ostensible aim of these precautions and the use of children reared in purity was to eliminate the possibility that those preparing the water and the ashes might themselves be carriers of corpse impurity.

Interestingly, we now have Qumran texts which specifically reject this Pharisaic stratagem of using young boys to do the sprinkling. They insist that only a priest of mature age was qualified to accomplish the purgation by means of the sprinkling waters. Here we have another Qumran-Pharisaic dispute over purity, which at the same time serves to confirm the historicity of the account found in the Mishnah.

Our second illustration concerns the use of sprinkling water for general purification from any sort of ritual uncleanness. The classical biblical locus for the use of sprinkling water for lustration is Numbers 19, where water containing the ashes of a red cow is sprinkled upon those who have become impure through contact or being under the same roof with a corpse. 4Q277 elaborates on the procedure, adding the controversial Qumran stringencies that those who perform the ritual must wait for sundown after bathing and, as we just noted, that the one who sprinkles the water must be a priest of mature age. It further states that the sprinkling water effectively accomplishes purification not only from corpse impurity but from any other source of uncleanness [מכל] טמאה אחרת.

---

[3] *Barn.* 8:1, *The Apostolic Fathers* I (trans. K. Lake; Cambridge: Harvard University Press, 1959), 369.

[4] Gedalia Alon, *Mehkarim be-toldot Yisra*ʾ*el* (Tel-Aviv: HaKibbutz HaMeuchad, 1957), 1:296–302. (Hebrew)

Such an extension of the use of sprinkling water for impurities other than those stemming from the dead appears to be reflected in a number of Qumran texts. We have found such allusions in passages pertaining to sexual impurity as well as the general impurity thought at Qumran to be inherent in all transgressors of the law (1QS 5.14). Thus, we have a description of the lustration required for the atonement of sin:

> It is by the holy spirit uniting him to his truth that he can be cleansed from all his iniquities. It is by humbling his soul to all God's statutes that his flesh can be cleansed by sprinkling with waters of purification and by sanctifying himself with waters of purity יטהר בשרו להזות במי נדה ולהתקדש במי דוכי (1QS 3.7–9).

This passage describes the purification characteristic of the Qumran community in which external ablutions, in this case sprinkling with water for lustration, are effective only when coordinated with inner receptivity for the divine holy spirit. We shall return to this in what follows.

The notion that the sprinkling of water, which in normative halakah is confined to purification from corpse impurity, could be extended to other kinds of impurity at first seems anomalous. However, it is possible to identify scriptural passages that would facilitate such a notion, and to point out later sources in which it reemerged.

Ps 51:9 has the prayer תחטאני באזוב ואטהר "Purge me with hyssop, and I shall be clean." The hyssop was used for sprinkling upon those defiled by a corpse (Num 19:17). It aroused the query in the *Midrash on Psalms*, "Did David actually fall into uncleanness? No, but into an iniquity whereby his soul was wounded unto death, as he said: My heart is wounded (חלל) unto death within me (Ps 109:22)." The Midrash infers from this "that every man who commits a transgression is as unclean as though he had touched a dead body and must be purified with hyssop."[5] This inference harmonizes quite well with the Qumran view that all transgressors of God's word are impure, except that at Qumran it appears to have been more than a metaphor.

---

[5] *The Midrash on Psalms* (trans. W. G. Braude; New Haven: Yale University, 1959), 472.

In Num 8:7 the purification of the Levites is described as requiring the sprinkling of מי חטאת. Mediaeval and modern commentators have identified this sprinkling water with the מי נדה of Numbers 19.[6] Rashi, in fact, took its purpose to be the purification of the Levites from possible corpse impurity. Yet, this is not stated in the text. It is quite plausible that other exegetes supposed this sprinkling water to be intended for general cleansing from any possible source of impurity.

Such an approach is indeed reflected in *Siphre Zuta*:

> ...]הלויים נתקדשו בהזייה ישראל נתקדשו בפרת חטאת
> שנאמר דבר אל בני ישראל ויקחו אליך פרה אדומה[7]

Here the red cow is designated as the means by which Israel was sanctified. Gedalia Alon properly took this to mean that the covenant at Sinai, just as the inauguration of the Levites, was preceded by sprinkling.[8] This inference may be supported by reference to Philo, who says that the people at Sinai "had cleansed themselves with ablutions and sprinklings λουτροῖς τε καὶ περιρραντηρίοις (*Decal.* 45).

New Testament scholars have observed that in Hebrews 9 the description of the sanctification associated with the "first covenant," that is the one at Sinai, appears to conflate diverse purification rituals:

> For when every commandment had been told to all the people by Moses in accordance with the law, he took the blood of calves and goats, with water and scarlet wool and hyssop, and sprinkled both the scroll itself and all the people, saying, "This is the blood of the covenant that God has ordained for you." (Hebrews 9:19)

The sprinkling of the blood of oxen and the recitation accompanying it is found in Exodus 24, but the water, the scarlet, and the hyssop derive from the ritual of the red cow, which is mentioned in Heb 9:13. However, in view of what we have found at Qumran, the association of purification by water containing the ashes with the covenant at Sinai no longer appears so remote, although the Jewish sources which we cited allude to it as preparatory to the covenant rather than its sequel. We must also leave to New Testament scholars the problematic mention in some textual witnesses of goats and the sprinkling of water upon the scroll. Nevertheless, I hope that this illustration may serve as another indication of how the details of purification may be relevant to the Christian exegesis of pentateuchal laws.

---

[6] For a recent discussion of this question see Baruch A. Levine, *Numbers 1–20* (AB 4A; New York: Doubleday, 1993), 274–75.

[7] H. Saul Horovitz, *Siphre zuta le-seder ba-Midbar*, in *Siphre d'Be Rab* (Jerusalem: Wahrmann Books, 1966), 251 (Hebrew); repr. of 1917 Leipzig edition.

[8] Alon, Ibid, 1:139. (Hebrew) See there Jacob Epstein's editorial note, which questions whether this midrash is an integral part of *Sipre Zutta.*

We should now like to indicate what may be learned from Qumran about the moral-ethical dimension of purification. In modern scholarship on the Essenes one frequently encounters the notion that repeated immersion for ritual purity could not possibly have had any spiritual significance. The questionable validity of this assumption already emerges from the fact that the level of purity attained by senior Essenes was proportional to their standing in the spiritual ἄσκησις practiced by the order:

> They are divided, according to the duration of their discipline, into four grades; and so far are the junior members inferior to the seniors, that a senior if but touched by a junior, must take a bath, as after contact with an alien. (*J.W.* 2.150)

It is also noteworthy that "ritual" purification was held to be a prerequisite of prophecy by the Essenes, who were highly regarded for this pneumatic gift. For prophesying they not only utilized the books of the prophets, but, as Josephus reports, "various forms of purification" διαφόροις ἁγνείαις (*J.W.* 2.159).

As far as Qumran is concerned, the link between purity of body and spirit is salient throughout the literature. One of the primary duties of the covenanters was "to separate from all impurities, according to their law and to let no man defile his holy spirit" (CD 7.3–4). "Defiling their holy spirit" is juxtaposed with failure to separate from menstruants and incest, among the cardinal sins attributed to their contemporaries (CD 5.7–11). The insistence that acceptance of the holy spirit רוח קדושה precede "sprinkling with waters of purification" is emphatically articulated:

> It is by the holy spirit uniting him to his truth, וברוח קדושה ליחד באמתו, that he can be cleansed from all his iniquities…It is by humbling his soul to all God's statutes that his flesh can be cleansed by sprinkling with waters of purification and by sanctifying himself with waters of purity. (1QS 3.7–9)

This passage describes the purification characteristic of the Qumran community in which external ablutions, in this case sprinkling with water for lustration, are effective only when coordinated with inner receptivity for the divine holy spirit.[9]

---

[9] In his illuminating study, *John the Baptizer and Prophet* (JSNTSup 62; Sheffield: JSOT Press, 1991), Robert L. Webb draws attention to the addition to *T. Levi* 2:3 in manuscript E in which Levi's ablution is followed by the prayer that the Lord make known to him the "spirit of holiness" (*to pneuma to hagion*). He finds it significant that in this addition, which has close parallels with the Aramaic *Testament of Levi ar* (4Q213), an actual immersion is performed in running water to symbolize cleansing from sin and conversion to God.

There is likewise an abundance of lustral metaphors applied to the divine spirit, which purifies man as water that is sprinkled or poured out upon those in need of cleansing. *Jubilees* 1:23 speaks of the Lord's assurance of Israel's penitence and return to him: "And I shall create for them a holy spirit, and I shall purify them." In the *Rule of the Community* 4.20–21 the divine purification of man is depicted as follows:

לטהרו ברוח קודש מכול עלילות רשעה ויז עליו רוח אמַת כמי נדה

> To purify him by the holy spirit from all works of wickedness and shed upon him the spirit of truth like sprinkling water.

Here the purifying effect of the holy spirit, apparently synonymous with the spirit of truth, is juxtaposed with the sprinkling of water. The context of this passage is eschatological, and appears to echo Joel 3:1: "And it shall come to pass afterwards, that I will pour out my spirit upon all flesh; and your sons and daughters shall prophesy." However, the biblical prophets were also depicted as speaking through the holy spirit (1QS 8.16), and the purifying function of the holy spirit was believed to continue in the present life of the community, as is clear from the *Thanksgiving Hymns* (1QH) 8.21 (לטהרני ברוח קודשך), 1QS 3.7, and 4Q255 2.1. The use of the verb יצק "to pour" for the holy spirit (as in 4Q504 1–2, line 15, יצקתה את רוח קודשכה עלינו) shows how readily the spirit could be conceived as acting concomitantly with the rituals of lustration. In a significant passage (4Q414 10.7) God is described as the one who wills[10] לטהר עמו במימי רוח[ץ] "to purify his people in cleansing water." The collective formulation, "to purify his people," again underlines the communal aspect of purification as ritually affecting all of Israel.

The fact that purification was intimately associated with the holy spirit at Qumran is likely to raise new questions concerning the baptism of John as portrayed in the synoptic gospels and the book of Acts. According to these John, himself, described his baptism of repentance as limited to water, while that of the "one who is coming" would be a baptism with the holy spirit.[11] This raises the question why John would have rejected or postponed to the future the pneumatic aspect of purification which had already emerged so saliently at Qumran. David

---

[10] The restoration of the word רוח[ץ] seems open to question, since רחץ is not spelled with a *waw*, and the restored phrase appears elsewhere in Qumran as מי רחץ. I considered the possibility that the traces of the letter after רוח might be compatible with a *qôp*, thus suggesting the possible restoration לטהר עמו במימי רוח ק[דשו] "to purify his people with the water of his holy spirit." However, Stephen Pfann, who graciously examined PAM 43.482, concludes that רוח[ץ] seems preferable.

[11] Mark 1:5–6 and par.; Acts 19:1–7.

Flusser[12] has suggested that the original intent of John's prophecy did not pertain to any baptism forthcoming after him, but to the eschatological outpouring of the spirit, but this does not seem to be the way it was interpreted in the Gospels and Acts.

The close affinity between the baptism of John and that practiced at Qumran has been widely recognized. Especially noteworthy is Josephus' emphatic description of John's baptism "as a consecration of the body implying that the soul was already thoroughly cleansed by right behavior" (*Ant.* 18.117). This is precisely the point of *Rule of the Community* 3.8–9: "It is by submitting his soul to all God's statutes, that his flesh can be cleansed, by sprinkling with waters of purification, and by sanctifying himself with waters of purity." This statement forms the conclusion of the emphatic repudiation of all forms of ablution not preceded by repentance.

It is further noteworthy that Josephus depicts John's exhortation as a call "to *join* in baptism" (βαπτισμῷσυνιέναι). This may well be an allusion to a ritual immersion which involved not just individuals but groups of penitents. Feldman justly avoids the translation "to be united by baptism," but his stated reason that "there is no indication that John championed group baptism" requires evaluation.[13] The authors of the Gospels certainly wished to depict the response to his preaching as a group phenomenon, "And there went out to him all the country of Judea, and all the people of Jerusalem; and they were baptized by him in the river Jordan, confessing their sins" (Mark 1:5).

The daily ablutions of the Essenes were likewise performed as a group "when they again assemble in one place and after girding their loins with linen cloths, bathe their bodies in cold water" (*J.W.* 2.129).

Some scholars take pains to differentiate between the repeated baths of the Essenes and the purportedly one-time penitential purification performed by John. This distinction can with more validity be made between the immersions of the Essenes and Christian baptism.[14] The Epistle to the Hebrews, as well as Tertullian, polemically proclaimed the impossibility of repeating Christian baptism. However, the claim that John's immersion for repentance was likewise a once in a lifetime ceremony remains unsubstantiated. In his recent study, "John the Purifier," Bruce D. Chilton observes:

---

[12] David Flusser, "The Baptism of John and the Judean Desert Sect," in *The Sect of the Judaean Desert and Its Views* (Jerusalem: n.p., 1960, 73) (Hebrew).

[13] Josephus, *Ant.* 18.118, note a (Feldman, LCL).

[14] *Semel ergo lavacrum inimus, semel delicta abluuntur quia ea iterari non oportet*, "Once only we enter the baptismal bath and once only are our sins washed away, for it behooves us not to repeat them," Tertullian, *Bapt.* 15.2.

> It is routinely claimed that John preached a "conversionary repentance" by baptism, an act once for all which was not repeatable nor to be repeated. That is a fine description of how baptism is portrayed in the Epistle to the Hebrews 6:1–8, and such a theology came to predominate within catholic Christianity. But ablutions in Judaism were characteristically repeatable, and Hebrews must argue against the proposition that one may be baptized afresh. Only the attribution to John of later, catholic theology of baptism can justify the characterization of his baptism as symbol of a definite "conversion."[15]

In Jewish thought repentance tends to be viewed, like cleansing, as a perennial process.[16] True, the Rabbis took a very dim view of the sinner who declares *a priori*, "I will sin and repent, and do both again" (*m. Yoma* 8, 9), but they were not oblivious to the fallibility of human nature. Can we assume that, John, the prominent advocate of immersion for the sake of repentance, would have denied its value for one who had sincerely immersed himself in the past? The penitents of Qumran apparently did not.

Another issue that has been raised with regard to the baptism of John is its administration by an authority figure, rather than the allegedly self-administered immersions of Qumran. Yet, the presumption that immersions at Qumran were not subject to the control of any communal authority should by no means be taken for granted. True, the available sources do not specify that this was the function of any particular supervisor, but they do indicate that there were those to whom the privilege of immersion was denied. Concerning one who fails to obey the rules of the sect, the *Rule of the Community* 5.13 says, "He must not enter the water in order to touch the purity of the men of holiness." From this one may plausibly infer firstly, that immersion was one of the requirements for admission into the יחד and secondly, that it was subject to some form of communal control. This was clearly the case with the Essenes, where a neophyte who had successfully completed a one year probation was "allowed to share the purer kind of water for purification, τῶν πρὸς ἁγνειαν ὑδάτων" (*J.W.* 2.138).

---

[15] Bruce D. Chilton, *Judaic Approaches to the Gospels* (Atlanta: Scholars Press, 1994), 26–27; cf. James A. T. Robinson, "The Baptism of John and the Qumran Community," in *Twelve New Testament Studies* (Naperville, IL: Allenson, 1962), 17; Leonard F. Badia, *The Qumran Baptism and John the Baptist's Baptism* (Lanham, MD: University Press of America, 1980), 49; and Hartmut Stegemann, *Die Essener, Qumran, Johannes der Taufer und Jesus* (Freiburg: Herder, 1993), 306–7 are among those who claim the one-time character of John's purification.

[16] See Tertullian's caricature of this fact: *Israel cotidie lavat quia cotidie inquinatur* (*Bapt.* 15.3), approvingly cited by Emil Sch&uuml;rer, *Geschichte des J&uuml; dischen Volkes im Zeitalter Jesu Christi* (Leipzig: J. C. Hinrichs, 1898), 3:131.

The penitential tone of the 4Q512 purification liturgy is readily recognizable. It is illustrated by extant confessional phrases such as ותטהרני מערות נדה ותכפר "You have cleansed me from the turpitude of impurity and atoned" (29–32 7.8),[17] מכול ערות בשרנו "from all the turpitude of our flesh" (36–38 3.17), נסתרות אשמה "hidden trespasses of guilt" and מנגע הנדה "from the plague of impurity" (34 col. 5). M. Baillet surmised that these were all allusions to sexual impurity. Interestingly, the phrase ומנדות טמאה "and from defiling impurity" and other uses of נדה in the sense of impurity are found in 1–6 col. 12, a column which mentions the "holy ashes" and the sprinkling waters. This would lend support to the aforementioned premise that sprinkling was used also for the purification of defilements other than those stemming from corpses.

CONCLUSION

Although fragmentary, the purification liturgies add to our understanding of the purpose and spiritual dimension of the lustrations practiced at Qumran. Far from being merely external acts for the removal of ritual uncleanliness, the purifications were viewed as the means by which the holy spirit restores the corporate purity of Israel. 4Q284 alludes to communal cleansing in preparation for the Sabbaths and the festivals. But individuals, too, who bathed themselves to remove the different categories of uncleanliness or in order to be admitted to a higher level of purity in the community, were made conscious of the indispensability of penitence to make them worthy of renewed sanctification.

The affinities between the views of purification at Qumran and those of John the Baptist, long recognized by scholars, appear to be enhanced by the liturgical texts. The hypothetical distinctions concerning the one-time nature of John's baptism, its administration by an external authority, and its noninvolvement of the holy spirit are in need of reevaluation.

The discovery of the Scrolls fifty years ago opened a window into an ancient Jewish world in which ritual and religious purity were intimately associated. That world, in which the sanctity of the Temple was to some extent extrapolated into the sphere of daily life, could not practically be preserved after its destruction. Henceforth the offerings required for purification could no longer be brought and the lack of sprinkling water left everyone in a permanent state of impurity. However, the use of *Miqwaʾot*, the ritual pools sufficient for bodily immersion, was continued by both men and women. Moreover, the *Miqweh* served as a symbolic reminder of the nexus between inner and outer cleansing. Half a century after the destruction of the Temple, the illustrious Akiba dwelt on Jeremiah's characterization of the Lord as the מקוה, "the *hope* of Israel" (Jer 17:13). The Lord, he observed, serves also as the מקוה the ritual pool for Israel. "Just as the *Miqweh* purifies the unclean, so the Holy One blessed be He purifies Israel" (*m. Yoma* 8, 9). With this rabbinic observation even a Qumran survivor would very likely have concurred.

---

[17] The phraseology of the purification liturgy found in 4Q414 likewise reflects the theme of atonement כפר.

CHAPTER SEVEN

EXCERPTED MANUSCRIPTS AT QUMRAN: THEIR SIGNIFICANCE FOR THE TEXTUAL HISTORY OF THE HEBREW BIBLE AND THE SOCIO-RELIGIOUS HISTORY OF THE QUMRAN COMMUNITY AND ITS LITERATURE[1]

Brent A. Strawn

"These texts are of interest at all levels for the biblical scholar, as they relate to…exegesis, literary criticism, liturgy, the development of the canon, and textual criticism."[2]

1. INTRODUCTION

The phenomenon of excerption–or extraction as it is sometimes called–is a fairly widespread and well-known practice in antiquity. A. Kirk Grayson, for instance, argued that the Assyrian and Babylonian chronicles are, in large part, extracted from longer astronomical texts.[3] If he is correct, excerption is attested as early as second-millennium Mesopotamia. Two other examples, from the late-second millennium Levant, might be found in two Ugaritic tablets (*KTU* 1.7–8) that are apparently excerpts from the larger Baal cycle (*KTU* 1.1–6).[4] More proximate to Qumran in both location and time, but still predating it, are the Ketef Hinnom rolls (amulets?), which may be interpreted as extractions of sorts.[5] Still more examples, both early and late, could be added to this list.[6] Notable among them, and one that deserves special mention given its affinities to the texts under discussion here, is the Nash papyrus (second half of the second century B.C.E.), which contains the Decalogue and the Shema on a single leaf and that most scholars deem to have been a lectionary text of some sort.[7]

---

[1] I wish to thank several colleagues for responding to this article or discussing its argument with me in various capacities: James H. Charlesworth, Steve Delamarter, Steven J. Kraftchick, Carol A. Newsom, Henry W. Rietz, and Christine Roy Yoder. Additionally, I would like to thank Eugene Ulrich, Eileen Schuller, and Paul Garnet who each offered helpful feedback, critique, and encouragement at the Princeton symposium. None of the individuals listed here should be held responsible for errors or problems that remain in the article and it will be immediately apparent that many would disagree strongly with several of the points made below.

[2] Emanuel Tov, "Excerpted and Abbreviated Biblical Texts from Qumran," *RevQ* 16 (1995): 582.

[3] See A. Kirk Grayson, *Assyrian and Babylonian Chronicles* (TCS 5; Locust Valley, NY: J. J. Augustin, 1975). Of the possibility of extraction in chronographic texts, Grayson writes: "In connection with the problem of the form in which a text has been preserved the size and shape of the tablet should always be considered. In general large tablets, which contain carefully written inscriptions, formed an integral part of a permanent library. Small tablets, particularly those shaped like business documents, were made for a particular reason and would not normally be intended to form part of a permanent collection" (ibid., 4–5). For more on the chronicle texts, see John Van Seters, *In Search of History: Historiography in the Ancient World and the Origins of Biblical History* (New Haven: Yale University Press, 1983), 80–82, 95–92.

Given this long and well-attested practice, it should come as no surprise to find excerption at Qumran. Indeed, Hartmut Stegemann first treated excerpted biblical manuscripts in an article-length study in 1967.[8]

---

[4] Specifically, sections from *KTU* 1.3 cols. 1–3 and 1.4 cols. 1, 4, and 7. See Nick Wyatt, *Religious Texts from Ugarit: The Words of Ilimilku and His Colleagues* (Biblical Seminar 53; Sheffield: Sheffield Academic Press, 1998), 148–52. Note that the parallel texts are not in order. Wyatt wonders if both tablets are scribal exercises (148) and, on *KTU* 1.7, comments: “the use of mythological material for such work, and the ‘noncanonical’ order of the text is eloquent testimony not only of the freedom with which the text was probably used, but of the existence of scribal schools apparently specializing in this genre of literature. This has implication for our understanding of the transmission of mythological tradition and also our estimate of the innovative role of [the scribe] Ilimilku in the larger texts.” For similar dynamics in the Qumran material, see below.

[5] See Klaas A. D. Smelik, *Writings from Ancient Israel: A Handbook of Historical and Religious Documents* (trans. G. I. Davies; Louisville: Westminster John Knox, 1991), 161–62. Smelik himself interprets the data differently (see note 138 below).

[6] See, e.g., Emanuel Tov, “106–108. Introduction to 4QCant^{a-c},” in *Qumran Cave 4.XI: Psalms to Chronicles* (ed. E. Ulrich et al.; DJD 16; Oxford: Clarendon, 2000), 196n2; and idem, “Excerpted and Abbreviated,” 581 and n1 for further data. As but one additional example, not mentioned by Tov, note that the Nag Hammadi Codices (VI, *5*) have excerptions of Plato’s Republic 588a–589b. (I thank J. Zangenberg for reminding me of this point.) See the edition by Howard M. Jackson, James Brashler, and Douglas M. Parrot in *The Nag Hammadi Library in English* (ed. J. M. Robinson; 3d rev. ed.; San Francisco: HarperSanFrancisco, 1990), 318–20.

[7] See Julie A. Duncan, “Deuteronomy, Book of,” in *EDSS* 1:200; idem, “Excerpted Texts of Deuteronomy at Qumran,” *RevQ* 18 (1997): 44; Sidnie A. White (Crawford), “The All Souls Deuteronomy and the Decalogue,” *JBL* 109 (1990): 194n6; Emanuel Tov, *Textual Criticism of the Hebrew Bible* (2d rev. ed.; Minneapolis: Fortress, 2001), 118; and William F. Albright, “A Biblical Fragment from the Maccabean Age: The Nash Papyrus,” *JBL* 56 (1937): 145–76.

[8] Hartmut Stegemann, “Weitere Stücke von 4QpPsalm 37, von 4Q Patriarchal Blessings und Hinweis auf eine unedierte Handschrift aus Höhle 4Q mit Exzerpten aus dem Deuteronomium,” *RevQ* 6 (1967): 193–227, esp. 217–27.

However, as early as 1954, Patrick W. Skehan suspected that 4QDeut^{q} (4Q44)[9] contained only the Song of Moses (Deut 32:1–43) and was thus an excerpted or abbreviated manuscript of sorts.[10] More recently, Sidnie A. White Crawford and Julia A. Duncan identified three additional Deuteronomy manuscripts (4QDeut^{j} [4Q37], 4QDeut^{k1} [4Q38], and 4QDeut^{n} [4Q41]) as excerpted texts, with Duncan noting that other Pentateuchal manuscripts (4QExod^{d} [4Q15] and 4QExod^{e} [4Q16]) might also be excerpted.[11] In 1995, these documents and several others like them were the subject of a thorough review article by Emanuel Tov.[12]

The present study investigates these fascinating documents yet again; in so doing, I attempt three distinct but somewhat interrelated tasks. *First*, I delineate a taxonomy that catalogues characteristics of these texts so as to determine, if at all possible, whether or not they constitute a distinct literary subtype or genre at Qumran (see §2). *Second*, I assess what the nature and form of these manuscripts means for their usefulness (or lack thereof) for textual criticism (see §3). *Third*, I explore what the practice of excerption means for the notion of authoritative or "canonical" literature at Qumran (see §4).

---

[9] Citations of Dead Sea Scrolls texts in this chapter conform to the SBL standard numbering and naming system, rather than to the PTSDSSP numbering and naming system adopted for the present publication.

[10] Patrick W. Skehan, "A Fragment of the 'Song of Moses' (Deut. 32) from Qumran," *BASOR* 136 (1954): 12–15. Perhaps one should compare 4Q141 (4QPhyl N), which includes only Deut 32:14–20, 32–33. See Emanuel Tov, "*Tefillin* of Different Origin from Qumran?" in *A Light for Jacob: Studies in the Bible and the Dead Sea Scrolls in Memory of Jacob Shalom Licht* (ed. Y. Hoffman and F. H. Polak; Jerusalem: Bialik Institute, 1997), 46*.

2. TOWARD A TAXONOMY OF EXCERPTED MANUSCRIPTS

Recognition that excerpted texts might form a distinct genre or subset of documents at Qumran is relatively recent. As indicated above, early on Skehan suspected 4QDeut^{q} was an excerpted text, and Stegemann subsequently furthered the discussion by positing that 4QDeut^{n} was another example. Stegemann's opinion on 4QDeut^{n} was accepted and further augmented by White Crawford, the official editor of this text. Building on White Crawford's works–particularly, the material and textual characteristics of 4QDeut^{n}–Duncan determined that 4QDeut^{j} and 4QDeut^{k1} were two more excerpted manuscripts, bringing the total number of excerpted Deuteronomy manuscripts to four. Looking beyond Deuteronomy, Duncan posited that other Pentateuchal manuscripts might be excerpted. Tov concurred, adding manuscripts of both Psalms and Canticles to the growing list of (possibly) excerpted texts (cf. Table 1).

The excerpted nature of several of these manuscripts is debatable given, above all, their fragmentary states of preservation. Larger theoretical issues are also important in assessing the nature of several of these manuscripts (see §3 below). Even so, while criteria for the identification of excerpted manuscripts, their common elements and characteristics, and so forth are still being refined, the existence of at least four excerpted Deuteronomy manuscripts permits discussion of these texts. A preliminary taxonomy of the excerpted manuscripts is thus possible and is presented below, focusing on the five characteristics that most, if not all, of these documents share. These characteristics, which can be seen as criteria for the identification and classification of scrolls like these, are arranged in order of *decreasing* significance. Given the excellent surveys of Tov and Duncan, examples are kept to a minimum; moreover, the specific manuscripts that are discussed tend to be those that are most certainly excerpted rather than those that are only debatably so.

a. Form: Excerpted, Abbreviated, Rearranged

As is obvious from the nomenclature, excerpted manuscripts selectively excerpt material(s) from one or more "base-text" compositions, often omitting, abbreviating, and/or rearranging the source text in the process. A comparison of this phenomenon to similar practices in "exegetical" documents from Qumran is helpful and in order.

A number of scrolls at Qumran anthologize various biblical compositions and include interpretations. The *pesharim* come immediately to mind, but more similar to the excerpted manuscripts are the so-called "thematic peshers" such as *Florilegium* (4QFlor [4Q174]) and *Catena*^{a} (4QCat^a [4Q177]).[13] As Tov notes, other examples of the thematic-pesher type include *Ordinances*, *Rules*, and *Purification Rule* (4QOrd^{a,b,c} [4Q159, 4Q513-514], respectively), which interpret various biblical laws; 11QMelch (11Q13) focusing on the figure of Melchizedek; and 4QTanḥ (4Q176), which collects texts relating to the common theme of consolation.[14] Thematic peshers such as these differ from the *pesharim* in that they do not comment on a running biblical text. Instead, they combine different biblical texts apparently according to guiding themes or interests. Even so, like the *pesharim*, the thematic peshers tend to include commentary of some sort, often introduced by specific formulae.[15]

Excerpted manuscripts are of a different sort. On the one hand, they resemble running "biblical" manuscripts,[16] with the exception that units are often missing, shortened, or rearranged. On the other hand, unlike commentaries or other "nonbiblical" documents that select from a "biblical" composition by means of quotation and/or allusion, excerpted "biblical" manuscripts present small or large segments of the source text

---

[13] Annette Steudel thinks these two texts are from one such pesher, which she combines and entitles 4QMidrEschat^{a,b}. See her *Der Midrasch zur Eschatologie*, and, more briefly, "4QMidrEschat: 'A Midrash on Eschatology' (4Q174 + 4Q177)," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid 18–21 March, 1991* (ed. J.C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 2:531–41. (Possibly related are 4Q178, 4Q182 [4QCat^b], and 4Q183 in which case there would be five copies of the work.) As there is no material join between 4Q174 and 4Q177 and, indeed, they come from different scrolls (Steudel, "4QMidrEschat," 533), Steudel's theory must remain uncertain. See the comments in Jacob Milgrom and Lidija Novakovic, "Catena A (4Q177 = 4QCat^a)," in *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations*, Vol. 6B: *Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 287.

[14] Tov, "Excerpted and Abbreviated," 581.

[15] See Casey D. Elledge, "Appendix: A Graphic Index of Citation and Commentary Formulae in the Dead Sea Scrolls," in *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations* Vol. 6B: *Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 367–77.

[16] It is now commonplace to state that the terms "biblical" and "canonical" as well as their antonyms are anachronistic at Qumran. While this could be debated, at least at some levels, I nevertheless accede to such a point by putting such terms in quotation marks so as to flag their uncertain nature. See further the discussion below in §4.

without accompanying commentary.[17] As Tov claims: “Excerpted texts are recognized by the *juxtaposition of different biblical texts*, either from different books or from the same book.”[18]

Since Table 1 presents a list of those manuscripts that are (possibly) excerpted or abbreviated[19] along with full data for each, only a few comments are offered below on representatives that are certainly or probably excerpted (apart from the phylacteries and *mezuzot*).

Certainly Excerpted:

- 4QDeut^{j} (*Excerpted Deuteronomy*): Frags. 1–7 cover Deut 5:1–6:3, which is followed by 8:5–10 (frag. 8), 11:6–13 (frags. 9–10), Deut 11:21(?)[20] and Exod 12:43–13:5 (frags. 11–13), and, finally, Deut 32:7–8 (frag. 14).[21]
- 4QDeut^{k1} (*Excerpted Deuteronomy*): This manuscript includes selections from Deut 5:28–31; 11:6–13; and 32:17–18, 22–23, 25–27. While it is possible that the preservation of these chapters is coincidental, the passages are also popular among the phylacteries and other excerpted manuscripts.[22]

---

[17] It is largely for this reason that *Testimonia* is included in Table 1, but such is not the case for *Florilegium* and the Catenae texts. 4QTanḥ (4Q176) may be an exception. See note 103 below.

[18] Tov, “Excerpted and Abbreviated,” 586; emphasis mine.

[19] It is important to note that these two designations are not necessarily identical. Excerption may imply more conscious and productive selection as well as selection from different source texts; abbreviation may imply selection from only one source text. Even so, the end results of both processes are similar. It should be admitted, however, that if excerpts are taken from more than one base text, a scroll is more readily identified as excerpted than if it abbreviates from one composition. Here again, larger theoretical issues impinge on the analysis (see §3 below).

[20] See Tov, “Excerpted and Abbreviated,” 588n28 for the possibility that frag. 11, line 1 may preserve a reading from Exodus 12 (v. 42?), not Deut 11:21 (so Duncan tentatively). But see Duncan, “Deuteronomy,” 201; idem, “Considerations of 4QDt^{j},” 204–5; and idem, “37. 4QDeut^{j},” in *Qumran Cave 4.IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich et al.; DJD 14; Oxford: Clarendon, 1995), 88. If Duncan is correct, and her argument is compelling, there is a material join between Deuteronomy 11 and Exodus 12 at this point (frag. 27; see DJD 14, pl. 23). For the ordering, cf. 4QPhyl A and I (Józef T. Milik, “II. Phylactères A–U,” in *Qumran Grotte 4.II (4Q128–4Q157), I: Archaeologie; II: Tefillin Mezuzot et Targums* [ed. R. de Vaux and J. T. Milik; DJD 6; Oxford: Clarendon, 1977], 50, 63).

[21] Duncan, “Considerations of 4QDt^{j},” 203. Reconstruction of the textual order faces problems given the state of preservation; it is possible, but not determinable, that 8:5–10 *preceded* Deuteronomy 5–6, as in 4QDeut^{n} (4Q41; see ibid., 204).

[22] See Duncan, “Considerations of 4QDt^{j},” 205; idem, “Excerpted Texts,” 47. On the latter point, cf. esp. 4QDeut^{j,n}.

- 4QDeut^{n} (*All Souls Deuteronomy*, or *Excerpted Deuteronomy*):[23] The scroll preserves Deut 8:5–10 which occurs by itself on the first column,[24] *followed* by Deut 5:1–6:1 on columns 2–6, which together comprise a single sheet of leather. The first column was originally sewn to cols. 2–6 before it was separated in restoration.[25] Col. 1 has a right sewn edge as well, indicating that something probably preceded it.[26] The two sheets have differently written columns,[27] and col. 1 has several dry lines. It was, that is, only partially inscribed, another feature "suggesting that the column was indeed reserved for this discrete section of chapter 8."[28]
- 4QDeut^{q} (*Excerpted Deuteronomy*): Given its material remains, this small scroll could not have contained all of Deuteronomy and probably included only chapter 32 (only vv. 37–43 are extant).[29] It is possible, of course, that the scroll contained other selections from Deuteronomy or similar poetic material from elsewhere but this is speculation.[30]

Probably Excerpted:

- 4QExod^{d} (*Excerpted Exodus*): Within one fragment, the manuscript moves from Exod 13:15–16 to Exod 15:1, thus omitting the narrative section of Exod 13:17–22 and all of chapter 14.[31]
- 4QPs^{n} (4Q95): After frag. 1 which preserves Ps 135:6–8, frags. 2–3 move directly from Ps 135:11–12 to Ps 136:23–24. As the editors note, "[t]he

---

[23] See, esp., White (Crawford), "4QDt^{n}," 13–20.

[24] Cf. 4QDeut^{j} (4Q37), frag. 8, which also appears to have contained Deut 8:5–10 by itself (Duncan, "Excerpted Texts," 46, 49, 51). See note 21 above for the possibility that this unit preceded the Decalogue in this manuscript.

[25] See White (Crawford), "4QDt^{n}," 13; Duncan, "Excerpted Texts," 45; and Tov, "Excerpted and Abbreviated," 588 and n31 citing Stegemann, "Weitere Stücke," 222. The scroll is presented in its original ordering in DJD 14, pl. 28. Note further White (Crawford), "4QDt^{n}," for arguments against Strugnell's early opinion that the ordering of the scroll was due to incorrect repair in antiquity.

[26] White (Crawford), "4QDt^{n}," 15.

[27] Col. 1: 7 lines of 40–65 letter-spaces; cols. 2–6: 12 lines of 30–50 letter-spaces. See Tov, "Excerpted and Abbreviated," 589.

[28] Duncan, "Excerpted Texts," 46.

[29] Note the empty space to the left of the last verses, showing "that this is the last column of the scroll, though not of the book" (Tov, "Excerpted and Abbreviated," 589–90). Cf. Duncan, "Excerpted Texts," 44–45; Skehan, "A Fragment," 12–15.

[30] See Tov, "Excerpted and Abbreviated," 590. Cf. 4QPs^{g,h} (4Q89, 4Q90) and 5QPs (5Q5), all three of which probably contained only Psalm 119.

[31] See Tov, "Excerpted and Abbreviated," 590; and Judith E. Sanderson, "15. 4QExod^{d}," in *Qumran Cave 4.VII: Genesis to Numbers* (ed. E. Ulrich et al.; DJD 12; Oxford: Clarendon, 1994), 127–28. Note Sanderson's comments (ibid.) on the possible bearing of this text on the material reconstruction of 4QpaleoExod^{m} (4Q22).

> preserved text represents a new Psalm, which forms a coherent whole and presumably comprised 135:1–12 + 136:23–26."[32]

Other, at times less certain, examples of excerpted manuscripts can be found in Table 1; indeed, not all would agree that the six outlined above are excerpted.[33] Whatever the case, if these various scrolls are, at least temporarily, understood as excerpted and considered together, two types of excerption or abbreviation are evident: (1) texts that excerpt or abbreviate from *two different books of the Pentateuch* (e.g., 4QTestim [4Q175]; the phylacteries and *mezuzot*, 4QDeut^{j}); and (2) texts that excerpt or abbreviate from *different sections of the same biblical book* (e.g., 4QExod^{d,e}; 4QDeut^{k1,n,q}; 5QDeut [5Q1]; certain Psalms texts, esp. 4QPs^{n}; 4QCant^{a,b} [4Q106-107]).[34] The jury must remain out, at least for the time being, for several of these texts, but one should note that in many of these manuscripts, some sort of scribal break (paragraphing by means of *vacat*s or scribal signs, etc.) is evident between the different excerptions.[35] 4QDeut^{n} is particularly notable in this regard in that the column containing Deut 8:5–10 was sewn *before* the columns containing Deut 5:1–6:1, indicating that the scribe was intentionally "putting together a collection of excerpted texts."[36]

Discussion of the function(s) of these manuscripts and thus the purpose(s) behind their excerption is provided below (§4); but even at this point it should be stated that in some compositions and at some levels, rearrangement is very much *an exegetical technique*.[37]

b. Size Matters: Smaller Dimensions and Shorter Columns

Excerpted manuscripts are typically quite small in size. As the data in Table 1 indicate, with the exception of 4QTestim and 4QEzek^{a}(4Q73), the documents are all less than 20 lines, with most containing 15 or less.

---

[32] Patrick W. Skehan, Eugene C. Ulrich, and Peter W. Flint, "4QPs^{n}," in *Qumran Cave 4.XI: Psalms to Chronicles* (ed. E. Ulrich et al.; DJD 16; Oxford: Clarendon, 2000), 137.

[33] The two that are problematic are, of course, 4QExod^{d} (4Q15) and 4QPs^{n} (4Q95). For the latter, see further §4 below.

[34] This follows Tov, "Excerpted and Abbreviated," 598. The Psalms texts, in particular, constitute a vexed question. See §4 below.

[35] Note, e.g., *Testimonia* (4Q175), which has paragraphs (with partial *vacats*) and the *paragraphos* sign demarcating the four texts. The phylactery and *mezuzah* texts also often have their excerpts separated by a partial *vacat* or by a complete blank line.

[36] White (Crawford), "4QDt^{n}," 16; see further 14–17.

[37] See Moshe J. Bernstein, "Re-Arrangement, Anticipation and Harmonization as Exegetical Features in the Genesis Apocryphon," *DSD* 3 (1996): 37–57.

Shorter column height demonstrates "that the [excerpted] scrolls had limited contents and did not have to contain as much as would a copy of a whole book."[38] One might contrast, by way of example, the column heights of many of the biblical scrolls.[39] In brief, the excerpted texts are "considerably shorter than the twenty lines or more typically attested in the biblical scrolls at Qumran."[40] To cite but one example, most Cave 4 Deuteronomy manuscripts, when they can be reconstructed, range anywhere from 22 to 40 lines.[41]

Supporting the supposition that smaller column heights preserve smaller compositions is *b. B. Bat.* 14a, which indicates that the circumference of a scroll must not exceed its column height.[42] If a scroll like 4QDeut^{n} had contained the whole book of Deuteronomy it would have been very bulky indeed—much thicker than its column height.[43] Even so, caution must be exercised since, as Duncan points out, "[i]n addition to the question of whether such a [rabbinic] ruling was in effect at Qumran, is the question of whether excerpted texts would have been treated by the same standards as biblical manuscripts."[44]

But, regardless of rabbinic strictures like *b. B. Bat.* 14a, the physical reality of the manuscripts themselves indicates that in many cases it would have been impractical and unwieldy, if not outright impossible for these smaller-sized scrolls to have contained the entire composition from which they drew. Indeed, as Tov remarks, it is sometimes a manuscript's "limited scope [that] is the main criterion for assuming the existence of an excerpted text."[45] Such is the case, for example, with texts like 4QExod^{e}, 5QDeut, and 4QPs^{b} (4Q84; cf. also Table 3).[46]

The size criterion, however, even when apparent, is not sufficiently determinative. Even larger scrolls might still be excerpted if they satisfy other criteria.[47] Such is the case with 4QTestim and, perhaps, 4QEzek^{a}.[48] With that caveat made, in the case of the smaller-sized scrolls, it seems safe to say that their dimensions: (1) indicate that they did not contain the entire composition in question (but see §3 below); (2) "facilitated easy transport";[49] and (3) have bearing on these manuscripts' probable function and use (see §4 below).[50]

---

[38] Duncan, "Excerpted Texts," 49.

[39] The Megilloth are exceptions to this rule. See Table 2 and further below.

[40] Duncan, "Excerpted Texts," 49.

[41] Emanuel Tov, "The Dimensions of the Qumran Scrolls," *DSD* 5 (1998): 81–83: 4QDeut^{e} (4Q32; ca. 22 lines); 4QDeut^{b} (4Q29; ca. 26 lines), 4QDeut^{c} (4Q30; ca. 27 lines), 4QDeut^{d} (4Q31; ca. 27 lines), 4QDeut^{h} (4Q35; ca. 30 lines), 4QpaleoDeut^{r} (4Q45; ca. 32 lines), 4QDeut^{i} (4q36; ca. 39 lines). Cf. Duncan, "Excerpted Texts," 49n28.

[42] Tov, "Dimensions," 73–74; Eshel, "4QDeut^{n}," 150–51.

[43] See White (Crawford), "4QDt^{n}," 17. White herself thinks this is only "a minor point" in favor of this text's excerpted status.

[44] Duncan, "Excerpted Texts," 49n29.

[45] Tov, "Excerpted and Abbreviated," 586.

[46] Ibid., 596–97.

c. Content: Correspondence in Passage Selection and Distribution

Examination of the passages excerpted in these documents reveals that, oftentimes, *the same portions* of biblical text are excerpted. Both 4QDeut^{j} and 4QDeut^{n}, for example, begin a column with Deut 5:1 and reserve a single column for Deut 8:5–10. Deuteronomy 11:6–13 appears in both 4QDeut^{j} and 4QDeut^{k1}. With the exception of Deuteronomy 8, these texts are also common in the phylacteries (*tefillin*) and *mezuzot*, which are, in turn, excerpted documents of a specialized type.[51] The list of passages that were to be included in the *tefillin* according to the *halakah* (esp. *b. Menah.* 34a–37b, 42b–43b and *Mas. Tep.* 9) were Exod 13:1–10, 11–16; Deut 6:4–9; and 11:13–21.[52] However, not all Qumran *tefillin*, especially those from Cave 4, follow this *halakah*.[53]

---

[47] *Contra* Tov: "All collections of excerpts are written in scrolls of small dimensions" (ibid., 586).

[48] In the case of *Testimonia*, note: (1) it is written on a single sheet; (2) it contains excerpts from four different compositions, which may be thematically related; and (3) the excerpts are separated with scribal marks. With regard to 4QEzek^{a} (4Q73), the interrelated nature of the selections makes excerption possible. See George J. Brooke, "Ezekiel in Some Qumran and New Testament Texts," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid 18–21 March 1991* (ed. J.C. Trebolle Barrera and L. Vegas Montaner; 2 vols; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:317–37, esp. 319; and further below at note 95. In both cases, then, the criterion of form is most significant and more determinative than size.

[49] See Tov, "106–108. Introduction to 4QCant^{a-c}," 198; Stephen Pfann, "4Q298: The Maskîl's Address to All Sons of Dawn," *JQR* 85 (1994): 213 and, esp., 213n14: "Most portable scrolls were owned by individuals and intended to be carried about and read during certain feasts." The liturgical/ritual connection is intriguing, but unfortunately Pfann cites no evidence in support of this claim.

[50] Cf. the comments of Grayson in note 3 above.

[51] Annette Steudel, "Testimonia," in *EDSS* 2:938; Duncan, "Deuteronomy," 201; idem, "Considerations of 4QDt^{j}," 201–2.

[52] See Tov, "*Tefillin* of Different Origin," 45*.

[53] Ibid.; see also idem, "A Categorized List of All the 'Biblical Texts' Found in the Judaean Desert," *DSD* 8 (2001): 83–84; idem, "D. The Biblical Lists from the Judaean Desert: 1. Categorized List of the 'Biblical Texts,'" in *The Text from the Judaean*

Regardless of differences between Qumran *tefillin* and rabbinic *halakah*, the correspondence of content between the Deuteronomy manuscripts and the phylacteries and *mezuzot* is suggestive.[54] Since the liturgical function of the phylacteries and *mezuzot* is well established, one might reasonably infer that the excerpted manuscripts were used similarly—that is, in some sort of liturgical or ritual function (see §4 below). So Tov thinks that 4QDeut^{j} "served liturgical purposes" due to two factors: "the fragments of the manuscript consist of sections which are also contained in the Qumran phylacteries…and the manuscript is of small dimensions."[55] Tov's comment shows that the confluence of criteria is the best-case scenario when identifying excerpted texts. But, with specific reference to the phylacteries, it must be admitted that both 4QDeut^{j} and 4QDeut^{n} preserve Deut 8:5–10—and accord that passage its own column—and that this is *not* the case in the phylacteries.[56] Similarly, the Deuteronomy manuscripts also include portions from Deut 5:1–6:3 and chapter 32.[57] What should be made of these facts?

First, we should recall the variation in textual content apparent in the *tefillin* from Qumran, especially those from Cave 4. Some of those texts *do* include the Decalogue.[58] Second, inclusion of text(s) in the excerpted manuscripts that is not included in the phylacteries or *mezuzot* means nothing more or less than that the excerpted manuscripts are not coterminous with the phylacteries or *mezuzot* in form, nor—it should be stressed—function. *Correspondence* in passage content and distribution, not to mention *excerpted form*, certainly indicates that these different documents—the excerpted manuscripts, on the one hand, and the phylacteries and *mezuzot*, on the other—are related and that their function(s) is similar. The *differences* between these documents indicate that they are not identical. Again, this should not be understood as denying a liturgical functionality to the excerpted texts, even those parts not paralleled in the *tefillin* and *mezuzot*, but only a denial of *identical* liturgical function. The liturgical importance of Deut 8:5–10, for instance, was noted by Stegemann, who drew attention to the fact that it is set off as its own unit

in the Samaritan Pentateuch (SamP).[59] More recently, Moshe Weinfeld has pointed out that this passage is the basis for the blessing after meals (*b. Ber.* 44a).[60] As for Deuteronomy 32, its poetic character may be enough to suggest why it was excerpted, especially given the probability that at least some of the Psalm manuscripts were excerpted (e.g., 4QPs^{g,h} [4Q89-90] and 5QPs [5Q5] containing only Psalm 119; see §4). Still further, the liturgical use of Deuteronomy 32 is demonstrated by such texts as *b. Rōʾs Has.* 31a, *m. Meg.* 3:6, and *y. Meg.* 74b, which state that the Levites used to recite this chapter in the Temple on the Sabbath.[61]

d. Text: Character and Affiliation

The text-critical data from the excerpted manuscripts are mixed. A discussion of the theoretical problems involved is taken up below (§3). For now, with reference to the main text groups, the following can be stated—again employing the Deuteronomy manuscripts as the primary example.[62]

- Tov states that 4QDeut^{q} "is of an independent textual nature, with close affinities to the LXX,"[63] but given its poor state of preservation, it is hard to be certain how extensive the scroll's affinities with the (Hebrew Vorlage of the) LXX actually were.
- Duncan has demonstrated that 4QDeut^{j,k1,n} tend toward a slightly expanded version of the text;[64] by this they show some affinity with SamP.[65]

---

[59] See Stegemann, "Weitere Stücke," 223–24.

[60] Moshe Weinfeld, "Grace After Meals in Qumran," *JBL* 111 (1992): 427–28; cf. idem, "Prayer and Liturgical Practice in the Qumran Sect," in *The Dead Sea Scrolls: Forty Years of Research* (ed. D. Dimant and U. Rappaport; *STDJ* 10; Leiden: Brill, 1992), 240–58, esp. 251–52. See also Duncan, "Deuteronomy," 201; idem, "Considerations of 4QDt^{j}," 203; Stegemann, "Weitere Stücke," 224; and White (Crawford), "4QDt^{n}," 15. Weinfeld believes that the custom of conjoining the Decalogue (with the Shema) and the blessing after meals might be attested in the epistle of Pliny the Younger to Trajan (*Ep. Tra.* 10.96), but see the critique by Reuven Kimelman, "A Note on Weinfeld's 'Grace After Meals in Qumran,'" *JBL* 112 (1993): 695–96.

[61] See Weinfeld, "Grace After Meals," 428.

[62] See Duncan, "Excerpted Texts," 52–60 for a full list of variants.

[63] Tov, "Excerpted and Abbreviated," 600.

[64] Duncan, "Excerpted Texts," 51. Duncan gives the following statistics: 4QDeut^{k1} (4Q38) has the long reading in 4 out of 5 variants; 4QDeut^{j} (4Q37) has the long reading in 6 out of 7; and 4QDeut^{n} (4Q41) is long in 7 out of 12. Elsewhere, Duncan has noted that "more than a quarter of the variants attested in the [Deuteronomy] scrolls represent this particular category [expansion] of textual variant" (unpublished paper, "Deuteronomy in the Judaean Desert Texts").

[65] See Duncan, "Excerpted Texts"; idem, "Deuteronomy," 199.

The affinity with SamP is perhaps clearest in 4QDeut^{n} with its harmonization of Exod 20:11 with Deut 5:12–13 in the Sabbath commandment.[66] Harmonizations are not, of course, restricted to SamP.[67] Indeed, the other corpus of material that shows this same tendency is, not surprisingly, the phylacteries.[68] The relationship of 4QDeut^{j,k1,n}, that is, may not be to SamP but to the phylacteries, or–more precisely–to the tradition of excerpting certain types and passages of texts and the method by which such excerption took place.[69]

Other factors, besides possible affinity with SamP and/or the phylactery texts, could explain the expansionistic and harmonizing tendency of the excerpted manuscripts. In the Deuteronomy scrolls, these factors would include influence from closely parallel passages and the highly repetitive style of Deuteronomy.[70] Related to both of these is "another possibility which might explain the specific kinds of variants and errors found in these manuscripts, and that is that excerpted texts were sometimes copied from memory."[71] Indeed, *b. Meg.* 18b permits the writing of phylacteries and *mezuzot* from memory.[72] This is further reason to connect these texts with the excerpted texts as closely related documents. Moreover, the popularity of the passages that are typically excerpted is further underscored.

---

[66] See White (Crawford), "4QDt^{n}," 15; further, idem, "The All Souls Deuteronomy," 193–206. Tov, "Excerpted and Abbreviated," 589 notes the same is true of 4QPhyl G (4Q134), 8QPhyl (8Q3), 4QMez A (4Q139), and the Nash papyrus. See also Esther Eshel's extensive study, "4QDeut^{n}–A Text That Has Undergone Harmonistic Editing," *HUCA* 62 (1991): 117–54.

[67] Note White (Crawford), "4QDt^{n}," 15–16, who points out harmonizations in other "biblical" manuscripts (e.g., 4QpaleoExod^{m} [4Q22]). But, as White points out, they "are particularly noticeable in the phylactery texts found at Qumran, that is, in specially excerpted texts." Duncan ("Excerpted Texts," 60) adds 4QNum^{b} (4Q27) to 4QpaleoExod^{m}. Both texts, of course, do have some relationship with the SamP. See Judith E. Sanderson, *An Exodus Scroll from Qumran: 4QpaleoExod^{m} and the Samaritan Tradition* (HSS 30; Atlanta: Scholars Press, 1986), esp. 189; and Nathan Jastram, "A Comparison of Two 'Proto-Samaritan' Texts from Qumran: 4QpaleoExod^{m} and 4QNum^{b}," *DSD* 5 (1998): 264–89. See further Eshel ("4QDeut^{n}," 117–54), who prefers the general nomenclature "harmonistic" over pre- or proto-Samaritan.

[68] See note 54 above and White (Crawford), "4QDt^{n}," 15–16; further, Tov, "*Teffilin* of Different Origin," 49* and nn14-15 (with literature) on the text-critical data of the *tefilllin.* See above and also Tov, "Excerpted and Abbreviated," 587, 600.

[69] Duncan, "Excerpted Texts," 51. 4QDeut^{q} (4Q44) should perhaps be included with the other Deuteronomy manuscripts (i.e., slightly expansionistic), but it is hard to say since it is so fragmentary and because of the complicated history of transmission of Deuteronomy 32 (ibid., 51n38).

[70] Duncan, "Excerpted Texts," 60; Duncan, "Deuteronomy," 199. For repetition in Deuteronomy, see Brent A. Strawn, "Keep/Observe/Do–Carefully–Today! The Rhetoric of Repetition in Deuteronomy," in *A God So Near: Essays on Old Testament Theology in Honor of Patrick D. Miller* (ed. B. A. Strawn and N. R. Bowen; Winona Lake, IN: Eisenbrauns, 2003), 215–40; and, for the phenomenon and its text-critical impact on LXX Deuteronomy, John W. Wevers, *Text History of the Greek Deuteronomy* (Abhandlung der Akademie der Wissenschaften in Göttingen, Philologisch-Histroische Klasse, Dritte Folge 106; MSU 13; Göttingen: Vandenhoeck & Ruprecht, 1978), esp. 86–98.

Lastly, Duncan has discerned textual similarities between 4QDeut^{j} and 4QDeut^{k1} (possibly also 4QDeut^{n}). She states:

> The data are too sparse to lead to any conclusions, but introduce the idea that some of the texts belonging to this genre shared not only components, but textual characteristics. This remains, however, in the realm of speculation, as there is not enough common text between the three manuscripts we have to say anything of substance.[73]

Shared textual characteristics, at least for the Deuteronomy manuscripts, is an intriguing topic and would be an additional criterion or subcriterion for identifying and categorizing excerpted material. But, as Duncan states, such a possibility must remain hypothetical at present. Indeed, as Tov notes, "[s]everal of the [excerpted] texts reflect a free approach to Scripture," which may obviate the quest for textual affinities–whether with the large families (see §3 below) or even among the excerpted manuscripts themselves. This latter consideration may be yet further indication "that these texts have been prepared for personal use" (see §4).[74]

e. Composition in the "Qumran Scribal Practice"

Several of the excerpted manuscripts were written according to what Tov has called the "Qumran scribal practice,"[75] namely, with full orthography and morphology, including the use of scribal marks and, occasionally, cryptic script.[76] The same holds true for some of the *tefillin*. Still, many of these manuscripts are not written in accordance with these practices (so also for other of the *tefillin*) and thus Tov's theory must remain, at best, a secondary supportive criterion in the taxonomy of excerpted manuscripts.[77]

---

[71] Duncan, "Excerpted Texts," 60; see further 61, where she says the same possibility holds for some of the phylacteries and *mezuzot* from Qumran. Note also Sidnie White Crawford, "A Response to Elizabeth Owen's '4QDeut^{n}: A Pre-Samaritan Text?'" *DSD* 5 (1998): 94.

[72] See Duncan, "Excerpted Texts," 61n68; Tov, *Textual Criticism*, 119. So also Milik, "II. Phylactères A–U," 38. See further Edward L. Greenstein, "Misquotation of Scripture in the Dead Sea Scrolls," in *The Frank Talmage Memorial Volume* (ed. B. Walfish; Haifa: Haifa University Press, 1993), 71–83.

[73] Duncan, "Considerations of 4QDt^{j}," 206.

[74] Tov, "Excerpted and Abbreviated," 600. Additionally, Tov notes that 4QCant^{b} (4Q107) has a large number of scribal errors and "significant Aramaic influence."

[75] See Tov, "Excerpted and Abbreviated," 587, and, more fully, idem, "The Orthography and Language of the Hebrew Scrolls Found at Qumran and the Origin of These Scrolls," *Text* 13 (1986): 31–57; idem, "Hebrew Biblical Manuscripts from the Judaean Desert: Their Contribution to Textual Criticism," *JJS* 39 (1988): 5–37;

Be that as it may, scribal practices when conceived largely, not just as assessed by Tov in his theory,[78] remain an important, if not primary,

---

idem, *Textual Criticism*, 100–17; idem, "*Tefillin* of Different Origin," 44*–54*; idem, "Letters of the Cryptic A Script and Paleo-Hebrew Letters used as Scribal Marks in Some Qumran Scrolls," *DSD* 2 (1995): 330–39; idem, "Scribal Markings in the Texts from the Judean Desert," in *Proceedings of the Judaean Desert Scrolls Conference, Jerusalem, 30 April 1995* (ed. D. W. Parry and S. D. Ricks; Leiden: Brill, 1996), 41–77; and idem, "Groups of Biblical Texts found at Qumran," in *Time to Prepare the Way in the Wilderness: Papers on the Qumran Scrolls by Fellows of the Institute for Advanced Studies of the Hebrew University, Jerusalem, 1989–1990* (ed. D. Dimant and L. H. Schiffman; *STDJ* 16; Leiden: Brill, 1995), 85–102. William M. Schniedewind, "Qumran Hebrew as an Antilanguage," *JBL* 118 (1999): 247, has helpfully summarized Tov's longer list of scribal features by reducing them to two: "(1) the use of elongated forms with ה– and (2) the tendency toward full phonetic spelling." Tov's theory has not gone unchallenged: see, e.g., Frank Moore Cross's remarks in "Notes on a Generation of Qumrân Studies," in idem, *The Ancient Library of Qumran* (3d ed.; Minneapolis: Fortress, 1995), 176–77; and James VanderKam and Peter Flint, *The Meaning of the Dead Sea Scrolls: Their Significance for Understanding the Bible, Judaism, Jesus, and Christianity* (San Francisco: HarperSanFrancisco, 2002), 142–46, who draw attention to Tov's more recent article ("The Biblical Texts from the Judaean Desert–An Overview and Analysis of the Published Texts," in *The Bible as Book: The Hebrew Bible and the Judaean Desert Discoveries* [ed. E. D. Herbert and E. Tov; London: The British Library and Oak Knoll Press, 2002], 139–66), which seems more nuanced with regard to this category. See note 118 below.

[76] See Tov, "Excerpted and Abbreviated," 600: in the practice are 4QDeut^{j} (4Q37) (though there is no solid evidence), 4QDeut^{k1} (4Q38), 4QTestim (4Q175), several phylacteries and *mezuzot*, and some psalm texts (11QPs^{a} [11Q5]; cf. 4QPs^{e} [4Q87], 11QPs^{b} [4Q84]; 4QPs^{f} [4Q88]; 4QPs^{n} [4Q95]; 4QPs^{q} [4Q98]; and 4QPsAp^{a}).

[77] Tov, "Excerpted and Abbreviated," 600: not in the practice are several of the phylacteries and *mezuzot*, 4QExod^{d} (4Q15), 4QDeut^{n} (4Q41), 4QDeut^{q} (4Q44), 4QCant^{a,b} (4Q106, 4Q107). Note Tov's admission of evidence contrary to his general theory in other, "sectarian" texts such as 4Q252, 4Q395, and 4QpNah (4Q169) ("*Tefillin* of Different Origin," 44* n3). (Cf. also note 75 above.) Important, too, are the observations of Schniedewind, "Qumran Hebrew as an Antilanguage," 237: "just because a document was *copied* by a Qumran scribe does not mean it was *composed* within the community. Hence, orthography must still be studied in concert with terminology in determining whether each scroll is a sectarian composition." Cf. the insights of Carol A. Newsom, "'Sectually Explicit' Literature from Qumran," in *The Hebrew Bible and Its Interpreters* (ed. W. H. Propp, B. Halpern, and D. N. Freedman; BJSUCSD 1; Winona Lake, IN: Eisenbrauns, 1990), 167–87, who has demonstrated the opposite is true as well: just because a work was not composed at Qumran does not mean that it cannot be read for information relating to the sect proper.

[78] Cf. Stegemann, "Weitere Stücke," 217–18, who mentions the use of certain kinds of handwriting. Tov, "Excerpted and Abbreviated," 586n18 thinks this dubious.

criterion for the identification of these manuscripts. These include, above all, the excerpted, abbreviated, and/or rearranged form of these manuscripts. Several of these larger scribal practices might be called "para-textual" or "para-textual content" since they are not limited to the specific wording of the texts. In any event, a broader understanding of scribal practices would include Tov's profile of "Qumran scribal practice" but also other items, including, perhaps, the particular genre of the excerpted manuscripts themselves–a point that must now be addressed.

f. A Genre for Excerpted Texts?

The preceding discussion of excerpted manuscripts has drawn on different exemplars that are related but clearly not identical. Some excerpt from just one composition in an order that is recognizable from other witnesses, while others excerpt from one composition in a different order, with still others excerpting from more than one composition. Then there is the distinction between a scroll proper–whatever its size and format–and the phylacteries and *mezuzot.* Can these various (types of) documents be treated together? Do they constitute a genre, and if so, what are the salient elements of that genre?

The existence of more than one manuscript that manifest the five characteristics described in the taxonomy above confirms the existence, with some distinctions, of a type or group of texts here. Speaking of the Deuteronomy manuscripts, for example, Duncan notes that the existence of the genre "excerpted biblical manuscript" was suggested already by 4QDeut^{n} and was "more or less substantiated" by 4QDeut^{j} and 4QDeut^{k1}.[79] While such a judgment holds true for the Deuteronomy manuscripts which bear a number of similarities with regard to passage selection and distribution, it might legitimately be asked whether the same can be said for the Exodus manuscripts, whether they are considered with one another or with the Deuteronomy texts or still other comparables. Moreover, what of the Psalms texts, or, still further, *Testimonia*? Are these, too, examples of the same genre?

Much depends on the definition and analysis of "genre." Early studies of genre tended to focus mostly, if not exclusively, on shared (identical) features. Narrowly conceived, such an approach would almost certainly dissociate a text like *Testimonia*, which contains selections from four different texts (including one "nonbiblical" source), from (a) 4QDeut^{q}, which evidently contained only Deuteronomy 32; (b) 4QPs^{g,h} and 5QPs, which apparently contained only Psalm 119; or even (c) 4QDeut^{j}, which excerpts from different "biblical" texts in a rearranged order. More recent genre theory has suggested that focusing overmuch on identical features is mistaken. Instead, cognitive theories of genre argue that genre is the result and creation of three aspects: (1) individual (necessary) elements; (2) interaction of these elements; and (3) the genre's overall gestalt.[80]

---

[79] Duncan, "Considerations of 4QDt^{j}," 206.

Only the first of these three aspects—that of *individual (necessary) elements*—corresponds to the object of study in many early analyses of genre. This aspect is now deemed insufficient by itself for the determination of genre even while it remains important on many levels. With reference to the excerpted manuscripts from Qumran, the taxonomy presented above is a step toward the identification and categorization of the individual and necessary elements that would mark a scroll as belonging to this genre. The five criteria identified—form, size, content, text, and scribal practice—were presented in order of decreasing import. So, preeminent among the characteristic (necessary) elements of this genre is the excerpted, abbreviated, or rearranged form of the base text. Less necessary, but still important, are the size of the manuscript in question, its content, textual character and affiliation, and so forth.[81]

The second aspect of genre concerns the *interaction* of the included (whether necessary, default, or optional) elements.[82] This means that the included elements must relate to one another in a matter consistent with the genre. For example, smallness of scroll size in and of itself, while suggestive, does not determine excerpted status.[83] Other elements must be present and interactive in ways consistent with other, ideally more-certain exemplars of the genre. Finally, there is the third aspect: *the gestalt of the genre*. Sinding describes the gestalt as a sense of the whole that facilitates comprehension of the parts, and believes that this sense is shared by both the performer and audience.[84]

---

[80] I am indebted here to Robert Williamson, Jr.'s unpublished paper "Qumran Pesher: A Cognitive Model of the Genre," who has brought cognitive theories of genre to bear on the *pesharim.* In particular, Williamson highlights the work of George Lakoff (*Women, Fire, and Dangerous Things: What Categories Reveal about the Mind* [Chicago: University of Chicago Press, 1987]), Alastair Fowler (*Kinds of Literature: An Introduction to the Theory of Genres and Modes* [Cambridge, MA: Harvard University Press, 1982], see esp. 39), and, for the three aspects listed above, M. Sinding ("After Definitions: Genre, Categories, and Cognitive Science," *Genre* 35 [2002]: 181–220).

[81] Sinding speaks of *necessary*, *default*, and *optional* elements in genre analysis, description, and identification (ibid.). As indicated above, the most necessary element for excerpted manuscripts would be the non-continuous quotation of sections, large or small, of a base text or texts. Default and optional elements would be present in the prototypical member of the genre (perhaps one might compare 4QDeut^{n} [4Q41] or 4QDeut^{j} [4Q37] as semi-pristine types) but may not be manifested in other exemplars. This explains why not all of the manuscripts are short (e.g., *Testimonia*), why all of them do not excerpt the same text (e.g., Deut 8:5–10), and so forth and so on. To a large degree, the usefulness of newer genre theory is its capacity to explain differences among exemplars that are nevertheless still of the same genre *if*—especially—they share gestalt structure(s). See below.

[82] See the previous note. As an example of such interaction, note the work of George J. Brooke on the structural combination of quotation-interpretation as constitutive of the *pesher* genre ("Qumran Pesher: Towards the Redefinition of a Genre," *RevQ* 10 [1979–1980]: 483–503).

The more recent studies of genre are quite helpful when it comes to understanding the excerpted manuscripts. The *elements* of the genre, whether necessary, default, or optional, are mainly those listed in the taxonomy above, though these may be further nuanced and others added to the list. The *interaction* is the attestation of more than one of these aspects working together in similar ways. The overall *gestalt* is a composition that looks very much like its base text but is not quite the same. It looks more like an epitome, a selection, a pastiche, or catena constructed of or from a base text(s) rather than the base text(s) itself.

I will return to the genre issue momentarily. Before doing so, it is obvious that the description offered above raises several critical questions that have been ignored up to this point but that must be treated before the discussion can proceed. First, in the case of the Dead Sea Scrolls, where manuscripts are often poorly and only fragmentarily presented, how can one be sure that a scroll is excerpted if the remains do not attest the presence of more than one of the constituent (and constitutive) generic elements? This is the *material question*. It will be addressed, in part, by looking at the Qumran evidence relating to the Megilloth. The second, *theoretical question* is not unrelated to the material question, and has important bearing on a number of issues relating to the text-critical significance of the excerpted manuscripts and, more generally, the Dead Sea Scrolls as a whole. It is simply this: how should one conceptualize these manuscripts and approach them in the first place? How can we be sure that the designation "excerpted" is not—given the nature of our evidence—anachronistic, inapplicable, and erroneous? The issues involved in the theoretical question are taken up in §3 below. There is yet one further question: the *question of meaning(s)*. If excerpted manuscripts constitute a genre of literature at Qumran, what is that genre's purpose and function? What does the author(s) responsible for the genre mean by its use and, in turn, what does the use of such a genre indicate about the author(s) who employed it and the reader(s)/hearer(s) who received it? The question of meaning(s) must wait for §4.

---

[83] So, Tov's comment above (see at note 45) must be nuanced.

[84] See Sinding, "After Definitions," 196, relying, in part, on E. D. Hirsch, *Validity in Interpretation* (New Haven: Yale University Press, 1967), 71–89.

g. The Megilloth: An Exce(r)ption to the Rule?

The Megilloth are a useful test-case for the discussion of genre and *the material question*, because the known copies of the Five Scrolls at Qumran are physically much smaller than the average biblical scroll (see Table 2).[85] It is quite likely that these scrolls contained only the particular biblical book attested therein. Tov's explanation for the small size of manuscripts of the Megilloth seems reasonable: it was "probably in order to enable the carrying around of these scrolls."[86] Elsewhere, however, Tov has used the smaller size of at least some Megilloth manuscripts to argue that they are excerpted manuscripts. He has made an especially strong case in this regard for 4QCant^{a,b} (4Q106–4Q107). With regard to the material question, these two manuscripts comprise a suggestive example insofar as Tov employs *additional criteria beyond small size* to argue that they are excerpted. It should be recalled, after all, that small size is *not* the most important, necessary element, and may indeed be only a default or optional element in the genre. So Tov rightfully employs other aspects of the taxonomy outlined above. With reference to "Qumran scribal practice," he notes the possible remnant of a superscription and the use of scribal signs, including paleo-Hebrew letters in 4QCant^{b} frag. 1. Such phenomena "may have been related to the special character of that manuscript."[87] With reference to the most important and necessary element—that of excerption, abbreviation, or rearrangement—Tov argues that the preserved text of 4QCant^{a,b}, which is different from Canticles as preserved, for example, in the MT,[88] is not due to scribal negligence[89] but is instead a shortened version[90] that follows the general sequence of Canticles

---

[85] See Tov, "106–108. Introduction to 4QCant^{a-c}," 197. An exception is 4QQoh^{a} (4Q109), which preserves 20 lines.

[86] Tov, "Dimensions," 74. Recall Pfann's comment above in note 49.

[87] Tov, "106–108. Introduction to 4QCant^{a-c}," 196.

[88] Note the movement from Cant 4:7 to 6:11 (?) within one fragment (2 col. 2) in 4QCant^{a}. See Tov, "106. 4QCant^{a}," in *Qumran Cave 4.XI: Psalms to Chronicles* (ed. E. Ulrich et al.; DJD 16; Oxford: Clarendon, 2000), 203, for a discussion (and pl. 24).

[89] See Tov, "106–108. Introduction to 4QCant^{a-c}," 196; idem., "Excerpted and Abbreviated," 591–92; and, further, idem, "Three Manuscripts (Abbreviated Texts?) of Canticles from Qumran Cave 4, " *JJS* 46 (1995): 88–111.

[90] Better: *versions* because the two texts do not overlap.

as known from other textual witnesses.[91] So, according to Tov, 4QCant^{b} probably contained only the first part of the book. In making his argument, Tov observes something that could, in fact, be another optional element of the excerpted text genre: "The biblical book of Canticles contains a conglomeration of love songs, and not one coherent composition, so that segments could be removed from it without harming the context."[92] Even if this element—"lack of damage to the context of the base text"—is sustained in other exemplars, it would be at best an optional element because most other excerpted manuscripts are based on texts that are not conglomerations.[93]

It is crucial to identify the central assumption underlying Tov's argument about the Cave 4 Canticles scrolls. In his words:

> Underlying this description [of 4QCant^{a,b}] is thus the understanding that the Qumran scrolls shortened *an earlier existing text*, while the assumption that they represented early literary crystallizations of the book differing from the one represented by the other textual witnesses, though not impossible, is discarded.[94]

The latter, discarded assumption is not only not impossible, it is alive and well, not to mention well-represented, in the work of Tov's coeditor in the DJD series, Eugene Ulrich. The difference between these two scholars is treated in §3. At this point, it is enough to reiterate that shorter size in and of itself is not and cannot be determinative in identifying an excerpted manuscript. This is an element (probably default) that must *interact* (the second important aspect) with other elements vis-à-vis the base text. But here too the material question complicates matters. Can one be certain that a text like 4QEzek^{a} (4Q73) is an excerpted manuscript? On the negative side of the argument is the larger size of the scroll (21 lines). On the positive side, one might note that the preserved portions (Ezek 10:5–15; 10:17–11:11; 23:14–15, 17–18, 44–47; 41:3–6) could well be due to a purposive thematic selection (i.e., excerption),[95] though it must be admitted that this could simply be the accidental results of preservation.[96] The most important (necessary) element–that of excerpted form–is present, but one cannot be sure of its meaning or even its actual attestation given the state of preservation, the lack of corroborative elements, and, in fact, the *absence* of at least one of the default or optional elements (smaller size).

---

[91] Tov, "106–108. Introduction to 4QCant^{a-c}," 196.

[92] Ibid.

[93] So, esp., the Deuteronomy texts. To be more precise, *all* of the biblical texts—including the Pentateuchal texts—are conglomerations of sorts, but not in the same fashion as Canticles. Hence, a better articulation of the point would not be the "conglomerative" nature of the base text but the lack of contextual interference in the excerpted receptor text. That is, regardless of the coherence of the base text, as long as the excerpts make sense in the new construction, the composition is a success. This explains why texts as different as Canticles and Psalms, on the one hand, and Deuteronomy and Exodus, on the other hand, can still be excerpted.

[94] Tov, "106–108. Introduction to 4QCant^{a-c}," 196; emphasis added.

[95] See Brooke, "Ezekiel in Some Qumran and New Testament Texts," 317–37, esp. 319–21.

Similarly, to return to the Megilloth, one cannot be certain if their smaller size always and invariably indicates an excerpted manuscript of some sort, even if the scrolls can be shown to contain *only* one particular book.[97] Even so, *the fragmentary nature of our evidence, given poor preservation, counsels caution in the other direction as well.* Small sized manuscripts (see Table 3; cf. Table 4), especially from multiple-copy documents (see Table 5) are a natural place to expect possible excerption. One cannot and must not simply assume that such manuscripts are excerpted, but one must guard equally against assuming too confidently that they certainly included the whole composition that they reflect.[98] Without further evidence, one simply cannot be sure: *perhaps* such manuscripts are simply poorly preserved scrolls that once contained a version of the entire composition; alternatively, *and perhaps equally as likely*, such manuscripts were excerpted from a base text of the composition. These comments are leading to the *theoretical, text-critical question* outlined above, especially with regard to the usefulness of the excerpted manuscripts in the text-critical enterprise. Before addressing that vexed issue, however, one final caveat is in order with reference to the discussion of genre.

h. A Continuum of Text Types? Or: Genre, Once Again

Cognitive theories of genre underscore that genre is something of a moving target and that genre is created, discovered, and found in interpretation as much as it is recognized from what is already manifest in the text and presumably obvious to any who have eyes to see. Such theory also explains how texts that are not exactly the same can still be related generically: it is enough for the texts concerned to have a kind of family resemblance.[99] To press the analogy, genre is not so much a matter of identical or even fraternal twins (or sextuplets for that matter), as it is like a family reunion of extended kin. The broader family resemblance is the generic repertoire from which family members can select, but all of which no one exemplar need manifest (excepting, perhaps, the great^{x}-grandparent). This explains why 4QTestim, though large in size and inscribed on a single sheet, is nevertheless "in the family" with 4QDeut^{n}.[100] Conversely, the presence of *additional, non-citation material* in the form of commentary or explanation explains why the catenae texts, 4QCat^{a,b} (4Q177 and 4Q182), *Florilegium* (4QFlor [4Q174]),[101] and other texts like these,[102] while similar to some degree, are not invited to the family reunion. The inclusion of additional material makes these latter texts something else, not excerpted or abbreviated; they are of a different genre.[103]

---

[96] So, e.g., Judith E. Sanderson, "73. 4QEzek^{a}," in *Qumran Cave 4.X: The Prophets* (ed. E. Ulrich et al.; DJD 15; Oxford: Clarendon, 1997), 210, who intimates that the scroll originally contained the whole book of Ezekiel in a manuscript of 47 columns of ca. 42 lines each. Notably, Sanderson's conclusions rest solely on reconstruction.

[97] The scrolls containing Psalm 119 are different from those of the Megilloth, partly because this psalm is always written stichometrically at Qumran (see Tov, "Excerpted and Abbreviated," 590) and thus there is additional scribal evidence for the importance of this composition. The psalms as a genre/form also commend a liturgical *Sitz im Leben* of some sort. Cf. note 93 above.

[98] The latter point is *contra* the remarks of Brooke, "Ezekiel in Some Qumran and New Testament Texts," 317.

---

[99] See Fowler, *Kinds of Literature*, 55–56. Sinding, "After Definitions," 214: "genre members are never identical or strictly feature-defined but bear structure-based family resemblances over widely varying specifics."

[100] Note the use of scribal marks separating the different *testimonia* (DJD 6, pl. 21); the writing of the Tetragrammaton with four dots; and the possible motivation for selection in that each *testimonium* alludes to a character "which figure[s] prominently in the thought of the sect (such as the Righteous Teacher) and [this] suggest[s] that the quotations were compiled by a member of the Community" (Frank Moore Cross, "Testimonia [4Q175 = 4QTestimonia = 4QTestim]," in *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations*, Vol. 6B: *Pesharim, Other Commentaries, and Related Documents* [ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002], 309). Cf. the analysis of George J. Brooke, *Exegesis at Qumran: 4QFlorilegium in its Jewish Context* (JSOTSup 29; Sheffield: JSOT Press, 1985), 309–19.

[101] The order of selections in 4QFlor (4Q174) is interesting, however, insofar as frags. 1–2 and 21 1.1–19 move from 2 Sam 7:10b–11a to Exod 15:17b–18, back to 2 Sam 7:11–14, then to Amos 9:11, Ps 1:1, Isa 8:11, Ezek 37:23, and Ps 2:1–2. Other frags. and cols. cite from Dan 11:32, Deut 33:8ff., and Isa 65:22–23. See the notes and discussion in Jacob Milgrom, "Florilegium: A Midrash on 2 Samuel and Psalms 1–2 (4Q174 = 4QFlor)," in *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations*, Vol. 6B: *Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 248–63.

[102] See *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations*, Vol. 6B: *Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002). One thinks not only of the *pesharim* proper but also of the other commentary texts included there (e.g., 4Q252–4Q254, 4Q254a, 5Q10, 4Q253a; note also 11Q13).

[103] An exception may be *Tanhumim* (4Q176), which consists almost exclusively of citations from Isaiah 40ff. (40:1–5a; 41:8–9; 43:1–2; 43:4–6; 49:7d; 49:13–17;

In the case of the excerpted manuscripts, the cited material is primary—indeed, *solitary*; in the interpretive texts, the cited material may still be considered primary but it is *supplemented* by additional material that may well exceed it in size and ultimately, therefore, importance. The presence of this additional material indicates *a gestalt difference* between excerpted manuscripts and these others. In the case of the exegetical texts, the overall gestalt is one of interpretation. The cited texts are explained or related to the audience, context, or reader in some (usually explicit) way; that interpretive move is, moreover and to no small degree, the primary function of the manuscript.[104] Such is *not* the case with excerpted manuscripts. They too may be interpretive, but they are not interpretive in the same way. They are interpretive by means of selection and arrangement of the base text(s) *without commentary*; commentary texts are interpretive by means of selection and arrangement *and* the addition of commentary. Said differently, the excerpted manuscripts represent a kind of minimalist program of interpretation; the commentary texts represent a maximalist version.

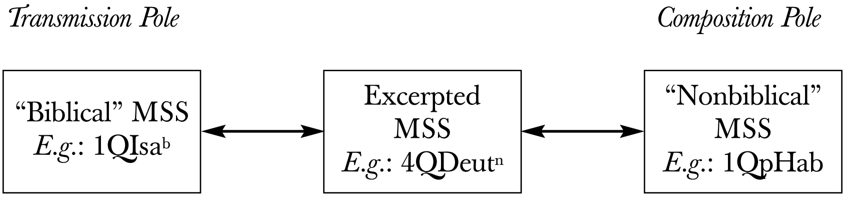
Yet even with this important distinction made, a relationship of sorts is apparent between the excerpted manuscripts and commentary texts, on the one hand, and excerpted manuscripts and their base texts, the

---

51:22–23a; 51:8[?]; 52:1–3; 54:4–10a; 52:1; 52:1c–2a; note the ordering and arrangement and that the first citation that is extant is from Ps 79:3, and that the last is apparently from Zech 13:9) and which apparently does so by conscious thematic selection—"for the sake of consolation" (Hermann Lichtenberger, "Consolations [4Q176 = 4QTanḥ]," in *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations*, Vol. 6B: *Pesharim, Other Commentaries, and Related Documents* [ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002], 330). Much depends on a few lines: esp. frags. 1–2 1.1–3, 4b; frags. 4 and 5 line 5 (one word); frags. 8–11 lines 13–17; frag. 14 lines 1–7; frag. 15 lines 5–6; and frags. 16–18, 22–23, 51 and 53 lines 1–9. Cf. also the remaining fragments (24–32, 34–41, 43–50, 52, 54–57), which are too small for identification. The issue is whether or not these passages contain non-citation material and, if so, what the nature and extent of that is. Again, the accidence of preservation precludes certainty, but it seems clear that at least some of these passages contain the additional, non-citation material that would identify the text as belonging to a different genre than the excerpted manuscripts proper. For the text, see further Lichtenberger, "Consolations," 329–49 and the notes there. See also Cristopher D. Stanley, "The Importance of 4QTanḥumim (4Q176)," *RevQ* 15 (1992): 569–82; and idem, *Paul and the Language of Scripture: Citation Technique in the Pauline Epistles and Contemporary Literature* (SNTSMS 69; Cambridge: Cambridge University Press, 1992), esp. 74–77, 267–91, and 296–306 for citation technique in the Greco-Roman world and in Early Jewish literature (including *Testimonia*, *Consolations*, *Melchizedek*), which has significant bearing on the topic at hand.

[104] Cf. James H. Charlesworth's reflections on the hermeneutics of the *pesharim* in *The Pesharim and Qumran History: Chaos or Consensus?* (Grand Rapids: Eerdmans, 2002).

"biblical" compositions, on the other hand. Indeed, a kind of continuum is obvious, represented by the chart below:



Transmission Pole
Composition Pole
"Biblical" MSS *E.g.*: 1QIsa^{b}
Excerpted MSS *E.g.*: 4QDeut^{n}
"Nonbiblical" MSS *E.g.*: 1QpHab

To be sure, the chart is *far* too facile for the complex data from Qumran. Even so, it is heuristic in that it depicts how the excerpted manuscripts fall somewhere between the "biblical" scrolls and the "nonbiblical" scrolls (particularly the commentary texts). They have some affinity to both groups but remain distinct—constituting a kind of *tertium quid* as it were. In one sense, they represent a blurred category: that of "'nonbiblical' 'biblical' scroll."[105] The existence of such a document-type—as well as the possibility that still other texts, given their poor state of preservation, might also belong to this genre—raises important text-critical questions that must now be addressed.

3. THE TEXT-CRITICAL PROBLEM OF EXCERPTED MANUSCRIPTS

Although small in size (usually) and number,[106] the text-critical significance of the excerpted manuscripts is actually quite large and complex. There are at least two issues that, while closely related, may be logically distinguished for the sake of clarity. *First*, what is the text-critical contribution of the particular manuscripts themselves? This includes manuscript-form and how that form impacts the text-critical data contained in the scroll. Manuscript-form, in turn, raises the *second* question, which is also not unrelated to the genre issues discussed above: How ought one to view these manuscripts within the larger discussion of the history and formation of the biblical text, and what, if anything, do they have to contribute to that debate? Definitive answers to these questions lie outside the scope of this paper. Nevertheless, both must be addressed before a final important question can be explored: what were the purpose(s) and function(s) of these texts and what do they reveal about the socio-religious and scribal practices of the Qumran Community (see §4 below)?

---

[105] It is worth noting that PTSDSSP, which intentionally does not publish "biblical" scrolls but only "nonbiblical"/"sectarian" scrolls, has elected to include an edition of selected excerpted manuscripts. Included will be, at least, 4QExod^{d-e} (4Q15-16), 4QDeut^{j,k1,n,q}, and 5QDeut. The edition, contributed by Julie A. Duncan and Brent A. Strawn, is slated for publication in PTSDSSP 6A: *Targum on Job, Parabiblical, and Related Documents* (forthcoming).

[106] Following the computations of Tov, "D. The Biblical Lists from the Judaean Desert," 167–78, and based on the data in Table 1, the statistics are as follows: 18 of 202 "biblical" texts or 8.91% (counting only Hebrew "biblical" texts and excluding *Testimonia*, the phylacteries, and the *mezuzot*). If all of the Psalms scrolls thought by Tov to be possible excerptions or abbreviations are included, the computation becomes 27 of 202 or 13.37%.

a. The Text-Critical Contribution of Excerpted Manuscripts

The specific contributions of the readings contained in the excerpted manuscripts are detailed elsewhere: in addition to the editions of these texts found in DJD, the articles of White Crawford, Duncan, Eshel, and Tov contain extensive collation of the data. The sheer amount of information indicates that it cannot be repeated here. Moreover, some of the most important conclusions about these texts, especially the Deuteronomy manuscripts, have already been summarized above. This includes, especially, Duncan's work, which has shown that these manuscripts tend toward a slightly expansionistic version of the text in question and that, in the case of the Deuteronomy manuscripts, this may be the result, not of textual affinity with SamP or the phylacteries and *mezuzot*, but the influence of closely parallel passages and copying from memory.

Most text-critical discussions to date and the data contained therein have been focused on the most minute details in the excerpted manuscripts: line-by-line, even word-by-word analyses treating specific words and clauses, orthography and morphology, and so forth–in other words, the *contents* and *constituent parts* of these scrolls. What has received less attention is the text-critical issue of the *overall form, order, and shape* of these manuscripts. Typically, once scholars have identified a manuscript in question as excerpted, that fact is ignored and the text-critical data of the constituent excerpts are then investigated. But the textual form ought to give one pause: precisely how useful are these documents for the text-critical enterprise given their form and order, which are, at times, drastically different from what is preserved in other versions of the text?

An important and quite pertinent issue at this point is the determination of the function(s) of these manuscripts. This is investigated in §4. It suffices to say here that the *function* of the manuscript in question (e.g., personal or devotional use) no less than *the manner of its composition* (e.g., from memory) impacts its text-critical significance and usefulness. It is simply not certain, that is, if these texts were copied from an exemplar that was (so that they are) aligned with a particular text-type,[107] or if they were composed from memory and/or for a particular and momentary purpose in which case asking about text-critical alignment, while a possible angle of inquiry, would hardly be the only or even the best one, and quite possibly, in fact, the worst one. The manuscripts' probable functionality, in short, indicates that they served a purpose *beyond* merely preserving a *copy* of a biblical text. This "plus"-beyond-simple-transmission warrants caution when comparing the excerpted manuscripts' textual data with other witnesses to the biblical text.

Even so, at the very least it seems safe to say that, with regard to form and order, the lack of units or the rearrangement of such–textual "macrovariants," as it were–ought to be attributed to excerption or shortening, not to the specific textual affiliation of the scroll. 4QDeut^{j} again provides a useful example. As indicated above, the scroll contains excerpts from Deuteronomy 5, 6, 8, 11; Exodus 12, 13; and Deuteronomy 32–in that order. Though the variants contained in each unit may be (and are) of significance and potentially aligned (or not) with particular text families, almost no one would want to argue that this manuscript represents an early text-form or, in Ulrich's terminology, a variant literary edition of Exodus and/or Deuteronomy. But how can we be certain about the latter point? I would argue that such a judgment is predicated on two important pieces of information:

1. First and foremost, such a judgment is possible primarily–if not, in fact, *exclusively*–through *recourse to other, often more complete, copies* of Exodus and Deuteronomy that are more or less representative of established text families like SamP, LXX, or MT. Yet without these fuller and oftentimes later witnesses it would be significantly harder if not impossible to assess whether or not 4QDeut^{j} is an early exemplar of Exodus and Deuteronomy in *both* order and form *as well as* in content. Said differently, the overall form and order of these manuscripts that strikes one as odd

---

[107] As already stated, such alignment is unclear for many of these texts. Tov has repeatedly stressed that most of them stand at some distance from the MT and Duncan's work has shown that even in their expansionistic tendencies they need not be aligned with SamP. See, similarly, Elizabeth Owen, "4QDeut^{n}: A Pre-Samaritan Text?" *DSD* 4 (1997): 162–78, who has put the text more formally in Tov's "Non-Aligned" category. Tov's non-aligned category is intended to include many different text-forms (see VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 145), but in practice this grouping may function in a restrictive matter (inadvertently?) privileging the three main families (MT, LXX, SamP). See note 119 below and the discussion there. Note White Crawford's response to Owen ("A Response," 94): she states that 4QDeut^{n} (4Q41) is non-aligned *because* it is an excerpted text.

and that is, in fact, the primary criterion that reveals them to be of a particular type or genre of manuscript, *is contingent on prior knowledge of the base text in question.* That prior and additional–even extra-textual[108]–knowledge is what indicates that the overall form and order of the manuscript is *not typical*: it is text-critically suspect as a "pure copy" of the composition. And yet, by the same token, if the overall shape of these manuscripts is suspect on a text-critical level, it should give one pause in being too quick to use their constituent parts as fertile soil for text-critical arguments of whatever variety. The parts may simply be non-aligned, not because they belong to another, previously unknown textual tradition, but because the function or purpose to which the text was put (its *raison d'être*) dictated both form and content, both composition and transmission, of the source text in question. To be sure, various excerpted manuscripts (or some of their parts) may indeed be and very well are aligned with particular text families. Yet this must remain an open question that is answered on a case-by-case, line-by-line, and word-by-word basis. Moreover, such decisions will again be largely dependent on and only possible if one has access to fuller, more extensive manuscripts of the same composition(s) from established text families. The main point, however, is that such alignment or non-alignment may be largely inadvertent or, at least, not the matter of primary import. In short, the question of alignment is certainly not the only question to ask of the excerpted manuscripts; neither is it necessarily the most important question to ask.

2. The second piece of information that permits the judgment is *prior knowledge of the genre of excerpted manuscripts.* As already indicated, this genre has been conclusively identified only recently, despite the fact that other documents, such as the phylacteries and *mezuzot* reflect similar excerption. Moreover, the genre is still being delineated and thus is sure to be further refined. Still further, even those exemplars that certainly belong to this genre were identified as such on the basis of prior knowledge of the source text (point #1).

Both of these sources of information can be challenged; it is especially noteworthy that the second is to no small degree contingent upon the first. Hanging upon each and on their conjunction is the issue of what contribution, if any, these documents make to the on-going questions of the Dead Sea Scrolls' contribution to the history and formation of the biblical text.

---

[108] That is, external to the manuscript (text) in question itself.

b. Excerpted Manuscripts and the History and Formation of the Biblical Text, Or: Toward a Theory of "Hyper-Local" Texts

It is, in fact, the startling new information about the biblical text afforded by Qumran that casts significant doubt on the first source of information: that of *prior* knowledge about the source text. Such prior knowledge is often, in truth, *posterior* (*a posteriori*) in the sense that it is based on *chronologically later* manuscripts or text-traditions. As indicative of the problem and the issues involved, Tov's statement on *Reworked Pentateuch*$^{a–e}$ (4QRP$^{a–e}$ [4Q158, 4Q364–4Q367]) is illustrative:[109]

> [This composition] contains long stretches of text which would have been understood as representing biblical manuscripts, *had the remainder of those extensively preserved manuscripts not been known....As a consequence*, even though the fragments of 4QRP bear on the textual criticism of the Bible, they should be considered as representing a text that is beyond the Bible, and not as a witness to the biblical text. They are relevant to textual criticism, since their evidence often goes together with that of other textual witnesses, but when it runs counter to these manuscripts one should consider first whether the deviation did not result from exegesis of some kind, including possible omission(s).[110]

Tov's comments correspond to several of the conclusions reached above. Moreover, they seem relatively sound, insofar as the texts in question are related to the Pentateuch–books that are attested in multiple copies and in multiple versions (i.e., with reference to alignment) at Qumran and elsewhere. The prior knowledge of the source text in the case of *Reworked Pentateuch*, that is, is not solely posterior, based only on later texts (and knowledge) anachronistically retrojected backwards and wrongly imposed upon the Qumran evidence, if only because many of the manuscripts related to the biblical compositions *predate Reworked Pentateuch*.[111] Even so, Ulrich has challenged Tov's conclusions regarding *Reworked Pentateuch*, positing that this composition is, in fact, a true version and variant literary edition of the Pentateuch at Qumran.[112]

---

[109] For the text, see Emanuel Tov and Sidnie White (Crawford), "364–367. 4QReworked Pentateuch$^{b–e}$," in *Qumran Cave 4.VIII: Parabiblical Texts, Part I* (ed. H. Attridge et al.; DJD 13; Oxford: Clarendon, 1993), 187–351; and John M. Allegro, "158. Biblical Paraphrase: Genesis, Exodus," in *Qumran Cave 4.I (4Q158–4Q186)* (ed. J. M. Allegro with A. A. Anderson; DJD 5; Oxford: Clarendon, 1968), 1–6.

[110] Tov, "Excerpted and Abbreviated," 583–84; my emphases. See also Tov, "The Textual Status of 4Q364-367 (4QRP)," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid 18–21 March, 1991* (ed. J.C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:44–82, esp. 49–52; idem, "Biblical Texts as Reworked in Some Qumran Manuscripts with Special Attention to 4QRP and 4QParaGen-Exod," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls* (ed. E. Ulrich and J. VanderKam; Notre Dame: University of Notre Dame Press, 1994), 111–34, esp. 131–34; and idem, "Rewritten Bible Compositions and Biblical Manuscripts, with Special Attention to the Samaritan Pentateuch," *DSD* 5 (1998): 334–54.

The disagreement between Tov and Ulrich on *Reworked Pentateuch* is symptomatic of the larger differences between these two scholars and their respective assessments of the Qumran evidence for the history of the biblical text. The full scope of the debate between them and how their respective positions fit into the larger discussion lie outside the scope of this paper. Still, a brief overview is in order; five stages or perspectives in the research can be delineated.[113]

As is well known, William F. Albright championed a theory of "local texts" (*stage or perspective 1*) in which he correlated the three main textual versions–MT, LXX, and SamP–with the development of the text in particular geographical locations: Babylon, Egypt, and Palestine, respectively.[114] This thesis was adopted and further elaborated by Frank Moore Cross (*stage/perspective 2*).[115] In one sense, the theory of local texts is an attempt to explain how one *Urtext* became three. In contrast to this approach, in light of the great diversity found in the Dead Sea Scrolls, Shemaryahu Talmon (*stage/perspective 3*), sought to explain how multiple text-forms became, instead, just three. He did this by focusing on the textual and, notably, the socio-religious aspects that led to the creation and preservation of the different text families.[116] Tov's work belongs to yet a *fourth stage/perspective*: Like Talmon, Tov recognizes a far greater diversity of text-types preserved at Qumran than did Albright and Cross; he calls this the "textual plurality and variety" of the period between the third century B.C.E. and first century C.E.[117] Tov observes that, in contrast to a theory of local texts, all three "geographical texts" are found together, in Palestine, at Qumran, along with a number of manuscripts that do not correspond to the three local texts. Indeed, Tov discusses *at least five* different groups of texts at Qumran (with total percentages): (1) texts written in his so-called "Qumran scribal practice" of orthography and morphology (20%); (2) proto-MT texts (35%); (3) pre-SamP texts (5%); (4) texts close to the presumed Hebrew Vorlage of LXX (5%); and (5) non-aligned (independent) texts (35%).[118] In truth, Tov's analysis is not as strict or reified as it is often made out to be by his detractors.[119] Even so, his work can be (and has been) challenged as overly dependent upon later textual traditions and families insofar as the scrolls–many of which constitute our earliest known version of a composition in question–are placed in categories largely, primarily, or solely known from (much) later exemplars. In this regard, it is worth considering Tov's fifth category: non-aligned texts. The designation itself raises questions: non-aligned with what or according to whom? The answers would seem to be: (with what?) the three main text families of MT, LXX, and SamP; and (according to whom?) Tov and other textual critics who assess the data in this fashion. These remarks are not intended to be overly critical, and two caveats must be entered immediately. First, in addition to the fact that Tov is more nuanced than his critics often allow, one should note that he has been a leading proponent of realizing the textual diversity at Qumran, and that, related to this, his "non-aligned" group actually "includes numerous forms of the biblical text."[120] Non-aligned texts do not constitute a monolithic, homogenous category. Second, even though it is true that prior text-critical knowledge can be operative in overly influential ways and that such knowledge is often based on chronologically posterior evidence, one must not underestimate the importance of such knowledge. That is to say, it is (a) probably impossible to completely bracket what we already know when facing new data, and, moreover, (b) it is probably undesirable to do so–at least completely. Prior knowledge is, at some level, always operative, even while it must constantly be adjusted to the new data emerging from the sources. Such a process of dialectical reflection is never easy or mechanistic.[121] Even so, despite these caveats, Tov's critics still argue that, while on the one hand his work represents an advance, on the other hand it gets the three main text-types "in the back door," so to speak. Whether intentionally or not, that is, Tov's work on diversity of text-type at Qumran (according to some) has functioned to reassert the priority and dominance of the three main text

---

[111] On the basis of paleographical analysis, the oldest copies of the Pentateuchal manuscripts are as follows:

Genesis: 250–150 B.C.E. (6Q1)
Exodus: 250–150 B.C.E. (4Q15, 4Q17)
Leviticus: 250–150 B.C.E. (4Q17)
Numbers: 150–100 B.C.E. (1Q3 paleo and 4Q23)
Deuteronomy: 250–150 B.C.E. (4Q28, 4Q46, 5Q1)

The dates of 4QReworked Pentateuch are, in the main, significantly later:
4QRP^{a}: early Herodian (30–1 B.C.E.)
4QRP^{b}: late Hasmonean (50–1 B.C.E.)
4QRP^{c}: late Hasmonean (50–1 B.C.E.)
4QRP^{d}: late Hasmonean (50–1 B.C.E.)
4QRP^{e}: middle to late Hasmonean ([125]100–50 B.C.E.)

(Dates follow Brian Webster, "J. Chronological Index of the Texts from the Judaean Desert," in *The Text from the Judaean Desert: Indices and an Introduction to the Discoveries in the Judaean Desert Series* [ed. E. Tov et al.; DJD 39; Oxford: Clarendon, 2002], 351–446, esp. 358, 371–75, 378–434; cf. also Frank Moore Cross, "Paleography," in *EDSS* 2:629–34.) Of course, dates such as these are related to the *production* of the scroll, not the date of the composition of the work. White Crawford ("Reworked Pentateuch," in *EDSS* 2:775–76) gives evidence for a date of composition in the middle- to late-second century B.C.E., but indicates that such evidence is not unambiguous and so "[t]he question of date is at the moment unresolved" (776).

[115] See Frank Moore Cross, "The Evolution of a Theory of Local Texts," in *Qumran and the History of the Biblical Text* (ed. F. M. Cross and S. Talmon; Cambridge, MA: Harvard University Press, 1975), 306–20.

[116] Shemaryahu Talmon, "The Old Testament Text," in *CHB* 1:159–99; repr. in *Qumran and the History of the Biblical Text* (ed. F. M. Cross and S. Talmon; Cambridge, MA: Harvard University Press, 1975), 1–41, esp. 39–4; and "The Textual Study of the Bible–A New Outlook," in *ibid.*, 321–81. Cf. more recently idem, "The Crystallization of the 'Canon of Hebrew Scriptures' in the Light of Biblical Scrolls from Qumran," in *The Bible as Book: The Hebrew Bible and the Judaean Desert Discoveries* (ed. E. D. Herbert and E. Tov; New Castle, DE: Oak Knoll Press; London: British Library, 2002), 5–20. Note that much of Ulrich's recent writing also places emphasis on certain sociological factors. Cf., similarly, Julio Trebolle Barrera, "The Authoritative Functions of Scriptural Works at Qumran," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls* (ed. E. Ulrich and J. VanderKam; Notre Dame: University of Notre Dame Press, 1994), 95–110.

[117] Tov, *Textual Criticism*, 117; cf. further 187–97.

[118] See Tov, "Groups of Biblical Texts Found at Qumran," 85–102; idem, *Textual Criticism*, 114–17. Statistics are from the latter source. In a more recent essay ("The Biblical Texts from the Judaean Desert–An Overview and Analysis," 139–66), Tov does not provide statistics for the first Qumran scribal practice group and this represents a development from his earlier approach (see VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 143–46). See further, ibid., 146, for a critique of Tov's

---

statistical analysis, and his favoring of MT even when the manuscripts in question are equally aligned with other types.

[119] See Tov's many nuances and qualifications in "Groups of Biblical Texts," 85–102; and idem, *Textual Criticism*, 191–97. Note also the positive assessments in VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 142–45.

[120] Ibid., 145.

[121] For an insightful analysis of this interpretive dialectic, see Clifford Geertz, "'From the Native's Point of View': On the Nature of Anthropological Understanding," in idem, *Local Knowledge: Further Essays in Interpretive Anthropology* (3d ed.; New York: Basic, 2000), 55–70. Geertz ends up stating that such a process is "like grasping a proverb, catching an allusion, seeing a joke–or…reading a poem."

types, especially and ultimately, the MT, given the sheer dominance of his "proto-MT" group.[122]

This brings us to the *fifth stage/perspective* represented by Ulrich who, in a stream of important publications, has attempted a new formulation.[123] His approach might be termed a theory of multiple literary editions. In his work, Ulrich stresses two important points:[124] (1) in many cases, Qumran represents our earliest textual evidence about a particular composition;[125] it is thus premature and misleading to take such early evidence and slot it into categories that only come from later texts and the knowledge thereof.[126] (2) It is abundantly clear from the evidence at Qumran that many compositions existed side-by-side in variant literary editions. The most famous example of this is probably Jeremiah, known at Qumran in both the longer (MT) and shorter (LXX) versions (cf. 4QJer^{a,c} [4Q70, 4Q72] and 4QJer^{b,d} [4Q71, 4Q72a], respectively). But there is evidence that other books probably also existed in this fashion.[127]

---

[122] Tov, *Textual Criticism*, 117: "At the same time, the great number of the proto-Masoretic texts probably reflects their authoritative status." Cf. ibid., 191. Note also VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 143, 146, and tables 6.1 and 6.2.

[123] See Ulrich, "Our Sharper Focus," 1–24 and esp. the important essays collected in his *The Dead Sea Scrolls and the Origins of the Bible* (SDSSRL; Grand Rapids: Eerdmans, 1999), esp. 3–120. Other important essays by Ulrich that come after the book collection but prior to "Our Sharper Focus," include "The Qumran Biblical Scrolls," 67–87; "The Text of the Hebrew Scriptures," 85–108; and "From Literature to Scripture: Reflections on the Growth of a Text's Authoritativeness," *DSD* 10 (2003): 3–25. Note also Ulrich's essay, "The Dead Sea Scrolls and the Hebrew Scriptural Texts," in volume one, chapter 4, of the present work. As there is some repetition and overlap between these various essays, I have cited mostly from "Our Sharper Focus" since it is the most recent (2004).

[124] Note, e.g., these two points (but in reverse order) in Ulrich, "Our Sharper Focus."

[125] Note Eugene Ulrich, "Qumran and the Canon of the Old Testament," in *The Biblical Canons* (ed. J.-M. Auwers and H. J. De Jonge; Colloquium Biblicum Lovaniense; BETL 163; Leuven: Leuven University Press and Peeters, 2003), 62: "they [the scrolls] are the oldest, the best, and the most authentic evidence we have for the shape of the Scriptures at the time of the beginning of Christianity and rabbinic Judaism.…The Qumran scriptural scrolls should now become the standard criteria for understanding and judging the Jewish Scriptures in late Second Temple Palestinian Judaism." Cited, with some adjustment, in "Our Sharper Focus," 10.

[126] See esp. Ulrich, "The Qumran Biblical Scrolls," 70–72, 85.

[127] Ulrich, "Our Sharper Focus," 2–9 presents what he calls "clear evidence for variant literary editions of at least six books of the twenty-four in the traditional Hebrew Bible" (8)—namely, Exodus (4 versions: LXX, MT, SamP, and 4QpaleoExod^{m} [4Q22]), Numbers (3 versions: MT, SamP, and 4QNum^{b} [4Q27]), Joshua (4 versions: LXX, MT, OL, and Josephus/4QJosh^{a} [4Q47]), Jeremiah (2 versions: MT and LXX), Psalms (2 versions: MT and 11QPs^{a} [11Q5]), and Canticles (2 versions: MT and 4QCant^{a,b} [4Q106-107]). Ulrich argues that the evidence of the SamP and LXX, when "restudied…with Qumran in mind," adds seven other books to this list: Genesis, 1 Samuel, Kings, Ezekiel, the Twelve, Proverbs, and Daniel. He

The theories of Ulrich and Tov are the two main options currently available and viable.[128] But how does one adjudicate between them? To return to *Reworked Pentateuch* for a moment, Tov would seem to have the advantage. We have a plethora of manuscripts relating to the Pentateuch at our disposal (at least 91 from Qumran alone; cf. Table 5), many of which predate the (mostly later) copies of *Reworked Pentateuch.* To be sure, the latter composition does exist in multiple copies (five), but the presence of additional, "exegetical" material in this composition seems best interpreted as evidence that the composition is a "parabiblical" work, if not actually "exegetical" proper along the lines of some of the other commentary texts.[129] White Crawford may be correct when she writes, "to the casual reader, the scroll [of 4QReworked Pentateuch] would have looked like any other manuscript of the Torah,"[130] but given the other Pentateuchal manuscripts—as well as those commentary texts related to the Pentateuch—one might argue that such a surmise is incorrect.[131]

---

continues: "Evidence from Judges, Job, and Lamentations is too sparse for certainty but suggest[s] the possibility that these books may also be added to the list. We thus have surviving manuscript evidence that over half of the books of the Hebrew Bible circulated in variant literary editions at the time of the origins of Christianity and rabbinic Judaism" (ibid., 8–9; cf. also VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 144–45). In my judgment, not all of this evidence is equally compelling—not even for Ulrich's most certain examples—and so the existence of multiple literary editions for at least some of these books is less certain and more debatable than others. For Canticles and Psalms, see further below. For Samuel, note the alternative perspective in Alexander Rofé , "4QMidrash Samuel?—Observations Concerning the Character of 4QSam^a," *Textus* 19 (1998): 63–74.

[128] See, e.g., VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 145–47. Talmon's theory is not by any means defunct but is in some sense distinct because it (helpfully and rightly) focuses on socio-religious factors that are less to the forefront in the other perspectives.

[129] See Tov and White Crawford, "364–367. 4QReworked Pentateuch^{b-e}," 188, 191. Cf. White Crawford, "Reworked Pentateuch," 775: "This reworking [of the biblical text by means of scribal intervention] consisted of exegetical additions and a differing sequence of passages from that of the received texts." Note esp. 4Q365 frags. 6a col. 2 and 6c; cf. 4Q158 frag. 14. See further Tov, "The Textual Status of 4Q364-367," 49; idem, "Biblical Texts as Reworked," 131–34; and Sidnie A. White Crawford, "4Q364 & 365: A Preliminary Report," in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls, Madrid 18–21 March 1991* (ed. J.C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992), 1:217–28. Note, however, that for his part Ulrich sees additions and altered sequences as characteristic of the biblical text in this period, not indication of nonbiblical composition ("The Qumran Biblical Scrolls," 74; idem, "The Text of the Hebrew Scriptures," 102–3).

[130] White Crawford, "Reworked Pentateuch," 775.

[131] As a further piece of evidence, one might note that reconstruction (N.B.!) of 4QRP—assuming (N.B.!) it contained "Genesis" through "Deuteronomy"—would place these scrolls among the longest at Qumran. See, e.g., White Crawford, "4Q364

One might also wonder, on the basis of those self-same manuscripts–"biblical" and otherwise–whether there was any such thing as a "casual reader" at Qumran.

But what about smaller texts with less abundant evidence? 4QCant^{a,b} are an important case in point. Here Ulrich's theory seems to carry most weight since these manuscripts are the earliest known copies of this composition. While it is possible, as Tov remarks, that these texts represent an abbreviation of the biblical text, he is also right in stating that this is a particular understanding–in short, an *assumption* of sorts. It is not surprising, then, to find Ulrich arguing the opposite: "They could be 'abbreviated MSS,' or, more likely, they could be simply variant literary editions of the Song, similar to the many other instances of variant literary editions of biblical books."[132] Unfortunately, Ulrich does not cite any evidence supporting his claim that this assessment is "more likely,"[133] and, while it is possible that the evidence of variant literary editions in the case of Jeremiah or other books obtains also here for Canticles, it is hardly certain that it does so, and it very well may not. Ulrich's position, too, then–with reference to these texts of Canticles–would seem to be an *assumption*.[134] This is not to say that Ulrich's (or Tov's) assumption is not based on any evidence whatsoever. Indeed, in light of what was said above about Tov, it should be pointed out that Ulrich's assumption, too, is equally contingent on knowledge of other data sets. The variant literary editions of Jeremiah comprise one such piece of data, but, more generally, so do the later text types, the influence of which Ulrich helpfully

---

& 365," 217-18n3, who notes Stegemann's reconstruction of 4Q364 + 4Q365 as one scroll 25 meters long! (11QT is, by comparison, 8 meters.) The size alone might raise doubts about such reconstruction (cf. *b. B. Bat.* 14a discussed above), but one should also observe that most Pentateuchal manuscripts contain only one composition. The number of manuscripts that contain more than one composition are few (four: 4QGen-Exod^a; 4QpaleoGen-Exod^l; 4QExod-Lev^f; 4QLev-Num^a; this does not include 4QDeut^j [4Q37]) and there is not one that clearly and unambiguously preserves the transition from one composition to another on a single fragment (the possible, but debatable, exception is 4QpaleoGen-Exod^l frag. 1). These considerations could lend further support to the perspective that 4QRP did *not* cover the whole Pentateuch seriatim, but only selectively, thematically, and interpretively. At the very least, White Crawford's comments are correct: "As it stands, the results of the physical reconstruction are not yet conclusive" (ibid.).

[132] Ulrich, "Our Sharper Focus," 8. With "abbreviated MSS," Ulrich is citing Tov, "Three Manuscripts," 88–111.

[133] But note Ulrich's more extended treatment in "The Text of the Hebrew Scriptures," 104–5. Even here, however, he limits himself to arguing for the *possibility* of his interpretation in light of his overall theory, not the *probability* of it on the basis of the manuscripts themselves.

[134] See previous note.

wishes to restrict. This is to say that, to some degree at least, Ulrich, too, is influenced by knowledge of later text families in his argument that these are or are not operative on, and bear or do not bear sufficient similarity to, the Qumran materials in his construction of a theory of multiple literary editions.

Things seem to be at something of an impasse. The positions of Tov and Ulrich, while based on extensive data that must not be underestimated, bypassed, or treated lightly, are nevertheless differentiated–at least at *some* level and with *some* texts–by different *presuppositions* about the nature of the biblical text and the evidence cast on that text by Qumran. One could easily argue that Ulrich's is the safer of the two options. He does not seem to be as subject to the charge of (potential) anachronism as Tov. As Ulrich puts it: Instead of asking, "Was the MT the standard biblical text in antiquity?....The more neutral question would be, What was the text of the Scriptures like in the Second Temple period?"[135] By favoring the earliest evidence (i.e., Qumran) and treating it as preeminent, Ulrich can largely eschew questions of text-type and alignment: "There was no 'Masoretic Text' in antiquity, nor was there a category of 'Proto-Masoretic Text.'"[136] The Qumran texts are not so much on-the-way-to-becoming-something-that-we-know-later; what we have later is instead *a reduction and selection*–largely the result of circumstance and happenstance–from what was a larger, more robust, and diverse body of compositions and versions thereof.[137]

It is clear that Ulrich has made some significant theoretical points in contrast with and distinction from Tov. And again, deciding among these two scholars and the presuppositional stances each assumes–depending, as those positions are, on vast and unrivaled amounts of work, on both their parts, with the primary data–is beyond the scope and purpose of this study. And yet, given the focus of the present article, it is worth asking what, if anything, the excerpted manuscripts might have to say to this debate, especially given the use of 4QCant^{a,b} by both of these eminent textual critics.

1. First, the point made earlier regarding the small size of some manuscripts and their fragmentary remains also obtains here. If, due to the state of preservation, we cannot be sure a small-sized scroll is truly

---

[135] Ulrich, "Our Sharper Focus," 11.

[136] Ibid.

[137] Ibid., 12. Ulrich cites a recent article by Tov to similar effect: see Emanuel Tov, "The Status of the Masoretic Text in Modern Text Editions of the Hebrew Bible: The Relevance of Canon," in *The Canon Debate* (ed. L. M. McDonald and J. A. Sanders; Peabody, MA: Hendrickson, 2002), 234–51, esp. 242.

excerpted, then we also cannot be sure, given the existence of the excerpted documents (as both manuscripts and genre), that it is *not* excerpted. One can only be certain, that is, about those scrolls that are most obviously excerpted. Yet here again Ulrich's theoretical observations are crucial: how can one know that a scroll is excerpted and not an early text-form? As stated above, such a decision is reached, at least in part, only—or at least primarily—by recourse to other, fuller exemplars of the source text, some or most of which are later than the manuscript in question. One must argue from the most certain exemplars, that is, to less certain ones. Given this, one must admit to a certain amount of uncertainty with regard to texts like 4QCant^{a,b}. At the same time, given our limited evidence and lack of certainty due to preservation, paucity of evidence, and so forth, one must also guard against overstating the contribution of these texts to the compositional history of the Song of Songs.[138] There is always the chance that further evidence will come to light and clinch one of the two options—abbreviation (Tov) or early text-form (Ulrich)—*or* suggest yet a third.

2. Regardless of textual alignment or lack thereof, the existence of excerpted manuscripts demonstrates that at least some scrolls were put to particular uses and played specific functions. Although such uses and functions remain somewhat elusive (see §4), it seems safe to say that the texts' utility—to some degree at least—dictated the form and order of the text.[139] This means that the form and order of these manuscripts may be more related to *text-use* and *text-function* than text-type, whether that is understood as aligned *à la* Tov or understood as a variant edition *à la* Ulrich. The text-type, that is, may be neither and, instead, a kind of third thing.

3. It is critical in this discussion to note that the excerpted manuscripts do *not* manifest what Ulrich would call "sectarian variants."[140] Indeed,

---

[138] See at note 89 for Tov's arguments that the selection is intentional and not accidental. Note also that the cautions presented above could be addressed to Smelik's argument regarding the Ketef Hinnom rolls. Smelik believes that these rolls are *forerunners* of the priestly blessing, which only later received definitive form in Numbers 6 (*Writings from Ancient Israel*, 162). One might well ask, however, how and if Smelik's assumption is inherently better than the possibility that the rolls excerpt or extract from a prior version of the blessing.

[139] See the first comment (#1) immediately above; the issues are obviously intertwined.

[140] See Eugene Ulrich, "The Absence of 'Sectarian Variants' in the Jewish Scriptural Scrolls Found at Qumran," in *The Bible as Book: The Hebrew Bible and the Judaean Desert Discoveries* (ed. E. D. Herbert and E. Tov; London: The British Library; New Castle, DE: Oak Knoll Press, 2002), 179–95. See also idem, "Our Sharper Focus," 12–13 for the two sectarian variants that Ulrich believes can be identified with certainty in SamP: (1) statements that God "had chosen" (בחר vs. MT's יבחר) Mount Gerizim (cf. Deut 12:5; 14:23; 16:2; 17:8; 18:6; 26:2; etc.); and (2) the reading of "Mount Gerizim" instead of "Mount Ebal" at Deut 27:4.

none of the biblical manuscripts betray sectarian variants according to him.[141] Ulrich has used this data, with reference to the biblical scrolls from Qumran, to argue for their centrality, reliability, and representative nature within Early Judaism in general and thus, more specifically, for the text-critical enterprise. Note:

> They may not be dismissed as "sectarian" or "vulgar" texts, because they were not composed by the Qumran community but were mainly imported from Jerusalem and elsewhere (or copied faithfully at Qumran), and because they do not show any "sectarian" variants.... Thus, unless one can for a certain aspect explain why it is not the case, the Qumran scriptural evidence is generally applicable for the text and canon [better: collection] of late Second Temple Palestinian Judaism.[142]

Leaving aside the questions (still live, I think) of various scrolls' points of origin and possible importation, one wonders if, in fact, the excerpted manuscripts provide the "certain aspect" that Ulrich allows might challenge his conclusions, at least at a particular juncture or two. As argued above, the excerpted manuscripts are a kind of "'nonbiblical' 'biblical' scroll." They further complicate these categories and they, too, do not witness sectarian variants as defined by Ulrich. And yet, their order and form, as well as the mutually dependent issue of their function reveals them to be "sectarian"–if that is defined according to functional categories of use, reading, and reception within the Qumran community

---

[141] See, e.g., Ulrich, "The Absence of Sectarian Variants," *passim*; and idem, "Our Sharper Focus," 12–13. In the latter essay (12n38), Ulrich's formulation is open: "It is an immense field, of course, and I do not claim, so early after final publications, that I have understood perfectly every possible example. To my knowledge, however, no one has adduced from the scrolls evidence acceptable to other scholars favoring sectarian activity of any moment." It is important to recall that Ulrich does not accept Tov's theory of "Qumran scribal practice," which would, if allowed, constitute possible evidence for sectarian activity, if not actual sectarian variants/variance. Perhaps we should also mention Paulson Pulikottil's work, *Transmission of Biblical Texts in Qumran: The Case of the Large Isaiah Scroll 1QIsa^a* (JSPSup 34; Sheffield: Sheffield Academic Press, 2001), who attempts to make the case that the differences between 1QIsa^a and the other witnesses are best explained not simply as the result of scribal error, interpretive reading, or linguistic peculiarity, but as reflective of the scribe(s)'s close reading of Isaiah and correlate concern to explicate and exegete Isaiah more accurately. Cf. Talmon, "DSIa as a Witness to Ancient Exegesis of the Book of Isaiah," *ASTI* 1 (1962) 62–72; repr. in *Qumran and the History of the Biblical Text* (ed. F. M. Cross and S. Talmon; Cambridge, MA: Harvard University Press, 1975), 116–26. Again, one must reckon with a continuum of document-types at Qumran, with composition and transmission ideal poles that are actually blurred at many points and in manifold ways (see §2 above).

[142] Ulrich, "Qumran and Canon," 62; cited with the editorial addition in idem, "Our Shaper Focus," 10. Similarly, idem, "The Qumran Biblical Scrolls," *passim*, esp. 85.

(sect).[143] Although I would not want to overstate the case, it seems that one could use this data to argue against Ulrich. The excerpted manuscripts are (functionally) "sectarian" *and yet manifest no sectarian variants.* It may well be incorrect to presume, then, that "vulgar," "non-official" manuscripts would contain such sectarian variants. It is possible, that is (to continue this line of thinking), that what look to be normal, official, mainstream texts from Qumran are *also*, nevertheless, *and despite that*, sectarian at some level(s) and, if so, *because of that*, *not necessarily representative* of all of Early Judaism at this time.[144] Ulrich is quite right, that is, in pressing (contra Tov?) for the priority of the Qumran data vis-à-vis later text types. Privileging later text types can only be anachronistic as he has thoroughly and convincingly demonstrated. But in so doing, Ulrich may have overstated the case by neglecting the specific *Qumran* provenience of these scrolls. Ulrich's work is virtually unparalleled in demonstrating that one must not underestimate the value of the Dead Sea Scrolls for the history of the biblical text–that fatal mistake, made by an infamous few soon after the discovery of the Dead Sea Scrolls in 1947, is now unconscionable and, happily, unimaginable, thanks in large part to Ulrich. But, at the same time, one must pay special attention to the *specific location* in which these texts were found.[145] This would be to move toward a theory, not of local texts associated with large and disparate geographical regions, but of "hyper-local" texts, attending to their particular and, at times perhaps, *peculiar* Qumran provenience. The scrolls are, after all, *manuscripts* that are *cultural-material artifacts* and that reflect the scribal practices and scribal ideologies of the community (יחד) within which they were composed, copied, read, "performed," and used.[146] They are *manuscripts*–not, in the modern reified sense, "texts."[147] But even if the Dead Sea Scrolls are treated in a modern way as "texts," that does not make their form and content any less subject to the ideology of the community that held them as precious.[148] It seems that, in the case of the biblical scrolls which have often been the purview of textual critics, these communal, rhetorical, ideological, and cultural-artifactual aspects of the scrolls have been woefully neglected and understudied; and yet, in the light of the benefits apparent from recent socially minded work in codicology and papyrology,[149] it is apparent that attention to such aspects would pay significant dividends for the biblical scrolls,[150] as it has for study of the "nonbiblical" scrolls.[151]

---

[143] See the insightful comments on the three different ways a text might be defined as "sectarian" in Newsom, "Sectually Explicit," 167–87. Note also George J. Brooke, "*E Pluribus Unum*: Textual Variety and Definitive Interpretation in the Qumran Scrolls," in *The Dead Sea Scrolls in Their Historical Context* (ed. T. H. Lim; Edinburgh: T & T Clark, 2000), 107–19.

[144] Cf. Ulrich's formulation ("The Text of the Hebrew Scriptures," 97): "The Scriptures found at Qumran should be viewed as typical of the Scriptures possessed and used by the various groups within Judaism *unless* either (1) the Qumran scriptural scrolls are 'sectarian', or (2) the MT was the 'standard biblical text' in that period" (emphasis mine). Ulrich's work has thoroughly demonstrated that the second point is not viable; the comments above, however, raise questions about the first point.

[145] In my judgment, except for the handful of earliest manuscripts, which must predate the community, and a few other exceptional cases, theories of external origin or importation of various Scrolls must remain, to a large degree, speculative. For example, the number of scribal hands attested at Qumran does not, by itself, clinch an argument in favor of wide-scale importation (cf. Ulrich, "The Qumran Biblical Scrolls," 80–81). What *is* certain about these manuscripts, even the earliest ones, is that *they were found at Qumran.*

4. The last point raises again the issue of genre and the continuum of kinds of documents/compositions at Qumran. When these are considered

---

[146] I am indebted to Steve Delamarter for discussions on this point. Among Delamarter's work, see "The Sociology of Ethiopian Scribal Communities: A Preliminary Report" (paper presented at the international meeting of the Society of Biblical Literature, Groningen, Netherlands, June 2004); and "Communities of Faith and Their Bibles: A Sociological Typology" (paper presented at the West Coast Dead Sea Scrolls Workgroup, Vancouver, Canada, October 2004). I thank Delamarter for sharing both of these essays with me.

[147] See David C. Parker, *The Living Text of the Gospels* (Cambridge: Cambridge University Press, 1997), who is especially helpful in beginning to think differently about "texts," manuscripts, and copies.

[148] See the ground-breaking study of Carol A. Newsom, *The Self as Symbolic Space: Constructing Identity and Community at Qumran* (STJD 52; Leiden: Brill, 2004).

[149] Note esp., e.g., Michelle P. Brown, *The Lindisfarne Gospels: Society, Spirituality and the Scribe* (Toronto: University of Toronto Press, 2003), esp. 71, 193, 200–71, 397–402; and Alan D. Crown, *Samaritan Scribes and Manuscripts* (TSAJ 80; Tübingen: Mohr Siebeck, 2001). I am grateful to Steve Delamarter for discussions on medieval codicology and for bringing several key works, including these two, to my attention. Note also Colette Sirat, *Hebrew Manuscripts of the Middle Ages* (Cambridge: Cambridge University Press, 2002).

[150] This work is beginning to take place. Note the new monograph by Emanuel Tov, which was unfortunately unavailable to me at the time of this writing: *Scribal Practices and Approaches Reflected in the Texts Found in the Judean Desert* (*STDJ* 54; Leiden: Brill, 2004); as well as the two volumes in the series, *The Bible as Book*: Edward D. Herbert and Emanuel Tov, eds., *The Bible as Book: The Hebrew Bible and the Judaean Desert Discoveries* (London: The British Library and Oak Knoll Press, 2002); and John L. Sharpe and Kimberly Van Kampen, eds., *The Bible as Book: The Manuscript Tradition* (London: The British Library and Oak Knoll Press, 1998)–note esp. Tov's essay, "Scribal Practices and Physical Aspects of the Dead Sea Scrolls," in the 1998 volume (9–33). Prior to this more recent work the mainstay was Malachi Martin, *The Scribal Character of the Dead Sea Scrolls* (2 vols.; Bibliothèque du *Muséon* 44–45; Louvain: University of Louvain, 1958).

[151] See, e.g., Newsom, *The Self as Symbolic Space*, though her work is rhetorically based, not codicological or papyrological.

along with text-functionality, it becomes clear that a “biblical” scroll may be both more and less than that. And again, given the opacity of some of our data, we seem cast back to certain presuppositions, at least to some degree with certain texts. In deciding matters on a case-by-case or scroll-by-scroll basis, the text-critical data proper that have been culled by Ulrich, Tov, and so many others must be given the most weight. Those data are considerable and the closest approximation to “hard-data” we have. Even so, the excerpted manuscripts clearly manifest a functionality for (certain) scrolls and demonstrate that such functionality can impact the overall form and composition of a scroll and that that has bearing, in turn, on the text-critical data it preserves. This is no small contribution to the discussion and also constitutes another piece of “hard-data”–one that warrants that caution is in order with some of these scrolls. In some cases, that is, both Tov and Ulrich may be guilty of overstating the evidence. Attention must be paid to the most specific (hence: “hyper-local”) aspects of the Dead Sea Scrolls insofar as those aspects may determine how useful or un-useful these documents are for larger theories of the biblical text. In the absence of unambiguous confirming or disconfirming evidence we must, despite all of our hard work, still admit to no small degree of uncertainty regarding the “standard” or “representative” nature of the Qumran Scrolls for Early Judaism.[152] We can speculate about that but we must be wary of overstating the case or overestimating the evidence, and we should be quick to admit what is hypothesis and what is more and less certain than hypothetical. This is, at least in part, what the excerpted manuscripts contribute to these larger discussions.

To underscore the point in a different way, I conclude this section with some comments by Jonathan Z. Smith:

> [C]omparison is never a matter of identity [only]. Comparison requires the acceptance of difference.…That this is *not* the working assumption of many

---

[152] Esp. since, as Ulrich notes, “[t]he primary and most straightforward evidence available for the nature of the scriptural text near the end of the Second Temple period is provided by the scrolls of the Scriptures from Qumran and other places in the Judaean Desert” (“The Qumran Biblical Scrolls,” 73). For the latter, note Tov’s comment (*Textual Criticism*, 191) that “it should be remembered that all the texts found in the Judean Desert, except for the ones found at Qumran, reflect 𝔐.” Ulrich strengthens his case that the Qumran scrolls are entirely representative by appealing to the New Testament and Josephus (e.g., “The Qumran Biblical Scrolls,” 78–80; idem, “The Text of the Hebrew Scriptures,” 96–98), but at this point the work of Stanley on citation in Greco-Roman and Early Jewish literature, as well as at Qumran (see note 103 above), becomes extremely important and raises doubts on how convincingly the NT and Josephus actually confirm Ulrich’s position. Also important is how Stanley’s findings fit nicely with data about excerption.

> scholars in the field may be seen by noting the poverty of conception that usually characterizes their comparative endeavours, frequently due, as has already been suggested, to apologetic reasons. It is as if the only choices the comparativist has are to assert either identity or uniqueness, and that the only possibilities for utilizing comparisons are to make assertions regarding dependence.[153]

Although made with reference to the comparative analysis of religion and religious systems, Smith's comments may be instructively applied to the textual criticism of the Qumran biblical scrolls. In the light of Smith's comments, Tov's analysis can be seen (especially through an Ulrichian lens!) to be in need of more acceptance of difference. The manuscripts need not be categorized as a matter of similarity and/or identity with later traditions in a search for origins, dependence, or trajectory. At the same time, Smith's comments indicate, contra Ulrich, that identity's opposite, uniqueness, is also not the only option available to the textual comparativist. Smith continues by warning that comparison, whether constructed as genealogy or homology, often "disguises and obscures the scholar's interests and activities allowing the illusion of passive observation."[154] Instead, according to Smith, comparison is "a disciplined exaggeration in the service of knowledge.…Comparison provides the means by which *we* 're-vision' phenomena as *our* data in order to solve *our* theoretical problems."[155] Smith's ultimate point is that comparative work–in the present analogy: textual criticism–is not the be-all and end-all of (religious studies) inquiry. Comparison, whether of religious systems or textual witnesses, is only *part* of the job of interpretation. And even when it is done and done well, as it has been by Tov and Ulrich and many others, more will still need to be done.[156] Here, too, Ulrich and Tov have led the way by going beyond the text-critical data to larger analyses. Even so, more work still lies ahead of us since those larger analyses are, by definition, *interpretive*.

---

[153] Jonathan Z. Smith, *Drudgery Divine: On the Comparison of Early Christianities and the Religions of Late Antiquity* (Chicago: University of Chicago Press, 1990), 47.

[154] Ibid., 51.

[155] Ibid., 52; emphasis his. On several levels, Ulrich's "Our Sharper Focus" essay is a nice example of Smith's comments. In light of the citation of Geertz (see note 121 above), note Smith, *Drudgery Divine*, 53: "Comparison…is an active, at times even a playful, enterprise of deconstruction and reconstitution."

[156] Cf. Smith's conclusion: "Lacking a clear articulation of purpose, one may derive arresting anecdotal juxtapositions or self-serving differentiations, but the disciplined constructive work of the academy will not have been advanced, nor will the study of religion have come of age" (ibid., 53).

4. Excerpted Manuscripts and a Functionalist Approach to Authoritative Literature at Qumran

a. The Purpose(s) and Function(s) of Excerpted Manuscripts

In the preceding discussion reference to the function or purpose of the excerpted manuscripts has often been made. It remains to discuss this matter more directly since it constitutes one of the important contributions of the excerpted manuscripts to the field of Qumran studies and impinges to no small degree on several of the points treated above. In brief, it appears obvious from their order and form that these manuscripts were intended for some sort of function or purpose, but scholars have been unable or unwilling to be more specific than that.[157] The comments that are offered are typically general, if not downright vague. Note the following: the manuscripts served "some special use,"[158] imply "a liturgical or devotional purpose,"[159] were "made and used for some devotional and/or study purpose,"[160] and/or "were considered a special type of biblical texts, used for specific purposes."[161] Among generalizations like these, the favorites are largely two: devotional or liturgical.[162] The physical characteristics of these manuscripts are sometimes said to support one or the other (even both) of these functions.[163]

Part of the problem, of course, is that, lacking further information—ideally a cultic manual of some sorts[164]—we cannot be entirely certain what precise function (or, probably better, *functions*) these manuscripts served. Even so, the specific source texts that are included in many of these manuscripts, along with data culled from other places,[165] lends weight to the liturgical and devotional options.[166] Weinfeld, for example, has argued that "4QDeut^{n} is a scroll for a liturgical purpose: the recital of the Decalogue, next to the blessing after meals," is due in part to the role of Deut 8:5–10 in later rabbinic texts.[167] Duncan concurs and, more specifically, thinks the conjunction of Deut 8:5–10 with the Decalogue "may well represent some sort of prayer service."[168] She thinks a "prayer-book" designation could also apply to 4QDeut^{j,k1,q}, though she allows that the material and content differences among the manuscripts might indicate that "they were utilized for (slightly) differing purposes."[169] She thus posits that 4QDeut^{n} "was for private devotional use," while 4QDeut^{j} "with its quite complete range of…texts, and large script, may have served pedagogical purposes."[170] While suggestive, Duncan remains appropriately cautious:

---

[157] Note Duncan's hope ("Considerations of 4QDt^{j}," 206) that with the genre established "the direction of investigation from here might be towards determining more precisely (beyond the general rubric of 'liturgical' or 'devotional') the setting and context of the use of these texts."

[158] Duncan, "Excerpted Texts," 43.

[159] Duncan, "Considerations of 4QDt^{j}," 203.

[160] White (Crawford), "4QDt^{n}," 17.

[161] Tov, "Excerpted and Abbreviated," 585.

[162] For the latter, note, e.g., that Sanderson thinks 4QExod^{d} (4Q15) was "a liturgical scroll" ("15. 4QExod^{d}," 127). Cf., similarly, Tov, "Excerpted and Abbreviated," 590 and, esp., 598: "Most of the excerpted texts from Qumran…appear to have been liturgical." For a discussion of what the designation "liturgical" means for various texts at Qumran, see the helpful article by Eileen M. Schuller, "Prayer, Hymnic, and Liturgical Texts from Qumran," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls* (ed. E. Ulrich and J. VanderKam; Notre Dame: University of Notre Dame Press, 1994), 153–71, esp. 162–69.

[163] For example, Tov remarks that their "small size facilitated easy transport, and probably implied liturgical use" ("106–108. Introduction to 4QCant^{a-c}," 198). Schuller ("Prayer, Hymnic, and Liturgical Texts," 167) thinks that multiple copies could be an indication of liturgical usage.

[164] But see Schuller, "Prayer, Hymnic, and Liturgical Texts," 162–63, for relevant data toward reconstructing liturgical prayer.

> The *Sitz im Leben* and precise function of these texts is debatable. It seems most likely that the greater part of [them]…would have had a liturgical or devotional function, especially given the fact that they so clearly duplicate the corpus of phylacteries (and *mezuzot*).[171]

In the case of the phylacteries, it was not always deemed necessary to write passages out completely; the opposite holds true for the excerpted texts. "This difference may underscore the more symbolic as opposed to more practical function, respectively," of these two types of documents.[172] But, as the phylacteries and *mezuzot* are also excerpted manuscripts, even if a specialized (sub)type, Duncan's comments indicate that it is best to speak of *multiple functions and uses* of these manuscripts. That is, the function of each was "probably different: some might have been used for studying, others for teaching, or for pious reasons."[173]

---

[165] It is important, in the light of §3 above, to note that it is often this additional, extra-manuscript data brought to bear from *other* texts that helps clarify this. So, e.g., Duncan, "Deuteronomy," 201 points out that the phylacteries have helped identify the Deuteronomy manuscripts as "special-use texts." Cf. Tov's appeal to other biblical/textual witnesses in "Excerpted and Abbreviated," 591–92.

[166] Note that Tov, "Dimensions," 84, and Pfann, "4Q298," 213n14, believe that the small-sized "nonbiblical" scrolls 4Q444, 4Q501, 4Q510, and 5Q14 are also liturgical. For the liturgical use of thematic peshers such as 11Q13, see Brooke, *Exegesis at Qumran*, 319–23.

[167] Weinfeld, "Grace After Meals," 428; idem, "Prayer and Liturgical Practice," 160–75; so also Duncan, "Excerpted Texts," 50; Eshel, "4QDeut^{n}," 148–152; Tov, "Excerpted and Abbreviated," 589, who cites 4QPhyl A, B, G, H, J, L, M, and O. Cf. also 1QS 6.2–3.

[168] Duncan, "Excerpted Texts," 50.

[169] Ibid., 51.

[170] Ibid.

[171] Ibid., 50; see further 50–51, and, similarly, "Deuteronomy," 201.

[172] Duncan, "Excerpted Texts," 50; similarly, "Deuteronomy," 201.

In addition to liturgical use or personal reading, Tov has delineated a third possible function–that of exegetical-ideological anthology–and he has correlated specific manuscripts with the differing functions. In his estimation, the excerpted manuscripts of Exodus, Deuteronomy, and the Psalms "probably presented liturgical anthologies, the Canticles texts contain an abbreviated version of an undetermined nature, probably reflecting the excerptors' literary taste,"[174] and a text like 4QTestim was made for "exegetical-ideological…purposes."[175] But Tov also allows for some functional overlap. So, while in the liturgical category he places "[a]ll the anthologies of the Psalter from Caves 4 and 11," he nevertheless thinks that these were "probably meant for devotional reading from Scripture, private or public."[176] To Tov's three functions, Duncan has added yet a fourth: pedagogical/didactic purposes. Indeed, "most classical excerpted texts in poetry and prose were made for educational purposes, illustrating a certain topic or idea."[177]

In sum: writ large, the functions of these manuscripts were probably multiple and varied but most probably fall into one of two, also largely written, categories: liturgical and pedagogical–whether that was personal and private or public and performative. It is important to stress that the various functions are not mutually exclusive and overlap to some degree. What is clear, regardless, is that the manuscripts did serve some particular function(s) in the life of the community. And, even if we must admit to some lack of knowledge about the specifics of that, this simple fact has significant bearing on the important question of what constitutes "authoritative literature" at Qumran.

---

[173] Steudel, "Testimonia," 938; cf. also Tov, "Excerpted and Abbreviated," 585.

[174] Tov, "Excerpted and Abbreviated," 591.

[175] Ibid., 585.

[176] Ibid., 598–99. Tov lists personal reading as a possible purpose of 4QDeut^{q} (4Q44), 4QPs^{g,h} (=4Q89, 4Q90), 5QPs (=5Q5), 4QCant^{a,b} (4Q106, 4Q107), and 4QEzek^{a} (4Q73).

[177] Ibid., 598, citing Henry Chadwick, "Florilegium," in *RAC* 7:1131–60. Tov draws attention to Pap. Ryl. Gk. 260 (4th c. C.E.), which collects pericopae from Isaiah, Genesis, Chronicles, and Deuteronomy.

b. Excerpted Manuscripts and "Authoritative Literature" at Qumran

The question of what constitutes authoritative (or "biblical" or "canonical") literature[178] at Qumran is a hotly debated one but has been treated in a number of useful writings, especially in a series of individual and joint studies by Peter W. Flint and James C. VanderKam.[179] These scholars, and others, have delineated various criteria by which authoritative texts might be identified. Included are the following:

- Explicit statements or terms indicating the scriptural status of a composition;
- Associating a book or writing with prophecy;
- Compositions attributed to great forerunners, God, or an angel (cf., e.g., 11QT, *1 Enoch, Jubilees*);
- Compositions with Davidic superscriptions (e.g., Pss 151A–B);
- Books with a large quantity of preserved manuscripts;
- Translation of a composition into Greek or Aramaic;
- Books on which commentaries or *pesharim* are composed;
- Compositions that are quoted or alluded to as authorities; and
- Works that later works are dependent upon, either explicitly or implicitly.[180]

---

[178] The issue of nomenclature is an important but vexed one. It cannot be resolved here, though the excerpted manuscripts add further to the complexity. For now, I point out Peter W. Flint's appositional equation ("Noncanonical Writings in the Dead Sea Scrolls: Apocrypha, Other Previously Known Writings, Pseudepigrapha," in *The Bible at Qumran: Text, Shape, and Interpretation* [ed. P. W. Flint; SDSSRL; Grand Rapids: Eerdmans, 2001], 116)–"especially authoritative, that is, as Scripture"–as a possible but not definitive and perhaps problematic construction. Cf., similarly, VanderKam, *The Dead Sea Scrolls Today*, 153: "other compositions among the scrolls may also have been considered revealed *and therefore* authoritative" (emphasis mine). Elsewhere, VanderKam defines authoritative collection as "a *group of works* whose *authority is accepted* by a community," especially "ones whose witness…[was] regarded as decisive in settling questions or proving points" ("Authoritative Literature in the Dead Sea Scrolls," *DSD* 5 [1998]: 384; emphasis his).

[179] See Flint, "Noncanonical Writings," 80–126; idem "'Apocrypha,' Other Previously-Known Writings, and 'Pseudepigrapha' in the Dead Sea Scrolls," in *The Dead Sea Scrolls after Fifty Years: A Comprehensive Assessment* (ed. P.W. Flint, J.C. VanderKam, and A. E. Alvarez; 2 vols.; Leiden, Brill, 1998–1999), 2:24–66; VanderKam, *The Dead Sea Scrolls Today*, 150–56; idem, "Authoritative Literature," 382–402. Note also VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 172–80.

[180] This list largely follows VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 172–77 with some phraseology from Flint, "Noncanonical Writings," 116–21. Other important studies include Ulrich, "From Literature to Scripture," 3–25; Devorah Dimant, "The Qumran Manuscripts: Contents and Significance," in *Time to*

Others items might be added to this list;[181] regardless, using these criteria, scholars have argued that various works—both "biblical" and "nonbiblical"—had "authoritative" or "scriptural status at Qumran."[182]

In the main, most of the criteria listed above are *formal*.[183] The practice of excerption adds yet another formal criterion for identifying authoritative works, one that has typically not been considered in such investigations—namely, if a composition is excerpted in(to) another scroll, the source text is an authoritative document. Or, perhaps more precisely, the source text is *being treated* as an authoritative document. This slightly different way of phrasing the matter actually highlights an important aspect, one that is again undervalued in the search for more secure, formal criteria. It is simply this: the function(s) of a manuscript—that is, the purpose(s) to which it is put—has as much to say about its authority as do its formal characteristics. The purpose(s) and function(s) of the excerpted manuscripts are thus quite significant in that they press toward a definition of authoritative literature that goes *beyond* formalistic categories. Said differently, they help toward viewing this question in more functionalist ways.[184]

Prepare the Way in the Wilderness: Papers on the Qumran Scrolls by Fellows of the Institute for Advanced Studies of the Hebrew University, Jerusalem, 1989–1990 (ed. D. Dimant and L. H. Schiffman; *STDJ* 16; Leiden: Brill, 1995), 23–58; Charlotte Hempel, "Interpretive Authority in the Community Rule Tradition," *DSD* 10 (2003): 59–80; and Philip R. Davies, *Scribes and Schools: The Canonization of the Hebrew Scriptures* (ed. D. A. Knight; Library of Ancient Israel; Louisville: Westminster John Knox, 1998), 152–68.

[181] See, e.g., VanderKam, "Authoritative Literature," 385–87, on the use of paleo-Hebrew letters.

[182] For example, Flint, "Noncanonical Writings," 121, concludes with a provisional list of non-canonical works that had "scriptural status at Qumran": "Daniel, Psalm 151A, Psalm 151B, Psalm 154, Psalm 155, the canticle (Sir 51:13–30) found in 11QPs^{a} [11Q5], *1 Enoch*, and *Jubilees*....The following compositions were probably also regarded as Scripture: Tobit and the Letter of Jeremiah." See VanderKam, *The Dead Sea Scrolls Today*, 151–53; and "Authoritative Literature," 394–95, for biblical texts that are quoted as authorities. For "nonbiblical" authorities, VanderKam includes *Jubilees, 1 Enoch*, and the *Temple Scroll* (see *The Dead Sea Scrolls Today*, 153–57; and idem, "Authoritative Literature," 396–402). Note also "Authoritative Literature," 386–88, which adds the *pesharim* and 4QMMT. Further discussion can be found in VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 172–80, esp. 177–80 and tables 7.3–7.5. See further there (170–71) and VanderKam, "Authoritative Literature," 388 and n13 for discussion of the important passage at 4QMMT C 9–11.

[183] Note, e.g., the attention paid to the various ways citations are introduced in VanderKam, "Authoritative Literature," 391–94. Cf. on this point, Elledge, "Appendix: A Graphic Index," 367–77. Esp. notable are the occurrence of such formulae in non-commentary texts such as, e.g., 4Q159 (4QOrd^{a}), CD, 4QD, 4QTohorot (4Q274-279, 281–283), and so forth, as well as formulae that introduce citations from unidentified sources (e.g., CD 4.15; 9.8–9; 16.10; 4Q228 frag. 1 1.9).

[184] VanderKam, *The Dead Sea Scrolls Today*, 153 is aware of such possibilities when he writes: "If other criteria were used, one would perhaps have to add more books to

Functional categories are not coterminous with formal ones. A composition may be functionally authoritative without being formally so. Examples might include contemporary hymnbooks or prayerbooks that coexist with, but are not the same as, the Scriptural texts of a faith community. Attention to function also further problematizes terminology like "canonical," "Scriptural," "biblical," and the like, if and when such terms are assessed primarily or only through formal categories. It is not that formal categories are unhelpful or not useful. On the contrary, they are exceedingly important and the delineation of various criteria by Flint, VanderKam, and others is a great advance in our understanding. Even so, the functionality that is obviously the *raison d'être* of compositions like the excerpted manuscripts indicates that socio-religious aspects, not just formal-textual ones, must be considered when assessing whether or not a composition is "Scripture." Of course, much hangs on nomenclature and definitions at this point, and it may be best to restrict our terminology to a more neutral designation like "authoritative literature." That phrase is more functional; perhaps even better would be "used" literature or "useful" literature at Qumran. Literature that is used in certain ways—liturgically, devotionally, corporately, or privately—is exercising a particular authority over the reader, hearer, user.[185]

The functional definition of authority or canonicity raised by the existence of the excerpted manuscripts may, in turn, have something to contribute to the debate about the various Psalms scrolls at Qumran. The literature here is rather large but the options are mainly two. On the one hand are scholars like Flint, Ulrich, and James A. Sanders, who have presented evidence that more than one edition of the book of Psalms existed at Qumran.[186] Using such data they argue, among other things, that

---

the list. For example, some have said that Chronicles was probably regarded as scriptural at Qumran because the group accepted the division of the priests into twenty-four shifts, as stipulated in 1 Chr 24.7–18." Note also "Authoritative Literature," 398–99, for other content data pertaining to authoritative status.

[185] Again, one might profitably compare Newsom's work on "sectarian" reception and use of "nonsectarian" materials ("Sectually Explicit," 167–87). Contrast Ulrich, "The Qumran Biblical Scrolls," 83, who argues that, "simple use does not constitute normativeness"—at least with reference to notions of "the standard text."

[186] For Ulrich, see the essays in note 123 above. For James A. Sanders, see "Variorum in the Psalms Scroll (11QPs^a)," *HTR* 59 (1966): 83–94; idem, "Cave 11 Surprises and the Question of Canon," *McCQ* 21 (1968): 1–15; and idem, "The Qumran Scroll (11QPs^a) Reviewed," in *On Language, Culture, and Religion: In Honor of Eugene A. Nida* (ed. M. Black and W. A. Smalley; The Hague: Mouton, 1974), 79–99. Flint's work on the subject is vast. The main work is *The Dead Sea Psalms Scrolls and the Book of Psalms* (*STDJ* 17; Leiden: Brill, 1997); cf. the reviews by James A. Sanders in *DSD* 6 (1999): 84–89 and Brent A. Strawn in *Koinonia* 11.1 (Spring, 1999): 145–49.

11QPs^{a} (11Q5) is a "true," "Scriptural" psalter.[187] The alternative ordering of psalms in scrolls like this one (cf. also 4QPs^{e} [4Q87] and 11QPs^{b} [11Q6], perhaps 4QPs^{b}) is due to the fact that it represents a variant literary edition.[188] On the other side of the debate are scholars such as Tov, Talmon, Skehan, Menahem Haran, and Moshe H. Goshen-Gottstein, who argue that 11QPs^{a} and other scrolls that reflect alternative orders and/or additional compositions (e.g., the Plea for Deliverance [11QPs^{a} 19.1–18; 11QPs^{b} frags. a–b]) are liturgical collections.[189] Again, the debate is large and the literature extensive; it cannot be resolved here. Still, insofar as several of the excerpted manuscripts are psalms scrolls and in light of Tov's belief that many more of the psalms scrolls are also of the excerpted variety,[190] a few comments are in order.

See also Flint, "The Contribution of the Cave 4 Psalms Scrolls to the Psalms Debate," *DSD* 5 (1998): 320–33; idem, "The '11QPs^{a}-Psalter' in the Dead Sea Scrolls, Including the Preliminary Edition of 4QPs^{e}," in *The Quest for Context and Meaning: Studies in Biblical Intertextuality in Honor of James A. Sanders* (ed. C. A. Evans and S. Talmon; Leiden: Brill, 1997), 173–99; idem, "Methods for Determining Relationships between Manuscripts, with Special Reference to the Psalms Scrolls," in *Methods of Investigation of the Dead Sea Scrolls and the Khirbet Qumran Site: Present Realities and Future Prospects* (ed. M. O. Wise et al.; Annals of the New York Academy of Sciences 722; New York: New York Academy of Sciences, 1994), 197–211; and idem, "Psalms and Psalters in the Dead Sea Scrolls," in vol. 1 of the present collection. Additional treatments that are pertinent include VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 122–23; and Martin G. Abegg, Jr., Peter W. Flint, and Eugene Ulrich, *The Dead Sea Scrolls Bible: The Oldest Known Bible Translated for the First Time into English* (San Francisco: HarperSanFrancisco, 1999), 505–89.

[187] For 11QPs^{a} (11Q5), see James A. Sanders, *The Psalms Scroll of Qumran Cave 11 (11QPs^{a})* (DJD 4; Oxford: Clarendon, 1965); idem, *The Dead Sea Psalms Scroll* (Ithaca: Cornell University Press, 1967); and Florentino García Martínez, Eibert J. C. Tigchelaar, and Adam S. Van der Woude, "5. 11QPsalms^{a}, Fragments E, F," in *Qumran Cave 11.II: 11Q2-18, 11Q20-31* (ed. F. García Martínez et al.; DJD 23; Oxford: Clarendon, 1997), 29–36.

[188] For the Cave 4 materials, see Flint, "The Contribution of the Cave 4 Psalms Scrolls," 320–33, and contributions by Skehan, Ulrich, Flint, Fitzmyer, and Puech, in DJD 16:7–170.

[189] Tov, "Excerpted and Abbreviated," 593–95; Shemaryahu Talmon, "Pisqah Beʿemsaʾ Pasuq and 11QPs^{a}," *Text* 5 (1966): 11–21; Patrick W. Skehan, "A Liturgical Complex in 11QPs^{a}," *CBQ* 35 (1973): 195–205; Menahem Haran, "11QPs^{a} and the Canonical Book of Psalms," in *Minhah le-Nahum: Biblical and Other Studies Presented to Nahum M. Sarna in Honour of His 70th Birthday* (ed. M. Brettler and M. Fishbane; JSOTSup 154; Sheffield: JSOT Press, 1993), 193–201; and Moshe H. Goshen-Gottstein, "The Psalms Scroll (11QPs^{a}): A Problem of Canon and Text," *Textus* 5 (1966): 22–33.

[190] See Tov, "Excerpted and Abbreviated," 594–95. Specifically, he identifies the following eight collections, which manifest different sequences from and/or additional material to the MT as possibly excerpted or abbreviated: (1) 11QPs^{a} (11Q5), also reflected in 4QPs^{e} (4Q87; note sequences 118 > 104; 105 > 146), 11QPs^{b} (11Q6),

- First, *the existence of at least three excerpted texts* (4QPs^{g,h}; 5QPs) that probably contained only Psalm 119 demonstrates that this genre is known and attested among the Psalms scrolls. This raises the possibility, if not likelihood, that other psalms scrolls could also be excerpted.[191]
- Second, *the nature of the excerpted material* is of critical importance. Most of the manuscripts that are most certainly excerpted are selected from books of the Torah and, in the case of the psalms scrolls, Psalm 119–the preeminent Torah psalm (see Table 1).
- Third, *the primary functional categories* for excerpted texts are liturgical or pedagogical, whether these are corporately or privately construed. The majority of most certainly excerpted texts fit these categories nicely: excerpted Torah texts were obviously used liturgically, and, given their subject matter, are also instructional texts. Psalm scrolls, by their very nature, are ideal for liturgical use.[192] That they are also useful in instruction, perhaps primarily in private contexts in this capacity, is underscored by the excerption of Psalm 119, but is probably latent in many of the psalms themselves.[193]

In my judgment, considerations such as these suggest a mediating position between the two schools of thought on the psalms (especially 11QPs^{a}). Favoring the position of Tov, Talmon, et al., are the excerpted manuscripts' existence, their typical content, and their liturgical and pedagogical functions. All of these are potentially applicable and suitable to the psalms scrolls and, given the existence of excerptions of Psalm 119, it is likely that at least a few of the other psalms scrolls are also excerpted.[194]

---

and perhaps, 4QPs^{b} (4Q84); (2) 4QPs^{a} (4Q83; < Ps 32; note sequence 38 > 71); (3) 4QPs^{d} (4Q86; note sequence: 147 > 104); (4) 4QPs^{f} (4Q88); (5) 4QPs^{k} (4Q92); (6) 4QPs^{n} (4Q95); (7) 4QPs^{q} (4Q98; < Ps 32); and (8) 11QapPs^{a} (11Q11). For more on the order and sequencing of the various Psalms manuscripts, see Flint, *The Dead Sea Psalms Scrolls*, 254–64.

[191] To his great credit, Flint is well aware of the excerpted texts and their possible bearing on the psalms manuscripts, though he does not end up arguing for the excerpted status of the psalms scrolls (apart, perhaps, from the Psalm 119 scrolls). See, e.g., *The Dead Sea Psalms Scrolls*, 167, 217–18; idem, "Psalms and Psalters."

[192] Cf. Schuller, "Prayer, Hymnic, and Liturgical Texts," 165: "all psalters are, to some extent, liturgical collections." For the liturgical use of the psalms, note *m. Tamid* 7:4; *Sop* 18.4; and *b. Ros Haš*. 31a; and see Peter L. Trudinger, *The Psalms of the Tamid Service: A Liturgical Text from the Second Temple* (VTSup 98; Leiden: Brill, 2004).

[193] Note, e.g., the importance of Psalm 1 as an introduction to the Psalter, though this psalm is unfortunately not attested in any psalms scrolls from Qumran (though it is cited in 4QFlor [4Q174]). For reflections on the Psalms as Torah, see J. Clinton McCann, Jr., *A Theological Introduction to the Book of Psalms: The Psalms as Torah* (Nashville: Abingdon, 1993).

[194] Note also that the Psalms evidence from outside Qumran, namely from Masada, supports MT (cf. note 152 above). This is esp. true for MasPs^{b}, against

Favoring Flint, Sanders, et al., is the consideration that such texts were *used* and that use implies and manifests scriptural–that is, authoritative–status. In a sense, then, both sides of the debate are correct. 11QPs^a cannot be considered "*irrelevant* to the issue of canon, *since*…it constituted a liturgical collection."[195] Liturgical collections in their construction and use *are*, by definition, authoritative. This means that the two options offered by Flint regarding 11QPs^a–"True Psalter or Secondary Collection?"–are too extreme and perhaps too facile.[196] The psalms texts can be "true" psalters–if by that it is meant that they are functional, used, and authoritative–and, simultaneously, be excerpted, abbreviated, rearranged, or "secondary" collections. Is 11QPs^a "canonical?" If it was used in authoritative ("canonical") fashion at Qumran, the answer is affirmative. Is 11QPs^a (also) representative of a variant literary edition? Answering that question is more complex. That the 11QPs^a "edition" is also represented in 4QPs^e and 11QPs^b, and perhaps also 4QPs^b, may tip the balance toward the affirmative. Here, that is, could be multiple exemplars of the "edition."[197] But, one might also use those same manuscripts to argue that this *particular liturgical construction* was well known and well used–the "edition" may not be a variant literary edition of a "biblical" text but a *popular liturgical edition* of the psalms. In this understanding, the liturgical construction would be representative of text-use and text-function not text-type or text-family/edition. The issue, again, is one of adjudication between options and the extensive text-critical apparatus must not be overlooked or underestimated. In particular, the corpus of Flint's work is

---

11QPs^a (11Q5), insofar as it ends with Psalm 150. See Shemaryahu Talmon et al., *Masada VI: Yigael Yadin Excavations 1963–1965: Final Reports* (Jerusalem: Israel Exploration Society, 1999), 91–97; and Strawn's review of Flint, *The Dead Sea Psalms Scrolls,* 148–49.

[195] Tov, "Excerpted and Abbreviated," 593, summarizing Talmon, Goshen-Gottstein, Skehan, and Haran; my emphasis.

[196] One of the problems seems to be that Flint conjoins the position that 11QPs^a (11Q5) is liturgical with a belief that the "MT-150" Psalter was already established. While it may be true that most proponents of 11QPs^a as a liturgical scroll have also believed that the MT-150 Psalter was already established, the two elements are *not necessarily or logically connected.* The MT-150 Psalter need not be entirely stabilized (it was, in fact, probably not, as Flint has demonstrated) *and* 11QPs^a could still be a liturgical collection (cf., perhaps, excerpted Exodus scrolls [see Table 1] alongside the "multiple editions" of Exodus [see Ulrich]). Cf. Davies, *Scribes and Schools*, 156 for some similar points (not on the Psalms texts), and note Schuller, who also thinks that stating the question as variant psalter or liturgical hymnbook is not the most helpful. She adds: "It is to be noted that the recension with the most pronounced liturgical features exists in only two copies from Cave 11" ("Prayer, Hymnic, and Liturgical Texts," 165).

[197] See Flint's work, esp. "The '11QPs^a-Psalter' in the Dead Sea Scrolls," 173–94; idem, *The Dead Sea Psalms Scrolls*, 150–71.

of crucial importance; his opinion on these matters is most weighty. Even so, if the excerpted manuscripts can be appropriately termed a kind of "'nonbiblical' 'biblical' scroll," then it is possible that a correlate exists: a "'biblical' 'nonbiblical' scroll." The psalms scrolls that are excerpted (4QPs^{g,h}; 5QPs) belong to the former *and perhaps also* to the latter. Their existence and the possibility, in the light of their existence, that other psalms scrolls are also excerpted constitutes evidence that the same might be true for still other manuscripts, even large ones such as 11QPs^{a}. If so, these documents' primary concern is not preserving a copy of the biblical text (hence, "nonbiblical"); instead, the textual form and order of these documents has been dictated or impacted by their (liturgical) functions. But those selfsame functions indicate that the compositions in question are, despite that fact if not because of it, authoritative and canonical—functioning as rule of faith and life (that is, as "Scripture") for the community (hence, "biblical").

In sum: as was the case with textual criticism and the Dead Sea Scrolls, the excerpted manuscripts prove useful to the larger debates regarding authoritative literature at Qumran and offer a *via media* between opposing perspectives by focusing our attention on the specific (again, "hyper-local") contexts and uses of the manuscripts in question.

5. CONCLUSIONS

In conclusion, the comment of Tov, used in part as the epigraph of this study, has proven quite correct:

> These texts are of interest at all levels for the biblical scholar, as they relate to…exegesis, literary criticism, liturgy, the development of the canon, and textual criticism, *although in the latter case their evidence should be used carefully.*[198]

The full significance of the excerpted manuscripts is still yet to be fully appreciated, explored, and utilized by scholars. The present article has attempted to further the discussion on several different fronts, but certainly more can be said, and the debates engaged here are far from settled. This is true due, in part, to the intriguing questions raised by the existence of excerpted manuscripts. Considered together, they offer characteristic traits by which other documents can, with greater or lesser degrees of certainty, also be identified as belonging to this genre (see §2).

---

[198] Tov, "Excerpted and Abbreviated," 582; emphasis mine.

Although in the case of many manuscripts, especially those poorly preserved, the degree of uncertainty will remain large, the existence of excerpted manuscripts urges caution: the accidents of preservation and the decay of time are not the only causes of fragmentary remains. It is possible that, for some manuscripts, the textual remains are brief and unusual because the scroll itself was brief, selected, arranged–in a word, excerpted. This is but the first cautionary tale told by the excerpted manuscripts, however. They also urge caution with regard to notions such as the "Qumran scribal practice" since some are written in that practice and some are not. It is hard to believe that excerpted texts *not* written in that practice originated from outside the community given these texts probable function(s) within the community.[199]

The excerpted texts also offer something of a middle ground between the theories of Tov and Ulrich on the significance of the Dead Sea Scrolls for the formation and history of the biblical text (see §3). In the main, they do not align neatly with the three dominant text families, though they often share the expansionistic and harmonistic tendencies that also mark the SamP, and they can, therefore, be slotted with the "proto-SamP" group (or groups), if such a category and categorization is allowed. And yet, in the case of the texts of Canticles, the manuscripts' chronological priority indicates that they ought to be taken seriously as possible (early) text-forms. Alongside the options of (non-)alignment and early text-form, then, the genre of excerpted manuscripts with its functional gestalt provides yet another, and equally possible, explanation for these text-forms. Here too, then, the excerpted manuscripts urge caution: the two options that Ulrich has lifted up–that of "aberrant" and "vulgar," on the one hand, and "oldest…best…most authentic," on the other[200]–are actually two extremes on a continuum that is highly variegated and complex.[201] The excerpted manuscripts reveal that functionality can dictate form, and, given the often poor states of preservation, one must proceed carefully in analyzing such form and what it means in any particular scroll. Text-function also raises significant socio-religious issues that urge reexamination of the Dead Sea Scrolls with reference to these very issues within the specific location of Qumran. In §3 above, this was coined a theory of "hyper-local" texts, but it is in fact the kind of work that is found, to some degree at least, in the fields of codicology and papyrology.[202]

---

[199] Note also the dates of many of the excerpted manuscripts, which places them in the middle or the latter half of the community's existence (see Table 1 below).

[200] Ulrich, "The Absence of Sectarian Variants," 180.

[201] Similarly, like Flint's opposition of "true psalter" or "secondary collection," Ulrich's opposition of scrolls of "peculiar 'sectarians' or…of general Judaism" ("The Qumran Biblical Scrolls," 73), may also be overly polarized. For interesting reflections relating to the subject, see Brooke, "*E Pluribus Unum*," 107–19.

Finally, the socio-religious functioning of the excerpted manuscripts (and, perhaps, other texts from Qumran) urges a "functionalist" approach to authoritative literature at Qumran (see §4). Another criterion is added to the lists of Flint, VanderKam, and others: if scribes excerpted from a source text in order to produce a scroll that played some sort of liturgical, exegetical, or devotional purpose, the source text is clearly authoritative. But, depending on the precise purpose, the excerpted text *itself* may also be authoritative: if used in the liturgy, such a text is authoritative; if used in private study or in public instruction, such a text is authoritative. The modern analogies are several and run the range from hymnals and songbooks, where laity often know more hymns than Scripture by heart; devotional books that are often catenae of various biblical texts; or ecclesiastical "manuals of discipline" (cf. 1QS!) or books of order that are as *functionally* authoritative as "the canonical text." Whether such entities are as *textually* authoritative, however, is quite another question and comprises just one more in the long list offered by the excerpted manuscripts in our ongoing study of the Dead Sea Scrolls.[203]

---

[202] There are also obvious affinities with some of the emphases of Talmon.

[203] One of the more fascinating of these questions is whether it is possible that the Qumran community excerpted from its "nonbiblical," "sectarian" compositions as it did from its "biblical" texts. The answer must be positive, at least for a text like *Testimonia.* The possibility that the same is true for other texts is raised in James H. Charlesworth and Brent A. Strawn, "Reflections on the Text of *Serek Ha-Yaḥad* Found in Cave IV," *RevQ* 17 (1996): 414–16. I explore it more fully in another article, which is a continuation of the present study: "Excerpted '*Non-Biblical*' Scrolls at Qumran? Background, Analogies, Function," in *Qumran Studies: New Approaches, New Questions* (ed. M. T. Davis and B. A. Strawn; Grand Rapids: Eerdmans, in press). See further there, esp. for listings of "nonbiblical" scrolls of small and medium-sized dimensions that exist in multiple copies and for additional discussion of the purpose and function of excerpted manuscripts.

TABLES[204]

Table 1. List of Excerpted and Abbreviated Manuscripts at Qumran[205]

Text	*Contents*	*Number of lines extant (height)*[206]	*Date*[207]	*Remarks*
Testimonia (4Q175)	Exod 20:21; Num 24:15–17; Deut 33:8–11; Josh 6:26 from *Apocryphon of Joshua*ᵇ (4Q379) frag. 22 2.7–14	30 lines	125–75 B.C.E.	For Exod 20:21b, cf. SamP and MT Deut 5:28b–29 + 18:18–19[208]
Phylacteries and *mezuzot* (1Q13; 4Q128–155; 5Q8; 8Q3–4; XQ1–4)	Contents vary	Line counts vary	Dates vary	

---

[204] The first footnote per table provides important bibliographical data. The studies that have provided the bases for these tables have been rounded out, esp., by the lists in Emanuel Tov et al., eds., *The Text from the Judaean Desert: Indices and an Introduction to the Discoveries in the Judaean Desert Series* (DJD 39; Oxford: Clarendon, 2002). The data provided in the following tables, as is true for virtually every listing pertaining to the Scrolls, is provisional and subject to modification. Note the sigla employed: * = reconstructed; Ø = not extant; ??? = reconstruction not attempted; (?) = status or identification as excerpted or abbreviated manuscript uncertain.

[205] Much of this list follows Tov, "Excerpted and Abbreviated," 581–600, but it has been updated and adjusted by comparison with the editions in DJD; Flint, *The Dead Sea Psalms Scrolls*; and Duncan, "Excerpted Texts," 43–62. For sigla, see note 204 above.

[206] The line count given for each document is the maximum number of lines extant for that scroll on any preserved fragment or column regardless of editorial reconstructions or the existence of margins (for these latter, cf. Tov, "Dimensions," 69–91). In a few cases, the absolute height of the scroll is given, including margins (see ibid., 77–91).

[207] Per note 111 above, dates follow Webster, "J. Chronological Index," 351–446, esp. 371–75.

[208] Note Ulrich, "The Text of the Hebrew Scriptures," 87n2, who points out (*apud* B. J. Pitre) that an expanded form of Exod 20:21, similar to this one, is also found in 4Q158 frag. 6 (4QReworked Pentateuch^{a}).

Table 1, cont.

Text	*Contents*	*Number of lines extant (height)*	*Date*	*Remarks*
2QExod^{b} (2Q3) esp. frag. 8 (?)[209]	Exod 19:9[210] followed after *vacat*[211] by 34:10	7 lines	30–68 B.C.E.	Note ordering (other frags. reflect standard order) and writing of divine name in paleo-Hebrew (also in frags. 2 and 7)[212]
4QExod^{d} (4Q15)	Exod 13:15–16 + 15:1	5 lines	250–150 B.C.E.	Abbreviation and ordering; note omission of 13:17–14:31 within one fragment

---

209. 2QExod^{b} (2Q3) is thought to be an excerpted text by Steudel, "Testimonia," in *EDSS* 2:938; Stegemann, "Weitere Stücke," 220; and Brooke, "Torah in the Qumran Scrolls," 102. Contrast Tov, "Dimensions," 69; and idem, "Excerpted and Abbreviated," 584, who opts instead for a rewritten Bible text.

210. Tov, "Excerpted and Abbreviated," 584n13 thinks this is not Exod 19:9 (so Maurice Baillet, "3. Exode [deuxième exemplaire]," in *Les "Petites Grottes" de Qumrân* [ed. M. Baillet, J. T. Milik, and R. de Vaux; DJD 3; Oxford: Clarendon, 1962], 55) but "a nonbiblical addition before 34:10 similar to the additions in 4QRP." Unfortunately, the fragmentary nature of the manuscript precludes certainty, though it should be noted that the text writes the tetragrammaton in paleo-Hebrew script (see note 212 below). In my judgment, the thematic connections between Exodus 19 and 34, observed by Baillet (ibid., 55), remain a viable explanation for the arrangement of the text and, hence, its excerption.

211. See Baillet (ibid., 55) who notes that the *vacat* does not correspond to a Masoretic division but that SamP does end a pericope at this point. So, similarly, Exod 34:10 does not begin a new unit in MT but does in the SamP.

212. For the latter point, see VanderKam, "Authoritative Literature," 385–86, who notes this trait also in 4QIsa^{c} (4Q57) and 11QPs^{a} (11Q5) though elsewhere it is largely restricted to works that did *not* become part of the Hebrew Bible (e.g., 1QpMic [1Q14], 1QpHab, 1QpZeph [1Q15], etc.).

Table 1, cont.

Text	*Contents*	*Number of lines extant (height)*	*Date*	*Remarks*
4QExod^e (4Q16)	Exod 13:3–5	8 lines (8.2 cm.)	150–100 B.C.E.	Probably not whole biblical book
4QDeut^j (4Q37)	Deut 5:1–11, 13–15; 5:21–6:3; 8:5–10; 11:6–13; 11:21 (?) + Exod 12:43–13:5; Deut 32:7–8	14 lines (12 cm.)	50 C.E.	Note the material join between Exodus and Deuteronomy
4QDeut^{k1} (4Q38)	Deut 5:28–32; 11:6–13; 32:17–18, 22–23, 25–27	13 lines	30–1 B.C.E.	
4QDeut^n (4Q41)	Deut 8:5–10 + 5:1–6:1(with plus of Exod 20:11 after Deut 5:15)	12 lines (6.8 cm.)	30–1 B.C.E.	Different ordering and smaller dimensions; probably not whole biblical book
4QDeut^q (4Q44)	Deut 32:9–10 (?), 37–43	11 lines (11.1 cm.)	50–1 B.C.E.	Limited dimensions; probably only Deuteronomy 32
5QDeut (5Q1)	Deut 7:15–24; 8:5–9:2[213]	15 lines	250–150 B.C.E.	Probably not whole biblical book

---

[213] See Józef T. Milik, "1. Deutéronome," in *Les "Petites Grottes" de Qumrân* [ed. M. Baillet, J. T. Milik, and R. de Vaux; DJD 3; Oxford: Clarendon, 1962], 171, for frags. 2–5 of this manuscript, which might come from Deuteronomy 32–33.

Table 1, cont.

Text	*Contents*	*Number of lines extant (height)*	*Date*	*Remarks*
4QEzek^a (4Q73) (?)	Ezek 10:5–15; 10:17–11:11; 23:14–15, 17–18, 44–47; 41:3–6	21 lines	50–25 B.C.E.	Note possible thematic choice of texts.
4QPs^b (4Q84) (?)	Portions of Psalms 91–94, 96, 98–100, 102–103, 112–113, 115–118	16 lines (17.5 cm.)	30–68 C.E.	Note minus of Psalms 104–111 in frag. 25 col. 2; small dimensions; use of Cryptic A in frag. 5
4QPs^g (4Q89)	Portions of Ps 119:37–92	8 lines (8.1 cm.)	50 C.E.	Probably only Psalm 119 given small dimensions
4QPs^h (4Q90)	Ps 119:10–21	12 lines	30 B.C.E. –68 C.E.	Probably only Psalm 119 on the scroll (?)
4QPs^n (4Q95)	Pss 135:6–8, 11–12 + 136:23–24	5 lines	30–1 B.C.E.	Note combination of text
4QPs^x (4Q98g *olim* 4Q236 = 4QPs89)	Ps 89:20–22, 26, 23, 27–28, 31	8 lines	200–100 B.C.E.	Differently ordered and abbreviated text
5QPs (5Q5)	Ps 119:113–120, 138–142	8 lines	1–100 C.E.	Note only Psalm 119
4QCant^a (4Q106) (?)	Cant 3:4–4:7; 6:11(?)–7:7	14 lines	30–1 B.C.E.	Note abbreviated text

[214] See the comments by Eugene Ulrich, "4QDan^{e}," in *Qumran Cave 4.XI: Psalms to Chronicles* (ed. E. Ulrich et al.; DJD 16; Oxford: Clarendon, 2000), 287.

[215] Given some of the theoretical issues raised in the body of the paper, it is possible that more texts could be excerpted or abbreviated. As two examples, I refer to the work of Tov ("Excerpted and Abbreviated," 594–95) who has posited that eight collections that manifest different sequences from and/or additional material to the MT might be excerpted or abbreviated (11QPs^{a} [11Q5], also reflected in 4QPs^{e} [4Q87], 11QPs^{b} [11Q6], and perhaps 4QPs^{b} [4Q84; see above]; 4QPs^{a} [4Q83]; 4QPs^{d} [4Q86]; 4QPs^{f} [4Q88]; 4QPs^{k} [4Q92]; 4QPs^{n} [4Q95; see above]; 4QPs^{q} [4Q98]; and 11QapPs^{a} [11Q11]); and Brooke ("Ezekiel in Some Qumran and New Testament Texts," 318) who has raised the possibility that 3Q1 might be excerpted.

[216] The listing follows Tov, "106–108. Introduction to 4QCant^{a-c}," 197; idem, "Dimensions," 69–91; idem, "Three Manuscripts," 90–91; and Pfann, "4Q298," 213n14. Some of the data in these lists is now outdated and has been updated by comparison with editions in DJD. For sigla, see note 204 above.

[217] Tov, "Dimensions," 72 gives 2.90m as the reconstructed length (see Maurice Baillet, "6. Cantique des Cantiques," in *Les "Petites Grottes" de Qumrân* [ed. M. Baillet, J. T. Milik, and R. de Vaux; DJD 3; Oxford: Clarendon, 1962], 113).

[221] The listing follows Tov, "A Categorized List," 67–84; idem, "D. The Biblical Lists," 165–83, and combines the data from his three divisions (Qumran: Hebrew/Aramaic; Qumran: Greek; Sites Other Than Qumran). See further there, esp. 67–70 and 165–67, respectively, for criteria of inclusion in the list as well as for explanation of fluctuating numbers. Cf. VanderKam and Flint, *The Meaning of the Dead Sea Scrolls*, 149–50 (Tables 6.4–5).

[222] This is the total number of copies from Qumran. Numbers in parentheses indicate additional copies from sites in the Judean Desert other than Qumran (see Tov, "A Categorized List," 80–83).

[223] This includes 4QtgLev (4Q156).

[224] This includes 4QtgJob (4Q157) and 11QtgJob (11Q10).

CHAPTER EIGHT

THE TWO SPIRITS IN QUMRAN THEOLOGY

John R. Levison

INTRODUCTION[1]

Nearly two columns of the *Rule of the Community* (1QS) are devoted to the Master's responsibility "to instruct and teach all the Sons of Light concerning the nature of all the sons of man." These are among the most defining and significant portions of instruction in the entirety of the scrolls, yet the content of this teaching is baffling. Its opaqueness, which tends to obfuscate rather than to clarify human nature, renders a clear definition of "spirit" evasive. This noun, which occurs no less than sixteen times in 1QS 3.13–4.26, is employed in such an array of expressions as, "all the kinds of their [sons of man] spirits," "two spirits in which to walk," "all the spirits of his [the angel of darkness] lot," "a spirit of humility and patience," "the spirit of deceit," and the "holy spirit."

In an assiduous and variegated effort to ascertain the conceptions of "spirit" which coalesce in this teaching, two dominant questions have emerged. One is the nature of the notoriously elusive "two spirits." Are they human dispositions or angels or something altogether different? The other question, at the center of which is this teaching in 1QS 3.13–4.26, is whether Qumran pneumatology was consistent or whether various conceptions collided in the centuries-long history of the Qumran community.

The combination of industry and creativity that led to the formulation of these issues and the drive toward their resolution is impressive. Even before a decade had elapsed after the publication of the Community

---

[1] Overviews of research and bibliographies may be found in Hermann Lichtenberger, *Studien zum Menschenbild in Texten der Qumrangemeinde* (SUNT 15; Göttingen: Vandenhoeck & Ruprecht, 1980), 123-24n1; and Arthur E. Sekki, *The Meaning of* Ruah *at Qumran* (SBLDS 110; Atlanta: Scholars Press, 1989), *passim.* All translations of publications written originally in German and French are my own, unless bibliographical data of the English translation are given.

Rule, scholars had with acuity and intellectual breadth forged several approaches to these issues. I have, therefore, opted in this study to revisit in some detail the most paradigmatic of those analyses of the two spirits in Qumran theology to expose their foundational observations and their most compelling arguments.

Because the teaching of the two spirits occurs within the confines of a single text, and because the studies I hope to elucidate contain numerous citations, it may prove useful to begin with a translation of 1QS 3.13–4.26:

> [col. 3] (13) It is for the Master to instruct and teach all the Sons of Light concerning the nature of all the sons of man, (14) with respect to all the kinds of their spirits with their distinctions for their works in their generations, and with respect to the visitation of their afflictions together with (15) their times of peace. From the God of knowledge comes all that is occurring and shall occur. Before they came into being he established all their designs; (16) and when they come into existence in their fixed times they carry through their task according to his glorious design. Nothing can be changed. In his hand (are) (17) the judgments of all things; he being the one who sustains them in all their affairs. He created the human for the dominion of (18) the world, designing for him two spirits in which to walk until the appointed time for his visitation, namely the spirits of (19) truth and deceit. In a spring of light emanates the nature of truth and from a well of darkness emerges the nature of deceit. (20) In the hand of the Prince of Lights (is) the dominion of all the Sons of Righteousness; in the ways of light they walk. But in the hand of the Angel of (21) Darkness (is) the dominion of the Sons of Deceit; and in the ways of darkness they walk. By the Angel of Darkness comes the aberration of (22) all the Sons of Righteousness; and all their sins, their iniquities, their guilt, and their iniquitous works (are caused) by his dominion, (23) according to God's mysteries, until his end. And all their afflictions and the appointed times of their suffering (are caused) by the dominion of his hostility. (24) And all the spirits of his lot cause to stumble the Sons of Light; but the God of Israel and his Angel of Truth help all (25) the Sons of Light. He created the spirits of light and darkness, and upon them he founded every work, (26) […] every action, and upon their ways (are) [al]l […]. The one God loves for all [col. 4] (1) [app]ointed times of eternity, taking pleasure in all its doings forever; (concerning) the other he loathes its assembly, and all its ways he hates forever. (2) And these are their ways in the world: to illuminate the heart of man and to level before him all the ways of true righteousness; and to make his heart fear the judgments of (3) God; and a spirit of humility and patience, of great compassion and constant goodness, and of prudence, insight, and wonderful wisdom, which is firmly established in all (4) the works of God, leaning on his great mercy; and a spirit of knowledge in all work upon which he is intent, zeal for righteous precepts, a holy intention (5) with a steadfast purpose; and great affection

towards all the Sons of Truth; and a glorious purity, loathing all unclean idols, and walking with reservation (6) by discernment about everything, concealing the truth of the mysteries of knowledge. The (preceding) are the principles of the spirit for the Sons of Truth (in) the world. The visitation of all those who walk in it (will be) healing (7) and great peace in a long life, multiplication of progeny together with all everlasting blessings, endless joy in everlasting life, and a crown of glory (8) together with a resplendent attire in eternal light. (9) But concerning the Spirit of Deceit (these are the principles): greed and slackness in righteous activity, wickedness and falsehood, pride and haughtiness, atrocious disguise and falsehood, (10) great hypocrisy, fury, great vileness, shameless zeal for abominable works in a spirit of fornication, filthy ways in unclean worship, (11) a tongue of blasphemy, blindness of eyes and deafness of ear, stiffness of neck and hardness of heart, walking in all the ways of darkness, and evil craftiness. The visitation of (12) all those who walk in it (will be) many afflictions by all the angels of punishment, eternal perdition by the fury of God's vengeful wrath, everlasting terror (13) and endless shame, together with disgrace of annihilation in the fire of the dark region. And all their times for their generations (will be expended) in dreadful suffering and bitter misery in dark abysses until (14) they are destroyed. (There will be) no remnant nor rescue for them. (15) In these (two spirits are) the natures of all the sons of man, and in their (two) divisions all their hosts of their generations have a share; in their ways they walk, and the entire task of (16) their works (falls) within their divisions according to a man's share, much or little, in all the times of eternity. For God has set them apart until the Endtime; (17) and put eternal enmity between their (two) classes. An abomination to truth (are) the doings of deceit, and an abomination to deceit (are) all the ways of truth. (There is) a fierce (18) struggle between all their judgments, for they do not walk together. But God, in his mysterious understanding and his glorious wisdom, has set an end for the existence of deceit. At the appointed time (19) for visitation he will destroy it forever. Then truth will appear forever (in) the world, which has polluted itself by the ways of ungodliness during the dominion of deceit until (20) the appointed time for judgment which has been decided. Then God will purify by his truth all the works of man and purge for himself the sons of man. He will utterly destroy the spirit of deceit from the veins of (21) his flesh. He will purify him by the Holy Spirit from all ungodly acts and sprinkle upon him the Spirit of Truth like waters of purification, (to purify him) from all the abominations of falsehood and from being polluted (22) by a spirit of impurity, so that upright ones may have insight into the knowledge of the Most High and the wisdom of the sons of heaven, and the perfect in the Way may receive understanding. For those God has chosen for an eternal covenant, (23) and all the glory of Adam shall be theirs without deceit. All false works will be put to shame. Until now the spirits of truth and deceit struggle in the heart of humans, (24) and (so) they walk in wisdom or vileness. According

> to a man's share in truth shall he be righteous and thus hate deceit, and according to his inheritance in the lot of deceit he shall be evil through it, and thus (25) loathe truth. For God has set them apart until the time of that which has been decided, and the making of the new. He knows the reward of their works for all the end of (26) [appointed tim]es, and he allots them to the sons of man for knowledge of good [...and thus] dec[id]ing the lots for every living being, according to this spirit [...] the visitation.[2]

THE TWO SPIRITS: COSMIC BEINGS OR HUMAN DISPOSITIONS?

Within a decade of the publication of the Community Rule, scholars had forged no less than three distinct approaches to the teaching of the two spirits. K. G. Kuhn and A. Dupont-Sommer, drawing upon *external parallels* with Zoroastrianism, interpreted the two spirits primarily as cosmic beings locked in war with one another. In response to that approach, P. Wernberg-Møller sought to demonstrate "on purely *internal grounds*"[3]–from elements within the document itself–that these spirits are two inclinations within each individual human being. O. Seitz, in a less influential but nonetheless significant study, explained the teaching of the two spirits as the product of the *creative exegesis* of 1 Sam 16:14, "And the spirit of the Lord departed from Saul, and an evil spirit from the Lord troubled him." By 1961, then, three approaches to the two spirits had emerged, yielding a disorienting array of interpretations.

The Two Spirits and External Parallels

In articles published in 1950, K. G. Kuhn and A. Dupont-Sommer agreed that the Qumran community had come under Iranian influence.[4]

[4] André Dupont-Sommer wrote, "If Essenism had earlier been influenced largely by Zoroastrianism [= Iranian religion], whose influence was not wholly eliminated afterwards, the Master of Justice [Teacher of Righteousness] himself brought about

This hypothesis is credible, since the Jews had lived for centuries under Persian domination. Two years later, both scholars had discovered in the Community Rule, which contains the teaching of the two spirits (1QS 3.13–4.26), sufficient evidence to reaffirm resoundingly their conviction that Zoroastrian influences had shaped the earliest beliefs of the Qumran community.[5] Both independently cited numerous correspondences between the teaching on the two spirits in 1QS 3–4 and the Gāthās of Zarathustra, which comprises the primary repository of the teachings of Zoroaster, whose influence lay at the headwaters of Iranian religion or Zoroastrianism, centuries prior to the founding of the community at Qumran. It will serve us well to dwell upon these parallels because they constitute the most cogent defense of the interpretation of the two spirits as cosmic beings locked in war with one another. The most significant correspondences include:

There are (1) 1QS 3.18: "two spirits in which to walk until the appointed time for his visitation, namely the spirits of truth and of deceit." Both Kuhn and Dupont-Sommer, by observing that the basic opposition between two spirits could not be traced to the Hebrew Bible, freed themselves to contend that this distinction was derived from Zoroastrianism. Dupont-Sommer cited *Yasna* 45.2, of the Gāthās, as evidence:[6]

"Yes, I shall speak of the two fundamental spirits of existence, of which the virtuous one would have thus spoken to the evil one: 'Neither our thoughts nor teachings nor intentions, neither our preferences nor words, neither our actions nor conceptions nor our souls are in accord.'"[7]

(2) Kuhn argued more generally that the tenor of 1QS 3–4, with its eschatological point of reference and an ethical dualism between right actions and evildoing, corresponds quintessentially to the ethical dualism and eschatological resolution of *Yasna* 30.3–5:

---

its reform under the influence of another mystical movement, Neo-Pythagoreans" (*The Dead Sea Scrolls: A Preliminary Survey* [Oxford: Basil Blackwell, 1952]). Karl G. Kuhn ("Die in Palästina gefundenen hebräischen Texte und das Neue Testament," *ZTK* 47 [1950]: 211) noted that Qumran theology, "accords surprisingly with the original preaching of Zarathustra [= Zoroaster]." Kuhn wrote this although, as he explained in a subsequent publication ("Die Sektenschriften und der iranische Religion," *ZTK* 49 [1952]: 297, 314), he had not yet seen the *Rule of the Community*.

[5] Kuhn, "Sektenschriften," 296–316; André Dupont-Sommer, "L'instruction sur les deux Esprits dans le Manuel de Discipline," *RHR* 142 (1952): 5–35.

[6] "L'instruction," 16–17, 19; on 1QS 3.19, 21.

[7] All translations from the Gāthās are by S. Insler, *The Gāthā*s of Zarathustra (Textes et mémoires 1; Acta Iranica 8; Leiden: Brill, 1975). For a description of the good spirit, see in the Avesta, *Yasna* 47.

> Yes, there are two fundamental spirits, twins which are renowned to be in conflict. In thought and in word, in action, they are two: the good and the bad. And between these two, the beneficent have correctly chosen, not the maleficent. Furthermore when these two spirits first came together, they created life and death, and how, at the end, the worst existence shall be for the deceitful but the best thinking for the truthful person. Of these two spirits, the deceitful one chose to bring to realization the worst things. (But) the very virtuous spirit…chose the truth and (so shall those) who shall satisfy the Wise Lord continuously with true actions.

For Kuhn, in particular, these references to two spirits in a context which contains *fundamental* ethical and eschatological dualisms suggest the influence of Zoroastrianism on 1QS 3.13–4.26.[8]

(3) 1QS 3.24–25: "But the God of Israel and his angel of Truth help all the Sons of Light." Dupont-Sommer discerned a parallel between this affirmation of divine aid for the children of light and *Yasna* 50.5: "Lord, let wisdom come in the company of truth across the earth! Yes, if ye shall be pleased with your prophet, reveal Thyself with visible help, mighty through Thy hand, through which he might see us in happiness."[9]

(4) 1QS 4.2: "And these are their [the spirits'] ways in the world." The concept of two ways in relation to two factions of people is discernible, according to Dupont-Sommer, in *Yasna* 31.2, where, in a context which refers to two factions, the truthful and deceitful, it is said, "If the better course for the soul has not been seen through these words, then let me lead all of you in which way the Wise Lord knows (to exist) that judgment between the two alternatives by which we are going to live in accordance with truth."[10]

(5) 1QS 4.6: "The visitation of all those who walk in it [the spirit of truth] (will be) healing." The effect of healing, according to Dupont-Sommer, is frequent in the Gāthās, e.g., *Yasna* 44.16; 31.19. The good person, "virtuous through truth, watching over the heritage for all, is a world-healer and Thy ally in spirit, Wise One" (44.2).[11]

(6) 1QS 4.15–18: "In these (two spirits are) the natures of all the sons of man, and in their (two) divisions all their hosts of their generations have a share…For God has set them apart until the Endtime; and put eternal enmity between their (two) classes.…But God, in his mysterious understanding and his glorious wisdom, has set an end for the existence of deceit." The division of humankind into two distinct groups until eschatological

[9] Dupont-Sommer, "L'instruction," 21.

[10] Ibid., 22.

[11] Ibid., 25.

judgment is fundamental to the Gāthās, e.g., *Yasna* 31.2, 3; 43.12; 47.6; 51.9. Both Kuhn and Dupont-Sommer cited in this regard *Yasna* 44.15: "Tell me truly, Lord…when the two hosts who share no wonts come together, where and to which one shalt Thou grant victory?"[12]

To be able to locate at Qumran a particular text which confirmed the suspicion that the community had been influenced by Iranian theology must have generated considerable enthusiasm. The recurrence of the opposition between two spirits in a context dominated by eschatology and ethical dualism is of considerable import.

Nonetheless, these parallels were challenged because the Gāthās, though they purport to express the convictions of Zoroaster, who lived centuries before the founding of the Qumran community, were actually written centuries *after* the demise of the Qumran community.[13] Dupont-Sommer had partially anticipated this critique by marshalling corroborative evidence from Plutarch's description of Zoroastrianism in *De Iside et Osiride*, which was composed prior to ca. 120 C.E., in support of the possible influence of Zoroastrianism on the community at Qumran. On the respective origins and enmity of the two spirits in light and darkness (1QS 3.19–21), Dupont-Sommer could refer to Plutarch's description of Zoroastrian gods: "Oromazes [Ahura Mazda], born from the purest light, and Areimanius, born from the darkness, are constantly at war with each other."[14] On the equal divisions of the two spirits (1QS 4.15–16), Dupont-Sommer noted that every time the good god (Ahura Mazda) created other gods, the evil god matched them in number.[15] And on the ultimate defeat of the evil god (1QS 4.18), Dupont-Sommer cited a small portion of Plutarch's description: "But a destined time shall come when it is decreed that Areimanius, engaged in bringing on pestilence and famine, shall by these be utterly annihilated and shall disappear."[16]

These parallels with *De Iside et Osiride* were not entirely adequate to forestall the criticisms of scholars such as F. Nötscher. Nötscher contended that *general* dualisms, such as good and evil, belong to common human perceptions of reality and, therefore, need hardly be traced to early Zoroastrianism, about which almost nothing is known.[17]Many of the parallels which Kuhn and Dupont-Sommer adduced do admittedly fit in this category. Belief in God's aid to the suffering righteous, for example, is hardly limited to Zoroastrianism. H. G. May, moreover, subsequently garnered a wide variety of scriptural texts, such as the cosmic battle between Gog and Magog in Ezekiel 38–39, to create a believable biblical context for this sort of dualism.[18] Nötscher observed as well that Zoroastrianism underwent changes in the course of a millennium and that the *specific* dualism between light and darkness which is fundamental to Qumran dualism is less characteristic of the Gāthās (the primary evidence for early Zoroastrianism) than of the later Avesta. This particular dualism, then, can hardly be adduced as an indication of Zoroastrian influence on Qumran theology.

---

[12] Ibid., 28–29; Kuhn, "Sektenschrift," 305. Dupont-Sommer cited *Yasna* 43.8, 15; 46.6 as parallels to the "eternal hatred." The ultimate defeat of the evil spirit and victory of the good spirit is, according to Dupont-Sommer ("L'instruction," 30), "a fundamental doctrine" of Zoroastrianism (*Yasna* 30.8, 10; 43.5).

[13] For a recent and concise discussion of Zoroastrianism, see Mary Boyce, "Zoroaster, Zoroastrianism," *ABD* 6:1168–74.

[14] Dupont-Sommer, "L'instruction," 18.

[15] Ibid., 29n1.

[16] Ibid., 30.

There exists, moreover, another breach in the foundation of Zoroastrian influence. The influence of early Zoroastrianism cannot satisfactorily explain the struggle of the two spirits *within* the human heart (e.g., 1QS 4.23) or the capacity of a child of light to sin. This aspect of 1QS 3–4 compelled Dupont-Sommer, without the ability to appeal to Zoroastrian parallels, to conjecture awkwardly, "The idea seems to be that, if the two spirits *in each person* are unequally apportioned, they are found *together* equally: the two forces, in some manner, are equal…"[19]

Kuhn too acknowledged this tension, recognizing that (as he perceived it) in 1QS 3.15–4.19 two *groups* of people are divided under their respective spirits of light and falsehood, which war in cosmic battle with one another, while in 1QS 4.20–23, the spirits of truth and falsehood are said to struggle *within each individual.* He explained this tension in two ways. First, he regarded the tension as a matter of terminology rather than substance, for even in 1QS 3.22, the children of light are led astray in the context of a cosmic battle by the prince of darkness and his coterie of evil spirits. What 1QS 4.20–23 expresses as an anthropological dualism–a struggle within an individual–is much the same as the cosmic dualism of 1QS 3.15–19, in the course of which the righteous are led astray. Kuhn contended, secondly, that "this terminological distinction lies in this, that the dualism of the two original spirits of truth and evil, from Iranian [Zoroastrian] religion, which was adopted in 1QS 4.20ff. is combined with the Old Testament conceptions of the 'new spirit,' of the 'holy spirit,' of the 'steadfast spirit' which God will place in the heart of the pious" (Ezek 36:25–27; Ps 51:10, 12–14, 19).[20]

---

[17] Friedrich Nötscher, *Zur theologischen Terminologie der Qumran-texte* (BBB 10; Bonn: Peter Hanstein Verlag, 1956), 86–92. Kuhn ("Sektenschriften," 309) had already acknowledged this.

[18] Herbert G. May, "Cosmological Reference in the Qumran Doctrine of the Two Spirits and in Old Testament Imagery," *JBL* 82 (1963): 1–14. He cited as well several instances in which the qualities of God were hypostatized and "thought of as angelic beings" (e.g., Ps 85:11–14) in an attempt to identify a plausible biblical basis for explaining the origins of the two angelic spirits.

[19] Dupont-Sommer, "L'instruction," 29.

In the end, Kuhn's inability to adduce Zoroastrian parallels to explain the presence of an anthropological dualism (the struggle within) in 1QS 3–4 exposes a gap in the hypothesis of Zoroastrian influence. How taut are the parallels if Zoroastrianism cannot adequately explain the anthropological dimension of 1QS 3–4?[21]

The Two Spirits and Internal Considerations

Into this breach, nearly a decade later, strategically stepped P. Wernberg-Møller,[22] who, "on purely internal grounds" (as opposed to citing external parallels) attempted to redress the balance by contending that the two spirits in 1QS 3–4 are to be understood as two dispositions within all human beings, as the precursor of the rabbinic concept of the two impulses:

> It may thus be doubted whether we have a parallel at all here to the concept in the *Gathas* of the two sharply separated divisions of mankind. The sons of righteousness are, in a way, regarded as a section within the larger whole, the sons of perversion, and as belonging to them. This feeling of solidarity with the rest of mankind is something very characteristic of the anthropology

---

[20] Kuhn, "Sektenschrift," 301-2n4. Hans Wildberger ("Der Dualismus in den Qumranschriften," *Asiatische Studien* 8 [1954]: 163–77) attempted to strengthen the hypothesis of Zoroastrian influence by identifying the "spirit of impurity" with Belial. He went on, on the basis of 1QS 10.21 ("Belial I will not keep in my heart") to locate the spirit of impurity or Belial both in the cosmos and "in the heart" of the children of darkness.

[21] Some scholars have refined the Zoroastrian hypothesis by pinpointing a particular form of Zoroastrianism known as Zurvanism. See, for example, Jacques Duchesne-Guillemin, "Le Zervanisme et les manuscrits de la Mer Morte," *Indo-Iranian Journal* 1 (1957): 96–99; James H. Charlesworth, "A Critical Comparison of the Dualism of 1QS III 13–IV 26, and the 'Dualism' Contained in the Fourth Gospel," *NTS* 15 (1968): 400–401.

[22] Independently of Wernberg-Møller, Marco Treves contended ("The Two Spirits of the Rule of the Community," *RevQ* 3 [1961]: 449–52) that the two spirits are not angels because: the reference is to "all varieties" and not two spirits in 1QS 14; the allotment of spirits to the single angel of darkness suggests that angels and spirits are not synonyms (1QS 3.24); the spirit is sprinkled (1QS 4.21) and angels are not; in the Hebrew scriptures, angels do not dwell in human hearts (1QS 4.23).

> of the Qumran community…it comes out very strongly in *1 QS* XI and in *1 QH*; but it also lies behind the instruction before us [in 1QS 3–4].[23]

The focus of 1QS 3–4 is the variety of human spirits produced by the struggle between truth and perversity *within* the human heart. Although Wernberg-Møller's study is dense, its most cogent evidence may nonetheless be summarized.

(1) 1QS 3.14 refers not to "two kinds" of spirits but to "…all the ranks of their spirits…" The focus of 1QS 3–4 is not two groups—the number "two" occurs only in 3.18. All human beings are distinguished from one another on the basis of a variety of spiritual states and not because they belong to one of two mutually exclusive groups.[24] Nor does 1QS 3.14–15 have in view an eschatological judgment akin to Zoroastrianism. The vocabulary is similar to 1QS 3.23, in which punishment and grief are *present* realities. The words, "punishment," and "recompense," moreover, derive from Hos 9:7, in which they describe Israel's sinful present existence.

(2) 1QS 3.18, which mentions the placement of two spirits in human beings, constitutes an allusion to Gen 2:7. The image therefore is akin to the creative inbreathing of two spirits rather than the creation of two cosmic spirits, as in Zoroastrianism.[25]

(3) 1QS 3.18–19 corresponds to 4.18–22, particularly the reference to "the time fixed for His [God's] visitation." This parallel "makes it clear that the expression 'spirits of truth and perversion' in 1QS 3.18–19 means two *psychological* qualities…" In 1QS 4.18–22, the point is "that perfection is at present, however desirable, not practicable, but it will be so when God will replace the 'perverted' mind by a 'true' and 'holy' disposition [i.e., spirit]."[26] Thus can Wernberg-Møller appeal to 1QS 4.18–22, in which the spirit is that which exists within a human, to elucidate the more obtuse earlier reference.

(4) 1QS 3.13–4.6 in general presents no strict dualism but rather a framework in which God is consistently stronger than the angel of darkness. Once again, the focus is not upon two equal and opposed cosmic spirits.[27]

(5) The lists in 1QS 4.2–14, which contrast "the spirit of meekness, of patience, generous compassion, eternal goodness…" and "the spirit of deceit," do not refer to two cosmic spirits with their respective realms of morality. Rather each human, both within and outside the Qumran

[25] Ibid., 422.

[26] Ibid., 423.

[27] Ibid.,425–27.

community, exhibits in varying measure the characteristics of these spirits, and it is the mixture of these characteristics which determines, as in 1QS 3.14, "all the ranks of their spirits." The exegetical basis for this inference is that the sons of truth are referred to twice in the first list, but the sons of perversion are not mentioned at all in either list. The intent of these contrasting lists, therefore, is not to distinguish between the righteousness of the children of light and the evil of the children of darkness, but to depict the nature of all people, who participate to varying degrees in good and evil. The children of darkness do not even come into the picture.[28]

(6) 1QS 4.17–18 describes a fierce struggle, and 4.23 locates this struggle in the human heart: "Until now the spirits of truth and of injustice feud in the heart of man and they walk in wisdom or in folly." The nature of this struggle determines the particular *share* one has in the spirits of truth and perversion.[29]

These observations, among others, formed the basis for Wernberg-Møller's contention—made in direct opposition to K. G. Kuhn and A. Dupont-Sommer—that

> The difference between light and darkness, righteousness and sin was, of course, felt to be radical; but the domains of these opposites were not kept strictly apart. Perversion and darkness made inroads upon the realms of truth and light because the sons of righteousness, in spite of their name and election, like the rest of mankind, had two "spirits," two opposing inclinations (III, 18) constantly at war with one another (IV, 23), of which, at the moment, the "perverse" one had the upper hand.[30]

Wernberg-Møller's analysis of 1QS 3–4 served as an important corrective to Kuhn's and Dupont-Sommer's explanation of 1QS 3–4 via Zoroastrianism. His exclusive emphasis upon the anthropological dimension was nonetheless as one-sided as their emphasis upon the cosmic dimension. H. G. May later contended, for example, that even a reference to "all their kinds of spirits" (1QS 3.14) is set in a context replete with references to the spirit of truth and deceit or the prince of light and the angel of darkness,[31] and J. H. Charlesworth justifiably observed that "anyone advocating a psychological rendering of this passage must necessarily explain why here particularly 'Angel of Darkness' or 'Angel of Truth' should be drained of their cosmic force."[32]

The Two Spirits and Biblical Exegesis

Unlike Kuhn, Dupont-Sommer, and Wernberg-Møller, O. Seitz attempted to explain what he perceived to be the coexistence of various dualisms in 1QS 3–4. Seitz uncovered this complexity by discerning a relationship between passages from the Shepherd of Hermas, the *Testaments of the Twelve Patriarchs*, and the Community Rule, and by tracing their coalescence of conceptions primarily to 1 Sam 16:14: "And the spirit of the Lord departed from Saul, and an evil spirit from the Lord troubled him."[33] This biblical text emerged in Herm. *Mand.* 5.1.2a, 3–4 in the conviction that

> the holy spirit which dwells in you will be pure....But if any quick temper enters, at once the holy spirit, being delicate, is pressed for room...for it is choked by the evil spirit...being defiled by the quick temper.
>
> Therefore, abstain from quick temper, which is the most evil spirit; but put on patience....(5.2.8)

Seitz noted that 1 Sam 16:14 is unique in scripture as the text in which God is said to send *both* an evil and a good spirit. Seitz took the verb, choked, which occurs as well in the Septuagint version of 1 Sam 16:14, as further evidence that this discussion in the Shepherd of Hermas is spun exegetically from 1 Sam 16:14 (LXX 1 Kgs 16:14).[34] The centrality, moreover, of "quick temper," suggests the influence of the story of Saul, who was flung into fits of rage when inhabited by the evil spirit.

This antithesis between *two spirits* is similar to the opposition of *two angels* in Herm. *Mand.* 6.2.1:

---

spirits *for* human beings to follow. 1QS 3.18 reads ל (as in 2 Sam 12:20) and not ב. In this interpretation, human beings situate themselves in either of the two spirits; the two spirits are not situated within a human being. Nonetheless, other of Wernberg-Møller's observations were subsequently strengthened. For example, his contention that 1QS 3.14 has less to do with two spirits than with varieties of spirits was borne out by Sekki's (*Meaning*, 195) observation that the closest parallel to this formulation occurs in 1QS 20, where the expression refers to the varieties of spiritual perfection of priests, which are the basis for their rank in the community. 1QS 3.14 suggests that the varieties of spiritualities *within individual members of Qumran* may lie rather more at the forefront of 1QS 3–4 than does the *division of the members from nonmembers based upon the two spirits of 1QS 3.18–19.*

[33] Otto Seitz, "Two Spirits in Man: An Essay in Biblical Exegesis," *NTS* 6 (1959): 82–95. He also discerned (86) adumbrations of the lying spirit of 1 Kgs 22:21–23 in 1QS 4.9 and Herm. *Mand.* 3.1, 2, 4.

[34] Although Seitz did not cite Pseudo-Philo, *Liber Antiquitatum Biblicarum* (*L.A.B.*), this interpretation is especially evident in *L.A.B.* 60.1–2, where the evil spirit is said to have *choked* Saul.

> Behold then the works of the angel of evil. First of all he is quick tempered…whenever this one arises in your heart, recognize him by his works.…Whenever quick temper or bitterness assails you, recognize that he is in you.
>
> Trust the angel of righteousness, but avoid the angel of evil…For if any man is faithful, and the desire of this angel arises in his heart, that man or woman must commit some sin.

The antithesis between good and evil which is manifest in opposition between two spirits and two angels which "arise in the heart," is evident further in a "psychological dualism" between two desires:

> The evil desire is the daughter of the devil.…But you must put on the desire of righteousness and, armed with the fear of the Lord, resist them [evil desires].…If you serve the good desire and are subject to her, you will be able to gain dominion over the evil desire and bring her into subjection…

Seitz mustered analogous exegetical activity from the *Testaments of the Twelve Patriarchs*. A similar antithesis of two spirits is in evidence, according to Seitz, in *T. Gad* 4:7: "The spirit of hate cooperates with Satan through impatience, but the spirit of love cooperates with the law of God in patience." The *complexity* of antitheses is evident as well in the *Testaments of the Twelve Patriarchs*.

> If the soul wills to walk well…it does all its deed in righteousness…But if the inclination tends toward evil,…it is dominated by Beliar; even it if does something good, he perverts it to evil…since the treasure of the inclination is filled with an evil spirit (*T. Asher* 1:3ff.)
>
> The *inclination* of the good man is not under the control of the error of the *spirit of Beliar*, for the *angel of peace* guides his soul (*T. Benj.* 6:1).[35]

Precisely this complexity characterizes 1QS 3–4, where the spirits under the dominion of the angel of darkness mislead the children of light (1QS 3.24), and where "the spirits of truth and deceit struggle in the heart of humans…" (1QS 4.23). Seitz discerned, as well, a level of psychological (i.e., anthropological) dualism in the reference to inclinations in 1QS 4.4–5–"A holy intention with a steadfast purpose"–which is followed shortly later, in 1QS 5.4–5, by the exhortation: "No man shall wander in the stubbornness of his heart, to err following his heart, his eyes, and the plan of his inclination." Even some of the effects of the two spirits as they act upon this inclination are similar to the Shepherd of Hermas and the *Testaments of the Twelve Patriarchs*: either patience (1QS 4.3) or quick temper (1QS 4.10).[36]

---

[35] Seitz, "Biblical Exegesis," 91–92; italics mine.

[36] Ibid., 93.

Seitz included far more exegetical data, as well as frequent relevant references to the rabbinic conception of the two inclinations, to substantiate his view that the teaching of the two spirits could best be understood as the product of creative exegesis. It is nonetheless the correspondences he discerned between the complex coexistence of dualisms in the Shepherd of Hermas, the *Testaments of the Twelve Patriarchs*, and the Community Rule, alongside the ability to trace them together to 1 Sam 16:14, which constitute Seitz's primary contribution.

Two Spirits: The Via Media

Although most scholars have responded primarily to Wernberg-Møller or to Kuhn and Dupont-Sommer, they have tended nonetheless to adhere, like Seitz, to an interpretation which acknowledges the coexistence of anthropological and cosmic dualisms in 1QS 3–4. What is indeed striking, despite this superficial consensus, is the *variety of rationales* for these interpretations, as a whirlwind review of select studies should illustrate.

B. Otzen explained 1QS 3–4 as an instance of a late Jewish belief according to which what happens in the world at large is played out in individual human beings. Within each human transpires a psychological dualism (*microcosm*) of spirits which corresponds to a cosmic-mythological dualism (*macrocosm*) of angels and demons.[37]

E. Schweizer underscored the ethical dimension of 1QS 3–4 by placing it in the context of *the fundamental decision to obey Torah.* Although the formulation of the two spirits is analogous to the rabbinic conception of the two impulses, this understanding of the two spirits does not suffice. Human beings can decide only from God's power; accordingly the two spirits are identified as angels who act in God's power to help and to hinder people in their ethical decisions.[38]

---

[37] Benedikt Otzen, "Die neugefundenen hebräischen Sektenschriften und die Testamente der zwölf Patriarchen," *ST* 7 (1954): 135–36. Otzen contended as well that both dualisms are ethical and thus influenced by Iranian religion, as opposed to the Hellenistic and gnostic dualism of body and soul.

[38] Eduard Schweizer, "Gegenwart des Geistes und eschatologische Hoffnung bei Zarathustra, spätjüdischen Gruppen, Gnostikern und den Zeugen des Neuen Testaments," in *Neotestamentica* (ed. E. Schweizer; Zürich/Stuttgart: Zwingli Verlag, 1963), 159–64. Originally published in *The Background of the New Testament and its Eschatology. Studies in Honour of C. H. Dodd* (ed. W. D. Davies and D. Daube; Cambridge: University Press, 1956), 482–508.

A. R. C. Leaney, like Schweizer, argued that there is in 1QS 3–4 an issue more fundamental than the two spirits; viz., the contrast between *light and darkness.* The association is evident in 1QS 3.18–19: "two spirits…the spirits of truth and of deceit. In a spring of light emanates the nature of truth and from a well of darkness emerges the nature of deceit." The particular expressions of this fundamental conviction are, however, confused, for "the writer is not clear whether he wishes to teach that man as such is a combination of a good and a bad spirit or that mankind is divisible into the good (arising from light) and the bad (arising from darkness)."[39]

J. G. Gammie regarded the fundamental element of 1QS 3–4 to be ethical dualism, which he defined as *the division of people into opposing (e.g., good and evil) groups.* According to Gammie, "1QS 3.13–4.26 teaches an ethical dualism which at times is internalized into a psychological dualism and at times externalized or further extended into a modified cosmic dualism."[40]

H. Lichtenberger contended that 1QS 3.13–4.26 deals primarily with *the tension between God's responsibility for creation and the presence of evil among the faithful.* The primary point of 1QS 3.18–19, for example, is that *God* has created both spirits. The interpretation of the two spirits in 1QS 3.18 as human dispositions which, in the following line, are related to cosmic, mythological elements of light and darkness is secondary to the acknowledgment that God in the beginning created both, that God helps the children of light in the present cosmic battle with the angel of darkness, and that God has set an eschatological limit to the existence of the spirit of deceit.

A. E. Sekki characterized the teaching of the two spirits as a *reinterpretation of the community's traditional understanding of the spirit.* Because 1QS 3–4 is a *re*interpretation, the traditional and revised views of the spirit coexist at three interpretative levels in 1QS 3.13–4.26. (1) The use of the feminine gender in the expression, "two spirits," in 1QS 3.18–19 indicates that these two spirits, as well as "the spirits of light and of darkness" in 3.25, are human dispositions, for the word, "spirit," in the feminine gender, tends to designate human dispositions in the Qumran scrolls. (2) The use of the masculine gender in the similar expression, "the spirits of truth and deceit" (1QS 4.23), indicates a reference to the good and evil spirits which fill the cosmos, for throughout the remainder of Qumran literature references to angelic beings as "spirits" occur with relative consistency in the male gender. According to Sekki, the author of this essay on the two spirits allows these two interpretations to coexist in order to teach that "the pious must deal not only with their own sinful nature but also with the problem of demonic attack."[41] (3) Alongside references to two human dispositions and a multiplicity of angelic and demonic beings, the author of 1QS 3.13–4.26 refers as well to the singular spirit of God as the "spirit of holiness" and the "spirit of truth" (4.21) in an eschatological context replete with traditional allusions to Isa 44:3, Joel 3:1, and Ezek 36:25–27. 1QS 3–4, therefore, preserves various conceptions of the spirit as dispositions, angels, and an eschatological reality in order to reinterpret the traditional view of the sect for whom God, through the holy spirit, will deliver God's people from sin in the last days by describing the eschatological holy spirit as the spirit of truth (1 QS 3.18–19). "In this way the author indicates that the 'holy Spirit' which will come from God in the future is really none other than the good spirituality given to the sectarian at his creation."[42]

Synthesis

This altogether too brief survey of scholarly positions on the two spirits suggests how little consensus there is even amongst scholars who agree that the cosmic and anthropological interpretations of the two spirits coexist in 1QS 3–4. The solution to this conundrum, then, is one of the *desiderata* of Qumran scholarship.

Despite this lack of consensus, a return to the first decade of studies may suggest a complementarity in these studies that has led to the embrace of various interpretations of the spirit in 1QS 3–4. Kuhn and Dupont-Sommer provided, via external parallels, a credible explanation of the stark opposition of two cosmic spirits: the influence of Persian cultural hegemony, particularly Zoroastrian dualism, made inroads into early Jewish theology. What this hypothesis could not satisfactorily explain—the struggle within individuals—Wernberg-Møller, by approaching

---

[41] Sekki, *Meaning*, 211. See also 4Q510, 1, 6, in which the demons attempt to destroy the heart of the faithful.

[42] Sekki, *Meaning*, 217–18.

1QS 3–4 on internal grounds, could: individuals within the community were ranked by the mixture or varieties of the spirits of truth and deceit within. Taken in tandem, with the caveat that neither adequately explains *every* reference to spirit in 1QS 3–4, these complementary approaches account quite satisfactorily for both the cosmic and anthropological aspects of this teaching.

The cogency of both sets of analyses, despite their onesidedness, suggests why subsequent scholars preferred to interpret 1QS 3–4 as a combination of cosmic and anthropological elements. This does not mean that scholars agree over the fundamental issue at stake in 1QS 3–4; we have seen that they do not. Nor is there consensus about which particular references—of which there are sixteen—in 1QS 3–4 are to human spirits and which are to cosmic spirits. Sekki's survey of scholarly opinions on each reference to "spirit" in 1QS 3.13–4.26 catalogues the bewildering disagreement of scholars concerning which particular texts refer to angelic spirits and which to human spirits.[43] Despite this lack of consensus, scholars do affirm virtually unanimously that 1QS 3–4 is a teaching concerned *both* with the struggle within human beings *and* the cosmic struggle that has an impact upon their ability to live righteously.

The community at Qumran, however, was not so much shaped by systematic, abstract reflection upon the origin of evil or the nature of angels as by their scriptures. It was the ability of the Teacher of Righteousness to interpret Torah and prophets that lent him status in the community. In this respect Seitz's suggestion that the teaching of the two spirits is the product of the creative exegesis of 1 Sam 16:14 is essential to a holistic interpretation of 1QS 3–4. His interpretation, moreover, can be strengthened if it is juxtaposed with those of Kuhn, Dupont-Sommer, and Wernberg-Møller, for a weakness of Seitz's interpretation is its inability to address a disparity between 1 Sam 16:14 and 1 QS 3–4. In 1 Sam 16:14, the evil and good spirits do *not* coexist within Saul; the evil spirit enters after the departure of the good spirit. In 1QS 3.18, both spirits coexist within a human being. This conceptual shift can be explained by the influence of a Judaism that was shaped by Persian dualism; the mutually exclusive spirits of 1 Sam 16:14 may have been interpreted as two spirits that coexist within a human being in the context of the cosmic coexistence of the prince of light and the angel of darkness.

[43] *Meaning*, 193–219.

THE TWO SPIRITS: THEIR RELATION TO QUMRAN THOUGHT

Diversity Within the Dead Sea Scrolls

A scant year before Wernberg-Møller attempted a frontal assault on the hypothesis of Zoroastrian influence, O. Betz drove a wedge into the assumption that Qumran conceptions of the spirit were relatively uniform. Betz discovered what he would designate the Spirit-teaching (*Geistlehre*), which is located primarily in 1QH, and the Spirits-teaching (*Geisterlehre*), which characterizes 1QS 3.13–4.26. These, contended Betz, "are so closely intertwined that Qumran research until now and probably also the sect itself did not discover their original independence."[44] For the division between a Spirit-teaching and Spirits-teaching, Betz offered several pieces of evidence.

Creation

The Spirit-teaching is concerned primarily to describe the human spirit as an impure spirit, a "spirit of flesh" which is characterized by waywardness and sin. Thus, the Qumran psalmist thanks God for insight, even though a human being is

> a structure of dust fashioned with water,
> his counsel is the [iniquity] of sin,
> shame of dishonor and so[urce of] impurity
> and a depraved spirit rules over him. (1QH 5.21–22)

Strikingly different is the creation imagery in 1QS 3.18–19, where not one spirit, but two, are created, and where these are not inbreathed but placed for humans to walk in them.

This difference is explicable in part, according to Betz, because the Spirit-teaching of 1QH is deeply influenced by Genesis 2, with its images of breath and clay and its focus upon the creation of individual human beings. The Spirits-teaching, in contrast, with its reference to "generations" and to the contrast between light and darkness, is spun from Genesis 1, and therefore is directed toward generations of people, children of light and darkness.

---

[44] Otto Betz, *Offenbarung und Schriftforschung in der Qumransekte* (WUNT 6; Tübingen: Mohr Siebeck, 1960), 143.

Sin

According to the Spirit-teaching, the spirit that God inbreathed into each individual can be tainted by sin. Based upon the conviction of Lev 11:43, that one's life or *nephesh* can be defiled by breach of the levitical laws, the author of the *Damascus Document* similarly warns in CD 12.11 against the defilement of one's life or "spirit" and against the defilement of one's "holy spirit" in CD 5.11–12 and 7.3–4. Integral to this warning is the member's ability to choose, to resist defilement of one's spirit by stringent adherence to community rules. This emphasis upon individual choice and sin is absent from the Spirits-teaching, according to which the ways of two groups of people are predetermined by their respective origins, either from a well of darkness or a spring of light (1QS 3.18–19). The decision concerning which group to join is not a human one but a divine one.

A further conviction divides the Spirit-teaching from the Spirits-teaching. The basic distinction between good and evil is depicted in the former by the contrast between spirit and flesh and in the latter by the contrast of two spirit worlds. We have seen above that the hymn writer describes himself both as "a creature of clay" and "a mistaken spirit." He has, according to 1QH 4.25, "a spirit of flesh." In 1QS 3–4, in contrast, the world is divided between spirits of deceit and truth, the prince of light and the angel of darkness, angels and demons, two ways with their respective effects and actions (4.2–16). There is here no conception of an individual spirit created good but gone bad, a spirit breathed from above but buried now under the impulse of the flesh. There is, in short, no need for purification in the here and now, although this is precisely the need that preoccupies the Qumran hymn writer.

Purification

We have seen that the proponents of the Spirit-teaching could describe themselves as both creatures of clay and mistaken spirits. We have seen that the human spirit could, from this perspective, be defiled by disobedience. Of such human beings it must be said, "Born of a woman, how can he dwell before you, he whose kneading (is) from dust and whose corpse (is) food for maggots? He is (but) a discharge, (mere) pinched-off clay whose urge is for the dust. What can clay and that which is shaped (by) hand dispute; and what counsel does it comprehend?" (1QS 11.21–22). This is only part of the picture; it could also be said:

> I give you thanks, Lord,
> because you have sustained me with your strength,
> you have spread your holy spirit over me so that I will not stumble,
> you have fortified me against the wars of wickedness,
> and in all their calamities
> you have n[ot] discouraged (me) from your covenant. (1QH 15.6–8)

The difference between these assessments of human nature is striking, compelling Betz to suggest: "The difference between both pictures corresponds to the contrast between the natural and the newly created individual—between the person who lives according to the flesh, who possesses nothing other than an impure body and erring spirit, and the person who lives according to the spirit, who has received the power of God and the holy spirit."[45] In other words, "The spirit and power of God overcome human fleshly nature and straighten out his inclination, that is, spirit."[46]

This conception of new creation holds nothing in common with the conception of the two spirits in 1QS 3–4, in which one's predetermined lot amongst either the children of light or children of darkness is evident in whether one follows the way of the spirit of deceit (1QS 4.9–11) or the spirit of humility and patience (1QS 4.2–6). There is no individual new creation in the present age; there are rather two ways which coexist until the eschatological eradication of the spirit of deceit (1QS 4.20).

Betz's interpretation is not without its weaknesses. Because he wrote before the publication of Wernberg-Møller's study, he perhaps did not sufficiently consider the anthropological dimension of 1QS 3–4 which may have created a bridge between the Spirit-teaching and the Spirits-teaching. The notion of "a variety of spirits" and the conviction that the two spirits "struggle in the heart of humans" may have provided Betz with some measure of concurrence between the Spirits-teaching and the conviction of the Spirit-teaching that the human spirit can err and be deceived. Such criticisms notwithstanding, Betz's clear definition of the dilemma, which previously had tended to go unrecognized, demonstrated that the spirit of truth in 1QS 3–4 cannot easily be identified with the holy spirit in the remainder of the Qumran documents, as had been done customarily in studies prior to Betz's.[47]

---

[45] *Offenbarung*, 124. This realization can be traced to the important study of Erik Sjöberg, "Neuschöpfung in den Toten-Meer-Rollen," *ST* 11 (1955): 131–37. Sjöberg drew attention to the function of the spirit, not only in creation, as in 1QS 3.18–19, nor exclusively in eschatology, as in 1QS 4.20–23, but in the new creation of the believer. Sekki (*Meaning*, 28–30) regarded Sjöberg's study as paradigmatic.

[46] *Offenbarung*, 125.

[47] For a list of scholars who made this identification, see Sekki, *Meaning*, 56n218. Werner Foerster attempted ("Der Heilige Geist im Spätjudentum," *NTS* 8 [1961]:

Diversity Within the Qumran Hymns

A subsequent analysis by H.-W. Kuhn (a student of K. G. Kuhn) on Qumran eschatology served to buttress Betz's thesis. While Betz attempted to uncover a diversity of views on the spirit throughout the Qumran corpus, H.-W. Kuhn concentrated his attention upon the Qumran Hymns in order to distinguish two conceptions of the spirit: the predestined spirit given to human beings at their creation, a conception whose fundamental formulation occurs in 1QS 3.13–4.26, and a subsequent gift bestowed upon entrance into the community.[48]

Kuhn's analysis of the first conception–the spirit as the predestined essence of a human being instilled at creation–consisted of two simultaneous tasks. One was to gather those texts in 1QH which exhibit a coalescence of vocabulary, including "spirit," "task," "to determine," and "to fashion." The other task was to demonstrate the association of these portions of 1QH with 1QS 3–4.

Kuhn located, for example, what he considered a substantial reference to the spirit as the predestined essence of humans granted at their creation in 1QH 7:

> I know that the impulse of every spirit is in your hand,
> [and all] its [task] you have established even before creating him. (7.16–17)
>
> You have fashioned the spirit
> and have organised its task [before the centuries.]
> From you comes the path of every living being. (7.25)[49]

Similar is 1QH 9.8–9:

> You have fashioned every spirit
> and […] and the judgment of all their deeds.[50]

129–30) to rebut Betz by proffering numerous parallels between 1QS 3–4 and 1QH to demonstrate "the essential identification of the 'spirit of truth' with the 'holy spirit' of the hymns." The parallels Foerster cited, however, tend to deal less with the spirit(s) than with other elements of 1QS 3–4 and 1QH, though Foerster contended (127) that the spirit's presence is presupposed in many contexts of 1QH where there is no explicit reference to the spirit.

[48] Heinz-Wolfgang Kuhn, *Enderwartung und gegenwärtiges Heil: Untersuchungen zu den Gemeindeliedern von Qumran mit einem Anhang über Eschatologie und Gegenwart in der Verkündigung Jesu* (SUNT 4; Göttingen: Vandenhoeck & Ruprecht, 1966), 120–39.

[49] Ibid., col. 7, line 25.

[50] H.-W. Kuhn (*Enderwartung*, 124n4) followed the reconstruction: "By which you have determined their task."

Kuhn recognized an impressive agreement in vocabulary amongst these passages and contended that they are conceptually linked to 1QS 3–4. References to the fashioning of every spirit in conjunction with the word, "task," for instance, recall the creation context of 1QS 3–4, particularly 1QS 3.16: "when they come into existence in their fixed times they carry through their task according to his glorious design."[51]

These observations led Kuhn to the conclusion that, while the spirit of a person in the Qumran hymns can represent a person's predestined essence, in most places in which "spirit" occurs in the anthropological sense, this "spirit" is simply, according to its usage in the Hebrew Bible, the natural spirit of a person as understanding, disposition, or mental constitution.[52] But this is, according to Kuhn, only part of the picture. "Next to the characteristic conception of spirit as the predestined essence of a person which was apportioned to him, occurs in the Qumran hymns also the other perception, that the spirit was given as a special divine gift to the pious upon entrance into the community."[53]

For evidence of this second strand of thought, Kuhn once again gathered texts on the basis of characteristic vocabulary. When God is said "to give the spirit to" a believer, this signals, according to Kuhn, entrance into the community. The Teacher, for example, writes:

> And I, the Instructor, have known you, my God,
> through the spirit which you gave in me,
> and I have listened loyally to your wonderful secret
> through your holy spirit. (1QH 20.11–12)

The verb, "to draw near," also signals entry into the community. In 1QS 9.15–16, the prescription for entrance includes this term: "…according to the cleanness of a man's hands he may approach, and upon the author of his insight he may draw near, and thus (establish) his love along with his hatred." Both expressions, the giving of the spirit and drawing near, occur in 1QH 8.19–20:

> I have appeased your face by the spirit which you have placed [in me,]
> to lavish your [kind]nesses on [your] serv[ant] for [ever,]
> to purify me with your holy spirit,
> to bring me near[54] by your will according to the extent of your
> kindnesses.

---

[51] For further evidence Kuhn appealed (*Enderwartung*, 125–26) to the similarities between 1QH 14.11–12 and 1QS 4.24–25.

[52] Ibid., 126.

[53] Ibid., 130.

[54] Literally, "to cause me to draw near."

By isolating two clusters of characteristic terminology and demonstrating that only one of them exhibited affinities with 1QS 3–4, Kuhn strengthened the emerging *consensus communis* that the Dead Sea Scrolls contain a variety of conceptions of the spirit. Betz had demonstrated that the teaching on the two spirits in 1QS 3–4 was measurably different from conceptions of the spirit in the remainder of the Community Rule, in the *Damascus Document*, and in the Qumran Hymns. Kuhn took this perspective a step farther by observing that diversity existed within the corpus of Qumran Hymns. The next step would be taken by P. von Osten-Sacken, who contended that there is diversity even within the teaching of the two spirits in 1QS 3.13–4.26.

Diversity Within 1QS 3–4

Because Osten-Sacken intended to trace the history of dualism in the Qumran community, he naturally dealt extensively with the teaching on the two spirits. He regarded the *War Scroll* (1QM) as the earliest representative of dualism because of its intense eschatological expectation of a final battle and its clear opposition between Israel and the nations. This form of dualism, suggested Osten-Sacken, fits well the situation of the Maccabean Rebellion, when some of the Jews, incensed by the political and religious violations of Antiochus IV Epiphanes, fought for liberation from Seleucid Rule.

The fundamental structure of 1QS 3.20–25, contended Osten-Sacken, is the same as the beliefs in the *War Scroll.* The contrast between the sons of light and darkness, the enmity of the angel of darkness or Belial toward the children of light, the appointed time for the defeat of Belial and his angelic entourage, and God's help in the face of overwhelming opposition are elements which 1QM 1 and 1QS 3.20–25 have in common. Even the name of God, "God of Israel," occurs eleven times in the *War Scroll* and otherwise only in 1QS 3.24.

Although 1QS 3.13–4.14, which contains 3.20–25, reflects this early form of dualism, the teaching of the two spirits actually belongs to a later stage in the development of Qumran dualism than the *War Scroll.* There is a lessening of eschatological and military dualism that would reflect a period of relative political stability; the cosmic battle now is seen from an ethical perspective as the ongoing opposition between good and evil. Dualism was instead associated with creation: "the editor of the teaching, 1QS 3.13–4.14, assimilated alongside the eschatological-dualistic tradition of 1QM an interpretation of an entirely different sort, the creation tradition, with a certain deterministic stamp, which it obtained in the Qumran community."[55] This emphasis upon creation is due to the influence of the Qumran Hymns; Osten-Sacken, like H.-W. Kuhn, observed, for example, the similarity between 1QH 15.21–22–"You have fashioned the spirit and have organized its task"–and 1QS 3.16–"when they come into existence in their fixed times they carry through their task according to his glorious design."[56] In addition to the assimilation of an emphasis upon creation, the editor has also added a predestinarian thread in 1QS 3.17–19, probably, according to Osten-Sacken, due to Iranian (Zoroastrian) influence in a period subsequent to the writing of the *War Scroll.* Therefore, the original eschatological dualism of the *War Scroll* which provides the ground structure of 1QS 3.13–4.14 diminished and was supplemented by a new emphasis upon creation, the ethical contrast of good and evil in the present, and predestination.

If 1QS 3.13–4.14 represents an intermediate stage in the development of Qumran dualism, then 1QS 4.15–26 comprises a still later phase. In this section the anthropological struggle comes to the fore. The battle lines had shifted from the opposition between Israel and the nations (1QM) to the contrast between the sons of light and the sons of darkness, including Jews (1QS 3.13–4.14), to the individual's struggle between righteousness and evil (1QS 4.15–26).

According to Osten-Sacken, then, there are no less than three stages of Qumran thought reflected in 1QS 3.13–4.26. 1QS 3.20–25 reflects most clearly the dualistic origins of Qumran thought akin to the *War Scroll.* 1QS 3.13–4.14 adjusts that dualism for present experience by associating it with creation and predestination. The anthropological emphasis of 1QS 4.15–26 represents a further and subsequent ethicizing of this dualism.

Synthesis

The fissure created by Betz's study was developed in the studies of H.-W. Kuhn and Osten-Sacken into an irreparable fracture. All subsequent studies have been compelled to acknowledge that in the Qumran writings as a whole (Betz), the Qumran Hymns (Kuhn), and 1QS 3–4 (Osten-Sacken) multiple conceptions of God's spirit(s) were permitted to coexist.

---

[55] von der Osten-Sacken, *Gott und Belial,* 130.

[56] Ibid., 129.

The burden of proof now rests upon scholars who identify the spirit of truth, from 1QS 3–4, with the holy spirit of the Qumran Hymns.

CONCLUSION

An extravagant amount of attention has been paid during the first half-century of scholarship to the question of the two spirits in Qumran theology. This level of interest is hardly inappropriate in light of the importance of 1QS 3–4 for ascertaining conceptions of the spirit, perceptions of predestination, and descriptions of dualism in formative Judaism and nascent Christianity. Despite the erudition displayed in these studies, the first 50 years of research have yielded a bewildering lack of consensus concerning the two significant issues which have been the foci of this essay.

There exists still meager consensus concerning the fundamental questions that attend this pivotal passage in the scrolls. The question of Iranian influence continues to be debated, though with less intensity than in earlier years. Recently, M. Philolenko has resurrected the argument for Iranian influence in a study that argues not only for Iranian influence in general but for Zurvanite influence in particular. According to Philolenko, a Zurvanite origin of this teaching, as well as parallel conceptions in the Visions of Amram, is evident in the combination of dualism with a threefold schema of history–past, present, and eschatological future. Zurvanite conceptions are evident as well in the mélange of good and evil, light and darkness within human beings, that is, in the varying levels at which truth and perversity exist in humans. Belief in this mélange is discernible as well in the Horoscopes that have been preserved among the Dead Sea Scrolls. Although Philolenko does not, in my opinion, introduce new evidence into the debate, he does provide a characteristically competent and reliable discussion of the question of Iranian influence. More salutary about this study perhaps is the thoroughness with which he traces the alleged influence of Qumran dualism in other Jewish and Christian texts, including *2 Baruch* (according to a citation of Cyprian), Philo Judaeus, the Fourth Gospel, Lactantias, and others.[57]

---

[57] Marc Philolenko, "La doctrine qoumrânienne des deux Esprits: Ses origines iraniennes et ses prolongements dans le judaïsme essénien et le christianisme antique," in *Apocalyptique Iranienne et Dualisme Qoumrânien* (ed. G. Widengren, A. Hultgard, and M. Philolenko; *Recherches Intertestamentaires* 2; Paris: Andrien Maisonneuve, 1995), 163–211.

No more consensus is apparent with respect to the question of the cosmic or psychological dimensions of the two spirits. The present impasse concerning the nature of the two spirits reflects the more general question of how to negotiate the relationship between the environment of Antiquity (K. G. Kuhn and Dupont-Sommer on Zoroastrianism), the texts themselves (Wernberg-Møller's internal grounds), and Qumran's biblical foreground (Seitz's analysis of the interpretation of 1 Samuel 16:14). Our hurried passage, moreover, through the studies of Otzen, Schweizer, Leaney, Gammie, Lichtenberger, and Sekki revealed the dismaying variety of rationales, which exist to support a putative correspondence between the cosmic and psychological dimensions.

Nor has a coherent theological exposé of unity and diversity vis-à-vis the spirit and the two spirits appeared as a worthy sequel to the pioneering study of O. Betz. This impressive half century of scholarship has, therefore, set the terms of the debate without ultimately resolving the issues to which it has so keenly and adeptly drawn attention.[58]

---

[58] Most recently, Jean Duhaime ("Les voies des deux Esprits (*1QS* iv 2–14): une analyse structurelle," *RevQ* 19 [2000]: 349–67) has employed the structuralist approach of Marc Girard to undertake an intricate analysis of this passage, with particular attention paid to the role of repetition and transitional phrases. This detailed study, in which Duhaime delves into the most minute of literary details, provides an excellent exposé of each main section (3.15b–4.1; 4.2–14; 4.15–26) and subsection of this passage; it is not an attempt to address the questions that have tended to preoccupy students of this passage.

CHAPTER NINE

DUALISM IN THE ESSENE COMMUNITIES

Elisha Qimron

A. INTRODUCTION: DUALISM AT QUMRAN

Typical of the Dead Sea Scrolls is the dualistic division of mankind into righteous and wicked. The former share the lot of God, while the latter are consigned to Belial (or Mastema). This concept is explicitly stated in e.g., 1QS 3.20–25:

כול ביד שר אורים ממשלת בני צדק ובדרכי אור יתהלכו וביד
מלאך חושך כול ממשלת
בני עול ובדרכי חושך יתהלכו ... ואל ישראל ומלאך אמתו
עזר לכול בני אור.

> All the righteous ones are ruled by the Angel of Light and walk in the ways of light, while all the wicked ones are ruled by the Angel of Darkness and walk in the ways of darkness…But the God of Israel and His Angel of Truth will help all the sons of light.

Only those who observe the commandments of God are considered righteous. Since the community alone knows the exact way of performing these commandments, only those who join it will survive, while the others will be annihilated. Those who join the community are considered as belonging to God and protected by Him (and His angels), while those who do not are consigned to Belial (or Mastema). The former will be saved, while the latter will be annihilated (on the Day of Judgment). Entering the covenant of the community means joining the lot of God. Those who enter the covenant commit themselves to God's commandments. As soon as one takes the oath obliging him to follow God's commandments, he is no longer under the control of Belial (or Mastema). This covenant is mutual. God is obliged to protect the covenanter from Belial (and thus from annihilation) as long as the latter keeps his obligation to follow the Divine commandments, as we find in CD 16.4–6:

וביום אשר יקים האיש על נפשו לשוב אל תורת משה יסור מלאך
המשטמה מאחריו אם
יקים את דבריו על כן נימול אברהם ביום דעתו:[1]

> And when a man swears to return to the Law of Moses, the angel of persecution will leave him alone, provided that he keeps his obligation. Therefore, Abraham circumcised himself on the day that the law became known to him.

The idea that each individual belongs either to the lot of God or to the lot of Belial is frequently found in the Dead Sea Scrolls and has been discussed by some of the finest scholars. Yet, most of these discussions have ignored the practical aspect of the idea. For example, the connection between this idea and the covenant with God has not always been clearly indicated. Several passages imply that a person belongs to the lot of God as long as he does not violate his obligation to observe God's commandments. Evidently, those who intentionally transgress are expelled from the community of God[2] and consequently are consigned to Belial. Thus, practical procedures were needed in order to decide who should be expelled and who could rightfully remain in the community. In principle, only those who intentionally transgressed would be expelled, while those who did so unintentionally would remain. Yet, this distinction was difficult to put into practice and bothered the legislators of the community.

It should be emphasized that no one who rebels against God (namely against His commandments) can remain in the community. There is a sense of mutual responsibility in the community (which is symbolized by the sharing of the property and the common meals). Of course, the community cannot be responsible for intentional transgressions committed surreptitiously. The oath by the Holy Name, taken by those who first join the community in the annual ceremony, is aimed to put the responsibility in such cases on the transgressor alone. This is inferred from CD 15.12–13:

וכאשר יקים עליו לשוב אל תורת משה כל לב ובכל נפש נקיאים
הם ממנו אם ימעל

> And when one imposes upon himself an oath to turn back to observe the Law of Moses with all (his) heart and all (his) soul, the Community's members are not responsible any more for his sins.[3]

---

[1] The covenant is compared here to Abraham's circumcision, which protected him from Belial.

[2] See 4Q266 (*Damascus Document Fragments*) 11.5–18.

[3] The verb מעל should be taken here in its original meaning "to cover," cf. the noun מְעִיל. This meaning of the root is found in several biblical passages, e.g., Num

B. DUALISM AND THE DAY OF JUDGMENT

Surely, God knows who is righteous and who is wicked; and on the Day of Judgement, He will annihilate all the evildoers. He has, however, not revealed this secret to any human being. How could the community ensure that no evildoers be within it? As said above, all those who intentionally and openly transgressed were expelled and all the others remained within. Were there no dubious cases? This simple question has never been asked. *Prima facie* evidence of dubious cases would surely contradict the assumed dualistic approach. Is it not more reasonable to assume that in human decision, there may be cases of doubt? Two passages in the Dead Sea Scrolls do indeed deal with doubtful cases. Both, however, were totally misinterpreted, because of the ignorance of the practical aspect, the misreading of one of these texts and as a result of the assumed dualism bias discussed above.

These texts deal with a group who entered the community, yet retained some of their old perverse ways with regard to the performance of the Torah commandments. Since these men were neither purely righteous nor purely wicked, it was impossible to decide whether or not they should be expelled from the community and consigned to Belial. Benefiting from the doubt, it was determined that they would remain in the community until Elijah arises on the Day of Judgment and decides in each case. They were, however, not allowed to partake in the common property symbolizing the mutual responsibility and common fate. Let us discuss these two passages. The first one is 1QS 9.5–11:

בעת ההיא יבדילו אנשי היחד בית קודש[...]והון אנשי הקודש
ההולכים בתמים
דרך אל יתערב הונם עם הון אנשי הרמיה אשר לוא הזכו
דרכם להבדל מעול
וללכת בתמים דרך ומכול עצת התורה לוא יצאו ללכת
בכול שרירות לבם
ונשפטו במשפטים הרשונים אשר החלו אנשי היחד לתיסר בם עד
בוא נביא ומשיחי אהרון וישראל

The prevailing interpretation of this passage may be exemplified by the translation of Geza Vermes:

5:5–7, 13, Josh 7:1. Note also אם במרד ואם במעל Josh 22:22. Also see Jehuda L. Palache, *Semantic Notes on the Hebrew Lexicon* (Leiden: Brill, 1959), 10–12, 45 (I am indebted to my friend Chaim Cohen for this reference).

> At that time, the men of the Community shall set apart a House of Holiness…As for the property of the men of holiness who walk in perfection, it shall not be merged with that of the men of falsehood who have not purified their life by separating themselves from iniquity and walking in the way of perfection. *They shall depart from none of the counsels of the Law to walk in the stubbornness of their heart* but shall be ruled by the primitive precepts in which the men of the community were first instructed until there shall come the Prophet and the Messiahs of Aaron and Israel

I argue that this interpretation of the underlined sentence is linguistically and contextually impossible.

In my opinion, the dependent clause following אנשי הרמיה should be understood as a definition of this phrase, namely:

אשר לוא הזכו דרכם להבדל מעול וללכת בתמים
דרך ומכול עצת התורה לא יצאו ללכת בכול שרירות לבם

> "Who have not (totally) refined their (old perverse) conduct by separating themselves from iniquity and walking in the way of perfection; but (on the other hand) have not gone astray from all the (obligations of the) Community of the Torah by following their own (perverse) will."

Thus, this dependent clause defines the אנשי הרמיה as neither righteous nor rebels.

The numerous difficulties in the prevailing interpretation are quite apparent:

1. The syntax is irregular: prohibitions in the DSS begin with the negated predicate rather than with the object. Such a prohibition would have been formulated as follows:

   אל יצאו [אנשי הקודש] מכול עצת התורה ללכת בכול שרירות לבם
2. The "men perfect in holiness" have already been defined as "walking in perfection"; there is logically no point in prohibiting those who walk in perfection from following their own (perverse) will (ללכת בשרירות לבם).
3. According to the prevailing interpretation, the sentence beginning הרשונים ונשפטו במשפטים is meaningless. It can hardly refer either to the righteous or to the wicked.
4. The reason for mentioning the prophet (Elijah) is also totally unclear according to the prevailing interpretation.
5. The mentioning of the sharing of property also has no meaningful purpose according to the prevailing interpretation.

The second passage is CD 20.20–25 (according to my reading):[4]

---

[4] See Magen Broshi, ed., *The Damascus Document Reconsidered* (Jerusalem: Israel Exploration Society, Shrine of the Book, Israel Museum, 1992), 47.

ושבתם וראיתם בין צדיק ורשע בין עבד אל לאשר לא עבדו ועשה
חסד [...] לאהביו
ולשמריו לאלף דור [...] בית פלג אשר יצאו מעיר הקדש וישענו
על אל בקץ מעל
ישראל ויטמאו את המקדש ושבו עוד אל דרך העם בדברים מעט
[...]לם איש לפי רוחו ישפטו בעצת הקדש:

> Then you will distinguish once more between the just and the wicked, between one who has served God and one who has not served Him" (Mal 3:18). "And He will show mercy to thousands to those who love Him and observe (His commandments) for a thousand generations" (Exod 20:6, Deut 5:10, 7:9). (These verses refer to) the mixed group who left the Holy City. They trust in God during the time when the Israelites sinned and contaminated the Temple. They, however, returned to the (wrong) way of the (rest of) the people in some respects. Each of them shall be judged within the Holy Community according to his own virtue.

This passage is part of a much longer discussion of the observance of the covenant. In particular, the longer passage concerns the lot of those who observe God's commandments, and that of those who do not, namely, the rebels.

The relationship between the passage of 1QS and that of CD is obvious:

1. Both concern a group within the Community which observes some of the wrong practices of the opponents of the Community–cf. ושבו עוד אל דרך העם בדברים מעט in CD and יצאו ללכת בכול שרירות לבם אשר לוא הזכו דרכם להבדל מעול וללכת בתמים דרך ומכול עצת התורה לוא in 1QS. Note the word דרך in both passages and the equivalents ומכול and בדברים מעט. Note also the repetition of מכול in 1QS.
2. Both say that these people should be judged within the Community–cf. רוחו ישפטו בעצת הקדש איש לפי and ונשפטו במשפטים הרשונים אשר החלו אנשי היחד לתיסר בם in 1QS.
3. Both postpone the decision of the lot of these people to the Day of Judgment mentioned at the end of the Book of Malachi–CD cites the relevant passage in this book, while 1QS refers to (the) Prophet, which commentators have identified with Elijah mentioned at the end of the Book of Malachi. From other sources, we learn that when Elijah appears, he will make a final determination for the solution of problems which are evenly balanced.[5]

---

[5] Menahem Kister reminded me that the expression עד בוא נביא occurs in 1 Macc 4:46 with regard to the contaminated stones of the altar (being both holy and contaminated). Therefore, only when Elijah appears will their status be finally determined.

Finally, one should note that both of the expressions in the 1QS passage, denoting the sharing of the common fate on the one hand and the rebellion against God on the other, are also found in the long discussion of CD preceding the passage under discussion: אל יאות עמו בהון ובעבודה 19.7 and וילכו בשרירות לבם 9–10. (Note also the mentioning of the Messiahs in 19.1.)

C. Jurisprudence Within the Community

In order to establish my interpretation of the passage in 1QS, I must deal with the various usages of the רמיה (אנשי) and בית פלג in the Dead Sea Scrolls.

The first term occurs in a juridical context in 1QS 8.21–24:

כול איש מהמה אשר יעבר דבר מתורת מושה ביד רמה או ברמיה
ישלחהו מעצת היחד
ולוא ישוב עוד: ולוא יתערב איש מאנשי הקודש בהונו ועם עצתו
לכול דבר: ואם בשגגה
יעשה והובדל מן הטהרה ומן העצה ודרשו המשפט אשר לוא
ישפוט איש ולוא ישאל על
כול עצה שנתים ימים

> Every man among them who deliberately or through negligence transgresses any precept of the Law of Moses, shall be expelled from the Council of the Community and shall never again return. No one among the men of holiness shall be associated in his property or his counsel in any way whatsoever. But if he has acted inadvertently, he shall be excluded from the Meal and from the Council and they shall interpret the rule (as follows): for two years he shall take no part in judgment or be asked for advice on any matter.

Surely, this text bears on the passage under discussion. It too deals with three kinds of transgressions: intentional transgressions, unintentional transgressions, and transgressions by רמיה. Vermes translates ברמיה here: "through negligence." This understanding is very appealing and philologically suits my interpretation of אנשי הרמיה in 1QS 9. Yet here transgressors through negligence are excluded from the congregation, while in 1QS 9 they are not. How can one explain this apparent contradiction?

I hereby suggest the following solution: each of these two passages deals with different kinds of commandments. Column 8 apparently deals with the commandments of the Torah that are not controversial;

while col. 9 deals with controversial commandments involving specific groups that joined the congregation, but retained some of their old practices (as is explicitly stated in the passage from CD and implied in 1QS 9 [ומכול עצת התורה לוא יצאן]).

Such juridical distinction is also found both in rabbinic sources and elsewhere in the Dead Sea Scrolls. For the former, cf. דבר שהצדוקים מודים בו "an obvious case which, even for the Sadducees, would be noncontroversial (*b. Sanh.* 33b); for the latter, cf. CD 15.13–14:

> וכל אשר נגלה מן התורה לרוב המחנה והוא שגה בו יו[דיעהו]
> המבקר אותו צוה עליו
> ויל[מד] עד שנה תמימה ולפי דעתו <יקרב>...........

> If one errs in any matter of the Law which is obvious to the members of the congregation, the Overseer shall explain the matter to him and instruct him to learn (the laws) for up to one full year. As soon as the Law becomes known to him, he shall be admitted.

If my analysis of these passages is correct, it enables us to establish degrees of liability in the Scrolls. There is a clear distinction between intentional and unintentional transgressors of God's commandments. For the former, the punishment is permanent expulsion from the community; while for the latter, the punishment may be temporary exclusion for a short period. A third category is careless transgression, The degree of liability in this case depends upon whether or not the law is controversial.

Careless transgressors of non-controversial commandments were given the same punishment as intentional transgressors, namely expulsion from the community. Careless transgressors of controversial commandments were neither expelled nor regarded as full partners with the rest of the community.

Linguistically, the meaning "careless" for the verb רמי is similar to the meaning of Akkadian *ramû* A and its usage in this passage may be compared to its meaning in several Biblical and Dead Sea Scrolls passages;[6] e.g., קשת רמיה "slack bow" = Akkadian *qastu ramītu*; יתרמה 1QS 7.6 "acts neglectfully" has an Akkadian parallel: *urtammiʾū* "they have neglected"; both the Hebrew and the Akkadian verbs are used in legal contexts.[7]

---

[6] See Samuel J. Fuenn, האוצר, *A Dictionary of the Language of the Bible and the Mishnah* (Warsaw: Aḥiʾasaf, 1924), 422 [Hebrew]; Israel Ephal, "הערות לקסיקאליות על כמה מונחי צבא קדומים," *ErIsr* (Yigael Yadin Memorial Volume) 20 (1989): 115–19. Jonah Ibn Janah, *The Book of Hebrew Roots* (Oxford: Clarendon, 1875), 481; *CAD* R:127. The English term *lax* also has both of these connotations: "loose," with regard to objects (like a bow) and "careless," with regard to human conduct.

[7] See *CAD* R:131. I am in debt to my friend Chaim Cohen for the Akkadian source.

The exact meaning of רמיה in other passages in the Dead Sea Scrolls is beyond the scope of this article. In fact, when it refers to the opponents it may have another connotation.[8] In the passage under discussion, it refers to a group within the sect and is clearly defined.

The term בית פלג occurs only twice in the Dead Sea Scrolls. In the passage under discussion, it is well defined. The second occurrence is in Pesher Nahum:

[פוט ולובים היו בעזרתך] פשרו הם רשע[י עד]ה בית פלג הנלוים
על מנשה

> Put and Libyans were your helpers. This refers to the wicked within the Congregation, the mixed group who joined Manasseh. (4Q169 4.1)

I have restored רשע[י עד]ה assuming that the pesher mentions a group within the community that follows some of the Sadducean practices. The word פלג would then mean "mixed" as in biblical Aramaic (Dan 2:41).

---

[8] Yet, it can mean "careless individuals" even in reference to the opponents.

CHAPTER TEN

THE QUMRAN CONCEPT OF TIME[1]

Henry W. Morisada Rietz

The concept of "time" provides us with a heuristic category to coordinate several different aspects of the Qumran community's thought and theology. These aspects include the calendar, halakot, predetermination of history, cosmology, angelology, and the "latter days" (so-called eschatology).

Scholars have long recognized that the collection of documents found in eleven caves near Khirbet Qumran constitute a sort of "library" of the community whose ruins are adjacent to the caves.[2] The significance of the collection being a "library" is the recognition that the documents represented are from a variety of sources. Thus, in order to study the Qumran community, it is necessary to identify documents that were composed by the community, i.e., the "sectarian" Dead Sea Scrolls.[3] The most reliable indicator of Qumran authorship is the distinctive use of certain technical terms.[4] The sectarian Dead Sea Scrolls include the *Rule of the*

---

[1] I adapted and subsequently developed portions of this paper in my dissertation, "Collapsing of the Heavens and the Earth: Conceptions of time in the sectarian Dead Sea Scrolls" (Ph.D. dissertation, Princeton Theological Seminary, 2000). I greatly appreciate the guidance provided by the members of my committee, Dennis T. Olson, Donald H. Juel, and initially Brian K. Blount, and especially, James H. Charlesworth, who chaired the committee. For a fuller discussion, see my *Time in the Sectarian Dead Sea Scrolls* (WUNT II; Tübingen: Mohr Siebeck, [forthcoming]).

[2] The association between the manuscripts, the caves and the ruins is well supported. See the classic work by Roland de Vaux, *Archaeology and the Dead Sea Scrolls* (Schweich Lectures 1959; rev. ed.; Oxford: Oxford University Press, 1973), 53–57. More recently, see Jodi Magness, *The Archaeology of Qumran and the Dead Sea Scrolls* (Grand Rapids: Eerdmans, 2002), esp. 43–44. The few proposals that seek to separate the connection between the ruins and the manuscripts are not persuasive; e.g., Norman Golb who disassociates the scrolls from the ruins at Qumran and suggests that they are the remains of the Jerusalem temple's library, which was hidden in the caves during the first revolt (Norman Golb, "Who Hid the Dead Sea Scrolls?" *BA* 48 [1985]: 68–82; and *Who Wrote the Dead Sea Scrolls? The Search for the Secret of Qumran* [New York: Scribners, 1995], 3–171).

[3] The word sectarian is used in mutually exclusive ways by various scholars. In this paper, it denotes documents composed or edited by the Qumran Community.

[4] For example, the classic but dated work of Friedrich Nötscher, *Zur theologischen Terminologie der Qumran Texte* (Bonn: Peter Hanstein, 1956). Devorah Dimant provides

Community, the *Rule of the Congregation*, the *War Scroll*, the *Thanksgiving Hymns*, *Some Works of the Torah*, the *Damascus Document*, the *Pesharim*, *Wicked and Holy* (4Q180 and 4Q181), and the *Angelic Liturgy*.[5]

In addition to the sectarian documents, there is another category of documents which can be identified as the "traditions" used by the community. An initial indication of the documents that functioned as the community's traditions is found in the number of copies of manuscripts that were found.[6] In addition to the existence of multiple copies, the traditional function of a document may be indicated by the provenience of the manuscript copies, i.e., whether a manuscript was copied by a member of the community.[7] By indicating which manuscripts were copied at Qumran, this criterion provides more evidence for determining which documents, though composed elsewhere, were valued by the community and thus served as traditions for the community. There are other more explicit clues that a document functioned as an authoritative source of traditions for the community. These involve positive references, allusions, and quotations in the sectarian documents. In addition to the biblical traditions, the most important traditions inherited by the Qumran community for this discussion include *First Enoch*[8] and *Jubilees*.[9]

---

a useful attempt using this criterion to distinguish the Qumran Community's documents from the rest of the Dead Sea Scrolls. For a fuller discussion of the criterion of technical terminology, see my essay, "Identifying Compositions and Traditions of the Qumran Community: *Songs of the Sabbath Sacrifice*, a Case Study," in *Qumran Studies* (ed. M. T. Davis and B. A. Strawn; Grand Rapids: Eerdmans, forthcoming).

[5] Carol A. Newsom in her *editio princeps* (*Songs of the Sabbath Sacrifice: A Critical Edition* [HSS 27; Atlanta: Scholars Press, 1985]). Newsom, however, has argued for a pre-Qumran provenience in her later publications ("'Sectually Explicit' Literature from Qumran," in *The Hebrew Bible and Its Interpreters* [ed. W. H. Propp, B. Halpern, and D. N. Freedman; BJSUCSD 1; Winona Lake, IN: Eisenbrauns, 1990], 167–87, esp. 179–85; "Angelic Liturgy: Songs of the Sabbath Sacrifice (4Q400–4Q407, 11Q17, Mas1k)," in *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations. Vol. 4B, Angelic Liturgy: Songs of the Sabbath Sacrifice* (ed. J. H. Charlesworth and C. A. Newsom; PTS-DSSP 4B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1999), 4–5). I argue, however, that the *Angelic Liturgy* (also called *Songs of the Sabbath Sacrifice* or *Sabbath Songs*) is probably a sectarian document ("Identifying Compositions and Traditions of the Qumran Community").

[6] See also Carol Newsom, who counts the nonbiblical manuscripts, which occur in multiple copies, and concludes, "What appears from this simple count is that most of the nonbiblical texts that exist in two or more copies and the great majority of those found in more than one of the caves are either products of the Qumran community or are closely related to central aspects of its theology and praxis" (idem, "'Sectually Explicit' Literature from Qumran," esp. 169–171; quotation from 171).

[7] See discussion in "Identifying Compositions and Traditions of the Qumran Community."

[8] The traditional character of the Enoch material is indicated by a variety of evidence, including the number of manuscripts found at Qumran (4Q201–202, 4Q204–212).

CALENDAR AND HALAKOT

Soon after the discovery of the first Dead Sea Scrolls, it was recognized that the calendar followed by the Qumran community differed from the 354-day lunar calendar followed by the establishment in the Temple.[10] Annie Jaubert, following the suggestion of Dominique Barthélemy, identified the community's calendar as the 364-day solar calendar known earlier from *First Enoch* 72–82 and *Jubilees*.[11] This identification is supported by the presence of calendrical documents reflecting the 364-day calendar.[12] While some of these calendrical documents may have been composed by

---

Influence of the story of the Watchers, which the Enochic material develops from Gen 6:1–4, are found in the *Damascus Document* (e.g., CD MS A 2.17–21) and the *Wicked and Holy* (4Q180 and possibly 4Q181).

[9] That *Jubilees* was a tradition of the Qumran Community is indicated by abundant evidence; see my essay, "Synchronizing Worship: Jubilees as a Tradition for the Qumran Community," in *Enoch and Qumran Origins: New Light on a Forgotten Connection* (ed. G. Boccaccini, with J. H. Ellens, and J. Waddell; Grand Rapids: Eerdmans, 2005), 111–18.

[10] For a review of the scholarship, see James VanderKam, "Calendrical Texts and the Origins of the Dead Sea Community," in *Methods of Investigation of the Dead Sea Scrolls and the Khirbet Qumran Site: Present Realities and Future Prospects* (ed. M. O. Wise et al.; Annals of the New York Academy of Sciences 722; New York: The New York Academy of Sciences, 1994), 371–88.

Ses origines bibliques," *VT* 3 (1953): 250–64; "Le calendrier de Jubilés et les jours liturgiques de la semaine," *VT* 7 (1957): 35–61; *The Date of the Last Supper* (trans. I. Rafferty; Staten Island, NY: Alba House, 1965); ET of *La Date de la Cène. Calendrier biblique et liturgie chrétienne* (Etudes bibliques; Paris: Gabalda, 1957). See also, James C. VanderKam, "The Origin, Character, and Early History of the 364-Day Calendar: A Reassessment of Jaubert's Hypotheses," *CBQ* 41 (1979): 390–411.

[12] Jozef T. Milik, *Ten Years of Discovery in the Wilderness of Judaea* (trans. J. Strugnell; SBT 26; London: SCM Press; Naperville, IL: Allenson, 1959), 107–9. These calendrical documents include 4Q322–324 and 4Q324^{a-c} (Michael O. Wise, "*Primo Annales Fuere*: An Annalistic Calendar from Qumran," in *Thunder in Gemini: And Other Essays on the History, Language and Literature of Second Temple Palestine* [JSPSup 15; Sheffield: Sheffield Academic Press, 1994], 186–239), and *An Aramaic Brontologion* 4Q318 (Michael O. Wise, "Thunder in Gemini: An Aramaic Brontologion [4Q318] from Qumran," in *Thunder in Gemini: And Other Essays on the History, Language and Literature of Second Temple Palestine* [JSPSup 15; Sheffield: Sheffield Academic Press, 1994], 13–50). Also significant is the prose composition at the end of 11Q5 (11QPs^{a} 27.2–11), which lists "David's Compositions," including "a song to sing before the altar over the whole-burnt offering for each day and (every) day for all the days of the year, four and sixty and three hundred (לכול ימי השנה ארבעה וששים ושלוש)." See James A. Sanders, "David's Compositions," in *The Psalms Scroll of Qumran Cave 11 (11QPs*^{a}) (DJD 4; Oxford: Clarendon, 1965), 91–93, and pl. 17; idem, *The Dead*

the community, their provenience is difficult to establish because these documents do not typically use the technical terms of the community.[13] Significantly, however, a calendar begins one extant copy of *Some Works of the Torah*,[14] and another calendar may have been part of one manuscript

---

Sea Psalms Scroll (Ithaca: Cornell University Press, 1967), 134–37; "David's Compositions," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations. Vol. 4A, Pseudepigraphic and Non-Masoretic Psalms and Prayers* (ed. J. H. Charlesworth; PTS-DSSP 4A; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1998), 213–15). Both Michael Chyutin and Peter W. Flint suggest that the 364-day calendar shaped the structure of the Psalter preserved by 11Q5 (Michael Chyutin, "The Redaction of the Qumranic and the Traditional Book of Psalms as a Calendar" *RevQ* 16 [1994]: 367–95; and Peter W. Flint, *The Dead Sea Psalms Scrolls and the Book of Psalms* [*STDJ* 17; Leiden: Brill, 1997], 182–93).

[13] Wise notes that 4Q324^c is written in Cryptic Script A ("*Primo Annales Fuere*: An Annalistic Calendar from Qumran," 188). It has been suggested that the Cryptic Scripts indicate Qumran provenience for the manuscript.

[14] 4Q394 frags. 1–2, 3–7 col. 1; see James H. Charlesworth, ed., in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 3, Damascus Document Fragments, Some Works of the Torah, and Related Documents* (ed. J. H. Charlesworth; PTSDSSP 3; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2005). One of the controversial aspects of *Some Works of the Torah* (4Q394-399) is the possible presence and significance of a calendrical text. In their reconstruction of *Some Works of the Torah*, Elisha Qimron and John Strugnell (*Qumran Cave 4.V: Miqsat Maᶜase ha-Torah* [DJD 10; Oxford: Clarendon, 1994]) originally associated a calendrical text (the Composite Text section A) with the beginning of the document. This calendrical text lists Sabbaths and festivals, coordinating them with the specific day of the month. Such coordination is only possible from the 364-day solar calendar. Qimron and Strugnell provided 4Q394 frags. 1–2 as some of the manuscript evidence for this reconstruction. However, the identification of what Qimron and Strugnell call 4Q394 frags. 1–2 as part of the same manuscript of the rest of the fragments of 4Q394 has been called into question. 4Q394 frags. 1–2 were previously designated as a separate document, 4Q327, and James C. VanderKam argues that they represent a different manuscript than 4Q394 ("The Calendar, 4Q327, and 4Q394," in *Legal Texts and Legal Issues: Proceedings of the Second Meeting of the International Organization for Qumran Studies, Cambridge 1995 Published in Honour of Joseph M. Baumgarten* [ed. M. Bernstein, F. García Martínez, and J. Kampen; *STDJ* 23; Leiden: Brill, 1997], 179–94). VanderKam, who builds on the arguments of Florentino García Martínez, lists several problems with identifying 4Q394 frags. 1–2 as part of the same manuscript of the rest of 4Q394 (cf. García Martínez, "Dos notas sobre *4QMMT*," *RevQ* 16 [1993]: 293–97; Florentino García Martínez's arguments are addressed to the edition of 4Q394–399 published by Robert H. Eisenman and Michael O. Wise, *The Dead Sea Scrolls Uncovered: The First Complete Translation and Interpretation of 50 Key Documents Withheld for Over 35 Years* [Rockport, MA: Element, 1992]). First, concerning the arrangement of the text, the physical manuscript of 4Q394 frags. 1–2 is much shorter than that of frags. 7–9; the columns of frags. 1–2 are only one or two words long in contrast to the rest of 4Q394; the letters are shorter and the lines tend to be closer together than on the other fragments of 4Q394 (VanderKam, "The Calendar, 4Q327, and 4Q394," 184–85; see also García Martínez, "Dos notas sobre *4QMMT*," 294). Second, the scripts of fragments 1–2 are palaeographically different from the rest of 4Q394 (VanderKam, "The Calendar, 4Q327, and 4Q394," 185–87). Third, VanderKam points out that while frags. 1–2 and the rest of 4Q394 use final *mems* in medial positions, only the rest of 4Q394 use medial *mems* in final

of the *Rule of the Community*.[15] Moreover, the *Angelic Liturgy*, which was at least redacted and recited by the Qumran community, is structured on

---

position and final *mems* in the first position. Thus, the material Qimron and Strugnell have identified as 4Q394 frags. 1–2 are probably from a different manuscript than the rest of the fragments of 4Q394 and therefore are more correctly designated 4Q327.

Although the material preserved in 4Q327 (a.k.a. 4Q394 frags. 1–2) does not provide evidence for a calendar at the beginning of *Some Works of the Torah*, such evidence is provided by 4Q394 frags. 3a–4. 4Q394 frags. 3a–4, col. 1, preserves the end of the calendar and the beginning of section B, clearly on the same manuscript. The last line of the calendar, line 3, is *vacat* with the exception of a single inscribed word, "day(s)" (יום), at the beginning. The next line, line 4, preserves the beginning of section B; the *vacat* at the end of line 3 indicates a new section (4Q394 frags. 3a–4; see Qimron and Strugnell, *Miqsat Ma^{c}ase ha-Torah* [DJD 10], pl. 2). According to Qimron, the association of 4Q394 frags. 1–2 with the rest of 4Q394 is based on the palaeographic similarities, although he notes some differences, and similarities in subject matter with frags. 3a–4, lines 1–3 (ibid., 201). Schiffman questions the association of frags. 1–2 with the rest of 4Q394 because of the unusual single word column length (Lawrence H. Schiffman, "The Place of 4QMMT in the Corpus of Qumran Manuscripts," in *Reading 4QMMT* [ed. J. Kampen and M. Bernstein; SBL Symposium Series 2; Atlanta: Scholars Press, 1996], 82). While Schiffman may be correct, the contiguous material connecting the calendar in frags. 3a–4, lines 1–3, with section B beginning in line 4, establishes that a calendrical text stood at the beginning of 4Q394, as Schiffman acknowledges (in *Reading 4QMMT*, 82–83). The only other manuscript witness to the beginning of section B is 4Q395 frag. 1. Strugnell suggests that the extant blank leather to the right of the inscribed area probably indicates the beginning of the manuscript and thus, that the calendar was not at the beginning of this manuscript (Strugnell, "MMT: Second Thoughts on a Forthcoming Edition," The Community of the Renewed Covenant: *The Notre Dame Symposium on the Dead Sea Scrolls* [ed. E. C. Ulrich and J. C. VanderKam; Christianity and Judaism in Antiquity series 10; Notre Dame, IN: University of Notre Dame Press, 1994]), 61; see *Miqsat Ma^{c}ase ha-Torah* [DJD 10], pl. 3). VanderKam, however, cautions against following Strugnell's suggestion. VanderKam points out that since we only have one column extant on 4Q395 we do not know how wide were the spaces between columns on that manuscript and that the space extant to the right of 4Q395 is comparable to the space between columns on 4Q394 (VanderKam, "The Calendar, 4Q327, and 4Q394," 184). While it is possible that a calendrical text existed on other manuscripts of *Some Works of the Torah*, there is no manuscript evidence extant. Thus, the presence of a calendar at the beginning of *Some Works of the Torah* may be idiosyncratic to 4Q394. Nevertheless, its presence on 4Q394 attests to a 364-day calendar at the beginning of one manuscript copy of *Some Works of the Torah.*

[15] 4Q319 and 4Q259. See Uwe Glessmer, "Investigation of the Otot-text (4Q319) and Questions about Methodology," in *Methods of Investigation of the Dead Sea Scrolls and Khirbet Qumran Site: Present Realities and Future Prospects* (ed. M. O. Wise et al.; Annals of the New York Academy of Sciences 722; New York: New York Academy of Sciences, 1994), 429–40; Uwe Glessmer, "The Otot-Texts (4Q319) and the Problem of Intercalations in the Context of the 364-Day Calendar," in *Qumranstudien: Vorträge und Beiträge der Teilnehmer des Qumranseminars auf dem internationalen Treffen der Society of Biblical Literature, Münster, 25.–26. Juli 1993* (ed. H.-J. Fabry, A. Lange, and H. Lichtenberger; Göttingen: Vanderhoeck and Ruprecht, 1996), 125–64; Sarianna Metso, "The Primary Results of the Reconstruction of 4QS^{e}," *LLS* 44 (1993): 303–8; idem, *The Textual Development of the Qumran Community Rule* (*STDJ* 21; Leiden: Brill, 1997), 48–51.

the 364-day calendar.[16] In addition, the *War Scroll* attests to twenty-six priestly "courses" (משמרות; 1QM 2.1–2) reflecting a 364-day calendar, rather than the twenty-four of the 354-day lunar calendar.[17] On the basis of this evidence one is able to establish that the 364-day calendar was followed by the members of the community.

The 364-day calendar has several interesting features. The number 364 is a multiple of 7, the number of days in a week; that is, 364 divided by 7 equals exactly 52, the number of weeks in a year. Therefore, any particular date of the year would fall on the same day of the week every year. Thus, for example, the first day of the year always fell on the same day of the week. The followers of this calendar reckoned the first day of every year on the fourth day of the week (Wednesday), the day according to Genesis when God created the celestial lights as the calendrical markers:

> And God said, "Let there be lights in the firmament of the heavens to separate the day from the night; and let them[18] be for signs and for appointed times (ולמועדים) and for days and years, and let there be lights in the firmament of the heavens to give light upon the earth." And it was so. And God made two great lights–the greater light to have dominion over (לממשלת) the day and the lesser light to have dominion over (לממשלת) the night,–and the stars. And God set them in the firmament of the heavens to give light upon the earth and to have dominion (ולמשל) over the day and the night and to separate between the light and the darkness. And

---

[16] Introducing each *Sabbath Song* is a formula, which associates the *Song* with a specific Sabbath of the first quarter of the year as well as the day of the month on which that Sabbath would fall. Formulae for *Songs* 1, 2, 4, 6, 7, 8, and 12 are at least partially extant (see J. H. Charlesworth and C. A. Newsom, eds., *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations. Vol. 4B, Angelic Liturgy: Songs of the Sabbath Sacrifice* (PTS-DSSP 4B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1999).

[17] Scholars previously understood this passage as referring to twenty-six priestly families, adding two to the twenty-four courses mentioned in 1 Chr 24:1–18 and 25:9–31 (Paul Winter, "Twenty-six Priestly Courses," *VT* 6 [1956]: 215–17; Shemaryahu Talmon, "The Calendar Reckoning of the Sect from the Judaean Desert," in *Aspects of the Dead Sea Scrolls* [ed. C. Rabin and Y. Yadin; ScrHier 4; Jerusalem: Magnes, 1958; 2d ed. 1965], [1958; 2d ed. 1965], 162–99; repr., rev. ed. as "The Calendar of the Covenanters of the Judean Desert," in *The World of Qumran From Within: Collected Studies* [Jerusalem: Magnes; Leiden: Brill, 1989], 147–85; Yigael Yadin, *The Scroll of the War of the Sons of Light Against the Sons of Darkness* [trans. B. and Ch. Rabin; Oxford: Oxford University Press, 1962], 202–6). The evidence of the *Mišmarot* texts from Qumran, however, coordinated the twenty-four priestly families with the twenty-six courses of the 364-day calendar (e.g., 4Q321; for its publication and discussion see Shemaryahu Talmon and Israel Knohl, "A Calendrical Scroll from a Qumran Cave: *Mišmarot* B^{a}, 4Q321," in *Pomegranates and Golden Bells: Studies in Biblical, Jewish, and Near Eastern Ritual, Law, and Literature in Honor of Jacob Milgrom* [ed. D. P. Wright, D. N. Freedman, and A. Hurvitz; Winona Lake, IN: Eisenbrauns, 1995], 267–301, esp. 295–96 and n44).

[18] Notice the plural.

> God saw that (it was) good. And there was evening and there was morning, the fourth day (Gen 1:14–19; cf. *Jub* 2:9).

Evidence that the year began on Wednesday is provided by the date formulae of the *Angelic Liturgy*, which date the Sabbaths to specific days of the month, with the first Sabbath on the fourth day of the first month: למשכיל שיר עולת השב]ת הראישונה בארבעה לחודש הראישון "[To the Master. Song of the whole-offering of] the first [Sabba]th on the fourth (day) of the first month."[19] Nevertheless, there is a discrepancy between the 364-day calendar and the 365.25 days it takes for the earth to orbit the sun. Although several proposals have been advanced as to how the 364-day calendar would be reconciled with the 365.25-day earth orbit, none has been persuasively substantiated by the sources.[20] R. T. Beckwith, however, questions whether the 364-day was ever intercalated. Modern proposals for intercalation are based on the assumption that the followers of the 364-day calendar would have recognized the need for intercalation. In actuality, Beckwith argues, the traditions in *First Enoch* and *Jubilees* are quite emphatic that the year constitutes exactly 364 days:

> …and the days (of the year) add up to exactly three hundred sixty-four days (*1 En.* 72:32);[21]
>
> They bring about all the years punctiliously, so that they forever neither gain nor fall behind their fixed positions for a single day, but they convert the year with punctilious justice into three hundred sixty-four days (*1 En.* 74:12).

Moreover, *Jubilees* is emphatic that the length of the year is ordained by God's commandment:

> All the days of the commandments will be 52 weeks of days; (they will make) the entire year complete. So it has been engraved and ordained on the heavenly tablets. One is not allowed to transgress a single year, year by year. Now you command the Israelites to keep the years in this number–364 days. Then the year will be complete and it will not disturb its time from its days or from its festivals because everything will happen in harmony with their testimony. They will neither omit a day nor disturb a festival (*Jub.* 6:30–32).[22]

---

[19] 4Q400 (*Angelic Liturgy* or *Sabbath Song*) 1, line 1. The restoration of the formula is certain; see the formula preserved at the beginning of *Angelic Liturgy* 2, 4, 6, 7, 8, and 12 (see Newsom, "Angelic Liturgy" [PTSDSSP 4B]).

[20] Roger T. Beckwith provides a convenient discussion of several of the major proposals to solve the problem of intercalation (*Calendar, Chronology, Jewish and Christian: Biblical, Intertestamental and Patristic Studies* [AGJU 33; Leiden: Brill, 1996], 125–33).

[21] Quotations of *1 Enoch* are from the translation by Ephraim Isaac, in *OTP* 1:5–89.

[22] Translation of the Ethiopic version of *Jubilees* is from James C. VanderKam, *The Book of Jubilees* (CSCO 510–11; Scriptores Aethiopici 87–88; Leuven: Peeters, 1989). Unfortunately, this passage has not been identified among the fragmentary manuscripts from Qumran.

As Beckwith rightly observes, "if this is what the men of Qumran and their literary mentors believed, it is certain that they would not have recognized any need for intercalation; they would, on the contrary, have repudiated such a suggestion."[23]

Eventually, however, the one-and-a-quarter-day discrepancy between the 364-day calendar and the actual length of the year would result in natural phenomena appearing to occur at the wrong time: the seasons, celestial bodies (especially the stars), and the sprouting of crops will seem to be late. And, in fact, *First Enoch* attests to this happening:

> In respect to their days, the sinners and the winter are cut short. Their seed(s) shall lag behind in their lands and in their fertile fields, and in all their activities upon the earth. He will turn and appear in their time, and withhold rain; and the sky shall stand still at that time. Then the vegetable shall slacken and not grow in its season, and the fruit shall not be born in its (proper) season. The moon shall alter its order, and will not be seen according to its (normal) cycles....Many of the chiefs of the stars shall make errors in respect to the orders given to them; they shall change their courses and functions and not appear during the seasons prescribed for them....They (the stars) shall err against them (the sinners); and modify their courses. Then they (the sinners) shall err and take them (the stars) to be gods. And evil things shall be multiplied upon them; and plagues shall come upon them, so as to destroy all (*1 En.* 80:2–8).

> (Then) the angel said (to me), "This place is the (ultimate) end of heaven and earth: it is the prison house for the stars and powers of heaven. And the stars...they are the ones which have transgressed the commandments of God from the beginning of their rising because they did not arrive punctually. And he was wroth with them and bound them until the time of the completion of their sin in the year of mystery" (*1 En.* 18:14–16).

The explanation for these cosmic disturbances was theological: they will occur "in the days of the sinners" (*1 En.* 80:2; 18:14–16). Beckwith rightly concludes, "the fault was not with the revealed calendar but with the course of nature! The calendar could and should continue to be observed, though nature, during this evil period, had gone astray."[24]

Beckwith's analysis, however, understands the 364-day calendar as the innovation of a minority group in Israel, the "proto-Essene movement" of the late third century B.C.E.[25] A. Jaubert, however, argued that the 364-day calendar is presupposed in the late priestly documents of the Tanak (Ezekiel, P, Haggai, Zechariah, Chronicles, Ezra, Nehemiah, and possibly passages in Kings) and was used in some form in the Second Temple until the Maccabean period.[26] Jaubert's argument is followed to varying degrees by several Qumran scholars.[27] If, indeed, the 364-day calendar was operative in the Jerusalem Temple from the exilic period, the silence concerning the 1 1/4-day discrepancy of the 364-day calendar with the seasonal and celestial phenomena suggests that some method of intercalation would have been used, although the specific method of intercalation is not readily forthcoming from the evidence. The polemical language found in *First Enoch* and *Jubilees* dates from the second century B.C.E. and may reflect a calendrical controversy in which use of the 364-day solar calendar in the Jerusalem Temple is replaced by use of the 354-day lunar calendar. It seems probable, however, that intercalation would not be acceptable after the rise of the polemical assertions that the 364-day calendar is revealed by God although natural phenomena will fail to adhere to it. Even if the 364-calendar was once the governing calendar in the Jerusalem Temple and intercalated, from the second century on the inheritors of *First Enoch* and *Jubilees*, i.e., the Qumran community, probably would not have intercalated the 364-day calendar.

---

[23] Beckwith, *Calendar Chronology, Jewish and Christian*, 136.

[24] Beckwith, *Calendar and Chronology, Jewish and Christian*, 140. Beckwith rightly observes that "[s]ince this material occurs in such early texts, one must presume that the discrepancy had developed fairly rapidly, and was due to an absence of intercalation, rather than to an imperfect attempt at it" (ibid., 139).

The institution of the 364-day calendar was understood by the traditions of *First Enoch* and *Jubilees* as a commandment of God (*1 En.* 18:14–16, 80:2–8; *Jub.* 2:9; cf. 6:30–32) modifying the tradition preserved in Gen 1:14–19 where both the sun and the moon are the determinants of the calendar; "The Lord appointed the sun as a great sign above the earth for days, Sabbaths, months, festivals, years, Sabbaths of years, jubilees, and all the times of the years" (*Jub.* 2:9).[28] The basis of the 364-day calendar also rests upon a concern to properly fulfill other *halakot* of the Torah. By fixing the festival days on the same day of the week every year, the 364-day calendar avoids conflict between the commandments to honor the Sabbath and commandments to celebrate the festivals. In *Jubilees*, the 364-day solar calendar is emphatically opposed to the 354-day lunar calendar;

[25] Ibid., 105. Beckwith suggests that the originator may have been the author of the "Astronomical Book" of *1 Enoch.*

[26] See Annie Jaubert, "Le calendrier," *VT* 3 (1953): 250–64, and *The Date of the Last Supper*, 31–52.

[27] Early on, for example, Milik, *Ten Years*, 110–11. VanderKam follows Jaubert's argument that the 364-day calendar is presupposed in the priestly documents, but rejects her contention that over time the 364-day calendar was modified ("Reassessment of Jaubert's Hypothesis," *CBQ* 41 [1979]: esp. 391–99; "2 Maccabees 6, 7A and Calendrical Change in Jerusalem," *JSJ* 12 [1981]: 52–74, esp. 57–59). Philip R. Davies also follows Jaubert's argument that the 364-day is reflected in priestly documents and that it ceases to be in use in the Jerusalem Temple before the second century B.C.E. ("Calendrical Change and Qumran Origins: An Assessment of VanderKam's Theory," *CBQ* 45 [1983]: 80–89). Joseph M. Baumgarten, however, argues against Jaubert's theory that the 364-day calendar is reflected in the Pentateuch ("The Calendar of the Book of Jubilees and the Bible," in *Studies in Qumran Law* [SJLA 24; Leiden: Brill, 1977], 101–14; this paper originally appeared in Hebrew in *Tarbiz* 32 [1962]: 317–28).

> There will be people who carefully observe the moon with lunar observations because it is corrupt (with respect to) the seasons and is early from year to year by ten days.[29] Therefore years will come about for them when they will disturb (the year) and make a day of testimony something worthless and profane a festival. Everyone will join together both holy days with the profane and the profane with the holy day, for they will err regarding the months, the sabbaths, the festivals, and the jubilee. For this reason I am commanding you and testifying to you so that you may testify to them because after your death your children will disturb (it) so that they do not make the year (consist of) 364 days only. Therefore, they will err regarding the first of the month,[30] the season, the sabbath, and the festivals. They will eat all the blood with all (kinds of) meat (*Jub.* 6:36–38).[31]

Whether the prediction of *Jubilees* of such calendrical disputes reflects its author's present situation, the Qumran community's adherence to the 364-day calendar as opposed to the 354-day calendar of the Jerusalem establishment resulted in each group celebrating the various festivals on different days. Evidence for this is found in the *Pesher Habakkuk*:

> Its interpretation concerns the Wicked Priest who pursued after the Righteous Teacher to devour him with his poisonous vexation to the house of[32]

---

[28] Translation of the Ethiopic version of *Jubilees* is from VanderKam, *The Book of Jubilees*. This passage is fragmentarily preserved in 4QJub^a (4Q216) 6.7–8; for the Hebrew text, see James C. VanderKam and Jozef T. Milik, "A. Jubilees," in *Qumran Cave 4.VIII: Parabiblical Texts, Part 1* (ed. H. W. Attridge et al.; DJD 13; Oxford: Clarendon, 1994), 16–17.

[29] That is, it is 10 days shorter than the true year of 364 days, according to *Jubilees*, and thus it is 354 days.

[30] Note that although *Jubilees* rejects the moon as a standard for calendrical purposes, it continues to celebrate the first day of the month.

[31] Translation of the Ethiopic version is from VanderKam, *The Book of Jubilees*.

[32] Reading אבית as a contracted form of אלבית (see Maurya P. Horgan, "Habakkuk Pesher," in *The Dead Sea Scrolls: Hebrew, Aramaic, and Greek Texts with English Translations. Vol. 6B, Pesharim, Other Commentaries, and Related Documents* [ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002], 181n106, and earlier *Pesharim: Qumran Interpretations of Biblical Books* [CBQMS 8; Washington: Catholic Biblical Association, 1979], 49).

> his exile. And at the end of the festival, the rest-(day) of the Day of Atonement, he appeared to them to devour them and to cause them stumble on the day of fasting, their restful Sabbath (שבת מנוחתם; 1QpHab 11.4–8).

As Talmon persuasively argues, the Wicked Priest probably could not have launched an attack on a day he considered a festival. Thus, the passage indicates that the Wicked Priest differed from the Qumran community in the reckoning of the Day of Atonement; that is, he followed a different calendar.[33] This interpretation is strengthened by the third person pronominal suffix ("their") specifying the "restful Sabbath" as the community's.[34]

As in the book of *Jubilees*, the Qumran community was also concerned that the Sabbath regulations were strictly followed according to their interpretation. Thus, for example, the community allowed only the burnt-offering of the Sabbath to be performed on that day: "Let no one offer-up on the altar on the Sabbath, except for the Sabbath sacrifice (עולת השבת), for thus it is written, 'apart from your Sabbaths'" (CD MS A 11.17–18, interpreting Lev 23:38).[35]

In the *Rule of the Community*'s "preamble," a series of twenty-two infinitive constructs indicate the purpose of entering into the covenant of God.[36] Three of the purposes expressed are

> in order not to march[37] on any one of all the commands of[38] God in their times,
> and in order not to advance their times,
> and in order not to delay from all their appointed times

[33] Shemaryahu Talmon, "Yom Hakippurim in the Habakkuk Scroll," *Biblica* 32 (1951): 549–63, repr. in idem, *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes and Leiden: Brill, 1989), 186–99.

[34] Talmon, "Yom Hakkippurim."

[35] Talmon, "The Calendar of the Judean Covenanters," 171–73.

[36] See Elisha Qimron and James H. Charlesworth, "Rule of the Community (1QS)," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 1, The Rule of the Community and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 1; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1994), 7n3.

[37] Most translators render לצעוד idiomatically as "transgress" or "deviate"; however, this sense is not attested elsewhere and probably requires the emendation of בכול to מכול. The classical sense of the root refers to "marching" (appearing in martial as well as religious contexts such as in processionals; for the latter see 2 Sam 6:13) and generally "walking." This imagery is lost in the idiomatic translations. See 1QS 3.9–11, which preserves an almost parallel passage in which the preposition following צעד is על; "May he establish his steps so that he might walk perfectly in all the ways of God…and not march upon (any) one from all his commands" (ואין לצעוד על אחד מכול דבריו). For a positive use of צעד in the sectarian material, see CD MS B 20.18.

[38] Lit. "words of."

ולוא לצעוד בכול אחד מכול דברי אל בקציהם
ולוא לקדם עתיהם
ולוא להתאחר מכול מועדיהם
(1QS 1.13b–15a).

The references to advancing or delaying the times probably refer to following the wrong calendars, which would cause the festivals to be celebrated too early or too late. Additionally, at the end of the *Rule of the Community*'s covenantal renewal ceremony a nearly parallel passage occurs:

> May he establish his steps so that he might walk perfectly in all the ways of God, as he commanded, at the appointed times of his fixed times, and not to turn aside to the right or left, and not march upon (any) one from all his commands.[39]

ויהכין פעמיו להלכת תמים בכול דרכי אל כאשר צוה למועדי תעודתיו
ולוא לסור ימין ושמאול ואין לצעוד על אחד מכול דבריו
(1QS 3.9–11; parallel in 4Q255 [4QS MS A]).[40]

These passages attest to the halakic significance of following the correct calendar. The times of worship have been commanded by God; failure to worship at the correct time violates God's Torah. As Talmon comments, calendrical and liturgical differences constituted a radical breach between the two groups and may have been a significant factor in the community's separation from the rest of Israel;[41] "Whoever does not observe the festivals of the year at the same time as the community in which he lives, ceases to be a member of the social body to which he hitherto belonged."[42]

PREDETERMINATION OF HISTORY

According to *Some Works of the Torah*, the Qumran community's halakic disputes with the majority of other Jews led them to withdraw from the rest of society. These disputes involved a wide range of halakot, involving both calendrical and noncalendrical issues. The community considered other Jews, and especially the establishment in the Jerusalem Temple, to be breaking the halakot of the Torah. This led the members of the community to believe that they were living in "the last days" (אחרית הימים) of a wicked age before the dawn of a golden, messianic age.[43] While scholars often discuss this belief as the community's "eschatology," it is better to avoid the term "eschatology" ("study of the last things") because it often is read as implying "the end of history" or "the end of the world." Both of these connotations are anachronistic impositions, with the former denying the temporal continuity envisioned between the two ages, and the latter denying the earthy nature of the anticipated age.[44]

---

[39] Lit. "his words."

[40] See also 1QS 9.26–8.

[41] Cf., however, *Some Works of the Torah* (4Q394–4Q399), an early sectarian document, which lists many of the Community's halakic rulings in conflict with those of the Jerusalem establishment and attributes the Community's withdrawal from society to these halakic disputes; "[And you know that] we have separated ourselves (פרשנו) from the multitude of the peo[ple…and] from sharing in these things and from going wi[th them] in these" (cols. 7–8). Although the 364-day calendar was prefixed to at least one manuscript copy (4Q394), calendrical issues are not listed as one of the disputes in the extant portions of the body of the document. See Qimron and Strugnell, *Miqsat Maʾase ha-Torah.*

[42] Talmon, "The Calendar of the Judean Covenanters," 149.

The Qumran community believed that history is divided into periods and that God has predetermined the character of each period. The Qumran community inherited these ideas from its traditions, including the book of Daniel, *First Enoch* and others. An example of the periodization and determinism of history in the Qumran sectarian documents is provided by the *Wicked and Holy*,[45] witnessed by at least one manuscript (4Q180), and possibly a second (4Q181).[46] Both manuscripts reflect the rather full orthography[47] and, in the case of 4Q180, the scribal practices of the Qumran community.[48] Moreover, the provenience of the composition as the community is strongly indicated by the use of the community's technical terms and ideas as well as probable allusions to the *Rule of the Community*. The formula, פשר על, which may indicate the sort of "commentary" peculiar to the community,[49] is extant twice on 4Q180, including the probable incipit.[50]

---

[43] See Shemaryahu Talmon, "Waiting for the Messiah: The Spiritual Universe of the Qumran Covenanters," in *Judaisms and their Messiahs at the Turn of the Christian Era* (ed. J. Neusner, W. S. Green, and E. S. Frerichs; Cambridge: Cambridge University Press, 1987), 111–37, rev. ed. reprinted as "Waiting for the Messiah–The Conceptual Universe of the the Qumran Covenanters," in *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes and Leiden: Brill, 1989), 273–300; Annette Steudel, "אחרית הימים in the Texts from Qumran," *RevQ* 16 (1993): 225–46.

[44] See the comments of Talmon: "I shall avoid as much as possible the employment of the term 'eschatology,' which bears the stamp of metahistory or is understood to designate 'the end of historical time'" (in "Waiting for the Messiah," 115; cf. 126). See also Jean Carmignac, *Le Mirage de l'Eschatologie: Royauté, Règne et Royaume de Dieu…sans Eschatologie* (Paris: Letouzey et Ané, 1979), 200.

[45] Perhaps the original title is indicated by the beginning of the document: פשר על הקצים (4Q180 frag. 1, line 1). Line numbers follow the transcription of Roberts, "Wicked and Holy," in in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Document, War Scroll, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 204–13. This document is also known as *The Ages of Creation.*

[46] It is difficult to determine from the fragmentary manuscripts whether 4Q180 frag. 1, lines 9–10, and 4Q181 frag. 2, lines 4ff.[, preserve very divergent texts or different portions of the same text (see also Jozef T. Milik's notes to 4Q180, line 9, in *The Books of Enoch: Aramaic Fragments of Qumrân Cave 4* [Oxford: Clarendon, 1976], 250). Milik identified 4Q180 and 4Q181 as copies of the same document (*JJS* 23 [1972]: 110; cf. *Books of Enoch*, 251). Allegro, who first published the manuscripts, did not relate the manuscripts ("Some

---

Unpublished Fragments of Pseudepigraphical Literature from Qumran's Fourth Cave,"*ALUOS* 4 [1962–63], 3–5 and pl. 1; John M. Allegro and Arnold A. Anderson, *Qumrân Cave 4.I (4Q158–4Q186)* (DJD 5; Oxford: Clarendon, 1968), 77–80 and pls. 17, 27). Strugnell, who improved on Allegro's work, first suggested a relationship between the two manuscripts, with 4Q180 as perhaps a commentary on 4Q181 (see John Strugnell, "Notes en marge du volume V des Discoveries in the Judaean desert of Jordan," *RevQ* 7 [1970]: 163–276, esp. 252). See also Devorah Dimant who argues against Milik's identification of these two manuscripts as copies of the same document; rather, she suggests that the similarities as well as differences between 4Q180 frag. 1, lines 5, 7–8, and 4Q181 frag. 2, lines 1–2, "may be better explained as a citation," with 4Q181 preserving a citation of 4Q180 or with both citing another source (Devorah Dimant, "The 'Pesher on the Periods' (4Q180) and 4Q181," *IOS* 9 [1979]: 77–102, esp. 88–91, 99–100).

[47] For example, כול in 4Q181 frag. 2, lines 5, 9; 4Q180 frags. 2–4 2.8, 9; but כל in 4Q180 frag. 1, line 9; להמה in 4Q181 frag. 2, line 2; but להם in the parallel 4Q180 frag. 1, line 8. Note also the quotation of Gen 18:20–21 in 4Q180 frags. 2–4 2.5–7, which preserves a fuller orthography than the MT (cf. Roberts, "Wicked and Holy," 210n20, and Strugnell, "Notes en marge du volume V," 254).

[48] Note the preference for אל rather than the Tetragrammaton in 4Q180 frag. 1, line 1, and that אל is written in a paleo-Hebrew script. Because of the avoidance of the Tetragrammaton, one should perhaps restore אל at the beginning of 4Q180 frags. 2–4 2.5, rather than יהוה. Roberts and Strugnell restore יהוה; Milik restores ואשר, though the tetragrammaton is often used in citing the biblical text (4Q180 frags. 2–4 2.5–7 quote Gen 18:20–21). Whether one restores אל or יהוה, it was probably written in a paleo-Hebrew script.

[49] Among the published Dead Sea Scrolls, the exact formula פשר על occurs only in this document and probably in 4Q464 and 4Q171 (= 4QpPs^{a}). 4Q464, "An Exposition on the Patriarchs," frag. 3 2.7 reads פשר ע]ל [note that the ע is damaged] (Michael E. Stone and Esther Eshel, "An Exposition on the Patriarchs [4Q464] and Two Other Documents [4Q464^{a} and 4Q464^{b}]," *Le Muséon* 105 [1992]: 248–49, 254 and pl. = PAM 43.357; cf. 247). The extremely fragmentary 4Q464 is written in a Herodian script and exhibits the full orthography, which may be characteristic of Qumran scribal practices (see idem, esp. 244). In 4Q171 3.7, the formula פשר על is clearly visible on the leather (see Allegro and Anderson, *Qumrân Cave 4.I [4Q158–4Q186]* [DJD 5], pl. 16). Although there is an unusually large space between פשר and על, the emendation to פשרו (so Allegro, Horgan) is not certain. For the various formulae used in the *pesharim*, see Casey D. Elledge, "Appendix: A Graphic Index of Citation and Commentary Formulae in the Dead Sea Scrolls," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 6B, Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 367–77.

[50] Fragment 1, lines 1, 7; the formula is also implied in line 8: ועל עזזאל. As Strugnell notes, 4Q181 frag. 2 (part of which parallels 4Q180 frag. 1) preserves a

Undergirding the thought of the *Wicked and Holy* is a strong predestinarian thought which characterizes many of the community's other writings, such as the *Rule of the Community* and the *Thanksgiving Hymns*;[51]

> From the God of knowledge (comes) all that is and (all) that shall be.[52] And before their coming into being[53] (God) has established all their design(s). And when they come into being for their fixed times[54] according to his (God's) glorious design they fulfill their deeds
>
> מאל הדעות כול הויה ונהייה ולפני היותם הכין כול מחשבתם
> ובהיותם לתעודותם כמחשבת כבודו ימלאו פעולתם
> (*Rule of the Community* [1QS 3.15b–16a]).[55]

> And before creating them, you knew all their works forever [...]
> ובטרם בראתם ידעתה כול מעשיהם לעולמי עד]
> (*Thanksgiving Hymns* [1QH 9.7b–8a]).[56]

Although fragmentary, the *Wicked and Holy* provides significant insight into the conceptions of time attested among the members of the Qumran. Prominent in this document is the idea that the events of history are predetermined by God. Related to the idea of predestination is the periodization

---

large right margin, which may indicate the beginning of the manuscript ("Notes en marge du volume V," 254; cf. Allegro and Anderson, *Qumran Cave 4.I (4Q158–4Q186)* [DJD 5], pl. 18). 4Q180 frag. 1 preserves a large top margin indicating that line 1 represents the first line of the column (cf. ibid., [DJD 5], pl. 27).

[51] See Nötscher, *Zur theologischen Terminologie der Qumran Texte*, 173–82; Armin Lange, *Weisheit und Prädestination: Weisheitliche Urordnung und Prädestination in den Textfunden von Qumran* (*STDJ* 18; Leiden: Brill, 1995) and "Wisdom and Predestination in the Dead Sea Scrolls," *DSD* 2 (1995): 340–54.

[52] For discussion of the *Niphʿal* participle of היה, see William H. Brownlee, *The Dead Sea Manual of Discipline: Translation and Notes* (BASORSup 10–12; New Haven, 1951), 9n1, and Brownlee, "Appendix H: The Niphʾal Participle of the Verb היה," in *The Dead Sea Manual of Discipline*, 54–55.

[53] For the construction לפני followed by an infinitive construction indicating the time "before," cf., e.g., Gen 13:10, 1 Sam 9:15.

[54] While in Biblical Hebrew תעודה is derived from עוד meaning "testimony" (see Isa 8:16, 20) or "custom" (Ruth 4:7), in Qumran Hebrew תעודה seems to be semantically related to יעד and has the following meanings: "fixed time," "assembly," and "destination" (Qimron, *Hebrew of the Dead Sea Scrolls* [HSS 29; Atlanta: Scholars Press, 1986], 115; cf. Bruno W. Dombrowski, "The Meaning of the Qumran Terms *Tʿwdh* and *Mdh*," *RevQ* 7 [1971]: 567–74; Newsom, *Songs of the Sabbath Sacrifice*, 161). For examples of תעודה meaning "fixed time," cf. 1QS 1.9, 3.10; 1QM 2.8, 14.13; Mas1k 1.3 (*Angelic Liturgy*; and parallel in 4Q402 frag. 4, lines 12–13).

[55] Cf. 1QS 11.11. My translation leaves ambiguous whether the clause כמחשבת כבודו modifies the preceding or succeeding phrase; probably it modifies both.

[56] 1QH 9.7b–8 = Sukenik's 1.7b–8a (E. L. Sukenik, *The Dead Sea Scrolls of the Hebrew University*, Jerusalem: Magnes, 1955).

of history. As indicated above, the beginning of the document interprets the earlier tradition preserved in 1QS 3.15b–16a:

> Interpretation concerning the periods[57] which God made;[58] a period to accomplish [all that is]
> and (a period to accomplish all) that shall be. Before creating them,[59] (God) established [their] deeds [according to the detail(s) of[60] their periods,]
> (one) period after another.[61] And it[62] was engraved on (the) tablets of [heaven…]
> [for a]ll (the) periods of their[63] dominion. This (is the) order from [Adam to Noah, and from Shem to Abraha]m unt[il] he begat Isaac there were[64] ten [generations.…]
> […] (*vacat*)[65] […]

---

[57] קץ in this document refers to a defined interval of "time," i.e., a "period," as elsewhere in the sectarian Dead Sea Scrolls. See, for example, 1QpHab 7.12–14 and CD MS A 2.9–10, and discussions by Nötscher, *Zur theologischen Terminologie der Qumran Texte*, 167–69 and Shemaryahu Talmon, "קץ," *ThWAT* 7:84–92, esp. 89–92.

[58] The translation understands עשה as a perfect third person singular form. The unpointed text, however, is ambiguous and a participial form "making" is also possible.

[59] The possible antecedents (i.e., a masculine plural noun) קצים and, more probably, the partially restored [כול הויה] ונהיה. For the second possibility, see 1QS 3.15b–16a on which this passage is based, where כול הויה ונהייה is the antecedent of the two pronominal suffixes that follow; כול הויה ונהייה ולפני היותם הכין כול מחשבתם. Less probable is Milik's rendering, which translates the form as a participle and the suffix as referring ahead to the "angels," which he restores later in the line (Milik, *Books of Enoch*, 251).

[60] For discussion of פרוש as "detail(s)" see Albert I. Baumgarten, *JBL* 102 (1983): 418–22.

[61] Milik renders the prepositional construction "one period after another" (Milik, *Books of Enoch*, 251), while Roberts translates "a time according to its time" (Roberts, "Wicked and Holy," 207).

[62] The precise antecedent of הוא is difficult to determine. Milik understands it as referring to "each period;" Dimant suggests that it may refer to פרוש, "detail(s)" (Dimant, "The 'Pesher on the Periods,'" 79–80). Regardless of the identification of the precise antecedent, the interpretation of the overall passage is not greatly affected.

[63] Due to the fragmentary state of the text, the antecedent of the pronominal suffix is ambiguous and is tied to how one reads and restores line 2. I read the antecedent as [כול הויה] ונהיה. קצים is also possible, though not probable. If one reads פעולות as a construct and restores a possessive noun (as does Milik), then the antecedent of this suffix probably would be that noun. See note to פעולות]ם. Dimant restores לבני איש at the end of line 3, which provides the antecedent for her (Dimant, ibid., 78–79). Similarly, Armin Lange restores לבני האדם at the end of line 3 (Lange, *Weisheit und Prädestination*, 277).

[64] את here expresses "duration" (see the entry I. את 2., in BDB, 85); so also Milik, *Books of Enoch*, 250. See Exod 13:7, Lev 25:22 and Deut 9:25. For another possible interpretation, see Dimant, ibid., 80–81.

[65] The *vacat* indicates the end of a section.

> פשר על הקצים אשר עשה אל[66] קץ להתם [כול הויה][67]
> ונהיה בטרם בראם הכין פעולות[ם לפרוש קציהם]
> קץ לקצו והוא חרות על לחות [השמים
> [כ]ל
> [ל]קצי ממשלותם זה סרך מ[אדם לנוח ומשם לאברה]ם
> [ע]ד הוליד ישחק את עשרה ה[תולדות[68]
>] [
> (4Q180 frag. 1, lines 1–5).

The first line alerts the reader to the subject of the document, "the periods" (הקצים) and emphasizes that these periods of time are made by God (אשר עשה אל). The language of the entire passage is that of creation, indicated by verbs עשה (line 1), ברא and כון (line 2),[69] inherited from the biblical traditions. While the passage picks up on the biblical theme of God as creator, it distinctively shifts the terminology of the object from the spatial (e.g., בראשית ברא אלהים את השמים ואת הארץ) to the temporal (הקצים). After describing God's making of "the periods" (plural), the passage describes different "periods" or times in the singular; "a period to accomplish [all that is] and (a period to accomplish) all that shall be." Thus, the passage emphasizes the temporal dimension (instead of the spatial dimension) as the primary context in which events occur.

The emphasis that it is in the temporal dimension that events occur provides the basis for the idea of predestination expressed in the text;

> …the periods which God made; a period to accomplish [all that is] and (a period to accomplish all) that shall be. Before (God) created them, (God) established [their] deeds […] a period for its period (4Q180 frag. 1, lines 2–3).

Implicit is the recognition of the temporal dimensions of action. Since actions occur in history (i.e., in a "period" of time) and God made all of history (i.e., "the periods"), the activity and events which occur in history are predetermined by God.[70] Before anything happens, they have already been 'set in stone'; "And (each period) was engraved on (the) tablets of [heaven…for a]ll (the) periods of their dominion."

---

[66] Note that אל is written in a paleo-Hebrew script.

[67] Restoration follows Strugnell who is dependent on 1QS 3.15 ("Notes en marge du volume V," 252).

[68] Or restore ה[דורות (so Dimant, ibid., 78 and Lange, *Weisheit und Prädestination*, 277). *Pace* Milik who restores ה[שבעים, "w[eeks…]" on the basis of 4Q181 frag. 2, line 3 [line 5 according to Milik] (Milik, *Books of Enoch*, 249–50). In his discussion of the restoration, Milik equates "ten [generations]" with "ten [weeks]" (ibid., 250).

[69] See the creation account in Genesis 1, which uses both ברא (vs. 1) and עשה (vv. 7, 16, 25). Cf. also Isa 41:20; 43:7; 45:7, 12, 18; and Amos 4:13 where עשה is used in a parallel construction with ברא and esp. Isa 45:18 where כון is also present.

[70] Cf. 4Q180 frags. 2–4 2.10b: "[….] Before (God) created them, (God) knew [their] design [….]"; (בטרם בראם ידע מחשב[תם [).

Related to the idea that God predetermines the events of history is an ordering of history into "periods" of time. The periods are understood to be under the dominion of different creatures, both human (so 4Q180 frag. 1, lines 4–5 par. 4Q181 frag. 2, line 1) and angelic ʿAzazʾel and the angels in 4Q180 frag. 1, beginning at line 7).[71] These different periods are arranged in "order" (סרך).

The composition also emphasizes that the duration of each period is determined[72] as well as of the events which are characteristic of them. Since the duration of each period is limited, so too is the existence of all that occurs in each period. Each period provides not only the context, but also the limitation for all that occurs within it. Thus, lines 1 and 2 emphasize that each period is created "to accomplish" (לתתם) in the sense of "complete" or "bring to an end" all that occurs.[73]

Despite the poor preservation of the fragments, allusions to biblical events are readily evident in many of them. An exception to this is the rather well preserved 4Q181 frag. 1, col. 2.1–6, which may be a second manuscript witness to the *Wicked and Holy*.

> [1] for guiltiness[74] in community[75] with the stub[born ones of his[76]] people [and] for [wallow]ing in (the) sin of the sons of humanity[77] and for great judgments and terrible illnesses

---

[71] Perhaps the dichotomy between human and angelic is false; the document juxtaposes human and angelic actors (the story of ʿAzazʾel and the angels involves the daughters of humans [4Q180 frag. 1, lines 7–10, parallel 4Q181 frag. 2, lines 2 and following]; the angelic appearance to Abraham at the oaks of Mamre [4Q180 frags. 2–4 2.4 and following]). See also 4Q181 frag. 1 2.1–6; so also 1QS 3.17, 20–21. Milik characterizes 4Q180-181 as follows: "The commentator of 4Q180 and 181 summarized or quoted verbally Biblical passages, which describe the events marked by the intervention of angels, messengers of God who is the special protector of Israel (Deut. 32:9 ff.)" (Milik, *Books of Enoch*, 252).

[72] Cf. 4Q180 frag. 1, lines 8–9: "And concerning ʿAzazʾel […to love] iniquity and to possess wickedness all [his] ti[me…]; ועל עזזאל [... לאהבת] עולה ולהנחיל רשעה כל ק[צו (text and translation from Roberts "Wicked and Holy," 206–7). It is difficult to associate the material preserved on 4Q181 frag. 2, lines 2 and following, which apparently provides a parallel text.

[73] Cf. D. Dimant, "The 'Pesher on the Periods,'" 92.

[74] That is, "wrong-doing."

[75] Or "in the community."

[76] The antecedent of the pronominal suffix, if the restoration is correct, is uncertain.

[77] Or "sons of Adam." Either way, the sense is the same.

[2] in (the) flesh according to the mighty deeds of God and corresponding to their wickedness, according to their impurity,[78] turning aside[79] the sons of [(the) heavens] and (the) earth to (be) a community of wickedness until

[3] its endtime.[80] Corresponding to his compassions, God according to his goodness and the wonder of his glory brought near (some) from the sons of the world [...] to be reckoned[81] with him in (the) co[mmunity of

[4] (the) div]ine being as[82] a holy congregation in (the) appointment[83] to life eternal and in (the) lot with his Holy Ones [...]

[5] [...] each according to his lot which he ca[s]t for [...]

[6] [...] to life e[te]rn[al....]

[1] לאשמה ביחד עם ס[רי] עמ[ו ו]ל[התגול]ל[84] בחטאת בני אדם ולמשפטים גדולים ומחלים רעים

[2] בבשר לפי גבורות אל ולעומת רשעם לפי טמאתם[85] מסיר[86] בני [שמים] וארץ ליחד רשעה עד

[3] קצה לעומת רחמו[87] אל לפי טובו והפלא כבודו הגיש מבני תבל[...][88] להתחשב עמו בי[חד]

[4] [א]לים לעדת קודש במעמד לחיי עולם ובגורל עם קדושיו כ[

[5] [...]לאו איש לפי גורלו אשר הפ[י]ל ל[

[6] [...] לחיי ע[ו]ל[ם

---

[78] Or “uncleanness.”

[79] The Hitpael masculine singular participle מסיר may be dependent on רשעם earlier in the line or on the antecedent of the restored pronominal suffix on עמ]ו in line 1.

[80] The antecedent of the feminine singular suffix of קצה is ambiguous; possibly it is תמאתם in line 2. Cf. the similar thought in 1QS 3.23, 4.16.

[81] The force of the *hitpaʿel* maybe reflexive, “to reckon themselves”; cf. Num 23:9d, ובגוים לא יתחשב (“and among the nations it does not reckon itself”).

[82] The force of the preposition ל in לעדת is determined by being in construction with the infinitive לחתהשב. See Isa 29:17c = 32:15c, והכרמל ליער יחשב (“and the garden-land shall be reckoned as a forest”).

[83] Translation follows Roberts, “Wicked and Holy,” 213.

[84] The restoration is from Roberts who follows Strugnell, “Notes en marge du volume V,” 254–55.

[85] Corrected from סוד נדתם; note the א is written above the line. See Strugnell, ibid., 225, and Roberts, ibid., 212n29.

[86] The reading follows Roberts who is dependent on Strugnell, ibid., 255.

[87] Reading רחמו instead of רחמי; see Roberts, ibid., 212n32; and Strugnell, ibid., 255.

[88] The leather is obliterated; there is no physical break in the leather.

In contrast to other more fragmentary passages, there is no clear allusion to events inherited from the biblical tradition. The passage describes a time of widespread wickedness affecting both "the sons of [(the) heavens]" as well as the sons of "(the) earth."[89] Moreover, much of the language of this passage may reflect the distinctive terminology of the community.[90] Thus, the passage may provide the "interpretation" concerning the community's present "period" of time (קץ).

Regardless of the actual referents, the passage portrays two distinct and opposing communities, a "community of wickedness" and "a holy congregation." There is a limit to the "time" of the first group (עד קצה).[91] In contrast, the second group has "life eternal" (4Q181 frag. 1, col. 2.4, 6). The first group receives "great judgments and terrible illnesses" from God for their wickedness (4Q181 frag. 1, col. 2.1–2). On the other hand, the second group is separated by God from the first group, the "sons of (the) world," and presumably escapes punishment. Moreover, this second group is said to be not only a "holy congregation," but also in communion with God and the divine beings; "to be reckoned with him (God) in the co[mmunity of (the) div]ine beings as a holy congregation…and in (the) lot with his Holy Ones" (4Q181 frag. 1, col. 2.3–4). Thus, this passage affirms that regardless of how wicked the time may seem, God has preordained an end to the wickedness. Although humanity (and some of the heavenly beings) may seem to be completely estranged from God and destined for punishment, all is not lost; for God is at work to produce a remnant that is to be in communion with the divine. These presumably human beings (since they are "from the sons of the world") are exalted to be in community with God and angelic beings.

---

[89] Cf. the "sons of the world" (בני תבל) in line 3.

[90] The passage seems to echo 1QS 3.13–4.26; לאשמה (4Q181 frag. 1 2.1) and ואשמתם (1QS 3.22); עד קצה (4Q181 frag. 1 2.2–3) and עד קצו (1QS 3.23), עד קץ אחרון (1QS 4.16–7; cf. 4.18); לעומת רחמו ... לפי טובו (4Q181 frag. 1 2.3) and ורוח ... ורוב רחמים וטוב עולמים (1QS 4.3); מבני תבל (4Q181 frag. 1 2.3) and תבל (1QS 3.18; 4.2, 6, 19); לחיי עולם (4Q181 frag. 1 2.4; cf. 2.6) and ושימחת עולמימ בחיי נצח (1QS 4.7; cf. 6Q18 frag. 2, line 5); forms of גורל (4Q181 frag. 1 2.4; cf. 2.5). Cf. בי[חד א]לים (4Q181 frag. 2 2.3–4) and ביחד אל (1QS 1.12, 2.22); לעדת קודש (4Q181 frag. 1 2.4) and לעדת קודש (1QS 5.20), בעדת קודש (4Q491 [4QM1] frag. 11 1.14); בגורל עם קדושיו (4Q181 frag. 1 2.4) and ובגורל עם קדושיכה (1QH 19.11–12 [= Sukenik 11.11–12]), ומפיל גורל עם מלאכי פנים (1QSb 4.26).

[91] 4Q181 frag. 1 2.2–3. While the exact antecedent of the pronominal suffix cannot be clarified, it is clearly associated with the wicked community.

COSMIC DIMENSIONS OF THE CALENDAR

The following of the 364-day solar calendar had not only *halakic* and thus social, but also cosmic dimensions. The book of *Jubilees* attests to the idea that the terrestrial worship of the Jerusalem Temple was to be synchronized with the celestial worship in the heavens.[92] The holy day which dominates Jubilees is the weekly Sabbath.[93] Instructions concerning the Sabbath are found in *Jub.* 2:17–33 and 50:1–13 which concludes the document. These two sections form a sort of *inclusio* to the book. Like the Priestly writer of the Pentateuch, the author of *Jubilees* ties the institution of the Sabbath to the creation event.[94] However, distinct from the biblical tradition, the command to observe the Sabbath was first given to the angels (in the following passages referred to in the first person plural) and the Sabbath is to be observed in heaven;

> He gave us the sabbath day as a great sign so that we should perform work for six days and that we should keep sabbath from all work on the seventh day. He told us—all the angels of the presence and all the angels of holiness (these two great kinds)—to keep sabbath with him in heaven and on earth (*Jub.* 2:17–18).[95]
>
> On it[96] we kept sabbath in heaven before it was made known to all humanity that on it they should keep sabbath on earth (*Jub.* 2:30b).[97]

the sabbath was only made known to the chosen people of israel,[98] and they were to observe the Sabbath with the angels;

> In this way he made a sign on it by which they, too, would keep sabbath *with us* on the seventh day to eat, drink, and bless the creator of all as he had blessed them and sanctified them for himself as a noteworthy people out of all the nations; and to keep sabbath *together with us* (*Jub.* 2:21).[99]

---

[92] For the biblical antecedents of the worship in the heavens, see Isaiah 6; cf. Daniel 7, 1 Kgs 22:19–23, *1 Enoch* 14.

[93] "…it [the sabbath] is more holy and more blessed than any day of the jubilee of jubilees." (*Jub.* 2:30a). Cf. the section in CD MS A 10.14–11.18 "Concerning the Sa[bba]th."

[94] *Jub.* 2:25; cf. Gen 2:1–4.

[95] Translation from VanderKam, *The Book of Jubilees.*

[96] That is, the seventh day.

[97] Translation from VanderKam, ibid.

[98] *Jub.* 2:19–20, 30b; 50:9–10.

[99] Translation from VanderKam, ibid.; emphasis added.

In fact, the one who observes the Sabbath is comparable to the angels; “Everyone who observes (it) and keeps sabbaths on it from all his work will be holy and blessed throughout all times like us” (*Jub.* 2:28).[100]

The synchronicity between the human and angelic worship is further attested at Qumran by the *Angelic Liturgy*. Although it is possible that the *Angelic Liturgy* may be a tradition inherited by the Qumran community, it was certainly adopted there as evidenced by the Qumran sectarian incipit to each song, “To the Master” (למשכיל). While the exact function of the *Angelic Liturgy* is disputed,[101] the parts of the *Angelic Liturgy* provide clear evidence of a mirroring of heavenly and earthly worship.[102] The *Angelic Liturgy* consists of *Songs* for the first thirteen Sabbaths of the year according to the 364-day calendar. C. Newsom discerns a pyramidal structure of three sections, with *Songs* 1–5, *Songs* 6–8, and *Songs* 9–13 each comprising a section and with *Song* 7 centrally located as a climax.[103] As Newsom summarizes the content of the individual sections, the movement of the *Songs* progresses from the establishment of the angelic priesthood and its praise (*Songs* 1–5) to elaboration of angelic praise and blessing (*Songs* 6–8) to the description of the heavenly temple and its praise, and especially of the *merkāba* and the heavenly high priests (*Songs* 9–13; anticipated in *Song* 7).[104] The first *Song* calls the angelic priesthood[105] to praise God:

---

[100] Translation of the Ethiopic tradition is from VanderKam, ibid. Cf. *Jub.* 16:28 where Israel is circumcised and sanctified so that they may be in the presence of God and the angel who are also circumcised; “For this (i.e., circumcision) is what the nature of all of the angels of the presence and all of the angels of holiness was like from the day of their creation. And in front of the angels of the presence and the angels of holiness he sanctified Israel to be with him and with his holy angels.” For discussion of biblical characters portrayed as angels in the documents collected in the Pseudepigrapha, see James H. Charlesworth, “The Portrayal of the Righteous as an Angel,” in *Ideal Figures in Ancient Judaism: Profiles and Paradigms* (ed. J. J. Collins and G. W. E. Nickelsburg; SBLSCS 12; Chico, CA: Scholars Press, 1980), 135–51.

[101] Lawrence H. Schiffman suggests that it is an exegetical description of angelic worship (“*Merkavah* Speculation at Qumran: The 4Q *Serekh Shirot ʿOlat ha-Shabbat*,” in *Mystics, Philosophers, and Politicians* [Alexander Altmann *Festscrift*; ed. J. Reiharz and D. Swetschinski; Duke Monographs in Medieval and Renaissance Studies 5; Durham: Duke University Press, 1982], 15–47). Johann Maier suggests that the recitation of the *Angelic Liturgy (Sabbath Songs)* replaced the services of the defiled Jerusalem Temple for the estranged Community (“*Shîrî ʿôlat hash-Shabbat.* Some Observations on their Calendric Implications and on their Style,” in *The Madrid Qumran Congress: Proceedings of the International Congress on the Dead Sea Scrolls Madrid 18–21 March, 1991* [ed. J.C. Trebolle Barrera and L. Vegas Montaner; 2 vols.; *STDJ* 11; Madrid: Editorial Complutense; Leiden: Brill, 1992], 2:543–60, esp. 552–53). Newsom suggests that “the cycle of the Sabbath Shirot is a quasi-mystical liturgy designed to evoke a sense of being present in the heavenly temple” (Newsom, *Songs of the Sabbath Sacrifice*, 59; more recently, see her comments in Charlesworth and Newsom, eds., *The Dead Sea Scrolls* [PTSDSSP 4A]).

[102] The question of direction of mirroring remains; is angelic worship a reflection of human worship or is human worship a reflection of the angelic? While the latter is more probable, the question cannot be answered conclusively.

[103] Newsom, *Songs of the Sabbath Sacrifice*, 13–17, and more recently in Charlesworth and Newsom, *The Dead Sea Scrolls* (PTSDSSP 4A), 288.

> Praise [the God of…]*h*, O godlike beings of all the Most Holy Ones. And in divinity […] among the eternally holy, the Most Holy Ones. And they have become for him priests of [the inner sanctum…]ministers of the presence in his glorious inner room. In the congregation of all the divine being of [knowledge…] godlike beings.[106]

Later in the same *Song*, reference is made to the "[G]o[d of] the divine beings, priests of the highest heights who [draw n]ear […]."[107]

One of the themes that is sounded in the *Angelic Liturgy* is the predestinarian idea that God has appointed the times for various events:

> A[l]l these things he has done wondrously according to his merciful plan. <and without> […] all the words of knowledge. For from the God of knowledge comes all that exists forever. And from his knowledge [and] his [plan]s have come into existence all eternally fixed times. He makes the former things [in] their [time]s and the latter things in their appointed times. And there are none among those who have knowledge (who can) discern the [wondrous] revealed things before he acts. And when he acts none of the […of] God can comprehend what he plans. For they are part of his glorious works. Before they existed [(they were) part of] his [desig]n.[108]

Unfortunately, the context of this passage from the end[109] of *Song 5* cannot be reconstructed with certainty. There are references to the "war of God" (מלחמת אלוהים) and "godlike beings in the war of the clouds" (אלוהים במלחמת שחקים) as well as "wondr[ous] new works" (מעשי חדשות פל[א]),[110] which may be the antecedent of "all these things" (כול אלה) at the beginning of the earlier quotation. If so, then this passage may refer to the war, described in the *War Scroll*, which is to occur synchronistically in the heavens and on the earth.[111] Moreover, two of the lines make reference to one who is unclean and probably to his exclusion, an idea which will be seen to be consistent with the mingling of angels and humans; "[...] he is unclean [...]*t* and not [...]*yh* and not be [...]*ym* together *k*[...]."[112]

---

[104] Charlesworth and Newsom, *The Dead Sea Scrolls* (PTSDSSP 4A), 288.

[105] For discussion of the various terms used for angels and in the description of the heavenly Temple, see Newsom, *Songs of the Sabbath Sacrifice*, 23–58.

[106] *Sabbath Song 1: A Composite Text,* lines 15 (Charlesworth and Newsom, *The Dead Sea Scrolls* [PTSDSSP 4A], 139).

[107] *Sabbath Song 1: A Composite Text,* line 20 (ibid., 141).

[108] *Sabbath Song 5: A Composite Text,* lines 14–18 (ibid., 153).

[109] Indicated by the *vacat* (see Mas1k 1.3 1.6).

[110] Lines 10, 13, and 14, respectively, of the Composite Text.

[111] See Newsom, *Songs of the Sabbath Sacrifice*, 158–59.

The mirroring of the heavens and the earth is reflected in the Qumran community's dualism. The classic Qumran expression of the dualism is found in the *Rule of the Community*, 1QS 3.13–4.26,[113] which describes the bifurcation of humans into two groups with each group led by an angelic figure:

> In the hand of the Prince of Lights (is the) dominion of all the Sons of Righteousness;
> in the ways of light they walk.
> And in the hand of the Angel of Darkness (is the) entire dominion of the Sons of Deceit;
> and in the ways of darkness they walk.
>
> ביד שר אורים ממשלת כול בני צדק
> בדרכי אור יתהלכו
> וביד מלאך חושך כול ממשלת בני עול
> ובדרכי חושך יתהלכו
> (1QS 3.20–21).

This bifurcation of forces, with humans and angels in both groups, has been ordained by God until the appointed time:

> And God, in the mysteries of his understanding and in the wisdom of his glory, set a time[114] (קץ) for the existence of deceit. And at the appointed time of visitation (ובמועד פקודה) he will destroy it for ever (לעד; 1QS 4.18–19).[115]

Although the bifurcation is attributed to God, the *Rule of the Community* assures its readers that God will intervene, at the predetermined time, on behalf of truth to eradicate deceit.

The Qumran sectarian Dead Sea Scrolls not only attest to a dualism of angels in the heavens and humans on earth, but also of the in-breakings of the angelic world on earth. Angels are present on earth in the community. The classic expressions of angelic presence is found in the form of prohibitions excluding certain people from some aspects of the community found in the *Rule of the Congregation* (1QS^a 2.3–10), the *Damascus Document* (CD MS A 15.15–17 and par. in 4QD MSS), and the *War Scroll* (1QM 7.3–6 and possible parallel in 4QM1).[116]

---

[112] *Sabbath Song 5: A Composite Text,* lines 7–8 (Charlesworth and Newsom, *The Dead Sea Scrolls* [PTSDSSP 4A], 153).

[113] In 1QS, the *vacat* at the end of 3.12 and a scribal mark between 3.12 and 13 indicate that 3.13 begins a new section. A parallel text is found in 4Q257 (4QS MS C frag. 2 col. 1). For a discussion of this passage, see James H. Charlesworth, "A Critical Comparison of the Dualism in 1QS 3:13–4:26 and the 'Dualism' Contained in the Gospel of John," *NTS* 15 (1968–69): 389–418; reprinted in *John and the Dead Sea Scrolls* (ed. James H. Charlesworth; COR; New York: Crossroad, 1990), 76–106.

[114] Or "end."

[115] Cf. the context of 4.16–26.

> And any man afflicted with one of any of the human uncleannesses shall not go into the assembly of these.[117] And any man afflicted with these shall not take his stand in the midst of the Congregation. And any one afflicted in his flesh, crippled in the legs or hands, lame or blind or deaf or mute, or stricken in his flesh visible (to the) eyes, or a tottering old man so that he is unable to sustain himself in the midst of the Congregation; these shall not g[o] to take (their) stand [in] the midst of the Congregation of the m[e]n of the name, *for the holy angels (are) [in] their [Cou]ncil* (כיא מלאכי קודש [בעצ]תם; 1QS^a 2.3–9).[118]
>
> And any one simple-minded and errant, and (whose) eyes cannot see [and] limping or lame or mute or young boy, no[t] any of these [shall go] into the midst of the Congregation, *for the hol[y] angel[s] (are) [in their midst]* (כי מלאכ[י הקוד]ש בתוכם; Composite of 4Q266 [4QD^a] frag. 8, col. 1.7–9, CD MS A 15.15–18, and 4Q270 [4QD^e] frag. 6, col. 2.8–9).[119]
>
> Not any young boy nor woman shall go into their camps when they depart from Jerusalem to go to war until their return; and any lame or blind or

---

[116] For earlier discussion of these passages, see Joseph A. Fitzmyer, "A feature of Qumran angelology and the angels of 1 Cor 11:10, " *NTS* 4 (1957–58): 48–58, republished with postscript (1966) in *Paul and the Dead Sea Scrolls* (ed. J. Murphy-O'Connor and J. H. Charlesworth; Christian Origins Library; New York: Crossroad, 1990), 31–47; and Aharon Shemesh, "'The Holy Angels are in their Council': The Exclusion of Deformed Persons from Holy Places in Qumranic and Rabbinic Literature," *DSD* 4 (1997): 179–206.

[117] Or "God," following James H. Charlesworth and Loren T. Stuckenbruck, "Rule of the Congregation (1QSa)," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 1, The Rule of the Community and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 1; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1994), 114–15 and n23 to the Heb.

[118] See transcription and translation of Charlesworth and Stuckenbruck, ibid., 114–17; see also Lawrence H. Schiffman, *The Eschatological Community of the Dead Sea Scrolls: A Study of the Rule of the Congregation* (SBLMS 38; Atlanta: Scholars Press, 1989), 37–52.

[119] Adapted from Joseph M. Baumgarten's transcriptions and translations of the 4QD MSS (*Qumran Cave 4.XIII: The Damascus Document (4Q266-273)* [DJD 18; Oxford: Clarendon, 1996], 63–64, 156–57) and of CD (Joseph M. Baumgarten and Daniel R. Schwartz, "Damascus Document (CD)," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Document, War Scroll, and Related Documents* [ed. J. H. Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995], 38–39).

> limping or a man who (has) a permanent blemish in his flesh or a man stricken with uncleanness of his flesh, all of these they shall not go with them to war. All of them shall be volunteers of war, and perfect of spirit and flesh, and ready for the Day of Vengeance. And every man who is not purified from his discharge on the day of war shall not go down with them, *for the holy angels (are) together with their hosts* (כיא מלאכי קודש עם צבאותם; 1QM 7.3–6).[120]

Although the context of the passages differs, the exclusion of certain individuals in each is based on the presence of angels. The broad context of the passage in *Rule of the Congregation*[121] is provided by its *incipit*; "And this is the rule for the entire Congregation of Israel in the latter days" (וזה הסרך לכול עדת ישראל באחרית הימים; 1QS^{a} 1.1[122]) which provides instruction for, among other things, a messianic feast immediately following the exclusion passage (see 1QS^{a} 2.11–22). The specific context of 1QS^{a} 2.11–22 is at the end of a passage that began in 1.25b–27, indicated by the *vacat* between 1.25a and b:

> And when there will be a convocation of[123] the entire assembly for judgment, or for the Council of the Community, or for a convocation of war, they shall sanctify them(selves) three days so that everyone entering shall be pre[pared for the Co]uncil.

---

[120] See transcription and translation of Jean Duhaime, "War Scroll (1QM, 1Q33)," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Document, War Scroll, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 110–11.

[121] The *Rule of the Congregation* is attested on only one extant manuscript, 1Q28, on which is also found the *Rule of the Community* (1QS) and *Blessings* (1Q28b). See Józef T. Milik, "Annexes à la règle de la communauté," in *Qumran Cave 1* (DJD 1; Oxford: Clarendon, 1955), 107–18, esp. 107 and pls. 22–24.

[122] Schiffman understands this document as providing the rules for Israel at a future time when "[t]he entire community of Israel is to be identified with the sect in the end of days" (*The Eschatological Community*, 12). The future reference is established by the references to the messiahs in 2.11–22 (cf. Talmon, "Waiting for the Messiah"). Stegemann rightly points out that despite the presence of the Messiahs, the context is still the last days of an evil age since the final War is yet to occur (see 1Q28a 1.21, 26; Stegemann, *Die Essener, Qumran, Johannes der Täufer und Jesus* [Freiburg: Herder, 1993], 159–63; followed by Annette Steudel, "אחרית הימים in the Texts from Qumran," 230–31). Although the document points to a future age, the specificity of the rules suggests that the *Rule of the Congregation* is not merely speculative. As Schiffman suggests, the rules were probably practiced in the Community in anticipation of the future (see the section entitled "The Future as a Mirror of the Present," in *The Eschatological Community*, 35–36).

[123] Following the translation of Schiffman here and later in the passage; for discussion see his *The Eschatological Community*, 29–30.

The participants in the various assemblies are instructed to “sanctify them(selves) three days”; the reason for this sanctification is eventually provided in 2.8–9; “for (the) angels of holiness (are) [in] their [Coun]cil.”

The similar exclusion passage in the *Damascus Document* (CD MS A 15.15–17) confirms that the belief in the present presence of angels was operative during the community’s existence. The context of the passage is a section in the “Laws”[124] dealing with oaths (CD MS A cols. 15–16). The structure of the passage can be outlined as follows:

15.1–6a–oaths in general and the “oath of the covenant” (בשבועת הברית)

15.6b–15a–(oath) “to return to the Torah of Moses”[125]

15.15b–19[126]–exclusion of the physically and mentally impaired

16.1–6a–(oath) “to return to Torah of Moses” with reference to *Jubilees*

16.6b–20–miscellaneous halakot re: oaths

In this passage, the oath “to return to the Torah of Moses” (לשוב אל תורת משה; CD MS A 15.9, 12; 16.1–2, 4–5) is compared (וכן in 15.6) to the “oath of the covenant” (בשבועת הברית; 15.5–6). The halakot is directed “to everyone who turns (השב) from his corrupt way” (15.7) and refer to the initiation into the sectarian community.[127] These halakot are specifically for the present “wicked time”; “And thus (also is) the precept during the entire wicked time” (וכן המשפט בכל קץ הרשע; 15.6b–7). The passage claims that the correct interpretation of the Torah of Moses has been revealed to sectarian community: “Should he err in any matter of the Torah revealed to the multitude of the camp (וכל אשר נגלה מן התורה לרוב המחנה), the Examiner shall ma[ke it known] to him and enjoin it upon him, and te[ac]h (him) for (a minimum of) one complete year” (15.13–15).[128] After discussing the exclusion of the physically and mentally impaired, the passage returns to discussing the return to the Torah of Moses;

---

[124] The *Damascus Document* comprises two large sections, often referred to as the “Admonition” and the “Laws.” Cf. Chaim Rabin, *The Zadokite Documents* (2d rev. ed.; Oxford: Clarendon, 1958). For an outline, that includes the material from the Dead Sea Scrolls, see Joseph M. Baumgarten and Daniel R. Schwartz, “Damascus Document (CD),” 5. Note that the “Laws” are introduced by “a catalogue of transgressions ending with an appeal to those who know to choose between the paths of life and perdition” (ibid., 5).

[125] Cf. 1QS 5 esp. 5.7–10 and the parallel vocabulary.

[126] A *vacat* between 15.6a and b signals the beginning of a subsection. That these instructions are for “the entire time of evil” is repeated in CD MS A 15.10 par. 4Q266 frag. 8 1.1.

[127] Cf. 1QS 5 esp. 5.7–11, which also deals with the initiation into the sectarian Community and the language parallels CD MS A 15.6b–16.6a. “He shall take upon his soul by a binding oath to return to the Torah of Moses ויקם על נפשו בשבועת אסר לשוב אל תורת מושה, according to all which he has commanded with all heart and with all soul בכול לב ובכול נפש, according to everything that has been revealed from it to the Sons of Zadok, the priest who keep the covenant and seek his will, and according to the multitude of the men of their covenant who devote themselves to his truth and to walking in his will.” (1QS 5.8–10; cf. 4Q256 and 4Q259 [4QS MSS B and D], which omit “according to all which he has commanded” thus providing a closer parallel to CD MS A 15.9–10).

> Similarly,[129] a man shall take upon himself (an oath) to return to the Torah of Moses (יקום האיש על נפשך[130] לשוב אל תורת משה), for in it everything is specified. And the explication of their times, when Israel was blind to all these; behold it is specified in the Book of the Divisions of the Times in their Jubilees and in their Weeks.[131] And on the day when a man takes upon himself (an oath) to return to the Torah of Moses (יקום האיש על נפשו לשוב אל תורת משה), the angel Mastema shall turn aside from after him, if he fulfills his words (CD MS A 16.1–5).

In this passage, “the Book of the Divisions of the Times in their Jubilees and in their Weeks” is a reference to the ancient title of the book of *Jubilees*. Moreover, the reference to *Jubilees* is framed by the phrase יקום האיש על נפשו לשוב אל תורת משה. The passage emphasizes that “in it (i.e., the Torah of Moses) everything is specified” (בה הכל מדוקדק).[132] Thus, the presence of angels is affirmed in the community which understands itself as returning to the Torah, which includes the correct calendar.

The context of the third passage, from the *War Scroll*, is the final war between the Sons of Light against the Sons of Darkness. The *War Scroll* describes the time when “the congregation of divine beings and the assembly of men, the Sons of Light and the lot of Darkness, will war together” (עדת אלים וקהלת אנשים בני אור וגורל חושך נלחמים יחד;

---

[128] Cf. 1QS 5.8–10 where the initiate swears “to return to the Torah of Moses … according to everything which has been revealed from it to the Sons of Zadok” (לכול הנגלה ממנה לבני צדוק).

[129] Baumgarten translates כן as “Therefore.” כן probably functions comparatively as in 15.6 where a comparison is made between the oath of the covenant and the (oath) to return to the Torah of Moses. Here, in 16.1, the previous sentence ends “with you a covenant and with all Israel” and כן marks a transition to the “(oath) to return to the Torah of Moses.”

[130] Read **ופאו** (see line 4; see also 4Q271 frag. 4 2.4).

[131] This is the ancient title of *Jubilees*. See earlier note, which discusses the evidence for *Jubilees* as a tradition inherited by the Qumran Community.

[132] Note that this is consistent with 1QS 5.9, where what has been revealed to the Sons of Zadok “has been revealed from it” (הנגלה ממנה), i.e., the Torah of Moses in 5.8.

1QM 1.10–11). The Sons of Light include “the sons of Levi, the sons of Judah, and the sons of Benjamin, exiles of the wilderness” (1QM 1.2), while the opposition is identified as the foreign armies of Edom, Moab, Ammon, Philitia,[133] the Kittim of Asshur,[134] as well as other Jews, “the ones violating the covenant” (מרשיעי ברית;[135] 1QM 1.2). The angelic figures include the “Prince of Lights” (שר מאור; 1QM 13.10; cf. שר אורים in 1QS 3.20), Michael, Gabriel, Sariel, Raphael (1QM 9.15–16), and others who are waging war “against the army of Belial” (בחיל בליעל; 1QM 1.1) which includes “the spirits of his lot, the angels of emptiness” (רוחי גורלו מלאכי חבל; 1QM 13.11–12 par. 4QM5 frag. 2, line 4).[136] The outcome, which includes the defeat of the Kittim and the rest of the Sons of Darkness, as well as the events preceding it have been predetermined by God: “On the day of the Kittim’s fall, there shall be clash and fierce carnage before the God of Israel, for this is the day he has appointed long ago for a destructive war against the Sons of Darkness” (כיא הואה יום יעוד לו מאז למלחמת כלה לבני חושך; 1QM 1.9-10; cf. 1. 8–9, 15.4–5).

The imagery of the *War Scroll*, however, attests to more than some sort of parallel universes with two separate battles occurring. Rather, as we have seen from the exclusion passage, the angels are said to be present on the side of the Sons of Light; “for the holy angels (are) together with their hosts” (כיא מלאכי קודש עם צבאותם יחד; 1QM 7.6). A copy of the *War Scroll* preserves a parallel tradition:[137] “for the holy angels (are) togeth[er] in their lines (כיא מלאכי בערכותמה יח[ד]; 4Q491 frags. 1–3 line 10). Elsewhere, the members of the community, which are now considered to be Israel, are called “ones seeing holy angels” (ורואי מלאכי קודש; 1QM 10.10–11). The language of divine presence is heightened in several of the prayers which comprise a major section of the *War Scroll*.[138] One of the prayers addressing God, comprising 1QM 12.7–16,[139] affirms that "the congregation of your Holy Ones (is) in our midst for an everlasting help" (ועדת קדושיכה בתוכנו לעזר עולמי[ם]; 1QM 12.7). The prayer continues by asserting that even God is in their midst:

---

[133] See the discussion by Yadin, *The Scroll of the War*, 21–22.

[134] See ibid., 22–26.

[135] Cf. Dan 11:32. See the discussion by Yadin, ibid., 26.

[136] See ibid., 229–42, and cf. Duhaime, “War Scroll,” (PTSDSSP 2), 86–87. Duhaime, however, understands the Sons of Darkness as being the army of Belial.

[137] See the comments of James H. Charlesworth and Brent A. Strawn who are responsible for the notes to the Hebrew text in Duhaime, “War Scroll,” (PTSDSSP 2), 110n94 and 144n16.

[138] Duhaime outlines the major sections of 1QM as follows: 1.1–end: Introduction; 1 end–9 end: Organization and Tactics; 9 end–14 end: War Prayers; 14 end–20?: The War against the Kittim (ibid., [PTSDSSP 2], 80; cf. Yadin’s outline [*The Scroll of the War*, 14]: cols. 1–2: War Series; cols. 2–9: Battle Serekh Series; cols. 9–14: Ritual Serekh Series; cols. 15–19: Kittim Series.

> For the Lord (is) holy and the glorious king (is) with us, with the Holy Ones, migh[ty ones and] the host of angels (are) in our ranks;
> and the mighty one of wa[r] (is) in our congregation and the host of his spirits (is) with our foot-soldiers and our horsemen [...]
>
> כיא קדוש אדוני ומלך הכבוד אתנו עם קדושים גבו[רים ו]צבא מלאכים[140] בפקודינו
> וגבור המלח[מה] בעדתנו וצבא רוחיו עם צעדינו ופרשינו[
> (1QM 12.8–9).

The imagery of God's presence on the side of Israel in the war draws from biblical traditions. This influence is explicit in 1QM 10.1–5 which quotes Deut 20:2–4 (cf. Deut 7:21, 23:10–15; Exod 23:20–33):

> And thus he made known to us that you (are) in our midst, O great and fearful God (כיא אתה בקרבנו אל גדול ונורא), to plunder all our enemies be[fore u]s. And he taught us concerning our generations, saying, "When you draw near to war, the priest shall stand and say to the people, 'Hear, O Israel, you (are) drawing near today to war against your enemies. Do not fear and do not let your hearts be faint and do not be alar[med, and do n]ot tremble before them, for your God (is) going with you to war for you with your enemies to save you'" (כיא אלוהיכם הולך עמכם להלחם לכם עם אויביכם להושיע).[141]

The language is personalized in another version of the *War Scroll*[142] in which the subject speaks in the first person singular:

---

[139] The boundaries of the prayer are indicated by the vacant line 6 and the *vacat* at the end of line 16. A parallel is preserved in 4Q492 (4QM2) frag. 1 and the prayer bears similarities to that in 1QM 19 (see notes to Duhaime, "War Scroll," [PTSDSSP 2], 120). The prayer begins by addressing God; "And you, O God,..." (ואתה אל; 1QM 12.7).

[140] Cf. 1QM 19.1: כיא קדוש אדירנו ומלך הכבוד אתנו וצ[בא ("For our majestic one (is) holy and the glorious king (is) with us and the h[ost...]."

[141] For differences with the MT, see Yadin, ibid., 304. Translation generally follows Duhaime, ibid., [PTSDSSP 2].

[142] The fragmentary remains of 4Q491 (4QM1) frag. 11, col. 1 do not preserve parallels with the extant portions of 1QM; column 2, however, may preserve parallels to 1QM 16.3–6. Duhaime judges 1QM and 4QM to preserve different recensions of the *War Scroll* (ibid., [PTSDSSP 2], 82), a judgment confirmed by the apparatus provided by Charlesworth and Strawn.

> And one is not exalted besides me, and one does not come to me, for I have sat on […]*h* in the heavens (כיא אני ישבתי ב[…]ה בשמים; 4Q491 [4QM1] frag. 11, col. 1.13);
>
> I am reckoned with the divine beings, and my place (is) in the holy congregation (אני עם אלים אתחשב ומכוני בעדת קודש; 4Q491 [4QM1] frag. 11, col. 1.14);
>
> […f]or I am reckon[ed] with the divine beings [and] my glory (is) with the sons of the king ([כ]יא אניא עם אלים אחש[ב ו]כבודי עם בני המלך; 4Q491 [4QM1] frag. 11, col. 1.18).

Although the text is fragmentary, the speaker is probably human, a member of the community.[143] Thus, the *War Scrolls* asserts angelic and divine presence in the camps of the community during the War, and even the apparent exaltation of at least one member to the heavens.

CONCLUSION

The term "time" has allowed us to discuss several interrelated aspects of the Qumran community's thought: the calendar and halakot, the predetermination of history, and the cosmic dimensions of the calendar. The Qumran community followed a 364-day solar calendar structured around the Sabbaths. This calendar differed from the 354-day lunar calendar followed by the ruling priests in the Jerusalem Temple. Since the times of worship had been commanded by God, failure to worship at the correct time violates God's Torah. The Qumran community also believed that the terrestrial worship of the Jerusalem Temple was to be synchronized with the celestial worship in the heavens. From the point of view of the community, the Jerusalem establishment, by following the wrong calendar, severed the cosmic synchronicity, and thus the continuum, between the heavens and the earth. This led the community to believe that they were living in the "latter days" of an evil generation predetermined by God, and to await the appointed time when God will intervene on behalf of truth to eradicate deceit. By following the same calendar as the angels in the heavens, the Qumran community believed they maintained the synchronicity. The synchronicity between the angelic and human realms culminates in the confluence of the heavenly realm and the earthly realm in the community's experience, with the community's affirmations that angels, as well as God, are present in their midst and that human(s) are exalted to the heavens to be reckoned with the angels.

CHAPTER ELEVEN

PREDESTINATION IN THE BIBLE AND THE DEAD SEA SCROLLS[1]

Magen Broshi

The study of the Dead Sea scrolls started with the right foot forward–the seven Scrolls discovered in 1947 were quite well preserved and among the most important of the 900 manuscripts unearthed in the decade 1947–1956.

It is frightening to think what would have been the state of the research had it started with the shabby 15,000 fragments of Cave 4. It is no secret that, even so, the scholarly community has known in the past half century plenty of disagreements, some of which were quite acrimonious.

Four of the scrolls are sectarian, i.e., Essene, and would have been shortlisted by almost any scholar who would be asked to compile a list of the ten most important scrolls.[2] Just a year after the publication of the Manual of Discipline, it became clear that the single most important theological element in this composition is its firm belief in predestination, to be precise, *double* predestination.[3] This element is what differentiates it sharply from "Normative Judaism." In short time it will become apparent that this belief in predestination is common also to the other three scrolls: the *Thanksgiving Scroll*, the *War Scroll*, and the *Habakkuk Commentary*. That predestination lies at the foundation of the sectarian teachings will reach soon almost a status of *opinio communis*.[4]

---

[1] This a slightly revised and updated version of a chapter in my book, *Bread, Wine, Walls and Scrolls* (JSPSup 36; Sheffield; Sheffield Academic Press, 2001), 238–51. I dedicate this essay to the blessed memory of Prof. David Flusser, an eminent scholar and inspiring teacher.

[2] The other six Sectarian scrolls, in my opinion, would be: the *Damascus Document*; the *Temple Scroll*; MMT (*Miqsat Maᶜase ha-Torah*); *Angelic Liturgy*; the *Nahum Commentary*; and the *Book of the Mysteries*.

[3] William H. Brownlee, "The Dead Sea Manual of Discipline," *BASORSup* 10–12 (1951): 4–60; Karl G. Kuhn, "Die Sektenschrift [1QS] und die iranische Religion." *ZTK* 49 (1952): 296–316.

[4] Friedrich Noetscher, *Zur Theologischen Terminologie der Qumran Texte* (Bonn: Peter Hanstein, 1956); Jacob Licht, "Legs as Signs of Election," *Tarbiz* 35 (1965–66): 18–26; David Flusser, "The Dead Sea Scrolls and Pre-Pauline Christianity," in *Judaism and*

Predestination will be the main argument in identifying the Dead Sea Sect with the Essenes. Josephus tells us that of the three "philosophies" the Pharisees say that some events are the work of fate (*heimarmenos*); The Sadducees "do away with fate," believing that "all things lie within our power," but the Essene are of the opinion that "fate is the ruler of all things, and nothing can happen to people except it be according to its decree" (*Ant.* 13.171–73; 18.18). Using the term fate is the closest Josephus, a very well informed informant, could get when trying to convey the meaning of divine providence to his pagan readers.[5]

No monotheistic religious system can adhere exclusively to either predestination or free will. Sanders correctly turned our attention to the fact that no form of Judaism known to us (except, perhaps, for the Sadducees) considered predestination and free will to be incompatible.[6] In both Judaism and Christianity those two contradictory tenets live paradoxically side by side, at different times in different amounts. Not until the Middle Ages was any attempt made to reconcile the two.

The Hebrew Bible, a collection of writings of various and numerous genres composed during almost 1,000 years is certainly not a homogenous collection. However, it is an anthology upholding free will. The Lord has relegated some of his power to humans ("Thou hast made him a little lower than the angels," Ps 8:5) including the freedom to defy God's will. This freedom allows a person to choose the way of righteousness but it is also a freedom to choose the way of sin and evil. "Behold, I set before you this day a blessing and a curse. A blessing if you obey the commandments of the Lord your God....and a curse if you will not obey the commandments" (Deuteronomy 26–28). An important element is that the gates of repentance are always open (e.g., Deut 4:30–31; Ezek 14:6 et passim). "The Bible never represents God as causing man to sin in the first instance, he hardens the heart of the voluntary sinner to prevent him from repenting"[7] Thus God hardened the heart of Pharaoh and yet punished him severely (e.g., Exod 4:21–24). The same is the lot of king Sihon (Deut 2:30) and the Canaanites (Josh 11:20). Paul repeats the

---

the Origins of Christianity (Jerusalem: Magnes Press, 1988), 220–22; Helmer Ringgren, *The Faith of Qumran: Theology of the Dead Sea Scrolls* (New York: Crossroads, 1995).

[5] Prof. David Flusser told me that in the early fifties, the late Prof. Gershom Scholem had doubts about the suggested identification with the Essenes. When Flusser pointed out to him that there is an agreement between the predestinarianism of the Sect and the evidence of Josephus, he was immediately convinced.

[6] Ed P. Sanders, *Paul and Palestinian Judaism: A Comparison of Patterns of Religion* (London: SCM Press, 1977), index s.v.; idem, *Paul* (Oxford: Oxford University Press, 1991), 42–43.

[7] Yehezkel Kaufmann, *The Religion of Israel* (Chicago: University of Chicago Press, 1960), 76, 327–29.

motive of hardening the heart, but for him it had a predestinarian nature (e.g., Rom 9:17–18).

"THE TREATISE OF THE TWO SPIRITS" AND OTHER PREDESTINARIAN DEAD SEA SCROLLS

Our starting point, and the basis of our research, will be a text that is the only extant theological treatise in Jewish literature prior to the Middle Ages. The text, part of the Manual of Discipline (1QS 3.13–4.26), is quite a sizable composition, 40 lines, some of which are almost 20 words long.

> From the God of Knowledge comes all that is occurring and shall occur. Before they came into being he established all their design; and when they come into existence in their fixed times they carry through their task according to his glorious design. Nothing can be changed. (1QS 3.15–16)[8]

This succinct preamble encapsulates the gist of the whole treatise: the world is governed by the principle of dual predestination–the Lord has preordained everything in it and let the "two spirits," the "Spirit of Truth" and the "Spirit of Falsehood," conduct its affairs. This is an eloquent and lucid exposition of the basic teachings of the Dead Sea Sect, i.e., the Essenes. As we shall see later, there is a high probability that this treatise belongs to a pre-Essene or proto-Essene stage but it became the most important sectarian component in their teaching.[9] The doctrine of dual predestination looms high also in the other three of the original sectarian scrolls and we would like to mention briefly the manifestations of this tenet in these works.

The Thanksgiving Scroll is a collection of psalm-like hymns, personal prayers in which the author thanks God for saving him, a salvation due to election, i.e., predestinarian salvation. The antithesis of God's glory versus man's lowliness is repeated time and again. The poet describes himself as "…a shape of clay kneaded in water, a ground of shame and a source of pollution" (1.23–24).[10]

[10] Translation from Geza Vermes, *The Dead Sea Scrolls: Qumran in Perspective* (London: Collins World, 1978).

He enjoys the Lord's favors not because he merits it but due to God's compassion and kindness. The work is permeated throughout with a dual predestinarian *weltanschauung*:

> In the wisdom of thy knowledge
> Thou didst establish their destiny before ever they were.
> All things [exist] according to [Thy will]
> And without Thee nothing is done. (1:20–21)[11]

The Habakkuk Commentary, the best preserved and arguably the most important of the commentaries, is a very typical Essene composition. Not only did it teach us for the first time about their particular solar calendar, but the predestinarian doctrine is its cornerstone. Of this work we will single out a telling passage, 7:5–14, which Lange deals with ably.[12] These verses express the principal Essene idea of a preexistent order of the world. All the course of history follows a divine design: "As He has inscribed them in the mysteries of His wisdom" (7:13–14).

Needless to say that we could go on and quote many Dead Sea Scrolls passages that are based on the doctrine of predestination.

THE ESSENE SOLUTION TO THE CONTRADICTION BETWEEN DUAL PREDESTINATION AND REALITY

The Essenes were aware of the difficulty of reconciling the two, and they devised a solution: It is true that we are born into either of the camps–that of the Children of Light or of the Children of Darkness, and there is no crossing from the latter camp to former, i.e., no repentance. Repentance, it ought to be remembered, is one of the basic tenets of "normative" Judaism. The Essenes upheld a system in which every human being is composed of nine parts–some of light and some of darkness (4Q186 [*Horoscopes* or 4QCryp^{a}]).[13] By this system, in which the number of parts is uneven, everyone belongs to one of the two camps. Thus, a figure discussed in this text (lines 5–9) is made of six parts of the "House of Light" (an astrological term, of course) and three of the "House of Darkness," therefore he belongs to the Children of Light. However, his "dark" parts explain misbehavior for which he is accountable. This accountability is reflected in the penitential code (Manual of Discipline 6.24–7.25), a list of offences for which members of the community were punished. For example, "whoever interrupts his neighbor's words: ten days" (7.9–10, probably cutting the food rations).

Alexander, "Physiognomy, Initiation, and Rank in the Qumran Community," in *Geschichte–Tradition–Reflexion 1: Festschrift Für Martin Hengel* (ed. P. Schaeffer et al.; Tübingen: Mohr Siebeck, 1996), 385–94; Francis Schmidt, "Astrologie juive ancienne. Essai d'interpretation de 4QCriptique (4Q186)," *RevQ* 18 (1995): 97–113.

The Essene cardinal tenet, predestination, finds expression also in their reliance on astrology, or to be more precise, zodiacal physiognomy. In the composition referred to above, 4Q186, in which man's time of birth (or rather, as Schmidt has suggested lately, the time of conception, similar to the Chinese way of reckoning) and his physical features predetermine his fate. These are things one carries with him all his life without a possibility to change anything and the astrological system used by the Essenes falls neatly into their predestinarian theology.[14]

THE ORIGIN OF THE ESSENE DOUBLE PREDESTINATION

Just as the dual predestination was detected in the Scrolls, it was also suggested that this doctrine was formulated under Zoroastrian influence.[15] This is highly probable, but far from certain. The main difficulty of establishing an Iranian influence, or lack of it, lies in the fact that the extant pertinent Iranian texts are considerably younger than their Jewish counterparts.[16] Moreover, it ought to be borne in mind that full fledged predestination–the belief in omnipotent and omniscient God who has an absolute command of the world affairs is a logical, consequential development of extreme monotheism.

Of greater pertinence to our subject are Lange's studies on Wisdom and Predestination.[17] Lange proposes a theory which posits the existence of pre-Essene or proto-Essene sapiential literature and that this literature was one of the sources of the Essene dual predestination. Of this literary school at least four compositions have survived: Sapiential Works *A*$^{a-e}$, 4Q415–418, 423, the *Book of the Mysteries*, the *Treatise of the Two Spirits*, and the fifth song of the *Angelic Liturgy*.[18] Two of these works have been preserved in several copies–4QSap A in eight manuscripts, the *Book of the Mysteries* in four exemplars, a fact that attests to the importance ascribed to this genre.

[14] Alexander, ibid.; Schmidt, ibid.

[15] Kuhn, ibid.

[16] Shaul Shaked, "Iranian Influence on Judaism: First Century B.C.E. to Second Century C.E.," *CHJ* 1:308–25.

[17] Lange, *Weisheit und Praedistenation*; idem, "Wisdom and Predestination."

The common denominator of these texts is their belief in "a preexistent, hidden, sapiential order of the world, dualistic in character."[19] These texts lack the distinctive vocabulary of the Qumranic community, the *Yāḥad*. However, it has been shown that the Manual of Discipline is not a homogenous composition but an anthology of several literary works.[20] The *Treatise of the Two Spirits*, described above as the fullest, most eloquent exposition of the doctrine of the dual predestination, is missing from one of the Cave 4 manuscripts (4Q259) and perhaps also from at least one other, a proof that it was not an integral part of the manual.[21] This is one of the strong arguments for ascribing it to a pre-, or proto-Essene stage.

Another source of the Essene predestinarian doctrine is the Apocalyptic literature. The debt of Qumran to their Apocalyptic predecessors represented by *1 Enoch*, *Jubilees*, and the *Testament of Levi* had been recognized already in the earliest stages of the research and is still one of the fruitful fields of research for Qumranologists.[22] The first two books were preserved until now primarily in their Ethiopic translations and the Testament in Greek and other languages. Qumran has now furnished us with parts of the original texts: *1 Enoch* and the *Testament of Levi* in Aramaic and *Jubilees* in Hebrew.[23] The pre-Essene origin of these books is shown by their early date (as suggested both by paleographic and radiocarbon considerations, by content (lacking certain basic Qumranic elements), and by the use of Aramaic (the Essene literature uses Hebrew exclusively).[24] These books share with the Essene literature the belief in evil demons and angels, the idea that history is composed of cycles of periods, and fervent eschatological expectations. Of great significance is also the use of the solar calendar of 364 days.

---

[18] Even if these works are pre- or proto-Essene, they are still to be regarded as sectarian, i.e., Essene. It is a significant fact that *1 Enoch* and *Jubilees* were preserved and books like the *Book of the Mysteries* were not.

Vanderkam and Jozef T. Milik, "Jubilees," in *Qumran Cave 4.VIII: Parabiblical Texts, Part 1* (ed. H. W. Attridge et al.; DJD 13; Oxford: Clarendon, 1994), 1–185.

Apocalypticism is predestinarian by definition: if the secrets of the future can be revealed it means that the course of events is not open-ended, it is predestined.

The existence of a predestinarian school can be adduced also from Sirach's (Ecclesiasticus) two anti-Essene pronouncements.[25] Apparently Qumran's Censorship Board has not detected those miniscule polemical passages and the book was granted a *nihil obstat* and thus we have at least one copy of the book (2Q18). The few verses included in 11QPs 51:13–17, were not, most probably, authored by Sirach. A polemical passage (43:6–7) arguing against the solar calendar and extolling the role of the moon, and hence the lunar calendar, should not occupy us here but another, predestinarian, one is quite significant:

> Say not: "It was because of the Lord that I fell away"
> for He will not do things that He hates.
> Say not: "It was He that led me astray"
> For He has no need for a sinner. (11QPs 15:11–12)

As Sirach was composed most probably no later than the eighties of the second century B.C.E. and the formation of the Essene sect must have taken place, according to mainstream scholars, in the aftermath of the Maccabean revolt, closer to the middle of the century,[26] it seems that Sirach is about one generation older.

In short, the Essene theology was founded at the confluence of two currents—the Apocalyptic and Sapiential.

PREDESTINATION IN THE PAULINE EPISTLES

In this chapter we would like to suggest that the predestinarian elements in Paul's teachings were formed under Essene influence. Having been later handed over to certain schools in western Christianity, the doctrine of predestination ought to be regarded as one of the most important Essene contributions to world civilization, and certainly a significant one. The principal pertinent texts are to be found in Romans 9–11, but let us first start with three verses from the former chapter, 8:28–30:

> We realize that all things work together for the good for those who love God, for those who are called according to His purpose. Those whom He foreknew, He also predestined to be conformed to the image of His son that he might be the firstborn among many brothers. Those whom He predestined, He also called; Those whom He called, He also justified; And those whom He has justified He, He also glorified.[27]

The last verse (v. 30) specifies all the stages: predestining–calling–justifying–glorifying. If this is not an explicit formulation of the predestinarian doctrine, the present author does not know what is. However, certain students of the epistle try to minimize the significance of this and other similar expressions and consequently Paul's indebtedness to the Essenes. They claim that Paul's pronouncements about election and predestination concern people, not individuals,[28] or that "What Paul asserts here in this regard is stated from 'corporate' point of view. He does not have in mind the predestination of individuals."[29]

Close reading of this passage does not necessarily lead to this interpretation, and Ziesler himself admits that this is a possibility not a must.[30] This and compatible passages in chapters 9–12 deal with the status of Israel versus that of the Gentiles, therefore the destiny of individuals is not discussed specifically. There is no indication, though, that Paul made the assumed distinction between the corporate and the individual. The same could be said also of this passage:

> ….But even when Rebecca had children by one and the same man, our father Isaac–even before they were born or done anything good or evil, in order that God's purpose in election might persist, not because of deeds but because of his call–it was said to her: "The older shall serve the

[29] Fitzmyer, ibid., 523.

[30] Ziesler, ibid.

> younger." As it stands written: "Jacob I loved, but Esau I hated." (Rom 9:10–13)[31]

Paul was fully aware of the basic moral difficulty that predestination poses, i.e., damnation without having sinned:

> What then shall we say? Is God unjust? Certainly not! (Rom 9:14).

The adequacy of Paul's solution is beyond the scope of this paper, but the fact that he felt the injustice inherent in predestination is noteworthy.

We could go on and quote a number of other predestinarian Pauline passages (e.g., Phil 2:13b–14),[32] but we will conclude with only one more:

> "Therefore He has mercy on whomever He wills and hardens the heart of whomever He chooses" (Rom 9:18).

This was chosen by Otto as the pure and proper predestinarian expression.[33]

Sanders is certainly right in saying that "precisely how we should formulate the balance between predestination and decision is difficult to say."[34] Side by side we have a verse just quoted (9:18) and a chapter later (10:13–17) we are confronted with the sequence preaching–hearing–faith which absolutely disregards predestination. Caird has shown clearly how Paul's epistle irenically harbors contradictory, conflicting views.[35]

On the influence of the Essenes on Paul there is almost a unanimous agreement.[36] Even without the amazing passage in 2 Cor 6:14–7:1, which reads like a classic Qumranic text, slightly adapted and Christianized,[37] there are numerous points of contact between the Pauline corpus and the Scrolls. The channels through which the Essene influence reached Paul are not known to us, but there is absolutely no doubt about the existence, the intensity and significance of such an influence. In 1963 H. Braun gathered parallels between Paul's epistles and Qumranic literature known at his time and reached an impressive number of 100.[38] Thirty years later, H.-W. Kuhn and his colleagues had detected no less than 400 such cases.[39] Relationships between Dead Sea Scrolls passages and Romans have been dealt with also by Flusser.[40]

[36] "Almost." Heikki Räisänen, "Paul, God, and Israel: Romans 9–11 in Recent Research," in *The Social World of Formative Christianity and Judaism: Essays in Tribute to Howard Clark Kee* (ed. J. Neusner et al.; Philadelphia: Fortress, 1988), 183–84, gives the impression that the notion of double predestination in Romans was somehow a Pauline invention. See also Elizabeth Johnson, in *Pauline Theology. Vol. III: Romans* (ed. D. M. Hay and E. E. Johnson; Minneapolis: Fortress, 1995), 22–24; reissued under the same title by SBL (SBLSymS; Atlanta: Scholars Press, 2002), 21–23.

[37] Joseph A. Fitzmyer, *Essays in the Semitic Background of the New Testament* (London: Geoffrey Chapman, 1971), 205–17.

We would like to conclude with another predestinarian expression. This is a very popular verse, one of the most popular in the New Testament–Luke 2:14. In the version known to everyone who received ever a Christmas card it says: "Peace upon earth to all people of good will." This is an excellent example of a "progressive" message, something that seemingly suits practically almost every ideology. But, indeed, it does not. The true meaning became clear only after the publication of the *Thanksgiving Scroll*, which helped us understand that the verse should be rendered something like: "Peace upon earth among people of *His good will*." That is something different altogether. Peace will be granted to those whom the Lord has elected, not to people with good intentions or good deeds to their credit. This is a predestinarian statement *par excellence* which shares the same worldview as the author of the *Thanksgiving Scroll* who speaks also of "sons of His good pleasure" (4.32–33).[41] Flusser has shown convincingly that the original Lukan verse was altered slightly by a later copyist in order to grant it the predestinarian meaning. The copyist may have possibly been under Pauline influence.[42]

CONCLUSION I

The space limitations of this paper, as well as the limitations of the present author's competence, preclude a more detailed and comprehensive treatment of the subject. Certain important pertinent terms such as election, grace and others that loom large in both the Scrolls and the New Testament have not even been mentioned. However, we feel that we have achieved, partially at least, two objectives. First, by reintroducing the subject into the scholarly discourse. This is a claim that begs explanation.

Indeed, as we have mentioned in the introduction, this subject had been dealt with ably already almost half a century ago. It was discussed in very good monographs: by Eugene Merrill and recently by two young German scholars, Günter Röhser and Armin Lange.[43] On the other hand, it is often glossed over or totally ignored. In Kuhn's study on the impact of the Qumran scrolls on the understanding of Paul,[44] predestination is not even mentioned. This is also the case of Stuhlmacher.[45] In the six volumes of the *Anchor Bible Dictionary*, one of the finest publications of its kind, there is neither an entry for free will, nor one for predestination.[46] There is even a study which denies the existence of any predestinarian ideas in Paul.[47] The same Caird who authored one of the most perceptive essays on the subject[48] has nothing to say in his posthumously published book.[49] Or is this the responsibility of his editor?

Our second objective is to underline what seems to us to be the most important contribution of the Essenes to Christian theology–the doctrine of predestination. They, or rather their immediate predecessors, the sapiential proto-Essene school, were the first to crystallize and preach the doctrine of predestination. Predestination is by definition monotheistic.[50] Members of "normative" Judaism (i.e., the Pharisaic, Rabbinical mainstream) were predominantly adherents of free will[51] and the Sadducees rejected predestination. Predestination was the cornerstone of the Essene theology, and the primitive church, especially Paul, were exposed to the teachings of the Essenes. The exposure of Jesus and the early Christians to Essene influence is beyond dispute; the difference between scholars is the weight they ascribe to it. Be it as it may, there is no denying that

[48] Caird, "Predestination: Romans IX–XI."

[49] George B. Caird, *New Testament Theology* (ed. L. D. Hurst; Oxford: Clarendon, 1994).

[50] Without entering into a lengthy terminological discourse we would like to point out that predestination is the monotheistic system of predeterminism.

[51] Ephraim E. Urbach, *The Sages, their Concepts and Beliefs* (Cambridge, MA: Harvard University Press, 1987), 255–85.

Paul's teachings have influenced Christian theologians, from Augustine onward, in formulating their concept of predestination.

CONCLUSION II

> Hic liber est in quo quaerit sua dogmata quisque,
> Invenit et pariter dogmata quisque sua
> This is the book in which each one seeks his own dogmas,
> and likewise finds his own.[52]

The Epistle to the Romans is universally agreed to be the most important text in the New Testament. Even if Melanchthon's dictum claiming that this is the summary of all Christian doctrine is somewhat inflated, this slim composition is still arguably the most important text in western civilization. It was extraordinarily popular in antiquity and it has remained so for almost two millenia. Between 1960–1980 appeared no less than 1,176 publications concerning the Epistle.[53] As we have shown earlier, predestinarian pronouncements are to be found in other Pauline Epistles, as well as in other books of the New Testament. Romans exercised tremendous influence on Christians throughout the ages.[54]

Even if we concede that Paul misinterpreted the Essene teachings (which we believe is not the case) and that Augustine misconstrued Paul (ditto)–about Luther's and Calvin's indebtedness to Augustine there is not the least doubt; the line of transmission is crystal clear.

Predestination is not just an idle philosophical or theological concept, it played a major role in world history–this is one of the basic ideas responsible for the rise of capitalism.[55]

CHAPTER TWELVE
RESURRECTION: THE BIBLE AND QUMRAN

Émile Puech

In every age, man has asked himself about the meaning of his existence, of the universality and inexorableness of death which strikes unexpectedly. To this basic question he does his best to find answers which, inevitably, reflect his cultural environment and his general immersion in human history. Embedded in the civilizations of the ancient Near East, biblical man was no exception. This is particularly true of the Canaanite milieu of the late second millennium B.C., whose culture, language, script, literature, and religious practices, ancient Israel absorbed. Well known are all the difficulties the prophets and sages of Israel encountered in overcoming these deeply rooted cultural and cultic traditions in order to impose the monotheism associated with the God of the Covenant. Within this Canaanite milieu there was belief in a more or less diffuse notion of life after death, founded, no doubt, at least in part upon observations of the cycles of nature without it being, however, a notion of reincarnation. It was familiar with the cult practices performed over the tomb of one who had departed for "the land of no return" (*erṣet la tāri*) and who had come under the power of the infernal deities. In fact, death then is not taken as an ultimate dissolution, but as an entrance into another world: one of silence and shadows.

I. THE BIBLE

Even more than the Canaanite Baal, vanquisher of Mot (Death) and Yamm (Sea), Yahweh is the God of the living and the dead, the creator of heaven and earth–Sheol is under his domination (1 Sam 2:6). The God of the covenant is a jealous God who would not tolerate a cult of the dead incompatible with monotheism. He is considered to be the judge who loves justice and the law–indeed he does not allow an offense to go unpunished even after death. For divine justice is not to be taken as flawed on account of the present prosperity of the wicked or the premature death of the just. The recognition of individual responsibility by the prophets and sages (Jer 31:29–30, Ezekiel 18 and 33, etc.) parallels that of retribution beyond the grave (Psalm 73; Prov 12:28, 14:32, etc.). Without doubt, in death all men return to the earth, but the meaning of Sheol has received a new connotation. From indicating a dwelling place of shadows and silence common to all, it comes to designate a place of temporary sojourn, of sorting out, of rewards and punishments (Ps 16:9–10; 49:10–16;[1] Prov 15:24) and, finally, the place of eternal chastisement.

Ezekiel 37

If God, the creator, causes descent to Sheol, he also causes ascent from it. He is the one who brings about death, but also the one who gives life, the one who strikes down and heals, judging and correcting the behavior of his wayward people. Note Hos 6:1–3 or, again the parable of the dry bones in Ezek 37:1–14, which, at the time of the exile, originally alluded to the restoration of Israel as a nation upon its land. Nevertheless, the choice of metaphor, for it to be comprehensible, suggests that the reader/audience could be familiar with a belief in resurrection/return to life. This is also what seems to underline the language of the account of a creation in two stages: the reformation of the body and the infusion of the spirit. But given the prophetic remarks over the graves (Ezek 37:12–14), the metaphor of the restoration of Israel upon its own land must have fueled speculation and brought in another belief to which later tradition witnesses: the resurrection of the dead of the people of God and even that of only the just of the people, according to the degree of the refinement of the notion of individual as opposed to collective responsibility.

Isaiah 26

The "little apocalypse" of the book of Isaiah is situated within the context of the sages' and the pious' rereading of the prophetic writings. Some verses of this poetic description announce the ultimate vanishing of the enemies (Isa 26:14), in contrast to life returned to the dead of the people of God (Isa 26:19). In fact, the passage builds upon this opposition: the fate of the wicked (vv. 9–14) and that of the people of Yahweh (vv. 15–19):[2]

---

[1] See Émile Puech, *La croyance des Esséniens en la vie future: immortalité résurrection, vie éternelle? Histoire d'une croyance dans le judaïsme ancien* (*Ebib* 21–22; Paris: Gabalda 1993), 52, where we have shown that Ps 49:15–16 already probably knows of a compartmentalization of Sheol as does *1 Enoch* 22.

> The Dead do not live; shades do not rise–because you have punished and destroyed them and wiped out all memory of them (v. 14).
>
> Your dead shall live, the corpses shall rise. O dwellers in the dust, awake and rejoice because your dew is a radiant dew, and the earth of shades will give birth (v. 19).

Whereas some perished forever, others shall revive and be resuscitated for a blessed life. The vocabulary used is typical of that which would be repeated later within indisputable contexts of resurrection: "your dead will live" (מתיך יחיו), "the corpses will rise" (נבל[ו]ת יקומון), "O dwellers in the dust, awake and rejoice" (הקיצו ורננו שכני עפר), "the land of shadows gives birth" (וארץ רפאים תפיל). This passage is an undeniable witness to the certainty within this pious circle of Jews of a life after death and a resurrection of the just of the people of Yahweh already at an early date (at least in the third century B.C.).

The certainty of life after death and the resurrection of the people of Yahweh came to be joined in a passage of clearly eschatological nature. The hope of ultimate salvation is expressed in the form of a banquet upon Zion where God will gather all the peoples who will see the salvation of God for his people and the chastisement of the impious of whom the archetype is Moab (Isa 25:10–12). Whether or not there is a notion of resurrection in these lines, the author expresses here the firm conviction of God's definitive victory over death and his dominion over life (Isa 25:6–8).

Job

Similarly on his part, Job could have nourished a hope of a miraculous resurrection in this life (Job 19:25–27):

> For I know that my Redeemer lives, and that at the last he will stand upon the dust. But after my skin has been thus destroyed, then in my flesh I shall see God. Because I myself shall see him, my eyes saw and not a stranger, and my heart fainted within me (Job 19:25–27).

Because of faith, Job knows that God is capable of awakening the dead (1 Kgs 17:22) and making them ascend from Sheol. In certain ways, the hope of Job is related to that of the suffering servant of Isaiah (Isa 53:8–11) who, after the experience of death in sacrificial expiation (v. 10), will see light. The plan of God cannot fail; it must succeed.

---

[2] On the state of the question and textual criticism, Hebrew text and Masoretic Text, etc., see Puech, *La croyance des Esséniens*, 66–73.

Wisdom of Ben Sira (Sirach)

If, at the beginning of the second century B.C., Ben Sira was aware, in the sapiential/wisdom part, of a notion of "Sheol" common to all, on the other hand, in the Praise of the Fathers (Sirach 44–49), the author, who is no longer tied to the style and context of the doctrines of the common tradition, takes over material from the Israelite tradition relating to each praiseworthy figure. Belief in the resurrection of the Israelite just is found in numerous passages. If Isa 66:4 has been picked up in Sir 46:12 and 49:10, the hope that the bones of the judges and the prophets will be quickened to life in the tomb already could allude to a belief in the resurrection of the body; this hope certainly has been understood in this manner at least since the first century B.C.[3]

On the other hand, the passage concerning Elijah's ascent to heaven gives an occasion to recall the miraculous action of the prophet in the resurrection (1 Kgs 17:17–24). The author knows that Elijah must return at the time of the eschaton in order to preach conversion, before which, according to Mal 3:23–24, God's anger bursts forth against his people. A makarism, which the Hebrew text (= HT) preserves in its original form,[4] proclaims the one "happy" who is living at the time of the return of the prophet. For it is he who during his lifetime can seize the prophet's call to conversion by returning to the divine commandments and, therefore, become just. Elijah will be able to return to him life so he might have a share in the rewards of the just on the day of judgment. Thus, we read in Sir 48:11 (HT): "Happy is he who shall see you before he dies, for you will restore life and he will live again."

---

[3] The floral image taken from Isa 66:4 and repeated in the *Testaments of the Twelve Patriarchs*, *T. Sim.* 6:2–7, *Tg. Hos.* 14:6–8, *Gen. Rab.* 28:3, has most probably served to express the hope of the resurrection of the individuals in question, as tends to be proven by its utilization on tombs (the lilies of the fields in particular) and on ossuaries, which are certainly linked to this belief; Sir 46:12 (Syriac) explicitly has "the lilies"; see Puech, *La croyance des Esséniens*, 73–74.

[4] For the text and textual criticism, see Puech, ibid., 74–76, and Émile Puech, "Ben Sira 48:11 et la résurrection" in *Of Scribes and Scrolls: Studies on the Hebrew Bible, Intertestamental Judaism, and Christian Origins presented to John Strugnell on the Occasion of his Sixtieth Birthday* (ed. H. W. Attridge, J. J. Collins, and T. H. Tobin; College Theology Society Resources in Religion 5; Lanham, MD: University Press of America, 1990), 81–90. But we cannot support either the choice of the Greek text or the interpretation of the recent study of Jean Lévêque, "Le portrait d'Élie dans l'éloge des Pères (Sir 48:1–11)," in *Ce Dieu qui vient: Études sur l'Ancien et le Nouveau Testament offertes au Professeur Bernard Renaud à l'occassion de son soixante-cinquième anniversaire* (ed. R. Kuntzmann; LD 159, Paris: Cerf, 1984), 215–29. On the one hand, the Hebrew text of manuscript B is totally recoverable and not mutilated (the author does not appear to know our study). On the other hand, if in this context the Hebraism, ζωῆ ξησόμεθα, does not signify "revive," what would makarism mean ("blessing" or "calling happy" from Gk. *makarismos*), in general, and the sequence "moreover we also, we

The sense of our verse seems to be echoed by Jesus in Mark 9:1: "There are those standing here today who will not taste of death before the kingdom of God comes in power!" Those who wait with love for the coming of the kingdom will be able to die in peace for they will have seen the victory of the saving God.

Since Elisha had received a double portion of the spirit during his life, he had given life to the son of the Shunamite (2 Kgs 4:35; 8:4–5) and, likewise, even after his death, to a Moabite foreigner according to the old Hebrew text and the Old Greek (2 Kgs 13:20–21), but the Masoretic Text and the *kaige* recension corrected it to "an Israelite" in order to make it conform to contemporary custom and belief (Isa 26:19) that only the just of Israel are able to benefit from the resurrection of the dead. The sages also decreed that an "impure" Jew could not repose in a family tomb until the purification of the flesh.[5] Thus, as the follower of Elijah and a just man having lived long before the eschatological times, he ought also to have a part in the resurrection of the just during the Messianic times, Sir 48:12–14 (HT):[6]

> Elijah has been enveloped in the whirlwind! Then Elisha was filled with his spirit, he wrought two times more signs and marvels by his mere word. During his lifetime he feared no one, nor had any man power on his spirit. Nothing was beyond his power; and from his tomb his flesh will be brought back into life. In life he performed wonders, after death, marvelous deeds.

In conclusion, far from opposing any belief in resurrection, as is often asserted, the Wisdom of Ben Sira (Sirach) admits, in the section of the

---

are quickened to life," concerning Ben Sira's generation, after "Happy are those who see you and those who are asleep in love," concerning the contemporaries of (historical) Elijah, since his contemporaries are well dead? Furthermore, nowhere does Ben Sira claim to be witness of the definitive intervention of the prophet (227–28)! The latter is awaited in the future, on the Day of Yahweh. No, the doctrine of the future was quite well known in certain circles of priests and sages of his time.

[5] See Puech, *La croyance des Esséniens*, 78–79.

[6] For more detail, see ibid., 76–78. The Greek reading 13b: "and in his death his corpse prophesied…"

Praise of the Fathers, a received belief from contemporary circles of the pious, a resurrection of just Jews destined to benefit from the blessings of the messianic times at the eschaton.[7]

A short time later, and without a doubt under the influence of Daniel 12 and of Isa 26:19 among other ancient texts, when this belief was largely accepted, the Greek translation of Sir 48:11 with respect to Elijah, extends this hope to all the just:

> Happy are those who will see you
> and those who are asleep (are decorated) in love.
> For we also assuredly, we shall be revived.

Daniel 12

If the original text of Sir 48:10–14; 46:12; and 49:10 could mark a restriction with respect to the resurrection of all the just, which is affirmed in Isa 26:19, Daniel 12 (circa 165–164 B.C.) takes up the formulation of Isaiah 26, 53, and 66 to express its hope of a future life through the resurrection of the dead in a personal sense and transformation into a glorious existence in contrast to the fate of the wicked (cf. Isa 66:24). This occurs, after the annihilation of the kings and the foreign peoples, within the context of an eschatological salvation at the time of final distress. Then will appear Michael, the protector of the people of God who are being threatened by the enemy. Among the people the ones who will be saved are "all those who are written in the Book" (Dan 12:1), which is to be understood as the Book of Life. In contrast, all others will perish, which is implied in Daniel 12, but explicit, for example, in *Jub.* 30:20–22, which dates from the same period.

Exegetes have proposed diverse explanations of v. 2: the sense of "the many" (רבים), of the preposition מן in "from those who sleep in the land of dust" (מישני אדמת עפר), and above all of the "these" (אלה): is there a universal resurrection or of a group of Israelites alone, both just and sinners, or are the Israelites just and others sinners? Or again, does verse 12:2a include among the dead a group subdivided into two categories, those (the "many" = רבים) who rise and, implicitly, the others who remain among the dead? In other words, are the two groups (vv. 1–2a) divided, on the one hand, into those who in the final generation retain life along with those, belonging to the previous generations, returning to life, that is, "all those who are inscribed in the Book," and on the other hand, in contrast, those who lost their life in the final combat along with those, belonging to former generations, remaining in death, that is, "the sinners" among the people who are not written in the Book?

---

[7] For an up-to-date note, see part "III L'eschatologie" in my article, "Ben Sira et Qumrân," in *Il Libro del Siracide: Tradizione, Redazione, Teologia, IV Convegno di Studi biblici, Palermo 2–3 Áprile 2004* (ed. G. Bellia and A. Passaro; forthcoming).

This latter interpretation, which alone gives an adequate account of the text, has been proposed by Alfrink.[8] It rejects the sense of רבים = "multitude" = "the whole" and accepts for מן the partitive sense "many of those who…" Likewise, it does not envisage the resurrection of the impious, whoever they might be. This interpretation places Daniel 12 in line with Isaiah 26, but attached to an individual eschatology by the refinement, "those who are inscribed in the Book," where the prophet distinguishes between two groups brought into association by the use of similar terminology: "Those who dwell in the dust" (שכני עפר), "those who sleep in the dust" (ישני אדמת עפר), and "those who will be awakened" (הקיצו/י [see 1QIsa^a –HT]– יקיצו). In Daniel the situation only applies to the just of the people of God, of ancient generations (v. 2a) and of the generation of the time of tribulation (v. 1), distinguished by the fate which falls to them, life or death (v. 2b), according to actions good or evil, of those who will have acted upon the call to reform as announced by the return of Elijah in Sir 48:11. The double "those" (אלה) does not refer back to a single group previously designated "many of those who sleep in the land of dust will awaken" (רבים מישני אדמת עפר יקיצו) but, as elsewhere, to two groups, even implicitly named in "whoever is written in the book" (כל הנמצא כתוב בספר) and in "many of those who sleep in the land of dust" (רבים מישני אדמת עפר). Consequently, v. 2b constitutes an independent proposition.

This way of understanding vv. 1–2b is confirmed by the eschatological passage in Isa 66:24, by which Dan 12:2b was clearly influenced, it being the only other place the word דראון ("horror") is used in the Hebrew Bible. In Isa 66:22–24 the final generation is also divided into two groups: They will consist of those who have come to worship upon Zion and who will see the "victims of Yahweh"(vv. 15–16) whose "worm never dies and fire never ceases…their corpses…will be a horror for all those who live" (v. 24). Common to both Isaiah 66 and Daniel 12 is a conception that runs counter to a life set aside for a group of sinners. Therefore, we understand Dan 12:1b–2 as follows:[9]

---

[8] See Bernardus J. Alfrink, "L'idée de résurrection d'après Dan XII, 1–2, " *Biblica* 40 (1959): 355–71.

[9] See Puech, *La croyance des Esséniens*, 79–82.

> At that time your people shall escape, everyone who is found written in the book, and many of those who sleep in the dust shall awake. The one (shall be) for an eternal life and the other for a disgrace, for everlasting horror.

This understanding of the text is in agreement with that of the LXX, though Theodotion-Daniel attests at a much later time to an interpretive gloss upon the MT "for reproach" (לחרפה) through "for shame" (εἰς αἰσχύνην) and the evolution of the doctrine of universal resurrection, of Jews and pagans, of good and evil, of the just for eternal life, of the sinners for eternal reproach.

In verse 3 and following, the author concerns himself with the fate of a particular class of the just–the instructed or instructors (משכילים) who in the end times will receive a special glory. It is probable that the instructors (משכילים) and "those who have justified the many" (מצדיקי הרבים) designate the same category of persons. The "instructed-instructors" are those who "justify the multitude" since in Dan 11:33 they instruct (יבינו) the people and are clearly connected with the fourth Servant Song in Isa 52:13: "Behold, my servant shall prosper/shall understand" (הנה ישכיל עבדי) and 53:11 "…being made just, my servant will justify the multitude" (יצדיק צדיק עבדי לרבים), attributing to the same "justified" person (צדיק) the functions of "he will understand" (ישכיל), of "through his knowledge my servant will justify the multitude" (בדעתו יצדיק צדיק עבדי לרבים), and of "he will see the light" (יראה אור). In fact, the LXX takes this in the sense of ישכיל–συνήσει("he will have understanding" in Isa 52:13. It is through "the learned" that "the refining, the purification, and cleansing up to the end time" (Dan 11:35) of the multitude will be accomplished (Dan 12:10) because for them "the learned" took responsibility and for whom some gave their lives. The learned will understand and will instruct (יבינו) and thereby will justify (יצידקו) by leading their contemporaries to a just way. The Greek translation of Theodotion-Daniel extends the promise of hope originally reserved for the martyrs, for the knowing ones who are as bright as the brilliance of the firmament, whereas the LXX retains "those who keep my word" in v. 3b, canceling out the notion of "those who justify the multitudes," which appears in the Hebrew. Be that as it may, the figure of the Servant in Isaiah is interpreted collectively in Daniel 12 as initially functioning as "just-martyrs" persecuted for their faith at the time of Antiochus IV, and very rapidly afterward functioning as the "just-servants of the Word," thus previously the "instructed" by the word.

The victory over death and the glorification once reserved as the exceptional and unique right of the Servant has been transferred to the spiritual guides and transposed upon the plan of a new world of the just revived and glorified, similar to the saints in Daniel 7. Although there is no reason to imagine an astral immortality promised to these just martyrs or instructors, their future life does not appear simply to be a pure and simple continuation of present existence–just as the world to come is not in continuity with the present. The divine judgment at the time of the eschaton marks a rupture between the two. As far as the resurrection and glorification are reserved for the end time, what is expected is not a mere reanimation of a cadaver, but the reuniting of the resurrected with the group of survivors, however upon a different plane of reality as is indicated by the metaphors, "they will be as brilliant as the light of the firmament" and "…as the stars forever and ever." Here is indicated the novelty of the mode of life of the resurrected–particularly that of the elite in the company of the astral beings in glory. In this passage, what is important is first of all that the just, dead or living at the moment of the time of the tribulation, arrive together at the establishment of the kingdom (see Daniel 7). But since the stars are often mentioned along with the angels as partaking in the same divine glory and that, sometimes they (the stars) are identified with the angels (cf. Dan 8:10, *1 En.* 104:1–2, 6), this connection helps us better to understand the celestial glory and angelic company of the revived, which are linked to the resurrection-transformation at the time of divine judgment's final retribution.[10]

Daniel himself is seen as being promised resurrection for eternal life at the end of days, after a time of repose in death, being counted among the just inscribed in the Book (Dan 12:13). This chapter of Daniel elaborates upon the message of the fourth Servant Song of Isaiah and of Isaiah 26 where the promise of resurrection underlines the power of God as creator and judge of the world, his lordship over history and over both the living and the dead.

2 Maccabees

The story-parable of the seven brothers, martyrs for the sake of obedience to the Laws of the Fathers, dating without doubt from about the time of the persecutions of Antiochus IV, shares this belief in resurrection–a faith easily assimilated at the core of a group of believers.[11] The martyrdom of old Eleazar indicates that it is preferable to go

---

[10] See ibid., 82–85.

[11] For the questions answered by this subject and this book, see ibid., 85–92.

"without delay to dwell with the dead" and to set an example rather than to transgress the Laws of the Fathers, since neither the living nor the dead are able to escape the justice of the Almighty (2 Macc 6:18–31). Death, then, is not the end, but the entry into another life through the judgment of God.

In 2 Maccabees 7, faith in the resurrection appears at the center of the narrative. Encouraged by their mother, the seven brothers accept death rather than repudiate the Laws of the Fathers. The passage of the Law invoked as the basis for this faith (Deut 32:36) makes an appeal to the justice of God on behalf of his faithful (2 Macc 7:5)–justice which is active after death through the resurrection of his servant (lit. "through an eternal reviving of life" 2 Macc 7:9, cf. Dan 12:2 LXX). The form of eternal life envisaged does not appear homogeneous: Is it an eternal life as Daniel 12 or a return to this life (cf. 2 Macc 7:9, 14 and 11)? Even the tyrant does not escape divine punishments in this life or after death, for there is no hope of resurrection for the impious (2 Macc 7:14). Just as creation and the breath of life depend upon God who gives and withholds as he wishes, so it will be in resurrection, in the recreation of the bodies of the just who are faithful to the covenant "at the time of mercy" (2 Macc 7:29).

In other words, the brothers and their mother each express an aspect of the belief in resurrection. The first who dies without transgressing the Law faithfully obeys the Law of Moses, therefore, God will have pity upon us who die for the Law and, as the second believes, he will resurrect us for an eternal life. It is from heaven that I have received these limbs, but I despise them for the sake of the Law, for I hope to recover them anew, is exclaimed by the third. From the fourth and the fifth comes a statement of quite broad significance: hope of resurrection ἐλπίδας ἀναστήσεσθαι for the just alone (as in Daniel 12 [Hebrew]) and solidarity of the just in death for the sake of sins, for God does not abandon his people, whereas the impious and their kind will experience the torments in this life and there will be no hope for resurrection. Finally, the mother confesses faith in God the Creator who, "at the time of mercy" will restore the spirit and life, and the seventh son leaves his body and his life for the sake of the Law so that God might look favorably upon the nation and chastise the impious as an inducement to confess the one God.

In his suicide, Razi professes the same faith and hope. While throwing his entrails about, he prays to the Lord of life and spirit to return them to him one day (2 Macc 14:46). That is to say that here resurrection is conceived of in a corporal sense in line with Semitic anthropology and that it can be related to the day of judgment.

The dream vision of Judas, the purpose of which is to encourage the faithful in looking forward to victory, can present an outline of the understanding of the afterlife and the relationships between the worlds of the living and the dead. The conversation with Onias and Jeremiah, at first glance, suggests the conception of a blessed "corporal" existence of the just after their death, without insisting upon the post-mortem state of the martyr (2 Macc 15:12–16). On the other hand, the belief in the intercession of the saints (after death) on the side of the children of men is attested here for the first time (later attested in *1 Enoch* 39:5 and Philo, *Exsecr.* 165). Reciprocally, the living ought to pray for the dead (2 Macc 12:38–45). Indeed, the expiatory sacrifice offered for the fallen soldiers guilty of idolatry only makes sense if a belief in resurrection is admitted and recognized as the beginning of the reward for just martyrs (12:44–45). The link having been established between the carrying of idols and the death of the soldiers (12:40), the author wishes to protect the living from the consequences of an error which has polluted all the people, hinting that the resurrection and its rewards are reserved only for Jews sleeping in piety and that other, culpable Jews must face chastisement unless expiatory sacrifice is made. For if the fate of the soldiers had been fixed forever at their death in combat, the sacrifice for the dead would not make sense. Does this belief diverge from Daniel 12, or is this rather an additional precaution on behalf of combatant Jews for a just cause whose righteousness and purity are not irreproachable? The expiatory sacrifice must effect their required purification and, implicitly, inscribing them according to the number of the just in the prospect of resurrection and reward, effects a change in their division within Sheol (see *1 Enoch* 22). Nevertheless, it is not a question of "spiritual" resurrection after death within a framework of an individual, transcendent eschatology. Resurrection is expected in the future; not when an individual dies, but at the time of eschatological Judgment–within a collective and linear eschatology.

The author therefore keeps to the conception of resurrection formulated in Daniel 12. Wishing to exhort and comfort the faithful in the struggle against impiety, the author insists upon divine justice, which is exercised upon the earth and after death: obedience to the law leads to a life from which the impious will be totally excluded. In this sense resurrection is understood as the first act of recompense for those who merit justice. Moreover, some of the more eminent martyrs will even be able to enjoy particular favor, such as Onias and Jeremiah, comparable to the case of the Patriarchs in line with the Praise of the Fathers in Ben Sira and the "instructed/instructors" (משכילים) of Daniel 12.

Wisdom

Emanating from Alexandrine Judaism in the latter part of the first century before Christ, the book of Wisdom contains, according to certain authors, a notion of life after death according to a scheme of individual and transcendent eschatology and not any more a collective and linear eschatology, starting, not from a Semitic anthropology, but from a Hellenistic one, strongly colored by Platonic thought. But this remains to be demonstrated.[12]

The wisdom author exhorts the believer to walk in justice for justice is immortal (1:15). The one who lives according to justice, casting his lot with God, will receive the compensation of the just (2:16, 22), for God created humankind incorruptible (2:23). He has not created death, but it is through the envy of the Devil that death (2:1–3) has entered the world (2:24). The impious, whose life is cut off by death and Sheol, will have the experience of death (2:24b). These passages follow the traditional thought of Dan 12:2, the evil will rot (לדראון–διαφθορά) while the just live incorruptible (ἀφθαρσία). So although the terms are new, the idea is ancient. The immortality of the souls of the just is not bound to their nature or preexistence, as for Plato, but is graciously given from God as reward for good conduct (2:22–24; 4:1, 10, 13–14, 17; 5:15–16). Humankind is the creation of God, death is not an end for the just but a passage (an exodus–ἔξοδος), a continuation of life with God under another form (3:1–9) in the company of the saints (5:5), likewise for the impious, death has begun its work in this life, and will continue through to the end of life by chastisement (3:1–12; 4:19–5:16 and 3:7). The death of the impious corresponds to the immortality of the just, and their pain to their peace and repose.

Despite the Hellenic appearance, immortality (ἀθανασία) is linked to conceptions both Semitic and biblical. The punishment and reward are contingent upon the time of judgment (ἐν καιρῷ ἐπισκοπῆς 3:7, 13; 4:20–5:5). The just will be resplendent (3:7), they will judge the peoples (3:8), receive a crown of glory, a diadem of beauty (5:16) participating in the court of the saints (5:5). But for the sinners there will be the darkness and suffering of Hades. Wisdom, which does not enter the heart of the perverse (1:4), carries out the sorting between the just and the wicked, has tallied their works and will not allow the impious to go unpunished. This is simply a variant expression of the idea of being inscribed (or not inscribed) in the Book of Life.

---

[12] See ibid., 92–98, and also Eberhard Bons, "ΕΛΠΙΣ comme l'espérance de la vie dans l'au-delà dans la littérature juive hellénistique," in *Ce Dieu qui vient: Études sur l'Ancien et le Nouveau Testament offertes au Professeur Bernard Renaud à l'occassion de son soixante-cinquième anniversaire* (ed. R. Kuntzmann; LD 159, Paris: Cerf, 1984), 345–70, esp. 348–56.

Since "the souls of the just are in the hand of God" (3:1), "in peace" (3:3) and the time of the Day of the Lord–judgment–is expected, it is necessary to allow for the well-known idea of an "individual" judgment and of an intermediary state distinguishing between the just and the unjust, those inscribed and those not inscribed in the Book of Life. However, it cannot be a question of the disappearance of the soul and of the body of the impious, since the punishment of the impious will be made at the same time as the reward and exaltation of the just (4:19–5:16 and 3:7) upon the day of judgment. The author does not adopt a theory of preexistence of the soul or of death as liberation from the body-prison.[13] He does not explicitly speak of an "awakening," although the belief in resurrection of the dead would be implicit within the schema of a linear eschatology. In fact, it makes itself a faith in the absolute power of God over life and death, who restores the breath of life and brings the dead back from Hades (16:13–14). Manna, the incorruptible nourishment of the angels (16:20, 22–23), must, under the designation of "ambrosia" (ἀμβροσίας τροφῆς), feed flesh incorruptible. Although the author does not insist upon the personal identity of the mortal and the spiritual body, implicitly posited in the deliverance of the souls from Sheol-Hades, he obviously does not ignore it. He envisages the victory of man over death in the manner of a spiritualization or a transformation into glory when he describes the just within the company of the saints at the side of God in a cosmos which is itself transformed as a reward for a life of justice. Though immortality is a gift of God lost through original sin, the soul of the just shall at the time of judgment recover a glorious body, incorruptible.

Pseudepigraphic Texts

To this survey of biblical passages, it will be necessary to add a brief overview of the contribution of pseudepigraphic texts from the end of the first millennium before Christ, primarily *1 Enoch*, of which five sections date from the end of the third century to the end of the first century B.C. "The Book of Astronomy" proclaims the happiness of those who die just, without any misdeed written in judgment, when he will receive his reward. "The Book of the Watchers" knows of the compartmentalization of Sheol for the souls according to their degree of justice/righteousness waiting for judgment. "The Book of Dreams" and the "Letter of Enoch," contemporaneous with Daniel, attest to the belief in resurrection of the just and the everlasting chastisement of the impious. Finally, the "Parables," dated to the end of the first century B.C., essentially stress resurrection of the just upon a renewed earth in the company of the Elect One who presides over the judgment. In the "Letter" and the "Parables," the just shine brilliantly in vestments of glory just as the stars of heaven in a universe transformed (*1 En.* 91:16; 45:4–5), whereas the sinners perish within the flame of eternal fire. Thus, *The Book of Enoch* presents the eternal life of the just as a life in glory, radically different from the present terrestrial life and generally associated with resurrection at the time of judgment.

---

[13] Without doubt, Wis 9:15 refers to Plato, nevertheless, the image is also biblical (see Job 4:19 and Isa 38:12). For a more detailed presentation and bibliography, see Émile Puech, "La conception de la vie future dans le livre de la *Sagesse* et les manuscrits de la mer Morte: un aperçu," *RevQ* 82 (2003): 209–32;or "Il Libro della *Sapienza* ei manoscritti del Mar Morto: un primo approcio," in *Il Libro della Sapienza: Tradizione, Redazione, Teologia* (ed. G. Bellia and A. Passaro; StudBib 1; Rome: Città Nuova, 2004), 131–55.

In the second part of the first century B.C., the *Psalms of Solomon* attest to the experience of judgment and resurrection of the just for eternal life but eternal punishment and perdition in Hades for the impious.

These major lines of origin and development of the belief in a life after death and the resurrection of the just of the people of God in the canonical and some apocryphal works appear to be sufficient to locate the position of the trend in Jewish thought that the recently discovered manuscripts from the Dead Sea reveal to us.[14] Yet we are not unaware that these ideas were far from being shared by all the currents of Jewish thought during the last centuries B.C.[15] Whether according to Christian sources (in particular Acts 23:6–8) or Jewish sources, which compare the Sadducees to the figures of Cain and Esau (cf. *Mishnah*, *Talmud*, ʾAbot de Rabbi Nathan, the Targumim, etc.), the Sadducean trend of thought in particular explicitly rejected belief in resurrection. The Sadducees, just as the wicked in the book of Wisdom, denied faith in resurrection, angels and spirits, and all forms of the afterlife, including the survival of the soul and body—beliefs which, according to the Sadducees, are without foundation in the Law of Moses.

---

[14] Because one often makes too much of it, one must avoid the characterization of "Sect" or "sectarian." This movement within Judaism had nothing of a sect about it, because postexilic Judaism was far from being unified. In fact, over the course of centuries several Jewish movements saw the light of day and represented just as many official Judaisms. Flavius Josephus reported the existence of three "schools of Jewish philosophy" dating back to 152 B.C.: the Pharisees, Sadducees, and Essenes (*J.W.* 2.119) and it is impossible to decide upon the orthodoxy of any of them. Even though being the most numerous, which survived in the subsequent rabbinic movement, the Pharisee movement cannot pretend to represent all by itself orthodox Judaism from before the national catastrophe of the fall of the Temple in A.D. 70; quite to the contrary, since Essenism itself vigorously disputed the Mosaic orthodoxy of thought-systems and praxis. One must not forget that even the word "Pharisee" comes from the Aramaic פרישין "separated." Thus, on the whole, the latter are of a sectarian tendency in relation to the more orthodox and traditional heritage.

[15] For the state of the question concerning the currents of Pharisaism and Sadduceeism, as well as Greek and Semitic apocryphal texts, ancient Jewish literature, inscriptions and the New Testament, see *La croyance des Esséniens*, 99–301.

II. QUMRAN

Along with the majority of scholars, we hold the inhabitants of Qumran to be Essenes, even if the Essenes cannot be simply reduced to the Qumranites. This identification alone at once accounts for the classical evidence (Pliny the Elder, Dio Cassius, Flavius Josephus, and Hippolytus of Rome) and for the archaeological evidence from the campaigns in the ruins of (*Khirbet*) Qumran and the nearby caves where the manuscripts were found.

But, then, what is the belief of the Essenes concerning the future life? Must one blindly follow Flavius Josephus, who attributes to them a faith in the immortality of the soul after death, the just receiving an eternal blessing, while the wicked are found in torment without end (*J.W.* 2.151–158, summarized in the *Ant.* 18.18)? Or, rejecting this type of neo-Pythagorean belief, is it preferable to accept the presentation of Hippolytus of Rome who attributes to them a belief in the final judgment after an intermediate state, a universal conflagration, and resurrection of the flesh for the just who will become immortal, but eternal punishment of the wicked (*Elenchos* or *Haer.* 9.27)?

The majority of modern scholars traditionally accept the evidence of the references of Flavius Josephus as rather faithfully representing the belief of the Essenes, even if it is a bit distorted by being dressed up in Hellenistic fashion, concluding that the passage in Hippolytus only reproduces material that belongs to his predecessor, adding or expanding here and there some details, even on occasion in contradiction. In short, Hippolytus would have christianized a more authentically Jewish passage in Josephus.[16]

---

[16] For a fairly complete discussion of the state of the question see ibid., 703–69, where I discuss the thesis of Todd S. Beall, *Josephus' Description of the Essenes Illustrated by the Dead Sea Scrolls* (SNTSMS 58; Cambridge: Cambridge University Press, 1988).

But is the solution so simple? Should one have more trust in a Jewish historian at the end of the first century after Christ, who, however, is writing for a particular audience in Rome, than in Hippolytus, a champion slayer of heresies, from the beginning of the third century after Christ, who, *a priori*, would not have to present them in the light of "orthodoxy," thus rendering them irrelevant to his topic? In fact, would it not be surprising that upon the subject of conceptions of the life after death, a current of Jewish belief as conservative as Essenism should allow itself to be won over by the Greek influence it combated so vigorously elsewhere? It is important, then, to interrogate the manuscripts from Qumran–they have the advantage of not containing interpolations by an outside hand, expunging or christianizing–in order to get a somewhat more precise idea concerning the subject and to know which of the two authors had intentionally changed certain elements of the sources and to what end.

Contrary to the Sadducees who limited themselves to the Five Books of Moses, the Qumranites copied and read a great variety of books, more extensive than the list defined afterward as canonical by the rabbis, taking them as a source for inspiration and meditation. Were they influenced by these writings and did they accept the conceptions of the future life that they conveyed? Indeed, it is more than probable that the Essene movement emerging within the contexts of the middle of the second century B.C. did not cut off its Jewish roots and that all this literature so extensively collected, copied, and transmitted, to which its rich library gives witness, must have effected in some manner, its conception of the future life, at least in the main outlines, even sometimes in a rather precise manner. Such a conclusion is logically compelled to the extent where this conception appears to be coherent and does not show any obvious contradiction. Heirs of the Hasidic movement of the beginning of the second century B.C.,[17] the Essenes should have, unless there is some indication to the contrary, espoused its conception of a life after death, which is none other than the biblical conception, such as it was transmitted in the canonical books and the Apocrypha of the Old Testament and treated in the above discussion along its major lines.

---

[17] We have demonstrated the soundness of the etymology of חסיד (in Hebrew) = חסה = essene (in Aramaic), as advanced by Emil Schürer among others a century ago, persistently pushing aside all other hypotheses. See *La croyance des Esséniens*, 21–24.

The Non-Biblical Works Recovered at Qumran

Noncanonical books have been identified along with many copies of the biblical books recovered in the caves at Qumran in the twentieth century.[18] Among these numerous texts figure the books of *1 Enoch* (the "*Parables*" excepted), in which the conception of the life after death is rooted in both the biblical and Semitic traditions (see above). The fragments of the *Testament of Qahat ar* (4Q542), a composition certainly of pre-Qumranic date, are not irrelevant to eschatological thought. The patriarch Qahat exhorts his sons to conduct themselves in such a manner that eternal blessing might rest upon them, and so as to be delivered from the punishments reserved for sinners destined to vanish forever at the time of the judgment of the world (4Q542 1 col. 2). But more than half of the column is lost, and we are deprived of valuable information. A similar idea is found in a passage in the Testament of his son, Amram. The *Visions of Amram*, dating from circa 200 B.C., contrasts the fate of the just with that of the wicked at the time of the Last Judgment: darkness, death, and Abaddon are for the sons of darkness, but light, joy and peace are for the sons of light who will be delivered this very day from the sons of darkness, and they will be enlightened (*Visions of Amram*^{f} *ar*, 4Q548 1–2, col. 2, lines 12–16).[19] The theology of the "Two-Ways" in these texts echoes the conception in Isaiah 26 and precedes the brief formulation of Daniel 12. Their laconic context does not permit us to say much, however it should be surprising that these two Aramaic compositions may greatly disagree with the biblical passages and *1 Enoch*, which are in favor of resurrection.

The Words of the Lights *(4Q504)*

The Hebrew composition *The Words of the Lights* (4Q504 [= 4QDibHam] דברי המאורות), which is perhaps an Essene composition, refers to: "All those who are written in the Book of Life [...and will stand] for service to you and give thanks to [your holy name" (4Q504 1–2, col. 6, lines 14–15, and compare 4QInstruction, or *Sapiential Work A*^{a} *[= 4Q418] 81*

---

[18] One should take into account, according to ancient witnesses, the rich discoveries between A.D. 200–800; such discoveries indicate the presence of a great quantity of biblical and nonbiblical books.

[19] Concerning these texts, see *La croyance des Esséniens*, 531–42, and "4QTestament de Qahat ar" and "4QVisions de Amram ^{f} ar," in *Qumran Grotte 4.XXII: Textes araméens, Première Partie (4Q529-549)* (ed. É. Puech; DJD 31; Oxford: Clarendon, 2001), 257–288, 391–398.

[below]).[20] Within this context, the inscription in the Book of Life can only go back to Daniel 12, instead of Isa 4:3, where, besides this mention of the Book of Life, deliverance, resurrection, and judgment are also involved. Indeed, as in Daniel, the inscription in the Book of Life specifies the eschatological conception of Isaiah 26: from the corporate-national conception expressed in Isaiah 26 it develops into an individual and personal conception of eschatology where the moral conduct of each member of true Israel comes first into the tally.

Pseudo-Ezekiel *(4Q385–388)*

Probably dating from the middle of the second century B.C., the Hebrew composition *Pseudo-Ezekiel* (also called 4QDeutero-Ezekiel), which possibly makes reference to some of the points of dispute relating to the separation of the Essenes and the Pharisees over the Law and Covenant, intends to confirm the faithful in their promised inheritance of the earth at the eschaton. The prophet entreats God to shorten the days of distress in order to accelerate the salvation of the just (4Q385 4) and the possession of their heritage (4Q385 2).[21]

The repetition of the parable of the dry bones of Ezekiel 37 relates the intervention of God on the side of the just "for those who loved your name and walked in the ways of justice," those merit the recompense from the redeemer (גואל), the divine partner in the Covenant. As above, it is not any more a question of restoration of the people of Israel but of an eschatological reward for the faithful at the end of days. God will resurrect only the just of his people. The language of re-creation gives a vivid presentation of the recovery of life in the inverse order of conception: the reassembly of the bones and the recovery of the flesh, then the breaking in of the spirit, in response to the "how" of the second question of the prophet.[22] Thus it emphasizes the identity of beings and the continuity of a form of existence after death in the retribution of the person for the day of judgment. Along the same line, the image of the tree which bows down and raises up again responds to the “when” of the first question in situating its realization at the end of days.

---

[20] For this passage, see *La croyance des Esséniens*, 654–68.

[21] See ibid, 605–16 where we have provided corrections to the provisional edition of these few fragments. See now Devorah Dimant, *Qumran Cave 4 XXI. Parabliblical Texts, Part 4: Pseudo-Prophetic Texts* (DJD 30; Oxford: Clarendon, 2000), 23–29, 37–42; and Émile Puech, "L'image de l'arbre en 4QDeutéro-Ézéchiel (4Q385 2 9–10)," *RevQ 16* (1994): 429–40.

[22] The school of Shammai repeats the same image to express its conception of the resurrection of the dead as a recreation; just as Hillel invokes Job 10:10f to express the new creation–all the renewedness of the resurrected body.

Sapiential Work A$^{a–e}$ *(4Q415–418)*

The recent publication of a wisdom composition–here referred to as *Sapiential Work A$^{a–e}$*, but called *The Instructions* (Musar le Mevin)–found particularly amongst the numerous fragments of Cave 4[23]–has given especially strong evidence concerning the importance of eschatology in wisdom literature. This composition, which dates from the second century B.C.[24] emphasizes the predetermined roles celestial beings play in the life of the world and man, in punishment for those following the inclinations of the flesh (רוח בשר) and the reward of the righteous on judgment day. The responsibility of the sage is to explain to mere creatures of the flesh the difference between good and evil and the importance of perseverance in good behavior so as to avert the destruction that awaits the sinner on judgment day.

This is the topic found in the middle of the first column of the manuscript, which serves as an introduction (4Q416 1 par.; 4Q418 229+1-2c+212).[25] It depicts the judgment of sin/unrighteousness which will come to an end at its appointed time. Human beings shall be judged and their eternal fate determined as a result of their behavior, either following the impulses of a fleshly existence (רוח בשר), or their adherence to a spiritual community of people (עם רוח) molded by the example of the saints–for a reckoning of their works is recorded in the ledger books that shall be opened at the judgment. It is therefore important for the aware or intelligent human being to meditate upon "the mystery of existence" or God's plan (רז נהיה) and "to keep to the Word" (that is, "obey the Law")–this is the true wisdom that leads to life (cf. also 4Q525). This coincides with the theology of the "Two Paths": truth and wisdom as opposed to iniquity and folly and the everlasting consequences of their works.

---

[23] John Strugnell, Daniel J. Harrington, and Torleif Elgvin, eds., *Qumran Cave 4.XXIV: Sapiential Texts, Part 2; 4QInstruction (Musar le Mevin): 4Q415ff, with a Re-edition of 1Q26 and an Edition of 4Q423* (ed. J. Strugnell et al.; DJD 34; Oxford: Clarendon, 1999). For treatment of 1Q26 see Jozef T. Milik, “Un apocryphe,” in *Qumran Cave I* (ed. D. Barthélemy and J. T. Milik; DJD 1; Clarendon Press; Oxford, 1955), 101–2.

[24] Contrary to the editors, who place the composition between Proverbs and Ben Sira, I would date this *Sapiential Work* (= 4QInstruction) at the earliest to about the end of the first half of the second century B.C., because similarities with the Qumran-Essene compositions are striking. The author of the *Thanksgiving Hymns* appears to quote it: cf. for example, 1QH^{a} 5.26–27 (= 13.9–10) and 4Q417 1, col. 1, lines 7–8, 1QH^{a} 9.28–29 (= 2.26–27) and 4Q417 1, col. 1, line 8, 1QH^{a} 18.29–30 (= 10.27–28) and 4Q418 55.10. The same is true of the author of the so-called “Treatise on the Two Spirits,” see 1QS 3.13– 4, cf. 4Q416 1, etc. For other affinities, see Émile Puech, “Les fragments eschatologiques de 4QInstruction (4Q416 1 and 4Q418 69 ii, 81–81a, 127)”, *RevQ* 85 (2005) 89–119.

[25] For the reassociation of the fragments and restoration of the column, cf. Puech, ibid.

Within the context of this exhortation, it seems clear that the ultimate goal of human life and history gives direction to behavior in the present, which in turn determines the fate of each and everyone in the future life. Of course, the elect belong to the spiritual world (עם רוח), but then the inclinations of the flesh (רוח בשר) can lead them astray at any moment and place them amongst sinners who have no hope in the hereafter. This destiny will be definitively inscribed in the ledger books and can never be changed (4Q417 1, col. 1, lines 14–16 par. 4Q418 43 11–12).[26] A passage in this column seems to witness to two judgments, one focusing on the works of each and everyone at death and the other, an eternal judgment, at the endtime:

> [6][And day and night meditate upon the mystery of] existence and examine continually and then you will know the truth and iniquity, wisdom [7][and fol]ly you shall [recognize] in their acts. Understand all their ways with their judgment for all everlasting times, and the eternal [8]judgment. Then you shall discern between good and evil according to all their deeds (4Q417 1, col. 1, lines 6–8).

These two judgments correspond to a double significance of the pit-Sheol at different stages of God's plan and attest to an intermediate state between individual death and the Last Judgment (cf. *1 Enoch* 22). In another column, following yet again another cosmological section (4Q418 69, col. 2 + 60 par. 4Q417 5), we find, quite like a diptych, a passage which focuses on the everlasting punishments that will befall sinners and the rewards of the righteous in the eternal glory:[27]

> [2][…] and you shall understand [the sources of the abys]ses with [3][all the hidden places of their fountains and you shall have knowledge of the seas'

---

[26] This is not the position taken by the author of 2 Macc 12:38–45 who demands prayers and the offering of sacrifices for the dead (see above).

[27] Cf. Émile Puech, "La croyance à la résurrection des justes dans un texte de sagesse: 4Q418 69 ii," in *Sefer Moshe, The Moshe Weinfeld Jubilee Volume. Studies in the Bible and the Ancient Near East, Qumran, and Post-Biblical Judaism* (ed. C. Cohen, A. Hurvitz, and S. Paul; Winona Lake, IN: Einsenbrauns, 2004), 427–44, with some subsequent changes, and lastly Puech, "Les fragments eschatologiques."

> swells] in their activity. Is it not in faithfulness that circulates [4]all their [currents] and in knowledge all their waves? (*vacat*)
>
> And now, foolish man, what is good to him who is not [5]formed? [And] what is tranquillity to him who has not existed? And what is a decree to him who has not been established? And what can the dead lament over all their [days?] [6]You were fashioned for the Sheol and to the everlasting Pit shall your return be when it shall awake and [expose] your sin. And the inhabitants of [7]its dens shall cry out against your pleading and all those destined-for-eternity, the seekers of the truth shall awake for your judgment. [Then] [8]all the foolish people shall be destroyed and the sons of iniquity shall not be found anymore [and a]ll those who hold fast to wickedness [shall] wither away. [Then] [9]during your judgment, the foundations of the firmament shall quake and all the [divi]ne/[etern]al ar[mies] shall thunder forth and all those who had loved [truth/righteousness shall revive.] [10]*vacat* "And you, the faithful elected, who pursue [understanding and] who ardently seek [wisdom and] who keep vigil [11]over all knowledge, how can you say: "We are tired of understanding and at [all times] and every[where] we have been vigilant in pursuing knowledge?" [12]But for all the years of eternity, none gets tired! Does not one take delight in truth forever? And knowledge, [ceaselessly,] does it not serve us? And the so[ns of] [13]Heaven whose lot is eternal life, will they truly claim: "We are exhausted by doing the works of truth and [we] are worn out [14]all the time?" Is it not in the eternal light that they shall [all] walk [in garments of] glory and an abundance of splendor? You, [you shall stand] [15]in the firmaments of [holiness and within] the divine council for all [the days of eternity (?) *va*]*cat*
>
> 'And you, the understanding one[...]"

Following a series of rhetorical questions leading to an indisputable answer, the author takes a firm stand: "Then the Pit shall wake up and all those destined for eternity, the seekers of the truth shall awake for your judgment." That is to say, that the foolish or wicked, who all through their lives, did not take into consideration their fate in the hereafter, shall hope for nothing less than a return to Sheol, which shall be changed from an abode for the dead into a place of eternal perdition and destruction when it shall wake up for judgment (תקיץ), the cosmos being called upon to stand witness. But the righteous shall reawaken in order to enter a life of glory for eternity in the firmaments of holiness in the company of angels in the divine council. The "seekers of the truth," who are "those destined for eternity" (נהיה עולם) cannot be angels, who neither have to seek nor to reawaken since they never sleep, because they possess wisdom, and they are already within the divine council for eternity.

The eschatology of this wisdom text is totally in line with that of Dan 12:2–4, the word יעורו is the equivalent of יקיצו to evoke waking up from the slumber of death and entering eternal life in glory (cf. *1 En.* 91:10 and 92:3). Gaining glory does not occur at the death of an individual, as some sort of "particular judgment" but at the Last Judgment, at the moment of cosmic disturbance and of renewal. It is not a question of the immortality of the soul, but an elevation-exaltation of the righteous person according to the elements of a Semitic anthropology, the clothing of a glorious body, as if returning to the condition of paradise before humankind's sin, living in the presence of God and in the company of angels, just as the exaltation of Elijah or of Enoch but beyond death and judgment.[28]

These Hebrew compositions, whose attribution to Essenes is discussed by certain scholars, must have, in one manner or another, if they are not Essene compositions, influenced, just as *1 Enoch* did, the conceptions of the future life of the Essenes such as they appeared in Qumranic compositions.

4Q Messianic Apocalypse *(4Q521)*

The fragments of a single copy recovered of this Hebrew composition, known also as *On Resurrection*, addressed to the pious to encourage perseverance in their religious commitment, supplies us with very important evidence concerning Essene eschatology and their conception of the future life. As we have shown elsewhere, much evidence supports a dating of the composition after the book of Daniel and for an Essene attribution.[29] The exhortation is based upon the enumeration of the Messianic blessings which God himself will do for the pious (חסידים), the faithful (אמונים), the just (צדיקים), and the poor (ענוים). He will renew them through his power and will honor them upon a royal throne, freeing prisoners, giving sight to the blind, and healing the deformed so that no one might be excluded from the divine service. He will reward the fruits of good work, and will perform glorious acts which have never been performed before: he will heal the wounded, revive the dead, preach the good news to the poor, gratify the suffering, repatriate the

---

[28] For a more detailed presentation of the eschatology found in this composition, cf. Émile Puech, "Les identités en présence dans les scènes du jugement dernier de 4QInstruction (4Q416 1 et 4Q418 69 ii)," in *Proceedings of the Fifth Meeting of IOQS, Groningen 27–28 July, 2004* (Leiden: Brill, [forthcoming]).

[29] See Puech, *La croyance des Esséniens*, 426–40.

"uprooted," and make wealthy those now starving (4Q521 2, col. 2). This enumeration is inspired by Isaiah 61 and 35 just as is the case of the logion of Jesus in Matt 11:3–6 and Luke 7:22–23. After a break, the text goes on with an allusion to the arrival of Elijah according to Mal 3:23–24 and the mention of a royal messiah whom the earth will acclaim in great rejoicing. In all of these actions God will work through the mediation of his prophet of the end time, the New Elijah whose prototype has already resurrected the dead, healed mortal wounds, and relieved the needy, as well as through the mediation of his messiah(s). These signs, certainly linked to the appearance of the messianic kingdom, very clearly repeat what Sir 48:10–11 attributed before to Elijah *redivivus*. This eschatological prophet is probably to be identified with the Priestly instructor, the priestly messiah expected in the Qumran compositions as the Karaite tradition has emphasized it later.

In another group of fragments (4Q521 7+5 col. 2, lines 1–15) the text describes the Last Judgment at the time of the eschaton where God will bring forth a new creation:

> …]see all that [the Lord has done,
> the ea]rth and all it contains,
> the seas[and all that they contain]
> and all the reservoirs of waters and torrents. (*vacat*)
> [You will rejoice, all of y]ou who make good before the Lor[d],
> [The blessed and no]t as these, the evil one[s], for they shall be for death
> [when] the reviver will re[surrect] the mortals of his people. (*vacat*)
> And we shall give thanks and announce to you the just acts of the Lord
> who [has delivered(?)] the dead and opened [the tombs of…]
> and…[ ]
> and the valley of the dead in […]
> and the bridge of the Aby[ss…]
> the evil ones are coagulated i[n…]
> and the heavens receive [the just…
> and al]l the angels[…

The passage continues, by way of elaboration, the conception of the Last Judgment in Daniel 12. God, as already written in *Pseudo-Ezekiel* (or 4QDeutero-Ezekiel), is able to create anew doing justice with the just of his people, who are the center of all this exhortation, whether in opening the tombs of those resurrected in glory, or on that day gloriously transforming living just, just as the evil are consigned to eternal death. On the day of the great judgment, God acts as the great judge, rewarding the blessed who have done what is good and chastising the evil who have perpetrated evil. In this passage, there is nothing said about the just having to pass through death in order to receive their reward. On the contrary, the mortals (lit. "the sons of death" [= בנ]י תמ[ותה]) among the just are going to escape the inexorable law of death to be changed into the glory of the new Adam "immortal," just as the righteous who arise from their tombs. The passage sets forth a scene very close to that of 1 Thess 4:16–17 relating to the dead and the living in Christ and that of the Last Judgment of Matt 25:31–46 relating to the separation of the blessed and the damned. Lines 9 and 10 could have quoted, as is common in this type of discourse, the opening of the books or the celestial registers for judgment, as well as the notion of rising from the valley of death in line 11. Indeed lines 12 and following mention the separation of the blessed and the damned through the image of the Bridge over the Abyss (גשר תהום). This image, unique in Semitic literature is a borrowing from Zoroastrian and Vedic eschatology.[30] This is the Bridge of Separation (*shinvato peretu*) whose span must separate the good from wicked. The evil are coagulated (קפאו) as the dead in a refrigerium of ice and darkness, whereas heaven's angels go before the just in order to receive them into an extraterrestrial paradise, in the mythical geography of *1 Enoch.*

This passage concerning the final things which appears to be a borrowing from Iranian religion adapted to a Semitic context, but apparently yet without the idea of a universal resurrection, is not otiose in an Essene composition. It overtakes the conviction of the other Essene compositions affirming that at the time of judgment the just will stand before God in the company of the angels. In other words, like in Daniel 12, the state of the resurrected is not a return to the former life, improved and happy, nor clearly immortality of the soul, but a real transformation of the present human condition of the Just, alive or dead, in order to enter in the divine service in the company of the angels. This text envisages a return of the just to a state of paradise before the Fall in the company of the Creator upon an earth unspoiled by Belial and sin comparable to the renewal (παλιγγενεσία) of Matt 19:28; 22:30. That is to say, eschatology refers to protology. Thus it is quite easy to comprehend the state of the body or the flesh of resurrection already described in the Books of Enoch, which certain scholars describe as a spiritual body, more as a doctrine of a "glorified body" known from Zoroastrianism. This Essene conception clearly presupposes the notion of a new earth, of a new heaven, of a purifying by fire, which other Qumran passages emphasize.

---

[30] This belief, which became an important subject in Zoroastrianism, shows up in the middle of the fourth century B.C. See chapter 1 in Henry Corbin, ed., *Terre céleste et corps de résurrection: de l'Iran mazdéen à l'Iran shi'ite* (Paris: Buchet-Chastel, 1960); Marijan Molé, "Culte, mythe et cosmologie de l'Iran ancien. Le problème zoroastrien et la tradition mazdéenne," *Annales du Musée Guimet, Bibliothèque Nationale–Paris* 69 (1963): 323–28; and Albert F. de Jong, "Shadow and Resurrection," *Bulletin of the Asian Institute*, NS 9 (1995): 215–24 (esp. 220–21).

An identical conception is found in the better preserved Qumran scrolls, ones unanimously recognized as Essene scrolls, although it is found in a more diffuse fashion or in passing because no one of these scrolls in their present state directly deals with this subject.

The Rule of the Community *(1QS)*

The theme of the Day of the Lord is central to the "Instruction Concerning the Two Spirits" (1QS col. 3, line 3–col. 4) the composition of which dates from the second half of the second century B.C. The passage deals with the rewards of the just and the punishments of the evil at the time of the Day of the Lord in order to stimulate the conduct to be followed in the present time where each being and creation are subject to the influences and domination of the two spirits: the spirit of light and the spirit of darkness. If the conflictual presence of the two spirits in the human heart conditions its activity, God has placed a term for the domination of evil and to that of the evil doer who will be lost forever, and he will purify and reward the faithful having become just at the time of the Day of the Lord and of the renewal of creation (4.25).

This expectation of the eschatological Judgment (4.20) ought to determine the conduct of each member of the community living in the context of sin. This judgment is then inscribed within a collective eschatology concerning the history of the world and of humanity along with its works, not in a purely individual eschatology of an assumptionist type, nor a belief in the immortality of the soul, as some have imagined. The description of the rewards and the punishments which can only be *post mortem* in relation to the Day of the Lord clearly reflects the words or themes of Dan 12:2. The reward supposes a return to paradise in a world purified from sin, from its origin, that is Belial, and from its consequence, that is, death. Thus all the glory of Adam in Eden is a new promise to the just. The final hymn (1QS 11) reflects the conception established in the Hymns: the author knows himself to be mortal and must return to dust. Nevertheless, God calls his elect to stand before him forever.[31]

---

[31] See Puech, *La croyance des Esséniens*, 426–40.

The Thanksgiving Hymns *(1QH)*

An identical conception underlies the eschatology of the *Thanksgiving Hymns* (1QH), the theological and didactic finality of which does not escape notice. Be they attributed to the Teacher or his peers or disciples, the *Thanksgiving Hymns* also date from the second half of the second century B.C. and reflect the thought of the first generations of the Qumranites.

Certain scholars want to reduce the eschatology of the *Thanksgiving Hymns* to a purely individual eschatology, indeed, even a realized eschatology.[32] This is difficult to accept since the salvation of the just is promised in the future at the time of judgment, just as the destruction of the impious at the time of the eschatological war is a notion clearly presented in the *Thanksgiving Hymns.* At the present the community lives within a time of exile, of trials and persecutions following the Teacher, even if the faithful know that this is only for a time and that the promised eternal rewards will be restored to them through sheer divine grace. This will be an eternal life with God in glory in the company of the angels, a life already experienced in embryonic form in the present through entrance into the community. But it is necessary and indispensable to persevere in order to receive the promised inheritance, for the faithful remain vulnerable and sinful, "a fountain of impurity, wallowing in sin," who can do nothing without the aid of the holy spirit of God. He knows that upon death the body returns to dust (1QH 20.27–34[= 12.24–31], 18.5–7 [= 10.3–5]).[33]

However, this presentation is not irreconcilable with the often repeated mention of the day of judgment at the eschaton, which must involve the "Height," the spirits, the earth, and Sheol (1QH 25.3–16), to the point of requiring the holding of a new conception not attested anywhere else in this literature: the belief in the immortality of the soul. Although poorly preserved, this passage clearly knows of the notion of an intermediate state fully described in *1 Enoch* 22, which dates to a period before the foundation of the Qumran community and which is attested among the manuscripts discovered. Now, the "Book of the Watchers" presents a belief in the resurrection of the just. How is the future judgment conceived where the impious will receive "condemnation, punishments, and destruction" and the just "peace, eternal glory, delights, perpetual joy, length of days, God dispersing that which is ancient and creating anew; destroying the former realities and resurrecting eternal spirits" (1QH 5 [= 13]), if not within a collective eschatology with the resurrection and judgment of the just only, and eternal punishment of the impious? Certainly, resurrection is only mentioned in passing and by allusion but it is connected to the dissolution of the old creation under the domination of spirits of evil and the creation of beings new and eternal. The renovation is described in the terms of re-creation (ברא).

---

[32] Just as, for example Heinz-Wolfgang Kuhn, *Enderwartung und gegenwärtiges Heil: Untersuchungen zu den Gemeindeliedern von Qumran mit einem Anhang über Eschatologie und Gegenwart in der Verkündigung Jesu,* (SUNT 4; Göttingen: Vandenhoeck-Ruprecht, 1966).

[33] We cite the text according to our new numbering of the Hymns following the restoration of the scroll 1QH with, when possible, the equivalent numbering of the editor. See Puech, *La croyance des Esséniens,* 335–419.

The *Thanksgiving Hymns* recognize a collective eschatology, which ends with a universal conflagration that renews the universe. How is one to understand this Conflagration and Fire in deepest Sheol linked to the pardon-purification of the faithful to whom God bequeaths all the glory of Adam in an abundance of days (1QH 4.21–27 [= 17.9–15]), if not as an allusion to the universal conflagration (ἐκπύρωσις) and to the renovation of creation where the just, resurrected or transformed, will be established in its paradisiacal state of "im-mortal" being? This conflagration is described anew in 1QH 11.20–37 (= 3.19–36) where the just, formed of clay and mortal, are called to life in the company of the immortal angels in an assembly of jubilation and praise in a world finally purified from "the great sin," an allusion to the sin of Adam (1QH 11.22 [= 3.21]). The condemnation that weighs upon humanity will be changed into a benediction for the faithful who will have, again therefore, access to paradise and life with God.

But the renewal and the access to the life of paradise are preceded by judgment and the final war when the community, sheltered in its fortress protected by God and his angels, will go forth in order to participate in the final victory, its just dead rise up from the dust in order to take part in the ultimate combat upon the day of judgment and to benefit along with the living from the rewards of the new creation (1QH 13.22–15.8 [= 5.20–7.5] and particularly 14.9–39).[34] The images of the final war portray the intervention of the sword of God repeatedly present in the eschatological passages before the Day of the Lord (CD 7.9–10; 19.10–11, etc.). Though the symbolic language of these hymns is unique, it cannot be ignored in the presentation of Qumran eschatology. In this way the author placed himself within the perspective of eternal retribution of the wicked and recompense for the just–as it is the case in the *Sapiential Work* (*The Instruction A*). But only the just who repose in death are resurrected to participate in the rewards. Just as there is neither injury nor death among the just in this eschatological war, there are neither captives nor any hope for the corpses among the ranks of the enemy. This is clearly to convey that, in order to enter glory, the living just do not have to die and that the just dead will rise, that the wicked will not resurrect but that they remain in death and fire in Abaddon with Belial where the victims of the final combat rejoin them (cf. 4Q521 7+5 col. 2). This presentation obviously depends upon Dan 12:1–2, because the author understood it as interpreted by Alfrink.

---

[34] See ibid., 354–363, where we have given the decipherment of these lines not previously read.

While exhorting for the present and invoking a life in communion with the angels, the *Thanksgiving Hymns* remind that if entrance and steadiness within the community are requisite in order to be reckoned among the just, sons of light, they are not by themselves the realization of salvation, which is expected upon a liberated, renovated, and purified earth in the time of the universal conflagration and final judgment involving all beings. Very far from a realized eschatology, the *Thanksgiving Hymns* affirm the hope in a resurrection of the dead in order to participate with the living in the glory of Adam in an eternal life in the company of the angels in the presence of God and the eternal damnation of Belial and the wicked in infernal Sheol. In this schema of linear eschatology ending with judgment and renovation, the *Thanksgiving Hymns* know also the existence of an intermediate death state and judgment in various spheres: heaven, earth and infernal Sheol. In such a schema in which individual responsibility has an important place, it is nowhere a question of a belief in immortality of the soul and of a unique judgment at the death of the person.

This firm conclusion of the *Thanksgiving Hymns*, presenting a Semitic eschatology which is the same as that of Hippolytus and not the Greek eschatology of the passages of Flavius Josephus, finds a complement in a small fragment not yet joined (frag. 53) which seems to repeat Dan 12:3 or a text like *1 En.* 58:2–6. Might it be Daniel 12 or the *Parables of Enoch*, both passages are in favor of a belief in resurrection.

The War Scroll *(1QM)*

In the *War Scroll* (1QM), a composition more or less contemporary to the *Rule of the Community* (1QS) and the *Thanksgiving Hymns* (1QH), certain scholars thought they have found explicit mention of the resurrection in a particularly laconic passage. But here at 12.6 instead of: "Those who will raise from the earth when your judgments will be disputed," we read further, "in the war [against all those p]unished of the earth disputing your judgments" ([על כול נ]קמי ארץ).[35]

However, the improved reading of this line does not invalidate a faith in the resurrection of the just, of which the author obviously knew, developing the theme of the final war in Daniel 10–12. The sons of light are victorious but no one of the enemy will escape death, but will be delivered to the fire of Abaddon just as the just shine forever. As in Daniel 12 the prince Michael is placed "over the sons of your people" (1QM 12.4–5; 13.10, 15–16; 14.16; 17.6; 18.1–3, 10–11) for the chosen moment (13.14–15, cf. בעת ההיא of Dan 11:40; 12:1, 4), which is the day of the great battle (17.1). A hymnic section of the *War Scroll* (13 and 14)[36] presents this eschatological war according to a collective eschatology presenting great affinities with the closing of the book of Daniel. Like a liturgy, the war of extermination, lead by the sons of light and aided by the hand of God, the sword of God, and his angelic armies, will strike all the impious, uprooting evil and preparing the way of a new era in a transformed world. The just whose names are inscribed in the heavenly books are to be the vanquishers, without casualties in their ranks, whereas not one in the ranks of the enemy will be rescued or survive. Some will be delivered into eternal fire that will devour them, the others will be brilliant and resplendent in light, in joy, and eternal peace. Belial and his spirits will be enchained in dark places of perdition (17.17–18). That is to say, the radical change expected in the victory of the just at the time of judgment.

Does the transformation-glorification of the just and their ascension to God (1QM 14.14) give evidence in favor of a belief in the immortality of the soul or, tied to the notion of Final Judgment and of the conflagration of the world, are they at the same time one of the facets of a belief in resurrection within a collective and personal eschatology? In spite of the absence of a precise vocabulary with regard to this subject (a good third of the scroll is lost) the second solution presents itself as reflecting the understanding of the author of the *War Scroll*–an understanding that is indeed dependent upon Daniel and quite comparable to the notions in the *Thanksgiving Hymns* and the *Rule of the Community*. In fact, the concept of an eschatological war does not have a meaning in an eschatology invoking the notion of the immortality of the soul alone.

---

[35] See ibid., 443–98 (esp. 452).

[36] See ibid., 454–79, where we propose a clearly improved reading of these columns.

The Damascus Document *(CD)*

In the *Damascus Document*, of which a number of copies have been found in the caves, and whose composition also dates from the second half of the second century B.C., the author is more preoccupied with the conversion of his contemporaries in exhorting them to observe the Law than with their future fate. He nevertheless does not ignore the day of judgment (8.3–4, 19.15), the definitive destruction of the impious and the reward of the just to whom are promised "a life eternal and all the glory of Adam (חיי נצח וכל כבוד אדם)" (3.20), or "to live a thousand (thousands of) generations" (7.5–6 par. 19.1). This clearly indicates the recovery of the blessings of paradise before the fall. The impious and apostate will receive appropriate retribution at the time of the Day of the Lord (7.9 par. 19.5–6). One can even note parallels in vocabulary throughout Dan 12:1b–2: "At that time your people will be spared, those … those for punishment (ובעת ההיא ימלט עמך אלה...אלה לחרפות...)" and CD 19.10: "Those will be spared at the time of the Day of the Lord and those who remain they will be delivered up to the sword (אלה ימלטו בקץ הפקדה והנשארים ימסרו לחרב)." This text knows the imagery of eschatological war and the final confrontation of the prince of light and Belial (4.12–6.18, 12.23–13.1, 14.18–19). If the document does not contain an explicit mention of resurrection,[37] it is not without significance that its eschatology forms with that of the three other Qumran scrolls quoted above a unified conception, in direct line with the developments in biblical and apocryphal literature.

Miscellanea

In *Melchizedek* (11Q13) Melchizedek triumphs over Belial at the end of the tenth and final jubilee where the "lot" of Belial is judged and definitively plunged in the darkness, while the "lot" of Melchizedek triumphs in peace and exaltation, as in Daniel 12. This final victory initiates the renovation of the world and the arrival of a new and eternal era.[38]

The eschatological conception of Daniel is recalled in a laconic passage of the *Wicked and Holy* (4Q181 1, col. 2, lines 1–6) attesting the resurrection for eternal life in a celestial exaltation in the company of the angels in sight of the divine liturgy:[39]...[...the impious will be for eternal condemnation and for the annihilation in Abaddon and the just] for life eternal" (lines 5–6).

---

[37] Chaim Rabin, *Qumran Studies* (Scripta Judaica 2; Oxford: Oxford University Press, 1957), 73–74, has read a mention of the resurrection in 20.10, 13; 3.20 and 7.6; see also Puech, *La croyance des Esséniens*, 499–514.

[38] For a more detailed discussion, see ibid., 515–62.

According to the *Micah Pesher 1* (1Q14 10.3–9)[40] all those who follow the teaching of the Teacher and join the council of the community will be saved upon the day of judgment at the end of days. This amounts to following the path of conversion as the *Rule of the Community* prescribes (1QS 8) and consequently to being inscribed in the heavenly books in order to participate in the resurrection.

Many passages of the *Psalm Pesher 1* (4Q171 1–10, cols. 2–4)[41] insist upon the final dispersion of the impious, while the just "live a thousand generations in salvation and all the inheritance of Adam will belong to them forever" (col. 2, lines 1–2). These images portray the eternal salvation of the just contemplating the judgment of the impious of the last generation and getting the inheritance of truth as a return to the well being of the "original" paradise from which death and sin were absent.

The *Florilegium* or *Eschatological Midrash* (4Q174+177), which explicitly cites Dan 11:35 and 12:10, must have accepted the collective and individual eschatology of Daniel; the contrary would otherwise have been surprising.[42]

The Graves of the Essenes

As evidence from within Qumran, it remains to compare the results of this inquiry into the texts with the practice of the inhabitants of the site as much as the archaeological remains permit. It is at least logical to ask whether the authors, scribes and readers who studied or handed on these manuscripts, translated their conception of life after death into their burial practices. Of the nearly 1,200 tombs of the cemeteries by surface survey, the 53 tombs excavated in different parts of the cemeteries (central, peripheral, north and south) give an idea of the identity of the inhabitants of the place as well as of their burial practices.[43] The south-north orientation of the individual tombs of the central cemetery (about 1,100 tombs) and sometimes east-west on the slopes exhibits a marked disdain towards the "impure" Jerusalem and its defiled temple. It is favorably turned towards the north where is situated the paradise of justice and the divine Mountain-Throne according to the biblical and other apocalyptic imagery in line with the cosmology of the time (see Isa 14:13–14, Ps 48:3, *1 En.* 25:4–5).

---

[39] See ibid., 526–31.

[40] See ibid., 599–600.

[41] See ibid., 600–603.

[42] See ibid., 572–91.

[43] For a presentation of the whole, see ibid., 693–702, and for a more developed treatment, see Émile Puech, "The Necropolises of Khirbet Qumrân and of 'Ain el-Guweir, and the Essene Belief in Afterlife," *BASOR* 312 (1998): 21–36.

On the basis of Deut 32:43, did the Essenes also attribute to the soil of Israel the power of the purification of the sinful flesh and of atonement in the expectation of resurrection? Given the importance of the Mosaic law in their activities and their constant concern with purity, it is quite probable. All these factors have brought about the custom of individual tombs in a single trench in the soil, especially as the occupants did not live in families but in a celibate state.[44] Better than an inhumation in a coffin as in the Hellenistic period or a reinhumation in an ossuary as in the Roman period within a family tomb, the Essene practice respected the remains of the deceased sheltered in a loculus which was not disturbed again, except in rare cases of reinhumation, in their eternal repose, in this manner preserving as well as possible the bones from further contact or defilement. The elect lie upon their backs, head to the south gazing toward the north, and face the paradise of justice, the Mountain-Throne of God, and the New Jerusalem toward which they will be drawn into the awakening of resurrection. Or, with head to the west, they will gaze upon the Sun of Justice and its light bursting forth (Mal 3:20).

These customs clearly translate the Essene belief revealed in the texts above and they are distinctly in favor of a belief in resurrection of the body which they read in the biblical passages and Apocrypha and which they expressed in their own writings. These imply belief in a resurrection of the body, which will be animated by the spirit joined to the soul held in reserve during the intermediate state in the paradise of justice. They also emphasize the importance of the body for the personal identity of the resurrected. In considering their tombs does one not hear the echo of the word of the prophet upon which they have surely meditated: "But you, go to the end (of your life) and take your rest, you shall rise for your reward at the end of days" (Dan 12:13).

Is it surprising that the burial practices are in full agreement with the conceptions of a future life transmitted in the documents pre-Essene and Qumranic found in the caves? This is certainly not by accident and if otherwise would merit explanation. But in turn the burial practices confirm the identification of the inhabitants of the place with the Essenes. The simple belief in the immortality of the soul does not account for the Essenes' texts recovered in the caves as well as the biblical texts and Apocrypha present in abundance. Further, it does not explain the particular care taken at Qumran with the corpse of the dead–unique in Palestine–a practice that could not have been understood in isolation from any belief system,[45] and would on this score conflict with the evidence of one classical notice (Hippolytus) which deserves the same attention as its parallel, that of Flavius Josephus.

---

[44] As recent studies showed it, see Joe Zias, "The Cemeteries of Qumran and Celibacy: Confusion Laid to Rest?" *DSD* 7 (2000): 220–53.

CONCLUSION

In conclusion then, the Essenes obviously did not adopt a realized eschatology, as certain scholars have claimed, neither did they assume an immortal soul. They awaited the arrival of the messianic kingdom at the end of the eschatological war at the finish of the final Jubilee, the Day of the Lord or the Last Judgment. The latter assures the resurrection of the just dead and the transformation of the living just into the glory of Adam upon an earth purified by fire and renewed, in the company of angels in the presence of God, but also eternal damnation of the impious vanquished and coagulated in eternal fire of hell with Belial and his angels.

It is finally possible to respond to the question occasioned by a comparison of the accounts of Flavius Josephus and Hippolytus of Rome. The archaeological evidence and the manuscripts (biblical, pseudepigraphical, and Essene) confirm the Essene belief in a future life such as Hippolytus or his source presents: immortality of the soul separated from the body in an intermediate state, the Final Judgment, the universal conflagration and the renewal of earth, and the eternal punishment of the impious, resurrection of the body (of the flesh) of the just Essene in glory, in the image of Adam, incorruptible as before the Fall. But they do not support a belief in an immortal soul entombed in a body, which serves as its prison and from which it will be liberated upon death in order to rejoice and to be reunited with the celestial realm beyond the ocean (for the just) or to tumble into a pit of eternal punishments (for the impious). This is certainly foreign to the Qumran texts and Semitic texts in general which all insist upon divine judgment at the end of the eschaton, the renewal and the purification of all things and the glory of Adam for the just. Flavius Josephus certainly has revised his source, distorting it and imputing to the Essenes non-Semitic beliefs in contradiction to prior evidence, biblical and otherwise, and the evidence of archaeology. We must seek the contradiction in Josephus, not in a source common to the two accounts, quite faithfully followed by Hippolytus despite the adaptation to Greek idiom.

---

[45] Except the south-north orientation, the tombs of Khirbet Qazone cemetery (Jordan) show a lot of peculiarities: graves dug in the Lisan marl containing grave goods as iron, copper, silver, gold earrings and bracelets, beads, scarabs, wooden staffs, pottery, glass, funerary stelae inscribed in Greek or engraved (Dusares betyles), and a proportionately normal number of men, women, and children; see Konstantinos D. Politis, "Rescue Excavations in the Nabataean Cemetery at Khirbet Qazone 1996–1997," *ADAJ* 42 (1998): 611–14. The booklet of Robert Donceel, *Synthèse des Observations faites en fouillant les tombes des nécropoles de Khirbet Qumrân et des environs*: *The Khirbet Qumran Cemeteries: A Synthesis of the Archaeological Data* (*QC* 10; Cracow: Enigma Press, 2002), has to be read with a lot of critical observations that cannot be discussed here.

As the inheritors of these same texts before their separation, it is not surprising that Essenes and Pharisees professed the same belief in this important point, a belief accepted already through the Hasidic milieu. Furthermore, it appears clearly that Daniel 12, which only treats this subject briefly and in passing, is not the first and most ancient biblical witness concerning this belief, which goes back, as we have shown above, to at least the third century in Isaiah 26, *Visions of Amram*, *1 Enoch*, and *Sapiential Work A*. For its part, *Pseudo-Ezekiel* (or *Deutero-Ezekiel*) confirms an ancient rereading of Ezekiel 37 at work in the notion of resurrection. It is not, then, the persecution of Antiochus IV Epiphanes, as is frequently said, that is therefore at the origin of this belief, in trying to account for the hope of the martyrs for the laws (2 Maccabees). On the contrary, the persecution and deportation under Nebuchadnezzar II in 587, which deeply marked the consciousness, were probably the true origin of this development, perhaps and even probably through Iranian influence, partially adopted and adapted to the Yahwistic faith of pious circles of Jerusalem sages, psalmists, etc. *The Messianic Apocalypse* (or *On Resurrection* [= 4Q521]), which witnesses to this influence in an irrefutable fashion, is integrated perfectly into the Essene conception of eschatology expressed by other Essene compositions–in particular, the *Thanksgiving Hymns*, the *Rule of the Community*, the *War Scroll*, and the *Pesharim*. Without doubt it gives, despite its very fragmentary state, more detail than the latter, but that should not surprise given the subject treated in the preserved fragments: the expectations of the messiah(s), of the messianic kingdom and final judgment.

The appearance of this belief rooted in the Canaanite cultural milieu is the work of religious circles reflecting upon divine justice confronted by the death of the just of the people of God. It is inscribed within a collective eschatology, and the resurrection is expected for the day of judgment where God manifests his victory over the Prince of Darkness, over sin and consequently over death (Isa 25:8). But it only concerned the just of this people (Isaiah 25 and 26; Daniel 12), and in their own compositions, only the Essene just. This conception is much more unified than is often expressed in the biblical texts and ancient pseudepigrapha, which do not reflect the belief in the immortality of the soul according to the Greek conception.

The Greek translation of the Bible began by introducing some changes and expanding the resurrection to all the just, then afterward professing a universal resurrection. The New Testament inherited from these conceptions professed by the Essenes and the Pharisees in which the resurrection is always linked with final judgment as recompense of the just by an entry into glory, but as eternal punishment for the impious. The resurrected belongs to the order of the new creation. Also Jesus, vanquisher of Satan and death, is "the first born among the dead" (Acts 26:23; Col 1:18; Rev 1:17) or, "the Christ is resurrected from among the dead, the first fruit of those who have fallen asleep" (1 Cor 15:20). Such is the response of God to the eternal question of man.

CHAPTER THIRTEEN

QUMRAN COMMUNITY STRUCTURE AND TERMINOLOGY AS THEOLOGICAL STATEMENT[1]

Sarianna Metso

I. Introduction

The organizational terminology used in the Qumran writings is puzzling in its diversity.[2] This diversity is apparent in all levels of the community structure: the community as a whole, the different groups of members, the community officials, and the organizational units. This article will attempt to answer a number of questions that I had laid out for future discussion in a previous article:

> Should we think that the use of different organizational terms indicates the existence of different types of groups? Or is it possible that a single group or functionary had several names in use simultaneously? Or was the use of

---

[1] This chapter was originally prepared for the Princeton conference in 1997. A revised form of it was meanwhile published as, "Qumran Community Structure and Terminology as Theological Statement," *RevQ* 20/79 (2002): 429–44. The present chapter is further revised and updated.

[2] This is well recognized, e.g., by James H. Charlesworth, one of the two authors of the entry "Community Organization," in *EDSS*. His view of the possibility of finding any clarity in the matter is somewhat pessimistic: "Numerous technical terms designating social groups or leaders are found in the Rule of the Community. It is not wise to seek to systematize the meanings of all these terms and relate them, because the quintessential Qumran document reflects the evolutionary nature of the Qumran community; that is, the terms most likely had different meanings at different periods in the history of the community and perhaps also at the same time." Idem, "Community Organization in the Rule of the Community," *EDSS* 1:133–36, esp. 133–34. For the other two parts of that article, see Michael A. Knibb, "Community Organization in the Damascus Document," 1:136–38, and "Community Organization in Other Texts," 1:138–40. See also Nathan Jastram, "Hierarchy at Qumran," in *Legal Texts and Legal Issues: Proceedings of the Second Meeting of the International Organization for Qumran Studies, Cambridge 1995; Published in Honour of Joseph M. Baumgarten* (ed. M.J. Bernstein, F. García Martínez, and J. Kampen; *STDJ* 23; Leiden: Brill, 1997), 349–76; Charlotte Hempel, "Community Structures in the Dead Sea Scrolls: Admission, Organization, Disciplinary Procedures," in *The Dead Sea Scrolls after Fifty Years: A Comprehensive Assessment* (ed. P. W. Flint, J. C. VanderKam, and A. E. Alvarez; 2 vols.; Leiden: Brill, 1998–1999), 2:67–92.

> different terms successive, so that terms could have changed even though the structure of the community (or communities) would have remained the same?[3]

While one of the purposes of my study is to question whether and how the different terms occurring in the community's legal documents can be fit together, another of its tasks is to examine the theological background of the terms which the community used of itself and its functionaries.

It is the thesis of this article that the self-understanding of the Essene community is mirrored in the theological dimension of its organizational terminology. Many of the terms used are borrowed from the Hebrew Bible, and the attributes attached to the names of the community functionaries reflect the way the community understood its existence as a fulfillment of God's holy plan expressed in the Scriptures. The purpose of the terms was not merely to function as organizational definitions but to serve a theological function as well, i.e., to express the self-understanding of the community. That theological function helps explain the diversity of the community terminology: sociological clarity was less the goal of the Essene writers than was theological impact.

This article is based on my larger study in progress involving the entire corpus of the rule texts found at Qumran, including such highly interesting manuscripts as *Miscellaneous Rules* (4Q265; *olim Serek Damascus*), *Decrees* (4Q477; *olim Rebukes Reported by the Overseer*), *TohorotA–D* (4Q275; *olim Communal Ceremony*; and 4Q279; *olim Four Lots*).[4] But since we still lack clarity in understanding how the organizational terms function in the foundational documents of the *Rule of the Community* (1QS, 4Q255-264), the *Rule of the Congregation* (1Q28a), and the *Damascus Document* (CD), the focus of this article is the various manuscripts of these three documents. It has been suggested that the *Rule of the Community*, the *Rule of the Congregation*, and the *Damascus Document* originated from different groups: the *Rule of the Community* from the group living at Qumran, the *Damascus Document* from the wider Essene movement, and the group behind the *Rule of the Congregation* from a group different from that of the *Rule of the Community*.[5] Due to the composite nature of the documents, I based my comparison on the occurrences of various organizational terms within the different redactional sections of the documents, not merely in each document as a whole. The importance of the theological aspect of the community terminology is shown especially in the editorial changes made during the redactional process seen in the manuscripts, and a literary critical analysis of the documents indicates that different sources did not necessarily represent the same traditions in their use of the community terminology.

II. SELECTIVE SURVEY OF THE THEOLOGICAL VOCABULARY ATTACHED TO THE ORGANIZATIONAL TERMS

The theological dimension of the organizational terminology is apparent in all levels of the community structure: the community as a whole, the different groups of members, the community officials, and the organizational units.

A. The Names That the Community Uses of Itself

(1) יחד

In the *Rule of the Community*, יחד is the name most frequently used for the community. Despite the fact that the word occurs as a noun only twice in the Hebrew Bible (Deut 33:5; 1 Chr 12:8),[6] and that the term may have been adopted under the influence of the Greek term κοινόν or κοινωνία,[7] the attributes attached to the term indicate that it had a strong theological connotation in the Qumran community: the community is established by God himself (cf. יחד אל 1. 12; 2.22) and will last forever (יחד עולמים 3.12); it is holy (יחד קודש 9.2) and follows his counsel (יחד עצתו 3.6) in truth (יחד אמת 2.24). In 1QSa, the community is usually referred to as עדה; the term יחד is, however, used in the combinations עצת היחד / עצת יחד (1.26, 27; 2.2, 11 [היחד added above the line in 2.2]),[8] השולחן היחד / שול[חן יחד (2.17, 18; there are differences of opinion whether this term should be translated as "the table of the community" or "the common table"), and עדת היחד (2.21). Whereas it is possible that עצת היחד / עצת יחד in 1QSa signifies a special organizational group within the community, the use of the term היחד / יחד in 2.17, 18, i.e., השולחן היחד / שול[חן יחד, and of כול עדת היחד in 2.21, may indicate a reference to the whole community; in this case, it would be synonymous with עדה. In CD, יחד occurs only in manuscript B: מורה היחיד / יורה היחיד (20.1, 14) , אנשי היחיד (20.32). In preserved parts of the 4QD material (4Q266-273), יחד (as a noun) does not occur even once; however, it has been suggested as a reconstruction in 4QD^e (4Q270) frag. 3, col. 3, line 19 ממשפטי הי[חד] (no parallel in CD).

---

[6] The adverb יחדו, however, is used 96 times in the Hebrew Bible. In his forthcoming article "Sinai Revisited" (in *Biblical Interpretation at Qumran* [ed. M. Henze; Grand Rapids: Eerdmans], forthcoming), James C. VanderKam suggests that the Qumran community called itself יחד, a "unity," on the basis of the Sinai narrative, esp. Exod 19:8; "[t]he people all answered as one [יחדו]: 'Everything that the Lord has spoken we will do.'"

[7] Moshe Weinfeld, *The Organizational Pattern and the Penal Code of the Qumran Sect. A Comparison with Guilds and Religious Associations of the Hellenistic-Roman Period* (NTOA 2; Göttingen: Vandenhoeck & Ruprecht, 1986), 13–14. For a broader discussion of the term, see also Bruno W. Dombrowski, "היחד in 1QS and τό κοινόν. An Instance of Early Greek and Jewish Synthesis," *HTR* 59 (1966): 293–307; Shemaryahu Talmon, "Sectarian יחד–A Biblical Noun," *VT* in *The World of Qumran from Within. Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989) 53–60; H.-J. Fabry, "יחד," *TDOT* 6:41–48. In this context, the monograph by Catherine Murphy, *Wealth in the*

(2) עדה

The term עדה, particularly characteristic of the *Rule of the Congregation*, has a strong biblical background, especially in the P document, where it is used of the Mosaic Israel encamped in the wilderness (often explicitly named as עדת ישראל; Exod 12:3, 6, 19, 47; Lev 4:13; Num 32:4; Josh 22:18, 20; 1 Kgs 8:5). Marvin H. Pope has described the Priestly writer's use of the term עדה as follows:

> As used in P, the term appears to designate the responsible element of the nation, the full citizens who have the rights and duties of looking after the affairs of the nation. At the head of the עדה is Moses, and the tribes are represented by leaders or chiefs…Males of the community twenty years of age and over who were fit for military service (Num 1:20) are called פקודי העדה (Exod 38:25) [9]

Dead Sea Scrolls and in the Qumran Community (*STDJ* 40; Leiden: Brill, 2002) should also be mentioned. Although the community organization is not her focus, her impressive work will provide helpful background for many of the organizational terms used in the Dead Sea Scrolls.

[8] For a more detailed discussion on עצת היחד, see below under "D. The names used for organizational units within the community."

[9] Marvin H. Pope, "Congregation, Assembly," *IDB* 1:669–70, esp. 669. For a broader discussion, see D. Levy, Jacob Milgrom and Heinz-Josef Fabry, "עֵדָה,"

The whole work of the *Rule of the Congregation* can be seen as reflecting the theology attached to the term עדה. The group is referred to as the congregation of Israel (עדת ישראל1QSa 1.1, 20; 2.12), sometimes as the holy congregation (עדת הקודש / עדת קודש 1.9, 12–13) or simply as the congregation (העדה 1.17, 23; 2.5, 7, 8, 10). It is the congregation of the men of renown (עדת א[נ]ושי השם 2.8), consisting of the wise men of the congregation, the commanders of the tribes, the judges and officers, and the commanders of thousands, hundreds, fifties, and tens, and the Levites. In one instance the term כול עדת היחד is used (2.21), and there it may be synonymous with עצת היחד, which occurs several lines earlier in 2.11.[10]

The term עדה is frequently mentioned also in CD, in both the Admonition and the Laws. Four times the term occurs with the third person masculine suffix referring to God (עדתו 8.13; 13.10, 11; 19.26). Particularly often עדה occurs in the titles or designations of persons or officials: (נשיא כל העדה (7.20), שפטי העדה (10.4, 8 par. 4QD^{e} [= 4Q270] frag. 6, col. 4, lines 15, 18), עד עשרה אנשים ברורים מן העדה (10.5 par. 4QD^{e} [= 4Q270] frag. 6, col. 4, lines 15–16), באי העדה (14.10). In CD, there is a reference to a congregation of the men of perfect holiness, עדת אנשי תמים הקדש (20.2), and J. Baumgarten has argued that עדת אנשי תמים הקדש would signify an inner group, more advanced in their piety, within the Essene community.[11] It may be noted

---

TDOT 10:468–81. To the military and legal aspects of the term, a ritual or cultic dimension should be added, as pointed out by Levy and Milgrom, 473–74.

[10] This conclusion is based on the assumption that the officials and groups mentioned in 1QSa 2.12–17 together constitute the full membership of the community, who are summoned for the "assembly of the council of the community" (מועד לעצת היחד 2.11): cf. 1QSa 1.25–26, "If the whole assembly (כול הקהל) is summoned, whether for judgment, or for a council of the community (עצת יחד)…" In 1QSa 2.17–21, "the whole congregation of the community" (כול עדת היחד) seems to include everyone else except the two messiahs. Thus, it seems likely to me that כול עדת היחד (2.21) and עצת היחד (1.26; 2.11) are synonymous. However, the question is complicated by the likelihood that the latter part of the manuscript starting with 2.11, forms a redactionally separate unit. Further indication that כול עדת היחד(2.21) and עצת היחד (1.26; 2.11) are synonymous and refer to the full membership of the community is given by 1QS, for the sections dealing with the admission of the new members seem to use the term עצת היחד synonymously with היחד (see 1QS 5.7, and cf. 6.13 with 6.18 and 23). See below section D. "The Names Used for Organizational Units within the Community." Heinz-Josef Fabry (*TDOT* 10:481), on the other hand, referring to 1QSa 2.21 and 4QpPs^{a} (4Q171) 1–10, col. 4, line 19, suggests that עדת היחד "constituted a subdivision" of היחד.

[11] Joseph M. Baumgarten, "The Duodecimal Courts of Qumran, Revelation and Sanhedrin," *JBL* 95 (1976): 59–78; repr., in *Studies in Qumran Law* (SJLA 24; Leiden: Brill, 1977), 145–71; and idem, "The Qumran-Essene Restraints on Marriage," in *Archaeology and History in the Dead Sea Scrolls* (ed. L. H. Schiffman; JSPSup 8; Sheffield: JSOT Press, 1990), 13–24, esp. 18, n23.

that in the *Rule of the Community*, perfect (תמים) conduct is expected from every member of the community.[12] The word עדה is used only once in the *Rule of the Community* (1QS 5.20), in the phrase עדת קודש, equivalent with יחד; the phrase occurs twice in the *Rule of the Congregation* (1.9, 12–13).

(3) קהל

In the *Rule of the Congregation* and the *Damascus Document* the community is sometimes referred to as קהל or הקהל (1QSa 1.25; CD 7.17 par. 4QD^a [= 4Q266] frag. 3 col. 3, line 18; 11.22; 12.6 par. 4QD^f [= 4Q271] frag. 5, col. 1, line 21; 14.18 par. 4QD^a [= 4Q266] frag. 10, col. 1, line 11, 4QD^d [= 4Q269] frag. 11, col. 1, line 1); in the *Rule of the Congregation* one also finds קהל אל (2.4).[13] There are no occurrences of the term in the *Rule of the Community*. In the Deuteronomistic literature, the term קהל designates the cultic community of Israel, and sometimes the divine name is attached (קהל יהוה Num 16:3; 20:4; or קהל אלהים Neh 13:1). In pre-Deuteronomic literature the term is used rarely, but in Num 22:4 it is applied to the large camp of Israel.[14]

(4) מחנה

In comparison with יחד and עדה, the term מחנה which is particularly frequent in the *Damascus Document*, appears to be different, for it seems to lack almost completely the type of theological attributes attached to יחד and עדה. Naturally, the term מחנה has a background in the Hebrew Bible, where Israel is portrayed as a "camp" during its pre-Canaanite days (see Exod 33:7, Num 2:2; 1:53; 1 Chr 9:18), camps here signifying the holy people of Yahweh. In the *Damascus Document*, the term refers to Essene settlements or communities in Palestinian towns and villages, outside Qumran (see, e.g., 7.6; 9.11; 10.23; 12.23; 13.13; 19.2).[15] מחנה was not understood as a secular assembly, however, for the groups listed as belonging to a מחנה are "priests, Levites, Israelites, and proselytes" (CD 14.3) and at the head of a מחנה stood a priest learned in the book of Hagi (CD 13.2). In the Hebrew Bible the word מחנה is also used to signify a military camp (Deut 23:10; Judg 7:10), and this connotation of the term is particularly prominent in the *War Scroll* (e.g., 1QM 3.4; 4.9; 7.1, 3, 7; 14.2). The term occurs only once in the *Rule of the Congregation* (1QSa 2.15), and there its meaning is close to that in the *War Scroll*. In 1QS, the term is not attested at all.

---

[12] 1QS 1.8; 2.2; 3.9; 8.9, 10, 18, 20, 21; 9.2, 5, 6, 8, 9, 19.

[13] Actually, the manuscript reads בקהל אלה; it is to be corrected to בקהל אל.

[14] Overall, there is no discernible difference in meaning between the terms עדה and קהל in the Hebrew Bible; see Pope, *IDB* 1:670, and Jacob Milgrom, *Leviticus 1–16: A New Translation with Introduction and Commentary* (AB 3; New York: Doubleday, 1991), 242–43. Milgrom suggests that "the alternation between עדה and קהל in legal material may be due to editorial activity" (243). He argues that "…עדה is an ancient technical term for the sociopolitical body that was called into session by Israel's tribal chieftains whenever a national transtribal issue arose. Once the monarchy was firmly established, though, there was no further need for the עדה and, indeed, the term does not occur even once in writings that can be dated at the end of the monarchy, such as Deuteronomy or Ezekiel" (242). "Thus it can be suggested that once עדה fell into desuetude, subsequent redactors of P had no other choice but to substitute קהל for it, the very word that usurped its place. Out of reverence for the text, however, they did not replace every עדה but only once or twice in each pericope, so that the reader would know that the term he knew as קהל originally read עדה (243).

(5) ברית

The theme of the covenant was, of course, of special importance for the Essenes: the community considered itself as the true keeper of the covenant. In the Qumranic writings numerous Hebrew Bible patterns and ideas have been used and combined. It is not the purpose of this article, however, to describe and analyze the covenantal theology of the Essenes. Instead, I wish to pay attention to the special connotation that was added to the term "covenant" (ברית) in the Essene and especially Qumran community. There are many instances identifying entering into the community with entering into the covenant: the community *was* the covenant. The terms יחד and ברית appear to have been used somewhat synonymously, especially in the *Rule of the Community*, so that ברית had in fact obtained a connotation of an organizational term: ברית חסד (1.8), לברית יחד עולמים (3.11–12), ליחד ברית עולם (5.5), בברית אל (5.8), ביחד לבריתו (5.22), ברית היחד (8.16–17). The idea of the community as the covenant has its background in the language of the Second Isaiah, e.g., Isa 42:6 ואתנך לברית עם ("I have made you a covenant to the people"). The Qumran community seems to have adopted Second Isaiah's view about the people as the covenant, at the same time abandoning the universalist message of his ideology.

---

[15] Franz-Josef Helfmeyer, "חנה" (*TDOT* 5:6) points out that the "camp" mentioned in the Damascus Document "does, however, have at least one element of the 'desert ideology' in common with the OT notion of the desert camp: a situation of separation, comparable to the purified cities of 1 Macc. 13:48 (cf. CD 12:23)."

In CD, the term "covenant" is frequently mentioned. The community refers to itself as those who enter or entered into the covenant (2.2; 6.19; 9.3 par. 4QD^e^ [= 4Q270] frag. 6, col. 3, line 17; 8.1 par. 4QD^a^ [= 4Q266] frag. 3, col. 3, line 24; 13.14; 19.14; 20.25) or, alluding to Jer 31:31, as the new covenant in the land of Damascus (6.19; 8.21 = 19.33; 20.12). At the same time, it is emphasized in the *Damascus Document* that the covenant is the same that God made with the ancestors (8.17–18; 12.11; 15.5, 18, 19; 19.29–31) and that it is a covenant that will last forever (3.13; 19.1–2). In contrast to the *Rule of the Community*, however, in CD one does not find the kind of attributes attached to the term that would directly identify the community with the covenant. The term מחנה, for example, never occurs together with ברית in the *Damascus Document.* In the *Rule of the Congregation*, the term occurs only twice, in both cases with a suffix. In the first case, the suffix refers to the sons of Zadok, the priests: בני צדוק הכוהנים ואנושי בריתם (1.2). In the second case, the suffix refers to God: אנושי עצתו אשר שמרו בריתו (1.3).

(6) ישראל

The case of the term ישראל is interesting, for its use in the *Rule of the Community* differs from that in the *Rule of the Congregation* and the *Damascus Document.* Sometimes יחד and ישראל appear to have been used synonymously in the *Rule of the Community* (1QS 2.22; 5.5), but there are instances as well where the community is described as belonging to a larger Israel (1QS 5.6; 8.5, 9, 11). In 1QS 6.13 ישראל is even used to signify persons outside the community ("Anyone from Israel who willingly offers himself to join the council of the community").[16]

In the *Rule of the Congregation*, the community is consistently referred to as Israel. In 1QSa 1.1 and 2.12 the special title the community uses of itself is כול עדת ישראל (see also 1.20). As mentioned above in connection with the term עדה, the title כול עדת ישראל is borrowed from the Priestly writer of the Pentateuch, where it is used to designate the wilderness community during the Exodus (Exod 12:3, 47: Lev 4:13; Josh 22:18; 1 Kgs 8:5). The wilderness pattern is also apparent in 1QSa 1.14, where "the heads of the thousands of Israel" are mentioned. In 1QSa 1.6

---

[16] One might ask whether the sentence in 1QS 6.13 could not be understood in the sense that "Israel" would signify the community (i.e., יחד) and "the council of the community" a subgroup within it. A comparison between the occurrences of יחד and עצת היחד in the *Rule of the Community* indicates, however, that the (whole) community was sometimes referred to as עצת היחד. See below in section D, "The Names Used for Organizational Units within the Community."

the community members are spoken to as "all those who are native Israelites" (a citation from Lev 23:42). M. Knibb has correctly pointed out that "implicit in these words is the claim that the community represents the true Israel, the ideal which all Jews should follow."[17] Again, in the *Rule of the Congregation*, the assembly of the community members is called עצת היחד בישראל (2.2).

In the Admonition of the *Damascus Document*, where the origins and history of the Essene movement are recounted, it is Israel that is spoken of; Israel's history is identified with the community's history. In 1.7 par. 4QD^{c} (4Q268) 1, 14, for example, the community is described as "a root of planting from Israel and Aaron," and in 6.5 par. 4QD^{b} (4Q267) 2, 11 and 8.16 (= 19.29) the community members are referred to as "the converts of Israel." Aaron and Israel are frequently mentioned together (CD 1.7 par. 4QD^{c} 1, 14; 10.5 par. 4QD^{e} [4Q270] frag. 6, col.4, line 16; 12.23–13.1; 14.19 par. 4QD^{d} [4Q269] frag. 11, col. 1, line 2; 19.11; 20.1). In the section of the Laws, Israel and the community seem to mean the same: the community is called חבור ישראל (12.8), the community members are referred to as זרע ישראל (12.22), and the rules for entry to the covenant, i.e., to the community, are meant for the whole Israel הבא בברית לכל ישראל לחוק עולם (15.5).

B. The Names Used for Groups of Community Members

The rule texts contain lists of groups of the community members, which provide illuminating evidence for the existence of different traditions in the use of organizational terminology. In 1QS 2.19–25 the groups of the community are named "priests, Levites, and all the people," while in 1QS 6.8–13 they are "priests, elders, and the rest of all the people." Since it is implausible that the terms "elders" and "Levites" could have been used synonymously, it seems that two different traditions are attested here. Yet another way of grouping the members occurs in CD 14.3–6: priests, Levites, Israelites, and proselytes. In this case, a real difference in community structure is more likely, for there is no mention of "proselytes" belonging to the community in the *Rule of the Community*.[18]

---

[17] Michael A. Knibb, *The Qumran Community* (vol. 2 of *Cambridge Commentaries on Writings of the Jewish and Christian World 200 BC to AD 200*; Cambridge: Cambridge University Press, 1987), 149.

[18] For "proselytes" in CD, see Hempel, "Community Structures," 77.

All three documents, the *Rule of the Community*, the *Rule of the Congregation*, and the *Damascus Document*, use the wilderness tradition of Exod 18:21 and Deut 1:15 and portray the community as if it were organized as an army. According to the *Rule of the Community*, the lay members of the community shall enter the covenant in "thousands, hundreds, fifties, and tens" (1QS 2.21–22) at the annual ceremony of the covenant renewal. Special officials at the heads of the groups are mentioned in the *Rule of the Congregation*: "the heads of the thousands of Israel, the commanders of hundreds, the commanders of fifties, [the commanders] of tens" (1.14–15; see also 1.29–2.1). The rule for the camps in CD 13.1–2 orders the groups consisting of at least ten members to be divided according to "thousands, hundreds, fifties, and tens."

When the community groups are mentioned separately, different kinds of names are usually used. The term אנשי היחד occurs in the *Rule of the Community* in the section recorded in columns 5–9. It refers to the members of the community in general and is somewhat synonymous with the term הרבים,[19] except that the latter has a more administrative connotation. Full certainty cannot be attained as to whether the term אנשי היחד also covers the members who were still in their probational period or whether the term, like הרבים, designated full members exclusively. In two out of the twelve occurrences אנשי היחד alludes to the lay members alone (1QS 5.2–3; 9.7), and in the contexts of these a differentiation has been made between the lay members (רוב אנשי היחד or אנשי היחד) and the priests (בני צדוק or בני אהרון). In the *Damascus Document* אנשי היחד occurs only once, in manuscript B (CD 20.32 אנשי היחיד, corr. אנשי היחד). There are no occurrences of the term in the *Rule of the Congregation.*

One might think that בני המחנה occurring in CD 13.13 would constitute a term parallel to אנשי היחד, but that occurrence is unique in the *Damascus Document*, which does not intend to use any single specific name for the community members (note, e.g., that "those who enter the covenant" and "sons of Israel" are used frequently). Contrary to the *Rule of the Community*, women and children are mentioned both in the *Rule of the Congregation* and the *Damascus Document* (1QSa 1.4; CD 4.21; 5.10; 7.7–8; 12.1 par. 4QD^{f} (4Q271) frag. 5, col. 1, line 17; 16.10–12; 19.3).[20]

The documents are fairly consistent in the names of priests. They are called simply הכוהנים (e.g., 1QS 1.18; 2.19; 6.4–5; 8.1; 1QSa 1.15–16;

---

[19] See note 6 for references.

[20] There are also eight occurrences in 4QD^{e} that have no parallels in CD: 4QD^{e} frag. 2, col. 1, line 18; frag. 2, col. 2, lines 16, 17; 4.1, 2, 6, 13; 5.21; frag. 7, col. 1, line 13.

CD 4.21; 10.15; 14.3, 5, 6),[21] but also בני צדוק (1QS 3.20, 22; 9.14; 1QSa 1.2, 24; 4QD^a (4Q266) frag. 5, col. 1, line 16) and בני אהרון (1QS 5.21; 9.7; 1QSa 1.15–16, 23; 2.13; 4QD^a frag. 5, col. 2, lines 5, 8, 12; frag. 6, col. 2, line 13; 4QD^e (4Q270) frag. 2, col. 2, line 6; 4QD^g (4Q272) frag. 1, col. 2, line 2). The group of the Levites is mentioned in all three documents (1QS 1.19, 22; 2.4, 11, 20; 1QSa 2.1; CD 3.21; 13.3; 14.4–5 par. 4QD^c (4Q268) 2.1; 10.5 par. 4QD^e frag. 6, col. 4, line 16). Unique for the *Rule of the Congregation* is the division of community members according to their families (משפחות; 1.9, 15, 21).

C. The Names Used for Community Officials

(1) משכיל

The term משכיל appears in the *Rule of the Community* and the *Damascus Document.* Certain scholars consider the term equivalent to occurrences in the Book of Daniel (11:33; 12:3) and interpret it simply as the general way "wise man,"[22] but the majority view it as denoting a specific community official,[23] and the readings in 1QS 9.12, 3.13 and 1QSb 1.1, 3.22, 5.20 give weighty support to that view. J. Hempel, Knibb and Koenen consider the maskil to be a lay leader.[24] A point against that view, however, is that a function assigned to the maskil is to bless the God-fearing, the priests and the prince of the congregation, indicating that the maskil was either a priest or a Levite[25] (see 1QSb 1.1, 3.22, 5.20). In the *Damascus Document*, the role of maskil is most vague. The term occurs there only twice in the headings of heavily redacted passages that deal with the regulations for the camps. The passages have multiple headings involving several addressees, and it is no longer possible to determine which duties were specifically addressed to the maskil.

---

[21] Plus twenty occurrences in 4QD that have no parallels in CD.

[22] See, e.g., Preben Wernberg-Møller, *The Manual of Discipline Translated and Annotated with an Introduction* (*STDJ* 1; Leiden: Brill; Grand Rapids: Eerdmans, 1957), 66n39: "Both in Daniel and in Pseudepigraphal literature the designation 'wise' is used in a general sense about a member of the pious community, and this is probably the meaning in which the word is used also in 1QS and CD…" Carol Newsom (*Songs of the Sabbath Sacrifice: A Critical Edition* [HSS 27; Atlanta: Scholars Press, 1985], 3) also writes that "in certain occurrences of the word at Qumran it may…have a nontechnical meaning, 'person of understanding' (e.g., 1QH 12.11; 4Q510 frag. 1 line 4)," but she continues that "in most of its occurrences in QL, however, משכיל is used as a technical term to designate a particular office or functionary in the Qumran community."

[23] For example, André Dupont-Sommer, "L'instruction sur les deux Esprits dans le 'Manuel de Discipline,'" *RHR* 142 (1952): 5–35, esp. 12; Newsom, *Songs of the Sabbath Sacrifice* , 3; Eduard Lohse, ed., *Die Texte aus Qumran. Hebräisch und Deutsch. Mit Masoretischer Punktation. Übersetzung, Einführung und Anmerkungen* (München: Kösel-Verlag, 1971), 283n23; Klaus Koenen, "שָׂכַל," *TWAT* 7:782–95, esp. 794.

[24] Johannes Hempel, "Die Stellung des Laien in Qumran," in *Qumran-Probleme. Vorträge des leipziger Symposions über Qumran-Probleme vom 9. bis 14. Oktober 1961* (ed. H. Bardtke; Deutsche Akademie der Wissenschaften zu Berlin, Schriften der Sektion für Altertumswissehschaft 42; Berlin: Akademie-Verlag, 1963), 193–215, esp. 197; Knibb, *The Qumran Community*, 96; Koenen, "שָׂכַל," 794.

(2) פקיד *and* מבקר

Comparable to משכיל are two other officials, פקיד and מבקר, described in the *Rule of the Community* (1QS 6). The *paqid* is the leader of the *rabbim* appointed to examine those who seek to become members of the community and to teach them the community's rules (1QS 6.14–15). The *mebaqqer* similarly is the leader of the *rabbim* (6.12). His assigned task is the administration of the candidates' property during their second year of probation (6.20). Since the duties of the *mebaqqer* and *paqid* share similarities, does this mean that they are one and the same official or might they be two separate officials with similar duties? Most scholars have taken the first position, albeit hesitatingly, on the basis of the *Damascus Document*:[26]

> In CD XV, 8 the *mebaqqer* of the *rabbim* (המבקר אשר לרבים) is mentioned (cf. 1QS frag. 6, line 12). According to CD frag. 13, lines 7–11 the *mebaqqer* is the head of the camp, whose duty it is to teach the *rabbim.* He is the one to examine the candidates, and the verb used in this context is פקד (cf. 1QS frag. 6, line 14). On the basis of this comparison it seems likely that *mebaqqer* and *paqid* are synonymous terms used of the same office. Milik has argued that the *paqid* was a priestly leader but the *mebaqqer* a layman.[27] Priest came to the same conclusion having investigated the question together with the messianic ideas of the community.[28] Vermes, on the other hand, has argued that the *mebaqqer* (whom he identifies with the *paqid*) and

---

25. Cf. 2 Chr 30:22 כל־הלוים המשכילים. In 1QS 1.16–2.18 only priests and Levites, never laymen, act as those who pronounce blessings and curses. In 4Q510 and 4Q511 the *maskil* has the function of reciting protective hymns against evil spirits.

26. William H. Brownlee, *The Dead Sea Manual of Discipline* (BASORSup 10–12; New Haven, CT: ASOR, 1951), 25n27; Wernberg-Moeller, *The Manual of Discipline*, 107; Frank M. Cross, Jr., *The Ancient Library of Qumran and Modern Biblical Studies. The Haskell Lectures* (Garden City, NY: Doubleday, 1958; repr. 1976), 176; Mathias Delcor, "Qumran. La Règle de la Communauté. Doctrines des Esséniens. I. L'Instruction des deux esprits," in *DBSup* 9:851–57, esp. 855. Knibb, *The Qumran Community*, 118.

27. Jozef T. Milik, *Dix ans de découvertes dans le Désert de Juda* (Paris: Cerf, 1957), 99–100.

28. John F. Priest, "Mebaqqer, Paqid, and the Messiah," *JBL* 81 (1962): 55–61.

> the maskil were one and the same person.[29] This is hardly the right conclusion, for in the Community Rule the *maskil* appears as the spiritual teacher and leader of the community rather than as an administrative officer. The responsibility of the *maskil* is to lead new members into the secrets of the interpretation of the Law (1QS frag. 9, lines 14, 17–18) and to ensure that the secrets remain within the community, hidden from outsiders (frag. 9, lines 16–20). A special duty of the *maskil* is to teach the doctrine of the two spirits (1QS frag. 3, line 13–frag. 4, line 26).[30]

The *Rule of the Congregation* introduces two groups of officials which do not occur in the *Rule of the Community* at all: "the commanders, judges and officers" (שרים שופטים ושוטרים; 1QSa 1.15, 24, 29–2.1) and "the heads of the families of the congregation" (ראשי אבות העדה) (1.23–24, 25; 2.15–16 [reconstructed]). All terms have been borrowed from the Pentateuch, the first group of officials from Deut 1:15–16 and Exod 18:21–22, the second from Num 31:26, and the use of these terms reflects the wilderness imagery in which the community viewed itself. In the *Damascus Document*, of these only שופטים is attested (CD 9.10; 10.1, 4 par. 4QD^e [= 4Q270] frag. 6, col. 4, lines 13, 15; 14.13 par. 4QD^a [= 4Q266] frag. 10, col. 1, line 6; 15.4).

D. The Names Used for Organizational Units within the Community

The term הרבים[31] is used only four times in the CD (13.7; 14.7, 12; 15.8) but thirty-four times in 1QS (e.g., 6.8, 15, 25; 7.16; 8.19; 9.2). Interestingly, the term occurs only in the section of the Laws (9–16) in the *Damascus Document*,[32] and only in columns 5–9 of the *Rule of the Community*. In the *Rule of the Community* the term signifies the totality of full members of the community, consisting of both priests and laymen, the authoritative body where the judicial matters of the community were decided. Those who were still in their probationary period were not yet considered as belonging to הרבים (see 1QS 6.13–23). In fact, examining and accepting the candidates for membership was a major duty of הרבים, and here we see a difference between the *Rule of the Community* and the *Damascus Document*: according to the *Rule of the Community* the group of הרבים is superior to המבקר in matters related to the new members (see esp. 1QS 6.13–23, where the final decision is made by the authority of הרבים, not by המבקר). In the *Damascus Document* the relationship between the two seems to be the reverse: The *mebaqqer* has a more important role in accepting a new member (CD 15.7–15), and it is the duty of המבקר to instruct הרבים (CD 13.7).

[30] Sarianna Metso, *The Textual Development of the Qumran Community Rule* (*STDJ* 21; Leiden: Brill, 1997), 136-37n92.

[31] For the meaning and translation of the term, see Hans Walter Huppenbauer, "רבים, רוב, רב in den Sektenregel," *TZ* 13 (1957): 136–37; Jean Carmignac, "HRBYM: les Nombreux ou les Notables?" *RevQ* 7 (1971): 575–86; Colin G. Kruse, "Community Functionaries in the Rule of the Community and the Damascus Document. A Test of Chronological Relationships," *RevQ* 10 (1981): 543–51.

[32] To this should be added the following occurrences that have no parallel in CD: 4QD^a 11 1.8 (2x); 4QD^b 9.8; 4QD^e frag. 7, col. 1, line 11.

A rule for the session of the *rabbim* (מושב הרבים) has been recorded in 1QS 6.8–13, and a comparison between 1QS 6.8 and 10 indicates that מושב הרבים and עצת היחד were two different names for the same community meeting. Somewhat confusing is the observation that whereas in 1QS 6.8 the term עצת היחד seems to designate an organizational body *within* the community, "a council of the community," the sections 1QS 5.7–20 and 6.13–23 dealing with the admission of new members seem to use term עצת היחד synonymously with היחד (see esp. 5.7, and cf. 6.13 with 6.18 and 23). The community meeting termed מושב כל המחנות in CD 14.3 appears to have had a function similar to that of the מושב הרבים of the *Rule of the Community* (cf. esp. CD 14.3–6 and 1QS 6.8–10). In the *Rule of the Congregation*, the *rabbim* is never mentioned. Instead, the terms מושב אנשי השם and מועד לעצת היחד (both in 1QSa 2.11) are used.

III. EXAMPLES OF REDACTIONAL ACTIVITY TO INCREASE THEOLOGICAL SIGNIFICANCE OF THE ORGANIZATIONAL TERMS

Among the copies of the *Rule of the Community* manuscripts 4QS^{b,d} (4Q256, 4Q258) contain a text which is considerably shorter than that of 1QS. Despite the fact that both 4QS^{b} and 4QS^{d} are palaeographically later than 1QS, they have transmitted a more original text than 1QS. A comparison between the versions of 4QS^{b,d} and 1QS reveals a process of redaction, the purpose of which was to strengthen the self-understanding of the community and to emphasize its role as the true keeper of the covenant. Several of the editorial changes involve terms related to community organization, and the words absent from 4QS^{b,d} but added in 1QS demonstrate the theological significance attached to the terms.

In 4QS^{b,d} the parallel to 1QS 5.2–3 states that the authority in the community belongs to the *rabbim* (על פי הרבים, 4QS^{b} 9.3 par. 4QS^{d} 1.2), whereas in 1QS the term is replaced by a long verse:

> according to the sons of Zadok, the priests who keep the covenant, and the multitude of the men of the community who hold fast to the covenant. On the basis of their word the decision shall be taken.[33]

על פי בני צדוק הכוהנים שומרי הברית ועל פי רוב אנשי היחד
המחזקים בברית על פיהם יצא תכון הגורל

In spite of the use of different terminology, no difference can be perceived between the manuscripts in their description of the structure of the community,[34] for 1QS 6.8 clearly states that the *rabbim* consist of both priests (הכוהנים) and laymen (הזקנים[35] ואשר כול העם). Apparently, the redactor(s) wished to stress the purpose of הרבים as the true keeper of the covenant and, as Vermes has pointed out, to emphasize the Zadokite link of the priestly leaders of the community.[36]

A similar case occurs in 1QS 5.9–10: the term "the council of the men of the community" (עצת אנשי היחד, 4QS^{b} 9.9 par. 4QS^{d} 1.7) occurring in 4QS^{b,d} has been replaced by the long phrase:

> to the sons of Zadok, the priests who keep the covenant and seek his will, and to the multitude of the men of their covenant who together willingly offer themselves for his truth and to walk according to his will.

לבני צדוק הכוהנימ שומרי הברית ודורשי רצונו ולרב אנשי בריתם
המתנדבים יחד לאמתו ולהתלך ברצונו

A comparison between 1QS 6.8 and 10 implies that the terms הרבים and עצת היחד are synonymous (see also, e.g., 1QS 5.7; 6.3, 14, 16; 7.2, 22, 24), so the motive for replacing the term must have been something other than a change in the community structure. In my opinion, the motive was theological.

---

[33] The translation here and in the longer quotations that follow is that of Michael A. Knibb, *The Qumran Community*.

[34] For a different assessment, see Hempel, "Community Structures," 83–84.

[35] This is the only occurrence of הזקנים in 1QS. The word also signifies a special group in 1QM 13.1, CD 5.4 and 9.4, and it may be somewhat synonymous with ראשי אבות העדה of 1QSa 1.23–24. According to Walter Baumgartner (*HAL* 264), in the Hebrew Bible the term is used in the sense "Gesamtheit der (den Vollbart tragenden) im reifen alter stehenden Männer, der Rechtsfähigen einer Gemeinschaft" (e.g., Josh 20:4; Deut 19:12; 21:3; Exod 3:16; 2 Kgs 23:1; Ezek 8:11; Lev 4:15; Deut 31:28; 1 Kgs 20:7; Exod 24:14).

[36] Geza Vermes, "Preliminary Remarks on Unpublished Fragments of the Community Rule from Qumran Cave 4, " *JJS* 42 (1991): 250–55, esp. 254–55.

The variant in 1QS 5.2–3 has been widely discussed. Whereas Vermes speaks of two different traditions,[37] C. Hempel has developed the thought further, speaking of a Zadokite recension, the marks of which can also be seen in the text of 1QSa.[38] R. Kugler discusses another variant concerning the sons of Zadok in 1QS 9.14 par. 4QS^{e} 3.10 (4Q259; בני הצדוק par. בני הצדק), arguing that the form in 1QS typifies a later recension indicating that the Zadokite priests had not always had a prominent role in the community but gained that position only at a later stage. In his view the Zadokites, however, remained obedient to the superior maskil.[39] Although developments in the text can be due to historical changes in the community, I do not find it compelling in 1QS 5.2–3 nor in 1QS 5.9–10. Both of the substitute wordings occurring in 1QS are heavily loaded with theological vocabulary: The sons of Zadok are referred to as "the priests who keep the covenant" and "seek his will,"[40] and the men of the community as those "who hold fast to the covenant" and "who together willingly offer themselves for his truth and to walk according to his will." If one attributes the motive for replacing the term הרבים to theological factors, then these two changes are in line with other redactional changes made in the section.

Other examples of editorial changes involving organizational terminology are the instances in 1QS 5 where the words יחד and ברית have been added to the text secondarily. The case in 1QS 5.20–22 par. 4QSd 2.1–2 is probably the most illustrative (the words lacking in 4QS^{b,d} but added in 1QS are in italics): "…they shall examine his spirit…under the authority of the sons of Aaron who have willingly offered themselves *in the community* to establish his covenant and to pay attention to all his statutes which he has commanded men to perform, and under the authority of the multitude of Israel who have willingly offered themselves to return in the community *to his covenant*." A similar kind of insertion occurs in 1QS 5.5–6 par. 4QS^{b} 9.5 par. 4QS^{d} 1.4: "…that they may lay a foundation of truth for Israel, for the community *of the eternal*

---

[37] Vermes, "Preliminary Remarks," 255.

[38] Charlotte Hempel, "The Earthly Essene Nucleus of 1QSa," *DSD* 3 (1996): 253–69, and "Community Structures," 83–84.

[39] Robert Kugler, "A Note on 1QS 9:14: The Sons of Righteousness or the Sons of Zadok," *DSD* 3 (1996): 315–20.

[40] Following her position that "sons of Zadok" signify an elite group within the community, Hempel ("Community Structures," 84n58) also interprets 1QSa 1.22b–25 from a perspective of historical development. Her observation, however, that "authority is attributed in a…convoluted fashion to the sons of Aaron in line 23 and to the sons of Zadok in line 24," rather suggests that the term "sons of Zadok" was interchangeable with "sons of Aaron" as designations for the priests.

covenant." In 1QS 5.8 par. 4QS^b 9.6 par. 4QS^d 1.5–6 a longer phrase has been added: "Everyone who joins the council of the community *shall enter into the covenant of God in the presence of all those who willingly offer themselves*. He shall undertake by a binding oath…" The emphasis on the community as the true keeper of the covenant is apparent in all of the examples cited here.

IV. CONCLUSION

With only a few exceptions, the organizational terminology of the Essene community has been taken over from the Hebrew Bible, and the community's documents reflect also the theological ideas of the contexts from which the terms have been borrowed. The influence of the exodus wilderness tradition appears to have been particularly strong, but there are also cases where the community has provided a new interpretation for a term.

Although it seems that the various terms have their own distinct semantic fields, some terms appear to have been used synonymously. It is not fully clear whether synonymous names were used simultaneously, or rather, whether this phenomenon is due to a historical development, so that in the course of time the names of some organizational units were changed although their tasks remained the same. My inclination is to consider simultaneous usage as the primary factor.

Interestingly, the duties of particular community officials (esp. *maskil*, *mebaqqer*, and *paqid*) are described differently in different documents, i.e., the names of the officials are the same, but the tasks attributed to the officials differ from one document to another. This would indicate that communities behind the different documents were indeed different from one another in their organization, although titles used for some officials were identical. Alternatively, one could explain this phenomenon through internal community development, but because of redactional borrowing of passages from one document to another, the link between a specific term and its original historical situation is difficult to establish.

The documents share many terms in common. On the other hand, individual terms appear in one document that do not appear in the other documents. Such terms could prove particularly important for the investigation of sociological structures of the Qumran community and the wider Essene movement.

A comparison between the different copies of the same document clearly indicates that the organizational terms were highly significant for the self-understanding of the community. There are variants where a short *terminus technicus* has been replaced by a longer phrase loaded with theological terminology, and sometimes theologically based organizational terms have been secondarily inserted into sentences which originally lacked them.

CHAPTER FOURTEEN
DAILY AND FESTIVAL PRAYERS AT QUMRAN

Dennis T. Olson

INTRODUCTION

The hundreds of fragments of morning and evening prayers found at Qumran help to fill a large gap in our knowledge about the development of Jewish prayer and worship in the interim period between the final formation of the Hebrew Bible and the rise of rabbinic and early Christian practices of prayer and daily liturgy. Portions of morning and evening prayers from the Qumran community have been found in Cave 4 in the *Daily Prayers* of 4Q503 (= 4QprQuot) and in the *Words of the Lights* in 4Q504-506 (= 4QdibHam$^{a–c}$). In addition to these regular daily prayers, fragments of *Prayers for Festivals* used on special feast days were also discovered in Qumran Cave 4 (4Q507–509) and Cave 1 (1Q34–1Q34^{bis}). Many of these manuscript witnesses are quite fragmentary and often lack a context for interpreting their full significance. The more complete text of the "Prayer for the Day of Atonement" in 1Q34–1Q34^{bis} duplicates some sections of 4Q509 and repeats several themes and motifs from 4Q507 and 4Q508. This more complete text helps to provide a broader interpretive context for the fragmentary festival prayers of Cave 4. In fact, 1Q34–1Q34^{bis}, 4Q507, 4Q508, and 4Q509 may be four versions of the same document.

HISTORY OF RESEARCH

4Q503

The collection of 225 fragments in 4Q503 was first published by M. Baillet in 1982.[1] Baillet and C. H. Hunzinger have offered a plausible reconstruction of the sequence and columns in which the fragments fall, although several of the fragments are difficult to place.[2] B. Nitzan has noted the recurring and regularized structure of the individual morning and evening prayers.[3] The structure of the prayers is as follows:

---

[1] Maurice Baillet, "Paroles des Luminaires (i)," in *Qumrân Grotte 4.III (4Q482–4Q520)* (DJD 7; Oxford: Clarendon, 1982), 105–36.

1. Heading–specifies the time of the prayer (for example, "On the…of the month in the evening" or "And when the sun rises to shine over the earth") and a liturgical direction, "they will bless and they will answer and they will say."
2. An initial series of blessings–"Blessed be the God of Israel who does/has done…"
3. References to the night ("And the night…at the beginning…of the revolutions of the vessels of light") or to the day ("And this day he has renewed…for us dominion…").
4. A concluding blessing to God ("Blessed be you, God of Israel" or Blessed be your name, God of Israel").
5. Final benediction–"Peace (be) upon you, O Israel."
6. A division between individual prayers is marked either by a line or a blank space.

These fragmentary prayers are dated to 100–75 B.C.E., largely due to the Hasmonean Hebrew script in which they are written.[4]

4Q504–4Q506

The 182 fragments of prayers of 4Q504, 4Q505, and 4Q506 involve a weekly cycle of daily prayers. They were first published by M. Baillet with some changes in readings and interpretations by K. G. Kuhn and M. R. Lehmann.[5] Scholars have been able to reconstruct a number of the prayer fragments of 4Q504 into a sequence of daily prayers that reflect a designated theme assigned to each day of the week.[6] Thus, the first day of the week commemorated creation. The fourth day of the week (Wednesday) remembered the covenant at Sinai (4Q504 frag. 3, col. 2, lines 5, 13). Friday focused on the confession of sin and forgiveness (4Q504 frags. 1–2 col. 1, line 1–col. 7, line 3). Saturday was the day of praise (4Q504 frags. 1–2 col. 7, line 4). In contrast to 4Q504, the fragmentary character of 4Q505 defies any such reconstruction of their original sequence. 4Q506 has some parallels to the more complete 4Q504, and thus some of its fragments can be placed in a discernible sequence.

---

[2] Baillet, ibid., 105. See the suggestion concerning col. 3 and the repositioning of frags. 2 and 3 in Joseph M. Baumgarten, "4Q503 (Daily Prayers) and the Lunar Calendar," *RevQ* 12 (1987): 399–407.

[3] Bilhah Nitzan, *Qumran Prayer and Religious Poetry* (*STDJ* 12; Leiden: Brill, 1994), esp. the summary on 70.

[4] Baillet, ibid., 105. A similar dating is offered by Baumgarten, "4Q503 (Daily Prayers)," 399, and by Lawrence H. Schiffman, "The Dead Sea Scrolls and the Early History of the Jewish Liturgy," in *The Synagogue in Late Antiquity* (ed. L. I. Levine; Philadelphia: ASOR, 1987), 33.

[5] Baillet's initial research on 4Q504 was "Psaumes, hymnes, cantiques et prières dans les manuscrits de Qumrân," in *Le Psautier: Ses origines, Ses problèmes littéraires, Son influence* (Orientalia et Biblica Lovaniensia 4; Louvain: Université de Louvain, Institut Orientaliste, 1962), 389–405. Baillet first published 4Q504 frags. 1–2 and frag. 8 with extensive notes in "Un recueil liturgique de Qumrân, grotte 4: 'Les Paroles des Luminaires,'" *RB* 68 (1961): 195–250. Some changes in readings were offered by Karl

Bilhah Nitzan has found that the structure of the individual prayers of the *Words of the Lights* is fairly similar to the *Prayers for the Festivals* (1Q34–1Q34$^{\text{bis}}$, 4Q507–509).[7] The structure of these prayers appears to include these elements:

1. Heading indicating the time of the prayer ("Thanksgiving for the day of…").
2. A petition asking God to remember ("Remember, O Lord, that").
3. A series of historical remembrances drawn from Israel's history and petitions for present action–the main body of the prayer.[8]
4. A closing blessing ("Blessed be the Lord who…us…").
5. A congregational response ("Amen. Amen.").
6. Divisions between the prayers are usually marked by a blank space or rarely by special characters.

The three manuscripts of 4Q504, 4Q505, and 4Q506 are generally dated to three different time periods, spanning the history of the Qumran community. The Hasmonean Hebrew handwriting of 4Q504 dates it to

---

G. Kuhn, "Nachträge zur Konkordanz zu den Qumrantexten," *RevQ* 4 (1963): 163–234 and Manfred R. Lehmann, "A Re-interpretation of 4Q Dibrê ham-Meʾoroth," *RevQ* 5 (1964): 106–10. See also Maurice Baillet, "Remarques sur l'édition des Paroles des Luminaires," *RevQ* 5 (1964): 23–42. Baillet published all the prayer fragments of 4Q504–4Q506 in "Paroles des Luminaires (ii)," "Paroles des Luminaires (iii)," and "Prières pour les fêtes (i)," in *Qumrân Grotte 4.III (4Q482–4Q520)* (DJD 7; Oxford: Clarendon, 1982), 137–75.

[6] A plausible reconstruction of the sequence of the fragments was suggested by Baillet, ibid., (DJD 7), 138, 170. Baillet is in turn partly dependent on the earlier research by J. Starcky who proposed the sequence for frags. 1–2 and who was responsible for separating some of the fragments that had become fused together one on top of the other. See Jean Starcky, "Le travail d'édition des fragments manuscrits de Qumrân," *RB* 63 (1956): 66.

[7] See Nitzan, *Qumran Prayer and Religious Poetry,* esp. 71.

[8] For a proposed chronological sequence of the historical remembrances in these prayers, see Esther G. Chazon, "4QdibHam: Liturgy or Literature?" *RevQ* 15 (1991–92): 447–55.

about 150 B.C.E. The script of 4Q505 seems to be somewhat later, around 70–60 B.C.E. The latest of the three, 4Q506, has a script that dates to a time in the first century C.E.[9] Distinctive themes or vocabulary unique to the Qumran community are for the most part not found in this prayer material.[10] Thus, these prayers were likely inherited from a pre-Qumranic Jewish community. E. G. Chazon has demonstrated that the consistent style and carefully structured progression of historical remembrances in the prayers suggest a unitary composition by one author.[11] The number of copies found and the varying ages of the manuscripts which span both the beginning and end of the community's historical life suggest that these prayers were much treasured and probably often used in the actual worship life of the Qumran community.

1Q34–1Q34^{bis}; 4Q507–4Q509

These manuscript collections contain four copies of *Prayers for Festivals,* the fragmentary remains of prayers apparently recited on special festival days throughout the Jewish liturgical calendar year at Qumran.[12] In 1Q34–1Q34^{bis}, fragments 1–3, col. 1 may refer to Sukkot (Tabernacles or Feast of Booths) with its allusion to dew and the earth. Sukkot was an autumn harvest festival (Exod 23:16) to which was added in the first century C.E. a remembrance of Israel's wandering in the wilderness from Egypt to Canaan. 1Q34–1Q34^{bis} concludes with a reference to the Day of Atonement or Yom Kippur. Fragments 1–3, col. 1, line 5 refer to "the solstitial point" which may indicate its use for the New Year festival or Rosh Hashanah. The gift of the covenant at Sinai is mentioned in fragments 3–5 col. 2 and thus may be related to the festival of Pentecost, otherwise known as the Feast of Weeks, the Day of First Fruits, or Shavuot. The five fragments of 1Q34–1Q34^{bis} were first published by J. T. Milik

---

[11] Chazon, "4QdibHam: Liturgy or Literature?"

[12] For the full Hebrew text, translation and explication of these prayers, see James H. Charlesworth and Dennis T. Olson, "Prayers for Festivals (1Q34–1Q34^{bis}; 4Q507–509)," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations. Vol. 4A, Pseudepigraphic and Non-Masoretic Psalms and Prayers* (ed. J. H. Charlesworth et al.; PTSDSSP 4A; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1998), 46–106.

(1Q34) and J. C. Trever.[13] The script of 1Q34–1Q34^{bis} is early Herodian, dating to some time around 50 B.C.E.

Only three fragments of 4Q507 contain legible writing. Fragment 1 contains a communal confession of sin, whereas fragments 2 and 3 praise the deity through a blessing formula: "Blessed be the Lord." Fragment 3 contains a doxological double "Amen," which signals the end of a prayer of praise. J. Starcky initially arranged the text of 4Q507, and M. Baillet was the first to publish the collection as *Prayers for Festivals*.[14] J. Strugnell noted some similarities in style and form between the prayers of 4Q507 and the prayers in 1QH, but the content of the two sets of prayers are quite different.[15] The Herodian script of 4Q507 situates these prayers in the early-first century C.E.

4Q508 is made up of 43 fragments that contain numerous allusions to festivals in the Jewish liturgical year. M. Baillet was also the first to publish these texts, dating them to a time early in the first century C.E.[16] Baillet argues that fragments 1, 3, 7, 30 and 39–41 are similar to parts of 1Q34–1Q34^{bis}, which are clearly connected to the Day of Atonement festival. The prayers contain references to "the festival of your compassion," "a festival of repentance," and the verb "to atone." Other indirect and possible allusions to Jewish festivals in these fragmentary prayers include "the [pr]oduce of our land for wav[ing]" (Festival of the Barley Harvest), the "beginnings of months" (Festival of the New Moon), and a "festival of honor and holine[ss]" (unknown).[17] Other themes encountered in 4Q508 include an emphasis on the covenant relationship between God and the community, the holiness of God, the confession of sin, atonement, and the doxological double "Amen" at the end of individual prayers. The references to "his covenant" (frag. 4 line 2) and "offerings," "sacrifice," and "contribu[tions]" (frag. 9, line 1, frag. 15, lines 1, 17) probably allude to the harvest and covenant remembrance festival of Pentecost or Shavuot. The three-fold offerings of "grain, new wine and olive oil" are mentioned in fragment 13 line 3 in 4Q508, echoing the same three-fold offering often found in biblical texts (Num 8:12; Deut 12:17; 14:23; 18:4; Neh 10:40; 13:5, 12; 2 Chr 31:5).[18]

[16] Baillet, ibid., 177.

[17] Ibid., 177.

4Q509 consists of 313 fragments of prayers that contain several allusions to a variety of Jewish festivals. "The festivals of green vegetation" in fragment 3 line 7 may refer to the New Year Festival or Rosh Hashanah. Fragment 3, lines 2–9, and fragments 97–98, line 1 have significant parallels with sections of 1Q34–1Q34^{bis} clearly associated with the Day of Atonement or Yom Kippur. The Festival of Shavuot or Day of Firstfruits may well be the subject of fragments 131–132 with their references to "firstfruits" and "free-will offerings" from the produce of the land. 4Q509 is the earliest among this Qumranic collection of *Prayers for Festivals*, dating to sometime before 70 B.C.E. with its late Hasmonean script. M. Baillet originally published the collection of prayers in 4Q509.[19]

The structure of the individual prayers throughout the *Prayers for Festivals* is fairly consistent and has parallels to the structure of the prayers in the *Words of the Lights* (4Q504–506). The structure includes a heading with the designated time of the prayer, a call to God to remember, a series of historical remembrances and petitions, a closing blessing to the Lord, and a final congregational response, "Amen. Amen."[20] The numerous technical terms and themes distinctive to Qumran which appear throughout the *Prayers for the Festivals* suggest that these prayers were not imported into the community from the outside; rather, they represent genuine Qumranic compositions.[21]

KEY ISSUES

4Q503

The theology of the fragmentary prayers in 4Q503 is focused on the praise of God who is "holy" (frags. 15–16, lines 5, 13, 18; frag. 26, line 3) and who has revealed the mysteries of the divine drama in which the Qumran community plays a role (frags. 33–34, col. 1, lines 4, 21; frags. 51–55, line 18; frags. 64, 69, 70–71, 76). God is the God of lights who creates and directs all creation (frag. 13, line 1; frags. 21–22, line 1; frags. 29–32, line 8). These prayers express both the specially chosen and holy status of the people of God (frags. 1–6, line 20; frag. 11, line 3; frags. 37–38, line 5) as well as the community's need to confess its sin before God (frag. 81). God has revealed to the community special knowledge of the "psalms of glory" (frags. 51–55, line 9) and of the divine plan or design (frags. 51–55, line 13). Much of the vocabulary in the prayers is suggestive of distinctive themes of other documents composed at Qumran: light as contrasted with darkness, "we, his holy people," "for our knowledge," "the sons of the covenant," frequent mention of "standards of light," "God of lights," "Holy Ones," "the Holy One of Holy Ones," "the Sons of Righteousness," "the lots of light," "the priesthood," "the armies of divine beings," "his wondrous works," and "lots of darkness."

[18] Ibid., 181.

[19] Ibid., 184–215.

[20] Nitzan, *ibid.*, 71.

[21] Carol Newsom has expressed reservations about the claim that the *Prayers for Festivals* were composed at Qumran. She argues that the prayers imply different assumptions about the calendar than those typically associated with the Qumran community. The notion of separating the covenant "from all the people" may be referring to Israel as a whole, not the special subgroup of the Qumran community. See Carol Newsom, "'Sectually Explicit' Literature from Qumran," in *The Hebrew Bible and Its Interpreters* (ed. W. H. Propp, B. Halpern, and D. N. Freedman; BJSUCSD 1; Winona Lake, IN: Eisenbrauns, 1990), 167–87. Newsom argues that the more

The daily blessings of 4Q503 bear strong resemblance to prose prayers in the Hebrew Bible, especially the biblical genre of the "indirect cultic blessing of God." This genre is characterized by a passive participial form of the verb "to bless," followed by the name of God and a predicative clause giving the reason for the praise of God. An example of a biblical prayer in this genre is Solomon's prayer at the dedication of the first temple in Jerusalem in 1 Kgs 8:56: "Blessed be the Lord, who has given rest to his people Israel according to all that he promised; not one word has failed of all his good promise, which he spoke through his servant Moses." The corresponding typical form of the prayer in 4Q503 begins, "Blessed be the God of Israel who…" In addition to this frequent "indirect cultic blessing of God," the Qumran morning and evening prayers also include a few examples of the "direct cultic blessing of God" in which the deity is directly addressed in second person rather than in indirect third person. An example is 4Q503 frags. 33–34, line20: "[Bless]ed are you, O God of Israel, who has established…" This form of the direct cultic blessing has been characteristic of traditional Jewish prayer since the rabbinic period (e.g., "Blessed are you, O Lord our God, King of the universe…"). The prayers in 4Q503 demonstrate that this form of direct cultic blessing was already in place at Qumran.

The major difference between the biblical prayers and the prayers of 4Q503 is the time of day when the prayers are said. In the Hebrew Bible,

---

generic language in *Prayers for Festivals* does not point "clearly to Qumran authorship" (177). For evidence of distinctively Qumranic terms and themes in the *Prayers for Festivals*, see Charlesworth and Olson, "*Prayers for Festivals*."

the rising of the sun is rarely seen as a reminder to praise God.[22] However, the morning prayer at the rising of the sun is a very prevalent motif in the Qumran prayers with the recurring formula, "When the sun comes forth to shine upon the earth." The Qumran community's custom of regular corporate morning prayer at sunrise was attested by Josephus:

> And as for their piety toward God, it is very extraordinary; for before sun-rising they speak not a word about profane matters, but put up certain prayers which they have received from their forefathers, as if they made a supplication for its rising (*J.W.* 2.8.5).

The fragments provide a few glimpses into the community's spirituality and corporate prayer life, including a transitional step in the development toward regular morning prayer which came to characterize the practice of later Jewish prayer in the rabbinic period and beyond.[23]

Two other issues associated with these prayers in 4Q503 have to do with liturgical time: (1) What kind of calendar, solar or lunar, do these prayers presuppose? and (2) Does the liturgical day at Qumran begin in the evening at sunset or in the morning at sunrise? As to the first question concerning the solar or lunar calendar at Qumran, some scholars argue that Qumran worshippers differed from some of their Jewish counterparts in following an intercalated solar-lunar calendar rather than a strictly lunar calendar or strictly solar calendar alone. An example of one non-Qumranic Jewish tradition that followed a strictly solar calendar is *Jub.* 6:32–38. *Jubilees* repudiated as liturgically corrupt any community who relied on marking time by studying the phases of the moon as in the lunar calendar: "They will set awry the months and the appointed times and the sabbaths and the feasts."[24] But other Jewish traditions which predate *Jubilees* had already integrated the lunar and solar calendars into one liturgical calendar.[25] Some have argued that the sequence of daily blessings in 4Q503 may reflect this integrated employment of both lunar and solar calendars to mark the passage of time. The daily prayers seem to assign a blessing for each successive phase of the moon when there is greater light or darkness (e.g., "lots of light," frag. 51–55, line 14; "lots of darkness" frag. 39, line 2). On the other hand, the recurring phrase, "gates of light," throughout the prayers (e.g., frags. 29–32, line 10) seems to be associated with the changing yearly pattern in "the ris[ing of the sun]" (frags. 29–32, line 11).[26] However, a recent major study of Qumran's calendar texts (4QCalendrical Documents and *Mishmarot* texts) makes a substantive case that the Qumran community used a 364-day solar calendar and not a lunar calendar.[27]

---

[22] Possible exceptions include Ps 113:3 ("From the rising of the sun to its setting the name of YHWH is to be praised"), 118:24 ("This is the day that YHWH has made; let us rejoice and be glad in it"), and Mal 1:11 ("For from the rising of the sun to its setting my name is great among the nations, and in every place incense is offered to my name…"). On the time and place of prayer in the Hebrew Bible, see Patrick D. Miller, *They Cried to the Lord: The Form and Theology of Biblical Prayer* (Minneapolis: Fortress, 1994), 48–50.

[23] For further reflections on the role of the prayers of 4Q503, see Esther Chazon, "The Function of the Qumran Prayer Texts: An Analysis of the Daily Prayers (4Q503)," in *The Dead Sea Scrolls: Fifty Years after their Discovery* (ed. L. H. Schiffman, E. Tov, and J. C. VanderKam; Jerusalem: Israel Exploration Societyand the Shrine of the Book, 2000), 217–25.

[24] *OTP* 2:68. *Jubilees* seems to be among the few extant traditions that reject the lunar calendar entirely. See Baumgarten, "4Q503 (Daily Prayers), 406; Emil Schürer, *The History of the Jewish People in the Age of Jesus Christ* (rev. and ed. G. Vermes et al.; 3 vols.; Edinburgh: T & T Clark, 1973–87), 2:581; and Ben Zion Wacholder, "The Calendar of Sabbatical Cycles during the Second Temple and the Early Rabbinic Period," *HUCA* 44 (1973): 153–96. See also the study by Shemaryahu Talmon, "The

The second issue involving liturgical time is the determination of the beginning of a new day. Does the new day begin in the evening at sunset or in the morning at sunrise? The question may be raised in this context since prayers in 4Q503 are designated for both the morning and the evening. Some scholars have argued that the Qumran community was unique in Judaism in viewing the day as beginning with the rising of the sun (morning) rather than the setting of the sun (evening).[28] However, the prayers of 4Q503 utilize a recurring formula to introduce the new day of the month which assumes the evening as the beginning of that new day: "On such and such a day of the month *in the evening*." The prayers in 4Q503 appear to reflect standard practice in other Jewish communities

Calendar of the Covenanters of the Judean Desert," in *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes; and Leiden: Brill, 1989), 147–85; repr. of rev. ed. from "The Calendar Reckoning of the Sect from the Judaean Desert," in *Aspects of the Dead Sea Scrolls* (ed. C. Rabin and Y. Yadin; *ScrHier* 4; Jerusalem: Magnes, 1958; 2d ed. 1965), 162–99.

[25] The "Book of the Heavenly Luminaries" (*1 Enoch* 72–82) and Sirach 43:6–7 reflect the use of an integrated solar and lunar calendar. See especially *1 Enoch* 74; *OTP* 1:53.

[26] Baumgarten, "4Q503 (Daily Prayers)," 399–407.

[27] Shemaryahu Talmon, Jonathan Ben-Dov, and Uwe Glessmer, in *Qumran Cave 4.XVI: Calendrical Texts* (ed. S. Talmon, J. Ben-Dov, and U. Glessmer, DJD 21; Oxford: Clarendon, 2001) (DJD 21; Oxford: Clarendon, 2001). Talmon argues that Qumran's solar calendar corresponds to the calendar system of the Book of the Heavenly Luminaries (*1 Enoch* 72–82) and the book of *Jubilees* (chs. 2 and 6). This contrasted with the 354-day lunar calendar used by the ruling priests of the Jerusalem Temple and by the Pharisees of the Second Temple period and later appropriated by rabbinic circles.

[28] 1QS 10.10 reads, "As the day and night enters I will enter into the covenant of God…" Talmon cites this text and uses it to argue that the "Covenanters' order of prayer…begins with the morning benedictions" (S. Talmon, "The Calendar of the Covenanters," in *The World of Qumran*, 175).

of the time, understanding the liturgical day to begin with the evening and the setting of the sun.[29]

4Q504–4Q506

One key issue in this collection of thematic prayers for the individual days of the week is the interpretation of the title for the entire group of prayers in 4Q504, frag. 8, דברי המאורות. The title may be literally translated, "The Words of the Lights." However, the Hebrew word דברי has a wide semantic range of possible meanings. The word in late-biblical Hebrew may mean "matters" (1 Chr 27:1), daily "duties" or "liturgies" (1 Chr 16:37; Ezra 3:4), "acts" (2 Chr 13:22) or "things" (Isa 42:16). Thus, one could translate the title of the prayers as "The Liturgies of the Lights" or "The Acts of the Lights."

The precise meaning of the second noun in the title, "the Lights," is also problematic. The "lights" may signify the stars that sometimes symbolized the heavenly angels. This association of stars and angels occurs in another Qumran document, 4Q511, as well as another document, *1 En.* 86:1, 3; 88:1. Thus, the title may signify the words of the stars or angels, which the community uses as a model for the words of its own prayers to God. However, a more likely context for understanding the "words of lights" or "liturgies of lights" is the daily and monthly cycles of heavenly "lights" which regulate chronological patterns of time for the community, namely, the sun, the moon, and the stars. This pattern of time was grounded in the biblical creation story of Genesis 1. Day 1 of creation involves the separation of the region of light and darkness, but Day 4 (corresponding to Wednesday) is the high point in terms of the creation of the "lights":[30]

> And God said, "Let there be lights in the dome of the sky to separate the day from the night; and let them be for signs and for seasons and days and years, and let them be lights in the dome of the sky to give light upon the

---

[29] Baumgarten, *ibid.,* 403–4. One exception to this may be the document 4Q408, which refers to the morning before the evening. See Annette Steudel, "4Q408: A Liturgy on Morning and Evening Prayer Preliminary Edition," *RevQ* 16 (1994): 313–34. See also Esther Chazon, "When Did They Pray? Times for Prayer in the Dead Sea Scrolls and Related Literature," in *For a Later Generation: The Transformation of Tradition in Israel, Early Judaism, and Early Christianity* (eds R. Argall, B. Bow, and R. Werline; Harrisburg, PA: Trinity Press International, 2000), 42–51.

[30] On the importance of Wednesday as the day of light, see Annie Jaubert, *La date de la Cena* (Paris: Cerf, 1957), 24, 26–27, 42–44.

> earth." And it was so. God made the two great lights–the greater light to rule the day and the lesser light to rule the night–and the stars (Gen 1:14–16).

The importance of these heavenly "lights" in regulating the patterns of an ancient Jewish community's liturgical and festival life is also suggested by the title of the section in *1 Enoch* 72–82, "The Book of the Itinerary of the Luminaries of Heaven" (*1 En.* 72:1). Thus, the title of 4Q504 may mean "The Liturgies (according to the Cycle of Heavenly) Lights."

Still a third possibility for the meaning of the "Lights" is that they signify the priests who function as intermediaries of the heavenly light from God to the community. The high priest Aaron in Sir 45:17, for example, is a vehicle of God's light to the people of Israel. In the *Testament of Levi*, the priest Levi (4:3) and the priest who is still to come (18:3–4) perform this mediating role of the divine light to the community. Both of these priests are compared to the sun. In the Qumran literature itself as in 1QS 2.3, the blessing of the priests upon the community includes the light of wisdom. A Qumranic prayer in 1QSb 4.27 asks God to make the priest "a great light for the world" through wisdom. A saying attributed to Jesus in Matt 5:14 may also be suggestive in this regard as he instructs his disciples: "You are the light of the world."[31] One of the earlier biblical sources for this image may be the priestly benediction in Num 6:22–27. God instructs Aaron the priest and his sons to bless the people, using the image of the light of the divine face to shine upon the people: "The Lord make his face to shine upon you, and be gracious to you" (6:25). The motif of Moses' shining face after coming down from the encounter with God on Mount Sinai may also be related (Exod 34:29–35). Moses' face reflects the divine radiance and glory as he mediates between God and the people. Given this third possibility of associating the title "The Words of the Lights" with the function of the priests, the title might be rendered, "The Words/Prayers/Liturgies of the Lights."

Certainty in the precise meaning of the superscription, "The Words of the Lights," may be difficult to attain. What seems certain is that the prayers of 4Q504, 4Q505, and 4Q506 were daily prayers or liturgies used in weekly cycles and led by priests from within the community. The prayers clearly build upon and incorporate biblical phrases, images and allusions as part of a larger phenomenon of what Judith Newman calls "the scripturalization of prayer" in Second Temple Judaism.[32] Prayer becomes an important means not only of citing or alluding to biblical texts in this period. Prayer becomes a mechanism for reinterpreting earlier biblical texts and applying them to new times and situations. This process of scripturalization began already in the later biblical books; examples include the prayers in Nehemiah 9 and Dan 9:3–19. This reinterpretation of biblical texts through prayer continued into the post-biblical period in both Jewish and Christian traditions, including the Qumran community. Qumran's daily prayers range across a wide spectrum of biblical themes. They move from confession of sin to praise and from lament over the community's disobedience and failures to the remembrance of God's faithfulness to the covenant with Israel.

1Q34–1Q34bis; 4Q507–4Q509

A number of important issues weave their way in and through these collections of *Prayers for Festivals*. One issue involves the sharp dualities in identifying who is inside the community and who is outside and opposed to the community. The prayers speak of "our tormentors" (1Q34–1Q34bis frags. 1–3, col. 1, line 6) and "the wicked ones" (1Q34–1Q34bis frags. 1–3, col. 1, line 2) who will not survive the judgment to come. These presumably include those whom the community considers wicked in Israel, especially the evil priests who control the Jerusalem Temple (see the "Wicked Priest" in the *Habakkuk Pesher*, 1QpHab 11.1–8). In contrast, the festival prayers describe those who are inside the community as "blessed" (1Q34–1Q34bis frags. 1–3, col. 1, line 7) and "the righteous" (1Q34–1Q34bis frags. 1–3, col. 1, line 2). The elect of God "know the disciplines of glory" (1Q34–1Q34bis frags. 3–5, col. 2, line 8), and they "know the things which are hidden and the things which are revealed" (4Q508 frag.2 line 4; 4Q509 frag. 212, line 1). They participate in "the eternal ascents" (1Q34–1Q34bis frags. 3–5, col. 2, line 8) involving progress in discipline and knowledge. The community certainly acknowledges its own failures and disobedience: "we have forgotten yo[ur] covenant" (4Q509 frag. 18, line 2). Yet the dualism between "us" and "them" at Qumran is strong and strident.

A related issue is the strong set of thematic polarities that permeate the theology of these festival prayers. Temporary judgment of the community mixes with the ultimate promise of salvation. The affliction of the community joins with assurances of divine compassion. Strong blessings accompany vengeful curses. Sin is matched by forgiveness. Impurity contrasts with holiness. Unfaithfulness to the covenant is answered by atonement through God's covenant faithfulness. The Qumran covenant festival outlined in the *Rule of the Community* (1QS 2.19–25) may provide some helpful background to understanding the liturgical setting for some of these theological polarities within the festival prayers. This is especially the case for the prayers in 4Q409.[33] However, the overriding mood among these theological polarities remains a positive one with frequent expressions of joy, gladness, and praise. The positive tone is grounded in the faithfulness and love of God who forgives God's chosen people and triumphs over the community's enemies.

Another issue or distinctive aspect of these festival prayers is the function and frequency of the doxological double "Amen" in the prayers. The double "Amen" appears several times (4Q507 frag. 3, line 2; 4Q508 frag. 20, line 1; 4Q509 frag. 4, line 4; 4Q509 frags. 131–132, col. 2, line 3). In all the extant liturgical fragments of Qumran, the double "Amen" appears a total of fourteen times. In contrast, the double "Amen" appears only five times in the Hebrew Bible. In its biblical usage, the double "Amen" could have a literary function to mark the end of a written collection of prayers. Thus, the double "Amen" concludes three of the five major divisions of prayers within the book of Psalms (Pss 41:14; 72:19; 89:52). In addition to this literary function, the Bible also portrays the "double Amen" as an oral liturgical response in a festival liturgy in Neh 8:6: "And Ezra blessed the LORD, the great God; and all the people answered, 'Amen, Amen,' lifting up their hands." This twofold literary and liturgical function of the double "Amen" formula likely applies as well to its use in the Qumran community and literature (see especially 1QS). The Qumran material provides an important bridge from the infrequent use of the double "Amen" in the Hebrew Bible to its much greater use in liturgical texts and practice in Early Judaism and Early Christianity.[34]

A final issue associated with these *Prayers for Festivals* is the nature of the relationship between prayers and animal and grain sacrifices in the festival liturgies of Qumran. Most scholars agree that no evidence exists for actual physical sacrifice at Qumran that involved the slaughter of animals and burning them on an altar as an offering to God (Leviticus 1–7). However, the *Prayers for Festivals* appear to affirm the continuing validity and value of offering religious sacrifices to God. This has led some scholars to conclude that the practice of prayer had in part replaced the sacrificial system, in particular, the sacrifices associated with the Temple at Jerusalem.[35] However, 4Q508 frag. 9, line 1 contains a reference to "offerings," and 4Q508 frag. 13, line 3 mentions a meal offering of "gr[ain,] new wine, and olive oil." Hence, it is possible that some offering of nonanimal sacrifices may have accompanied prayer as a means of atonement and expiation. The process of individual and community atonement included but also extended beyond the regular practice of prayer. Other elements involved participating in rituals of purity, obeying the commandments, observing festivals, confessing sin and receiving forgiveness.[36] Worship, forgiveness, offerings, and obedience were part of the larger dynamic of the community's life of liturgy and prayer at Qumran.

[34] On the use of the Amen formula in the synagogue (*m. Ber.* 5.4; 8.8) and in the early church (1 Cor 14:16), see E. Schürer, *The History of the Jewish People*, 2:450n108; and Jepsen, "אמן," *TDOT* 1:321.

CONCLUSION

These fragmentary collections of prayers provide tantalizing glimpses into a vibrant life of prayer and liturgy within the desert community of Qumran. The three major collections surveyed represent three different systems or schedules of prayer. The prayers in 4Q503 are individual prayers or blessings assigned for the evening and the morning for each of the successive days of the month. The prayers in 4Q504-506 are thematic prayers for individual days of the week. The theme for Sunday was creation, Wednesday was the covenant, Friday was the confession of sin and forgiveness, and Saturday was praise. The prayers in 1Q34–1Q34$^{\text{bis}}$

---

[35] Lawrence H. Schiffman, "The Dead Sea Scrolls and the Early History of Jewish Liturgy," 42. 4Q508 frag. 15, col. 1, line 1 does contain the verb "to sacrifice." However, this isolated occurrence does not overturn the prevailing notion in the Qumran texts that prayer in some way takes over some of the function of the sacrifices at the Temple in Jerusalem. In reference to 1QS 8–9, Michael Knibb argues that "despite some uncertainties of translation these words seem to constitute a clear statement that prayer and right behavior would take the place of sacrifice as the means of effecting atonement" (*Qumran Community,* 138). See also Shemaryahu Talmon, "The Emergence of Institutionalized Prayer in Israel in the Light of Qumran Literature," in *Qumrân: Sa Piété, sa Théologie et son Milieu* (ed. M. Delcor; BETL 46; Paris: Duculot, 1978), 265–84; repr., in *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 200–243.

[36] As an example, 1QS 3.4–12 and 9.3–5 state that according to the Torah, the offering of the lips replaces the flesh and fat of burnt offerings on the altar as an acceptable means of expiation.

and 4Q507–509 represent still another system of special prayers assigned for certain annual festivals like the Day of Atonement, Pentecost, or the New Year. Thus, the individual days of the month, the days of the week, and the festival days of the year each had their assigned prayers. One may ask whether we have evidence that these three overlapping or competing systems of prayer were coordinated in any way. For example, did the prayers assigned for a given festival day replace or override the usual morning, evening and thematic daily prayers for that day? Or would all the prayers–evening-morning, daily thematic, and festival prayers–have been recited for that festival day?

Unfortunately, the disjointed and incomplete nature of the preserved prayers provides little information to help answer these questions. However, it should be noted that the morning and evening prayers do mention "festivals" (4Q503 frags. 29–32, line 21), and the thematic daily prayers make reference to the "festival of our redemption" (4Q504 frag. 5, col. 2, line 4). The fact that these daily prayers allude to yearly festivals suggests that some awareness and integration of these disparate schedules of prayer seem likely. In any case, the Qumran prayers provide invaluable resources for understanding the profound piety and devotion of this group within Judaism, even as questions remain. Moreover, these prayers add important insights in reconstructing the life of prayer and worship that undergirds the practices of prayer in Judaism and Christianity today.[37]

---

[37] For a helpful study of the similarities and differences in the practices of prayer at Qumran versus rabbinic Judaism, see Richard Sarason, "The 'Intersections' of Qumran and Rabbinic Judaism: The Case of Prayer Texts and Liturgies," *DSD* (2001): 169–81.

CHAPTER FIFTEEN

THE SOCIOLOGICAL AND LITURGICAL DIMENSIONS OF *PSALM PESHER 1* (4QPPS^{a}): SOME PROLEGOMENOUS REFLECTIONS

James H. Charlesworth and James D. McSpadden

Reflecting back on over fifty years of research on the Dead Sea Scrolls, it is patently obvious how significant Scripture was for the Qumranites.[1] Their pneumatic and eschatological approach to Scripture and their hermeneutic of fulfillment reveals the *raison d'être* for their life in the wilderness.

Interpreting scripture provided an explanation for the Qumranites' history and suffering. It also clarified meaning in a time that was pregnant with expectation for them. As we shall see, at least one of the pesharim—*Psalm Pesher 1* (4Q171 = 4QpPs^{a})—also provided moments of refreshment as the Qumranites chanted liturgically the living meaning of the Psalms as many of the first members of the community had earlier chanted the Psalter, accompanied by trumpet, cymbal, and harp in the Temple.

Qumranologists have demonstrated that Scripture was vital to the community that lived, worshipped, and prepared "the way of the Lord [YHWH]" on the western edge of the Dead Sea. Scripture read aloud and studied defined daily needs, renewed life, and gave meaning to an otherwise desolate desert-existence. It also served as a guide through each stage of the journey into communal life—from one's initial foray into the desert to his initiation and, finally, full inclusion in the community, as well as his movement up through the hierarchy. Scripture was paradigmatic for setting parameters for thought and behavior, as well as providing a structure for strict organization.

---

[1] Although the term "Scripture" emerged relatively late in the history of Judaism as a way of collectively identifying the authoritative texts included in the canon, many of these texts certainly enjoyed an authoritative status prior to canonization, which was a long process. In this chapter, the term Scripture will be used to represent those texts that became canonical and others that were considered equally authoritative within Second Temple Judaism. For further reflections, see James C. VanderKam, "Authoritative Literature in the Dead Sea Scrolls," *DSD* 5 (1998): 382–402.

Nowhere is this inveterate relationship between Scripture and community life better displayed than in a seminal passage from the *Rule of the Community*:

> When these become the Community in Israel {according to these rules},[2] they shall separate from the session of the men of deceit to depart into the wilderness to prepare there the Way of the Lord (?); as it is written, "*In the wilderness prepare the way of the Lord, make straight in the desert a path for our God.*" This (alludes to) the study of the Torah wh[ic]h he commanded through Moses to do, according to everything which has been revealed (from) time to time, and according to that which the prophets have revealed by his Holy Spirit (1QS 8.12–16).[3]

Under this rule, each prospective member of the community pledges to adhere to a common behavioral and ideological code, and agrees to heed the call of Scripture on his life. By hearing the Voice that called him to "prepare the way of the Lord in the wilderness," which is the Qumranite pneumatic interpretation of Isa 40:3, each Qumranite obtains invigorating meaning from Scripture. How does this occur? It is through their study of Torah and through a type of livelihood that emanates from fresh revelation.[4] By responding to Scripture, the individual assumes a particular posture; he stands on Scripture and is oriented toward Scripture. Yet this posture is not his alone. He joins a brotherhood of individuals united for a common purpose and oriented toward a common goal. This is to say, through Scripture he becomes a member of the community–the *Yāḥad* (יחד), God's chosen people.[5] Thus, understanding the Qumran community demands imagining the living influence of Scripture (God's Word to them).

Some of the most formational scriptural texts at Qumran were the Psalms. The Psalms appear with great frequency among the Qumran

---

[2] The words "according to these rules" are supralinear (above line 13) and are not found in D and E. They were thus not translated in *The Dead Sea Scroll: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 1, The Rule of the Community and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 1; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1994).

[3] Unless otherwise noted, all translations in the present article are from the volumes in the PTSDSS Project (PTSDSSP). The bold text indicates scriptural citation. This translation is by James H. Charlesworth and appeared in PTSDSSP 1 (with the addition mentioned in the previous note).

[4] The use of masculine pronouns to describe the members of the community reflects the scholarly assumption that the Community consisted solely of males. See Zias's contribution in this collection.

[5] See the reflections by Shemaryahu Talmon, "Sectarian יחד–A Biblical Noun," *VT* 3 (1953): 133–40; repr. as "The Qumran יחד–A Biblical Noun," in idem, *The World of Qumran from Within: Collected Studies* (Jerusalem: Magnes; Leiden: Brill, 1989), 53–60.

Scrolls, through allusion, general reference, citation, and copies of the Psalter (in various forms and for different reasons). Research into these psalmic texts has been dynamic. With the discovery of the *Apocryphal Psalms* (11Q5 = 11QPs^{a}), scholars were made keenly aware of the importance of the Psalms to the Qumranites. But since this discovery, scholars have started to debate the relative, authoritative weight of these texts in comparison to other "scriptural" documents used by the Qumranites.

These observations raise many questions. Among the most important of them are the following: Were the Psalms used as a source book for communal and spiritual identity? If so, in what venue was this source effective and which psalms were significantly so utilized? On the one hand, the presence of numerous non-Masoretic psalms in the Qumran collection of Psalms raises caution in making judgments about the authority, content, and arrangement of the Psalter; but, on the other hand, copious references to and quotations from the Psalms (and the Psalter) suggest that the community regarded them not only as sacred but also invaluable to its communal life.

To contribute to the on-going debate about the status of the Psalter at Qumran, we shall focus now on one Qumran document that draws on the Psalms, *Psalm Pesher 1.* Scholars have examined *Psalm Pesher 1* with regard to its textual form,[6] "historical" contents,[7] and contribution to the knowledge of the pesharim as a whole;[8] however, no one has paused to consider the significance of this text for a living community. In the present essay, we will attempt to observe the document's significance for understanding the Psalms as Scripture and the way it forges a relationship between Scripture and the life of the *Yāḥad.* After briefly setting the text in its context, attending to both the pesher's form and subject matter, we will examine three particular functions of the text for the community.

---

[6] Most important among these investigations are John M. Allegro, "Commentary on Psalms (A)," in *Qumran Cave 4.I (4Q158–4Q186)* (ed. J. M. Allegro and A. A. Anderson; DJD 5; Oxford: Clarendon, 1968), 42–50; Jean Carmignac, "Notes sur les Pesharim," RevQ 3 (1961–62): 521–26; Dennis Pardee, "A Restudy of the Commentary on Psalm 37 from Qumran Cave 4, " *RevQ* 8 (1972–75): 163–94; Hartmut Stegemann, "Der Pešer Psalm 37 aus Höhle 4 von Qumran (4QpPs37)," *RevQ* 4 (1963–64): 235–70.

[8] See Maurya P. Horgan, *Pesharim: Qumran Interpretation of Biblical Books* (CBQMS 8; Washington, DC: The Catholic Biblical Association of America, 1979); and more recently, idem, "Pesharim," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 6B, Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 6–194.

It is a vehicle to convey internal history, a new word of prophecy, and a communal liturgical text. Finally, we shall offer some reflections on the sociological effects of the text on communal identity.

PSALM PESHER 1 AS A TEXT IN CONTEXT

The millennia separating the period when *Psalm Pesher 1* was composed and studied at Qumran and the present obscure our ability to understand the significance of this text for its intended audience.[9] Moreover, the additional pressures of cultural biases, historical preconceptions, and predetermined hermeneutical objectives strain our understanding by coloring our contemporary reading of this scroll. Thus, before examining the text's significance to the *Yāḥad*, it is first necessary to shake off some hermeneutical baggage and examine the text *qua* text, for, only then can we begin to enter into the world of the text and thus the world of the Qumran community.

As indicated by its title of classification, *Psalm Pesher 1* is a commentary (pesher) on the book of Psalms.[10] Yet it is only one of many documents found in the eleven Qumran caves that alludes to, refers to, or quotes the Psalms. Among the Qumran Scrolls, the Psalms are better represented than any other biblical book.[11]

This fact prompts the question: "What might have generated this high interest in the Psalms?" Perhaps the Psalms served as an early liturgical handbook or psalter for the community's assemblies.[12] Perhaps the community appreciated the Psalms as an institutional means for associating the Righteous Teacher with David, thereby identifying the Teacher as a holy figure like David. This seems likely since most Qumranites probably linked the Righteous Teacher with the composition of the Qumran hymnbook, the *Thanksgiving Hymns* (or at least some of these hymns), which may have been used liturgically in Qumran services. Or again, two curious lines in 11Q5 provide insight, "and the Lord gave him [David] a spirit of discernment and light; and he wrote over 3,600 psalms" (27.4–5).

---

[9] The date of 4QpPs^a (= 4Q171) is uncertain. Scholars have proposed dates of composition ranging from the late second century B.C.E. to the early first century C.E., depending on how they have chosen to adjudicate technological (radio-carbon testing), literary, and archaeological evidence. For the purposes of the present essay, we need not settle upon a precise date for the text, but only agree to assume that the text was circulating at some time during the first century C.E., prior to the destruction of the Community. For further discussion on dating 4QpPs^a (= 4Q171) see, Timothy H. Lim, *Pesharim* (CQS 3; London: Sheffield Academic Press, 2002), 20–22.

[10] Before moving on, the term "psalms" deserves a word of definition. The scrolls reveal that the Qumran Community possessed many psalms, which were later collected into the book of Psalms. But the Community also had in its possession non-Masoretic psalms. Because of this diversity, it is important to distinguish between the two groups of texts. In this essay, "Psalms" will refer to the Masoretic collection of psalms (Psalms 1–150), while lower case "psalms" will indicate a broader grouping of psalmic texts (including psalms 151–155).

[11] Peter W. Flint, *The Dead Sea Psalms Scrolls and the Book of Psalms* (*STDJ* 17; Leiden: Brill, 1997) identifies 36 Psalms scrolls and seven documents that mention the Psalms. Lim, *Pesharim*, remains ambivalent but does identify "40 or so Psalms scrolls preserved in the Qumran library" (38).

Do these lines not indicate the ubiquity of David-like psalms in Second Temple Judaism? It is certainly clear that psalms 151–155, *More Psalms of David*, indicate that the composition of new psalms was common in Second Temple Judaism. Moreover, the pseudepigraphic *Psalms of Solomon* are composed in the poetic style of the Psalter and receive their inspiration intermittently from the psalms attributed to Solomon's father, David.[13]

The Qumran Scrolls provide a sharpening of questions related not only to the compilation of the Psalter, but also to the shaping of the Hebrew canon.[14] Thus, we should ask, "Did the Qumranites include the

[12] James A. Sanders, *The Dead Sea Psalms Scroll* (Ithaca: Cornell University Press, 1967), 9–14; idem, "The Qumran Psalms Scroll (11QPs^a) Reviewed," in *On Language, Culture, and Religion: In Honor of E. A. Nida* (ed. M. Black and W. A. Smalley; The Hague: Mouton, 1974), 79–99. For further discussion of the Psalms in relation to Qumran "liturgy," see Flint, *The Dead Sea Psalms Scrolls*, 202–27; Lawrence Schiffman, "The Dead Sea Scrolls and the Early History of Jewish Liturgy," in *The Synagogue in Late Antiquity* (ed. L. I. Levine; Philadelphia: ASOR, 1987), 33–48; Eileen M. Schuller, "Prayer, Hymnic, and Liturgical Texts from Qumran," in *The Community of the Renewed Covenant: The Notre Dame Symposium on the Dead Sea Scrolls* (ed. E. Ulrich and J. VanderKam; Notre Dame: University of Notre Dame Press, 1994), 153–74; Moshe Weinfeld, "Prayer and Liturgical Practice in the Qumran Sect," in *The Dead Sea Scrolls: Forty years of Research* (ed. D. Dimant and U. Rappaport; *STDJ* 10; Leiden: Brill, 1992), 241–58.

[13] The "ancestors" and "magic" were important to the Qumranites. But these Jews were paradigmatically different from the tribal life of the Kiriwinians studied by Bronislaw Malinowski in *Magic, Science and Religion* (Garden City, NY: Doubleday, 1948), see esp. 190–215. A comparison of these two similar, but quite different, groups helps us perceive the central paradigmatic insight at Qumran. While these primitives used magic to obtain herbs and other needs, the Qumranites did not see plants controlled by spirits. The cosmos was filled with spirits, but there was *only one God*: "From the God of knowledge comes all that is occurring and shall occur" (1QS 3.15).

[14] Too often scholars think that there is an appreciable difference in the way scribes copied "canonical" from "noncanonical" texts. Only occasionally is that the case in the first millennium C.E., and the much earlier manuscripts found in the Qumran caves do not illustrate the supposition that books in the Hebrew canon were copied with more care than those we now place in the apocryphal collections. For example,

Psalms in their *canon* of Scripture?" P. Flint has devoted his scholarly life to this question. In our opinion if we do not define "canon" too narrowly, he has shown conclusively that the answer is "yes."

Flint argues that both formal (use of Psalms) and functional (number of attestations) criteria clearly demonstrate that "the Psalms were among those Scriptures which contained the revealed truth that was to be interpreted, and served as the basis for the ordering of the community."[15] According to Flint's conclusions, the Psalms not only held authoritative status, but also represented the very essence of life in the Qumran community. If we look closely at the scrolls, we can see that the imagery, language, and theology of the Psalms infused the community's compositions and created a pneumatic psalmic ethos within the *Yāḥad.* And it is from the midst of this ethos that a Qumranite created the commentary known as *Psalm Pesher 1.*

Psalm Pesher 1 resembles the form of the other pesharim found at Qumran.[16] Like the pesharim, *Psalm Pesher 1* utilizes a simple exegetical strategy: the citation of Scripture (*lemma*) followed by a commentary on the citation. In this format, the commentary directly builds upon Scripture and explains the meaning of contemporary events in light of prophecy, which for the Qumranites included the Psalms. That is, the Qumranites wrote commentaries (pesharim) on the prophets (six on Isaiah, two on

---

there are numerous marginal and interlinear collections in the great Isaiah scroll (and in 1QS), while the *Temple Scroll* is elegantly copied on vellum. For similar reflections, see Emanuel Tov, "The Writing of Ancient Biblical Texts, with Special Attention to the Judean Desert Scrolls," in *Sefer Moshe, The Moshe Weinfeld Jubilee Volume: Studies in the Bible and the Ancient Near East, Qumran, and Post-Biblical Judaism* (ed. C. Cohen, A. Hurvitz, and S. M. Paul; Winona Lake, IN: Eisenbrauns, 2004), 445–58. Classic and seminal thoughts by the giants in the field are found in Frank M. Cross and Shemaryahu Talmon, eds., *Qumran and the History of the Biblical Text* (Cambridge, MA: Harvard University Press, 1975).

[15] Flint, *Dead Sea Psalms Scrolls*, 219.

[16] We have intentionally avoided the phrase "pesher genre" as a way to explain the common features present in all or most of the pesharim. In recent publications, scholars have used this phrase liberally and without regard for the implications of its usage. To use the term "genre" to describe the pesharim glosses over several difficulties. For example, in order to make a genre distinction one must have other similar contemporary texts against which to compare a particular text and a frame of reference, which clarifies other related, but different, genres. In the case of the Qumran pesharim, no such texts exist, despite the repeated assurances of many scholars that the midrashim provide acceptable, vaguely contemporary texts. For more on the issues related to genre, see Alastair Fowler, *Kinds of Literature: An Introduction to the Theory of Genres and Modes* (Oxford: Oxford University Press, 1982), and Carol Newsom, *The Book of Job: A Contest of Moral Imaginations* (Oxford: Oxford University Press, 2003), 11–15.

Hosea, two on Micah, two on Zephaniah, and one each on Nahum and Habakkuk) and the Psalms (three).[17] Between the two parts, the pesharim insert formulae as a distinguishing marker and a transitional device. Most often these formulae use a form of פשר, hence the name "pesharim," but other transitions can and do appear.[18] Notably, in *Psalm Pesher 1,* the introductory formula always includes a form of פשר (*pesher*).[19]

Psalm Pesher 1 has the main features of the pesharim. As a Qumran commentary it displays the hermeneutics of fulfillment. It also is shaped by the pneumatic, eschatological, and idiosyncratic interpretation that is self-serving to the Qumranites, as they look for an interior meaning to their own history and suffering.[20]

But, despite its shared form, several characteristics combine to make *Psalm Pesher 1* a unique document among the pesharim. First, its script is *late* Herodian. A close examination of the plates confirms Horgan's judgment that the "manuscript is written in a rustic semi-formal hand and dates to the Herodian period."[21] This paleographical clue allows us to date reliably the text to the late first century B.C.E. or more likely to the early first century C.E.[22]

Second, *Psalm Pesher 1* does not have the appearance of an autograph.[23] One interesting piece of evidence leads to this hypothesis and contravenes

---

[17] See in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 6B, Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002).

[18] For a clear presentation of the commentary formulae see, Casey D. Elledge, "Appendix: A Graphic Index of Citation and Commentary Formulae in the Dead Sea Scrolls," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 6B, Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 367–77; see esp. 372–76.

[19] It is conceivable that פשר at Qumran is influenced by the use of this noun, in Aramaic, in relation to interpreting dreams (Dan 4:3 and 5:12). See the recent comments by Shani L. Berrin, "Qumran Pesharim," in *Biblical Interpretation at Qumran* (ed. M. Henze; SDSSRL; Grand Rapids: Eerdmans, 2005), 110–33, esp. 123–24.

[20] See Charlesworth, *The Pesharim and Qumran History*, 6, 16, 68.

[21] Horgan, "Pesharim," in *Pesharim, Other Commentaries, and Related Documents* (PTSDSSP 6B), 6. Horgan also connects 4QpIsa^a(= 4Q161) and 4QpHos^a(= 4Q166) with the same hand as 4QpPs^a (= 4Q171).

[22] See note 9.

[23] This claim is not merely an argument from silence. The script is rather late and it looks like the text has been corrected by a later scribe from another copy, which cannot be the text of Psalm 37 because the pesher formula is restored. For discussions regarding the nature of this text, some in defense of 4QpPs^a (= 4Q171) as an autograph see, James H. Charlesworth, *The Pesharim and Qumran History*, 77–80; and Frank M. Cross, Jr., *The Ancient Library of Qumran* (3d ed.; Sheffield: Sheffield Academic Press, 1995), 91–92.

Frank M. Cross's report on the early consensus that "all of the pesharim appear to be autographs."[24] A scribal emendation appears in col. 3, between lines 4 and 5: ואוהבי יהוה כיקר כורים פשר[ו[25] ("*And those who love Yahweh are like the splendor of pastures.* [Its] interpretation [...]").

The supralinear insertion suggests that a later scribe corrected an error made in the copying of the original text. What is added above line five are the words from Ps 37:20b–c and the beginning of the pesher formula. Three observations indicate that these words are a correction: (1) The insertion is between the lines. (2) The hand is appreciably different and probably later. (3) The Tetragrammaton is written in the square script and not in Paleo-Hebrew as elsewhere in this manuscript. The error is most likely caused by *parablepsis* (looking back and forth from text being copied to text being inscribed) aided perhaps by *homoeoteleuton* (similar or identical ending of lines)[26] or even more likely *homoeotelearchon* (similar or identical beginning of lines), if the lost portion of the supralinear line contained the same word as the beginning of line 5.[27]

Third, the scribe(s) varies the exegetical technique used in the pesher. For example, in some lines words from the *lemma* are explicitly incorporated into the commentary (frags. 1–10, 3.4–5). In other lines the scribe(s) draws upon images present in the biblical text (frags. 1–10, 2.7, 2.16–20). In still other places entire lines of Scripture are repeated in the commentary (frags. 1–10, 3.11–12). Such diversity reflects the skill and creativity of a capable scribe, or school of scribes, who received specialized training in the community.[28]

Finally, the pesher is continuous.[29] In the 13 fragments of *Psalm Pesher 1*, we can clearly discern a commentary upon Ps 37:7–40 and can confidently presume that immediately prior, in a section now missing, the scribe(s) commented on vv. 1–6. By commenting on the Psalm verse by verse, one after another in strict and deliberate succession (according to the MT arrangement of Psalm 37), the scribe gives the pesher continuity and, perhaps more importantly, demonstrates that Psalm 37, in its entirety, was significant to the Qumran *Yāḥad*.

---

[24] See the quotation from a letter received from Cross on 17 June 2001, which is cited in Charlesworth, *The Pesharim and Qumran History*, 77.

[25] For the diacritics, see PTSDSSP 6B, 14. The MT has "the enemies of" for the text's "those who love." Also, the MT has כרים for the text's כורים.

[26] Note also, that in John 12:15 in Codex Vaticanus the copying scribe's eye went from one *autous ek tou* to the next, inadvertently omitting the words in between, perhaps by poor eyesight or fatigue.

[27] John Strugnell suggested the error was caused by *homoeoteleuton*; see PTSDSSP 6B, 14. We are persuaded that the error is caused by *homoeotelearchon*, since a scribe copying Hebrew begins at the right and at the beginning of a line and the word that would be repeated appears as the first word in line five (see frags. 1–10, col. 3.5).

[28] See, Emanuel Tov, "Copying of a Biblical Scroll," *JRH* 26 (2002): 189–210.

[29] There are two types of pesharim, continuous (4QpIsa^{a-e}; 4QpHos^{a,b}; 1QpZeph [= 1Q15]; 4QpZeph [= 4Q170]; 1QpMic [= 1Q14]; 4QpHab; 1QpPs [= 1Q16]; 4QpPs^{a,b} [= 4Q171, 4Q173]) and thematic (4QFlor [= 4Q174]; 11QMelch [= 11Q13]), in addition to the numerous pesher elements found outside the formal pesharim (cf. esp. 1QS; CD; 4Q394–399). For further discussion, see Devorah Dimant, "Pesharim, Qumran," *ABD* 5: 244–50.

FUNCTIONS FOR IDENTITY FORMATION

To claim that *Psalm Pesher 1* functioned to *maintain* communal identity is not unique. Scholars have long observed the ways that the texts discovered at Qumran functioned to shape the community: Scripture solidified Jewish identity, hymns united the *Yāḥad* in collective praise and defined it as a worshipping body, and original compositions (see esp. 1QS, *Some Works of the Torah* [4Q394–399 = 4QMMT]) served as rules to tighten the boundaries around the sect. In different ways, it seems, all of the documents composed at Qumran reinforced a certain sect identity.

Psalm Pesher 1, as a singular and independent document, suggests that it may have enjoyed an additional function in the community. Through its display of history, attention to prophecy, and liturgical shape, *Psalm Pesher 1* uses both text (Psalm 37) and commentary to *create* a particular sociology of identity.

Revealing History and History Being Revealed

The topic of history in the pesharim has received much debate. Do the pesharim present history as fact–as incontrovertible and empirical truth? Or do the texts present ideology under the guise of history? That is, are the facts fabricated or manipulated by the scribe(s), or even the Righteous Teacher, to unite the community under one mind? While the distance between the two options is considerable, leaving scholars to take up one side or another, a small, but reliable, middle way does exist. This via media affirms that all the history contained in the pesharim is "history as perceived from within the Qumran community."[30] Like ancient historiography, which often blends facts with ideas, the pesharim allow fact and idea to meet on intimate terms. More precisely, the pesharim filter all historical data through an ideological lens (poignantly shaped by the sharp antinomy between good and wicked).[31] Thus, in order to observe "history" in *Psalm Pesher 1* we should recognize that the Qumranites perceived and interpreted history primarily in terms of their pneumatic interpretation of Scripture.

---

[30] Charlesworth, *The Pesharim and Qumran History*, 5.

This middle way is especially suitable for investigating *Psalm Pesher 1.* Contrary to the claims of many scholars who limit historical information to the *Habakkuk Pesher* (1QpHab) and the *Nahum Pesher* (4Q169 = 4QpNah), historical data are reflected in *Psalm Pesher 1.* In line after line, not only in commentary but also in *lemma*, history appears or is mirrored, indicating the scribe(s)' interest in the formational quality of history. History does not appear by happenstance in the pesher. Rather, history is re-presented with purpose, disclosing a particular history *of* the beginnings and sufferings of the community *for* the life and identity of the community.

Turning to the text, we find history presented in two ways. First, the text makes numerous references to "historical" persons or groups using sobriquets, or euphemistic titles, which obliquely describe individuals related to the Qumran *Yāḥad.* Between eight to ten sobriquets appear in *Psalm Pesher 1.*[32] Not surprisingly, these sobriquets fall along a distinct axis: persons inside the community (the Poor Ones; the Council of the community; the Interpreter of Knowledge; the Righteous Teacher) and persons outside (Ephraim; Manasseh; the Wicked Priest). This axis also distinguishes a moral bifurcation between good persons and those against the good, as well as the faithful versus the unfaithful. As a rule, the sobriquets strive to preserve anonymity, and thus provide very little information about the figure, save the occasional hyperbolic idealization of a particular virtue or vice.[33]

---

[31] Scholarly work in the area of ancient historiography has grown exponentially in recent years. While many important works have given shape to the discussion, three have particular relevance to our study of history in 4QpPs^a (= 4Q171). These are Robert G. Hall, *Revealed Histories: Techniques for Ancient Jewish and Christian Historiography* (JSPSup 6; Sheffield: Sheffield Academic Press, 1991); John Marincola, *Authority and Tradition in Ancient Historiography* (Cambridge: Cambridge University Press, 1997); and Håkan Bengtsson, *What's in a Name? A Study of Sobriquets in the Pesharim* (Uppsala: University Printers, 2000).

[32] Two titles, "Belial" (1–10 2.11) and "the Congregation of the Community" (1–10 4.19), are debatable.

[33] Presumably, some in the Community would have known the identity of these persons. However, the textual anonymity does not diminish the significance of the observation that history is reflected in 4QpPs^a (= 4Q171). Through revelation and pneumatic eschatological exegesis and hermeneutics, the Jews in the Community are once again made cognizant of their own role in salvation history.

However, when we read the sobriquets in context, the figures behind the titles gain resolution. This sharpening is evident in the several references to the Righteous Teacher (מורה הצדק).[34] Elsewhere in the Qumran library we find the Righteous Teacher characterized as the guide of the way of Truth (1QS 1.11), and–most importantly–the person to whom God finally elected to reveal "all the mysteries of the words of his servants the prophets" (1QpHab 7.4–5).

In *Psalm Pesher 1*, three different references help fill out the identity of the Righteous Teacher. (1) He is described as "the Priest" (הכוהן) and the one whom God established "to build for him a congregation (עדה)" (frags. 1–10, 3.15–16). This reference suggests that the Righteous Teacher played a seminal role in the organization and structuring of the community, a man of priestly lineage, presumably from the line of Zadok.[35] (2) The Righteous Teacher, as almost always elsewhere, is presented in dualistic opposition to the Wicked Priest ([הכו]הן הרשע frags. 1–10, 4.8). (3) The Righteous Teacher is the consummate mediator, since he ("the skilled scribe" [סופר מהיר]) approaches God "with purposeful speech" (frags. 1–10, 4.27). Combined, these references fill in some of the ambiguity behind the figure of the Righteous Teacher. Thus, fact (priest and leader) mixes with interpretation (interlocutor with God and warrior against the Wicked Priest) to create a unique profile and, ultimately, to reveal the function and purpose, if not the identity of the Righteous Teacher. As Frederick Schweitzer noted, the Righteous Teacher is "the indispensable main spring, the great initiator and driving force, everything stemming from him, everyone acting or reacting in response to him."[36] From the *Hodayot* we also learn that the Righteous Teacher is the "Irrigator of the Garden" that God has planted; the One who waters "the Trees of Life," the Qumranites, who "shall become the Eternal Fountain," which is also "the Planting of Truth."[37] *Psalm Pesher 1* preserves the legacy of the

---

[34] The sobriquet is only partly visible in 4QPs^{a} frags. 1–10, col. 3, lines 15 and 19; col. 4 line 8.

[35] The first wave of Zadokite priests, which may not have included the Righteous Teacher, most likely separated themselves from the Temple in the second century B.C.E. When this separation occurred is not clear; it certainly was demanded when the Hasmoneans, against tradition and linage, became high priests forever until a trustworthy prophet would arise (cf. 1 Maccabees 14). For more on the priestly character of the Righteous Teacher see Charlesworth, *The Pesharim and Qumran History*, 30–36.

[36] Frederick W. Schweitzer, "The Teacher of Righteousness," in *Mogilany 1989: Papers on the Dead Sea Scrolls Offered in Memory of Jean Carmignac. Part II: The Teacher of Righteousness. Literary Studies* (ed. Z. J. Kapera; Proceedings of the Second International Colloquium on the Dead Sea Scrolls [Mogilany, Poland, 1989]; Qumranica Mogilanensia 3; Kraków: Enigma, 1991), 84.

[37] See James H. Charlesworth, "An Allegorical and Autobiographical Poem by the *Moreh has-Sedeq* (1QH 8:4–11)," in *"Shaʿarei Talmon": Studies in the Bible, Qumran, and the*

Righteous Teacher and by presenting aspects of his person anew, allows him to continue to appear alive so as to govern the life of the community.

The second way history is presented in *Psalm Pesher 1* is by making references to temporal events. Several of these events appear in the text, the most prominent of which is the double retelling of an encounter between the Righteous Teacher and the Wicked Priest. Both the *lemma* (1–10 4.7) and the commentary (1–10 4.8–10) speak of a time when the Wicked One or Priest lay in ambush to murder the Righteous One or Teacher. Only God's intervention prevented the victory of the Wicked One or Priest.

Did this event actually occur or is it an example of the creative history that was produced in and characterized the community? One cannot say with certainty. But regardless of its veracity, the community believed that the event had taken place. To it, history had not only occurred as the Psalm described, but through this history, a prophetic word had been fulfilled.[38]

From Prophecy to Prophecy

A diaphanous line separates prophecy and history in *Psalm Pesher 1*. Throughout the text, the two are indissolubly linked, emerging from and for a similar purpose, and becoming, almost always, indistinguishable. Each gives shape to the other: prophecy is perceived and articulated in response to the movement of history in a certain direction, namely away from Jerusalem and into the wilderness as a temporary phase before the return to "the New Jerusalem." History is perceived as the fulfillment of prophecy. Because of this close relationship, and the fact that the Qumranites blurred a distinction between prophecy and history, any modern attempts to isolate completely one from the other misrepresents Qumran thought. Even so, it is possible intermittently to separate history from prophecy, and when this is possible, we discover an additional layer of textual significance. To make this separation fruitful, then, let us point out several features of *Psalm Pesher 1* that demonstrate how the text functions as prophecy.

Ancient Near East Presented to Shemaryahu Talmon (ed. M. Fishbane, and E. Tov, with W. W. Fields; Winona Lake, IN: Eisenbrauns, 1992), 295–307. The use of capitalization indicates that these terms are *termini technici*.

[38] If indeed the Righteous Teacher composed some portions of 1QH, then the historical veracity of this reference may find support in the autobiographical note describing the writer's prolonged suffering from an inflicted wound (e.g., 1QH 16.26–17.9).

By its very subject, *Psalm Pesher 1* is prophetic. Earlier we observed that at Qumran the Psalter and related psalms circulated through the community as an authoritative set of texts. It seems that part of this authority derived from their status as prophecy. The Qumranites made no distinction between what later generations labeled the prophetic books and the Psalms. To the Qumranites, David, the author of the Psalms, was a prophet. Recall the biographical comment in 11QpPs^{a}: "and the Lord gave him (David) a discerning and enlightened spirit. And he wrote 3,600 psalms.…All these he composed *through prophecy* which was given him from before the most high" (11Q5 = 11QPs^{a} 27.3–11).[39] Thus, to members in the *Yāḥad*, the Psalms embodied the inspiration of *David the prophet*, and carried forward his prophetic spirit. And to the members of the *Yāḥad*, Psalm 37 offered a potent and immediate prophecy concerning the people of God—a people against whom the wicked generation continually lifted its hands, but to whom and through whom God elected to fulfill the divine promises.

The form of *Psalm Pesher 1* further exposes the text's prophetic character. The organization of the text into three parts—*lemma*, interpretive formula, and commentary—creates smaller cycles of prophecy, which independently offer distinctive, divine speech and collectively reinforce communal ideology. From *lemma* to commentary—old word to new, previous prophecy to current prophecy—each cycle draws out the hidden meaning of the Psalm, creating a new word again on target for God's elect. The catalyst in this process, and the point at which exegetical transformation occurs, is פשר itself. This simple term creates a bridge from Temple-priest-identity to Qumran-priest-identity. As Scripture passes, or is passed, over the interpretative formula, the formula transforms Scripture, producing a pneumatic eschatological interpretation that reveals the meaning of Scripture (God's Word). According to the Qumranites, they are permitted to see, through God's grace bestowed on the Righteous Teacher, the meaning God had hidden in Scripture.

Is this exegetical process a means of substitution in which the new word replaces the old? Most scholars rightly comprehend that this is not the case, observing that the pesher mode of interpretation does not exchange one text for another, but rather expands the meaning of the former, giving rise to a hermeneutic of fulfillment.[40] *Psalm Pesher 1* does not strip Scripture of its ability to speak. It rather gives Scripture a fresh and true voice that may be heard by those who reside in the silence of the wilderness near a dead sea.

---

[39] Sanders, *Psalms Scroll*, 86–87. Italics added.

[40] See, George J. Brooke, "Biblical Interpretation in the Qumran Scrolls and in the New Testament," in *The Dead Sea Scrolls: Fifty Years after their Discovery: Proceedings of the Jerusalem Congress, July 20–25, 1997* (ed. L. H. Shiffman, E. Tov, and J. C. VanderKam; Jerusalem: Israel Exploration Society and the Shrine of the Book, 2000), 60–73;

In *Psalm Pesher 1*, prophetic fulfillment is often connected to the Land:

> *And the afflicted will take possession of (the) land and will delight in abundant peace.* Its interpretation concerns the congregation of the Poor Ones, who will accept the appointed times of affliction…they will delight [in] all […] of the land and will grow fat in all…" (frags. 1–10, 2.9–11).[41]

Psalm 37:11, cited above, describes a group of people who will reassume a position of leadership in the Land and take great pleasure in possessing the Land as God had promised Abraham. In its "original" context, the verse reassures Israel that the God of Abraham, Isaac, and Jacob, the One who fulfills the divine promises, would soon return the Promised Land to Israel in final judgment, while destroying the nations which vied for possession of it. The commentary that follows Ps 37:11 utilizes the same elements–the afflicted (ענוים), the Land (ארץ), and delight (והתענגו)–but refocuses the original prophecy. In the hands of the Qumran scribe(s), prophecy has been altered because prophecy has been fulfilled. It, the community, is the currently afflicted people, living in the desolate wilderness apart from the Temple and God's Holy City. While the Psalm still speaks an eschatological word of promise in the latter days, the final judgment has now become imminent.[42] The circumstances of the community demonstrate that soon, on account of its faithfulness, "The Poor Ones" will inherit the Land, God's promise, when God restores the legitimate priestly line.

Charlesworth, *The Pesharim and Qumran History*, 14–16; Michael Fishbane, "Use, Authority and Interpretation of Mikra at Qumran," in *Compendia rerum Iudaicarum ad Novum Testamentum. Section 1. Mikra: Text, Translation, Reading and Interpretation of the Hebrew Bible in Ancient Judaism and Early Christianity* (ed. M. J. Mulder; Assen: Van Gorcum; and Philadelphia: Fortress, 1988), 339–78.

[41] James H. Charlesworth et al., eds., *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 6B, Pesharim, Other Commentaries, and Related Documents* (PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 11. Other references to "the land" (הארץ) appear at 1–10 2.4, 8, 9, 11; 3.9; 4.2, 11.

[42] The authoritative value placed on prophetic truth at Qumran and the absence of other copies of 4QpPs^{a} (= 4Q171) raise an important question, "was prophecy considered finally concretized at Qumran?" Our inclination is to respond "no," acknowledging that prophecy continues to be alive within the Community. As history continues and life changes for the Qumranites, it is conceivable that the divine knowledge will continue to illuminate other previously hidden meanings of Scripture. Perhaps this fluidity is possible because of the apocalyptic framework in which all prophecy appears at Qumran. See, John J. Collins, "Teacher and Messiah? The One Who Will Teach Righteousness at the End of Days," in *The Community of the Renewed Covenant* (ed. E. Ulrich and J. VanderKam; Notre Dame: University of Notre Dame, 1994), 193–210.

Liturgical Formation

While discussions concerning history and prophecy have appeared frequently in the secondary literature, the liturgical significance of *Psalm Pesher 1*, and for that matter the pesharim, has not. One, and perhaps the only, exception to this standard is the work of J. T. Milik. In an overlooked, but provocative, statement, Milik observed that the pesharim represent "ephemeral compositions preserved in the author's own copy and are to be connected with the exposition of the Bible that were given in the sect's meetings for worship."[43] Milik's claim is bold, affirming an entrenched association between Qumran hermeneutics and liturgy. Unfortunately, Milik presents no support for his assertion, sharing only his view that public times of communal "worship," i.e., liturgy, were the most natural setting for "the exposition of the Bible," the pesharim.

Since its publication, Milik's statement has produced few adherents, largely because it has gone virtually unobserved. This is not surprising since a great deal of uncertainty continues to surround the issue of "liturgy" at Qumran. For example, did the *Yāḥad* develop and possess a standard form of liturgy? If so, on what occasions did it follow this liturgy? How did the yearly renewal of the Covenant relate to other public liturgical customs (cf. 1QS 1–2)? How and with what criteria can we identify texts in the Qumran library as liturgical? Did not non-liturgical texts sometimes obtain liturgical significance at Qumran, the antechamber of heaven in which angels worshipped? What Qumran Scrolls are most important as we seek to re-create and comprehend Qumran liturgy and the phenomenology of worship at Qumran?[44] At present, questions are far more abundant than answers, although recent work has demonstrated an increasing scholarly interest in Qumran liturgical practices.[45]

---

[43] Jozef T. Milik, *Ten Years of Discovery in the Wilderness of Judea* (trans. J. Strugnell; SBT 26; Naperville, IL: Alec R. Allenson, 1959), 41. M. Horgan (*Pesharim*, 3), also notes Milik's statement.

[44] Explorations into the issue of liturgy have largely been beset by the weight of anachronism. Often scholars have compared liturgy and liturgical themes at Qumran with liturgical texts from Rabbinic Judaism and Christianity. It seems, however, that those who study Qumran liturgy would do well to look at post-exilic biblical (e.g., Ezra, Daniel, Nehemiah) and pseudepigraphical liturgical texts that are roughly contemporary to the Qumran corpus. See, James H. Charlesworth, "Jewish Hymns, Odes, and Prayers," in *Early Judaism and Its Modern Interpreters* (ed. R. A. Kraft and G. W. E. Nickelsburg; vol. 2 of *The Bible and Its Modern Interpreters*; Atlanta: Scholars Press, 1986), 411–36.

[45] Among the numerous insightful studies, see the chapters by John J. Collins, Eileen M. Schuller, and Robert A. Kugler in *Religion in the Dead Sea Scrolls* (ed. J. J. Collins and R. A. Kugler; Grand Rapids: Eerdmans, 2000). The texts are conveniently collected in

For our present research, Milik's statement just quoted has particular relevance. His judgment points out an important distinction in Qumran liturgical research; that is, what is up for debate in discussions of Qumran liturgy is the character of its composition, not its existence. The *Rule of the Community* (notably 1QS) is a text upon which Milik most likely based his original claim. This collection of rules proves the presence of some kind of communal gathering oriented around prescribed elements: "The Many (והרבים) shall spend the third part of every night of the year in unity (or in the community), reading the Book, studying judgment, and saying benedictions in unity (or in the community)" (1QS 6.7–8). Although no specific information in this passage renders the identity of "the Book," "the judgments," or "the blessings," the text is clear that at Qumran there existed a time of gathering, organized according to the use of several different "liturgical" elements. As such, it may be the case that liturgy, in the broad sense of the term,[46] had a composite and complex character at Qumran. That is, different elements blended freely to create a mosaic of worshipful communal activity (esp. at Yom Kippur). And if this is the case, *then it is likely that Psalm Pesher 1 existed as another element in this mosaic.*

Before proceeding further, let us freely admit that much of what follows is speculative, but based upon implications drawn from evidence and deductions from the perceptions articulated in the previous pages. While evidence appears to point to the use of *Psalm Pesher 1* as a liturgical text, there can be no definitive proof of such assertions. We must, then, continue with the proviso that we will stimulate more questions for fruitful reflection and discussion.

Two particular characteristics of *Psalm Pesher 1* intimate a use of the text in a liturgical setting. The first characteristic once again brings the conversation back to the importance of the Psalms at Qumran. Unlike the other pesharim, *Psalm Pesher 1* is unique in that it draws on the Psalter, an authoritative set of texts with deep liturgical significance.[47] The use of the Psalter is significant, because the community referred to and quoted from these sacred texts throughout their own writings and because they used the Psalter as a model for some of their original liturgical compositions.[48]

Donald W. Parry and Emanuel Tov, eds., *Poetic and Liturgical Texts* (part 5 of *Dead Sea Scrolls Reader*; 6 vols.; Leiden, Boston: Brill, 2005); see esp. the introduction on xxiii–xxiv.

[46] As Richard K. Fenn suggests, sociologically liturgy can include such actions as burning files. See idem, *Liturgies and Trials* (Oxford: Blackwell, 1982).

[47] Over the past decade, scholars have debated the degree to which it can be claimed that the Psalms functioned liturgically at Qumran. A concise overview of this debate is presented in Flint, *The Dead Sea Psalms Scrolls*, 202–27.

[48] See James R. Davila, *Liturgical Works* (Grand Rapids: Eerdmans, 2000).

The Qumranites, however, were not the first group to draw upon the liturgical value of the Psalter. As "Sons of Aaron" and "Levites" they inherited centuries of traditions and customs that surrounded and defined the Psalter. Before the destruction of the First Temple and the Exile of the Israelites, the Psalter–or at least some of the early psalms–was already being used liturgically. One clear example is Psalm 68.[49] On special feast days and the principal Jewish festivals, the priests and often numerous Levites would chant the Psalms.[50] This communal activity in the Temple has numerous purposes; for example, it elevates and commemorates the leaders of Israel (at one time honoring priest and king), celebrates the people's presence in the Land, and fundamentally "centers on God's rule of the world, including Israel, the nations, and the whole of creation."[51] Thus, the liturgical shaping and use of the Psalter reminded the Israelites of God's sovereign and faithfully gracious (חסד) rule over them. In light of this phenomenological and liturgical importance of the Psalter, it seems obvious that the Qumranites, as former leaders in the Temple cult, inherited this usage, perhaps via the Righteous Teacher, who may have earlier served as High Priest.[52] There is every reason to assume that by choosing to compose a commentary upon the Psalter in *Psalm Pesher 1*, the Qumranites took up, embodied, and carried forward the liturgical value of the Psalter.

By commenting upon Psalm 37, the scribe further enhanced the liturgical value of *Psalm Pesher 1*. In the MT, Psalm 37 appears in the Psalter as an acrostic poem.[53] A close examination of *Psalm Pesher 1* shows that the author of the pesher attempts to preserve this acrostic, separated by the interpolation of hermeneutical words, in the commentary itself. By recasting this poetic feature, the scribe acknowledges the oral and liturgical function of the Psalm and allows his new composition to reflect this value.[54] So, while we cannot ask why the scribe chose to comment upon Psalm 37, we can observe that by choosing to do so he demonstrates exposure to the liturgical influences surrounding the Psalm.

---

[49] See James H. Charlesworth, "Bashan, Symbology, Haplography, and Theology in Psalm 68, " in *David and Zion: Biblical Studies in Honor of J. J. M. Roberts* (ed. B. F. Batto and K. L. Roberts; Winona Lake, IN: Eisenbrauns, 2004), 351–72.

[50] Although controversial and dated at points, Sigmund Mowinckel, *The Psalms in Israel's Worship*, 2 vols. (trans. D. R. Ap-Thomas; New York: Abingdon Press, 1962), deftly explores the public character of the Psalms. The bulk of his work seeks to show specifically how and where different types of Psalms functioned in Israel's history.

[51] Patrick D. Miller, "The Ruler in Zion and the Hope of the Poor: Psalms 9–10 in the Context of the Psalter," in *David and Zion: Biblical Studies in Honor of J. J. M. Roberts* (ed. B. F. Batto and K. L. Roberts; Winona Lake, IN: Eisenbrauns, 2004), 187.

[52] See 4QPs^a frags. 1–10, 3.15–16 and the discussion in Charlesworth, "The Righteous Teacher was a Priest," in *The Pesharim and Qumran History: Chaos or Consensus?* (ed. J. H. Charlesworth; Grand Rapids: Eerdmans, 2002), 88–89. Charlesworth is here influenced by the insights of Hartmut Stegemann and Jerome Murphy-O'Connor [see the works and pages noted].

[53] It should be noted that Hebrew poetry at Qumran looks different from Hebrew poetry found in the MT and later rabbinic writings. At Qumran, poetic convention is streamlined, so that features like parallelism and strophic arrangement appear with less frequency. Because of this, Qumran documents can often possess poetic elements without assuming a poetic form. The lack of *parallelismus membrorum* in 1QH, in contrast to the *Psalms of Solomon*, and the complex mixed poetic forms that look like prose are good examples of this shift.

A second liturgical characteristic of *Psalm Pesher 1* appears in the arrangement of the text. An examination of plates 14–17 in DJD 5 reveals that *Psalm Pesher 1* is organized into sections. The scribe(s) has elected to group together certain verses, along with the commentary on those verses, by inserting *vacats*, or blank lines, into the text.[55] In cols. 2 and 3, the most complete fragments of *Psalm Pesher 1* preserved, we can discern several *vacats* and note that they appear with some regularity, between every sixth to eighth line. Moreover, the *vacats* always follow the end of a line of commentary and precede a new scriptural citation.

Rhetorically, this technique must have been quite effective. The inclusion of regularly spaced *vacats* would have demonstrably enhanced the oral communicability of the text. Rather than reading the pesher without pause, the speaker could break at the *vacat*, take a breath, and allow the audience to reflect on the commentary. In this way, the text produces a meter and rhythm that incorporates the individual members into a single body and establishes a unifying tone in which the gathered community could collectively, and simultaneously, participate in worship.

SOCIOLOGY OF IDENTITY

Although the destruction of Qumran in 68 C.E. ended the community's literary production, preventing us from ever knowing fully the effect of any document on community life, the extant words of *Psalm Pesher 1* continue to speak to us across this silence. In particular, the text begins to intimate the significance of this single text for a singular community.

---

[54] The correspondence between poetry and liturgy is imprecise at Qumran. Perhaps all religious poetry created by the Qumranites should be considered liturgical, since at Qumran there appears a greater tendency for poetic texts to be associated with liturgical settings. See Davila, *Liturgical Works*.

[55] It should be noted that *vacats* appear throughout the Qumran Scrolls. They are scribal conventions to divide the texts into meaningful units. 4QpPs^{a} (= 4Q171) is thus not unique in this respect. However, the ubiquity of *vacats* at Qumran discloses the possibility that *vacats* served more than one function.

Through the retelling of history, the pronouncement of prophecy, and the yearly liturgical cycle, *Psalm Pesher 1* becomes a speech-act that expresses a particular discourse–a unique "socio-religious vocabulary" that defines the community as such.[56]

As *Psalm Pesher 1* moves from text through speaker to hearer, the Qumranites receive a revelation of identity. That is, from this "vocabulary" a sociology of identity emerges. And as the community repeats the text over and over, the vocabulary encounters and conditions each member into this solidarity as "a brother" (cf. 1QS 6.10, 22).[57] In this final section, then, we will explore the contours of identity by attending to the three most prominent elements of the sociological vocabulary found in *Psalm Pesher 1*–where, why, and whom.

At the outset, however, we should make some comments on the proper means to employ sociology in studying ancient texts.[58] First, sociologists are not trained to work with texts and text experts cannot also be sociologists. Second, the sociologists who launched the new discipline, Auguste Comte and Henri Saint-Simon, sought a methodology for studying social phenomena that would replace the religious (or spiritual) means that had been regnant for over a millennium. Thus, in the attempt to be nonsubjective sociologists have often judged religion harshly.[59] Any sociological method to be employed now, therefore, must be pruned of such a negative prejudice. Third, we should be self-critical of thinking analogically and using analogy when there are no clear analogies between our world and the world of Qumran.[60]

---

[56] Shemaryahu Talmon, "Between the Bible and the Mishna," in *The World of Qumran From Within* (Jerusalem: Magnes; Leiden: Brill, 1989), 41; repr., in Jewish Civilization in the Hellenistic-Roman Period (ed. S. Talmon; JSPSup 10; Sheffield: JSOT Press, 1991).

[57] Wayne A. Meeks rightly points out that at Qumran the concept of "brother" was "restricted to members of a purist sect" (*The First Urban Christians* [New Haven: Yale University Press, 1983], 87). Appropriate also in a world in which fratricide continued to shape society (e.g., with Hyrcanus II and Aristobulus II) are reflections on such phenomena in the biblical world from Abel through Josephus' brothers, Abimelech, and Absalom to the last of the Hasmoneans (and of course the palace intrigues of Herod the Great). See esp. Frederick E. Greenspahn, "Every Brother a Supplanter," in *When Brothers Dwell Together* (Oxford: Oxford University Press, 1994), 111–27.

[58] For some important reflections on problems and prospects of using sociology when studying the past, with comments concerning the work of Weber, Rodd, Elliott, Gottwald, and Theissen, see Bengt Holmberg, *Sociology and the New Testament* (Minneapolis: Fortress, 1990), 6–12.

[59] Bryan R. Wilson rightly asks, "how might sociology maintain a neutral attitude towards religion when, at the same time, it sought to discredit it?" (idem, *Religion in Sociological Perspective* [Oxford: Oxford University Press, 1982], 5).

[60] For judicious reflections on the danger of analogy, see Ian Hodder, *The Present Past: An Introduction to Anthropology for Archaeologists* (New York: Pica Press, 1982), 11–27.

The numerous attempts to write a sociology of Second Temple Judaism or of the New Testament have often faltered by a simplistic attempt to apply methods that were not designed to work with ancient texts. It is clear that one cannot write a sociology of antiquity or of Qumran, even though the Qumran texts and Qumran are a rich mine for sociological exploration. All that should be attempted is a sociologically sensitive description of some aspects of life at Qumran. G. Theissen rightly points out that sociological analysis of ancient texts and societies is a continuation and deepening of biblical historical criticism;[61] and N. K. Gottwald correctly claims that "history without sociology is blind."[62]

Certainly, questions will always be paramount in any such endeavor. Since Qumran was a group, or sect, then sociological methods and insights should help us grasp some dimensions of the Qumran Scrolls that would elude us by using only historiography. Thus, we might now focus on *Psalm Pesher 1* seeking to discern if and in what ways this commentary on the Psalter might help us comprehend something about the "where," "why," and "whom" of the Qumranites.

The issue of *where* concerns the location of the community and the ideology that supports this location. What is this place located on the western shore of the Dead Sea? And how can the community determine the significance of this location, which, in turn, defines the body's identity? According to 1QS, as we noted earlier, Qumran is a place of preparation. Here, the members gather together "to prepare the way of the Lord" by preparing themselves through study, discipline, and prayer (8.15–17). Moreover, on this Spartan patch of earth, the Qumranites, like the location itself, are set apart from society. Isolation defines both site and occupant, so that the question of "where" becomes a part of self-identity. Only at Qumran–a site far removed from distraction and impediment–can the community work together to prepare for the ever-imminent time of divine intervention.

Psalm Pesher 1 assumes and revises the terms of this preparation. With the passage of many years, from the composition of 1QS to the circulation of *Psalm Pesher 1*, the community had come to understand preparation as affliction. The psalmic pesher makes this evident in its scenic description of daily life: members beset by forces of wickedness, leaders continually encountering physical forces of resistance (e.g., The Man of the Lie and the Wicked Priest), and famine (רעב [frags. 1–10, 3.3]) as a commonplace occurrence.[63] While this description seems tinted by communal ideology, it retains a truthful form. It seems that in "the latter days" of *Psalm Pesher 1* the Qumranites recognized asceticism and suffering as the most faithful mode of Torah-shaped behavior. That is, by suffering in the present, they could both demonstrate their faithfulness and orient themselves toward the future.[64]

---

[61] See esp. Gerd Theissen, "Zur forschungsgeschichtlichen Einordung," in *Studien zür Soziologie des Urchristentums* (WUNT 19; Tübingen: Mohr Siebeck, 1989). Sociology plays a major role in Theissen's essay, "The Political Dimension of Jesus' Activities," in *The Social Setting of Jesus and the Gospels* (ed. W. Stegemann, B. J. Malina, and G. Theissen; Minneapolis: Fortress, 2002).

[62] Norman K. Gottwald, *The Tribes of Yahweh* (Sheffield: Sheffield Academic Press, 1999 [new edition]), 17.

Historical events also inform this vocabulary of "where." At several points in his commentary, the author of *Psalm Pesher 1* shows that at Qumran the Sons of Light have suffered in salvation history. Since the arrival of the first inhabitants at Qumran, many "Poor Ones" had lived and died there, including, conceivably, the Righteous Teacher. His life and legacy, while central to the community, is one of many. The text sets him alongside the entire existence of priests, Levites, and other Jews at Qumran, and in so doing adumbrates a particular narrative of life. Moreover, *Psalm Pesher 1* engages the community's memory and incorporates the body of worshipers into this larger historical continuum that galvanizes past and present. At the northwestern edge of the Dead Sea, in a particular location now made sacred, a story that transcends time unites a sect of Jews. In this way, *Psalm Pesher 1* informs the members of the community where it has been and where it is, thus allowing them to live in the historical and local present.

A second question central to the sociology of identity forged by *Psalm Pesher 1* is the question of "*why*." This question seeks to define larger questions, such as existence and legitimacy. What motivates each member's journey into the wilderness? And having faced the rigors associated with living in the wilderness, what motivates the community to remain at Qumran? According to *Psalm Pesher 1* existence is a matter of a common will. Note these words:

---

[63] It is entirely possible that the scribe(s) uses רעב to indicate a regional famine. Not only was the landscape surrounding Qumran severe, unsuitable for most types of cultivation, but several other documents edited or composed during the Second Temple period mention a time of famine. See Acts 11:28. Cf. Luke 15:14; Rev 18:8 (also see Gen 12:10, 26:1; 41:57; 2 Sam 21:1).

[64] See, Philip R. Davies, "Space and Sects in the Qumran Scrolls," in *"Imagining" Biblical Worlds: Studies in Spatial, Social and Historical Constructs in Honor of James W. Flanagan* (ed. D. M. Gunn and P. M. McNutt; JSOTSup 359; Sheffield: Sheffield Academic Press, 2002), 81–98.

> *Abandon anger and forsake rage. And do not be angry; it results only in evil, for those who do evil will be cut off.* Its interpretation concerns all those who return to the Torah, who do not rebelliously refuse to turn back from their evil; for all those who refuse to turn back from their sin will be cut off. *And those who wait for Yahweh, they will take possession of (the) land.* Its interpretation: they are the congregation of his chosen ones, those who do his will (frags. 1–10, 2.1–5a).

In the sections of commentary following each *lemma*, the scribe places an emphasis not only on the presence of divine and human will in action, but also on the relationship between these wills. The presence of wills is largely a reflection of thought as expressed in the Psalms: human action is wedded with the greater action of God. However, the connection of these two wills at Qumran is distinctive. God has acted before the Qumranites ever had an opportunity to act, thus "the congregation of his chosen ones" receives an apposition. God's chosen ones are identical to "those who do his will." Furthermore, they understand their own action as precipitous of God's further action. Both by their presence in the wilderness and the dutiful shaping of their daily suffering and tasks (words and deeds), they presume that they will ultimately take possession of the Land. Thus, existence is legitimated in a double affirmation. Great is the man who chooses to be a part of the community and great is the man whom God has chosen.

Alongside this description of wills, *Psalm Pesher 1* uses time as a means to explore existential questions that form communal identity. As important as space was for the Qumranites, time–as is the case with biblical and Jewish theology–is even more paradigmatically crucial.[65] The pesharim reveal that the key that unlocks the "secrets" of Scripture is the hermeneutical principle that all prophecy is directed to the "latter days." When is that time? It is the time of the Qumranites; prophecy was given directly to them and to no other Jew.

At Qumran, the present was the time of the fulfillment of prophecy. Hence, the interpretative mode at Qumran was fulfillment hermeneutic.

The assumption that God is faithful and trustworthy was an indisputable fact for all religious Jews. For the Qumranites there was much more. They could obtain meaning and understanding with the wisdom through which God had disclosed "all the mysteries" of his prophecies to the Righteous Teacher; they could see fulfillment in their own origins and recent history. Their time and their own community is the crucible in which God is fulfilling all his prophecies. For the Qumranites the future was becoming part of the present (in ways known to the Psalmists who composed some of the psalms with the use of verbs that are examples of *perfectum propheticum*). Thus, the "*why*" clarifies that time is being fulfilled by God's activity for and within the community.

---

[65] André Neher tends to adopt and exaggerate Abraham Heschel's claim that the Jews were "the builders of time." Yet, while Genesis does not reject space (as Neher claims), it does embody "the espousal of time, as a result of which biblical 'philosophy' will always be alien to Greek philosophy" (André Neher, "The View of Time and History in Jewish Culture," in *Cultures and Time* [Paris: Unesco Press, 1976], 151; article is on 149–67).

Using the terminology and sociological and anthropological sophistication provided by V. W. Turner, we can comprehend that the Qumranites experienced a liminal existence. In terms of "where," they were only temporarily in the wilderness (1QS), since the wilderness is where they were "preparing the Way," and wilderness is a biblical concept that signifies primarily preparation; as S. Talmon states, "Ultimately (at Qumran) the desert became the locale of a period of purification and preparation for the achievement of a new goal."[66] The liminality of where is obvious also in that the community is not merely part of the earth; it is sacred space in which angels join the "Most Perfect of Perfect Ones" and anthropology moves close to angelology. In terms of when, the Qumranites, as Semites, knew no clear distinction of past, present, and future; moreover, for them the liminality was phenomenological, since the past was full of future promises and the present was regnant with fulfilled meaning, which is enunciated pellucidly in the pesharim. Turner's competence does not include Judaism, though he (a Roman Catholic) is a specialist on the sociology of pilgrimage, which makes sense for the Qumranites, since certain passages in the Qumran Scrolls indicate that they are on a pilgrimage to a renewed Temple and Holy City (cf. *The New Jerusalem* and the *Temple Scroll*). Thus, the liminality of the Qumranites is evident in the fact that they are interstitial, living within "the in-between state of life-in-death." Like a "seclusion camp," the Qumranites obtain self-identity by emphasizing "gnosis (liminal wisdom)."[67] The concept of liminality helps us comprehend deeper dimensions of the interiority of Qumran perception; for example, consider the following from *Psalm Pesher 1* which interprets (provides a pesher on) Ps 37:21–22, and the promise that those who are blessed by "*the righteous one…[will inh]erit (the) land*":

---

[66] Shemaryahu Talmon, *Literary Studies in the Hebrew Bible* (Jerusalem: Magnes; Leiden: Brill, 1993), 253.

[67] This reflection on liminality has been influenced by Victor W. Turner's *Process, Performance and Pilgrimage: A Study in Comparative Symbology* (Ranchi Anthropology Series 1; New Delhi: Concept Publishing, 1979); see esp. 142. Also see Victor W. Turner, *The Ritual Process: Structure and Anti-structure* (Chicago: Aldine, 1969; repr. Berlin: Walter de Gruyter, 1995).

> Its interpretation concerns the congregation of the Poor Ones; thei]rs is the inheritance of all the great [ones;] they will take possession of the high mountain of Isra[el, and on] his holy [moun]tain they will delight.... (frags. 1–10, 3.10–11)

The third, and in some ways the most important, element in the sociological vocabulary of *Psalm Pesher 1* is the question of "*whom*." What sociological insights and sensitivities help us perceive the sociology of the community? In particular, what are the defining contours of communal self-identity? Admittedly, the issue of Qumran self-identity is somewhat elusive, since the character of identity differs, depending on the text, and the very nature of self-identification involves subjectivity.[68] Yet, while provenience and ideology do place strictures on identity, they never close it.

Looking closely at *Psalm Pesher 1*, we find parts of this "whom," which we may describe as a dynamic, collective first-person singular, I–an image of the collective self that begins to disclose knowledge of self-identity. Three reflections help to define this "whom."

First, this self-identity is evident in how language receives power. From *Psalm Pesher 1* the community learns of its divine inheritance through revealed and special interpretive power. Against other Jewish communities, especially the ruling priesthood in Jerusalem, the Qumranites claim unique ability to discern the true meaning of Scripture. In their view, God has provided them with the gift to discern what to others is hidden–the source of this gift being Scripture (God's inviolate Word) and the means being the pesher methodology. Moreover, this gift has established them as the new prophets of God, deriving power, authority, insight, and salvific knowledge from sacred Scripture. The quintessential prophet in their history or midst is clearly the Righteous Teacher, who fits perfectly Weber's definition of prophet, "a purely individual bearer of charisma, who by virtue of his mission proclaims a religious doctrine or divine command." Why? It is because "the prophet's claim is based on personal revelation and charisma."[69] Not only is this portrayal of the Righteous Teacher evident in many pesharim, but in *Psalm Pesher 1* he is presented as "the Interpreter of Knowledge" (1.27), "the pillar" (3.16), and the one who stands "be]fore God with purposeful speech" (4.27).

---

[68] Carol Newsom captures this complication in the title of her helpful essay, "The Case of the Blinking I: Discourse of the Self at Qumran," in *Discursive Formations, Ascetic Piety and the Interpretation of Early Christian Literature* (ed. V. L. Wimbush; *Semeia* 57; Atlanta: Scholars Press, 1992). See pp. 13–23.

[69] Max Weber, *The Sociology of Religion* (trans. E. Fischoff; 4th ed.; Boston: Beacon, 1956), 46.

These observations raise the question, "Is the Righteous Teacher not only 'the Prophet;' but also an example of the charismatic?"[70] He is clearly a charismatic, using Weber's terminology and methodology for the ideal-type, because he not only embodied (see sections of 1QH) but was also affirmed by the social unit at Qumran, especially articulated in the pesharim, as the unique holder "of specific gifts of the body and spirit," which were "believed to be supernatural" and obviously "not accessible to everybody." From the images of him mirrored in the Qumran Scrolls, especially the pesharim, the Righteous Teacher is one "who knows only inner determination and inner restraint." He "demands obedience and a following by virtue of his mission." His charismatic authority was also enhanced by his patronymic origins; he was one of the legitimate priests, not only one of the Sons of Aaron, but also most likely a Zadokite.[71]

The term and concept "mission," used by Weber, is crucial; the Righteous Teacher is the prophet to whom God finally chose to reveal *all* his mysteries. All other Jews, especially the reigning high priest, misperceive God's will. Otherwise they would not so flagrantly disobey and insult God by breaking his commandments. The Righteous Teacher also makes claims on the social group he leads, and "it is the *duty* of those to whom he addresses his mission to recognize him as their charismatically qualified leader."[72] The Righteous Teacher thus is a stellar example of Weber's social model for the charismatic.

These comments lead to some caveats. According to Weber, the "corporate group which is subject to charismatic authority is based on an emotional form of communal relationship."[73] This applies to Qumran and the allegiance and even adoration accorded by the Qumranites to the Righteous Teacher; but much of what Weber also claims does not apply to Qumran sociology. He states that the "administrative staff of a charismatic leader does not consist of 'officials.'" At Qumran it does.

---

[70] For more discussion of the concept of charisma, see Bryan R. Wilson, *The Noble Savages: The Primitive Origins of Charisma and Its Contemporary Survival* (Berkeley: University of California Press, 1975). Appropriate for comprehending the Righteous Teacher's charisma is Wilson's insight that "charisma challenges the existing order" (26) and that charisma "appears to be a response to…social disruption" (27).

[71] James H. Charlesworth agrees with Ben Zion Wacholder that *Moreh has-sedeq* seems to be a paronomasia on "Zadok." See Ben Zion Wacholder, *The Dawn of Qumran* (Cincinnati: Hebrew Union College Press, 1983), 99.

[72] The quotations are from Max Weber, *Essays in Sociology* (trans. H. H. Gerth and G. W. Mills; New York: Oxford University Press, 1946), 246–47; italics his.

[73] See Max Weber, *Social and Economic Organization* (trans. A. M. Henderson and T. Parsons; New York: Free Press; and London: Collier Macmillan, 1947), 360; most of what follows in the above discussion is found on this and the following pages.

Weber adds that the members of a social group attached to a charismatic are "not chosen on the basis of social privilege," they are not appointed nor dismissed, and there is "no hierarchy." The Qumranites are the elite in Israel, especially the Sons of Aaron; according to Qumran legislation, members were appointed and even dismissed, and a rigid hierarchy certainly defined Qumran life. Thus, it is unwise to seek for patterns in sociological studies of what may be unique characteristics of the Qumran social order.

We have seen that the Righteous Teacher is a quintessential example of the charismatic, but the Qumran community is not a good example of a group defined by a charismatic. How can we comprehend this sociological anomaly? Four observations alone must suffice for the present study.

First, the Righteous Teacher did not initiate a group; he inherited one (CD 1.8–11; cf. 4Q171 [= 4QpPs^{a}] frags. 1–10, 3.15–16). The contrast at this point between the Righteous Teacher and Jesus of Nazareth helps ground and illustrate this fact. The Righteous Teacher was not the founder of the Jewish group that is known to us from Qumran. Hence his own charisma did not create, even if it did later define, the community.

Second, the Righteous Teacher was not celebrated as the Messiah or the One-who-was-to-Come; he pointed, as did John the Baptizer, to another. As important as he was for the members of the community, he was the means to, not the source of, Truth. Again, the contrast with what another Jewish group said of their charismatic is appropriate (cf. Mark 8:29 and John 14:6).

Third, the Righteous Teacher's group did not elevate him as one of the angels, archangels, or virtually equal with God. Unlike Jesus, he did not evoke messianic reflections. Jesus initiated christological reflections, during and especially after his death. The Righteous Teacher was a mediator and the Irrigator of the Garden; while he was charismatic he was not the primary source of charisma. So, it is understandable why the community who looked to him also looked beyond him.

Fourth, and most importantly, the germinative force within the community is not the Righteous Teacher. It is Scripture which is made the source of life and meaning via the hermeneutic of fulfillment. Scripture contained secrets. No one–not even the prophet who recorded them–knew the secrets within God's word. God chose to reveal them only to one person: the Righteous Teacher. The recognition that he was "the Interpreter of Knowledge" (מליץ דעת; frags. 1–10, 1.27) elevates him, but such an accolade also places him below what is being interpreted. Far more important than the Interpreter is what is to be interpreted: God's own message for "his chosen ones," those "who do his will" (frags. 1–10, 2.5).

The power which the Righteous Teacher made manifest to those in the community and the commentary in *Psalm Pesher 1* helped to shape identity. It seems relatively obvious that P. L. Berger and T. Luckmann are correct to stress, "Identity is a phenomenon that emerges from the dialectic between individual and society."[74] When a man "crossed over into" the community he identified himself no longer with others in his past; he identified himself as one of the Sons of Light who dwelt with the Holy Spirit in the "House of Holiness" and began his journey to become one of the "Most Holy of Holy Ones." Here Berger's seminal work, *The Sacred Canopy*, reveals something fundamental about the Qumran sociology of identity.[75] According to Berger, groups in marginal situations often use ideologically conditioned means to legitimate particular social circumstances: "whenever a society must motivate its members to kill or to risk their lives, thus consenting to being placed in extreme marginal situations, religious legitimations become important."[76]

Berger's sociological insights resonate with what we know of the Qumran situation. Life in the wilderness required physical and spiritual risk and suffering (e.g., bodily suffering, complete conformity, and religious ostracism, even asceticism). And the Qumran Scrolls disclose in abundant ways that religious legitimation sustained their marginal social life. In *Psalm Pesher 1* religious legitimation appears as prophetic interpretation. Prophecy becomes a formula to make sense out of an otherwise untenable situation, motivating a fringe group of Jews, and providing existential meaning. Or to put it another way, through prophecy the community finds itself. Those in the community will inherit "the high mountain of Isra[el]" (frags. 1–10, 3.11). They will constitute "his holy people" (frags. 1–10, 3.7–8). They are "[the congregation of] his chosen ones" who "will rejoice in the inheritance of truth" (frags. 1–10, 4.11–12). Thus, while the power of the "I" derives its dynamic from God's choice of them as the elect and chosen ones in the latter days,[77] the sustaining force of this power derives from willing and constant interpretation and reinterpretation of Scripture, God's Word, through פשר, which provides legitimation.

[76] Berger, *The Sacred Canopy*, 44.

[77] Insightful at this point in our reflections are Bryan R. Wilson's reflections on how the prophet, like the Righteous Teacher, is forced into the interstices of society, because of his marginality, millennialism, and esoteric knowledge. While Wilson does not include Qumran in his study, some of his reflections can sharpen our perspectives of social life at Qumran. See Bryan R. Wilson, *Magic and the Millennium: A Sociological Study of Religious Movements of Protest among Tribal and Third-world Peoples* (St. Albans, England: Paladin, 1975); see esp. 503.

The second part to this "whom" is the constructing of high social barriers. *Psalm Pesher 1* makes a clear distinction between those inside the community and those outside it. In both the text's commentary and *lemma* we find examples of an unambiguous sociological duality: those guided by "the Man of the Lie" (frags. 1–10, 1.26) and those united under "the Interpreter of Knowledge" (frags. 1–10, 1.27). The former are "the ruthless ones of the covenant" who are indeed "in the house of Judah" (frags. 1–10, 2.14), "the wicked ones of Ephraim and Manasseh" (frags. 1–10, 2.18), and "the wi]cked ones of Israel" (frags. 1–10, 3.12). The latter are "all those who return to Torah" (frags. 1–10, 2.2–3), "those who do the Torah" who "are in the Council of the Community" (frags. 1–10, 2.15), "the congregation of his chosen ones" (frags. 1–10, 2.5), and "the congregation of the Poor Ones" (frags. 1–10, 2.10). Indeed, they are "the cho[sen] ones of God" (frags. 1–10, 4.14). The social barriers are so high that persecution is evident. The Pesher reveals that God's elect live in the "time of affliction" because it was "appointed" (frags. 1–10, 2.10). And "the wi[c]ked princes" are those "who oppress his holy people," who are clearly the members of the community (frags. 1–10, 3.7–8). Hope is provided in times of extreme suffering because it is certain that God will "destroy" "the wi]cked ones of Israel" (frags. 1–10, 3.12–12).

In addition, *Psalm Pesher 1* appears to use barrier language to plot a mode of social survival. That is, by building and maintaining certain barriers, the community ensures its own social survival and relegates all other groups to social extinction. Barriers have two functions: too keep out and to restrict within. The barriers in *Psalm Pesher 1* include the cessation of sacrifice, the exacting observation of Torah (frags. 1–10, 2.2–3, 15, 23), the removal of sin (frags. 1–10, 2.4), the flight from evil (frags. 1–10, 2.3), and adherence to the defining teachings of the Righteous Teacher (frags. 1–10, 1.27). Some of these barriers clearly had existed since the founding of the community as a reaction to the Jerusalem cult and its followers; however, by the time *Psalm Pesher 1* was composed, the Qumranites had organized them into a more structured sociology, which was also a cosmology. The barriers present in the text seem to serve as a symbolization of life, a rubric that defines proper social interaction within the community and ascribes a particular social character to those outside the community.[78] As *Psalm Pesher 1* shows, survival occurs when all members of the community adhere to this symbolization.

Third is the association of a name. *Psalm Pesher 1* identifies the community with an important titular designation. It is היחד; see בעצת היחד in frags. 1–10, 2.15 and עדת היחד in frags. 1–10, 4.19. In this pesher, as throughout the Qumran library, the term היחד "the Community"–as already intimated, is a *terminus technicus.*[79] Already in the present work we have used *Yāḥad* as a means of indicating the group at Qumran, but its significance is greater than its function as a synonym.

The noun derives from the verbal root יחד which in the Qal, usually in the Imperfect, denotes "to be united" (Gen 49:6, Isa 14:20) and "to come together" (Ps 122:3). Etymologically linked with it is another important term, the cardinal number one, אחד (in Hebrew) and חד (in Aramaic), "one." Thus, the two terms (יחד and אחד) are linked etymologically (cf. also Heb. יחיד which means "singular," "only"). The community, the *Yāḥad*, is "One." It is singularly united with one purpose and aligned with One God. The community is defined by solidarity. As members of the *Yāḥad*, the Qumranites live, act, and think as one.[80]

Myth and ritual clearly had social functions within the community. As W. Burkert argued, "myth and ritual can form an alliance for mutual benefit." And these two, myth and ritual, "became a major force in forming ancient cultures."[81] These sociological reflections help us comprehend the myth that shaped the pesharim and the ritual that helped to establish the close knit social group.

CONCLUSION

Thinking sociologically, one can imagine that many of the Qumranites would have experienced significant tensions and frustrations. One tension seems ancient in the history of Israel: the individual's search for meaning between solidarity with Israel and some individuality. At Qumran the sociological tension was the relationship between the life of the collective

---

80. For more on the usage of this term prior to the Qumran Community see, Shemaryahu Talmon, "The Qumran יחד," 53–60.

81. Walter Burkert, *Structure and History in Greek Mythology and Ritual* (Berkeley: University of California Press, 1979), 56–57.

"Many" (הרבים)[82] and *Yāḥad* on one side and the life of the individual member on the other. Despite the fact that all members of the *Yāḥad* had been predestined to be Sons of Light, a fact proved by the Urim and Thummim (which revealed the judgment of the Holy Spirit), they nevertheless continued to exist as individuals with distinct characteristics. Each Qumranite most likely had at least five portions of light and perhaps as many as four portions of darkness (cf. *Horoscopes* 4Q186). The most elevated Qumranites were like the angels in their midst; they may have had eight portions of light and only one portion of darkness. Each had a "rank" in the strict hierarchy of the community, with different approximations to being an Elim.[83] But to what extent were the Qumranites disturbed by the tension between the Many and the One, the community and the individual Qumranite? Some of the rules in the *Rules of the Community* are evidence of the tension between individuality and collectivity. This tension would have surfaced intermittently, especially when it was time for one "to cross over into the Covenant" and become a member of the community. It most likely also surfaced liturgically, as a Qumranite pondered his relation to the community and his place within Second Temple Judaism. Thus, the tension would have been not only across the barriers, between those within and those without; it was also within the barriers, as the Qumranite looked out from Qumran-Judaism to other forms of Early Judaism and also looked around within the community at the diversity revealed by the hierarchy (and esp. the revelatory skills displayed by the Maskil).

Sociologists help us become sensitive to other dimensions of our texts. A theological reading of the Qumran Scrolls gives the impression that the lines are lucidly clear between "light" and "darkness." Yet, as Robertson Smith and Emile Durkheim have attempted to show, sacredness and purity are fundamentally ambiguous. Thus, the Qumranites and other early Jews sought rules and constructed ways to define purity (and impurity) that would protect the pure from the constant danger of impurity (a thought that brings to mind Mary Douglas's concept of purity and danger).[84] As Durkheim suggested, "the pure and impure are not two separate classes, but two varieties of the same class, which includes all sacred things." He continued to suggest that there is "no break of continuity between these two opposed forms." And indeed, that the "pure is made out of the impure, and reciprocally. It is in the possibility of these transmutations that the ambiguity of the sacred consists."[85] The presupposition that the Wicked Priest and "the Priest" who is the Righteous Teacher are absolute opposites is false, even though one might have obtained that thought by contemplating that the Wicked Priest apparently attempted to "murder" the Righteous Teacher (frags. 1–10, 4.8). Both "the Man of the Lie" (frags. 1–10, 1.26) and "the Interpreter of Knowledge" (1.27) are priests. The discontinuity is within the continuity of the high priesthood.

[84] See esp. Mary C. Douglas, *Purity and Danger* (New York: Routledge, 1966; repr. 2002).

*Psalm Pesher 1 r*epresents one of the pesharim. As a group these pesharim placard the earliest clear evidence of Jewish exegesis.[86] Scholars have been preoccupied with the characteristics of the pesharim and their witness to Qumran hermeneutical authority and methodology. We have pointed to another dimension of the pesharim as represented by *Psalm Pesher 1.* It is not only a religious document. It seems to be a living testimony to the function of liturgy within Qumran, whether among a few in the scriptorium (locus 30) or among many (the Many) in the large hall set aside for eating and worship (locus 77).[87]

The authority of Scripture at Qumran is refracted through the powerful and authoritative ones in the community, the Mebakker (Examiner), the Maskil (Master), and the Paqid (Overseer). They collectively control all possessions, all admittance and dismissal, advancement, and the daily distribution of sustenance.[88] Yet, all in the community feel daily the power of the Righteous Teacher, as the abiding presence that doles out wisdom, as the sole authority who knows God's secrets (all of them;

[86] Also see Donald W. Parry and Emanuel Tov, eds., *Exegetical Texts* (part 2 of *The Dead Sea Scrolls Reader*; 6 vols.; Leiden: Brill, 2004); see esp. the introduction on xxi–xxii.

[87] For a chart of these loci, see Roland de Vaux, *Archeology and the Dead Sea Scrolls* (London: The British Academy, 1973), pl. 39. In the foreword, the great archaeologist Kathleen M. Kenyon heralded de Vaux's book as "a completely authoritative statement of the archaeological evidence [of Qumran], and this to an archaeologist seems conclusive for the dating of the Scrolls" (vi). Charlesworth does indeed find de Vaux's research definitive and authoritative; but–as he has pointed out since the 1960s–there are some places where he would want to correct de Vaux. Both de Vaux and Kenyon would have encouraged debates, even spirited ones. Despite recent objections by some archaeologists, Charlesworth remains convinced that locus 30 is where scrolls were copied and locus 77 is where the Qumranites met collectively.

[88] See the insightful suggestions by Moshe Weinfeld in *The Organizational Pattern and the Penal Code of the Qumran Sect: A Comparison with Guilds and Religious Associations of the Hellenistic-Roman Period* (NTOA 2, Edtiones Universitai res Friburg Suisse; Gottingen: Vandenhoeck & Ruprecht, 1986).

1QpHab 7) and teaches them so that they are "the Trees of Life." Indeed, the authority of the Righteous Teacher is absolute, because God chose him "as the pillar" (frags. 1–10, 3.16). A rigid set of rules (morality) and authority define social existence within the community. Qumran phenomenology mirrors Durkheim's insight that morality "constitutes a category of rules where the idea of authority plays an absolutely preponderant role."[89] Thus, the author(s) of *Psalm Pesher 1* in col. two emphasizes that God's "chosen ones" (2.5) are those who "return to the Torah" (2.2–3), "turn back from their evil" (2.3), do God's "will" (2.5), and "accept the appointed time of affliction" (2.10).

The corollary to this emphasis on purity and morality is retribution, as Max Weber stressed, when he argued in *The Sociology of Religion* that "the distinctively ethical view was there would be concrete retribution of justices and injustices on the basis of a trial of the dead, generally conceived in the eschatological process as a universal day of judgment."[90] Thus, the author of *Psalm Pesher 1* promises that "the wicked ones" (frags. 1–10, 2.18) who are "all the wicked...will be consumed" (2.7–8), but the "chosen ones" (frags. 1–10, 2.5) "will be delivered" (2.10) so that they "will delight" and "grow fat" (2.11).

Our study has indicated that when a single pesher is separated from the larger group of pesharim, and the generic "genre" studies these texts have fostered, and examined independently, aspects of social life at Qumran may appear. That is, the realization that the Psalter was the hymnbook of the Second Temple and its liturgy should be the presupposition by which we explore the possible collective and liturgical use of a commentary upon it at Qumran (namely *Psalm Pesher 1*). The text itself, which seems to be a copy of an earlier text, seems to mirror liturgical use (note esp. the *vacats*).

Likewise, the distinct speech found in *Psalm Pesher 1* represents an aspect of the sociology of knowledge, because it is an example of the communal speech known only to the Qumran community. Indeed, the text provides a particular socio-religious vocabulary significant to the members of the Qumran community who have lived for some decades in the wilderness preparing the way of the Lord,[91] and eagerly expecting the restoration of the Temple and its services (many were also looking for the coming of two Messiahs). Not only does the pesher comment upon a text with clear liturgical, religious, and sociological importance (Psalm 37), but it also represents an equally authoritative voice. By revealing the meaning of secular history, speaking prophetically, and perhaps intermittently functioning liturgically, *Psalm Pesher 1* helped to shape communal identity and demonstrated to the priests, Levites, and others living on the northwestern shores of the Dead Sea that they had been chosen by God and the Holy Spirit, so that המה עדת בחירו ("they are the congregation of his chosen ones"; 4Q171 = [4QpPs^{a}] frags. 1–10, 2.5). These reflections are offered as a prolegomenon for further probes of how scrolls may have functioned liturgically (defined broadly) at Qumran. For the Qumranites their community was the New Temple and the antechamber of Heaven in which angels worship with (and are not always distinguishable from) "the Most Holy of the Holy Ones."

[91] The book of Numbers was exceedingly important at Qumran, but not as important as Isaiah. On the wilderness motif in Numbers, see the reflections of Mary C. Douglas, *In the Wilderness: The Doctrine of Defilement in the Book of Numbers* (Oxford: Oxford University Press, 2001).

CHAPTER SIXTEEN

THE MOSES AT QUMRAN: THE מורה הצדק AS THE NURSING-FATHER OF THE יחד

Jacob Cherian

1. Introduction

This note will focus on a revealing and parallel use of parental imagery in the *Hodayot*^{a} and in the book of Numbers, thus providing another reason for seeing the Righteous Teacher (מורה הצדק)[1] as "the Moses at Qumran."[2] The Qumran hymns are full of colorful metaphors and imagery, where the hymnist pictures himself in relation to God, self, his enemies, and his community (יחד). The parental imagery employed by the Righteous Teacher in 1QH 15.19–22a[3] is very pertinent and personal, especially in the context of the close-knit, yet hierarchical, Qumran community. This imagery of the "nursing-father"[4] captures the Teacher's authoritative role in the community. It holds heuristic potential for insight into the nature of the Teacher's leadership and the ethos of the community. Along with an examination of the parental imagery invoked in the *Thanksgiving Hymns* (*Hodayot*^{a}) and in Num 11:12, a brief sketch of the significant parallels in a Pauline letter (1 Thess 2:7–12) and the *Odes of Solomon* (19:1–4) will be offered.

---

[1] For a succinct introduction, see Jerome Murphy-O'Connor, "Teacher of Righteousness," *ABD* 6:340–41. I use the *terminus technicus* "Righteous Teacher" to highlight the fact that, from the standpoint of the Community, this personage was the "Right" and "Righteous" Teacher and Priest, the one who rightly interpreted the mysteries of God, as opposed to other teachers and priests (esp. "the Wicked Priest"; 1QpHab 1.13; 9.9–10; 11.4–17).

[2] For one such argument, where the Righteous Teacher is seen as a "typological" or "new" Moses, see Michael O. Wise, "The Temple Scroll and the Teacher of Righteousness," in *Mogilany 1989: Papers on the Dead Sea Scrolls, Offered in Memory of Jean Carmignac, Part II: The Teacher of Righteousness. Literary Studies* (ed. Z. J. Kapera; Proceedings of the Second International Colloquium on the Dead Sea Scrolls [Mogilany, Poland, 1989]; Qumranica Mogilanensia 3; Kraków: Enigma, 1991), 121–47.

[3] Column 7, according to Sukenik numbers.

[4] I was introduced to this term through Aaron Wildavsky's book, *The Nursing Father: Moses as a Political Leader* (Tuscaloosa, AL: University of Alabama Press, 1984). The term excellently expresses the reality of the paternal as well as maternal characteristics that are depicted in the texts studied here.

1.1 On the Semantic Potency and "Models" of Imagery

The key role of imagery and the intricate nature of the metaphorical world have received welcome attention among biblical scholars.[5] James Barr explains that there is a key relationship between semantics and interpretation.[6] Words are not complete semantic units by themselves; rather, they have various meanings in differing contexts. The whole array of semantic devices–ranging from simile and metaphor to typology and allegory–is both essential and integral to human expression. Such literary devices help to express diverse and complex matters in fresh and lucid ways.

Max Black speaks of two of the possible classes of semantic "models": *scale models* (a miniature or representative reproduction of selected features of the "original") and *analogue models* (a reproduction of the "*structure or web of relationships in an original*").[7] "The analogue model shares with its original not a set of features or an identical proportionality of magnitude but, more abstractly, *the same structure or pattern of relationships*."[8] It is clear that the use of parental imagery by the hymnist (and others) falls into the latter class of models. Thus the parental imagery found in the *Thanksgiving Hymns* (*Hodayot*^{a}) evokes an ethos as well as a whole range of emotions that are to be understood in the framework of a complex web of relationships that existed at Qumran.

---

[5] Three representative works are: James Barr, *The Semantics of Biblical Language* (Glasgow: Oxford University Press, 1961); George B. Caird, *The Language and Imagery of the Bible* (Philadelphia: Westminster, 1980); and Peter W. Macky, *The Centrality of Metaphors to Biblical Thought: A Method of Interpreting the Bible* (Lewiston, NY: E. Mellen Press, 1990).

[6] Semantics is now approached from various perspectives, including from the viewpoints of philosophy (e.g., a seminal work by Max Black, *Models and Metaphors: Studies in Language and Philosophy* [Ithaca: Cornell University Press, 1962]) and linguistics (so, Barr, *The Semantics of Biblical Language*).

[7] Black, *Models and Metaphors*, 219–23; 222; emphasis added.

[8] Ibid., 223; emphasis added.

1.2 The Significance of the Thanksgiving Hymns (Hodayot^{a}) *and the Authorship of 1QH 15.6–25*

The *Thanksgiving Hymns* (*Hodayot*^{a}), one of the seven scrolls discovered in Cave 1, is a collection of hymns that clearly held prime position among the Qumranites.[9] The *Hodayot*^{a}, like the *Rule of the Community* and the *War Scroll,* was meticulously copied on a large-format scroll. Émile Puech points out the significance of this artifact.

> The impeccable material crafting of the scroll, which to our knowledge is unique among the manuscripts that have been found, would in itself show the great esteem and importance the scribe-copyist accorded to this text, on a level with the great biblical manuscripts.[10]

One could therefore suppose that these texts, along with the biblical texts, had normative value in the Qumran community. These highly emotive and conceptually rich hymns, deeply steeped in scripture and modeled on the biblical psalms, intermittently express the ideas and feelings of the author(s).

The issue of the authorship of these hymns has received sufficient scholarly attention. According to Puech, "it can be reasonably surmised that the Hymns of 1QHodayot^{a} were composed during the lifetime of the Teacher of Righteousness."[11] Some, like Frederick Schweitzer, would consider the whole of the *Hodayot*^{a}, "to be essentially the work of a unique temperament, viz., the Teacher of Righteousness."[12] While this would be a minority opinion,[13] scholars using varying methodologies agree that at least certain hymns should be ascribed to the Righteous Teacher. Here we find support in Gert Jeremias' outstanding study, *Der Lehrer der Gerechtigkeit.*[14] In a rather long chapter that focuses on the self-understanding of the Righteous Teacher, he makes a detailed examination of several psalms to answer the crucial question whether the Righteous Teacher is the Author of the *Thanksgiving Hymns*.[15] Jeremias' careful study leads him to the dependable judgment that *some* of the hymns (including 1QH 15.6–25) could reasonably be assigned to the Righteous Teacher.[16] Therefore we can approach our chosen text (1QH 15.19–22a) with adequate confidence that it comes from the pen of the Righteous Teacher.

---

1.3 Other Leadership Imagery in the Thanksgiving Hymns *(*Hodayot^a*)*

Probably the most common leadership metaphor in (but not unique to) the *Thanksgiving Hymns* (*Hodayot*^{a}) is that of the servant (עבד). Most often one finds the use of "your servant" (עבדך).[17] Thus, for example, one reads:

> [...You have cleansed] *your servant* from all his offences [by the abundance of] your mercy. (4.11b)
>
> [I thank you because] you have spread out [your] holy spirit over *your servant*....(4.26)
>
> And I, *your servant*, you have graced me with a spirit of knowledge....(6.25b)[18]

A few other metaphors and similes are also used to speak of the leader of the Qumran community. One such term is "a banner." Thus we read: "But you have made me a banner for the chosen of righteousness, and a knowledgeable interpreter of wonderful mysteries" (10.13). Of course the function of the Righteous Teacher as the mediator or revealer of the רזי אל ("mysteries of God") is an important feature at Qumran—something that also stands out in other Qumran writings.[19] James Charlesworth has brought out the import of the allegory where the Righteous Teacher is seen as God's "Autumnal Rain" for his followers[20]–quite a remarkable image for a community living in the arid region of Qumran. There are no other major leadership images that capture our attention in the *Thanksgiving Hymns* (*Hodayot*^{a}) apart from these and, of course, that of the nursing-father.

---

[15] Ibid., 168–267.

[16] Ibid., 180–92. The other texts he looks at are 1QH 2.1–19; 2.31–39; 4.5–5.4; 5.5–19; 5.20–7.5; 8.4–40 (here I refer to the columns using Sukenik's numbers). See also Menahem Mansoor (*The Thanksgiving Hymns: Translated and Annotated with an Introduction* [*STDJ* 3; Grand Rapids: Eerdmans, 1961], 45–49) who prefers to leave the issue of authorship as an open question. Cf. the overly cautious treatment of this matter by Svend Holm-Nielsen, in that, though he is willing to state that "[i]t is even more natural in this psalm [15.6–25] than in psalm 10 [5.20–7.5] to take the author to be some leading person within the community," he still demurs that such a reading "is not an unavoidable conclusion" (*Hodayot, Psalms from Qumran* [ATDan 2; Aarhus: Universitetsforlaget, 1960], 137).

[17] For the usage of words in the DSS, we consulted, the *Graphic Concordance to the Dead Sea Scrolls* (ed. James H. Charlesworth et al.; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1991).

[18] Unless indicated otherwise, the author has rendered all translations.

2. THE מורה הצדק AS THE NURSING-FATHER OF THE יחד (1QH 15.19–22A)

In a section of the *Thanksgiving Hymns* (*Hodayot*^{a}) that many scholars see as coming from the pen of the Righteous Teacher (see section 1.2), we find a significant use of parental imagery. The text in focus is 1QH 15.19–22a.

[19] [מ]טע ולגדל נצר להעיז בכוח ו:[ב]צדקתכה העמדתני
[20] לבריתכה ואתמוכה באמתכה ואת[ ] ותשימני אב לבני חסד
[21] וכאומן לאנשי מופת ויפצו פה כיונ[ק שדי אמו]וכשעשע עוליל בחיק
[22] אומניו

> (19) the planting (to blossom),[21] and to cause a shoot to grow; to take refuge in strength and [...in] your righteousness. You have upheld me (20) in your covenant and I will cling to your truth, and [...] You have made me *a father* (b) to the sons of mercy, (21) like *a wet-nurse* [כאומן][22] to the men of wonder; they open wide their mouth like a chi[ld on *the breast of its mother*] like a nursing infant in the lap of (22) its *wet-nurse* [אומניו].

Interestingly, lines 18b–19a read: "And I depend on the abun[dance of your compassion] and hope in the [abundance] of your mercy, to cause *the*

---

[19] See for example 1QpHab 7.3–17.

[20] See James H. Charlesworth, "An Allegorical and Autobiographical Poem by the *Moreh has-sedeq* (1QH 8.4–11), in *"Shaʿarei Talmon": Studies in the Bible, Qumran, and the Ancient Near East Presented to Shemaryahu Talmon* (ed. M. Fishbane, and E. Tov, with W. W. Fields; Winona Lake, IN: Eisenbrauns, 1992), 295–307; idem, "Autumnal Rain (המורה) for the Faithful Followers of the Moreh (המורה): Joel and the *Hodayot*," in *Der Mensch vor Gott: Forschungen zum Menschenbild in Bibel, antikem Judentum und Koran. Festschrift für Hermann Lichtenberger zum 60. Geburtstag* (ed. U. Mittmann-Richert, F. Avemarie, and G. S. Oegema; Neukirchen-Vluyn: Neukirchener, 2003), 193–210.

[21] "To blossom" is from the previous word (להציץ), the last word on line 18.

[22] Interestingly, Mansoor (*The Thanksgiving Hymns*, 151) translates the term as "nursing father." Holm-Nielsen (*Hodayot, Psalms from Qumran*, 130, 135n36) does note the parallel with Num 11:12, but translates אומן as "foster father." I do not think that אומן has a masculine aspect in its intrinsic meaning; rather nursing father comes from the double context in which the word is found: one, a man is using the word; two, the presence of אב (father) in its immediate literary context.

planting to blossom, and to cause a shoot to grow." This idea is then developed in exquisite detail in 1QH 16.4–11a. The hymnist moves from one metaphor (planting)[23] to another (father and wet-nurse) in quick succession.[24]

The authority that a father had in a Jewish household is well known. The wisdom tradition is replete with the concept that the teacher is a father to his students. The teaching of wisdom is part of a parental passing on of knowledge and care.[25] But what is perhaps more crucial to grasp here is that this image of the teacher as the *nursing-father* is often modeled after God (see following sections). Thus God's care is also that of a *nursing-father*.[26]

Therefore one is not surprised to find the following two texts in the *Thanksgiving Hymns* (*Hodayot*^{a}) in a subsequent column. In these texts (1QH 17.29b–32a; 1QH 17.35–36) the hymnist speaks of God's compassion, care, and foreknowledge, which have been with him from the moment of his birth. He also calls God *the father* of the "sons of truth." God is also like a mother and *wet-nurse* of all creation.

> For, since my father (30) you have know me, and from the womb [...of] my mother you have dealt bountifully to me, from the breasts of the one who conceived me your mercy (31) has been over me, in the embrace of my wet-nurse (אומנתי) [...] from my youth you have revealed yourself to me with the insight of your righteousness (32) and with established truth you have upheld me. (1QH 17.29b–32a)
>
> For (35) my father did not acknowledge me, and my mother cast me off on you. Because *you are father* (אב) to all the [son]s of your truth. You rejoice (36) over them, *like one who has compassion on her nursing child*, and *like a wet-nurse* [כאומן] you nourish all your creatures on (your) lap. (1QH 17.35–36)

These texts evidence a very unique use of the word אומן. In 1QH 15.21 and 17.36 the word is used with the preposition כ. There appear to be only these four instances of אומן (i.e., in 1QH 15.21, 22; 17.31, 36) in the extant and published sectarian writings found at Qumran—all of them, significantly, in the *Thanksgiving Hymns* (*Hodayot*^{a}).

---

[23] The planting thrives as the Righteous Teacher becomes "God's Irrigator." Also see Patrick A. Tiller, "The 'Eternal Planting' in the Dead Sea Scrolls," *DSD* 4 (1997): 312–35; Shozo Fujita, "The Metaphor of Plant in Jewish Literature of the Intertestamental Period," *JSJ* 7:1 (1976): 30–45; esp. 40–44.

[24] This is reminiscent of something that Paul does as he describes the roles of leaders such as Apollos and himself in their respective ministries in Corinth. Thus 1 Cor 3:9 reads: θεοῦ γάρ ἐσμεν συνεργοί, θεοῦ γεώργιον, θεοῦ οἰκοδομή ἐστε ("For we are God's fellow-workers; you are God's field, God's building"). After employing the agricultural metaphor, Paul deftly shifts to architectural imagery in 1 Cor 3:10–17.

[25] Space will not permit a discussion of texts such as Sir 3:1, 6–8; 51:10, 23.

[26] The concept of Yahweh being a father to his people is replete in the Hebrew Bible (Deut 32:6, 18; Isa 9:5[6]; 63:16; 64:7[8]; Jer 3:4, 19c; 31:9; Mal 1:6; 2:10; 2 Sam 7:14a; Ps 89:27[26]; 1 Chr 28:6) and a mother (Isa 66:13a; cf. Isa 66:11; also see maternal imagery in Deut 32:11, 12a; cf. Matt 23:37). See also 3 Macc 5:7; 6:3, 8; Tob 13:4; Wis 2:16; 11:10; 14:3; *Jub.* 1:24–25; 19:29.

Here, the significance of *paronomasia* (the play on words that sound alike) should not go unnoticed. This interpretive method is "typical of many passages in documents composed at Qumran."[27] Thus we must also look at אומן along with the possible assonances with key words such as אמן[28] and אמונהand אמנה. Maintaining faithfulness to God and the covenant was an integral part of Qumran life. Hence in 1QpHab 2.1–4 the traitors and the Man of the Lie both disbelieve the God-given words of the Righteous Teacher and are unfaithful to the covenant of God (לוא האמינו בברית אל). On the other hand the Qumran community saw faithfulness as a key requirement for maintaining their status with God and the community.

In an important section of *Pesher Habakkuk* (1QpHab 8.1–7) we find the interpretation of Hab 2:4b ("And the righteous man will live by his faithfulness [באמונתו]") given as follows: "(1) Its interpretation concerns all who observe the Law in the house of Judah, whom (2) God will save from the house of judgment on account of their tribulation and their faithfulness (ואמנתם)[29] (3) to the Righteous Teacher." Thus what was expected from the community was a certain and necessary אמונה to the אומן. One can only imagine this kind of authority in the community to be wielded by someone as important as the Righteous Teacher. I am inclined to think that here (in 1QH^{a} 15.19–22a) we have one of the best Jewish uses of parental imagery to represent the role of a leader. The Righteous Teacher, like God, serves as the nursing-father to the יחד.[30]

---

[27] Charlesworth, "Autumnal Rain," 198. For another example of paronomasia, see idem, "Paronomasia and Assonance in the Syriac Text of the *Odes of Solomon*," in *Literary Setting, Textual Studies, Gnosticism, the Dead Sea Scrolls, and the Gospel of John* (ed. J. H. Charlesworth; vol. 1 of *Critical Reflections on the Odes of Solomon*; JSPSup 22; Sheffield: Sheffield Academic Press, 1998), 147–65.

[28] The root אמן, "to be firm, secure, dependable" is very important and common in biblical as well as the Qumran writings. The expression אמן אמן ("Amen, Amen") is found in several places; for example, in 1QS 1.20; 2.10, 18.

[29] The Hebrew term could be either from אמונה or אמנה; see textual notes and translation in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 6B, Pesharim, Other Commentaries, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 6B; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 2002), 172–75.

[30] The *Damascus Document*, elaborating on the role of the "Inspector of the Camp," pictures his task as both paternal and pastoral: "He shall have pity on them like a father on his sons, and will heal all the strays(?) like a shepherd his flock" (CD 13.9).

3. MOSES: THE NURSING-FATHER TO HIS COMMUNITY (NUM 11:12)

The Righteous Teacher has rightly been compared to Moses. His role in the community, like Moses, was to bring the Torah to the "House of Judah." Like the covenant that was delivered through Moses, the Qumranites were now given "a new covenant" (1QpHab 2.3); understandably the Righteous Teacher is thereby considered a "second Moses" for the community. In his study of 11Q19 (= 11QT^a), John C. Reeves states that "by invoking the Mosaic mantle [in 11QT^a] the מורה הצדק implicitly assumes the role of a 'second Moses.'"[31]

In this context we can compare the Righteous Teacher with Moses via a remarkable and parallel use of the parental imagery found in Num 11:12, where the same word (אמן)[32] is used. The text sees Moses' divinely prescribed role as that of a wet-nurse to Israel.

> האנכי הריתי את כל העם הזה אם אנכי ילדתיהו כי תאמר אלי שאהו
> בחיקך כאשר ישא האמן את הינק על האדמה אשר נשבעת לאבתיו
>
> Did I conceive all of these people? Did I give birth to them? Why do you tell me to carry them in my bosom, like *a wet-nurse* carries an infant, to the land that you promised on oath to their ancestors?

Notice the striking maternal imagery. Moses is remonstrating with God about the exhausting and exasperating burden he has been assigned. Since God is "the mother" who conceived and bore the Israelites, God ought to take responsibility for being Israel's wet-nurse. But now Moses has to serve as their *nursing-father*.[33] Hence one could well imagine the Righteous Teacher resorting to a conscious use of the same imagery in the Torah, and that in a community that inhabited the world of Torah, these words were heard as a reference to Moses, the *nursing-father* of Israel.

---

[31] John C. Reeves, "The Meaning of Moreh sedeq in the Light of 11Q Torah," *RevQ* 13 (1988): 287–98. Reeves goes so far as to argue, from Josephus' use of the term *nomothetēs* (in *J.W.* 2.145), that the מורה הצדק should be viewed as "True Lawgiver" of the Qumran sect rather than as "Teacher of Righteousness" (ibid., 297–98).

[32] The obvious difference from the use in 1QH 15 and 17 is that here in Numbers the Qal participle of אמן is written defectively without the *mater*. Gert Jeremias also notes the parallel of אומן in 1QH 15 with both Moses and Paul (*Der Lehrer der Gerechtigkeit*, 183n21; 190).

[33] Dennis T. Olson, *Numbers* (IBC; Louisville: Westminster John Knox, 1996), 66. Though unusual, this female imagery for God is not unique (e.g., Deut 32:18; Isa 42:14; 66:13). In this connection also see other texts such as Isa 60:16; 66:7–9, 11.

4. THE NURSING-FATHER IN CHRISTIAN WRITINGS

In this final section, I intend to introduce briefly two similar instances of parental imagery found in explicitly Christian authors. The first is found in Paul's letter to the Christians at Thessalonica; the second in the *Odes of Solomon*, where one encounters an exceptional portrayal of God as the Nursing-Father.

4.1 Paul as a Nursing-Father (1 Thess 2:7–12)

We turn our attention to a passage in 1 Thessalonians where Paul describes the manner and motive of his pastoral ministry among the Thessalonian believers. Here the apostle aptly chooses the potent maternal as well as paternal imagery to speak of the nature of the leadership exercised by the apostolic team.

> (5) Neither did we ever come with flattering speech, as you know, or with a pretext (arising out) of greed–God is witness…(7) although we could have burdened you with the weight [of our privileged position] of being apostles of Christ, instead we became (like) infants in your midst. *As a nursing mother cares for and cherishes her children* (ὣς ἐὰν τροφὸς θάλπῃ τὰ ἑαυτῆς τέκνα), (8) so we affectionately longed for you, delighted not only to impart to you the gospel of God, but our very selves as well, since you had become so dear to us….(11) even as you know, we (treated) each of you *as a father deals with his own children* (ὣς πατὴρ τέκνα ἑαυτοῦ), (12)encouraging and comforting and urging you to walk worthy of God, who calls you into his own kingdom and glory. (1 Thess 2:5, 7, 8, 11, 12)

One cannot easily draw certain conclusions about the relation between Paul and the theology and methodology of the Qumran community. Nevertheless, it is reasonable to think that the "intertextual" consciousness among the Qumran exegetes in their use of Scripture may have parallels to that evidenced in Paul's letters.[34] It also becomes clear that Paul is using imagery that is not novel in any sense but is deeply rooted in his Jewish heritage. Explicit parental imagery in Paul is also found in 1 Cor 4:14–21; 2 Cor 6:11–13; 11:1–3; 12:14–18 and Gal 4:19.[35] This imagery seems to be the bedrock of Paul's pastoral care. At this juncture we will not go into a detailed commentary on the significance of Paul's conception of himself as a mother and father to the Thessalonian believers,[36] but rather will be satisfied with the astute words of Jeremias:

---

[34] See Stephen F. Noll, "Qumran and Paul," in *DPL*, 777–83; esp. 779–80. "The [Qumran] rules demonstrate an eclectic use of Scripture including quotation, allusion, and paraphrase in the context of pastoral exhortation" (ibid., 780).

[35] Cf. 1QH 11.7 ("I was in distress like a woman giving birth for the first time when her labor-pains come on her") with Gal 4:19.

> *Die einzige Parallele für die Verwendung des kombinierten Vater–und Mutterbildes als Ausdruck für das innige Verhältnis zwischen einem Leiter und seiner Gruppe findet sich bei Paulus. Auch er weiss von sich zu sagen, dass er der Gemeinde von Thessalonich Vater und Mutter ist* (1. Thess 2, 7–12).[37]

4.2 Odes of Solomon *19:1–4: God, the Nursing-Father*

The *Odes of Solomon* are a remarkable collection of very early Jewish-Christian hymns (ca. 100 C.E.).[38] At least one intriguing text in the *Odes* (19:1–4)[39] is very pertinent to our study. Charlesworth has shown that "[t]he *Odes* are strikingly similar to many ideas and images found in the Dead Sea Scrolls, especially the *Thanksgiving Hymns*" and "were most likely influenced by the ideas developed in the Dead Sea Scrolls."[40]

---

[36] Something I have undertaken elsewhere; see Jacob Cherian, "The Significance, Function, and Implications of Parental Imagery in Paul's Pastoral Care" (Unpublished Th.M. Thesis, Regent College, Vancouver, 1996); idem, "Paul, A Mother to his Churches: A Brief Examination of Parental Imagery in 1 Thess 2:1–12 and Galatians 4:19–20, " *Dharma Deepika* (2001): 35–47. See also Beverly R. Gaventa, "Our Mother St. Paul: Toward Recovery of a Neglected Theme," *PSB* 17 (1996): 29–44.

[37] Jeremias, *Der Lehrer der Gerechtigkeit*, 190. "The only parallel for the use of a combination of father and mother imageries, to describe the intimate relation between a leader and his group, is in Paul. He speaks about himself as the father and mother of the Thessalonian congregation."

[38] For the Syriac texts (along with the translations and notes) of the *Odes*, see James H. Charlesworth, *The Odes of Solomon: The Syriac Texts* (SBLTT 13; Missoula, MT: Scholars Press, 1978). The translation of *Ode* 19:1–4 used here is from this work.

[39] I am indebted to Prof. Charlesworth for bringing this text to my attention, as well as his helpful comments on a draft of this study.

[40] Charlesworth, *Literary Setting, Textual Studies*, 24. In addition to the arguments of Jean Carmignac and James H. Charlesworth–that lead to the conclusion that the best explanation for the several parallels to the sectarian DSS, especially in the *Hodayot*^{a}, is that the Odist was either a member of the Qumran community or an Essene community–is the observation, that only in these two documents do we find a clear development of the motherhood of God, as one having breasts. See also the major work of Othmar Keel and Christopf Uehlinger, *Gods, Goddesses, and Images of God in Ancient Israel* (trans. Thomas H. Trapp; Minneapolis: Fortress, 1998). Keel and Uehlinger maintain that a study of iconographic and mythological motifs will reveal "buried feminine aspects of the Judeo-Christian image of God" (ibid., 409).

> 1. A cup of milk was offered to me,[41]
> and I drank it in the sweetness of the Lord's kindness.
> 2. The Son is the cup,
> and the Father is he who was milked;
> and the Holy Spirit is she who milked him;
> 3. Because his breasts (*tdwhi*) were full,
> and it was undesirable that his milk should be released without purpose.
> 4. The Holy Spirit opened her bosom,
> and mixed the milk of the two breasts of the Father. (*Odes* 19:1–4)

This is truly fascinating. In a developed Trinitarian framework, God "the Father" is pictured with nourishing breasts and the spiritual milk he provides for his children is mediated through "the Son" and "the Holy Spirit." There is probably no stronger and clearer picture of God as a Nursing-Father anywhere else in Jewish literature.

5. CONCLUDING REMARKS

God is often seen as the parent of Israel. More so God could be called the Nursing-Father of Israel. The apostle Paul, albeit later than the Righteous Teacher at Qumran, also uses this imagery to speak of his parental care and authority among his churches. The biblical tradition had used the term אמן for Moses. Similarly the מורה הצדק, the Moses at Qumran, understands his authoritative yet tender calling to be that of a nursing-father of his community. In the fulfillment of this role he is like Moses and God. This potent image presents valuable insight into the web of relations and the ethos of the fascinating יחד.

---

[41] Cf. 1 Pet 2:3.

CHAPTER SEVENTEEN

ENOCH AND THE ARCHANGEL MICHAEL

Ephraim Isaac

One of the most insignificant figures mentioned in the Hebrew Bible is the seventh descendant of Adam, a man called Enoch, the son of Yared, the father of Methuselah, the longest living man (Gen 5:22–24). Despite the short and enigmatic description in Genesis of the life and end of this man, he appears in postbiblical Jewish thought and literature, including the Dead Sea Scrolls, as well as in early Christian writings. How such a minor figure became one of the most central personalities in postbiblical Judaism and at Qumran reveals the power of ancient biblical texts. In this paper I shall discuss the many legends about the life and exaltation of Enoch recorded in the postbiblical period, and in particular how he became identified with the archangel Michael and the angel Metatron.

In the Hebrew Bible, Enoch is not a figure whose importance ranks with that of the patriarchs, the kings, or the prophets. There is only one reference to him in the whole Bible, that of Gen 5:18–24 (although Halevy unconvincingly suggested reading "Danel" in Ezek 14:14, 20; 28:3 as "Enoch").[1] In the apocryphal-pseudepigraphic works attributed to him, Enoch is a spiritual hero with supernatural knowledge. He tours the heavens and earth with angels and has apocalyptic visions, he learns of the fate of the fallen angels who, according to Gen 6:1–4, had descended to earth and sinned with mortal women, and instructs his family about the history of the world and the eschatological era.

The name "Enoch" has an obscure etymology. It has been variously suggested to be a derivative of the West Semitic root *ḥnk*, "to introduce, initiate, dedicate"[2] like the Hebrew word "Hanukkah." Other nonetymological meanings have been suggested: "your gift," by Philo (*Abr.* 17); "founder," by the biblical author on the basis of Enoch's association with the founding of the first city by his namesake, the descendant of the evil

---

[1] Joseph Halevy, "Cainites et Sethites," *REJ* 14 (1887): 20–25.

[2] Stefan C. Reif, "Dedicated to *ḥnk*," *VT* 22 (1972): 495–501; Werner Dommershausen, "*ḥanak*," in *TDOT* 5:19–21.

Cain (Gen 4:17, 23–24);[3] and "initiate" on the basis of Enoch's introduction into the mysteries of the world.[4] In Ethiopic, as in Hebrew and Aramaic, *ḥnk* means "to dedicate," but it also has varying meaning such as "to investigate, examine, bless, sanctify." Hence, Ethiopic commentators say that "Enoch" means "renewal," "sanctified," or "blessed" on the basis of his physical transformation into a new heavenly body.

Why is the figure of Enoch so unimportant in the Bible and yet so prominent in postbiblical Judaism and early Christianity? I think the lack of overall interest in eschatology and angelology in most of the books of the Hebrew Bible render Enoch into an insignificant and apparently negligible figure in Israelite religion. Yet it is precisely the interest of late Second Temple Judaism, the Essenes, and the early Church in eschatology and angelology that accounts for his later popularity. This later interest in his character, as well as the esoteric speculation about his supposed secret life ensues, in fact, from that obscure and stunning allusion to his life and death found in the single biblical reference to him, which states that "he walked with the angels"[5] and that "he was taken up" when he was 365 years old (Gen 5:24).[6]

II

Who is Enoch? We will probably never know anything about the historical Enoch, if such a person even existed. However, we learn more about Enoch's theological identity from the corpus of literature attributed to him, including *1 Enoch*, the most important Jewish writing of the Late Second Temple period, and from numerous references made to him in other so-called Jewish apocryphal and pseudepigraphic literature, as well as in early Christian writings.

Among modern scholars, Gunkel popularized the view that Enoch, who lived 365 years and was the seventh descendant of Adam, parallels Emmeduranki, the seventh Babylonian antediluvian priest king in Berosus' list (Edoranchus)[7] who taught solar divinatory rites. However, Borger has recently suggested Enmeduranki's adviser Utuabzu, the seventh in the *bit meseri* list of antediluvian sages and who was also said to have ascended to heaven, as Enoch's Mesopotamian prototype.[8]

[5] What the phrases *wythlk ʿm hʾlhym*, "he walked with the angels," and *wʾynnw ky lqh ʿtw ʿlhym* "he was not, for the angels took him," mean is a matter of linguistic dispute. I translate *ʿlhym* in *hthlk ʿm hʾlhym* as "angels."

[6] The figure corresponds to the number of days in the solar year.

In Rabbinic Literature there is an ambivalent attitude towards Enoch. On the one hand, he is portrayed as a culprit and a hypocrite who died from a plague at a young age–Enoch's lifespan of 365 years is relatively short in the genealogy of Seth–to be spared from further folly that would have disallowed his heavenly ascent.[9] These pejorative accounts may be based on the confusion of the two biblical Enochs, the descendant of Cain and the son of Yared. More commonly, however, he is portrayed as a pious worshiper of the true God, who was removed from among the dwellers on earth to heaven or *Gan Eden* without tasting the pangs of death, and who received the names and offices of Metatron and *Safra Rabba*, the Great Scribe, who was credited with the invention of the art of writing.[10] This is the prevailing Rabbinic view of Enoch's character and exaltation. However, in various other Rabbinic accounts, Enoch becomes a poly-professional: an angel, a scribe, an ascetic who preaches repentance, a proselyte, a king in whose 243 years of rule peace reigns on earth, a cobbler who sews worlds together as he pronounces the benediction "Blessed be the name of the glory of His kingdom for ever and ever."[11]

Important books from Late Second Temple period attributed to Enoch are found in the Pseudepigrapha.[12] According to E. G. Hirsch, Enoch was "forgotten by the Jews and reappears as the hero and author of several pseudepigraphic midrashim, in part elaborations of material contained in the *Sefer ha-Yashar*."[13] The Enochic corpus contains a series of revelations that Enoch received and transmitted to his son Methuselah for the benefit of the righteous who will live in the end times. Its major subject matter is twofold: the nature and implications of the created structure of the cosmos; and the origin, nature, consequences, and final judgment of evil and sin.

The figure of Enoch must be understood in the context of the corpus of *merkabah* texts of which the Enochic corpus forms a part.[14] As for the New Testament's portrayal of Enoch, he is presented there as an individual who possessed faith and pleased God, so that he did not die (Heb 11:5–6), and he is quoted as an authoritative prophet in Jude 14–15 (cf. *1 En.* 1:9). According to Ethiopic *tergwame* literature, Enoch hid at the foot of the Garden of Eden for 6 years and dwelt among the archangels. During his lifetime he did not taste earthly food and his body was transformed into a new eternal body, a resurrected body.[15] Hence he is depicted as a prototype of Jesus and all those who rise up from the dead. Enoch is one of those that passed directly into Gan Eden (*Tg. Ps.-J.* Gen 5:24; *Yal.* Gen 5:24).

In the Qur'an, Enoch is called Idris "the Instructor" and described as a prophet of truth and a model of patience whom Allah raised to a lofty place (Sura 19.57; 21.85). According to Muslim scholars like Baidawi, Idris, also named Uhnukh, was the inventor of writing and of the sciences of astronomy and mathematics, as well as a preacher of repentance to the corrupt descendants of Cain. Idris was often compelled to defend his life with the sword against the depraved children of earth. He invented the balance to weigh justly. He was the first scribe and the first tailor. He longs to enter paradise. God sends Death disguised as a beautiful virgin to test him. He prays for death with the privilege of returning to life. This is granted: he dies, but returns to life at once; visits hell, where he sees from the wall of division the horrors of Gehenna; and is then led to the gate of paradise. Refused admittance by the custodian, he lifts himself over the wall by clinging to a branch of the tree "Tuba," the tree of knowledge, which God for his benefit caused to bend over the wall. Thus Idris entered paradise while still living. It is possible that these legends contain traces of lost haggadahs. Masʾudi reports that Enoch (Uhnukh) was the son of Lud, and is identical with Idris. He lived on earth for 300 years and perhaps longer; he is credited with the invention of the needle and the art of sewing; and he received from heaven thirty leaflets containing the praises of God and prayers.

---

[13] *JE* 5:178. Of the midrashim, Hirsch lists the following: *Hekalot Rabbati*, *Sefer Hanok*, *Sefer Hekalot*, and *Hayye Hanok*; *Hekalot Rabbati*, in which Enoch appears as Metatron, *Sar ha-Panim* and reveals celestial secrets to the learned and the wise (see Adolph Jellinek, *Bet ha-Midrash* [6 vols.; Leipzig: Fridrikh Nies, 1853], 3:83–108; see also Ludwig Blau, "Amulet" in *JE* 1:549b; cf. also Norbert Peters, *Die jüngst wiederaufgefundene hebärische Text des Buches Ecclesiasticus* [Freiburg im Breisgau: Herder, 1902], 230); and in Sir 49:14 his destiny is glorified. See also Sir 44:16; 49:14: 16; Wis 4:10; *Jub.* 4:16, 22; 7:38, 39; 10:17; 19:24; 27; 21:10; Book: *T. Sim.* 5:4; *T. Levi* 10:52; 16:1; *T. Jud.* 18:1; *T. Dan* 5:6; *T. Naph.* 4:1; *T. Benj.* 9:1; 10:6). According to Ecclesiasticus, the "taking away" of Enoch is related to his being "an example for the conversion of all generations."

[14] The parallels between *3 Enoch* and the other *merkabah* tracts will not be pursued here; they are amply covered elsewhere, in the introduction and in the notes to the translation. Some of the texts still remain in manuscript, or have been published only in part, or in very faulty editions.

[15] *hthlk* implies, as the Ethiopic biblical version does, that he "served God."

III

There is a tradition found in some Jewish haggadic and Qabbalistic literature that Enoch became the Archangel Michael. The link in this identification is to be found in an angel named Metatron.

There has been a great deal of debate about the meaning of the name of this latter angel, found also as *metator*, a loan-word in Jewish Aramaic.[16] The two most commonly suggested etymologies of the name are the Latin *metator* "front guard, commander," and the Greek *metaturannos*, contracted from *(ho) meta thronon*, "(the) one next to the throne." According to Alexander, the name could simply be gibberish, like the magical names ʿAdiriron and Dapdapiron.[17] According to Ludwig Blau, "Kohut identifies Metatron with the Zoroastrian Mithra; but probably only a few bits were borrowed from the latter. Sachs, Gruenbaum, Weinstein, and others think "that Metatron is identical with Philo's Logos"; but L. Cohn, the eminent Philonist, contradicts this view. M. Friedlander, on the other hand, takes Metatron to be, both in name and in nature, none other than Horus, the "frontier guardian" and "surveyor of the frontier" of the early Gnostics.[18]

[18] See *JE* 8:519.

Metatron is interchangeably identified at times with Enoch and at times with the archangel Michael.[19] Although the sources of such identifications are thought by some to not predate the medieval period, the root of it might go back as early as the Late Second Temple Period. In this paper we shall first outline the tradition and then examine the possible roots of the idea in the earlier period going back to Qumran.

I will argue below in agreement with Alexander that Milik's argument for a late identification of Enoch with Metatron is untenable. Indeed, the identification of Enoch with angels has its roots going back to Second Temple Jewish literature. In the Pseudepigrapha, Enoch is a heavenly scribe (*Jub.* 4:23; *2 En.* 53:2). Likewise Metatron/Enoch is the great scribe in this period.[20] Enoch and Metatron both witness to human folly. Enoch died at the young age of 365 years, and Metatron is depicted as a youth. The name Metatron might mean "guide," and Enoch was a guide to his son Methuselah, Noah's grandfather.

According to another tradition, Enoch is Michael, the intercessor, the angel of mercy and tolerance (*1 En.* 40:9), hence his name: a term believed to be derived from the Latin, *metator*. According to yet another tradition, Michael taught Enoch the mysteries of justice and mercy (71:3). The later mystical works call Michael the "Prince of the Presence"[21] and "Prince of the Ministering Angels."[22] He is "the mighty scribe,"[23] the lord of the heavenly hosts, of all treasures and of secrets,[24] and bears the lesser divine name.[25] The Zohar defines his nature exactly by declaring that he is little lower than God.[26] Michael is identical in all respects with Enoch; the "Hekalot" of which he is the chief personage is called also "The Book of Enoch."[27]

The statement in Exodus, "My name is in him" (23:21) gave rise to the speculation that Metatron carries the Tetragrammaton and that he is the angel who was leading the Israelites during their travel to the land of

Canaan (*b. Sanh.* 38b). Already here we find an identification of the archangel Michael with Metatron, for generally Michael is held to be the guiding angel.[28] Michael defended the Israelites against the accuser and saved them from drowning in the Red Sea (*Ex. Rab.* 18:5); led them during their 40 years' wandering in the wilderness;[29] became Moses' teacher (*Deut. Rab.* 11:6); and mediated the giving of the Torah/Two Tablets at Sinai (*Jub.* 1:27; 2:1; *Apoc. Mos.* 1).

In other later Jewish literature the bearer of the Tetragrammaton is an angel called Yahoʾel, (*3 En.* 48D:1).[30] In his discussion of *3 Enoch* (in *OTP*), Alexander suggests that the archangel Yahoʾel probably originated in speculation about the angel in whom God's name resides (*b. Sanh.* 38b) who subsequently was identified as Metatron.[31] Alexander also rightly identifies the angel Yahoʾel of the *Apocalypse of Abraham* (15–29) as the Metatron of *3 Enoch* (48D:1).

In *3 Enoch*, Metatron is depicted as the supreme archangel (*3 En.* 12:5; 48C:7; 48D:1[90]). He is the second in command in Heaven (*3 En.* 10:3–6); and, like the Almighty, he sits on a throne and presides over a celestial law court (*3 En.* 16:1).[32]

Most scholars agree that Metatron, though a complex figure, is the alter ego of the archangel Michael. As Alexander says in his translation of *3 Enoch*, "both angels were known as 'the Great Prince;' both were said to serve in the heavenly sanctuary; both were guardian angels of Israel; what is said in one text about Michael is said in another about Metatron."[33]

[33] Alexander, "3 (Hebrew Apocalypse of) Enoch," 243; cf. also his notes from Louis Ginzberg, *The Legends of the Jews* (trans. H. Szold; 7 vols.; Philadelphia: Jewish Publication Society, 1909), 5:20n91; 5:170n10; 5:305n248; 6:74n381; Saul

Scholem has suggested that Metatron and Michael were one and the same angel; Michael was the angel’s common name and Metatron one of his esoteric, magical names.[34] Gruenwald disagrees, but Alexander notes the identification of the two angels in later texts and propounds the idea of an archangel with many of Michael’s powers.[35]

In *3 Enoch* Metatron is identified as Enoch. Metatron’s absorption of the figure of Enoch could only have taken place in circles acquainted with the Palestinian apocalyptic Enoch traditions. The apocalyptic texts do not seem to go so far as to say that Enoch was transformed into an archangel when he was taken into heaven, but some of them speak of his exaltation in language, which could be taken to imply this (see esp. *2 En.* 22:8). As Metatron is the alter ego of Michael, he is also the alter ego of Enoch. He is, like Enoch, a human being who had been exalted.

In the *haggadah*, Michael became known as Israel’s Defender from the very beginning of his career when he fought with Israel’s accuser, Samael, the fallen angel. When Elisha b. Abuyah saw Metatron in the heavens, he thought that he was another divine power, but was forbidden to worship him (*b. Hag.* 15a).

Metatron and Michael also perform the same type of duties. Michael led Adam by hand out of Paradise. (*Adam and Eve* 28:3–29:2) He announced Adam’s death and was in charge of the dead body of Adam (and that of Abel), whom he buried with Uriel’s help. He taught people how to bury their dead, and how to mourn for six days (*Adam and Eve* 41:1; 45:1; 48:1–7; 51:12; *Apoc. Mos.* 40:1). He also attended to the bodies of Eve and Moses at their deaths (*Adam and Eve* 43:1–2). Likewise, Moses prays to Metatron to intercede for him at his death, although the angel advised him against it.[36] When Moses died, three angels and Metatron attended to him, as Michael attended to Adam.[37] When God sat in mourning for Moses, Metatron consoled Him just as the Archangel Michael consoled Eve and Seth at the death of Adam. Certain similar traditions appear in Ethiopic *tergwame* commentaries that Enoch preceded

---

Lieberman, *Sheki’in* (Jerusalem: Bamberger, 1939), 11–15, 99–100; Alexander, “The Historical Setting of the Hebrew Book of Enoch,” 162–63.

[34] Scholem, *Jewish Gnosticism*, 46, and his quotation from *Reʾuyot Yehezqeʾl*, *B. Mesiʿa*, 2:132: “The Prince dwells nowhere but in Zebul [the 3rd heaven]…And what is his name?…Mitatron, like the name of the Power.” He suggests that the “Prince” here is Michael, on the grounds that Michael is called “the great prince” in Dan 12:1; cf. *b. ḥag.* 12b; *b. Menaḥ.* 110a; *b. Zebaḥ.* 62a.

[35] Alexander, *OTP*, 244; Gruenwald’s note in Temirin I (1972), 128. See, e.g., Sefer Zerubbabel, *B. Mesiʿa*, 2:498 (the text in Jellinek, *Bet ha-Midrash*, 2:55, is slightly different).

[36] *Taʿan. Waʾethanan* 6.

[37] *Tg. Yer. II* Deut 34:6.

even Adam and that his *Book* was written before the books of Moses, that is the *Orit*, the Torah.

In the *Book of Enoch* and in Daniel Michael is "the Prince of Israel," or "one of the chief princes" (Dan 10:13, 21; 12:1), and in Kabbalistic writing "the advocate of the Jews." Likewise, Metatron has been identified as "the Prince of the World" (*b. Hul.* 60a; *b. Zebaḥ.* 16b; *b. Sanh.* 94a) along with Metatron.[38] God instructs children in the Torah during the last quarter of the day; Metatron, during the first three quarters (ʿAbod. Zar. 3b). Michael and Metatron contend with the fallen angel, Samael or Shamhai,[39] and Enoch intercedes for them.

In the Pseudepigrapha likewise Enoch appears as the heavenly scribe (*Jub.* 4:23; *2 En.* 53:2), although elsewhere he is called Michael (*Ascen. Is.* 9:21), while, as noted above, *Tg. Yer. I* Exod 24:1 substitutes the name of Michael for Metatron, which is found in the other sources. In the Hebrew writings Metatron fills the role of Enoch in the Pseudepigrapha in bearing witness to the sins of mankind. Since both sources represent him as a youth it may be assumed that the first versions of the Hebrew mystical works, though they received their present form in the geonic period, originated in antiquity, so that the conception of Metatron must likewise date from an early period.

The views regarding the source of this conception differ widely. The name "Metatron," which occurs only in Hebrew writings, is in itself striking. The derivation from the Latin *metator* "guide" is doubtlessly correct, for Enoch also is represented as a guide in the pseudepigraphic work which bears his name; and the Hebrew *Book of Enoch*, in which reference to Metatron is constantly implied, states that "He is the most excellent of all the heavenly host, and the guide [Metatron] to all the treasuries of my [God]"[40]

These divergent views clearly indicate that Metatron combines various traits derived from different systems of thought.[41] In medieval mysticism Metatron plays the same role as in antiquity and in the period of the Geonim.

Gruenwald "has yet another solution for the problem of Metatron. The ancients had already noticed that the numerical value of the letters in the word 'Metatron' corresponded with those of the word 'Shaddai' (= 314), and 'Metatron' is also said to mean 'palace' (*metatrion*),

IV

At Qumran, we do not find a clear-cut identification of Enoch with the archangel Michael. However, many of the characteristics and duties ascribed to him could easily be translated to Enoch. It has been suggested that the *merkabah* literature, in which we find the connection between Enoch and Metatron, bears affinity to certain Qumran texts such as *The Angelic Liturgy* (4Q400–407 = 4QShirShabb), *Melchizedek* (11Q13 = 11QMelch), *Physiognomy* or *Horoscope ar* (4Q561) and related works.

A text called *The Words of Michael ar* or *The Vision of Michael* (4Q529) could as easily be described as the vision of Enoch. In this text the archangel Michael, like Enoch, ascends to the highest heavens and sees visions similar to those usually associated with Enoch: forces or throngs of fire; nine mountains, at least two of which stand in the east (unfortunately the text is damaged here); and a new city. Like Enoch reporting his vision to members of his family, Michael reports his to fellow angels.[42]

In *Melchizedek* (11Q13 = 11QMelch),[43] Melchizedek is exalted and appointed chief of the angels and judges with the assistance of other angels over Belial and his followers. Alexander has rightly criticized van der Woude, who proposed that the Qumran Melchizedek may be regarded as the high priest of the heavenly Temple (cf. Gen 14:8; Ps 110:4). On the other hand, van der Woude might be right in identifying him with the archangel Michael, the heavenly high priest in rabbinic tradition (*b. Hag.* 12b) and Alexander may be right in seeing the parallels between the heavenly Melchizedek of Qumran and the Metatron of *3 Enoch* who is also a heavenly high priest (*3 En.* 15B:1). Enoch, Melchizedek, and Metatron all share the same experiences as exalted earthly figures who become heavenly judges (*3 En.* 16:1).

Scholem[44] reinterprets the identity of Metatron in the following five ways:

(1) One of Metatron's most distinctive titles is *Sar Hapanim*, the high priest of the heavenly sanctuary (cf. Metatron's common title *ʿebed* "servant" [10:3].[45] In *3 Enoch* 4, however, the name is taken in the sense of "Youth"

---

and to be connected with the divine name *mqm* ('place')" (as formulated by Ludwig Blau, in *JE* 8:519).

[42] See Robert Eisenman and Michael O. Wise, *The Dead Sea Scrolls Uncovered* (London: Element, 1992), 37–39.

[43] Adam S. van der Woude, "Melchisedek als himmlische Erlösergestalt," *OTS* 14 (1965): 354–73; Jozef T. Milik, "*Milkî-sedeq* et *Milkî-resa*: dans les anciens écrits juifs et chrétiens," *JJS* 23 (1972): 95–144, esp. 96–109.

[44] Scholem, *Jewish Gnosticism*, 7n19.

[45] Regarding the titles of Metatron, see also G. Scholem, *Kabbalah* (Jerusalem: Keter, 1974), 377–79.

and linked with the notion that Metatron is translated Enoch; as the youngest of the angel-princes, he is known among them as "Youth" (4:10).[46]

(2) One of the reasons that J. T. Milik has advanced a very late date for *3 Enoch* is the evidence of the incantation bowls which date from the seventh or eighth century, or even from the ninth century C.E., where Metatron is identified with Enoch (p. 128). But here Enoch is still a purely human figure and there is no hint of the claim of *3 Enoch* that he was elevated to the rank of archangel.

(3) The name Metatron is to be derived from the Latin *metator*.[47] But this loanword could hardly have entered Hebrew and Judeo-Aramaic before the fifth or sixth century C.E., for it was then that Latin borrowings, especially of administrative and military terms, entered these languages *en bloc*.[48]

(4) *3 Enoch* was influenced by the Arabic Hermetic tradition of the eighth to tenth centuries C.E. The Arabic Hermeticists identified Hermes with Enoch; the incantation bowls identify Hermes with Metatron. The author or redactor of *3 Enoch*, receiving both these traditions, deduced that Enoch was the same as Metatron.[49]

(5) "Cabbalistic theories, including the figure of Metatron-Enoch in his role as lieutenant of God, do not appear in Western Europe until the twelfth century (C.E.)."[50]

Milik's arguments do not stand up to close scrutiny. The second argument, Milik's dating of the incantation bowls, is open to question. Many of the bowls cannot be dated with certainty, but those from Nippur (among which are some of our most informative texts on Metatron) were found in stratified deposits and have been dated archaeologically to the seventh century C.E. *at the very latest.* Moreover, the fact that Enoch is not identified with Metatron on the bowls proves little. It is unlikely that the circles from which *3 Enoch* emanated were the same as those that produced the bowls. The failure of the magicians to equate Enoch and Metatron does not prove that the *merkabah* mystics had not already made this connection, either in Babylonia or in Palestine.

As for the third argument, Milik is rather overconfident about the derivation of the angelic name Metatron from the Latin *metator* (see below). His assertion that *metator* can hardly have entered Judeo-Aramaic or Hebrew before the fifth or sixth century C.E. does not accord with the evidence: it is found in what would appear to be much earlier Jewish material. The appeal in Milik's fourth argument to Arabic Hermetic traditions to explain the equation between Metatron and Enoch is unnecessary. The identification can be explained as a natural development within the mystical tradition. It is very curious, if Milik is correct, that the impact of Arabic Hermeticism is not more evident in *3 Enoch* or in the other *merkabah* tracts. Out of the scores of names for Metatron found in the *merkabah* traditions Hermes does not appear to be attested. Milik's final argument is simply mistaken. It assumes that *3 Enoch* was written in western Europe. In fact it was almost certainly written in the East–either in Babylonia or in Palestine (see the section below on the provenance of the book).

[50] Ibid.

It can be shown conclusively that the vast majority of the ideas contained in *3 Enoch*, including the Enoch-Metatron doctrine, were known in both these centers long before the twelfth century C.E. (1) Enoch is found in certain recensions of the Alphabet of Akiba and in *3 En.* 48C (*Kitab al-Anwar* 1.4.2). This short account appears to be a summary of a longer version of the elevation of Enoch closely akin to *3 Enoch* 3–15. (2) If we are right in surmising that *3 Enoch* has drawn some of its materials from the Babylonian Talmud, then its final redaction can hardly be earlier than the fifth century C.E. (3) The magical bowls from Nippur show that many of *3 Enoch*'s ideas about Metatron and about the heavenly world were known in magical circles in the sixth and seventh centuries C.E. All things considered, then, though *3 Enoch* contains some very old traditions and stands in direct line with developments which had already begun in the Maccabean era, a date for its final redaction in the fifth or the sixth century C.E. cannot be far from the truth.

Alexander has rightly suggested that *3 Enoch* draws on Palestinian apocalyptic traditions about Enoch, in particular those pertaining to the identity of Enoch and Metatron attested in Palestinian works: the Targumim and the fourth-century *Reʾuyot Yehezqeʾl*.[51] Metatron is mentioned a number of times in the incantation bowls from Babylonia, and invoked as "the Great Prince," "the Great Prince of God's Throne," "the Great Prince of the Whole World"; and in Mandaean literature as *Yoraba*–the great Yaho–cf. Yahoel. There are three highly suggestive references to Metatron in the Babylonian Talmud (*b. Sanh.* 38b; *b. Hag.* 15a; *b. Abodah Zarah* 3b). Particularly significant is the close relationship between the account of the humbling of Metatron in *3 Enoch* 16 and that in *b. Hag.* 15a.

---

[51] *B. Mesiʿa* 2:132; ed. Gruenwald, ibid., 130.

In conclusion, the figure of Enoch that emerges from postbiblical Jewish literature, including works attributed to him, is manifold. He is at once a heavenly traveler, a prophet, a seer, a priest, an ascetic, a scribe, a mediator, a Jewish proselyte, and an eschatological judge. However, of all the traditions of Enoch, the most intriguing is that in at least one genre of later Jewish thought he is also an archangel, indeed the very famous and beloved Archangel Michael.

CHAPTER EIGHTEEN

QUMRAN AND THE DATING OF THE PARABLES OF ENOCH[1]

Paolo Sacchi

1. The Importance of the Date of the *Book of Parables* to Understanding the Origins of Christianity

The central figure of the *Book of Parables* (also called the *Book of Similitudes*; hereafter abbreviated as *BP*) is a character with no name. He is identified with Enoch at the end of the book, in 71:14 according to the translation: "You are the Son of Man born for justice and justice has dwelt in you." However, not all scholars interpret this passage in the same way.[2] In any case, it is clear that this work belongs to the current of Judaism, which considered its religious beliefs to be revelations of Enoch, who is the revealer of *BP* too. This current of Judaism was born around the fourth century B.C.E. and in my opinion, which is shared by Boccaccini, in the late Persian era, while other scholars such as Collins and Nickelsburg locate its origin at the very beginning of the Hellenistic period.

---

[1] This article reproduces the text I handed over to Prof. James H. Charlesworth in the meeting at Princeton University in 1997, the papers from which constitute the substance of the present work, with only a few modifications concerning the form of my argument and posterior bibliography.

[2] Cf. Ephraim Isaac, who translates "You, son of man" and explains in a footnote that he has written "son of man" with small letters because the Ethiopic expression is different from the expression referring to the "Son of Man," in *OTP* 1:50 Robert H. Charles originally (*APOT* [1893 ed.]) translated, "This is the Son of Man," but twenty years later in the translation of 1913 (*APOT*) he rendered it: "You are the Son of Man," which has remained the common interpretation of this passage. At any rate, Charles (*APOT* [1913] 2:175) had already remarked this difference between the two phrases indicating the Son of Man, but he explained it as being synonymous. Cf. F. Martin, *Le livre d'Hénoch* (Paris: Letouzey et Ané, 1906), 161: "Toi, tu es le fils de l'homme;" Sabino Chialà, *Il libro delle Parabole di Enoc* (Studi Biblici 117; Brescia: Paideia, 1997), 288–91: "Tu sei il Figlio dell'Uomo."

BP's place within the Enochic current is based on an ideological continuity that is independent of the identification of the book's anonymous protagonist with Enoch. I will consider in this article the protagonist as a mysterious character, created before the beginning of time (48:3), who has been assigned the task of carrying out the final judgment. This judgment will be merciless only toward those to whom the author refers as "those who possess the earth, who will neither be rulers nor princes." They above all have the sin of pride; they are those who have any kind of power on earth. The others can be forgiven, on condition that they recognize their sins even at the moment of judgment before this mysterious character.

He has some angelic characteristics, but he is superior to the angels. He is referred to by three different names: the Righteous One, the Chosen One, the Son of Man. It is no matter for the purpose of this article if the three phrases indicate a title or only an appellative, or if the mysterious character is Enoch or a heavenly figure without name. Since Jesus refers to himself with the last of these three terms, as the Son of Man, and since his functions are in some way comparable to those of the Son of Man in *BP*, the date assigned to this book is extremely important, because *BP* will have bearing on the history of the origins of Christianity in a very different manner depending on its dating.

There are three possibilities:

1. *BP* was written after the formation of the New Testament (i.e., later than 100 C.E.).
2. *BP* was contemporary to the formative period of the New Testament.
3. *BP* was written before the New Testament and before Jesus himself.

In the first case, *BP* has no value for understanding the period of Christian origins. It has received some influences from New Testament texts and its history belongs to the aftermath of the Christian origins.

The second and third cases are not so different as it may seem at first view. We must consider that *BP*'s figure of the Son of Man was not created by the author or redactor of the book. The book may only reflect a belief already existing among people.

It is clear, however, that if *BP* was written in a time before Jesus, it is easier for us to think that its ideas were known at Jesus' time. In this case *BP* becomes fundamental for the study of Jesus' self consciousness.[3]

---

[3] Cf. James H. Charlesworth *The Old Testament Pseudepigrapha and the New Testament*, (Cambridge: Cambridge University Press, 1985), 110: "Yet the real issue remains open. Are these Jewish Parables pre-Christian and a source for understanding either Jesus' *ipsissima verba* or the theologies of the Evangelists? Or, are they post-Christian and a significant development independent of the canonical Gospels, or a Jewish reaction to Christianity?"

2. THE RESEARCH ON THE *BOOK OF PARABLES*: A CRITICAL OVERVIEW

Europe became aware of *BP*'s existence relatively recently. The book arrived in Europe in 1773, brought there in three manuscripts from Ethiopia by James Bruce. In 1821, Richard Laurence carried out the first translation into a European language. It was again Laurence who edited the first edition of the Ethiopic text in 1838, *Libri Enoch prophetae versio Aethiopica* (Oxford : J. H. Parke), followed in 1851 by August Dillmann (*Liber Henoch Aithiopice*, Leipzig: F. C. G. Vogel), whose work marked a foundational moment in research on the text. Other editions of the Ethiopic text worth mentioning are those of Johan Flemming, Robert Henry Charles, and Michael A. Knibb.[4]

The numerous commentaries on translations, usually inserted into collections of OT Pseudepigrapha, are also particularly important. The principal treatments are by the following scholars: J.-P. Migne, R. H. Charles, E. Kautzsch, F. Martin, P. Riessler, P. Sacchi, A. Díez Macho, S. Uhlig, J. H. Charlesworth, H. F. D. Sparks, A. Dupont-Sommer and M. Philonenko, *and* S. Chialà.[5]

It is interesting to note that during the nineteenth century it was common to interpret all pseudepigraphal writings as having Christian origin, perhaps handing down some ancient Jewish tradition.[6] However, *1 Enoch* was an exception, because its first editor, Laurence, maintained that the book had originally been written in Hebrew and was datable to the early part of the reign of Herod the Great.

Charles, *The Book of Enoch* (Oxford: Clarendon 1893); *APAT* 2:217–310; François Martin, *Le livre d'Hénoch: traduit sur le texte éthiopien* (Paris: Letourzey et Ané, 1906); Charles, *APOT* (Oxford, 1893; 1913^2), 2:163–281; Paul Riessler, *Altjüdisches Schriftum ausserthalb der Bibel* (Augsburg: B. Filser 1928), 355–451, 1291–97; Paolo Sacchi et al., *Apocrifi dell'Antico Testamento* (Classici delle religioni 38/2; Turin: Unione Tipografico-Editrice Torinese, 1981), 1:415–667; Alejandro Díez Macho, *Los apócrifos del Antiguo Testamento* (Madrid: Cristiandad, 1984), 4:13–146; Siegbert Uhlig, *Das äthiopische Henochbuch* (*JSHRZ* 5/6; Gütersloh: Mohn, 1984); James H. Charlesworth, *OTP*, 1:5–89; Hedley F. D. Sparks, *The Apocryphal Old Testament* (Oxford: Clarendon, 1984), 169–320; André Dupont-Sommer, and Marc Philonenko, *La Bible*; *Ecrits intertestamentaires* (Paris: Gallimard 1987), 465–625; Chialà, *Parabole di Enoc*.

[6] The distinction between Old and New Testament Pseudepigrapha was made by Johan Alberto Fabricius, *Codex Pseudepigraphicus Veteris Testamenti* (2 vols., Hamburg: Theodor Christoph Felinger, 1713–1723) on the basis of the pseudo-author's name, whether he was a figure in the Old or the New Testament. Beginning with Kautzsch, *Die Apokryphen und Pseudepigraphen*, the concept of the Old Testament Pseudepigrapha

While there was some discussion in the nineteenth century as to whether *BP* was originally Christian or Jewish,[7] beginning with Charles (1893) the idea of the book's Jewish, pre-Christian origin was commonly accepted. Under the entry "Apocryphes de l'Ancien Testament," in the *Dictionnaire de la Bible, Suppléments*, 1:359, B. J. Frey dated all of *1 Enoch*, including *BP*, to the second century B.C.E.

However, assigning an early date to the *Book of Parables* created some serious problems for Christian theology, which was used to considering the name "Son of Man," a title that Jesus had given himself, as characteristic of Jesus and a direct consequence of the Son of Man in the book of Daniel. It was common to interpret the Son of Man in Daniel as the direct archetype of Jesus the Christ.[8]

Thus, given the objective problems created for Christian theology if *BP* is considered to predate Jesus, during the first decades of the twentieth century some attempts were made to maintain that even though the work was Jewish, the messianic titles must have been inserted later by the Ethiopic Christian tradition.[9] These attempts were later abandoned due to their inconsistencies; it is impossible to eliminate the Son of Man from the original version of *BP* without eliminating the book itself.

Subsequently, Sjöberg lowered the pre-Christian dating, drawing attention to the only event clearly mentioned in the text,[10] a Parthian

---

changes; it is no longer a purely literary distinction, but a historical one. A pseudepigraphic text can be titled as Old Testament Pseudepigraph only if it is datable prior to the closure of the Christian canon (roughly 100 C.E.). This definition of "Old Testament Pseudepigrapha" is accepted by most scholars up until the present, with the exception of Albert-Marie Denis, *Introduction aux Pseudépigraphes grecs d'Ancien Testament* (Leiden: Brill, 1970), and Charlesworth's vast edition (*OTP*). Denis and Charlesworth consider many books of this type Old Testament Pseudepigrapha, even if they were composed after 100–150 C.E., when the Old Testament period was clearly closed. On the Spanish edition, see Paolo Sacchi et al., *Apocrifi dell'Antico Testamento* (Biblici, Testi e studi 5; Brescia: Paideia, 1999), 3:33–34. The Introduction is published also in *Henoch* 21 (1999): 97–130; see 115–16.

[7] On the history of the interpretation of *BP* during the nineteenth century, cf. the entry "Apocryphes de l'Ancien Testament," by Jean-Baptiste Frey, *DBSup* 1:359.

[8] Cf. John J. Collins *Daniel* (Minneapolis: Fortress, 1993), 304–10.

[9] Cf. Nils Messel, *Der Menschensohn in den Bilderreden des Henoch* (Giessen: A. Töpelmann, 1922). In 1909 Léon Gry (*RB* 18 [1909]: 462–64) admits that the *BP* could have undergone many Christian interpolations. However, these Christians must have been Aramaic speaking people, because the Fathers of the Church ignored *BP*. The author, though, has many doubts that all messianic passages can be attributed to Christians.

[10] Erik K. T. Sjöberg, *Der Menschensohn in dem äthiopischen Henochbuch* (Lund: C. W. K. Gleerup, 1946).

invasion of Palestine narrated in 56:5–7. Since the only Parthian invasion acceptable to the common opinion for the time when *BP* was composed was the one which took place in 40 B.C.E., when the Parthians intervened in favor of the last Hasmoneans (Antigonus Asmoneus) against the Antipatrids (Herod the Great), 40 B.C.E. became the *terminus a quo* for the composition of *BP.*

The discovery of the Dead Sea manuscripts has introduced a new element into the discussion. While the library at Qumran contained many and lengthy fragments of *1 Enoch* in the original language, the collection contained no fragment of *BP.* It is therefore necessary to pose the question about the book's absence. Whether it is true that *BP* occupies the second place in the Ethiopic Pentateuch after having taken the place of another book, the so-called *Book of Giants*, the question as to why *BP* was unknown to Qumran remains open. There are two possibilities: it had not yet been written in 68 C.E. when the caves at Qumran were closed; or it belongs to a group other than the one at Qumran. Given the presence of the rest of *1 Enoch* in the Qumran library, which was very well represented at Qumran, and *BP*'s undeniable place in the Enochic tradition, at first only the first hypothesis was taken into consideration.

We should also remember that some scholars have resolved the problem by simply saying that the absence of the book can even be attributed to chance.[11] This line of reasoning could be adopted, but only after having demonstrated both that the work cannot have been created after 70 C.E., and that the Qumranites had no specific reason to exclude it from their library.

Moving the date after 70 C.E. causes serious problems, this time of a historical rather than a theological nature, since *BP* seems to fit clearly in some part of the period running from 40 B.C.E. to the end of the first century C.E. Once again there are two possibilities: either to assign it decidedly to the years between 70 and 100 C.E., considering it to be contemporary with the great apocalypses of the day, the *Fourth Book of Esdras*, the *Syriac Apocalypse of Baruch*, and the canonical book of Revelation, or give it an even later date. In the latter case the possibility that the book originated in Christian circles would again have to be taken into consideration. The former solution would not change the old problems very much while the second would mean returning, though in a more critical manner, to the positions of more than one hundred years ago.

---

[11] Cf. J. Clifford Hindley, "Towards a Date for the Similitudes of Enoch. An Historical Approach," *NTS* 14 (1968): 551–65; Jonas C. Greenfield and Michael A. Stone, "The Books and the Traditions of Enoch," *Numen* 26 (1979): 89–103; Christopher L. Mearns, "Dating the Similitudes of Enoch," *NTS* 25 (1979): 360–69; Gillian Bampfylde, "The Similitudes of Enoch; Historical Allusions," *JSJ* 15 (1984): 9–31.

The most radical approach to the later dating of *BP* was taken by Milik in 1976.[12] He brought the date down to the third century and attempted a complex and coherent explanation. Even though his conclusions have been rejected, his work was of great stimulus to later research.

Milik deduces that the only possible explanation for the book's absence from Qumran is that it was written later, choosing the third century once again in connection with the information on the Parthian invasion, mentioned in 56:5–7 and fairly emphasized by Sjöberg, because it is the only clear reference to a historical event in *BP*.[13] Milik interprets the passage as an allusion to Shapur I's defeat of the emperor Valerian in 260, which led to an invasion of Palestine by the surrounding peoples. Already in 1968,[14] Hindley had tried to find another Parthian invasion later than 70 C.E., and had indicated the time of Trajan's war against the Parthians in 117 C.E. Hindley's point of departure for rejecting identification of the invasion mentioned in *BP* with the one of 40 B.C.E. was that Flavius Josephus had recounted the event as though it had been welcomed with satisfaction by the Jews (*Ant.* 14.324 *et seq.*; *J.W.* 1.248 *et seq.*), while *BP* narrates the invasion with horror.

In reality, Flavius Josephus presents the episode of the Parthian invasion in 40 B.C.E. as the cause of massacres and a war that not only pitted Parthians against Romans, but also Jew against Jew (*Ant.* 14.359). In regard to this situation, in *J.W.* (1.252) he writes, "the killing (among Jews) never ended." He also narrates that the Parthians sacked Jerusalem and its surrounding countryside (*Ant.* 14.363). There is also a curious detail that corresponds to the account given in *BP*, that the Parthians sent their cavalry ahead (*J.W.* 1. 250) and it sacked the area around Mount Carmel.

The passage of chap. 56 tells of an invasion from the east (Parthians, Medes). They invade "the land of their[15] elect ones" and they trample it. After this first phase there will be a resistance "of my righteous ones" (with no variants), which hinders their horses. At this point war breaks out among the invaders, but (if I understand the text correctly) the Jews themselves fight some on one side (the Parthians) and some on the other (the Romans sent in aid of Herod); it is a civil war, as seems to be confirmed by the expression, "A man shall not recognize his brother (which could refer to the invaders and to the Jews as well), nor a son his mother (which could hardly refer to the invading army)." It is interesting to note that this is also the interpretation given by the modern Amharic translation, which in its paraphrase clearly indicates that punishment regards the Jews more than the assailants. An Italian translation of the Amharic can be found in Fusella.[16]

---

[12] Jozef T. Milik, *The Books of Enoch* (Oxford: Clarendon, 1976).

[13] Also James H. Charlesworth considers the information concerning the Parthian invasion a historical one. See "The Date of the Parables of Enoch (1 En 37–71)," *Henoch* 20 (1998): 96.

[14] Hindley, "Towards a Date."

[15] *Their*: with most manuscripts. The text of MS F, *my*, is *lectio facilior*. The author tells us that Parthians penetrated into a part of Palestine, where *their* supporter received them with favor, because they hoped to be freed from Romans. In fact, it is the beginning of the civil war that Josephus speaks of in the subsequent chapters.

Milik was well aware that moving the date of composition so far after the closure of the Qumran caves meant necessarily going back to the hypothesis of a Christian origin of *BP*. This also meant finding a new way of solving the problems that scholars felt had been solved long ago. The first of these problems was that it was generally agreed that the original had been written in either Hebrew or Aramaic and it was hard to imagine a Christian writing in one of those languages during the third century. Milik sought to explain that the original must have been in Greek, and in order to demonstrate this he tried to show that the text was similar to the Sibylline books and was originally written in verse. This hypothesis was as audacious as it was indemonstrable.[17]

Milik was quite systematic in collecting arguments in favor of his interpretation and some of them frankly do not merit our attention. For example, the idea that the quotations of the scripture seem closer to the Septuagint than to the Hebrew text, or that the figure of the Son of Man is derived from the Gospels. This last argument clearly depends on the dating of *BP* and cannot determine it. Nor is there any value to the observation that there are no traces of *BP* in any ancient documents other than the Ethiopic version; he himself hypothesizes the existence of a Greek version. However, the observation, which scholars were already aware of,[18] that the Church Fathers do not quote *BP* between the first and fourth centuries B.C.E. while they do quote the rest of the Enochic works, does merit some attention.

In this case the question is simply formulated poorly. As I wrote in 1981,[19] the question is not why the Church Fathers quote the Enochic Pentateuch without quoting *BP*, but rather why they only quote the *Book of Watchers* and the final additions to *1 Enoch* which, in fact, have been handed down to us in Greek. The answer is clear: it was in the *Book of Watchers* that they could find a complete story of the fall of the angels, which is only hinted at in chapter 6 of Genesis. And again it was to the *Book of Watchers* that the *Epistle of Jude* alluded (v. 14), giving the book a certain credit in Christian circles.

---

[16] See Sacchi, *Apocrifi del'Antico Testamento*, 1:540, in footnote.

[17] As the problem of the original language of *BP* is concerned, cf. Charles, *APOT* 2:173–76. These pages are still valid.

[18] Ibid., 2:180–81.

[19] Sacchi, *Apocrifi dell'Antico Testamento*, 1:436.

That is not all, though. While it is true that there are no direct quotations, there is at least one clear allusion to *BP* in Tertullian. He defends the authority of the Enochic Pentateuch precisely because Enoch can be considered a prophet of Christ; and for that reason it was rejected by the Jews. He does, however, admit a limit in the work's use. In order to demonstrate that Enoch had truly spoken of Jesus Christ, Tertullian writes in *Cult. fem.* 3.1: "Since Enoch in this same work (naturally the Enochic Pentateuch) has made predictions regarding the Lord (that is Jesus Christ) we can reject nothing that regards us. We know that every work suited to edification has divine inspiration. We can clearly see that this work was rejected by the Jews for precisely this reason, like nearly all other writings that provide a glimpse of Christ." For this, too, Milik's hypothesis does not hold up.[20]

BP's absence from Qumran has drawn the attention of many scholars, because it is certain, just as it is certain that *BP* is not a third century Christian text. So, the question is open. Taking, for example, the minimal hypothesis, that is that the text is Jewish, which is absolutely clear, but trying to reconcile this with the book's absence from Qumran, seen as proof that it was written shortly after 70 C.E., we must still find a solution to the problem of the Parthian invasion. The invasion tends to push toward a higher dating, given the fact that the author describes the events with a sense of immediateness, as though he still had the terror of those days firmly in mind. It is also hard to believe that at the end of the first century C.E. the most disturbing event that the author could think of was a Parthian invasion of more than a century earlier, while the destruction of the Temple in Jerusalem hardly had any effect on him at all.

Thus, attempts have been made to eliminate the Parthians from the text in two ways: interpreting the entire passage of 56:5–7 as an apocalyptic literary *topos* with no precise value,[21] or, again assuming an apocalyptic mentality, considering mention of the Parthians as merely a metaphor for the Romans.[22] If a generic term like *kittim* may be referred to many peoples, such a precise name as "Parthians" cannot be used as a code for another people. At least, I do not know of any similar example.

---

[20] Cf. Chialà, *Parabole di Enoc*, 68. In *BP* many passages relating to the Son of Man may be interpreted as prophecies of the Christ.

[21] Cf. Michel Jas, "Hénoch et le Fils de l'Homme," *Revue Réformée* 30 (1979): 105–19; Michael A. Knibb, "The Date of the Parables of Enoch: A Critical Review," *NTS* 25 (1979): 345–59.

[22] George W. E. Nickelsburg, review of J. T. Milik, *The Books of Enoch*, in *CBQ* 40 (1978): 411–19. Cf. David W. Suter, *Tradition and Composition in the Parables of Enoch*

The other way to explain *BP's* absence from Qumran is that of interpreting it as being different from the Qumran theology. The true precursor of this line of interpretation is Nickelsburg who, in a review of Milik, explained *BP*'s absence from Qumran with the fact that it was written by a group external to Qumran. He clearly proposed in 1981 an early date for *BP*: "…the Parables are a Jewish writing produced around the turn of the era."[23] At the same time Knibb was explaining that if *BP* was not present at Qumran, then it could not be Essene, but must be Enochic.[24] Since he considered the allusion to the Parthians a pure literary *topos*, he dated the work to the end of the first century C.E. on the basis of a comparison with the three great apocalypses of that period. He was left, however, with the problem of explaining why the author made no mention of the destruction of the Jerusalem Temple. The explanation he gives is that the sense of desperation that pervades the entire work makes sense precisely because the book was written after 70 C.E. At any rate, the observation that emerged from the works of Nickelsburg and Knibb was destined to be developed further in the future: this was not a question that regarded only *BP*, but rather all of the history of Essenism and Enochism, to which we shall return below.

Bampfylde[25] has followed Knibb's method of literary comparisons in order to establish the best date for *BP*. Bampfylde's results, however, are quite different. Like Knibb he does not assign much importance to the fact that *BP* is missing from the Qumran library and he gives a rather vague interpretation of the Parthian invasion. He does find some stylistic parallels, though, with the *Psalms of Solomon* and as a consequence fixes the date at 51–50 B.C.E. Black[26] also agrees with this dating, thus returning to Charles's positions.

The work of Reddish[27] can be seen as drawing this period of the research on *BP* to a close; summarizing the various positions of the most recent scholarship, he comes to the conclusion that *BP* must have been

---

(Missoula, MT: Scholars Press, 1979). The author thinks that the most probable date is during the time of Caligula (37–41 C.E.), because this seems to him the best period for explaining the work in terms of a reaction against emperor worship (165–66).

[23] George W. E. Nickelsburg, *Jewish Literature Between the Bible and the Mishnah* (Philadelphia: Fortress, 1981), 223.

[24] Cf. Knibb, "The Date."

[25] Bampfylde, "The Similitudes of Enoch," 9–31.

[26] Matthew Black, *The Book of Enoch or 1 Enoch; A New English Edition* (Leiden: Brill, 1985), 187–188.

[27] Mitchell G. Reddish, *Apocalyptic Literature* (Nashville: Abingdon Press, 1990).

written between 40 B.C.E. and 70 C.E. Two fundamental elements stand out, that I too accept: the Parthian invasion and the fact that the author did not know of the destruction of Jerusalem. We can affirm that the Christian origin of the work is excluded and its absence from Qumran is no longer a problem.[28]

As far as I know, since 1990 the only book that dedicates considerable space to a discussion of the date of *BP* is the one by Chialà. Articles such as those of Collins and Slater only draw attention to the fact that the author of *BP* wrote prior to the destruction of Jerusalem. Their attention is directed more toward the evolution of the concept of the "Son of Man" from Daniel 7 to *4 Esdras* 13. Chialà's line of reasoning is also based essentially on the history of the concept of the "Son of Man."[29] A similar opinion has been rendered by J. H. Charlesworth, whereby he dates *BP* to Herod's time; that is, he confirms the dating proposed by me and Chialà in another way.[30] He is convinced that *BP* belongs to Herod's reign on the basis of a sociological and economic analysis of Palestine of that time. G. Aranda Pérez argues for dating in the first half of the first century C.E.[31] Now G. W. E. Nickelsburg confirms the date he proposed in 1981; he writes: "The Parables can be dated sometime around the turn of the era."[32]

3. MY ARGUMENTATION

Now, I would like to leave the discussion of the history of research on *BP* behind, in order to advance a coherent line of thought based on the points that I feel we have solidly ascertained: 40 B.C.E. as *terminus a quo* and 70 C.E. as *terminus ad quem*. I would add to this some observations in order to narrow even further the span of time in which to place *BP*'s composition. A more precise dating is important for our understanding of the origins of Christianity.

---

[28] The absence of *BP* in the Qumran Library is clearly explicated by both the Groningen hypothesis (by Florentino García Martínez and Adam S. van der Woude), and the Enochic Essene hypothesis (by Boccaccini).

[29] John J. Collins, "The Son of Man in First-Century Judaism," *NTS* 38 (1992): 448–66 (he dates the work to just prior to 70 C.E.); Thomas B. Slater, "One Like a Son of Man in First-Century C.E. Judaism," *NTS* 41 (1995): 183–98 (he dates the work to prior to 70 C.E., but more broadly than Collins); Chialà, *Parabole di Enoc* (he dates *BP* sometime around the turn of the era). On the interpretations of the Son of Man in Daniel, see John J. Collins, *Daniel* (Minneapolis: Fortress, 1993), 308–10.

[30] Charlesworth, "Date of the Parables," 93–98.

[31] The Italian version is *Letterature giudaica intertestamentaria* (Brescia: Paideia, 1998), 239; originally in Spanish, Gonzalo Aranda Pérez, Florentino García Martínez, and Miguel Pérez Fernández, *Literatura judía intertestamentaria* (Introducción al estudio de la Biblia 9; Estella, Navarra: Editorial Verbo Divino, 1996).

[32] Nickelsburg, *1 Enoch* (Hermeneia; Minneapolis: Fortress, 2004), 6.

BP's anonymous protagonist belongs to that category of superhuman figures with saving functions with which Middle Judaism is so rich. After Elijah and Enoch, who were born but did not die, we must also remember the heavenly *Melchizedek* of 11Q13 (= 11QMelch), who is no longer a man but an archangel,[33] and the un-named protagonist of *BP* who, for the sake of brevity, we will refer to from now on with his most characteristic title, Son of Man. This figure is said to have been created[34] before the beginning of time (*1 En.* 48:3), and it is said that he knows all the secrets of righteousness (49:2). Furthermore, it is his task to carry out the last judgment.

It is clear that there is a tendency to attribute these super-human figures with ever-higher nature and with more and more vast functions. From Elijah who will return to the earth to bring peace between fathers and sons, to the angel Melchizedek who will cause the Jews to repent and pave the way for their return to their homeland, the ascending line is clear. The Son of Man is certainly the last of this super-human series in chronological terms, but he cannot be placed later than the first century C.E., because the figure is then appropriated by the Gnostics, and there is not a trace of gnosis in *BP*. The activity of the super-human figures as intermediaries between God and the humans reaches its apex and then disappears during the first century C.E.[35]

Remaining, then, within the proposed limits for the work's date (*terminus a quo* 40 B.C.E., *terminus ad quem* 70 C.E.), it seems worthy of note that in the Gospel of Mark, the oldest of the four, Mark speaks of the Son of Man as a well-known figure. He identifies Jesus with the Son of Man without explaining just who that is. This means that Mark knew who it was, and that he was addressing a group of readers that knew who he was, as well. For Mark this identification of Jesus with the Son of Man is so important that he places it at the very beginning of his book. Let us reread Mark 2:1–12 which narrates the miracle of the paralytic, and especially verses 9–11: "Which is easier, to say to the paralytic 'Your sins are forgiven' or to say 'Rise, take up your pallet and walk'? But that you may know that the *Son of Man* has authority *on earth* to forgive sins…*I* say to you, 'rise, take up your pallet and go home.'" In order to explain his powers and his authority, Jesus declares at least to have the same authority as the Son of Man, if not actually to be the Son of Man. Therefore, in Jesus' day the expression "Son of Man" must have been well known, just as the words "prophet" and "messiah." The only thing that he explains to his listeners is that the Son of Man's powers are valid on earth as well. The structure of Mark's discourse clearly assumes knowledge of the expression "Son of Man" both on Mark's part and on that of the listeners.[36]

---

[33] On the figure of Melchizedek at Qumran, cf. Émile Puech, "Notes sur le manuscrit 11QMelkîsédeq," *RevQ* 12 (1987): 483–513 (fragment dated to mid-first century B.C.E.). On the figure of Melchizedek commonly interpreted as an archangel, or something similar, cf. Claudio Gianotto, *Melchisedek e la sua tipologia* (Brescia: Paideia, 1984), 70–74; Angelo Vivian, "I movimenti che si oppongono al Tempio: il problema del sacerdozio di Melchisedeq," *Henoch* 14 (1992): 97–112. The interpretation of the Qumranic Melchizedek as an angel figure has been contested by Franco Manzi, *Melchisedek e l'angelologia nell' Epistola agli Ebrei e a Qumran* (Rome: Pontificio Ist. Biblico, 1997), who would treat Melchizedek simply be an appellative of God.

[34] The word "created" does not exist in the text. The stars and the world were created; as far as the Son of Man is concerned, in Isaac's English translation the text reads: "That Son of Man was given a name…before the Lord of the Spirits" (*1 En.* 48: 2–3). It is a literal translation of *lipnê* from the Hebrew: *lipnê* in Qumran Hebrew could mean "by." This leads us to believe that he is a creature, even though created in a different way than the rest of the world. On the meaning of *lipnê* as "by" after a passive verb in the Hebrew of the time, cf. Jean Carmignac, "Le complément d'agent après un verbe passif dans l'hébreux et l'araméen de Qumran," *RevQ* 9 (1978): 409–28. Cf. also Collins, "The Son of Man", 454–55.

[35] See the *excursus* on the Son of Man in Chialà, *Parabole di Enoc*, 303–40.

Some may object that Mark and his readers had the Son of Man of the book of Daniel in mind, interpreted as an existing figure rather than a metaphor. At any rate, whichever interpretation we choose Mark's narration clearly sees the Son of Man as judge and, therefore, with the power to forgive, while in Daniel the Son of Man presents himself to the Ancient of Days only after the judgment. This can be found only in *BP*. The *Book of Parable* is an intermediate step between Daniel and Mark, or rather, between Daniel and Jesus. For Mark, Daniel was the scriptural point of reference for legitimizing the Son of Man. Mark puts the following words in Jesus' mouth when presenting himself to the High Priest: "You will see the Son of Man sitting at the right hand of power, and coming with 'the clouds of heaven'" (Mark 14:62). The expression, "with the clouds of heaven," is a quote from Daniel 7:13. Even the very ease with which *BP* was interpreted as a Christian text shows that Jesus/Son of Man is more similar to the Son of Man in *BP* than to the one in Daniel.[37]

---

[36] Conviction that the concept of Son of Man was a wide-spread apocalyptic concept can also be found in Norman Perrin, *A Modern Pilgrimage in New Testament Christology* (Philadelphia, Fortress, 1974).

[37] The text of Daniel 7:13–14 presents "one like a Son of Man coming with the clouds of heaven…to the Ancient of Days" who gave him "dominion and glory and kingship" over all peoples. The function of last judge can be derived from this powerful figure, but this particular element is lacking in Daniel. There is, however, a far from banal difference between the text of Daniel and that of Mark: Daniel says "one like a Son of Man," while Mark says "the Son of Man." For Mark the Son of Man is

Passing from the Gospel of Mark to the Gospel of John we find that the situation has changed. John knows who the Son of Man is, but he uses the label much less often. Not only that, but he also feels the need to explain the relationship between Jesus and the Son of Man with his functions, a sign that the autonomous existence of the figure of the Son of Man was disappearing, or had already disappeared from the Jewish imagination. It was certainly disappearing or had disappeared from John's intended audience. Thus John explicates why Jesus has the power to judge: "As the Father has life in himself, so he has granted the Son also to have life in himself, and has given him authority to execute judgment, because he is the Son of Man" (John 5:26–27).

This leads us to believe that within the church the title "Son of Man" was already falling into disuse toward the end of the first century. Besides, for the church Jesus was the Messiah, though he had called himself with the title or appellative Son of Man. On the contrary, the role as judge in the last judgment was well known during the period when Mark was writing and, given the abundance of documentation, it is natural to believe that Jesus actually did refer to himself with this title or appellative. This does not necessarily mean that *BP* existed before Jesus, but it is beyond doubt that the figure of the Son of Man as a real judge figure already existed, because the people already knew it. Furthermore, the numerous literary parallels between *BP* and the New Testament indicated by Charles and taken up again by Sacchi[38] explain the influence of *BP* on the Synoptic Gospels much better than a supposed influence in the opposite direction. It is more likely that an early Christian, who was a converted Jew, knew a Jewish book, than that an author who had not become Christian had read the New Testament, this without taking into account the fact that *BP* would have to be given an excessively late date.

Already in the writings of Paul some literary comparisons with *BP* are noteworthy, beginning with the letter to the Thessalonians, considered to be the oldest text in the New Testament (50–51 C.E.), where there is a parallel between 5:3 and *1 En.* 62:4.[39] In the first letter to the Corinthians there is a parallel between 6:11 and *1 En.* 48:7.[40] Other parallels have

---

clearly a person. Cf. Slater, "One Like a Son of Man." His argumentation, which does not include the New Testament, is valid.

[38] Sacchi, ibid., 1:425–29.

[39] 1 Thess 5:3: "…then sudden destruction will come upon them as travail comes upon a woman with child, and there will be no escape"; *1 En.* 62:4: "The pain shall come upon them as on a woman in travail with birth pangs."

[40] 1 Cor 6:11: "you were justified in the name of the Lord Jesus Christ and in the Spirit of our God"; *1 En.* 48:7: "they will be saved in his name." "His" may be referred to the Son of Man, but it is possible that it is related to God Himself.

been pointed out between *1 Enoch* and the pseudo-Pauline epistle to the Ephesians (1:9 and *1 En.* 49:4).[41] While taken one by one these literary affinities could be explained in terms of derivations from the style of the day; taken together the very number (around 50) is too high to be attributed simply to chance.

Another argument in favor of a high dating for *BP* is the use the author makes of the *Book of Noah*, which he quotes at length. Only a few fragments of the *Book of Noah* survived at Qumran. It is a book that disappeared completely later and its use is therefore more easily explained as being by an author writing in an early period. This argument, of course, does not lead to any precise date, but it does lead us toward a rather early date.

The absence of *BP* from Qumran, however, remains to be explained. Until now, I have followed a line of thought as though the absence of *BP* from the Qumran library were a chance event. That hypothesis would be valid, as I have said, only if we cannot find any valid explanation for the phenomenon.

Our problem, though, interferes with another one that places the absence of *BP* from Qumran in a different light. It has been pointed out that all of the oldest pseudepigrapha are present at Qumran, but beginning with the *Epistle of Enoch*,[42] whose definitive form may be dated to the first half of the first century B.C.E.; no later pseudepigraphic texts are documented. The problem, then, is no longer why *BP* was not at Qumran, but why all of the Pseudepigrapha, beginning with the definitive form of the *Epistle of Enoch*, are missing.

The "Groningen hypothesis"[43] and the "Enochic-Essene hypothesis"[44] have provided an answer. The Qumranites broke away from Enochism when the Qumranites accentuated their predeterminism. The later stratum of the *Epistle of Enoch*, in fact, insists on the freedom of choice and the full responsibility of the humans for sin (*1 En.* 98:4). From this point on, far from being a similar movement the Enochians became a markedly different and opposing movement with regard to the Qumranic one. The clearly deterministic passages from the Community Rule, in fact, belong to its latest stratum.[45]

---

[41] Eph 1:9: "He has made known to us in all wisdom and insight the mystery of His will, according to His purpose which He set forth in Christ as a plan for the fullness of time." In *1 En.* 48:6 we read, "For this purpose he became the Chosen One…And he has revealed the wisdom of the Lord of the Spirits to the righteous and the holy ones." Both Fusella and Chialà invert subject and object, having Wisdom reveal him.

[42] Cf. Gabriele Boccaccini, *Beyond the Essene Hypothesis: The Parting of the Ways between Qumran and Enochic Judaism* (Grand Rapids, Eerdmans 1998), 104–13.

[43] Cf. Florentino García Martínez, "Origins and Early History; A Groningen Hypothesis," *FO* 25 (1988): 113–36 and idem, "A 'Groningen Hypothesis of Qumran Origins and Early History," *RevQ* 14 (1990): 522–41.

[44] Gabriele Boccaccini, "E se l'essenismo fosse un movimento enochiano? Una nuova ipotesi circa i rapporti tra Qumran e gli esseni," *RStB* 9, no. 2 (1997): 49–67, text of a paper read in 1995 at the Congress of the "Associazione Biblica Italiana." See also Boccaccini, *Beyond the Essene Hypothesis*. Cf. also Paolo Sacchi, "Qumran e Gesù," *RStB* 9 (1997): 99–116; and Chialà, *Parabole di Enoc*.

Another motive explaining the rift between Enochism and Qumran Essenism can be added. While the Enochians found a reason for distancing themselves from the Qumranites in following their own tradition, which had never denied human freedom of choice, the Qumranites too had a reason for distinguishing themselves from the Enochians, because the latter were losing the concept of impurity, and especially the concept of the impurity of sin. It is not a random event that after the *Book of Watchers*, impurity lost more and more of its importance in the Enochic movement. Impurity is a fundamental concept in the *Book of Watchers*, the oldest known Enochic work, and it is always linked to sin–in some way it is the root of sin. The impure is not equal to sin, but, inasmuch as it weakens the humans, in accordance with an archaic conception of impurity, it opens them up to sin.

In the Enochic *Book of Dream Visions* (of sure date, around 160 B.C.E.) the only mention made of impurity refers to its negative influence on the humans, in the sense that it keeps them from receiving great revelations. At the beginning of the book (*1 En.* 83:2 and 85:3) the author emphasizes that Enoch had his visions before marrying. In this case impurity would have the sense it had in Zadokitism. This is not much. Even when it tells of the fall of angels, the author makes no reference at all to the contamination of human nature. In 84:4 he writes: "The angels of your heavens sin and your wrath shall fall on the flesh of men until the great day of Judgment." There is no intermediate term between the sin of the angels and the ruin of humankind: the author has left out the impurity provoked by the angels' sin.

---

[45] See, for example, the so-called doctrine of the Two Spirits as it is exposed in the *Rule of the Community* 3.15 and the following verses: "From the God of knowledge comes all that is occurring and shall occur. Before men come into being, He has established all their designs; when they come into existence in their fixed times they carry through their task according to His glorious design. Nothing can be changed. In His hand is the rule of all things. And He is one who sustains them in all their affairs. He created the humans for the dominion of the world, and designed for them two spirits in which to walk until the appointed time for His visitation, namely the spirits of truth and deceit (i.e., of good and evil). In a spring of light emanates the nature of truth and from a well of darkness emerges the nature of deceit. In the hands of the Prince of Light is the dominion of all the sons of Righteousness; in the ways of Light they walk; but in the hands of the angel of Darkness is the dominion of the sons of deceit; and in the ways of Darkness they walk....He created the spirits of Light and Darkness, and He founded every work upon them." Regarding the stratification of the *Rule of the Community*, see Jerome Murphy-O'Connor, "La genèse littéraire de la Règle de la Communauté," *RB* 76 (1969): 528–49; Jean Pouilly, *La Règle de la Communauté de Qumrân; Son évolution littéraire* (Paris: Gabalda, 1976); Piera Arata Mantovani, "La stratificazione letteraria della Regola della Comunità di Qumran: a proposito di uno studio recente," *Henoch* 5 (1983): 69–91.

In the oldest part of the *Epistle of Enoch* (later than the *Book of Dream Visions*, but still in the second century B.C.E.), impurity is mentioned only in *1 En.* 91:7. Its roots lie in human behavior, because there are no angels who sin. The author says: "If rebellion, sin and impurity grow (obviously among men and due to their guilt) there shall be great punishment." Impurity is placed in the third position as a final consequence of rebellion, which elicits sin, which in turn elicits impurity. It is therefore the opposite of the conception present in the *Book of Watchers* where impurity was caused by the angelic sin, the principal cause of sin among the humans. However, the prophetic theme of the discourse on the ten historical eons can justify the author's lack of interest in this specific theme.

If, however, we move to the part added in the first century B.C.E., omission of the "impure" cannot be accidental, given the parenetic nature of the discourse. Suspicion that at least in the most recent part of the *Epistle of Enoch* impurity is not important, not only exists, but is very strong. Evil coincides with violence and oppression of the weak (see *1 En.* 96:4, 5, 7; 97:8; 98:11, 12; 99:11–13), which was to become a central motif in *BP*. In its first-century B.C.E. reelaboration, the *Epistle of Enoch* becomes strongly anti-Qumranic inasmuch as it defends the idea of human responsibility in sin (*1 En.* 98:4).[46] If we bear in mind that impurity coincided with sin for the Qumranites, and for this reason existed before the individual, the *Epistle of Enoch's* lack of interest in impurity can easily be understood in terms of an intention to polemicize with those Enochians who were withdrawing from the world, the ones we have referred to as Qumranites. In rejecting the idea that impurity/sin exists before the individual, the author found himself rejecting the existence of impurity or, at least, its value.

At this point the problem of the relationship between Enochism and Mosaic Law, a theme I addressed at the Congress of the "Associazione

---

[46] "I have sworn unto you, sinners: In the same manner that a mountain has never turned into a servant, nor shall a hill ever become a maidservant of a woman; likewise, neither has sin been exported into the world. It is the people who have themselves invented it. And they who commit it shall come under a great curse" (trans. E. Isaac, *OTP* 1:78).

Biblica Italiana" (Rocca di Papa, September 1997[47]), presents itself. Not only is Mosaic Law not mentioned in the *Book of Watchers*, but the *Book of Dream Visions* even tells us that on Mount Sinai Moses only received the revelation of the house of God, that is, the tabernacle and–the metaphor aside–the Temple (*1 En.* 89:36). *BP* never mentions the Law, not even in reference to behavior or judgment; *BP* only speaks of righteousness. It would seem, therefore, that while the Enochians had their reasons for distancing themselves from the Qumranites, because unlike the latter they still believed in human freedom of choice, the Qumranites, too, had good reason to break away from the Enochians; the Qumranites accepted Mosaic Law, even though in an enlarged form, integrated with their own rules of behavior, their *mishpatim.*

In *BP* there is no mention at all of impurity, nor is mention made of Mosaic Law. Sin is a result of violence, and the identification between the two is especially strong when the violence is perpetrated against the weak. The true sinners are only "those who possess the earth." The humans are responsible for their sins, as stated forcefully in the most recent stratum of the *Epistle of Enoch* (*1 En.* 98:4), but salvation cannot come through the humans' justice. It can only come through divine forgiveness, if the humans humbly recognize their sins. Only "those who possess the earth," to be identified with those who hold any form of power according to the current view,[48] are excluded from this possibility. Even in a list of attitudes in singing God's praises there is no word corresponding to "purity" (*1 En.* 61:11); the list includes the spirits of trust, wisdom, patience, mercy, righteousness, peace, and goodness. If there is anything uniting *BP* with the rest of the previous Enochic tradition it is the idea that evil is in some way the result of an angelic sin, but here it is identified with having revealed heavenly knowledge, which should have remained exclusively in the hands of the angels (*1 En.* 65:6–8). Even the art of writing is condemned as a heavenly secret that should have remained such (*1 En.* 69:8–11). Sin is the consequence of the teachings of evil angels; it is not the consequence of an angelic contamination.

Even in the oldest stratum of *Slavonic Enoch* or *2 Enoch* (the so-called Recension B: around mid-first century C.E.), impurity is not given importance; evil is represented by violence, good by love, and these representations extend even to the animals.

---

[47] Paolo Sacchi, "Gesù davanti all'impuro e alla Legge," *RStB* 11 (1999): 43–64.

[48] For a different interpretation, see Chialà, *Parabole di Enoc*, who maintains that the different expressions indicating the wicked, like "those who possess the earth," "powerful," "kings," etc. are only metaphors to indicate the powers existing between Heaven and earth, i.e., the angels (293–301). Isaac, on the contrary, narrows the meaning of this type of expression to a group of powerful people, the "landowners."

SUMMARY

Recapitulating, the arguments considered in assigning a date to *BP* are the following:

1. The period in which the Jewish religion in its various sects developed the belief in a superhuman figure is that running from the final addition to the book of Malachi to the Gospel of John and the contemporary *Syriac Apocalypse of Baruch.* As far as the figure of the Son of Man is explicitly concerned, it is in decline in the Gospel of John and absent from Revelation. It is absolutely impossible to go beyond this span of time. The ascending trend running from the human figures, who did not die, as Elijah and Enoch, to angelic figures, as the heavenly Melchizedek and the Son of Man is noteworthy. In the *Syriac Apocalypse of Baruch* the function of the heavenly Messiah is limited and in the contemporary *Fourth Book of Esdras* the Messiah returns to being a man, albeit an exceptional man, whose destiny is that of preparing history for the last judgment.
2. The absence of *BP* from Qumran is important; it indicates that the work must be dated after the schism within the Enochic current, which occurred roughly in the mid-second century B.C.E.
3. Mention of the Parthian invasion, seen as the beginning of a civil war, fits the situation in 40 B.C.E. well and constitutes the *terminus a quo.*
4. The horror expressed in reference to this invasion seems to indicate that the author witnessed it first-hand and excludes the possibility that the author had also known the destruction of Jerusalem in 70 C.E., which was a much more grave event. Thus, a date fairly close to 40 B.C.E. seems obligatory.
5. Since for Mark, the author of the oldest Gospel, the Son of Man, understood as a real and autonomous figure, was a well-known phrase that needed no explanation, this means that the concept must have been already well known. Since Jesus, in speaking of his power to forgive sins, refers to the figure of the Son of Man understood as the judge of the Last Judgment, the idea of the Son of Man as judge of the Last Judgment must antedate Jesus. However, the belief in the existence of the Son of Man, as he is presented in *BP*, is not necessarily tied to the existence of *BP*; it could have already existed at the time of the book's writing. *BP*'s text demonstrates the existence of the concept of the Son of Man; but we cannot infer from this that this form of the Son of Man was created by the book's author.
6. *BP* was known to at least one Christian writer during the first centuries of the Common Era. While it is true that there are no quotations from the book, Tertullian's text clearly demonstrates that he knew it. It is also interesting that he does not mention the Son of Man; the title had been abandoned and apparently was held to be dangerous.

CONCLUSION

In accordance with recent trends in the research, I believe that *BP* was most probably written around the year 30 B.C.E., and at any rate not more than a generation after that date. This makes *BP* particularly important for research concerning Jesus' understanding of himself, and confirms the reading of the Gospels without having to fall back on strange and contrasting interpretations as to why Jesus would refer to himself as the Son of Man. It also obviously poses a theological problem regarding the relationship between the angelic figure of the Son of Man and the historical figure of Jesus. The fact that Jesus attributes to himself powers and functions of the Son of Man, as they appear in *BP*, does not mean that he identifies himself with that figure *sic et simpliciter*: it is a fact that the New Testament always refers to Daniel and never explicitly quotes *BP* in reference to the Son of Man. In other words, even though the theology of *BP* had an influence on the New Testament, the authors of the New Testament did not consider *BP* to be scripture, nor an adequate support for justifying Jesus' view of himself, who always refers to the Son of Man in Daniel and not to that of *BP*.

CHAPTER NINETEEN

THE DEAD SEA SCROLLS AND THE MEAL FORMULA IN *JOSEPH AND ASENETH*: FROM QUMRAN FEVER TO QUMRAN LIGHT

Randall D. Chesnutt

As important for the study of early Judaism as the previously unknown texts recovered from the Judean Desert over the last fifty years is the reexamination of long-known texts in the light of those new discoveries. That all early Jewish literature should be scrutinized afresh in view of the startling finds at Qumran is natural and appropriate. Extensive primary sources in Hebrew and Aramaic which are clearly Jewish, Palestinian, from the Second Temple period, and unedited after that period, cannot help but illuminate our other sources, so many of which are extant only in late and heavily edited forms and are of uncertain date, provenance, original language, and even Jewishness. Nor is the potential illumination confined to the broad ideological landscape of these writings or even to specific language, ideas, genres, and practices for which Qumran provides parallels. For several works traditionally classified as Old Testament Apocrypha and Pseudepigrapha, the significance of the scrolls is much more direct: fragments of Tobit, the Wisdom of Jesus ben Sirach, the Letter of Jeremiah, four of the five works that comprise *1 Enoch, Jubilees*, something akin to some of the *Testaments of the Twelve Patriarchs*, and three of the five apocryphal Psalms of David have all been found at Qumran, in some cases prompting major reconsideration of the work's compositional history and interpretation. The impact of the scrolls on the study of these and many other early Jewish and Christian texts has been truly–and rightfully–revolutionary.

At the same time, the desire to explain the relationship between the Qumran community and other groups, individuals, and texts from antiquity has given rise to many speculative and sensational claims. Most notorious are the fanciful theories that link Qumran *dramatis personae* with familiar New Testament figures. B. E. Thiering's identification of John the Baptist as the Teacher of Righteousness (the founder and early leader of the Qumran community) and Jesus as the Wicked Priest (the archenemy of the Qumran group),[1] and R. H. Eisenman's contention that James, the brother of Jesus, is the Qumran Teacher of Righteousness and the author of at least one of the Qumran documents (4Q394-399 = 4QMMT, *Some Works of the Torah*), and that the apostle Paul is the hated adversary whom the scrolls call the Man of Lies,[2] are only two examples. Not as widely publicized in popular media, but quite influential in scholarly circles, are the proposed links between various works of the Old Testament Pseudepigrapha and the community that preserved the Dead Sea Scrolls. In addition to the pseudepigraphical works actually represented among the Qumran manuscripts, the following have been frequently alleged to have close ties with the Qumran sect: the *Testament of Abraham*,[3] the *Martyrdom and Ascension of Isaiah*,[4] the *Testament of Job*,[5] Pseudo-Philo's *Liber*

Antiquitatum Biblicarum,[6] the *Psalms of Solomon*,[7] the *Odes of Solomon*,[8] the Similitudes of Enoch (*1 Enoch* 37–71),[9] and *Joseph and Aseneth*.[10] Although such connections are entirely possible and must be evaluated on a case-by-case basis, the number and nature of the proposals suggest that an infectious "Qumran fever" has sometimes impaired scholarly judgment, blurred the distinction between similarities and actual connections, and predisposed some to find traces of Qumran in every nook and cranny of Judaism and early Christianity. This fever raged most intensely in the first two decades after the initial Qumran discoveries, but intermittent outbreaks have continued down to the present. Our current challenge is to bring legitimate light from the Dead Sea Scrolls to bear on our other sources without falling victim to the Qumran fever that has beset so many.

The purpose of the present study is to assess the impact of the Dead Sea Scrolls on the interpretation of one early Jewish text, the apocryphal

romance commonly called *Joseph and Aseneth.*[11] We shall first consider the claims of a direct connection–claims that exhibit symptoms of the Qumran fever described above. Then we shall offer a new proposal on how the scrolls, used responsibly in conjunction with other ancient Jewish sources, elucidate one difficult aspect of *Joseph and Aseneth* once the Qumran fever has subsided and is replaced by a more circumspect method.[12]

---

[11] In this study *Joseph and Aseneth* is assumed to be a Jewish work dating between the early first century B.C.E. and the early second century C.E. The Greek text employed is that reconstructed by C. Burchard and published, among other places, in Christoph Burchard, "Ein vorläufiger griechischer Text von Joseph und Aseneth," *Gesammelte Studien zu Joseph und Aseneth: Berichtigt und ergänzt Herausgegeben mit Unterstützung von Carsten Burfeind* (ed. C. Burchard; SVTP 13; Leiden: Brill, 1996), 161–209; and now, at long last, in an *editio critica maior*: Christoph Burchard, assisted by Carsten Burfeind and Uta B. Fink, *Joseph und Aseneth kritisch herausgegeben* (PVTG 5; Leiden: Brill, 2003). On the priority of this version over the short recension edited by Marc Philonenko (*Joseph et Aséneth: Introduction, text critique, traduction et notes* [StPB 13; Leiden: Brill, 1968]), see Christoph Burchard, "Zum Text von 'Joseph und Aseneth,'" *JSJ* 1 (1970): 3–34; and more recently idem, "The Text of Joseph and Aseneth Reconsidered," *JSP*, in press. My assumptions here represent what were consensus views until quite recently (see the chapter on "The Present State of Research" in my *From Death to Life: Conversion in Joseph and Aseneth* [JSPSup16; Sheffield: Sheffield Academic Press, 1995], 65–93), but there are now dissenting opinions. Recent arguments for the priority of the short version (Angela Standhartinger, *Das Frauenbild im Judentum der hellenistischen Zeit: Ein Beitrag anhand von "Joseph und Aseneth"* [AGAJU 26; Leiden: Brill, 1995]; and Ross S. Kraemer, *When Aseneth Met Joseph: A Late Antique Tale of the Biblical Patriarch and His Egyptian Wife, Reconsidered* [New York: Oxford University Press, 1998]) show that the text-critical issue is more complex than is sometimes supposed and that scholars have erred in pursuing the elusive "original" to the neglect of the various redactors and settings evidenced by the various text forms; but they do not, in my judgment, overturn Burchard's strong case for the priority of the longer text. I also remain convinced of the Jewish (i.e., non-Christian) character of the work, *pace* Kraemer's recent contention that it is at least as likely to be Christian as Jewish. See on this John J. Collins, "Joseph and Aseneth: Jewish or Christian?" *JSP*, in press. The present study both assumes the Jewish character of the work and makes a modest contribution in support of this view.

[12] The group that inhabited Khirbet Qumran and left behind the so-called Dead Sea Scrolls is here assumed to have been Essene or at least very closely akin to the Essenes known to us from Philo, Pliny, and Josephus. Although the Essene character of the sect and the scrolls can no longer be affirmed in the unqualified and unreflective way that it once was, a cautious form of the Essene theory still seems to me far superior to alternative views. Of course, the Qumran sect must not be supposed to have been coextensive with, or even typical of, Essenism. We must allow for both local variation and considerable change over time. For purposes of this study, it is not necessary to decide whether works of disputed sectarian character, such as the *Temple Scroll*, were composed at Qumran or only used there.

QUMRAN FEVER

In the early days after the dramatic discoveries of 1947, three factors converged to draw *Joseph and Aseneth* into the Qumran orbit and create an atmosphere conducive to Qumran fever. First, *Joseph and Aseneth*'s Essene affinities had been suspected long before 1947. As early as 1902, K. Kohler discerned "indisputable elements of Essene lore" in Aseneth's penitential prayer and in Levi's disclosure of heavenly secrets,[13] and in 1922, P. Riessler argued for the Essene origins of the work on the basis of such parallels as the white clothing, prayer toward the sun, the exaltation of virginity, and the sacred meal.[14] Naturally these early views commanded a fresh hearing in the aftermath of the initial Qumran discoveries. Second, in a seminal article in 1952, G. D. Kilpatrick introduced *Joseph and Aseneth* into the study of Christian origins. Kilpatrick suggested that the apocryphon's bread-cup-ointment formula reflects a religious meal distinct from Passover but closely related to the Last Supper, and speculated that a comparable sacred meal would turn up in the recently discovered Dead Sea Scrolls.[15] Third, a major topic in early studies of the Dead Sea Scrolls and Christian origins was precisely the topic wherein Kilpatrick had proposed a connection between *Joseph and Aseneth* and Christianity–the sacred meal of the bread and cup.[16] The stage was therefore set for *Joseph and Aseneth* and the Dead Sea Scrolls to be studied in close connection with each other, first with regard to the sacred meal and then, inevitably, on other matters as well.

What Kilpatrick could only imagine became a reality in a 1957 article by K. G. Kuhn.[17] In exploring the Lord's Supper in the light of Qumran practice, Kuhn suggested that the sacred meal in *Joseph and Aseneth* and the Essene cult meal are so similar that "a connection between the two must be postulated" and, indeed, that this connection is "decisive" for understanding *Joseph and Aseneth*'s meal formula.[18] However, the connection is indirect; the more immediate ties are with the sacred meal of the Therapeutae, "an Egyptian offshoot of the Palestinian Order of the Essenes."[19] Unlike the Essene meal, but like that in *Joseph and Aseneth*, the Therapeutic meal included women and was explicitly sacramental. Thus, in Kuhn's view the Therapeutae provide the connecting link: "their cult meal, and thereby also the meal in *Joseph and Aseneth*, is related to that of the Essenes."[20]

[15] George D. Kilpatrick, "The Last Supper," *ExpTim* 64 (1952): 4–8.

[16] E.g., see Karl G. Kuhn, "Über den ursprünglichen Sinn des Abendmahles un sein Verhältnis zu den Gemeinschaftmahlen der Sektenschrift," *EvT* 10 (1950–51): 508–27.

[17] Karl G. Kuhn, "The Lord's Supper and the Communal Meal at Qumran," in *The Scrolls and the New Testament* (ed. K. Stendahl; New York: Harper and Brothers, 1957), 65–93. In an earlier version of this article (see the previous note), Kuhn had not included *Joseph and Aseneth*, but now, building on Kilpatrick's study, he not only includes it but has it figure quite prominently. See also Karl G. Kuhn, "Repas cultuel essénien et cène chrétienne," in *Les Manuscrits de la Mer Morte: Colloque de Strasbourg 25–27 mai 1955* (Paris: Presses Universitaires de France, 1957), 75–92.

The view that *Joseph and Aseneth* originated among the Therapeutae was developed by M. Delcor in 1962,[21] not only on the basis of the meal, but on other grounds as well. Some elements in the story, such as the white garments, the high estimation of virginity, and prayer toward the rising sun, he found consistent with either Essene or Therapeutic origins. However, like Kuhn, Delcor concluded that other features fit better with the Therapeutae. Thus the ablutions that were so central at Qumran but lacking in *Joseph and Aseneth* are also absent from Philo's description of the Therapeutae. The participation of women, the practice of fasting, and Aseneth's disposal of worldly possessions also find closer analogies among the Therapeutae. The romance is therefore closely related to the Qumran sect but has even stronger ties to its Egyptian Therapeutic counterpart.[22]

Few others in the 1950s and 1960s voiced support for an Essene or Therapeutic origin for *Joseph and Aseneth*.[23] The landmark monographs by C. Burchard (1965) and M. Philonenko (1968) rejected any sectarian affiliation,[24] and Qumran fever in the study of *Joseph and Aseneth* quickly abated. However, three recent studies have attempted to revive the Essene hypothesis. R. T. Beckwith bases his argument on calendrical concerns. Although *Joseph and Aseneth* does not reflect the 364-day calendar known from *1 Enoch*, *Jubilees*, and the Qumran texts, Beckwith suggests that it does presuppose "a relatively unknown adaptation of the 364-day calendar" in which the year begins on Thursday rather than Wednesday and all the dates are shifted back one day in the week in order to avoid having Jewish characters in the story travel on the Sabbath or feast days. Recognizing this pattern, Beckwith argues, clarifies the sacred meal in *Joseph and Aseneth*: if one assumes the proposed "adapted Essene calendar," the marriage festivities in chapter 21 coincide with the Essene festival of the Firstfruits of Wine, and therefore the meals at the Essene firstfruits festivals (including those of barley, wheat, and oil, as well as wine) provide the background for the formulaic references to bread, cup, and ointment.[25] J. C. O'Neill also argues for a Qumran connection, speculating that the sacred meal in *Joseph and Aseneth* is "the special new meal associated with entry into the Promised Land, a meal founded by Melchizedek and celebrated at Qumran" (Gen 14:18–20).[26] In a recent book that is among the most fanciful interpretations of the Dead Sea Scrolls to date, I. Sheres and A. K. Blau propose that Aseneth's tale originated at Qumran as a popular gloss on an exotic, secret ritual of artificial insemination and virginal conception that the sectarians practiced in order to procreate without the pollution of sexual intercourse. Indeed, the son born to the virgin Aseneth in *Joseph and Aseneth* is none other than the Qumran Teacher of Righteousness.[27]

[19] Ibid., 76.

[20] Ibid. "Therapeutae" is actually the masculine form, "Therapeutrides" the feminine. In this study "Therapeutae" is used generically to include—as the community described by Philo did—both men and women.

[21] Mathias Delcor, "Un roman d'amour d'origine thérapeute: Le Livre de Joseph et Asénath," *BLE* 63 (1962): 3–27.

[22] Ibid., 21–27.

[23] Wolfgang Nauck, *Die Tradition und der Charakter des ersten Johannesbriefs* (WUNT 3; Tübingen: Mohr Siebeck, 1957), 169–71, related the work closely to Qumran tradition, suggesting that Aseneth's prayer parallels the confession of sin in the initiatory ritual described in 1QS 1.24–25. Heinrich Schlier, *Der Brief an die Epheser: Ein Kommentar* (2d ed.; Düsseldorf: Patmos-Verlag, 1958), 275n4, maintained that while the text as we now have it is overlaid with a Christian-gnostic veneer, the underlying Jewish core derives from Essene circles in Egypt. Marc Philonenko, "Joseph und Asenath," *BHH* 2:889–90, declared the work unquestionably Therapeutic. See also idem, "Le Testament de Job et les Thérapeutes," 52. As noted below, Philonenko backed away from this claim in his later studies.

The bizarre and baseless speculation of the last view mentioned need not detain us here. Yet some assessment of the various alleged Qumran connections is in order before we venture to suggest new light from the Dead Sea Scrolls on *Joseph and Aseneth.* The overall evaluation of these proposals already implied by our placement of them under the heading "Qumran fever" can now be stated flatly: *Joseph and Aseneth* is not an Essene or Therapeutic writing, and theories affirming such connections rest on superficial and methodologically flawed comparisons. Similarities among the multiform communities and texts of early Judaism are inevitable and often illuminating but do not necessarily indicate a direct relationship.[28] What appears similar in form or language is not always similar in essence and function; differences, as well as similarities, must be given due weight.

---

[26] John C. O'Neill, "What is *Joseph and Aseneth* About?" *Henoch* 16 (1994): 194.

[27] Ita Sheres and Anne Kohn Blau, *The Truth about the Virgin: Sex and Ritual in the Dead Sea Scrolls* (New York: Continuum, 1995), 93–134, esp. 94–95, 113–14.

The meal formula in *Joseph and Aseneth* is both the most commonly cited point of contact with the Essenes and a classic example of the premature upgrading of similarities to direct connections. That the eating of blessed bread and drinking of a blessed cup constitute a definitive feature of Jewish identity in both in *Joseph and Aseneth* and the Qumran scrolls is clear. At Qumran the very stages of initiation are described in terms of the candidate's eligibility to come into contact with the sect's pure food (1QS 6.13–23). Offenders expelled from the community were thereby excluded from a ritual meal that was expressive of the central eschatological and messianic aspirations of the sect and that prepared one for the imminent end of days (1QS 7.18–21; 8.16–19; 1Q28a [= 1QSa] 2.11–22).[29] Josephus also recognized the solemnity and importance of the Essene meals (*J.W.* 2.8.5–8).

Joseph and Aseneth's meal formula likewise epitomizes Jewish identity. The participant enjoys life and immortality, whereas the diet of idolaters is defiling and damning (7:1; 8:5–7). To eat "blessed bread of life," drink a "blessed cup of immortality," and be anointed with "blessed ointment of incorruption" is to eat the same immortal food as that eaten by the angels of God in paradise (16:14–16). This exalted status approximates angelic existence[30] and therefore bears some similarity to the angelic sort of existence enjoyed by God's elect according to the Qumran scrolls.[31]

---

[28] Samuel Sandmel, "Parallelomania," *JBL* 81 (1962): 3, astutely notes: "it is the distinctive which is significant for identifying the particular, and not the broad areas in common with other Judaisms."

[29] This is not to equate the great messianic banquet of the days to come (1Q28a [= 1QSa] 2.11–22) with the communal meals described in 1QS 6.2–23. Nevertheless, the two have so much in common that the communal meals must be seen as integrally related to the eschatological expectations and the deep-seated messianic consciousness of the sect. See Geza Vermes, *The Dead Sea Scrolls: Qumran in Perspective* (Cleveland: Collins World, 1978), 182; and the more detailed discussions in Lawrence H. Schiffman, "Communal Meals at Qumran," *RevQ* 10 (1979): 45–56; idem, *Sectarian Law in the Dead Sea Scrolls: Courts, Testimony and the Penal Code* (BJS 33; Chico, CA: Scholars Press, 1983), 191–210; and idem, *The Eschatological Community of the Dead Sea Scrolls: A Study of the Rule of the Congregation* (SBLMS 38; Atlanta: Scholars Press, 1989), 53–67.

[30] On angelic existence as a soteriological conception in *Joseph and Aseneth*, see Chesnutt, *From Death to Life*, 143–45.

[31] See James H. Charlesworth, "The Portrayal of the Righteous as an Angel," in *Ideal Figures in Ancient Judaism: Profiles and Paradigms* (ed. J. J. Collins and G. W. E.

However, there is nothing here so distinctive as to suggest a direct connection. As we shall emphasize below, the solemnity of mealtime, the concern to avoid impure food, the pronouncing of blessings over meals, and the role of meal practices as consummate expressions of a whole way of life are characteristic of many Jewish circles in antiquity. Moreover, there are striking differences between the Qumran meals and the meal formula in *Joseph and Aseneth* that attenuate the alleged connections.

The two meal traditions are poles apart in terms of rules for eligibility and order. 1QS 6.2–5 specifies that wherever ten members of the sect reside they are to eat together, that they are to sit according to rank, and that a priest must be present to bless the first portion of bread and wine. According to 1QS 6.13–23, before one could even be admitted to the communal meals, he had to be examined by the community's Overseer (פקיד), instructed in the sect's teachings, approved by the plenary assembly ("the Many," הרבים), and examined yet again at the end of a one year novitiate. Only then was he granted provisional membership and admitted to the community's solid food (טוהרת הרבים). After another provisional year he was again examined by the Many, and, if voted suitable for full membership, assigned a rank and granted access to the sect's pure liquids (משקה הרבים) as well as the solid foods.[32] Anyone allowed to return after being banned from participation had to repeat the full progression of initiatory stages (1QS 7.18–21; 8.16–19).

Joseph and Aseneth knows nothing of such regimen. Aseneth is a beneficiary of the bread of life and cup of blessing immediately upon her renunciation of idols and penitent turning to the God of Israel, and this advancement and its heavenly confirmation occur independently of any contact with the Israelite community. The rigid system of seniority observed in the Qumran meals (1QS 5.23–24; 6.2, 8–11, 22; 1Q28a [= 1QSa]; Josephus, *J.W.* 2.8.10) clashes with *Joseph and Aseneth*'s emphasis on the privileged status of every "worshiper of God" (θεοσεβής); the anonymous author is concerned to distinguish between idolaters and "worshipers of God," but not to make distinctions among the latter (8:5–7;

Nickelsburg; SBLSCS 12; Chico, CA: Scholars Press, 1980), 135–36; and more recently Devorah Dimant, "Men as Angels: The Self-Image of the Qumran Community," in *Religion and Politics in the Ancient Near East, Studies and Texts in Jewish History and Culture* (ed. A. Berlin; Bethesda, MD: University of Maryland Press, 1996), 93–103; and Crispin H. T. Fletcher-Louis, *All the Glory of Adam: Liturgical Anthropology in the Dead Sea Scrolls* (*STDJ* 42; Leiden: Brill 2002).

[32] Variations in detail between this scheme and that described in CD 15.7–15 and Josephus *J.W.* 2.8.7 have been much discussed but do not affect the argument here. For a helpful critique of alternative interpretations of טהרה and משקה, see Schiffman, *Sectarian Law in the Dead Sea Scrolls*, 161–65.

21:1; 23:9–12; 28:5–7; 29:3).[33] The very emphasis on the parity between the convert to Judaism and the person who is born Jewish[34] contrasts sharply with the Qumran assessment of proselytes as inferior.[35] The priestly character of the Qumran sect that is exhibited in the priority of the priest at mealtime is absent from *Joseph and Aseneth*, where Levi is esteemed for his prophetic, not his priestly qualities (22:13; 23:8; 26:6; 28:15–17). Neither does the obsession with ritual purity that was such a hallmark of Qumran meal practice have any counterpart in *Joseph and Aseneth* other than the general concern shared by many Jews in the Hellenistic world to eat apart from gentiles (7:1; cf. 20:5 and 21:8) and to avoid food contaminated by idolatry (8:5). Ritual washings such as those practiced regularly at Qumran have no place in Aseneth's story.[36] Also absent from the latter are the sectarian outlook and monastic way of life reflected in the scrolls and the messianic and eschatological yearnings that were determinative for the Qumran sect and its communal meals. Such pronounced differences overshadow the superficial similarities that some have emphasized.

Alleged affinities based on similarities other than the sacred meal are likewise tenuous. The understanding of the human predicament at Qumran is fundamentally different from that in *Joseph and Aseneth* even if there is a profound consciousness of sin and appeal for forgiveness in both. Aseneth's predicament is conceived very specifically as a state of defilement and death resulting from the worship of idols instead of the true God; sin is simply non-acknowledgment of God, and the predicament of the godless is therefore alterable by human choice.[37] The Qumran concepts of the two spirits, rigid determinism, and utter depravity of humanity are all foreign to *Joseph and Aseneth.* Light-darkness dualism appears in Aseneth's prayers but is far less central than in the scrolls and lacks the predestinarian character of Qumran dualism (see especially 1QS 3.13–4.26). Death-to-life polarity also appears in Aseneth's conversion story (15.4–5; 16.16) as well as in the Qumran Hodayoth (1QH 3.19–23; 11.3–14) and Philo's description of the Therapeutae (*Contempl.* 13), but these various usages of familiar imagery share nothing distinctive. Certainly the mere presence of virtually universal antitheses such as light-darkness and death-life afford no evidence of close kinship.[38] The wearing of white garments by both Aseneth[39] and the candidates for Essene initiation described by Josephus (*J.W.* 2.8.3, 7) is a noteworthy similarity, but once again the phenomenon is too common in antiquity[40] to support a direct connection. Aseneth's white garment parallels that worn by Joseph (14:12–15; cf. 5:5) and functions to demonstrate that as a new convert she shares his exalted status.[41] This status approximates angelic existence and therefore does bear some similarity to the angelic status ascribed to God's elect in the Qumran scrolls. However, the portrayal of the righteous as angels is itself widely attested.[42] Again we are dealing with a concept shared by many Jews rather than with distinctive ideas indicating a direct relationship.

---

[33] This fact argues against a sectarian origin for the work, as is noted by John J. Collins, *Between Athens and Jerusalem: Jewish Identity in the Hellenistic Diaspora* (2d ed.; Grand Rapids: Eerdmans, 2000), 239; Nikolaus Walter, "Judisch-hellenistische Literatur vor Philo von Alexandrien (unter Ausschluss der Historiker)," *ANRW* 2.20.1 (1987): 105; and Chesnutt, *From Death to Life*, 215–16.

[34] In "The Social Setting and Purpose of Joseph and Aseneth," *JSP* 2 (1988): 21–48; and *From Death to Life*, 108–15, 256–65, I argue that this concern to elevate the status of converts is in fact one of the main purposes of *Joseph and Aseneth.*

[35] See 4Q174 (= 4QFlor) 1.4; 4Q169 (= 4QpNah) 2.9; CD 14.4–6; and the discussion in Joseph M. Baumgarten, "The Exclusion of *Netinim* and Proselytes in 4QFlorilegium," *RevQ* 8 (1972): 87–96; repr. with postscript in idem, *Studies in Qumran Law* (SJLA 24; Leiden: Brill, 1977), 75–87.

[36] In 14.12 Aseneth is told to wash her face and hands, but only because she is dirty from having lain in ashes and mud for a week. No purificatory significance is indicated, and certainly there is no washing of the whole body such as the Qumran sectarians practiced. Further undermining any ritual significance to washing in water is the fact that Aseneth later prepares to wash her face in pure water but decides not to do so lest she wash off her great beauty (18.8–10).

[37] See my discussion of the human predicament and the nature of salvation as conceived in *Joseph and Aseneth* in *From Death to Life*, 139–45.

O'Neill's claim that the special meal founded by Melchizedek and associated with entry into the Promised Land is the connecting link between Aseneth's meal and Qumran practice is mere speculation and leaves the problematic oil of anointing unexplained. Beckwith's case that calendrical concerns corroborate the Essene connection is likewise unconvincing. No such concerns are explicit in *Joseph and Aseneth*, and even the implicit pattern that Beckwith reconstructs from the scattered temporal references in the work does not correspond to the calendar attested at Qumran but only to a conjectural "adapted Essene calendar." Beckwith's proposed link between the meal language in *Joseph and Aseneth* and the Essene firstfruits festivals is also problematic. Even if one assumes the highly conjectural calendrical scheme upon which this proposed connection rests, only the marriage festivities in *Joseph and Aseneth* 21 are thereby associated with the festival of the Firstfruits of Wine; nothing suggests that the bread-cup-ointment formula should be related to the firstfruits festivals.

---

[38] See my discussion in *From Death to Life*, 145–49, 172–76, 180–81.

[39] The text is uncertain at this point. Burchard's edition has λινῆ, "linen," where the old edition by Pierre Batiffol (*Le Livre de la Prière d'Aseneth* [StPatr 1–2; Paris: Leroux, 1889–90]) has λευκή, "white, radiant." Philonenko's text reads λαμπρά, "bright, shining." In any case, that Aseneth's new garment is white can be deduced from the context in 14.12–15 and from the obvious parallel with Joseph's white tunic (5.5).

[40] See Wilhelm Michaelis, "λευκός, λευκαίνω," *TDNT* 4:241–50. To name only a few, the Therapeutae, Merkabah mystics, and devotees of the Isis cult all wore white garments. See my discussion in *From Death to Life*, 196, 211, 247–50.

[41] On the carefully crafted parallels between the portrayals of Aseneth and Joseph, and their function to show Aseneth's worthiness to be fully accepted into the Israelite community and married to the patriarch, see my *From Death to Life*, 109–11.

[42] Charlesworth, "The Portrayal of the Righteous as an Angel," 135–51; and Paul B. Decock, "Holy Ones, Sons of God, and the Transcendent Future of the Righteous and the New Testament," *Neot* 17 (1983): 70–82.

Many of our conclusions with regard to the alleged Essene character of *Joseph and Aseneth* also apply, *mutatis mutandis*, to the supposed Therapeutic affinities. Thus the conclusion that the meal formula and Aseneth's white garment fail to establish a link with the Essenes holds good also for the Therapeutae. *Joseph and Aseneth*'s concern to place the new convert on a par with the established members of the community of Israel stands in contrast to the ranking of members among both Essenes and Therapeutae (Philo *Contempl.* 3.30; 8.67). The absence of reference in *Joseph and Aseneth* to any private communal existence and ordered life of piety contrasts with the Therapeutae as well as with the Essenes.

Those points at which Delcor finds a Therapeutic connection to have some advantage over the Essene hypothesis are likewise tenuous. While it is true that the ritual washings regularly practiced at Qumran are lacking in both *Joseph and Aseneth* and Philo's description of the Therapeutae, this fact hardly provides any positive reason to link the latter two. Neither does the role of women among the Therapeutae parallel Aseneth's experiences. Therapeutic men and women worshiped in separate enclosures, ate separately, and remained celibate (*Contempl.* 3.32–33; 9.68–69). Most of the Therapeutrides, according to Philo, were "aged virgins, who have kept their chastity…of their own free will in their yearning for wisdom" (*Contempl.* 9.68).[43] In *Joseph and Aseneth*, on the other hand, marriage is considered normal (4:11; 8:5–7). The couple marries and has children (21:1–9). Their virginity prior to their marriage (1:4–6; 2:1; 4:7; 7:4–8; 8:1) is clearly not a lifelong disposition, but serves, in Joseph's case, to emphasize an ethic of abstinence before marriage and refusal of intimacy with non-Jews, and in Aseneth's case, as another of the many parallels with Joseph that demonstrate her suitability to marry him and to be received fully into the community of Israel. The Therapeutic premium placed on virginity is quite different.

The Therapeutic ideal of poverty is also quite foreign to *Joseph and Aseneth.* Philo reports that the Therapeutae relinquished all their worldly possessions to their families or friends in order to devote themselves to the contemplative life (*Contempl.* 2.13, 18). Aseneth, too, disposed of all her valuables, throwing especially her idols and the related paraphernalia out the window (10:10–13). However, this dramatic act serves to accentuate Aseneth's utter repudiation of idolatry and does not reflect any ideal of poverty and simplicity. Her elegant clothing and opulent feasting later in the story (18:5–6; 20:6; 21:8) stand in marked contrast to the ascetic lifestyle of the Therapeutae, who, according to Philo, wore only inexpensive clothing, ate only enough simple food to sustain life, and abstained from meat and wine (*Contempl.* 4.37–38; 9.73–74). Aseneth's fasting in connection with her initial penance in sackcloth and ashes is quite temporary and therefore scarcely comparable, *pace* Delcor, to the regular fasts observed by the Therapeutae (*Contempl.* 4.34–35).

---

[43] Quotations of Philo are from LCL.

Not only are the supposed parallels with the Therapeutae illusory, but fundamental differences render any close kinship highly improbable. *Joseph and Aseneth* knows nothing of the retreat from the bustle of life into the solitude of contemplation that is the hallmark of the Therapeutic sect described by Philo. On the contrary, the ethic fostered by the formula "it is not proper for the man (woman) who worships God to…" (8:5–7; 21:1; 23:9, 12; 29:3) and by other attempts to define the conduct befitting "those who worship God" (23:10; 28:5–7) presupposes life in the everyday world of ordinary social intercourse. Aseneth is not even a likely candidate for the kind of conversion envisioned in Philo's portrayal of the Therapeutae: whereas one left the hubbub and temptations of daily life to pursue the superior Therapeutic life of meditation and solitude, the disdainful Aseneth is secluded in her tower and not even subject to the vices and temptations of the outside world prior to her conversion.[44] Moreover, upon her conversion Aseneth enters no communal order devoted to bodily and spiritual healing, regimented discipline of praying, studying Scripture and philosophy, and composing and singing hymns and psalms—all of which were definitive of Therapeutic life as Philo describes it (*Contempl.* 1.2; 3.25–29).

The inevitable conclusion is that the persistent claims of kinship between *Joseph and Aseneth* and the Essenes or Therapeutae emanate more from Qumran fever than from compelling evidence. Neither the romance in general nor its meal formula in particular has anything more in common with either of these groups than is reasonable to expect from any two Jewish circles, and the differences are so pronounced as to preclude close kinship. *Joseph and Aseneth* is not an Essene or Therapeutic work.

---

[44] Burchard, *Untersuchungen zu Joseph und Aseneth*, 108–9.

QUMRAN LIGHT

The danger of Qumran fever should in no way curtail the quest for legitimate Qumran light on *Joseph and Aseneth.* To evince the potential of the Qumran scrolls to elucidate this non-Qumranic text, we return to the enigmatic phenomenon of the bread, cup, and ointment. In the long text edited by Burchard, this formulaic language appears six times: three times in the triad, "blessed bread of life…blessed cup of immortality …and blessed ointment of incorruption" (8:5; 15:5; 16:16); and three times in the dyad, "bread of life…and cup of blessing" (8:9; 19:5; 21:21).[45] Closely related is the mysterious honeycomb from which Aseneth eats at the command of her heavenly visitor in chapter 16.

Most interpreters have supposed that the meal language refers to some sort of ritual meal, and analogies have been drawn with the sacred meals not only of the Qumran sect and the Therapeutae, but also the mystical Judaism posited by E. R. Goodenough, the mystery religions (especially the Isis cult), and early Christianity.[46] Others have suggested that the reference is not to a ritual meal at all but to the everyday Jewish meal–which itself had a solemn religious character–and, by metonymy, to the entire life *more judaico.*[47] This latter view has much to commend it, and in fact I shall defend a form of it below. However, the admitted problem with this approach–and, to some degree, with all interpretations–is that oil of anointing seems out of place in a meal context.[48] In what follows I propose to address this problem by examining certain perceptions of oil in the Qumran scrolls and various other ancient Jewish sources and their relation to Jewish attitudes toward food and drink. I shall argue that these perceptions, which are widely attested in early Judaism and epitomized most succinctly in the talmudic ban on "the bread, wine, and oil of heathens," shed decisive light on the controversial triad in *Joseph and Aseneth.*

Before turning to the Dead Sea Scrolls and other comparative materials, it is important to consider the function of the meal formula in its context in *Joseph and Aseneth.* Having already learned in 7:1 that Joseph ate separately from his hosts and "would not eat with the Egyptians, for this was an abomination to him," in 8:5–7 we find Joseph's own pointed use of meal language to distinguish the "worshiper of God" (θεοσεβής) from the idolater and to support the former's separatism from the latter. Four antitheses express a fundamental dichotomy: the one blesses the living God, the other dead and dumb idols; the one eats blessed bread of life, the other bread of strangling from the table of idols; the one drinks a blessed cup of immortality, the other a cup of deceit from the libation of idols; the one is anointed with blessed ointment of incorruption, the other with the ointment of destruction. The contaminating effect of intimacy with idolaters, whose very diet makes them agents of corruption and death, posed a serious threat to the distinctive identity of God's people as conceived by this author. Stated positively, appropriate and properly blessed bread, cup, and ointment were considered central to and representative of the identity of those who worship God. In 21:13–14, 21 (not in Philonenko's text), Aseneth's former idolatrous existence and her current life as one of the people of God are once again condensed and expressed antithetically in terms of their respective food and drink.

---

[45] There are slight variations: the triadic form in 16.16 lacks the word "blessed," and the dyad in 21.21 has "cup of wisdom" instead of "cup of blessing." In the short recension edited by Philonenko, only three of the six appear: 8.5, 8.11 (= Burchard's 8.9), and 15.4 (= Burchard's 15.5).

[46] See the views surveyed in my history of research in *From Death to Life*, 20–64.

[47] See my survey in ibid., 20–64.

[48] Burchard, *Untersuchungen zu Joseph und Aseneth*, 28, describes the ointment as the principal *Störenfried*, or "trouble-maker," in all attempts to explain the meal formula.

If the meal formula was inspired by some Jewish ritual, it can hardly have been an initiatory ritual, because in 8:5 it is Joseph–not Aseneth–who is said to eat bread, drink a cup, and be anointed with ointment. Here the formula clearly refers to the continuing experience of those who worship God rather than to an initiatory act.[49] One further fact makes it unlikely that this language refers to a specific ritual at all: Aseneth never actually receives any bread, cup, or ointment anywhere in the narrative. Instead, she eats a piece of honeycomb and is then told by the man from heaven: "Behold, you have eaten bread of life, drunk a cup of immortality, and been anointed with ointment of incorruption" (16:16). This explicit equation of eating honey with eating bread, drinking a cup, and being anointed with ointment makes it unlikely that either half of the equation refers to a fixed ritual form.[50] Rather, both symbolize that participation in life and immortality which is the unique privilege of those who worship God. Similarly, in 19:5 (not in Philonenko's text), the transformed Aseneth identifies herself to Joseph and explains what has transpired in his absence in terms of her having eaten bread of life and drunk a cup of blessing, when in fact she has eaten no such bread and drunk no such cup anywhere in the narrative. Once again meal language–whether or not it echoes some special ritual–is used representatively to set

---

[49] So also Collins, *Between Athens and Jerusalem*, 233: "Since the eating, drinking, and anointing are predicated of Joseph as a pious man, they are evidently not, or at least not only, elements of an initiation ritual. Rather, they are the habitual practice of the pious."

[50] Gerhard Delling, "Die Kunst des Gestaltens in 'Joseph und Aseneth,'" *NovT* 26 (1984): 23.

Aseneth's newfound status as a suitable mate for Joseph apart from her polluted and polluting former state when Joseph, as a man of God, would have nothing to do with her (7:1).

The honeycomb scene is notoriously difficult, but at least something of its contribution to the function of chapters 14–17 within the larger narrative can be discerned. The "man from heaven" who visits Aseneth in these chapters provides heavenly confirmation of her conversion and describes the blessings that now accrue to her.[51] I have argued elsewhere that a major purpose of *Joseph and Aseneth* was to enhance the status of converts within a community deeply divided over the perception of converts and especially over the propriety of marriage between a convert and a born Jew.[52] By having Aseneth eat from the honeycomb, the author places her on a par with the Jew by birth, and indeed with the angels of God in paradise, who eat the same immortal food (16:14). The honey not only signifies manna[53] but was a widely known symbol of immortality in the ancient world.[54] Aseneth's eating of the honey and her full participation in the blessings of life and immortality symbolized thereby, all under the direction of God's chief angel, prove this convert worthy to be received fully into the community of Israel and to be married to the revered patriarch. Whether or not this correctly describes the social setting and purpose of *Joseph and Aseneth*, the explanation that "all the angels of God…and all the chosen ones of God and all the sons of the Most High" eat from the same honeycomb (16:14) again suggests a continual feeding of the people of God rather than a ritual of initiation. Moreover, the miraculous appearance and disappearance of the comb, the angel's strange marking of the comb, and the mysterious appearance and behavior of millions of colorfully clad bees make it unlikely that any repeatable ritual is reflected here at all. If such a ritual lies behind this enigmatic episode, its form and significance are no longer recoverable.

[51] Dieter Sänger, "Bekehrung und Exodus: Zum jüdischen Traditionshintergrund von 'Joseph und Aseneth,'" *JSJ* 10 (1979): 29–30; and idem, *Antikes Judentum und die Mysterien: Religiongeschichtliche Untersuchungen zu Joseph und Aseneth* (WUNT 2/5; Tübingen: Mohr Siebeck, 1980), 156–57, 182, makes the important point that this heavenly visit is neither the cause nor the occasion of Aseneth's conversion; rather, it functions to provide heavenly confirmation of a conversion that has already taken place and to articulate the benefits of belonging to the elect people of God.

[52] "The Social Setting," 21–48; and *From Death to Life*, 108–15, 256–65.

[53] Exodus 16:31 and various post-biblical sources indicate that the manna tasted like honey; see Josephus *Ant.* 3.1.6; *Sib. Or.* frag. 3.34–35, 46–49; and *Targums Neofiti, Pseudo-Jonathan*, and *Onqelos* on Exod 16:31. Aseneth's honey is reminiscent of the manna in Exodus 16 in other ways as well: both are compared to dew, and both are said to be white like snow or frost (Exod 16:13–14; Num 11:7–9; *Jos. Asen.* 16.8). Ps 78:25 (see also Wis 16:20; *L.A.B.* 19.5) calls the manna the "bread of angels," and *Jos. Asen.* 16.14 says that the angels of God eat from the life-giving honeycomb.

[54] The ancient practice of preserving corpses by encasing them in honey (Herodotus 1.198; Diodorus Siculus 15.93.6; Plutarch *Ages.* 40.3; Josephus *Ant.* 14.7.4; Lucretius *De Rerum Natura* 3.892; and *b. B. Bat.* 3b) evidences such associations. See further Marco Zecchi, "On the Offering of Honey in the Graeco-Roman Temples," *Aegyptus* 77 (1997): 71–83. Moyer Hubbard, "Honey for Aseneth: Interpreting a Religious Symbol," *JSP* 16 (1997): 97–110, argues that Aseneth's consumption of honey is also a symbol of her new birth. The practice of feeding honey to newborns was widespread, and *Epistle of Barnabas* 6.8–19 combines the same words for renewal used in *Jos. Asen.* 8.9 and 15 with a specific reference to eating honey in connection with conversion as a new creation/new birth. Honey also has a long history as an image of the word and wisdom of God (e.g., Pss 19:10; 119:103; Prov 24:13–14; Sir 24:19–20); see Karl-Gustav Sandelin, "A Wisdom Meal in the Romance of Joseph and Aseneth," in *Wisdom as Nourisher: A Study of an Old Testament Theme, Its Development Within Early Judaism, and Its Impact on Early Christianity* (ed. K.-G. Sandelin; Åbo: Åbo Akademie, 1986), 152–57. On the associations of honey in the Septuagint and a wide range of

Even if the formulaic triad is employed not for its ritual significance but to represent the entire Jewish way of life *vis-à-vis* a life of idolatry, it is significant that the particular acts chosen as representative are eating, drinking, and anointing. These three verbs express elemental human acts,[55] just as the recurrent biblical triad of "grain, wine, and oil" summarizes the staples of life.[56] The explicit concern in 7:1 to avoid the defiling table practices of foreigners, together with the genitival qualifiers attached to the three staple items–life, immortality, and incorruption for the people of God, and strangling, deceit, and destruction for the outsider–suggest that the proper use of these items, as distinct from their defiling use by others, provided a definitive boundary marker for the author's community.

That ancient Jewish meal practices often served as consummate expressions of a whole way of life is well known. G. Feeley-Harnik correctly observes:

> …food, articulated in terms of who eats what with whom under which circumstances, had long been one of the most important languages in which

---

other ancient sources as these bear on Aseneth's honeycomb, see Anathea Portier-Young, "Sweet Mercy Metropolis: Interpreting Aseneth's Honeycomb," *JSP*, in press.

[55] 2 Chr 28:15; *Apoc. Ab.* 9.7; *m. Ter.* 6.1; *t. Ter.* 7.1; and *b. Pesaḥ.* 31b–32a.

[56] For example, Deut 7:13; 11:14; 12:17; 14:23; 18:4; 28:51; 2 Chr 31:5; 32:8; Ezra 3:7; Neh 5:11; 10:39; 13:5; Jer 31:12; Hos 2:8, 22; Joel 2:19, 24; Hag 1:11; Ps 104:15; see also Jud 10:5; *Jub.* 13:26; 32:12; 1QH 10.24; *T. Jud.* 9:8; *Sib. Or.* 3.243, 745; Josephus *J.W.* 1.15.6; 7.8.4; Rev 6:6; and *Did.* 13:5–6. The Tosefta refers to "wine, oil, and fine flour" as "things upon which life depends" (ʿ*Abod. Zar.* 4.1–2). The *Temple Scroll*'s description of a firstfruits festival for oil and another for wine along with the biblical festivals celebrating the firstfruits of grain likewise attests to the recognition of these basic items as indispensable staples (11QTemple 19.11–23.9; see also 4Q251 (= 4QHalakah A) 5, frag. 2.

> Jews conceived and conducted social relations among human beings and between human beings and God.[57]

Meal practices served as "social differentials, delimiting the boundaries between the 'us' and the 'them.'"[58] M. Douglas' brilliant analysis of the social function of meals in general is pertinent to Jewish meals in particular:

> Each meal carries something of the meaning of the other meals; each meal is a structured social event which structures others in its own image.…it distinguishes order, bounds it, and separates it from disorder.[59]
>
> …whenever a people are aware of encroachment and danger, dietary rules controlling what goes into the body would serve as a vivid analogy of the corpus of their cultural categories at risk.[60]

Such an understanding of food and meal practices as boundary markers in early Judaism accords well with what we find in *Joseph and Aseneth.* Here the explicit concern to avoid defilement at table (7:1) and the repeated employment of three staple items to contrast the life-giving diet of the pious with the defiling food of idolaters suggest that meal practices were central to the self-identity of the community for which the work was written. However, as noted above, the inclusion of oil in the triad makes it difficult to suppose that the "meal formula" in *Joseph and Aseneth* is simply a reference to the everyday Jewish meal and a metonym for the Jewish way of life. Oil was used in a variety of ways in Jewish meals, but as far as we can tell, a meal of bread and wine followed by an anointing with oil is without parallel.[61] Even so, the Hebrew Bible does rank oil alongside food and drink as God's greatest provisions. Thus Ps 104:15 places God's gift of oil to make the face shine in parallel with his gifts of wine to make the heart merry and bread to make the heart strong, and Ps 23:5 has the gracious host Yahweh not only spread a table of food before his guest but also anoint the guest's head with oil. The very recurrence of the triad, "grain, wine, and oil," attests to the importance of oil as a staple commodity in Jewish tradition and throughout the Near East. Oil served not only as a basic food source, but also as the principal fuel for lighting and as a main ingredient in numerous body care products, including medicines, ointments, soaps, and perfumes. It also figured prominently in sacrifice and ritual, including the anointing of persons and vessels of special distinction.[62] Moreover, as we shall now document from Qumran and other Jewish sources, oil was held to be especially susceptible to impurity, and pagan oil was often associated with idolatrous rites. Recognizing these perceptions of oil will vitiate *Joseph and Aseneth*'s otherwise problematic placement of right and wrong oil alongside right and wrong food and drink as representative items to distinguish the practice of worshipers of God from that of outsiders.

> Oil they consider defiling, and anyone who accidentally comes in contact with it scours his person; for they make a point of keeping a dry skin…(*J.W.* 2.8.3)[63]

Although this practice is consistent with the sect's general asceticism and avoidance of luxury, J. M. Baumgarten correctly insists that the primary impetus for the taboo is rather the perception of oil as a potent carrier of impurity.[64] Oil was certainly used at Qumran,[65] but, as in rabbinic tradition, oil and other liquids were considered to be sensitive conductors of contamination and required the utmost caution. Thus the Temple Scroll declares:

> …every house in which someone dies shall be unclean for seven days;…And on the day on which they remove the corpse from the house, they shall clean the house of every stain of oil (תגאולת שמן), wine, and dampness from water; they shall scrape its floor, its walls and its doors; and they shall wash with water its locks, its doorposts, its thresholds, and its lintels. (11Q19 [= 11QTemple^{a}] 49.5–13)[66]

The *Damascus Document* rules similarly:

> And all the wood, stones, and dust which are defiled by human impurity, while having oil stains (גאולי שמן) on them, according to their impurity shall he who t[o]uches them become impure. (CD 12.15–17)[67]

---

[63] This and subsequent quotations of Josephus are from LCL. In apparent dependence on Josephus, Hippolytus (*Haer.* 9.14) also refers to the Essenes' abstention from anointing with oil.

[64] Joseph M. Baumgarten, "The Essene Avoidance of Oil and the Laws of Impurity," *RevQ* 6 (1967): 183–93; repr. with addendum in idem, *Studies in Qumran Law*, 88–97.

[65] A number of oil lamps and some olive pits were found in the excavations. See Roland de Vaux, "Fouilles de Khirbet Qumrân," *RB* 63 (1956): 552–53, 558–59; and Lankester Harding, "Introductory," in Dominique Barthélemy and Jozef T. Milik, *Qumran Cave 1* (DJD 1; Oxford: Clarendon, 1955), 7. In 1988, a Herodian juglet of oil was found in a nearby cave (Joseph Patrich and Benny Arubas, "A Juglet Containing Balsam Oil [?] from a Cave Near Qumran," *IEJ* 39 [1989]: 43–59), but, of course, a connection with the Qumran settlement cannot be proved. The *Temple Scroll* envisions the use of olive oil in temple ritual and even a bodily anointing with oil in connection with the feast of Firstfruits of Oil (11QTemple 22.15–16; see also 4Q251 [= 4QHalakah A] frag. 2). Yigael Yadin reconciles this with Josephus' indication that the Essenes did not use oil on the body by suggesting that pure oil could be procured only by means of the firstfruits ritual elaborated in the Temple Scroll; thus the anointing that was possible once a year was shunned at all other times because the purity of oil could not be assured (*The Temple Scroll: Hebrew and English*, 3 vols. [Jerusalem: Israel Exploration Society, 1977–83], 1:133–34, 140–42).

[66] This and subsequent quotations from the *Temple Scroll* are my own translation of the Hebrew text in Yadin, *Temple Scroll*, vol. 2.

[67] The text and translation of the *Damascus Document* are from Joseph M. Baumgarten and Daniel R. Schwartz, "The Damascus Document," in *The Dead Sea Scrolls: Hebrew,*

In these texts oil and other liquids are the carriers rather than the source of contamination. They adhere to surfaces that have been exposed to some unclean object or person, and they transmit that impurity to anyone who touches them even after the original source of defilement has been removed. *Rules* (4Q513 = 4QOrdinances^{b}) frag. 13.4 (see also frag. 12.1) likewise notes the risk of being "[so]iled with oil" ([מג]אלים בשמן). The fragmentary halakhic text *Harvesting* (4Q284a frag. 1), if the restoration by Baumgarten is accurate,[68] warns of potential contamination during the process of extracting olive oil. The *Temple Scroll* indicates that any oil brought into the holy city must be pure (11Q19 [= 11QTemple^{a}] 47.5–13). In the *War Scroll*, even the concern for the purity of priests on the battlefield is couched in metaphorical language suggestive of oil's susceptibility to defilement: 1QM 9.8–9 declares "they shall [no]t profane the oil of their priestly anointing (שמן משיחת כהונתם) through the blood of nations of vanity," and a parallel in 4Q491 (= 4QM^{a}) 3.5 reads "they shall not profane the oil of their priesthood (שמן כהונתם)."[69]

In rabbinic halakah, the character of liquids as carriers of impurity receives extensive elaboration. The Mishnah declares that while solid foods transmit impurity only to other foods, unclean liquids contaminate vessels as well (*m. Parah* 8.5). Moreover, the grade of impurity conveyed by solid foods diminishes with each derivative contact, but liquids, even if touched by someone or something bearing secondary impurity, become unclean to the first degree and transmit that first degree impurity to other liquids without any diminution through the chain of derivative contact (*m. Parah* 8.5–7; *m. Ṭehar.* 2.6; 3.1; *t. Ṭehar* 1.5; *b. Ber.* 52a). Solid foods are rendered susceptible to impurity if they become wet,[70] even in

Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Document, War Scroll, and Related Documents (ed. J. H. Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 4–58. On the reading גאולי שמן, "oil stains," as opposed to the emendations proposed by Schechter and Rabin, see Baumgarten, *Studies in Qumran Law*, 88–89; and Baumgarten and Schwartz, "The Damascus Document," 53n188.

[68] Joseph M. Baumgarten, "Liquids and Susceptibility to Defilement in New 4Q Texts," *JQR* 85 (1994): 94.

[69] Texts and translations of the War Scroll and related materials are from Jean Duhaime, "War Scroll," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 2, Damascus Document, War Scroll, and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 2; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1995), 80–141.

[70] The entire Mishnaic tractate *Makširin* deals with items that are rendered susceptible to impurity by wetting. Lev 11:34–38 provides the biblical springboard for these laws. See also *m. Ṭehar.* 3.1–2; *t. Makš.* ; *y. Šeb.* 6.1 (36c); *b. Ḥul.* 36a–b; and the discussion by Jacob Neusner, *A History of the Mishnaic Law of Purities* (SJLA 6; Leiden: Brill, 1974–77), *passim*, esp. 12:133–60.

the case of fruits and vegetables wet by their own exuding juices (*m. Ṭehar.* 9; *m. ʿEd.* 4.6; *b. Šabb.* 17b; *b. Ḥul.* 36b). Even dampening from rain or dew renders produce susceptible to impurity under certain circumstances (*m. Makš.*; *t. Makš.*; *b. B. Meṣiʿa* 22a–b; *b. Qidd.* 59b).

Although we do not find such developed halakah at Qumran, the sensitivity of liquids to contamination is recognized a number of times in the Qumran materials and related texts. Thus, according to the *Rule of the Community*, neophytes gained access to the community's solid foods (טוהרת הרבים) after a novitiate of one year but were excluded from the pure liquid of the sect (משקה הרבים) until the end of a second provisional year (1QS 6.13–22; 7.21–22).[71] *Harvesting* (4Q284a frag. 1) likewise refers to those ineligible to touch "the community's liquids" (משקי הרבים).[72] The *Temple Scroll* makes explicit, as do rabbinic sources, that solid foods on which water has been poured are like liquids in that they are more susceptible to impurity than dry foodstuffs (11Q19 [= 11QTemple^{a}] 49.6–9). *Rules* (4Q513 = 4QOrdinances^{b}) frag. 13.4–6, though badly mutilated, clearly suggests that oil and other liquids (משק[ה]) transmit impurity more easily than do solids.[73] Passages already cited above from both the *Temple Scroll* and the *Damascus Document* show that residue of oil and other liquids on household surfaces were considered to be lingering conductors of defilement after the original source of the impurity had been removed (11Q19 [= 11QTemple^{a}] 49.5–13; CD 12.15–17). According to the Qumran halakhic letter known as *Some Works of the Torah*, liquids were such sensitive conductors of impurity that if a stream of liquid flowed in either direction between a clean and an unclean vessel, both vessels were considered unclean (4Q394 [= 4QMMT^{a}] frag. 3.5–8; 4Q396 [= 4QMMT^{c}] frag. 1.2.6–9; 4Q397 [= 4QMMT^{d}] frags. 3–4.1–2). Other fragmentary texts from Cave 4 give even more stringent rulings than rabbinic tradition regarding the susceptibility of fruits and vegetables to defilement by their own exuding juices and by rain and dew (4Q284a frags. 1–2; 4Q274 frag. 3.1–2).[74] Purity concerns related to the properties of liquids impinge not only on dietary matters but also on the water used for lustrations. Josephus implies a grading of water for such purposes when he refers to "the purer kind of holy water" to which Essene novices were admitted after a probationary year (*J.W.* 2.8.7), and the variety of designations used in the Community Rule ("water for washing" [מי רחץ, 1QS 3.5]; "water for sprinkling" [מי נדה, 1QS 3.4, 9; 4.21]; and "water for purification" [מי דוכי, 1QS 3.9]) may reflect such a gradation.[75]

---

[71] Very early in Qumran studies, Stephen Lieberman, "The Discipline in the So-Called Manual of Discipline," *JBL* 71 (1952): 203, recognized the obvious parallel between this distinction and the rabbinic evaluation of משקין, liquids, as more susceptible to impurity than אוכלין נגובין, dry solid foods. See further Schiffman, *Sectarian Law in the Dead Sea Scrolls*, 163–65.

[72] See Baumgarten, "Liquids and Susceptibility," 94.

[73] Lawrence H. Schiffman, "Ordinances and Rules," in *The Dead Sea Scrolls: Hebrew, Aramaic and Greek Texts with English Translations, Vol. 1, The Rule of the Community and Related Documents* (ed. J. H. Charlesworth et al.; PTSDSSP 1; Tübingen: Mohr Siebeck; Louisville: Westminster John Knox, 1994), 167n51: "this frag. clearly assumes that oil is a transmitter of defilement….There can be no question that such was the view of the Qumran sect and some related groups of Second Temple Jews."

Because oil was such a staple commodity, because the lengthy process of production constantly exposed it to contamination, and because pagan oil was often associated with idolatrous rites,[76] many Jews considered oil an even greater source and medium of contamination than other liquids. As Baumgarten has stated, "the avoidance of pagan oil was of concern even to those not likely to have been so scrupulous with regard to other sources of defilement."[77] Josephus' report that the Essenes shunned the use of oil on the skin (*J.W.* 2.8.3) should therefore occasion no surprise. Not only would oil from external sources be a potential contaminant, but even pure oil on the skin would increase one's risk of contracting defilement by virtue of the power of liquids to transmit and even amplify impurity from other sources. In a community so dominated by purity concerns that a person could become impure simply by touching someone of lower rank (*J.W.* 2.8.10), any substance that would exacerbate the problem was naturally avoided.

In addition to the Qumran qualms about oil discussed above, a wide array of other Jewish sources testify to deep-seated Jewish concerns about the proper use of oil. The book of Judith preserves intact the exemplary scruples of its heroine by noting that when she was preparing to enter the pagan army camp, she packed her own cruse of oil along with other provisions (Jdt 10:5). Josephus attributes the following scheme to his rival, John of Gischala:

> With the avowed object of protecting all the Jews of Syria from the use of oil not supplied by their own countrymen, he sought and obtained permission to deliver it to them at the frontier. He then bought up that commodity…As Galilee is a special home of the olive and the crop had been plentiful, John, enjoying a monopoly, by sending large quantities to districts in want of it, amassed an immense sum of money. (*J.W.* 2.21.2)

---

[74] See further Baumgarten, "Liquids and Susceptibility," 91–101.

[75] Baumgarten, *Studies in Qumran Law*, 95n35.

[76] Sidney B. Hoenig, "Oil and Pagan Defilement," *JQR* 61 (1970–71): 64–66.

[77] Baumgarten, *Studies in Qumran Law*, 97.

Josephus later reports:

> He [John of Gischala] stated that the Jewish inhabitants of Caesarea Philippi,…having no pure oil for their personal use, had sent a request to him to see that they were supplied with this commodity, lest they should be driven to violate their legal ordinances by resort to Grecian oil.…So he sent off all the oil in the place…John by this sharp practice made an enormous profit. (*Life* 13)

In support of his claim that Seleucus I Nicator granted Syrian Jews full privileges of citizenship which were still in effect, Josephus writes:

> And the proof of this is the fact that he gave orders that those Jews who were unwilling to use foreign oil should receive a fixed sum of money from the gymnasiarchs to pay for their own kind of oil; and, when the people of Antioch proposed to revoke this privilege, Mucianus, who was then governor of Syria, maintained it. (*Ant.* 12.3.1)

The palpable bias against John of Gischala and in favor of better civic status for Jews in these passages does not negate Josephus' testimony to a strong Jewish disdain for pagan oil and determination to use pure oil produced by Jews.[78] The fact that Josephus can take such scruples for granted and allude to them without explanation suggests that Jewish aversion to gentile oil was widespread and long standing.[79]

In the rabbinic corpus, compunctions about oil, even more than those about liquids in general, are greatly elaborated. Painstaking precautions were required during the production of olive oil to insure its purity (*m. Ṭehar.* 9–10). Guards were posted at olive presses to ensure that no unclean person entered (*b. Ber.* 62a). Even oil produced in purity was subject to contamination from pagan contact during transport (*b. Ḥag.* 25a). Whereas other liquids were considered susceptible to second-degree rather than first-degree impurity when they congealed, oil remained susceptible to first-degree impurity when it congealed (*m. Ṭehar.* 3.1–2). The purity of oil used in Temple ritual was of special concern (*m. Ḥag.* 3.4; *t. Ḥag.* 3.30–32; *b. Menaḥ.* 86b), as is illustrated in the well-known story of the oil defiled by the Seleucids and the miraculous cruse of pure oil found by the Hasmoneans when they recaptured the Temple (*b. Šabb.* 21b). Anointing oneself with unclean oil put one in a state of impurity that immersion did not remedy as long as there was residual oil on the skin (*m.* ʿ*Ed.* 4.6). The Hillelites held that a person who anointed himself even with pure oil and later became unclean could not become clean again by immersion as long as there was oil on his skin (*m.* ʿ*Ed.* 4.6). The Mishnaic tractate on idolatry prohibits consumption of the "oil of idolaters" (השמן שלהן [i.e., שמן של עובדי גלולים], *m.* ʿ*Abod. Zar.* 2.6)[80], and the Babylonian Talmud includes this ban on the "oil of heathens" (שמנן [i.e., שמן של עובדי כוכבים]) in the Eighteen Decrees enacted by the Shammaites as safeguards against idolatry (*b.* ʿ*Abod. Zar.* 35b–36b).[81]

---

[78] Neither is this point altered if the decree attributed by Josephus to Seleucus I Nicator (312–281 B.C.E.) actually dates to a later Seleucid ruler. Ralph Marcus, in Appendix C to his Loeb translation of books 12–14 of the *Antiquities*, suggests that the decree should be ascribed to Antiochus III (223–187 B.C.E.). Inscriptional evidence confirms that Seleucid officials made grants of oil in Hellenistic cities. See Michael I. Rostovtzeff, "Syria and the East," *CAH* 7:178–79.

[79] The persistence of such ideas in Jewish Christianity is suggested by the tradition that James, the brother of Jesus, "did not anoint himself with oil" (Eusebius *Hist. Eccl.* 2.23, citing Hegessipus), although the motive in this instance may have been ascetic avoidance of luxury rather than scruples about purity.

Impure oil thus takes its place alongside unclean food and drink as one of the basic realities of daily life considered by many Jews to be most threatening to Jewish purity and identity. *Joseph and Aseneth*'s "ointment of destruction" (χρῖσμα ἀπωλείας) finds close analogies in Josephus' "foreign oil" (ἀλλοφῦλον ἔλαιον), "oil not supplied by their own countrymen" (ἔλαιον μὴ δι᾽ … ὁμοφύλων ἐγκεχειρίσμενον), and "Grecian oil" (ἔλαιον …Ἑλληνικόν), the Mishnaic "oil of idolaters" (שמן של עובדי גלולים), and the Talmudic "oil of heathens" (שמן של עובדי כוכבים). All of these, in turn, are functionally analogous to "the king's food and wine" (פתבג המלך ויין; LXX: τὸ δεῖπνον τοῦ βασιλέως καὶ ὁ οἶνος) refused by Daniel (1:8), the "royal feast and wine of libations" (συμπόσιον βασιλέως οὐδὲ … οἶνος σπονδῶν) shunned by Esther (Add Esth 4.17x; but cf. Esther 2:9), "the bread of gentiles" (οἱ ἄρτοι τῶν ἐθνῶν) avoided by Tobit (1:10–11), the pagan general Holofernes' "own food and wine" (τὰ ὀψοποιήματα αὐτοῦ καὶ ὁ οἶνος αὐτοῦ) declined by Judith (12.1–4, 19), the "unclean things" (κοινά) that the Maccabean martyrs refused to eat (1 Macc 1:62), the "grain of the gentiles" (דגן הגוים) that should be banned from the Temple according to *Some Works of the Torah* (4Q394 [= 4QMMT^a] frag. 1, col. 1, lines 6–8), the "Greek bread" (ἑλληνικὸς ἄρτος) eschewed in the Cologne Mani Codex (87.16–23), the "bread of strangling" (ἄρτος ἀγχόνος) and "cup of deceit" (ποτήριον ἐνέδρας) depreciated in *Joseph and Aseneth*, the "bread of idolaters" (הפת שלהן [i.e., פת של עובדי גלולים]) banned in *m.* ʿ*Abod. Zar.* 2.6, and the "bread of heathens" (פיתן [i.e., פת של עובדי כוכבים]) and "wine of heathens" (יינן [i.e., יין של עובדי כוכבים]) forbidden in the Eighteen Decrees (*b.* ʿ*Abod. Zar.* 35b–36b). All represent a concern to maintain distinctively Jewish mores in those areas deemed most vulnerable to pagan corruption.[82]

---

[80] The text and translation of the Mishnah employed in this study is Philip Blackman, *Mishnayoth* (7 vols.; New York: Judaica Press, 1964). The remarkable parenthetical statement in *m.* ʿ*Abod. Zar.* 2.6 that "Rabbi [Judah] and his court permitted the oil" embarrassed the Amoraim and continues to puzzle modern interpreters. The clause fits neither the grammar nor the content of its present context and appears to be a later insertion into the list of forbidden items. See the explanations in *t.* ʿ*Abod. Zar.* 4.8–11; *b.* ʿ*Abod. Zar.* 35b–37a; and *y.* ʿ*Abod. Zar.* 2.8, 41d. For a balanced discussion of the origins of the ban on gentile oil and its later relaxation, see Martin Goodman, "Kosher Olive Oil in Antiquity," in *A Tribute to Geza Vermes: Essays on Jewish and Christian Literature and History* (ed. P. R. Davies and R. T. White; JSOTSup 100; Sheffield: Sheffield Academic Press, 1990), 227–45.

[81] The text and translation of the Babylonian Talmud employed in this study is Isidore Epstein, ed., *The Hebrew-English Edition of the Babylonian Talmud* (London: Soncino Press, 1983–90).

Of special significance for our study is the fact that several Jewish sources that express scruples about oil mention it not just alone, but together with bread and/or wine, or their near equivalents, in combinations which are similar to that in *Joseph and Aseneth* and which function to set the pure apart from the impure, the holy from the profane, and especially Judaism from paganism. The book of Judith lists the provisions that Judith took with her into the pagan army camp as follows: a skin of wine, a cruse of oil, and a bag filled with parched grain, dried fig cakes, and pure (καθαρός) bread (Jdt 10:5). The book of *Jubilees* singles out grain, wine, and olive oil as subjects of the heavenly tablets' most stringent requirements for tithing and purity (*Jub.* 32:10–15). The Qumran *Temple Scroll* gives the following regulations for the holy city and its ideal sanctuary:

> Everything that is in it shall be pure, and everything that enters it shall be pure: *wine and oil and all food and all drink shall be pure*....In the skins (of the animals) which they slaughter in the sanctuary, in these they shall bring *their wine and their oil and all their food* to the city of my sanctuary. And they shall not defile my sanctuary with the skins of the abominable sacrifices which they offer in their land. (11Q19 [= 11QTemple^a] 47.5–14; emphasis added)

Whether oil is for anointing or dietary use in these contexts is a secondary issue. What is important for our purposes is that these and other texts, representing a very broad spectrum of Jewish communities, mention oil together with food and drink as those basic necessities most subject to defilement and, by the same token, if used properly, most symbolic of appropriate Jewish conduct. On the same trajectory, rabbinic law often treats oil and wine together because of their similar vulnerability to defilement during production, transport, and storage (*m. Ḥag.* 3.4; *t. Ḥag.* 3.30–32; *b. Ḥag.* 25a; *m. Mid.* 2.5; *b. Šabb.* 17a). The Mishnaic tractate on idolatry brings together gentile bread and oil as items to be avoided by Jews:

---

[82] Also related are the "cup of demons" (ποτήριον δαιμονίων) and "table of demons" (τράπεζα δαιμονίων) prohibited by Paul (1 Cor 10:21) and the taboo on "food sacrificed to idols" (εἰδωλόθυτος) in some early Christian circles (see Acts 15:29; 21:25; Rev 2:14, 20; but cf. 1 Cor 8:10).

> These things of idolaters are forbidden, but it is not prohibited to derive any benefit from them: milk that an idolater milked but no Israelite watched him, (and) *their bread and (their) oil.* (*m. ᶜAbod. Zar.* 2.6; emphasis added)

Blessings over oil and wine in the context of a meal are discussed in *b. Ber.* 43b. Also noteworthy are the instructions given to Abraham in the *Apocalypse of Abraham* 9.7 to abstain from eating cooked food, drinking wine, and anointing himself with oil in preparation for his revelatory experience; the vision of priestly investiture in *T. Levi* 8:4–5, where Levi is anointed with holy oil and fed with wine and holy bread; and the Coptic version of the very Jewish liturgical material in *Didache* 9–10, which includes a blessing to be said over the ointment along with those for the bread and cup.[83]

The most striking parallel to the bread-cup-ointment triad in *Joseph and Aseneth* appears in the Babylonian Talmud. In the gemara to the mishnah cited above from *m. ᶜAbod. Zar.* 2.6, the Talmud states:

> Behold Bali declared that Abimi the Nabatean said in the name of Rab: *The bread, wine and oil of heathens* and their daughters are all included in the eighteen things. (*b. ᶜAbod. Zar.* 36a; emphasis added)

This tradition is repeated verbatim in *b. ᶜAbod. Zar.* 36b and with slight variations in *b. Šabb.* 17b, where the order is bread, oil, and wine. It is surprising that this talmudic combination of pagan bread, wine, and oil has not figured in discussions of the meal formula in *Joseph and Aseneth*,[84] which combines precisely the same items to distinguish the people of God from idolaters. Not only is the rabbinic formula strikingly similar in content to that in *Joseph and Aseneth*, but the express purpose of the talmudic prohibition–to safeguard against idolatry–makes it functionally similar as well. Questions of the date and authenticity of rabbinic traditions are, of course, problematic. However, as we have seen, in this instance the talmudic formula only brings together three items that had functioned, both individually and in various combinations, for a long time and in very diverse Jewish circles, as benchmarks by which to gauge and express one's Jewishness.

---

[83] The so-called μύρον prayer is found in 10:8 in the Coptic version. The parallel with the triad in *Joseph and Aseneth* is striking, and Jewish roots are at least arguable. However, the dating of the prayer is problematic. Some argue that it was a part of the original, while others consider it a late interpolation. It has even been argued that the Coptic word *stinoufi* does not mean "ointment" but either denotes "incense" or is a metaphor for the "fragrance" of the Spirit in paradise. See the discussions in Robert A. Kraft, *Barnabas and the Didache* (Apostolic Fathers Series 3; New York: Nelson, 1965), 66, 165–69; Arthur Vööbus, *Liturgical Traditions in the Didache* (Stockholm: Estonian Theological Society in Exile, 1968), 46–49; and Stephen Gero, "The So-Called Ointment Prayer in the Coptic Version of the Didache: A Re-Evaluation," *HTR* 70 (1977): 67–84.

[84] When I first called attention to this parallel in a paper entitled, "'Bread, Wine, and Oil of Idolaters': Rabbinic Light on a *Crux Interpretum* in Joseph and Aseneth," at the 1989 annual SBL meeting in Anaheim, I could not discover any discussion of these Talmudic passages in published research on *Joseph and Aseneth.* Since then, Alan F. Segal has noted one of them (*b. Sabb.* 17b) to show that "the puzzling objects of Aseneth's rites are known to be symbolic of Judaism in a general way" ("Conversion

In view of the widely attested Jewish perceptions of oil, as well as bread and wine, and especially the bringing together of these items in such contexts as the *Temple Scroll*'s insistence on the purity of "wine and oil and all food and all drink," and the Talmud's ban on "the bread, wine, and oil of heathens," it is not surprising to find oil used in *Joseph and Aseneth* alongside food and drink in a triadic formula that sets the uniquely Jewish use of these staples over against their usage outside Judaism as an expression for the entire life *more judaico*. The possibility remains that the bread-cup-ointment formula in *Joseph and Aseneth* echoes some otherwise unattested ritual meal, but there is little in the text itself to suggest this, and in any case the nature and form of such a meal would be irrecoverable. However, the absence of a discernible ritual meal does not mean that the language of eating, drinking, and being anointed is merely literary and symbolic, as R. Schnackenburg seems to suggest.[85] Though expressive of the whole Jewish way of life, this language grows out of and represents something very concrete in the Jewish community–the effort to maintain a distinctive way of life in precisely those daily realities where susceptibility to gentile impurity was considered greatest, namely, food, drink, and oil contaminated by idolatry. So symbolic of

---

and Messianism: Outline for a New Approach," in *The Messiah: Developments in Earliest Judaism and Christianity* [ed. J. H. Charlesworth; Minneapolis: Fortress, 1992], 311; see also idem, *Paul the Convert: The Apostolate and Apostasy of Saul the Pharisee* [New Haven: Yale University Press, 1990], 91–92). Segal concludes, as I do, that "the rules of commensality were broadly understood in the Judaism of this period as safeguards against idolatry," and that the eating, drinking, and anointing in *Joseph and Aseneth* "are apparently symbolic of Jewish life in general, rather than representative of a specific conversion ritual" ("Conversion and Messianism," 311; *Paul the Apostle*, 91–92). Other than Segal's brief references and my own in *From Death to Life*, 134–35, I know of no published studies that consider this remarkable parallel to the triadic formula in *Joseph and Aseneth.*

[85] Rudolf Schnackenburg, "Das Brot des Lebens," in *Tradition und Glaube: Das frühe Christentum in seiner Umwelt. Festgabe für K. G. Kuhn* (ed. G. Jeremias, H.-W. Kuhn, and H. Stegemann; Göttingen: Vandenhoeck und Ruprecht, 1971), 339n35.

Jewish identity in a gentile environment was the peculiarly Jewish use of these three staples that the entire life *more judaico* came to be expressed in a formulaic triad or dyad that has been assumed–probably mistakenly and certainly too readily–to refer to a special ritual meal.

Thus the significance of the Dead Sea Scrolls for interpreting *Joseph and Aseneth* has been both exaggerated and underestimated. It is exaggerated when the work is labeled Essene or Therapeutic or when its meal formula is declared analogous to the sacred meal traditions of those communities. It is underestimated when little-noticed aspects of Qumran thought and practice are not seen in connection with similar traditions in other Jewish circles and brought to bear on an otherwise enigmatic phenomenon in *Joseph and Aseneth.* Perceptions of oil at Qumran and elsewhere and the representative use of daily food, wine, and oil as identity markers in various ancient Jewish sources shed more light on the triadic formula in *Joseph and Aseneth* than do the various ritual meals with which comparisons and connections have frequently been drawn.

CHAPTER TWENTY

THE BIBLE, THE *PSALMS OF SOLOMON*, AND QUMRAN

Joseph L. Trafton

Prior to the discovery of the Dead Sea Scrolls, there were few Jewish writings that could be dated with some degree of certainty to the first century B.C.E. and, hence, could be used as witnesses to Judaism in the era just prior to the rise of Christianity. One such book was a collection of eighteen noncanonical psalms called the *Psalms of Solomon*[1] (hereafter *Pss. Sol.*). Apparently the product of a specific group within Judaism, the *Pss. Sol.* came to be regarded by scholars as the classical source for pre-Christian Pharisaism. In addition, for a long time the *Pss. Sol.* stood out as containing the clearest example of Jewish Messianism prior to the turn of the eras. The excitement that continues unabated since the discovery of the Scrolls has to a large extent pushed documents such as the *Pss. Sol.* into the background. Though this turn of events might give cause for regret, the new window that the Scrolls have opened upon Judaism of this period has at the same time given us a fresh perspective from which to examine the *Pss. Sol.* and its contributions to an understanding both of Judaism in the first century B.C.E. and of the NT.

Although the *Pss. Sol.* are preserved only in Greek and Syriac, most scholars agree that they were probably composed in Hebrew. I have argued elsewhere that both the Greek and the Syriac are independent witnesses to the original.[2] In addition, there is a general consensus that certain historical allusions in *Pss. Sol.* 2, 8, and 17 refer to the Roman general Pompey, who captured Jerusalem in 63 B.C.E. and was slain in Egypt in

---

[1] For an introduction to the *Psalms of Solomon*, see Joseph L. Trafton, "Solomon, Psalms of," *ABD* 6:115–17. For the current state of research, see Robert B. Wright, "*Psalms of Solomon*," *OTP* 2:639–50; Joseph L. Trafton, "Research on the *Psalms of Solomon* Since 1977," *JSP* 12 (1994): 3–19; Mikael Winninge, *Sinners and the Righteous: A Comparative Study of the Psalms of Solomon and Paul's Letters* (ConBNT 26; Stockholm: Almqvist and Wiksell, 1995), 9–21; and Kenneth Atkinson, *An Intertextual Study of the Psalms of Solomon* (Studies in the Bible and Christianity 49; Lewiston, NY: Edwin Mellen, 2000), 396–429.

48 B.C.E. This points to a date for the *Pss. Sol.* shortly after Pompey's death.[3] The *Pss. Sol.* exhibit a strong we/they emphasis throughout, suggesting that the psalms are the product of some Jewish party or sect.[4] Whether they were all written at the same time, or even by the same author, is debated. Most scholars agree, however, that the *Pss. Sol.* were probably composed in or near Jerusalem in the latter half of the first century B.C.E.

The discovery of the Dead Sea Scrolls has thrown an enormous amount of unexpected light upon Judaism in the last two centuries B.C.E. and the first century C.E. In this article we shall examine three elements in the *Pss. Sol.*–the community that produced them, the Messianic expectation contained therein, and the poetic style that characterizes them–and place them within the larger context provided by the Scrolls and by the NT.
