*Storage:* Store under cool, dry conditions in unopened pkgs. in well-ventilated area; avoid direct sunlight; gentle warming may be required to ensure material properly discharges from storage drums
- Persoft NK-60, NK-100** [NOF]  
*Chem. Descrip.:* Ethoxylated fatty alcohols  
*Uses:* Detergent; emulsifier; wetting agent; textile detergent; dyeing assistant; base for liq. detergents; dispersant for pulp pitch; lubricant for bottle cleaning processing  
*Properties:* Liq.; 90% conc.; nonionic  
*Environmental:* Biodeg.
- Petrac® Calcium Stearate CP-11** [Ferro]  
*Chem. Descrip.:* Calcium stearate  
 CAS 1592-23-0; EINECS/ELINCS 216-472-8  
*Uses:* Mold release agent, lubricant, pigment suspending agent, and flow control agent for plastics (PVC, phenolics), paints, inks, foundry, industrial cleaners, waterproofing of cement and clay tile, lubrication and glossing in paper coatings, wire drawing compds.  
*Properties:* Wh. powd., 97% thru 100 mesh; sp.gr. 1.03; dens. 26 lb/ft<sup>3</sup>; m.p. 151 C; acid no. 205; 9.8% CaO
- Petrac® Calcium Stearate CP-11 LS** [Ferro]  
*Chem. Descrip.:* Calcium stearate  
 CAS 1592-23-0; EINECS/ELINCS 216-472-8  
*Uses:* Mold release agent, lubricant, pigment suspending agent, and flow control agent for plastics (PVC, phenolics), paints, inks, foundry, industrial cleaners, waterproofing of cement and clay tile, lubrication and glossing in paper coatings, wire drawing compds.  
*Properties:* Powd., 90% thru 200 mesh; sp.gr. 1.03; dens. 26 lb/ft<sup>3</sup>; m.p. 154 C; soften. pt. 150 C; 9.4% CaO
- Petrac® GMS** [Ferro]

*Chem. Descrip.:* Glyceryl stearate  
CAS 123-94-4

*Uses:* Internal/external lubricant, mold release for rigid PVC inj. molding, film, sheet, bottle compds.; pigment suspending agent in paints and inks; water-proofing agent for cement, clay tile; lubricant, gloss aid in paper coatings; foundry resins; lubricant, antistat, and antifog in polyolefins

*Properties:* Off-wh. flake; m.p. 140 F; acid no. 2; iodine no. 2.5; sapon. no. 167; 43% alpha monoglycerides

**Petrolatum RPB** [Crompton/Witco]

*Chem. Descrip.:* Petrolatum tech.  
CAS 8009-03-8; EINECS/ELINCS 232-373-2

*Uses:* Binder, carrier, lubricant, moisture barrier, plasticizer, protectant, softener for tech. applics., (elec., paper and pkg., plastics, rubber, textiles, industrial use)

*Properties:* Dk. brn.; m.p. 71-77 C

**Petrolite® C-3500** [Baker Petrolite]

*Chem. Descrip.:* Oxidized polymer

*Uses:* For use in adhesives, textiles, and high-wax polish applics.; lubricant for PVC extrusion; food pkg. adhesives, textiles; defoamer in food-contact paper/paperboard; general-purpose polymer

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Solid; visc. 152 SUS (116 C); m.p. 107 C; congeal pt. 93 C; acid no. 24; sapon. no. 42

**Petrolite® C-7500** [Baker Petrolite]

*Chem. Descrip.:* Oxidized PE wax  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Used in the formulation of emulsions having hard films with good gloss and dry-bright polish props.; oil binder in solv.-based polishes, release agents, textile finish softeners; food pkg. adhesives, textiles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Color 0.5 (D1500) wax; m.p. 97 C; acid no. 15; sapon. no. 32

**Petrolite® C-9500** [Baker Petrolite]

*Chem. Descrip.:* Oxidized polyethylene  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Used in the formulation of emulsions having hard films with good gloss and dry-bright polish props.; oil binder in solv.-based polishes, release agents, textile finish softeners; food pkg. adhesives, textiles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Color 0.5 (D1500) wax; m.p. 94 C; acid no. 31; sapon. no. 50

**Petrolite® E-1040** [Baker Petrolite]

*Chem. Descrip.:* Oxidized polyethylene  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Used in the formulation of emulsions, textile finish softeners, floor, auto, and liq. solv.-based polishes; food pkg. adhesives, textiles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* M.p. 106 C; acid no. 40; sapon. no. 65

**Petrolite® E-2020** [Baker Petrolite]

*Chem. Descrip.:* Oxidized HDPE  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Wax producing emulsions for formulating textile lubricants and softeners, floor, auto polishes, mold release agents, lubricants, and antiblocking agents; in ceramic binders; processing aid in the fabrication of thermoplastic resins; external and internal lubricant; food pkg. adhesives, textiles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* M.p. 116 C; acid no. 22; sapon. no. 41

**Petrolite® WB-5** [Baker Petrolite]

*Chem. Descrip.:* Urethane deriv. of oxidized wax

*Uses:* Wax with dye solubility, pigment dispersing, and oil and dye binding properties for use in one-time carbon paper

*Properties:* Brn. wax; m.w. 650; m.p. 89 C; acid no. 16; sapon. no. 60

**Petrothene® NA 204-000** [Equistar]

*Chem. Descrip.:* LDPE resin  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Extrusion coating and inj. molding resin for general purpose and food contact applics.; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Sp.gr. 0.918; melt index 7.0 g/10 min; Vicat soften. pt. 84 C; tens. str. 1700 psi; elong. 550%; hardness (Shore D) 50

**Petrothene® NA 214-000** [Equistar]

*Chem. Descrip.:* LDPE  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Extrusion coating grade for sugar pouches, industrial and multiwall bags, treated and primed films and laminations; food-contact paper, polymer

*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant

*Properties:* Sp.gr. 0.918; melt index 10.0 g/10 min; Vicat soften. pt. 86 C; tens. str. 1580 psi; elong. 580%; hardness (Shore D) 54

**Petrothene® NA 216-000** [Equistar]

*Chem. Descrip.:* LDPE resin  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Extrusion coating resin for flexible pkg., milk cartons, set-up cartons, food boards, food-contact paper

*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant

*Properties:* Sp.gr. 0.923; melt index 3.7 g/10 min; tens. str. 1750 psi; elong. 550%; Vicat soften. pt. 92 C; hardness (Shore D) 53 C

**Petrothene® NA 217-000** [Equistar]

*Chem. Descrip.:* LDPE resin  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Extrusion coating resin for flexible pkg., milk cartons, industrial papers and foil mounting, single-ply bags, pouch bags, board trays, fiber drums, corrugated boxes, fiberboard containers, food-contact paper

*Regulatory:* FDA 21CFR §176.170, 177.1350 compliant

*Properties:* Sp.gr. 0.923; melt index 5.5 g/10 min; tens. str. 1800 psi; elong. 550%; Vicat soften. pt. 92 C; hardness (Shore D) 53

**Petrothene® NA 219-000** [Equistar]

*Chem. Descrip.:* LDPE  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Extrusion coating grade for use with paper, films, and other base stocks for flexible pkg., milk cartons, single-ply bags, board trays, fiber drums, corrugated boxes, fiberboard containers, food-contact paper

*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant

*Properties:* Sp.gr. 0.923; melt index 10.0 g/10 min; Vicat soften. pt. 95 C; tens. str. 1700 psi; elong. 226%; hardness (Shore D) 51

**Petrothene® NA 957** [Equistar]

*Chem. Descrip.:* LDPE  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Liner film resin for multiwall paper bag liners, general pkg., industrial liners, food containers, and trash bags; good heat seal, drawdown

*Properties:* 1.25-mil film; dens. 0.924 g/cc; melt index 2.6 g/10 min; haze 15%; tens. str. 2500 psi (break, MD); tens. elong. 300% (break, MD); Vicat soften. pt. 80 C; hardness (Shore D) 42; Dart drop impact 120 g

**Pexite® Wood Rosins** [Hercules]

*Chem. Descrip.:* Refined natural resins obtained from pine trees  
*Uses:* Thermoplastic acidic resin for paper sizes, soaps, emulsifiers, and greases, and for mfg. of syn. resins for adhesives, paints, varnishes, etc.; wax modification; as chem. intermediate; in solder fluxes; for food-pkg. and -processing

*Properties:* USDA Rosin WG, N, M, and K grades solid; sol. in most alcohols, esters, ketones, hydrocarbons, chlorinated solvs., plasticizers, and min. oils; dens. 1.067 kg/l; Drop soften. pt. 82 C (WG and N), 81 C (M and K); flash pt. (COC) 216 C; acid no. 162 (WG), 161 (N and M), 160 (K); sapon no. 168 (WG), 167 (N and M), 166 (K)

**Phosflex® 4** [Akzo Nobel]

*Chem. Descrip.:* Tributyl phosphate  
CAS 126-73-8; EINECS/ELINCS 204-800-2

*Uses:* Flame retardant primary plasticizer for nitrocellulose, cellulose acetate, chlorinated rubber, and vinyls; antifoam for paper coatings, water-based adhesives, inks, textile sizes, detergent sol'ns.; high boiling solv. for lithographic inks; latex paints; also suitable for epoxy, PS, PVAc

*Properties:* Colorless liq.; sp.gr. 0.980 (20/20 C); visc. 6 mPa·s; 11.7% P

**Phosflex® 61B** [Akzo Nobel]

*Chem. Descrip.:* t-Butylated triphenyl phosphate ester mixt.  
CAS 56803-37-3

*Uses:* Flame retardant plasticizer for phenolic resins, paper coatings, PVC and PVC foams, acrylic, cellulose, epoxy, phenolic, and PVAc polymers

*Properties:* Straw-colored liq.; sp.gr. 1.165 (20/20 C); visc. 77 mPa·s; 8.0% P

**Phosflex® 71B** [Akzo Nobel]

*Chem. Descrip.:* t-Butyl phenyl diphenyl phosphate  
CAS 56803-37-3

*Uses:* Flame retardant plasticizer for PVC, PVC foams, vinyl nitrile foams,

- PVAc emulsions, cellulose, acrylic, epoxy, paper, phenolic, PS, ABS, engineering resins, polyesters, alloys  
*Properties:* Colorless liq.; sp.gr. 1.180 (20/20 C); visc. 32 mPa·s; 8.5% P
- Phosflex® TBEP** [Akzo Nobel]  
*Chem. Descr.:* Tributoxylethyl phosphate  
 CAS 78-51-3; EINECS/ELINCS 201-122-9  
*Uses:* Flame retardant plasticizer for plastisols, acrylics, cellulose, epoxy, nitrile rubber, PVAc; floor polish emulsions; leveling agent in latex paints and polishes; imparts low temp. flexibility to syn. rubbers; antifoam in paper coatings, inks, textile sizes, detergents, and paints  
*Properties:* Colorless liq.; sp.gr. 1.35 (20/20 C); visc. 12 mPa·s; 7.8% P
- Photomer® 51** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Benzil dimethyl ketal  
 CAS 24650-42-8; EINECS/ELINCS 246-386-6  
*Uses:* Photoinitiator for UV curable coatings and inks for paper, plastics, wood, and elec. applics.
- Photomer® 3015** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Bisphenol A epoxy diacrylate  
*Uses:* Used for paper/paperboard, metal/deco clear and pigmented systems; low visc. oligomer with wide range of radiation curable props.; greater ease in handling, exhibits good cure  
*Properties:* 100% solids
- Photomer® 3016** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Bisphenol A epoxy diacrylate  
*Uses:* Base resin in radiation-curing overprint varnishes for paper/board and wood varnishes; good litho props. in wet offset inks; high visc. oligomer with good cure speed; provides high surf. hardness, high gloss, exc. solv. resist.  
*Properties:* 100% solids
- Photomer® 3016-20T** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Epoxy acrylate/monomer blend  
*Uses:* Used in paper/paperboard, overprints, wood coatings, and inks; dilution of Photomer® 3016 with Photomer® 4006 (TMPTA) to facilitate easier handling and applic.
- Photomer® 3016-40R** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Epoxy acrylate/monomer blend  
*Uses:* Used in paper/paperboard and wood coatings and inks; dilution of Photomer® 3016 with Photomer® 4061 (TPGDA) to facilitate easier handling and applic.
- Photomer® 3016-40T** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Epoxy acrylate/monomer blend  
*Uses:* Used in paper/paperboard, overprints, wood coatings, and inks; dilution of Photomer® 3016 with Photomer® 4006 (TMPTA) to facilitate easier handling and applic.
- Photomer® 3038** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Acrylated epoxy resin with Photomer® 461 (tripropylene glycol diacrylate)  
*Uses:* Used in radiation-curable paper/paperboard, overprints, rigid plastics, wood, and chipboard coatings
- Photomer® 4015** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Aromatic alkoxyate monoacrylate  
*Uses:* Flexibilizer in coatings and inks for flexible substrates, and for paper, metal and photopolymer applics.; low irritancy replacement for 2-PEA
- Photomer® 4025** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Bisphenol A ethoxylate diacrylate  
*Uses:* Film-former for paper/paperboard and photopolymer applics.; higher ethoxylate analog of Photomer® 4028; water disp. monomer which is fast curing, exhibits exc. flexibility and cured film props.  
*Properties:* Med. m.w.
- Photomer® 4028** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Bisphenol A ethoxylate diacrylate  
*Uses:* Film-former for radiation-cured inks and coatings, esp. overprint varnishes on paper/paperboard, litho inks, screen inks; as base oligomer in low visc. systems; fast curing, mod. visc. monomer; forms tough abrasion-resist. films of high tens. str. and good elong.  
*Toxicology:* Low skin irritancy
- Photomer® 4155** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Ethoxylated trimethylolpropane triacrylate  
*Uses:* Film-former in aq./solv. systems such as photopolymers, screen printing, textiles, and paper/paperboard coatings; higher ethoxylate homologue of Photomer® 4149; water disp. monomer with good cure response and film forming char.  
*Properties:* Med. m.w.
- Photomer® 4158** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Ethoxylated trimethylolpropane triacrylate  
*Uses:* Used in aq./solv. developable photopolymers, paper, textiles coatings and other porous substrates; very high ethoxylate homologue of Photomer® 4149; partially water sol. MFA which cures to a flexible, soft homopolymer  
*Properties:* High m.w.
- Photomer® 4160** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Neopentyl glycol ethoxylate diacrylate  
*Uses:* Film-former for paper/paperboard, wood varnishes, and flexible plastics; patented low visc., fast curing ester with good solvency props.; forms flexible films of high tensile, mod. elong., and mod. shrinkage
- Photomer® 4204** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Aliphatic alkoxyate diacrylate  
*Uses:* Used for paper, wood, and metal prods.; low irritancy, mod. cure monomer; exhibits good flexibility, solv. resist., and adhesion props.; developmental  
*Properties:* Low odor
- Photomer® 5018** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Polyester acrylate  
*Uses:* Good wetting chars. make it esp. suitable in multicolor printing/coating systems where interfacial adhesion is a problem; for clear coatings on wood, glass, paper, and plastics; low visc. oligomer for radiation-curing applics.
- Photomer® 6010** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Aliphatic urethane diacrylate  
*Uses:* Film-former for coatings and inks for paper and plastic substrates; nonyellowing, flexible film-forming oligomer exhibiting outstanding humidity resist.
- Photomer® 6140** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Aliphatic urethane diacrylate  
*Uses:* Used for radiation-curing overprint varnishes and inks for flexible or semirigid substrates like paper and plastics; high visc. nonyel. oligomer; good flexibility and toughness
- Photomer® 6210** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Aliphatic urethane diacrylate  
*Uses:* Used in coatings and inks on rigid and flexible plastics, paper, and metals; premium oligomer with very low visc., exc. light stability, chem. and abrasion resist.
- Photomer® 8061** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Monomethoxy tripropylene glycol monoacrylate  
*Uses:* Reactive diluent for use in UV/EB adhesives, with good adhesion to aluminum, paper, paperboard, and selected plastics; comparable in cure to TPGDA with exc. solvating props.  
*Properties:* Low visc.
- Photomer® 8127** [Cognis/Coatings & Inks]  
*Chem. Descr.:* Monomethoxy neopentyl glycol propoxylate monoacrylate  
*Uses:* Exhibits good adhesion to aluminum, paper, plastics, and glass; useful in RC laminating and structural adhesives; reactive monomer comparable in cure to NPG(PO) diacrylate  
*Properties:* Very low visc.
- Phthalopal®** [BASF AG]  
*Chem. Descr.:* Phthalate resins, sat. and unsat.  
*Uses:* Resin for paint and varnish industry; oil-free for NC finishes; binder for aq. flexographic inks and lightfast paper varnishes; saponified form
- Picconol® A100** [Hercules/Resins]  
*Chem. Descr.:* Aliphatic hydrocarbon resin emulsions  
*Uses:* Resin emulsion used in combination with other aq. thermoplastic and/or elastomeric systems to produce coatings, paints, and adhesives; extender, tackifier for NR, SR; waterproof finishes for paper, textiles; esp. suitable for use in high-styrene SBR, EVA resin, and polyacrylic-based latex paints, and in adhesives for bonding films, fibers, and granular materials; food-pkg. and processing operations  
*Properties:* Gardner 9 (50% in toluene) liq.; dens. 0.97 kg/l; visc. 3000 cps; soften. pt. (R&B) 63 C; pH 8.5; 50% aq. disp.; anionic
- Piccopale® 100** [Hercules/Resins]  
*Chem. Descr.:* Aliphatic hydrocarbon resin, stabilized with 0.1% antioxidant (tetrakis [methylene (3,5-di-t-butyl-4-hydroxyhydrocinnamate)] methane)  
*Uses:* Tackifier, binder for rubber, adhesives, construction materials; saturant/waterproofing agent for paper, textiles; replacement for gloss oils in paints, varnishes, and coatings  
*Properties:* Gardner 3 color; sp.gr. 0.91-0.97; dens. 0.97 kg/l; melt. visc. 230

C (1 poise); soften. pt. (R&B) 100 C; flash pt. (COC) 259 C; acid no. < 1; sapon. no. < 2

**Piccopale® 100-70M66** [Hercules/Resins]

*Chem. Descrip.:* Hydrocarbon resin sol'n.

*Uses:* Tackifier, binder for rubber, adhesives, construction materials; saturant/waterproofing agent for paper, textiles; replacement for gloss oils in paints, varnishes, and coatings

*Properties:* Visc. 17-36 stokes; soften. pt. (R&B) 100 C; flash pt. (TCC) 40 C min.; 70% solids in min. spirits

**Piccotac® 95T** [Hercules/Resins]

*Chem. Descrip.:* Aliphatic C5 hydrocarbon resin

*Uses:* Tackifier for hot-melt adhesives; saturant and waterproofing agent in various paper, paperboard, and textile prods.; hot-melt road marking compds.; food pkg. adhesives, paper/paperboard; compat. with most popular elastomers and polymers

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180 compliant

*Properties:* Gardner 2 pastilles; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, MIBK, and ethyl ether; insol. in lower alcohols and glycols; m.w. 1800; sp.gr. 0.940; soften. pt. (R&B) 98 C; acid no. < 1; flash pt. (COC) 500 F

*Precaution:* May fuse/block/lump during hot weather, if stored near steam pipes or sources of heat, and upon prolonged storage; gradually oxidize and darken, affecting sol.

**Pigmosol®** [BASF AG]

*Uses:* Org. and inorg. pigments for building materials, crop protection agents, artists' colors; papermaking for highly lightfast paper coloring and wallpapers; colorants for pigmenting glues; for coloring detergents (speckles), soaps

**Pilot® SXS-40** [Pilot]

*Chem. Descrip.:* Sodium xylene sulfonate

CAS 1300-72-7; EINECS/ELINCS 215-090-9

*Uses:* Coupling agent, hydrotrope, solubilizer, solvent in org. polymers and dyestuffs, petrol. industry, pulping, animal glues; solubilizer, hydrotrope for textiles; dispersant and stabilizer for lowering cloud pt. and visc. in liq. detergents

*Properties:* Lt. yel. clear liq.; dens. 9.9 lb/gal; pH 7.5; 42% total solids; anionic

**Piosafe 30** [Vinings Ind.]

*Uses:* Surf. sizing agent for safety and security papers such as checks and stock certificates for size press; treated sheet turns dk. brn. if alterations in printed material or signatures are attempted with bleaching chems.

*Properties:* Liq.

**Pittclor®** [PPG Ind.]

*Chem. Descrip.:* Calcium hypochlorite

CAS 7778-54-3; EINECS/ELINCS 231-908-7

*Uses:* Algicide, antimicrobial, fungicide for municipal water treatment, sewage treatment, in textile and paper mills, tanneries, wastewater effluent treatment in petrochemical industries; chlorinating agent for swimming pools; disinfectant for cleaning pool parts, locker room floors, etc.

*Properties:* Wh. gran. powd.; m.w. 142.994; sol. in water; dens. 61.1 lb/ft<sup>3</sup>; 65% act.

**Plasmine KN-500** [Plasmine Tech.]

*Chem. Descrip.:* Styrene acrylic copolymer ammonium salt sol'n.

CAS 35209-54-2

*Uses:* Surf. size for acid or alkaline papermaking for size press and calender operations; component of paper/paperboard in contact with aq./fatty/dry foods; imparts exc. ink jet printability to alkaline fine papers and offset printability to wh. papers and board grades; reduces ink feathering and show through; minimizes fugitive sizing effects of internal size

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Water-wh. clear sol'n.; trace odor; completely sol. in water; sp.gr. 1.04; dens. 8.8 lb/gal; visc. 15-35 cps; b.p. 212 F; pH 8-10; 19-21% solids

*Toxicology:* May cause skin/eye irritation, permanent eye injury

*Precaution:* Avoid strong oxidizing agents, acids, strong bases; strong bases may cause release of ammonia

*Hazardous Decomp. Prods.:* Elevated temps. will cause release of sm. amts. of ammonia

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 12 mos shelf life; store @ 40-90 F in closed containers in well-ventilated area; avoid brass, copper, and aluminum fittings/vessels

**Plasmine® N-750-P** [Plasmine Tech.]

*Chem. Descrip.:* Pale highly fortified rosin soap in water

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for papermaking; component of paper/paperboard in contact with aq./fatty/dry foods; for use in wet end at pH range of 4.5-5.5; not shear-sensitive; exc. stability

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Amber liq.; ammonia odor; sol. in cold water; sp.gr. 1.142; dens. 9.51 lb/gal; visc. 120-450 cps; b.p. 105 C; flash pt. nonflamm.; pH 10.5; 50% total solids

*Toxicology:* Alkaline soap; avoid long-term contact; may cause skin and eye irritation or damage

*Precaution:* Keep away from acids

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 1 yr+ shelf life; store in closed container in cool, well-ventilated area; avoid brass and copper fittings

**Plasmine® PLH-50** [Plasmine Tech.]

*Chem. Descrip.:* Pale fortified rosin

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for papermaking; component of paper/paperboard in contact with aq./fatty/dry foods; exc. stability; not shear-sensitive

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Amber liq.; ammonia odor; sol. in cold water; sp.gr. 1.14; dens. 9.54 lb/gal; visc. 18 cps; b.p. 105 C; flash pt. nonflamm.; pH 10.5; 50% solids

*Toxicology:* May cause skin and eye irritation, permanent eye injury; vapor may cause skin and eye irritation; inh. may cause coughing

*Precaution:* Keep away from acids

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 1 yr+ shelf life; store @ 70-85 F in closed containers in well-ventilated area; keep from freezing, but if accidentally frozen, mix thoroughly; avoid brass and copper fittings

**Plasmine® PLH-55** [Plasmine Tech.]

*Chem. Descrip.:* Pale fortified rosin

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for papermaking, bleached and unbleached sulfate pulp, recycled fiber furnish; component of paper/paperboard in contact with aq./fatty/dry foods; for use in wet end at pH range of 4.5-5.5; reduces rosin buildup on presses and felts; freeze-thaw stable

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Amber liq.; ammonia odor; sol. in cold water; sp.gr. 1.158; dens. 9.65 lb/gal; visc. 75 cps; b.p. 105 C; flash pt. nonflamm.; pH 10.5; 50% total solids

*Toxicology:* May cause skin and eye irritation, permanent eye injury; vapor may cause skin and eye irritation; inh. may cause coughing

*Precaution:* Keep away from acids

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 1 yr+ shelf life; store @ R.T.; avoid brass and copper fittings

**Plasthall® 7041** [C.P. Hall]

*Chem. Descrip.:* Long chain alkyl alkylether diester

*Uses:* Plasticizer, softener for rubber, CR, SBR, NBR, nitrile-PVC, PVAc; peptizing agent; transfer aid on correctable ribbon; penetrant and tackifier for computer ribbons, carbon paper

*Properties:* Yel. liq.; sol. in hexane, toluene, kerosene, ethanol, acetone, min. oil; insol. in water; m.w. 492; sp.gr. 0.925; visc. 15 cps; f.p. -51 C; acid no. 0.5; iodine no. nil; sapon. no. 228; flash pt. 182 C; ref. index 1.449; 0.08% moisture

**Plasthall® 7049** [C.P. Hall]

*Chem. Descrip.:* Alkyl oleate

*Uses:* Plasticizer for SBR; transfer aid on correctable ribbon; penetrant and tackifier for computer ribbons, carbon paper

*Properties:* Gardner 5 clear oily liq.; sol. in hexane, toluene, kerosene, ethanol, acetone, min. oil; insol. in water; sp.gr. 0.874; visc. 25 cps; f.p. -55 C; acid no. 1.3; iodine no. 69; sapon. no. 145; flash pt. 191 C; ref. index 1.4590; 0.10% moisture

**Plasthall® R-9** [C.P. Hall]

*Chem. Descrip.:* Octyl tallate

*Uses:* Transfer aid on correctable ribbon; penetrant and tackifier for computer ribbons, carbon paper; plasticizer for SBR, CR; imparts good low temp. flexibility

*Properties:* Yel. to amber liq.; sol. in hexane, toluene, kerosene, min. oil; insol. in water; m.w. 398; sp.gr. 0.873; visc. 17 cps; f.p. -10 C; acid no. 0.2; sapon. no. 141; flash pt. 213 C; ref. index 1.459; 0.10% moisture

**Plioliute® AC** [Goodyear]

*Chem. Descrip.:* Styrene/acrylate emulsion copolymer

CAS 9010-92-8

*Uses:* UV-resist. resin for solv.-based masonry and concrete coatings, swimming pool paints, waterproof texture and masonry coatings, concrete curing membranes and sealers, aluminum, metallic, and high-build maintenance coatings, paper coatings, metallic and silk screen inks, dry electrophotographic toners

*Properties:* Sol. in aromatic solvs., aliphatic blends, chlorinated HC, esters, ketones; sp.gr. 1.04; dens. 8.66 lb/gal; ref. index 1.546; hardness (Sward) 46 (24 h); dissip. factor 0.0089 (100 Hz); dielec. const. 2.61 (100 Hz); vol. resist.  $7.8 \times 10^{15}$  ohm-cm

**Pliolite® AC-3** [Goodyear]

*Chem. Descrip.:* Vinyltoluene/acrylate

*Uses:* Rheological modifier used in masonry paints, concrete floor enamels, waterproof masonry coatings, fill coats, paper coatings (barrier coatings, gloss overlacquers), metallic and gravure inks

*Properties:* Wh. friable gran., odorless, tasteless; sp.gr. 1.028; dens. 8.56 lb/gal; bulk dens. 25.7 lb/ft<sup>3</sup>; ref. index 1.562

**Pliolite® AC-L** [Goodyear]

*Chem. Descrip.:* Styrene/acrylate emulsion copolymer

CAS 9010-92-8

*Uses:* Resin for solv.-based masonry and concrete coatings, swimming pool paints, waterproof texture and masonry coatings, concrete sealers, aluminum, metallic, and high-build maintenance coatings, paper coatings, gloss overlacquers, metallic and silk screen inks

*Properties:* Sp.gr. 1.04; dens. 8.66 lb/gal; ref. index 1.546; hardness (Sward) 40 (24 h)

**Pliolite® S-5D** [Goodyear]

*Chem. Descrip.:* S/B emulsion copolymer

CAS 9003-55-8

*Uses:* Resin for solv.-based coatings, concrete stains, waterproof texture and masonry coatings, concrete curing membranes, aluminum and metallic maintenance coatings, paper coatings, dry electrophotographic toners, silk screen inks

*Properties:* Sol. in aromatic solvs., aliphatic blends, chlorinated HC, esters, ketones; sp.gr. 1.05; dens. 8.74 lb/gal; ref. index 1.585; hardness (Sward) 12 (24 h); dissip. factor 0.0007 (100 Hz); dielec. const. 2.60 (100 Hz); vol. resist.  $3 \times 10^{15}$  ohm-cm

**Pliolite® S-5E** [Goodyear]

*Chem. Descrip.:* S/B emulsion copolymer

CAS 9003-55-8

*Uses:* Resin for solv.-based coatings, concrete stains, waterproof texture and masonry coatings, concrete sealers, traffic paints, aluminum and metallic maintenance coatings, paper coatings, metallic inks, dry electrophotographic toners

*Properties:* Sol. in aromatic solvs., aliphatic blends, chlorinated HC, esters, ketones; sp.gr. 1.05; dens. 8.74 lb/gal; ref. index 1.585; hardness (Sward) 9 (24 h); dissip. factor 0.0007 (100 Hz); dielec. const. 2.60 (100 Hz); vol. resist.  $3 \times 10^{15}$  ohm-cm

**Pliolite® VT** [Goodyear]

*Chem. Descrip.:* Vinyl-toluene/butadiene emulsion copolymer

*Uses:* Film-former for solv.-based traffic paints, block fillers, paper coatings, adhesives, laminates, printing inks, hot melts, abrasion-resist. coatings, masonry and concrete paints, waterproof coatings; produces films with clarity, str., hardness and chem. resist.

*Properties:* Sol. in aromatic solvs., aliphatic blends, chlorinated HC, esters, ketones; sp.gr. 1.026; dens. 8.56 lb/gal; ref. index 1.57; hardness (Sward) 20 (24 h); dissip. factor 0.0010 (100 Hz); dielec. const. 2.58 (100 Hz); vol. resist.  $6.97 \times 10^{15}$  ohm-cm

**Pliolite® VTAC** [Goodyear]

*Chem. Descrip.:* Vinyl-toluene/acrylate emulsion copolymer

*Uses:* Resin used for solv.-based coatings, waterproof texture and masonry coatings, intumescent fire-retardant paints, concrete curing membranes and sealers, paper coatings, gloss overlacquers, silk screen inks, dry electrophotographic toners

*Properties:* Sol. in aromatic solvs., aliphatic blends, chlorinated HC, esters, ketones; sp.gr. 1.026; dens. 8.56 lb/gal; ref. index 1.57; hardness (Sward) 20 (24 h); dissip. factor 0.0019 (100 Hz); dielec. const. 2.60 (100 Hz); vol. resist.  $6.91 \times 10^{15}$  ohm-cm

**Pliolite® VT-L** [Goodyear]

*Chem. Descrip.:* Vinyl-toluene/butadiene emulsion copolymer

*Uses:* Resin used in solv.-based coatings, concrete floor enamels, waterproof

texture and masonry coatings, paper coatings (gloss overlacquers)

*Properties:* Sp.gr. 1.03; dens. 8.57 lb/gal; ref. index 1.558; hardness (Sward) 32 (24 h)

**Plonon 102** [NOF]

*Chem. Descrip.:* POE-POP ether

*Uses:* Emulsifier, solubilizer, dispersant, detergent, antifoam, wetting agent used in soaps, syn. resins, metal cleaning, emulsion polymerization, fermentation, paper industries

*Properties:* Colorless liq.; odorless and tasteless; m.w. 1250; sol. in water, ethanol, acetone, benzol, dioxane; visc. 105 cs (37.8 C); HLB 7; cloud pt. 22 C (10% aq.); surf. tens. 41.1 dynes/cm (0.1%); 100% conc.; nonionic

**Plonon 104** [NOF]

*Chem. Descrip.:* POE-POP ether

*Uses:* Emulsifier, solubilizer, dispersant, detergent, antifoam, wetting agent used in soaps, syn. resins, metal cleaning, emulsion polymerization, fermentation, paper industries

*Properties:* Colorless liq.; odorless and tasteless; m.w. 1650; sol. in water, ethanol, acetone, benzol, dioxane; visc. 105 cs (37.8 C); HLB 15.0; cloud pt. 64 C (10% aq.); surf. tens. 43.5 dynes/cm (0.1%); 100% conc.; nonionic

**Plonon 201** [NOF]

*Chem. Descrip.:* POE-POP ether

*Uses:* Emulsifier, solubilizer, dispersant, detergent, antifoam, wetting agent used in soaps, syn. resins, metal cleaning, emulsion polymerization, fermentation, paper industries

*Properties:* Colorless liq.; odorless and tasteless; m.w. 2200; sol. in ethanol, acetone, benzol, dioxane; visc. 190 cs (37.8 C); HLB 3; cloud pt. 21 C (10% aq.); surf. tens. 38 dynes/cm (0.1%); 100% conc.; nonionic

**Plonon 204** [NOF]

*Chem. Descrip.:* POE-POP ether

*Uses:* Emulsifier, solubilizer, dispersant, detergent, antifoam, wetting agent used in soaps, syn. resins, metal cleaning, emulsion polymerization, fermentation, paper industries

*Properties:* Colorless paste; odorless and tasteless; m.w. 3400; sol. in water, ethanol; visc. 370 cs (37.8 C); HLB 13.5; cloud pt. 64 C (10% aq.); surf. tens. 39.8 dynes/cm (0.1%); 100% conc.; nonionic

**Plonon 208** [NOF]

*Chem. Descrip.:* POE-POP ether

*Uses:* Emulsifier, solubilizer, dispersant, detergent, antifoam, wetting agent used in soaps, syn. resins, metal cleaning, emulsion polymerization, fermentation, paper industries

*Properties:* Colorless paste; odorless and tasteless; m.w. 8000; sol. in water; HLB 28; cloud pt. 100 C (10% aq.); surf. tens. 44.1 dynes/cm (0.1%); 100% conc.; nonionic

**Pluracol® E400 NF** [BASF]

*Chem. Descrip.:* PEG-8

CAS 25322-68-3; EINECS/ELINCS 225-856-4

*Uses:* Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditioner, antistat, sizing agent, dispersant for cosmetic and oral care preps., metal polishing and cleaning formulations, rubber prods., paper and wood prods., textile processing, ink formulations; excipient, carrier, solvent in pharmaceuticals; chemical intermediate

*Properties:* Liq.; m.w. 400; visc. 7.4 cs (99 C); pour pt. 5 C; flash pt. (COC) 182 C; nonionic

**Pluracol® E600 NF** [BASF]

*Chem. Descrip.:* PEG-12

CAS 25322-68-3; EINECS/ELINCS 229-859-1

*Uses:* Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditioner, antistat, sizing agent, dispersant for cosmetics, oral care preps., metal polishing and cleaning formulations, rubber prods., paper and wood prods., textile processing, ink formulations; excipient, carrier, solvent for pharmaceuticals; chemical intermediate

*Properties:* Liq.; m.w. 600; visc. 10.8 cs (99 C); pour pt. 20 C; flash pt. (COC) 249 C; nonionic

**Pluracol® E1450** [BASF]

*Chem. Descrip.:* PEG-32

CAS 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Chemical intermediate, base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditioner, antistat, sizing agent, dispersant for pharmaceutical, cosmetic, and oral care preparations, in metal polishing and cleaning formulations, rubber prods., paper and wood prods., textile processing, ink formulations

*Properties:* Solid; m.w. 1450; visc. 28.5 cs (99 C); m.p. 45 C; flash pt. (COC) 255 C

**Pluracol® E2000 [BASF]**

*Chem. Descrip.:* PEG-40

CAS 25322-68-3

*Uses:* Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditioner, antistat, sizing agent, dispersant for pharmaceuticals, cosmetics, oral care preps., metal polishing and cleaning formulations, rubber prods., paper and wood prods., textile processing, ink formulations; chemical intermediate

*Properties:* Solid; m.w. 2000; visc. 43.5 cs (99 C); m.p. 52 C; flash pt. (COC) > 260 C; nonionic

**Pluracol® E4500 [BASF]**

*Chem. Descrip.:* PEG

*Uses:* Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditioner, antistat, sizing agent, dispersant for pharmaceuticals, cosmetics, oral care preps., metal polishing and cleaning formulations, rubber prods., paper and wood prods., textile processing, ink formulations; chemical intermediate

*Properties:* Solid; m.w. 4500; visc. 170 cs (99 C); m.p. 60 C; flash pt. (COC) > 260 C

**Pluracol® E8000 [BASF]**

*Chem. Descrip.:* PEG-150

CAS 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditioner, antistat, sizing agent, dispersant for pharmaceuticals, cosmetics, oral care preps., metal polishing and cleaning formulations, rubber prods., paper and wood prods., textile processing, ink formulations; chemical intermediate

*Properties:* Solid; m.w. 8000; visc. 750 cs (99 C); m.p. 61 C; flash pt. (COC) > 260 C; nonionic

**Pluriol® E 200 [BASF AG]**

*Chem. Descrip.:* PEG

*Uses:* Solubilizer; impregnating agent; humectant; mold release agent; flow improver; thermal and hydraulic fluid; org. intermediate; detergent and cleaner; dye and pigment dispersant; inks; textile and coatings industry; coloring ceramics; softener in paper industry; plasticizer in adhesives industry and in prod. of cellulose film; ceramics and metalworking lubricant

*Properties:* Clear colorless liq.; m.w. 200; water-sol.; dens. 1.12 g/cc; visc. 55-65 cs.; m.p. < -40 C; flash pt. > 150 C; pH 6.0-7.5 (1% aq.); 100% conc.; nonionic

**Pluriol® E 1500 [BASF AG]**

*Chem. Descrip.:* PEG

*Uses:* Solubilizer; humectant; binder and hardener in personal care prods.; dispersant for dyes and pigments; inks; textiles; coatings; coloring ceramics; paper industry softener; plasticizer in adhesives industry and prod. of cellulose film; ceramics and metalworking lubricants; aux. for copper and nickel electroplating baths; electrolytic polishing of steel

*Properties:* Wh. fine powder; m.w. 1500; water-sol.; bulk dens. 0.6 kg/l; visc. 25-35 cs (99 C); m.p. 45 C; flash pt. > 230 C; pH 6.0-7.5 (1% aq.); 100% conc.; nonionic

**Pluriol® E 4000 [BASF AG]**

*Chem. Descrip.:* PEG

*Uses:* Solubilizer; humectant; binder and hardener in personal care prods.; dispersant for dyes and pigments; inks; textiles; coatings; coloring ceramics; paper industry softener; plasticizer in adhesives industry and prod. of cellulose film; lubricant, dispersant, mold release for rubbers; cure activator in min.-filled compds.

*Properties:* Wh. fine powder; m.w. 4000; water-sol.; bulk dens. 0.6 kg/l; visc. 80-130 cs (99 C); m.p. 55 C; flash pt. > 240 C; pH 6.0-7.5 (1% aq.); 100% conc.; nonionic

**Pluriol® E 6000 [BASF AG]**

*Chem. Descrip.:* PEG

*Uses:* Solubilizer; humectant; binder and hardener in personal care prods.; dispersant for dyes and pigments; inks; textiles; coatings; coloring ceramics; paper industry softener; plasticizer in adhesives and prod. of cellulose film

*Properties:* Wh. fine powder; m.w. 6000; water-sol.; bulk dens. 0.6 kg/l; visc. 300 cs (99 C); m.p. 60 C; flash pt. > 240 C; pH 6.0-7.5 (1% aq.); 100% conc.; nonionic

**Pluriol® E 8000 [BASF AG]**

*Chem. Descrip.:* PEG

*Uses:* Solubilizer, humectant; binder/hardener in personal care prods.; dispersant for dyes/pigments; inks; textiles; coatings; ceramics; paper industry softener; plasticizer in adhesives industry and prod. of cellulose film; mold release for rubbers

*Properties:* Nonionic

**Pluriol® E 9000 [BASF AG]**

*Chem. Descrip.:* PEG

*Uses:* Solubilizer, humectant; binder/hardener in personal care prods.; dispersant for dyes/pigments; inks; textiles; coatings; ceramics; paper industry softener; plasticizer in adhesives industry and prod. of cellulose film; mold release for rubbers

*Properties:* Wh. fine powder; m.w. 9000; water-sol.; bulk dens. 0.6 kg/l; visc. 1900 cs (99 C); m.p. 65 C; flash pt. > 240 C; pH 6.0-7.5 (1% aq.); 100% conc.; nonionic

**Pluronic® 10R5 [BASF]**

*Chem. Descrip.:* Merxapol 105

CAS 9003-11-6

*Uses:* Emulsifier, wetting agent, binder, stabilizer, plasticizer, lubricant, solubilizer, dispersant, visc. control agent, defoamer, intermediate for hard surface detergents, rinse aids, automatic dishwashing, textile processing, paints, latexes, cosmetics, pulp, paper, and petrol. industries, agric. prods., in iodophors, water treating systems, fermentation, cutting and grinding fluids

*Properties:* Liq.; sol. in water, propylene glycol, xylene, IPA, ethyl acetate, perchloroethylene, IPM; m.w. 1970; sp.gr. 1.058; visc. 400 cps; HLB 21.0; cloud pt. 69 C (1% aq.); flash pt. (COC) > 450 F; pour pt. 15 C; ref. index. 1.4587; surf. tens. 50.9 dynes/cm; 100% act.; nonionic

*Toxicology:* LD50 (oral) 3 to > 10 g/kg, (dermal) > 1 to > 10 g/kg; minimal to mild eye and skin irritation

**Pluronic® 17R2 [BASF]**

*Chem. Descrip.:* Merxapol 172

CAS 9003-11-6

*Uses:* Detergent, oil emulsifier for hard surface detergents, textile processing, paints, latexes; defoamer; wetting agent; deduster; demulsifier; dispersant; dye leveling agent; gellant; antistat; syn. lubricant base fluid for metalworking and textile lubricants, chem. intermediates; pulp/paper additive; low-foam

*Properties:* Liq.; sol. in water, xylene, IPA; ethyl acetate, perchloroethylene, IPM, trichlorotrifluoroethane; m.w. 2100; sp.gr. 1.030; visc. 350 cps; HLB 4.0; pour pt. -25 C; cloud pt. 39 C (1% aq.); flash pt. (COC) > 450 F; ref. index 1.4535; surf. tens. 41.9 dynes/cm (0.1%); Draves wetting > 360 s (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 3 to > 10 g/kg, (dermal) > 1 to > 10 g/kg; minimal to mild eye and skin irritation

**Pluronic® 25R2 [BASF]**

*Chem. Descrip.:* Merxapol 252

CAS 9003-11-6

*Uses:* Low-foam detergent, oil emulsifier, wetting agent, defoamer for hard surf. detergents, rinse aids, automatic dishwashing, textile processing, paints, latexes; wetting and rinse aid; lubricant and leveling agent for paper coating

*Properties:* Liq.; sol. in xylene, IPA, ethyl acetate, perchloroethylene, IPM, trichlorotrifluoroethane; m.w. 3120; sp.gr. 1.039; visc. 680 cps; HLB 6.3; pour pt. -5 C; cloud pt. 33 C (1% aq.); flash pt. (COC) > 450 F; ref. index 1.4541; surf. tens. 37.5 dynes/cm (0.1%); Draves wetting 38 s (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 3 to > 10 g/kg, (dermal) > 1 to > 10 g/kg; minimal to mild eye and skin irritation

**Pluronic® F38 [BASF]**

*Chem. Descrip.:* Poloxamer 108

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints

*Properties:* Prilled; sol. in ethanol, propylene glycol, water, toluene; m.w. 5000; dens. 8.9 lb/gal (77 C); sp.gr. 1.07 (77 C); visc. 260 cps (77 C); m.p. 48 C; HLB 30.5; cloud pt. > 100 C (1% aq.); flash pt. (COC) 505 F; surf. tens. 52.2 dynes/cm (0.1% conc.); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® F68 [BASF]**

*Chem. Descrip.:* Poloxamer 188

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints

*Properties:* Prilled; sol. in ethanol, water; m.w. 8350; dens. 8.8 lb/gal (77 C); sp.gr. 1.06 (77 C); visc. 1000 cps (77 C); m.p. 52 C; HLB 29.0; cloud pt. > 100 C (1% aq.); flash pt. (COC) 500 F; surf. tens. 50.3 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® F68LF [BASF]

*Chem. Descrip.:* Poloxamer 108

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Flake; m.w. 7700; sol. in toluene; sp.gr. 1.06 (77 C); dens. 8.7 lb/gal (77 C); visc. 850 cps (77 C); m.p. 50 C; cloud pt. 32 C (1% aq.); 100% conc.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® F77 [BASF]

*Chem. Descrip.:* Poloxamer 217

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints

*Properties:* Prilled; sol. in ethanol, water, toluene; m.w. 6600; dens. 8.7 lb/gal (77 C); sp.gr. 1.04 (77 C); m.p. 48 C; HLB 24.5; cloud pt. > 100 C (1% aq.); flash pt. (COC) 485 F; surf. tens. 47.0 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® F87 [BASF]

*Chem. Descrip.:* Poloxamer 237

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints

*Properties:* Prilled; sol. in ethanol, water, toluene; m.w. 7700; dens. 8.7 lb/gal (77 C); sp.gr. 1.04 (77 C); visc. 700 cps. (77 C); m.p. 49 C; HLB 24.0; cloud pt. > 100 C (1% aq.); flash pt. (COC) 472 F; surf. tens. 44.0 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® F88 [BASF]

*Chem. Descrip.:* Poloxamer 238

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Prilled; sol. in ethanol and water; m.w. 10,800; dens. 8.8 lb/gal (77 C); sp.gr. 1.06 (77 C); visc. 2300 cps (77 C); m.p. 54 C; HLB 28.0; cloud pt. > 100 C (1% aq.); surf. tens. 48.5 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® F98 [BASF]

*Chem. Descrip.:* Poloxamer 288

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints

*Properties:* Prilled; sol. in ethanol, water, perchloroethylene; m.w. 13,000; dens. 8.8 lb/gal (77 C); sp.gr. 1.06 (77 C); visc. 2700 cps (77 C); m.p. 55 C; HLB 27.5; cloud pt. > 100 C (1% aq.); flash pt. (COC) 491 F; surf. tens. 43.0 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® F108 [BASF]

*Chem. Descrip.:* Poloxamer 338

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints

*Properties:* Prilled; sol. in ethanol, water; m.w. 14,000; dens. 8.8 lb/gal (77 C); sp.gr. 1.06 (77 C); visc. 8000 cps (77 C); m.p. 57 C; HLB 27.0; cloud pt. > 100 C (1% aq.); flash pt. (COC) 495 F; surf. tens. 41.2 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® F127 [BASF]

*Chem. Descrip.:* Poloxamer 407

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints

*Properties:* Prilled; sol. in ethanol, water, toluene, perchloroethylene; m.w. 12,500; dens. 8.8 lb/gal (77 C); sp.gr. 1.05 (77 C); visc. 3100 cps (77 C); m.p. 56 C; HLB 22.0; cloud pt. > 100 C (1% aq.); surf. tens. 40.6 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® L10 [BASF]

*Chem. Descrip.:* PO/EO block copolymer

CAS 9003-11-6

*Uses:* Surfactant, defoamer, emulsifier, demulsifier, solubilizer, detergent, dispersant, binder, stabilizer, gellant, wetting agent, rinse aid, chemical intermediate in cosmetics, textiles, paper, petrol., paints, metal cleaning; low-foam

*Properties:* Liq.; m.w. 3200; visc. 660 cps; HLB 14.0; pour pt. -5 C; cloud pt. 32 C (1% aq.); surf. tens. 41 dynes/cm (0.1%); Draves wetting > 360 s (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® L31 [BASF]

*Chem. Descrip.:* Poloxamer 101

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Liq.; sol. in ethanol, propylene glycol, water, toluene, xylene, perchloroethylene; m.w. 1100; dens. 8.5 lb/gal; sp.gr. 1.02; visc. 165 cps; HLB 4.5; cloud pt. 37 C (1% aq.); flash pt. 439 F (COC); pour pt. -32 C; ref. index 1.4515; surf. tens. 46.9 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® L35 [BASF]

*Chem. Descrip.:* Poloxamer 105

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Liq.; sol. in ethanol, propylene glycol, water, toluene, xylene, perchloroethylene; m.w. 1900; dens. 8.8 lb/gal; sp.gr. 1.06; visc. 340 cps; HLB 18.5; cloud pt. 77 C (1% aq.); pour pt. 7 C; surf. tens. 48.8 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

#### Pluronic® L43 [BASF]

*Chem. Descrip.:* Poloxamer 123

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Liq.; sol. in ethanol, propylene glycol, water, toluene, xylene, perchloroethylene; m.w. 1850; dens. 8.7 lb/gal; sp.gr. 1.04; visc. 310 cps; HLB 12.0; cloud pt. 42 C (1% aq.); pour pt. -1 C; ref. index 1.4563; surf. tens. 47.3 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L44 [BASF]**

*Chem. Descrip.:* Poloxamer 124

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Liq.; m.w. 2200; dens. 8.8 lb/gal; sp.gr. 1.05; visc. 440 cps; HLB 16.0; cloud pt. 65 C (1% aq.); flash pt. (COC) 464 F; pour pt. 16 C; ref. index 1.4580; surf. tens. 45.3 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L61 [BASF]**

*Chem. Descrip.:* Poloxamer 181

CAS 9003-11-6

*Uses:* Low-foam detergent, defoamer, oil emulsifier for machine dishwasher and rinse aids, laundry detergents, hard surf. cleaners, fermentation, emulsion polymerization, agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Liq.; sol. in ethanol, toluene, xylene, perchloroethylene; m.w. 2000; sp.gr. 1.01; dens. 8.4 lb/gal; visc. 285 cps; HLB 3.0; pour pt. -29 C; cloud pt. 24 C (1% aq.); flash pt. (COC) 455 F; ref. index 1.4520; 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L62 [BASF]**

*Chem. Descrip.:* Poloxamer 182

CAS 9003-11-6

*Uses:* Low-foam detergent, oil emulsifier for machine dishwasher and rinse aids, laundry detergents, emulsion polymerization, agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Liq.; sol. in ethanol, propylene glycol, water, toluene, xylene, perchloroethylene; m.w. 2500; sp.gr. 1.03; dens. 8.6 lb/gal; visc. 400 cps; HLB 7.0; pour pt. -4 C; cloud pt. 32 C (1% aq.); flash pt. (COC) 466 F; surf. tens. 42.8 dynes/cm (0.1%); Draves wetting 78 s (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L62D [BASF]**

*Chem. Descrip.:* Poloxamer 108

CAS 9003-11-6

*Uses:* Low-foam detergent, oil emulsifier for laundry detergents, agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

*Properties:* Liq.; sol. in ethanol, propylene glycol, water, toluene, xylene, perchloroethylene; m.w. 2350; sp.gr. 1.04; dens. 8.7 lb/gal; visc. 385 cps; HLB 7; pour pt. -1 C; cloud pt. 35 C (1% aq.); ref. index 1.4557; surf. tens. 43 dynes/cm (0.1%); Draves wetting 206 s (0.1%); 100% conc.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L62LF [BASF]**

*Chem. Descrip.:* Poloxamer 108

CAS 9003-11-6

*Uses:* Detergent, oil emulsifier for rinse aids, laundry detergents, agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes; low-foam

*Properties:* Liq.; sol. in ethanol, propylene glycol, water, toluene, xylene, perchloroethylene; m.w. 2450; sp.gr. 1.03; dens. 8.6 lb/gal; visc. 400 cps; HLB 7; pour pt. -10 C; cloud pt. 28 C (1% aq.); ref. index 1.4546; surf. tens. 39 dynes/cm (0.1%); Draves wetting 118 s (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L64 [BASF]**

*Chem. Descrip.:* Poloxamer 184

CAS 9003-11-6

*Uses:* Wetting agent, emulsifier, demulsifier, foam and visc. control agent,

dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, latexes, paints

*Properties:* Liq.; sol. in ethanol, propylene glycol, water, toluene, xylene, perchloroethylene; m.w. 2900; dens. 8.8 lb/gal; sp.gr. 1.05; visc. 550 cps; HLB 15.0; cloud pt. 61 C (1% aq.); flash pt. (COC) 485 F; pour pt. 16 C; ref. index 1.4575; surf. tens. 43.2 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L81 [BASF]**

*Chem. Descrip.:* Poloxamer 231

CAS 9003-11-6

*Uses:* Detergent, oil emulsifier, defoamer for hard surf. cleaners, fermentation, emulsion polymerization, agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes; low-foam

*Properties:* Liq.; sol. in ethanol, toluene, xylene, perchloroethylene; m.w. 2750; sp.gr. 1.02; dens. 8.5 lb/gal; visc. 475 cps; HLB 2.0; pour pt. -37 C; cloud pt. 20 C (1% aq.); ref. index 1.4526; 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L92 [BASF]**

*Chem. Descrip.:* Poloxamer 282

CAS 9003-11-6

*Uses:* Detergent, wetting agent, oil emulsifier for hard surf. cleaners, emulsion polymerization, agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes; low-foam

*Properties:* Liq.; sol. in ethanol, toluene, xylene, perchloroethylene; m.w. 3650; sp.gr. 1.03; dens. 8.6 lb/gal; visc. 700 cps; HLB 5.5; pour pt. 7 C; cloud pt. 26 C (1% aq.); flash pt. (COC) 445 F; ref. index 1.4547; surf. tens. 35.9 dynes/cm (0.1%); Draves wetting 15 s (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® L101 [BASF]**

*Chem. Descrip.:* Poloxamer 331

CAS 9003-11-6

*Uses:* Detergent, oil emulsifier, defoamer for fermentation, emulsion polymerization, agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes; low-foam

*Properties:* Liq.; sol. in ethanol, toluene, xylene, perchloroethylene; m.w. 3800; sp.gr. 1.02; dens. 8.5 lb/gal; visc. 800 cps; HLB 1.0; pour pt. -23 C; cloud pt. 15 C (1% aq.); ref. index 1.4524; 100% act.; nonionic

CAS 9003-11-6

**Uses:** Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

**Properties:** Paste; sol. in ethanol, toluene, xylene, perchloroethylene; m.w. 5850; dens. 8.7 lb/gal (60 C); sp.gr. 1.04 (60 C); visc. 550 cps (60 C); m.p. 37.5; HLB 13.0; cloud pt. 81 C (1% aq.); flash pt. (COC) 448 F; pour pt. 32 C; surf. tens. 33.1 dynes/cm (0.1%); 100% act.; nonionic

**Toxicology:** LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® P105 [BASF]**

**Chem. Descrip.:** Poloxamer 335

CAS 9003-11-6

**Uses:** Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

**Properties:** Paste; sol. in ethanol, toluene, xylene, perchloroethylene; m.w. 6500; dens. 8.8 lb/gal (60 C); sp.gr. 1.05 (60 C); visc. 800 cps (60 C); m.p. 42 C; HLB 15.0; cloud pt. 91 C (1% aq.); pour pt. 35 C; surf. tens. 39.1 dynes/cm (0.1%); 100% act.; nonionic

**Toxicology:** LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® P123 [BASF]**

**Chem. Descrip.:** Poloxamer 403

CAS 9003-11-6

**Uses:** Wetting agent, emulsifier, demulsifier, foam and visc. control agent, dispersant, antistat, gellant, dyeing assistant, leveling agent, lubricant for agric., cosmetics, metal cleaning, pulp/paper, textile scouring, water treatment, paints, latexes

**Properties:** Paste; sol. in ethanol, toluene, xylene, perchloroethylene; m.w. 5750; dens. 8.5 lb/gal (60 C); sp.gr. 1.02 (60 C); visc. 350 cps (60 C); m.p. 31 C; HLB 8.0; cloud pt. 90 C (1% aq.); pour pt. 31 C; surf. tens. 34.1 dynes/cm (0.1%); 100% act.; nonionic

**Toxicology:** LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

**Pluronic® P-2000 [BASF]**

**Chem. Descrip.:** PPG-2

CAS 25322-69-4

**Uses:** Skin softener, nonoily emollient for cosmetic creams/lotions, bath oils, blushers, skin fresheners, aftershaves, nail enamel removers; binder; lubricant; dispersant; emulsifier; food pkg. adhesives, coatings, paper, polymers; defoamer for aq. systems, food contact, mold release applics., paints, ceramics, grinding fluids, hydraulic fluids; lubricant base for textiles, paper, metalworking formulations; chemical intermediate for fatty acid esters; component for urethanes

**Regulatory:** FDA 21CFR §173.310, 173.340(a)(3), 175.105, 175.300, 175.380,

175.390, 176.170(a)(5), 176.180, 176.200, 176.210, 177.1680, 178.3740

**Properties:** APHA 40 max. liq., polyol odor; sol. @ 5% in min. oils, min. spirits, aromatic solvs., perchloroethylene; insol. in water; m.w. 2000; sp.gr. 1.002; visc. 150-175 cst (100 F); vapor pressure < 0.1 mm Hg; b.p. > 300 F; acid no. 1 max.; pour pt. -31 C; flash pt. (PMCC) > 350 F; ref. index 1.450; 100% act.; nonionic

**Toxicology:** LD50 (dermal, rabbit) > 30,000 mg/kg, (IP, rat) 4470 mg/kg, (IV, rat) 710 mg/kg; contact with skin and eyes may cause temporary irritation

**Precaution:** Incompat. with strong oxidizing materials

**Hazardous Decomp. Prods.:** Thermal decomp. may produce CO<sub>2</sub>

**Storage:** Store in well-ventilated area below 120 F

**Plyamul® 40305-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Vinyl acetate homopolymer emulsion

CAS 9003-20-7

**Uses:** Adhesive base for high-speed applics., suitable for coated and uncoated paper, corrugated board, and cotton cloth substrates; fast breaking; exc. visc. build with plasticizer or solv. addition

**Properties:** Dens. 8.85-9.15 lb/gal; visc. 1000-2000 cps; pH 4.5-5.5; 54-56% NV

**Storage:** > 3 mos shelf life @ 72 F; protect from freezing

**Plyamul® 40315-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Vinyl acetate homopolymer emulsion

CAS 9003-20-7

**Uses:** Adhesive base suitable for uncoated paper, corrugated board, and cotton cloth substrates; multipurpose; remoistenable; good machinability

**Properties:** 1 μ particle size; dens. 9.1 lb/gal; visc. 1000 cps; surf. tens. 49.5 dynes/cm; pH 5.0; 55% solids; nonionic

**Plyamul® 40351-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Vinyl acetate homopolymer emulsion

CAS 9003-20-7

**Uses:** Adhesive base suitable for wood, uncoated paper, corrugated board, and cotton cloth substrates; hand modifier for textiles; multipurpose

**Properties:** 0.2-3.0 μ particle size; dens. 8.8-9.2 lb/gal; visc. 1400-2000 cps; pH 4.0-5.5; surf. tens. 51-54 dynes/cm; 54-56% solids

**Plyamul® 40354-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Vinyl acetate homopolymer emulsion

CAS 9003-20-7

**Uses:** Adhesive base suitable for wood, uncoated paper, corrugated board, and cotton cloth substrates; multipurpose; higher visc. version of Plyamul 40351-00

**Properties:** 1.75 μ particle size; dens. 9.1 lb/gal; visc. 2300 cps; surf. tens. 52.5 dynes/cm; pH 4.75; 55% solids; nonionic

**Plyamul® 40359-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Vinyl acetate homopolymer emulsion

CAS 9003-20-7

**Uses:** Adhesive base suitable for wood, uncoated paper, corrugated board, and cotton cloth substrates; multipurpose; higher visc. version of Plyamul 40354-00

**Properties:** 1.75 μ particle size; dens. 9.0 lb/gal; visc. 3300 cps; surf. tens. 52.5 dynes/cm; pH 4.75; 55% solids; nonionic

**Plyamul® 40656-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Polyvinyl acetate stabilized with polyvinyl alcohol

**Uses:** Adhesive base designed to provide improved water resist. and fiber tear in paper and pkg. applics.; good wet tack

**Properties:** Visc. 2000-3000 cps

**Plyamul® 97825-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Self crosslinking vinyl acetate copolymer latex

CAS 9003-20-7

**Uses:** Base for wood adhesives, wood binders, and functional coatings, suitable for wood, uncoated paper, and cotton cloth substrates; good cold set, wet tack, and heat resist.; suitable for RF cure applics.; freeze-thaw stable

**Properties:** 1.6 μ particle size; dens. 9.0 lb/gal; visc. 4000 cps; surf. tens. 39.5 dynes/cm; pH 5.0; 50% solids; nonionic

**Storage:** < 3 mos shelf life @ 72 F; protect from freezing; material will crosslink on storage

**Plyamul® 97897-00 [Reichhold/Emulsion Polymers]**

**Chem. Descrip.:** Vinyl acetate homopolymer

CAS 9003-20-7

**Uses:** Adhesive base or binder for tape joint compds.; provides clear water resist. films for uncoated paper and corrugated board; borax stable

**Properties:** 0.2-1.5 μ particle size; dens. 8.8-9.2 lb/gal; visc. 1000-2200 cps; surf. tens. 48-51 dynes/cm; pH 4.5-5.5; 57-59% NV

*Storage:* > 3 mos shelf life @ 72 F; protect from freezing

**PM 3082** [Hercules/Resins]

*Chem. Descrip.:* Aliphatic hydrocarbon resin

*Uses:* Resin used in pressure-sensitive adhesives, hot-melt adhesives and coatings, waterproofing, paints/varnishes; tackifying resin in rubber compounding; thermoplastic road-marking applics.; food-contact adhesives, paper, rubber articles, wood preservatives; chem. and moisture resist.; UV stable

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.2600, 178.3800 compliant

*Properties:* Gardner 4 pastilles; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, MIBK, and ethyl ether; insol. in alcohols and glycols; sp.gr. 0.950; visc. 6.1 stokes (70% resin solids in toluene); soften. pt. (R&B) 101 C; acid no. < 1; flash pt. (COC) 520 F

*Precaution:* May fuse/block/lump during hot weather, if stored near steam pipes or sources of heat, and upon prolonged storage; gradually oxidize and darken, affecting sol.

**PMO Ashless 150** [Texaco]

*Chem. Descrip.:* Min. oil with inhibitors

*Uses:* Antiwear circulating oil providing corrosion/rust protection to paper machine lubrication systems, gear drive units, pumps, self-contained bearings in industrial applics.; metal-free; environmentally friendly; exc. water separation, oxidation and deposit resist., filterability

*Properties:* Lt. red color; visc. 150 cSt (40 C), 14.2 cSt (100 C); flash pt. (COC) 485 F

**PMO Ashless 220** [Texaco]

*Chem. Descrip.:* Min. oil with inhibitors

*Uses:* Antiwear circulating oil providing corrosion/rust protection to paper machine lubrication systems, gear drive units, pumps, self-contained bearings in industrial applics.; metal-free; environmentally friendly; exc. water separation, oxidation and deposit resist., filterability

*Properties:* Very dk. red color; visc. 220 cSt (40 C), 18.4 cSt (100 C); flash pt. (COC) 490 F

**PMO Ashless 320** [Texaco]

*Chem. Descrip.:* Min. oil with inhibitors

*Uses:* Antiwear circulating oil providing corrosion/rust protection to paper machine lubrication systems, gear drive units, pumps, self-contained bearings in industrial applics.; metal-free; environmentally friendly; exc. water separation, oxidation and deposit resist., filterability

*Properties:* Very dk. red color; visc. 320 cSt (40 C), 23.4 cSt (100 C); flash pt. (COC) 495 F

**PMO Ashless 460** [Texaco]

*Chem. Descrip.:* Min. oil with inhibitors

*Uses:* Antiwear circulating oil providing corrosion/rust protection to paper machine lubrication systems, gear drive units, pumps, self-contained bearings in industrial applics.; metal-free; environmentally friendly; exc. water separation, oxidation and deposit resist., filterability

*Properties:* Very dk. red color; visc. 437 cSt (40 C), 28.4 cSt (100 C); flash pt. (COC) 500 F

**Pogol® 600** [Huntsman]

*Chem. Descrip.:* PEG 600

CAS 25322-68-3; EINECS/ELINCS 229-859-1

*Uses:* Surfactant intermediate; intermediate for fatty acid esters; solubilizer, lubricant used in paper coating mixes; antisticking agent; oil resistor; antistat, softener, humectant, and lubricant for textiles, metalworking

*Properties:* Pt-Co < 50 color; clear paste; m.w. 570-630; dens. 1.1257 g/ml (20 C); visc. 64 cps; f.p. 20-25 C; flash pt. (PMCC) 210 C; ref. index 1.4699; pH 5.5-7.0 (5% aq.); 100% act.; nonionic

**Polelectron® 430** [ISP]

*Chem. Descrip.:* Styrene/PVP copolymer

CAS 25086-29-7

*Uses:* Binder and adhesive for wood, cotton, paper, glass fiber, flour, concrete; laundry processing; stabilizer for detergents; surf., textile, and paper coatings; latex rug backings; floor wax emulsions; opacifier and thickener for cleaning prods.; opacifier for shampoos, conditioners, acid rinses, permanent waves, setting lotions; dye acceptor in hair color preps.

*Properties:* Milky-wh. fluid emulsion; < 0.5 µ particle size; visc. 750 cps (@ pH 2-5); 40% solids

**Polidene® 33-031** [Scott Bader]

*Chem. Descrip.:* VdC copolymer plasticized with a phosphate plasticizer

*Uses:* Used in textile fibers; binder for fire-retardant fabrics; impregnant and adhesive for papers

*Properties:* Emulsion; particle size 0.3 µ; sp.gr. 1.10; visc. 0.05-0.50 poise; pH 7.0-8.0; 50 ± 1% solids

**Polybond® 3002** [Uniroyal]

*Chem. Descrip.:* PP homopolymer, maleic anhydride-modified

*Uses:* Chemical coupling agent for talc, glass, and mica-reinforced PP giving enhanced physical and thermal props.; compatibilizer for blends, e.g., PP/polyamide, PP/EVOH giving improved processability and mech. props.; adhesion agent for filled or reinforced polyolefins; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 176.170, 177.1210, 177.1390, 177.1520

*Properties:* Pellets; melt flow 7 g/10 min; dens. 0.91 g/cc; m.p. 157 C

**Polybond® 3150** [Uniroyal]

*Chem. Descrip.:* PP homopolymer, maleic anhydride-modified

*Uses:* Chemical coupling agent for glass, mica, and talc-reinforced PP giving enhanced physical and thermal props.; compatibilizer for blends such as PP/polyamide and PP/EVOH to improve processability and mech. props.; adhesion agent for filled or reinforced polyolefins; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 176.170, 177.1210, 177.1390, 177.1520

*Properties:* Pellets; melt flow 50 g/10 min (230 C); dens. 0.91 g/cc; m.p. 157 C

**Polyco® 3250** [Rohm & Haas]

*Chem. Descrip.:* Vinyl acrylic copolymer

*Uses:* Binder for paper and paperboard coatings; alkali-swellable; contributes good gloss and balanced ink receptivity; replacement for natural binders such as casein and protein; helps reduce risk of bacterial contamination associated with natural binders

*Properties:* Sp.gr. 1.08; dens. 9.0 lb/gal; visc. 100 cps; pH 5.0; 45% solids; anionic

**Polyco® 6108NP** [Rohm & Haas]

*Chem. Descrip.:* Acrylic/vinyl acetate copolymer

CAS 25067-02-1

*Uses:* Binder for paper and paperboard coatings; exc. balance of str., water resist., flexibility, and sheet/print gloss; exc. runnability at high solids or high speeds; high pick resist.; ideal where sheet coverage and printability are desired

*Properties:* Sp.gr. 1.09; dens. 9.1 lb/gal; visc. 500 cps; pH 6.3; 50% solids; anionic

**Polycup® 172** [Hercules]

*Chem. Descrip.:* Polyamide-epichlorohydrin aq. sol'n.

*Uses:* Crosslinking agent for carboxylated SBR latex, carboxymethyl cellulose, PVA, and other water-sol. polymers; water resist. aid for starch-based adhesives and coatings; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Pale amber liq.; water-sol.; sp.gr. 1.03; visc. 50 cps; f.p. -3.9 C; pH 4.7; 12.5% total solids; cationic

*Storage:* 100 days shelf life below 32 C

**Polycup® 1884** [Hercules]

*Chem. Descrip.:* Polyamide-epichlorohydrin aq. sol'n.

*Uses:* Crosslinking agent for carboxylated SBR latex, carboxymethyl cellulose, PVA, and other water-sol. polymers; water resist. aid for starch-based adhesives and coatings; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Pale amber liq.; water-sol.; sp.gr. 1.12; visc. 325 cps; f.p. -6.7 C; pH 4.5; 35% total solids; cationic

*Storage:* 100 days shelf life below 32 C

**Polyfix®** [Showa Highpolymer]

*Chem. Descrip.:* Polyamide epichlorohydrin aq. sol'n.

*Uses:* Wet paper reinforcement; retention aid for paper industry; strengthening additive for construction materials

**Polyflex® 300 Retention Aid** [Cytec Ind.]

*Chem. Descrip.:* Polyacrylamide

CAS 9003-05-8

*Uses:* Retention aid for neutral/alkaline paper and paperboard; wet-end polymer

*Regulatory:* DOT nonregulated

*Properties:* Wh. powd.; odorless; VOC 0.02 lb/gal; 5-10% volatiles; anionic  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 2000 mg/kg; LC50 (inh., rat, 4 h) > 20 mg/l; direct contact may cause minimal eye and skin irritation; not expected to be harmful by ing., inh.; TSCA listed

- Precaution:* Incompat. with strong oxidizing agents; spills are very slippery when wet  
*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, ammonia, NO<sub>x</sub>  
 NFPA: Health 0; Flammability 1; Reactivity 0  
*Storage:* Avoid iron, copper, or aluminum containers/equip. for handling/storage
- PolyFloc™** [Hercules]  
*Uses:* Flocculant for water and wastewater clarification in pulp/paper industry
- PolyFree** [Reichhold]  
*Chem. Descrip.:* Latex-based compd.  
*Uses:* Paper coating providing some grease resist. to detergent boxes, paper/paperboard wraps, concrete and other dry-mix bags, food pkg.; fully repulpable; exc. water resist. and antiblocking  
*Regulatory:* FDA approved  
*Properties:* Clear
- PolyFree OC** [Reichhold]  
*Chem. Descrip.:* Latex-based compd.  
*Uses:* Paper coating incl. food pkg.; for overcoating water-resist. coatings like PolyFree or for use by itself; fully repulpable; exc. moisture/oil/grease resist.; exc. antiblocking  
*Regulatory:* FDA approved  
*Properties:* Clear
- Poly-G® 200** [BASF]  
*Chem. Descrip.:* PEG 200  
 CAS 25322-68-3; EINECS/ELINCS 203-989-9  
*Uses:* Chemical intermediate for prod. of surfactants for cleaners, textiles, cosmetics, personal care prods., rubber mold releases, printing inks and dyes, metalworking fluids, foods, paints, paper, wood prods., adhesives, agric., ceramics, elec. equip., petrol. prods., photographic prods., resins; carrier for pharmaceuticals  
*Properties:* APHA 25 max. liq.; m.w. 200; sol. in water, acetone, ethanol, ethyl acetate, toluene; sp.gr. 1.125; dens. 9.38 lb/gal; visc. 4.3 cs (99 C); flash pt. 171 C (COC); nonionic
- Poly-G® B1530** [BASF]  
*Chem. Descrip.:* PEG 500-600  
*Uses:* Chemical intermediate for prod. of surfactants for cleaners, textiles, cosmetics, personal care prods., rubber mold releases, printing inks and dyes, metalworking fluids, foods, paints, paper, wood prods., adhesives, agric., ceramics, elec. equip., petrol. prods., photographic prods., resins; carrier for pharmaceuticals  
*Properties:* Wh. waxy solid; m.w. 900; somewhat less sol. in water than liq. glycols; sp.gr. 1.104 (50/20 C); dens. 9.20 lb/gal (50/20 C); visc. 15 cs (99 C); f.p. 38-41 C; flash pt. 254 C (COC); pour pt. 38 C
- Polyglyme** [Ferro/Grant]  
*Chem. Descrip.:* Poly(ethylene glycol) dimethyl ether  
 CAS 24991-55-7  
*Uses:* Solvent for removing CO, CO<sub>2</sub>, SO<sub>2</sub>, H<sub>2</sub>S and other sour-gas components from ammonia gas streams, for absorp. of fluorocarbons and other halogenated liq./gases; stack gas scrubbing; brake fluid component; solubilizer for plastic, textile, and paper  
*Properties:* Sl. yel.; very mild nonresidual odor; water-sol.; misc. with ethanol, acetone, benzene, diethyl ether, octane; m.w. 275; sp.gr. 1.04 (20/20 C); dens. 8.6 lb/gal; visc. 12 cP (20 C); vapor pressure < 0.01 mm Hg (20 C); flash pt. (CC) > 130 C  
*Environmental:* Slowly biodeg.
- Polymin® 978 L** [BASF]  
*Chem. Descrip.:* Polyethylenimine and polyamidoamine aq. sol'n.  
*Uses:* Retention aid, drainage aid for paper and board mfg.; improves retention of fibers and fillers, and promotes drainage in paper processing; fixing agent for fillers, fines, pitch, anionic and nonionic colloids, pigment dyes, and direct dyes; reclaims suspended fibers from wh. water and wastewater; effective over broad pH range  
*Properties:* Water-sol.; cationic
- Polymin® KE 78 PF** [BASF]  
*Chem. Descrip.:* High m.w. polyacrylamide powd.  
 CAS 9003-05-8  
*Uses:* Retention aid, drainage aid for paper; improves retention of fines/fillers, and promotes drainage during web formation on paper machines; flocculant in flotation, filtration, and sedimentation processes to reclaim paper fibers from excess wh. water; dewatering agent for sludge; phenol-free; effective in neutral, acid, and sl. alkaline pH ranges  
*Properties:* Cationic
- Polymin® KE 84** [BASF]  
*Chem. Descrip.:* High m.w. polyacrylamide emulsion  
 CAS 9003-05-8  
*Uses:* Retention aid, drainage aid for paper; improves retention of fines/fillers, and promotes drainage during web formation on paper machine; flocculant in flotation, filtration, and sedimentation processes to reclaim paper fibers from excess wh. water; dewatering agent for sludge; effective in neutral, acid, and sl. alkaline pH ranges  
*Properties:* Cationic
- Polymin® PL** [BASF]  
*Chem. Descrip.:* Polyethylenimine aq. sol'n.  
 CAS 9002-98-6  
*Uses:* Retention aid, drainage aid for paper and board mfg.; fixing agent for anionic substances; pitch control agent; reclaims fibers from excess wh. water; drainage aid; wet str. papers; binds fines, fillers, slimy colloids and other org. substances on paper stock; charge modifier in highly contaminated, high hardness systems; most effective at neutral to sl. alkaline pH; can occasionally cause yellowing and impair fluorescent activity of optical brighteners in very wh. grades of paper  
*Properties:* Water-sol.; cationic
- Polymin® PR 266 L** [BASF]  
*Chem. Descrip.:* High m.w. polyacrylamide emulsion  
 CAS 9003-05-8  
*Uses:* Retention aid, drainage aid for paper; reclaims fibers from excess wh. water; effluent treatment; improves fiber retention, filler retention and drainage rates on paper machine wire  
*Properties:* Cationic
- Polymin® PR 971 L** [BASF]  
*Chem. Descrip.:* Polyethylenimine aq. sol'n.  
 CAS 9002-98-6  
*Uses:* Charge modifier in highly contaminated systems; binder for fines, fillers, slimy colloids, and other org. substances in paper stock; accelerates dewatering on the wire and in the press section; produces paper with high wet str.; fixes anionic substances; dye fixative; controls pitch; promotes alkaline size; used with polyacrylamides in dual component systems; can occasionally cause yellowing and impair fluorescent activity of optical brighteners in very wh. grades of paper  
*Properties:* Cationic
- Polymin® PR 973** [BASF]  
*Chem. Descrip.:* High m.w. polyacrylamide powd.  
 CAS 9003-05-8  
*Uses:* Retention aid, drainage aid for paper; improves retention of fines and fillers, and promotes drainage on paper machine wire; precipitant for solids, reclaims fibers from excess wh. water; effluent treatment; most effective at sl. alkaline to sl. acidic pH  
*Properties:* Anionic
- Polymin® PR 8578** [BASF]  
*Chem. Descrip.:* High m.w. polyacrylamide emulsion  
 CAS 9003-05-8  
*Uses:* Retention aid, drainage aid for paper; improves retention of fibers and fillers, and promotes drainage on paper machine wire; reclaims fibers from excess wh. water; effluent treatment  
*Properties:* Cationic
- Polymin® SKA** [BASF]  
*Chem. Descrip.:* Substituted polyethylenimine aq. sol'n.  
 CAS 9002-98-6  
*Uses:* Binder for binding fines, fillers, slimy colloids and dissolved org. substances to paper fibers, esp. for paper and board grades containing mech. or recycled fibers; reclaims fibrous material from excess wh. water; most effect at pH 4-7.5  
*Properties:* Cationic
- Polymin® SNA** [BASF]  
*Chem. Descrip.:* Modified polyethylenimine aq. sol'n.  
 CAS 9002-98-6  
*Uses:* Retention aid, drainage aid for paper and board mfg., esp. for use in highly contaminated systems; aids recovery of fines from paper machine wh. water; binder for fines, slimy colloids, pigments on the fiber; effective over broad pH range; can impair effect of optical brighteners; stable to salts that cause hardness in water  
*Properties:* Water-sol.; cationic
- Polymin® SO** [BASF]  
*Chem. Descrip.:* Aq. sol'n. of high m.w. polyamidoamine

*Uses:* Retention agent, flocculant, fixing agent for fines, slimy colloids, pigment and colloidal substances on fiber in paper; improves drainage rate of paper stock; recovery of fibers from paper machine wh. water; does not reduce brightness of pulp when used up to 0.2%; suitable for use in highly acid media; stable to salts that cause hardness in water

*Properties:* Weakly cationic

**Polyox® WSR 205** [Union Carbide]

*Chem. Descrip.:* PEG-14M

CAS 25322-68-3

*Uses:* Thermoplastic resin; thickener, lubricant, binder, flocculant, wet adhesive, binder/coating for ceramics, papermaking, cosmetics, pharmaceuticals, agric., elec., metals, petrol., textiles; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 600,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 4500-8800 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR 301** [Union Carbide]

*Chem. Descrip.:* PEG-90M

CAS 25322-68-3

*Uses:* Thermoplastic resin; thickener; lubricant; binder; flocculant; wet adhesive; flow modifier, lubricant for construction, military, agric., mining; provides wet adhesion to personal care prods.; foam stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 4,000,000; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 1650-5500 cps (1% aq.); m.p. 62-67 C; pH 8-10 (1% aq.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR 303** [Union Carbide]

*Chem. Descrip.:* Polyethylene oxide

CAS 25322-68-3

*Uses:* Thermoplastic resin; thickener, lubricant, binder, flocculant, wet adhesive for mining, papermaking; foam stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 7,000,000; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 7500-10,000 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR 308** [Union Carbide]

*Chem. Descrip.:* Polyethylene oxide

CAS 25322-68-3

*Uses:* Thermoplastic resin; thickener, lubricant, binder, flocculant, wet adhesive; foam stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 8,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 10,000-15,000 cps (1% aq.); m.p. 62-67 C; pH 8-10

(sol'n.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR 3333** [Union Carbide]

*Chem. Descrip.:* PEG-9M

CAS 25322-68-3

*Uses:* Thermoplastic resin; thickener; lubricant; binder; flocculant; for wet adhesion in papermaking; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 400,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 2250-3350 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR Coagulant** [Union Carbide]

*Chem. Descrip.:* PEG-115M

CAS 25322-68-3

*Uses:* Thermoplastic resin; lubricant in shave prods.; feel modifier providing soft feel; film-former, thickener for aq. systems; flocculant for mining, papermaking; foam stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 5,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 5500-7500 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR N-10** [Union Carbide]

*Chem. Descrip.:* PEG-2M

CAS 25322-68-3

*Uses:* Thermoplastic resin; thickener; lubricant; binder; flocculant; wet adhesive; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 100,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 12-50 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR N-12K** [Union Carbide]

*Chem. Descrip.:* PEG-23M

CAS 25322-68-3

*Uses:* Thermoplastic resin; thickener; lubricant; binder; flocculant; wet adhesive; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 1,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 400-800 cps (2% aq.); m.p. 62-67 C; pH 8-10 (2% aq.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR N-60K** [Union Carbide]

- Chem. Descrip.:* PEG-45M  
CAS 25322-68-3  
*Uses:* Thermoplastic resin; thickener; lubricant; binder; flocculant; wet adhesive; lubricant/emollient in personal care prods.; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)  
*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 2,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 2000-4000 cps (2% aq.); m.p. 62-67 C; pH 8-10 (2% aq.); nonionic  
*Precaution:* Slippery when wet  
*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup
- Polyox® WSR N-80** [Union Carbide]  
*Chem. Descrip.:* PEG-5M  
CAS 25322-68-3  
*Uses:* Thermoplastic resin, thickener, lubricant, binder/coating, flocculant, wet adhesive for agric., ceramics applics.; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)  
*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 200,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 65-115 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic  
*Precaution:* Slippery when wet  
*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup
- Polyox® WSR N-750** [Union Carbide]  
*Chem. Descrip.:* PEG-7M  
CAS 25322-68-3  
*Uses:* Thermoplastic resin, thickener, lubricant, binder/coating, flocculant, wet adhesive for agric., elec., papermaking; emollient for personal care prods.; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)  
*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 300,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 600-1200 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic  
*Precaution:* Slippery when wet  
*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup
- Polyox® WSR N-3000** [Union Carbide]  
*Chem. Descrip.:* PEG-14M  
CAS 25322-68-3  
*Uses:* Thermoplastic resin; thickener; lubricant; binder; flocculant; wet adhesive; binder/coating in elec.; emollient in personal care prods.; dispersant for vinyl polymerization; food-contact coatings, paper/paperboard, polymers, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)  
*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 400,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 2250-4500 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic  
*Precaution:* Slippery when wet  
*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup
- Polypax EGDS** [Pax Group]  
*Chem. Descrip.:* Ethylene glycol distearate  
CAS 627-83-8; EINECS/ELINCS 211-014-3  
*Uses:* Opacifier, pearlescent, plasticizer, visc. builder for pearlescent shampoos; opacifier, antistat, conditioner, plasticizer, lubricant, visc. builder in paper/pulp; low HLB  
*Properties:* Solid; disp. in oil and hydrocarbons; insol. in water; 99% act.
- Polypax EGMS** [Pax Group]  
*Chem. Descrip.:* Ethylene glycol monostearate  
CAS 111-60-4; EINECS/ELINCS 203-886-9  
*Uses:* Opacifier, pearlescent, plasticizer, visc. builder for pearlescent shampoos; opacifier, antistat, conditioner, plasticizer, lubricant, visc. builder in paper/pulp; low HLB  
*Properties:* Solid; disp. in oil and hydrocarbons; insol. in water; 99% act.
- Polypax IC** [Pax Group]  
*Chem. Descrip.:* Polyglycol ester  
*Uses:* Defoamer, emulsifier, dispersant, thickener, leveling agent, lubricant, softener in paper/pulp  
*Properties:* Liq.; sol. in veg. and min. oils; disp. in water; 99% act.; nonionic
- Polypax SMS** [Pax Group]  
*Chem. Descrip.:* Sorbitan monostearate  
CAS 1338-41-6; EINECS/ELINCS 215-664-9  
*Uses:* Surfactant, emulsifier, dispersant, defoamer, lubricant, stabilizer in paper/pulp  
*Properties:* Solid; sol. in oils and hydrocarbons; insol. in water; 99% act.; nonionic
- Polyquat 2 C** [Pax Group]  
*Chem. Descrip.:* Alkyl trimethylammonium chloride  
*Uses:* Biocide for industrial formulations; surfactant, emulsifier, corrosion inhibitor, flocculant, preservative, fungicide, bactericide, antistat, softener in paper/pulp; prevents/controls unwanted growth of microorganisms; minimizes loss due to spoilage  
*Properties:* Liq.; 27% act.; cationic
- Polyquat 188** [Pax Group]  
*Chem. Descrip.:* 3-Chloro-2-hydroxypropyl trimethylammonium chloride  
CAS 3327-22-8; EINECS/ELINCS 222-048-3  
*Uses:* Reagent to quaternize nat. and syn. polymers; starch modifier, biocide in industrial applics.; surfactant, emulsifier, humectant, leveling agent, softener, flocculant, biocide, bactericide, antistat, conditioner in paper/pulp; dyeing assistant  
*Properties:* Liq.; 70% act.; cationic
- Polyquat PR** [Pax Group]  
*Chem. Descrip.:* Fatty acid imidazoline deriv.  
*Uses:* Emulsifier, antistripping agent in bitumen emulsions; corrosion inhibitor, flocculant, dispersant, antistat, demulsifier, lubricant, softener in paper/pulp  
*Properties:* Liq./semisolid; 98% act.
- Polysalt** [BASF AG]  
*Chem. Descrip.:* Salts of polycarboxylic acids  
*Uses:* Dispersant for extenders, paper coating pigments; stabilizer for coating mixtures and slurries; grinding assistant for chalk
- Polyset® 2015** [Int'l. Group]  
*Chem. Descrip.:* HDPE wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Hardener for candles, crayons, and paper coatings; food pkg.; antiblocking agent; dry lubricant; emulsions; gravure separation; hot-melt coatings and adhesives; mold release agent; paper cups and containers; pastes; pigment flushing; plastic additives/processing aids; polishing and potting compd.; rubber compounding; sealants; sculpture and artists' waxes; in food-contact textiles; will enhance performance without significantly affecting melt visc.  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.2600, 177.2800, 178.3850  
*Properties:* Liq. and free-flowing solid; m.w. 780; sp.gr. 0.943; visc. 15-25 cps; soften. pt. 113 C; acid no. nil; drop m.p. 116 C; flash pt. (CC) 232 C min.
- Polysol®** [Showa Highpolymer]  
*Chem. Descrip.:* Syn. resin emulsions (from polymerization of vinyl or olefin monomers)  
*Uses:* Used in adhesives (paper-to-paper, wood-to-wood, plastic-to-paper, etc.), pressure-sensitive adhesives; vehicle for emulsion paint of construction materials and metal; coating/finishing for paper or fabrics; binder for flock finishing to clothes; mortar mix; seed fixing agent
- Polystabil®** [Stockhausen]  
*Uses:* Grinding aid, dispersant for improving rheological props. of pigment slurries in papermaking
- Polystar OM** [NOF]  
*Chem. Descrip.:* Sodium salt of polymeric carboxylic acid

- Uses:* Dispersant, stabilizer for dyes, pigments, clays, agric., rubber, and plastic industries; antistat for pulp/paper industry  
*Properties:* Lt. yel. liq.; anionic
- Polystar OMP** [NOF]  
*Chem. Descrip.:* Sodium salt of polymeric carboxylic acid  
*Uses:* Dispersant, stabilizer for dyes, pigments, clays, agric., rubber, and plastic industries; antistat for pulp/paper industry  
*Properties:* Wh. powd.
- POLYSTEP® A-7** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Sodium dodecylbenzene sulfonate, linear  
CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Emulsifier for emulsion polymerization in paints and coatings, S/B, vinyl chloride, vinylidene chloride latexes; food pkg. adhesives, rubber articles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600, 178.3130, 178.3400  
*Properties:* Yel. slurry; 39% conc.; anionic
- POLYSTEP® A-11** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Isopropylamine dodecylbenzene sulfonate, branched  
CAS 26264-05-1; EINECS/ELINCS 247-556-2  
*Uses:* Pigment dispersant; emulsifier in emulsion polymerization (paints and coatings, S/B, vinyl chloride, vinylidene chloride latexes); defoamer in food-contact paper/paperboard; food-contact rubber articles; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §176.210, 177.2600, 178.3130, 178.3400  
*Properties:* Pale clear visc. liq.; oil-sol.; 88% act.; anionic
- POLYSTEP® A-13** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Linear dodecylbenzene sulfonic acid  
CAS 27176-87-0; EINECS/ELINCS 248-289-4  
*Uses:* Emulsion polymerization surfactants; paints and coatings; catalyst in acid catalyzed reactions; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §176.210, 178.3400  
*Properties:* Dk. visc. liq.; 97% act.; anionic
- POLYSTEP® A-15** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Sodium linear dodecylbenzene sulfonate  
CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Emulsifier for emulsion and styrene polymerization; paints and coatings; food pkg. adhesives, rubber articles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600, 178.3130, 178.3400  
*Properties:* Pale clear to hazy liq.; 22% conc.; anionic
- POLYSTEP® A-15-30K** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Potassium dodecylbenzene sulfonate, linear  
CAS 27177-77-1; EINECS/ELINCS 248-296-2  
*Uses:* Surfactant for styrene-butadiene, vinyl chloride, and vinylidene chloride latexes; emulsion polymerization for paints and coatings; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; thermal and hydrolytic stability  
*Regulatory:* FDA 21CFR §176.210, 177.2600, 178.3130, 178.3400  
*Properties:* Hazy slurry; 30% conc.; anionic
- POLYSTEP® A-16** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Sodium dodecylbenzene sulfonate, branched  
CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Emulsifier for styrene polymerization; paints and coatings; food pkg. adhesives, rubber articles; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600, 178.3130, 178.3400  
*Properties:* Pale turbid liq.; 30% conc.; anionic
- POLYSTEP® A-16-22** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Sodium dodecylbenzene sulfonate, branched  
CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Emulsifier for styrene, vinyl chloride polymerization, emulsion polymerization, paints and coatings; food pkg. adhesives, rubber articles; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600, 178.3130, 178.3400  
*Properties:* Pale turbid liq.; 22% conc.; anionic
- POLYSTEP® A-17** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Dodecylbenzene sulfonic acid, branched  
CAS 27176-87-0; EINECS/ELINCS 248-289-4  
*Uses:* Intermediate for the prod. of sodium salts; neutralized acid as emulsifier;
- salts as emulsifiers for SBR latex; emulsion polymerization; paints and coatings; catalyst for acid catalyzed reactions; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §176.210, 178.3400  
*Properties:* Dk. visc. liq.; water-sol.; dens. 9.1 lb/gal; sp.gr. 1.09; visc. 9000 cps (30 C); 97.4% act.; anionic
- POLYSTEP® AE-120** [Stepan]  
*Uses:* Surfactant; mech. and freeze/thaw stabilizer; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; aids in control of particle size  
*Regulatory:* FDA §176.210, 178.3400 compliant  
*Properties:* Waxy semi-solid; 100% act.; nonionic
- POLYSTEP® AE-307** [Stepan]  
*Uses:* Surfactant; mech. and freeze/thaw stabilizer; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; aids in control of particle size  
*Regulatory:* FDA §176.210, 178.3400 compliant  
*Properties:* Pale clear liq.; 70% act.; nonionic
- POLYSTEP® B-3** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Sodium lauryl sulfate  
CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Emulsifier for emulsion polymerization of S/B, vinyl chloride, sol. acrylics, paints and coatings; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.1210, 177.2600, 177.2800, 178.3400; USP approved  
*Properties:* Wh. powd.; 97.5% act.; anionic
- POLYSTEP® B-5** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Sodium lauryl sulfate  
CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Emulsifier for emulsion polymers, incl. vinyl chloride, S/B, acrylic, paints and coatings; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.1210, 177.2600, 177.2800, 178.3400  
*Properties:* Pale yel. clear liq.; 30% act.; anionic
- POLYSTEP® B-7** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Ammonium lauryl sulfate  
CAS 2235-54-3; EINECS/ELINCS 218-793-9  
*Uses:* Emulsion polymerization surfactant; latex foaming agent; water resist. aid in coatings; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.1210, 177.2600, 177.2800, 178.3400  
*Properties:* Pale clear liq.; 30% act.; anionic
- POLYSTEP® B-11** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Ammonium laureth sulfate (4 EO)  
CAS 32612-48-9  
*Uses:* Emulsifier for emulsion polymerization (acrylics, styrene-acrylic, vinyl acrylics, S/B, paints, coatings); food pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3400  
*Properties:* Pale clear liq.; 59% act.; anionic
- POLYSTEP® B-20** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Ammonium laureth sulfate (30 EO)  
CAS 32612-48-9  
*Uses:* Emulsifier for emulsion polymerization (acrylics, styrene-acrylics, vinyl acrylics), floor finish latexes, paints and coatings; food pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; good water resistance  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3400  
*Properties:* Pale clear liq.; 30% act.; anionic
- POLYSTEP® B-22** [Stepan; Stepan Canada]  
*Chem. Descrip.:* Ammonium laureth sulfate (12 EO)  
CAS 32612-48-9  
*Uses:* Emulsifier for acrylic copolymers, emulsion polymerization, paints and coatings; food pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3400

- Properties:* Pale clear liq.; 30% act.; anionic
- POLYSTEP® B-23** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Sodium laureth-12 sulfate  
 CAS 9004-82-4; EINECS/ELINCS 221-416-0  
*Uses:* High active emulsifier for emulsion polymerization (acrylics, styrene-acrylics, vinyl acrylics); food pkg. adhesives; defoamer in food-contact paper/paperboard; somewhat monomer sol.  
*Regulatory:* FDA 21CFR §175.105, 176.210  
*Properties:* Amber hazy liq.; oil-sol.; 60% act.; anionic
- POLYSTEP® B-24** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Emulsifier for emulsion polymerization (S/B, vinyl chloride, acrylic, styrene acrylic, PVC, paints, coatings); food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard; low cloud pt.  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.1210, 177.2600, 177.2800, 178.3400  
*Properties:* Pale clear liq.; 30% act.; anionic
- POLYSTEP® B-330S** [Stepan]  
*Chem. Descrip.:* Sodium laureth sulfate preserved with Kathon CG  
 CAS 9004-82-4; EINECS/ELINCS 221-416-0  
*Uses:* Emulsion polymerization surfactant used in latex mfg.; controls latex particle size; food pkg. adhesives; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard; useful in most polymer systems esp. vinyl chloride and S/B emulsions; contains no formaldehyde  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3400; kosher  
*Properties:* Clear liq.; sp.gr. 1.03; dens. 8.6 lb/gal; visc. 57 cps; f.p. -2 C; pour pt. 1 C; cloud pt. 4 C; flash pt. (PMCC) > 94 C; pH 7.5 (10% aq.); 28.5% act.; anionic  
*Toxicology:* LD50 (oral) > 5 g/kg; pract. nontoxic orally; mild to mod. skin and mod. eye irritant at 10% act.  
*Environmental:* Biodeg.  
*Storage:* Store in sealed container above 7 C; avoid overheating or freezing
- POLYSTEP® C-OP3S** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Sodium octoxynol-3 sulfate  
*Uses:* Emulsifier for controlling particle size in vinyl acetate specialty copolymers, in emulsion polymerization, paints and coatings; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* Wh. visc. disp.; 20% act.; anionic
- POLYSTEP® F-1** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-4  
 CAS 9016-45-9; EINECS/ELINCS 230-770-5  
*Uses:* Pigment dispersant; emulsifier for emulsion polymerization (styrene acrylic, acrylic, vinyl acrylic, S/B, paints, coatings); food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; nonfoaming  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Water wh. to pale yel. clear liq.; oil-sol.; 100% act.; nonionic
- POLYSTEP® F-2** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-6  
 CAS 9016-45-9  
*Uses:* Pigment dispersant; emulsion polymerization; paints and coatings; contributes mech. and freeze/thaw stability to latexes; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; allows control of particle size  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Pale clear liq.; oil-sol.; 100% act.; nonionic
- POLYSTEP® F-3** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-8  
 CAS 9016-45-9  
*Uses:* Pigment dispersant; emulsifier for polymerization (styrene acrylic, acrylic, vinyl acrylic, S/B, paints, coatings); contributes mech. and freeze/thaw stability to latexes; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; allows control of particle size  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Water-wh. to pale yel. clear liq.; water-sol.; 100% act.; nonionic
- POLYSTEP® F-4** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-10  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* Emulsifier for emulsion polymerization (styrene acrylic, acrylic, vinyl acrylic, S/B, paints, coatings); food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles
- Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400
- Properties:* Water-wh. to pale yel. clear liq.; 100% act.; nonionic
- POLYSTEP® F-5** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-12  
 CAS 9016-45-9  
*Uses:* Emulsifier and stabilizer for emulsion polymerization (styrene acrylic, acrylic, vinyl acrylic, S/B, paints, coatings); food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; allows control of particle size;  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Water-wh. to pale yel. clear to turbid liq.; 100% act.; nonionic
- POLYSTEP® F-6** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-14  
 CAS 9016-45-9  
*Uses:* Emulsifier for emulsion polymerization (styrene acrylic, acrylic, vinyl acrylic, S/B, paints, coatings); food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Water-wh. to pale yel. clear to turbid liq.; 100% act.; nonionic
- POLYSTEP® F-9** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-30  
 CAS 9016-45-9  
*Uses:* Emulsifier in emulsion polymerization; paints and coatings; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Water-wh. to pale yel. clear to hazy liq. or gel; 70% act.; nonionic
- POLYSTEP® F-9S** [Stepan]  
*Chem. Descrip.:* Nonoxynol-30  
 CAS 9016-45-9  
*Uses:* Surfactant for emulsion polymerization, paints and coatings; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Wh. waxy solid; 100% act.; nonionic
- POLYSTEP® F-10** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-40  
 CAS 9016-45-9  
*Uses:* Emulsifier for acrylics and vinyl acetate, emulsion polymerization, paints and coatings; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Clear to hazy liq. or gel; 70% conc.; nonionic
- POLYSTEP® F-95B** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-34  
 CAS 9016-45-9  
*Uses:* Emulsifier for acrylics and vinyl acetate, emulsion polymerization, paints and coatings; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; blended with other surfactants to increase the latex particle size  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400  
*Properties:* Clear liq.; 70% act.; nonionic
- POLYSTEP® LAS-50** [Stepan]  
*Chem. Descrip.:* Linear sodium dodecylbenzene sulfonate  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Surfactant for emulsion polymerization, paints and coatings; food pkg. adhesives, rubber articles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600, 178.3400  
*Properties:* Yel. slurry; 50% act.; anionic
- POLYSTEP® OP-9** [Stepan]  
*Chem. Descrip.:* Octylphenol ethoxylate, 9 EO  
 CAS 9002-93-1  
*Uses:* Surfactant for emulsion polymerization, paints and coatings; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.180, 176.210, 178.3400  
*Properties:* Pale, clear liq.; 100% act.; nonionic
- POLYSTEP® OP-3070** [Stepan]  
*Chem. Descrip.:* Octylphenol ethoxylate, 30 EO  
 CAS 9002-93-1  
*Uses:* Surfactant for emulsion polymerization, paints and coatings; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400

*Properties:* Clear/hazy liq.; 70% act.; nonionic

**POLYSTEP® OP-4070** [Stepan]

*Chem. Descrip.:* Octylphenol ethoxylate, 40 EO

CAS 9002-93-1

*Uses:* Surfactant for emulsion polymerization, paints and coatings; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400

*Properties:* Clear/hazy liq.; 70% act.; nonionic

**Polystix® 90 Resin** [Hercules/Resins]

*Chem. Descrip.:* Dimerized rosin

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* For soldering fluxes, construction mastics, and various adhesives and protective coatings; food pkg. adhesives, coatings, paper, cellophane, polymers, films, rubber articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.380, 175.390, 176.170, 176.180, 176.210, 177.1200, 177.1210, 177.1400, 177.2600 compliant

*Properties:* Gardner 8 (50% resin solids in toluene) solid or flakes; sol. in most alcohols, esters, ketones, hydrocarbons, and chlorinated solvs.; insol. in water; sp.gr. 1.07; softens. pt. 90 C; acid no. 150

*Precaution:* May fuse/block/lump during hot weather, if stored near steam pipes or sources of heat, and upon prolonged storage; gradually oxidize and darken, affecting sol.

**Polysynth NDW** [Pax Group]

*Chem. Descrip.:* Proprietary blend of nonionic emulsifiers and fatty acid/alcohol derivs.

*Uses:* Defoamer in paper/pulp; rec. where silicone defoamers are not advisable

*Properties:* Paste; 33% act.; nonionic

*Environmental:* Totally biodeg.

**Polysynth RRE** [Pax Group]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* Retanning agent, dispersant, scale inhibitor, flocculant, thickener, stabilizer in paper/pulp; cost-effective

*Properties:* Visc. liq.; 30% act.

**Polysynth SD** [Pax Group]

*Chem. Descrip.:* Silicone oil-based

*Uses:* Defoamer for industrial applics., paper/pulp; highly effective

*Properties:* Liq.; 30% act.

**Polysynth SI 40** [Pax Group]

*Chem. Descrip.:* Organically modified silicone oil emulsion

*Uses:* Softener imparting good handle to textile fabrics, leather; mold release agent, slip agent, softener in paper/pulp; provides surf. feel enhancement

*Properties:* Liq.; 40% act.

**Poly-Tergent® E-17A** [BASF]

*Chem. Descrip.:* EO/PO block polymer

CAS 9003-11-6

*Uses:* Surfactant, foam control agent, solubilizer, dispersant, wetting agent, spreading agent for automatic dishwashing, rinse aids, industrial laundry, metal cleaning, water treatment, textiles, agric., paper processing; low-foaming

*Properties:* APHA 50 clear liq., mild odor; sol. in water, alcohols, glycol ethers, aromatic and aliphatic hydrocarbons, chlorinated solvs.; sp.gr. 1.02; dens. 8.5 lb/gal; pour pt. -30 C; cloud pt. 32 C (1% aq.); flash pt. (COC) 232 C; pH 4.5-7.5 (1% aq.); surf. tens. 42 dynes/cm (0.1%); Draves wetting 43 s (0.1%); Ross-Miles foam 18 mm (0.1%, initial); 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) 2.7 g/kg, (dermal, rabbit) >2 g/kg; may cause irritation to skin and eyes

*Storage:* Store between 21-49 C

**Poly-Tergent® E-17B** [BASF]

*Chem. Descrip.:* EO/PO block polymer

CAS 9003-11-6

*Uses:* Surfactant, foam control agent, solubilizer, dispersant, wetting agent, spreading agent for automatic dishwashing, rinse aids, industrial laundry, metal cleaning, water treatment, textiles, agric., paper processing; low-foaming

*Properties:* APHA 50 clear liq., mild odor; sol. in water, alcohols, glycol ethers, aromatic and aliphatic hydrocarbons, chlorinated solvs.; sp.gr. 1.02; dens. 8.5 lb/gal; pour pt. -35 C; cloud pt. 35 C (1% aq.); flash pt. (COC) 232 C; pH 4.5-7.5 (1% aq.); surf. tens. 44 dynes/cm (0.1%); Draves

wetting > 300 s (0.1%); Ross-Miles foam 25 mm (0.1%, initial); 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) 4.2 g/kg, (dermal, rabbit) > 2 g/kg; may cause irritation to skin and eyes

*Storage:* Store between 21-49 C

**Poly-Tergent® E-20B** [BASF]

*Chem. Descrip.:* EO/PO block copolymer

CAS 9003-11-6

*Uses:* Low toxicity foam control agent, solubilizer for automatic dishwashing, rinse aids, industrial laundry, metal cleaning, water treatment, and textile formulations; dispersant, wetting agent, and spreading agent for agric. formulations; used in paper processing, kraft pulping, and spent cooling liquor

*Properties:* Liq.; 100% conc.; nonionic

**Poly-Tergent® E-25B** [BASF]

*Chem. Descrip.:* EO/PO block polymer

CAS 9003-11-6

*Uses:* Surfactant, foam control agent, solubilizer, dispersant, wetting agent, spreading agent for automatic dishwashing, rinse aids, industrial laundry, metal cleaning, water treatment, textiles, agric., paper processing; low-foaming

*Properties:* APHA 50 clear liq., mild odor; sol. in water, alcohols, glycol ethers, aromatic and aliphatic hydrocarbons, chlorinated solvs.; sp.gr. 1.03; dens. 8.6 lb/gal; pour pt. -10 C; cloud pt. 29 C (1% aq.); flash pt. (COC) 232 C; pH 4.5-7.5 (1% aq.); surf. tens. 42 dynes/cm (0.1%); Draves wetting > 300 s (0.1%); Ross-Miles foam 20 mm (0.1%, initial); 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; LC50 (inh., rat) > 200 mg/l; nonirritating to skin and eyes

*Storage:* Store between 21-49 C

**Poly-Tergent® P-32A** [BASF]

*Chem. Descrip.:* EO/PO block polymer

CAS 9003-11-6

*Uses:* Surfactant, demulsifier, dedusting agent, dispersant for rinse aids, dishwashing, metal cleaning, papermaking; low-foaming

*Properties:* APHA 50 max. clear liq.; mild odor; sol. in alcohols, glycol ethers, aromatic hydrocarbons, chlorinated solvs.; insol. in water; sp.gr. 1.02; dens. 8.5 lb/gal; pour pt. -33 C; cloud pt. 15 C (1% aq.); flash pt. (COC) 229 C; pH 5.0-7.5 (1% aq.); surf. tens. 43 dynes/cm (0.1%); 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) 2.5 g/kg, (dermal, rabbit) > 2 g/kg; may cause irritation to skin and eyes

*Storage:* Store between 21-49 C

**Poly-Tergent® S-205LF** [BASF]

*Chem. Descrip.:* Alkoxylated linear alcohol

*Uses:* Surfactant for dishwashing applics., metal cleaning baths; foam depressant in hard surface cleaners; cleaner for dairy industry; rewetting agent for paper toweling

*Properties:* APHA 100 max. clear liq.; mild odor; sol. in water, alcohols, glycol ethers, aromatic hydrocarbons, chlorinated solvs.; sp.gr. 1.00; visc. 192 cs; flash pt. 229 C (COC); cloud pt. 10 C (1% aq.); pH 5.5-7.0 (1% aq.); surf. tens. 32 dynes/cm (0.1%); 100% act.; nonionic

**Polywax® 500** [Baker Petrolite]

*Chem. Descrip.:* Polyethylene homopolymer (m.w. 500)

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, flow modifier, release agent, antiozonant/antiblock for plastics, rubber; nucleating agent for expandable PS; slip agent for printing inks; leveling/slip agent for powd. coatings; visc. modifier for hot-melt adhesives; cosmetic ingreds.; wax modifier; chewing gum base; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings

*Regulatory:* Incl. FDA §172.888, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 178.3720, 179.45

*Properties:* Prills; low sol. in org. solvs., esp. at R.T.; sol. in CCl<sub>4</sub>, benzene, xylene, toluene, turpentine; m.w. 500; melt index > 5000 g/10 min; dens. 0.93 g/cc; visc. 6.6 cps (99 C); m.p. 88 C; soften. pt. (R&B) 88 C

**Polywax® 600** [Baker Petrolite]

*Chem. Descrip.:* Polyethylene homopolymer (m.w. 600)

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Syn. polymer for food and food contact applics.; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; defoamer in food-contact coatings, paper/paperboard; outstanding heat stability and resist. to chemical attack

*Regulatory:* FDA 21CFR §172.888, 175.105, 175.125, 175.300, 175.320,

176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 177.2800, 178.3720, 178.3850, 179.45

*Properties:* Visc. 64 SUS (149 C); m.p. 94 C

**Polywax® 655** [Baker Petrolite]

*Chem. Descrip.:* Polyethylene homopolymer (m.w. 655)

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, flow modifier, release agent, antiblock for plastics processing; nucleating agent for expandable PS; slip aid for printing inks; leveling/slip agent for powd. coatings; visc. modifier for hot-melt adhesives; cosmetic ingreds.; wax modifier; chewing gum base; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings

*Regulatory:* Incl. FDA 21CFR §172.888, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 178.3720, 179.45

*Properties:* Prilled; low sol. in org. solvs., esp. at R.T.; sol. in CCl<sub>4</sub>, benzene, xylene, toluene, turpentine; m.w. 655; melt index > 5000 g/10 min; dens. 0.94 g/cc; visc. 5 cps (149 C); m.p. 99 C; soften. pt. (R&B) 99 C

**Polywax® 850** [Baker Petrolite]

*Chem. Descrip.:* Polyethylene homopolymer (m.w. 850)

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, flow modifier, release agent, antiblock for plastics processing; nucleating agent for expandable PS; slip aid for printing inks; leveling/slip agent for powd. coatings; visc. modifier for hot-melt adhesives; cosmetic ingreds.; wax modifier; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings

*Regulatory:* Incl. FDA 21CFR §172.888, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 178.3720, 179.45

*Properties:* M.w. 850; melt index > 5000 g/10 min; dens. 0.96 g/cc; visc. 8.5 cs (149 C); m.p. 107 C; soften. pt. (R&B) 107 C

**Polywax® 1000** [Baker Petrolite]

*Chem. Descrip.:* Polyethylene homopolymer (m.w. 1000)

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, flow modifier, release agent, antiblock for plastics processing; nucleating agent for expandable PS; slip aid for printing inks; leveling/slip agent for powd. coatings; visc. modifier for hot-melt adhesives; cosmetic ingreds.; wax modifier; food pkg. adhesives, coatings, paper, cellophane, rubber, textiles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.888, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 177.2800, 178.3720, 178.3850, 179.45

*Properties:* Prilled; low sol. in org. solvs., esp. at R.T.; sol. in CCl<sub>4</sub>, benzene, xylene, toluene, turpentine; m.w. 1000; melt index > 5000 g/10 min; dens. 0.96 g/cc; visc. 12 cps (149 C); m.p. 113 C; soften. pt. (R&B) 113 C

**Polywax® 2000** [Baker Petrolite]

*Chem. Descrip.:* Polyethylene homopolymer (m.w. 2000)

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, flow modifier, release agent, antiblock for plastics processing; nucleating agent for expandable PS; slip aid for printing inks; leveling/slip agent for powd. coatings; visc. modifier for hot-melt adhesives; cosmetic ingreds.; wax modifier; food pkg. adhesives, coatings, paper, cellophane, polymers, rubber; defoamer in food-contact coatings, paper/paperboard; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §173.20, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520(c) (2.1)-(2.3), 177.2600, 178.3570, 178.3850, 179.45

*Properties:* Prilled; low sol. in org. solvs., esp. at R.T.; sol. in CCl<sub>4</sub>, benzene, xylene, toluene, turpentine; m.w. 2000; melt index > 5000 g/10 min; dens. 0.97 g/cc; visc. 48 cps (149 C); m.p. 126 C; soften. pt. (R&B) 126 C

**Polywax® 3000** [Baker Petrolite]

*Chem. Descrip.:* Polyethylene homopolymer (m.w. 3000)

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, flow modifier, release agent, antiblock for plastics processing; nucleating agent for expandable PS; slip aid for printing inks; leveling/slip agent for powd. coatings; visc. modifier for hot-melt adhesives; cosmetic ingreds.; wax modifier; food pkg. adhesives, coatings, paper, cellophane, polymers, rubber; defoamer in food-contact coatings, paper/paperboard; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §173.20, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520(c) (2.1)-(2.3), 177.2600, 178.3570, 178.3850, 179.45

*Properties:* M.w. 3000; melt index > 5000 g/10 min; dens. 0.98 g/cc; visc. 130 cps (149 C); m.p. 129 C; soften. pt. (R&B) 129 C

**PolyWeb® 5000** [Georgia-Pacific Resins]

*Chem. Descrip.:* High charge dens. polymer

*Uses:* Minimizes wet web breaks in the pressroom and controls linting in thin or thick stock systems for newsprint

*Properties:* Burgundy liq.; visc. 75 cps; pH 5.5; 12.5% NV; cationic

**Polywet® ND-2** [Uniroyal]

*Chem. Descrip.:* Sodium polyacrylate, bisulfite terminated aq. sol'n.

CAS 9003-04-7

*Uses:* Nonfoaming dispersant for pigments, mins., extenders, fillers in aq. systems; latex paints and enamels; food pkg. coatings, adhesives, paper/paperboard, polymers; dispersant, scale inhibitor for water treatment, cooling towers, boiler water; controls sludge; prep. of color concs.; defoamer in food-contact paper; effective over wide pH range; resists hydrolysis; stable to acid and alkali

*Use Level:* 20-40 ppm (scale inhibitor, cooling or boiler water)

*Regulatory:* FDA 21CFR §173.73, 173.310, 173.340, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1210; Australia, Canada, EU, Japan, Korea, and Philippines compliances

*Properties:* Colorless to slight yel. clear liq., char. odor; sol. in alcohols and water; m.w. ≈ 1000; sp.gr. 1.16; visc. 24-40 cps; pH 6.8-7.8; 25% act.; anionic

*Toxicology:* LD50 (oral, rat) 23 g/kg; eye irritant

*Environmental:* LC50 (bluegill sunfish, 95 h) > 8000 ppm; nontoxic to fish or activated sludge microorganisms

*Storage:* Store in closed containers away from sources of direct heat in a dry area; stable to prolonged storage below freezing

**Polywet® ND-35** [Uniroyal]

*Chem. Descrip.:* Sodium polyacrylate, bisulfite terminated, aq. sol'n.

CAS 9003-04-7

*Uses:* Nonfoaming dispersant for pigments, extenders, and fillers in aq. systems; efficient in all latex paints, incl. gloss latex enamels; dispersant in shipment of inorg. pigment slurries; scale inhibitor for water treatment; food pkg. adhesives, coatings, paper, polymers; defoamer in food-contact coatings; effective over broad pH range

*Regulatory:* FDA 21CFR §173.73, 173.310, 173.340, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1210; Australia, Canada, EU, Japan, Korea, and Philippines compliances

*Properties:* Colorless to sl. yel. liq.; char. odor; sol. in alcohols and water; sp.gr. 1.25; visc. 50-90 cps; pH 7.2; 34% solids; anionic

*Toxicology:* Expected LD50 (oral, rat) > 11 g/kg; sl. irritating to eyes; nonirritating to skin; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents

*Storage:* Store away from sources of direct heat in dry area; keep containers closed when not in use; stable to prolonged storage at temps. below freezing

**Polywet® WTC 6512** [Uniroyal]

*Chem. Descrip.:* Sodium polyacrylate, bisulfite terminated, aq. sol'n.

CAS 9003-04-7

*Uses:* Dispersant; antiscalant; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §173.73, 173.310, 173.340, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1210; Australia, Canada, EU, Japan, Korea, and Philippines compliances

*Properties:* Yel. to amber liq.; char. odor; sol. in alcohols and water; sp.gr. 1.30; visc. 400-1300 cps; pH 6.8-7.8; 48% solids; anionic

*Toxicology:* Expected LD50 (oral, rat) 10 g/kg; may cause eye irritation; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents

*Storage:* Store away from sources of direct heat in dry area; keep containers closed when not in use; stable to prolonged storage at temps. below freezing

**Polywet® Z1766** [Uniroyal]

*Chem. Descrip.:* Sodium polyacrylate, bisulfite terminated, aq. sol'n.

CAS 9003-04-7

*Uses:* Dispersant for titanium dioxide, other pigments for coatings; boiler water additives; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings; effective over broad pH range; resists hydrolysis

*Regulatory:* FDA 21CFR §173.73, 173.310, 173.340, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1210; Australia, Canada, EU, Japan, Korea, and Philippines compliances

*Properties:* Colorless to sl. yel. clear to opalescent liq., char. odor; sol. in alcohols and water; sp.gr. 1.23; visc. 180-350 cps; pH 7.0; 35% act.; anionic

*Toxicology:* LD50 (oral, rat) > 12.3 g/kg; nonirritating to eyes and skin

## Ponolith™ Blue BW Liq.

*Storage:* Store in closed containers away from sources of direct heat in a dry area; stable to prolonged storage below freezing

### Ponolith™ Blue BW Liq. [Bayer/Industrial Chems.]

*Uses:* Pigment for papers (sized, acid, alkaline, coatings), tinting applics.; brilliant grn.-shade blue; exc. lightfastness; not bleachable in hypochlorite; very good affinity for clay fillers

*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 100 cps; pH 10.5

### Ponolith™ Blue NPEF Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, for stock additions, and coating applics.

*Properties:* Liq.

### Ponolith™ Blue PT Liq. [Bayer/Industrial Chems.]

*Uses:* Pigment for papers (sized, acid, alkaline, coatings), esp. for tinting wh. papers; red-shade blue; exc. lightfastness; not bleachable in hypochlorite; very good affinity for clay fillers

*Properties:* Liq.; dens. 9.0 lb/gal; visc. < 100 cps; pH 8.4

### Ponolith™ Blue RDC Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Pigment for papers (sized, acid, alkaline, coatings), esp. for tinting of alkaline and acid papers; brilliant grn.-shade blue; exc. lightfastness; not bleachable in hypochlorite; very good affinity for clay fillers

*Properties:* Liq.; dens. 9.5 lb/gal; visc. < 100 cps; pH 9.5

### Ponolith™ Blue RT Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Pigment for papers (sized, acid, alkaline), esp. for tinting of alkaline and acid wh. papers; economical; red-shade blue; very good lightfastness; not bleachable in hypochlorite; very good affinity for clay fillers

*Properties:* Liq.; dens. 8.7 lb/gal; visc. < 100 cps; pH 7.1

### Ponolith™ Fast Black P Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Carbon black disp.

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Pigment for papers (sized, acid, alkaline, coatings), esp. for tinting acid and alkaline-sized wh. papers.; blk.; exc. lightfastness; not bleachable in hypochlorite; very good affinity for clay fillers

*Properties:* Liq.; dens. 9.9 lb/gal; visc. < 100 cps; pH 8.2

### Ponolith™ Fast Black PLD Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, for stock additions, and coating applics.

*Properties:* Liq.

### Ponolith™ Fast Blue C Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Pigment for papers (sized, acid, alkaline, coatings), esp. for tinting of alkaline and acid wh. papers; red-shade blue; exc. lightfastness; not bleachable in hypochlorite; very good affinity for clay fillers

*Properties:* Liq.; dens. 9.1 lb/gal; visc. < 100 cps; pH 8.7

### Ponolith™ Fast Blue PT Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, for stock additions, and coating applics.

*Properties:* Liq.

### Ponolith™ Fast Violet 4RN Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Pigment with mod. brilliance for papers (tinting of sized, acid, alkaline, coatings), suitable for tinting and deeper shades; violet; partially bleachable in hypochlorite; exc. lightfastness; very good affinity for clay fillers; good affinity for CaCO<sub>3</sub> and TiO<sub>2</sub> fillers

*Properties:* Liq.; dens. 8.8 lb/gal; visc. < 100 cps; pH 8.6

### Ponolith™ Green BN Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, for stock additions, and coating applics.

*Properties:* Liq.

### Ponolith™ Print Yellow FGRN-2 Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, for stock additions, and coating applics.

*Properties:* Liq.

### Ponolith™ Red BRN Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring

paper internally, for stock additions, and coating applics.

*Properties:* Liq.

### Ponolith™ Red BWSC Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Pigment with mod. brilliance for papers (sized, acid, alkaline, coated), suitable for envelope grades; neutral-shade red; partially bleachable in hypochlorite; very good lightfastness; very good affinity for CaCO<sub>3</sub>, clay, and TiO<sub>2</sub> fillers

*Properties:* Liq.; dens. 8.8 lb/gal; visc. 1500 cps; pH 10.5

### Ponolith™ Red WC Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Pigment for tinting of sized, alkaline and acid papers; bright blue-shade red; bleachable in hypochlorite; exc. lightfastness; exc. affinity for CaCO<sub>3</sub> fillers; very good affinity for clay and TiO<sub>2</sub>

*Properties:* Liq.; dens. 9.5 lb/gal; visc. < 1000 cps; pH 9.0

### Ponolith™ Supra Black B Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Pigment black 7

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Blk. dye for beater applic. to acid-sized papers, esp. where high lightfastness is required, for neutral or alkaline-sized papers where a cationic retention mechanism is used, and as colorant for coatings and deco printing inks; not rec. for laminates; exc. bleedfastness; not bleachable in hypochlorite; very good affinity for TiO<sub>2</sub> fillers

*Properties:* Liq. disp.

### Ponolith™ Supra Blue HM Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Pigment blue 15:3

*Uses:* Blue pigment for beater applic. to acid-sized papers, esp. where high lightfastness is required, for neutral or alkaline-sized papers where a cationic retention mechanism is used, and for coatings and deco printing inks; not rec. for use in laminates; not bleachable; exc. bleedfastness; exc. affinity for TiO<sub>2</sub>; very good affinity for clay and CaCO<sub>3</sub> fillers

*Properties:* Liq. disp.

### Ponolith™ Supra Blue RB Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Pigment blue 15

CAS 147-14-8; EINECS/ELINCS 205-685-1

*Uses:* Blue pigment for beater applic. to acid-sized papers, esp. where high lightfastness is required, for neutral or alkaline-sized papers where a cationic retention mechanism is used, and for coatings and deco printing inks; not rec. for use in laminates; not bleachable; exc. bleedfastness; very good affinity for clay and CaCO<sub>3</sub> fillers

*Properties:* Liq. disp.

### Ponolith™ Supra Red CD Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Pigment violet 19

CAS 1047-16-1; EINECS/ELINCS 213-879-2

*Uses:* Pigment for beater applic. to acid-sized papers, esp. where high lightfastness is required, for neutral or alkaline-sized papers where cationic retention mechanism is used, and for coatings and deco printing inks; completely bleachable in hypochlorite; exc. bleedfastness; exc. affinity for CaCO<sub>3</sub> fillers; very good affinity for clay and TiO<sub>2</sub>

*Properties:* Liq. disp.

### Ponolith™ Supra Red MY Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant scarlet pigment for fine papers (sized, alkaline-sized); rec. where higher lightfastness is required; partially bleachable in hypochlorite; very good affinity for clay and CaCO<sub>3</sub> fillers

*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 3000 cps; pH 9.0

### Ponolith™ Supra Violet EB Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Pigment violet 23

CAS 6358-30-1; EINECS/ELINCS 228-767-9

*Uses:* Violet pigment for beater applic. to acid-sized papers, esp. where high lightfastness is required, for neutral or alkaline-sized papers where a cationic retention mechanism is used, and for coatings and deco printing inks; not rec. for laminates; exc. bleedfastness; not bleachable; exc. affinity for clay fillers; very good affinity for CaCO<sub>3</sub>

*Properties:* Liq. disp.

### Ponolith™ Supra Yellow BG Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, in stock additions, and coating applics.

*Properties:* Liq.

### Ponolith™ Supra Yellow GY Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Pigment yellow 150

- Uses:* Yel. dye for beater applic. to acid-sized papers, esp. where high lightfastness is required; colorant for coatings and deco printing inks; not rec. for laminates; exc. bleedfastness; completely bleachable in hypochlorite; exc. affinity for TiO<sub>2</sub> fillers; very good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq. disp.
- Ponolith™ Supra Yellow RD Liq.** [Bayer/Industrial Chems.]  
*Chem. Descrip.:* Pigment yellow 65  
*Uses:* Yel. dye for beater applic. to acid-sized papers, esp. where high lightfastness is required; colorant for coatings and deco printing inks; not rec. for laminates; exc. bleedfastness; not bleachable in hypochlorite; very good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq. disp.
- Ponolith™ Tinting Yellow 2GND Liq.** [Bayer/Industrial Chems.]  
*Chem. Descrip.:* Org. pigment disp.  
*Uses:* Brilliant green-shade yel. pigment for papers (sized, acid, alkaline), tinting applics.; good stability when diluted with mill process water; partially bleachable in hypochlorite; good lightfastness; very good affinity for clay fillers; good affinity for TiO<sub>2</sub> and CaCO<sub>3</sub> fillers  
*Properties:* Liq. disp.; dens. 8.8 lb/gal; visc. < 400 cps; pH 9.5
- Ponolith™ Violet FFR Liq.** [Bayer/Industrial Chems.]  
*Chem. Descrip.:* Org. pigment disp.  
*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, for stock additions, and coating applics.  
*Properties:* Liq.
- Ponolith™ Yellow 2GBW Liq.** [Bayer/Industrial Chems.]  
*Uses:* Pigment for papers (sized, acid, alkaline, coatings), esp. for tinting applics.; brilliant green-shade yel.; good resist. to microbiological growth when diluted 1:1 with mill process water; partially bleachable in hypochlorite; good lightfastness; very good affinity for clay fillers; good affinity for TiO<sub>2</sub> and CaCO<sub>3</sub> fillers  
*Properties:* Liq. disp.; dens. 8.8 lb/gal; visc. < 400 cps; pH 10.5
- Ponolith™ Yellow 2GN-P Liq.** [Bayer/Industrial Chems.]  
*Chem. Descrip.:* Org. pigment disp.  
*Uses:* Brilliant green-shade yel. pigment for papers (sized, acid, alkaline, coatings); rec. for tinting and for producing deeper shades; partially bleachable in hypochlorite; good lightfastness; very good affinity for clay fillers; good affinity for TiO<sub>2</sub> and CaCO<sub>3</sub> fillers  
*Properties:* Liq. disp.; dens. 8.7 lb/gal; visc. < 100 cps; pH 8.0
- Ponolith™ Yellow WY-7724** [Bayer/Industrial Chems.]  
*Chem. Descrip.:* Org. pigment disp.  
*Uses:* Brilliant pigment for tinting paper, for coating colored papers, for coloring paper internally, for stock additions, and coating applics.
- Pontamine™ Beige FX Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.
- Pontamine™ Black LD Liq.** [Bayer/Industrial Chems.]  
*Uses:* Direct dye intended for tinting of wh. papers, suitable for sized, acid, alkaline types; can be applied internally or on the sheet surf.; pract. bleachable in hypochlorite; partially bleachable in sodium hydrosulfite; fair lightfastness  
*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 100 cps; pH 7.5
- Pontamine™ Black LFS** [Bayer/Industrial Chems.]  
*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Powd.
- Pontamine™ Black LFS Liq.** [Bayer/Industrial Chems.]  
*Uses:* Direct blk. dyestuff for papers (acid-sized, alkaline-sized, tissue); bleachable in hypochlorite; exc. lightfastness @ 200 lb/ton dyeing level, fair @ 20 lb/ton; high substantivity to typ. papermaking furnishes; very good affinity for CaCO<sub>3</sub>  
*Properties:* Liq.
- Pontamine™ Black SP Liq.** [Bayer/Industrial Chems.]  
*Uses:* Black dyestuff for papers (sized, acid, alkaline, paperboard, molded, tissue); tint in wh. fine papers to inc. opacity; economical; pract. bleachable in chlorine; fair lightfastness  
*Properties:* Liq.; dens. 9.6 lb/gal; visc. < 100 cps; pH 8.0
- Pontamine™ Blue BN Liq. 200%** [Bayer/Industrial Chems.]  
*Uses:* Bright neutral-shade blue dyestuff rec. for internal paper coloration applics. (sized, acid, alkaline, tissue); pract. bleachable in chlorine; good lightfastness and bleedfastness; good resist. to trace amts. of residual chlorine; exc. affinity for CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 8.8 lb/gal; visc. < 100 cps; pH 7.5
- Pontamine™ Blue BT Liq.** [Bayer/Industrial Chems.]  
*Uses:* Red-shade blue dyestuff for papers (sized, acid, alkaline, tissue); bleachable in chlorine; fair lightfastness  
*Properties:* Liq.; dens. 9.7 lb/gal; visc. < 100 cps; pH 10.7
- Pontamine™ Blue GTB Liq.** [Bayer/Industrial Chems.]  
*Uses:* Sl. greener-shade blue direct dye for papers (sized, alkaline-sized, tissue); pract. bleachable; good lightfastness; exc. affinity for CaCO<sub>3</sub> fillers; good substantivity to commonly used cellulose fibers and recycled fibers  
*Properties:* Liq.; dens. 9.1 lb/gal; visc. < 100 cps; pH 10.5
- Pontamine™ Blue SP Liq.** [Bayer/Industrial Chems.]  
*Uses:* Red-shade blue dyestuff for papers (sized, acid, alkaline, tissue); pract. bleachable in chlorine; fair lightfastness  
*Properties:* Liq.; dens. 10.1 lb/gal; visc. < 100 cps; pH 7.9
- Pontamine™ Blue SP-N Liq.** [Bayer/Industrial Chems.]  
*Uses:* Red-shade blue dyestuff for papers (sized, acid, alkaline, tissue); bleachable in chlorine; fair lightfastness  
*Properties:* Liq.; dens. 9.7 lb/gal; visc. < 100 cps; pH 8.25
- Pontamine™ Blue WE-N Liq.** [Bayer/Industrial Chems.]  
*Uses:* Bright red-shade blue dyestuff primarily intended for tinting applics. for sized, acid, alkaline, and tissue papers; pract. bleachable in hypochlorite; good lightfastness; good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 8.5 lb/gal; visc. < 100 cps; pH 8.0
- Pontamine™ Bond Blue B Liq.** [Bayer/Industrial Chems.]  
*Uses:* Sl. green-shade blue dyestuff for fine papers (sized, acid, alkaline); bleachable in sodium hypochlorite and sodium hydrosulfite; very good lightfastness; good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.4 lb/gal; visc. < 100 cps; pH 9.3
- Pontamine™ Bond Yellow 303 Liq.** [Bayer/Industrial Chems.]  
*Uses:* Sl. grn.-shade, fluorescent yel. dyestuff for paper (sized, acid, alkaline, tissue); economical; bleachable; exc. lightfastness  
*Properties:* Liq.; dens. 9.0 lb/gal; visc. < 100 cps; pH 7.2
- Pontamine™ Bordeaux 8B Liq.** [Bayer/Industrial Chems.]  
*Uses:* Brilliant blue-shade red dyestuff for paper (sized, acid, alkaline, tissue); pract. bleachable in chlorine; good lightfastness; good affinity for clay fillers  
*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 100 cps; pH 8.1
- Pontamine™ Brilliant Blue A** [Bayer/Industrial Chems.]  
*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Powd.
- Pontamine™ Brilliant Blue A2G Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.
- Pontamine™ Brilliant Blue A Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.
- Pontamine™ Brilliant Bond Blue A Liq.** [Bayer/Industrial Chems.]  
*Uses:* Brilliant grn.-shade blue dyestuff for papers (sized, acid, alkaline, tissue); partially bleachable in chlorine; very good lightfastness  
*Properties:* Liq.; dens. 9.5 lb/gal; visc. < 100 cps; pH 11.1
- Pontamine™ Brilliant Flavine 6G-N Sol'n.** [Bayer/Industrial Chems.]  
*Uses:* Very bright grn.-shade, fluorescent yel. dyestuff for paper (sized, acid, alkaline, tissue); bleachable; poor lightfastness; fair affinity for clay, TiO<sub>2</sub>, and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.3 lb/gal; visc. < 400 cps; pH 7.3
- Pontamine™ Brilliant Orange 2R Liq.** [Bayer/Industrial Chems.]  
*Uses:* Bright red-shade orange direct dyestuff for paper (sized, alkaline-sized, tissue); good substantivity to common papermaking furnishes; bleachable in chlorine; fair lightfastness, good bleedfastness; very good affinity for TiO<sub>2</sub> fillers  
*Properties:* Liq.; dens. 9.3 lb/gal; visc. < 100 cps; pH 7.0
- Pontamine™ Brilliant Paper Yellow Liq.** [Bayer/Industrial Chems.]  
*Uses:* Yel. dyestuff for paper (sized, acid papers); alkali-sensitive; bleachable; very good lightfastness  
*Properties:* Liq.; dens. 9.6 lb/gal; visc. < 100 cps; pH 12.6
- Pontamine™ Brilliant Violet 6B Liq. 50** [Bayer/Industrial Chems.]  
*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.
- Pontamine™ Brilliant Violet BRW Liq.** [Bayer/Industrial Chems.]

## Pontamine™ Brilliant Yellow 5GA Liq.

*Uses:* Violet dyestuff for paper (sized, acid, alkaline, tissue); pract. bleachable in chlorine; good lightfastness; good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.5 lb/gal; visc. < 100 cps; pH 8.4

## Pontamine™ Brilliant Yellow 5GA Liq. [Bayer/Industrial Chems.]

*Uses:* Grn. shade yel. dyestuff for paper (sized, acid, alkaline, tissue); bleachable in chlorine; good lightfastness; also avail. in powd. form  
*Properties:* Liq.; dens. 8.9 lb/gal; visc. < 100 cps; pH 6.4

## Pontamine™ Fast Orange WN Liq. [Bayer/Industrial Chems.]

*Uses:* Brilliant red-shade orange dyestuff for paper (sized, acid, alkaline, tissue); pract. bleachable in chlorine; good lightfastness; very good affinity for clay fillers  
*Properties:* Liq.; dens. 9.4 lb/gal; visc. < 100 cps; pH 7.5

## Pontamine™ Fast Red 8BF Liq. [Bayer/Industrial Chems.]

*Uses:* Blue-shade red dyestuff for paper (sized, acid, alkaline, tissue—lighter shades); economical; partially bleachable in chlorine; good lightfastness; good affinity for CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 100 cps; pH 7.9

## Pontamine™ Fast Red 8BLX [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Powd.

## Pontamine™ Fast Red 8BLX Liq. [Bayer/Industrial Chems.]

*Uses:* Blue-shade red dyestuff for paper (sized, acid, alkaline, tissue); partially bleachable in chlorine; good lightfastness; good affinity for CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.7 lb/gal; visc. < 100 cps; pH 6.8

## Pontamine™ Fast Red 9BL Liq. [Bayer/Industrial Chems.]

*Uses:* Blue-shade red dyestuff for paper (sized, acid, alkaline, tissue—lighter shades); economical; partially bleachable in chlorine; good lightfastness; good affinity for CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.0 lb/gal; visc. < 100 cps; pH 7.8

## Pontamine™ Fast Red BA Liq. New [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Fast Scarlet 4BA [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Powd.

## Pontamine™ Fast Scarlet 4B Liq. [Bayer/Industrial Chems.]

*Uses:* Brilliant scarlet dyestuff for paper (sized, acid, alkaline, tissue); partially bleachable in chlorine; good lightfastness; very good affinity for clay fillers, good affinity for CaCO<sub>3</sub>  
*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 100 cps; pH 7.4

## Pontamine™ Fast Turquoise 8GL Liq. [Bayer/Industrial Chems.]

*Uses:* Brilliant green-shade blue dye for papers (sized, acid, alkaline, tissue); partially bleachable; good lightfastness; good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.5 lb/gal; visc. < 100 cps; pH 7.1

## Pontamine™ Fast Yellow 3GF Liq. [Bayer/Industrial Chems.]

*Uses:* Yel. dyestuff for paper (acid-sized, alkaline-sized, tissue); pract. bleachable in chlorine; exhibits good lightfastness; good affinity for clay fillers  
*Properties:* Liq.; dens. 9.0 lb/gal; visc. < 100 cps; pH 6.0

## Pontamine™ Fast Yellow 5GF Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Fast Yellow E-2G Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Golden Yellow RB Liq. [Bayer/Industrial Chems.]

*Uses:* Reddish shade yel. dyestuff for paper (sized, acid, alkaline, tissue); bleachable; good lightfastness  
*Properties:* Liq.; dens. 8.9 lb/gal; visc. < 100 cps; pH 7.2

## Pontamine™ Green 2B [Bayer/Industrial Chems.]

*Uses:* Blue-shade green direct dyestuff for papers (sized, alkaline, tissue); partially bleachable in hypochlorite; fair lightfastness; good fiber substantivity in rosin size and alum dyeing conditions  
*Properties:* Powd.; sol. 10 g/l

## Pontamine™ Grey K-CGL [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity

for cellulose fibers

*Properties:* Powd.

## Pontamine™ Kraft Brown ES Liq. [Bayer/Industrial Chems.]

*Uses:* Red-shade brown dyestuff for paper (sized, acid, alkaline, molded, tissue); partially bleachable; good lightfastness; good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 9.0 lb/gal; visc. < 100 cps; pH 8.7

## Pontamine™ Kraft Brown JCC Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Kraft Orange A Liq. [Bayer/Industrial Chems.]

*Uses:* Yel.-shade orange dyestuff for paper (sized, acid, alkaline, tissue, molded prods.); economical; partially bleachable; good lightfastness; very good affinity for clay fillers  
*Properties:* Liq.; dens. 9.9 lb/gal; visc. < 100 cps; pH 8.4

## Pontamine™ Orange OCC Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Red Sern Liq. [Bayer/Industrial Chems.]

*Uses:* Brilliant blue-shade red direct dyestuff for paper (sized, alkaline); fully bleachable in hypochlorite, pract. bleachable in sodium hydrosulfite; fair lightfastness; exc. affinity for CaCO<sub>3</sub> fillers, good affinity for clay  
*Properties:* Liq.; dens. 8.8 lb/gal; visc. < 100 cps; pH 7.0

## Pontamine™ Substantive Turquoise 6G Liq. [Bayer/Industrial Chems.]

*Uses:* Turquoise dye substantive to hardwood and softwood kraft pulps, rec. for tissue and alkaline-sized papers; partially bleachable; very good lightfastness  
*Properties:* Liq.; sp.gr. 1.1; visc. < 100 cps; pH 12.0; anionic

## Pontamine™ Violet BBN Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Yellow 2RF Liq. [Bayer/Industrial Chems.]

*Uses:* Bright reddish-shade yel. dyestuff for paper (sized, acid, alkaline, tissue); partially bleachable; good lightfastness; good affinity for CaCO<sub>3</sub> fillers  
*Properties:* Liq.; sp.gr. 1.1; visc. < 100 cps; pH 8.0-8.5 (10%)

## Pontamine™ Yellow 3GRC [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Yellow 711 Liq. [Bayer/Industrial Chems.]

*Uses:* Sl. reddish shade, fluorescent yel. dyestuff for paper (sized, acid, alkaline, tissue); exc. bleachability in chlorine; good lightfastness and water bleedfastness; very good affinity for clay fillers  
*Properties:* Liq.; dens. 8.8 lb/gal; visc. < 100 cps; pH 7.5

## Pontamine™ Yellow EM Liq. [Bayer/Industrial Chems.]

*Uses:* Yel. dyestuff for paper (sized, acid, alkaline, tissue); pract. bleachable in chlorine; good lightfastness; good affinity for clay fillers  
*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 100 cps; pH 6.0

## Pontamine™ Yellow GFB Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Yellow GG-N Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Liq.

## Pontamine™ Yellow G Liq. [Bayer/Industrial Chems.]

*Uses:* Yel. dyestuff for paper (sized, acid, alkaline, tissue); bleachable; exc. lightfastness; good fiber substantivity and water bleedfastness  
*Properties:* Liq.; dens. 9.1 lb/gal; visc. < 100 cps; pH 7.2

## Pontamine™ Yellow GX [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, specialty papers; direct affinity for cellulose fibers  
*Properties:* Powd.

## Pontamine™ Yellow GXG Liq. [Bayer/Industrial Chems.]

*Uses:* Red-shade yel. dyestuff for paper (sized, acid, alkaline, tissue); economical; fair lightfastness; good affinity for clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; dens. 10.0 lb/gal; visc. < 150 cps; pH 8.9

## Pontamine™ Yellow GXW Liq. [Bayer/Industrial Chems.]

*Uses:* Red-shade yel. dyestuff for paper (sized, acid, alkaline, tissue); economical; not bleachable; fair lightfastness; good affinity for clay and CaCO<sub>3</sub> fillers

*Properties:* Liq.; dens. 9.2 lb/gal; visc. < 100 cps; pH 9.0

**Powdered Guar Gum Type A** [Gumix Int'l.]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, visc. modifier, water-binder, stabilizer, lubricant for foods (dairy prods., bakery, meat, beverages, salad dressings), pharmaceuticals (appetite depressant, disintegrant and binder in compressed tablets), cosmetics (creams, lotions), industrial uses incl. papermaking, mining, tobacco, textiles, explosives, potable water treatment (coagulant aid); flocculant in industrial water, petrol. drilling

*Properties:* Wh. to yllsh. powd., nearly odorless, bland taste; disp. in cold or hot water; insol. in org. solvs.

**Powdered Guar Gum Type AA** [Gumix Int'l.]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, visc. modifier, water-binder, stabilizer, lubricant for foods (dairy prods., bakery, meat, beverages, salad dressings), pharmaceuticals (appetite depressant, disintegrant and binder in compressed tablets), cosmetics (creams, lotions), industrial uses incl. papermaking, mining, tobacco, textiles, explosives, potable water treatment (coagulant aid); flocculant in industrial water, petrol. drilling

*Properties:* Wh. to yllsh. powd., nearly odorless, bland taste; disp. in cold or hot water; insol. in org. solvs.

**Powdered Guar Gum Type B** [Gumix Int'l.]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, visc. modifier, water-binder, stabilizer, lubricant for foods (dairy prods., bakery, meat, beverages, salad dressings), pharmaceuticals (appetite depressant, disintegrant and binder in compressed tablets), cosmetics (creams, lotions), industrial uses incl. papermaking, mining, tobacco, textiles, explosives, potable water treatment (coagulant aid); flocculant in industrial water, petrol. drilling

*Properties:* Wh. to yllsh. powd., nearly odorless, bland taste; disp. in cold or hot water; insol. in org. solvs.

**Powdered Guar Gum Type BB** [Gumix Int'l.]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, visc. modifier, water-binder, stabilizer, lubricant for foods (dairy prods., bakery, meat, beverages, salad dressings), pharmaceuticals (appetite depressant, disintegrant and binder in compressed tablets), cosmetics (creams, lotions), industrial uses incl. papermaking, mining, tobacco, textiles, explosives, potable water treatment (coagulant aid); flocculant in industrial water, petrol. drilling

*Properties:* Wh. to yllsh. powd., nearly odorless, bland taste; disp. in cold or hot water; insol. in org. solvs.

**Powdered Gum Ghatti #1** [Frutarom Meer]

*Chem. Descrip.:* Gum ghatti

CAS 9000-28-6

*Uses:* Stabilizer, binder, emulsifier forming o/w emulsions, used in beverage emulsions where it forms orange oil emulsions, in table syrup emulsions; tablet binder and thick mucilage coatings in pharmaceuticals; binder in paper industry; emulsifier for petroleum and nonpetroleum waxes used in coating and barrier applics.

*Properties:* Off-wh. to lt. amber gum; 99% thru 80 mesh, ≥ 90% thru 100 mesh; visc. ≥ 100 cps (5%)

**Powdered Gum Ghatti #2** [Frutarom Meer]

*Chem. Descrip.:* Gum ghatti

CAS 9000-28-6

*Uses:* Stabilizer, binder, emulsifier forming o/w emulsions, used in beverage emulsions where it forms orange oil emulsions, in table syrup emulsions; tablet binder and thick mucilage coatings in pharmaceuticals; binder in paper industry; emulsifier for petroleum and nonpetroleum waxes used in coating and barrier applics.

*Properties:* Water-sol.

**Powdered Gum Guar NF Type 80 Mesh B/T** [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages,

cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

*Properties:* Water-sol.

**Powdered Gum Guar Type 140 Mesh B/T** [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages, cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

*Properties:* Water-sol.

**Powdered Gum Guar Type ECM** [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages, cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

*Properties:* Water-sol.

**Powdered Gum Guar Type M** [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages, cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

*Properties:* Water-sol.

**Powdered Gum Guar Type MM FCC** [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages, cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

*Properties:* Wh. to cream-wh. fine powd., nearly odorless; 97% thru 140 mesh, ≥ 90% thru 200 mesh; visc. ≥ 3500 cps (1%); pH 5.0-6.4

**Powdered Gum Guar Type MM (HV)** [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages, cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

*Properties:* Water-sol.

**Powdered Gum Guar Type MMM 1/2** [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages, cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

## Powdered Gum Guar Type MMW

*Properties:* Water-sol.

### Powdered Gum Guar Type MMW [Frutarom Meer]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, binder, suspending agent, stabilizer, and dietary fiber source for soft cheese prods., ice cream, sherbets, fruit drinks, dietetic beverages, cocoa beverages, baked goods, frozen pie fillings, icings, salad dressings, relishes; binder/lubricant in sausages, stuffed meat prods., canned pet foods; in explosives and mining; as wet-end additive in papermaking, sizes, oil well drilling muds; appetite depressant; pharmaceutical tablet binder; cosmetics; textile printing

*Properties:* Water-sol.

### Powdered Gum Karaya Superfine #1 FCC [Frutarom Meer]

*Chem. Descrip.:* Karaya gum FCC

CAS 9000-36-6; EINECS/ELINCS 232-539-4

*Uses:* Stabilizer, water binder, emulsifier for foods (water ices, sherbets, cheese spreads, meringue powds., meat processing), pharmaceuticals (bulk laxatives, denture adhesives); binder in paper industry; thickener for textile dyes

*Properties:* Water-sol.

### Powdered Gum Karaya Superfine XXXX FCC [Frutarom Meer]

*Chem. Descrip.:* Karaya gum NF/FCC

CAS 9000-36-6; EINECS/ELINCS 232-539-4

*Uses:* Stabilizer, water binder, emulsifier for foods (water ices, sherbets, cheese spreads, meringue powds., meat processing), pharmaceuticals (bulk laxatives, denture adhesives); binder in paper industry; thickener for textile dyes

*Use Level:* 0.2-0.4% (sherbets), < 0.8% (cheese spreads), 0.25-1% (meat)

*Properties:* Powd.; 100% thru 80 mesh, ≥ 60% thru 200 mesh; swells in water, insol. in alcohol; visc. ≥ 200 cps (1%); pH 4.4-4.8

### Powdered Locust Bean Gum Type D-200 [Frutarom Meer]

*Chem. Descrip.:* Locust bean gum FCC

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, water binder, suspending agent, and stabilizer for soft cheese, cheese spreads, ice cream, baked goods, cakes, frozen pie fillings, sausages, stuffed meat prods., canned pet foods; wet-end additive in papermaking; textile sizing agent, print paste thickener; excipient for pharmaceutical tablets; thickener for toothpaste; thickener/stabilizer for cosmetic creams and lotions

*Properties:* Water-sol.

### Powdered Locust Bean Gum Type D-300 [Frutarom Meer]

*Chem. Descrip.:* Locust bean gum FCC

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, water binder, suspending agent, and stabilizer for soft cheese, cheese spreads, ice cream, baked goods, cakes, frozen pie fillings, sausages, stuffed meat prods., canned pet foods; wet-end additive in papermaking; textile sizing agent, print paste thickener; excipient for pharmaceutical tablets; thickener for toothpaste; thickener/stabilizer for cosmetic creams and lotions

*Properties:* Water-sol.

### Powdered Locust Bean Gum Type P-100 [Frutarom Meer]

*Chem. Descrip.:* Locust bean gum FCC

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, water binder, suspending agent, and stabilizer for soft cheese, cheese spreads, ice cream, baked goods, cakes, frozen pie fillings, sausages, stuffed meat prods., canned pet foods; wet-end additive in papermaking; textile sizing agent, print paste thickener; excipient for pharmaceutical tablets; thickener for toothpaste; thickener/stabilizer for cosmetic creams and lotions

*Properties:* Water-sol.

### Powdered Locust Bean Gum Type PP-100 [Frutarom Meer]

*Chem. Descrip.:* Locust bean gum FCC

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, water binder, suspending agent, and stabilizer for soft cheese, cheese spreads, ice cream, baked goods, cakes, frozen pie fillings, sausages, stuffed meat prods., canned pet foods; wet-end additive in papermaking; textile sizing agent, print paste thickener; excipient for pharmaceutical tablets; thickener for toothpaste; thickener/stabilizer for cosmetic creams and lotions

*Properties:* Water-sol.

### PQ® Epsom Salt Tech. [PQ]

*Chem. Descrip.:* Magnesium sulfate heptahydrate

CAS 10034-99-8; EINECS/ELINCS 231-298-8

*Uses:* Pulping aid maintaining pulp visc. and quality during oxygen delignification for bleaching of kraft hard and soft wood pulps; retards degradation of pulp carbohydrates; maintains cellulose fiber lengths

*Properties:* Colorless or wh. rhombic or monoclinic opaque cryst.; 94% -10 to +48 mesh (Tyler screen); readily dissolves in cold water; m.w. 246.50; sp.gr. 1.68; bulk dens. 63 lb/ft<sup>3</sup>; ref. index 1.455; pH 6-7 (1%); hardness (Mohs) 2-2.5; 99% min. MgSO<sub>4</sub> (anhyd.); 9.8% Mg

### Praestafix® [Stockhausen]

*Uses:* Paper auxiliary, trash remover for elimination of anionic charges and charge carriers in the pulp; replaces alum for fixation of rosin size; partially reduces COD-freight in water circuit

*Use Level:* 0.1-0.4%

*Properties:* Very low m.w.; cationic

### Praestamin® [Stockhausen]

*Uses:* Paper auxiliary, dry strength agent, drainage aid, retention aid for paper, carton, cardboard; improves tens. str.; burst, breaking length, internal bonding, pick resist.

*Use Level:* 0.1-0.9%

*Properties:* Liq., emulsion, granulate; low m.w.; cationic/amphoteric

### Praestaret® [Stockhausen]

*Uses:* Paper auxiliary, retention agent for acid and neutral papermaking; improves drainage speed and fiber and filler retention, inc. machine capacity, provides better yield of furnish components (fibers, fillers)

*Use Level:* 0.01-0.1%

*Properties:* Liq. and granular; high-very high m.w.; cationic

### Prelude™ [Hercules]

*Uses:* Sizing agent for recycled paperboard; requires no cationic starch or additives for retention or reaction

### Premier [IMERYS]

*Chem. Descrip.:* Kaolin clay

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Clay for paper coatings (high quality boxboard and enamel papers); produces coatings of exc. gloss and brightness with uniform ink receptivity

*Properties:* Spray-dried, slurry; 0.002% 325-mesh residue, 92% finer than 2 μ particle size; sp.gr. 2.72; visc. 200 cps (70% solids); brightness (GE) 87-88; ref. index 1.56; pH 6.2-7.5 (20% aq.); hardness (Mohs) 2; 0.3-1.0% moisture (spray-dried), 29-31% moisture (slurry)

### Presstige™ [Hercules]

*Uses:* Deposit control agent, felt conditioner, fabric/felt cleaning agent for pulp, paper, and paperboard mfg., treatment of press section rolls

### Printex® XE 2 [Degussa-Hüls]

*Chem. Descrip.:* Carbon black

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Porous conductive filler for elec. conductive and antistatic compds., incl. thermoplastics, rubber, adhesives, sealants, inks, coatings, putties, floor pavements, concrete, mortar, paper for conductor insulation; results in lower comping, visc., easier processing, lower moisture pickup during comping., storage, and transportation, improved physical props.

*Properties:* Blk. beads; odorless; dens. 140 g/l; surf. area 1000 m<sup>2</sup>/g; pH 8

*Precaution:* Nonexplosive under normal handling/storage, however, explosions can be caused in air concs. above 50 g/cm<sup>3</sup> with a high energy ignition source; may smolder above 300 C; avoid contact with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SO<sub>2</sub>

### Printosil® [Süd-Chemie AG]

*Chem. Descrip.:* Bentonite

CAS 1302-78-9; EINECS/ELINCS 215-108-5

*Uses:* For surf. finishing of superlight-coated papers

### Printplus 500 [Vinings Ind.]

*Uses:* Frictionizing agent for fine and specialty papers; for applic. in a size press or through a spray applicator

### Pristerene 4909 [Uniqema/Oleochems.]

*Chem. Descrip.:* Stearine

*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers

*Properties:* Acid no. 201-209; iodine no. 2 max.; sapon. no. 202-210

### Pristerene 4912 [Uniqema/Oleochems.]

*Chem. Descrip.:* Stearine

*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers

*Properties:* Acid no. 200-208; iodine no. 2 max.; sapon. no. 201-209

### Pristerene 4913 [Uniqema/Oleochems.]

- Chem. Descrip.:* Stearine  
*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers  
*Properties:* Acid no. 202-206; iodine no. 1 max.; sapon. no. 203-207
- Pristerene 4916** [Uniqema/Oleochems.]  
*Chem. Descrip.:* Stearine  
*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers  
*Properties:* Acid no. 202-210; iodine no. 2 max.; sapon. no. 203-211
- Pristerene 4931** [Uniqema/Oleochems.]  
*Chem. Descrip.:* Stearine  
*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers  
*Properties:* Acid no. 200-210; iodine no. 5 max.; sapon. no. 202-212
- Pristerene 4943** [Uniqema/Oleochems.]  
*Chem. Descrip.:* Stearine  
*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers  
*Properties:* Acid no. 178-190; iodine no. 6 max.; sapon. no. 179-191
- Pristerene 4945** [Uniqema/Oleochems.]  
*Chem. Descrip.:* Stearine  
*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers  
*Properties:* Acid no. 188-198; iodine no. 5 max.; sapon. no. 189-199
- Pristerene 4963** [Uniqema/Oleochems.]  
*Chem. Descrip.:* Stearine  
*Uses:* Applics. incl. rubber vulcanization aids, shaving creams, paper sizing agents, candles, metal stearates and emulsifiers  
*Properties:* Acid no. 198-205; iodine no. 2 max.; sapon. no. 199-206
- Pro-Cote®** [Protein Tech. Int'l.]  
*Chem. Descrip.:* Soy-based polymers  
*Uses:* Rheology modifier, cobinder, coating structuring agent in paper and paperboard; good coating stability; for use in size press, precoat, and topcoat applics.; for use with any pigment systems (clay, CaCO<sub>3</sub>, TiO<sub>2</sub>)  
*Properties:* Wh. to tan fine gran. powd.; < 2% on 20 mesh; sp.gr. 1.02-1.05 (10-18% sol'n.); bulk dens. 0.40-0.65 g/cm<sup>3</sup>; amphoteric  
*Storage:* 1 yr shelf life (dry); rec. to prepare and use sol'n. within one day
- Product BCO** [DuPont]  
*Chem. Descrip.:* Cetyl betaine  
 CAS 693-33-4; EINECS/ELINCS 211-748-4  
*Uses:* Wetting agent, detergent, emulsifier, dispersant, surfactant for dyeing applics.; softener for textiles; leveling agent and rewetting agent in the paper industry; dyeing assistant and degreaser in the leather industry; antistat on plastic films  
*Properties:* Brn. clear liq.; mild odor; misc. in water; dens. 8.4 lb/gal; visc. free-flowing; surf. tens. 27.8 dynes/cm (32 C, 0.1%); 33% solids; amphoteric
- Propetal 99** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol EO/PO adduct  
*Uses:* Detergent, wetting agent, emulsifier, antifoam, base material for low-foaming cleansing agents for household and industry, mech. dishwash agents, high-pressure and spray cleaners, tile cleaners, aux. prods. for paper, textile, and leather industries; low foaming  
*Properties:* Colorless to yllsh. liq.; sol. in most org. solvs., e.g., benzene, toluene; disp. in water @ higher temps.; sp.gr. 0.97 (20 C); cloud pt. 20-24 C (1% aq.); pH 6 (10%); 100% act., 0.5% water; nonionic  
*Storage:* Prod. may become turbid at lower temps. without loss in quality
- Propetal 241** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol EO/PO adduct  
*Uses:* Detergent, wetting agent, emulsifier, antifoam, intermediate for prep. of low foaming detergents for household and industry, dishwash, sanitary and floor tile cleaners, industrial spray cleaners, metal pickling, paper, textiles, leather; low foaming  
*Properties:* Colorless to yllsh. liq.; sol. in water, alcohols, most org. solvs.; dens. 0.99 g/cc; cloud pt. 37-41 C (1% aq.); pH 5-7 (10%); 100% act., 0.5% water; nonionic  
*Environmental:* Biodeg.  
*Storage:* Prod. may become turbid at lower temps. without loss in quality
- Propetal 387** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol EO-PO adduct  
*Uses:* Surfactant for household and industrial cleaners, high-pressure and spray cleaners, aux. prods. for paper, textile, and leather industries; low foaming; stable @ acid and weakly alkaline pH  
*Properties:* Colorless to yllsh. liq.; sol. in ethanol, IPA, petrol., and orange terpene; disp. in water; sp.gr. 0.93 (20 C); cloud pt. 54-59 C (5 g/10 ml BDG 57% aq.); pH 6 (10%); 100% act., 0.5% water; nonionic
- ProSoft™** [Hercules]  
*Uses:* Release aid, crepe aid, debonder, softener for tissue mfg.
- Prosorb®** [Vinings Ind.]  
*Chem. Descrip.:* Organophilic, adsorbent mineral slurry  
*Uses:* Pitch/stickies control agent for papermaking; anticoagulant for colloidal pitch on paper machine; detackifier making pitch and stickies less prone to deposition; patented; forms complex with pitch which has strong affinity for cationic materials, such as alum which serves to fix the complex to anionic fiber
- ProSweet™** [Hercules]  
*Uses:* Odor control agent for control of hydrogen sulfide and other mercaptan odors in pulp/paper mills
- Protect ZA7** [Magnesium Elektron]  
*Chem. Descrip.:* Neutral zirconium sol'n. contg. 20% ZrO<sub>2</sub>, ammonium acetate, and ammonium hydroxide  
*Uses:* Binder insolubilizer for paper and board coatings and dry-laid nonwoven fabrics; deposit control agent in wet-end papermaking; component of waterborne inks, overprint varnishes, and adhesives; component of textile, leather, and paper water-repellent formulations; coagulant in mfg. of syn. leather-cloth and nonwovens; metal pre-treatment coatings; precursor to ZrO<sub>2</sub> in catalyst systems  
*Properties:* Clear aq. sol'n.; sp.gr. 1.32; pH 7.0  
*Storage:* Store sealed in cool areas; protect from high temps. and freezing
- Protect ZZA** [Magnesium Elektron]  
*Chem. Descrip.:* Ammonium zirconium carbonate, zinc oxide, ammonium hydroxide sol'n.  
*Uses:* Str. agent for alkaline-sized paper; component of waterborne inks, overprint varnishes, and adhesives; component of textile, leather, and paper water repellent formulations; antimicrobial treatment for textiles/timber; coagulant in mfg. of syn. leather-cloth and nonwovens  
*Properties:* Clear alkaline aq. sol'n.; sp.gr. 1.35; pH 10; ZrO<sub>2</sub> & ZnO (16%)  
*Storage:* Store sealed in cool areas; protect from high temps. and freezing
- Protectol® BCM** [BASF AG]  
*Chem. Descrip.:* 1H-Benzimidazol-2-yl-carbamic acid, methyl ester  
 CAS 10605-21-7; EINECS/ELINCS 234-232-0  
*Uses:* Biocide; preservative; fungicidal treatment for paints, sealants, and grouts; biocide for paper industry (soap wrappers, wallpaper, cartons)  
*Use Level:* Up to 0.5% (paints, sealants, grouts); 0.2-0.5% (soap wrappers, wallpaper, cartons)  
*Regulatory:* MITI approved  
*Properties:* 99% act.  
*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; nonirritant; TSCA listed
- Protectol® BCM-FL** [BASF AG]  
*Chem. Descrip.:* 1H-Benzimidazol-2-yl-carbamic acid, methyl ester  
 CAS 10605-21-7; EINECS/ELINCS 234-232-0  
*Uses:* Biocide; preservative; fungicidal treatment for paints, sealants, and grouts; biocide for paper industry (soap wrappers, wallpaper, cartons)  
*Use Level:* Up to 1.25% (paints, sealants, grouts); 0.5-1.2% (soap wrappers, wallpaper, cartons)  
*Regulatory:* MITI approved  
*Properties:* 42% act.  
*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; nonirritant; TSCA listed
- Protectol® DMU** [BASF AG]  
*Chem. Descrip.:* Dimethylol urea  
 CAS 140-95-4; EINECS/ELINCS 205-444-0  
*Uses:* Biocide, disinfectant for hospital use; preservative in paints, chain lubricants, polymer and wax dispersions; fungicidal treatment for paper glues, pigment slurries  
*Use Level:* 0.05-0.2% (polymer disp.); 0.05-0.25% (wax emulsions); up to 2% (paints); 0.05-0.15% (glue, pigment slurries)  
*Regulatory:* MITI, BGA approved  
*Properties:* 99% act.  
*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; nonirritant; TSCA listed
- Protectol® GDA** [BASF AG]  
*Chem. Descrip.:* Glutaraldehyde  
 CAS 111-30-8; EINECS/ELINCS 203-856-5  
*Uses:* Biocide, preservative for aq. systems and cleaners; disinfectant in industrial water treatment, incl. paper prod., cooling towers, heat exchange

ers, oil recovery, and sugar refining; food pkg. adhesives, paper; food-contact slimicide; preservative for chain lubricants, detergents, paper coatings/pigment slurries, cosmetic rinse-off prods.; prevents growth of bacteria, slime-forming microorganisms, algae, and fungal mycelia

*Use Level:* 5-50 ppm (oil industry water treatment); 0.02-0.1% (detergents); 0.01-0.05% (paper coatings)

*Regulatory:* FDA 21CFR§ 172.230, 173.320, 175.105, 176.170, 176.180, 176.300; BP, USP, MITI and BGA approved

*Properties:* Liq.; 50% act.

*Toxicology:* LD50 (oral, rat) 320 mg/kg; strong skin and eye irritant; TSCA listed

#### Protectol® GL 40 [BASF AG]

*Chem. Descrip.:* Glyoxal

CAS 107-22-2; EINECS/ELINCS 203-474-9

*Uses:* Biocide, disinfectant for aq. systems, cleaners, disinfectants; disinfectant for hospital surfaces, food processing, animal husbandry, surgical instruments, laundry; food pkg. adhesives, paper, polymers

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.2280; BGA approved; MITI listed

*Properties:* Liq.; 40% act.

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; nonirritating to skin and eyes; TSCA listed

#### Protectol® KLC 50 [BASF AG]

*Chem. Descrip.:* Dimethyl-n-(C<sub>12</sub>/C<sub>14</sub>)-alkyl-benzylammonium chloride

CAS 85409-22-9; EINECS/ELINCS 287-089-1

*Uses:* Biocidal surfactant for chemical industry, detergent mfg.; disinfectant used in all-purpose sanitizers, disinfectant floor and dairy cleaners; process water treatment for sugar industry, cooling towers, heat exchangers, and swimming pools; preservative for cosmetics, chain lubricants, masonry washes, oil recovery; food pkg. adhesives, coatings; slimicide in food-contact paper; food-contact sanitizing sol'ns.

*Use Level:* 0.05-0.2% (wax emulsion); up to 0.5% (chain lubricants); up to 1% (masonry washes); 0.01-0.2% (cosmetics)

*Regulatory:* FDA 21CFR § 175.105, 176.300, 178.1010; EP, DAB, BP, USP, JP, MITI, JSCI, and BGA approved

*Properties:* Clear to yls. liq.; sol. in water, 5% sodium hydroxide, 5% HCl, 5% sodium chloride, alcohol, chlorinated hydrocarbons, oil, wh. spirit; dens. 0.98 g/cm<sup>3</sup>; visc. 80 mPa·s; cloud pt. -4 C; surf. tens. 37 mN/m (1 g/l); pH 6 (1% aq.); 50% act.; cationic

*Toxicology:* LD50 (oral, rat) 1500-1600 mg/kg; corrosive to skin and eyes; TSCA listed

*Environmental:* 80% biodeg.

#### Protectol® KLC 80 [BASF AG]

*Chem. Descrip.:* Dimethyl-n-(C<sub>12</sub>/C<sub>14</sub>)-alkylbenzylammonium chloride

CAS 85409-22-9; EINECS/ELINCS 287-089-1

*Uses:* Biocide, surfactant for chemical industry, detergent mfg., disinfection, preservation; disinfectant for hospital surfaces, food processing, animal husbandry, surgical instruments, hands, laundry; food pkg. adhesives, coatings; food-contact sanitizing sol'ns.; slimicide in food-contact paper

*Regulatory:* FDA 21CFR §175.105, 176.300, 178.1010; BGA, JSCI, MITI approved

*Properties:* Clear to yls. liq.; sol. in water, 5% sodium hydroxide, 5% HCl, 5% sodium chloride, alcohol, chlorinated hydrocarbons, oil, wh. spirit; dens. 0.98 g/cm<sup>3</sup>; visc. 500 mPa·s; cloud pt. -10 C; surf. tens. 37 mN/m (1 g/l); pH 6 (1% aq.); 80% act.; cationic

*Toxicology:* LD50 (oral, rat) 1100-1600 mg/kg; corrosive to skin and eyes; TSCA listed

*Environmental:* 80% biodeg.

#### Protectol® PP [BASF AG]

*Chem. Descrip.:* Phenoxypropanols

*Uses:* Biocide, disinfectant for medical and food industries; preservative for cosmetics industry, adhesives; defoamer in food-contact paper/paperboard

*Use Level:* 0.1-1% (cosmetics); up to 5% (adhesives)

*Regulatory:* FDA 21CFR §176.210; MITI approved

*Properties:* 98% act.

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; nonirritant; TSCA listed

#### Protectol® TOE [BASF AG]

*Chem. Descrip.:* 3,5-Dimethyl-1,3,5-2H-tetrahydrothiadiazine-2-thione

CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Biocide, preservative for use in aq. systems; slimicide for water treatment for paper industry, cooling towers, heat exchangers, food contact applics.; food pkg. adhesives, paper, animal glue

*Use Level:* 0.01-0.05% (wax emulsion); 0.01-0.05% (polymer dispersions); 0.01-0.05% (paper coatings, glue, pigment slurries)

*Regulatory:* FDA 21CFR§ 175.105, 176.170, 176.180, 176.230, 176.300, 178.3120; MITI and BGA approved

*Properties:* Powd.; 99% act.

*Toxicology:* LD50 (oral, rat) 600 mg/kg; nonirritant to skin and eyes; TSCA listed

#### Protectol® TOE Granules [BASF AG]

*Chem. Descrip.:* 3,5-Dimethyl-1,3,5-2H-tetrahydrothiadiazine-2-thione

CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Biocide, preservative; slimicide for water treatment for paper industry, cooling towers, heat exchangers, food contact applics.; food pkg. adhesives, paper, animal glue

*Use Level:* 0.01-0.05% (wax emulsion); 0.01-0.05% (polymer dispersions); 0.01-0.05% (paper coatings, glue, pigment slurries)

*Regulatory:* FDA 21CFR§ 175.105, 176.170, 176.180, 176.230, 176.300, 178.3120; MITI and BGA approved

*Properties:* Granules; 99% act.

*Toxicology:* LD50 (oral, rat) 600 mg/kg; nonirritant to skin and eyes; TSCA listed

#### Protocol™ [Hercules]

*Uses:* Defoamer for pulp, paper, and paperboard mfg.

#### Prox® 923 [Synthron SA]

*Chem. Descrip.:* Urea-formaldehyde resin

CAS 9011-05-6

*Uses:* Wet str. agent for paper mfg. at acidic pH

*Properties:* Cationic

#### Prox® A 899 E [Synthron SA]

*Uses:* Thickener, water retention aid for paper sticking and coating applics.

#### Prox® AC 553 L [Synthron SA]

*Chem. Descrip.:* Polyamide resin

CAS 9012-24-2

*Uses:* Dry str. agent for paper mfg. improving mech. props.

#### Prox® ASN 165 R [Synthron SA]

*Chem. Descrip.:* Acrylic copolymer

CAS 25133-97-5

*Uses:* Binder for coating paper, board, and polyester nonwoven materials; nonyellowing

#### Prox® DLF Double Conc. [Synthron SA]

*Uses:* Insolubilizer for starch-based binders in paper sticking and coating applics.; contains min. level of formaldehyde

#### Prox® V P 137 [Synthron SA]

*Chem. Descrip.:* Polyamide resin

CAS 9012-24-2

*Uses:* Wet str. agent for paper mfg. at neutral pH

#### Prox®-Ad WA 138 E [Synthron SA]

*Uses:* Nonstick agent for paper sticking and coating applics. incl. food pkg., flat board and box covering; component of paper/paperboard in contact with aq./fatty/dry foods; compat. with hot-melt adhesives

*Regulatory:* FDA 21CFR §176.170, 176.180; BGA XXXVI compliance

*Properties:* Cationic

#### Prox®-Amine AP [Synthron SA]

*Uses:* Lubricant, dustproofing agent for mfg. of pigmented paper in a size press

#### Prox®-Amine CE 9122 AL [Synthron SA]

*Uses:* Softener for mfg. of paper wadding; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210

#### Prox®-Amine CH 65 [Synthron SA]

*Uses:* Softener for wet-end paper mfg. (wadding); food pkg. adhesives

*Regulatory:* FDA 21CFR§175.105

#### Prox®-Amine CH 66 [Synthron SA]

*Uses:* Hydrophilizing softener for wet-end paper mfg. (wadding); food pkg. adhesives

*Regulatory:* FDA 21CFR§175.105

*Properties:* Dilutable in all proportions in water

#### Prox®-Coat FF [Synthron SA]

*Chem. Descrip.:* Resin

*Uses:* Insolubilizer for org. binders and amyloids in paper sticking and coating applics.; food pkg. adhesives; formaldehyde-free

*Regulatory:* FDA 21CFR §175.105; BGA XXXVI compliance

#### Proxel® BD 20 [Avecia; Avecia Ltd]

*Chem. Descrip.:* 1,2-Benzisothiazolin-3-one solv.-free aq. disp.

CAS 2634-33-5; EINECS/ELINCS 220-120-9

**Uses:** Microbiostat preservative for aq. compositions such as o/w emulsions, water-based adhesives, latexes, emulsion paints, casein and rosin disp., textile spin-finish sol'ns., pesticides, aq. slurries, inks, titanium dioxide slurries, tape joint compds.; leather processing sol'ns.; preservation of fresh animal hides and skins; food pkg. adhesives, paper; food-contact slimicide; non-VOC; heat stable and nonvolatile

**Use Level:** 0.05-0.25% (emulsion paint, adhesives, paper coating, oil-in-water emulsions, latexes, leather processing), 0.10-0.50% (pesticide formulations)

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA 40CFR §180.1001(d); EPA reg. no. 10182-405

**Properties:** Fawn-colored disp.; sol. in water at use dilutions; sp.gr. 1.03; dens. 9.0 lb/gal; visc. 2000 cps; b.p. 100 C; pH 7; 19.3% act.

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; sl. toxic by ingestion; corrosive; causes eye and skin damage; may cause allergic skin reaction; harmful if swallowed or absorbed thru the skin; TSCA listed

**Environmental:** Toxic to fish

**Storage:** Stable under normal storage conditions; maintain pH above 4; protect from frost; if frozen, thaw and stir well before use

#### Proxel® DL [Avecia]

**Chem. Descrip.:** 1,2-Benzisothiazolin-3-one (8.5% min.) in aq. dipropylene glycol

**Uses:** Antimicrobial preservative, stabilizer, slimicide for use in latexes, emulsion paint, aq. slurries, adhesives, tape joint compds., o/w emulsions, paper coatings, pesticides, water-based inks, hides and skins; USDA approved for paints used in federally inspected plants and packing adhesives having min. contact with meat or poultry food prods.; food pkg. adhesives, paper; food-contact slimicide; inhibitor of bacteria, yeast, and fungi; heat-stable, low corrosivity; no formaldehyde released

**Use Level:** 0.1-0.3% (latexes, emulsion paints), 0.1-0.2% (aq. slurries, pigment disp.), 0.1-0.5% (adhesives, pesticides, tape joint compds., water-based inks), 0.1-0.3% (oil-in-water emulsions, paper coating compositions)

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA 40CFR §180.1001(d); EPA reg. no. 10182-265; USDA approval

**Properties:** Dk. brn. liq.; low odor; sol. in water at use dilutions; sp.gr. 1.08; visc. 10 cps; b.p. 100 C; flash pt. (Seta) > 200 F; pH 12; 8.5% min. act.

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; sl. toxic

**Environmental:** Biodeg.

**Storage:** Dilute aq. sol'ns. stable in presence of electrolytes above pH 4

#### Proxel® GXL [Avecia; Avecia Ltd]

**Chem. Descrip.:** 1,2-Benzisothiazolin-3-one in aq. dipropylene glycol

**Uses:** Antimicrobial preservative, slimicide in aq. compositions incl. latex emulsions, metalworking fluids, aq. paints, adhesives, and polishes; USDA approved for paints used in federally inspected plants and packing adhesives having min. contact with meat or poultry food prods.; food pkg. adhesives; food-contact paper/paperboard; slimicide in food-contact paper; patented; heat stable, nonvolatile

**Use Level:** 0.05-0.15% (latexes, emulsion paint, paper coating), 0.05-0.25% (water-based inks, pesticide formulations, adhesives), 0.04-0.125% (aq. slurries, pigment disp.), 0.08-0.25% (tape joint compds.), 0.05-0.18% (oil-in-water emulsions)

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA 40CFR §180.1001(d); EPA reg. no. 10182-30; USDA approval

**Properties:** Dk. brn. non-crystallizing liq., sl. odor; sol. in water at use dilutions; 0.1% on 270 mesh; sp.gr. 1.13; dens. 9.5 lb/gal; visc. 500 cps; vapor pressure 12.25 mm Hg; i.b.p. 100 C; flash pt. (Seta) > 200 F; pH 12 (10% aq.); 19.3% act.

**Toxicology:** LD50 (oral, rat) 1200-2175 mg/kg; sl. toxic by ingestion; severe skin/eye irritant; may cause eye burns; vapors can irritate eyes, nose, respiratory passages; repeated/prolonged contact may cause dermatitis and skin sensitization; TSCA listed

**Environmental:** Toxic to fish; LC50 (rainbow trout, 96 h) 7 mg/l, (bluegill sunfish, 96 h) 30 mg/l

**Precaution:** Incompat. with strong oxidizing agents, acids; corrodes mild steel, aluminum, copper, and other metals; reacts vigorously with sodium hypochlorite, may evolve chlorine

**Hazardous Decom. Prods.:** Hazardous combustion prods.: CO<sub>x</sub>, NO<sub>x</sub>, ammonia, SO<sub>x</sub>

**Storage:** Stable under normal storage conditions; maintain pH above 4, protect from frost

#### Proxel® XL2 [Avecia; Avecia Ltd]

**Chem. Descrip.:** 1,2-Benzisothiazolin-3-one aq. sol'n. in propylene glycol

**Uses:** Inhibitor of bacteria, yeast, and fungi; for use in latexes, emulsion paint, aq. slurries, adhesives, tape joint compds., o/w emulsions, paper coating compositions, pesticides, water-based inks, hides and skins; USDA approved for paints used in Federally inspected plants and packing adhesives having min. contact with meat or poultry food prods.; food pkg. adhesives, paper; food-contact slimicide; heat-stable, readily degradable in environment; low corrosivity; no formaldehyde released

**Use Level:** 0.1-0.3% (latexes, emulsion paints), 0.1-0.2% (aq. slurries, pigment disp.), 0.1-0.5% (adhesives, pesticides, tape joint compds., water-based inks), 0.1-0.3% (oil-in-water emulsions, paper coating compositions)

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA 40CFR §180.1001(d); EPA reg. no. 10182-405

**Properties:** Dk. brn. liq.; low odor; sol. in water at use dilutions; sp.gr. 1.09; visc. 10 cps; b.p. 100 C; flash pt. (Seta) > 200 F; pH 12.8; 9% min. act.

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; sl. toxic

**Environmental:** Biodeg.

#### Prox®-Lube SC 5060 [Synthron SA]

**Uses:** Lubricant, visc. stabilizer for paper sticking and coating applics.; reduces deposits during calendaring

#### Prox®-Lube SN 5070 [Synthron SA]

**Uses:** Lubricant, softener for paper sticking and coating applics.; developed for Champion or Massey drying press

#### Prox®-Size A 925 E [Synthron SA]

**Uses:** Surf. sizing agent for paper sticking and coating applics.; food pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180; BGA XXXVI compliance

**Properties:** Anionic

#### Prox®-Size C 902 E [Synthron SA]

**Uses:** Sizing agent for paper sticking and coating applics.; applicable in the mass or as a surf. sealer

**Properties:** Cationic

#### PSA-28 [Songkang Ind. Co.]

**Chem. Descrip.:** Modified styrene-acrylic copolymer

CAS 9010-92-8

**Uses:** Surf. sizing agent for wood-free papermaking; improves printability in ink-jet paper; effective regardless of alum content or pH of stock

**Use Level:** 2-20% of starch wt.

**Properties:** Visc. < 2000 cps; pH 9 ± 1; 40 ± 1% solids

#### PSA-34 [Songkang Ind. Co.]

**Chem. Descrip.:** Modified styrene-acrylic copolymer

CAS 9010-92-8

**Uses:** Surf. sizing agent for wood-free papermaking; improves printability in ink-jet paper; effective regardless of alum content or pH of stock

**Use Level:** 2-20% of starch wt.

**Properties:** Visc. < 2000 cps; pH 9 ± 1; 40 ± 1% solids

#### Pulpsil® 160 C [Wacker-Chemie GmbH]

**Chem. Descrip.:** Polydimethylsiloxane and filler

**Uses:** Antifoam; defoamer in food-contact paper/paperboard; component in paper/paperboard in contact with aq./fatty/dry foods

**Regulatory:** FDA 21CFR §176.170, 176.180, 176.210; BgVV XXXVI compliance

**Properties:** Colorless liq.; mild odor; virtually insol. in water; dens. 0.99-1.04 g/cm<sup>3</sup>; visc. 17,000-23,000 mPa·s; m.p. -45 C; flash pt. > 230 C; ignition pt. > 350 C

**Toxicology:** LD50 (oral, rat) > 20,000 mg/kg, (dermal, rat) > 2000 mg/kg; nonmutagenic; nonteratogenic

**Environmental:** Expected LC50 (fish) > 100 mg/l; do not introduce into sewer systems or in shore waters; not degradable biologically; degradable to a certain extent in abiotic processes

**Hazardous Decom. Prods.:** Above 150 C a small amt. of formaldehyde is released thru oxidation

**Storage:** Keep container tightly closed

#### Pulpsil® 760 E [Wacker-Chemie GmbH]

**Chem. Descrip.:** Polydimethylsiloxane + filler aq. emulsion

**Uses:** Antifoam and drainage aid for pulp washing and screening, bleaching, sewage treatment; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty/dry foods; highly effective

**Use Level:** 0.05-0.3 kg/ton pulp

**Regulatory:** FDA 21CFR §176.170, 176.180, 176.210

*Properties:* Milky wh. liq.; mild odor; completely misc. with water; dens. 1.0 g/cm<sup>3</sup>; visc. 50-500 mPa·s; vapor pressure 23 hPa (20 C); b.p. 100 C (1013 hPa); flash pt. none; pH 6-8; 32-35% solids

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg

*Environmental:* Do not introduce into sewer systems or in shore waters; probably nontoxic to fish

*Hazardous Decomp. Prods.:* Above 150 C a small amt. of formaldehyde is released thru oxidation

*Storage:* 6 mos min. shelf life when stored in tightly closed original containers @ 0-40 C; protect against frost, sun, heat sources

#### Pura-Chem® [Hercules]

*Chem. Descrip.:* Emulsion and dry polymers

*Uses:* Settling agent, sludge dewatering agent for pulp/paper industry

#### PVP K-15 [ISP]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent, dye-receptive resin used in adhesives, ceramics, glass/glass fibers, coatings/inks (pigment dispersant, leveling agent, gloss aid, antiblock), personal care prods. (hair, shave, makeup, bath, skin, dentifrices), household/industrial/institutional cleaners, elec., lithography/photography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

*Properties:* Off-wh. powd.; sol. in water and org. solv.; m.w. 8100; bulk dens. 36 lb/ft<sup>3</sup>; 95% min. act.

*Toxicology:* LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

#### PVP K-15 Sol'n. [ISP]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent, dye-receptive resin used in adhesives, ceramics, glass/glass fibers, coatings/inks (pigment dispersant, leveling agent, gloss aid, antiblock), personal care prods. (hair, shave, makeup, bath, skin, dentifrices), household/industrial/institutional cleaners, elec., lithography/photography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

*Properties:* Clear liq.; m.w. 12,000; 28-32% solids

*Toxicology:* LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

#### PVP K-30 [ISP]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent, dye-receptive resin used in adhesives, ceramics, glass/glass fibers, coatings/inks (pigment dispersant, leveling agent, gloss aid, antiblock), personal care prods. (hair, shave, makeup, bath, skin, dentifrices), household/industrial/institutional cleaners, elec., lithography/photography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

*Properties:* Off wh. powd.; sol. in water and many organic solv., incl. alcohols, some chlorinated compds., nitroparaffins, and amines; m.w. 57,500; bulk dens. 28 lb/ft<sup>3</sup>; 95% min. act.

*Toxicology:* LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

#### PVP K-60 Sol'n. [ISP]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent, dye-receptive resin used in adhesives, ceramics, glass/glass fibers, coatings/inks (pigment dispersant, leveling agent, gloss aid, antiblock), personal care prods. (hair, shave, makeup, bath, skin, dentifrices), household/industrial/institutional cleaners, elec., lithography/photography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

*Properties:* Clear liq.; m.w. 400,000; dens. 9.3 lb/gal; 45-49% solids

*Toxicology:* LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

#### PVP K-90 [ISP]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent, dye-receptive resin used in adhesives, ceramics, glass/glass fibers, coatings/inks (pigment dispersant, leveling agent, gloss aid, antiblock), personal care prods. (hair, shave, makeup, bath, skin, dentifrices), household/industrial/institutional cleaners, elec., lithography/photography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

tography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

*Properties:* Off-wh. powd.; m.w. 1,270,000; bulk dens. 20 lb/ft<sup>3</sup>; 95% min. act.

*Toxicology:* LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

#### PVP K-90 Sol'n. [ISP]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent, dye-receptive resin used in adhesives, ceramics, glass/glass fibers, coatings/inks (pigment dispersant, leveling agent, gloss aid, antiblock), personal care prods. (hair, shave, makeup, bath, skin, dentifrices), household/industrial/institutional cleaners, elec., lithography/photography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

*Properties:* Clear liq.; m.w. 1,280,000; 20-24% solids

*Toxicology:* LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

#### PVP K-120 [ISP]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent, dye-receptive resin used in adhesives, ceramics, glass/glass fibers, coatings/inks (pigment dispersant, leveling agent, gloss aid, antiblock), personal care prods. (hair, shave, makeup, bath, skin, dentifrices), household/industrial/institutional cleaners, elec., lithography/photography, textiles, membranes, metallurgy, paper, polymerization, water/waste treatment, oil/gas

*Properties:* Off-wh. powd.; m.w. 2,900,000; 95% min. act.

*Toxicology:* LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

#### Pycal 94 [Uniqema/ICI Surf. Am.]

*Chem. Descrip.:* POE aryl ether

*Uses:* Emulsifier, wetting agent, plasticizer for industrial applics.; plasticizer for wax paper adhesives; solvent for PVAc; thickener for PVAc emulsions; coalescing agent for resin particles in air-drying of resin film

*Properties:* Pale yel. liq.; sol. in water, ether, alcohol, ketone, lower aliphatic ester, and aromatic hydrocarbon solv.; sp.gr. 1.1; visc. ≈ 50 cps; HLB 14; acid no. 2 max.; flash pt. > 300 F; ref. index 1.502; pH 4-6 (50% aq.)

#### Pyrex AMN [BK Giulini Chemie]

*Chem. Descrip.:* Inorg. ammonium salts

*Uses:* Flame retardant for paper, board, and cellulose nonwovens

*Use Level:* 10-12%

*Properties:* Wh. crystals; sol. 500 g/l in water (20 C); bulk dens. 950 kg/m<sup>3</sup>; pH 7 (10%); 100% act.

*Toxicology:* Nontoxic

*Storage:* 1 yr. shelf life in dry conditions

#### Pyrex FA [BK Giulini Chemie]

*Chem. Descrip.:* Ammonium polyphosphate

*Uses:* Flame retardant for paper, board, and cellulose nonwovens

*Use Level:* 7%

*Properties:* Colorless liq.; misc. with water; sp.gr. 1.3; pH 6; 50% act.

*Toxicology:* Nontoxic

*Storage:* 6 mos. shelf life

#### PyroBreak™ EX-13 [Michelman]

*Chem. Descrip.:* Phosphorus-based system with wetting agent

*Uses:* Flame retardant saturant for in-line and off-line applic. to treat paper, paperboard, natural fiber, and wood for paperboard pkg., corrugated paperboard for building materials, industrial prod. structural components, displays, exhibits, etc.; low cost; contains wetting agent to inc. rate of penetration into substrate; glueable; printable; flexible; repulpable; water-based; solv.-free; nonhazardous

*Use Level:* 10-15% (dry wt. basis) on paper/paperboard substrate

*Properties:* 60% solids

#### PyroBreak™ EX-18 [Michelman]

*Uses:* Flame retardant saturant for in-line and off-line applic. to treat paper, paperboard, natural-fiber fabrics, and wood for paperboard pkg., corrugated paperboard for building materials, industrial prod. structural components, displays, exhibits, etc.; glueable; printable; flexible; repulpable; water-based; solv.-free; nonhazardous

*Use Level:* 10-15% (dry wt. basis) on paper/paperboard substrate

*Properties:* 60% solids

#### PyroCide™ II [Michelman]

*Uses:* Flame retardant intumescent coating for paper, paperboard, corrugated

---

sheet, and other substrates incl. wood, wood prods., plastics, and films;  
gluable; printable; flexible; repulpable; water-based; solv.-free; non-

hazardous  
*Properties:* Dens. 11 lb/gal

# Q

## Q-Cel® 6019 [PO]

*Chem. Descrip.:* Hollow borosilicate glass microspheres  
*Uses:* Extender/filler for plastics, fiberglass-reinforced plastics, urethane foams, putties, cultured marble, adhesives, automotive repair compds., moldings, thin films, pressure sensitive tapes, paper; lightweight  
*Properties:* Wh. spheres; dens. 0.20 g/cc  
*Toxicology:* Moderately alkaline; prolonged exposure may cause respiratory irritation

## QEMI BSW 8131 [Qemi Int'l.]

*Chem. Descrip.:* Water-based defoamer composed of silicone fluid, hydrophobic particles, and lipophilic surface act. agents  
*Uses:* Defoamer for brown stock washers, starch systems, ground wood, hydropulpers, white water loops, and wastewater applics.; drainage aid for paper applics.; pitch control agent; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210  
*Properties:* Off-wh. to wh. emulsion; sp.gr. 0.98-1.02; visc. 800-1600 cps; pH 7-10

## QEMI BSW 8133 [Qemi Int'l.]

*Chem. Descrip.:* Oil-based defoamer composed of silicone fluid, hydrophobic particles, and lipophilic surface active agents  
*Uses:* Defoamer for brown stock washers, starch systems, ground wood, hydropulpers, white water loops, and wastewater applics.; drainage aid for paper applics.; pitch control agent; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210  
*Properties:* Off-wh. to wh. emulsion; sp.gr. 0.98-1.02; visc. 800-1600 cps; pH 7-10

## QEMI DSR 8116A [Qemi Int'l.]

*Chem. Descrip.:* Low m.w., very high charge dens. polyamine  
*Uses:* Dry str. resin for paper/paperboard, food-contact paper/paperboard in contact with aq./fatty foods; designed for use as part of a two-component system  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* Amber clear liq.; sol. in water; dens. 9.4 ± 0.1 lb/gal; visc. 500-1000 cps; f.p. 20 F; pH 5 ± 1; 50 ± 1% act.; cationic  
*Storage:* 3 mos shelf life; store at 40-90 F; if frozen, thaw and agitate prior to use; store in glass, SS, plastic, or epoxy-lined vessels (avoid aluminum, copper, mild steel equip.)

## QEMI DSR 8117A [Qemi Int'l.]

*Chem. Descrip.:* Med. m.w., low charge dens. polyacrylamide  
 CAS 9003-05-8  
*Uses:* Dry str. resin for paper/paperboard, food-contact paper/paperboard in contact with aq./fatty foods; in conjunction with Qemi DSR 8116A for recycle furnishes; effective under acid or alkaline papermaking conditions  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* Lt. amber liq.; sol. in water; dens. 8.95 ± 0.1 lb/gal; visc. 5000-11,000 cps; f.p. 3 F; pH 5 ± 1; 22 ± 1% act.; anionic  
*Storage:* 3 mos shelf life; store at 40-90 F; if frozen, thaw and agitate prior to use; store in glass, SS, plastic, or epoxy-lined vessels (avoid aluminum and iron equip.)

## QEMI MDF 8019 [Qemi Int'l.]

*Chem. Descrip.:* Water-based defoamer composed of silicone fluid, hydro-

phobic particles, and lipophilic surface act. agents  
*Uses:* Machine defoamer for starch systems, coters, ground wood, hydropulpers, white paper white water loops, and wastewater applics.; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods; no reportable materials (i.e., paraffinic or naphthenic oils); no adverse effects on sizing  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210  
*Properties:* Wh. to off-wh. emulsion; sp.gr. 0.98-1.02; visc. 800-1600 cps; pH 7-10

## QEMI MDF 8021 [Qemi Int'l.]

*Chem. Descrip.:* Water-based defoamer composed of silicone fluid, hydrophobic particles, and lipophilic surface act. agents  
*Uses:* Machine defoamer for starch systems, coters, ground wood, hydropulpers, white paper white water loops, and wastewater applics.; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods; no reportable materials (i.e., paraffinic or naphthenic oils); no adverse effects on sizing  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210  
*Properties:* Wh. to off-wh. emulsion; sp.gr. 0.98-1.02; visc. 800-1600 cps; pH 7-10

## QEMI MDF 8023 [Qemi Int'l.]

*Chem. Descrip.:* Water-based defoamer composed of surface act. agents  
*Uses:* Defoamer for paper machines, in starch and coating systems, and in wastewater applics.; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods; no reportable materials (i.e., paraffinic or naphthenic oils); no adverse effects on sizing  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210  
*Properties:* Off-wh. tan emulsion; sp.gr. 0.98-1.02; visc. 800-1200 cps; pH 6.5-9.0

## QEMI MDF 8831 [Qemi Int'l.]

*Chem. Descrip.:* Water-based emulsion defoamer  
*Uses:* Machine defoamer for paper applics., effluent treatment of surf. foam; handles surf. foam as well as trapped air  
*Properties:* Wh. emulsion; sp.gr. 0.95; dens. 8.0 lb/gal; f.p. near 0 C; pH 7.5-8.5  
*Storage:* 6 mos shelf life

## QEMI Q-AQ-60 [Qemi Int'l.]

*Chem. Descrip.:* 60% Anthraquinone micronized aq. slurry, ultrahigh purity  
 CAS 84-65-1; EINECS/ELINCS 201-549-0  
*Uses:* Alkaline pulp catalyst enhancing yield and accelerating delignification of kraft pulps, resulting in increased digester capacity, odor abatement, decreased liquor chemical usage, etc.  
*Properties:* < 1.5 μ mean particle size; dens. 1.22; visc. < 400 cps; pH 8-10; 60% min. assay  
*Toxicology:* Potential skin irritant

## QEMI SSDF 8013 [Qemi Int'l.]

*Chem. Descrip.:* Water-based defoamer composed of silicone fluid, hydrophobic particles, and lipophilic surface act. agents  
*Uses:* Defoamer for starch systems, coters, ground wood, hydropulpers, white paper white water loops, and wastewater applics.; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods; no reportable materials (i.e., paraffinic or naphthenic oils); no adverse effects on sizing  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210

*Properties:* Wh. to off-wh. emulsion; sp.gr. 0.98-1.02; visc. 800-1200 cps; pH 7-9

**QEMI WSR 8122A** [Qemi Int'l.]

*Chem. Descrip.:* Highly charged cationic thermosetting polyamine resin

*Uses:* Wet str. resin for acid or alkaline papermaking, paper/paperboard, virgin and recycled stocks, fine paper, specialty paper, food-contact paper/paperboard in contact with aq./fatty foods; inc. wet tens. and wet tear props.; effective at pH 4-9; retains and inc. efficiency of internal additives

*Regulatory:* FDA 21CFR §176.170

*Properties:* Amber clear liq.; sol. in water; dens.  $9.0 \pm 0.2$  lb/gal; visc. 200-600 cps; f.p. 32 F; pH  $3.2 \pm 0.5$ ;  $30 \pm 0.5\%$  act.; cationic

*Storage:* 3 mos shelf life; store at 40-90 F; if frozen, thaw and agitate prior to use; store in glass, SS, plastic, or epoxy-lined vessels (avoid aluminum and iron equip.)

**QEMI WSR 8123A** [Qemi Int'l.]

*Chem. Descrip.:* Highly charged cationic thermosetting polyamine resin

*Uses:* Wet str. resin for acid or alkaline papermaking, paper/paperboard, virgin and recycled stocks, furnishes having high cationic demand incl. unbleached kraft, corrugating medium, and recycle furnishes, and food-contact paper/paperboard in contact with aq./fatty foods; inc. wet tens. and wet tear props.; effective at pH 4-9; retains and inc. efficiency of internal additives

*Regulatory:* FDA 21CFR §176.170

*Properties:* Dk. amber liq.; sol. in water; dens.  $9.0 \pm 0.1$  lb/gal; visc. 50-250 cps; f.p. 32 F; pH  $5.0 \pm 1$ ;  $30 \pm 0.5\%$  act.; cationic

*Storage:* 3 mos shelf life; store at 40-90 F; if frozen, thaw and agitate prior to use; store in glass, SS, plastic, or epoxy-lined vessels (avoid aluminum and iron equip.)

**Qemiban** [Qemi Int'l.]

*Chem. Descrip.:* Water-based defoamer composed of lipophilic and hydrophobic surface act. agents

*Uses:* Defoamer for paper machine white water loops, food-contact paper/paperboard, and wastewater applics.; component of paper/paperboard in contact with aq./fatty foods; no reportable materials (i.e., paraffinic or naphthenic oils)

*Regulatory:* FDA 21CFR §176.170, 176.210

*Properties:* Wh. emulsion; sp.gr. 0.98-1.02; visc. 800-1200 cps; pH 7-9

**Qemibrom L-27** [Qemi Int'l.]

*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide (20%)

CAS 10222-01-2

*Uses:* Biocide for control of bacteria, fungi, and yeast in pulp, paper, and paperboard mills; fast-acting; nonoxidizing

*Use Level:* 0.15-0.50 lb/ton of pulp/paper (dry basis)

*Properties:* Lt. yel. to amber liq.; mild antiseptic odor; misc. with water; bulk dens. 10.2-10.7 lb/gal; vapor pressure  $2.2 \times 10^5$  mm Hg; f.p.  $\approx -50$  C; b.p.  $> 120$  C (act. dec.); pour pt.  $\approx -45$  C; flash pt. (COC) none; pH 2-4

*Environmental:* Outstanding environmental props.; nonpersistent; degrades to naturally occurring prods.

*Storage:* 12 mos shelf life; store below 35 C in original self-venting containers out of direct sunlight

**Qemibrom L-56** [Qemi Int'l.]

*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide (5%)

CAS 10222-01-2

*Uses:* Biocide for control of bacteria, fungi, and yeast in pulp, paper, and paperboard mills; fast-acting; nonoxidizing

*Use Level:* 0.06-0.21 gal/ton of pulp/paper (dry basis)

*Properties:* Lt. yel. to amber liq.; mild antiseptic odor; misc. with water; bulk dens. 9.1-9.7 lb/gal; vapor pressure  $2.2 \times 10^5$  mm Hg; f.p.  $\approx -50$  C; b.p.  $> 120$  C (act. dec.); pour pt.  $\approx -45$  C; flash pt. (COC) none; pH 2-4

*Environmental:* Outstanding environmental props.; nonpersistent; degrades to naturally occurring prods.

*Storage:* 12 mos shelf life; store below 35 C in original self-venting containers out of direct sunlight

**Qemicide DTC-35** [Qemi Int'l.]

*Chem. Descrip.:* Sodium dimethyldithiocarbamate (15-16.6%), nabam (15-16.6%) in inert ingreds. (66.8-70%)

*Uses:* Bactericide and fungicide for paper mills, pulp mills; slimicide for machines which make food pkg. paper/paperboard

*Use Level:* 0.1-2.0 lb/ton finished paper

*Properties:* Yel.-grn. liq.; sulfurous odor; dens. 1.175 g/cc (20 C); pH 10.5-12.4

*Storage:* Store at mod. temps.

**Qemicide DTC-1050** [Qemi Int'l.]

*Chem. Descrip.:* Potassium dimethyldithiocarbamate (50-51%)

CAS 128-03-0

UN No. 1760

*Uses:* Bactericide and fungicide for industrial recirculating water cooling towers, evaporator condensers, paper mills, pulp mills, sec. and tert. petrol. recovery, and drilling fluids; highly effective; not approved for use in potable water or where contamination of potable water may occur

*Regulatory:* EPA reg. no. 31910-12-63684

*Properties:* Yel.-grn. liq.; dens. 1.25 g/cc (20 C); pH 12-14

*Toxicology:* Causes eye and skin irritation; harmful if swallowed; avoid contamination of food

*Precaution:* Corrosive liq.

*Storage:* Store at mod. temps., 33-110 F

**Qemicide MBT-10** [Qemi Int'l.]

*Chem. Descrip.:* Methylene bithiocyanate aq. microemulsion

CAS 6317-18-6

*Uses:* Biocide for cooling water and paper industries; slimicide in paper mills; cost effective; long term performance; no hazardous org. solvs.

*Use Level:* 2-8 oz/ton of finished paper

*Regulatory:* EPA approved

*Properties:* Wh. microemulsion; sl. pungent odor; m.w. 130 (of act.); sp.gr. 1.046 (15.5 C); visc. 150-250 cps; flash pt.  $> 67$  C

**Qemidink 8001** [Qemi Int'l.]

*Chem. Descrip.:* Org. cleaner composed of proprietary blend of org. surface act. agents and solvent

*Uses:* Deinking aid to remove and disperse inorg. and org. paper machine additives as well as common org. contaminants from pulping process; controls common sulfite, groundwood, and kraft pulping pitch aids; degreaser; release agent when applied continuously on tissue machines; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods; nonalkaline; nonfoaming

*Use Level:* 0.25-2.0 lb/ton (at hydropulper), 0.01-0.1% (fed continuously thru showers), 5-100% (batch and general cleaning)

*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210

*Environmental:* Biodeg.

**Qemidink 8002** [Qemi Int'l.]

*Chem. Descrip.:* Org. surfactant

*Uses:* Deinking aid, flotation aid for starch systems, coters, ground wood, hydropulpers, white paper white water loops, and wastewater applics.; softener in tissue prod.; defoamer in food-contact paper/paperboard; component of paper/paperboard in contact with aq./fatty and dry foods; inc. flotation cell effectiveness; nonalkaline; low foaming

*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210

*Properties:* Amber liq.; sp.gr. 0.942 g/ml; visc. 100-200 cps; flash pt.  $> 450$  F

*Environmental:* Biodeg.

**Qemidink 8787** [Qemi Int'l.]

*Chem. Descrip.:* Polyalkylene oxide surfactant

*Uses:* Surfactant, deinking aid for paper, optimizing brightness and ink removal in combination flotation/washing systems; effective in mills having hard or soft water; zero VOC; fully compat. with all typ. deinking chems.; effective over broad pH (8-11) and temp. (90-129 F) ranges; noncorrosive; extremely stable

*Use Level:* 4-6 lb/ton air-dried fiber (newsprint/magazine and wastepaper)

*Regulatory:* DOT nonhazardous

*Properties:* Colorless clear liq.; dens. 8.5 lb/gal; visc. 435 cps; f.p. 0 C; flash pt. (PMCC) nonflamm.; pH 5.5 (1%); nonionic

*Toxicology:* As with any detergent, care should be taken to avoid contact with eyes or skin due to natural degreasing props.

*Storage:* 6 mos shelf life; store and use above 60 F due to inc. visc. at lower temps.; avoid freezing; fully functional once completely thawed; avoid mild steel tanks

**Qemifeltwash 8020A** [Qemi Int'l.]

*Chem. Descrip.:* Solvent/surfactant blend

*Uses:* Solvent/surfactant for continuous cleaning of wet felts in paper machine press sections, e.g., in newsprint or mech. furnish sheets where pitch control is very important; acidic version; applied diluted at 0.1-1.0% conc.

*Use Level:* 3-7 lb/ton paper

*Properties:* Pale yel. clear liq.; sol. in water; sp.gr. 1.03; pH 2.4 (5%)

*Storage:* Store at 40-90 F; keep containers closed; store away from heat or ignition sources

**Qemifeltwash 8020N** [Qemi Int'l.]*Chem. Descrip.:* Solvent/surfactant blend*Uses:* Solvent/surfactant for continuous cleaning of wet felts in paper machine press sections, esp. on brn. paper, linerboard; neutral version; applied diluted at 0.1-1.0% conc.*Use Level:* 3-7 lb/ton paper*Properties:* Colorless clear liq.; org. solv. odor; disp. in water; sp.gr. 1.0; f.p. < 0 C; pH 6.5 (5%)*Precaution:* May contain trace amts. of ethylene oxide, which may accumulate in the headspace of shipping/storage containers*Storage:* Store at 40-90 F; keep containers closed; store away from heat or ignition sources**Qemifloc 707** [Qemi Int'l.]*Chem. Descrip.:* Polymer*Uses:* Coagulant for difficult wastewater applics. in paper, tanneries, steel furniture mfg., oily/greasy effluents, poultry processing plants, automotive mfg., textile industry; useful as primary or sec. coagulant or with anionic polymers; exc. solid-liq. separation; rapid destruction of o/w emulsions; reduces sludge; effective in low and high suspended solids effluents; cost effective over wide range of pH, temp., etc.*Properties:* Dk. brn. visc. liq.; sol. in water; sp.gr. 1.33-1.35; visc. 1000-2000 cps; f.p. 20 F; pH 4-5; 50% act.; cationic*Toxicology:* Mildly corrosive; avoid contact with eyes and skin; do not ingest*Precaution:* Mildly acidic; mildly corrosive to steel, aluminum, and copper alloys; extremely high temps. (500 F) and highly alkaline conditions may lead to prod. degradation**Qemifloc 8086** [Qemi Int'l.]*Chem. Descrip.:* Emulsion polymer*Uses:* Coagulant; retention aid for solid-liq. separation processes; clarifier and sludge dewatering aid in industrial and municipal water treatment processes, paper mill effluent treatment; flocculant in filter press and centrifuge operations; effective over wide range of operating conditions; exc. resist. to chlorine*Use Level:* 0.1%*Properties:* Milky wh. o/w emulsion; high m.w.; bulk dens. 8.6-8.7 lb/gal (80 F); visc. 400-1000 cps (80 F); f.p. 10 F; cationic*Toxicology:* Avoid exposure in confined areas*Precaution:* Water should never be added to an o/w emulsion (an intractable gel is formed); spills are very slippery; contains petrol. distillates*Storage:* 6 mos-1 yr shelf life; store at 40-90 F; if frozen, warm and agitate prior to use; will settle sl. on standing; mild agitation restores homogeneity; store empty closed containers away from heat/flame**Qemifloc AH 1000** [Qemi Int'l.]*Chem. Descrip.:* High m.w. polymer*Uses:* Flocculant for paper applics.*Use Level:* 3-5 g/l working conc.*Properties:* Wh. powd.; 2% < 100 mesh; bulk dens. 0.80; visc. 1800 cps (5 g/l); anionic*Storage:* Shelf life 24 mos in closed containers when stored indoors at stable temps. between 5 and 30 C**Qemifloc AH 1054** [Qemi Int'l.]*Chem. Descrip.:* Polymer*Uses:* Flocculant for paper applics.*Use Level:* 3-5 g/l working conc.*Properties:* Wh. powd.; 1.25 mm mesh size; bulk dens. 0.80; visc. 1700 cps (5 g/l); anionic*Precaution:* Spillages are slippery and may be hazardous if spread on floor*Storage:* Hygroscopic; store indoors in dry place below 35 C**Qemifloc CEPG 164** [Qemi Int'l.]*Chem. Descrip.:* Polyacrylamide emulsion

CAS 9003-05-8

*Uses:* Retention aid for liq.-solid separation processes, paper, belt filter/screw press/centrifuge dewatering, dissolved air flotation, gravity settling; flocculant; coagulant; clarifier for water, influent, effluent; thickener*Use Level:* 10 g/l max. use conc.*Properties:* Milky translucent liq.; med. m.w.; bulk dens. 1.02; visc. 1200 cps; 39% act.; cationic*Storage:* 6 mos stability; store @ 0-35 C**Qemifloc FL 61** [Qemi Int'l.]*Chem. Descrip.:* Highly charged, low m.w. polymer*Uses:* Flocculant, coagulant for liq.-solids separation processes, gravity settling, raw water clarification, potable water treatment, filtration, wastewater

treatment; total or partial replacement for inorg. salts; pourable, easy to apply; economical; effective over wide pH range

*Use Level:* 1-20 mg/l (raw water clarification, wastewater treatment), 5-20 mg/l (oil wastes)*Regulatory:* NSF approved for potable water treatment (20 mg/l max. conc.)*Properties:* Reddish-amber liq.; sol. in water; sp.gr. 1.14-1.16 g/ml; visc. 250-400 cps; f.p. 20 F; pH 5.5-6.5; cationic*Environmental:* BOD<sub>5</sub> 100,000 mg/l; COD 200,000 mg/l*Storage:* 12 mos shelf life @ 10-40 C in SS, epoxy or plastic-lined carbon steel, FRP, or PE containers; avoid iron or aluminum for storage/use**Qemifloc FL 71** [Qemi Int'l.]*Chem. Descrip.:* Highly charged polymer*Uses:* Coagulant for liq.-solids separation processes, water clarification where high color and/or low turbidity are prevalent, potable water treatment; used alone or with a flocculant*Regulatory:* NSF approved for potable water treatment (to 20 ppm)*Properties:* Amber liq.; sp.gr. 1.14-1.16 g/ml; visc. 650-1000 cps; f.p. 20 F; pH 5.5-6.5; cationic*Storage:* 1 yr shelf life; store @ 0-35 C in SS, epoxy or plastic-lined carbon steel, FRP, or PE containers; avoid iron or aluminum equip.**Qemifloc FL 81** [Qemi Int'l.]*Chem. Descrip.:* Highly charged high m.w. polymer*Uses:* Coagulant; flocculant; clarification aid; coagulant in potable water treatment; pourable, easy to apply; economical; effective at low dosages, over wide pH, and in chlorinated waters; noncorrosive*Regulatory:* NSF approved for potable water treatment (to 20 mg/l)*Properties:* Reddish-amber liq.; sp.gr. 1.15-1.17 g/ml; visc. 5000-9000 cps; f.p. -18 C; pH 4-5; cationic*Storage:* 1 yr shelf life; store @ 10-40 C in SS, epoxy or plastic-lined carbon steel, FRP, or PE containers; avoid iron or aluminum equip.**Qemireten 8015** [Qemi Int'l.]*Chem. Descrip.:* Low m.w., very high charge dens. liq.*Uses:* Coagulant, retention aid for industrial liq.-solid separation processes, influent clarification, oily wastewater separation, paper recycle clarification, sludge dewatering, pitch control, stickies control, and color removal; component of paper/paperboard in contact with aq./fatty food*Regulatory:* FDA 21CFR §173.60, 176.170; NSF approved for potable water treatment*Properties:* Lt. amber clear liq.; sol. in water; dens. 9.6 ± 0.1 lb/gal; visc. 500-1000 cps; f.p. ≤ 20 F; pH 5-6; cationic*Storage:* 1 yr min. shelf life in unopened containers; store in cool area; protect from freezing; if frozen, warm to 40-90 F and agitate prior to use; prod. rotation rec.; avoid Al, Cu, or mild steel equip.**Qemisoft 8075** [Qemi Int'l.]*Chem. Descrip.:* Fatty acids and quat. amines blend with 15% IPA/9% water*Uses:* Tissue softener, release agent, antistat, and repulping aid for paper industry; provides slick hand*Use Level:* 0.07-0.14 gal/ton of paper*Properties:* Wh. soft solid @ 25 C, easily handled at 46-48 C; easily disp. in hot water; m.w. 569; bulk dens. 7.12 lb/gal; flash pt. 68 F; pH 6.9; 74-77% fatty acids/quat. amines, 15% IPA, 9% water, 2.5% max. amines/amine hydrochloride; highly cationic*Storage:* Store in cool, dry place; keep closed**Qemisoft 8100** [Qemi Int'l.]*Chem. Descrip.:* Quat. ammonium compd.*Uses:* Tissue softener for paper industry, cotton, polyester, and wool giving very soft full handle; compat. with nonionic and cationic chems.*Use Level:* 1-2% on wt. of goods*Properties:* Wh. lysh. pearls; disp. in cold or warm water; pH 5.0 ± 0.5 (5 g/l H<sub>2</sub>O); 100% act.; cationic**Qemisperse 8845** [Qemi Int'l.]*Chem. Descrip.:* Org.*Uses:* Pitch dispersant, pitch control agent for use in thick stock to limit pulp defects and stock system deposition, for kraft and newsprint furnish systems*Properties:* Clear pumpable liq.; sl. odor; sol. in water; sp.gr. 1.18; pH 7 (1%)*Storage:* Store in cool, dry area**QO® Tetrahydrofurfuryl Alcohol (THFA®)** [Penn Spec. Chems.]*Chem. Descrip.:* Tetrahydrofurfuryl alcohol

CAS 97-99-4; EINECS/ELINCS 202-625-6

*Uses:* High boiling solvent and carrier for pesticides; FDA approved for use

- in paper processing; chemical intermediate; also in industrial and consumer cleaners, leather and textile dyeing, epoxies, coatings, inks, paints, and adhesives; plasticizer and vinyl stabilizer carrier  
*Regulatory:* FDA compliance  
*Properties:* Colorless liq.; sol. in water; m.w. 102.13; sp.gr. 1.05 (20 C); dens. 8.79 lb/gal (20 C); visc. 6.24 cps (20 C); f.p. < -80 C; b.p. 178 C; flash pt. (TCC) 74 C; ref. index 1.4520 (20 C)  
*Environmental:* Biodeg.
- QS 1162** [Mace Adhesives & Coatings]  
*Chem. Descr.:* Fully-reacted aliphatic PU in toluene/isopropanol  
*Uses:* For formulation of durable functional and decorative finishes for flexible to rigid substrates such as woven and nonwoven textiles, leather, plastic, wood, paper, and paperboard; readily pigmentable  
*Properties:* Clear visc. liq.; dens. 7.5 lb/gal; visc. 30,000 cps (70 F); VOC 5.3 lbs/gal; 30% solids  
*Toxicology:* Avoid prolonged or repeated contact with skin  
*Storage:* Store @ 40-100 F; keep away from all sources of ignition
- Q-Thane® QW20-1** [K.J. Quinn]  
*Chem. Descr.:* Aliphatic polyester urethane  
*Uses:* Water-based disp. for formulation of tough coatings for plastics, metals, and woods; rec. for flexible films (vinyl, polyester), floor coatings, wood coatings, and plastic, metal, and paper coatings; high gloss and exc. abrasion resist.  
*Properties:* Visc. 25-550 cps; VOC 317 g/l; pH 7.5 ± 0.5; tens. str. 3600; elong. 200%; hardness (Sward) 9; 33 ± 1% solids
- Q-Thane® QW28** [K.J. Quinn]  
*Chem. Descr.:* Aliphatic polyester urethane aq. disp.  
*Uses:* Used for flexible substrates that require tough durable coating; also for industrial bonding, plastic and paper coatings  
*Properties:* Translucent; visc. 25-500 cps; VOC 270 g/l; pH 7.75 ± 0.75; tens. str. 5000; elong. 550%; hardness (Sward) 10; 36 ± 1% solids
- Q-Thane® TE2028** [K.J. Quinn]  
*Chem. Descr.:* Acrylic emulsion  
*Uses:* For use as coating for fabrics, nonwovens, and paper to provide chem., water, and heat resist.; compat. with Q-Thane QWs to provide exc. crosslinking  
*Properties:* PH 6.2 ± 0.25; 50% ± 1 solids
- Quenchophor™ AK 01 Liq.** [Bayer/Industrial Chems.]  
*Chem. Descr.:* Polymer  
*Uses:* Fluorescence quenching agent for papers contng. fluorescent whitening agents  
*Properties:* Liq.; cationic
- Quenchophor™ E1006 Liq.** [Bayer/Industrial Chems.]  
*Chem. Descr.:* Polymer  
*Uses:* Fluorescence quenching agent for papers contng. fluorescent whitening agents  
*Properties:* Liq.; cationic
- Quenchophor™ E1025 Liq.** [Bayer/Industrial Chems.]  
*Chem. Descr.:* Polymer  
*Uses:* Fluorescence quenching agent for papers contng. fluorescent whitening agents  
*Properties:* Liq.; cationic
- Querton 442** [Akzo Nobel Surf. Chem. AB]  
*Chem. Descr.:* Dihydrogenated tallow dimethyl ammonium chloride  
CAS 61789-80-8; EINECS/ELINCS 263-090-2  
*Uses:* Imparts soft feel and antistatic props. to textile softeners for commercial laundry and textile mfg. applics., for hair conditioners, paper chemicals; mfg. of organoclays
- Querton 442-11** [Akzo Nobel Surf. Chem. AB]  
*Chem. Descr.:* Dihydrogenated tallow dimethyl ammonium chloride  
CAS 61789-80-8; EINECS/ELINCS 263-090-2  
*Uses:* Imparts soft feel and antistatic props. to textile softeners for commercial laundry and textile mfg. applics., for hair conditioners, paper chemicals; mfg. of organoclays  
*Properties:* Off-wh. paste; sol. in warm ethanol, IPA, or similar solvs.; disp. in hot water; dens. 860 kg/m<sup>3</sup>; visc. 90 mPa·s; solid. pt. 35-40 C; pH 6-8 (5% in IPA/water 50/50); 76-78.5% act.
- Querton 442-82** [Akzo Nobel Surf. Chem. AB]  
*Chem. Descr.:* Dihydrogenated tallow dimethyl ammonium chloride  
CAS 61789-80-8; EINECS/ELINCS 263-090-2  
*Uses:* Imparts soft feel and antistatic props. to textile softeners for consumer rinse cycle softeners, commercial laundry, textile mfg. applics., for hair conditioners, paper chemicals; mfg. of organoclays  
*Properties:* Off-wh. paste; sol. in warm ethanol, IPA, similar solvs.; disp. in hot water; dens. 860 kg/m<sup>3</sup>; visc. 150 mPa·s; solid. pt. 35-40 C; pH 6-8 (5% in IPA/water 50/50); 81-83% act.
- Querton 442E** [Akzo Nobel Surf. Chem. AB]  
*Chem. Descr.:* Dihydrogenated tallow dimethyl ammonium chloride  
CAS 61789-80-8; EINECS/ELINCS 263-090-2  
*Uses:* Imparts soft feel and antistatic props. to textile softeners for consumer rinse cycle softeners, commercial laundry, textile mfg. applics., for hair conditioners, paper chemicals; mfg. of organoclays  
*Properties:* Off-wh. paste; sol. in warm ethanol, IPA, similar solvs.; disp. in hot water; dens. 860 kg/m<sup>3</sup>; visc. 50 mPa·s; solid. pt. 30 C; pH 6-9 (5% in IPA/water 50/50); 75-77% act.
- Querton 442H** [Akzo Nobel Surf. Chem. AB]  
*Chem. Descr.:* Dihydrogenated tallow dimethyl ammonium chloride  
CAS 61789-80-8; EINECS/ELINCS 263-090-2  
*Uses:* Imparts soft feel and antistatic props. to textile softeners for consumer rinse cycle softeners, commercial laundry, textile mfg. applics., for hair conditioners, paper chemicals; mfg. of organoclays  
*Properties:* Off-wh. paste; sol. in warm ethanol, IPA, similar solvs.; disp. in hot water; dens. 860 kg/m<sup>3</sup>; visc. 50 mPa·s; solid. pt. 30 C; pH 6-9 (5% in IPA/water 50/50); 75-77% act.
- Querton 442P** [Akzo Nobel Surf. Chem. AB]  
*Chem. Descr.:* Di(C12-20 alkyl) dimethylammonium chloride  
CAS 68514-95-4  
*Uses:* Imparts soft feel and antistatic props. to textile softeners for consumer rinse cycle softeners, commercial laundry, textile mfg. applics., for hair conditioners, paper chemicals; mfg. of organoclays  
*Properties:* Off-wh. paste; sol. in warm ethanol, IPA, similar solvs.; disp. in hot water; dens. 860 kg/m<sup>3</sup>; visc. 50 mPa·s; solid. pt. 30 C; pH 6-9 (5% in IPA/water 50/50)
- Querton 442P-11** [Akzo Nobel Surf. Chem. AB]  
*Chem. Descr.:* Di(C12-20 alkyl) dimethylammonium chloride  
CAS 68514-95-4  
*Uses:* Imparts soft feel and antistatic props. to textile softeners for consumer rinse cycle softeners, commercial laundry, textile mfg. applics., for hair conditioners, paper chemicals; mfg. of organoclays  
*Properties:* Off-wh. paste; sol. in warm ethanol, IPA, similar solvs.; disp. in hot water; dens. 860 kg/m<sup>3</sup>; visc. 90 mPa·s; solid. pt. 35-40 C; pH 6-8 (5% in IPA/water 50/50); 76-78.5% act.
- Quilon® C** [DuPont; DuPont Canada]  
*Chem. Descr.:* Chrome complex sol'n. in IPA  
*Uses:* Water repellent and release agent used for water-repellent pkg. materials, food pkg., grease-resistant and release paper when used with PVA, water-repellent nonwoven fabrics, adhesive tapes, release films; insolubilizer for paper coatings, glass fiber coatings; water repellent, tanning agent, lubricant for leather, suede, feathers  
*Properties:* Blue-grn. liq.; alcoholic odor; b.p. 82 C; water-sol.; dens. 0.97 g/ml; flash pt. 4 C (TOC); 5.7% Cr; 7.8% Cl
- Quilon® H** [DuPont; DuPont Canada]  
*Chem. Descr.:* Chrome complex sol'n. in IPA  
*Uses:* Water repellent and release agent used on paper/paperboard for water-repellent pkg. materials, food pkg., grease-resistant and release paper when used with PVA, water-repellent coatings and adhesives, water- and stain-resistant leather (shoes, golf bags, etc.), colorfast, water-repellent suede (dry-cleanable); insolubilizer for adhesives, films, protein binders, and inks  
*Properties:* Dk.-grn. liq.; alcoholic odor; b.p. 82 C; water-sol.; dens. 1.04 g/ml; flash pt. -3 C (TOC); 9.2% Cr; 12.6% Cl
- Quilon® L** [DuPont; DuPont Canada]  
*Chem. Descr.:* Chrome complex sol'n. in IPA  
*Uses:* Water repellent and release agent used on paper/paperboard for water-repellent pkg. materials, food pkg., grease-resistant and release paper when used with PVA, release and grease-crawl-resist. paper for industrial release sheets for prep. of plastic laminates, food separators and pan liners, separator sheets for pressure-sensitive tapes and labels, water-repellent coatings and adhesives  
*Regulatory:* FDA approved for food pkg.  
*Properties:* Dk.-grn. liq.; alcoholic odor; b.p. 82 C; water-sol.; dens. 1.03 g/ml; flash pt. -2 C (TOC); 9.2% Cr; 12.7% Cl
- Quilon® S** [DuPont; DuPont Canada]  
*Chem. Descr.:* Chrome complex sol'n. in IPA  
*Uses:* Water repellent and release agent used for release and grease-crawl-

resistant papers (industrial release sheets for prep. of plastic laminates, food separators and pan liners, separator sheets for pressure-sensitive tapes and labels), water-repellent pkg. materials, food pkg., grease-resistant and release paper when applied with PVA, water-repellent coatings and adhesives; insolubilizer for adhesives, films, protein binders, and inks

*Properties:* Dk.-grn. liq.; alcoholic odor; b.p. 82 C; water-sol.; dens. 0.95 g/ml; flash pt. 2 C (TOC); 5.7% Cr; 7.8% Cl

**Quso® G35, G38, WR55, WR83** [Degussa-Hüls]

*Chem. Descrip.:* Precipitated silica

CAS 1343-98-2; EINECS/ELINCS 215-683-2

*Uses:* Thickener for pastes, creams, lotions in cosmetics and toiletries; suspending agent; improves free-flowing chars. of fine powds.; defoamer for pulp/paper

*Properties:* Microfine; sol. in hot, strong alkaline sol'ns.

# R

## Rad-Cure 106A [Rad-Cure]

*Uses:* UV-curable, heat-sealable adhesive coating providing exc. results when cured on paper or porous substrates for subsequent thermal sealing to glass, aluminum, and steel; high gloss, nonyel. appearance

*Properties:* Gardner 1-2 clear liq.; moderate, musty acrylate odor (uncured), mild sweet odor (cured); dens. 9.0 lb/gal; visc. 150-250 cps; 100% solids

## Rad-Cure 106B [Rad-Cure]

*Uses:* UV-curable, heat-sealable blister coating for blister card applics., producing a paper tearing bond when heat sealed to vinyl blisters; high gloss, nonyel. appearance; also seals well to itself and to most papers and some other plastics

*Properties:* Light hazy liq.; moderate, musty acrylate odor (uncured), mild sweet odor (cured); dens. 9.0 lb/gal; visc. 650-950 cps; 100% solids

## Rad-Cure 106S [Rad-Cure]

*Uses:* UV-curable, heat-sealable adhesive coating intended primarily for plastic-to-plastic applics., and can be cured on paper, vinyl, Lexan, Mylar, and some other plastics; high gloss, nonyel. appearance; cured adhesive has exc. seal props.

*Properties:* Lt. hazy liq.; moderate, camphor-like odor (uncured), mild sweet odor (cured); dens. 9.0 lb/gal; visc. 250-350 cps; 100% solids

## Radiaflot® [Atofina]

*Chem. Descrip.:* Surfactant

*Uses:* Dispersant for pulp, deinking; flotation collector; foam regulator

*Environmental:* Biodeg.

## Raisaccel 2510-L3 [Vinings Ind.]

*Chem. Descrip.:* Blend of surfactants and anthraquinone

*Uses:* Pulping catalyst; improves pulp yield, str., and uniformity; reduces the K number, the rejects, and the usage rate of pulping chems.

## Rai-X-Foam [Vinings Ind.]

*Uses:* Defoamer for pulp/paper

## Ralufon® EA 15-90 [Raschig; Raschig AG]

*Chem. Descrip.:* 2-Ethylhexanol, ethoxylated, sulfopropylated  
 CAS 154906-10-2

*Uses:* Surfactant used in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; wetting agent; solubilizer for hardly sol. nonionics; low-foaming; long service life due to inherent stability; hydrolysis-resist. over wide pH range; no cloud pt.

*Properties:* Liq.; completely misc. in water; pH 5-9; 70% min. act.; anionic

## Ralufon® F3-13 [Raschig]

*Chem. Descrip.:* Alkanol polyethylene oxide sulfopropyl ether, potassium salt  
*Uses:* Surfactant used in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free

*Properties:* Paste; completely misc. in water; 70% min. act.; anionic

## Ralufon® F4-I [Raschig; Raschig AG]

*Chem. Descrip.:* Isotridecyl alcohol ethoxylate (4 mole) sulfopropyl ether, potassium salt  
 CAS 119481-70-8

*Uses:* Surfactant for cleansers, emulsions, electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free

*Properties:* Paste; completely misc. in water; 70% min. act.; anionic

## Ralufon® F5-13I [Raschig; Raschig AG]

*Chem. Descrip.:* Pentaethylene glycol- $\alpha$ -alkyl (C13-C15) alcohol- $\omega$ -(3-sulfopropyl)-diether  
 CAS 119481-71-9

*Uses:* Surfactant for cleansers, emulsions, electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free

*Properties:* Paste; completely misc. in water; 70% min. act.; anionic

## Ralufon® F7-13 [Raschig; Raschig AG]

*Chem. Descrip.:* Heptaethylene glycol- $\alpha$ -alkyl (C13-C15) alcohol- $\omega$ -(3-sulfopropyl)-diether  
 CAS 119481-71-9

*Uses:* Surfactant for cleansers, emulsions, electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free

*Properties:* Paste; completely misc. in water; 70% min. act.; anionic

## Ralufon® F11-13 [Raschig; Raschig AG]

*Chem. Descrip.:* Undecaethylene glycol- $\alpha$ -alkyl (C13-C15) alcohol- $\omega$ -(3-sulfopropyl)-diether  
 CAS 119481-71-9

*Uses:* Surfactant for cleansers, emulsions, electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free

*Properties:* Paste; completely misc. in water; 70% min. act.; anionic

## Ralufon® N3.5 [Raschig]

*Chem. Descrip.:* Nonylphenol polyethylene oxide sulfopropyl ether, potassium salt

*Uses:* Surfactant, wetting agent, emulsifier in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free

*Properties:* Paste; completely misc.; 70% min. act.; anionic

## Ralufon® N6 [Raschig]

*Chem. Descrip.:* Nonylphenol polyethylene oxide sulfopropyl ether, potassium salt

*Uses:* Surfactant, wetting agent, emulsifier in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free

*Properties:* Paste; completely misc.; 70% min. act.; anionic

## Ralufon® N9 [Raschig; Raschig AG]

*Chem. Descrip.:* Polyethylene glycol- $\alpha$ -(4-nonylphenyl)- $\omega$ -3-sulfopropyl diether, potassium salt  
 CAS 119438-10-7

*Uses:* Surfactant, wetting agent, emulsifier in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensi-

- tive to high electrolyte concs.; resist. in acid and basic media; completely salt-free  
*Properties:* Paste; completely misc.; 70% min. act.; anionic
- Ralufon® N10** [Raschig]  
*Chem. Descrip.:* Nonylphenol polyethylene oxide sulfopropyl ether, potassium salt  
*Uses:* Surfactant, wetting agent, emulsifier in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free  
*Properties:* Paste; completely misc.; 70% min. act.; anionic
- Ralufon® N20-90** [Raschig; Raschig AG]  
*Chem. Descrip.:* Polyethylene glycol- $\alpha$ -(4-nonylphenyl)- $\omega$ -3-sulfopropyl diether, potassium salt  
 CAS 119438-10-7  
*Uses:* Surfactant, wetting agent, emulsifier in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper and textile applics.; high foaming power; stable against alkaline earth ions (hard water); insensitive to high electrolyte concs.; resist. in acid and basic media; completely salt-free  
*Properties:* Paste; completely misc.; anionic
- Ralufon® NAPE 14-90** [Raschig; Raschig AG]  
*Chem. Descrip.:* Sulfoalkylated polyalkylated  $\beta$ -naphthol, potassium salt  
 CAS 120478-49-1  
*Uses:* Surfactant, wetting agent, emulsifier used in electroplating baths, metal cleaners, tert. oil recovery, emulsion polymerization, paper, leather, and textile applics., tech. cleaners; solubilizer for aromatic compds.; low-foaming; good dissolving power for organic substances  
*Properties:* Liq.; completely sol. in water; pH 5-9; 70% min. act.; anionic
- Raneoff F-9** [Eastern Color & Chem.]  
*Chem. Descrip.:* Fluorocarbon-type  
*Uses:* Water repellent in food-contact paper/paperboard; durable; provides oil resist. with water repellency; zero VOC version  
*Regulatory:* FDA 21CFR §176.170
- Rapisol B-30, B-80, B-90, C-70** [NOF]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent; dyeing aux.; penetrant for textiles, machine industry; detergent for food industry; dispersant for pitch; agric. spreader; deinking agent for waste paper; pharmaceutical additive; emulsifier for PVC paste resin, petrol and tar; flash agent for dyestuffs and pigments; flotation agent for mining industry  
*Properties:* Colorless transparent liqs.; anionic
- Raven® H2O** [Columbian Chems.]  
*Chem. Descrip.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* For paper, building materials; low energy disp.  
*Properties:* Powd.; 55 nm mean particle size; sp.gr. 1.8; surf. area 45 m<sup>2</sup>/g; oil absorp. 111 (powd.); 2.2% NV
- RC 503** [Process Chems. LLC]  
*Uses:* Brownstock defoamer for kraft, sulfite, and semi-chem. pulp washing., for use in brownstock washing, screen room, and bleach plant operations; oil-based; does not contribute to deposit formation; suitable whether batch or continuous pulp is employed  
*Properties:* Opaque tan liq.; dens. 7-9 lb/gal; visc. 300-500 cps  
*Toxicology:* TSCA listed  
*Storage:* Store in dry area
- RC 8003** [Mace Adhesives & Coatings]  
*Uses:* Paper coating for heat transfer printing applics.; good ink reception and good release for clean transfer; no VOCs  
*Use Level:* 30-60 g/ream coat wt.  
*Properties:* Colorless clear lt. oil; mild acrylic odor; visc. 150 cps  $\pm$  50 (70 F); 100% solids  
*Precaution:* Avoid open flame  
*Storage:* 3 mos. shelf life away from heat and UV-lt.
- RC 8005** [Mace Adhesives & Coatings]  
*Uses:* UV-curable paper coating; good stain, solv. resist., and color stability; no VOCs  
*Use Level:* 30-120 g/ream coat wt.  
*Properties:* Clear to off-wh. liq.; mild acrylic odor; visc. 2400 cps  $\pm$  200 (70 F); 100% solids
- Precaution:* Avoid open flame  
*Storage:* 3 mos. shelf life away from heat and UV-lt.
- Reacopaque 100** [OMNOVA Sol'ns./Paper]  
*Uses:* Opacifier to replace abrasive fillers in various paper grades; improves smoothness of most paper, improves pressroom performance, increases sizing
- Reactopaque® 100** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Hydrophobic polyamide  
 CAS 25038-54-4  
*Uses:* Opacifier for paper incl. newsprint, uncoated and coated free sheets, LWC, board and tissue grades; improves paper formation and smoothness; provides higher opacity at equal or higher brightness  
*Properties:* Visc. 400 cps; pH 4.0; 11% total solids; cationic
- Reactopaque® 150** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Hydrophobic polyamide  
 CAS 25038-54-4  
*Uses:* Opacifier for paper incl. newsprint, uncoated and coated free sheets, LWC, board and tissue grades; improves paper formation and smoothness; provides higher opacity at equal or higher brightness; works at higher pH; sl. more cationic than Reactopaque 100  
*Properties:* Visc. 400 cps; pH 4.0; 11% total solids; cationic
- Reactopaque® 175** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Hydrophobic polyamide  
 CAS 25038-54-4  
*Uses:* Opacifier for paper incl. newsprint, uncoated and coated free sheets, LWC, board and tissue grades; improves paper formation and smoothness; provides higher opacity at equal or higher brightness; works at higher pH; sl. more cationic than Reactopaque 100  
*Properties:* Visc. 400 cps; pH 4.0; 11% total solids; cationic
- ReChem®** [Hercules]  
*Uses:* Deinking agent, flotation aid, pulping aid, debonder, ink dispersant for recycled fiber systems
- Redifloc® Series** [Eka Chems.]  
*Chem. Descrip.:* Polyamines, polyacrylamides, and polyaluminum hydroxychloride  
*Uses:* Anionic trash catcher to reduce colloidal interference and deposition in papermaking processes
- Regal® 991** [Cabot/Special Blacks]  
*Chem. Descrip.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant for gravure and carbon paper inks, gloss inks and bases; general purpose; offers balance of good dispersion and blue tone  
*Use Level:* 15-22% (web-offset newsink); 35-45% (paste ink bases); 5-12% (liq. gravure ink)  
*Properties:* Pellets; 38 nm particle size; sp.gr. 1.8; dens. 28 lb/ft<sup>3</sup>; surf. area 46 m<sup>2</sup>/g; oil absorp. 63 cc/100 g; 1% volatile  
 HMIS: Health 0; Flammability 1; Reactivity 0
- Regal® 99R** [Cabot/Special Blacks]  
*Chem. Descrip.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant for gravure and carbon paper inks, gloss inks and bases; general purpose; offers balance of good dispersion and blue tone  
*Use Level:* 35-45% (paste ink bases)  
*Properties:* Fluffy; 38 nm particle size; sp.gr. 1.8; dens. 16 lb/ft<sup>3</sup>; surf. area 46 m<sup>2</sup>/g; oil absorp. 65 cc/100 g; 1% volatile  
 HMIS: Health 0; Flammability 1; Reactivity 0
- Regal® 300R** [Cabot/Special Blacks]  
*Chem. Descrip.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant for inks, coatings, plastics, paper; provides high tinting str., good jetness, and good dispersion  
*Properties:* Fluffy; 27 nm particle size; dens. 13 lb/ft<sup>3</sup>; surf. area 80 m<sup>2</sup>/g; 1.0% volatile
- Regal® 330** [Cabot/Special Blacks]  
*Chem. Descrip.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant, UV stabilizer for inks, coatings, plastics, paper; provides high tinting str., good jetness, and good dispersion  
*Properties:* Pellets; 25 nm particle size; dens. 28 lb/ft<sup>3</sup>; surf. area 94 m<sup>2</sup>/g; 1.0% volatile
- Regal® 330R** [Cabot/Special Blacks]  
*Chem. Descrip.:* Carbon black

- CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant, UV stabilizer for inks, coatings, plastics, paper; provides high tinting str., good jetness, and good dispersion  
*Properties:* Fluffy; 25 nm particle size; dens. 19 lb/ft<sup>3</sup>; surf. area 94 m<sup>2</sup>/g; 1.0% volatile
- Regal® 400** [Cabot/Special Blacks]  
*Chem. Descr.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant providing exc. dispersion in gloss printing and carbon paper inks, stable tinting of enamels, resistive plastics  
*Properties:* Pellets; 25 nm particle size; dens. 30 lb/ft<sup>3</sup>; surf. area 96 m<sup>2</sup>/g; 3.5% volatile
- Regal® 400R** [Cabot/Special Blacks]  
*Chem. Descr.:* Carbon black, aftertreated  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant providing exc. dispersion in gloss printing and carbon paper inks, stable tinting of enamels, resistive plastics (higher dielec. PVC cable compds.)  
*Properties:* Fluffy; 25 nm particle size; dens. 14 lb/ft<sup>3</sup>; surf. area 96 m<sup>2</sup>/g; pH 2.5-4.0; 3.5% volatile
- Regal® SRF-S** [Cabot/Special Blacks]  
*Chem. Descr.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant for gravure and one-time carbon paper inks  
*Use Level:* 5-12% (liq. gravure ink)  
*Properties:* Pellets; 60 nm particle size; sp.gr. 1.8; dens. 32 lb/ft<sup>3</sup>; surf. area 30 m<sup>2</sup>/g; oil absorp. 64 cc/100 g; 1% volatile  
 HMIS: Health 0; Flammability 1; Reactivity 0
- Reofos® 1884** [FMC]  
*Chem. Descr.:* Triaryl phosphate  
*Uses:* Flame retardant plasticizer for PVC and other polymers, rubber, aq. systems, latexes based on PVC, SBR, PVAc, acrylics, EVA, paints, dyes, nonwoven fabric binders, textile back coatings, carpet backings, asbestos paper bindings, adhesives, pigment carriers; emulsifiable  
*Properties:* Water-disp.; sp.gr. 1.145-1.161 (20/20 C); acid no. 0.26; nonionic
- Reomol® TBP** [FMC]  
*Chem. Descr.:* Tributyl phosphate  
 CAS 126-73-8; EINECS/ELINCS 204-800-2  
*Uses:* Defoamer for drilling muds, cements, fracturing fluids, plaster compositions, paper coatings, pulp bleaching, mold coating, glass luminescent coatings, aq. emulsion paints, adhesives, mercerizing liquors/dye baths; anti-freeze sol'ns., fermentation, detergents; primary plasticizer and solvent; pigment dispersant  
*Properties:* Liq.; sol. in min. oil, gasoline, most org. liqs.; sol. 0.1% in water; insol. in glycerin, glycols; sp.gr. 0.97-0.983 (20/20 C); dens. 8.14 lb/gal (20 C); visc. 3.7 cp (20 C); vapor pressure 7.3 mm Hg (150 C); f.p. < -80 C; b.p. 137-145 C (4 mm Hg); pour pt. < 80 C; flash pt. 166 C; fire pt. 182 C; surf. tens. 29 dynes/cm (20 C); 7.4% P, < 0.1% moisture  
*Toxicology:* Severe skin irritant  
*Precaution:* Low degree of fire hazard
- Repolem®** [Atofina SA]  
*Chem. Descr.:* Acrylic disp. and emulsions  
*Uses:* Binder for decorative paints, adhesives, textiles and nonwoven materials, leather, pulp/paper, etc.
- Resimene® 717** [Solutia]  
*Chem. Descr.:* High solids methylated melamine in n-butanol  
*Uses:* Crosslinker for thermosetting high solids and waterborne surf. coatings for automotive, metal, paper, appliance, and metal deco coatings, inks, prefinished paneling; gives rapid low temp. crosslinking, without need for strong acid catalysis  
*Properties:* APHA 30 max. liq.; dens. 9.5-9.7 lb/gal; visc. (Gardner-Holdt) Z-Z<sub>4</sub>; flash pt. (PMCC) 33 C; 84% min. solids  
*Storage:* 6 mos shelf life stored in tanks at temps. between 4-32 C
- Resimene® 730** [Solutia]  
*Chem. Descr.:* High solids methylated melamine in isopropyl alcohol  
*Uses:* Crosslinker for thermosetting surf. coatings for metal, appliance, can/container, and paper coatings, inks, prefinished paneling; fast uncatalyzed cure response and good uncatalyzed enamel stability  
*Properties:* APHA 30 max. liq.; sol. in solvs. and water; dens. 9.75-10.05 lb/gal; visc. (Gardner-Holdt) Z<sub>2</sub>Z<sub>4</sub>; flash pt. (PMCC) 22 C; 90% min. solids  
*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C
- Resimene® 735** [Solutia]  
*Chem. Descr.:* High solids methylated melamine in isopropanol  
*Uses:* Crosslinker for thermosetting aq. and solv.-borne surf. coatings for appliance, metal, paper, metal deco, and automotive coatings; good compatibility and fast cure response, exc. uncatalyzed enamel stability; offers high gloss, flexible, and impact-resist. films  
*Properties:* APHA 30 max. liq.; sol. in solvs. and water; dens. 9.35-9.65 lb/gal; visc. (Gardner-Holdt) T-W; flash pt. (PMCC) 10 C; 80% min. solids  
*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C
- Resimene® 745** [Solutia]  
*Chem. Descr.:* Hexamethoxymethyl melamine  
 CAS 3089-11-0  
*Uses:* Crosslinker for thermosetting surf. coatings for automotive, appliance, coil, can/container, metal, metal deco, and paper coatings, inks, prefinished paneling; offers exc. catalyzed cure response, stability, and compatibility; cure response 220 to > 600 F  
*Properties:* APHA 30 max. liq.; solv.-sol. and water-extensible; dens. 9.9-10.1 lb/gal; visc. (Gardner-Holdt) Y-Z<sub>2</sub>; flash pt. (PMCC) 110+ C; 98% min. solids  
*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C
- Resimene® 747** [Solutia]  
*Chem. Descr.:* Hexamethoxymethyl melamine  
 CAS 3089-11-0  
*Uses:* Crosslinker for thermosetting solv. and aq. surf. coatings for automotive, appliance, coil, can/container, metal, metal deco, and paper coatings, inks; provides for exc. catalyzed cure response with very good film flexibility and toughness  
*Properties:* Liq.; sol. in water with cosolv.; dens. 9.9-10.1 lb/gal; visc. (Gardner-Holdt) Y-Z<sub>2</sub>; flash pt. (PMCC) 110+ C; 98% min. solids  
*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C
- Resimene® 757** [Solutia]  
*Chem. Descr.:* High solids methylated/butylated melamine (methyl:butyl 75:25)  
 CAS 68036-97-5  
*Uses:* Crosslinker for thermosetting high solids surf. coatings, esp. at reduced temps., for automotive, appliance, metal, metal deco, and paper coatings, electrostatically applied coatings, and inks; improved flow, leveling, and cratering resist.; better intercoat adhesion  
*Properties:* APHA 30 max. liq.; dens. 9.4-9.6 lb/gal; visc. (Gardner-Holdt) Z-Z<sub>2</sub>; flash pt. (PMCC) 66+ C; 97% min. solids  
*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C
- Resimene® 797** [Solutia]  
*Chem. Descr.:* Modified high solids methylated melamine contg. 20% styrene allyl alcohol in ethanol  
*Uses:* Crosslinker for thermosetting surf. coatings for automotive, coil, can/container, metal, appliance, metal deco, paper, wood furniture and cabinet, and extrusion coatings, inks; cure/performance at cure temps. as low as 180 F  
*Properties:* APHA 100 max. liq.; solv.-sol.; dens. 9.4-9.7 lb/gal; visc. (Gardner-Holdt) V-Z; flash pt. (PMCC) 30 C; 92% min. solids  
*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C
- Resimene® 7111** [Solutia]  
*Chem. Descr.:* Modified methylated melamine formaldehyde resin in ethanol  
*Uses:* Crosslinker for solvent-borne and high solids coatings incl. automotive, plastic, exterior container, paper, wood, and general metal coatings; improved low temp. catalyzed cure response, better water resistance, tougher coating films, improved hardness without loss in film flexibility, and better adhesion  
*Properties:* APHA 100 max. color; dens. 9.5-9.8 lb/gal; visc. (Gardner-Holdt) R-V; flash pt. (PMCC) 30 C; 90-94% solids
- Resimene® 7112** [Solutia]  
*Chem. Descr.:* Modified methylated melamine formaldehyde resin in ethanol  
*Uses:* Crosslinker for solv.-borne and high solids coatings incl. automotive, plastic, exterior container, paper, wood, and general metal coatings; improved low temp. catalyzed cure response; better water, chemical, and stain resist.; better corrosion and salt spray resist.  
*Properties:* APHA 100 max. color; dens. 9.5-9.8 lb/gal; visc. (Gardner-Holdt) U-Y; flash pt. (PMCC) 30 C; 90-94% solids
- Resimene® AQ-1616** [Solutia]  
*Chem. Descr.:* High solids partially methylated melamine-formaldehyde resin in water

CAS 68002-20-0

*Uses:* Crosslinker for coating systems incl. automotive primers/topcoats, paper/paperboard coatings, latex binder systems, nonwoven binders, wood coatings, gen'l. metal coatings; provides fast and low temp. cure with little or no acid catalyst, good cured film props.

*Properties:* APHA 40 max. color; dens. 10.35-10.65 lb/gal; visc. (Gardner-Holdt) W-Z; flash pt. (PMCC) > 200 F; 78-82% solids

*Storage:* Protect from freezing

**Resimene® AQ-7550 [Solutia]**

*Chem. Descrip.:* Partially methylated melamine

CAS 68002-20-0

*Uses:* Crosslinker for thermosetting surf. coating, aq. coatings incl. metal, paper, automotive, coil, and wood furniture and cabinet coatings, inks; rapid uncatalyzed cure response

*Properties:* APHA 30 max. liq.; sol. in water; dens. 10.4-10.7 lb/gal; visc. (Gardner-Holdt) U-W; flash pt. (PMCC) 93+ C; 79% min. solids in water

*Storage:* 4 mos shelf life stored in tanks at temps. between 4-32 C; protect from freezing

**Resimene® BM-5901 [Solutia]**

*Chem. Descrip.:* High solids butylated melamine in n-butanol

*Uses:* Crosslinker for thermosetting surf. coatings, high solids and waterborne coatings for auto, appliance, metal, paper, and metal deco, and wood furniture and cabinet coatings, inks; gives fast, low temp. crosslinking without need for strong acid catalysis

*Properties:* APHA 30 max. liq.; dens. 8.6-8.9 lb/gal; visc. (Gardner-Holdt) Z<sub>1</sub>Z<sub>4</sub>; flash pt. (PMCC) 33 C; 80% solids

*Storage:* 12 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® CE-6517 [Solutia]**

*Chem. Descrip.:* High solids methylated/butylated melamine in n-butanol

*Uses:* Crosslinker, flow control agent, leveling agent for thermosetting surf. coatings for metal, paper, auto, appliance, coil, and metal deco, prefinished paneling, wood furniture and cabinet coatings, and inks; rapid uncatalyzed cure response

*Properties:* APHA 30 max. liq.; dens. 9.3-9.5 lb/gal; visc. (Gardner-Holdt) W-Z; flash pt. (PMCC) 33 C; 85% min. solids

*Storage:* 12 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® HM-2608 [Solutia]**

*Chem. Descrip.:* High solids methylated melamine in isobutanol

*Uses:* Crosslinking agent for thermosetting high solids and waterborne surf. coatings, for automotive, appliance, metal, paper, and metal deco coatings, inks, prefinished paneling; low temp. cure response with little or no acid catalysts

*Properties:* Liq.; dens. 9.7-9.9 lb/gal; visc. (Gardner-Holdt) Z<sub>1</sub>Z<sub>4</sub>; flash pt. (PMCC) 31 C; 90% min. solids

*Storage:* 6 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® U-901 [Solutia]**

*Chem. Descrip.:* High solids butylated urea-formaldehyde resin in 65% butanol, 35% xylene

*Uses:* Crosslinker for thermosetting surf. coatings for metal deco, general metal, prefinished paneling, paper, and prefinished paneling coatings; fast cure

*Properties:* APHA 30 max. color; insol. in water; dens. 8.3-8.6 lb/gal; visc. (Gardner-Holdt) W-Z; flash pt. (PMCC) 21 C; 50-54% solids

*Storage:* 12 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® U-918 [Solutia]**

*Chem. Descrip.:* High solids butylated urea-formaldehyde resin in butanol

*Uses:* Crosslinker for thermosetting surf. coatings for can/container, metal deco, general metal, paper, and prefinished paneling coatings; epoxy crosslinker; exc. flexibility, cure chars., and good moisture resist.

*Properties:* APHA 30 max. color; insol. in water; dens. 8.6-8.9 lb/gal; visc. (Gardner-Holdt) W-Z; flash pt. (PMCC) 40 C; 69-73% solids

*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® U-920 [Solutia]**

*Chem. Descrip.:* High solids butylated urea in 75% butanol, 25% xylene

*Uses:* Crosslinker for thermosetting surf. coatings for metal deco, general metal, prefinished paneling, paper, and wood and furniture and cabinet coatings; very good compat., gloss retention, and color retention

*Properties:* APHA 30 max. color; insol. in water; dens. 8.4-8.6 lb/gal; visc. (Gardner-Holdt) U-X; flash pt. (PMCC) 36 C; 58-62% solids

*Storage:* 24 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® U-933 [Solutia]**

*Chem. Descrip.:* High solids butylated urea in 55% isobutanol, 45% xylene

*Uses:* Crosslinker for thermosetting surf. coatings, esp. heat-sensitive substrates (e.g., wood and plastic) for general metal, prefinished paneling, paper, and wood furniture and cabinet coatings; very fast cure response

*Properties:* APHA 30 max. color; insol. in water; dens. 8.1-8.4 lb/gal; visc. (Gardner-Holdt) W-Z; flash pt. (PMCC) 18 C; 49-53% solids

*Storage:* 12 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® U-970 [Solutia]**

*Chem. Descrip.:* High solids methylated urea-formaldehyde resin in isobutanol

*Uses:* Crosslinker for thermosetting surf. coatings for general metal, prefinished paneling, paper, and wood furniture and cabinet coatings; good reactivity; reduced level of free formaldehyde

*Properties:* APHA 60 max. liq.; sol. in water; dens. 9.25-9.55 lb/gal; visc. (Gardner-Holdt) Y-Z; flash pt. (PMCC) 32 C; 80-84% solids

*Storage:* 12 mos shelf life stored in tanks at temps. between 4-32 C

**Resimene® U-975 [Solutia]**

*Chem. Descrip.:* High solids methylated urea-formaldehyde resin

CAS 68071-45-4

*Uses:* Crosslinker for thermosetting surf. coatings for general metal, prefinished paneling, paper, and wood furniture and cabinet coatings; good balance of cure response, enamel stability, and hydrocarbon tolerance

*Properties:* APHA 30 max. liq.; sol. in water; dens. 9.95-10.25 lb/gal; visc. (Gardner-Holdt) Z<sub>2</sub>Z<sub>5</sub>; flash pt. (PMCC) > 110 C; 96% min. solids

*Storage:* Store @ > 40 F to prevent crystallization; protect from freezing

**Resimene® U-980 [Solutia]**

*Chem. Descrip.:* High solids methylated urea-formaldehyde resin

CAS 68071-45-4

*Uses:* Crosslinker for thermosetting surf. coatings for can/container, metal deco, general metal, prefinished paneling, paper, and wood furniture and cabinet coatings; provides good exterior durability, hydrolytic stability, and film hardness; mod. cure response

*Properties:* APHA 30 max. liq.; sol. in water; dens. 9.8-10.1 lb/gal; visc. (Gardner-Holdt) U-Y; flash pt. (PMCC) 58 C; 97% min. solids

*Storage:* Store @ > 40 F to prevent crystallization; protect from freezing

**Resin 731D [Hercules]**

*Chem. Descrip.:* Modified dehydrogenated (disproportionated) rosin

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Thermoplastic resin used in hot-melt-applied adhesives and coatings for paper and paperboard substrates; as tackifier and processing aid for rubber-based adhesives and molding compds.; emulsifier for emulsion polymerization; plasticizer, softener, tackifier; for use in contact with food; pale, oxidation-resistant; sl. retards cure

*Properties:* USDA Rosin N solid, flakes; sol. in alcohols, esters, ketones, min. spirits, and aromatic hydrocarbons; dens. 1.058 kg/l; R&B soften. pt. 73 C; flash pt. (COC) 209 C; acid no. 154; sapon. no. 159

**Resolution™ 5029 [Eka Chems.]**

*Chem. Descrip.:* Fatty acid derivative; avail. in two versions: one from tall oil and one from vegetable oil

*Uses:* Deinking agent

*Environmental:* Readily biodeg.

**Resolution™ 5030 [Eka Chems.]**

*Chem. Descrip.:* Conventional fatty acid

*Uses:* Deinking agent for newsprint; can be converted to a soap by contact with alkali

*Properties:* Molten liq.

**Resyn® 25-1103 [Nat'l. Starch & Chem.]**

*Chem. Descrip.:* Polyvinyl acetate

CAS 9003-20-7

*Uses:* Coating binder, stiffener for bleached board coatings; component of paper/paperboard in contact with aq./fatty/dry foods; forms very rigid film on drying; exc. converting props. for pkg.; mech. stable; compat. with many coating ingreds.

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Dens. 9.0 lb/gal; visc. < 500 cps; pH 6.5; 47% solids

*Storage:* Protect from freezing

**Resyn® 25-1114 [Nat'l. Starch & Chem.]**

*Chem. Descrip.:* High m.w. polyvinyl acetate

CAS 9003-20-7

*Uses:* Coating binder for specialty size press applics., high quality web offset coatings, boxboard coatings, and bleached kraft applics.; component of paper/paperboard in contact with aq./fatty/dry foods; forms rigid film on drying; mech. stable; compat. with many coating ingreds.

*Regulatory:* FDA 21CFR §176.170, 176.180

- Properties:* Dens. 9.0 lb/gal; visc. < 500 cps; pH 6.5; 50% solids; anionic  
*Storage:* Protect from freezing
- Resyn® 25-1120** [Nat'l. Starch & Chem.]  
*Chem. Descrip.:* Polyvinyl acetate  
 CAS 9003-20-7  
*Uses:* Coating binder, stiffener for bleached board coatings; component of paper/paperboard in contact with aq./fatty/dry foods; forms very rigid film on drying; mech. stable; compat. with many coating ingreds.; exc. high shear rheology; meets demands of newer offset printing processes  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Dens. 9.0 lb/gal; visc. < 500 cps; pH 6.5; 47% solids  
*Storage:* Protect from freezing
- Resyn® 25-1140** [Nat'l. Starch & Chem.]  
*Chem. Descrip.:* Vinyl acrylate  
 CAS 2177-18-6; EINECS/ELINCS 218-538-1  
*Uses:* Coating binder for rotogravure coatings, pigmented and unpigmented size press sol'ns.; component of paper/paperboard in contact with aq./fatty/dry foods; forms very flexible film on drying; mech. stable; compat. with many coating ingreds.  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Dens. 8.8 lb/gal; visc. < 500 cps; pH 6.5; 50% solids  
*Storage:* Protect from freezing
- Resyn® 25-1151** [Nat'l. Starch & Chem.]  
*Chem. Descrip.:* Vinyl acetate  
 CAS 108-05-4; EINECS/ELINCS 203-545-4  
*Uses:* Coating binder for offset and rotogravure coatings.; delivers exc. holdout for special inks and varnishes; adds controlled adhesion in special coated paper grades; component of paper/paperboard in contact with aq./fatty/dry foods; forms mod. flexible film on drying; mech. stable; compat. with many coating ingreds.  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Dens. 8.9 lb/gal; visc. < 500 cps; pH 6.5; 50% solids  
*Storage:* Protect from freezing
- Resyn® 25-1152** [Nat'l. Starch & Chem.]  
*Chem. Descrip.:* Vinyl acrylate  
 CAS 2177-18-6; EINECS/ELINCS 218-538-1  
*Uses:* Coating binder for board coatings; improves printability with water-based inks; component of paper/paperboard in contact with aq./fatty/dry foods; forms flexible film on drying; mech. stable; compat. with many coating ingreds.  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Dens. 9 lb/gal; visc. < 500 cps; pH 6.5; 50% solids  
*Storage:* Protect from freezing
- Resyn® 25-1190** [Nat'l. Starch & Chem.]  
*Chem. Descrip.:* Polyvinyl acetate  
 CAS 9003-20-7  
*Uses:* Coating binder, stiffener for paper and board coatings; component of paper/paperboard in contact with aq./fatty/dry foods; forms very rigid film on drying; mech. stable; compat. with many coating ingreds.; exc. high shear rheology  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Dens. 9 lb/gal; visc. < 500 cps; pH 6.5; 50% solids  
*Storage:* Protect from freezing
- Resyn® 1090** [Nat'l. Starch & Chem.]  
*Chem. Descrip.:* Polyvinyl acetate emulsion  
 CAS 9003-20-7  
*Uses:* Dry and wet str. agent for paper saturation (filtration); component of paper/paperboard in contact with aq./fatty/dry foods; in resin-bonded filters for food contact; features stiffness, moldability, exc. mech. stability; imparts rigidity and pleatability to wide variety of substrates; can react with thermo-setting resins  
*Regulatory:* FDA 21CFR §176.170, 176.180, 177.2260  
*Properties:* 1.0 µ particle size; dens. 9.0 lb/gal; visc. 1000 cps; pH 5.0; 55% solids; nonionic
- Retaminol® 043S** [Bayer]  
*Uses:* Processing chem. for paper
- Retaminol® E** [Bayer]  
*Uses:* Processing chem. for paper
- Retaminol® H01** [Bayer]  
*Uses:* Processing chem. for paper
- Retaminol® K** [Bayer]  
*Uses:* Processing chem. for paper
- Retek®** [Hercules]  
*Chem. Descrip.:* Low charge dens. polymers (emulsions, dry polymers, and sol'ns.)  
*Uses:* Drainage aid, retention aid, charge control agent in pulp/paper industry
- Rewopal® HV 9** [Goldschmidt-Rewo GmbH]  
*Chem. Descrip.:* Nonoxynol-9  
 CAS 9016-45-9  
*Uses:* Emulsifier, solubilizer used in emulsion polymerization and insecticides; raw material for rinsing, washing, and cleaning agents; wetting agent in the paper and cellulose industry; degreaser used in pickling and alkaline immersion-bath cleaners  
*Properties:* Gardner 2 max. liq.; sol. in min. oil, alcohol, ketone, toluene, xylene, chlorinated hydrocarbons; cloud pt. 59-62 C (2%); pH 5-7 (1% solids); nonionic
- Rewopal® HV 25** [Goldschmidt-Rewo GmbH]  
*Chem. Descrip.:* Nonoxynol-25  
 CAS 9016-45-9  
*Uses:* Emulsifier, solubilizer used in emulsion polymerization, insecticides, detergents with high electrolyte content (e.g., electroplating); raw material for rinsing, washing, and cleaning agents; wetting agent in the paper and cellulose industry; degreaser used in pickling and alkaline immersion-bath cleaners  
*Regulatory:* BGA and FDA compliance  
*Properties:* Wh. wax; sol. in min. oil, alcohol, ketone, toluene, xylene, chlorinated hydrocarbons; cloud pt. 73-76 C (2%); pH 5-7 (1% solids); surf. tens. 42 dynes/cm; 100% act.; nonionic
- Rewopal® B 2003** [Goldschmidt-Rewo GmbH]  
*Chem. Descrip.:* Tetrasodium dicarboxyethyl stearyl sulfosuccinamate  
 CAS 3401-73-8; EINECS/ELINCS 222-273-7  
*Uses:* Flotation reagent; emulsifier for emulsion polymerization; foaming agent for latex emulsion (carpet backing); antigelling agent, cleaning agent for paper mill felts  
*Regulatory:* FDA compliance  
*Properties:* Low visc. liq.; sol. in water; partly sol. in org. solvs.; pH 7-8 (1%); surf. tens. 40 dynes/cm; 35% conc.; anionic
- Rewopal® SBDO 70** [Goldschmidt-Rewo GmbH]  
*Chem. Descrip.:* Dioctyl sodium sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, solubilizer for cosmetics, personal care preps., household and metal cleaners, paper, textile, paint, and dye industries, dry cleaning  
*Properties:* Colorless liq.; surf. tens. < 30 dynes/cm (0.1%); pH 6.5-7.5 (5% solids); 64% min. act.; anionic  
*Environmental:* Biodeg.
- Rexene® PE 5000 Series** [Huntsman]  
*Chem. Descrip.:* LDPE  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Extrusion coating and laminating resin ideal for critical specialty coatings such as photographic paper; good processability  
*Properties:* Dens. 0.917-0.924; melt index 4-18; tens. str. 1300-1500 psi (break)
- Rexfoam 301-A** [Graden]  
*Uses:* Defoamer for coatings; starch defoamer for size press applics.; defoamer in food-contact paper/paperboard; food pkg. adhesives, paper/paperboard; compat. with acrylics, B/S, and PVAc systems; will not cause film irregularities, fisheyes, or cratering  
*Use Level:* 0.01-2.0%  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210  
*Properties:* Off-wh. opaque liq.; sp.gr. 0.827-0.877; 100% solids  
*Storage:* Store @ R.T.; if frozen, warm to R.T. prior to use
- Rexfoam PI-53** [Graden]  
*Uses:* Antifoam/defoamer for aq. inks; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.200  
*Properties:* Off-wh. translucent liq.; disp. readily in aq. inks; dens. 8.6 lb/gal; visc. 1500-4500 cps; pH 7.5-9.0 (50%)  
*Storage:* Store @ R.T.; avoid prolonged storage above 110 F; if frozen or stored above 110 F, return to R.T. and mix thoroughly before use
- Rezsol®** [Hercules]  
*Chem. Descrip.:* Resin  
*Uses:* As Yankee coating chem. (adhesive base coatings, film modifiers,

release agents)

*Properties:* Cationic

**Rheolate® 2001** [Rheox]

*Chem. Descrip.:* Olefinic copolymer suspension

*Uses:* Antisettling agent for use in water-reducible coating and ink systems incl. industrial and trade sales paints, water-reducible alkyd, acrylic, epoxy, and urethane systems; provides superior pigment suspension at low levels; exc. leveling props.; produces exc. gloss, smooth films; also for household cleaners, inks, liq. detergents, pigment and agrochem. slurries; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; defoamer for food contact; VOC-free; pourable

*Use Level:* 0.6-2.0% on total wt.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 177.2800

*Properties:* Off-wh. translucent liq.; sp.gr. 1.008; dens. 8.4 lb/gal; bulking value 0.119 gal/lb; visc. 20 mPa·s max.; 24% NV in water/5% methyl diethanolamine

**Rheovis®** [Ciba Spec. Chems./Paper]

*Uses:* Rheology modifier, water retention aid for paper coatings

**Rhodacal® 3594** [Rhodia HPCII]

*Chem. Descrip.:* Proprietary

*Uses:* Solubilizer; foaming agent; dispersant; emulsifier in emulsion polymerization, emulsion PVC, latexes, elastomers; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 178.3400; BGA XIV compliance

*Properties:* Liq.; surf. tens. 35 dynes/cm; 38% solids in water

**Rhodacal® BX-78** [Rhodia HPCI; Rhodia HPCII France]

*Chem. Descrip.:* Sodium dibutyl naphthalene sulfonate

CAS 25417-20-3

*Uses:* Emulsifier, wetting agent, penetrant, dispersant for industrial cleaning, textiles, dyeing, leather, insecticides, herbicides, paper, dyes/pigments, wallpaper pastes, rubber, latex polymerization

*Regulatory:* Exempt from tolerance under EPA 40CFR §180.1001(c)(e)

*Properties:* Liq.; m.w. 326; water-sol.; pH 6-8 (5%); surf. tens. 36 dynes/cm (@ CMC); 70% solids; anionic

**Rhodacal® DS/4-E25** [Rhodia HPCII]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate aq. sol'n.

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Emulsifier for emulsion polymerization, latexes, emulsion PVC, elastomers; solubilizer; foaming agent; dispersant; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 178.3400; BGA XIV compliance

*Properties:* Liq.; surf. tens. 32 dynes/cm; 25% solids in water; anionic

**Rhodacal® DS-10** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Branched sodium dodecylbenzene sulfonate

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Emulsifier for emulsion polymerization (SBR, vinyl acetate, vinyl chloride, styrene, and acrylic latexes), paints and coatings; emulsifier, dispersant for agric. formulations; surfactant for washing fruits and vegetables; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e); BGA XIV compliance

*Properties:* Flakes; pH 6.0-9.5 (10%); surf. tens. 32 dynes/cm (@ CMC); 98% act.; anionic

*Toxicology:* LD50 (oral, rat) 2.77 g/kg, (IV, mice) 105 mg/kg

**Rhodacal® N** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Sodium polynaphthalene sulfonate

CAS 9084-06-4

*Uses:* Process aid in paper, leather; dispersant for pulp/paper, metal cleaning; emulsifier, wetting agent for industrial cleaners, pesticides, inks, reactive pigments, paints; moisture reducer in concrete; textile dye leveling agent

*Properties:* Tan to brn. gran. powd.; odorless; sol. in water; dens. 0.65-0.75 g/ml; 88-90% act.; anionic

**Rhodafac® BG-510** [Rhodia HPCII; Rhodia HPCII France; Costec]

*Chem. Descrip.:* Aliphatic phosphate ester of ethoxylated isodecyl alcohols, free acid

CAS 108818-88-8

*Uses:* Detergent, emulsifier, wetting agent, dispersant, hydrotrope, solubilizer

for liq. industrial alkaline cleaners, hard surf. detergents, soak-tank metal cleaning, metal lubricants, steam cleaning, household cleaning, paints, textile wet processing, paper deresination, pulping, and bleaching, crop protection formulations; compat. in conc. electrolyte systems

*Regulatory:* Exempt from tolerance under EPA 40CFR §180.1001(c)

*Properties:* Clear visc. liq.; sol. in water, glycol, ethanol, perchlorethylene, xylene; insol. in wh. min. oil, odorless kerosene; sp.gr. 1.19 (35 C); acid no. 215-235; pour pt. 7 C; pH < 2.5 (10% aq.); surf. tens. 29.9 dynes/cm (0.1% aq.); Draves wetting 0.25% (25 s); 99.5% act.; anionic

**Rhodafac® RE-610** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonoxynol-9 phosphate

CAS 68412-53-3; EINECS/ELINCS 266-231-6

*Uses:* Detergent, emulsifier, wetting agent, dispersant, antistat, lubricant, dedusting agent for dry cleaning, pesticides, paints, textile wet processing, metals, household and industrial detergents; emulsifier for emulsion polymerization; corrosion inhibitor; food pkg. adhesives, paper; defoamer in food-contact paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e)

*Properties:* Pale yel. clear to sl. hazy visc. liq., mild odor; sol. in xylene, butyl Cellosolve, perchlorethylene, ethanol, water; sp.gr. 1.095-1.115; dens. 9.2 lb/gal; visc. 610-630 cks (50 C); acid no. 62-70; pour pt. < 0 C; pH 1.5-2.5 (10%); surf. tens. 37 dynes/cm (0.1% aq.); Ross-Miles foam 100 mm (0.05% tap water, initial); 99% act.; anionic

*Toxicology:* LD50 (oral, rat) 7.8 g/kg; primary dermal irritant; severe eye irritant

**Rhodafac® RS-610** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Trideceth-6 phosphate

CAS 9046-01-9

*Uses:* Emulsifier for emulsion polymerization, waterless hand cleaners, pesticides; detergent for dry cleaning formulations, textile wetting agent; lubricant for fiber and metal treatment, paper-mill felt washing; antistat for aerosols, plastics; corrosion inhibitor; food pkg. adhesives, paper; defoamer in food-contact paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(d)

*Properties:* Hazy, visc. liq.; sol. in kerosene, Stod., xylene, butyl Cellosolve, perchlorethylene, ethanol; disp. in water; sp.gr. 1.04-1.06; dens. 8.7 lb/gal; pour pt. < 0 C; pH < 2.5 (10%); 99% act.; anionic

**Rhodafac® RS-710** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Trideceth-10 phosphate

CAS 9046-01-9

*Uses:* Detergent, wetting agent, emulsifier, dispersant for textile wet processing, industrial cleaners, pesticides, dry cleaning, metal treatment; antistat for plastics; corrosion inhibitor; food pkg. adhesives, paper; defoamer in food-contact paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(d)

*Properties:* Opaque visc. liq.; sol. in Stod., xylene, butyl Cellosolve, perchlorethylene, ethanol, water; sp.gr. 1.04-1.06; dens. 8.7 lb/gal; pour pt. 18 C; pH < 2.5 (10%); 99% act.; anionic

**Rhodamox® CAPO** [Rhodia HPCII]

*Chem. Descrip.:* Cocamidopropyl dimethylamine oxide

CAS 68155-09-9; EINECS/ELINCS 268-938-5

*Uses:* Foam booster/stabilizer, thickener, emollient for shampoos, bath prods., toiletries, dishwash, rug shampoos, fine fabric detergents, shaving creams, lotions, foam rubber, electroplating, paper coatings; used in toiletries for mildness

*Properties:* Colorless clear liq.; faint odor; water sol.; disp. in min. oil; dens. 1.0 g/ml; f.p. < 0 C; 30% conc.; nonionic/cationic

**Rhodamox® LO** [Rhodia HPCII]

*Chem. Descrip.:* Lauryl dimethylamine oxide

CAS 1643-20-5; EINECS/ELINCS 216-700-6

*Uses:* Foam booster/stabilizer, thickener, detergent, wetting agent, antistat, emollient for shampoos, bath prods., toiletries, dishwash, fine fabric detergents, shaving creams, lotions, textile softeners; foam stabilizer in foam rubber, electroplating, paper coatings; used in toiletries for mildness

*Properties:* Colorless clear liq.; faint char. odor; sol. in water, alcohols; disp. in nonpolar org. solvs., e.g., kerosene, min. oils; dens. 1.0 g/ml; f.p. < 0 C;

- pH 7-8; 30% act.; nonionic/cationic
- Rhodapex® CO-436** [Rhodia HPCII; Rhodia HPCII France]  
*Chem. Descrip.:* Ammonium nonoxynol-4 sulfate  
 CAS 9051-57-4  
*Uses:* Detergent, wetting agent, dispersant for dishwashing, scrub soaps, car washes, rug and hair shampoos; emulsifier for latexes, emulsion polymerization, petrol. waxes; antistat for plastics and syn. fibers; lime soap dispersant; crop protection formulations; food pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; high foaming  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e); BGA XIV compliance  
*Properties:* Varnish 5 max. clear liq.; alcoholic odor; water-sol.; sp.gr. 1.065; dens. 8.9 lb/gal; visc. 100 cps; surf. tens. 34 dynes/cm (1%); 58% act.; anionic
- Rhodapon® L-22** [Rhodia HPCII; Rhodia HPCII France; Costec]  
*Chem. Descrip.:* Ammonium lauryl sulfate  
 CAS 2235-54-3; EINECS/ELINCS 218-793-9  
*Uses:* High foaming detergent, emulsifier for shampoo, bubble bath, pet shampoos, l&l cleaners, coatings, wool scouring, fire-fighting foams; assistant for pigment dispersion; emulsion polymerization aid; food pkg. coatings, cellophane; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §175.210, 176.200, 177.1200  
*Properties:* Clear visc. liq.; visc. 1000 cps; HLB 31.0; cloud pt. 14 C; pH 6.8 (10%); 28% act.; anionic  
*Environmental:* Slowly degrades above pH 7  
*Storage:* 12 mos storage stability
- Rhodapon® LCP** [Rhodia HPCII]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Emulsion polymerization surfactant; imparts good stability and uniform particle size to emulsion polymers based on vinyl chloride, vinylidene chloride, styrene, butadiene, and acrylic esters; surfactant for fruit coatings, polymeric coatings, adhesives, paperboard, rubber goods; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles, animal glue; defoamer in food-contact paper/paperboard; low cloud pt.  
*Regulatory:* FDA 21CFR §172.210, 172.822, 175.105, 175.300, 175.320, 176.170, 176.180, 176.210, 177.1200, 177.1210, 177.1630, 177.2600, 177.2800, 178.1010, 178.3120, 178.3400, 179.45  
*Properties:* Yel. clear liq.; visc. 100 cps; pH 7.5-8.5 (10%); surf. tens. 30 dynes/cm (@ CMC); 29-30% act.; anionic
- Rhodapon® LSB** [Rhodia HPCII; Costec]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Detergent, emulsifier for hair shampoo, lotion, bubble bath, shaving creams, medicinal ointments, pastes, l&l and household cleaners, fruit coatings, polymeric coatings, adhesives, textiles, rubber articles; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles, animal glue; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard; high-foaming  
*Regulatory:* FDA 21CFR §172.210, 172.88, 175.105, 175.300, 175.320, 176.170, 176.180, 176.210, 177.1200, 177.1210, 177.1630, 177.2600, 177.2800, 178.1010, 178.3120, 178.3400, 179.45  
*Properties:* Pale clear liq.; visc. 150 cps; HLB 40; cloud pt. 20 C; pH 8 (10%); 29% act.; anionic
- Rhodapon® SM** [Rhodia HPCII]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Cosurfactant for household, l&l cleaners, personal care prods., rug/upholstery cleaners, pet shampoos, bubble baths, textile scouring, pigment flushing, food pkg., fruit coatings, polymeric coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, animal glues; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.210, 172.822, 175.105, 175.300, 175.320, 176.170, 176.180, 176.210, 177.1200, 177.1210, 177.1630, 177.2600, 177.2800, 178.1010, 178.3120, 178.3400, 179.45  
*Properties:* Wh. paste; pH 8; 38% act.; anionic
- Rhodapon® UB/E-30** [Rhodia HPCII]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1

- Uses:* Emulsifier for emulsion polymerization, emulsion and suspension PVC, latexes; solubilizer; foaming agent; dispersant; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard; emulsifier in food-contact articles; for use alone or with other surfactants; exc. mech. stability  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; BGA XIV compliance  
*Properties:* Liq.; surf. tens. 29 dynes/cm; 30% solids in water
- Rhodapon® UB/E-N** [Rhodia HPCII]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Emulsifier for emulsion polymerization, emulsion and suspension PVC, latexes; solubilizer; foaming agent; dispersant; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard; emulsifier in food-contact articles; for use alone or with other surfactants; exc. mech. stability  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; BGA XIV compliance  
*Properties:* Need.; surf. tens. 29 dynes/cm; 90% solids
- Rhodasurf® 870H2O** [Rhodia HPCII]  
*Chem. Descrip.:* Ethoxylated alcohol  
*Uses:* Emulsifier for latexes; food pkg. adhesives; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §175.105, 176.200; BGA XIV compliance  
*Properties:* Liq.; HLB 14.0; surf. tens. 27 dynes/cm; 80% solids; nonionic
- Rhodasurf® A-60** [Rhodia HPCII]  
*Chem. Descrip.:* Cetareath-60  
 CAS 68439-49-6  
*Uses:* Surfactant; emulsifier for latexes, acrylic, styrene-acrylic, and vinyl-acrylic emulsion polymerization; food pkg. adhesives; defoamer in food-contact paper coatings; APE-free  
*Regulatory:* FDA 21CFR §175.105, 176.180, 176.200; BGA XIV compliance  
*Properties:* Solid; HLB 18.2; surf. tens. 50 dynes/cm; 100% solids; nonionic
- Rhodasurf® CET/20** [Rhodia HPCII]  
*Chem. Descrip.:* Ethoxylated alcohol  
*Uses:* Emulsifier for latexes, acrylic, styrene-acrylic, and vinyl-acrylic emulsion polymerization; food pkg. adhesives; defoamer in food-contact paper coatings; APE-free  
*Regulatory:* FDA 21CFR §175.105, 176.200; BGA XIV compliance  
*Properties:* Flake; HLB 16.2; surf. tens. 49 dynes/cm; 100% solids; nonionic
- Rhodasurf® CET/55** [Rhodia HPCII]  
*Chem. Descrip.:* Ethoxylated alcohol  
*Uses:* Emulsifier for latexes, acrylic, styrene-acrylic, and vinyl-acrylic emulsion polymerization; food pkg. adhesives; defoamer in food-contact paper coatings; APE-free  
*Regulatory:* FDA 21CFR §175.105, 176.180, 176.200; BGA XIV compliance  
*Properties:* Flake; HLB 18.0; surf. tens. 51.5 dynes/cm; 100% solids; nonionic
- Rhodasurf® E 400** [Rhodia HPCII]  
*Chem. Descrip.:* PEG-8  
 CAS 25322-68-3; EINECS/ELINCS 225-856-4  
*Uses:* Surfactant intermediate; binder and lubricant in compressed tablets; softener for paper; plasticizer for starch pastes and polyethylene films; coupling agent for skin care lotions  
*Properties:* Liq.; pour pt. 6 C; 100% act.; nonionic
- Rhodasurf® E 600** [Rhodia HPCII]  
*Chem. Descrip.:* PEG-12  
 CAS 25322-68-3; EINECS/ELINCS 229-859-1  
*Uses:* Surfactant intermediate; binder and lubricant in compressed tablets; color stabilizer for fuel oils; softener for paper; plasticizer for starch paste and polyethylene film; coupling agent in skin care lotions  
*Properties:* Liq.; pour pt. 22 C; 100% act.; nonionic
- Rhodasurf® L-4** [Rhodia HPCII]  
*Chem. Descrip.:* Laureth-4  
 CAS 68002-97-1; EINECS/ELINCS 226-097-1  
*Uses:* Emulsifier, thickener, wetting agent, pigment dispersant, lubricant, solubilizer for cosmetic and industrial emulsions, emulsion polymerization, metal cleaning, monomer systems, floor waxes, paper finishes, rubber, crop protection applics.; textile scouring agent; emollient for pharmaceuticals  
*Properties:* Liq.; HLB 9.7; cloud pt. 0-5; pH 6.5 (1%); 100% act.; nonionic
- Rhodasurf® L-25** [Rhodia HPCII]  
*Chem. Descrip.:* Laureth-23  
 CAS 9002-92-0

*Uses:* Surfactant, wetting agent, pigment dispersant, lubricant, solubilizer for cosmetic and industrial emulsions, emulsion polymerization, metal cleaning, rubber and monomer systems, floor waxes, paper finishes; textile scouring agent; stabilizer for emulsion polymers; emollient for pharmaceuticals

*Properties:* Wax; HLB 16.9; cloud pt. > 95 C (1%); pH 6.5 (1%); 100% act.; nonionic

**Rhodasurf® TDA-8.5** [Rhodia Canada]

*Chem. Descrip.:* Trideceth-9 (8.5 EO)

CAS 24938-91-8

*Uses:* Emulsifier, strong rewetting agent for textile and paper prods.

*Properties:* Liq.; sol. in water, min. oil, min. spirits, aromatic solvs., perchloroethylene; dens. 0.98 g/ml; HLB 12.5; cloud pt. 52-56 C (1% aq.); 100% conc.; nonionic

**Rhodasurf® TR15/40** [Rhodia HPCII]

*Chem. Descrip.:* Tridecyl alcohol, ethoxylated

CAS 24938-91-8

*Uses:* Emulsifier for latexes, acrylic, styrene-acrylic, and vinyl-acrylic emulsion polymerization; food pkg. adhesives; defoamer in food-contact paper coatings; APE-free

*Regulatory:* FDA 21CFR §175.105, 176.200; BGA XIV compliance

*Properties:* Liq.; HLB 15.3; surf. tens. 34 dynes/cm; 40% solids in water; nonionic

**Rhodaterge® BCC** [Rhodia HPCII]

*Chem. Descrip.:* Proprietary blend

*Uses:* Surfactant, wetting agent, antifoam for use in alkaline and acid prods., beer prod. equip. cleaners, high alkaline CIP cleaners, food processing equip. cleaning systems, bottle washing concs., paper mill stock chest cleaners, metal cleaners, dishwasher compds.; surf. tens. reducer; defoamer for protein; low-foaming; stable in min. acids, 50% caustic (NaOH)

*Properties:* Amber clear liq.; sp.gr. 1.03-1.11; flash pt. (CC) > 200 F; pH 7.5; 40-45% solids; anionic

**Rhodaterge® PRC** [Rhodia HPCII]

*Chem. Descrip.:* Blend of surfactants, sequestrant, and alkali

*Uses:* Surfactant, detergent used for separation of PVC, vinyl, and paper in PET recycling systems; low-foaming; removes residue from plastic substrates; caustic-stable

*Properties:* Clear liq.; bland sl. sweet odor; flash pt. > 250 F; pH 11-13 (10% aq.); VOC none; 23-26% solids, 9-12% sodium hydroxide; anionic

*Environmental:* Biodeg.

**Rhodorsil® Emulsion 865A** [Rhodia Silicones]

*Chem. Descrip.:* Methylpolysiloxane emulsion, propylene glycol (1-5%)

*Uses:* Latex polymer for use as water repellent in masonry prods., tile adhesives, gypsum board, wood and brick prods.; component of food-contact paper/paperboard; water-based

*Regulatory:* FDA 21CFR §176.170, 176.180; DOT nonregulated; SARA acute health hazard

*Properties:* Milky wh. emulsion; sl. odor; sol. in water; sp.gr. 1.08; vapor pressure < 17 mm Hg (20 C); f.p. 0 C; b.p. 100 C (760 mm); flash pt. (TCC) > 93 C; pH 3.5; 54% volatiles by vol.

*Toxicology:* Eye irritant; sl. skin irritant; low acute oral toxicity; TSCA listed  
*Precaution:* Will burn under fire conditions; avoid strong bases, strong oxidizing agents; contains trace amts. of isothiazoline derivs. which may cause sensitization; contains dimethylpolysiloxane which can generate sm. amts. of formaldehyde

*Hazardous Decomp. Prods.:* Combustion may produce formaldehyde, CO<sub>x</sub>, cryst. silica; thermal decomp. prods.: dimethylcyclosiloxanes, methylphenylcyclosiloxanes

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* Store @ > 4 C in tightly closed containers in well-ventilated area away from ignition sources and incompat. materials; avoid freezing

**Rhodorsil® Emulsion 878** [Rhodia Silicones]

*Chem. Descrip.:* Polymethylsiloxane aq. emulsion, propylene glycol (1-5%)  
*Uses:* Latex polymer for use as water repellent in masonry prods., tile adhesives, concrete/joint cements, gypsum board, wood prods.; component of food-contact paper/paperboard; water-based

*Regulatory:* FDA 21CFR §176.170, 176.180; DOT nonregulated; SARA Title III acute health hazard

*Properties:* Milky wh. emulsion; sl. odor; sol. in water; sp.gr. 1.08; vapor pressure < 17 mm (20 C); f.p. 0 C; b.p. 100 C (760 mm); flash pt. (TCC) > 93 C; pH 3.5; 54% volatiles by vol.; nonionic

*Toxicology:* Eye irritant; sl. skin irritant; low acute oral toxicity; TSCA listed  
*Precaution:* Will burn under fire conditions; avoid strong bases, strong oxidiz-

ing agents; contains trace amts. of isothiazoline derivs. which may cause sensitization; contains dimethylpolysiloxane which can generate sm. amts. of formaldehyde

*Hazardous Decomp. Prods.:* Combustion may produce formaldehyde, CO<sub>x</sub>, cryst. silica; thermal decomp. prods.: dimethylcyclosiloxanes, methylphenylcyclosiloxanes

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* Store @ > 4 C in tightly closed containers in well-ventilated area away from ignition sources and incompat. materials; avoid freezing

**Rhodoviol® 4/125** [Rhodia HPCII]

*Chem. Descrip.:* Low m.w. polyvinyl alcohol

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Binder, thickener, and water retention aid for mfg. of adhesives for paper, cardboard; filler; low rate of hydrolysis

*Properties:* Gran. powd.; readily sol. in water; m.w. ≈ 30,000; visc. 5-6 mPas (4%); pH 5.0-6.5 (10%); 97% min. solids

*Storage:* 6 mos storage life when stored in dry atmosphere @ ambient temps. (not to exceed 40-120 F) in the original container

**Rhoplex® ASE-75** [Rohm & Haas]

*Chem. Descrip.:* Acrylic emulsion

*Uses:* Rheology modifier for paper and paperboard coatings; alkali-swellable; high solids; good balance of thickening efficiency and water holding; rec. where coat wt. build or high solids coatings are desired

*Properties:* Sp.gr. 1.08; dens. 9.0 lb/gal; visc. 20 cps; pH 2.7; 40% solids; anionic

**Rhoplex® ASE-95NP** [Rohm & Haas]

*Chem. Descrip.:* Acrylic emulsion

*Uses:* Rheology modifier for paper and paperboard coatings; alkali-swellable; high m.w.; rec. for specialty applics. or in conjunction with other Rhoplex thickeners to build visc. at high shear rates; not rec. as primary thickener in most applics.

*Properties:* Sp.gr. 1.06; dens. 8.8 lb/gal; visc. 200 cps; pH 3; 18% solids; anionic

**Rhoplex® ASE-108NP** [Rohm & Haas]

*Chem. Descrip.:* Acrylic emulsion

*Uses:* Rheology modifier for paper and paperboard coatings; alkali-swellable; exc. balance of water holding and thickening efficiency; effective at building coat weights; best suit for low shear applics.

*Properties:* Sp.gr. 1.06; dens. 8.8 lb/gal; visc. 70 cps; pH 3; 18% solids; anionic

**Rhoplex® B-15J** [Rohm & Haas]

*Chem. Descrip.:* Acrylic latex

*Uses:* Binder for coated materials, adhesives, textiles, fabric backcoating and finishing, paper; semireactive; med. hand; heat-sealable; self-thickening; exc. mech. stability; exc. cohesive and tens. str., durability; crosslinkable; will crosslink with melamine or urea/formaldehyde resins

*Properties:* Wh emulsion.; sp.gr. 1.06; dens. 8.8 lb/gal; visc. 45 cps; pH 6.2; 46% solids; nonionic

**Rhoplex® B-60A** [Rohm & Haas]

*Chem. Descrip.:* Acrylic latex

*Uses:* Binder for paper and paperboard coatings; nonreactive; exc. color stability; rec. for applics. where clarity and resist. to discoloration are desired

*Properties:* Sp.gr. 1.06; dens. 8.8 lb/gal; visc. 1500 cps; pH 9.6; 46.5% solids; nonionic

**Rhoplex® B-85** [Rohm & Haas]

*Chem. Descrip.:* Acrylic emulsion

*Uses:* Binder for paper and paperboard coatings, textiles; textile hand stiffener; noncrosslinking; very firm; produces films with toughness and improved resist. to blocking

*Properties:* Dens. 8.7 lb/gal; visc. < 100 cps; pH 9.8; 38% solids; anionic

**Rhoplex® B-88** [Rohm & Haas]

*Chem. Descrip.:* Acrylic emulsion

*Uses:* Binder for paper and paperboard coatings, textiles; textile hand stiffener; noncrosslinking; very firm; produces films with toughness and improved resist. to blocking

*Properties:* Dens. 9.0 lb/gal; visc. 30 cps; pH 8.7; 42.5% solids; nonionic

**Rhoplex® B-959** [Rohm & Haas]

*Chem. Descrip.:* Acrylic emulsion

*Uses:* Binder for paper and paperboard coatings, textiles (flocking, fabric backcoating/finishing, pigment printing); self-crosslinking; balance of med. hand, high solids, and exc. wash/dry clean durability; self-thickening; improved mech. stability

- Properties:* Sp.gr. 1.07; dens. 8.9 lb/gal; visc. 65 cps; pH 2.6; 55% solids; anionic
- Rhoplex® E-1691** [Rohm & Haas]  
*Chem. Descrip.:* Acrylic emulsion  
*Uses:* Binder for paper and paperboard coatings; topcoat and ink vehicle for vinyl coated fabrics and vinyl film; exc. solv. resist.; maintains exc. color stability; adheres well to vinyl with sl. force drying  
*Properties:* Dens. 8.6 lb/gal; visc. < 100 cps; pH 6.2; 41% solids; anionic
- Rhoplex® E-2961** [Rohm & Haas]  
*Uses:* Rheology modifier for paper and paperboard coatings, esp. heavy paper/paperboard; preneutralized; requires no pH adjustment; alkali-swellable; exc. balance of water holding and thickening efficiency; rec. for heavy coat weights applics.  
*Properties:* Sp.gr. 1.07; dens. 8.9 lb/gal; visc. 500 cps; pH 9.2; 11% solids; anionic
- Rhoplex® GL-618** [Rohm & Haas]  
*Chem. Descrip.:* Elastomeric acrylic polymer emulsion  
*Uses:* Binder for wet laid glass and/or polyester fiber mats used in roofing prods. such as asphalt shingles, other industrial nonwovens (filters, facer sheets, resilient flooring substrates, geotextile applics.), paper; self-crosslinking; firm binder; hydrophobic; superior hot tens. str.; low foaming; exc. mech. stability; ideal as sole binder or cobinder with U/F, P/F, and M/F resins  
*Properties:* Milky wh. liq.; dens. 8.9 lb/gal; visc. 95 cps; pH 8.6; 47% solids; anionic
- Rhoplex® GL-623** [Rohm & Haas]  
*Chem. Descrip.:* Acrylic polymer emulsion  
*Uses:* Binder for wet laid glass mat used in roofing prods. such as asphalt shingles, industrial nonwoven applics. (filtration media), paper; binder, hand stiffener in fabric finishing; self-crosslinking; firm binder  
*Properties:* Sp.gr. 1.06; dens. 8.8 lb/gal; visc. 50 cps; pH 8.0; 45% solids; anionic
- Rhoplex® HA-12** [Rohm & Haas]  
*Chem. Descrip.:* Acrylic polymer emulsion  
*Uses:* Ceramics binder for tape casting, slip casting, and roll compaction; binder, tack-free film-former for textiles, fabric finishing and backcoating; self-crosslinking; not sensitive to humidity change; high grn. str. and dens.; rec. where abrasion resist. is required; med./firm hand; exc. wash/dry clean durability  
*Properties:* 85-140 nm particle size; sp.gr. 1.05; dens. 8.8 lb/gal; visc. 280 cps; pH 2.6; 45% solids; nonionic  
 Custom prod.
- Rhoplex® NW-1715K** [Rohm & Haas]  
*Chem. Descrip.:* Styrene acrylic emulsion  
 CAS 9010-92-8  
*Uses:* Binder for textiles, nonwovens, and specialty paper; backcoating binder; crosslinkable; hydrophobic; ultra low formaldehyde; med. hand; good abrasion resist.  
*Properties:* Sp.gr. 1.01; dens. 8.4 lb/gal; visc. 150 cps; pH 6.2; 44% solids; anionic
- Rhoplex® NW-1845K** [Rohm & Haas]  
*Chem. Descrip.:* Styrene acrylic emulsion  
 CAS 9010-92-8  
*Uses:* Binder for textiles, backcoating fabric finishing, paper; soft; crosslinkable; hydrophobic; formaldehyde-free; balance of soft hand and str.; heat-sealable; improved mech. stability  
*Properties:* Sp.gr. 1.06; dens. 8.8 lb/gal; visc. 85 cps; pH 6.7; 44% solids; anionic
- Rhoplex® P-308** [Rohm & Haas]  
*Chem. Descrip.:* Styrene acrylic  
 CAS 9010-92-8  
*Uses:* Binder for mottle-resist. paper and paperboard coatings; high str.; compat. with calcium ions; hydrophobic  
*Properties:* Sp.gr. 1.04; dens. 8.7 lb/gal; visc. 150 cps; pH 7.5; 50% solids; anionic
- Rhoplex® P-322** [Rohm & Haas]  
*Chem. Descrip.:* Styrene acrylic  
 CAS 9010-92-8  
*Uses:* Binder for mottle-resist. paper and paperboard coatings  
*Properties:* Sp.gr. 1.04; dens. 8.6 lb/gal; visc. 500 cps; pH 7.5; 50% solids; anionic
- Rhoplex® P-376** [Rohm & Haas]  
*Chem. Descrip.:* Styrene acrylic  
 CAS 9010-92-8  
*Uses:* Binder for paper and paperboard coatings; hydrophobic; contributes exc. wet and dry pick resist.; promotes gloss development and ink/varnish holdout without contributing to ink mottle or adsorption problems; exc. compat. with cobinders; good adhesion to nonconventional substrates  
*Properties:* Sp.gr. 1.04; dens. 8.7 lb/gal; visc. 200 cps; pH 9.4; 50% solids; anionic
- Rhoplex® RM-232D** [Rohm & Haas]  
*Chem. Descrip.:* Hydrophobically modified alkali-swellable emulsion  
*Uses:* Rheology modifier for paper and paperboard coatings; low foam; good combination of thickening efficiency and water holding; exc. runnability in high-speed coating applics.; enhanced mech. stability  
*Properties:* Sp.gr. 1.06; dens. 8.8 lb/gal; visc. < 50 cps; pH 5.4; 28% solids; anionic
- Rhoplex® TR-520** [Rohm & Haas]  
*Chem. Descrip.:* Acrylic emulsion  
*Uses:* Binder for nonwovens manufactured with rayon, wood pulp or polyester fibers, medical nonwovens, paper; self-crosslinking; hydrophilic; salt-tolerant; mechanically stable; imparts intermediate hand; exc. wet tens. str. and durability to washing and dry cleaning; self-thickening  
*Properties:* Milky wh. liq.; dens. 8.9 lb/gal; visc. 35 cps; pH 2.6; 50.5% solids; anionic
- Rhoplex® TT-935** [Rohm & Haas]  
*Chem. Descrip.:* Hydrophobically modified alkali-swellable emulsion  
*Uses:* Rheology modifier for paper and paperboard coatings, esp. lightweight coatings; good combination of thickening efficiency and water holding; exc. runnability in high-speed coating applics.; rec. for use under high shear conditions  
*Properties:* Sp.gr. 1.06; dens. 8.8 lb/gal; visc. 50 cps; pH 3; 30% solids; anionic
- Ricon 100** [Ricon Resins]  
*Chem. Descrip.:* SBR random copolymer  
 CAS 9003-55-8  
*Uses:* Thermosetting liq. resin system used for elec. potting and impregnation of transformers, capacitors, motors laminates, molding compds. and castings, rubber modifiers, mica paper binder, nuclear heat shield; for harder cure zinc-rich coatings, molding compds.; vulcanizable binder for regrind and reclaim rubber; processing aid; outstanding elec. properties, thermal stability, moisture and age resistance, adhesion, and chem. resistance  
*Properties:* Hazy to clear amber very visc. liq.; low odor; m.w. 2400; negligible sol. in water; sp.gr. 0.89; dens. 7.4 lb/gal; visc. 40,000 cps (45 C); b.p. > 300 F; flash pt. 200 C; 80% butadiene, 20% styrene, 65% 1,2-vinyl; 98.5% min. NV
- Ricon 150** [Ricon Resins]  
*Chem. Descrip.:* High vinyl 1,2 polybutadiene homopolymer resin  
*Uses:* Thermosetting resin used in elec. potting and impregnation of transformers, capacitors, motors laminates, molding compds. and castings, rubber modifiers, mica paper binder, nuclear heat shield; for food pkg. and contact; impact modifier for PE or PP; coagent for NR, EPR, EPDM, CR, NBR, and SBR for peroxide cures, EPR and EPDM for sulfur cure; lowers Mooney visc. allowing increased filler loading  
*Properties:* Amber visc. liq.; low odor; m.w. 2400; sp.gr. 0.89; dens. 7.4 lb/gal; visc. 40,000 cps (45 C); flash pt. (TCC) > 300 F; 70% 1,2-vinyl, 20-22% trans-1,4, 6-8% cis-1,4; 100% resin
- RITA PEO-1** [R.I.T.A.]  
*Chem. Descrip.:* PEG-5M  
 CAS 25322-68-3  
*Uses:* Lubricant, tackifier for paper mfg., wastewater treatment, ceramic and glass treatment, adhesive and paint industries; cosmetic thickener, suspending agent, lubricant, coagulant, skin slip agent; resist. to bacterial degradation  
*Use Level:* 0.1-1%  
*Properties:* Wh. powd.; mild characteristic odor; particle size thru 16 mesh; sol. in water, numerous org. solvs.; m.w. 400,000; sp.gr. 1.15-1.22; visc. 300-1500 cps (5% sol'n.); bulk dens. 0.3 kg/l; soften. pt. 65-67 C; pH 6-8 (aq. sol'n.); nonionic  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; sl. toxic; TSCA listed  
*Precaution:* Avoid disp. of dust in air to reduce potential explosion hazard  
*Storage:* 6 mos shelf life in dk. place below 40 C to avoid solidification
- RITA PEO-2** [R.I.T.A.]  
*Chem. Descrip.:* PEG-9M  
 CAS 25322-68-3

*Uses:* Lubricant, tackifier for paper mfg., wastewater treatment, ceramic and glass treatment, adhesive and paint industries; cosmetic thickener, suspending agent, lubricant, coagulant, skin slip agent; resist. to bacterial degradation  
*Use Level:* 0.1-1%

*Properties:* Wh. powd.; mild characteristic odor; particle size thru 16 mesh; sol. in water, numerous org. solvs.; m.w. 210,000; visc. 50-200 cps (5% sol'n.); bulk dens. 0.3 kg/l; soften. pt. 65-67 C; pH 6-8 (aq. sol'n.); nonionic  
*Storage:* 6 mos shelf life in dk. place below 40 C to avoid solidification

**RITA PEO-3 [R.I.T.A.]**

*Chem. Descrip.:* PEG-23M

CAS 25322-68-3

*Uses:* Lubricant, tackifier for paper mfg., wastewater treatment, ceramic and glass treatment, adhesive and paint industries; cosmetic thickener, suspending agent, lubricant, coagulant, skin slip agent; resist. to bacterial degradation  
*Use Level:* 0.1-1%

*Properties:* Wh. powd.; mild characteristic odor; particle size thru 16 mesh; sol. in water, numerous org. solvs.; m.w. 1,000,000; visc. 2500-5500 cps (5% sol'n.); bulk dens. 0.3 kg/l; soften. pt. 65-67 C; pH 6-8 (aq. sol'n.); nonionic

*Storage:* 6 mos shelf life in dk. place below 40 C to avoid solidification

**RITA PEO-8 [R.I.T.A.]**

*Chem. Descrip.:* PEG-45M

CAS 25322-68-3

*Uses:* Lubricant, tackifier for paper mfg., wastewater treatment, ceramic and glass treatment, adhesive and paint industries; cosmetic thickener, suspending agent, lubricant, coagulant, skin slip agent; resist. to bacterial degradation  
*Use Level:* 0.1-1%

*Properties:* Wh. powd.; mild characteristic odor; particle size thru 16 mesh; sol. in water, numerous org. solvs.; m.w. 1,900,000; visc. 20-70 cps (0.5% sol'n.); bulk dens. 0.3 kg/l; soften. pt. 65-67 C; pH 6-8 (aq. sol'n.); nonionic  
*Storage:* 6 mos shelf life in dk. place below 40 C to avoid solidification

**RITA PEO-18 [R.I.T.A.]**

*Chem. Descrip.:* PEG-90M

CAS 25322-68-3

*Uses:* Lubricant, tackifier for paper mfg., wastewater treatment, ceramic and glass treatment, adhesive and paint industries; cosmetic thickener, suspending agent, lubricant, coagulant, skin slip agent; resist. to bacterial degradation  
*Use Level:* 0.1-1%

*Properties:* Wh. powd.; mild characteristic odor; particle size thru 16 mesh; sol. in water, numerous org. solvs.; m.w. 4,400,000; visc. 250-430 cps (0.5% sol'n.); bulk dens. 0.3 kg/l; soften. pt. 65-67 C; pH 6-8 (aq. sol'n.); nonionic

*Storage:* 6 mos shelf life in dk. place below 40 C to avoid solidification

**RITA PEO-27 [R.I.T.A.]**

*Chem. Descrip.:* PEG-160M

CAS 25322-68-3

*Uses:* Lubricant, tackifier for paper mfg., wastewater treatment, ceramic and glass treatment, adhesive and paint industries; cosmetic thickener, suspending agent, lubricant, coagulant, skin slip agent; resist. to bacterial degradation  
*Use Level:* 0.1-1%

*Properties:* Wh. powd.; mild characteristic odor; particle size thru 16 mesh; sol. in water, numerous org. solvs.; m.w. 7,200,000; visc. 400-1000 cps (0.5% sol'n.); bulk dens. 0.3 kg/l; soften. pt. 65-67 C; pH 6-8 (aq. sol'n.); nonionic

*Storage:* 6 mos shelf life in dk. place below 40 C to avoid solidification

**RO-40 [IMERYS]**

*Chem. Descrip.:* Ground calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Pigment, filler, reinforcement for paper, paint, polymers, food, esp. polyolefins, carpet backing, caulks, sealants, putties, asphalt, ceramics, foamed compds.; mild abrasive in cleaners; coarse ground

*Properties:* Wh. powd., odorless; 53% thru 325 mesh; negligible sol. in water; sp.gr. 2.71; dens. 22.57 lb/gal; bulk dens. 85 lb/ft<sup>3</sup> (loose); bulking value 0.044; ref. index 1.59; pH 9.5; nonflamm.

*Toxicology:* TLV/TWA 10 mg/m<sup>3</sup>, considered nuisance dust

*Precaution:* Incompat. with acids

**Rod White 950™ [Michelman]**

*Uses:* Wh. coating for paper; designed for rod coater applic.; max. wax gray-out resist.; gluable; repulpable

*Regulatory:* FDA compliance

**Rohagit® SL 252 [Rohm Tech]**

*Chem. Descrip.:* Acrylic polymer aq. sol'n.

*Uses:* Dispersant for nonwoven bonding, textile finishing and coating, and papermaking and finishing

*Properties:* Liq.

**Rohamere® 21 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate

*Uses:* Binder and additive for nonwoven bonding, textile finishing/coating, papermaking, impregnations; forms clear, hard tack-free film with exc. wash and dry clean fastness

*Properties:* Emulsion; 115 nm particle size; pH 2.2; 45 ± 0.5% solids; anionic/nonionic

**Rohamere® 61 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate

*Uses:* Thermoplastic for use as hand builder or flattening agent for textile or paper applics., or to improve block resist. of softer polymers; binder and additive for nonwoven bonding, textile finishing/coating, papermaking

*Properties:* Emulsion; 130 nm particle size; pH 9.2; 38 ± 0.5% solids; anionic

**Rohamere® 132 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Ethyl acrylate, acrylonitrile

*Uses:* Forms tack-free film for predispersed pigment colors; suited for nonwovens, esp. interlinings, fabric backcoatings and finishes, and paper coatings and impregnations; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; std. self-crosslinking acrylic; exc. anti-crock props.

*Properties:* Emulsion; 150 nm particle size; pH 2.3; 45 ± 0.5% solids; anionic/nonionic

**Rohamere® 568 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate

*Uses:* Binder and additive for nonwoven bonding, textile finishing/coating, papermaking; forms clear, hard tack-free film with exc. wash and dry clean fastness

*Properties:* Emulsion; 120 nm particle size; pH 2.2; 45 ± 0.5% solids; anionic/nonionic

**Rohamere® 587 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Butyl acrylate, acrylonitrile

*Uses:* For use in textile flocking adhesives, interlinings, and lightweight nonwovens; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; std. self-crosslinking acrylic; very soft; exc. wash and dry clean durability and UV resist.

*Properties:* Emulsion; 190 nm particle size; pH 3.0; 45 ± 0.5% solids; nonionic

**Rohamere® 626 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Butyl acrylate, methyl methacrylate

*Uses:* Binder and additive for nonwoven bonding, textile finishing/coating, papermaking; hard tack-free acrylic noted for exc. adhesion to leather and for exc. weather resist. provided by its highly hydrophobic composition

*Properties:* Emulsion; 120 nm particle size; pH 9.0; 45 ± 0.5% solids; anionic

**Rohamere® 977 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate

*Uses:* Used for nonwovens, textile backcoatings, paper impregnations, beater addition, coatings, and leather finish applics.; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; coagulatable acrylic

*Properties:* Emulsion; 110 nm particle size; pH 2.2; 45 ± 0.5% solids; anionic/nonionic

**Rohamere® 1410 [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Butyl acrylate, methyl methacrylate

*Uses:* Finishing agent for leather, tarpaulins, tablecloths, awnings, or applics. where water resist. is required; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; hydrophobic std. self-crosslinking acrylic

*Properties:* Emulsion; 120 nm particle size; pH 9.0; 42.5 ± 0.5% solids; anionic

**Rohamere® 1900-D [Röhm Am.; Rohm Tech]**

*Chem. Descrip.:* Butyl acrylate, ethyl acrylate

*Uses:* Used for nonwoven bonding, textile backcoating, flocking, and high wet str. paper applics.; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking acrylic; very soft, resilient; nonyellowing

*Properties:* Emulsion; 300 nm particle size; pH 3.7; 44.5 ± 0.5% solids; anionic

**Rohamere® 1960-D [Röhm Am.; Rohm Tech]**

- Chem. Descrip.:* Ethyl acrylate, methyl methacrylate  
*Uses:* Film-former for nonwoven bonding and impregnation, textile finishing, and paper impregnation; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking acrylic that forms firm, non-yellowing film  
*Properties:* Emulsion; 200 nm particle size; pH 3.0; 45 ± 0.5% solids; anionic
- Rohamere® 3045** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate  
*Uses:* Film-former for high pigment loading and good adhesion to vinyl and paperboard substrates; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; crosslinkable thermoplastic acrylic that forms med., clear, fast-drying film with exc. flexibility  
*Properties:* Emulsion; 110 nm particle size; pH 9.5; 45 ± 0.5% solids; anionic
- Rohamere® 6844-0** [Röhm Am.; Röhm GmbH]  
*Chem. Descrip.:* N-(2-Methacryloyloxyethyl)-ethylene urea 25% sol'n. in methylmethacrylate with 800 ppm MEHQ and 200 ppm PTZ inhibitors  
*Uses:* Wet adhesion monomer for paint resins (improves adhesion to old alkyd paints and wood); also used in plastics, leather, paper, and textile industries; polymerization and copolymerization in bulk, suspension, emulsion, and sol'n.  
*Properties:* Pt-Co 500 max. y/wh. to brn. liq.; sl. ester-like odor; misc. with water; sp.gr. 1.1 (20 C); visc. 6.7 mPa·s (20 C); vapor pressure 23 mbar (20 C); b.p. 100 C; solid. pt. -3 C; flash pt. none; ref. 1.4100-1.4200 (20 C); 1.0% water  
*Toxicology:* Not a skin irritant; TSCA listed  
*Precaution:* Avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light  
*Storage:* 6 mos shelf life @ 30 C max.
- Rohamere® 6852-0** [Röhm Am.; Röhm GmbH]  
*Chem. Descrip.:* N-(2-Methacryloyloxyethyl)-ethylene urea (50% sol'n. in water) with 800 ppm MEHQ and 200 ppm PTZ inhibitors  
*Uses:* Wet adhesion monomer for paint resins (improves adhesion to old alkyd paints and wood); also used in plastics, leather, paper, and textile industries; polymerization and copolymerization in bulk, suspension, emulsion, and sol'n.  
*Properties:* Pt-Co 500 max. y/wh. to brn. liq.; sl. ester-like odor; misc. with water; sp.gr. 1.1; visc. 6.7 mPa·s (20 C); vapor pressure 23 mbar (20 C); b.p. 100 C; solid. pt. -3 C; flash pt. none; ref. idex 1.4100-1.4200 (20 C); 50 ± 2.5% water; 50 ± 2.5% reactive ester  
*Toxicology:* Not a skin irritant; TSCA listed  
*Precaution:* Avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light  
*Storage:* 6 mos shelf life @ 30 C max.
- Rohamere® 8437** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Butyl acrylate, ethyl acrylate emulsion  
*Uses:* Used for nonwovens, textile backcoating, flocking, and paper applics.; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; nonyel. very soft acrylic with exc. wash and dry clean fastness  
*Properties:* Emulsion; 300 nm particle size; pH 4.5; 44.5 ± 0.5% solids; anionic
- Rohamere® 8464** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, acrylonitrile  
*Uses:* Film-former for backcoating formulations, laminating adhesives, or fabric finishing; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; std. self-crosslinking acrylic forms clear, flexible film; exc. mechanical stability  
*Properties:* Clear emulsion; 400 nm particle size; pH 3.0; 45 ± 0.5% solids; anionic/nonionic
- Rohamere® 8478** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate  
*Uses:* Film-former for fibrous or nonwoven applics. and paper impregnation; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking acrylic that forms med. film; nonyellowing  
*Properties:* Emulsion; 200 nm particle size; pH 3.0; 45 ± 0.5% solids; anionic
- Rohamere® 8596** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, acrylic acid sol'n.  
*Uses:* Film-former for textile sizing applics. and leather tanning; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; clear acrylic sol'n. polymer that forms soft film
- Properties:* Sol'n.; pH 1.5; 35 ± 0.5% solids
- Rohamere® 8662** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate emulsion  
*Uses:* Film-former; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; finishing agent in textile, leather, paper applics.; thermoplastic acrylic; forms a medium film  
*Properties:* Emulsion; 145 nm particle size; pH 6.5; 46 ± 0.5% solids; anionic/nonionic
- Rohamere® 9158** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate sol'n.  
*Uses:* Used for textile and leather saturation applics. requiring exc. penetration and improvement of break and scuff resist. in leather; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; clear, soft acrylic  
*Properties:* Sol'n.; pH 8.5; 21 ± 0.5% solids; anionic
- Rohamere® 84116** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate  
 CAS 140-88-5; EINECS/ELINCS 205-438-8  
*Uses:* Used for nonwovens, fabric finishing, laminating, and paper saturations; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking acrylic; nonyellowing; exc. wash and dry clean fastness  
*Properties:* Emulsion; 240 nm particle size; pH 3.5; 45 ± 0.5% solids; anionic/nonionic
- Rohamere® 84124** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate  
*Uses:* Film-former for spray coating and impregnation onto fibrous or nonwoven materials and paper; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking acrylic that forms stiff, nonyellowing film; exc. wash and dry clean durability  
*Properties:* Emulsion; 340 nm particle size; pH 3.0; 45 ± 0.5% solids; anionic
- Rohamere® 87219** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Ethyl acrylate, acrylonitrile  
*Uses:* Used in various coating applics.; binder and additive for nonwoven bonding, textile finishing/coating, papermaking; std. self-crosslinking acrylic; rec. where str. and good flexibility are required; good wash and dry clean durability  
*Properties:* Emulsion; 203 nm particle size; pH 3.0; 45 ± 0.5% solids; anionic/nonionic
- Rohamere® FF-6** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Butyl acrylate, methyl methacrylate  
*Uses:* Binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking formaldehyde-free polymer; low temp. cure; provides med. hand with very good wash and dry clean fastness  
*Properties:* Emulsion; 220 nm particle size; pH 2.5; 45 ± 0.5% solids; anionic
- Rohamere® FF-20** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Butyl acrylate  
 CAS 141-32-2; EINECS/ELINCS 205-480-7  
*Uses:* Binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking formaldehyde-free polymer; rec. for applics. where soft conventional crosslinking systems are used; low temp. cure; provides soft hand with very good wash and dry clean fastness  
*Properties:* Emulsion; 220 nm particle size; pH 2.5; 45 ± 0.5% solids; anionic
- Rohamere® FF+40** [Röhm Am.; Rohm Tech]  
*Chem. Descrip.:* Butyl acrylate, methyl methacrylate  
*Uses:* Binder and additive for nonwoven bonding, textile finishing/coating, papermaking; self-crosslinking formaldehyde-free polymer for applics. requiring stiff highly resist. finish; low temp. cure; provides firm hand with very good wash and dry clean fastness  
*Properties:* Emulsion; 220 nm particle size; pH 2.5; 45 ± 0.5% solids; anionic
- Rohatol® BV 411** [Rohm Tech]  
*Chem. Descrip.:* Self-crosslinking acrylic polymer emulsion  
*Uses:* Binder and additive for nonwoven bonding (waddings for clothing and interlinings), textile finishing (high-pile fabrics, flocking adhesives), textile coating (sportswear and leisure wear), papermaking and paper finishing  
*Properties:* Emulsion; pH 2.5; Polymer: tens. str. 5 M/mm<sup>2</sup>; elong. 80% (@ break); 50% solids; anionic
- Rohatol® BV 596** [Rohm Tech]

*Chem. Descrip.:* Self-crosslinking acrylic polymer emulsion

*Uses:* Binder and additive for nonwoven bonding (waddings for clothing, coating carriers for bitumen and PVC, needle felts for automotive articles, abrasives), textile finishing (high-pile fabrics, flocking adhesives), textile coating (roller and vertical blinds), papermaking and paper finishing

*Properties:* Emulsion; pH 2.8; Polymer: tens. str. 49 M/mm<sup>2</sup>; elong. 6% (@ break); 50% solids; anionic

**Rohatol® D 362** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer emulsion

*Uses:* Binder and additive for textile coating, protective foils, paper finishes

*Properties:* Emulsion; pH 7.5; Polymer: tens. str. 1 N/mm<sup>2</sup>; elong. 2400% (@ break); 50% solids; sl. anionic

**Rohatol® D 471** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer emulsion

*Uses:* Binder and additive for nonwoven bonding, roller and vertical blinds, bookbinding fabrics, papermaking and paper coatings

*Properties:* Emulsion; pH 9.6; Polymer: tens. str. 3 M/mm<sup>2</sup>; elong. 650% (@ break); 50% solids; anionic

**Rohatol® D 541** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer emulsion

*Uses:* Binder and additive for nonwoven bonding, roller and vertical blinds, textile coatings (tents, tarpaulins, awnings, tablecloths), papermaking and paper coatings

*Properties:* Emulsion; pH 9.5; Polymer: tens. str. 10 M/mm<sup>2</sup>; elong. 300% (@ break); 50% solids; anionic

**Rohatol® DV 242** [Rohm Tech]

*Chem. Descrip.:* Self-crosslinking acrylic polymer emulsion

*Uses:* Binder and additive for nonwoven bonding (interlinings, nonwovens for hygiene and hospital requisites, household and home), textile finishing (tarpaulins, tents, awnings, high-pile fabrics, upholstery fabrics, mattress ticking), textile coating (sportswear and leisure wear, tents, tarpaulins, awnings, roller and vertical blinds, suitcase, rucksacks, boat coverings, food wrapping), papermaking and paper finishing

*Properties:* Emulsion; pH 2.1; Polymer: tens. str. 2 M/mm<sup>2</sup>; elong. 140% (@ break); 50% solids; anionic

**Rohatol® DV 440** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer

*Uses:* Binder and additive for nonwoven bonding (for hygiene and hospital requisites, filters for dairy industry), textile finishing (upholstery fabrics, mattress ticking), papermaking and paper finishing; crosslinkable with melamine or urea resins

*Properties:* Emulsion; pH 2.5; Polymer: tens. str. 1 M/mm<sup>2</sup>; elong. 700% (@ break); 50% solids; anionic

**Rohatol® DV 477** [Rohm Tech]

*Chem. Descrip.:* Self-crosslinking acrylic polymer emulsion

*Uses:* Binder and additive for nonwoven bonding (waddings for upholstery, quilts, sleeping bags, clothing, nonwovens for household, air filters, dust masks, insulating materials), textile finishing (upholstery fabrics, mattress ticking, high-pile fabrics), textile coating (sportswear and leisure wear, tents, tarpaulins, awnings, roller and vertical blinds, suitcases, rucksacks, boat coverings, mattress covers), papermaking and finishing

*Properties:* Emulsion; pH 2.1; Polymer: tens. str. 7 M/mm<sup>2</sup>; elong. 147% (@ break); 50% solids; anionic

**Rohatol® DV 544** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer

*Uses:* Binder and additive for nonwoven bonding (household), papermaking and paper finishing; crosslinkable with melamine or urea resins

*Properties:* Emulsion; pH 8.4; Polymer: tens. str. 15 M/mm<sup>2</sup>; elong. 240% (@ break); 50% solids; anionic

**Rohatol® DV 571** [Rohm Tech]

*Chem. Descrip.:* Self-crosslinking acrylic polymer emulsion

*Uses:* Binder and additive for nonwoven bonding (waddings for upholstery, quilts, sleeping bags, clothing, coating carriers for bitumen and PVC, air filters, dust masks, insulating materials), textile finishing (edge-stiffening agent for knitwear, high pile fabrics), textile coating (sportswear and leisure wear, tents, tarpaulins, awnings, roller and vertical blinds, suitcases, rucksacks, boat coverings, mattress covers, protective foils), papermaking and finishing

*Properties:* Emulsion; pH 2.2; Polymer: tens. str. 24 M/mm<sup>2</sup>; elong. 85% (@ break); 50% solids; anionic

**Rohatol® M 600** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer

*Uses:* Binder and additive for nonwoven bonding, roller and vertical blinds, textile coatings (tents, tarpaulins, awnings, tablecloths, roller blinds), book-binding fabrics, papermaking and paper coatings

*Properties:* Emulsion; pH 9.5; Polymer: tens. str. 35 M/mm<sup>2</sup>; elong. 4% (@ break); 50% solids; sl. anionic

**Rohatol® M 630** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer

*Uses:* Binder and additive for nonwoven bonding (battery separators), food wrappings, papermaking and paper coating

*Properties:* Emulsion; pH 7.0; Polymer: tens. str. 35 M/mm<sup>2</sup>; elong. 4% (@ break); 50% solids; anionic

**Rohatol® M 712** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer

*Uses:* Binder and additive for nonwoven bonding (battery separators) and papermaking

*Properties:* Emulsion; pH 7.0; Polymer: tens. str. 26 M/mm<sup>2</sup>; elong. 85% (@ break); 50% solids; anionic

**Rohatol® MV 604** [Rohm Tech]

*Chem. Descrip.:* Thermoplastic acrylic polymer

*Uses:* Binder and additive for nonwoven bonding (for hygiene and hospital requisites, filters for dairy industry), glass-fiber nettings for reinforcement; crosslinkable with melamine or urea resins

*Properties:* Emulsion; pH 2.5; Polymer: tens. str. 22 M/mm<sup>2</sup>; elong. 8% (@ break); 50% solids; anionic

**Ropaque® BC-643** [Rohm & Haas]

*Chem. Descrip.:* Styrene acrylic hollow spheres

CAS 9010-92-8

*Uses:* Pigment, binder providing gloss, opacity, and brightness for paper and paperboard coatings; rec. for coatings where optical props. and bulk are desired

*Properties:* Hollow spheres; 0.6 µm particle size; 43% void vol.; sp.gr. 1.02; dens. 8.5 lb/gal; visc. 80 cps; pH 8.5; 30% solids; sl. anionic

**Ropaque® HP-1055** [Rohm & Haas]

*Chem. Descrip.:* Styrene acrylic hollow spheres

CAS 9010-92-8

*Uses:* Pigment providing gloss, opacity, and brightness for paper and paperboard coatings; rec. for coatings where optical props. and bulk are desired

*Properties:* Hollow spheres; 1.0 µm particle size; 55% void vol.; sp.gr. 1.02; dens. 8.5 lb/gal; visc. 80 cps; pH 8.5; 26.5% solids; sl. anionic

**Ropaque® HP-543P** [Rohm & Haas]

*Chem. Descrip.:* Styrene acrylic hollow spheres

CAS 9010-92-8

*Uses:* Pigment providing gloss, opacity, and brightness for paper and paperboard coatings; rec. for coatings on nonuniform substrates or for applics. where sheet finishing is limited

*Properties:* Hollow spheres; 0.5 µm particle size; 45% void vol.; sp.gr. 1.06; dens. 8.8 lb/gal; visc. 80 cps; pH 8.5; 30.5% solids; sl. anionic

**Roscol®** [Eka Chems.]

*Chem. Descrip.:* Rosin disp., casein-stabilized

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for internal sizing of all kinds of paper and board in pH range of 4-6

*Properties:* Anionic

**Ross Beeswax** [Frank B. Ross]

*Chem. Descrip.:* Beeswax

EINECS/ELINCS 232-383-7

*Uses:* For use in polishes, cosmetics, medicinal ointments/salves, candles, leather/textile/wood/paper finishes, confectionery, modeling, engraving, acid etching, lithography, emulsions; avail. as crude, yel. refined, and wh. bleached grades

*Regulatory:* FDA 21CFR §184.1973, 184.1975

*Properties:* Lt. taffy to deep brn. wax, char. honey odor; m.p. 62-65 C; acid no. 17-24; cloud pt. -65 C max.

**Ross Beeswax Substitute No. 11** [Frank B. Ross]

*Chem. Descrip.:* Yel. beeswax substitute

*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required

*Properties:* Yel.; m.p. 130-143 F; acid no. 1-5; sapon. no. 6-15

**Ross Beeswax Substitute No. 30** [Frank B. Ross]

*Chem. Descrip.:* Yel. beeswax substitute

- Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Yel.; m.p. 130-143 F; acid no. 1-5; sapon. no. 6-15
- Ross Beeswax Substitute No. 145** [Frank B. Ross]  
*Chem. Descrip.:* Wh. beeswax substitute  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Wh.; m.p. 140-158 F; acid no. nil; sapon. no. nil
- Ross Beeswax Substitute No. 628/5** [Frank B. Ross]  
*Chem. Descrip.:* Paraffin, candelilla wax, hydrogenated tallow glycerides, stearic acid, and cetyl alcohol  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* M.p. 140-150 F; acid no. 17-27; sapon. no. 60-80
- Ross Beeswax Substitute No. 662** [Frank B. Ross]  
*Chem. Descrip.:* Yel. beeswax substitute  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Yel.; m.p. 155-160 F; acid no. 17-24; sapon. no. 90-93
- Ross Beeswax Substitute No. 776** [Frank B. Ross]  
*Chem. Descrip.:* Wh. beeswax substitute  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Wh.; m.p. 145-160 F; acid no. 17-24; sapon. no. 89-103
- Ross Beeswax Substitute No. 909** [Frank B. Ross]  
*Chem. Descrip.:* Yel. beeswax substitute  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Yel.; m.p. 163-167 F; acid no. 1-3; sapon. no. 6-8
- Ross Beeswax Substitute No. 1595** [Frank B. Ross]  
*Chem. Descrip.:* Yel. beeswax substitute  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Yel.; m.p. 133-143 F; acid no. 1-5; sapon. no. 5-14
- Ross Beeswax Substitute No. 1623** [Frank B. Ross]  
*Chem. Descrip.:* Wh. beeswax substitute  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Wh.; m.p. 145-160 F; acid no. 17-24; sapon. no. 89-103
- Ross Beeswax Substitute No. 1892** [Frank B. Ross]  
*Chem. Descrip.:* Wh. beeswax substitute  
*Uses:* Used in polishes, cosmetics, medicinals (ointments, salves), candles, textile, leather, wood, and paper finishes, confectionery, modeling, engraving, acid etching, lithography, and emulsions; for use where pure beeswax is not required  
*Properties:* Wh.; m.p. 140-150 F; acid no. 2-8; sapon. no. 16-28
- Ross Candelilla Wax** [Frank B. Ross]  
*Chem. Descrip.:* Candelilla wax  
CAS 8006-44-8; EINECS/ELINCS 232-347-0  
*Uses:* Used in polishes, leather/textile finishes, cosmetics (lipstick), casting, lubricants/greases, adhesives, chewing gum, paper size, paper coatings; food pkg. adhesives, coatings, paper; avail. as crude and refined grades  
*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180  
*Properties:* Grayish-green wax-like fat, aromatic odor; sp.gr. 0.977-0.982; m.p. 38-49 C; acid no. 5-24; iodine no. 2-10; sapon. no. 210-239; flash pt. 470 F min.; ref. index 1.4360
- Ross Carnauba Wax** [Frank B. Ross]  
*Chem. Descrip.:* Carnauba (Copernicia cerifera) wax  
CAS 8015-86-9; EINECS/ELINCS 232-399-4  
*Uses:* Used for polishes, leather finishes, cosmetic creams and lipsticks, casting, lubricants, buffing compds., glazing of candies, gum, pills, and paper, inks; protective coatings, candles, medicinal ointments and salves; lubricant for melamine, phenolics; avail. as Prime or No. 1 Yel. or No. 3 North Country grades  
*Regulatory:* FDA 21CFR §182.1978, 184.1978  
*Properties:* Flakes or powd.; sp.gr. 0.996-0.998; m.p. 181.4 F min.; acid no. 2-10; iodine no. 7-14; sapon. no. 78-95; flash pt. 570 F min.; ref. index 1.4540
- Ross Ceresine Wax** [Frank B. Ross]  
*Chem. Descrip.:* Ceresine wax  
CAS 8001-75-0; EINECS/ELINCS 232-290-1  
*Uses:* Used for adhesives, textile waterproofing/mildewproofing, polishes, sunchecking in rubbers, cosmetic pomades and perfumes, crayons, medicinal ointments and salves, lubricants, mold releases, paper impregnants/sizes, paints, casting; food pkg. adhesives; avail. in various grades  
*Regulatory:* FDA 21CFR §175.105  
*Properties:* Wh., yel., tan, or orange grades; sp.gr. 0.880-0.935; m.p. 53.3-87.8 C; acid no. nil; sapon. no. 2 max.; ref. index 1.425-1.435
- Ross Japan Wax** [Frank B. Ross]  
*Chem. Descrip.:* Japan (Rhus succedanea) wax  
CAS 8001-39-6  
*Uses:* Wax used in package coatings, textile finishes, cosmetics, lubricants for textile, metal, and rope, pencils, crayons, wax modeling, buffing compds., pharmaceuticals; anticorrosion agent for metal; food pkg. adhesives, coatings, paper  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.350, 176.170, 182.10  
*Properties:* Pale cream colored wax, gummy feel; sp.gr. 0.975-0.984; m.p. 46.5-51.5 C; acid no. 6-30; iodine no. 4-15; sapon. no. 200-225; flash pt. 385 F min.; ref. index 1.4550
- Ross Montan Wax** [Frank B. Ross]  
*Chem. Descrip.:* Montan wax  
CAS 8002-53-7; EINECS/ELINCS 232-313-5  
*Uses:* Wax for use as carnauba substitutes, defoaming agents, in carbon paper and printing inks, polishes, rubber prods., plastics, records, insulation, sizing, adhesives; food pkg. adhesives, rubber articles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600  
*Properties:* German crude: pellets, powd.; m.p. 83-89 C; acid no. 31-38; sapon. no. 87-104; Domestic crude/refined: dk. brn., brn., tan flakes, powd.; m.p. 79.4-89 C; acid no. 24-55; sapon. no. 75-135
- Ross Ouricury Wax Replacement** [Frank B. Ross]  
*Uses:* Wax used for shoe polishes, inks for carbon paper, lubricants, mold release, roll leaf, stamping; carnauba wax replacement for use where color is not important  
*Properties:* Dk. color; sp.gr. 0.997-1.010; m.p. 180-188 F; acid no. 2-7; ester no. 76-88; sapon. no. 78-95; flash pt. 289.9 C min.
- Ross Palm Wax No. 765** [Frank B. Ross]  
*Chem. Descrip.:* Palm wax  
CAS 8021-56-5  
*Uses:* Wax used in carbon paper inks, rope and twine lubricants and water repellents, and floor, automotive, furniture, and leather polishes  
*Properties:* M.p. 175-185 F
- Ross Palm Wax No. 1475** [Frank B. Ross]  
*Chem. Descrip.:* Palm wax  
CAS 8021-56-5  
*Uses:* Wax used in carbon paper inks, rope and twine lubricants and water repellents, and floor, automotive, furniture, and leather polishes  
*Properties:* M.p. 171-180 F
- Ross Palm Wax No. 1581** [Frank B. Ross]  
*Chem. Descrip.:* Palm wax  
CAS 8021-56-5  
*Uses:* Wax used in carbon paper inks, rope and twine lubricants and water repellents, and floor, automotive, furniture, and leather polishes  
*Properties:* M.p. 167-175 F
- Ross Synthetic Candelilla Wax** [Frank B. Ross]  
*Chem. Descrip.:* Paraffin, myristyl lignocerate, stearic acid, hydrogenated tallow glyceride  
*Uses:* Wax for use in furniture, leather, auto, and floor polishes, leather and

textile finishes, cosmetics (lipsticks), casting, lubricants/greases, adhesives, chewing gum, paper size and coatings; hard, lustrous

*Properties:* Pale yel. hard wax, faint aromatic odor; m.p. 155-165 F; acid no. 12-22; sapon. no. 43-65; flash pt. 435 F min.

**Ross Wax #140** [Frank B. Ross]

*Chem. Descrip.:* Ethylene distearamide synthetic wax  
CAS 110-30-5; EINECS/ELINCS 203-755-6

*Uses:* Wax used as ingredient, finish or processing aid in adhesives, ammunition, asphalt, explosives, paints, paper, pyrotechnics, lubricants, mold releases, PVC, textile finishes, powd. metallurgy, etc.; food pkg. adhesives, coatings, paper, cellophane; high m.p.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1200

*Properties:* Wh. flakes, powd., or atomized; sol. in hot naphtha, xylene, Carbitol, IPA, trichlorethylene; sp.gr. 0.97; m.p. 138-140 C; flash pt. 530 F min.; acid no. 3-10; dielec. str. 233 V/mil; vol. resist.  $0.99 \times 10^{13}$  ohm-cm

**Ross Wax #160** [Frank B. Ross]

*Chem. Descrip.:* Synthetic wax  
CAS 123237-14-9; EINECS/ELINCS 232-315-6

*Uses:* Wax used as ingredient, finish or processing aid in adhesives, ammunition, explosives, hot-melt coatings, lubricants, paints, paper, pyrotechnics, release agent, propellants, textile finishes, powd. metallurgy, varnish, plastic film, etc.; high m.p.

*Properties:* Tan med. hard wax in lumps, flakes, powd., or atomized; sol. in hot naphtha, xylene, Carbitol, IPA, trichlorethylene, toluene; sp.gr. 1.0232; m.p. 157-162 C; flash pt. 590 F min.; acid no. 10 max.; iodine no. 7.5

**Rovene® 4100** [Mallard Creek Polymers]

*Chem. Descrip.:* Carboxylated styrene-butadiene emulsion

*Uses:* Modifier for air knife and blade coating formations, for boxboard coating and some publication grade papers

*Properties:* 0.19  $\mu$  particle size; visc. 300 cps; pH 6.3; 57% bound styrene;

50% solids

**Rovene® 4106** [Mallard Creek Polymers]

*Chem. Descrip.:* Carboxylated styrene butadiene latex

*Uses:* Hand modifier, sheet gloss aid for paper coatings; extremely hard latex

*Properties:* Particle size 0.20  $\mu$ ; dens. 8.4 lb/gal; visc. 200 cps; pH 6.5; 50% solids; anionic

**Rovene® 4112** [Mallard Creek Polymers]

*Chem. Descrip.:* Carboxylated styrene butadiene latex

*Uses:* Exc. runnability and printability for high speed blade coatings on LWC paper

*Properties:* Particle size 0.18  $\mu$ ; dens. 8.4 lb/gal; visc. 500 cps; pH 6.3; 50% solids; anionic

**Rovene® 4305** [Mallard Creek Polymers]

*Chem. Descrip.:* Carboxylated styrene butadiene latex

*Uses:* Binder for textiles, nonwovens, and paper saturation; soft; zero formaldehyde

*Properties:* 0.20  $\mu$  particle size; dens. 8.40 lb/gal; visc. 500 cps; pH 8.7; 53% solids; S/B ratio 45/55; anionic

**Rovene® 4402** [Mallard Creek Polymers]

*Chem. Descrip.:* Carboxylated styrene butadiene latex

*Uses:* Used for nonwovens and paper saturation; med. soft polymer

*Properties:* 0.20  $\mu$  particle size; dens. 8.40 lb/gal; visc. 300 cps; pH 8.7; 53% solids; S/B ratio 50/50; anionic

**Rovene® 5005** [Mallard Creek Polymers]

*Chem. Descrip.:* Carboxylated styrene-butadiene emulsion

*Uses:* Paper saturant; low foaming; rec. for applics. that require soft and strong saturant

*Properties:* 0.19  $\mu$  particle size; visc. 400 cps; pH 8.7; 45% bound styrene; 53% solids

# S

## Sabofos PP 75 [Sabo SpA]

*Chem. Descrip.:* Sodium alkylpolyglycol ether phosphate  
 CAS 68071-35-2

*Uses:* Detergent; wetting agent for low foaming auxiliaries in textile, paper, cleaners, and machine washing; alkali-stable

*Properties:* Liq.; 75% conc.; anionic

## Sabopon SAM [Sabo SpA]

*Chem. Descrip.:* Sulfosuccinate

*Uses:* Emulsifier in emulsion polymerization; foaming agent for latex emulsions (carpet backing); antigelling agent; cleaning agent for paper mill felts

*Properties:* Paste; 35% conc.; anionic

## Sachtofloc® 46.3 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Sachtoklar® and Synthofloc polyelectrolytes mixt.

*Uses:* Flocculant for treatment of turbid sol'ns. in sl. acidic to sl. alkaline range, e.g., for cleaning of heavily polluted wastewater from paper, textiles, ceramics industries, and petrochem. plants

*Properties:* Clear liq.; sp.gr. 1.20 (20 C); visc. 25 mPa·s (20 C); solid. pt. - 9 C; pH 2.9

*Storage:* 1 yr. shelf life

## Sachtofloc® 46.6 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Sachtoklar® and Synthofloc polyelectrolytes mixt.

*Uses:* Flocculant for treatment of turbid sol'ns. in sl. acidic to sl. alkaline range, e.g., for cleaning of heavily polluted wastewater from paper, textiles, ceramics industries, and petrochem. plants

*Properties:* Clear liq.; sp.gr. 1.19 (20 C); visc. 32 mPa·s (20 C); solid. pt. - 8 C; pH 2.9

*Storage:* 1 yr. shelf life

## Sachtofloc® 46.12 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Sachtoklar® and Synthofloc polyelectrolytes mixt.

*Uses:* Flocculant for treatment of turbid sol'ns. in sl. acidic to sl. alkaline range, e.g., for cleaning of heavily polluted wastewater from paper, textiles, ceramics industries, and petrochem. plants

*Properties:* Clear liq.; sp.gr. 1.18 (20 C); visc. 44 mPa·s (20 C); solid. pt. - 6 C; pH 3.0

*Storage:* 1 yr. shelf life

## Sachtofloc® 46.18 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Sachtoklar® and Synthofloc polyelectrolytes mixt.

*Uses:* Flocculant for treatment of turbid sol'ns. in sl. acidic to sl. alkaline range, e.g., for cleaning of heavily polluted wastewater from paper, textiles, ceramics industries, and petrochem. plants

*Properties:* Clear liq.; sp.gr. 1.17 (20 C); visc. 57 mPa·s (20 C); solid. pt. - 5 C; pH 3.0

*Storage:* 1 yr. shelf life

## Sachtofloc® 46.24 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Sachtoklar® and Synthofloc polyelectrolytes mixt.

*Uses:* Flocculant for treatment of turbid sol'ns. in sl. acidic to sl. alkaline range, e.g., for cleaning of heavily polluted wastewater from paper, textiles, ceramics industries, and petrochem. plants

*Properties:* Clear liq.; sp.gr. 1.16 (20 C); visc. 70 mPa·s (20 C); solid. pt. - 5 C; pH 3.1

*Storage:* 1 yr. shelf life

## Sachtofloc® 46.60 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Sachtoklar® and Synthofloc polyelectrolytes mixt.

*Uses:* Flocculant for treatment of turbid sol'ns. in sl. acidic to sl. alkaline range,

e.g., for cleaning of heavily polluted wastewater from paper, textiles, ceramics industries, and petrochem. plants

*Properties:* Clear liq.; sp.gr. 1.12 (20 C); visc. 86 mPa·s (20 C); solid. pt. - 2 C; pH 3.4

*Storage:* 1 yr. shelf life

## Sachtoklar® 37 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Polyaluminum chloride aq. sol'n.

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (13.2%); Cl (17.5%); Al (7%); SO<sub>4</sub> (< 1.0%)  
 CAS 1327-41-9; EINECS/ELINCS 215-477-2

UN No. 3264

*Uses:* Primary flocculant used for purification of potable and utility water, wastewater treatment, and papermaking process; food-contact applics.

*Use Level:* 5-50 g/m<sup>3</sup> (potable water); 10-5000 g/m<sup>3</sup> (wastewater); 0.3-2% (paper process)

*Regulatory:* German approved for paper in contact with foodstuffs

*Properties:* Yel. clear liq.; odorless; unlimited sol. in water; sp.gr. 1.30 (20 C); visc. 10-60 mPa·s (20 C); vapor pressure 103 hPa (20 C); f.p. - 25 C; b.p. > 100 C; pH 1.4

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; irritating to eyes and skin

*Environmental:* LC0 (leuciscus idus melonatus, 48 h) 750 mg/l; contains no substances or heavy metals in ecologically critical concs.; sl. harmful to water

*Precaution:* Corrosive; acidic; keep away from acid-sensitive materials

*Hazardous Decomp. Prods.:* May form HCl above 200 C

*Storage:* 12 mos storage stability; store dry < 40 C; handle/store with acid-resist. tanks, piping, pumps

## Sachtoklar® 39 [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Polyaluminum chloride aq. sol'n.

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (16.8%); Cl (22%); Al (8.9%); SO<sub>4</sub> (< 1.0%)  
 CAS 1327-41-9; EINECS/ELINCS 215-477-2

UN No. 3264

*Uses:* Primary flocculant used for purification of potable and utility water, wastewater treatment, and papermaking process; food-contact applics.

*Use Level:* 5-50 g/m<sup>3</sup> (potable water); 10-5000 g/m<sup>3</sup> (wastewater); 0.3-2% (paper process)

*Regulatory:* German approved for paper in contact with foodstuffs

*Properties:* Yel. clear liq.; odorless; unlimited sol. in water; sp.gr. 1.37 (20 C); visc. < 60 mPa·s (20 C); vapor pressure 103 hPa (20 C); f.p. -18 C; b.p. > 100 C; pH < 1.4

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; irritating to eyes and skin

*Environmental:* LC0 (leuciscus idus melonatus, 48 h) 750 mg/l; contains no substances or heavy metals in ecologically critical concs.; sl. harmful to water

*Precaution:* Corrosive; acidic; keep away from acid-sensitive materials

*Hazardous Decomp. Prods.:* May form HCl above 200 C

*Storage:* 12 mos storage stability; store dry < 40 C; handle/store with acid-resist. tanks, piping, pumps

## Sachtolith® HD-S [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Zinc sulfide, coated

CAS 1314-98-3; EINECS/ELINCS 215-251-3

*Uses:* Pigment, flame retardant used in thermoplastics (HDPE, PP), thermosets (melamine, urea, polyester), flame-resistant plastics, glass-reinforced plastics, pigment concs. and masterbatches, elastomers, textile fibers, paper, sealants, lubricants; opacifier; dry lubricant; food pkg. adhesives, rub-

ber articles; HD-S grade is coated with a small amt. of org. surfactant and have improved wetting-out and disp. char. in aq. and org. systems

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3297, 178.3570

*Properties:* Wh. powd.; odorless; 0.30 µm mean particle size; dens. 4.0 g/ml; surf. area 8 m<sup>2</sup>/g; oil absorp. 13; ref. index 2.37; pH 7; hardness (Mohs) 3; 98% ZnS

*Toxicology:* ZnS: ACGIH TLV/TWA 15 mg/m<sup>3</sup> (total dust), 5 mg/m<sup>3</sup> (respirable fraction); avoid dust inh.

*Precaution:* Incompat. with strong acids

*Hazardous Decomp. Prods.:* H<sub>2</sub>S

HMIS: Health 0; Flammability 0; Reactivity 0

**Sachtolith® L** [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Zinc sulfide

CAS 1314-98-3; EINECS/ELINCS 215-251-3

*Uses:* Pigment, flame retardant used in thermoplastics (HDPE, PP), thermosets (melamine, urea, polyester), flame-resistant plastics, glass-reinforced plastics, pigment concs. and masterbatches, elastomers, textile fibers, paper, sealants, lubricants; opacifier; dry lubricant; food pkg. adhesives, rubber articles; L is uncoated std. grade

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3297, 178.3570

*Properties:* Wh.; 0.35 µm mean particle size; dens. 4.0 g/ml; surf. area 8 m<sup>2</sup>/g; oil absorp. 14; ref. index 2.37; pH 6; hardness (Mohs) 3; 98% ZnS content

**Safacid 20/22 CD** [Pronova Oleochems.]

*Chem. Descrip.:* Sat. fatty acid

CAS 68002-88-0; EINECS/ELINCS 2681035

*Uses:* Industrial raw material; emulsifier, lubricant, defoamer, and release agent used in metal soaps, paper sizing, emulsions for textile/paper/wood processing; anticaking agent for fertilizers; hair conditioner; textile auxiliaries; raw material for making versatile greases, flow improvers, biodeg. fluids; good water repellency, high m.p., and gel strength; thermal props.

*Properties:* Lovibond 20Y/2R flakes or liq.; acid no. 167-174; iodine no. 7; sapon. no. 168-178

*Environmental:* Biodeg.; nontoxic to algae, daphnia, and fish

**Safacid 20/22 DF** [Pronova Oleochems.]

*Chem. Descrip.:* Sat. fatty acid

CAS 68002-88-0; EINECS/ELINCS 2681035

*Uses:* Industrial raw material; emulsifier, lubricant, defoamer, and release agent used in metal soaps, paper sizing, emulsions for textile/paper/wood processing; anticaking agent for fertilizers; hair conditioner; textile auxiliaries; raw material for making versatile greases, flow improvers, biodeg. fluids; good water repellency, high m.p., and gel strength; thermal props.

*Properties:* Lovibond 20Y/2R flakes or liq.; acid no. 164-171; iodine no. 8; sapon. no. 165-173

*Environmental:* Biodeg.; nontoxic to algae, daphnia, and fish

**Safacid 20/22 HF** [Pronova Oleochems.]

*Chem. Descrip.:* Sat. fatty acid

CAS 68002-88-0; EINECS/ELINCS 2681035

*Uses:* Industrial raw material; emulsifier, lubricant, defoamer, and release agent used in metal soaps, paper sizing, emulsions for textile/paper/wood processing; anticaking agent for fertilizers; hair conditioner; textile auxiliaries; raw material for making versatile greases, flow improvers, biodeg. fluids; good water repellency, high m.p., and gel strength; thermal props.

*Properties:* Lovibond 15Y/1.5R flakes or liq.; acid no. 164-169; iodine no. 3; sapon. no. 164-171

*Environmental:* Biodeg.; nontoxic to algae, daphnia, and fish

**Safacid 20/22 LF** [Pronova Oleochems.]

*Chem. Descrip.:* Behenic acid and arachidic acid

*Uses:* Industrial raw material; emulsifier, lubricant, defoamer, and release agent used in metal soaps, paper sizing, emulsions for textile/paper/wood processing; anticaking agent for fertilizers; hair conditioner; textile auxiliaries; raw material for making versatile greases, flow improvers, biodeg. fluids; good water repellency, high m.p., and gel strength; thermal props.

*Properties:* Lovibond 15Y/1.5R flakes or liq.; acid no. 164-171; iodine no. 3; sapon. no. 165-173

*Environmental:* Biodeg.; nontoxic to algae, daphnia, and fish

**SAFFIL High Alpha Grade** [ICI SAFFIL]

*Chem. Descrip.:* Polycrystalline alumina fiber

*Chem. Analysis:* Alumina (96%); silica (4%)

CAS 1344-28-1; EINECS/ELINCS 215-691-6

*Uses:* For high temp. insulation applics. (incl. vacuum formed boards, custom shapes and papers); for operating temps. up to 1750 C

*Properties:* < 0.5% impurities

**SAFFIL Low Alpha Grade** [ICI SAFFIL]

*Chem. Descrip.:* Polycrystalline alumina fibers

*Chem. Analysis:* Alumina (96%); silica (4%)

CAS 1344-28-1; EINECS/ELINCS 215-691-6

*Uses:* For high temp. insulation applics. incl. module making, expansion joints, furnace repairs, vacuum formed boards, custom shapes and papers; resist. to thermal shrinkage and chem. attack up to 1600 C

*Properties:* < 0.5% impurities

**Sag 100** [Crompton/Witco]

*Chem. Descrip.:* Silicone compd.

*Uses:* Antifoam for edible oil processing, jam/jelly/sauce mfg., food frying, hog scalding, feed supplement mfg., oil-based cosmetics, food pkg. adhesives and glues, food-contact paper/paperboard; food grade, autoclavable

*Regulatory:* FDA 21CFR §173.340, 175.105, 176.170, 176.180; BATF 27CFR §240.1051; USDA 9CFR §318.7, 381.147

**Sag 275D** [Crompton/Witco]

*Chem. Descrip.:* Organic compd.

*Uses:* Defoamer for waterborne coatings (latex, acrylics, vinyl/acrylics, PVA, semi- and high-gloss paints) and adhesives; defoamer in food-contact coatings, paper/paperboard; cost-effective; recoatable; controls foam and entrained air while minimizing pigment flotation, fish eyes, cratering, orange peel

*Use Level:* 0.5-1%

*Regulatory:* FDA 21CFR §176.180, 176.200, 176.210, 177.1640(b)

*Properties:* Lt. yel. opaque liq.; insol. in water; sp.gr. 0.88; visc. 1250 cP; flash pt. (COC) 116 C; pH 7.0; 100% act.

**Sag 730** [Crompton/Witco]

*Chem. Descrip.:* Dimethicone and silica

*Uses:* Defoamer for wastewater treatment at food processing plants, beverage mfg., whey processing, dehydration/evap./extraction processes, meat/poultry processing, washing/pkg. operations (eggs, vegetables, seafood), ethanol fermentation, flavorings mfg., cosmetics formulations (balms, lotions, moisturizers, ointments, shampoos, sunscreens), adhesives and sealants; food pkg. adhesives; food-contact paper/paperboard; food-grade

*Regulatory:* FDA 21CFR §173.340, 175.105, 176.170, 176.180, 177.1640(b); BATF 27CFR §240.1051; USDA approved

*Properties:* Disp. in water; 30% act.

**Sag 770** [Crompton/Witco]

*Uses:* Foam control agent used in snack food processing, ethanol fermentation, vegetable washing, beverage processing, food pkg. adhesives, food-contact paper/paperboard/polystyrene; food grade emulsion used to control protein or starch stabilized foam; provides rapid knockdown of existing foams; exc. durability

*Regulatory:* FDA 21CFR §173.340, 175.105, 176.170, 176.180, 177.1640(b); USDA approved

*Properties:* Liq.; disp. in water

**Sampaque® 5002** [Huber Engineered Materials]

*Uses:* Structured pigment, TiO<sub>2</sub> extender for paper and paperboard; good opacity and bulking chars.

*Properties:* Slurry; 85-95% finer than 2 µ; 0.03% max. 325 mesh residue; sp.gr. 2.60; visc. 500-700 cps; brightness (TAPPI) 91-93%; ref. index 1.57; pH 10-11.5 (28% solids); 45-51% slurry solids

**Samshin White AS** [Sam Shin]

*Uses:* Fluorescent brightening agent for pulp or paper; used for paper which is sized with rosin or syn. resins; exc. fastness to light, heat, acids, alkalis; unaffected by wide pH conditions

*Properties:* Yel. liq.; UV absorbance 347.6 nm; anionic

*Storage:* Avoid excessive heat and moisture

**Samshin White HL** [Sam Shin]

*Uses:* Fluorescent brightening agent for pulp or paper; used for paper which is sized with rosin or syn. resins; exc. fastness to light, heat, acids, alkalis; unaffected by wide pH conditions

*Properties:* Lt. brn. liq.; UV absorbance 347.6 nm; anionic

*Storage:* Avoid excessive heat and moisture

**Samshin White PL** [Sam Shin]

*Uses:* Fluorescent brightening agent for pulp or paper; used for paper which is sized with rosin or syn. resins; exc. fastness to light, heat, acids, alkalis; unaffected by wide pH conditions

*Properties:* Lt. brn. liq.; UV absorbance 347.6 nm; anionic

*Storage:* Avoid excessive heat and moisture

**Samshin White PR** [Sam Shin]

- Uses:* Fluorescent brightening agent for pulp or paper; used for paper which is sized with rosin or syn. resins; exc. fastness to light, heat, acids, alkalis; unaffected by wide pH conditions  
*Properties:* Highly conc. powd. or liq.; UV absorbance 347.6 nm; anionic  
*Storage:* Avoid excessive heat and moisture
- Samstat-350** [Sam Shin]  
*Uses:* Textile and paper aux. (copying paper, tissue paper); nearly no foaming; no influence on degree of size and whiteness during size press  
*Use Level:* 1-3 part/100 parts of starch on size  
*Properties:* Colorless transparent liq.; visc. < 20 cps; pH 7-9; 35 ± 1% solids; cationic  
*Storage:* 12 mos storage at R.T.
- Sancure® 1511** [BF Goodrich]  
*Chem. Descrip.:* Waterborne aromatic polyurethane polymer  
*Uses:* Used for plastic, concrete, and paper coatings; med. hard polymer  
*Properties:* Opaque; dens. 9.0 lb/gal; visc. 1000 cps; pH 8.7; tens. str. 5500 psi; elong. 230% (break); hardness (Sward) 56; VOC 307 g/l; 35% solids; 11.3% NMP
- Sanfac™** [BASF]  
*Uses:* Surfactant, rewetting agent for papermaking
- Sanibrom™ 40** [Albemarle]  
*Chem. Descrip.:* Sodium bromide (40% sol'n.)  
CAS 7647-15-6; EINECS/ELINCS 231-599-9  
*Uses:* Biocide for use as disinfectant, bactericide, fungicide, algicide, slimeicide, and molluscicide in recirculating and once-thru cooling water systems, wastewater systems, brewery pasteurizers, and pulp/paper mills; use with oxidizer such as sodium hypochlorite or chlorine gas to produce hypobromous acid  
*Regulatory:* EPA reg. no. 3377-25, 3377-32; DOT nonregulated  
*Properties:* Lt. to water-wh. clear liq.; sl. odor; sp.gr. 1.385-1.440; dens. 11.6-12.1 lb/gal (21 C); b.p. 100-112 C; flash pt. none; pH 7-9 (1:10); 38-42% assay  
*Toxicology:* Eye and skin irritant  
*Precaution:* Avoid strong acids, oxidizing agents, and extremely high heat; corrosive to aluminum
- Sanibrom™ 45** [Albemarle]  
*Chem. Descrip.:* Sodium bromide (45% sol'n.)  
CAS 7647-15-6; EINECS/ELINCS 231-599-9  
*Uses:* Biocide for use as disinfectant, bactericide, fungicide, algicide, slimeicide, and molluscicide in recirculating and once-thru cooling water systems, wastewater systems, brewery pasteurizers, and pulp/paper mills; use with oxidizer such as sodium hypochlorite or chlorine gas to produce hypobromous acid  
*Regulatory:* EPA reg. no. 3377-29, 3377-28; FIFRA registered  
*Properties:* Lt. to water-wh. clear liq.; sl. odor; sp.gr. 1.470-1.500; dens. 12.3-12.6 lb/gal (21 C); b.p. 100-112 C; flash pt. none; pH 7-9 (1:10); 44-46% assay  
*Toxicology:* Eye and skin irritant  
*Precaution:* Avoid strong acids, oxidizing agents, and extremely high heat; corrosive to aluminum
- Sanpeg™** [BASF]  
*Chem. Descrip.:* PEG-based  
*Uses:* Release agent for papermaking
- San-Sil® AN 45** [BASF]  
*Chem. Descrip.:* Syn. amorphous silica  
CAS 112926-00-8; EINECS/ELINCS 231-545-4  
*Uses:* Pigment for saturating paper grades used in decorative laminates and in paper coating applics. to enhance porosity, brightness, and ink receptivity  
*Properties:* Wh. powd.
- San-Sil® BD-73** [BASF]  
*Chem. Descrip.:* Syn. amorphous silica  
CAS 7631-86-9; EINECS/ELINCS 231-545-4  
*Uses:* Pigment for paper coating applics. where surf. smoothness is critical, for size press treated grades requiring enhanced brightness and surf. smoothness, and for ink jet applic.; provides exc. coating porosity  
*Properties:* Wh. powd.
- San-Sil® CG-102** [BASF]  
*Chem. Descrip.:* Syn. amorphous silica  
CAS 112926-00-8; EINECS/ELINCS 231-545-4  
*Uses:* Pigment for paper wet end filler additions, paper/paperboard coatings, and size press applics. to improve printing and brightness while maintaining opacity  
*Properties:* Wh. powd.
- San-Sil® KU 33** [BASF]  
*Chem. Descrip.:* Syn. amorphous silica  
CAS 112926-00-8; EINECS/ELINCS 231-545-4  
*Uses:* Pigment for paper coating applics. where surf. smoothness is critical, for size press treated grades requiring enhanced brightness and surf. smoothness; provides exc. coating porosity; improves printing and brightness  
*Properties:* Wh. powd.
- Sansink SB 301** [BASF]  
*Uses:* Deinking agent, surfactant for agglomerating laser and xerographic inks in paper processing; patented
- SanSoft™** [BASF]  
*Chem. Descrip.:* Quat. ammonium compd.  
*Uses:* Softener for tissue paper  
*Properties:* Cationic
- Sansperse™ WTC** [BASF]  
*Chem. Descrip.:* Phosphate-based high activity multicomponent formulation with acrylate dispersants and proprietary sequestrants  
*Uses:* Scale control agent, dispersant for alkaline deinking systems in papermaking; keeps washer and extractor surfaces clean in pulping and bleaching processes and in heat exchangers and scrubber systems; provides protection from scale in the presence of both temp. and pH shock; effective on calcium carbonate and calcium sulfate scale  
*Properties:* Liq.
- Sanstrip™ CA** [BASF]  
*Uses:* Acid boilout cleaning chem. for paper processing
- Sanstrip™ FP** [BASF]  
*Uses:* Alkaline boilout cleaning chem. for paper processing
- Santolink® AM-129** [Solutia]  
*Chem. Descrip.:* Etherified acrylated melamine/formaldehyde resin (62-68%) in tripropylene glycol diacrylate  
*Uses:* Crosslinking resin in radiation-cure applics. such as polyester and epoxy acrylates, unsat. polyesters, aliphatic and aromatic urethane acrylates, and most acrylate monomer diluents; imparts hardness and gloss, stain and chem. resist. to coatings, paper coatings; cured by free radical polymerization initiated by UV or thermal processing  
*Regulatory:* DOT nonregulated; SARA §302, 313 nonreportable  
*Properties:* Clear visc. liq.; sl. acrylate odor; insol. in water; sol. in most alcohols, aromatic hydrocarbons, ketones, and paraffins; sp.gr. 1.07-1.11 (20 C); dens. 8.9-9.3 lb/gal; visc. 4000-8000 cps; flash pt. (PMCC) > 110 C; 97% min. NV; < 0.1% free formaldehyde  
*Toxicology:* May cause eye and skin irritation; causes respiratory tract irritation; may cause allergic skin reaction; contains formaldehyde—potential cancer hazard; TSCA listed  
*Hazardous Decomp. Prods.:* Thermal decomp. may produce formaldehyde, methanol, nitrogenous prods., CO, and amines  
*Storage:* Store closed in cool, well ventilated area away from foodstuffs, reducing agents, and acids
- Santonox® TBMC** [Flexsys]  
*Chem. Descrip.:* 4,4'-Thiobis(6-t-butyl-m-cresol)  
CAS 96-69-5  
*Uses:* Antioxidant for paper film coatings, polyolefin stabilization, pulp/paper stabilization, NR and syn. rubbers, adhesives, PE, PP, ABS, cable coatings; antioxidant, stabilizer for food-grade polymers, rubber, adhesives; thermal print stabilizer; fiber lubricant stabilizer; stabilizer for NBR, ABS, PE, PP, EPM, EPDM; highly effective protectant for polyethylene; non-staining; nondiscoloring; in very low concs., forestalls degradation caused by processing heat and by UV light in outdoor aging  
*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.2010; BgVV XXI compliant  
*Properties:* Wh. to off-wh. fine powd. or cryst. powd.; m.w. 358.55; sp.gr. 1.09; m.p. 156-164 C  
*Storage:* 12 mos shelf life; store in single-stacked pallets in cool, dry, well-ventilated area away from direct sunlight
- Santowhite® BBMC** [Flexsys]  
*Chem. Descrip.:* 4,4'-Butylidenebis-(6-t-butyl-m-cresol)  
CAS 85-60-9  
*Uses:* Antioxidant for PE, PP, ABS, NR, synthetics, latexes, adhesives, oils for fiber finishes, food-grade polymers; stabilizer for syn. polymers, resins, inks; stabilizer, antigellant for drying oils; antioxidant, stabilizer for paper coatings, photographic coatings, thermal fax paper; food pkg. adhesives, coatings, rubber articles; nonstaining; provides exc. thermal oxida-

tive/UV discoloration protection; rec. for wh. or lt. colored prods. where color is critical; non-pinking

*Regulatory:* FDA 21CFR §175.105, 175.210, 175.300, 177.1632, 177.2600, 178.2010; BfVV XXI compliant

*Properties:* Wh. powd.; sol. in alcohol, acetone; insol. in petrol. ether; sp.gr. 1.03; m.p. 206-214 C

*Storage:* Store in single-stacked pallets in cool, dry, well-ventilated area away from direct sunlight

**Sappco Spa Securigard** [SA Paper Chems.; British Traders & Shippers]

*Chem. Descrip.:* Benzothiazole

*Uses:* Security chems. for paper

**Sarbox® SB 500 E50** [Sartomer]

*Chem. Descrip.:* Aromatic acid methacrylate half ester in SR 454 (ethoxylated trimethylolpropane triacrylate) with 1190 ppm MEHQ

*Uses:* Used in coatings (metal, paper, plastic, wood), inks (flexo and gravure, screen); fast cure speed, good wetting chars., exc. hardness and tens. str.; exc. adhesion to metal and plastic, good pigment dispersibility, good gloss characteristics

*Properties:* APHA 100-200 clear liq.; sp.gr. 1.16-1.19; dens. 9.7-9.9 lb/gal; visc. 75,000-100,000 cps; acid no. 130-160; flash pt. (Seta) > 200 F; 100% reactive esters

*Toxicology:* Low/moderate eye and skin irritation

*Storage:* Store in cool (preferably air-conditioned) area < 90 F away from direct sunlight, oxidizing agents and materials which may generate free radicals; use within 6 mos of receipt

**Sarbox® SB 500 K60** [Sartomer]

*Chem. Descrip.:* Aromatic acid methacrylate half ester in SR 344 (PEG-8 diacrylate) with 1060 ppm MEHQ

*Uses:* Used in adhesives, coatings (metal, paper, plastic, wood), inks (flexo and gravure, screen); good cure speed, wetting chars.; exc. adhesion to metal and plastic, org. and inorg. pigment dispersibility, exc. solv. resist.

*Properties:* APHA 100-200 clear liq.; sp.gr. 1.16-1.19; dens. 9.7-9.9 lb/gal; visc. 35,000-50,000 cps; acid no. 130-160; flash pt. (Seta) > 200 F; 100% reactive esters

*Toxicology:* Low/moderate eye and skin irritation

*Storage:* Store in cool (preferably air-conditioned) area < 90 F away from direct sunlight, oxidizing agents and materials which may generate free radicals; use within 6 mos of receipt

**Sarbox® SB 510 E35** [Sartomer]

*Chem. Descrip.:* Aromatic acid methacrylate half ester in SR 454 (ethoxylated trimethylolpropane triacrylate) with 620 ppm MEHQ

*Uses:* Used in adhesives, coatings (metal, paper, plastic, wood), inks (flexo and gravure, screen), plastisols; adhesion promoter for plastisol systems; exc. cure speed, exc. adhesion to metal and plastic, good wetting and flow characteristics; UV/EB or conventional cure; improved tensile and modulus props. while maintaining flexibility; exc. thin-film adhesion to electrocoated steel

*Properties:* APHA 150-250 clear liq.; sp.gr. 1.16-1.19; dens. 9.7-9.9 lb/gal; visc. 80,000-120,000 cps; acid no. 200-230; flash pt. (Seta) > 200 F; 100% reactive esters

*Toxicology:* Low/moderate eye and skin irritation

*Storage:* Store in cool (preferably air-conditioned) area < 90 F away from direct sunlight, oxidizing agents and materials which may generate free radicals; use within 6 mos of receipt

**Sarbox® SB 520 E35** [Sartomer]

*Chem. Descrip.:* Aromatic acid acrylate half ester in SR 454 (ethoxylated trimethylolpropane triacrylate) with 145 ppm MEHQ

*Uses:* Used in adhesives, coatings (metal, paper, plastic, wood), inks (flexo and gravure, screen); exc. cure speed, good wetting and flow characteristics, exc. adhesion to metal, plastic, electrocoated steel; intercoat adhesion; UV/EB or conventional cure

*Properties:* APHA 150-250 clear liq.; sp.gr. 1.16-1.19; dens. 9.7-9.9 lb/gal; visc. 80,000-120,000 cps; acid no. 200-230; flash pt. (Seta) > 200 F; 100% reactive esters

*Toxicology:* Low/moderate eye and skin irritation

*Storage:* Store in cool (preferably air-conditioned) area < 90 F away from direct sunlight, oxidizing agents and materials which may generate free radicals; use within 6 mos of receipt

**Sarbox® SB 520 M35** [Sartomer]

*Chem. Descrip.:* Aromatic acid acrylate half ester in SR 339 (2-phenoxyethyl acrylate) with 1060 ppm MEHQ inhibitor

*Uses:* Used for adhesives, coatings (metal, paper, wood, plastics), and inks

(flexo, gravure, screen); offers good cure speed, exc. adhesion to metal and plastics, good solv. and acid resist., high gloss, water/abrasion/chem./heat resist.; good wetting and flow char.

*Properties:* APHA 225 clear liq.; dens. 9.583 lb/gal; visc. 950 cps

*Storage:* 6 mos shelf life

**SarCat® K126** [Sartomer]

*Chem. Descrip.:* Cycloaliphatic diepoxide

*Uses:* Adhesion promoter for laminating adhesives, coatings (metal, paper, plastic, wood), inks, and electronics; fast cure, low volatility

*Properties:* APHA 10 clear liq.; sp.gr. 1.167; visc. 236 cps; cationic

**SB-332** [Huber Engineered Materials]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Filler, flame retardant, smoke suppressant for thermoplastics, thermosets, FRP spray-up/hand lay-up, FRP continuous panel, adhesives, sealants, mastics, paints, coatings, paper, elastomers, and rubber prods.; high loading; med. grind; high in superfines

*Properties:* Ground particulate; 11 μ median particle diam.; 98% thru 325 mesh; sp.gr. 2.42; bulk dens. 0.7 g/cc (loose); surf. area 3-4 m<sup>2</sup>/g; oil absorp. 27-28; brightness (TAPPI) 88; ref. index 1.57; hardness (Mohs) 2.5-3.5

**SB-805** [Huber Engineered Materials]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Filler, flame retardant, smoke suppressant for neoprene foam, thermoplastics, thermosets, adhesives, paints, coatings, paper; high loading; commonly used where a high degree of active surf. area is required and high loading levels must be maintained

*Properties:* Superfine powd.; 2.6 μ median particle diam.; 99.99% thru 325 mesh; sp.gr. 2.42; bulk dens. 0.4 g/cc (loose), 0.7 g/cc (packed); surf. area 5-6 m<sup>2</sup>/g; oil absorp. 34; brightness (TAPPI) 90-95; ref. index 1.57; hardness (Mohs) 2.5-3.5

**Schercofol DSB** [Scher]

*Chem. Descrip.:* Modified ethoxylated alkylamine

*Uses:* Dispersant for chopped strand fiberglass, paper, syn. fibers, and other nonwoven prods.; creates little or no foam

*Properties:* Amber liq.; faint typ. odor; completely sol. in water; sp.gr. 1.0; dens. 8.5 lb/gal; visc. 100-400 cps; vapor pressure < 25 mm Hg; b.p. 206 F; flash pt. (Seta) > 210 F; pH 6-7.5; 40-43% solid; cationic

*Toxicology:* Possible skin irritant; eye, nasal, and intestinal tract irritant; prolonged contact may cause dermatitis

*Precaution:* Incompat. with strong acid, strong alkali; spills are slippery

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, ammonia

*Storage:* 1 yr shelf life; avoid overheating or freezing; spilled material is slippery

**Schercoquat IAS** [Scher]

*Chem. Descrip.:* Isostearamidopropyl ethyldimonium ethosulfate

CAS 67633-63-0; EINECS/ELINCS 266-778-0

*Uses:* Emulsifier, dispersant, and flocculant for fibers, pulp/paper

*Properties:* Amber clear visc. liq., slight mild odor; water-sol.; m.w. 522; sp.gr. 0.99 ± 0.01; dens. 8.2 lb/gal; pH 5-7 (5.0% aq.); 90% min. act.; cationic

**Schercoquat IIS** [Scher]

*Chem. Descrip.:* Isostearyl ethylimidonium ethosulfate

CAS 67633-57-2; EINECS/ELINCS 266-778-0

*Uses:* Emulsifier, dispersant, flocculant for fibers, pulp/paper

*Properties:* Dk. amber clear to sl. hazy visc. liq., sl. mild odor; m.w. 532; sp.gr. 1.036 ± 0.01; dens. 8.6 lb/gal; pH 4-7 (5.0% aq.); 98% min. dry solids; cationic

**Schercozoline I** [Scher]

*Chem. Descrip.:* Isostearyl hydroxyethyl imidazoline

CAS 68966-38-1; EINECS/ELINCS 273-429-6

*Uses:* Surfactant, softener, antistat, dye assistant for textiles, paper, cutting oils, metal lubricants, polishes, cosmetics, agric., corrosion inhibitors, building materials

*Properties:* Amber clear liq.; m.w. 378; alkali no. 150-160; 90% min. imidazoline; cationic

Custom prod.

**Schercozoline L** [Scher]

*Chem. Descrip.:* Lauryl hydroxyethyl imidazoline

CAS 136-99-2; EINECS/ELINCS 205-271-0

*Uses:* Surfactant, softener, dye assistant, antistat for textiles, paper, cutting oils, metal lubricants, polishes, cosmetics, corrosion inhibitors, building materials; intermediate for quats.

*Properties:* Cream solid; m.w. 268; m.p. 38-42 C; alkali no. 204-214; 90% min. imidazoline; cationic

Custom prod.

#### Schercozoline O [Scher]

*Chem. Descrip.:* Oleyl hydroxyethyl imidazoline

CAS 95-38-5; EINECS/ELINCS 248-248-0

*Uses:* Surfactant, softener, dye assistant, antistat, w/o emulsifier, corrosion inhibitor for textiles, paper, cutting oils, metal lubricants, polishes, cosmetics, agric., building materials; intermediate for quat. ammonium compds.

*Properties:* Dk. amber liq.; m.w. 350; alkali no. 160-170; 90% min. imidazoline; cationic

Custom prod.

#### Schercozoline S [Scher]

*Chem. Descrip.:* Stearyl imidazoline

CAS 95-19-2; EINECS/ELINCS 202-397-8

*Uses:* Surfactant, softener, antistat, dye assistant for textiles, paper, cutting oils, metal lubricants, polishes, cosmetics, agric., corrosion inhibitors, building materials

*Properties:* Cream solid; m.w. 336; m.p. 44-48 C; 90% min. imidazoline; cationic

Custom prod.

#### Sclair® 10A [NOVA Chems.]

*Chem. Descrip.:* Octene VLDPE with process stabilizer

*Uses:* Blending film resin for improved toughness; food-contact paper/paperboard, polymer; low gel, exc. sealability, exc. clarity, easy processability

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Melt index 1.7 g/10 min.; sp.gr. 0.911; tens. str. 34 MPa (MD); elong. 400% (MD); tear str. 13 g/μm (MD); Dart drop str. 6 g/μm

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 10B [NOVA Chems.]

*Chem. Descrip.:* Octene VLDPE with process stabilizer

*Uses:* Film resin for coextrusion; food-contact paper/paperboard, polymer; low gel, exc. sealability, dart impact, and clarity

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Melt index 0.77 g/10 min.; sp.gr. 0.911; tens. str. 50 MPa (MD); elong. 500% (MD); tear str. 16 g/μm (MD); Dart drop str. 28 g/μm

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 10C [NOVA Chems.]

*Chem. Descrip.:* Octene VLDPE with process stabilizer

*Uses:* Film resin for specialty blending and sealant/lamination applics.; food-contact paper/paperboard, polymer; low gel, exc. sealability, dart impact, and clarity

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Melt index 0.77 g/10 min.; sp.gr. 0.911; tens. str. 45 MPa (MD); elong. 550% (MD); tear str. 20 g/μm (MD); Dart drop str. > 41 g/μm

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 11B4 [NOVA Chems.]

*Chem. Descrip.:* Octene LLDPE with high slip and antblock, process stabilizer, polymer process aid

CAS 9002-88-4

*Uses:* Film resin for specialty lamination and coextrusion; food-contact paper/paperboard, polymer; low gel, exc. seal chars., easy processability

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Melt index 0.77 g/10 min.; sp.gr. 0.921; soften. pt. (Vicat) 104 C; tens. str. 34 MPa (MD); elong. 600% (MD); tear str. 12 g/μm (MD); Dart drop str. 6 g/μm; hardness (Shore D) 58

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 11P2 [NOVA Chems.]

*Chem. Descrip.:* Butene LLDPE with low slip/antblock, process stabilizer, and polymer process aid

CAS 9002-88-4

*Uses:* Film resin for specialty lamination and coextrusion; food-contact paper/paperboard, polymer; low gel; exc. seal chars.; easy processability

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Melt index 0.72 g/10 min.; sp.gr. 0.920; soften. pt. (Vicat) 98 C; tens. str. 42 MPa (MD); elong. 800% (MD); tear str. 2 g/μm (MD); Dart drop str. 3 g/μm

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 11P3 [NOVA Chems.]

*Chem. Descrip.:* Butene LLDPE with med. slip/antblock, process stabilizer, polymer process aid

CAS 9002-88-4

*Uses:* Film resin for specialty lamination and coextrusion; food-contact paper/paperboard, polymer; low gel; exc. seal chars.; easy processability

*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant

*Properties:* Melt index 0.72 g/10 min.; sp.gr. 0.920; soften. pt. (Vicat) 98 C; tens. str. 42 MPa (MD); elong. 800% (MD); tear str. 2 g/μm (MD); Dart drop str. 3 g/μm

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 11P4 [NOVA Chems.]

*Chem. Descrip.:* Butene LLDPE with high slip/antblock, process stabilizer, polymer process aid

CAS 9002-88-4

*Uses:* Film resin for specialty lamination and coextrusion; food-contact paper/paperboard, polymer; low gel; exc. seal chars.; easy processability

*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant

*Properties:* Melt index 0.72 g/10 min.; sp.gr. 0.920; soften. pt. (Vicat) 98 C; tens. str. 42 MPa (MD); elong. 800% (MD); tear str. 2 g/μm (MD); Dart drop str. 3 g/μm

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 58G (High Gloss) [NOVA Chems.]

*Chem. Descrip.:* HDPE with processing antioxidant

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Blow molding resin for sm. part blow molding, inj. blow molding, low-mod. ESCR uses; food-contact paper/paperboard; outstanding gloss, pearlescent finish when colored

*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant

*Properties:* Melt index 0.96 g/10 min.; sp.gr. 0.958; bulk dens. 0.61 g/cm<sup>3</sup>; soften. pt. (Vicat) 126 C; tens. str. 27.6 MPa (@ yield, 50 mm/min.); elong. 1200% (50 mm/min.); hardness (Shore D) 67

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 61C [NOVA Chems.]

*Chem. Descrip.:* Octene LLDPE with process stabilizer

CAS 9002-88-4

*Uses:* Extrusion resin for food pkg., milk cartons, and paperboard containers; food-contact paper/paperboard, polymer; offers exc. sealability and toughness, high adhesion and drawdown, good barrier props. and abrasion resist.

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Melt index 5.3 g/10 min.; sp.gr. 0.919

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 69A [NOVA Chems.]

*Chem. Descrip.:* HDPE with antioxidant

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Extrusion coating for paper, polymer films, woven scrim, food pkg.; features high tens. str., good moisture barrier, oil/solv./abrasion/temp. resist.; lower brittleness temp.

*Regulatory:* FDA 21CFR §177.1520 compliant

*Properties:* Melt index 13 g/10 min.; sp.gr. 0.962; soften. pt. (Vicat) 129 C; hardness (Shore D) 65

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 2607 [NOVA Chems.]

*Chem. Descrip.:* HDPE with antioxidant

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Inj. molding resin for roll-out carts; food-contact paper/paperboard, polymer; good impact resist.; exc. stiffness; low warpage

*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant

*Properties:* Melt index 4.8 g/10 min.; sp.gr. 0.947; soften. pt. (Vicat) 122 C; tens. str. 22 MPa (yield); hardness (Shore D) 65

*Storage:* Store in clean, dry place @ ambient temps.

#### Sclair® 2607-UV10 [NOVA Chems.]

*Chem. Descrip.:* HDPE with high UV stabilizers and antioxidants

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Inj. molding resin for roll-out carts; food-contact paper/paperboard, polymer; exc. stiffness; good impact. resist.; low warpage

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Melt index 4.8 g/10 min; dens. 0.947 g/cm<sup>3</sup>; tens. str. 22 MPa (yield); elong. 1000% (break); hardness (Shore D) 65; soften. pt. (Vicat) 122 C

#### Sclair® 2908, 2908-UV8A [NOVA Chems.]

*Chem. Descrip.:* HDPE with antioxidant; 2908-UV8A contains UV stabiliz-

ers

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Inj. molding resin for tote boxes and beverage crates; food-contact paper/paperboard, polymer; high stiffness; max. impact str. and toughness*Regulatory:* FDA 21CFR §176.170, 177.1520*Properties:* Melt index 7.0 g/10 min.; sp.gr. 0.961; soften. pt. (Vicat) 129 C; tens. str. 29 MPa (yield 50, mm/min.); elong. 1200% (break, 50 mm/min.); hardness (Shore D) 65*Storage:* Store in clean, dry place @ ambient temps.**Sclair® 2909** [NOVA Chems.]*Chem. Descrip.:* HDPE with antioxidant, UV stabilizer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Inj. molding resin for tote boxes and beverage crates; food-contact paper/paperboard, polymer; high stiffness, surf. gloss; max. impact str. and toughness*Regulatory:* FDA 21CFR §176.170, 177.1520*Properties:* Melt index 13 g/10 min.; sp.gr. 0.962; soften. pt. (Vicat) 129 C; tens. str. 29 MPa (yield 50, mm/min.); elong. 800% (break, 50 mm/min.); hardness (Shore D) 65*Storage:* Store in clean, dry place @ ambient temps.**Sclair® 8107** [NOVA Chems.]*Chem. Descrip.:* LLDPE with antioxidant

CAS 9002-88-4

*Uses:* Inj. molding resin for food and sanitary containers; food-contact paper/paperboard, polymer; exc. ESCR, low temp. impact*Regulatory:* FDA 21CFR §176.170, 177.1520*Properties:* Melt index 4.8 g/10 min.; sp.gr. 0.925; soften. pt. (Vicat) 91 C; tens. str. 10.5 MPa (yield, 50 mm/min.); elong. 850% (break, 50 mm/min.); hardness (Shore D) 52*Storage:* Store in clean, dry place @ ambient temps.**Sclair® 8107 UV8D, 8107G UV8D** [NOVA Chems.]*Chem. Descrip.:* LLDPE with processing antioxidants and UV stabilizers

CAS 9002-88-4

*Uses:* Rotational molding resin for food and sanitary containers; food-contact paper/paperboard, polymer; exc. ESCR, low temp. impact*Regulatory:* FDA 21CFR §176.170, 177.1520*Properties:* Melt index 4.8 g/10 min.; sp.gr. 0.925; soften. pt. (Vicat) 91 C; tens. str. 10.5 MPa (yield, 50 mm/min.); elong. 850% (break, 50 mm/min.); hardness (Shore D) 52*Storage:* Store in clean, dry place @ ambient temps.**Sclair® 8306 UV8D, 8306G UV8D** [NOVA Chems.]*Chem. Descrip.:* MDPE with processing antioxidants and UV stabilizers

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* General purpose rotational molding resin; food-contact paper/paperboard, polymer; offers balance of toughness, ESCR, and processability*Regulatory:* FDA 21CFR §176.170, 177.1520*Properties:* Melt index 3.8 g/10 min.; sp.gr. 0.932; soften. pt. (Vicat) 108 C; tens. str. 14.4 MPa (yield, 50 mm/min.); elong. 900% (break, 50 mm/min.); hardness (Shore D) 56*Storage:* Store in clean, dry place @ ambient temps.**Sclair® 8405 UV8D, 8405G UV8D** [NOVA Chems.]*Chem. Descrip.:* MDPE with processing antioxidants and UV stabilizers

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Rotational molding resin for spray tanks; food-contact paper/paperboard, polymer; high impact str.; good ESCR*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant*Properties:* Melt index 2.6 g/10 min.; sp.gr. 0.938; soften. pt. (Vicat) 114 C; tens. str. 18 MPa (yield, 50 mm/min.); elong. > 1000% (break, 50 mm/min.); hardness (Shore D) 58*Storage:* Store in clean, dry place @ ambient temps.**Scogin™ F** [FMC Biopolymer]*Chem. Descrip.:* Sodium alginate

CAS 9005-38-3

*Uses:* Thickener, water holder, emulsion stabilizer, suspending agent, gellant, and film-former for food, pharmaceuticals, cosmetics, other industrial uses, esp. for surf. treatment of paper and board*Regulatory:* FDA GRAS*Properties:* Ivory colored granular powd.; 80 mesh; sol. in water; visc. 45 cps (0.5%), 300 cps (1%), 3700 cps (2%), 16,000 (3%)**Scogin™ HV** [FMC Biopolymer]*Chem.  CAS 9011-13-6  
*Uses:* Emulsifier; starch modifier in adhesives, textile sizing, paper sizing; protective colloid; pigment binder and dispersant; film-former; visc. modifier; latex stabilizer; barrier coatings; anti-resoiling additives; strippable coatings; water treatment  
*Properties:* Liq.; m.w. 120,000; visc. 80 max. cps; pH 7.5-8.5  
*Storage:* 2 yr shelf life
- Scripset® 808** [Hercules]  
*Chem. Descr.:* Styrene/maleic anhydride amide/NH<sub>4</sub>OH acid salt  
*Uses:* Emulsifier; starch modifier in adhesives, textile sizing, paper sizing; protective colloid; pigment binder and dispersant; film-former; visc. modifier; latex stabilizer; barrier coatings; anti-resoiling additives; strippable coatings; water treatment; compat. in systems with ≥ pH 6.0  
*Properties:* Powd.; water-sol.; 100% conc.
- Secoren™-VE** [Dr. W. Kolb AG]  
*Uses:* Dewatering agent, bulk enhancer, drainage aid in paper processing; achieves a homogeneous distribution of fibers and fillers; inc. vol. of paper and reduces surf. difference; improves printability
- Sequabond® 7880** [OMNOVA Sol'ns./Paper]  
*Chem. Descr.:* Colloidal styrene-acrylic latex  
 CAS 9010-92-8  
*Uses:* Binder for paperboard improving coating str. and water resist.; component of paper/paperboard in contact with aq./fatty/dry foods; inc. ink holdout and str.; contributes to glueability, print mottle, folding chars. and offset water/ink absorp. balance  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Dens. 9.5 lb/gal; pH 9.5; 40% total solids
- Sequabond® TR 7830** [OMNOVA Sol'ns./Paper]  
*Chem. Descr.:* Colloidal styrene-acrylic latex  
 CAS 9010-92-8  
*Uses:* Binder for paperboard improving coating str. and water resist.; component of paper/paperboard in contact with aq./fatty/dry foods; inc. ink holdout and str.; contributes to glueability, print mottle, folding chars. and offset water/ink absorp. balance  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Dens. 8.5 lb/gal; pH 8.5; 48% total solids
- Sequaflow® 502** [OMNOVA Sol'ns./Paper]

- Chem. Descrip.:* Aliphatic ester  
*Uses:* Lubricant, dust control agent for improved surf. finish of coated paper/paperboard in calendering process; provides control of dusting and hazing in high temp. calendering operations; gives low high-shear visc. and exc. ink holdout  
*Properties:* Dens. 7.4 lb/gal; 100% total solids
- Sequaflow® 566** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Organic  
*Uses:* Lubricant, dust control agent for improved surf. finish of coated paper/paperboard in calendering process; provides control of dusting and hazing in high temp. calendering operations  
*Properties:* Dens. 8.2 lb/gal; pH 6.0; 50% total solids
- Sequapel® 403** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Stearylated melamine  
*Uses:* Surf. sizing agent, water resist. aid for size press applic.  
*Properties:* Dens. 8.2 lb/gal; pH 6.0; 50% total solids
- Sequapel® 409** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Stearylated melamine  
*Uses:* Surf. sizing agent, water resist. aid for size press applic.  
*Properties:* Dens. 8.3 lb/gal; pH 9.0; 40% total solids
- Sequapel® 414** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Stearylated melamine/paraffin wax  
*Uses:* Surf. sizing agent, water resist. aid for size press applic.  
*Properties:* Dens. 8.3 lb/gal; pH 9.0; 40% total solids
- Sequapel® 417** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Paraffin wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Surf. sizing agent, water resist. aid for size press applic.  
*Properties:* Dens. 8.2 lb/gal; pH 9.0; 35% total solids
- Sequapel® 1415** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Water-based fluorochemical  
*Uses:* Surf. sizing agent providing grease and oil holdout in size press paper coatings  
*Properties:* Dens. 8.3 lb/gal; pH 9.0; 15% total solids
- Sequapel® NS** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Paraffin wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Surf. sizing agent, water resist. aid for size press applic.  
*Properties:* Dens. 8.3 lb/gal; pH 10.0; 35% total solids
- Squarez 82** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Zirconium chelate  
*Uses:* Insolubilizer for paper coatings incl. food-contact paper; reacts with functional groups of coating binders; reduces water sensitivity; allows improved printability and more uniform surf.  
*Regulatory:* FDA approved  
*Properties:* Dens. 9.5 lb/gal; pH 7.5; 27% total solids
- Squarez 755** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Polyol carbonyl adduct  
*Uses:* Insolubilizer for paper coatings incl. food-contact paper; reacts with functional groups of coating binders; reduces water sensitivity; inc. number of impressions and print quality in the offset printing process  
*Regulatory:* FDA approved  
*Properties:* Dens. 10.7 lb/gal; pH 4.5; 55% total solids
- Sequatone® 2000** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Styrene acrylate  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent for digital printing applics.; enhances printing chars.  
*Properties:* Dens. 8.6 lb/gal; pH 8.5; 40% total solids
- Sequel™ ASA** [Hercules]  
*Uses:* Sizing agent for papermaking; reacts directly with cellulose to produce complete on-machine sizing at pH 4-9
- Sequestrene® 30A** [Ciba Spec. Chems. (NC)]  
*Chem. Descrip.:* Tetrasodium EDTA aq. sol'n.  
 CAS 64-02-8; EINECS/ELINCS 200-573-9  
*Uses:* Chelating agent for water softening, water treatment (hardness control, boiler/cooling tower treatment), enhanced oil recovery, liq. soaps, detergents, cosmetics (creams, soaps, ointments, oils, skin care prods.), H<sub>2</sub>S, SO<sub>x</sub>, NO<sub>x</sub> abatement, chemical cleaning, scale removal, photography, textiles (scouring, stripping, boil-off, dyeing), pulp/paper, leather, metal treatment (plating baths, alkaline derusting, pickling baths), syn. rubber/plastics (SBR polymerization, latex stabilization)  
*Properties:* Straw to pale yel. clear liq.; misc. with water; sp.gr. 1.29-1.31;

chel. value 100; pH 11.5-12.5 (10% aq.); 39% act. in water

*Toxicology:* TSCA listed

**SER-AD® FA 620** [Condea Servo; Condea Servo BV]

*Chem. Descrip.:* Oleyl alcohol ethoxylated, phosphated, ammonium salt (25-50%) and di-2-ethylhexyl sulfosuccinate, sodium salt (10-25%)

UN No. 1987

*Uses:* Pigment wetting agent/dispersant for use in aq. coatings such as flat and gloss dispersion paints, paper coatings, and waterborne industrial paints

*Use Level:* 8%

*Properties:* APHA 100 max. clear liq.; char. odor; sol. in water; immisc. with org. solvs.; sp.gr. 1.015 kg/m<sup>3</sup> (20 C); visc. 150 mPa·s (20 C); vapor pressure 66 mbar (20 C); b.p. > 80 C; flash pt. 29-31 C; pH 4.5-6.0; 50% act.; anionic

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; irritating to eyes, skin

*Environmental:* > 85% biodeg.; do not allow to enter sewerage and surf. or groundwater; danger to drinking water if even sm. quantities leak into ground; LC50 (fish) 1-100 mg/l

*Precaution:* Flamm.; avoid oxidizing agents

*Hazardous Decomp. Prods.:* None known

*Storage:* Keep container tightly sealed; protect from frost

**SER-AD® FX 504** [Condea Servo; Condea Servo BV]

*Chem. Descrip.:* Ammonium polyacrylate

CAS 9003-03-6

*Uses:* Pigment dispersant for paints and aq. coatings based on polymeric binders (paper coatings, adhesives, carpet backings, plasters); low foaming; effective with hydrophilic pigments and extenders

*Properties:* Gardner 3 max. clear liq.; pract. odorless; water-sol.; immisc. with org. solvs.; dens. 1.130 g/cm<sup>3</sup> (20 C); visc. 40 mPa·s max.; vapor pressure 23 mbar (20 C); m.p. -5 C; b.p. > 100 C; dec. pt. > 100 C; pH 7-9 (20 C); 30% act.

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; nonirritating to skin and eyes; nonsensitizing

*Environmental:* > 80% biodeg.; do not allow to enter sewerage and surf. or groundwater; do not allow lg. quantities to reach ground water or sewage system

*Hazardous Decomp. Prods.:* None known

*Storage:* Protect from frost

**SER-AD® FX 505** [Condea Servo; Condea Servo BV]

*Chem. Descrip.:* Polymeric carboxylic acid ammonium salt

*Uses:* Pigment dispersant for all aq. coatings based on polymeric binders, terpolymers, and latexes, e.g., paper coatings, adhesives, carpet backings, and plasters, etc.; low foaming

*Properties:* Gardner 4 max. clear liq.; nearly odorless; sol. in water; not misc. with org. solvs.; sp.gr. 1.220 (20 C); visc. 1000 mPa·s max. (20 C); vapor pressure 23 mbar (20 C); flash pt. > 100 C; pH 7-8.5; 50% act.; anionic

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; nonirritating to skin and eyes

*Environmental:* > 80% biodeg.; do not allow to enter sewerage and surf. or groundwater

*Hazardous Decomp. Prods.:* None known

*Storage:* Protect from frost

**Serdas® GBO** [Condea Servo; Condea Servo BV]

*Chem. Descrip.:* Surfactant in mineral oil, silicon-free

*Uses:* Antifoam with emulsifying props. for aq. coatings, disp. paints, paper coatings; for indirect food contact; low odor

*Use Level:* 0.2-0.5%

*Regulatory:* BGA and FDA approved

*Properties:* Cloudy liq.; odorless; disp. in water; sol. in many org. solvs.; sp.gr. 0.88 kg/m<sup>3</sup> (20 C); visc. < 400 mPa·s (20 C); b.p. > 200 C; flash pt. > 150 C; 99-100% act.; nonionic

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; low toxicity; nonirritating to eyes, skin

*Environmental:* < 80% biodeg.; do not allow to enter sewerage and surf. or groundwater; danger to drinking water if even sm. quantities leak into ground; LC50 (fish) 5-15 mg/l

*Hazardous Decomp. Prods.:* None known

*Storage:* Protect from frost; after extended period @ lower temps. prod. will separate

**Serdas® GLN** [Condea Servo BV]

*Chem. Descrip.:* Surfactants in mineral oil

*Uses:* Defoamer for paper, sugar, textiles, leather, paints

*Properties:* Disp. in water

- Serdox® NKL 6** [Condea Servo BV]  
*Chem. Descrip.:* C16-18 alcohol polyglycol ether  
 CAS 68439-49-6  
*Uses:* Emulsifier for paraffins, lanolin, waxes, silicone oils for textile, wood, paper, mold release, polishes  
*Properties:* Paste; cloud pt. 76 C (10% in 25% BDG); 100% act.; nonionic
- Serdox® NOP 9** [Condea Servo BV]  
*Chem. Descrip.:* Octoxynol-9  
 CAS 9002-93-1  
*Uses:* Used in textiles; rinsing agent for washing paper machine felts; rewetting agent for paper towels and tissues  
*Properties:* Liq.; HLB 13.0; 100% conc.; nonionic
- Serpol QPA 160** [Condea Servo BV]  
*Chem. Descrip.:* Sodium polyacrylate  
 CAS 9003-04-7  
*Uses:* Dispersant for paper industry  
*Properties:* Water-sol.
- Servirox® OEG 45** [Condea Servo BV]  
*Chem. Descrip.:* PEG-17 castor oil  
 CAS 61791-12-6  
*Uses:* Used in textile, phytopharmaceutical, leather, paper and cosmetic industries  
*Properties:* Liq.; 100% conc.; nonionic
- Servirox® OEG 55** [Condea Servo BV]  
*Chem. Descrip.:* PEG-26 castor oil  
 CAS 61791-12-6  
*Uses:* Emulsifier, dispersant, solubilizer used in textile, phytopharmaceutical, leather, paper and cosmetic industries  
*Properties:* Liq.; 100% act.; nonionic
- Servirox® OEG 90** [Condea Servo BV]  
*Chem. Descrip.:* PEG-180 castor oil  
 CAS 61791-12-6  
*Uses:* Emulsifier, dispersant, solubilizer used in textile, phytopharmaceutical, leather, paper and cosmetic industries  
*Properties:* Solid; 100% act.; nonionic
- Servirox® OEG 90/50** [Condea Servo BV]  
*Chem. Descrip.:* PEG-180 castor oil  
 CAS 61791-12-6  
*Uses:* Solubilizer used in textile, phytopharmaceutical, leather, paper and cosmetic industries  
*Properties:* Liq.; 50% act.; nonionic
- Servoxyl® VPBZ 5/100** [Condea Servo BV]  
*Chem. Descrip.:* C12-C18 fatty alcohol PEG ether (5 EO) phosphate ester  
*Uses:* Emulsifier for min. oils, metalworking, metal cleaning; antistat; hydro-trope; auxs. for textiles, agric., paper, cleaning, and metal processing industries  
*Properties:* Liq./paste; 100% act.; anionic
- Servoxyl® VPDZ 3/100** [Condea Servo BV]  
*Chem. Descrip.:* Isotrideceth-3 phosphate  
*Uses:* Low foam wetting agent for neutral to weakly alkaline range; in salt form used as emulsifiers and antistats for textiles; aux. for textiles, agric., paper, cleaning, and metal processing industries; hydrotrope  
*Properties:* Liq.; water-sol.; 100% act.; anionic
- Servoxyl® VPDZ 6/100** [Condea Servo BV]  
*Chem. Descrip.:* Isotrideceth-6 phosphate  
*Uses:* Surfactant for textile, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPFZ 7/100** [Condea Servo BV]  
*Chem. Descrip.:* Oleth-7 phosphate  
 CAS 39464-69-2  
*Uses:* Surfactant for the textile, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPGZ 6/100** [Condea Servo BV]  
*Chem. Descrip.:* Phenol PEG ether (6 EO) phosphate ester  
 CAS 39464-70-5  
*Uses:* Emulsifier for min. oils, lubricant auxiliaries, metal processing; auxs. for textile, agric., paper, cleaning industries; antistat; hydrotrope  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPI 55** [Condea Servo BV]  
*Chem. Descrip.:* Sodium n-butyl phosphate  
*Uses:* Surfactant for textile, agric., paper, cleaning, and metal processing industries; antistat for syn. fibers  
*Properties:* Liq.; sol. in water; 55% act.; anionic
- Servoxyl® VPIZ 100** [Condea Servo BV]  
*Chem. Descrip.:* n-Butyl phosphate ester  
 CAS 68439-39-4  
*Uses:* Surfactant used as base material for acid cleaners for glass, metal, and ceramics, flame retardants, mercerizing wetting agents and antistats; anti-corrosive and rust-removing props.; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPNZ 7/100** [Condea Servo BV]  
*Chem. Descrip.:* Nonoxynol-7 phosphate  
*Uses:* Wetting agent, base for mfg. of alkaline or weakly acid cleaning agents, dry cleaning formulations with antistatic properties, flame retardants, flotation aids; dispersant; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope; low foam  
*Properties:* Liq.; water-sol.; 100% conc.; anionic
- Servoxyl® VPNZ 20/100** [Condea Servo BV]  
*Chem. Descrip.:* Nonoxynol-20 phosphate  
*Uses:* Surfactant for the textile, agric., paper, cleaning, and metal processing industries  
*Properties:* Paste; 100% act.; anionic
- Servoxyl® VPPZ 100** [Condea Servo BV]  
*Chem. Descrip.:* Isopropyl phosphate ester  
 CAS 76483-21-1  
*Uses:* Base compd. for formulating acid cleaners for glass, metal, and ceramics, flame retardants, mercerizing wetting agents and antistats; anticorrosive and rust-removing props.; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPRZ 006/100** [Condea Servo BV]  
*Chem. Descrip.:* Tallow PEG-6 ether phosphate ester  
*Uses:* Surfactant for prod. of textile and dyeing auxiliaries, antistats, dry cleaning detergents; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPRZ 100** [Condea Servo BV]  
*Chem. Descrip.:* Tallow fatty alcohol partial ester of phosphoric acid  
*Uses:* Surfactant for the textile, agric., paper, cleaning, and metal processing industries  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPRZ 0011/100** [Condea Servo BV]  
*Chem. Descrip.:* Talloweth-11 phosphate  
*Uses:* Surfactant for prod. of dry cleaning detergents with antistatic props., textile and dyeing auxiliaries; o/w emulsifier for cosmetic creams, lotions, and gels; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Pale yel. solid; solid pt. 35 C; acid no. 65-70; pH 1.5-2.0 (1% aq.); 100% act.; anionic
- Servoxyl® VPTZ 003/100** [Condea Servo BV]  
*Chem. Descrip.:* 2-Ethylhexyl PEG ether phosphate ester, acid form  
 CAS 68439-39-4  
*Uses:* Surfactant, emulsifier for dry cleaning, emulsion polymerization, pesticides, cosmetics; base for acid cleaners; low-foam wetting agent for alkaline sol'ns., high pressure cleaners, metal degreasing, causticizing and kier boiling agents; anticorrosive props.; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Liq.; 100% act.; anionic
- Servoxyl® VPTZ 100** [Condea Servo BV]  
*Chem. Descrip.:* 2-Ethylhexyl phosphate ester  
 CAS 12645-31-7  
*Uses:* Low foam wetting agent for weakly to med. strong alkaline range in textile pretreatment and finishing, cosmetics; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Liq.; water-sol.; 100% act.; anionic
- Servoxyl® VPVZ 12/100** [Condea Servo BV]  
*Chem. Descrip.:* C20-22 fatty alcohol PEG ether (12 EO) phosphate ester  
*Uses:* Wetting agent, antistat for dry cleaning detergents, textile and dyeing auxiliaries; aux. for textiles, agric., paper, cleaning, and metal processing industries; emulsifier; antistat; hydrotrope  
*Properties:* Waxy solid; 100% act.; anionic

**Serwet® WH 170** [Condea Servo BV]*Chem. Descip.:* Dioctyl sodium sulfosuccinate

CAS 577-11-7; EINECS/ELINCS 209-406-4

*Uses:* Wetting agent for textiles, paints, paper, cleaners, cosmetics; dispersant for pigments; highly act.*Properties:* Liq.; sol. in water and alcohol; 65% act.; anionic*Environmental:* Biodeg.**Sevron®** [Crompton & Knowles]*Uses:* Basic dyes for unbleached, recycled, and other coarse paper applics. incl. kraft specialties, newsprint, egg cartons, industrial tissues, and saturation paper grades*Properties:* Powd. and liq.**Shamrock Hydrocer 100** [Shamrock Tech.]*Uses:* For water disp. surf. inks; better adhesion to coated paper, PP, PE substrates; improved wetting, gloss, rub resist.*Use Level:* 1.25-2.5%*Properties:* Wh. dispersion; dens. 8.4 lb/gal; 40% solids**Shamrock Hydrocer 145** [Shamrock Tech.]*Chem. Descip.:* Syn. wax

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* For aq. coatings and inks to reduce coeff. of friction with min. effect on gloss; for release props. of coatings from fabrics to can coatings; food pkg. adhesives, coatings, paper; prevents fingernail marring*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180; USDA compliant*Properties:* Wh. liq.; dens. 7.9-8.1 lb/gal; visc. 1100 cps max.; pH 6-7; 50% act.; nonionic*Toxicology:* TSCA listed*Storage:* Keep from freezing**Shamrock Hydrocer 200** [Shamrock Tech.]*Uses:* For water disp. surf. inks; better adhesion to PPE, PP, and non-absorbent coated paper; improved wetting, gloss, rub resist.*Use Level:* 2-4%*Properties:* Wh. dispersion; dens. 8.4 lb/gal; 25% solids**Shamrock Hydrocer EC 98** [Shamrock Tech.]*Chem. Descip.:* #1 Carnauba wax emulsion

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Slip agent and antimar additive to low pH polymers such as PVAc, PVC, PVdC; in resinous and polymeric food-contact coatings, in food-contact paper/paperboard*Regulatory:* FDA 21CFR 175.300, 176.170, 176.180 compliant*Properties:* Off-wh. to lt. tan emulsion; dens. 8.35 lb/gal; visc. 50 cps max.; pH 4-6; 35% act.; anionic*Toxicology:* TSCA listed*Storage:* Keep from freezing**Shamrock Hydrocer EEP 16** [Shamrock Tech.]*Chem. Descip.:* Polyethylene/paraffin wax*Uses:* Slip agent, release agent for inks and overprint varnishes where water resist. is desired; food pkg. paper/paperboard; will not normally interfere with second coat adhesion*Use Level:* 3-7%*Regulatory:* FDA 21CFR §176.170, 176.180*Properties:* Off-wh. translucent emulsion; dens. 8.2 lb/gal; visc. 50 cps max.; pH 9.5-10.5; 29-31% act.; anionic*Toxicology:* TSCA listed*Storage:* Keep from freezing**Shamrock Hydrocer EEP 33** [Shamrock Tech.]*Chem. Descip.:* Paraffin/polyethylene wax*Uses:* Antislip/antiblock additive for water-based inks and coatings; food pkg. coatings, paper/paperboard*Use Level:* 5-10%*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180 compliant*Properties:* Tan translucent emulsion; dens. 8.0-8.3 lb/gal; visc. 500 cps max.; pH 9.5-10.5; 29-31% act.; nonionic*Toxicology:* TSCA listed**Shamrock Hydrocer EP 91** [Shamrock Tech.]*Chem. Descip.:* Paraffin wax

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Water repellent in coatings, stains, and varnishes; food pkg. coatings, paper/paperboard*Use Level:* 4-8%*Regulatory:* FDA 21CFR §172.210, 175.300, 176.170, 176.180*Properties:* Wh. emulsion; ammoniacal odor; dens. 7.8-8.0 lb/gal; visc. 2000 cps max.; m.p. 57 C; pH 10-11.5; 29-31% act.; anionic*Toxicology:* TSCA listed*Storage:* Keep from freezing**Shamrock Neptune 968** [Shamrock Tech.]*Chem. Descip.:* Syn. wax

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Imparts lubricity, abrasion resist., and antiblocking props. to all water-based systems; food pkg. adhesives, coatings, paper/paperboard; helps avoid defoamer kickout*Use Level:* 0.5-3.0%*Regulatory:* FDA 21CFR 175.105, 175.300, 175.320, 176.170, 176.180; USDA compliant*Properties:* Wh. free-flowing powd.; 9 μ avg. particle size; disp. in water; sp.gr. 0.93; m.p. 104 C; soften. pt. 68 C*Toxicology:* TSCA listed**Shamrock Neptune 5038** [Shamrock Tech.]*Chem. Descip.:* Crystalline polyethylene

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* For use in inks and coatings; defoamer in food-contact coatings; food pkg. adhesives, coatings, paper; low/nonfoaming; will not affect intercoat adhesion or physical char. of coating*Regulatory:* FDA 21CFR 175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA compliant*Properties:* Wh. free-flowing powd.; 12.5 μ avg. particle size; disp. in water; sp.gr. 0.95; m.p. 125 C; soften. pt. 100 C; flash pt. > 175 C; anionic*Toxicology:* TSCA listed**Shamrock Neptune I N1** [Shamrock Tech.]*Chem. Descip.:* High melt polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* For use with water-reducible inks and top coatings for paper, film, and foil; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings; improves scuff and fingernail mar resist.*Use Level:* 1-2% (inks), 1-3% (coatings)*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved*Properties:* Wh. free-flowing powd.; 5 μ particle size; fineness (Hegman) 7+; disp. in aq. systems; sp.gr. 0.95; m.p. 113 C; soften. pt. 99 C*Toxicology:* TSCA listed**Shamrock Neptune I SP5** [Shamrock Tech.]*Chem. Descip.:* High melt polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* For use with water-reducible inks and top coatings for paper, film, and foil; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings; improves scuff and fingernail mar resist.*Use Level:* 1-2% (inks)*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved*Properties:* Wh. free-flowing powd.; 18 μ particle size; fineness (Hegman) 6+; sp.gr. 0.95; m.p. 113 C; soften. pt. 99 C*Toxicology:* TSCA listed**Shamrock S-232 MG** [Shamrock Tech.]*Chem. Descip.:* Alloy of waxes*Uses:* Provides inc. hardness, lubricity, and antiblocking chars. for coil coatings, wood lacquers, flexible and rigid pkg., and UV clears; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings; min. effect on gloss and clarity*Use Level:* 2-3% total formula wt.*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved*Properties:* Wh. free-flowing powd.; 3-4 μ particle size; fineness (Hegman) 7+; sp.gr. 0.97; m.p. 108 C; soften. pt. 69 C*Toxicology:* TSCA listed**Shamrock S-232 N1** [Shamrock Tech.]*Chem. Descip.:* Alloy of waxes*Uses:* Provides inc. hardness, lubricity, and antiblocking chars. for coil coatings, wood lacquers, flexible and rigid pkg., and UV clears; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings; min. effect on gloss and clarity*Use Level:* 2-3% total formula wt.*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved

- Properties:* Wh. free-flowing powd.; 5  $\mu$  particle size; fineness (Hegman) 7+; sp.gr. 0.97; m.p. 108 C; soften. pt. 69 C  
*Toxicology:* TSCA listed
- Shamrock S-232 N5** [Shamrock Tech.]  
*Chem. Descrip.:* Alloy of waxes  
*Uses:* Provides inc. hardness, lubricity, and antiblocking chars. for coil coatings, wood lacquers, flexible and rigid pkg., and UV clears; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings; min. effect on gloss and clarity  
*Use Level:* 2-3% total formula wt.  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved  
*Properties:* Wh. free-flowing powd.; 12.5  $\mu$  particle size; fineness (Hegman) 7; sp.gr. 0.97; m.p. 108 C; soften. pt. 69 C  
*Toxicology:* TSCA listed
- Shamrock S-236** [Shamrock Tech.]  
*Chem. Descrip.:* Alloy of waxes  
*Uses:* Provides inc. hardness, lubricity, and scuff resist. for coil coatings, wood lacquers, flexible and rigid pkg., and UV clears; food pkg. coatings, paper; does not sacrifice finish, gloss, and clarity  
*Use Level:* 2-3% to decrease coeff. of friction, maximize abrasion and scuff resist.  
*Regulatory:* FDA 21CFR §172.888, 175.250, 175.300, 176.170, 178.3720; USDA approved  
*Properties:* Wh. free-flowing powd.; 5  $\mu$  particle size; fineness (Hegman) 7+; sp.gr. 1.0; m.p. 83 C; soften. pt. 70 C  
*Toxicology:* TSCA listed
- Shamrock S-379 H** [Shamrock Tech.]  
*Chem. Descrip.:* Synthetic polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides good rub and slip in coatings and ink systems; food pkg. adhesives, coatings, paper  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180; USDA approved  
*Properties:* Wh. free-flowing powd.; 12.5  $\mu$  particle size; fineness (Hegman) 7; sp.gr. 0.93; m.p. 97 C; soften. pt. 63 C  
*Toxicology:* TSCA listed
- Shamrock S-379 N** [Shamrock Tech.]  
*Chem. Descrip.:* Synthetic polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides good rub and slip in coatings; food pkg. adhesives, coatings, paper  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180  
*Properties:* Wh. free-flowing powd.; 5  $\mu$  particle size; fineness (Hegman) 7+; sp.gr. 0.93; m.p. 97 C; soften. pt. 63 C  
*Toxicology:* TSCA listed
- Shamrock S-379 N3** [Shamrock Tech.]  
*Chem. Descrip.:* Synthetic polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides good rub and slip in coatings; food pkg. adhesives, coatings, paper  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180  
*Properties:* Wh. free-flowing powd.; 8  $\mu$  particle size; fineness (Hegman) 7+; sp.gr. 0.93; m.p. 97 C; soften. pt. 63 C  
*Toxicology:* TSCA listed
- Shamrock S-381 N1** [Shamrock Tech.]  
*Chem. Descrip.:* Modified polyethylene waxes  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Efficient flattening agent for coil coatings, wood lacquers, powd. coatings, flexible pkg., and architectural paints; food pkg. adhesives, coatings, paper; produces satin or flat finishes with exc. mar resist. and reduction of coeff. of friction  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180; USDA approval  
*Properties:* Wh. free-flowing powd.; 5  $\mu$  particle size; fineness (Hegman) 7+; sp.gr. 0.93; m.p. 78 C; soften. pt. 61 C  
*Toxicology:* TSCA listed
- Shamrock S-381 N5** [Shamrock Tech.]  
*Chem. Descrip.:* Modified polyethylene waxes  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Efficient flattening agent for coil coatings, wood lacquers, powd. coatings, flexible pkg., and architectural paints; food pkg. adhesives, coatings, paper;
- produces satin or flat finishes with exc. mar resist. and reduction of coeff. of friction  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180; USDA approval  
*Properties:* Wh. free-flowing powd.; 12.5  $\mu$  particle size; fineness (Hegman) 7; sp.gr. 0.93; m.p. 78 C; soften. pt. 61 C  
*Toxicology:* TSCA listed
- Shamrock S-394 N1** [Shamrock Tech.]  
*Chem. Descrip.:* Polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides exc. recoatability, rub resist., hardness, and antiblocking chars. for coil coatings, wood lacquers, powd. coatings, flexible and rigid pkg., inks; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved  
*Properties:* Wh. free-flowing powd.; 5  $\mu$  particle size; fineness (Hegman) 7+; sp.gr. 0.95; m.p. 113 C; soften. pt. 99 C  
*Toxicology:* TSCA listed
- Shamrock S-394 N5** [Shamrock Tech.]  
*Chem. Descrip.:* Polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides exc. recoatability, rub resist., hardness, and antiblocking chars. for coil coatings, wood lacquers, powd. coatings, flexible and rigid pkg., inks; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved  
*Properties:* Wh. free-flowing powd.; 12.5  $\mu$  particle size; fineness (Hegman) 7; sp.gr. 0.95; m.p. 113 C; soften. pt. 99 C  
*Toxicology:* TSCA listed
- Shamrock S-394 SP5** [Shamrock Tech.]  
*Chem. Descrip.:* Polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides exc. recoatability, hardness, and antiblocking chars. for coil coatings, wood lacquers, powd. coatings, flexible and rigid pkg.; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200; USDA approved  
*Properties:* Wh. free-flowing powd.; 18  $\mu$  particle size; fineness (Hegman) 6+; sp.gr. 0.95; m.p. 113 C; soften. pt. 99 C  
*Toxicology:* TSCA listed
- Shamrock S-395 N2** [Shamrock Tech.]  
*Chem. Descrip.:* Crystalline grade of polyethylene  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides recoatability, inc. hardness, abrasion resist., and antiblocking chars. for coil coatings, wood lacquers, powd. coatings, flexible and rigid pkg., UV clears, and architectural paint, solv. inks; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.180, 176.200; USDA approved  
*Properties:* Wh. free-flowing powd.; 7  $\mu$  particle size; fineness (Hegman) 7+; sp.gr. 0.95; m.p. 126 C; soften. pt. 119 C  
*Toxicology:* TSCA listed
- Shamrock S-395 N5** [Shamrock Tech.]  
*Chem. Descrip.:* Crystalline grade of polyethylene  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides recoatability, inc. hardness, abrasion resist., and antiblocking chars. for coil coatings, wood lacquers, powd. coatings, flexible and rigid pkg., UV clears, and architectural paint, solv. inks; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.180, 176.200; USDA approved  
*Properties:* Wh. free-flowing powd.; 12.5  $\mu$  particle size; fineness (Hegman) 7; sp.gr. 0.95; m.p. 126 C; soften. pt. 119 C  
*Toxicology:* TSCA listed
- Shamrock S-395 SP5** [Shamrock Tech.]  
*Chem. Descrip.:* Crystalline grade of polyethylene  
CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Provides recoatability, inc. hardness, abrasion resist., and antiblocking chars. for coil coatings, wood lacquers, powd. coatings, flexible and rigid pkg., UV clears, and architectural paint, solv. inks; food pkg. adhesives,

coatings, paper; defoamer in food-contact coatings

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.180, 176.200; USDA approved

**Properties:** Wh. free-flowing powd.; 18 µ particle size; fineness (Hegman) 6+; sp.gr. 0.95; m.p. 126 C; soften. pt. 119 C

**Toxicology:** TSCA listed

**Shamrock S-400 N1** [Shamrock Tech.]

**Chem. Descrip.:** Synthetic wax

CAS 8002-74-2; EINECS/ELINCS 232-315-6

**Uses:** Reduces coeff. of friction and inc. slip in rigid pkg. coatings with min. effect on gloss; food pkg. adhesives, coatings, paper

**Use Level:** 1-2% based on total formula wt.

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.170, 176.180; USDA approved

**Properties:** Wh. free-flowing powd.; 5 µ particle size; fineness (Hegman) 7+; sp.gr. 0.98; m.p. 141 C; soften. pt. 110 C

**Toxicology:** TSCA listed

**Shamrock S-400 N5** [Shamrock Tech.]

**Chem. Descrip.:** Synthetic wax

CAS 8002-74-2; EINECS/ELINCS 232-315-6

**Uses:** Reduces coeff. of friction and inc. slip in rigid pkg. coatings with min. effect on gloss; food pkg. adhesives, coatings, paper

**Use Level:** 1-2% based on total formula wt.

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.170, 176.180; USDA approved

**Properties:** Wh. free-flowing powd.; 12.5 µ particle size; fineness (Hegman) 7; sp.gr. 0.98; m.p. 141 C; soften. pt. 110 C

**Toxicology:** TSCA listed

**Shamrock S-400 SP5** [Shamrock Tech.]

**Chem. Descrip.:** Synthetic wax

CAS 8002-74-2; EINECS/ELINCS 232-315-6

**Uses:** Reduces coeff. of friction and inc. slip in rigid pkg. coatings with min. effect on gloss; food pkg. adhesives, coatings, paper

**Use Level:** 1-2% based on total formula wt.

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.170, 176.180; USDA approved

**Properties:** Wh. free-flowing powd.; 18 µ particle size; fineness (Hegman) 6+; sp.gr. 0.98; m.p. 141 C; soften. pt. 110 C

**Toxicology:** TSCA listed

**Shamrock S-483** [Shamrock Tech.]

**Chem. Descrip.:** High m.w. polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

**Uses:** Imparts good rub, abrasion, and slip chars. when added to inks and industrial coatings; food pkg. adhesives, coatings, paper, cellophane, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard

**Use Level:** 1-2% (liq. inks), 2-3% (paste inks)

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.180, 176.200, 176.210, 177.1200, 177.1210

**Properties:** Wh. free-flowing powd.; 6.5 µ particle size; sp.gr. 0.95; m.p. 112 C; soften. pt. 92 C

**Toxicology:** TSCA listed

**Shamrock S-Nauba 5021** [Shamrock Tech.]

**Chem. Descrip.:** Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

**Uses:** Wax used in coil coatings, wood lacquers, flexible and rigid pkg., UV clears, inks, cosmetics, candles, lubricants, shoe polishes, leather finishes, car waxes, floor polishes, fruit and candy coatings; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings

**Use Level:** 2% (improved surf. hardness)

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 182.1978; USDA approved

**Properties:** Off-wh. extra fine powd.; 12.5 µ particle size; 100% -400 mesh; sp.gr. 0.995; m.p. 84 C; acid no. 2-10; iodine no. 7-14; sapon. no. 75-85

**Toxicology:** TSCA listed

**Shamrock Taber Tiger 5512** [Shamrock Tech.]

**Chem. Descrip.:** Crystalline grade of polyethylene

CAS 9002-88-4; EINECS/ELINCS 200-815-3

**Uses:** Offers inc. hardness, abrasion resist. and antiblocking chars. for inks, coil coatings, wood lacquers, powd. coatings, flexible and rigid pkg., UV clears, and architectural paints; food pkg. coatings, paper, polymers

**Use Level:** 1-2% based on formula wt.

**Regulatory:** FDA 21CFR §172.888, 175.250, 175.300, 176.170, 176.180, 177.1520; USDA approved

**Properties:** Wh. free-flowing powd.; 18 µ particle size; fineness (Hegman) 6+; sp.gr. 0.98; m.p. 128 C; soften. pt. 120 C

**Toxicology:** TSCA listed

**Shell Sol B HT** [Shell]

**Chem. Descrip.:** Mixt. of predominantly C<sub>6</sub> (hexanes) and about 10% C<sub>7</sub> (heptanes) aliphatic hydrocarbons

**Uses:** Solvent for agric. fat/oil extraction, automotive undercoating, pharmaceuticals, adhesives, inks, paints, paper coating, lighter fluids, resins, plastics, NR, SR (except NBR); fast evaporating; hydrotreating removes unwanted compds., converts unsat. hydrocarbons, results in relatively low odor; lower hexane content than typ. commercial hexanes, thus reducing worker exposure

**Properties:** Colorless liq.; sp.gr. 0.674 (60/60 F); vapor pressure 140 mm Hg (68 F); distillation range 140-183 F; flash pt. < 0 F; KB value 29; VOC 5.53 lb/gal; 27-31% n-hexane

**Shell Tolu-Sol® W HT Solv.** [Shell]

**Chem. Descrip.:** Mixt. of predominantly C<sub>7</sub> and about 20% C<sub>8</sub> aliphatic hydrocarbons, hydrotreated

**Uses:** Solvent for agric., fat/oil extraction, automotive undercoating, polishes, adhesives, inks, paints, paper coatings, petrol. gas absorption, lighter fluids, resins, plastics, rubber; starting component for rubber solvs., lacquer diluents; high solvency; hydrotreating removes unwanted compds. (e.g., sulfur, nitrogen, oxygen), converts unsat. hydrocarbons (olefins, acetylenes, aromatics), results in relatively low odor; no more than trace amts. of HAPs; high cycloparaffin content

**Regulatory:** FDA 21CFR §172.250; SARA nonreportable

**Properties:** Saybolt 30 min color; sp.gr. 0.748 (60/60 F); vapor pressure 41 mm Hg (68 F); i.b.p. 205 F min.; distillation range 209-230 F; flash pt. 20 F; KB value 32 min.; VOC 6.17 lb/gal; 26.6 vol. % paraffins, 74.4 vol. % cycloparaffins

**Shell VM&P Naphtha HT** [Shell]

**Chem. Descrip.:** VM&P naphtha, hydrotreated

CAS 8032-32-4; EINECS/ELINCS 232-453-7

**Uses:** Solvent for agric., oil/fat extraction, polishes, industrial cleaners, adhesives, inks, paints, lighter fluids, pharmaceuticals, paper/textile coatings, petrol. gas absorp., asphalt, resins, plastics, rubber; fast/med.-evaporating, high solvency; hydrotreating removes unwanted compds. (e.g., sulfur, nitrogen, oxygen), converts unsat. hydrocarbons (olefins, acetylenes, aromatics), results in relatively low odor; no more than trace amts. of HAPs

**Regulatory:** SARA §313 nonreportable

**Properties:** Sp.gr. 0.752 (60/60 F); vapor pressure 10 mm Hg (68 F); b.p. 247-282 F; flash pt. 55 F; KB value 35; VOC 6.19 lb/gal; 54 vol. % paraffins, 48 vol. % cycloparaffins

**Sicomin®** [BASF AG]

**Chem. Descrip.:** Chrome yellow and molybdate orange pigments

**Uses:** Pigment for paints and surface coatings, for coloring plastics, for flexographic and gravure inks for pkg. materials, laminated paper coloring

**Sicopur®** [BASF AG]

**Chem. Descrip.:** High purity iron oxides

**Uses:** Pigment for paper refiners

**Silicone Antifoam Agent S 203** [Wacker Silicones]

**Chem. Descrip.:** Silicone compd.

**Uses:** Defoamer in aq. and nonaq. systems, for chem. processing and formulating, agrochems., pharmaceutical and food processing, and petrochems.; food pkg. adhesives; defoamer in food-contact coatings, paper/paperboard; USDA approved for egg washing, cleaning of meat-processing equip., fruit and vegetable washing; easily emulsified into antifoam emulsions for use in aq. systems

**Use Level:** 10 ppm

**Regulatory:** FDA 21CFR §173.340, 175.105, 176.200, 176.210; EPA 40CFR §180.1001(c)(d); USDA approval

**Properties:** Gray opaque compd.; solv.-disp.; visc. 2400 cps; 100% act.

**Storage:** 1 yr storage stability

**Silicone Antifoam Agent S 204** [Wacker Silicones]

**Chem. Descrip.:** Silicone compd.

**Uses:** Defoamer for aq. and nonaq. systems, chem. processing and formulating, cleaners, laundry detergents, food-contact coatings/paper; useful in alkaline aq. systems such as detergents; food pkg. adhesives; superior alkaline resist.

**Use Level:** 10 ppm

- Regulatory:* FDA 21CFR §175.105, 176.200, 176.210  
*Properties:* Gray opaque med.-visc. compd.; solv.-disp.; visc. 4000 cps; 100% act.  
*Storage:* 1 yr storage stability
- Silicone Antifoam Agent S 670** [Wacker Silicones]  
*Chem. Descrip.:* Self-emulsifying silicone polar compd.  
*Uses:* Antifoam in chem. processing and formulating, cleaners, textiles, paper, metalworking fluids, dispersions, paints and coatings; has been rendered self-dispersing with org. components  
*Use Level:* 30 ppm  
*Properties:* Translucent; good dispersibility in water; visc. 130 cps; 100% act.; nonionic  
*Storage:* 1 yr storage life @ R.T.
- Silicone Antifoam Compound S 204** [Wacker Silicones]  
*Chem. Descrip.:* Nonaq. silicone antifoam  
*Uses:* Antifoam for nonaq. systems, petrochem. processing, laundry detergents, cleaners, agrochems., food pkg. adhesives/paper/paperboard; rec. for systems with high surfactant content and/or exposure to high shear stress  
*Use Level:* 0.5-0.005%  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210  
*Properties:* Gray opaque; dens. 8.5 lb/gal; visc. 4000 cP; iodine no. 1; ref. index 1.40; 100% act.  
*Storage:* > 12 mos shelf stability; not subject to freezing
- Silicone Antifoam Emulsion SE 21** [Wacker Silicones]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Antifoam for hot aq. systems and coating applics., chem. processing and formulating, cleaners, agrochems., textiles and paper, paints, dispersions, wastewater treatment, pharmaceutical and food processing; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives; USDA approved for egg washing, cleaning meat-processing equip., fruit/veg. washing, soups, etc.  
*Use Level:* 100 ppm  
*Regulatory:* FDA 21CFR §173.340, 175.105, 176.200, 176.210; EPA 40CFR §180.1001(d); USDA compliance for egg washing, cleaning meat-processing equip., fruit/veg. washing, soups, etc.  
*Properties:* Creamy emulsion; very good dispersibility in water; visc. 1500 cps; 10% act.; anionic  
*Storage:* 6 mos storage life @ R.T.
- Silicone Antifoam Emulsion SE 23** [Wacker Silicones]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Antifoam for hot aq. systems and coating applics., chem. processing and formulating, agrochems., textiles and paper, paints, dispersions, wastewater treatment, pharmaceutical and food processing; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives; USDA approved for egg washing, cleaning meat-processing equip., fruit/veg. washing, printing ink, soups, etc.  
*Use Level:* 30 ppm  
*Regulatory:* FDA 21CFR §173.340, 175.105, 176.200, 176.210; EPA 40CFR §180.1001(d); USDA compliance for egg washing, cleaning meat-processing equip., fruit/veg. washing, printing ink, soups, etc.  
*Properties:* Creamy emulsion; poor dispersibility in water; visc. 5000 cps; 30% act.; anionic  
*Storage:* 6 mos storage life @ R.T.
- Silicone Antifoam Emulsion SE 25** [Wacker Silicones]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Antifoam for chem. processing and formulating, cleaners, agrochems., wastewater treatment, pharmaceutical and food processing; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives; USDA approved for egg washing, cleaning of meat-processing equip., fruit and vegetable washing, soups  
*Use Level:* 30 ppm  
*Regulatory:* FDA 21CFR §173.340, 175.105, 176.200, 176.210; EPA 40CFR §180.1001(d); USDA compliance for egg washing, cleaning meat-processing equip., fruit/veg. washing, soups, etc.  
*Properties:* Creamy emulsion; poor dispersibility in water; visc. 15,000 cps; 30% act.; anionic  
*Storage:* 6 mos storage life @ R.T.
- Silicone Antifoam Emulsion SE 26** [Wacker Silicones]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Antifoam emulsion for chem. processing and formulating, cleaners, paints, coatings, dispersions, laundry detergents; defoamer in food-contact

- paper coatings; food pkg. adhesives; persistent antifoam props. in highly alkaline environments at elevated temps.  
*Use Level:* 30 ppm  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Creamy; good dispersibility in water; visc. 1200 cps; 20% act.; anionic  
*Storage:* 6 mos storage life @ R.T.
- Silicone Antifoam Emulsion SRE** [Wacker Silicones]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Antifoam in chem. processing and formulating, cleaners, textile and paper, paints, coatings, dispersions, wastewater treatment, and petrochemicals; readily disp. in aq. systems and collapses foam rapidly  
*Use Level:* 50 ppm  
*Properties:* Creamy emulsion; very good dispersibility in water; visc. 100 cps; 20% act.; nonionic  
*Storage:* 6 mos. storage life @ R.T.
- Silwet® L-77** [Crompton/Witco]  
*Chem. Descrip.:* Polyalkylene oxide-modified polymethylsiloxane  
CAS 27306-78-1  
*Uses:* Surfactant, flow control agent, leveling agent, antistat, antifog, dispersant, wetting agent, flotation agent, spreading agent for coatings, printing inks, adhesives, agric., automotive, cleaners, mining, paper, pharmaceuticals  
*Use Level:* 0.025-0.25%  
*Regulatory:* SARA reportable  
*Properties:* Pale amber clear liq.; sol. in methanol, IPA, acetone, xylene, methylene chloride; disp. in water; m.w. 600; sp.gr. 1.007; dens. 8.37 lb/gal; visc. 20 cSt; vapor pressure < 1 mm Hg; f.p. 30 F; b.p. 150 F; HLB 5-8; pour pt. 2 C; cloud pt. < 10 C (0.1%); flash pt. (PMCC) 116 C; surf. tens. 20.5 dyne/cm (0.1% aq.); Draves wetting 8 s (0.1%); Ross-Miles foam 33 mm (0.1%, initial); VOC 2.96%; 100% act.; nonionic  
*Toxicology:* Mod. toxic, severe eye and mild skin irritant  
*Environmental:* Highly toxic to fish  
*Precaution:* Corrosive  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, SiO<sub>2</sub>  
NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-720 AP** [Crompton/Witco]  
*Chem. Descrip.:* Dimethicone copolyol  
*Uses:* Surfactant; anticaking agent; slip agent for paper; also for pharmaceutical use, printing inks; antiseize agent in glass food containers  
*Regulatory:* FDA approved as antiseize agent in glass food containers  
*Properties:* Colorless clear liq.; sol. in water, methanol, IPA, acetone, xylene, methylene chloride; m.w. 12,000; sp.gr. 1.036; dens. 8.61 lb/gal; visc. 1100 cSt; HLB 9-12; cloud pt. 42 C (1%); flash pt. (PMCC) 96 C; pour pt. -34 C; surf. tens. 29.3 dyne/cm (0.1% aq.); Draves wetting > 300 s (0.1%); Ross-Miles foam 43 mm (0.1%, initial); VOC 0.68%; 50% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-722** [Crompton/Witco]  
*Chem. Descrip.:* Dimethicone copolyol  
*Uses:* Surfactant, wetting agent, lubricant, antistat, dispersant, emulsifier, flow control agent, leveling agent, slip/mar resist. aid for adhesives, agric., chem. processing, coatings, fibers, household specialties, metal processing, mining, paper, personal care, petrol. processing, pigments, plastics, rubber, printing inks, textiles; low surf. tension  
*Properties:* Colorless clear liq.; sol. in methanol, IPA, acetone, xylene, methylene chloride; water-insol.; m.w. 3000; sp.gr. 0.990; dens. 8.23 lb/gal; visc. 120 cSt; HLB 5-8; pour pt. -54 C; flash pt. (PMCC) 124 C; VOC 2.23%; 100% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7001** [Crompton/Witco]  
*Chem. Descrip.:* Dimethicone copolyol  
*Uses:* Surfactant, dispersant, emulsifier, leveling agent, flow control agent, antifog, lubricant, antiblock, slip agent for adhesives, agric., automotive, coatings, printing inks, textiles, household specialties, cutting fluids, petrol. extraction, paper, personal care prods., plastics and rubber  
*Properties:* Pale yel. clear liq.; sol. in water, methanol, IPA, acetone, xylene, methylene chloride; m.w. 20,000; sp.gr. 1.023; dens. 8.50 lb/gal; visc. 1700 cSt; HLB 9-12; cloud pt. 39 C (1%); flash pt. (PMCC) 97 C; pour pt. -48 C; surf. tens. 30.5 dyne/cm (0.1% aq.); Draves wetting > 300 s (0.25%); Ross-Miles foam 46 mm (0.1%, initial); VOC 0.84%; 75% act.; nonionic

- Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7002** [Crompton/Witco]  
*Chem. Descrip.:* Dimethicone copolyol  
*Uses:* Surfactant, defoamer, flow control agent, leveling agent, slip/mar resist. aid for adhesives, agric., chem. processing, coatings, fibers, household specialties, metal processing, mining, paper, personal care, petrol. processing, pigments, plastics, rubber, printing inks, textiles  
*Properties:* Lt. amber clear liq.; sol. in water, methanol, IPA, acetone, xylene, methylene chloride; m.w. 8000; sp.gr. 1.028; dens. 8.54 lb/gal; visc. 900 cSt; HLB 5-8; pour pt. -40 C; cloud pt. 39 C (1% aq.); flash pt. (PMCC) 88 C; surf. tens. 30.5 dynes/cm (1.1% aq.); Ross-Miles foam 64 mm (0.1%, initial); VOC 1.14%; 100% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7087** [Crompton/Witco]  
 CAS 67762-85-0  
*Uses:* Surfactant, antiblock, gloss aid, flow control agent, leveling agent, lubricant, slip/mar resist. aid for adhesives, agric., chem. processing, coatings, fibers, household specialties, metal processing, mining, paper, personal care, petrol. processing, pigments, plastics, rubber, printing inks, textiles  
*Properties:* Colorless clear liq.; sol. in methanol, acetone, xylene, IPA; partly sol. in water; m.w. 20,000; sp.gr. 1.023; dens. 8.50 lb/gal; visc. 1700 cSt; HLB 9-12; pour pt. -48 C; cloud pt. 39 C (1% aq.); flash pt. (PMCC) 97 C; surf. tens. 28.2 dynes/cm (0.1% aq.); VOC 0.84%; 75% act.  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7200** [Crompton/Witco]  
*Chem. Descrip.:* Silicone glycol copolymer  
 CAS 68937-55-3  
*Uses:* Flow control agent, wetting agent, slip agent, dispersant, gloss aid, emulsifier for industrial coatings, household and institutional prods., textiles, inks; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210  
*Properties:* Colorless clear liq.; sol. in water, methanol, IPA, acetone, xylene, methylene chloride; m.w. 19,000; sp.gr. 1.064; dens. 8.84 lb/gal; visc. 2500 cSt; HLB 13-17; pour pt. 4 C; cloud pt. 77 C (1% aq.); flash pt. (PMCC) 110 C; surf. tens. 34.2 dynes/cm (1.1% aq.); Ross-Miles foam 78 mm (0.1%, initial); VOC 0.95%; 100% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7210** [Crompton/Witco]  
*Chem. Descrip.:* Silicone glycol copolymer  
 CAS 68937-55-3  
*Uses:* Antifoam, flow control agent, leveling agent, wetting agent, slip agent, dispersant, gloss aid, emulsifier for industrial coatings, household and institutional prods., textiles, inks; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210  
*Properties:* Colorless clear liq.; sol. in methanol, IPA, acetone, xylene, methylene chloride; partly sol. in water; m.w. 13,000; sp.gr. 1.020; dens. 8.47 lb/gal; visc. 1000 cSt; HLB 5-8; pour pt. -32 C; cloud pt. 25 C (1% aq.); flash pt. (PMCC) 96 C; surf. tens. 30.3 dynes/cm (1.1% aq.); Ross-Miles foam 18 mm (0.1%, initial); VOC 0.85%; 100% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7220** [Crompton/Witco]  
*Chem. Descrip.:* Silicone glycol copolymer  
 CAS 68937-55-3  
*Uses:* Surfactant, antifoam, antiblock, gloss aid, flow control agent, leveling agent for adhesives, agric., chem. processing, coatings, fibers, household specialties, metal processing, mining, paper, personal care, petrol. processing, pigments, plastics, rubber, printing inks, textiles; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210  
*Properties:* Colorless clear liq.; sol. in water, methanol, acetone, xylene, IPA; m.w. 17,000; sp.gr. 1.017; dens. 8.45 lb/gal; visc. 1100 cSt; HLB 5-8; pour pt. -18 C; cloud pt. < 25 C (1% aq.); flash pt. (PMCC) 143 C; surf. tens. 26.8 dynes/cm (0.1% aq.); VOC 0.69%; 100% act.  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7230** [Crompton/Witco]  
*Chem. Descrip.:* Silicone glycol copolymer  
 CAS 68937-55-3  
*Uses:* Flow control agent, leveling agent, wetting agent, slip agent, dispersant, gloss aid, emulsifier for industrial coatings, household and institutional prods., textiles, inks; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210

- Properties:* Pale yel. clear liq.; sol. in water, methanol, IPA, acetone, xylene, methylene chloride; m.w. 29,000; sp.gr. 1.033; dens. 8.59 lb/gal; visc. 4000 cSt; HLB 9-12; pour pt. -32 C; cloud pt. 40 C (1% aq.); flash pt. (PMCC) 135 C; surf. tens. 32.4 dynes/cm (1.1% aq.); Ross-Miles foam 80 mm (0.1%, initial); VOC 1.30%; 100% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7500** [Crompton/Witco]  
*Chem. Descrip.:* Dimethicone copolyol  
*Uses:* Surfactant, antifoam, dispersant, emulsifier, leveling agent, flow control agent, lubricant, slip agent for adhesives, automotive, chemical processing, coatings, petrol. extraction, paper, personal care prods., plastics and rubber, pharmaceutical, textile applics.  
*Properties:* Lt. yel. clear liq.; sol. in methanol, IPA, acetone, xylene, hexanes, methylene chloride; insol. in water; m.w. 3000; sp.gr. 0.982; dens. 8.16 lb/gal; visc. 140 cSt; HLB 5-8; pour pt. -43 C; flash pt. (PMCC) 121 C; VOC 1.13%; 100% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7608** [Crompton/Witco]  
*Chem. Descrip.:* Silicone glycol copolymer  
 CAS 67674-67-3  
*Uses:* Surfactant, gloss aid, flow control agent, leveling agent, lubricant, slip agent for adhesives, agric., chem. processing, coatings, fibers, household specialties, metal processing, mining, paper, personal care, petrol. processing, pigments, plastics, rubber, printing inks, textiles  
*Properties:* Colorless clear liq.; sol. in methanol, acetone, xylene, IPA; disp. in water; m.w. 600; sp.gr. 1.020; dens. 8.48 lb/gal; visc. 35 cSt; HLB 5-8; pour pt. -18 C; cloud pt. < 10 C (0.1%); flash pt. (PMCC) 118 C; surf. tens. 21.5 dynes/cm (0.1% aq.); Ross-Miles foam 71 mm (0.1%, initial); VOC 1.19%; 100% act.  
*Storage:* Store at R.T. in tightly sealed containers
- Silwet® L-7657** [Crompton/Witco]  
*Chem. Descrip.:* Polysiloxane polyether copolymer  
 CAS 68937-54-2  
*Uses:* Surfactant, lubricant for waterborne systems, adhesives, agric., chem. processing, coatings, fibers, household specialties, metal processing, mining, paper, personal care, petrol. processing, pigments, plastics, rubber, printing inks, textiles  
*Properties:* Colorless clear liq.; sol. in water, methanol, acetone, xylene, IPA; m.w. 5000; sp.gr. 1.090; dens. 9.06 lb/gal; visc. 600 cSt; HLB 13-17; pour pt. -18 C; cloud pt. 89 C (1% aq.); flash pt. (PMCC) 129 C; surf. tens. 31.5 dynes/cm (0.1% aq.); Ross-Miles foam 75 mm (0.1%, initial); VOC 0.80%; 100% act.; nonionic  
*Storage:* Store at R.T. in tightly sealed containers
- Sintrex EHR** [NOF]  
*Chem. Descrip.:* Sodium 2-ethylhexyl sulfate  
 CAS 126-92-1; EINECS/ELINCS 204-812-8  
*Uses:* Emulsifier for resin industry; textile scouring agent; dispersant for pulp/paper industry; shampoo; molding additive for ceramic industry  
*Properties:* Transparent liq.; anionic
- Sipernat® 22** [Degussa-Hüls]  
*Chem. Descrip.:* Syn. amorphous precipitated silica  
 CAS 112926-00-8; EINECS/ELINCS 231-545-4  
*Uses:* Adsorbent, anticaking agent, and flow control agent for adhesives, sealants, detergents, foods (table salt, powd. sweetener), plastics, cosmetics industries; used as aid to convert liqs. into powds.; processing aid; food pkg. adhesives, coatings, cellophane, rubber articles; defoamer in food-contact coatings, paper/paperboard; hydrophilic  
*Use Level:* 0.1-0.5% (table salt), 0.5% (powd. sweetener)  
*Regulatory:* FDA 21CFR §73.1, 133.146, 160.105, 160.185, 172.230, 172.340, 172.480, 173.340, 175.105, 175.300, 176.200, 176.210, 177.1200, 177.2420, 177.2600, 178.321, 182.90, 573.940(b)(c)  
*Properties:* Wh. fluffy powd., 18 nm avg. particle size; dens. 270 g/l (tapped); surf. area 190 m<sup>2</sup>/g; pH 6.3 (5% aq. susp.); 98% assay
- Sipernat® 22LS** [Degussa-Hüls]  
*Chem. Descrip.:* Precipitated silica  
*Chem. Analysis:* SiO<sub>2</sub> (98%), moisture (5%)  
 CAS 1343-98-2; EINECS/ELINCS 215-683-2  
*Uses:* Thickener for cosmetics, pharmaceuticals, elec., insulation, paper, film, pesticides, plastics industries; carrier, grinding aid, suspending aid, free-flow agent in pesticides; thickener and thixotrope in filled polyester gel coats, laminating resins; antiblock in PE and PP blown films  
*Regulatory:* FDA approved

- Properties:* 3.5  $\mu$  avg. particle size; dens. 80 g/l (tapped); BET surf. area 190 m<sup>2</sup>/g; pH 6.2
- Sipernat® 22S** [Degussa-Hüls]  
*Chem. Descrip.:* Precipitated silica  
 CAS 1343-98-2; EINECS/ELINCS 215-683-2  
*Uses:* Flow control agent, anticaking agent for powd. detergents, TPEs, sealants, foodstuffs (spices, guar gum, dried soup, powd. cheese), pharmaceuticals, fire extinguishers; converts liqs. to powds., e.g., PVC stabilizers; food pkg. adhesives, coatings, cellophane, rubber articles; defoamer in food-contact coatings, paper/paperboard; hydrophilic  
*Use Level:* 0.25-2%; 0.1-2% (spices), 1% (guar gum, powd. cheese), 1-2% (soup)  
*Regulatory:* FDA 21CFR §73.1, 133.146, 160.105, 160.185, 172.230, 172.340, 172.480, 173.340, 175.105, 175.300, 176.200, 176.210, 177.1200, 177.2420, 177.2600, 178.321, 182.90, 573.940(b)(c)  
*Properties:* Wh. loose powd.; 18 nm avg. particle size; dens. 120 g/l (tapped); surf. area 190 m<sup>2</sup>/g; pH 6.3 (5% aq. susp.); 98% assay
- Sipernat® 50** [Degussa-Hüls]  
*Chem. Descrip.:* Precipitated silica  
 CAS 1343-98-2; EINECS/ELINCS 215-683-2  
*Uses:* Carrier, flow control agent, anticaking agent for cosmetics, detergents, food industries (spices, high fat seasoning, cake mixes); food pkg. adhesives, coatings, cellophane, rubber articles; defoamer in food-contact coatings, paper/paperboard  
*Use Level:* 0.25-2%; 0.1-2% (spices), 1% (high fat seasoning), 1.5% (cake mixes)  
*Regulatory:* FDA 21CFR §73.1, 133.146, 160.105, 160.185, 172.230, 172.340, 172.480, 173.340, 175.105, 175.300, 176.200, 176.210, 177.1200, 177.2420, 177.2600, 178.321, 182.90, 573.940(b)(c)  
*Properties:* Loose wh. powd.; pH 6.0-7.4 (5%); 7% max. moisture  
*Toxicology:* Inhalation may cause respiratory tract irritation
- Sipernat® 50S** [Degussa-Hüls]  
*Chem. Descrip.:* Syn. amorphous precipitated silica  
 CAS 112926-00-8; EINECS/ELINCS 231-545-4  
*Uses:* Flow control agent, anticaking agent, and defoamer for food use (cocoa powd., dried soup, cake mix); food pkg. adhesives, coatings, paper, cellophane, rubber, etc.; defoamer in food-contact coatings, paper/paperboard; for prevention of plate out in PVC calendered films; anticaking agent for pre-expanded PS foam gran.; improves storability of phenolic and melamine resins  
*Use Level:* 0.25-2%; 0.5-2% (cocoa powd.), 0.5% (dried soup), 1.5% (cake mix)  
*Regulatory:* FDA 21CFR §73.1, 133.146, 160.105, 160.185, 172.230, 172.340, 172.480, 173.340, 175.105, 175.300, 176.200, 176.210, 177.1200, 177.2420, 177.2600, 178.321, 182.90, 573.940(b)(c)  
*Properties:* Wh. loose powd.; 7  $\mu$  avg. agglomerate size; tapped dens. 100 g/l; surf. area 480 m<sup>2</sup>/g; pH 6.7 (5%); 99% SiO<sub>2</sub>, 5% moisture  
*Toxicology:* Inhalation may cause respiratory tract irritation
- Sipernat® 300DS** [Degussa-Hüls]  
*Chem. Descrip.:* Precipitated silica  
*Chem. Analysis:* SiO<sub>2</sub> (98%), Al<sub>2</sub>O<sub>3</sub> (0.2%)  
 CAS 1343-98-2; EINECS/ELINCS 215-683-2  
*Uses:* Filler for plastics, paper and film industry; hydrophilic  
*Properties:* Powd.; 10 nm avg. particle size; dens. 90 g/l (tapped); DBP absorp. 260%; surf. area 300 m<sup>2</sup>/g; pH 6.5 (5% aq. susp.)
- Sipernat® 310** [Degussa-Hüls]  
*Chem. Descrip.:* Precipitated silica  
*Chem. Analysis:* SiO<sub>2</sub> (>97%), Na<sub>2</sub>SO<sub>4</sub> (< 3%)  
 CAS 1343-98-2; EINECS/ELINCS 215-683-2  
*Uses:* Filler for antiblocking of LDPE, PP, and flattening of PP tapes, and for paper applics.  
*Properties:* Powd.; 8 nm avg. particle size; dens. 130 g/l (tapped); DBP absorp. 210%; surf. area 650 m<sup>2</sup>/g; pH 7 (5% aq. susp.); 99% assay
- Sipernat® 320DS** [Degussa-Hüls]  
*Chem. Descrip.:* Precipitated silica  
 CAS 1343-98-2; EINECS/ELINCS 215-683-2  
*Uses:* Filler for plastics, silicone rubber, paper, and film industry applics.  
*Properties:* Wh. fluffy powd.; 18 nm avg. particle size; dens.  $\approx$  80 g/l; surf. area 170 m<sup>2</sup>/g; pH 6.3 (5% aq. susp.); 98% assay
- Sipernat® 500LS** [Degussa-Hüls]  
*Chem. Descrip.:* Amorphous precipitated silica  
*Chem. Analysis:* SiO<sub>2</sub> (99%), moisture (3%)
- CAS 112926-00-8; EINECS/ELINCS 231-545-4  
*Uses:* Thickener for cosmetic creams and lotions; prevents ink migration in paper coatings; also in thermal insulation, films, pharmaceuticals; carrier, grinding aid, suspending aid, free-flow agent for pesticides; prevents plate out in PVC calendered films; silicon wafer polishing agent  
*Regulatory:* FDA approved  
*Properties:* Powd.; 3.5  $\mu$  avg. particle size; dens 80 g/l (tapped); BET surf. area 475 m<sup>2</sup>/g; pH 6.3 (5% aq. susp.)
- Sipol LAL-7** [Specialty Industrial Prods.]  
*Chem. Descrip.:* C<sub>12</sub>-C<sub>14</sub> primary alcohol (7 EO)  
 CAS 68439-50-9  
*Uses:* Emulsifier, detergent used in household and I&I cleaners/detergents, textile finishing, paper processing, and agric. adjuvants  
*Properties:* Liq.; sol. in isopropanol and water; HLB 12.2; hyd. no. 104-112; nonionic
- Sipol NP-10** [Specialty Industrial Prods.]  
*Chem. Descrip.:* Nonylphenol (10 EO)  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* Detergent, wetting agent, emulsifier used in detergent compounding, textile, leather, pulp/paper processing, acid cleaners, corrosion inhibitors, emulsion and soak tank cleaners; for indirect food contact; agric. inert  
*Regulatory:* FDA 21CFR §178.3400 compliant; approved as agric. inert  
*Properties:* Liq.; sol. in water, toluene, and perchloroethylene; insol. in min. oil, min. spirits; HLB 13.2; cloud pt. 60-65 C; nonionic
- Sipomer® COPS 1** [Rhodia HPCII]  
*Chem. Descrip.:* Sodium allyloxy hydroxypropyl sulfonate aq. sol'n.  
*Uses:* Surfactant, stabilizer for emulsion polymerization; latex stabilizer; reduces latex foaming; provides improved film props. for paints, adhesives, paper and textile coatings; copolymerizable; provides latex stability at low surfactant levels  
*Properties:* APHA 100 clear liq.; m.w. 218; sp.gr. 1.17; dens. 9.75 lb/gal; visc. 10 cps; f.p. -12 C; b.p. 100 C (760 mm); flash pt. > 100 C; pH 6-9 (10%); 39-42% act.; anionic
- Sipomer® SEM 25** [Rhodia HPCII]  
*Chem. Descrip.:* 58-62% Polyethoxy methacrylate, 18-22% methacrylic acid, 18-22% water, 150-250 ppm MEHQ  
*Uses:* Monomer for use in alkali-sol. associative thickeners used in architectural coatings, paper formulations, personal care formulations, adhesives, grouts and cements  
*Properties:* Pale yel. clear liq.; completely sol. in water; sp.gr. > 1; visc. 150-175 cps; f.p. < -30 C; flash pt. > 210 C; pH 4.3-4.4; 40% volatile
- Sipophos DA-6P** [Specialty Industrial Prods.]  
*Chem. Descrip.:* Isodecyl alcohol phosphate ester (6 EO)  
*Uses:* Emulsifier in textile wetting or scouring applics.; penetrant, coupling agent used in alkaline detergents and pulp/paper formulations  
*Properties:* Liq.; 99% act.
- SizeXcel® 1790** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Low m.w., high charge dens. polymer  
*Uses:* Resin used to manage cationic demand wherever anionics are present in thin or thick paper stock systems, acid or alkaline papers; can aid greater use of CaCO<sub>3</sub> contg. broke  
*Properties:* Yel. to amber liq.; visc. 100 cps; pH 7; 50% NV; cationic
- SizeXcel® 1799** [Georgia-Pacific Resins]  
*Chem. Descrip.:* High m.w., high charge dens. polymer  
*Uses:* Resin used to manage cationic demand wherever anionics are present in thin or thick paper stock systems; rec. for use at high temps. or high conductivities; can aid greater use of CaCO<sub>3</sub> contg. broke  
*Properties:* Yel. to amber liq.; visc. 5000 cps; pH 6; 50% NV; cationic
- Slimex®** [Hercules]  
*Uses:* Antimicrobial and slimeicide for slime control in whitewater and preservation of pulps
- Slip-Ayd® SL 555** [Elementis Spec. Colorants/Addit.]  
*Chem. Descrip.:* Polyolefin/carnauba blend  
*Uses:* Wax additive for solv.-free systems incl. UV, EB, two-component catalyzed and powd. coatings; food pkg. adhesives/coatings/paper, in water-borne or solvent-borne coatings; defoamer in food-contact coatings  
*Use Level:* 0.1-0.5%  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200  
*Properties:* 6  $\mu$  particle size; sp.gr. 0.97; soften. pt. 82-86 C
- SM 1124XD** [Process Chems. LLC]  
*Uses:* Defoamer, drainage aid for kraft pulp/paper applics., for use in brownstock

washing, screen room, and bleach plant operations, on the paper machine, and in the effluent; water-based; does not contain EBS, min. oil, or dioxin precursors; does not contribute to deposit formation; suitable whether batch or continuous pulp is employed

*Properties:* Opaque wh. liq.; dens. 8.0-8.6 lb/gal; visc. 500-1150 cps

*Toxicology:* TSCA listed

*Storage:* Store in dry area

#### SM 2128 [GE Silicones]

*Chem. Descrip.:* Silicone aq. emulsion based on SF 18 (350)

*Uses:* Release agent for mech. rubber goods (automobile floor mats, shock mounts, fan belts, o-rings, footwear, floor tile), plastics, paper prods., indirect food contact, food handling (latex gloves), disposable food pkg.; latex dip additive

*Use Level:* 0.2-2.5% silicone (rubber release)

*Regulatory:* FDA compliance; SARA §302/311/312/313 nonreportable

*Properties:* Wh. liq.; odorless; sol. in water; sp. gr. 1; dens. 8.2 lb/gal; visc. 350 cst; f.p. 0 C; b.p. 100 C; flash pt. 215.5 C; pH ≈ 5-9; 37-41% total solids, 35% silicone; nonionic

*Toxicology:* May be harmful if swallowed; may cause mild skin irritation; may irritate eyes; not a primary eye or skin irritant; not a skin sensitizer

*Hazardous Decomp. Prods.:* (thermal): SiO<sub>2</sub>, formaldehyde

HMS: Health 0; Flammability 0; Reactivity 0

*Storage:* 12 mos storage stability

#### SMA® 1000 [Atofina; Atofina SA]

*Chem. Descrip.:* 1:1 Styrene/maleic anhydride copolymer

CAS 9011-13-6

*Uses:* Soil release agent in rug shampoos; paper sizing and coatings; commercial laundries; emulsion polymerization; oven cleaners; leveling agent for floor polishes; pigment dispersant in paints, inks, plastics; polymer additives; coatings for metals and plastics; powd. coatings; temporary coatings; aq. grinding fluids

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.1200, 177.1210, 177.1400, 182.99

*Properties:* Gardner 1-2 powd.; visc. 28 cP (20% sol'n., 30 C); m.p. 150-170 C; acid no. 465-495; 99% act.; anionic

#### SMA® 2000 [Atofina; Atofina SA]

*Chem. Descrip.:* Styrene/maleic anhydride copolymer

CAS 9011-13-6

*Uses:* Soil release agent in rug shampoos; paper sizing and coatings; commercial laundries; emulsion polymerization; oven cleaners; leveling agent for floor polishes; pigment dispersant in paints, inks, plastics; polymer additives; coatings for metals and plastics; powd. coatings; temporary coatings

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.1200, 177.1210, 177.1400, 182.99

*Properties:* Gardner 1-2 powd.; visc. 136 cP (20% sol'n., 30 C); m.p. 140-160 C; acid no. 335-375; 99% act.; anionic

#### SMA® 3000 [Atofina; Atofina SA]

*Chem. Descrip.:* Styrene/maleic anhydride copolymer

CAS 9011-13-6

*Uses:* Soil release agent in rug shampoos; paper sizing and coatings; commercial laundries; emulsion polymerization; oven cleaners; leveling agent for floor polishes; pigment dispersant in paints, inks, plastics; polymer additives; coatings for metals and plastics; powd. coatings; temporary coatings

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.1200, 177.1210, 177.1400, 182.99

*Properties:* Gardner 1 max. powd.; visc. gels; m.p. 115-130 C; acid no. 265-305; 99% act.; anionic

#### SNAP 2042 [Reichhold]

*Chem. Descrip.:* Styrene/butadiene/acrylonitrile latex

CAS 9003-56-9

*Uses:* Binder, dry str. agent, and gloss aid for all synthetically bound paper coatings, web and sheetfed offset papers, roto applics.; outstanding ink gloss; improved press performance; maintains high water absorbency

#### SNAP 2048 [Reichhold]

*Chem. Descrip.:* Styrene/butadiene/acrylonitrile latex

CAS 9003-56-9

*Uses:* Binder, dry str. agent and gloss aid for all synthetically bound paper coatings, web and sheetfed offset papers, roto applics.; outstanding ink gloss; improved press performance; maintains high water absorbency

#### SNAP 2054 [Reichhold]

*Chem. Descrip.:* Styrene/butadiene/acrylonitrile latex

CAS 9003-56-9

*Uses:* Binder, gloss aid for highly syn. binder systems typ. of LWC paper formulations, for web offset to roto applics.; outstanding ink gloss; maintains high water absorbency and porosity

#### Snowcal 75E (Export) [Omya Croxton+Garry]

*Chem. Descrip.:* Whiting

*Chem. Analysis:* CaCO<sub>3</sub> (97.8 ± 0.25%), moisture (0.1%)

CAS 471-34-1

*Uses:* Filler for paper

*Properties:* Superfine; nat. color; 0.005% on 45 µm sieve; 99 ± 1% finer than 10 µm, 45% finer than 2 µm; sp. gr. 2.7; TAPPI brightness 85.6 ± 0.6

#### Snowtex 20L [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Opalescent; 40-50 nm avg. particle diam.; sp. gr. 1.12-1.14 (20 C); visc. ≤ 3 mPa·s; pH 9.5-10; 20-21% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust); inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

#### Snowtex 40 [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Clear to opalescent; 10-20 nm avg. particle diam.; sp. gr. 1.28-1.35 (20 C); visc. ≤ 25 mPa·s; pH 9.0-10.5; 40% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust); inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

#### Snowtex 50 [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Clear to opalescent; 20-30 nm avg. particle diam.; sp. gr. 1.36-1.40 (20 C); visc. 5-50 mPa·s; pH 8.5-9.5; 47-49% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust);

inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

**Snowtex C** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica, stabilized  
EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Clear to opalescent; 10-20 nm avg. particle diam.; sp.gr. 1.12-1.14 (20 C); visc.  $\leq$  10 mPa·s; pH 8.5-9.0; 20-21% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust); inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

**Snowtex N** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica, stabilized with ammonia

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Clear to opalescent; 10-20 nm avg. particle diam.; sp.gr. 1.12-1.14 (20 C); visc.  $\leq$  6 mPa·s; pH 9-10; 20-21% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust); inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

**Snowtex O** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Clear to opalescent; 10-20 nm avg. particle diam.; sp.gr. 1.12-1.14 (20 C); visc.  $\leq$  3 mPa·s; pH 2-4; 20-21% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust); inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

**Snowtex OL** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

**Snowtex PS-L** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Surf. treatment agent for fiber, paper, plastics, adhesives; binder for catalysts, ceramics, inorg. and glass fibers

*Properties:* Wh. transparent milky solid; 35-40 nm particle size; sp.gr. 1.24-1.26; visc.  $<$  150 mPa·s; f.p. 0 C; pH 9-10.5; 35-36% SiO<sub>2</sub>;  $<$  0.20% Na<sub>2</sub>O

**Snowtex PS-M** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Surf. treatment agent for fiber, paper, plastics, adhesives; binder for catalysts, ceramics, inorg. and glass fibers

*Properties:* Wh. transparent milky solid; 18-23 nm particle size; sp.gr. 1.12-1.14; visc.  $<$  150 mPa·s; f.p. 0 C; pH 9-10.5; 20-21% SiO<sub>2</sub>;  $<$  0.20% Na<sub>2</sub>O

**Snowtex S** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting; metal surf. treatment; paint vehicle; catalyst binder; paper treatment; binder for inorganic film; features exc. heat resist., antistatic props., transparency, gelation, large surf. area

*Properties:* 7-9 nm particle size; visc. 1-7 cp; pH 9.0-10.5; 30% SiO<sub>2</sub> in water

**Snowtex ST-20L** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 40-50 nm particle size; visc. 1-3 cps; pH 9.5-11; 20% SiO<sub>2</sub>; 80% water

**Snowtex ST-40** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 11-14 nm particle size; visc. 5-25 cps; pH 9-10.5; 40% SiO<sub>2</sub>; 60% water

**Snowtex ST-50** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 20-30 nm particle size; visc. 5-50 cps; pH 8.5-9.5; 48% SiO<sub>2</sub>; 52% water

**Snowtex ST-C** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica  
EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 11-14 nm particle size; visc. 1-10 cps; pH 8.5-9.5; 20% SiO<sub>2</sub>; 80% water

**Snowtex ST-N** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 11-14 nm particle size; visc. 1-6 cps; pH 9-10; 20% SiO<sub>2</sub>; 80% water

**Snowtex ST-O** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder for inorg. film, inorg. fibrous shapes of ceramic and glass fiber, and for treatment of steel; antistat; catalyst binder; textile treatment; painting vehicle; paper treatment

*Properties:* Transparent; 11-14 nm particle size; visc. 1-3 cps; pH 2-4; 20% SiO<sub>2</sub>; 80% water

**Snowtex ST-O-30** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Antistat; catalyst binder; binder for inorg. film; textile treatment; painting vehicle; metal surf. treatment; paper treatment; superior stability; exc. heat resist., gelation; lg. surf. area; exc. frictionizing

*Properties:* Transparent; 12 nm particle size; visc. 3 mPa·s; pH 2-4; 30% SiO<sub>2</sub>; 70% water

**Snowtex ST-O-40** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Antistat; catalyst binder; binder for inorg. film; textile treatment; painting vehicle; metal surf. treatment; paper treatment; superior stability; exc. heat resist., gelation; lg. surf. area; exc. frictionizing

*Properties:* Opalescent; 22 nm particle size; visc. 5 mPa·s; pH 2-4; 40% SiO<sub>2</sub>; 60% water

**Snowtex ST-OL** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 40-50 nm particle size; visc. 1-3 cps; pH 2-4; 20% SiO<sub>2</sub>; 80% water

**Snowtex ST-OL-40** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Antistat; catalyst binder; binder for inorg. film; textile treatment; painting vehicle; metal surf. treatment; paper treatment; superior stability; exc. heat resist., gelation; lg. surf. area; exc. frictionizing

*Properties:* Milky wh.; 45 nm particle size; visc. 3 mPa·s; pH 2-4; 40% SiO<sub>2</sub>; 60% water

**Snowtex ST-OS** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Antistat; catalyst binder; binder for inorg. film; textile treatment; painting vehicle; metal surf. treatment; paper treatment; superior stability; exc. heat resist., gelation; lg. surf. area; exc. frictionizing

*Properties:* Transparent; 9 nm particle size; visc. 2 mPa·s; pH 2-4; 20% SiO<sub>2</sub>; 80% water

**Snowtex ST-S** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 7-9 nm particle size; visc. 1-7 cps; pH 9-10.5; 30% SiO<sub>2</sub>; 70% water

**Snowtex ST-UP** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control agent, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; food pkg.; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; good film-forming props.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210,

177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Clear to opalescent; elongated, 5-20 nm width, 40-300 nm length; sp.gr. 1.12-1.14 (20 C); visc. 5-100 mPa·s; pH 9-10; 20-21% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust); inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

**Snowtex ST-XS** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting, inorg. film, catalysts; antistat; metal surf. treatment; textile and paper treatment; paint vehicle

*Properties:* 4-6 nm particle size; visc. 1-7 cps; pH 9-10; 20% SiO<sub>2</sub>; 80% water

**Snowtex ST-ZL** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder, antistat, slip control, gellant for textile and paper treatment; antisticking aid in cellophane film; binder in catalysts, inorg. film, ceramic fiber, precision casting, insulating materials; refractory material; glass fibers; vehicle for paints and adhesives for fabric and paper; improves adhesion, durability, abrasion resist. in coatings; antislip in floor waxes; in polishes for silicon semiconductor wafers; metal surf. treatment; batteries; food pkg. applics.

*Regulatory:* FDA 21CFR §172.230, 172.480, 175.105, 175.300, 175.320, 175.350, 175.380, 175.390, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.1520, 177.2420, 177.2600, 178.3120, 182.90, 182.99, 573.940

*Properties:* Opalescent; 70-100 nm avg. particle diam.; sp.gr. 1.29-1.32 (20 C); visc. ≤ 5 mPa·s; pH 9-10; 40-41% SiO<sub>2</sub>

*Toxicology:* May irritate eyes; prolonged skin contact may cause irritation; OSHA (amorphous silica): PEL-TWA 20 mppcf, 0.8 mg/m<sup>3</sup> (total dust); inhaled dust or mist may cause pneumoconiosis and silicosis; noncarcinogenic

*Storage:* Store in tightly closed containers at R.T.; avoid direct exposure to sunlight

**Snowtex XS** [Nissan Chem. Ind.]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Binder for precision casting; metal surf. treatment; paint vehicle; catalyst binder; paper treatment; binder for inorganic film; features exc. heat resist., antistatic props., transparency, gelation, large surf. area

*Properties:* 4-6 nm particle size; visc. 1-7 cp; pH 9.0-10.0; 20% SiO<sub>2</sub> in water

**Sodium MBT** [Flexsys]

*Chem. Descrip.:* Sodium mercaptobenzothiazole sol'n.

CAS 2492-26-4

*Uses:* Chem. intermediate; corrosion inhibitor in aq. systems, antifreezes, hydraulic fluids, coolants, air conditioning/refrigeration systems; collector in extraction of metals from sulfite or oxide compds. in froth flotation; water treatment agent; biocide; bactericide; fungicide; food pkg. adhesives; resinous/polymeric food-contact coatings; defoamer in paper coatings, food-contact paper; slimicide in food-contact paper; food-contact textiles, glue

*Regulatory:* FDA 21 CFR §175.105, 176.200, 176.210, 176.300, 177.2800, 178.3120; BfVV XXI compliant

*Properties:* Amber to brn. liq.; sp.gr. 1.25-1.28; 49.5-51% conc.

*Storage:* Store above 0 C in well-ventilated area; avoid direct sunlight, excessive exposure to air

**Sodium Alginate HV NF/FCC** [Frutarom Meer]

*Chem. Descrip.:* Sodium alginate NF/FCC

CAS 9005-38-3

*Uses:* Emulsifier, stabilizer, suspending agent for ice cream, sherbets, soft drinks, bakery jellies, prevention of freezer burn; freeze/thaw stabilizer for lemon pie fillings; textile print paste thickener; paper sizing agent; food-grade

**Sodium Alginate LV** [Frutarom Meer]

*Chem. Descrip.:* Sodium alginate

CAS 9005-38-3

*Uses:* Emulsifier, stabilizer, suspending agent for ice cream, sherbets, soft

- drinks, bakery jellies, prevention of freezer burn; freeze/thaw stabilizer for lemon pie fillings; textile print paste thickener; paper sizing agent; food-grade  
*Properties:* Water-sol.
- Sodium Alginate LVC** [Frutarom Meer]  
*Chem. Descrip.:* Sodium alginate  
 CAS 9005-38-3  
*Uses:* Emulsifier for ice cream, sherbets, water ices; suspending agent in soft drinks; freeze/thaw stabilizer in lemon pie fillings; prevents freezer burn; gellant in puddings, fabrication of sausage casings; thickener in whipped cream, jellies, jams, meringue, fillings, sauces, cheese, candies, cake, syrups, bakery jellies; textile print paste thickener; paper sizing agent  
*Use Level:* 0.4-1.0%  
*Properties:* Off-wh. to tan free-flowing powd.; ≥ 98% thru 30 mesh; visc. ≥ 50 cps (1%); pH 5.5-8.0
- Sodium Alginate MV NF/FCC** [Frutarom Meer]  
*Chem. Descrip.:* Sodium alginate NF/FCC  
 CAS 9005-38-3  
*Uses:* Emulsifier, stabilizer, suspending agent for ice cream, sherbets, soft drinks, bakery jellies, prevention of freezer burn; freeze/thaw stabilizer for lemon pie fillings; textile print paste thickener; paper sizing agent; food grade  
*Properties:* Water-sol.
- Sodium Chlorite Sol'n. 50, Tech.** [Vulcan Perf. Chems.]  
*Chem. Descrip.:* Sodium chlorite  
 CAS 7758-19-2; EINECS/ELINCS 231-836-6  
*Uses:* Bacterial slimicide in paper mill systems; algicide in cooling towers; used in the electronics industry; as intermediate to generate sodium chloride, an oxidizing agent  
*Properties:* Wh. slightly cloudy liq.; dens. 11.7 lb/gal (35 C); cryst. pt. 25 C; 37% min. sodium chlorite
- Sodium Chlorite, Tech.** [Vulcan Perf. Chems.]  
*Chem. Descrip.:* Sodium chlorite  
 CAS 7758-19-2; EINECS/ELINCS 231-836-6  
*Uses:* Bacterial slimicide in paper mill systems; algicide in cooling towers; used in the electronics industry; as intermediate to generate sodium chloride, an oxidizing agent  
*Properties:* Wh. flakes; dens. 53 lb/ft<sup>3</sup> (loose); 69 lb/ft<sup>3</sup> (packed); 79% min. sodium chlorite
- Solan E** [Croda Oleochems.]  
*Chem. Descrip.:* PEG-75 lanolin  
 CAS 61790-81-6  
*Uses:* Emollient; superfatting agent for bar/liq. soaps, nail varnish removers; conditioner; superfatting agent, solubilizer for aq./aq.-alcoholic systems; solubilizer for perfumes; softener for paper tissues, cosmetic sponges; detergent cleansers; nongreasy vehicle in pharmaceuticals; plasticizer for hair sprays, mousses, and gels  
*Properties:* Yel./brn. solid; mild odor; water-sol.; drop pt. 45-50 C; HLB 16.2; acid no. 2 max.; iodine no. 4-8; sapon. no. 15-24; 100% conc.; nonionic
- Solan X** [Croda Oleochems.]  
*Chem. Descrip.:* PEG-150 lanolin  
 CAS 61790-81-6  
*Uses:* Emollient; superfatting agent for bar/liq. soaps, nail varnish removers; conditioner; superfatting agent, solubilizer for aq./aq.-alcoholic systems; solubilizer for perfumes; softener for paper tissues, cosmetic sponges; detergent cleansers; nongreasy vehicle in pharmaceuticals; plasticizer for hair sprays, mousses, and gels  
*Properties:* Yel. wax.; mild odor; water-sol.; drop pt. 52-54 C; acid no. 2 max.; sapon. no. 8.5-11.0
- Sol-Aqua-Fast®** [Crompton & Knowles]  
*Uses:* Direct dyes for fine papers, tissue grades, toweling, paperboard, and cover stocks
- Solar®** [BASF]  
*Uses:* Pigment dispersions for tinting wood-free papers and coatings, as well as for coloring grades requiring exc. lightfastness  
*Properties:* Anionic
- Solucote® 1003** [Soluol]  
*Chem. Descrip.:* Aliphatic waterborne PU  
*Uses:* Coating and impregnant for syn. fabrics and cordage; improves life of papermakers felt; med. firm; contains heat reactive crosslinker  
*Properties:* Dens. 8.7 lb/gal; visc. 25-125 cps (72 F); pH 7-8.5; tens. modulus 360 psi (100%); tens. str. 1000 psi; elong. 400%; 40 ± 2% solids
- Sol-U-Tein EA** [Fanning]  
*Chem. Descrip.:* Albumen  
 CAS 9006-50-2; EINECS/ELINCS 232-936-2  
*Uses:* Binder, coagulant, film-former, skin conditioner used in pharmaceuticals and personal care prods.; dye mordant in textiles, adhesives, veneers, sizing and making papers; gilding leather; book binding; food applic.  
*Properties:* Yel. powd.; 100% thru 80 mesh; 90% thru 100 mesh; bland odor; pH 6.5-8.0; 75% ovalbumin, ovoconalbumin, ovomucoid, ovomucin, ovoglobulin, lysozyme, and avidin
- Sorbitol Sol'n. High Mannitol** [ADM Food Addit.]  
*Chem. Descrip.:* Sorbitol  
 CAS 50-70-4; EINECS/ELINCS 200-061-5  
*Uses:* Sweetener, humectant, plasticizer, and stabilizer for foods and pharmaceuticals; food pkg. adhesives, coatings, polymers; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.380, 176.210, 177.2420, 182.99, 184.1835; GRAS; USP, FCC compliance  
*Toxicology:* Noncarcinogenic  
*Environmental:* Biodeg.  
*Storage:* Store in tightly closed container
- Sorbitol Sol'n. Noncrystallizing** [ADM Food Addit.]  
*Chem. Descrip.:* Sorbitol with other polyhydric alcohols  
*Uses:* Noncariogenic sweetener rec. for dentifrices and sugar-free food applics.; as humectant in variety of food, pharmaceutical, cosmetic, and industrial applics.; provides inc. visc.; plasticizer, stabilizer; food pkg. adhesives, coatings, polymers; defoamer in food-contact paper/paperboard; formulated to resist crystallization  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.380, 176.210, 177.2420, 182.99, 184.1835; GRAS; NF, JECFA, E420 compliance  
*Properties:* Clear, colorless syrup; no odor; sweet bland taste; sol. in water; sp.gr. 1.290-1.320; visc. 190 cps; b.p. 105 C; ref. index 1.457-1.467; 45-55% assay  
*Environmental:* Biodeg.  
*Precaution:* Incompat. with strong oxidizing agents  
*Storage:* Store in dry, well-ventilated area in tightly closed containers
- Soygold® 1000** [Ag Environmental Prods.]  
*Chem. Descrip.:* Methyl soyate  
 CAS 67784-80-9  
*Uses:* Industrial solv. for petrol. and animal fat degreasing, precision cleaning, asphalt industry (release agent), concrete release, mold release, metal cutting (lubricant), adhesive removal, silk screen, printing, paints, glass cutting, automotive prods.; substitute for d-limonene, naphtha, min. spirits, etc.; defoamer in food-contact paper coatings; in resin-bonded filters for food contact; in surf.-lubricants for mfg. of food-contact metallic articles; environmentally responsible; contains no petrol. distillates; low VOCs; ultra low evaporative emissions; high flash pt.; EPA listed as approved replacement (SNAP); water rinsable  
*Regulatory:* FDA 21CFR §172.225, 174.5, 176.200, 177.2260, 178.3910; SARA §313 nonreportable; DOT regulated (Class 65)  
*Properties:* Clear to lt. yel. liq.; lt. musty odor; negligible sol. in water; sp.gr. 0.870; vapor pressure < 5 mm Hg (72 F); m.p. -1 C; b.p. 320 C; flash pt. (PMCC) 218 C; KB 58; VOC < 14%  
*Toxicology:* Nontoxic; LD50 (oral, rat) 17.4 g/kg; nonirritating to eyes and skin; TSCA listed  
*Environmental:* Readily biodeg.; LC50 (bluegill, 96 h) > 1000 mg/l  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO  
 HMIS: Health 0; Flammability 1; Reactivity 0
- Soygold® 2000** [Ag Environmental Prods.]  
*Chem. Descrip.:* Methyl soyate with 1-3% surfactant (CAS 9016-45-9)  
*Uses:* Industrial solv. for petrol. and animal fat degreasing, precision cleaning, asphalt industry (release agent), concrete release, mold release, metal cutting (lubricant), adhesive removal, silk screen, printing, paints, glass cutting, automotive prods.; substitute for d-limonene, naphtha, min. spirits, etc.; defoamer in food-contact paper coatings; in resin-bonded filters for food contact; in surf.-lubricants for mfg. of food-contact metallic articles; contains no petrol. distillates; low VOCs; ultra low evaporative emissions; high flash pt.; EPA listed as approved replacement (SNAP); water rinsable  
*Regulatory:* FDA 21CFR §172.225, 174.5, 176.200, 177.2260, 178.3910; SARA §313 nonreportable; DOT regulated (Class 65)  
*Properties:* Clear to lt. yel. liq.; lt. musty odor; negligible sol. in water; sp.gr. 0.87; vapor pressure < 5 mm Hg (72 F); m.p. -1 C; b.p. > 204 C; flash pt. (PMCC) 218 C; KB 58; VOC < 14%  
*Toxicology:* Nontoxic; LD50 (oral, rat) 17.4 g/kg; nonirritating to eyes and

- skin; TSCA listed  
*Environmental:* Readily biodeg.; LC50 (bluegill, 96 h) > 1000 mg/l  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO  
 HMIS: Health 0; Flammability 1; Reactivity 0
- SPA** [Raschig; Raschig AG]  
*Chem. Descrip.:* Acrylic acid-(3-sulfopropyl)-ester, potassium salt  
 CAS 31098-20-1; EINECS/ELINCS 250-465-0  
*Uses:* Used for aq. dispersions, hydrogels, ion exchange resins, paper coatings, adhesives, photographic layers, antistatics, thickeners, and poly-electrolytes; functional monomer
- SPA E** [Raschig; Raschig AG]  
*Chem. Descrip.:* 1-Propanesulfonic acid, 2-hydroxy-3-(2-propenyloxy), sodium salt  
 CAS 52556-42-0; EINECS/ELINCS 258-004-5  
*Uses:* Surfactant for vinylic systems, emulsion polymerization in paper, textile, fiber, and adhesives industries; gives antistatic props. and promotes adhesion of pigments; functional sulfate monomer; polymerizable
- Spartan CM** [Spartan Flame Retardants]  
*Chem. Descrip.:* Inorg.  
*Uses:* Flame retardant for cotton, wool, silk, and rayon, and for paper/paperboard  
*Use Level:* 12-15% (textile), 15-20% (paper)  
*Properties:* Granular
- Spartan FR-48** [Spartan Flame Retardants]  
*Chem. Descrip.:* Proprietary  
*Uses:* Flame retardant for use on paper, paperboard, ground paper prods., cotton batting, cellulose insulation; exc. wetting props.  
*Use Level:* 9-15%  
*Properties:* Clear to hazy yel. liq.; sp.gr. 1.255 (60 F); dens. 10.45 lb/gal; visc. 7.7 cps; pH 7.7 ± 0.2 (5%); 50% act.  
*Storage:* Store @ 40 F or above in stainless steel or FRP tanks
- Spartan X-12** [Spartan Flame Retardants]  
*Chem. Descrip.:* Inorg.  
*Uses:* Flame retardant for use on cotton, wool, silk, rayon, and linen, and for paper/paperboard (nonyellowing under heat exposure)  
*Use Level:* 12-15% (textile), 15-20% (paper)  
*Properties:* Wh. cryst. powd.; dissolves in hot water; pH 6.7 (11.5%)  
*Toxicology:* Low toxicity; not a skin irritant or sensitizer  
*Precaution:* Avoid contact with galvanized steel, zinc, and copper-bearing alloys
- SPE 9528** [Solutia]  
*Chem. Descrip.:* Tetrasodium salt of 1-hydroxy ethylenediphosphonic acid  
 CAS 3794-83-0; EINECS/ELINCS 223-267-7  
*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination  
*Properties:* Wh. granular solid; 500 ± 150 μ mean particle size; 5% max. on 1180 μ; 4% thru 150 μ; bulk dens. 0.7-0.9 g/cm<sup>3</sup>; pH 11-12 (1%); 57 ± 3% act.; 9-15% moisture
- Spectrafil® LA** [Engelhard]  
*Chem. Descrip.:* Calcined kaolin  
*Uses:* Filler pigment for opacity and print-through resist. in uncoated publication papers contg. mech. pulp
- Spectrum DI** [Suyog]  
*Chem. Descrip.:* Surfactant and solvent blend  
*Uses:* Deinking agent for pulp/paper industry; produces stable emulsion on dil. with water  
*Use Level:* 0.4-0.5% emulsion for higher brightness  
*Properties:* Misc. with water; nonionic
- Spectrum X 6L** [Suyog]  
*Uses:* Defoamer and antifoam for pulp/paper mills; effective over wide pH range
- Spectrus™** [Hercules]  
*Uses:* Biocide for cooling water systems; oxidizing and nonoxidizing types
- SPI** [Raschig AG]  
*Chem. Descrip.:* Itaconic acid-bis-(3-sulfopropyl)-ester, dipotassium salt  
 CAS 93841-09-9  
*Uses:* Used for aq. dispersions, hydrogels, ion exchange resins, paper coatings, adhesives, photographic layers, antistatics, thickeners, and poly-

- electrolytes; functional monomer
- Spinomar NaSS** [Tosoh]  
*Chem. Descrip.:* Sodium p-styrenesulfonate  
 CAS 2695-37-6; EINECS/ELINCS 220-266-3  
*Uses:* Emulsifier for soapless emulsion of acrylic, vinyl acetate, and SBR latex, films; textile dye assistant; flocculant; scale inhibitor; sludge conditioner; hair fixative; cosmetic dispersant; artificial biomembranes; antistat for paper, fibers, plastic; pharmaceuticals; metal plating  
*Properties:* Wh. powd., nil odor; sol. in water; insol. in aliphatic, halogenated, or high alcohol solvs.; m.w. 206.20; apparent sp. dens. 0.5; decomp. pt. 330 C; flash pt. nil; 81.5% act.  
*Toxicology:* LD 50 (oral, mouse) 16 g/kg (as 40% olive oil susp.)  
*Storage:* Store in air-tight containers in dark place; if dried, subject to slow oxidation and/or polymerization
- SPM** [Raschig; Raschig AG]  
*Chem. Descrip.:* Potassium sulfopropyl methacrylate  
 CAS 31098-21-2; EINECS/ELINCS 250-466-6  
*Uses:* Used for aq. dispersions, hydrogels, ion exchange resins, paper coatings, adhesives, photographic layers, antistatics, thickeners and poly-electrolytes, flocculants, emulsions; emulsion stabilizer, allowing reduction of emulsifiers used in emulsion polymerization; functional monomer; produces highest quality polymers  
*Properties:* Wh. cryst. powd.; sol. > 2300 g/l in water, 135 g/l in methanol; sl. sol. in ethanol; almost insol. in acetone; m.w. 246.3; m.p. > 300 C (dec.); pH 4-10 (10% aq.); 90% min. assay  
*Storage:* 3 mos storage life when stored in cool, dark place @ R.T. in tightly closed drums
- SR 205** [Sartomer]  
*Chem. Descrip.:* Triethylene glycol dimethacrylate; with 80 ppm hydroquinone inhibitor  
 CAS 109-16-0; EINECS/ELINCS 203-652-6  
*Uses:* Reduces initial visc. and oil extractability, and improves ultimate hardness, heat distort., hot tear strength, and stain resistance in vinyl plastisols; used in cast acrylic sheet and rod, contact lens, elastomers, ion exchange resins, dental polymers, adhesives, coatings (paper, plastic), cosmetics, paints, sealants, photopolymers, electronics (photoresists, solder masks); noncorrosive, low visc., high boiling crosslinking monomeric ester  
*Properties:* APHA 25; colorless clear liq., mild, pleasant odor; sol. in alcohol, ether, ketones, esters, and low m.w. aliphatic hydrocarbons; m.w. 286; sp.gr. 1.070; dens. 8.96 lb/gal; visc. 11 cps; flash pt. (PMCC) 146 F; ref. index 1.4595; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 209** [Sartomer]  
*Chem. Descrip.:* Tetraethylene glycol dimethacrylate with 75 ppm hydroquinone inhibitor  
 CAS 109-17-1  
*Uses:* Crosslinking agent used in castings, plastisols, coatings, fibers, papers, adhesives (anaerobic), concrete polymers and sealants, dental polymers, elastomers, electronics (photoresists, solder masks), photopolymers, sealants; vulcanizing agent for peroxide curing of BR, CR, EPDM, NBR, IR, SBR; vulcanizing coagent with peroxide cure  
*Properties:* APHA 30 clear liq., mild pleasant odor; sol. in alcohols, esters, ethers, ketones, and aromatic hydrocarbons; insol. in water; m.w. 330.37; sp.gr. 1.077; dens. 9.0 lb/gal; visc. 14 cps; b.p. 220 C; acid no. 0.5; flash pt. (PMCC) 161 F; ref. index 1.4605-1.4610; 99% reactive esters
- SR 238** [Sartomer]  
*Chem. Descrip.:* 1,6-Hexanediol diacrylate; with 90 ppm hydroquinone inhibitor  
 CAS 13048-33-4; EINECS/ELINCS 235-921-9  
*Uses:* Used in adhesives; metal, optical, paper, plastic, PVC floor, textile and wood coatings; electronics; inks; paints; photopolymers  
*Properties:* APHA 20 clear liq.; musty odor; m.w. 226; sp.gr. 1.020; dens. 8.45 lb/gal; visc. 9 cps; flash pt. 152 F (PMCC); 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 268** [Sartomer]  
*Chem. Descrip.:* Tetraethylene glycol diacrylate with 125 ppm hydroquinone, 175 ppm MEHQ inhibitor  
 CAS 17831-71-9  
*Uses:* Used in coatings (optical, metal, paper, PVC floor, wood); low volatil-

- ity; offers chem. resist., flexibility, adhesion, hardness, abrasion resist. and impact strength  
*Properties:* APHA 50 clear liq.; musty, acrylic odor; m.w. 302; sp.gr. 1.114; dens. 9.3 lb/gal; visc. 20 cps; flash pt. 185 F (PMCC); 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 295** [Sartomer]  
*Chem. Descrip.:* Pentaerythritol tetraacrylate with 340 ppm MEHQ inhibitor CAS 4986-89-4  
*Uses:* Crosslinking agent in adhesives (binder), coatings (glass, metal, optical, paper, PVC floor, wood), elastomers, electronics (solder masks), inks (flexo, gravure, offset, screen), paints, sealants  
*Properties:* APHA 35 clear liq., musty odor; m.w. 352; sp.gr. 1.179; dens. 9.9 lb/gal; visc. 342 cps (38 C); m.p. 15-18 C; flash pt. (PMCC) 158 F; ref. index 1.4823; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 306HP** [Sartomer]  
*Chem. Descrip.:* Tripropylene glycol diacrylate with 175 ppm MEHQ inhibitor  
 EINECS/ELINCS 256-032-2  
*Uses:* Used for flexible packaging, printing, electronics, paper and wood coatings; monomer for high performance applics.; low extractables; solv. and chem. resist.; hard  
*Properties:* APHA 57 clear liq.; low odor; m.w. 300; sp.gr. 1.038; visc. 15 cps; ref. index 1.449; < 200 ppm acid
- SR 344** [Sartomer]  
*Chem. Descrip.:* PEG 400 diacrylate with 490 ppm MEHQ inhibitor  
*Uses:* Curing agent for radiation and peroxide cure systems incl. adhesives, coatings (glass, metal, optical, paper, plastic, PVC floor, wood), concrete polymers, inks (flexo, gravure, litho, offset, screen), photopolymers; difunctional monomer; produces soft, flexible films  
*Properties:* APHA 35 clear liq., mild odor; water-sol.; m.w. 508; sp.gr. 1.117; visc. 57 cps; flash pt. (PMCC) 51 F; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 351** [Sartomer]  
*Chem. Descrip.:* Trimethylolpropane triacrylate with 125 ppm hydroquinone and 175 ppm MEHQ inhibitors  
 CAS 15625-89-5; EINECS/ELINCS 239-701-3  
*Uses:* Curing agent for acrylics, adhesives, coatings (glass, metal, optical, paper, PVC floor, textile, wood), electronics, inks, paints, photopolymers; high boiling monomeric ester polymerized by common free radical initiators  
*Properties:* APHA 40 yel. clear, bright liq.; pungent odor; m.w. 296; sp.gr. 1.109; dens. 9.2 lb/gal; visc. 106 cps; b.p. 200 C; flash pt. (PMCC) 188 F; acid no. 0.7; ref. index 1.4735-1.4750; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 379** [Sartomer]  
*Chem. Descrip.:* Glycidyl methacrylate with 60 ppm hydroquinone inhibitor  
 CAS 106-91-2; EINECS/ELINCS 203-441-9  
*Uses:* Reactive diluent; in hydrogels for contact lenses and membranes, molding and casting compds.; impregnating paper, concrete, and wood, coatings (metal, powd.), printing inks, adhesives and sealants, elastomers, plastics, electronics (photoresists), chem. intermediates; monofunctional monomer; polymerized by applics. of heat, heat and peroxidic catalysts, and irradiation by UV, beta, gamma, or x-ray  
*Properties:* Clear liq., pungent odor; sol. in most organic solvs.; m.w. 142; sp.gr. 1.073; dens. 8.9 lb/gal; visc. 5 cps; b.p. 75 C; flash pt. (PMCC) 76 C; ref. index 1.4470; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 395** [Sartomer]  
*Chem. Descrip.:* Isodecyl acrylate (monomer) with 200 ppm MEHQ inhibitor  
 CAS 1330-61-6; EINECS/ELINCS 215-542-5  
*Uses:* Reactive diluent for radiation and peroxide cure applics.; curing agent for pressure-sensitive adhesives, screen inks, optical and paper coatings, and PVC floor and release coatings  
*Properties:* APHA 40 clear liq.; mild odor; m.w. 212; b.p. 121 (760 mm); sp.gr. 0.881; dens. 7.4 lb/gal; visc. 5 cps; ref. index 1.441; flash pt. (PMCC) 185 F; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 399** [Sartomer]  
*Chem. Descrip.:* Dipentaerythritol pentaacrylate with 270 ppm MEHQ inhibitor  
*Uses:* Curing agent; for acrylics, adhesives (binder, structural), coatings (glass, metal, paper, plastic, PVC floor, wood), electronics, inks (flexo, gravure, litho, offset, screen), paints, photopolymers, plastics, plastisols, sealants; high m.w., multifunctional acrylate monomer susceptible to polymerization by radiation and UV initiation  
*Properties:* APHA 50 clear liq., mild odor; sol. in esters, ketones; m.w. 524; sp.gr. 1.192; dens. 9.5 lb/gal; visc. 13,600 cps; acid no. 1.4; flash pt. (PMCC) 240 F; ref. index 1.4889; 99% reactive esters  
*Toxicology:* Low skin irritation  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 444** [Sartomer]  
*Chem. Descrip.:* Pentaerythritol triacrylate with 350 ppm MEHQ inhibitor  
 CAS 3524-68-3; EINECS/ELINCS 222-540-8  
*Uses:* Crosslinking agent used in adhesives (binder), coatings (glass, metal, optical, paper, PVC floor, wood), elastomers, electronics (solder masks), inks (flexo, gravure, offset, screen), sealants; trifunctional monomer; fast cure response  
*Properties:* APHA 50 clear liq., musty odor; m.w. 298; sp.gr. 1.162; dens. 9.9 lb/gal; visc. 520 cps; flash pt. (PMCC) 174 F; ref. index 1.4790; 99% reactive esters  
*Toxicology:* Low skin irritation  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 454** [Sartomer]  
*Chem. Descrip.:* PEG-3 trimethylolpropane triacrylate with 255 ppm MEHQ inhibitor  
*Uses:* Curing agent for radiation and peroxide cure systems incl. acrylics, adhesives (pressure sensitive, structural), coatings (glass, metal, optical, paper, PVC floor, release, textile, wood), concrete polymers; electronics (conformal, photoresists, solder masks), inks (flexo, gravure, litho, screen), paints, photopolymers; trifunctional monomer  
*Properties:* APHA 55 clear liq., mild odor; m.w. 428; sp.gr. 1.103; dens. 9.25 lb/gal; visc. 60 cps; flash pt. (PMCC) 188 F; ref. index 1.4686; surf. tens. 39.6 dynes/cm; 99% reactive esters  
*Toxicology:* Low skin irritation  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 454HP** [Sartomer]  
*Chem. Descrip.:* Ethoxylated, trimethylolpropane triacrylate with 300 ppm MEHQ inhibitor  
*Uses:* Used for electronics coating, wood/paper coatings, flooring, solder masks, and dry film applics.; fast curing monomer; solv. and chem. resist.; hard  
*Properties:* APHA 80 clear liq.; m.w. 428; sp.gr. 1.1043; visc. 62 cps; ref. index 1.4698; < 200 ppm acid
- SR 492** [Sartomer]  
*Chem. Descrip.:* PPG-3 trimethylolpropane triacrylate with 300 ppm MEHQ inhibitor  
*Uses:* Used for acrylics, adhesives, coatings (glass, metal, optical, paper, PVC floor, release, textile, wood), electronics, inks; offers fast cure, good flexibility  
*Properties:* APHA 65 clear liq.; sp.gr. 1.050; visc. 80 cps; 99% reactive esters  
*Toxicology:* Low skin irritation  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- SR 494** [Sartomer]  
*Chem. Descrip.:* Ethoxylated pentaerythritol tetraacrylate with 190 ppm MEHQ inhibitor  
*Uses:* Crosslinking agent for radiation and peroxide cure systems incl. adhesives (binder), chem. intermediates, coatings (glass, metal, paper, plastic, PVC floor, wood), elastomers; electronics (solder masks), inks (flexo, gravure, offset, screen), sealants; multifunctional monomer; fast cure response  
*Properties:* APHA 80 clear liq.; sp.gr. 1.128; visc. 150 cps; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials

which may generate free radicals; storage temps. should not be > 90 F

**SR 495 [Sartomer]**

*Chem. Descrip.:* Caprolactone acrylate monomer with 690 ppm MEHQ inhibitor

*Uses:* Protective coating for metal, plastics, wood, and paper; adhesive for metal, plastics, PC, acrylic sheet, and paper; provides low odor, low irritation, high adhesion props. for UV/EB curing

*Properties:* APHA 50 color m.w. 344; sp.gr. 1.1; visc. 85 cps; flash pt. (SCC) 136 C; 99% reactive esters

*Toxicology:* Low eye/skin irritation and sensitization

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 499 [Sartomer]**

*Chem. Descrip.:* PEG-6 trimethylolpropane triacrylate with 135 ppm MEHQ inhibitor

*Uses:* Used in acrylics, adhesives (pressure sensitive, structural), coatings (glass, metal, optical, paper, PVC floor, release, textile, wood), electronics, inks, paints, and photopolymers; low shrinkage

*Properties:* APHA 50 clear liq.; sp.gr. 1.106; visc. 90 cps; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 502 [Sartomer]**

*Chem. Descrip.:* PEG-9 trimethylolpropane triacrylate with 90 ppm MEHQ inhibitor

*Uses:* Used in acrylics, adhesives (pressure sensitive, structural), coatings (glass, metal, optical, paper, PVC floor, release, textile, wood), inks, paints, and photopolymers; low shrinkage and fast cure

*Properties:* APHA 70 clear liq.; sp.gr. 1.1606; visc. 126 cps; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 506 [Sartomer]**

*Chem. Descrip.:* Isobornyl acrylate with 170 ppm MEHQ inhibitor  
CAS 5888-33-5; EINECS/ELINCS 227-561-6

*Uses:* Curing agent, reactive diluent for radiation and peroxide cure applics. incl. adhesives, coatings (glass, metal, optical, paper, PVC floor, release), concrete polymers, electronics (photoresists, solder masks), inks (screen), photopolymers; monomer

*Properties:* APHA 20 clear liq.; m.w. 208; sp.gr. 0.987; dens. 8.2 lb/gal; visc. 9 cps; flash pt. (PMCC) 240 F; ref. index 1.4722; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR-1010 [Sartomer]**

*Chem. Descrip.:* Triaryl sulfonium hexafluoroantimonate (50%) in propylene carbonate

*Uses:* Photoinitiator for epoxy and vinyl ether systems, in coatings (metal, paper, wood, plastic) and inks; enhances adhesion to metallic substrates; offers fast cure speeds in epoxy, vinyl ether, and other cationically cured resin systems

*Properties:* Gardner 3-6 amber clear liq.; dens. 11.7 lb/gal; visc. 60-90 cps; 48-52% solids; cationic

**SR-1011 [Sartomer]**

*Chem. Descrip.:* Triaryl sulfonium hexafluorophosphate (50%) in propylene carbonate

*Uses:* Photoinitiator for epoxy and vinyl ether systems, in coatings (metal, paper, wood, plastic) and inks; enhances adhesion to metallic substrates; offers fast cure speeds in epoxy, vinyl ether, and other cationically cured resin systems

*Properties:* Gardner 6 clear pale yel. liq.; dens. 11.0 lb/gal; visc. 60-90 cps; 48-52% solids; cationic

**SR-1012 [Sartomer]**

*Chem. Descrip.:* Diaryl iodonium hexafluoroantimonate

*Uses:* Photoinitiator for epoxy and vinyl ether systems, in coatings (metal, paper, wood, plastic) and inks; enhances adhesion to metallic substrates; offers fast cure speeds in epoxy, vinyl ether, and other cationically cured resin systems

*Properties:* Off-wh. powd.; good sol.; m.p. 90-92 C; 100% solids; cationic

**SR 9003 [Sartomer]**

*Chem. Descrip.:* Propoxylated neopentyl glycol diacrylate with 350 ppm hydroquinone inhibitor

*Uses:* Used in coatings (metal, plastic, paper, PVC floor, release and wood); adhesives; electronics; inks; photopolymers

*Properties:* APHA 35 clear liq.; m.w. 328; sp.gr. 1.005; visc. 15 cps; ref. index 1.4470; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 9020 [Sartomer]**

*Chem. Descrip.:* Glyceryl propoxy triacrylate with 300 ppm MEHQ inhibitor

*Uses:* Used in adhesives (binder, pressure sensitive, structural), coatings (glass, metal, wood, optical, paper, PVC floor, release, textile), electronics, inks, paints, and photopolymers; trifunctional monomer

*Properties:* APHA 20 clear liq.; m.w. 428; sp.gr. 1.089; visc. 95 cps; ref. index 1.4612; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 9020HP [Sartomer]**

*Chem. Descrip.:* Propoxylated glyceryl triacrylate

*Uses:* Used in flexible packaging, printing, electronics, paper and wood coatings, and flooring; monomer for high performance applics.; low extractables; solv. and chem. resist.; hard

*Properties:* APHA 40 clear liq.; low odor; m.w. 428 sp.gr. 1.093; visc. 96 cps; ref. index 1.4625; < 200 ppm acid

**SR 9021 [Sartomer]**

*Chem. Descrip.:* Highly propoxylated glyceryl triacrylate with 285 ppm MEHQ inhibitor

*Uses:* Used in adhesives (binder, pressure sensitive, structural), coatings (glass, metal, wood, optical, paper, PVC floor, release, textile), electronics, inks, paints, and photopolymers; trifunctional monomer; fast surf. cure

*Properties:* APHA 50 clear liq.; sp.gr. 1.064; visc. 95 cps; ref. index 1.4610; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 9035 [Sartomer]**

*Chem. Descrip.:* PEG-15 trimethylolpropane triacrylate with 475 ppm MEHQ inhibitor

*Uses:* Used in adhesives (binder, pressure sensitive, structural), coatings (glass, metal, wood, optical, paper, PVC floor, release, textile), electronics, inks, paints, and photopolymers; trifunctional monomer; fast surf. cure, flexible, low shrinkage

*Properties:* APHA 60 clear liq.; m.w. 1000; sp.gr. 1.113; visc. 168 cps; ref. index 1.4697; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 9041 [Sartomer]**

*Chem. Descrip.:* Pentaacrylate ester with 265 ppm MEHQ inhibitor

*Uses:* Crosslinking agent for radiation and peroxide cure systems incl. acrylics, adhesives (binder, structural), coatings (glass, metal, paper, plastic, PVC floor, wood), electronics, inks (flexo, gravure, litho, offset, screen), paints, photopolymers, plastics, plastisols, sealants; multifunctional monomer; fast cure response

*Properties:* APHA 65 clear liq.; sp.gr. 1.192; visc. 15,195 cps; ref. index 1.4887; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**SR 9209 [Sartomer]**

*Chem. Descrip.:* Alkoxyated aliphatic diacrylate ester with 335 ppm hydroquinone inhibitor

*Uses:* Used in coatings (metal, plastic, paper, PVC floor, release, wood); electronics; inks

*Properties:* APHA 70 clear liq.; sp.gr. 1.045; visc. 15 cps; 99% reactive esters

*Toxicology:* Low skin irritation

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**Stabilix® [Hercules]**

- Uses:* Dispersant for control of deposits and stickies and to improve pulp quality and drainage
- Stabilizer 7000** [Raschig; Raschig AG]  
*Chem. Descrip.:* Bis (2,6-diisopropylphenyl) carbodiimide  
 CAS 2162-74-5; EINECS/ELINCS 218-487-5  
*Uses:* Stabilizer; process and post long-term protective agent against the effects of hydrolysis in polymers; stabilizer for PET exposed to high temps. and extreme environments, e.g., monofilaments for use in dryer felts for paper industry, TPU casting elastomers, EVA, PBT  
*Use Level:* 0.7-1.5%  
*Properties:* Wh. cryst., perceptible odor; sol. in acetone, insol. in water; m.w. 362.56; dens. 0.97 g/cc (20 C); bulk dens. 600-700 kg/m<sup>3</sup>; m.p. 48-50 C  
*Toxicology:* LD50 (oral, rat) 2395 mg/kg; nonirritating to skin and eyes; may cause sensitization, allergic skin reaction on repeated/prolonged exposure; TSCA listed  
*Precaution:* Incompat. with acids, alkalis, oxidizing agents; dust can form explosive mixts. with air; keep away from sources of ignition  
*Hazardous Decomp. Prods.:* NO<sub>x</sub>, isocyanates  
*Storage:* Store in cool place below 30 C in tightly closed original containers for 2 yr storage life
- Stabiloid® 833-0042** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Anatase wh. aq. disp.; dens. 15.1 lb/gal; VOC 0; 60% by wt. pigment solids; 25.1% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-0048** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile ink, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Rutile wh. aq. disp.; dens. 15.6 lb/gal; VOC 0; 60% by wt. pigment solids; 25.0% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-0549** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Red lt. aq. disp.; dens. 9.4 lb/gal; VOC 0; 21.5% by wt. pigment solids; 62.8% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-0575** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Red med. aq. disp.; dens. 9.5 lb/gal; VOC 0; 25% by wt. pigment solids; 59.3% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-0665** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Red dk. aq. disp.; dens. 9.2 lb/gal; VOC 0; 25% by wt. pigment solids; 59.3% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-1022** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Red oxide med. aq. disp.; dens. 16.1 lb/gal; VOC 0; 65% by wt. pigment solids; 19.9% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-1833** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.
- Properties:* Yel. oxide aq. disp.; dens. 14.5 lb/gal; VOC 0; 57% by wt. pigment solids; 31.1% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-2826** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Diarylide yel. aq. disp.; dens. 8.9 lb/gal; VOC 0; 16.7% by wt. pigment solids; 66% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-9919** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Carbon blk. aq. disp.; dens. 9.7 lb/gal; VOC 0; 27% by wt. pigment solids; 64.6% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabiloid® 833-9927** [Creanova]  
*Uses:* Colorant for use in water systems, paper coating and saturation, textile inks, latex paints, and latex compds.; high strength; glycol-free permitting use in coatings, adhesives, and films that cannot use potentially toxic solvs.  
*Properties:* Channel blk. aq. disp.; dens. 8.7 lb/gal; VOC 0; 7.2% by wt. pigment solids; 90% by wt. volatiles  
*Environmental:* No VOCs  
*Storage:* Protect from freezing
- Stabrom® 909** [Albemarle]  
*Chem. Descrip.:* Bromine  
 CAS 7726-95-6; EINECS/ELINCS 231-778-1  
 UN No. 3266  
*Uses:* Biocide, disinfectant, fungicide, algicide, slimicide for wastewater, commercial, and industrial recirculating cooling water systems, industrial once-thru cooling water systems, and pulp/paper mills; compat. with HDPE, PP, EPDM, PTFE, PVC, and VITON  
*Regulatory:* DOT regulated; EPA reg. no. 3377-55  
*Properties:* Yel. to orange clear liq.; mild sweet odor; sol. in water; sp.gr. 1.3746; dens. 1.3117 g/ml; visc. 2.168 cSt; vapor pressure 19 mm Hg; f.p. -0.3 C; b.p. 101-102 C; pH 12.4-13.7; 10.5-11.5% BrCl assay  
*Precaution:* Corrosive; incompat. with nylon
- Stafoam F** [NOF]  
*Chem. Descrip.:* Cocamide DEA (1:2)  
 CAS 61791-31-9; EINECS/ELINCS 263-163-9  
*Uses:* Detergent, rust inhibitor, foaming agent, penetrant for liq. detergents, metal cleaning, paper industry, textile processing; dye aux.; air entraining agent in construction industry  
*Properties:* Lt. yel. liq.; sp.gr. 0.995 (30 C); visc. 755 cps (30 C); surf. tens. 7 dynes/cm (0.1%); pH 9.5-10.5 (1% aq.)
- Stafoam FK** [NOF]  
*Chem. Descrip.:* Surfactant mixt.  
*Uses:* Scouring agent for textiles; cleaning agent for metal industry; air entraining agent for construction industry; detergent for paper industry  
*Properties:* Brn. transparent liq.; anionic/nonionic
- Staform P** [Frutarom Meer]  
*Chem. Descrip.:* Gum ghatti  
 CAS 9000-28-6  
*Uses:* Stabilizer, binder, emulsifier forming o/w emulsions; used in beverage emulsions where it forms orange oil emulsions, in table syrup emulsions; tablet binder and thick mucilage coatings in pharmaceuticals; binder in paper industry; emulsifier for petroleum and nonpetroleum waxes used in coating and barrier applics.  
*Properties:* Water-sol.
- Sta-Jel® 141** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Crosslinked potato starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides high visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Sta-Jel® 142** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Visc. modified potato starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6

- Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides med. visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Sta-Lok® 120, 160, 180, 182** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Waxy corn starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, retention aid, and dry str. agent for papermaking wet end  
*Properties:* Cationic
- Sta-Lok® 140** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Visc. modified waxy corn starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, retention aid, and dry str. agent for papermaking wet end; designed where lower visc. is required  
*Properties:* Cationic
- Sta-Lok® 156** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Waxy corn starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, dry str. agent for acid papermaking wet end; not rec. for alkaline systems; designed to have net cationic charge  
*Properties:* Amphoteric
- Sta-Lok® 300, 310, 330** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Dent corn starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, retention aid, dry str. agent for papermaking wet end, recycled board  
*Properties:* Cationic
- Sta-Lok® 356** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Dent corn starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, dry str. agent for acid papermaking wet end; not rec. for alkaline systems; designed to have net cationic charge  
*Properties:* Amphoteric
- Sta-Lok® 374, 376** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Dent corn starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, retention aid, dry str. agent for alkaline papermaking wet end; designed to have net cationic charge  
*Properties:* Amphoteric
- Sta-Lok® 400, 410, 430, 440** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Potato starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, retention aid, dry str. agent for papermaking wet end, recycled board  
*Properties:* Cationic
- Sta-Lok® 480** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Potato starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, dry str. agent for papermaking wet end, esp. for closed loop recycle paper machines  
*Properties:* Cationic/anionic
- Sta-Lok® 600** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Potato starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Drainage aid, dry str. agent for papermaking wet end, recycled board; designed for mills without cooking facilities  
*Properties:* Sol. in cold water; cationic/anionic
- Stanfax 234** [Para-Chem]  
*Chem. Descrip.:* Sodium lauryl sulfate  
CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* High-foaming surfactant for detergents, emulsion polymerization, textile/carpet applics., I&I applics., food-contact resinous and polymeric coatings/paper/rubber/textiles; all-purpose; compat. with most anionic, nonionic, and amphoteric surfactants  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.210, 177.1210, 177.2600, 177.2800, 178.3400  
*Properties:* 29.5% act.; anionic
- Stanfax 234LCP** [Para-Chem]  
*Chem. Descrip.:* Sodium lauryl sulfate  
CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* High-foaming surfactant for detergents, emulsion polymerization, textile/carpet applics., I&I applics., food-contact resinous and polymeric coatings/paper/rubber/textiles; low cloud pt.  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.210, 177.1210, 177.2600, 177.2800, 178.3400  
*Properties:* 29.5% act.; anionic
- Stanfax 238** [Para-Chem]  
*Chem. Descrip.:* Ammonium laureth sulfate  
CAS 32612-48-9  
*Uses:* Surfactant, foaming agent for personal care, industrial use, lt. duty detergents, textiles, carpet, emulsion polymerization, I&I applics.; component of food-contact paper/paperboard; all-purpose; compat. with most anionic, nonionic, and amphoteric surfactants  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* 27.5% act.; anionic
- Stanfax 320** [Para-Chem]  
*Chem. Descrip.:* Ammonium stearate  
CAS 1002-89-7; EINECS/ELINCS 213-695-2  
*Uses:* Surfactant, foaming agent for acrylic foam coatings, drapery foam and coatings, upholstery backing, filler coatings, filter media saturants; intermediate for conversion to metal stearates; food-contact adhesives, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.170  
*Properties:* 32% act.; anionic
- Stanfax 388** [Para-Chem]  
*Chem. Descrip.:* Ammonium stearate  
CAS 1002-89-7; EINECS/ELINCS 213-695-2  
*Uses:* Foaming agent for acrylic foam coatings, upholstery, drapery, filler coatings, filter media saturant; intermediate for metal stearates; food-contact adhesives, paper/paperboard; low ammonia  
*Regulatory:* FDA 21CFR §175.105, 176.170  
*Properties:* 32% act.; anionic
- Stanfax 560** [Para-Chem]  
*Chem. Descrip.:* Sodium sulfonate  
*Uses:* Surfactant for closed systems, emulsion polymerization; component of food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* 23% act.; anionic  
*Environmental:* Non-biodeg.
- Stanfax 968** [Para-Chem]  
*Chem. Descrip.:* Ammonium laureth sulfate  
CAS 32612-48-9  
*Uses:* Surfactant for industrial use, lt. duty detergents, textile/carpet applics.; component of food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* 27.5% act.; anionic
- Stanfax 996** [Para-Chem]  
*Chem. Descrip.:* Sodium lauryl sulfate  
CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant for personal care, shampoos, hand soaps, bath prods., shaving creams, rug shampoos, liq. laundry detergents, fine fabric wash; defoamer in food-contact paper/paperboard; emulsifier in food-contact articles  
*Regulatory:* FDA 21CFR §176.210, 178.3400  
*Properties:* 29.5% act.; anionic
- Stanfax 997** [Para-Chem]  
*Chem. Descrip.:* Sodium lauryl sulfate  
CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant for personal care, shampoos, hand soaps, bath prods., shaving creams, rug shampoos, emulsion polymerization, liq. laundry detergents, fine fabric wash; defoamer in food-contact paper/paperboard; emulsifier in food-contact articles  
*Regulatory:* FDA 21CFR §176.210, 178.3400  
*Properties:* 29.5% act.; anionic
- Stanfax 1012** [Para-Chem]  
*Chem. Descrip.:* Ammonium laureth sulfate  
CAS 32612-48-9  
*Uses:* Surfactant for emulsion polymerization; food-contact adhesives/paper  
*Regulatory:* FDA 21CFR §175.105, 176.170  
*Properties:* 30% act.; anionic
- Stanfax 1066** [Para-Chem]  
*Chem. Descrip.:* Sodium laureth sulfate  
CAS 9004-82-4; EINECS/ELINCS 221-416-0  
*Uses:* Surfactant for emulsion polymerization; food-contact adhesives/paper

- Regulatory:* FDA 21CFR §175.105, 176.170  
*Properties:* 30% act.; anionic
- Staramic® 105** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Hydroxypropylated, crosslinked dent corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides med. visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Staramic® 747** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Hydroxyethylated dent corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides med. visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Starcote®** [Atofina]  
*Chem. Descrip.:* Styrene-acrylic emulsions  
 CAS 9010-92-8  
*Uses:* Hydrophobicity agent for paper/board surfaces; improves ink jet printability and toner adhesion during laser printing on office papers; component of paper/paperboard in contact with aq./fatty/dry foods  
*Regulatory:* FDA 21CFR §176.170, 176.180; BgVV XXXVI compliance  
*Properties:* Very low particle size disp.
- Star\*pol® 136** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Hydroxypropylated crosslinked waxy corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides high visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Star\*pol® 410** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Dent corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides high visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Star\*pol® 468, 469, 600** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Hydroxypropylated crosslinked dent corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides high visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Star\*pol® 700, 800** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Visc. modified waxy corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Thickener, binder in paper coatings, building prods. (wall joint compds.), adhesives; provides high visc. at relatively low solids on prep. in cold water  
*Properties:* Sol. in cold water
- Star® Sodium Silicate** [PQ]  
*Chem. Descrip.:* Sodium silicate  
*Chem. Analysis:* SiO<sub>2</sub> (25.5%), Na<sub>2</sub>O (10.6%)  
 CAS 1344-09-8; EINECS/ELINCS 215-687-4  
*Uses:* Detergent, deflocculant, bleaching enhancer, alkalinity agent in deinking paper stock; peroxide stabilizer in repulping and postbleaching; slurry thinner in ceramics; peroxide bleaching in textiles; buffer in pad-batch dyeing  
*Properties:* Clear sol'n.; dens. 11.7 lb/gal (20 C); visc. 60 cps; pH 11.9
- Starwax® 100** [Baker Petrolite]  
*Chem. Descrip.:* Hard microcryst. wax consisting of n-paraffinic, branched paraffinic, and naphthenic hydrocarbons  
 CAS 63231-60-7; EINECS/ELINCS 264-038-1  
*Uses:* Wax used in hot-melt coatings and adhesives; paper coatings; printing inks; lubricant and processing aid in plastics modification; lacquers, paints, and varnishes; binder in ceramics, potting/impregnant in elec./electronic components; rubber and elastomers (plasticizer, antisenescing, antiblock, antiozonant); emulsion wax size in papermaking; fabric softener ingred.; in emulsion and latex coatings; in cosmetic hand creams and lipsticks; chewing gum base; food pkg.  
*Regulatory:* Incl. FDA §172.230, 172.615, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 178.3710, 179.45  
*Properties:* Color 1.0 (D1500) wax; very low sol. in org. solvs.; sp.gr. 0.93; visc. 15 cps (99 C); m.p. 88 C
- Staybelite®** [Hercules/Resins]

- Chem. Descrip.:* Acidic resin made by partially hydrogenating wood rosin  
*Uses:* Plasticizer, tackifier, or processing aid for reclaimed, natural, and syn. rubbers; component in sealing wax, optical lens pitch, elec. cables, waxes for paper coating, syn. resins, metal resinates, soldering fluxes, and ceramic ink vehicles; thermoplastic resin  
*Properties:* Very pale brittle solid; sp.gr. 1.045; soften. pt. (Drop) 75 C; acid no. 160; sapon. no. 157
- Staybelite® Ester 10** [Hercules/Resins]  
*Chem. Descrip.:* Glycerol hydrogenated rosinatate  
*Uses:* In solv., hot-melt, and emulsion adhesives based on thermoplastic and elastomeric materials; in emulsion form as tackifier for natural rubber, SBR, and neoprene latexes; as tackifier in industrial tape masses; in lamination of metal, foil, paper, etc.; in hot-melt-applied barrier coatings, chlorinated rubber finishes, etc.; as modifier for paraffin wax; used in food-pkg. and -processing operations; thermoplastic  
*Properties:* USDA Rosin WG solid, flakes; sol. in esters, ketones, higher alcohols, glycol ethers, and aliphatic, aromatic, and chlorinated hydrocarbons; sp.gr. 1.07; dens. 1.07 kg/l; G-H visc. I-M (75% solids in toluene); Hercules drop soften. pt. 83 C; acid no. 8
- Staysize® 140** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Acetylated, visc. modified dent corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Retention aid for papermaking size press and textile warp sizing; designed where inc. starch retention during repulping is required to improve BOD and COD levels in mill effluents  
*Properties:* Cationic
- St. Croix Hardwood** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Northern bleached hardwood from maple (55%), birch (23%), aspen (7%), and beech (15%)  
*Uses:* Market pulp as furnish for bond and copy paper, carbonless, photographic, machine glazed, and coated paper grades; good cleanliness; elemental chlorine-free; rec. for papers requiring a closed surf. for coating holdout  
*Properties:* 0.75 mm fiber length; 0.102 mg/m coarseness; brightness (ISO) 90.5
- Steamate™** [Hercules]  
*Uses:* Corrosion inhibitor in pulp/paper mill condensate systems
- STEPANOL® LCP** [Stepan]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Detergent, foam booster for shampoos, bubble baths, dishwash detergents, general cleaners, rug shampoos, and upholstery cleaners; food-contact paper/paperboard; defoamer in food-contact paper/paperboard; in closures with sealing gaskets for food containers; food-contact rubber articles, textiles; emulsifier in mfg. of food-contact articles; low cloud pt.  
*Regulatory:* Kosher; FDA 21CFR §172.822, 176.170, 176.210, 177.1210, 177.1630, 177.2600, 177.2800, 178.3400; EU, Japan, Canada, and Australia listed  
*Properties:* Clear low-visc. liq.; sol. in water; sp.gr. 1.03; dens. 8.6 lbs/gal; visc. 20 cps; f.p. 11 C; pour pt. 14 C; flash pt. (PMCC) > 94 C; pH 7-8.5 (10%); 0% RVOC; 28-30% act.; anionic  
*Toxicology:* Sl. toxic orally; mod. eye irritant; mild skin irritant  
*Environmental:* Biodeg.  
*Storage:* Store in sealed containers in cool, dry place @ 90-125 F
- Sterling® R** [Cabot/Special Blacks]  
*Chem. Descrip.:* Carbon black  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant for gravure and one-time carbon paper inks; blue tone; lampblack replacement  
*Properties:* Fluffy; 75 nm particle size; sp.gr. 1.8; dens. 16 lb/ft<sup>3</sup>; surf. area 25 m<sup>2</sup>/g; oil absorp. 71 cc/100 g; 1% volatile  
 HMIS: Health 0; Flammability 1; Reactivity 0
- Sterocoll® BL** [BASF]  
*Chem. Descrip.:* Acrylamide-acrylic acid copolymer w/o emulsion  
*Uses:* Thickener for paper/paperboard coatings; enhances runnability of metered size presses by reducing backing roll buildup; inc. visc. not dependent on pH  
*Properties:* Anionic
- Sterocoll® FD** [BASF]  
*Chem. Descrip.:* High solids acrylic ester-carboxylic acid copolymer disp.  
*Uses:* Thickener for paper/paperboard coatings; provides good balance of water retention and thickening to coating colors; improves runnability; con-

tains no plasticizers or solvs.

*Properties:* Anionic

**Sterocoll® FS** [BASF]

*Chem. Descrip.:* High solids acrylic ester-carboxylic acid copolymer disp.

*Uses:* Thickener for paper/paperboard coatings incl. food pkg.; modifies visc., water retention, and rheology of coating colors; contains no plasticizers or solvs.; mech. and shear-stable

*Properties:* Anionic

**Stixso® RR** [PO]

*Chem. Descrip.:* Sodium silicate sol'n.

*Chem. Analysis:* SiO<sub>2</sub> (30%), Na<sub>2</sub>O (9.22%)

CAS 1344-09-8; EINECS/ELINCS 215-687-4

*Uses:* Binder for abrasives in ceramics, paperboard mfg.; detergent, dispersant, emulsifier, deflocculant, bleaching enhancer, alkalinity agent in deinking paper stock; peroxide stabilizer in repulping and postbleaching

*Properties:* Syrupy liq.; sp.gr. 1.41 (20 C); dens. 11.8 lb/gal; visc. 830 cps; pH 11.3

*Toxicology:* Alkalinity can irritate eyes and skin

*Environmental:* Environmentally friendly

*Storage:* For extended storage, use tightly closed drums, steel containers, or containers of nonreactive materials

**Struktol® Calcium Stearate** [Struktol]

*Chem. Descrip.:* Calcium stearate

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Processing aid and release agent for plastics and rubber; processing aid in PVC extrusion, pipe, siding, inj. molded fittings, in wire drawing operations; anticaking agent in dry blending operations; food-pkg. adhesives/coatings/paper/cellophane/polymers/rubber; high purity, clear melt, nonwetable, low dusting

*Use Level:* 0.3-3 parts

*Regulatory:* FDA 21CFR §173.340, 175.105, 175.320, 176.170, 176.200, 177.1200, 177.2410, 177.2600, 178.2010, 181.29, 184.1229

*Properties:* Powd.; 7.5% max. on 200 mesh, 1% max. on 100 mesh; bulk dens. 20-22 lb/ft<sup>3</sup>; m.p. 148-150 C; 4% max. moisture; 11.2% max. CaO

*Storage:* Unlimited storage stability in cool, dry area

**Struktol® PE H-100** [Struktol]

*Chem. Descrip.:* Low m.w. polyethylene homopolymer wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Processing aid, dispersant, and compounding additive, improving flow in NR and SR; provides release from equip. with improved pigment dispersion and finish to molded articles; used in adhesives and coatings, food pkg., food pkg. adhesives, pressure-sensitive food pkg. adhesives, resinous/polymeric food-contact coatings, food-contact paper/paperboard, cellophane, lubricants for incidental food contact

*Use Level:* 1-4%

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 178.3570, 178.3850 compliant

*Properties:* Wh. waxy gran. or powd.; sp.gr. 0.91; visc. 180 cps (140 C); drop pt. 102 ± 5 C; acid no. nil

**Struktol® PE H-100 PL** [Struktol]

*Chem. Descrip.:* Polyethylene homopolymer wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Processing aid, dispersion and compounding additive, flow agent, release agent for nat. and syn. elastomers; improved pigment dispersion and finish in molded articles; food-contact adhesives/coatings/paper/cellophane/polymers/rubber

*Use Level:* 1-4%

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 178.3570, 178.3850 compliant

*Properties:* Wh. waxy gran. or powd.; sp.gr. 0.91; visc. 180 cps (140 C); drop pt. 102 ± 5 C; acid no. nil

**Struktol® TR 016** [Struktol]

*Chem. Descrip.:* Blend of calcium fatty acid salt and amide with sites avail. for hydrogen bonding

*Uses:* Dispersant for highly filled systems; processing aid, internal lubricant for polyolefins, PVC, PS, ABS, PET, TPO, TPE systems; coupling agent between polymer systems and fillers; approved for food and drug contact incl. food-contact adhesives/coatings/paper/cellophane/rubber articles

*Use Level:* 0.25-1.0%

*Regulatory:* FDA 21CFR §173.340, 175.105, 175.300, 175.320, 176.170, 176.200, 177.1200, 177.1400, 177.2260, 177.2410, 177.2600, 178.2010, 178.3860, 179.45, 181.29, 184.1229

*Properties:* Pale yel. pellets or microbeads, neutral odor; sp.gr. 1.0; m.p. 99 C; flash pt. > 290 C

*Toxicology:* Harmless

*Storage:* > 2 yrs storage stability under normal storage conditions

**Struktol® TR 044** [Struktol]

*Chem. Descrip.:* Fatty acid ester blend

*Uses:* Processing aid, flow agent, release agent for polymers; dispersant for powd. materials, providing more uniform filler incorporation; food pkg. adhesives, paper, cellophane; defoamer in food-contact paper/paperboard; antioxidant/stabilizer in food-grade polymers; reduces decomp. risk in highly loaded compds.

*Use Level:* 0.5-2%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.210, 177.1200, 178.2010

*Properties:* Lt. powd.; sp.gr. 0.95; bulk dens. 32 lb/ft<sup>3</sup>; drop pt. 57 C; acid no. < 10

*Storage:* 2 yrs min. stability under normal storage conditions

**Struktol® TR 121** [Struktol]

*Chem. Descrip.:* Oleamide

CAS 301-02-0; EINECS/ELINCS 206-103-9

*Uses:* Slip agent for polyethylene films; lubricant and mold release for inj. molding applics., processing thermoplastic resins, thermoplastic elastomers, and thermoset rubber systems; dispersant; food pkg. adhesives, coatings, paper, polymers, films

*Use Level:* 1-3% (rubber), 0.05% (plastic films), > 0.5% (plastic mold release)

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.180, 177.1210, 177.1350, 177.1400, 179.45

*Properties:* Cream-colored pellets; 85% 2-4 mm; insol. in water; limited sol. in alcohols, ketones, aromatic solvs.; bulk dens. 37.5 lb/ft<sup>3</sup>; m.p. 70-76 C; acid no. 1 max.; iodine no. 80-90; flash pt. (COC) 210 C; 98% amide

*Precaution:* Nonflamm.

*Storage:* Negligible corrosivity; storage at normal temps. will not affect prod., but extended storage should be avoided

**Struktol® TR 131** [Struktol]

*Chem. Descrip.:* Erucamide

CAS 112-84-5; EINECS/ELINCS 204-009-2

*Uses:* Slip agent for polyolefin films; release agent for polymer systems; dispersant in color concs. and printing inks; process aid/lubricant for thermoplastic elastomers, thermoplastic resins, thermoset rubber systems; food pkg. adhesives, coatings, paper, cellophane, polymers, films

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.180, 177.1200, 177.1210, 177.1350, 177.1400, 178.3860, 179.45

*Properties:* Gardner 4 max. color, faint odor; sp.gr. 0.93; bulk dens. 34.7 lb/ft<sup>3</sup> (beads), 37.5 lb/ft<sup>3</sup> (pellets); m.p. 79-85 C; acid no. 3 max.; iodine no. 72-78; flash pt. (COC) 220 C; 99% amide

*Precaution:* Nonflamm.; keep away from strong oxidizing agents; rotate inventory

*Storage:* Noncorrosive; normal storage will not affect prod., but extended storage above 175 C should be avoided

**Styrofan®** [BASF AG]

*Chem. Descrip.:* Polymer dispersions based on styrene/butadiene

CAS 9003-55-8

*Uses:* Gloss binders for paper and board coating; raw material for prod. of laminating adhesives; binders for bonding fiber webs

**Styrofan® BN 4901 X** [BASF]

*Chem. Descrip.:* Carboxylated polystyrene latex

*Uses:* Gloss aid for paper/paperboard coatings; imparts high gloss during finishing

*Properties:* Med. particle size

**Styronal™ BN 4204** [BASF]

*Chem. Descrip.:* Carboxylated styrene-butadiene disp.

*Uses:* Binder for coated rotogravure paper; yields paper coatings with exc. compressibility and smoothness

**Styronal™ BN 4606X** [BASF]

*Chem. Descrip.:* Carboxylated styrene-butadiene disp.

*Uses:* Binder for paper coatings; good balance of binding str., sheet and print gloss; exc. runnability esp. in high solids coatings

**Styronal™ ND 430** [BASF]

*Chem. Descrip.:* Carboxylated styrene-butadiene aq. disp.

*Uses:* Binder for paper coatings, size press applics., mfg. of laminating adhesives; exc. heavy ion stability

**Styronal™ ND 656** [BASF]

- Chem. Descrip.:* Carboxylated styrene-butadiene aq. disp.  
*Uses:* Binder for paper/paperboard coatings; general purpose offset binder; good balance of wet and dry str. and gloss
- Styronal™ ND 810** [BASF]  
*Chem. Descrip.:* Carboxylated styrene-butadiene disp.  
*Uses:* Gloss aid for paper and paperboard coatings; exc. mech. and chem. stability
- Styronal™ ND 834** [BASF]  
*Chem. Descrip.:* Carboxylated styrene-butadiene disp.  
*Uses:* Gloss aid for paper coatings; cobinder in paper saturation to reinforce substrates; combines high resilience and low film-forming temps. in saturation formulation
- Styronal™ NX 4489 X** [BASF]  
*Chem. Descrip.:* Styrene/butadiene/acrylonitrile aq. disp.  
 CAS 9003-56-9  
*Uses:* Binder for coating paper and board; exc. runnability in blade coaters for web offset and rotogravure applics.; exc. wet and dry str. and print gloss
- Styronal™ NX 4515 X** [BASF]  
*Chem. Descrip.:* Carboxylated styrene-butadiene disp.  
*Uses:* Binder for coating paper and board; exc. runnability in blade coating operations; superb wet and dry str.
- Styronal™ NX 4626** [BASF]  
*Chem. Descrip.:* Styrene/butadiene/acrylic aq. disp.  
*Uses:* Binder for coating paper and board; exc. runnability; good balance of wet and dry str. with exc. print gloss
- Styronal™ NX 4680** [BASF]  
*Chem. Descrip.:* Styrene/butadiene/acrylonitrile aq. disp.  
 CAS 9003-56-9  
*Uses:* Binder for coating paper and board, esp. for exc. wet pick and size press stability in offset applics.; exc. runnability in blade coating operations; exc. wet and dry str. and print gloss
- Sucrose Benzoate Regular and Coatings Grade** [Velsicol]  
*Chem. Descrip.:* Sucrose benzoate  
 CAS 12738-64-6; EINECS/ELINCS 235-795-5  
*Uses:* Resin modifier for coatings, inks, adhesives, lacquers, and UV inks; modifier for clear lacquers, providing exceptional clarity with high gloss, for use in clear coatings for wood, paper, and metal; metallic and pigmented coatings; powd. coatings; UV-cure and rotogravure inks; offers high film hardness combined with good flexibility; exc. UV stability, compat. with a broad range of resins, plasticizers, and solvs.  
*Properties:* APHA 30 max. (50% toluene sol'n.) glassy clear solid; misc. with acetone, benzene, CCl<sub>4</sub>, DIBK, DOP, MIBK, MEK, PEGs, toluene, xylene; m.w. 1070; sp.gr. 1.25; soften pt. (R&B) 98 C; acid no. < 0.01; iodine no. < 0.01; sapon. no. 153; hyd. no. 0.9; flash pt. (TOC) 500 F  
*Toxicology:* LD50 (oral) > 5 g/kg, not a primary skin or eye irritant
- Sulfoc Flocculants** [Suyog]  
*Chem. Descrip.:* Sodium salt of polyacrylic acid and/or polyacrylamide  
*Uses:* Flocculant for solid-liq. separation systems (sedimentation, filtration, flotation, centrifugation) for sugar, paper/pulp, asbestos, petroleum, iron ore, rock phosphate, copper and zinc ore, coal mining, boiler/lime water treatment, paints, pigments, industrial/sewage/waste water treatment, alum, aluminum sulfate, phosphoric acid, magnesium salt, borax, and boric acid industries
- Sugum 300 NS** [Sood Paper & Allied Chems.]  
*Chem. Descrip.:* Fortified rosin disp.  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Sizing agent for neutral to alkaline papermaking; effective at pH 6.8-7.5; rec. where CaCO<sub>3</sub>, kaolin, or talc are used; sizing develops in the drying process; highly stable  
*Properties:* Wh. disp.; ≈ 1 μ particle size; sp.gr. 1.030; visc. 5 mPa·s; pH 6.3-6.5; 30 ± 1% solids; anionic  
*Storage:* Store @ 5-35 C in closed tanks
- Sugum 300 WR** [Sood Paper & Allied Chems.]  
*Chem. Descrip.:* Fortified rosin disp.  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Sizing agent for neutral papermaking; rec. at pH 6.5-7.2; rec. where CaCO<sub>3</sub>, kaolin, or talc are used; sizing develops in the drying process; highly stable  
*Properties:* Wh. disp.; ≈ 1 μ particle size; sp.gr. 1.030; visc. 5 mPa·s; pH > 6.2; 30 ± 1% solids; anionic  
*Storage:* Store @ 5-35 C in closed tanks
- Sugum 500** [Sood Paper & Allied Chems.]

- Chem. Descrip.:* Fortified rosin soap size  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Sizing agent for papermaking; reacts anionically flocculating with aluminum sulfate due to affinity for cellulose; produces flocs which attach to fibers and inc. hydrophobicity of sheet; most effective at pH 4.5-5.0  
*Properties:* Pale brn. free-flowing visc. liq.; easily dilutable in cold water; sp.gr. 1.17; flash pt. nonflamm.; pH 9-10.5; 50 ± 1% solids; anionic  
*Toxicology:* Nontoxic; sl. irritation may occur to persons with sensitive skin  
*Storage:* Unlimited shelf life
- Sugum 700** [Sood Paper & Allied Chems.]  
*Chem. Descrip.:* Fortified rosin  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Sizing agent for papermaking; reacts anionically flocculating with aluminum sulfate due to affinity for cellulose; produces flocs which attach to fibers and inc. hydrophobicity of sheet; most effective at pH 4.5-5.0  
*Properties:* Pale brn. very visc. paste; easily dilutable in cold water; sp.gr. 1.26; pH 9-11; 70 ± 1% solids; anionic  
*Toxicology:* Nontoxic; sl. irritation may occur to persons with sensitive skin  
*Storage:* Unlimited shelf life
- SULFONIC 100** [Stepan]  
*Chem. Descrip.:* Dodecyl benzene sulfonic acid  
 CAS 68608-88-8; EINECS/ELINCS 271-807-5  
*Uses:* Surfactant intermediate; drilling foaming agent; catalyst in acid-catalyzed reactions; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §176.210, 178.3400; kosher  
*Properties:* Dk. visc. liq.; sp.gr. 1.03; dens. 8.56 lb/gal; visc. 500 cps; f.p. 9 C; pour pt. 12 C; flash pt. (PMCC) > 94 C; pH < 1; 96% min. act.; anionic  
*Toxicology:* Handle with extreme care; avoid contact with eyes and skin  
*Environmental:* Biodeg.  
*Storage:* Store in closed containers in cool, dry place
- Sulfopon® 101** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate C<sub>12</sub>C<sub>18</sub>  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant for shampoos, bubble baths, and lt. duty detergents, mfg. of polymer disps.; food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Liq.; 28-30% act.; anionic
- Sulfopon® 101 Special** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Basic surfactant for shampoos, specialty cleaners, and lt.-duty detergents; emulsifier for emulsion polymerization, mfg. of polymer disps.; food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; low freezing pt.  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Colorless liq. to paste; odorless; unlimited sol. in water; m.w. 302; sp.gr. 1.0 (20 C); visc. 1000 mPa·s max.; pour pt. ≤ 25 C; cloud pt. < 15 C; flash pt. none; pH 7.5-8.5 (101%); 29-31% act. in water; anionic  
*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; irritating to eyes, skin, and mucous membranes  
*Environmental:* > 90% biodeg.; LC50 (fish) > 10-100 mg/l; EC50 (bacteria) > 100 mg/l  
*Hazardous Decom. Prods.:* None  
*Storage:* Store in frost-free area in tightly closed containers
- Sulfopon® 101 Special RHD** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate; preserved with Kathon CG  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant for all types of polymer disps.; food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Liq.; 28-31% conc.; anionic
- Sulfotex OA** [Cognis/Care Chems.; Cognis Canada]  
*Chem. Descrip.:* Sodium 2-ethylhexyl sulfate  
 CAS 126-92-1; EINECS/ELINCS 204-812-8  
*Uses:* Foaming agent, wetting agent for animal glue on paper and paperboard and food processing; detergent and dispersant in industrial cleaners; mercerizing agent in dyeing of fibers; effective in high electrolyte concs.  
*Properties:* Lt. amber; dens. 9.2 lb/gal; pH 8.0-10.0 (10%); 43-46% act.; anionic  
*Environmental:* Biodeg.

**Sumaclear 800B** [Summit Research Labs]*Chem. Descrip.:* Vinyl acrylic and sizing agent*Uses:* Saturant for size press applics. for wallpaper and label grades*Properties:* Dens. 8.7 lb/gal; pH 4.0; 45% total solids**Sunbond® 857** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Vinyl acrylic and sizing agent*Uses:* Saturant for size press applics. for wallpaper and label grades*Properties:* Dens. 8.6 lb/gal; pH 4.0; 39% total solids**Sunbond® 925** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Carboxylated vinyl acrylic terpolymer latex*Uses:* Binder improving coating str. and water resist. in paper and board coatings; produces exc. surf. str. for offset printability*Properties:* Dens. 8.9 lb/gal; pH 6.5; 50% total solids**Sunbond® 936** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Polyvinyl acetate homopolymer

CAS 9003-20-7

*Uses:* Binder improving coating str. and water resist. in paperboard coatings; designed for coating color stability on high speed coaters*Properties:* Dens. 9.0 lb/gal; pH 6.5; 49.5% total solids**Sunbond® CP-58** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Vinyl acrylic and sizing agent*Uses:* Saturant for size press applics. for wallpaper and label grades*Properties:* Dens. 8.6 lb/gal; pH 4.5; 44% total solids**SunCryl® CP-50** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Soft self-crosslinked vinyl acrylic polymer*Uses:* Saturant for size press applics.*Properties:* Dens. 8.8 lb/gal; pH 4.0; 45% total solids**SunCryl® CP-75** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Soft self-crosslinked vinyl acrylic polymer*Uses:* Saturant for size press applics.*Properties:* Dens. 8.8 lb/gal; pH 4.0; 45% total solids**Sunkem® 301** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Polyethylene

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, gloss aid, release agent for improved surf. finish of coated paper/paperboard in gloss calendering process; allows better finishing with machine calendering equip.*Properties:* Dens. 8.1 lb/gal; pH 10.0; 40% total solids**Sunkem® 329** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Polyethylene

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant, gloss aid, release agent for improved surf. finish of coated paper/paperboard in gloss calendering process; allows better finishing with machine calendering equip.*Properties:* Dens. 8.3 lb/gal; pH 8.0; 25% total solids**Sunkote® 450** [OMNOVA Sol'ns./Paper]*Chem. Descrip.:* Calcium stearate

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant, leveling agent for improved surf. finish of coated paper/

- paperboard in calendering process  
*Properties:* Dens. 8.4 lb/gal; pH 11.0; 50% total solids
- Sunkote® 452** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Calcium stearate  
 CAS 1592-23-0; EINECS/ELINCS 216-472-8  
*Uses:* Lubricant, leveling agent for improved surf. finish of coated paper/paperboard in calendering process  
*Properties:* Dens. 8.4 lb/gal; pH 11.0; 50% total solids
- Sunkote® 455** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Calcium stearate  
 CAS 1592-23-0; EINECS/ELINCS 216-472-8  
*Uses:* Lubricant, leveling agent for improved surf. finish of coated paper/paperboard in calendering process  
*Properties:* Dens. 8.4 lb/gal; pH 11.0; 55% total solids
- Sunkote® 460** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Calcium stearate and polyethylene  
*Uses:* Lubricant for improved surf. finish of coated paper/paperboard in calendering process; designed for high shear coating applics. and for pigmented size press formulations  
*Properties:* Dens. 8.4 lb/gal; pH 11.0; 60% total solids
- Sunrez® 700C** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Cyclic amide condensate  
*Uses:* Insolubilizer for paper coatings incl. food-contact paper; reacts with functional groups of coating binders; reduces water sensitivity; inc. number of impressions and print quality in the offset printing process  
*Regulatory:* FDA approved  
*Properties:* Dens. 9.1 lb/gal; pH 4.0; 45% total solids
- Sunrez® 700M** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Cyclic amide condensate  
*Uses:* Insolubilizer for paper coatings incl. food-contact paper; reacts with functional groups of coating binders; reduces water sensitivity; inc. number of impressions and print quality in the offset printing process  
*Regulatory:* FDA approved  
*Properties:* Dens. 9.7 lb/gal; pH 6.0; 45% total solids
- Sunrez® 747** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Cyclic amide condensate  
*Uses:* Insolubilizer for paper coatings incl. food-contact paper; reacts with functional groups of coating binders; reduces water sensitivity; inc. number of impressions and print quality in the offset printing process  
*Regulatory:* FDA approved  
*Properties:* Dens. 9.8 lb/gal; pH 4.5; 45% total solids
- Sunsize® 4133** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Stearylated melamine  
*Uses:* Surf. sizing agent, water resist. aid for size press applic.  
*Properties:* Dens. 8.2 lb/gal; pH 6.0; 40% total solids
- Sunsize® 4134** [OMNOVA Sol'n./Paper]  
*Chem. Descrip.:* Stearylated melamine/paraffin wax  
*Uses:* Surf. sizing agent, water resist. aid for size press applic.  
*Properties:* Dens. 8.2 lb/gal; pH 6.0; 40% total solids
- Suntori 311** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Mixt. of mineral oil; activator  
*Uses:* Drier for papermaking; release agent designed for processing of thin papers such as tissues and toilet rolls  
*Use Level:* Spray 20-100 times diluted sol'n. to dryer  
*Properties:* Lt. yel. limpid visc. liq.; pH 7 (1%); nonionic
- Suntori C-500** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Mixt. of silicone oil, mineral oil; activator  
*Uses:* Drier for papermaking; release agent designed for processing of thin papers, either adding into slurry or spraying to dryer method  
*Use Level:* Mod. diluted sol'n. to riffer, head box, etc. for total of 0.1-0.5% per pulp or spray 100-1000 times diluted sol'n. to dryer  
*Properties:* Straw-colored transparent liq.; pH 7 (5%); cationic
- Suntori KL** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Alkylamide condensation prod.  
*Uses:* Drier for papermaking; release agent for processing of rayon paper or thin papers such as tissues and toilet rolls  
*Use Level:* 10-50 times diluted sol'n. to riffer, head box, etc. for total of 0.1-0.5% per pulp  
*Properties:* Lt. yellowish wh. liq.; pH 5.5; cationic
- Suntori P-40** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Polyethylene wax  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Drier for papermaking; release agent designed for process of thin papers; exhibits exc. self-fixation at low add-on levels  
*Use Level:* 100-200 times diluted sol'n. to riffer, head box, etc. for total of 0.05-0.2% per pulp  
*Properties:* Lt. yellowish brn. visc. liq.; pH 6 (5%); cationic
- Suntori WP** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Paraffin wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Water repellent, sizing auxiliary for papermaking  
*Use Level:* 10-20 times diluted sol'n. for total of 2-6% per paper  
*Properties:* Wh. milky emulsion; pH 8; anionic
- Sunwhite BY Liq.** [Sun Rise Chem. Ind.]  
*Chem. Descrip.:* Stilbene deriv.  
*Uses:* Fluorescent whitening agent for paper wet end, size press, and surf. coatings; for addition at the pulper or mixing chest; must not be applied with the alum or cationic auxs.  
*Properties:* Lt. brn. clear liq.; pH 10 ± 5; anionic
- Sunwhite BYX H/C** [Sun Rise Chem. Ind.]  
*Chem. Descrip.:* Stilbene deriv.  
*Uses:* Fluorescent whitening agent for paper wet end, size press, and surf. coatings; for addition at the pulper or mixing chest; must not be applied with the alum or cationic auxs.  
*Properties:* Ylsh. fine powd.; pH 10 ± 5; anionic
- Sunwhite CST** [Sun Rise Chem. Ind.]  
*Chem. Descrip.:* Stilbene deriv.  
*Uses:* Fluorescent whitening agent for paper surf. coatings and size press; extremely acid resist.; effective to pH 1; low affinity  
*Properties:* Brn. clear liq.; pH 10-11; 33 ± 1.5% solids; anionic
- Super 50** [EPC Papierchemie GmbH]  
*Chem. Descrip.:* Fully saponified, highly fortified rosin soap  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Sizing agent for paper, cardboard, food pkg. (Germany)  
*Use Level:* 0.5-2.0%  
*Regulatory:* BgVV XXXVI compliant  
*Properties:* Brn.; dilutable with cold or hot water at any mixing ratio; sp.gr. 1.15 g/cc; visc. < 150 s (Ford 4 mm, 21 C); pH 10-12 (50 g/l H<sub>2</sub>O); 50 ± 1% act.; cationic  
*Toxicology:* Alkalinity of prod. may cause skin irritation  
*Environmental:* Toxic to fish; do not allow to reach public sewers  
*Storage:* 6 mos storage stability at 5-70 C; do not store in nonferrous metal or aluminum
- Super Nevtac® 99** [Neville]  
*Chem. Descrip.:* Syn. polyterpene resin  
 CAS 9003-74-1  
*Uses:* Tackifier for PP, PE, NR, SIS block copolymers, EVA, polyisoprene, butyl rubber used in solv. and hot-melt adhesives, coatings, rubber prods., concrete-curing compds., and caulking compds.; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, rubber articles  
*Regulatory:* FDA 21 CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2600  
*Properties:* Gardner 5 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1040; sp.gr. 0.98; soften. pt. (R&B) 99 C; flash pt. (COC) 450 F
- Super Wet 102R** [Sam Shin]  
*Uses:* Insolubilizer improving printability, ink receptivity, brightness, opacity, and gloss in coated paper; improves wet pick and wet rub resist.; improves antiblistering  
*Use Level:* 0.4-1.0% to total pigment amt.  
*Properties:* Pale ylsh. liq.; visc. < 50 cps; pH 8 ± 1; 30 ± 1% solids; cationic  
*Storage:* 6 mos shelf life below 30 C; store in tightly closed containers in cool, well-ventilated area
- Super Wet EXP-1** [Sam Shin]  
*Uses:* Insolubilizer improving printability, ink receptivity, brightness, opacity, and gloss in coated paper; improves wet pick and wet rub resist.; improves antiblistering  
*Use Level:* 0.4-1.0% to total pigment amt.  
*Properties:* Pale ylsh. liq.; visc. 100 ± 50 cps; pH 8 ± 1; 50 ± 1% solids; cationic  
*Storage:* 6 mos shelf life below 30 C; store in tightly closed containers in cool, well-ventilated area
- Supragil RM/77 DL** [Rhodia HPCI]

- Chem. Descrip.:* Sodium naphthalene sulfonate  
CAS 1321-69-3  
*Uses:* Dispersant, sec. emulsifier, protective colloid for polymerization, elastomers; food pkg. adhesives, paper/paperboard; avoid undesired premature coagulum during polymerization phase; designed to avoid polymer coloring  
*Use Level:* 0.2-1.5% (as powd.) on latex  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180  
*Properties:* Liq.; 45% solids in water
- Suprapal®** [BASF AG]  
*Chem. Descrip.:* Styrene copolymer  
*Uses:* For roadmarking paints, gravure and flexographic printing inks, paper coatings, zinc dust primers
- Suresize®** [Vinings Ind.]  
*Uses:* Surf. sizing agent for printing and writing papers; provides improved ink and water holdout; controls sheet porosity
- Sure Sol®-290** [Koch Chem. Spec.]  
*Chem. Descrip.:* sec-Butylbiphenyl  
*Uses:* For carbonless paper industry
- Sure Sol®-300** [Koch Chem. Spec.]  
*Chem. Descrip.:* Di/tri-isopropylbiphenyl  
*Uses:* For carbonless paper, coatings, and resin industries  
*Properties:* Odorless
- Sure Sol®-330** [Koch Chem. Spec.]  
*Chem. Descrip.:* Diisopropylbiphenyl  
CAS 69009-90-1  
*Uses:* For heat transfer, carbonless paper, coatings, and resin industries  
*Properties:* Odorless
- Sure Sol®-333** [Koch Chem. Spec.]  
*Chem. Descrip.:* Sure Sol®-290/Sure Sol®-300 blend  
*Uses:* For carbonless paper industry
- Sure Sol®-450** [Koch Chem. Spec.]  
*Chem. Descrip.:* Triisopropylbenzene  
CAS 717-74-8; EINECS/ELINCS 211-941-3  
*Uses:* For carbonless paper and elec. industries
- Sure Sol®-480** [Koch Chem. Spec.]  
*Chem. Descrip.:* Propylated naphthalene  
*Uses:* For carbonless paper and elec. industries
- Surfactant 10G** [Arch Chems.]  
*Chem. Descrip.:* p-Nonylphenoxy-polyglycidol  
*Uses:* Surfactant used in agric. chemical emulsions, leather processing, paints, emulsion polymerization, waste paper deinking, alkaline cleaners, photographic film emulsions, and coating formulations  
*Properties:* Amber liq.; mild odor; sol. in alcohols, polyethers, acids; sp.gr. 1.032-1.114; dens. 8.6-9.3 lb/gal; visc. 110-195 cps; pour pt. -9 to -14 C; b.p. 93-103 C; cloud pt. > 100 C (0.5% aq.); pH 7.1-7.9 (1% aq.); surf. tens. 27-30 dynes/cm (0.1% act.); 50% act.; nonionic
- Surfonic® CO-15** [Huntsman]  
*Chem. Descrip.:* PEG-15 castor oil  
CAS 61791-12-6  
*Uses:* Emulsifier; dispersant; surfactant, antistat, leveling agent for leather, textiles, pulp/paper, agric., cutting oils for metalworking  
*Properties:* M.w. 1600; HLB 8.2; hyd. no. 105; cloud pt. 59 C (10% in 25% butyl diglycol); pH 6.5; nonionic
- Surfonic® CO-20** [Huntsman]  
*Chem. Descrip.:* PEG-20 castor oil  
CAS 61791-12-6  
*Uses:* Emulsifier; dispersant; surfactant, antistat, leveling agent for leather, textiles, pulp/paper, agric., cutting oils for metalworking  
*Properties:* Liq.; m.w. 1820; HLB 9.7; hyd.no. 92; cloud pt. 62 C (10% in 25% butyl diglycol); pH 7.0; 100% conc.; nonionic
- Surfonic® CO-25** [Huntsman]  
*Chem. Descrip.:* PEG-25 castor oil  
CAS 61791-12-6  
*Uses:* Emulsifier; dispersant; surfactant, antistat, leveling agent for leather, textiles, pulp/paper, agric., cutting oils for metalworking  
*Properties:* Liq.; m.w. 2040; HLB 10.7; hyd.no. 82.5; cloud pt. 66 C (10% in 25% butyl diglycol); pH 7.0; 100% conc.; nonionic
- Surfonic® CO-30** [Huntsman]  
*Chem. Descrip.:* PEG-30 castor oil  
CAS 61791-12-6  
*Uses:* Emulsifier; dispersant; surfactant, antistat, leveling agent for leather, textiles, pulp/paper, agric., cutting oils for metalworking  
*Properties:* Liq.; m.w. 2260; HLB 11.7; hyd.no. 74.5; cloud pt. 71 C (10% in 25% butyl diglycol); pH 7.0; 100% conc.; nonionic
- Surfonic® CO-42** [Huntsman]  
*Chem. Descrip.:* PEG-42 castor oil  
CAS 61791-12-6  
*Uses:* Emulsifier; dispersant; surfactant, antistat, leveling agent for leather, textiles, pulp/paper, agric., cutting oils for metalworking  
*Properties:* Liq.; m.w. 2700; HLB 13.0; hyd.no. 62.3; cloud pt. 67 C (10% in 25% DEGBE); pH 7.5; 100% conc.; nonionic
- Surfonic® DA-4** [Huntsman]  
*Chem. Descrip.:* Isodeceth-4  
CAS 61827-42-7  
*Uses:* W/o and o/w emulsifier, wetting agent, detergent, degreaser for hard surf. cleaners, textile processing, pulp/paper, and agric. formulations; sulfation intermediate  
*Properties:* Paste; disp. in water; m.w. 334; HLB 10.5; hyd. no. 168; 100% act.; nonionic  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture
- Surfonic® DA-6** [Huntsman]  
*Chem. Descrip.:* Isodeceth-6  
CAS 61827-42-7  
*Uses:* Detergent, degreaser, o/w emulsifier, wetting agent for hard surf. cleaners, textile processing, pulp/paper, and agric. formulations; sulfation intermediate  
*Properties:* Paste; sol. in water; m.w. 424; sp.gr. 1.0014; visc. 109 cps; HLB 12.5; hyd. no. 132; pour pt. 12.8 C; cloud pt. 42 C (1% DI water); 100% act.; nonionic  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture
- Surfonic® DDP-40** [Huntsman]  
*Chem. Descrip.:* Dodoxynol-4  
CAS 9014-92-0  
*Uses:* Surfactant, w/o emulsifier, wetting agent used in paper industry to mfg. paper towels and tissues, in solv. and dry cleaner formulations; emulsifier for agric. oils and degreasers; rewetting agent; low foaming  
*Properties:* Liq.; water-insol.; m.w. 438; HLB 8.0; hyd. no. 128; cloud pt. 54 C (10% in 25% butoxy diglycol); 100% act.; nonionic
- Surfonic® DDP-50** [Huntsman]  
*Chem. Descrip.:* Dodoxynol-5  
CAS 9014-92-0  
*Uses:* Surfactant, w/o emulsifier, wetting agent used in paper industry to mfg. paper towels and tissues, in solv. and dry cleaner formulations; emulsifier for agric. oils and degreasers; rewetting agent; low foaming  
*Properties:* Liq.; water-insol.; m.w. 482; HLB 9.1; hyd. no. 116; 100% act.; nonionic
- Surfonic® DNP-70** [Huntsman]  
*Chem. Descrip.:* Nonyl nonoxynol-7  
CAS 9014-93-1  
*Uses:* W/o emulsifier, wetting agent, surfactant for agric. formulations, emulsion polymerization, leather working; surfactant intermediate; food pkg. coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings; forms stable w/o emulsions  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99  
*Properties:* Liq.; insol. in water; m.w. 648; sp.gr. 0.9919 (20/20 C); HLB 9.5; hyd. no. 87.5; pour pt. -5 C; cloud pt. 68 C (10% in 25% butoxy diglycol); 100% act.; nonionic  
*Environmental:* Biodeg.
- Surfonic® DNP-80** [Huntsman]  
*Chem. Descrip.:* Nonyl nonoxynol-8  
CAS 9014-93-1  
*Uses:* W/o emulsifier, wetting agent, dispersant for emulsion polymerization, detergents, acid cleaners, hard surf. cleaners, textile processing, wax emulsification, pigment printing and agric. formulations; surfactant intermediate; food pkg. coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99  
*Properties:* Liq.; insol. in water; m.w. 692; sp.gr. 1.016 (20/20 C); HLB 10.2; hyd. no. 81; pour pt. -2 C; cloud pt. 71 C (10% in 25% butoxy diglycol); 100% act.; nonionic

- Environmental:* Biodeg.
- Surfonic® DNP-100** [Huntsman]  
*Chem. Descrip.:* Nonyl nonoxynol-10  
 CAS 9014-93-1  
*Uses:* W/o and o/w emulsifier, wetting agent, dispersant for emulsion polymerization, detergents, acid cleaners, hard surf. cleaners, textile processing, wax emulsification, pigment printing and agric. formulations; surfactant intermediate; food pkg. coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99  
*Properties:* Liq.; disp. in water; m.w. 780; sp.gr. 1.014 (20/20 C); HLB 11.3; hyd. no. 71; pour pt. 10 C; cloud pt. 75 C (10% in 25% butoxy diglycol); 100% act.; nonionic  
*Environmental:* Biodeg.
- Surfonic® DNP-140** [Huntsman]  
*Chem. Descrip.:* Nonyl nonoxynol-14  
 CAS 9014-93-1  
*Uses:* Degreaser; cleaning surfactant; lubrication oil additive; stabilizer; emulsifier; demulsifier; antioxidant for plastics and rubber; plasticizer in varnishes, resins, lacquers, and plastics; surfactant in pulp/paper, emulsion polymerization  
*Properties:* Sol. in water; m.w. 1000; f.p. 27 C; HLB 13.2; hyd. no. 57.5; cloud pt. 52 C (1% in DI water); nonionic
- Surfonic® DNP-700** [Huntsman]  
*Chem. Descrip.:* Nonyl nonoxynol-70  
 CAS 9014-93-1  
*Uses:* O/w emulsifier, solubilizer, surfactant, stabilizer used in detergents, emulsion polymerization, hard surf. cleaners, agric. formulations, pulp/paper processing, textile mfg.  
*Properties:* Solid; highly water-sol.; m.w. 3420; sp.gr. 1.047 (60 C); f.p. 57 C; HLB 18.0; hyd. no. 16.4; wetting 347 s (0.1% aq.); 100% act.; nonionic  
*Environmental:* Biodeg.
- Surfonic® DNP-1000** [Huntsman]  
*Chem. Descrip.:* Nonyl nonoxynol-100  
 CAS 9014-93-1  
*Uses:* O/w emulsifier, solubilizer, surfactant, stabilizer used in detergents, emulsion polymerization, hard surf. cleaners, agric. formulations, pulp/paper processing, textile mfg.  
*Properties:* Solid; highly water-sol.; m.w. 4740; sp.gr. 1.053 (60 C); f.p. 60 C; HLB 18.6; hyd. no. 13; wetting 516 s (0.1% aq.); 100% act.; nonionic  
*Environmental:* Biodeg.
- Surfonic® DNP-1500** [Huntsman]  
*Chem. Descrip.:* Nonyl nonoxynol-150  
 CAS 9014-93-1  
*Uses:* O/w emulsifier, solubilizer, surfactant, stabilizer used in detergents, emulsion polymerization, hard surf. cleaners, agric. formulations, pulp/paper processing, textile mfg.; food pkg. coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99  
*Properties:* Solid; highly water-sol.; m.w. 6950; sp.gr. 1.067 (60 C); f.p. 64 C; HLB 19.0; hyd. no. 11; wetting 768 s (0.1% aq.); 100% act.; nonionic  
*Environmental:* Biodeg.
- Surfonic® DOS-70MS** [Huntsman]  
*Chem. Descrip.:* Dioctyl sodium sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Dewatering aid for lime mud; wetting agent
- Surfonic® JL-80X** [Huntsman]  
*Chem. Descrip.:* Alkoxypolyalkoxyethanol  
*Uses:* Surfactant, emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household detergents, industrial prods., agric. sprays, dry cleaning, metal cleaners, ceramics, concrete, textile processing; wash deinking agent for pulp/paper; low foaming  
*Use Level:* 0.1-0.5% (paper deinking)  
*Properties:* Clear liq.; water-sol.; sp.gr. 1.0072; dens. 8.4 lb/gal; visc. 159.4 SUS (100 F); HLB 13.1; f.p. -5 C; hyd. no. 92; cloud pt. 56-63 C (1% aq.); flash pt. (PMCC) 320 F; pH 6.0-7.5 (1% aq.); surf. tens. 29.24 dynes/cm (0.1%); Draves wetting < 1.0 s (0.25%); Ross-Miles foam 75 mm (initial, 0.1%, 120 F); 100% act.; nonionic  
*Toxicology:* LD50 (oral, rat) 2.6 ml/kg; sl. toxic by ingestion; irritating to eyes  
*Environmental:* Biodeg.

- Surfonic® L12-2.6** [Huntsman]  
*Chem. Descrip.:* C10-12 pareth-3  
 CAS 66455-15-0  
*Uses:* Emulsifier, wetting agent, dispersant, detergent for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment  
*Properties:* Insol. in water; m.w. 278; visc. 21 cps; HLB 8.2; hyd. no. 199; pour pt. 15 C; nonionic
- Surfonic® L12-3** [Huntsman]  
*Chem. Descrip.:* C10-12 pareth-3  
 CAS 66455-15-0  
*Uses:* Surfactant, w/o and o/w emulsifier, wetting agent for detergents, laundry prespotters, hard surf. cleaners, personal care prods.; adjuvant for agric. pesticides; sulfation intermediate; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed  
*Properties:* Clear to sl. turbid liq.; water-insol.; m.w. 295; sp.gr. 0.9317; dens. 7.8 lb/gal; visc. 33 cps; HLB 9.0; hyd. no. 190; pour pt. -12.2 C; flash pt. (PMCC) 137.7 C; pH 5.5-6.5 (1% in aq. IPA); 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture
- Surfonic® L12-6** [Huntsman]  
*Chem. Descrip.:* C10-12 pareth-6  
 CAS 66455-15-0  
*Uses:* Surfactant, wetting agent, o/w emulsifier for detergents, laundry prespotters, hard surf. cleaners, personal care prods., agric. pesticides; rewetting agent for paper (corrugated and liner board); food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed  
*Properties:* Clear to sl. turbid liq.; water-sol.; m.w. 428; sp.gr. 0.9820; dens. 8.2 lb/gal; visc. 43 cps; HLB 12.4; hyd. no. 133; pour pt. 10 C; cloud pt. 48-52 C (1% aq.); flash pt. (PMCC) 162.7 C; pH 5.5-6.5 (1% in aq. IPA); Draves wetting 4.0 s (0.1%); 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture
- Surfonic® L12-8** [Huntsman]  
*Chem. Descrip.:* C10-12 pareth-8  
 CAS 66455-15-0  
*Uses:* Surfactant, wetting agent, o/w emulsifier for detergents, laundry prespotters, hard surf. cleaners, personal care prods., agric. pesticides; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed  
*Properties:* Liq.; sol. in water; m.w. 516; sp.gr. 1.0045; visc. 98 cps; HLB 13.6; hyd. no. 109; pour pt. 18.3 C; cloud pt. 80 C (1% in DI water); flash pt. (PMCC) 204.4 C; Draves wetting 8.4 s (0.1%); 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture
- Surfonic® L24-1.3** [Huntsman]  
*Chem. Descrip.:* C12-14 pareth-1  
 CAS 68439-50-9  
*Uses:* Surfactant, w/o emulsifier for detergents, personal care prods.; sulfation intermediate; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed  
*Properties:* Liq.; insol. in water; m.w. 253; sp.gr. 0.8785; visc. 19 cps; HLB 4.5; hyd. no. 222; pour pt. 10 C; flash pt. (PMCC) 151.7 C; 100% act.; nonionic  
*Toxicology:* TSCA listed

*Environmental:* Biodeg.

*Storage:* Hygroscopic; protect from moisture

**Surfonic® L24-3 [Huntsman]**

*Chem. Descrip.:* C12-14 pareth-3

CAS 68439-50-9

*Uses:* Surfactant, w/o and o/w emulsifier, wetting agent for detergents, laundry prespotters, hard surf. cleaners, personal care prods., agric. pesticides; sulfation intermediate; rewetting agent for paper (corrugated and liner board); food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard; food-contact slimicide

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 178.3910, 181.30, 182.99; EINECS, DSL, MITI listed

CAS 68439-50-9

*Uses:* Emulsifier, wetting agent, dispersant, detergent for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Solid; sol. in water; m.w. 1165; HLB 16.6; hyd. no. 48; pour pt. 39.4 C; nonionic

**Surfonic® L24-1280 [Huntsman]**

*Uses:* Deinking agent for wh. paper grade; low dirt count, high brightness

*Use Level:* 0.4-0.8%

*Properties:* Liq.; nonionic

**Surfonic® L28-890 [Huntsman]**

*Chem. Descrip.:* Linear alcohol ethoxylate

*Uses:* Detergent and wetting agent for textile, leather, paint, pulp/paper, household and industrial detergents

*Properties:* Clear liq.; sp.gr. 1.002; visc. 140 cps; HLB 12.6; cloud pt. 64-68 C (1% aq.); ref. index 1.4492; 90% act.; nonionic

**Surfonic® L46-7 [Huntsman]**

*Chem. Descrip.:* C14-16 pareth-7

*Uses:* Surfactant, detergent, o/w emulsifier, wetting agent, foaming agent, penetrant, intermediate for detergent, laundry prespotters, hard surf. cleaners, personal care prods., agric. pesticides; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed

*Properties:* Clear to sl. turbid semisolid; water-sol.; m.w. 534; sp.gr. 0.9790; dens. 8.0 lb/gal; visc. 63 cps; HLB 11.6; hyd. no. 107; pour pt. 22 C; cloud pt. 48-52 C (1% aq.); flash pt. (PMCC) 204.4 C; pH 5.5-6.5 (1% in aq. IPA); Draves wetting 20.6 s (0.1%); 100% act.; nonionic

*Toxicology:* TSCA listed

*Environmental:* Biodeg.

*Storage:* Hygroscopic; protect from moisture

**Surfonic® L68-18 [Huntsman]**

*Chem. Descrip.:* Linear alcohol ethoxylate

CAS 68439-49-6

*Uses:* Solubilizer, o/w emulsifier used in detergents, laundry prespots, hard surf. cleaners, personal care prods.; adjuvant for agric. pesticides; food pkg.

adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed  
*Properties:* Waxy solid; sol. in water; m.w. 1043; HLB 15.2; hyd. no. 54; pour pt. 5 C; 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture

**Surfonic® L108/85-5** [Huntsman]  
*Chem. Descrip.:* Alcohol ethoxylate  
 CAS 68439-45-2  
*Uses:* Degreaser, o/w emulsifier, wetting agent, dispersant, detergent for consumer detergents, cosmetics, skin creams/lotions, shampoos, bubble baths, agric., min. processing, pulp/paper, textiles, water treatment; low haze and clear points  
*Properties:* Liq.; sol. in water; m.w. 354; sp.gr. 0.9768; HLB 12.4; hyd. no. 156; cloud pt. 43 C (1% in DI water); flash pt. (PMCC) 132.2 C; 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture

**Surfonic® L610-3** [Huntsman]  
*Chem. Descrip.:* Ethoxylated alcohol  
 CAS 70879-83-3  
*Uses:* O/w and w/o emulsifier, wetting agent, detergent, surfactant for hard surf. cleaners, industrial and household cleaners, gypsum board mfg., laundry prespotters, metal cleaners, latex paints; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard; rec. for aq. systems requiring low foaming  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30; EINECS, DSL, MITI listed  
*Properties:* Liq.; insol. in water; m.w. 276; sp.gr. 0.9408; visc. 20 cps; HLB 9.6; hyd. no. 210; pour pt. -9.4 C; flash pt. (PMCC) 79.4 C; 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture

**Surfonic® L1270-2** [Huntsman]  
*Chem. Descrip.:* Linear alcohol ethoxylate  
 CAS 68439-50-9  
*Uses:* W/o emulsifier for personal care and light-duty cleaning prods.; sulfation intermediate; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed  
*Properties:* Liq.; insol. in water; m.w. 281; sp.gr. 0.9057; visc. 22 cps; HLB 5.4; hyd. no. 200; pour pt. 7.2 C; flash pt. (PMCC) 148.8 C; 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.  
*Storage:* Hygroscopic; protect from moisture

**Surfonic® L1285-2** [Huntsman]  
*Chem. Descrip.:* Linear alcohol ethoxylate  
 CAS 68439-50-9  
*Uses:* W/o emulsifier for personal care and lt.-duty cleaning prods.; sulfation intermediate; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.3120, 178.3400, 181.30, 182.99; EINECS, DSL, MITI listed  
*Properties:* Liq.; insol. in water; m.w. 278; sp.gr. 0.9027; visc. 23 cps; HLB 6.4; hyd. no. 202; pour pt. 7.2 C; flash pt. (PMCC) 148.8 C; 100% act.; nonionic  
*Toxicology:* TSCA listed  
*Environmental:* Biodeg.

*Storage:* Hygroscopic; protect from moisture

**Surfonic® LF-17** [Huntsman]  
*Chem. Descrip.:* Primary alcohol-EO adduct, modified  
 CAS 69013-18-9  
*Uses:* Wetting agent, detergent for aq. systems, metal cleaners, latex paints, textiles, paper, rinse aids, industrial and home mech. dishwashing compds.; defoamer in some systems; low foaming  
*Properties:* Pale yel. clear liq.; sol. in water; sp.gr. 1.003; visc. 54.5 cSt (100 F); f.p. -2 C; HLB 12.2; cloud pt. 32-37 C (1% aq.); flash pt. (PMCC) 295 F; surf. tens. 33.0 dynes/cm (0.1%); Draves wetting 7.2 s (0.25%); Ross-Miles foam 6 mm (initial, 0.1%, 120 F); 100% act.; nonionic  
*Toxicology:* LD50 (oral, rat) 3.53 g/kg; sl. toxic by ingestion, skin absorption; mod. irritating to eyes and skin  
*Environmental:* Biodeg.

**Surfonic® LF-18** [Huntsman]  
*Chem. Descrip.:* Alcohol alkoxyolate  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents  
*Properties:* Disp. in water; sp.gr. 1.013; visc. 243 cps; f.p. -6 C; cloud pt. 17 C (1% aq.); nonionic

**Surfonic® LF-37** [Huntsman]  
*Chem. Descrip.:* Alkyl polyoxyalkylene ether  
*Uses:* Surfactant, wetting agent, detergent for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents; low foaming  
*Properties:* Liq.; disp. in water; sp.gr. 0.9904; visc. 95 cps; f.p. -12 C; cloud pt. 17 C (1% aq.); 100% conc.; nonionic

**Surfonic® LF-40** [Huntsman]  
*Chem. Descrip.:* Alkoxyated alcohol  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents; low foaming  
*Properties:* Liq.; disp. in water; sp.gr. 0.9652; visc. 48 cps; wetting 11.8 s (0.1% in deionized water); 100% conc.; nonionic

**Surfonic® LF-41** [Huntsman]  
*Chem. Descrip.:* Alkoxyated nonylphenol  
 CAS 68891-11-2  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents; low foaming  
*Properties:* Liq.; sol. in water; sp.gr. 1.0343; visc. 270 cps; cloud pt. 37 C (1% aq.); wetting 4.3 s (0.1%, in deionized water); 100% conc.; nonionic

**Surfonic® LF-47** [Huntsman]  
*Chem. Descrip.:* Alcohol alkoxyolate  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents  
*Properties:* Insol. in water; sp.gr. 0.969; visc. 140 cps; f.p. < -20 C; nonionic

**Surfonic® LF-68** [Huntsman]  
*Chem. Descrip.:* Alcohol alkoxyolate  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents  
*Properties:* Insol. in water; sp.gr. 0.9742; visc. 119 cps; f.p. -4 C; cloud pt. 7.5 ml water (water titration); nonionic

**Surfonic® LF-0312** [Huntsman]  
*Chem. Descrip.:* Alcohol alkoxyolate  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents  
*Properties:* Disp. in water; sp.gr. 1.013; visc. 240 cps; f.p. -6 C; cloud pt. 17 C (1% aq.); nonionic

**Surfonic® N-10** [Huntsman]  
*Chem. Descrip.:* Nonoxynol-1  
 CAS 9016-45-9; EINECS/ELINCS 248-762-5  
*Uses:* W/o emulsifier, foam stabilizer, defoamer, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, petrol, cosmetic, latex paint, cutting oil, janitorial supply industries; coemulsifier for surfactant and solvent blends; food pkg. adhesives, coatings, paper, cellophane, animal glues; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200,

177.1200, 177.1210, 178.3120

*Properties:* Clear sl. visc. liq.; water-insol.; oil-sol.; m.w. 273; sp.gr. 0.980 (20/20 C); dens. 8.1 lb/gal; visc. 575 cps; HLB 3.9; hyd. no. 206; pour pt. -9 C; flash pt. (PMCC) 171 C; Ross-Miles foam 5 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-31.5** [Huntsman]

*Chem. Descrip.:* Nonoxynol-3

CAS 9016-45-9

*Uses:* W/o emulsifier, defoamer, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, petrol, cosmetic, latex paint, cutting oil, janitorial supply industries, solv. emulsion cleaners, dry cleaning detergents; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 178.3120

*Properties:* Clear sl. visc. liq.; water-insol., oil-sol.; m.w. 358; sp.gr. 1.01; dens. 8.4 lb/gal; visc. 294 cps; HLB 7.7; hyd. no. 157; pour pt. -4 C; flash pt. (PMCC) 207 C; ref. index 1.4950; Ross-Miles foam 8 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-40** [Huntsman]

*Chem. Descrip.:* Nonoxynol-4

CAS 9016-45-9; EINECS/ELINCS 230-770-5

*Uses:* W/o emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, petrol., cosmetic, latex paint, cutting oil, janitorial supply industries, solv. emulsion cleaners, dry cleaning detergents; latex stabilizer; detergent for petrol. oils; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Clear sl. visc. liq.; insol. in water; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, Stoddard; m.w. 396; sp.gr. 1.026; dens. 8.5 lb/gal; visc. 255 cps; HLB 8.9; hyd. no. 142; pour pt. -7 C; flash pt. (PMCC) 182 C; ref. index 1.4979; surf. tens. 27.5 dynes/cm (0.1%); Ross-Miles foam 10 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-60** [Huntsman]

*Chem. Descrip.:* Nonoxynol-6

CAS 9016-45-9

*Uses:* W/o and o/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, petrol, cosmetic, latex paint, cutting oil, janitorial supply industries; de-icing aid; rust inhibitor; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Clear sl. visc. liq.; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, Stoddard solv.; disp. in water; m.w. 484; sp.gr. 1.041; dens. 8.7 lb/gal; visc. 239 cps; f.p. < 0 C; HLB 10.9; hyd. no. 116; pour pt. -7 C; flash pt. (PMCC) 221 C; ref. index 1.4938; surf. tens. 28.7 dynes/cm (0.1%); Draves wetting 6 s (0.25%); Ross-Miles foam 12 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-70** [Huntsman]

*Chem. Descrip.:* Nonoxynol-7

CAS 9016-45-9; EINECS/ELINCS 248-292-0

*Uses:* Surfactant, detergent, wetting agent, surf. tens. reducer, penetrant, dispersant for agric., metal/min. processing, pulp/paper, household laundry detergents, industrial cleaners, textiles, emulsion polymerization; low to mod. foaming; generally inert

*Properties:* Disp. in water; m.w. 528; HLB 11.7; hyd. no. 106; cloud pt. 77 C (1% in 10% NaCl); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-80** [Huntsman]

*Chem. Descrip.:* Nonoxynol-8

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier, dispersant for leather, paint, textiles, pesticides, pulp/paper, emulsion polymerization; base surfactant for household and industrial detergents

*Properties:* Clear liq.; water-sol.; HLB 12.4; cloud pt. 23-27 C (1% aq.);

100% act.; nonionic

**Surfonic® N-85** [Huntsman]

*Chem. Descrip.:* Nonoxynol-8.5

CAS 9016-45-9

*Uses:* W/o emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, petrol, cosmetics, latex paints, cutting oils, janitorial supply industries; wash deinking agent for pulp/paper; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Use Level:* 0.1-0.5% (paper deinking)

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Liq.; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, water; m.w. 594; sp.gr. 1.056; dens. 8.8 lb/gal; visc. 251 cps; f.p. -1 C; HLB 12.6; hyd. no. 94; pour pt. 10 C; cloud pt. 44 C (1% aq.); flash pt. (PMCC) 243 C; ref. index 1.4923; surf. tens. 30.5 dynes/cm (0.1%); Draves wetting 3.5 s (0.25%); Ross-Miles foam 40 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-95** [Huntsman]

*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries, food pkg.; pitch dispersant for pulp/paper mill applics.; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Colorless to straw clear sl. visc. liq., sl. odor; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, water; m.w. 632; sp.gr. 1.061; dens. 8.8 lb/gal; visc. 293 cps; f.p. 5 C; HLB 13.1; hyd. no. 90; cloud pt. 54.2 (1% aq.); flash pt. (PMCC) 238 C; ref. index 1.4893; pH 7.0; surf. tens. 30.8 dynes/cm (0.1%); Draves wetting 3 s (0.25%); Ross-Miles foam 80 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) 3 g/kg (sl. toxic); eye irritant; sl. to severe skin irritant

*Environmental:* Biodeg.

**Surfonic® N-100** [Huntsman]

*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Clear sl. visc. liq.; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, water; m.w. 660; sp.gr. 1.064; dens. 8.8 lb/gal; visc. 250 cps; f.p. 8 C; HLB 13.3; hyd. no. 85; cloud pt. 65 C (1% aq.); flash pt. (PMCC) 213 C; ref. index 1.4888; surf. tens. 31.0 dynes/cm (0.1%); Draves wetting 4 s (0.25%); Ross-Miles foam 85 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-102** [Huntsman]

*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Clear sl. visc. liq.; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, water; m.w. 668; sp.gr. 1.065; dens. 8.8 lb/gal; visc. 290 cps; f.p. 9 C; HLB

13.5; hyd. no. 84; cloud pt. 81 C (1% aq.); flash pt. (PMCC) 204 C; ref. index 1.4884; surf. tens. 31.2 dynes/cm (0.1%); Draves wetting 4.5 s (0.25%); Ross-Miles foam 85 mm (initial, 0.1%, 120 F); 100% act.; non-ionic

*Environmental:* Biodeg.

**Surfonic® N-110** [Huntsman]

*Chem. Descrip.:* Nonoxynol-11

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, surf. tens. reducer, penetrant, dispersant for agric., metal/min. processing, pulp/paper, household laundry detergents, industrial cleaners, textiles, emulsion polymerization; low to mod. foaming; generally inert

*Properties:* Sol. in water; m.w. 704; visc. 278 cps; HLB 13.8; hyd. no. 79.7; cloud pt. 72 C (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-120** [Huntsman]

*Chem. Descrip.:* Nonoxynol-12

CAS 9016-45-9

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, petrol, cosmetic, latex paint, cutting oil, janitorial supply industries; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 176.300, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Clear sl. visc. liq.; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, water; m.w. 748; sp.gr. 1.070; dens. 8.9 lb/gal; visc. 308 cps; f.p. 14 C; HLB 14.1; hyd. no. 75; cloud pt. 81 C (1% aq.); flash pt. (PMCC) 204 C; ref. index 1.4869; surf. tens. 32.3 dynes/cm (0.1%); Draves wetting 7 s (0.25%); Ross-Miles foam 110 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-150** [Huntsman]

*Chem. Descrip.:* Nonoxynol-15

CAS 9016-45-9

*Uses:* O/w emulsifier, detergent, degreaser, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, petrol, cosmetic, latex paint, cutting oil, janitorial supply industries; rec. for acid cleaners, hard surf. cleaners; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper/paperboard; enhanced high temp. stability

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 178.3120

*Properties:* Wh. waxy solid; sol. in acetone, methanol, xylene, CCl<sub>4</sub>, water; m.w. 880; sp.gr. 1.065 (30/4 C); dens. 8.95 lb/gal; visc. 306 cps; f.p. 23 C; HLB 15.0; hyd. no. 64; cloud pt. 94 C (1% aq.); flash pt. (PMCC) 224 C; ref. index 1.4815 (30 C); surf. tens. 34.2 dynes/cm (0.1%); Draves wetting 17 s (0.25%); Ross-Miles foam 120 mm (initial, 0.1%, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-200** [Huntsman]

*Chem. Descrip.:* Nonoxynol-20

CAS 9016-45-9

*Uses:* O/w emulsifier, detergent, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, crude oils, cosmetic, latex paint, cutting oil, janitorial supply industries, emulsion polymerization; effective emulsifier for waxes, oils, fats, and solvs.; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings; rec. for high temp. and high electrolyte applics.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120

*Properties:* Waxy solid; water-sol.; m.w. 1100; dens. 9.0 lb/gal; f.p. 34 C; HLB 15.8; hyd. no. 51; cloud pt. 72-73 C (1% in 10% brine); flash pt. (PMCC) 232 C; 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-300** [Huntsman]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* O/w emulsifier, detergent, penetrant, solubilizer, dispersant for household cleaners, textile, agric., metal cleaning, petrol, cosmetic, latex paint, cutting oil, janitorial supply industries, emulsion polymerization; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact

articles; defoamer in food-contact coatings; rec. for high temp. and high electrolyte applics.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99

*Properties:* Solid; sol. in water; m.w. 1540; dens. 9.1 lb/gal; visc. 150-170 SUS (210 F); f.p. 44 C; HLB 17.1; hyd. no. 39; pour pt. 38 C; cloud pt. > 100 C (1% aq.); flash pt. (PMCC) > 232 C; ref. index 1.4690 (50 C); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-400** [Huntsman]

*Chem. Descrip.:* Nonoxynol-40

CAS 9016-45-9

*Uses:* O/w emulsifier, solubilizer used in textile scouring, agric. formulations, emulsion polymerization; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings; rec. for high temp. and high electrolyte applics.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99

*Properties:* Solid; sol. in water; m.w. 1980; HLB 17.8; hyd. no. 28; f.p. 43 C; flash pt. (PMCC) 277 C; 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-500** [Huntsman]

*Chem. Descrip.:* Nonoxynol-50

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, surf. tens. reducer, penetrant, dispersant for agric., metal/min. processing, pulp/paper, household laundry detergents, industrial cleaners, textiles, emulsion polymerization; low to mod. foaming; generally inert

*Properties:* Sol. in water; m.w. 2420; f.p. 57 C; HLB 18.2; hyd. no. 24; 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® N-550** [Huntsman]

*Chem. Descrip.:* Nonoxynol-55

CAS 9016-45-9

*Uses:* O/w emulsifier, solubilizer for floor finishes; freeze/thaw stabilizer in latexes; intermediate for solv. emulsion cleaners; food-contact coatings, paper, cellophane, animal glues; defoamer in food-contact coatings; exc. stability at high temps.

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 182.99

*Properties:* Solid; highly water-sol.; m.w. 2640; HLB 18.3; hyd. no. 20; f.p. 57 C; nonionic

*Environmental:* Biodeg.

**Surfonic® N-700** [Huntsman]

*Chem. Descrip.:* Nonoxynol-70

CAS 9016-45-9

*Uses:* O/w emulsifier, solubilizer for floor finishes; freeze/thaw stabilizer in latexes; intermediate for solv. emulsion cleaners; food-contact coatings, paper, cellophane, animal glues; defoamer in food-contact coatings; exc. stability at high temps.

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 182.99

*Properties:* Solid; highly water-sol.; m.w. 3300; HLB 18.7; hyd. no. 17; f.p. 58 C; nonionic

*Environmental:* Biodeg.

**Surfonic® N-1000** [Huntsman]

*Chem. Descrip.:* Nonoxynol-100

CAS 9016-45-9

*Uses:* O/w emulsifier, solubilizer used in mfg. of asphalt and emulsion polymerization; food-contact coatings, paper, cellophane, animal glues; defoamer in food-contact coatings; exc. stability at high temps.

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120

*Properties:* Solid; highly water-sol.; m.w. 4620; HLB 19.0; hyd. no. 13; f.p. 60 C; 100% conc.; nonionic

*Environmental:* Biodeg.

**Surfonic® NB-307** [Huntsman]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* O/w emulsifier, solubilizer, and stabilizer for polymers, dye assistant, textile scouring agents, agric. formulations, emulsion polymerization; food pkg. adhesives, coatings, paper, cellophane, polymers; emulsifier in mfg. of

food-contact articles; defoamer in food-contact coatings; rec. for high temp. and high electrolyte applics.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99

*Properties:* Liq.; water-sol.; m.w. 1540; HLB 17.1; hyd. no. 39; pour pt. 2 C; cloud pt. 78 C (1% in 10% NaCl); flash pt. (COC) > 196 C; 70% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® NB-407** [Huntsman]

*Chem. Descrip.:* Nonoxynol-40

CAS 9016-45-9

*Uses:* O/w emulsifier, solubilizer, and stabilizer for polymers, dye assistant, textile scouring agents, agric. formulations, emulsion polymerization; food pkg. adhesives, coatings, paper, cellophane, polymers; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings; rec. for high temp. and high electrolyte applics.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99

*Properties:* Liq.; water-sol.; m.w. 1980; HLB 17.8; hyd. no. 28; 70% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® NB-557** [Huntsman]

*Chem. Descrip.:* Nonoxynol-55

CAS 9016-45-9

*Uses:* O/w emulsifier for emulsion polymerization; emulsifier and stabilizer for asphalt emulsion; solubilizer; food pkg. coatings, paper, cellophane, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 182.99

*Properties:* Liq.; water-sol.; m.w. 2640; dens. 1.101 g/ml; visc. 1266 cps; HLB 18.3; pour pt. 13 C; flash pt. (PMCC) > 99 C; 70% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® NB-1007** [Huntsman]

*Chem. Descrip.:* Nonoxynol-100

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, surf. tens. reducer, penetrant, dispersant for agric., metal/min. processing, pulp/paper, household laundry detergents, industrial cleaners, textiles, emulsion polymerization; low to mod. foaming; generally inert

*Properties:* Sol. in water; m.w. 4620; HLB 19; pour pt. 0 C; 70% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® OP-15** [Huntsman]

*Chem. Descrip.:* Octoxynol-1.5

CAS 9002-93-1; EINECS/ELINCS 264-520-1

*Uses:* W/o emulsifier for surfactant and solv. prep. blends such as in pesticides, dry cleaning formulations, and polishes; food pkg. adhesives, coatings, paper, cellophane, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 182.99

*Properties:* Liq.; insol. in water; highly oil-sol.; m.w. 277; sp.gr. 0.985 (20/20 C); visc. 790 cps; HLB 5.1; hyd. no. 214; pour pt. -9 C; nonionic

*Environmental:* Biodeg.

**Surfonic® OP-35** [Huntsman]

*Chem. Descrip.:* Octoxynol-3.5

CAS 9002-93-1

*Uses:* W/o emulsifier, wetting agent, dispersant, detergent used for herbicides, metal cleaners, floor cleaners; food pkg. adhesives, coatings, paper, cellophane, polymers; defoamer in food-contact coatings; low foaming

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 182.99

*Properties:* Liq.; insol. in water; sp.gr. 1.023 (20/20 C); visc. 370 cps; HLB 8.6; hyd. no. 163; pour pt. -23 C; nonionic

*Environmental:* Biodeg.

**Surfonic® OP-50** [Huntsman]

*Chem. Descrip.:* Octoxynol-5

CAS 9002-93-1

*Uses:* W/o and o/w emulsifier for oils and fats; surfactant, wetting agent, emulsifier used in detergents, metal and hard surf. cleaners, solv. emulsion cleaners, pesticides, paper processing, textile mfg.; food pkg. adhesives, coatings, paper, cellophane, polymers; defoamer in food-contact coatings; emulsifier in mfg. of food-contact articles; multipurpose

*Regulatory:* FDA 21CFR §172.710, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Liq.; disp. in water; m.w. 426; sp.gr. 1.040 (20/20 C); visc. 290 cps; HLB 10.3; hyd. no. 141; pour pt. -9 C; 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® OP-70** [Huntsman]

*Chem. Descrip.:* Octoxynol-7

CAS 9002-93-1

*Uses:* Hard surface detergent; o/w emulsifier for oils and fats; wetting agent, emulsifier used in detergents, metal and hard surf. cleaners, solv. emulsion cleaners, pesticides, paper processing, textile mfg.; food pkg. adhesives, coatings, paper, cellophane, polymers; defoamer in food-contact coatings; emulsifier in mfg. of food-contact articles; low foaming

*Regulatory:* FDA 21CFR §172.710, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Liq.; sol. in water; m.w. 514; sp.gr. 1.054 (20/20 C); visc. 260 cps; HLB 12.0; hyd. no. 108; pour pt. -26 C; cloud pt. 23 C (1% DI water); 100% conc.; nonionic

*Environmental:* Biodeg.

**Surfonic® OP-100** [Huntsman]

*Chem. Descrip.:* Octoxynol-10

CAS 9002-93-1

*Uses:* Surfactant, o/w emulsifier used in household and industrial detergents, hot soak tank cleaners, metal cleaners; food pkg. adhesives, coatings, paper, cellophane, polymers; defoamer in food-contact coatings; emulsifier in mfg. of food-contact articles; rec. for high temp. and high electrolyte applics.

*Regulatory:* FDA 21CFR §172.710, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Liq.; sol. in water; m.w. 646; sp.gr. 1.065 (20/20 C); visc. 240 cps; HLB 13.6; pour pt. 2 C; cloud pt. 66 C (1% in DI water); Draves wetting 3.6 s (0.1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® OP-120** [Huntsman]

*Chem. Descrip.:* Octoxynol-12

CAS 9002-93-1

*Uses:* O/w emulsifier, solubilizer used in metal cleaning, industrial and household liq. detergents and cleaners, hard surf. cleaners, floor cleaners, detergent sanitizers; food pkg. adhesives, coatings, paper, cellophane, polymers; defoamer in food-contact coatings; emulsifier in mfg. of food-contact articles; rec. for high temp. and high electrolyte applics.

*Regulatory:* FDA 21CFR §172.710, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.1010, 178.3120, 178.3400, 182.99

*Properties:* Liq.; water-sol.; m.w. 734; sp.gr. 1.071 (20/20 C); visc. 330 cps; HLB 14.4; hyd. no. 77; cloud pt. 58 C (1% in 10% NaCl); Draves wetting 5.7 s (0.1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® OPB-167** [Huntsman]

*Chem. Descrip.:* Octoxynol-16 in water

CAS 9002-93-1

*Uses:* Coemulsifier for petrol. oils and solvs.; emulsifier in emulsion polymerization; wetting agent for acid and alkaline household and industrial detergents; surfactant in textiles, pulp/paper processing

*Properties:* Sol. in water; m.w. 910; visc. 470 cps; HLB 15.5; pour pt. 16 C; cloud pt. 67 C (1% in 19% NaCl); nonionic

**Surfonic® OPB-407** [Huntsman]

*Chem. Descrip.:* Octoxynol-40

CAS 9002-93-1

*Uses:* O/w emulsifier and stabilizer for polymers and waxes; dye assistant; textile scouring agent; solubilizer; food pkg. adhesives, coatings, paper, cellophane, polymers; defoamer in food-contact coatings; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.710, 175.105, 175.300, 176.170, 176.180, 176.200, 177.1200, 177.1210, 178.3120, 178.3400, 182.99

*Properties:* Liq.; water-sol.; m.w. 1966; sp.gr. 1.102 (20/20 C); visc. 490 cps; f.p. 10 C; HLB 17.9; hyd. no. 28; cloud pt. 75 C (1% in 10% NaCl); Draves wetting 367 s (0.1% aq.); 70% act.; nonionic

*Environmental:* Biodeg.

**Surfonic® P-1** [Huntsman]

*Chem. Descrip.:* Alcohol alkoxylate

*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-

- purpose laundry detergents  
*Properties:* Sol. in water; sp.gr. 0.975; visc. 90 cps; f.p. -30 C; cloud pt. 25 C (1% aq.); wetting 16 s (0.1%, in deionized water); nonionic
- Surfonic® P-3** [Huntsman]  
*Chem. Descr.:* Alcohol alkoxylate  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents  
*Properties:* Sol. in water; sp.gr. 0.973; visc. 56 cps; f.p. -30 C; cloud pt. 35 C (1% aq.); wetting 7.2 s (0.1%, in deionized water); nonionic
- Surfonic® P-5** [Huntsman]  
*Chem. Descr.:* Alcohol alkoxylate  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents  
*Properties:* Sol. in water; sp.gr. 0.985; visc. 85 cps; f.p. -26 C; cloud pt. 45 C (1% aq.); wetting 9.7 s (0.1%, in deionized water); nonionic
- Surfonic® P-6** [Huntsman]  
*Chem. Descr.:* Alcohol alkoxylate  
*Uses:* Surfactant for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, low foaming heavy-duty and all-purpose laundry detergents  
*Properties:* Sol. in water; sp.gr. 1.018; f.p. 4 C; cloud pt. 35 C (10% in 25% butyl diglycol); wetting 12.6 s (0.1%, in deionized water); nonionic
- Surfonic® POA-25R2** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.02; visc. 580 cps; HLB 6.3; f.p. - 5 C; cloud pt. 30 C (1%); nonionic
- Surfonic® POA-L42** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.04; visc. 225-310 cps; HLB 4.2; f.p. - 26 C; cloud pt. 37 C (1%); nonionic
- Surfonic® POA-L44** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.04; visc. 440 cps; HLB 16; pour pt. 16 C; cloud pt. 71 C (10%); nonionic
- Surfonic® POA-L61** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.02; visc. 366 cps; HLB 3; pour pt. - 30 C; cloud pt. 24 C (1%); nonionic
- Surfonic® POA-L62** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.04; visc. 450 cps; HLB 7; pour pt. - 4 C; cloud pt. 32 C (1%); nonionic
- Surfonic® POA-L62LF** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6
- Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.04; visc. 300-650 cps; HLB 6.6; pour pt. - 10 C; cloud pt. 28 C (1%); nonionic
- Surfonic® POA-L64** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.04; visc. 400-800 cps; HLB 15; pour pt. 16 C; cloud pt. 57 C (10%); nonionic
- Surfonic® POA-L81** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Disp. in water; sp.gr. 1.02; visc. 518 cps; HLB 2; pour pt. - 20 C; cloud pt. 20 C (1%); nonionic
- Surfonic® POA-L101** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Insol. in water; sp.gr. 1.02; visc. 800 cps; HLB 1; pour pt. - 23 C; cloud pt. 15 C (1%); nonionic
- Surfonic® POA-LF1** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.01; visc. 366 cps; HLB 3; pour pt. - 25 C; cloud pt. 24 C (1%); nonionic
- Surfonic® POA-LF2** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.04; visc. 320-450 cps; cloud pt. 32 C (1%); nonionic
- Surfonic® POA-LF5** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Sol. in water; sp.gr. 1.01; visc. 108 cps; cloud pt. 25 C (10%); nonionic
- Surfonic® POA-S38** [Huntsman]  
*Chem. Descr.:* EO/PO block copolymer  
CAS 9003-11-6  
*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper  
*Properties:* Solid; sol. in water; cloud pt. 100 C min. (10%); nonionic
- Surfonic® TDA-9** [Huntsman]  
*Chem. Descr.:* Isotrideceth-9  
*Uses:* O/w emulsifier, dispersant, wetting agent, detergent, degreaser for hard surf. cleaners, textile processing; pitch dispersant for pulp/paper processing

*Properties:* Liq.; sol. in water; m.w. 595; HLB 13.3; hyd. no. 94; pour pt. 18 C; cloud pt. 54 C (1% DI water); 100% act.; nonionic

*Environmental:* Biodeg.

*Storage:* Hygroscopic; protect from moisture

**Surfonic® TOFA-5** [Huntsman]

*Chem. Descrip.:* PEG-5 tallate

CAS 61791-00-2

*Uses:* Emulsifier for min. and animal oils, cosmetics, agric.; defoamer in effluent treatment, pulp/paper processes; low foaming additive in detergents, I&I hard surf. cleaners, pulp/paper chems.

*Properties:* M.w. 535; HLB 8.2; hyd. no. 113; sapon. no. 108; pH 7.0; nonionic

**Surfonic® TOFA-6** [Huntsman]

*Chem. Descrip.:* PEG-6 tallate

CAS 61791-00-2

*Uses:* Emulsifier for min. and animal oils, cosmetics, agric.; defoamer in effluent treatment, pulp/paper processes; low foaming additive in detergents, I&I hard surf. cleaners, pulp/paper chems.

*Properties:* M.w. 558; HLB 9.7; sapon. no. 104; nonionic

**Surfonic® TOFA-X10** [Huntsman]

*Chem. Descrip.:* PEG-10 tallate

CAS 61791-00-2

*Uses:* Emulsifier for min. and animal oils, cosmetics, agric.; defoamer in effluent treatment, pulp/paper processes; low foaming additive in detergents, I&I hard surf. cleaners, pulp/paper chems.

*Properties:* M.w. 817; HLB 13.0; sapon. no. 66; nonionic

**Surfonic® TOFA-20** [Huntsman]

*Chem. Descrip.:* PEG-20 tallate

CAS 61791-00-2

*Uses:* Emulsifier for min. and animal oils, cosmetics, agric.; defoamer in effluent treatment, pulp/paper processes; low foaming additive in detergents, I&I hard surf. cleaners, pulp/paper chems.

*Properties:* M.w. 1415; HLB 14.8; sapon. no. 48; nonionic

**Surfynol® 61** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* 3,5-Dimethyl 1-hexyn-3-ol

CAS 107-54-0; EINECS/ELINCS 203-500-9

*Uses:* Surfactant, wetting agent used for paper coatings, inks, floor polishes, and glass cleaning formulations; cleaner in silicon wafer industry

*Properties:* Colorless clear liq., camphoric odor; misc. with acetone, benzene, CCl<sub>4</sub>, diethylene glycol, ethanol, ethyl acetate, kerosene, MEK, min. oil, min. spirits, petrol. ether, Stod., naphtha; sp.gr. 0.8545; dens. 7.2 lb/gal; f.p. -68 C; b.p. 151 C; HLB 6-7; flash pt. (TOC) 135 F; ref. index 1.4353; surf. tens. 56.4 (0.1% aq.); Draves wetting < 300 s (0.1%); 100% act.; nonionic

**Surfynol® 104A** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* Tetramethyl decylenediol and 2-ethyl hexanol

*Uses:* Defoamer, wetting agent for PVC prod., emulsion polymerization, pesticides, coatings, dyestuffs, paper coatings, aq. systems; lubricant for metalworking formulations

*Regulatory:* EPA approved

*Properties:* Lt. yel. liq.; sp.gr. 0.869; dens. 7.2 lb/gal; HLB 4.0; m.p. < 0 C; surf. tens. 33.0 (0.1% aq.); 50% conc.; nonionic

**Surfynol® 104BC** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* Tetramethyl decylenediol in 2-butoxy ethanol

*Uses:* Wetting agent, defoamer in aq. systems, e.g., coatings, adhesives, inks, cements, metalworking fluids, latex dipping and paper coatings

*Properties:* Lt. yel. mobile liq., menthol odor; sol. < 1% in water; sp.gr. 0.903; dens. 7.6 lb/gal; vapor pressure 11 mm Hg; HLB 4.0; m.p. < -40 C; b.p. 111 C (100 mm); flash pt. (Seta CC) 76 C; 50% conc.; nonionic

*Toxicology:* LD50 (oral, rat) 1400 mg/kg, (dermal, rabbit) > 10,000 mg/kg; severe eye irritant; mod. skin irritant; mod. respiratory tract irritant; absorp. thru skin may cause headache, nausea; TSCA listed

*Precaution:* Combustible; ignition will cause class B fire; incompat. with oxidizing agents, dehydrating agents, alkalis

*Hazardous Decomp. Prods.:* Flamm. HC fragments, CO, CO<sub>2</sub>, irritating and toxic fumes at elevated temps.

*Storage:* Store in cool, dry, ventilated area in closed containers; keep away from oxidizers, heat, flame

**Surfynol® 104DPM** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* 50% Surfynol 104 in dipropylene glycol monomethyl ether

*Uses:* Wetting agent and defoamer for coatings (acrylic, alkyd, epoxy, SBR, PU, PVAc), inks, adhesives, paper coatings, overprint varnishes, fountain

sol'ns., pigments, dye milling, agric., foundry, hard-surf. cleaners, emulsion polymerization; exc. dynamic wetting and foam control

*Regulatory:* DOT nonregulated; SARA §313 nonreportable; SARA §312 hazard

*Properties:* Lt. yel. liq., menthol odor; sol. 0.2% in water; sp.gr. 0.928, dens. 7.8 lb/gal, m.p. -5 C; b.p. 212 C; HLB 4; flash pt. (CC) 89 C; 75% act.

*Toxicology:* LD50 (oral, rat) > 1860 mg/kg, (skin, rabbit) > 2000 mg/kg; severe eye irritant; mild skin irritant; TSCA listed

*Precaution:* Combustible; keep away from oxidizers, heat, flames, sparks; incompat. with reactive metals, hypochlorite, dehydrators; reaction with peroxides may result in violent decomp. of peroxide, possibly explosion

*Hazardous Decomp. Prods.:* May generate CO, CO<sub>2</sub>, flamm. hydrocarbon fragments, aldehydes, ketones upon burning

HMS: Health 2; Flammability 2; Reactivity 0

*Storage:* Store in cool, dry area in closed containers

**Surfynol® 104E** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* 50% Surfynol 104 (tetramethyl decylenediol); 50% ethylene glycol

*Uses:* Wetting agent, defoamer, dispersant, visc. stabilizer for emulsion polymerization, PVC prod., coatings, latex dipping, paper coatings, foundry, adhesives, dyes, pigments, oil field, hard surf. cleaners, metalworking fluids, textiles, cement, electroplating

*Regulatory:* EPA approved

*Properties:* Lt. yel. clear liq., sol. 0.2% in water; sp.gr. 0.999, dens. 8.3 lb/gal, m.p. < 0 C; HLB 4; surf. tens. 36.2 (0.1% aq.); 50% conc.; nonionic

**Surfynol® 104H** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* Tetramethyl decylenediol in ethylene glycol

*Uses:* Wetting agent, defoamer in aq. systems, e.g., coatings, adhesives, inks, cements, metalworking fluids, latex dipping and paper coatings

*Properties:* Lt. yel. clear liq.; sp.gr. 0.951; dens. 7.9 lb/gal; HLB 4.0; m.p. 10 C; surf. tens. 33.8 (0.1% aq.); 75% conc.; nonionic

**Surfynol® 104NP** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* 50% Surfynol 104 (tetramethyl decylenediol) in n-propyl alcohol

*Uses:* Surfactant, wetting agent, dispersant, visc. stabilizer, and defoamer for aq. systems incl. coatings, printing inks, wood finishes, overprint varnishes, fountain sol'ns., pressure-sensitive adhesives, paper coatings, agric., metalworking fluids, cement

*Properties:* Lt. yel. liq.; sp.gr. 0.856; dens. 7.1 lb/gal; m.p. -20 C; HLB 4.0; 50% act.; nonionic

**Surfynol® 104PA** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* Tetramethyl decylenediol in IPA

*Uses:* Wetting agent, defoamer in aq. systems, e.g., coatings, adhesives, inks, cements, metalworking fluids, latex dipping, paper coatings, emulsion polymerization, PVC prod.

*Properties:* Lt. yel. liq.; sp.gr. 0.839 (25 C); dens. 8.1 lb/gal; HLB 4.0; m.p. -16 C; 50% conc.; nonionic

**Surfynol® 104PG-50** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* 50% Surfynol 104 (tetramethyl decylenediol); 50% propylene glycol

*Uses:* Wetting agent, defoamer for coatings, paper coatings, aq. inks, overprint varnishes, fountain sol'ns., adhesives, pigments, dye milling, agric., foundry, hard-surf. cleaners, emulsion polymerization, electroplating

*Properties:* Lt. yel. liq., sol. 0.2% in water; sp.gr. 0.971, dens. 8.1 lb/gal, m.p. -16 C, HLB 4; 50% conc.; nonionic

**Surfynol® 420** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* PEG-1.3 tetramethyl decylenediol

*Uses:* Wetting agent, defoamer, dispersant for aq. coatings, inks, adhesives, agric., electroplating, oil field chems., paper coatings; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.200

*Properties:* Straw-colored liq.; sol. in CCl<sub>4</sub>, xylene, ethylene glycol, min. oil; sl. sol. in dist. water; sp.gr. 0.943; visc. < 250 cps; HLB 4.0; pour pt. -13 F; pH 6-8 (1% aq.); surf. tens. 32 dynes/cm (0.1%); nonionic

**Surfynol® 440** [Air Prods./Perf. Chem.s.]

*Chem. Descrip.:* PEG-3.5 tetramethyl decylenediol

CAS 9014-85-1

*Uses:* Defoamer, rewetting agent, and leveling agent for paperboard coatings, agric., water-based industrial finishes; metal cleaning and plating bath additive; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.200; EPA compliance

*Properties:* Straw clear liq.; sol. in CCl<sub>4</sub>, xylene, ethylene glycol, min. oil; sl. sol. in dist. water; sp.gr. 0.982; HLB 8.0; pour pt. -55 F; pH 6-8 (1% aq.); surf. tens. 33.2 dynes/cm (0.1% aq.); 100% conc.; nonionic

**Surfynol® 465** [Air Prods./Perf. Chems.]

*Chem. Descr.:* PEG-10 tetramethyl decynediol  
CAS 9014-85-1

*Uses:* Wetting agent, defoamer for aq. coatings, inks, adhesives; surfactant for emulsion polymerization; electroplating additive; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1210, EPA compliance

*Properties:* Straw clear liq.; sol. in water, CCl<sub>4</sub>, xylene, ethylene glycol, min. oil; sp.gr. 1.038; visc. < 200 cps; HLB 13.0; pour pt. 44 F; cloud pt. 63 C (5%); pH 6-8 (1% aq.); surf. tens. 33.2 (0.1% aq.); 100% conc.; nonionic

**Surfynol® 485** [Air Prods./Perf. Chems.]

*Chem. Descr.:* PEG-30 tetramethyl decynediol  
CAS 9014-85-1

*Uses:* Wetting agent, defoamer for aq. coatings, inks, adhesives, agric., electroplating, oil field chems., paper coatings, emulsion polymerization; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 177.1210, EPA compliance

*Properties:* Straw clear liq.; sol. in water, CCl<sub>4</sub>, xylene, ethylene glycol, min. oil; sp.gr. 1.080; visc. < 350 cps; HLB 17.0; pour pt. 85 F; cloud pt. > 100 C (5%); pH 6-8 (1% aq.); surf. tens. 40.1 (0.1% aq.); 100% conc.; nonionic

**Surfynol® 502** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Nonsilicone acetylenic diol-based surfactant

*Uses:* Defoamer, flow control agent, leveling agent for coatings (acrylic, alkyd, epoxy, SBR, PU, PVAc), paper coatings, aq. inks, overprint varnishes, fountain sol'ns., dye milling, adhesives, latex dipping, foundry, hard-surf. cleaners; in adhesives for food pkg.; provides exc. defect-free coverage over difficult-to-wet substrates in aq. systems; used over plastics, metals, wood, previously coated materials, inks

*Regulatory:* FDA 21CFR §175.105

*Properties:* Straw-colored clear liq.; sol. 0.15% in water; sp.gr. 0.9436; visc. 170 cps; f.p. 32 F; pour pt. 77 F; cloud pt. none; pH 6.6; surf. tens. 35.2 dynes/cm (dynamic, 0.1% aq.); 78% act.

*Toxicology:* TSCA listed

**Surfynol® 504** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Nonsilicone, solvent-free acetylenic diol-based

*Uses:* Wetting agent for coatings (acrylic, alkyd, epoxy, SBR, PU, PVAc), paper coatings, aq. inks, overprint varnishes, adhesives; food pkg. adhesives, coatings, paper; provides exc. defect-free coverage over difficult-to-wet substrates (plastics, metal, wood, previously coated materials) in aq. systems

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180

*Properties:* Straw-colored clear liq.; sol. 0.55 % in water; sp.gr. 1.0514; visc. 260 cps; f.p. 5 F; pour pt. 32 F; cloud pt. none; pH 6.9; surf. tens. 31.4 dynes/cm (0.1% aq.); 80% act.

**Surfynol® DF-37** [Air Prods./Perf. Chems.; Air Prods. Nederland BV]

*Chem. Descr.:* Silicone-free org. acetylenic-based defoamer

*Uses:* Dewebbing agent; defoamer, wetting agent for latex gloves, aq. coating dipping processes, paper coatings, and other aq. systems (inks, adhesives, coatings, agric., cement, metalworking fluids); food pkg. adhesives, coatings, paper, rubber articles; minimizes web formation

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.2600

*Properties:* Translucent pale yel. liq.; emulsifiable in water; sp.gr. 0.941; b.p. > 380 F; flash pt. > 280 F; 100% act.

**Surfynol® DF-70** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Organic defoamer

*Uses:* Defoamer for aq. systems, printing inks, coatings, paper coatings, adhesives, esp. acrylic and styrene-acrylic formulations; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210

*Properties:* Pale tan opaque liq.; disp. in water; sp.gr. 0.90; visc. 800 cps; b.p. 106 C; flash pt. (Seta) > 229 F; pH 6.9 (5% disp.); 100% act.

**Surfynol® DF-75** [Air Prods./Perf. Chems.; Air Prods. Nederland BV]

*Chem. Descr.:* Silicone-free organic-based defoamer

*Uses:* Defoamer for aq. systems, e.g., inks, adhesives, coatings, overprint varnishes, paper coatings, acrylic systems; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings; minimal contribution to VOC emissions

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.200, 176.210

*Properties:* Amber opaque liq.; disp. in water; sp.gr. 0.99; b.p. 240 F; flash pt. > 400 F; pH 8.0 (5% disp.); 100% act.

**Surfynol® DF-110D** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Higher m.w. acetylenic glycol in dipropylene glycol

*Uses:* Defoamer, de-air entrainment aid for aq. coatings, inks, adhesives, and highly pigmented systems (concrete, paper coatings, grouts, ceramics), PVC prod., emulsion polymerization

*Properties:* Liq.; HLB 3.0; nonionic

**Surfynol® DF-110L** [Air Prods./Perf. Chems.; Air Prods. Nederland BV]

*Chem. Descr.:* Higher m.w. acetylenic glycol in mixed glycols

*Uses:* Defoamer, de-air entrainment aid for aq. coatings, inks, adhesives, and highly pigmented systems (concrete, paper coatings, grouts, ceramics), PVC prod., emulsion polymerization

*Properties:* Liq.; HLB 3.0; nonionic

**Surfynol® DF-695** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Silicone emulsion

*Uses:* Defoamer for water-based coatings (acrylic, alkyd, epoxy, SBR, PU, PVAc) and inks, esp. useful in acrylic-resinated systems; food pkg. adhesives, coatings; defoamer in food-contact coatings; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200

*Properties:* Milky liq.; emulsifiable in water; sp.gr. 1.04; visc. 9000 cps; pH 7.3; 0.3% VOC

**Surfynol® PC** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Acetylenic glycol

CAS 126-86-3; EINECS/ELINCS 204-809-1

*Uses:* Defoamer in paper coating and adhesive latexes; antishock agent for paper coatings

*Properties:* Lt. yel. clear mobile liq.; sp.gr. 0.985; dens. 8.0 lb/gal; pour pt. 15 F; cloud pt. 47 F; 100% conc.; nonionic

**Surfynol® PG-50** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Tetramethyl decynediol in propylene glycol

*Uses:* Wetting agent and defoamer in water-based systems, e.g., coatings, adhesives, inks, cements, metalworking fluids, latex dipping and paper coatings

*Properties:* 50% conc.; nonionic

**Surfynol® PSA-336** [Air Prods./Perf. Chems.]

*Uses:* Surfactant for use in waterborne pressure-sensitive and laminating adhesives; powerful wetting agent providing exc. wetting of low-visc. adhesives over difficult-to-wet surfs. like films and silicone release liners; food pkg. adhesives, coatings, paper; solvent-free; low foaming tendencies

*Use Level:* 0.3-1%

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180

**Surfynol® SE** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Derived from Surfynol 104 (tetramethyl decynediol)

*Uses:* Wetting agent, foam control agent in pressure-sensitive adhesives, aq. lubricants, water-based paints, inks, dye processing, agric. formulations, and paper coatings

*Regulatory:* EPA approved

*Properties:* Lt. yel. liq.; misc. @ 50% in acetone, xylene, kerosene, perchloroethylene, IPA, butyl Cellosolve, propylene glycol; sp.gr. 0.94; dens. 7.8 lb/gal; visc. 160 cps; HLB 4-5; surf. tens. 32 dynes/cm (0.1%); Draves wetting 17 s (0.1%); nonionic

**Surfynol® SE-F** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Surfactant blend

*Uses:* Wetting agent, foam control agent for aq. pressure-sensitive adhesives, aq. lubricants, paints, paper coatings, dye processing, and aq. inks; defoamer in food-contact coatings; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.200

*Properties:* Liq.; HLB 4-5; nonionic

**Surfynol® SM-740** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Polyether-modified silicone prod.

*Uses:* Surfactant, slip agent, mar resist. aid, lubricant, scratch resist. aid for coating and ink films for waterborne or solvent-borne formulations incl. wood and container coatings (acrylic, alkyd, epoxy, SBR, PU, PVAc), overprint varnishes and flexible pkg. inks; food pkg. adhesives, coatings, paper

*Use Level:* 0.25-1%

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180

*Properties:* Clear visc. liq., mild pleasant odor; completely sol. in water; sp.gr. 0.982; dens. 8.7 lb/gal (70 F); visc. < 200 cps; vapor pressure 9.3 mm Hg; b.p. 93 C; flash pt. (Seta) > 230 F; < 1% VOC; 100% act.

*Toxicology:* Mod. eye and respiratory tract irritant; absorp. thru skin may cause nausea, headache; ing. may cause headache, nausea, vomiting; TSCA listed

*Precaution:* Combustible; ignition will cause class B fire; incompat. with oxidizing agents

*Hazardous Decomp. Prods.:* CO, SiO<sub>2</sub>, irritating and toxic fumes at elevated temps.

*Storage:* Store in cool, dry, ventilated area in closed containers away from heat, flames, ignition sources

#### Surfynol® SM-745 [Air Prods./Perf. Chems.]

*Chem. Descrip.:* Polyether-modified silicone prod. in n-butyl alcohol

*Uses:* Slip agent, mar resist. aid, lubricant, and scratch resist. aid for coating and ink films for waterborne or solvent-borne formulations incl. wood and container coatings (acrylic, alkyd, epoxy, SBR, PU, PVAc), overprint varnishes and flexible pkg. inks; food pkg. adhesives, coatings, paper

*Use Level:* 0.25-1%

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180

*Properties:* Lt. tan clear visc. liq., butyl alcohol odor; sl. sol. in water; sp.gr. 0.9; dens. 7.6 lb/gal; visc. 50 cps; b.p. 117 C; flash pt. (Seta) 102 F; 50% VOC; 50% act.

*Toxicology:* Mod. eye and respiratory tract irritant; inh. of vapors may cause coughing and chest pain; ing. may cause headache, nausea, vomiting; TSCA listed

*Precaution:* Combustible; ignition will cause class B fire; incompat. with oxidizing agents

*Hazardous Decomp. Prods.:* CO, SiO<sub>2</sub>, irritating and toxic fumes at elevated temps.

*Storage:* Store in cool, dry, ventilated area in closed containers away from oxidizers, heat, flame, ignition sources

#### Surfynol® TG [Air Prods./Perf. Chems.]

*Chem. Descrip.:* Tetramethyl decynediol and ethylene glycol

*Uses:* Pigment and substrate wetting agent/grinding agent used in latex and water-reducible paints, adhesives, paper coatings, and pigmented aq. systems

*Properties:* Lt. yel. clear liq.; sp.gr. 1.000; HLB 9-10; surf. tens. 27.6 (0.1% aq.); 83% conc.; nonionic

#### Surmax® CS-504 [Chemax]

*Chem. Descrip.:* Surfactant

*Uses:* Surfactant for formulating detergent concs.; mod. foaming agent, wetting agent, detergent for metalworking formulas, paint strippers, tire cleaners, transportation cleaners, dairy and food plant cleaners, paper felt washing, sanitizers, wax strippers; alkaline-stable

*Properties:* Clear amber to brn. liq.; mild odor; sol. in min. acids; sp.gr. 1.19; visc. 1390 cps; pour pt. < 15 F; cloud pt. > 100 C (1% aq.); flash pt. (COC) > 100 C; pH 7 (5% aq.); surf. tens. 38 dynes/cm (0.05% aq.); 80% active in water; modified anionic

*Toxicology:* Nontoxic; moderate to severe eye and skin irritant; LD50 (oral) > 5 g/kg; LD50 (dermal) > 2 g/kg

*Environmental:* Biodeg.

#### Surmax® CS-515 [Chemax]

*Chem. Descrip.:* Surfactant

*Uses:* Surfactant for formulating detergent concs.; mod. foaming agent, wetting agent, detergent for metalworking formulas, paint strippers, tire cleaners, transportation cleaners, dairy and food plant cleaners, paper felt washing, sanitizers, wax strippers; alkaline-stable

*Properties:* Clear amber to brn. liq.; mild odor; sol. in min. acids; sp.gr. 1.20; visc. 1490 cps; pour pt. < 15 F; cloud pt. > 100 C (1% aq.); flash pt. (COC) > 100 C; pH 7 (5% aq.); surf. tens. 40 dynes/cm (0.05% aq.); 80% active in water; modified anionic

*Toxicology:* Nontoxic; moderate to severe eye and skin irritant; LD50 (oral) > 5 g/kg; LD50 (dermal) > 2 g/kg

*Environmental:* Biodeg.

#### Surmax® CS-521 [Chemax]

*Chem. Descrip.:* Surfactant

*Uses:* Surfactant for formulating detergent concs.; wetting agent, detergent for metalworking formulas, paint strippers, tire cleaners, transportation cleaners, dairy and food plant cleaners, paper felt washing, sanitizers, wax strippers; alkaline-stable; low foaming

*Properties:* Clear amber to brn. liq.; mild odor; sol. in min. acids; sp.gr. 1.17; visc. 1280 cps; pour pt. < 15 F; cloud pt. > 100 C (1% aq.); flash pt. (COC) > 100 C; pH 7 (5% aq.); surf. tens. 57 dynes/cm (0.05% aq.); 80% active in water; modified anionic

*Toxicology:* Nontoxic; moderate to severe eye and skin irritant; LD50 (oral) > 5 g/kg; LD50 (dermal) > 2 g/kg

*Environmental:* Biodeg.

#### Surmax® CS-522 [Chemax]

*Chem. Descrip.:* Surfactant

*Uses:* Surfactant for formulating detergent concs.; wetting agent, detergent for metalworking formulas, paint strippers, tire cleaners, transportation cleaners, dairy and food plant cleaners, paper felt washing, sanitizers, wax strippers; alkaline-stable; low foaming

*Properties:* Clear amber to brn. liq.; mild odor; sol. in min. acids; sp.gr. 1.18; visc. 1550 cps; pour pt. < 15 F; cloud pt. > 100 C (1% aq.); flash pt. (COC) > 100 C; pH 7 (5% aq.); surf. tens. 51 dynes/cm (0.05% aq.); 80% active in water; modified anionic

*Toxicology:* Nontoxic; moderate to severe eye and skin irritant; LD50 (oral) > 5 g/kg; LD50 (dermal) > 2 g/kg

*Environmental:* Biodeg.

#### Surmax® CS-555 [Chemax]

*Chem. Descrip.:* Surfactant

*Uses:* Surfactant for formulating detergent concs.; wetting agent, detergent for metalworking formulas, paint strippers, tire cleaners, transportation cleaners, dairy and food plant cleaners, paper felt washing, sanitizers, wax strippers; alkaline-stable

*Properties:* Liq.; 60% act.; modified anionic

*Environmental:* Biodeg.

#### Surmax® CS-586 [Chemax]

*Chem. Descrip.:* Surfactant

*Uses:* Surfactant for formulating detergent concs.; wetting agent, detergent for metalworking formulas, paint strippers, tire cleaners, transportation cleaners, dairy and food plant cleaners, paper felt washing, sanitizers, wax strippers; alkaline-stable

*Properties:* Liq.; 80% act.; modified anionic

*Environmental:* Biodeg.

#### Suspengel 200 [Cimbar Perf. Mins.]

*Chem. Descrip.:* Montmorillonite

*Chem. Analysis:* SiO<sub>2</sub> (63.6%), Al<sub>2</sub>O<sub>3</sub> (21.4%), Fe<sub>2</sub>O<sub>3</sub> (3.8%), Na<sub>2</sub>O (2.7%), MgO (2%)

CAS 1318-93-0; EINECS/ELINCS 215-288-5

*Uses:* Filler used in coatings, adhesives, caulks, sealants, ceramics, pesticides, fertilizers, fungicides, foundry/refractory, water and waste treatment, pond/lake sealing, paper industry

*Properties:* 80% thru 200 mesh (dry); sp.gr. 2.5; bulk dens. 72 (compacted); apparent visc. 9.5 cps; surf. area 20 m<sup>2</sup>/g; oil absorp. 38 lb/100lb; pH (6%) 9

#### Suspengel 325 [Cimbar Perf. Mins.]

*Chem. Descrip.:* Montmorillonite

*Chem. Analysis:* SiO<sub>2</sub> (63.6%), Al<sub>2</sub>O<sub>3</sub> (21.4%), Fe<sub>2</sub>O<sub>3</sub> (3.8%), Na<sub>2</sub>O (2.7%), MgO (2%)

CAS 1318-93-0; EINECS/ELINCS 215-288-5

*Uses:* Filler used in coatings, adhesives, caulks, sealants, ceramics, pesticides, fertilizers, fungicides, foundry/refractory, water and waste treatment, pond/lake sealing, paper industry

*Properties:* 98% thru 325 mesh (dry); sp.gr. 2.5; bulk dens. 60 (compacted); apparent visc. 12.5 cps; surf. area 20 m<sup>2</sup>/g; oil absorp. 41 lb/100lb; pH (6%) 9

#### Suspengel Plus 200 [Cimbar Perf. Mins.]

*Chem. Descrip.:* Montmorillonite

*Chem. Analysis:* SiO<sub>2</sub> (63.3%), Al<sub>2</sub>O<sub>3</sub> (21.4%), Fe<sub>2</sub>O<sub>3</sub> (3.8%), Na<sub>2</sub>O (2.5%), MgO (2.3%)

CAS 1318-93-0; EINECS/ELINCS 215-288-5

*Uses:* Filler used in coatings, adhesives, caulks, sealants, ceramics, pesticides, fertilizers, fungicides, foundry/refractory, water and waste treatment, pond/lake sealing, paper industry

*Properties:* 80% thru 200 mesh (dry); sp.gr. 2.5; bulk dens. 72 (compacted); apparent visc. 18 cps; surf. area 20 m<sup>2</sup>/g; absorp. 20 m<sup>2</sup>/g; oil absorp. 34 lb/100lb; pH (6%) 9

#### Suspengel Plus 325 [Cimbar Perf. Mins.]

*Chem. Descrip.:* Montmorillonite

*Chem. Analysis:* SiO<sub>2</sub> (63.3%), Al<sub>2</sub>O<sub>3</sub> (21.4%), Fe<sub>2</sub>O<sub>3</sub> (3.8%), Na<sub>2</sub>O (2.5%),

- MgO (2.3%)  
 CAS 1318-93-0; EINECS/ELINCS 215-288-5  
*Uses:* Filler used in coatings, adhesives, caulks, sealants, ceramics, pesticides, fertilizers, fungicides, foundry/refractory, water and waste treatment, pond/lake sealing, paper industry  
*Properties:* 98% thru 325 mesh (dry); sp.gr. 2.5; bulk dens. 61 (compacted); apparent visc. 20 cps; surf. area 20 m<sup>2</sup>/g; absorp. 20 m<sup>2</sup>/g; oil absorp. 37 lb/100lb; pH (6%) 9
- Suwax** [Sood Paper & Allied Chems.]  
*Chem. Descrip.:* Modified wax emulsion  
*Uses:* Paper aux. for controlling rosin consumption in sizing of paper and boards; added at hydropulper or mixing chest prior to addition of rosin; imparts better finish, gloss, and printing qualities; good stability to acids  
*Properties:* PH 5.5-6.5; 16 ± 1% solids; nonionic  
*Storage:* 6 mos shelf life
- SWS-101 Dimethyl Fluids** [Wacker Silicones]  
*Chem. Descrip.:* Dimethylpolysiloxane terminated with nonreactive trimethylsilyloxy groups  
 CAS 9006-65-9  
*Uses:* For dielec. coolants, brake fluids, lubricants, auto care prods., release, heat transfer, aerosols, damping media, household prods., antifoam agents, cosmetics, shock absorbers; lubricant, antitackifier, emollient, and water barrier for skin care prods.; food pkg. adhesives; defoamer in food-contact coatings, paper/paperboard; features inertness, heat and oxidative stability, exc. elec. props.  
*Regulatory:* FDA 21CFR §173.340, 175.105, 176.200, 176.210; EPA 40CFR §181.1001(c)(d)  
*Properties:* Colorless clear liq.; misc. with nonpolar liqs. (hydrocarbons, chlorinated hydrocarbons, ethers); range of visc.; ref. index 1.35-1.41; dielec. str. 350 V/mil; dielec. const. 2.7 (100 cycles); vol. resist. 1 x 10<sup>14</sup> ohm-cm (500 V)
- Sylophobic** [Fuji Silysia]  
*Chem. Descrip.:* Syn. amorphous silica treated to be hydrophobic on surface; based on Sylysia grades  
 CAS 112926-00-8; EINECS/ELINCS 231-545-4  
*Uses:* Improves water, weather, and chem. resist. in paints; antiblocking agent in plastics; improves adhesion and water resist. in adhesives; anti-bleeding agent, thickener for inks and papers for printing; also for cosmetics
- Sylvaros® R** [Arizona]  
*Chem. Descrip.:* Polymerized rosin  
*Uses:* Tackifier for pressure-sensitive adhesives, construction adhesives, pick-up gums for labeling; adhesion promoter for difficult-to-bond substrates; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1210, 178.3870  
*Properties:* Gardner 8 color; soften. pt. (R&B) 77 C; acid no. 157
- Sylvatic® 5N** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, coatings; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210; only as reactant in oil-based or fatty acid-based alkyd resins  
*Properties:* Gardner 10 max. liq.; acid no. 60-66
- Sylvatic® 40N** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, coatings, paper; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210  
*Properties:* Gardner 7+ max. color; soften. pt. (R&B) 42 C; acid no. 3-11
- Sylvatic® 80N** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1210, 178.3870  
*Properties:* Gardner 7 max. color; soften. pt. (R&B) 81 C; acid no. 3-11
- Sylvatic® 100NS** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, coatings, paper; de-
- foamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210  
*Properties:* Gardner 9 max. color; soften. pt. (R&B) 100 C; acid no. 5-13
- Sylvatic® 105NS** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, coatings, paper; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210  
*Properties:* Gardner 8 max. color; soften. pt. (R&B) 105 C; acid no. 5-13
- Sylvatic® 295** [Arizona]  
*Chem. Descrip.:* Polymerized rosin  
*Uses:* Tackifier for pressure-sensitive adhesives, construction adhesives, pick-up gums for labeling; adhesion promoter for difficult-to-bond substrates; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1210, 178.3870  
*Properties:* Gardner 7 color; visc. 9000-13,000 cps (250 F); soften. pt. (R&B) 97 C; acid no. 158-165
- Sylvatic® 1085** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1210, 178.3870  
*Properties:* Gardner 5 max. color; soften. pt. (R&B) 85 C; acid no. 3-11
- Sylvatic® 1100** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, coatings, paper; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210  
*Properties:* Gardner 5 max. color; soften. pt. (R&B) 100 C; acid no. 5-13
- Sylvatic® 1103** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, coatings, paper; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210  
*Properties:* Gardner 5 max. color; soften. pt. (R&B) 102 C; acid no. 5-13
- Sylvatic® 2110** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for adhesives; food pkg. adhesives, coatings, paper; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210  
*Properties:* Gardner 5 max. color; soften. pt. (R&B) 108 C; acid no. 9 max.
- Sylvatic® 4083** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for food pkg. adhesives, resinous/polymeric food-contact coatings, closures with sealing gaskets for food containers; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.1210  
*Properties:* Gardner 4+ color; soften. pt. (R&B) 97 C; acid no. 60
- Sylvatic® 4105** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for food pkg. adhesives, resinous/polymeric food-contact coatings, closures with sealing gaskets for food containers; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.1210  
*Properties:* Gardner 4+ color; soften. pt. (R&B) 106 C; acid no. 10
- Sylvatic® 4136** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for food pkg. adhesives, resinous/polymeric food-contact coatings, closures with sealing gaskets for food containers; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.1210  
*Properties:* Gardner 4+ color; soften. pt. (R&B) 85 C; acid no. 9
- Sylvatic® 4203** [Arizona]  
*Chem. Descrip.:* Rosin ester  
*Uses:* Tackifier for food pkg. adhesives, resinous/polymeric food-contact coatings, closures with sealing gaskets for food containers; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.1210

*Properties:* Gardner 4 color; soften. pt. (R&B) 99 C; acid no. 13

**Sylvatac® 4216** [Arizona]

*Chem. Descrip.:* Rosin ester

*Uses:* Tackifier for food pkg. adhesives, resinous/polymeric food-contact coatings, closures with sealing gaskets for food containers; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.1210

*Properties:* Gardner 4+ color; soften. pt. (R&B) 102 C; acid no. 9

**Sylvatac® R85** [Arizona]

*Chem. Descrip.:* Polymerized rosin

*Uses:* Tackifier for pressure-sensitive adhesives, construction adhesives, pick-up gums for labeling; adhesion promoter for difficult-to-bond substrates; food pkg. adhesives, pressure-sensitive adhesives, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1210, 178.3870

*Properties:* Gardner 6 color; visc. 9440 cps (225 F); soften. pt. (R&B) 84 C; acid no. 155-162

**Sylvatac® RX** [Arizona]

*Chem. Descrip.:* Polymerized rosin

*Uses:* Tackifier for pressure-sensitive adhesives, construction adhesives, pick-up gums for labeling; adhesion promoter for difficult-to-bond substrates; food pkg. adhesives, pressure-sensitive adhesives, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1210, 178.3870

*Properties:* Gardner 7- color; soften. pt. (R&B) 74 C; visc. 5150 cps (225 F); acid no. 141-149

**Sylaysia 250** [Fuji Silaysia]

*Chem. Descrip.:* Syn. amorphous silica

*Chem. Analysis:* SiO<sub>2</sub> (99.7%)

CAS 112926-00-8; EINECS/ELINCS 231-545-4

*Uses:* Flattening agent for paints (lacquers, phenolic, amino-alkyd, vinyl, acrylic, PU, water-based, melamine-alkyd), paper, printing inks; moisture control and anticaking agent in powd. paint; antislip and matting agent in thermal and copy papers; gellant; adhesion thickener; adhesive; polishing

*Properties:* Wh. powd., odorless, tasteless; 2.7 µm avg. particle size; sp.gr. 2.15; surf. area 300 m<sup>2</sup>/g; oil absorp. 310 ml/100 g; brightness 92; ref. index 1.46; pH 3.0 (5% slurry)

*Precaution:* Dissolves in HF and strong bases

**Sylaysia 250N** [Fuji Silaysia]

*Chem. Descrip.:* Syn. amorphous silica

*Chem. Analysis:* SiO<sub>2</sub> (99.5%)

CAS 112926-00-8; EINECS/ELINCS 231-545-4

*Uses:* Flattening agent for paints (lacquer, phenolic, amino-alkyd, vinyl, acrylic, PU, water-based, melamine-alkyd), paper, printing inks; moisture control and anticaking agent in powd. paints; antislip, matting agent in thermal and copy papers; gellant; adhesion thickener; adhesive; catalyst carrier; polishing

*Regulatory:* FDA 21CFR §160.105, 160.182, 172.480; USDA cleared for certain uses in salt and seasonings, curing mixts. for meat/poultry

*Properties:* Wh. free-flowing powd., odorless, tasteless; 2.50-3.50 µm avg. particle size; 0.05% max. 45 µ sieve; insol. in water; sp.gr. 2.1; surf. area 300 m<sup>2</sup>/g; oil absorp. 270-350 ml/100 g (linseed oil); brightness 90 min.; ref. index 1.46; pH 6.0-8.0 (5% aq. slurry)

*Toxicology:* Dust may cause irritation of skin, mucous membranes; LD50 (oral, rat) > 31,000 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 6 mg/m<sup>3</sup> (total dust); very low oral toxicity; not considered an ocular irritant

*Environmental:* Not known to have any adverse effect on aquatic environment

*Precaution:* Nonflamm.; reacts with HF

HMIS: Health 0; Flammability 0; Reactivity 0

*Storage:* Keep tightly sealed to protect quality

**Sylaysia 256N** [Fuji Silaysia]

*Chem. Descrip.:* Syn. amorphous silica, surface treated with hydrocarbon-type wax

*Chem. Analysis:* SiO<sub>2</sub> (99.4%)

*Uses:* Flattening agent for paints (amino-alkyd, acrylic, PU, polyester), printing inks; food-contact paper/paperboard

*Regulatory:* FDA 21CFR § 172.230, 176.170

*Properties:* Wh. free-flowing powd., odorless, tasteless; 2.50-3.50 µm avg. particle size; 0.05% max. 45 µ sieve; insol. in water; sp.gr. 2.1; brightness 90 min.; ref. index 1.46; pH 6.0-8.3 (5% aq. slurry)

*Toxicology:* Nuisance dust; dust may cause irritation of skin, mucous membranes; silica component: LD50 (oral, rat) > 31,600 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 10 mg/m<sup>3</sup>; not considered an ocular irritant

*Environmental:* Not known to have any adverse effect on aquatic environment

*Precaution:* Reacts with HF; can burn explosively if a cloud of dust is generated and exposed to ignition source

*Storage:* Keep tightly sealed to protect quality

**Sylaysia 310** [Fuji Silaysia]

*Chem. Descrip.:* Syn. amorphous silica

*Chem. Analysis:* SiO<sub>2</sub> (99.5%)

CAS 112926-00-8; EINECS/ELINCS 231-545-4

*Uses:* Flattening agent for polyester paints, paper, printing inks; moisture control and anticaking agent in powd. paints, cosmetics, and pharmaceuticals; antislip agent, matting agent in thermal and copy papers; antiblocking agent for plastic films (OPP, PET, PVC, nylon); gellant; thickener; adhesives; catalyst carrier; polishing

*Regulatory:* FDA 21CFR §160.105, 160.182, 172.480; USDA cleared for certain uses in salt and seasonings, curing mixts. for meat/poultry

*Properties:* Wh. free-flowing powd., odorless, tasteless; 1.1-1.5 µm avg. particle size; 0.05% max. 45 µ sieve; insol. in water; sp.gr. 2.1; oil absorp. 250-350 ml/100 g (linseed oil); brightness 94 min.; ref. index 1.46; pH 6.8-8.0 (5% aq. slurry)

*Toxicology:* Dust may cause irritation of skin, mucous membranes; LD50 (oral, rat) > 31,000 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 6 mg/m<sup>3</sup> (total dust); very low oral toxicity; not considered an ocular irritant

*Environmental:* Not known to have any adverse effect on aquatic environment

*Precaution:* Nonflamm.; reacts with HF

HMIS: Health 0; Flammability 0; Reactivity 0

*Storage:* Keep tightly sealed to protect quality

*Uses:* Flattening agent for paints (lacquer, phenolic, amino-alkyd, vinyl, acrylic, PU, water-based, melamine-alkyd), paper, printing inks; moisture control and anticaking agent in powd. paints, cosmetics, and pharmaceuticals; antislip agent, matting agent in thermal and copy papers; gellant; thickener; adhesives; catalyst carrier; polishing

*Regulatory:* FDA 21CFR §160.105, 160.182, 172.480; USDA cleared for certain uses in salt and seasonings, curing mixts. for meat/poultry

*Properties:* Wh. free-flowing powd., odorless, tasteless; 1.7-2.1 µm avg. particle size; 0.05% max. 45 µ sieve; insol. in water; sp.gr. 2.1; surf. area 300 m<sup>2</sup>/g; oil absorp. 300-350 ml/100 g (linseed oil); brightness 95 min.; ref.

index 1.46; pH 6.8-8.0 (5% aq. slurry)

**Toxicology:** Dust may cause irritation of skin, mucous membranes; LD50 (oral, rat) > 31,000 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 6 mg/m<sup>3</sup> (total dust); very low oral toxicity; not considered an ocular irritant

**Environmental:** Not known to have any adverse effect on aquatic environment

**Precaution:** Nonflamm.; reacts with HF

HMS: Health 0; Flammability 0; Reactivity 0

**Storage:** Keep tightly sealed to protect quality

#### Sylsya 430 [Fuji Silysia]

**Chem. Descrip.:** Syn. amorphous silica

**Chem. Analysis:** SiO<sub>2</sub> (99.7%)

CAS 112926-00-8; EINECS/ELINCS 231-545-4

**Uses:** Flattening agent for paints (acrylic, water-based), paper, printing inks; moisture control and anticaking agent in powd. paints, pharmaceuticals, cosmetics; carrier for pharmaceuticals and cosmetics; antislip agent, matting agent for thermal and copy papers; matting agent, antiblocking agent for plastic films (IPP, CP, PET, PE, nylon); adhesives; catalyst carrier

**Properties:** Wh. powd., odorless, tasteless; 2.5 µm avg. particle size; insol. in water; sp.gr. 2.15; surf. area 300 m<sup>2</sup>/g; oil absorp. 220 ml/100 g; brightness 95; ref. index 1.46; pH 7.5 (5% slurry)

**Toxicology:** Dust may cause irritation of skin, mucous membranes; LD50 (oral, rat) > 31,000 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 6 mg/m<sup>3</sup> (total dust); very low oral toxicity; not considered an ocular irritant

**Environmental:** Not known to have any adverse effect on aquatic environment

**Precaution:** Nonflamm.; reacts with HF

HMS: Health 0; Flammability 0; Reactivity 0

**Storage:** Keep tightly sealed to protect quality

#### Sylsya 435 [Fuji Silysia]

**Chem. Descrip.:** Syn. amorphous silica, surf. treated with magnesium silicofluoride

**Chem. Analysis:** SiO<sub>2</sub> (99%), magnesium silicofluoride (3.6%)

**Uses:** Flattening agent for paints (lacquers, amino-alkyd, vinyl, acrylic, polyester, water-based, melamine-alkyd), paper, printing inks; antislip, matting agent in thermal and copy papers; antiblocking agent for OPP

**Properties:** Wh. free-flowing powd., odorless, tasteless; 2.2-2.9 µm avg. particle size; 0.05% max. 45 µ sieve; silica gel is insol. in water, coating is readily sol.; sp.gr. 2.1; oil absorp. 200-250 ml/10 g (linseed oil); brightness 95 min.; ref. index 1.46; pH 2.2-3.0 (5% aq. slurry)

**Toxicology:** LD50 (oral, rat) 7000-8000 mg/kg; dust may cause irritation of skin, mucous membranes; ACGIH TLV 5.8 mg/m<sup>3</sup> (total dust); not a primary skin or ocular irritant; magnesium silicofluoride highly toxic

**Environmental:** Not known to have any adverse effect on aquatic environment

**Precaution:** Nonflamm.; reacts with HF; silicofluorides decompose at high temps. giving off toxic fumes

**Storage:** Keep tightly sealed to protect quality

#### Sylsya 436 [Fuji Silysia]

**Chem. Descrip.:** Syn. amorphous silica, surf. treated with hydrocarbon-type wax

**Chem. Analysis:** SiO<sub>2</sub> (99.4%)

**Uses:** Flattening agent for paints (lacquers, amino-alkyd, vinyl, acrylic, PU, polyester, melamine-alkyd), printing inks; matting agent, antiblocking agent for plastic films (IPP, PE); food-contact paper/paperboard

**Regulatory:** FDA 21CFR § 172.230, 176.170

**Properties:** Wh. free-flowing powd., odorless, tasteless; 2.50-3.50 µm avg. particle size; 0.05% max. 45 µ sieve; insol. in water; sp.gr. 2.1; brightness 90 min.; ref. index 1.46; pH 6.0-8.3 (5% aq. slurry)

**Toxicology:** Nuisance dust; dust may cause irritation of skin, mucous membranes; silica component: LD50 (oral, rat) > 31,600 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 10 mg/m<sup>3</sup>; not considered an ocular irritant

**Environmental:** Not known to have any adverse effect on aquatic environment

**Precaution:** Reacts with HF; can burn explosively if a cloud of dust is generated and exposed to ignition source

**Storage:** Keep tightly sealed to protect quality

#### Sylsya 440 [Fuji Silysia]

**Chem. Descrip.:** Syn. amorphous silica

**Chem. Analysis:** SiO<sub>2</sub> (99.5%)

CAS 112926-00-8; EINECS/ELINCS 231-545-4

**Uses:** Flattening agent for paints (vinyl, acrylic, PU, water-based, melamine-alkyd), paper, printing inks; moisture control and anticaking agent in powd. paints; antislip agent, matting agent in thermal and copy papers; matting agent, antiblocking agent for plastic films (IPP, CPP, PET, PE, nylon); catalyst carrier

**Properties:** Wh. free-flowing powd., odorless, tasteless; 1.1-1.5 µm avg. particle size; 0.05% max. 45 µ sieve; insol. in water; sp.gr. 2.1; surf. area 300 m<sup>2</sup>/g; oil absorp. 250-350 ml/100 g (linseed oil); brightness 94 min.; ref. index 1.46; pH 6.8-8.0 (5% aq. slurry)

**Toxicology:** Dust may cause irritation of skin, mucous membranes; LD50 (oral, rat) > 31,000 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 6 mg/m<sup>3</sup> (total dust); very low oral toxicity; not considered an ocular irritant

*Uses:* Pigment for paint and coatings, concrete and building prods., paper, abrasives, plastics, rubber, chems., textile inks, and ceramics  
*Properties:* Red color; 0.01% on 325 mesh; sp.gr. 5.15; tap dens. 1.33 g/cc; oil absorp. 14 lbs/100 lbs; pH 7.0; 99%+ Fe<sub>2</sub>O<sub>3</sub>
- Synox HY-600M** [Hoover Color]  
*Chem. Descrip.:* Syn. yellow iron oxide  
*Uses:* Pigment for coatings, paper, inks, building and concrete prods.  
*Properties:* Yel. color; 0.01% on 325 mesh; sp.gr. 4.03; tap dens. 0.84 g/cc; oil absorp. 35 lbs/100 lbs; pH 7.0; 86%+ FeOOH
- Synox HY-605M** [Hoover Color]  
*Chem. Descrip.:* Syn. yellow iron oxide  
*Uses:* Pigment for coatings, paper, inks, building and concrete prods.  
*Properties:* Yel. color; 0.01% on 325 mesh; sp.gr. 4.03; tap dens. 0.75 g/cc; oil absorp. 36 lbs/100 lbs; pH 7.0; 86%+ FeOOH
- Synox HY-610M** [Hoover Color]  
*Chem. Descrip.:* Syn. yellow iron oxide  
*Uses:* Pigment for coatings, paper, inks, building and concrete prods.  
*Properties:* Yel. color; 0.01% on 325 mesh; sp.gr. 4.03; tap dens. 0.93 g/cc; oil absorp. 34 lbs/100 lbs; pH 7.0; 86%+ FeOOH
- Synox HY-620M** [Hoover Color]  
*Chem. Descrip.:* Syn. yellow iron oxide  
*Uses:* Pigment for coatings, paper, inks, building and concrete prods.  
*Properties:* Yel. color; 0.01% on 325 mesh; sp.gr. 4.03; tap dens. 1.02 g/cc; oil absorp. 34 lbs/100 lbs; pH 7.0; 86%+ FeOOH
- Synperonic 10/6-100%** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* PEG-6 isodecanol  
CAS 61827-42-7  
*Uses:* Emulsifier, wetting agent, degreaser for industrial and domestic cleaners (hard surf. cleaners, window cleaners, bottle wash, hand cleaners), metal degreasing, paper wetting, textiles (wool scouring, dye leveling, kier boiling); sulfation feedstock  
*Properties:* Colorless liq.; sol. in water, ethanol, chloroform, CCl<sub>4</sub>, veg. oil; insol. in kerosene; sp.gr. 0.99; HLB 12.6; acid no. 0.2; hyd. no. 130; pour pt. 11 C; cloud pt. 37 C (1% aq.); surf. tens. 27.5 mN/m (0.1%); Draves wetting 4 s (0.1%); Ross-Miles foam 108 mm (initial, 50 ppm CaCO<sub>3</sub>); 100% conc.; nonionic  
*Environmental:* Biodeg.
- Synperonic 10/7-100%** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* PEG-7 isodecanol  
CAS 61827-42-7  
*Uses:* Wetting agent, detergent, solubilizer, emulsifier, scouring agent, dye leveling agent for industrial/domestic cleaners (hard surf. cleaners, window cleaners, hand cleaners), metal degreasing, metalworking fluids, paper wetting, textiles (kier boiling, dye leveling, water treatment, wool scouring); effective at low temps.  
*Properties:* Colorless liq.; sol. in water, ethanol, chloroform, CCl<sub>4</sub>, veg. oil; insol. in kerosene; sp.gr. 1.00; HLB 13.4; acid no. 0.2; hyd. no. 120; pour pt. 14 C; cloud pt. 60 C (1% aq.); surf. tens. 30.0 mN/m (0.1%); Draves wetting 7 s (0.1%); Ross-Miles foam 115 mm (initial, 50 ppm CaCO<sub>3</sub>); 100% conc.; nonionic  
*Environmental:* Biodeg.
- Synperonic 13/9** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* PEG-9 tridecanol  
CAS 24938-91-8  
*Uses:* Wetting agent, detergent, scouring agent, dye leveling agent for industrial and domestic cleaning, coal dust suppression, metal degreasing, metalworking fluids, paper wetting, textiles (kier boiling, dye leveling, wool scouring); solubilizer and emulsifier for essential oils, aromatic solvs., fats, and waxes; general purpose; effective at low temps.  
*Properties:* Pale yel. liq.; sol. in water, ethanol, chloroform, CCl<sub>4</sub>, veg. oil; insol. in kerosene; sp.gr. 0.99 (20 C); HLB 13.6; acid no. 0.2; hyd. no. 94; pour pt. 16 C; cloud pt. 57 C (1% aq.); surf. tens. 31.1 mN/m (0.1%); Draves wetting 4.5 s (0.1%); Ross-Miles foam 122 mm (initial, 50 ppm CaCO<sub>3</sub>); 100% conc.; also avail. @ 90% dilution; nonionic  
*Environmental:* Biodeg.
- Synperonic 13/10** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* PEG-10 tridecanol  
CAS 24938-91-8  
*Uses:* Wetting agent, detergent, solubilizer, emulsifier, scouring agent, dye leveling agent for domestic cleaning (all-purpose, hard surf. cleaners), coal dust suppression, metalworking fluids and pickling baths, paper wetting, textiles (kier boiling, dye leveling, wool scouring); effective at low temps.  
*Properties:* Pale yel. liq.; sol. in water, ethanol, chloroform, CCl<sub>4</sub>; insol. in kerosene, veg. oil; sp.gr. 0.99 (20 C); HLB 14.1; acid no. 0.2; hyd. no. 88; pour pt. 18 C; cloud pt. 70 C (1% aq.); surf. tens. 31.5 mN/m (0.1%); Draves wetting 5 s (0.1%); Ross-Miles foam 122 mm (initial, 50 ppm CaCO<sub>3</sub>); 100% conc.; also avail. @ 90% and 80% dilutions; nonionic  
*Environmental:* Biodeg.
- Synperonic 91/6** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* C9-11 parath-6  
CAS 68439-46-3  
*Uses:* Detergent, emulsifier, wetting agent, scouring agent for textiles (wool scouring), agric. chems., coal dust suppression, household and I&I cleaning (hard surf. cleaners, laundry, lt. duty liqs., solv. cleaners/degreasers), leather finishing/processing, oil field chems., paper deinking  
*Properties:* Colorless liq.; sol. in water, ethanol, chloroform, CCl<sub>4</sub>; insol. in kerosene; sp.gr. 0.99; m.p. 10 C; HLB 12.5; acid no. 0.2 max.; hyd. no. 140; cloud pt. 52 C (1% aq.); surf. tens. 31 mN/m (0.1%); Draves wetting 5 s (0.1%); Ross-Miles foam 150 mm (initial, 50 ppm CaCO<sub>3</sub>); 100% conc.; nonionic  
*Environmental:* Fully biodeg.
- Synperonic 91/8** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* C9-11 parath-8  
CAS 68439-46-3  
*Uses:* Detergent, emulsifier, wetting agent, scouring agent for agric. chems., household and I&I cleaning (hard surf. cleaners, laundry, lt. duty liqs., solv. cleaner/degreasers, metal soaking), leather finishing/processing, oil field

chems., paper deinking, textiles (wool scouring)

*Properties:* Colorless hazy liq.; sol. in water, ethanol, chloroform, CCl<sub>4</sub>; insol. in kerosene; sp.gr. 1.00; m.p. 15 C; HLB 13.9; acid no. 0.2 max.; hyd. no. 115; cloud pt. 80 C (1% aq.); surf. tens. 33 mN/m (0.1%); Draves wetting 6 s (0.1%); Ross-Miles foam 150 mm (initial, 50 ppm CaCO<sub>3</sub>); 100% conc.; nonionic

*Environmental:* Fully biodeg.

**Syneronic 91/8T** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* C9-11 pareth-8

CAS 68439-46-3

*Uses:* Detergent, emulsifier, wetting agent, scouring agent for agric. chems., household and I&I cleaning (hard surf. cleaners, laundry, lt. duty liqs., solv. cleaner/degreasers, metal soaking), leather finishing/processing, oil field chems., paper deinking, textiles (wool scouring); low free-alcohol version of Syneronic 91/8;

*Properties:* Colorless hazy liq.; sol. in water, ethanol, chloroform, CCl<sub>4</sub>; insol. in kerosene; sp.gr. 1.01; m.p. 20 C; HLB 14.1; acid no. 0.2 max.; hyd. no. 106; cloud pt. 83 C (1% aq.); surf. tens. 33 mN/m (0.1%); Draves wetting 6 s (0.1%); Ross-Miles foam 155 mm (initial, 50 ppm CaCO<sub>3</sub>); 100% conc.; nonionic

*Environmental:* Fully biodeg.

**Syneronic A7** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* C13-15 pareth-7

CAS 68131-39-5

*Uses:* Wetting agent, detergent, scouring agent, dye leveling agent, emulsifier for agric. chems., carboxymethylate mfg., coal dust suppression, household and I&I cleaners (laundry, lt. duty liqs., polishes, window cleaners), steel phosphation, tin plating, paper wetting, skin care gels, textiles (wool scouring, fiber lubricant/antistat for spinning, cotton dye leveling)

*Properties:* Wh. paste; sol. in water, glycol ethers, alcohol, chloroform, CCl<sub>4</sub>; sp.gr. 0.96; visc. 60 cps; HLB 12.2; acid no. 0.2 max.; hyd. no. 105; pour pt. 24 C; cloud pt. 47 C (1% aq.); pH 6-8 (1% aq.); surf. tens. 31.9 mN/m (0.1%); Draves wetting 14 s (0.1%); Ross-Miles foam 110 mm (initial, 50 ppm CaCO<sub>3</sub>); 99% min. act.; nonionic

*Environmental:* Readily biodeg.

**Syneronic A9** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* C13-15 pareth-9

CAS 68131-39-5

*Uses:* Wetting agent, detergent, scouring agent, dye leveling agent, emulsifier for coal dust suppression, I&I cleaning, steel phosphation, tin plating, oil field chems., paper reclamation

*Properties:* Wh. paste; sol. in water, glycol ethers, alcohol, chloroform, CCl<sub>4</sub>; sp.gr. 0.98; visc. 35 cps (40 C); HLB 13.0; acid no. 0.2 max.; pour pt. 26 C; cloud pt. 65 C (1% aq.); pH 6-8 (1% aq.); surf. tens. 33.6 mN/m (0.1%); Draves wetting 22 s (0.1%); Ross-Miles foam 112 mm (initial, 50 ppm CaCO<sub>3</sub>); 99% min. act.; nonionic

*Environmental:* Readily biodeg.

**Syneronic A11** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* C13-15 pareth-11

CAS 68131-39-5

*Uses:* Wetting agent, detergent, scouring agent, dye leveling agent, emulsifier for agric. chems., household and I&I cleaning (bottle washing, laundry, lt. duty liqs., polishes, janitorial), cutting oils, steel phosphation, oil field chems., paper reclamation, textiles (cotton dye leveling, fiber lubricant/antistat for spinning, polyester dyeing)

*Properties:* Wh. solid; sol. in water, glycol ethers, alcohol, chloroform, CCl<sub>4</sub>; sp.gr. 0.99; visc. 42 cps (40 C); HLB 13.9; acid no. 0.2 max.; hyd. no. 81; pour pt. 27 C; cloud pt. 87 C (1% aq.); pH 6-8 (1% aq.); surf. tens. 35.5 mN/m (0.1%); Draves wetting 27 s (0.1%); Ross-Miles foam 117 mm (initial, 50 ppm CaCO<sub>3</sub>); 99% min. act.; nonionic

*Environmental:* Readily biodeg.

**Syneronic OP7.5** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Octoxynol-7.5

CAS 9002-93-1

*Uses:* Detergent for textile and paper processing; emulsifier for creams, lotions; solubilizer for topical pharmaceuticals and shampoos

*Properties:* Pale yel. liq.; HLB 11.7; 100% conc.; nonionic

**Syneronic OP8** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Octoxynol-8

CAS 9002-93-1

*Uses:* Detergent for textile and paper processing; emulsifier for creams, lotions; solubilizer for topical pharmaceuticals and shampoos

*Properties:* Pale yel. liq.; HLB 12.6; 100% conc.; nonionic

**Syneronic OP10** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Octoxynol-10

CAS 9002-93-1

*Uses:* Detergent, wetting agent, emulsifier; for textile and paper processing; emulsifier for creams, lotions; solubilizer for topical pharmaceuticals and shampoos

*Properties:* Pale yel. liq.; sol. in water, alcohol, glycol ethers; dens. 1.062 g/ml; visc. 393 cps; HLB 13.3; cloud pt. 63-67 C (1% aq.); pour pt. 7 C; surf. tens. 31.8 dynes/cm; pH 6-8 (1% aq.); 99% min. act.; nonionic

**Syneronic OP10.5** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Octoxynol-10.5

CAS 9002-93-1

*Uses:* Detergent for textile and paper processing; emulsifier for creams, lotions; solubilizer for topical pharmaceuticals and shampoos

*Properties:* Pale yel. liq.; HLB 13.5; 100% conc.; nonionic

**Syneronic OP11** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Octoxynol-11

CAS 9002-93-1

*Uses:* Detergent for textile and paper processing; emulsifier for creams, lotions; solubilizer for topical pharmaceuticals and shampoos

*Properties:* Pale yel. liq.; sol. in water, alcohol, glycol ethers; dens. 1.067 g/ml; visc. 371 cps; HLB 13.6; cloud pt. 79-82 C (1% aq.); pour pt. 8 C; surf. tens. 31.0 dynes/cm; pH 6-8 (1% aq.); 99% min. act.; nonionic

**Syneronic PE/L61** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Poloxamer 181

CAS 9003-11-6

*Uses:* Surfactant; demulsifier; antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, water treatment, pulp/paper; textile wet end processing; detergent for I&I applics. (auto dishwash rinse aids, dairy and brewery bottle washing, hard surf. cleaners); multiuse

*Properties:* Colorless liq.; sol. in ethanol, toluene; partly sol. in kerosene; insol. in water; m.w. 2100; sp.gr. 1.02; hyd. no. 53; pour pt. -30 C; cloud pt. 17 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 36.6 mN/m (0.1%, 20 C); Ross-Miles foam 5 mm (initial, 0.1%); 100% conc.; nonionic

**Syneronic PE/L62LF** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* POP/POE block copolymer

CAS 9003-11-6

*Uses:* Surfactant, wetting agent, emulsifier, dispersant, detergent for I&I cleaning (auto dishwash rinse aids, dairy and brewery bottle washing, hard surf. cleaners); antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, water treatment, pulp/paper; textile wet end processing

*Properties:* Colorless liq.; sol. in water, ethanol, toluene; m.w. 2350; sp.gr. 1.03; hyd. no. 47.3; pour pt. -9 C; cloud pt. 22 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 39.2 mN/m (0.1%, 20 C); Draves wetting > 360 s (0.1%); Ross-Miles foam 9 mm (initial, 0.1%); 100% conc.; nonionic

**Syneronic PE/L81** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Poloxamer 231

CAS 9003-11-6

*Uses:* Surfactant, wetting agent, emulsifier, dispersant, antifoam, demulsifier for I&I cleaners (auto dishwash rinse aids, dairy and brewery bottle washing, hard surf. cleaners), textile spin finish lubricants; antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, water treatment, pulp/paper; multiuse

*Properties:* Colorless liq.; sol. in ethanol, toluene; partly sol. in kerosene; insol. in water; m.w. 2750; sp.gr. 1.02; hyd. no. 41; pour pt. -27 C; cloud pt. 16 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 35 mN/m (0.1%, 20 C); Ross-Miles foam 9 mm (initial, 0.1%); 100% conc.; nonionic

**Syneronic PE/L101** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Poloxamer 331

CAS 9003-11-6

*Uses:* Surfactant, wetting agent, antifoam, emulsifier, demulsifier, dispersant for I&I cleaners (auto dishwash rinse aids, dairy and brewery bottle washing, hard surf. cleaners); antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, water treatment, pulp/paper; multiuse

*Properties:* Colorless liq.; sol. in ethanol, toluene; insol. in water, ethylene glycol; m.w. 3800; sp.gr. 1.02; hyd. no. 29.5; pour pt. -9 C; cloud pt. 11 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 32.4 mN/m (0.1%, 20 C); Ross-Miles foam 17 mm (initial, 0.1%); 100% conc.; nonionic

**Syneronic PE/L121** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Poloxamer 401

CAS 9003-11-6

- Uses:* Surfactant, wetting agent, antifoam, emulsifier, demulsifier, dispersant for I&I cleaners (auto dishwasher rinse aids, dairy and brewery bottle washing, hard surf. cleaners), personal care lotions (shave, suntan, antiperspirants, bath oils); antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, water treatment, pulp/paper; multiuse
- Properties:* Colorless liq.; sol. in ethanol, toluene; insol. in water, ethylene glycol; m.w. 4400; sp.gr. 1.02; hyd. no. 25.5; pour pt. -6 C; cloud pt. 10 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 32.5 mN/m (0.1%, 20 C); Ross-Miles foam 24 mm (initial, 0.1%); 100% conc.; nonionic
- Syneronic T1701** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* Poloxamine 701  
 CAS 11111-34-5  
*Uses:* Antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, water treatment, pulp/paper  
*Properties:* Yel. liq.; insol. in water; m.w. 3700; sp.gr. 1.02; hyd. no. 61.5; pour pt. -24 C; cloud pt. 16.5 C (10% aq.); pH 10 (2.5% aq.); surf. tens. 34.2 mN/m (0.5%, 20 C); Ross-Miles foam 3 mm (initial, 0.1%); 100% conc.; nonionic
- Syneronic T1301** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]  
*Chem. Descrip.:* Poloxamine 1301  
 CAS 11111-34-5  
*Uses:* Antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, water treatment, pulp/paper  
*Properties:* Yel. liq.; insol. in water; m.w. 6900; sp.gr. 1.02; hyd. no. 33; pour pt. -15 C; cloud pt. 12.5 C (10% aq.); pH 10 (2.5% aq.); surf. tens. 33 mN/m (0.5%, 20 C); Ross-Miles foam 9 mm (initial, 0.1%); 100% conc.; nonionic
- Syntergent K** [Cognis/Chems. Group; Cognis/Textiles]  
*Chem. Descrip.:* Fatty amido condensate  
*Uses:* Detergent for textile, leather, paper, and metalworking  
*Properties:* Liq.; 30% conc.; nonionic
- Synthamin 3000** [EPC Papierchemie GmbH]  
*Chem. Descrip.:* Styrene copolymer aq. sol'n.  
*Uses:* Surf. sizing agent for paper, cardboard, graphical papers, food pkg. (Germany); rec. for use in the size press, billblade, and speed sizer, together with starch or CMC sol'n.; very low foaming  
*Use Level:* 4-15 g/l  
*Regulatory:* BgVV XXXVI compliant  
*Properties:* Light, sl. turbid liq.; char. odor; sp.gr.  $\approx$  1.035 g/m<sup>3</sup>; visc. < 500 mPa·s; pH 8-10; 23  $\pm$  1.5% solids; anionic  
*Storage:* 1 yr storage stability; avoid contact with aluminum and nonferrous metals; insensitive to frost; may safely be used after thawing
- Synthamin 7000** [EPC Papierchemie GmbH]  
*Chem. Descrip.:* Styrene-acrylic ester copolymer  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent for paper, cardboard, printing and copying paper incl. inkjet and laser papers, graphical papers, food pkg. (Germany); very high stability; high efficiency; suitable for continuous or batch use  
*Use Level:* 4-15 g/l  
*Regulatory:* BgVV XXXVI compliant  
*Properties:* Light microdispersion; char. odor; sp.gr.  $\approx$  1.04 g/m<sup>3</sup>; visc. < 100 mPa·s; pH 8.5-9.5; 23  $\pm$  1.5% solids; anionic  
*Storage:* 3 mos min. storage stability; avoid contact with aluminum and nonferrous metals; sensitive to frost
- Synthemul® 447** [Reichhold]  
*Chem. Descrip.:* Vinyl acetate homopolymer latex  
 CAS 9003-20-7  
*Uses:* Base coat binder in free-sheet paper coatings, bleached and unbleached board; exc. blister resist., runnability, glueability; compat. with carbonates
- Synthemul® 550** [Reichhold]  
*Chem. Descrip.:* Vinyl acetate acrylate latex  
*Uses:* Binder for all paperboard applics.; as sole binder or in conjunction with Tylac® S/B latexes; exc. str., gloss, ink/varnish holdout, fold crack resist., cobinder compat.  
*Properties:* 15% acrylate (dry basis)
- Synthemul® 551** [Reichhold]  
*Chem. Descrip.:* Vinyl acetate acrylate latex  
*Uses:* Binder for all paperboard applics.; as sole binder or in conjunction with Tylac® S/B latexes; exc. str., gloss, ink/varnish holdout, fold crack resist., cobinder compat.  
*Properties:* 55% total solids; 30% acrylate (dry basis)
- Synthemul® 552** [Reichhold]  
*Chem. Descrip.:* Vinyl acetate acrylate latex  
*Uses:* Binder for all paperboard applics.; as sole binder or in conjunction with Tylac® S/B latexes; exc. str., gloss, ink/varnish holdout, fold crack resist., cobinder compat.  
*Properties:* 50% acrylate (dry basis)
- Synthemul® 883** [Reichhold]  
*Chem. Descrip.:* Vinyl acetate homopolymer latex  
 CAS 9003-20-7  
*Uses:* Base coat binder for free-sheet paper coatings, bleached and unbleached board; very high mech. stability; exc. wet rub resist., ink/varnish holdout, str. and stiffness  
*Properties:* Sm. particle size
- Synthemul® 40430-20** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Styrene-acrylic copolymer  
 CAS 9010-92-8  
*Uses:* Adhesive base for uncoated paper and mastic; multipurpose; good borax stability  
*Properties:* Dens. 8.5-8.7 lb/gal; visc. 100-600 cps; pH 8-9; 49-51% solids; anionic
- Synthemul® 40503-00** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Vinyl acetate homopolymer emulsion  
 CAS 9003-20-7  
*Uses:* Binder for paper coatings; formaldehyde-free  
*Properties:* Emulsion; 0.17  $\mu$  particle size; dens. 9.1 lb/gal; visc. 150 cps; pH 6.0; 50% solids; anionic
- Synthemul® 40550-00** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Vinyl acetate acrylate emulsion polymer  
*Uses:* Binder used for paper coatings; low acrylic level  
*Properties:* Emulsion; 0.20  $\mu$  particle size; dens. 9.0 lb/gal; visc. 200 cps; pH 6.0; 50% solids; anionic
- Synthemul® 40551-03** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Vinyl acrylic emulsion polymer  
*Uses:* Binder used for paper coatings; med. acrylic level  
*Properties:* Emulsion; 0.20  $\mu$  particle size; dens. 9.0 lb/gal; visc. 200 cps; pH 7.0; 50% solids; anionic
- Synthemul® 40552-00** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Vinyl acetate acrylate emulsion polymer  
*Uses:* Binder used for paper coatings; high acrylic level; ex. str. and gloss; exceptional ink and varnish holdout and fold crack resist.  
*Properties:* Emulsion; 0.20  $\mu$  particle size; dens. 9.0 lb/gal; visc. 200 cps; pH 7.0; 50% solids; anionic
- Synthemul® 40554-00** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Vinyl acrylic emulsion polymer  
*Uses:* Paper applics.; exc. mech. stability  
*Properties:* PH 5.5;  $\approx$  47% NV
- Synthemul® 97635** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Functionally modified vinyl acetate  
 CAS 108-05-4; EINECS/ELINCS 203-545-4  
*Uses:* Release coating for uncoated paper, mylar film, cellulose acetate, and metalized polyester, for pressure sensitive tape applic.; water-based  
*Properties:* Wh. milky emulsion; sp.gr. 1.0911; dens. 9.1 lb/gal; visc. 300 cps; pH 7.5-8.8; 45  $\pm$  1% NV; anionic  
*Storage:* Keep from freezing
- Synthemul® 97635-00** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Functionally modified vinyl acetate  
 CAS 108-05-4; EINECS/ELINCS 203-545-4  
*Uses:* Release coating for uncoated paper, mylar film, cellulose acetate, and metalized polyester, for pressure-sensitive tape applics.; water-based  
*Properties:* Wh. milky emulsion; sp.gr. 1.0911 (of solids); dens. 9.1 lb/gal; visc. 300 cps; pH 7.5-8.8; 45  $\pm$  1% NV; anionic  
*Storage:* Keep from freezing
- Synthemul® 97883-01** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Vinyl acetate homopolymer emulsion  
 CAS 9003-20-7  
*Uses:* Binder for paper/paperboard coatings  
*Properties:* Small particle size emulsion; 0.13  $\mu$  particle size; dens. 9.1 lb/gal; visc. 100 cps; pH 7.2; 47% solids; anionic
- Synthemul® 97982-00** [Reichhold/Emulsion Polymers]  
*Chem. Descrip.:* Acrylic emulsion  
*Uses:* Pressure-sensitive adhesive base for uncoated paper, mylar film, cellulose acetate, metalized polyester, and pressure sensitive tape; exc.

clarity and UV stability; med. peel and tack values; exc. rheology for coating; good borax stability

*Properties:* 0.30-0.40 particle size; dens. 8.5-8.7 lb/gal; visc. 500-1200 cps; surf. tens. 43-49 dynes/cm; pH 4.8-5.2; 55-57% solids; anionic

**Synthro®-Fix WF** [Synthron SA]

*Uses:* Dye fixing agent for mfg. of highly colored paper; trash fixing agent for stickies and wh. pitch control in wet-end paper mfg.; inc. uniformity of shades; formaldehyde-free; avoid problems of visual pollution in the wastewater

**Synthro®-Nyl NS 1920 P** [Synthron SA]

*Uses:* Fireproofing agent for paper sticking and coating applics.; only sl. hygroscopic

**Synthro®-Nyl PN 912 S** [Synthron SA]

*Uses:* Fireproofing agent for paper sticking and coating applics.; no yellowing or adverse effects on the mech. props. of the paper

**Synthro®-Pac 812 L** [Synthron SA]

*Uses:* Trash fixing agent, retention aid, drainage aid for wet-end paper mfg.; provides better machinability

**Synthro®-Pel FOX** [Synthron SA]

*Chem. Descrip.:* Fluorinated resin

*Uses:* Oilproofing agent for paper and greaseproof paper mfg.

*Properties:* Cationic

**Synthro®-Pel FOX 505** [Synthron SA]

*Chem. Descrip.:* Fluorinated resin

*Uses:* Oilproofing agent for paper and greaseproof paper mfg. incl. food pkg.

*Regulatory:* FDA and BGA compliances

*Properties:* Cationic

**Synthro®-Pel SCR** [Synthron SA]

*Chem. Descrip.:* Chromium salts-based

*Uses:* Antistick agent for paper sticking and coating applics.

**Synthro®-Pel WA 491** [Synthron SA]

*Uses:* Water vapor barrier for paper sticking and coating applics. incl. food pkg.; component of paper/paperboard in contact with aq./fatty/dry foods

*Regulatory:* FDA 21CFR §176.170, 176.180; BGA XXXVI compliance

**Synthro®-Pel XF** [Synthron SA]

*Uses:* Fluorinated resin extender for paper mfg., reducing cost of oilproofing treatments

**Synthro®-Pon DI 215** [Synthron SA]

*Uses:* Deinking agent, wetting agent for pulp mfg.

*Properties:* Flash pt. > 40 C

*Environmental:* Biodeg.

**Synthro®-Pon DI 237** [Synthron SA]

*Uses:* Deinking agent for flotation and washing type deinking processes in pulp mfg.

*Properties:* Solid

**Synthro®-Sol DC 819 L** [Synthron SA]

*Uses:* Dispersant, trash fixing agent for org. matter in wet-end paper mfg.

*Properties:* Anionic

**Synthro®-Sol DC 856 L** [Synthron SA]

*Uses:* Dispersant, deinking agent, grinding aid for pulp mfg.

**Synthro®-Stab TF** [Synthron SA]

*Uses:* Formaldehyde absorbent/deodorizer for paper sticking and coating applics.

**Synthro®-Stab Z** [Synthron SA]

*Uses:* Insolubilizer and crosslinking agent for paper and board sticking and coating applics.; formaldehyde-free; alkaline; act. at low temps.

# T

**T-1133A** [Wolstenholme Int'l.]

*Chem. Descrip.:* Water-based carbon black disp. with nonionic surfactant  
*Uses:* For formulation of corrugated inks and envelope inks, polyboard and film inks, acrylic, urethane, primer, and alkyd coatings, paper applics.  
*Properties:* Blk. resin; dens. 10-10.5 lb/gal; pH 8.6-9.4; 47.5-50% total solids; 39.5-41% carbon; nonionic

**T-2005A** [Wolstenholme Int'l.]

*Chem. Descrip.:* Water-based carbon black disp. with anionic surfactant and nonmercurial preservative  
*Uses:* Pigment base for applics. that require low foaming props. and good tint str., and for paper applics.  
*Properties:* Blk. resin; dens. 10 lb/gal; pH 9.3-10.2; 38.5-42.1% total solids; 33.0-36.1% carbon; anionic

**T-9087A** [Wolstenholme Int'l.]

*Chem. Descrip.:* Carbon black aq. disp. with surfactant and nonmercurial preservative  
*Uses:* Pigment base for applics. requiring low foaming and masstone jetness, and for paper applics.  
*Properties:* Dens. 9-10; pH 9.5-10.5; 30% carbon; 35% total solids; anionic

**Tacolyn® 3085** [Hercules/Resins]

*Chem. Descrip.:* Syn. resin disp.  
*Uses:* Tackifier for acrylic, nat. rubber, SBR, EVA, and polychloroprene latexes used in tape, label, pressure-sensitive, contact, and construction adhesives; latex modifier; food pkg. adhesives, paper/paperboard; solv.-free, resist. to oxidation, UV radiation  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180 compliant; Germany approved for food pkg./processing

*Properties:* < 1 µ particle size; visc. 2400 cps; pH 9.6; 55% total solids  
*Storage:* Store closed and keep from freezing

**Tafigel® PUR 40** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Polyurethane-based  
*Uses:* Associative thickener, rheology modifier, visc. builder, stabilizer for aq. systems, for use in indoor and outdoor paints, latex and anticorrosive paints, syn. resin-bound renderings, adhesives, paper, and paste fillers  
*Use Level:* 0.3-2.0%

*Properties:* Wh. lightly transparent liq. emulsion; disp. in water; dens. 1.06 g/ml (20 C); pH ≈ 6.5; 40% act. in water/butyltriglycol (40/20); nonionic  
*Storage:* 1 yr shelf life stored in closed container in cool (15-25 C), dry place; not sensitive to freezing

**Tallofin®** [Stockhausen]

*Uses:* Antiscalant, slimicide for control of deposits and slime in the paper machine circuit; reduces corrosive deposits/slime; suppresses odor-developing bacteria; combats stickies and resin; improves runnability

**Tamol® 731A** [Rohm & Haas]

*Chem. Descrip.:* Isobutylene/maleic anhydride copolymer  
 CAS 26426-80-2  
*Uses:* Corrosion/scale inhibitor used in various aq. systems (boiler feed water, recirculated cooling water) over wide temp. range; dispersant for dyes, pigments, latex paints; food pkg. adhesives, paper/paperboard; inhibits scale deposits on equip. surfs., promotes efficient heat transfer, decreases equip. damage  
*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* Pale yel. clear liq.; m.w. 15,000; dens. 9.2 lb/gal; visc. 19-182 cps; f.p. 28 F; pH 9.5-10.5 (10% aq.); surf. tens. 64 dynes/cm (0.1%); 24-26% total solids

*Toxicology:* LD50 (oral, rabbit) > 5 g/kg, (skin, rabbit) > 2 g/kg; contact causes irritation of eyes and skin

*Storage:* Keep from freezing

**Tamol® 808** [Rohm & Haas]

*Chem. Descrip.:* Partial sodium salt of PMAA  
 CAS 25086-62-8

*Uses:* Corrosion/scale inhibitor used in various aq. systems (boiler feed water, recirculated cooling water) over wide temp. range; dispersant, antiprecipitant; food pkg. adhesives, paper/paperboard; inhibits scale deposits on equip. surfs., promotes efficient heat transfer, decreases equip. damage  
*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* Sl. yel. clear liq.; m.w. 30,000; dens. 9.1 lb/gal; visc. 300-1500 cps; pH 4.5-5.5; surf. tens. 71 dynes/cm (1%); 20.5-22.5% total solids

*Toxicology:* LD50 (oral, rabbit) > 5 g/kg; contact causes irritation of eyes and skin

*Storage:* Keep from freezing

**Tamol® 819** [Rohm & Haas]

*Chem. Descrip.:* Sodium naphthalene sulfonate  
 CAS 9084-06-4

*Uses:* Dispersant for cement, pigments, carbon blk., dyes in leather, textile, and paper industries

*Properties:* Tan spray-dried solid; bulk dens. 40 lb/ft<sup>3</sup>; pH 8.8-10.0 (1% aq.); 93% min. act.; anionic

**Tamol® 850** [Rohm & Haas]

*Chem. Descrip.:* Sodium polymethacrylate aq. sol'n.  
 CAS 25086-62-8

*Uses:* Scale inhibitor for boiler and cooling water treatment, aq. systems; antiprecipitant; dispersant for inorg. pigments, flats thru semigloss latex paints, caulks, sealants, paper industry; food pkg. adhesives, coatings, paper; low foaming

*Regulatory:* FDA 21CFR §173.310, 175.105, 175.300, 176.170, 176.180  
*Properties:* Lt. yel. clear liq.; m.w. 30,000; dens. 9.9 lb/gal; visc. 250 cps; pour pt. 32 F; pH 9.0-10.8; surf. tens. 71 dyne/cm (1%); 29-31% total solids; anionic

*Toxicology:* LD50 (oral, rabbit) > 5 g/kg, (skin, rabbit) > 2 g/kg; contact causes irritation of eyes and skin

**Tamol® 960** [Rohm & Haas]

*Chem. Descrip.:* Sodium polymethacrylate aq. sol'n.  
 CAS 25086-62-8

*Uses:* Scale inhibitor for boiler and cooling water treatment, aq. systems; antiprecipitant; dispersant for inorg. pigments; food pkg. adhesives, coatings, paper; low foaming  
*Regulatory:* FDA 21CFR §173.310, 175.105, 175.300, 176.170, 176.180

*Properties:* Pale yel. clear liq.; m.w. 5000; dens. 10.6 lb/gal; visc. 550 cps; pour pt. 32 F; pH 8-9; surf. tens. 63 dynes/cm (1%); 40% act.; anionic  
*Toxicology:* LD50 (oral, rabbit) > 5 g/kg; contact causes irritation of eyes and skin

**Tamol® L Conc.** [Rohm & Haas]

*Chem. Descrip.:* Sodium naphthalene sulfonate  
 CAS 9084-06-4

*Uses:* Dispersant, tanning agent for leather; sec. dispersant for polymerization of rubber, in paper/pulp slurries

*Properties:* Amber liq.; dens. 10.4 lb/gal; visc. 20 cps; f.p. 28 F; pH 9.4 (1% aq.); surf. tens. 71 dyne/cm (1%); 47% act.; anionic

**Taurine-913** [Taurus Tech.]

*Chem. Descrip.:* Organosulfur compd. (dithiocarbamates)

*Uses:* Biocide, fungicide, slimicide for alkaline pulps, treatment of mill waters; effective against mesophilic and thermophilic bacteria, fungi; effective over wide pH range; nonfoaming; noncorrosive; cost effective

*Use Level:* 0.1-0.5 kg/ton finished paper

*Properties:* Golden yel.; sp.gr. 1.15-1.20; pH 9-10

*Toxicology:* Causes eye and skin irritation; harmful if swallowed

*Environmental:* Self-degradable; eco-friendly

*Storage:* Store in shade; avoid exposure to acidic environment

#### Taurine-DBNPA [Taurus Tech.]

*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide (20%), inert ingreds. (80%)  
CAS 10222-01-2

*Uses:* Bactericide, fungicide, yeast control in paper mills

*Use Level:* 300-500 ppm on total water used in the pulper

*Properties:* Pale liq.; dens. 1.25 g/l

#### Taurine-DCS [Taurus Tech.]

*Chem. Descrip.:* Hydrocarbon/surfactant aq. formulation

*Uses:* Paper machine cleaner

*Use Level:* 300-500 ppm on total water used in the pulper

#### Taurine-DEI [Taurus Tech.]

*Uses:* Paper aux. for deinking of heavily printed paper; dispersant for pulp; released ink is completely dispersed; most floats to surf. of pulper where it can be scooped off while the rest of the ink gets washed off on the paper machine wire; good stability to hard water, acid, alkali, salt, anionics

*Use Level:* 0.3-0.6% (dry stock in pulper)

*Properties:* Highly visc.; readily dilutable with water; stock sol'ns. higher than 100 g/l are turbid; pH 6-7 (1%); anionic

*Toxicology:* May cause eye and skin irritation; may be harmful if swallowed

#### Taurine-DFX [Taurus Tech.]

*Uses:* Dye fixing agent for paper industry; dispersant for dyes in papermaking; stabilizer for rosin size emulsions in papermaking; water-based; dye is retained even by bleached fibrous material with good yield

*Properties:* Colorless to pale yel.; freely sol. in water; pH 4 ± 0.5 (10%); 60 ± 2% solids; cationic

#### Taurine-KWT [Taurus Tech.]

*Chem. Descrip.:* Organosulfur cyclic compd.

*Uses:* Biocide, fungicide for industrial use, wet stage use, aq. compositions, paints, adhesives, cellulose, polymer sol'ns./emulsions, fillers, inks, metal-working fluids, paper stocks, textiles, leather; preservative for slurries and high visc. suspensions such as coatings and clays; rec. for systems with longer retention time; broad spectrum activity; nonvolatile; heat-stable

*Use Level:* 0.05-0.1% (emulsions), 0.1-0.2% (paper, leather, textiles)

*Properties:* Colorless to lt. amber liq.; mild odor; sol. in water and org. solvs.; flash pt. > 100 C; pH 5.0 max.

*Toxicology:* Low toxicity; avoid skin contact

#### Taurine-MBT [Taurus Tech.]

*Chem. Descrip.:* Methylene-bis-thiocyanate-based  
CAS 6317-18-6

*Uses:* Biocide for paper stocks; preservative for slurries and high visc. suspensions such as coatings and clays; rec. for anaerobic sulfate reducing bacteria which cause corrosion; fast acting; highly potent; cost effective

#### Taurine-QFD [Taurus Tech.]

*Chem. Descrip.:* Long chain aldehyde

*Uses:* Biocide for recycled wh. water treatment in papermaking; broad spectrum; cost effective

#### TBP [FMC]

*Chem. Descrip.:* Tributyl phosphate

CAS 126-73-8; EINECS/ELINCS 204-800-2

*Uses:* Antifoam in paper coatings, aq. adhesives, inks, casein sol'ns., textile sizes, and detergent sol'ns.; plasticizer and solvent for NC, cellulose acetate, chlorinated rubber, and vinyls; solvent for natural gums and syn. resins; flame retardant for cellulose, epoxies, PS, PVAc, PVC; component in extraction of rare earth metal salts

*Properties:* Pt-Co 50 max. liq.; char. odor; m.w. 266; f.p. < -80 C; b.p. 137-145 C; sol. in org. liqs., min. oil, and gasoline; sp.gr. 0.978 ± 0.003; dens. 975 kg/m<sup>3</sup>; visc. 3.7 cp; pour pt. < -80 C; ref. index 1.423 ± 0.001; flash pt. 166 C; fire pt. 182 C

#### T-Det® A126 [Harcros]

*Chem. Descrip.:* PEG-6 alcohol  
CAS 66455-15-0

*Uses:* Surfactant for use in detergents, laundry prespotters, hard surf. cleaners, emulsifiers, personal care prods., agric. adjuvants; food pkg. adhe-

sives, coatings, paper, animal glues; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 178.3120, 178.3400, 180.1001(c)(e)

*Properties:* Opaque liq.; water-sol.; sp.gr. 0.982; dens. 8.17 lb/gal; HLB 12.4; pour pt. 50 F; cloud pt. 122 F (1% sol'n.); flash pt. (PMCC) > 325 F; pH 5-7 (1% 10/6 IPA/H<sub>2</sub>O); 99.5% act.; nonionic

#### T-Det® A243 [Harcros]

*Chem. Descrip.:* PEG-3 alcohol  
CAS 68439-50-9

*Uses:* Surfactant for use in detergents, laundry prespotters, hard surf. cleaners, I&I applics., emulsifiers, personal care prods., agric.; food pkg. adhesives, coatings, paper, animal glues; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 178.3120, 178.3400, 180.1001(c)(e)

*Properties:* Opaque liq.; oil-sol.; sp.gr. 0.923; dens. 7.69 lb/gal; HLB 8.0; pour pt. 40 F; cloud pt. 45 ml H<sub>2</sub>O/g; flash pt. (PMCC) > 350 F; pH 5-7 (1% 10/6 IPA/H<sub>2</sub>O); 99.5% act.; nonionic

#### T-Det® A247 [Harcros]

*Chem. Descrip.:* PEG-7 alcohol  
CAS 68439-50-9

*Uses:* Surfactant for use in detergents, laundry prespotters, hard surf. cleaners, emulsifiers, personal care prods., paint, agric.; food pkg. adhesives, coatings, paper, animal glues; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 178.3120, 178.3400, 180.1001(c)(e)

*Properties:* Opaque liq.; water-sol.; sp.gr. 0.982; dens. 8.17 lb/gal; HLB 12.9; pour pt. 60 F; cloud pt. 122 F; flash pt. (PMCC) > 375 F; pH 5-7 (1% 10/6 IPA/H<sub>2</sub>O); 99.5% act.; nonionic

#### T-Det® A249 [Harcros]

*Chem. Descrip.:* PEG-9 alcohol  
CAS 68439-50-9

*Uses:* Surfactant for use in detergents, laundry pre-spotters, hard surf. cleaners, emulsifiers, personal care prods., agric.; food pkg. adhesives, coatings, paper, animal glues; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 178.3120, 178.3400, 180.1001(c)(e)

*Properties:* Opaque liq.; water-sol.; sp.gr. 0.994; dens. 8.26 lb/gal; HLB 13.0; pour pt. 70 F; cloud pt. 167 F; flash pt. (PMCC) > 325 F; pH 5-7 (1% 10/6 IPA/H<sub>2</sub>O); 99.5% act.; nonionic

#### T-Det® A467 [Harcros]

*Chem. Descrip.:* PEG-7 alcohol  
CAS 68213-23-0

*Uses:* Surfactant for use in detergents, laundry prespotters, hard surf. cleaners, household and industrial cleaners, metal degreasing, emulsifiers, personal care prods., agric.; food pkg. adhesives, coatings, paper, animal glues; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 178.3120, 178.3400, 180.1001(c)(e)

*Properties:* Opaque liq.; water-sol.; sp.gr. 0.979; dens. 8.14 lb/gal; HLB 11.6; pour pt. 70 F; cloud pt. 122 F; flash pt. (PMCC) > 400 F; pH 5-7 (1% 10/6 IPA/H<sub>2</sub>O); 99.5% act.; nonionic

#### T-Det® A2412 [Harcros]

*Chem. Descrip.:* PEG-12 alcohol  
CAS 68439-50-9

*Uses:* Surfactant, dispersant, wetting agent, solubilizer for use in detergents, hard surf. cleaners, emulsifiers, agric. adjuvants; food pkg. adhesives, coatings, paper, animal glues; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 178.3120, 178.3400, 180.1001(c)(e)

*Properties:* Opaque semi-solid; water-sol.; sp.gr. 1.007 (100 F); dens. 8.38 lb/gal (100 F); HLB 14.4; pour pt. 85 F; cloud pt. 155 F; flash pt. (PMCC) > 400 F; pH 5-7 (1% 10/6 IPA/H<sub>2</sub>O); 99.5% act.; nonionic

#### T-Det® C-20 [Harcros]

*Chem. Descrip.:* PEG-20 castor oil  
CAS 61791-12-6

*Uses:* Emulsifier, surfactant for leather, metal, textile processing, paints, paper, ink, rubber, polishes, and agric. applics.; food pkg. adhesives

- Regulatory:* FDA 21CFR §175.105, 180.1001c,d,e  
*Properties:* Yel. liq.; water-disp.; sp.gr. 1.03 (68 F); dens. 8.58 lb/gal (68 F); HLB 13.0; pour pt. 20 F; cloud pt. 115 F (1% IPA/NaCl/water); flash pt. (PMCC) > 200 F; pH 5-7 (1% aq.); 99.5% min. act.; nonionic
- T-Det® C-40** [Harcros]  
*Chem. Descrip.:* PEG-40 castor oil  
 CAS 61791-12-6  
*Uses:* Emulsifier, solubilizer, degreaser, lubricant, dispersant, penetrant used in leather, paper, textile and metal processing, rubber, paints; dispersant for pigment slurries; leveling agent; defoamer; stabilizer; wax and polish preparations; in adhesives for food pkg.  
*Regulatory:* FDA 21CFR §175.105, 180.1001c,d,e  
*Properties:* Yel. liq.; mild, oily odor; sol. in acetone, butyl Cellosolve, CCl<sub>4</sub>, ethanol, ether, ethylene glycol, methanol, veg. oil, water, xylene; sp.gr. 1.05; dens. 8.7 lb/gal; HLB 14.2; pour pt. 60 F; flash pt. (PMCC) > 200 F; pH 6.0 (1%); 99.5% min. act.; nonionic
- T-Det® DD-10** [Harcros]  
*Chem. Descrip.:* Dodoxynol-10  
 CAS 9014-92-0  
*Uses:* Emulsifier; surfactant for solvs.; detergent for paper, textile and industrial cleaner formulations; dispersant for paint pigments; emulsifier in mfg. of food-contact articles; low foaming  
*Regulatory:* FDA 21CFR §178.3400, 180.1001c,d,e  
*Properties:* Pale yel. liq.; mild aromatic odor; disp. in water; sp.gr. 1.05; dens. 8.75 lb/gal; HLB 13.1; cloud pt. 112 F (1%); flash pt. (PMCC) > 300 F; pour pt. 48 F; pH 7 (1%); 99.5% min. act.; nonionic
- T-Det® EPO-61** [Harcros]  
*Chem. Descrip.:* EO/PO block copolymer  
 CAS 106392-12-5  
*Uses:* Wetting agent, defoamer for paper mfg., water treating compds., metal cleaning, rinse aids, mech. dishwash, textiles; crude oil demulsifier; emulsifier and wetting agent in agric. toxicant formulations; food pkg. adhesives, paper  
*Regulatory:* FDA 21CFR §175.105, 176.180, 180.1001c,d,e  
*Properties:* Clear liq.; sol. in ethanol, toluene, xylene, perchlorethylene; disp. in water; sp. gr. 1.01; dens. 8.34 lb/gal; visc. 271 cps; HLB 3.0; pour pt. -28 C; cloud pt. 23 C (1%); flash pt. > 200 C; pH 5-7 (1% aq.); 99.5% min. act.; nonionic
- T-Det® EPO-62L** [Harcros]  
*Chem. Descrip.:* PO/EO block copolymer  
 CAS 106392-12-5  
*Uses:* Surfactant, emulsifier, defoamer for metal cleaners, degreasers, rinse aids, mech. dishwash, hard surf. cleaners, textiles, paper, agric. applics.; food pkg. adhesives, paper; low foaming  
*Regulatory:* FDA 21CFR §175.105, 176.180, 180.1001c,d,e  
*Properties:* Clear liq.; water-sol.; sp.gr. 1.03; dens. 8.6 lb/gal; HLB 7.0; pour pt. 27 F; cloud pt. 89 F (1%); flash pt. (PMCC) > 250 F; pH 4-8 (1% aq.); 100% conc.; nonionic
- T-Det® EPO-64L** [Harcros]  
*Chem. Descrip.:* PO/EO block copolymer  
 CAS 106392-12-5  
*Uses:* Wetting agent, surfactant, defoamer for metal cleaning compds., rinse aids, mech. dishwash, hard surf. cleaners, paper, textiles; emulsifier for agric. toxicants; demulsifier; food pkg. adhesives, paper; low foaming  
*Regulatory:* FDA 21CFR §175.105, 176.180, 180.1001c,d,e  
*Properties:* Clear liq.; water-sol.; sp.gr. 1.04; dens. 8.7 lb/gal; HLB 15.0; pour pt. 48 F; cloud pt. 138 F (1%); flash pt. (PMCC) > 250 F; pH 4-8 (1% aq.); 100% conc.; nonionic
- T-Det® EPO-104** [Harcros]  
*Chem. Descrip.:* EO/PO block copolymer  
 CAS 106392-12-5  
*Uses:* Detergent, emulsifier, dispersant, and wetting agent for agric. applics.; food pkg. adhesives, paper, cellophane, films; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.105, 176.200, 177.1200, 177.1400, 178.3120, 180.1001(c)(e)  
*Properties:* Paste; water-sol.; sp.gr. 1.04; dens. 8.7 lb/gal; HLB 13; pour pt. 90 F; cloud pt. 180 F (1%); flash pt. (PMCC) > 250 F; pH 5-7 (1% aq.); 99.5% act.; nonionic
- T-Det® N-6** [Harcros]  
*Chem. Descrip.:* Nonoxynol-6  
 CAS 9016-45-9  
*Uses:* Emulsifier for silicones, household waxes and polishes; wetting agent; detergent and dispersant for petrol. and fuel oils; agric. toxicant formulations; dry cleaning soap additive; leather and metal processing; solvent cleaner; deinking agent for paper; food pkg. adhesives; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 178.3400, 180.1001c,d,e  
*Properties:* Pale yel. liq.; mild aromatic odor; sol. in butyl Cellosolve, CCl<sub>4</sub>, corn oil, diesel fuel, ethanol, kerosene, Stod., xylene; dens. 8.7 lb/gal; sp.gr. 1.04; visc. 58 SUS (210 F); HLB 10.9; flash pt. > 400 F (OC); pour pt. < 0 F; pH 7; 99.5% min. act.; nonionic
- T-Det® N-8** [Harcros]  
*Chem. Descrip.:* Nonoxynol-8  
 CAS 9016-45-9  
*Uses:* Detergent, wetting agent, emulsifier, solubilizer, degreaser for textile, leather and paint processing, agric. toxicant, household and industrial cleaning formulations; pigment dispersant; rewetting agent, deinking agent, felt washing, leveling agent in paper mfg.; oil recovery operations; food pkg. adhesives; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 178.3400, 180.1001c,d,e  
*Properties:* Clear visc. liq.; mild aromatic odor; dens. 8.75 lb/gal; sp.gr. 1.05; visc. 63 SUS (210 F); HLB 12.4; cloud pt. 78 F (1%); flash pt. 500 F (OC); pH 6 (1%); 99.5% min. act.; nonionic
- T-Det® N-9.5** [Harcros]  
*Chem. Descrip.:* Nonoxynol-10  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* Detergent, wetting agent, emulsifier, solubilizer, degreaser, foaming agent for textiles, leather and paint processing, agric. toxicant, household and industrial cleaning formulations; pigment dispersant; rewetting agent, deinking agent, felt washing, leveling agent in paper mfg.; oil recovery operations; food pkg. adhesives; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 178.3400, 180.1001c,d,e  
*Properties:* Clear visc. liq.; mild aromatic odor; sol. in butyl Cellosolve, CCl<sub>4</sub>, ethanol, ethylene glycol, HAN, toluene, water, xylene; dens. 8.8 lb/gal; sp.gr. 1.06; visc. 68 SUS (210 F); HLB 13.1; cloud pt. 135 F (1%); flash pt. 500 F (OC); pH 7 (1%); 99.5% min. act.; nonionic
- TEBAC** [Raschig AG]  
*Chem. Descrip.:* N,N,N-Triethyl-benzenemethanaminium chloride  
 CAS 56-37-1; EINECS/ELINCS 200-270-1  
*Uses:* Phase transfer catalyst; catalyst; antistat; plasticizer; additive for toners and paper; biocide
- TEC** [Morflex]  
*Chem. Descrip.:* Triethyl citrate NF/FCC  
 CAS 77-93-0; EINECS/ELINCS 201-070-7  
*Uses:* Plasticizer for aq.-based pharmaceutical coatings; food additive; food-contact coatings, paper, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.300, 175.320, 175.380, 175.390, 176.170, 177.1210, 181.27, 182.1911, 184.199, GRAS  
*Properties:* Sol. 6.5 g/100 ml water; m.w. 276.3; sp.gr. 1.135-1.139; dens. 9.48 lb/gal; visc. 35.2 cps; b.p. 127 C (1 mm); pour pt. -50 F; flash pt. (COC) 155 C; ref. index 1.439-1.441; 99% min. assay
- Tech Pet F™** [Crompton/Witco]  
*Chem. Descrip.:* Petrolatum tech.  
 CAS 8009-03-8; EINECS/ELINCS 232-373-2  
*Uses:* Binder, carrier, lubricant, moisture barrier, plasticizer, protectant, softener for tech. applics. (elec., paper and pkg., plastics, rubber, textiles, industrial use)  
*Properties:* Dk. brn.; m.p. 50-65 C
- TEGO® RC 704** [Goldschmidt AG]  
*Chem. Descrip.:* Silicone  
*Uses:* Used for supertight paper and syn. film release coatings, esp. applicable for specialty adhesive tapes (e.g., diaper tapes); radiation-curable  
*Properties:* Greenish color; sp.gr. 1.09-1.11; visc. ≈ 2000 mPa·s; flash pt. > 100 C; 100% act.  
*Storage:* 1 yr shelf life in sealed, lightproof containers @ < 30 C
- TEGO® RC 705** [Goldschmidt AG]  
*Chem. Descrip.:* Silicone acrylate  
*Uses:* For paper and syn. film release coatings; EB/UV-curable  
*Properties:* Greenish clear color; sp.gr. 1.035-1.055; visc. 250-450 mPa·s; flash pt. > 100 C; 100% act.  
*Storage:* 1 yr. shelf life in sealed lightproof containers @ < 30 C
- TEGO® RC 706** [Goldschmidt AG]  
*Chem. Descrip.:* Silicone acrylate

*Uses:* For paper and syn. film release coatings; EB/UV-curable  
*Properties:* Greenish clear color; sp.gr. 0.985-1.005; visc. 120-180 mPa·s; flash pt. > 100 C; 100% act.

*Storage:* 1 yr. shelf life in sealed lightproof containers @ < 30 C

**TEGO® RC 708** [Goldschmidt AG]

*Chem. Descrip.:* Silicone acrylate

*Uses:* For paper and syn. film release coatings; EB/UV-curable

*Properties:* Ylsh. clear color; sp.gr. 1.027-1.037; visc. 2000 mPa·s; flash pt. > 100 C; 100% act.

*Storage:* 1 yr. shelf life in sealed lightproof containers @ < 30 C

**TEGO® RC 711** [Goldschmidt AG]

*Chem. Descrip.:* Silicone acrylate

*Uses:* For paper and syn. film release coatings; adhesion promoter; EB/UV-curable

*Properties:* Greenish clear color; sp.gr. 1.045-1.055; visc. 400-700 mPa·s; flash pt. > 100 C; 100% act.

*Storage:* 1 yr shelf life in sealed lightproof containers @ < 30 C

**TEGO® RC 726** [Goldschmidt AG]

*Chem. Descrip.:* Silicone acrylate

*Uses:* For paper and syn. film release coatings; EB/UV-curable

*Properties:* Ylsh. clear color; sp.gr. 0.97-0.99; visc. 1000 mPa·s; flash pt. > 100 C; 100% act.

*Storage:* 1 yr. shelf life in sealed lightproof containers @ < 30 C

**TEGO® Airex 901 W** [Tego; Tego GmbH]

*Chem. Descrip.:* Organo-modified polysiloxane, contains fumed silica

*Uses:* Defoamer/deaerator for water-based airless spray-applied wood and furniture coatings; food pkg. adhesives; defoamer in food-contact paper/paperboard; prevents microfoam; solv.-free; zero VOCs

*Use Level:* 0.2-0.5%

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.2600; US, EU, Japan listed

*Properties:* Sp.gr. 1.003-1.008; visc. 50-150 mPa·s; 100% act.

*Toxicology:* TSCA listed

*Storage:* 1 yr. shelf life in closed containers

**TEGO® Airex 960** [Tego; Tego GmbH]

*Chem. Descrip.:* Modified polysiloxane in xylene solv.

*Uses:* Deaerator for med. and high polar coating systems, esp. PU paints, high solids alkyds, ES spray systems, and urethane-polyesters; food-contact coatings; defoamer in food-contact paper/paperboard

*Use Level:* 0.2-0.8% based on total formulation

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210; BgVV recommended

*Properties:* Clear liq., aromatic odor; insol. in water; sp.gr. 0.91; dens. 7.6 lb/gal; visc. 4-8 mPa·s; b.p. 282-286 F; flash pt. 25 C; ref. index 1.473-1.476; 25% act.

*Toxicology:* TSCA listed

*Precaution:* DOT: flamm. liq.

*Storage:* 1 yr. min. storage stability in closed containers

**TEGO® Airex 970** [Tego; Tego GmbH]

*Chem. Descrip.:* Modified polysiloxane in xylene solv.

*Uses:* Deaerator for med.-polar solv.-based systems, esp. NC-containing systems, vinyl paints, and acid-curing baking finishes (alkyd-melamine and urea, acrylic-melamine, epoxy ester, high solids OEM finishes); food-contact coatings; defoamer in food-contact paper/paperboard

*Use Level:* 0.2-0.8% based on total formulation

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.2600

*Properties:* Clear liq., aromatic odor; insol. in water; sp.gr. 0.92; dens. 7.66 lb/gal; b.p. 282-286 F; flash pt. 25 C; ref. index 1.473-1.476; 25% act.

*Toxicology:* TSCA listed

*Precaution:* DOT: flamm. liq.

*Storage:* 1 yr. min. storage stability in closed containers

**TEGO® Antifoam 1-60** [Goldschmidt; Goldschmidt AG]

*Chem. Descrip.:* Polysiloxane-polyether copolymer, polyalkylsiloxane emulsion

*Uses:* Antifoam for wastewater treatment, distillation, bioprocesses, agric. applics., surfactants; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance; listed in TSCA, EINECS, DSL, AICS

*Properties:* Emulsion; 10% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 1-62** [Goldschmidt AG]

*Chem. Descrip.:* Silicone oil-based antifoam emulsion

*Uses:* Antifoam for liq. detergents, slurry compaction, cleaning/dishwashing

agents, care agents, softeners, wastewater treatment; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Emulsion; 10% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 2-18** [Goldschmidt AG]

*Chem. Descrip.:* Organo-modified siloxane emulsion

*Uses:* Antifoam for PVC polymerization, blow down, and demonomerization; defoamer for metalworking, in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Emulsion; 20% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 2-57** [Goldschmidt AG]

*Chem. Descrip.:* Organo-modified siloxane emulsion

*Uses:* Antifoam for polymer dispersions, final applics.; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Emulsion; 20% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 2-67** [Goldschmidt AG]

*Chem. Descrip.:* Silicone oil-based emulsion

*Uses:* Antifoam for surfactant concs. and ready-to-use sol'ns., detergents (liq., cleaning agents, dishwashing, care agents); defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Emulsion; 20% act.; anionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 2-80** [Goldschmidt AG]

*Chem. Descrip.:* Organo-modified siloxane emulsion

*Uses:* Antifoam for polymer dispersions, final applics.; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Emulsion; 20% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 2-82** [Goldschmidt AG]

*Chem. Descrip.:* Organo-modified siloxane emulsion

*Uses:* Antifoam for polymer dispersions, final applics., processing, pump over, demonomerization, and polymerization; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Emulsion; 20% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 2-89** [Goldschmidt; Goldschmidt AG]

*Chem. Descrip.:* Polysiloxane-polyether copolymer aq. emulsion

*Uses:* Antifoam for polymer dispersions, final applics., processing, pump over, demonomerization, and polymerization; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance;

listed in TSCA, EINECS, DSL, AICS

*Properties:* Emulsion; 20% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 2-92** [Goldschmidt AG]

*Chem. Descrip.:* Organo-modified siloxane emulsion

*Uses:* Antifoam for polymer dispersions, final applics., processing, and pump over; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Emulsion; 20% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 14** [Goldschmidt AG]

*Chem. Descrip.:* Organo-modified siloxane-based compd.

*Uses:* Antifoam for metalworking; surfactant concs., detergents; defoamer in food-contact paper/paperboard; self-emulsifying conc. org.

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* 100% act.; nonionic

*Toxicology:* TSCA listed

**TEGO® Antifoam 28** [Goldschmidt AG]

*Chem. Descrip.:* Organo-modified siloxane-based compd.

*Uses:* Antifoam for textile auxiliaries, surfactant concs., detergents (liq., cleaning agents, dishwashing, care agents); defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance

*Properties:* Conc.; 100% act.

- Toxicology:* TSCA listed
- TEGO® Antifoam 81** [Goldschmidt AG]  
*Chem. Descrip.:* Organo-modified siloxane-based compd.  
*Uses:* Antifoam; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Conc.; 100% act.  
*Toxicology:* TSCA listed
- TEGO® Antifoam 93** [Goldschmidt AG]  
*Chem. Descrip.:* Organo-modified siloxane  
*Uses:* Antifoam for textile auxiliaries, surfactant concs.; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Conc.; 100% act.  
*Toxicology:* TSCA listed
- TEGO® Antifoam 105** [Goldschmidt AG]  
*Chem. Descrip.:* Silicone oil  
*Uses:* Antifoam for paper stock preparation, paper machine, sheet forming and coating, and wastewater; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Emulsion; 10% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam 200** [Goldschmidt AG]  
*Chem. Descrip.:* Organo-modified siloxane  
*Uses:* Antifoam for paper stock preparation, paper machine, sheet forming and coating; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Emulsion; 20% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam 201** [Goldschmidt AG]  
*Chem. Descrip.:* Organo-modified siloxane  
*Uses:* Antifoam for paper stock preparation, paper machine, sheet forming and coating, and wastewater; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Emulsion; 20% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam 202** [Goldschmidt AG]  
*Chem. Descrip.:* Organo-modified siloxane  
*Uses:* Antifoam for paper stock preparation, paper machine, sheet forming and coating, and wastewater; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Emulsion; 20% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam 793** [Goldschmidt; Goldschmidt AG]  
*Chem. Descrip.:* Polysiloxane-polyether copolymer  
*Uses:* Antifoam for surfactants, textile auxiliaries, pretreatment, and dyeing, metalworking, cutting fluids, agric. formulations; defoamer in food-contact paper/paperboard; self-emulsifying  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance; listed in TSCA, EINECS, DSL, AICS  
*Properties:* Conc.; 100% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam 1488** [Goldschmidt; Goldschmidt AG]  
*Chem. Descrip.:* Polysiloxane-polyether copolymer aq. emulsion  
*Uses:* Antifoam for polymer dispersions, PVC, final applics., processing, pump over, demonomerization, polymerization, textiles, metalworking, surfactant concs.; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance; listed in TSCA, EINECS, DSL, AICS  
*Properties:* 20% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam 3062** [Goldschmidt; Goldschmidt AG]  
*Chem. Descrip.:* Polysiloxane-polyether copolymer  
*Uses:* Antifoam for surfactants, textile auxiliaries, metalworking, cutting fluids, agric. formulations, epoxy resins; defoamer in food-contact paper/paperboard; org.  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance; listed in TSCA, EINECS, DSL, AICS  
*Properties:* Conc.; 100% act.  
*Toxicology:* TSCA listed
- TEGO® Antifoam KE 400** [Goldschmidt; Goldschmidt AG]  
*Chem. Descrip.:* Vegetable oils, polysiloxane-polyether copolymer emulsion  
*Uses:* Antifoam for PVC prod., polymer dispersions; processing aid for
- water-based polymerization of thermoplastics and elastomers; in stripping of PVC latex in emulsion, suspension, and micro-suspension polymerization; defoamer in food-contact paper/paperboard; not rec. for strongly alkaline media (i.e., pH > 10)  
*Use Level:* 0.01-0.2%  
*Regulatory:* FDA 21CFR §176.210; listed in TSCA, EINECS, DSL, MITI, AICS  
*Properties:* Milky wh. emulsion; easily diluted with water; dens. 0.96 g/cm<sup>3</sup>; visc. 300-600 MPa·s; 60% act.; nonionic  
*Toxicology:* TSCA listed  
*Storage:* 6 mos min. storage stability in closed containers; store under frost-free conditions
- TEGO® Antifoam KE 600** [Goldschmidt; Goldschmidt AG]  
*Chem. Descrip.:* Polyether, polysiloxane-polyether copolymer  
*Uses:* Antifoam for PVC polymerization, blow down, and demonomerization, cutting fluids, surfactant concs., paper stock preparation, paper machine, sheet forming and coating, and wastewater; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance; listed in TSCA, EINECS, DSL, AICS  
*Properties:* Emulsion; 60% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam KS 6** [Goldschmidt AG]  
*Chem. Descrip.:* Org. oil compd.  
*Uses:* Org. antifoam for PVC, polymerization and blow down, wastewater treatment; defoamer in food-contact paper/paperboard; self-emulsifying  
*Regulatory:* FDA 21CFR §176.210; Korea, and MITI compliance  
*Properties:* Conc.; 100% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam KS 10** [Goldschmidt AG]  
*Chem. Descrip.:* Org. oil compd.  
*Uses:* Org. antifoam for PVC, polymerization and blow down, metalworking; defoamer in food-contact paper/paperboard; self-emulsifying  
*Regulatory:* FDA 21CFR §176.210; Korea, and MITI compliance  
*Properties:* Conc.; 100% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam KS 53** [Goldschmidt AG]  
*Chem. Descrip.:* Org. oil compd.  
*Uses:* Org. antifoam for polymer dispersions and PVC, wastewater treatment; defoamer in food-contact paper/paperboard; self-emulsifying  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Conc.; 100% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam KS 95** [Goldschmidt; Goldschmidt AG]  
*Chem. Descrip.:* Vegetable oils, polysiloxane-polyether copolymer emulsion  
*Uses:* Antifoam for PVC prod., polymer dispersions; defoamer in food-contact paper/paperboard; self-emulsifying  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance; listed in TSCA, EINECS, DSL, AICS  
*Properties:* Conc.; 40% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam KS 100** [Goldschmidt AG]  
*Chem. Descrip.:* Org. oil compd.  
*Uses:* Antifoam for wastewater treatment; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Conc., self-emuls.; 100% act.; nonionic  
*Toxicology:* TSCA listed
- TEGO® Antifoam KS 911** [Goldschmidt AG]  
*Chem. Descrip.:* Org. oil compd.  
*Uses:* Antifoam for wastewater treatment, distillation, and bioprocesses; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Conc.; 100% act.  
*Toxicology:* TSCA listed
- TEGO® Antifoam KS 1100** [Goldschmidt AG]  
*Chem. Descrip.:* Org. oil compd.  
*Uses:* Antifoam for paper stock preparation, paper machine, sheet forming and coating, and wastewater; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; BGA, Korea, and MITI compliance  
*Properties:* Conc., self-emuls.; 100% act.; nonionic  
*Toxicology:* TSCA listed

**TEGO® Antifoam MR 1000** [Goldschmidt AG]*Chem. Descrip.:* Org. oil compd.*Uses:* Org. antifoamer for metalworking; defoamer in food-contact paper/paperboard; self-emulsifying*Regulatory:* FDA 21CFR §176.210; Korea, and MITI compliance*Properties:* Conc.: 100% act.; nonionic*Toxicology:* TSCA listed**TEGO® Antifoam MR 1015** [Goldschmidt; Goldschmidt AG]*Chem. Descrip.:* Polysiloxane-polyether copolymer in combination with org. polymer; contains hydrophobic silica

CAS 68937-54-2

*Uses:* Defoamer for aq. coatings and inks, industrial coatings, wood lacquers, printing inks, pigment pastes, food-contact paper/paperboard*Use Level:* 0.05-0.2%*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600; BgVV approved*Properties:* Gardner 3 max. turbid liq.; sp.gr. 1.0; dens. 8.3 lb/gal; visc. 500-1000 mPa·s; flash pt. 90 C; 100% act.; 95-100% NV; nonionic*Toxicology:* TSCA listed*Storage:* 1 yr storage life in closed container**TEGO® Foamex 815** [Tego; Tego GmbH]*Chem. Descrip.:* O/w emulsion of polysiloxane-polyether copolymer; contains hydrophobic silica

CAS 68937-54-2

*Uses:* Defoamer for aq. coatings and printing inks, building protection coatings based on styrene-acrylic emulsions, wood and furniture lacquers, emulsion mfg., printing inks and overprint varnishes based on pure acrylic resins; defoamer in food-contact paper/paperboard*Use Level:* 0.1-1.5%*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600; BgVV approved*Properties:* Wh. thixotropic liq.; dens. 1.0 g/cm<sup>3</sup>; visc. 400 mPa·s; pH 7-9; 20% act.; 22-26% NV; nonionic*Toxicology:* TSCA listed*Storage:* 6 mos storage life in closed container @ < 40 C; keep from freezing**TEGO® Foamex 825** [Tego; Tego GmbH]*Chem. Descrip.:* Hydrophobic polysiloxane-polyether copolymer o/w emulsion; contains hydrophobic silica

CAS 68937-54-2

*Uses:* Defoamer for aq. coatings and printing inks, building protection coatings (satin gloss and gloss coatings), wood and furniture lacquers, emulsion mfg., printing inks and overprint varnishes based on pure acrylic resins, industrial coatings; defoamer in food-contact paper/paperboard*Use Level:* 0.1-1.0%*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600; BgVV approved*Properties:* Wh. thixotropic liq.; dens. 1.0 g/cm<sup>3</sup>; visc. 400 mPa·s; pH 7-9; 20% act.; 24.5-28.5% NV; nonionic*Storage:* 6 mos storage life in closed container @ < 40 C; keep from freezing**TEGO® Foamex 835** [Tego; Tego GmbH]*Chem. Descrip.:* O/w emulsion of dimethyl polysiloxane, contains hydrophobic silica*Uses:* Defoamer for aq. coatings and printing inks, printing inks for porous substrates, plasters, high visc. emulsion paints, overprint varnishes; defoamer in food-contact paper/paperboard*Use Level:* 0.03-0.3%*Regulatory:* FDA 21CFR §176.210; BgVV approved*Properties:* Wh. thixotropic liq.; sp.gr. 1.0; dens. 8.3 lb/gal; flash pt. none; pH 5-7; 50% act.; 51-53% NV; nonionic*Toxicology:* TSCA listed*Storage:* 6 mos storage life in closed container below 40 C; keep from freezing**TEGO® Foamex 1435** [Tego; Tego GmbH]

*Chem. Descrip.:* Polysiloxane w/o emulsion

*Uses:* Defoamer for water-thinnable printing inks, high visc. emulsion paints and renders, food-contact paper/paperboard

*Use Level:* 0.25-0.75%

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600

*Properties:* Wh. thixotropic liq.; misc. with water; sp.gr. 1.0; dens. 8.3 lb/gal; visc. 200-500 mPa·s; flash pt. none; 20% act. in water; nonionic

*Toxicology:* TSCA listed

*Storage:* 6 mos min. storage stability in closed containers under frost-free conditions

**TEGO® Foamex 1488** [Tego; Tego GmbH]

*Chem. Descrip.:* Dimethicone copolyol emulsion

*Uses:* Defoamer for water-based emulsion paints and water-thinnable systems, building protection coatings (acrylic, styrene-acrylic, PVA), wood/furniture varnishes, anticorrosive coatings/industrial paints (alkyd, polyester, acrylic), polymer emulsions; defoamer in food-contact paper/paperboard

*Use Level:* 0.1-1.0%

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600; BgVV approved

*Properties:* Wh. thixotropic liq.; sp.gr. 1.0 g/cc; dens. 8.3 lb/gal; visc. 150 mPa·s; flash pt. none; pH 7-9 (1:10); 20% act. in water; 22-26% NV; nonionic/anionic

*Toxicology:* TSCA listed

*Storage:* 6 mos storage stability in closed containers under frost-free conditions (@ < 40 C)

**TEGO® Foamex 1495** [Tego; Tego GmbH]

*Chem. Descrip.:* O/w emulsion of hydrophobic polysiloxane-polyether copolymer, contains hydrophobic silica

*Uses:* Defoamer for aq. coatings and printing inks, facade coatings, satin gloss coatings based on styrene-acrylic and terpolymer emulsions, aq. printing inks and overprint varnishes, emulsion mfg., food-contact paper/paperboard

*Use Level:* 0.1-1.0%

*Regulatory:* FDA 21CFR §175.105, 176.210; BgVV recommended

*Properties:* Wh. thixotropic liq.; sp.gr. 1.0; dens. 8.3 lb/gal; visc. 230 mPa·s; flash pt. none; pH 7-9 (1:10); 25% act.; 28-32% NV; nonionic

*Toxicology:* TSCA listed

*Storage:* 6 mos. storage life in closed container below 40 C; keep from freezing

**TEGO® Foamex 3062** [Tego; Tego GmbH]

*Chem. Descrip.:* Dimethicone copolyol

CAS 67762-96-3

*Uses:* Defoamer for water-based emulsion paints and water-thinnable systems, building protection coatings (acrylic, styrene-acrylic, PVA), wood/furniture varnishes, printing inks, food-contact paper/paperboard

*Use Level:* 0.05-0.15%

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.2600; BgVV approved

*Properties:* Gardner 3 max. sl. turbid liq.; sp.gr. 1.0; dens. 8.3 lb/gal; visc. 650-1250 mPa·s; flash pt. > 100 C; 100% act.; 97-100% NV

*Toxicology:* TSCA listed

*Storage:* 1 yr min. storage stability in closed containers

**TEGO® Foamex 7447** [Tego; Tego GmbH]

*Chem. Descrip.:* Dimethicone copolyol emulsion

*Uses:* Defoamer for water-based emulsion paints and water-thinnable systems, building protection coatings (acrylic, styrene-acrylic, PVAc), wood/furniture varnishes, anticorrosion/industrial paints (alkyd, polyester, acrylic), printing inks, polymer disp.; defoamer in food-contact paper/paperboard

*Use Level:* 0.2-1.5%

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600; BgVV approved

*Properties:* Wh. thixotropic liq.; sp.gr. 1.0; dens. 8.3 lb/gal; visc. 120-250 mPa·s; flash pt. none; pH 7-9 (1:10); 20% act. in water, 22-26% NV; nonionic

*Toxicology:* TSCA listed

*Storage:* 6 mos min. storage stability in closed containers under frost-free conditions (@ < 40 C)

**TEGO® Foamex 8020** [Tego; Tego GmbH]

*Chem. Descrip.:* Polyether siloxane copolymer emulsion, contains fumed silica

*Uses:* Defoamer for acrylic, styrene-acrylic; prevents and destroys foam during mfg. and applic. of waterborne coatings and printing inks; defoamer in food-contact paper/paperboard

*Use Level:* 0.1-1.0%

*Regulatory:* FDA 21CFR §176.210 compliant

*Properties:* Wh. liq.; visc. 250-400 mPa·s; 20% act.; 23-27% NV

*Toxicology:* TSCA listed

**TEGO® Foamex 8030** [Tego; Tego GmbH]

*Chem. Descrip.:* Polyether siloxane copolymer emulsion, contains fumed silica

*Uses:* Defoamer for water-based architectural coating, food-contact paper/paperboard

*Use Level:* 0.1-1%

*Regulatory:* FDA 21CFR §176.210; US, EU, Canada, Japan, Australia listed

*Properties:* Wh. liq.; visc. 250-400 mPa·s; 20% act.; 23-27% NV

*Toxicology:* TSCA listed

*Storage:* 6 mos. shelf life in closed containers @ < 40 C; keep from freezing

**TEGO® Foamex 826** [Tego; Tego GmbH]

*Chem. Descrip.:* Polyether siloxane copolymer emulsion contg. fumed silica

*Uses:* Defoamer for water-based systems, architectural coatings, pigmented coatings based on elastic polymers, decorative coatings, industrial coatings, food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600; BGVV approved

*Properties:* Wh. thixotropic liq.; pH 7-9 (1:10); 20% act.

*Storage:* 6 mos storage stability when stored frost-free in closed containers below 40 C

**TEGO® Foamex KS 4** [Tego; Tego GmbH]

*Chem. Descrip.:* Vegetable oil with tip of silicone

*Uses:* Defoamer for water-based architectural coatings, paints, plasters; defoamer for food-contact paper/paperboard mfg.; silicone-free

*Use Level:* 0.1-1%

*Regulatory:* FDA 21CFR §176.210 compliant; US, EU, and Canada listed

*Properties:* Sl. turbid ysh. liq.; visc. 400-1000 mPa·s; pH 6-8; 100% act.

*Toxicology:* TSCA listed

*Storage:* 1 yr. shelf life in closed containers

**TEGO® Foamex N** [Tego; Tego GmbH]

*Chem. Descrip.:* Dimethyl polysiloxane with hydrophobic silica

*Uses:* Defoamer conc. for med., high solid and solv.-free paint systems, building protection coatings, anticorrosive coatings, high visc. paints, pigmented UV-cured coatings and finishes, solv.-based gravure and flexo inks, food-contact paper/paperboard

*Use Level:* 0.05-0.5% on total formulation

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2600; BgVV approved

*Properties:* Sol. in isopropanol, butylacetate, xylene, and min. spirits; sp.gr. 1.0; dens. 8.2 lb/gal; visc. 200-600 mPa·s; flash pt. > 200 C; ref. index 1.402-1.406; 100% act.

*Toxicology:* TSCA listed

*Storage:* 1 yr min. storage stability in closed containers; stir well before use

**TEGO® Glide 100** [Tego; Tego GmbH]

*Chem. Descrip.:* Dimethicone copolyol

*Uses:* Surf. control additive, mar resist. aid and flow control agent for water and solv.-based paints (alkyd, sat. polyester, polyacrylate), building protection coatings, anticorrosive paints, car finishes, printing inks; defoamer in food-contact paper/paperboard

*Use Level:* 0.1-1.0%

*Regulatory:* FDA 21CFR §176.210 compliant; BgVV approved

*Properties:* Gardner < 3 color; sp.gr. 1.02-1.04; dens. 8.3 lb/gal; visc. 800 ± 150 mm<sup>2</sup> s<sup>-1</sup>; flash pt. 41 C; ref. index 1.445-1.455; surf. tens. 21 dynes/cm (20 C); 100% act.

*Toxicology:* TSCA listed

*Precaution:* DOT: combustible liq.

*Storage:* 1 yr min. storage stability in closed containers

**TEGO® Glide 403** [Tego; Tego GmbH]

*Chem. Descrip.:* Polysiloxane-polyether copolymer

CAS 68937-54-2

*Uses:* Slip agent, flow control agent, leveling agent, anticratering agent, antiblocking agent, release agent in paper/board coatings, industrial coatings, printing inks, preprint applics.; food pkg. adhesives; defoamer in food-contact paper/paperboard; exc. compat. in common water-based binders; very good release, slip, and mar resist.

*Use Level:* 0.3-5.0% (paper coatings), 0.1-1.0% (water-based coatings), 0.1-0.3% (solv.-based coatings), 0.1-1.0% (printing inks)

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600

*Properties:* Pale yel. liq.; sol. (1:100) in water, alcohol, esters, ketones,

aromatic hydrocarbons; sp.gr. 1.014-1.034; dens. 8.6 lb/gal; visc. 2100-3300 mPa·s; pH 5.5-7.5; ref. index 1.445-1.455 (20 C); 100% act.

Storage: 12 mos min. storage stability in original sealed containers @ R.T.

**TEGO® Glide 404** [Tego; Tego GmbH]

*Chem. Descrip.:* Polysiloxane-polyether copolymer

CAS 68937-54-2

*Uses:* Slip agent, flow control agent, anticratering agent, surf. tens. reducer in paper/board coatings, industrial coatings, printing inks, ink jet inks, varnishes; exc. compat. in common water-based binders

*Use Level:* 0.3-3.0% (paper coatings), 0.1-1.0% (industrial coatings), 0.3-3.0% (ink jet inks), 0.1-1.0% (printing inks, varnishes)

*Properties:* Lt. yel. liq.; sol. (1:100) in water, alcohol, glycols; sp.gr. 1.014-1.034; visc. 37-47 mPa·s; ref. index 1.370-1.380 (20 C)

Storage: 12 mos min. storage stability in original sealed containers @ R.T.

**TEGO® Glide B 1484** [Tego; Tego GmbH]

*Chem. Descrip.:* Dimethicone copolyol

*Uses:* Slip agent, flow agent, leveling agent, deaerator for solv.-based systems, epoxy resins, epoxide, PU, acrylate/isocyanate, and alkyd/melamine paint systems, floor coatings, car finishes, wood/furniture varnishes; defoamer in food-contact paper/paperboard; improves scratch resistance

*Use Level:* 0.05-0.25% (paints), 0.2-1.0% (epoxy coatings)

*Regulatory:* FDA 21CFR §176.210; BGVV approved

*Properties:* Gardner 3 max. color; sol. in most org. solvs.; insol. in water; sp.gr. 1.00; dens. 8.3 lb/gal; visc. 350-550 mPa·s; flash pt. 65 C; ref. index 1.439-1.443; 100% act.

*Toxicology:* TSCA listed

*Precaution:* DOT: combustible liq.

Storage: 1 yr min. storage stability in closed containers @ R.T.

**TEGO® Glide ZG 400** [Tego; Tego GmbH]

*Chem. Descrip.:* Dimethicone copolyol

*Uses:* Surfactant, mar resistant additive for water- and solv.-based paints (alkyd, alkyd-melamine, PU, vinyl), building protection coatings, anticorrosive paints, wood/furniture varnishes, printing inks; defoamer in food-contact paper/paperboard; hydrolytically stable

*Use Level:* 0.05-0.15% on total formulation (paints), 0.1-1.0% (printing inks)

*Regulatory:* FDA 21CFR §176.210 approved; BgVV approved

*Properties:* Gardner < 2 clear to sl. turbid liq.; sp.gr. 1.025-1.045; dens. 8.6 lb/gal; visc. 750-1250 mPa·s; flash pt. 83 C; ref. index 1.450-1.454; 100% act.

*Toxicology:* TSCA listed

*Precaution:* DOT: combustible liq.

Storage: 1 yr. shelf life in closed containers

**TEGO® Photo Compound 750** [Goldschmidt AG]

*Chem. Descrip.:* TEGO® RC 711 (80%) and oligomeric  $\alpha$ -cleavage photoinitiator (20%)

*Uses:* For UV curing of TEGO® RC Series

*Use Level:* 10-20 parts

*Properties:* Sl. yel. greenish color; visc. 1700 mPa·s (20 C); flash pt. > 100 C

Storage: 6 mos. shelf life in dark, cool, dry place; avoid exposure to direct daylight

**TEGO® Photoinitiator A 12** [Goldschmidt AG]

*Uses:* Photoinitiator for use with TEGO® RC Series when cured by UV radiation; solv.-free

*Use Level:* 2-5%

*Properties:* Colorless to sl. yel. color; sp.gr. 1.08; visc. 20-25 mPa·s (20 C); b.p. 250 C; flash pt. > 100 C; 100% act.

Storage: 1 yr. shelf life in sealed org. containers under cool, dry conditions

**TEGOPREN® 5803** [Goldschmidt; Goldschmidt AG]

*Chem. Descrip.:* Polysiloxane-polyether copolymer

*Uses:* Additive for boosting the performance of defoaming compds.; increases the spreading performance of org. oils; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210; listed in TSCA inventory

*Properties:* Oil-sol.; 100% act.

*Toxicology:* TSCA listed

**TEGOPREN® 5852** [Goldschmidt AG]

*Chem. Descrip.:* Polyether siloxane

*Uses:* Antifoam; dispersant for aq. and org. systems; paper/pulping aux.; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210, BGA, MITI, and Korea compliance

*Properties:* Sol. in alcohol, aromatic, chlorinated HC, ester oil; disp. in water;

cloud pt. < 25 C; 100% act.

*Toxicology:* TSCA listed

**TEGOPREN® 5863** [Goldschmidt; Goldschmidt AG]

*Chem. Descrip.:* Polysiloxane-polyether copolymer

*Uses:* O/w emulsifier; additive for boosting the performance of defoaming compds.; increases the spreading performance of org. oils; flow improver for gran. powds.; hydrophilic softener; fabric softener; paper/pulping aux.; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210, BGA, MITI, and Korea compliance; listed in TSCA inventory

*Properties:* Sol. in water, alcohol, aromatics, chlorinated HC, ester oil; cloud pt. 42 C; surf. tens. 30 mN/m (0.1% water); 100% act.

*Toxicology:* TSCA listed

**TEGOPREN® 5884** [Goldschmidt; Goldschmidt AG]

*Chem. Descrip.:* Polysiloxane-polyether copolymer

*Uses:* Softeners and finishes for textiles and other applics.; defoamer in food-contact paper/paperboard; hydrophilic

*Regulatory:* FDA 21CFR §176.210; TSCA listed

*Properties:* Sol. in alcohol, aromatics, chlorinated HC, ester oil; sol. hot in water; cloud pt. 71 C; 100% act.

*Toxicology:* TSCA listed

**TEGO® Silicone Acrylate RC** [Goldschmidt]

*Chem. Descrip.:* Silicone acrylate

*Uses:* For release coatings to be cured by EB/UV-radiation in the paper and film industries

**TEGO® Wet 260** [Tego; Tego GmbH]

*Chem. Descrip.:* Polysiloxane-polyether copolymer

CAS 68937-54-2

*Uses:* Substrate wetting agent for low- or zero-VOC coatings and printing inks; used in wood and furniture lacquers, spray or roller coatings, appliance coatings, aq. primers for plastics, water-borne fillers for automotive coatings; printing inks for plastic and paper, overprint varnish; good recoatability, low tendency to stabilize foam

*Use Level:* 0.1-0.7% as supplied

*Properties:* Gardner 3 max. color; sp.gr. 1.01-1.03; dens. 8.5 lb/gal; visc. 30-150 mPa·s; flash pt. > 100 C; pH 4-10; 100% act., 95-100% NV; nonionic

*Toxicology:* TSCA listed

Storage: 1 yr storage life in closed container

**Tektamer® 38** [Nalco]

*Chem. Descrip.:* 1,2-Dibromo-2,4-dicyanobutane

CAS 35691-65-7; EINECS/ELINCS 252-681-0

*Uses:* Antimicrobial preservative for aq. systems, paints, emulsions, adhesives, joint cements, pigment dispersions, metalworking fluids, inks, polishes, waxes, cosmetics and personal care prods.; food pkg. adhesives, paper

*Use Level:* 0.025-0.075% (aq. paints), 0.01-0.05% (latex emulsions), 0.025-0.15% (adhesives), 1-4% (metalworking concs.), 0.01-0.1% (waxes, polishes), 0.01-0.75% (inks)

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; EPA reg. no. 10445-33

*Properties:* Off-wh. to lt. tan powd., mildly pungent odor; sol. 1700 ppm in water @ 20 C; sol. 325 g/100 ml in dimethylformamide, 301 g acetone, 218 g chloroform, 138 g ethyl acetate, 121 g benzene; bulk dens.  $\approx$  48 lb/ft<sup>3</sup>; m.p. 50-53 C; 98% min. act.

*Toxicology:* Corrosive; causes eye damage and skin irritation; harmful or fatal if swallowed

*Environmental:* Minimal environmental impact

Storage: Store out of direct sunlight to maintain below its m.p.; exposure above 50 C will cause caking; keep containers tightly closed

**Tektamer® 38 A.D.** [Nalco]

*Chem. Descrip.:* 1,2-Dibromo-2,4-dicyanobutane aq. disp.

CAS 35691-65-7; EINECS/ELINCS 252-681-0

*Uses:* Antimicrobial preservative for aq. systems, paints, emulsions, adhesives, joint cements, pigment dispersions, metalworking fluids, inks, polishes, waxes, cosmetics and personal care prods.; food pkg. adhesives, paper; food-contact slimicide

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA reg. no. 10445-56

*Properties:* Off-wh. to wh. liq.; sp.gr. 1.1 (20 C); visc. 1800-2400 cps; f.p. 0 C; 25% min. act.

*Toxicology:* Corrosive to eyes; causes eye damage and skin irritation

*Environmental:* Minimal environmental impact

*Storage:* Ship and store @ 0-42 C; keep from freezing; store away from heat  
**Tektamer® 38 L.V.** [Nalco]

*Chem. Descrip.:* 1,2-Dibromo-2,4-dicyanobutane aq. disp.

CAS 35691-65-7; EINECS/ELINCS 252-681-0

*Uses:* Antimicrobial preservative for aq. systems, paints, emulsions, adhesives, joint cements, pigment dispersions, metalworking fluids, inks, polishes, waxes, cosmetics and personal care prods.; food pkg. adhesives, paper

*Use Level:* 0.1-0.3% (aq. paints), 0.04-0.2% (latex emulsions), 0.04-0.6% (adhesives), 0.04-0.4% (waxes, polishes), 0.04-0.3% (inks), 0.04-0.1% (dispersed pigments), 0.2-0.4% (joint cements), 0.1-0.4% (metalworking fluids)

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; EPA reg. no. 10445-56

*Properties:* Off-wh. low-visc. liq.; sp.gr. 1.15-1.17 (20 C); visc. 125-400 cps; f.p. 0 C; 25% min. act. in water

*Toxicology:* Corrosive to eyes; causes eye damage and skin irritation

*Environmental:* Minimal environmental impact

*Storage:* Ship and store @ 0-42 C; keep from freezing; store away from heat

**Tenase® 1200** [Genencor Int'l.]

*Chem. Descrip.:* Bacterial  $\alpha$ -amylase

CAS 9000-92-4; EINECS/ELINCS 232-567-7

*Uses:* Enzyme for starch liquefaction for baking (antistaling agent), brewing (starch haze removal), candy, cereal (reduces visc.), cocoa, distilling, fermentation, starch (prod. of low DE syrups), paper size and coatings, textile desizing, starch adhesives, cleaning starch processing equip.

*Properties:* Lt. tan to wh. impalpable dry powd., free of offensive odor and taste; water-sol.

*Storage:* Activity loss  $\leq$  10% in 1 yr stored in sealed containers under cool dry conditions; 5 C storage extends life

**Tergitol® 15-S-3** [Union Carbide]

*Chem. Descrip.:* C11-15 pareth-3

CAS 68131-40-8

*Uses:* Detergent, emulsifier, wetting agent, intermediate used in textiles, solv. cleaners, dry cleaning, metalworking fluids, water treatment, oil field chems., pulp/paper deinking, latex emulsions, plastics antistat, agric.; defoamer for aq. systems

*Regulatory:* FDA, EPA compliance

*Properties:* Clear liq.; sol. in oil, chlorinated solvs., most org. solvs.; m.w. 336; sp.gr. 0.930; dens. 7.74 lb/gal; visc. 26 cs; HLB 8.3; hyd. no. 167; pour pt. -46 C; cloud pt. < 0 (1% aq.); flash pt. (PMCC) 174 C; pH 4.0 (1% in aq. IPA); 100% act.; nonionic

*Environmental:* Biodeg.

**Tergitol® 15-S-5** [Union Carbide]

*Chem. Descrip.:* C11-15 pareth-5

CAS 68131-40-8

*Uses:* Detergent, emulsifier, wetting agent, intermediate for household and industrial detergents, textiles, dry cleaning, water treatment, metalworking/cleaning, oil field chems., pulp/paper deinking, agric.; latex emulsion stabilizer; plastics antistat; defoamer for aq. systems; fuel de-icing

*Regulatory:* FDA, EPA compliance

*Properties:* Clear liq.; sol. in oils, chlorinated solvs., most org. solvs.; m.w. 415; sp.gr. 0.965; dens. 8.03 lb/gal; visc. 35 cP; HLB 10.6; hyd. no. 135; cloud pt. < 0 C (1% aq.); flash pt. (PMCC) 178 C; pour pt. -24 C; pH 6-8 (1%); 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) 8570 mg/kg, (skin, rabbit) 4000 mg/kg; mod. toxic by skin contact; mildly toxic by ing.; irritating to skin and eyes

*Environmental:* Biodeg.

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>2</sub>

**Tergitol® 15-S-7** [Union Carbide]

*Chem. Descrip.:* C11-15 pareth-7

CAS 68131-40-8

*Uses:* Detergent, emulsifier, wetting agent, dye leveling agent, coupler, dispersant, stabilizer for household and industrial detergents, paper, textiles, leather, paints, agric., metal cleaners, oil field chems., water treatment, electronics; intermediate

*Regulatory:* FDA, EPA compliance

*Properties:* Clear liq.; sol. in water, chlorinated solvs., most org. solvs.; m.w. 515; sp.gr. 0.992; dens. 8.26 lb/gal; visc. 51 cP; HLB 12.4; hyd. no. 109; pour pt. 2 C; cloud pt. 37 C (1% aq.); flash pt. (PMCC) 187 C; pH 6.8 (1% aq.); surf. tens. 28 dynes/cm (0.1% aq.); Draves wetting 7 s (0.1%); Ross Miles foam 125 mm (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Tergitol® 15-S-9** [Union Carbide]

*Chem. Descrip.:* C11-15 pareth-9

CAS 68131-40-8

*Uses:* Detergent, emulsifier, wetting agent, dye leveling agent, coupling agent for household and industrial detergents, paper, textiles, leather, paints, agric., metal cleaning, oil field chems., water treatment, electronics; intermediate

*Regulatory:* FDA, EPA compliance

*Properties:* Clear liq.; sol. in water, chlorinated solvs., most polar org. solvs.; m.w. 584; sp.gr. 1.006; dens. 8.37 lb/gal; visc. 60 cP; HLB 13.3; hyd. no. 96; pour pt. 9 C; cloud pt. 60 C (1% aq.); flash pt. (PMCC) 193 C; pH 7.1 (1%); surf. tens. 30 dynes/cm (0.1% aq.); Draves wetting 8 s (0.1%); Ross-Miles foam 95 mm (0.1% aq.); 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) 2380 mg/kg, (skin, rabbit) 2000 mg/kg; mod. toxic by ing. and skin contact; skin and severe eye irritant

*Environmental:* Biodeg.

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>2</sub>

**Tergitol® 15-S-12** [Union Carbide]

*Chem. Descrip.:* C11-15 pareth-12

CAS 68131-40-8

*Uses:* Detergent, wetting agent, emulsifier, coupling agent, dispersant, dye leveling agent, stabilizer for household/industrial detergents, paper, textiles, fiber lubricants, paints, agric., metal cleaners, oil field chems., water treatment, electronics, leather; rec. for elevated temp. and high electrolyte applics.

*Regulatory:* FDA, EPA compliance

*Properties:* Clear liq.; sol. in water, chlorinated solvs., most polar org. solvs.; m.w. 738; sp.gr. 1.020; dens. 8.49 lb/gal; visc. 85 cP; HLB 14.7; hyd. no. 76; pour pt. 20 C; cloud pt. 88 C (1% aq.); flash pt. (PMCC) > 227 C; pH 6.2 (1%); surf. tens. 31 dynes/cm (0.1% aq.); Draves wetting 24 s (0.1%); Ross-Miles foam 125 mm (1%, initial); 100% act.; nonionic

*Toxicology:* Skin and severe eye irritant

*Environmental:* Biodeg.

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating vapors

**Tergitol® 15-S-15** [Union Carbide]

*Chem. Descrip.:* C11-15 pareth-15

CAS 68131-40-8

*Uses:* Emulsifier, detergent, wetting agent for alkaline industrial cleaners/degreasers, textile scouring, dye carriers, demulsification of petrol. oil emulsions, oil field chems.; pulp/paper processing aid; stabilizer for syn. latexes; for use at elevated temps., in presence of electrolytes

*Regulatory:* FDA, EPA compliance

*Properties:* Wh. waxy semisolid; sol. in water, chlorinates solvs, polar org. solvs.; m.w. 877; sp.gr. 1.009 (55/20 C); dens. 8.40 (55 C); visc. 43 cP (50 C); HLB 15.6; hyd. no. 64; pour pt. 28 C; cloud pt. > 100 C (1% aq.); flash pt. (PMCC) 246 C; pH 6.4 (1% aq.); surf. tens. 34 dynes/cm (0.1% aq.); Ross-Miles foam 130 mm (0.1% aq., initial); 100% act.; nonionic

*Environmental:* Biodeg.

**Tergitol® Min-Foam 1X** [Union Carbide]

*Chem. Descrip.:* C11-15 alcohols reacted with EO and PO

CAS 68551-14-4

*Uses:* Surfactant, foam depressant, wetting agent, detergent for household/industrial cleaners, dry cleaning, textile processing, metal cleaning, circuit board cleaners, leather, paper deinking

*Properties:* Clear liq., mild char. odor; sol. in water, xylene, butyl Cellosolve, anhyd. IPA, perchloroethylene, oils; m.w. 645; sp.gr. 0.995; dens. 8.28 lb/gal; visc. 57 cP; HLB 11.4; hyd. no. 87; solid. pt. -42 C; pour pt. -38 C; cloud pt. 40 C (1% aq.); flash pt. (PMCC) 111 C; pH 6.7 (1% aq.); surf. tens. 29 dynes/cm (0.1% aq.); Draves wetting 6 s (0.1% aq.); Ross-Miles foam 120 mm (0.1% aq., initial); 100% act.; nonionic

*Toxicology:* Skin and eye irritant

*Environmental:* Biodeg.

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

**Tergitol® Min-Foam 2X** [Union Carbide]

*Chem. Descrip.:* C11-15 alcohols reacted with EO and PO

CAS 68551-14-4

*Uses:* Surfactant, antifoam, detergent for household/industrial detergents, machine dishwashing, rinse aid, acid metal cleaners, textile dyeing/processing/scouring, circuit board cleaners, paper deinking, water treatment; completely rinsable

*Properties:* Clear liq.; sol. in xylene, butyl Cellosolve, anhyd. IPA, perchlo-

roethylene, oils; m.w. 630; sp.gr. 0.978; dens. 8.14 lb/gal; visc. 49 cP; HLB 13.8; hyd. no. 89; solid. pt. -47 C; pour pt. -42 C; cloud pt. 20 C (1% aq.); flash pt. (PMCC) 155 C; pH 6.6 (1% aq.); surf. tens. 29 dynes/cm (0.1% aq.); Ross-Miles foam 45 mm (0.1% aq., initial); 100% act.; non-ionic

*Environmental:* Biodeg.

**Tergitol® NP-4** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-4

CAS 9016-45-9; EINECS/ELINCS 230-770-5

*Uses:* Detergent, wetting agent, emulsifier, dispersant used in dry cleaning detergents, household and industrial cleaners, adhesives, agric., emulsification/disp. PVAc; emulsifier for silicones and min. oils; freeze/thaw stabilizer for latex emulsions; food pkg. adhesives; sanitizing sol'ns. for food contact; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.210, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Colorless clear liq.; char. odor; oil-sol.; sol. in kerosene, aliphatic hydrocarbons, butyl acetate, butyl Cellosolve, corn and wh. min. oil, diesel fuel, anhyd. IPA, Stod., toluene; m.w. 396; sp.gr. 1.031; dens. 8.57 lb/gal; visc. 445 cs; HLB 8.9; b.p. > 300 C; flash pt. 480 F (COC); cloud pt. 0 C; 100% act.; nonionic

**Tergitol® NP-6** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-6

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier, dispersant used in dry cleaning detergents, household and industrial cleaners, adhesives, agric., emulsification/disp. PVAc; emulsifier for silicones and min. oils; freeze/thaw stabilizer for latex emulsions; food pkg. adhesives; defoamer in food-contact paper/paperboard; sanitizing sol'ns. for food contact; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.210, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Colorless clear liq.; char. odor; sol. in kerosene, aliphatic hydrocarbons, butyl acetate, butyl Cellosolve, corn and wh. min. oil, diesel fuel, anhyd. IPA, Stod., toluene; m.w. 484; sp.gr. 1.055; dens. 8.67 lb/gal; visc. 373 cs; HLB 10.9; b.p. > 300 C; flash pt. 360 F (PMCC); cloud pt. 0 C (0.5% aq.); pH 5-7.5; 100% act.; nonionic

**Tergitol® NP-7** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-7

CAS 9016-45-9; EINECS/ELINCS 248-292-0

*Uses:* Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

*Regulatory:* FDA 21CFR §175.105, 176.210, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Pt-Co 75 max. clear liq.; mild char. odor; sol. in butyl acetate, butyl Cellosolve, corn oil, anhyd. IPA, toluene, water; m.w. 528; sp.gr. 1.055; dens. 8.71 lb/gal; visc. 338 cs; HLB 11.7; solid. pt. -6 C; b.p. > 250 C; flash pt. 525 F (COC); cloud pt. 20 C; pH 5-8 (10% aq.); 100% act.; nonionic

**Tergitol® NP-8** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-8

CAS 9016-45-9

*Uses:* Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

*Regulatory:* FDA 21CFR §175.105, 176.210, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Pt-Co 50 max. clear liq.; mild char. odor; sol. in butyl acetate, butyl Cellosolve, ethylene glycol, anhyd. IPA, toluene, water; m.w. 572; sp.gr. 1.056; visc. 325; HLB 12.3; solid. pt. -3 C; b.p. 250 C; flash pt. 400 F (PMCC); cloud pt. 43 C; pH 5.0-8.0 (10% aq.); surf. tens. 30 dynes/cm (0.1% aq.); 100% act.; nonionic

**Tergitol® NP-9** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-9

CAS 9016-45-9

*Uses:* Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

*Regulatory:* FDA 21CFR §175.105, 176.210, 176.300, 178.1010(b), 178.3400, 182.99; USDA approved; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Yel. clear liq.; mild char. odor; sol. in butyl acetate, butyl Cellosolve, ethylene glycol, anhyd. IPA, toluene, water; m.w. 616; sp.gr. 1.057; dens. 8.80 lb/gal; visc. 318 cs; HLB 12.9; solid. pt. 0 C; b.p. > 250 C; flash pt. 540 F (COC); cloud pt. 54 C; pH 5-8 (10% aq.); surf. tens. 30 dynes/cm (0.1% aq.); 100% act.; nonionic

**Tergitol® NP-9.5** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-9.5

CAS 9016-45-9

*Uses:* Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

*Regulatory:* FDA 21CFR §175.105, 176.210, 176.300, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Liq.; misc. with chlorinated and aromatic solvs.; m.w. 634; sp.gr. 1.06; dens. 8.8 lb/gal; visc. 240 cP; HLB 13.1; hyd. no. 88; pour pt. 5 C; cloud pt. 59 C (1%); surf. tens. 31 dynes/cm; Ross-Miles foam 90 mm (1%, initial); 100% act.; nonionic

**Tergitol® NP-10** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

*Regulatory:* FDA 21CFR §175.105, 176.210, 176.300, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Yel. clear liq.; mild char. odor; sol. in butyl acetate, butyl Cellosolve, ethylene glycol, anhyd. IPA, toluene, water; m.w. 682; sp.gr. 1.062; dens. 8.84 lb/gal; visc. 327 cs; HLB 13.6; solid. pt. 7 C; b.p. > 250 C; flash pt. 500 F (COC); cloud pt. 63 C (0.5% aq.); 100% act.; nonionic

**Tergitol® NP-11** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-11

CAS 9016-45-9

*Uses:* Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

*Regulatory:* FDA 21CFR §175.105, 176.210, 176.300, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

*Properties:* Liq.; misc. with chlorinated and aromatic solvs.; m.w. 678; sp.gr. 1.06; dens. 8.8 lb/gal; visc. 260 cP; HLB 13.5; hyd. no. 83; pour pt. 12 C; cloud pt. 72 C (1%); surf. tens. 34 dynes/cm; Ross-Miles foam 95 mm (1%, initial); 100% act.; nonionic

**Tergitol® NP-12** [Union Carbide]

*Chem. Descrip.:* Nonoxynol-12

CAS 9016-45-9

*Uses:* Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/

disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

**Regulatory:** FDA 21CFR §175.105, 176.210, 176.300, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

**Properties:** Liq.; misc. with chlorinated and aromatic solvs.; m.w. 704; sp.gr. 1.06; dens. 8.8 lb/gal; visc. 240 cP; HLB 13.8; hyd. no. 80; pour pt. 13 C; cloud pt. 78 C (1%); surf. tens. 34 dynes/cm; Ross-Miles foam 100 mm (1%, initial); 100% act.; nonionic

**Tergitol® NP-13** [Union Carbide]

**Chem. Descrip.:** Nonoxynol-13  
CAS 9016-45-9

**Uses:** Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

**Regulatory:** FDA 21CFR §175.105, 176.210, 178.1010(b), 178.3400, 182.99; EPA 40CFR §180.1001(c),(d),(e)

**Properties:** Yel. clear liq.; mild char. odor; sol. in butyl acetate, butyl Cellosolve, ethylene glycol, anhyd. IPA, toluene, water; m.w. 792; sp.gr. 1.071; dens. 8.90 lb/gal; visc. 410 cs; HLB 14.4; solid. pt. 16 C; b.p. > 250 C; cloud pt. 83 C (0.5% aq.); pH 5.0-8.0 (10% aq.); surf. tens. 34 dynes/cm (0.1% aq.); 100% act.; nonionic

**Tergitol® NP-15** [Union Carbide]

**Chem. Descrip.:** Nonoxynol-15  
CAS 9016-45-9

**Uses:** Surfactant; detergent and wetting agent for adhesives/sealants, agric. emulsifiers, auto/brass/copper/silver polish, dairy and food plant cleaners, deinking/wetting/rewetting agent, detergent in industrial and household cleaners; dispersant for polymers/pigments; dust control/mining; emulsification/disp. polyvinyl acetate; emulsifier for fats/waxes/kerosene/min. oil, polyester resin; metal cleaning; textile wetting agent; wet/spread agents in water-based paints; food pkg.; all-purpose

**Regulatory:** FDA 21CFR §175.105, 176.210; EPA 40CFR §180.1001(e)

**Properties:** Liq.; HLB 15.0; 100% conc.; nonionic

**Tergitol® TMN-3** [Union Carbide]

**Chem. Descrip.:** Isolaureth-3  
CAS 60828-78-6

**Uses:** Emulsifier, wetting agent, coupling agent, penetrant, leveling agent for textile processing, lubricants, water treatment, solv. cleaners/degreasers, metalworking fluids, dry cleaning, oil field chems., pulp/paper deinking; defoamer for aq. systems; intermediate for anionic surfactants used in household, industrial, and personal care prods.

**Regulatory:** FDA, EPA compliance

**Properties:** Clear liq.; sol. in chlorinated solvs., most polar and nonpolar solvs, oils; m.w. 312; sp.gr. 0.930; dens. 7.74 lb/gal; visc. 19 cP; solid. pt. -40 C; HLB 8.1; hyd. no. 180; pour pt. -49 C; cloud pt. < 0 C (1% aq.); flash pt. (PMCC) 130 C; pH 7.2 (10% in aq. IPA); 100% act.; nonionic

**Tergitol® TMN-10** [Union Carbide]

**Chem. Descrip.:** Isolaureth-10  
CAS 60828-78-6

**Uses:** Emulsifier, wetting agent, spreading agent, penetrant, detergent, leveling agent for high temp. applics., textile wet processing, fiber lubricants, agric., paper deinking, metal cleaners, acid cleaners, water treatment, leather, circuit board cleaners

**Regulatory:** FDA, EPA compliance

**Properties:** Clear liq.; sol. in water, most polar solvs.; m.w. 683; sp.gr. 1.044; dens. 8.69 lb/gal; visc. 96 cP; HLB 14.1; hyd. no. 82; pour pt. -16 C; cloud pt. 77 C (1% aq.); solid. pt. -7.5 C; flash pt. (PMCC) none; pH 6.4 (10% aq.); surf. tens. 27 dynes/cm (0.1% aq.); Draves wetting 9 s (0.1% aq.); Ross-Miles foam 117 mm (0.1% aq., initial); 90% act. in water; nonionic  
**Toxicology:** LD50 (oral, rat) 5650 mg/kg; mildly toxic by ing.; skin and severe eye irritant

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Teric™ 12A3** [Huntsman]

**Chem. Descrip.:** PEG-3 C12-C15 alcohol  
CAS 68131-39-5

**Uses:** Wetting agent, emulsifier, dispersant for oil- and water-based systems,

consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

**Properties:** Visc. 28 cps (20 C); HLB 7.1; hyd. no. 175; pour pt. < 0 C; 0.15% water; nonionic

**Environmental:** Biodeg.

**Teric™ 12A9** [Huntsman]

**Chem. Descrip.:** PEG-9 C12-C15 alcohol  
CAS 68131-39-5

**Uses:** Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

**Properties:** Visc. 32 cps (50 C); HLB 13.6; hyd. no. 84; pour pt. 20 C; cloud pt. 80-85 C; surf. tens. 30.2 mN/m (0.1%); wetting 10 s (0.1%); Ross-Miles foam 11.7 cm (0.1%, initial); 0.5% water; nonionic

**Environmental:** Biodeg.

**Teric™ 12A23** [Huntsman]

**Chem. Descrip.:** PEG-23 C12-C15 alcohol  
CAS 68131-39-5

**Uses:** Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

**Properties:** Visc. 75 cps (50 C); HLB 16.6; hyd. no. 46; pour pt. 35 C; cloud pt. > 100 C; surf. tens. 35.7 mN/m (0.1%); wetting 42 s (0.1%); Ross-Miles foam 10.5 cm (0.1%, initial); 0.5% water; nonionic

**Environmental:** Biodeg.

**Teric™ 12M2** [Huntsman]

**Chem. Descrip.:** PEG-2 cocamine  
CAS 61791-14-8

**Uses:** Dispersant, emulsifier, stabilizer used in metal, stone, paper and textile processing; formulation of lubricants and dye bath auxs.; emulsion stabilizer; fat liquoring compds.; wetting agent of hydrophobic surfaces

**Properties:** Liq.; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, min. and veg. oil; disp. in water; sp.gr. 0.913; visc. 166 cps; m.p. -1 ± 2 C; HLB 11.4; surf. tens. 28.2 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic

**Teric™ 12M5** [Huntsman]

**Chem. Descrip.:** PEG-5 cocamine  
CAS 61791-14-8

**Uses:** Dispersant, emulsifier, stabilizer used in metal, stone, paper and textile processing; formulation of lubricants and dye bath auxs.; emulsion stabilizer; fat liquoring compds.; wetting agent of hydrophobic surfaces

**Properties:** Liq.; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, min., veg. and paraffin oil, olein; disp. in water; sp.gr. 0.971; visc. 311 cps; m.p. -9 ± 2 C; HLB 12.4; surf. tens. 29.2 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic

**Teric™ 12M15** [Huntsman]

**Chem. Descrip.:** PEG-15 cocamine  
CAS 61791-14-8

**Uses:** Dispersant, emulsifier, stabilizer used in metal, stone, paper and textile processing; formulation of lubricants and dye bath auxs.; emulsion stabilizer; fat liquoring compds.; wetting agent of hydrophobic surfaces

**Properties:** Liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, veg. oil, olein; sp.gr. 1.038; visc. 343 cps; m.p. -11 ± 2 C; HLB 15.7; cloud pt. > 100 C; surf. tens. 39.6 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic

**Teric™ 13A7** [Huntsman]

**Chem. Descrip.:** Isotrideceth-7

**Uses:** Emulsifier for agric.; intermediate for carboxymethylate mfg., sulfation; filter cake dewatering agent; dust suppressant in coal industry; domestic and window cleaners; leather finishing; wetting agent for paper and cellulose, textiles

**Properties:** APHA 100 color; sol. in water, aromatics, ethyl acetate, glycol ethers, trichlorethylene, ethanol, olein, ethylene glycol; sp.gr. 0.984; visc. 80 cps; HLB 11.8; hyd. no. 112-118; pour pt. 0 C; pH 5.5-7.5; surf. tens. 26 dynes/cm (0.1%); 100% act.; nonionic

**Teric™ 13A9** [Huntsman]

**Chem. Descrip.:** Isotrideceth-9

**Uses:** Wetting agent, dispersant, emulsifier, detergent used in pigment disps., agric. and horticultural applics., solv. emulsion cleaners, paper; wool dye leveling agent

**Properties:** Hazen 150 liq.; sol. in water, ethyl acetate, ethyl lcinol, ethanol; sp.gr. 1.018; visc. 142 cps; m.p. < 0 C; HLB 13.3; cloud pt. 63 ± 2 C; pH

6-8 (1% aq.); surf. tens. 27.9 dynes/cm (0.1%); wetting 2 s (0.1%); Ross-Miles foam 12.5 cm (0.1%, initial); 95% act.; nonionic

**Teric™ 16A16** [Huntsman]

*Chem. Descrip.:* PEG-16 C16-C18 alcohol

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 65 cps (50 C); HLB 14.9; hyd. no. 60; pour pt. 38 C; cloud pt. > 100 C; surf. tens. 37.1 mN/m (0.1%); wetting 28 s (0.1%); Ross-Miles foam 7.3 cm (0.1%, initial); 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 16A22** [Huntsman]

*Chem. Descrip.:* PEG-22 C16-C18 alcohol

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 92 cps (50 C); HLB 15.8; hyd. no. 42; pour pt. 40 C; cloud pt. > 100 C; surf. tens. 41.3 mN/m (0.1%); wetting 48 s (0.1%); Ross-Miles foam 10.3 cm (0.1%, initial); 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 16A29** [Huntsman]

*Chem. Descrip.:* PEG-29 C16-C18 alcohol

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 105 cps (50 C); HLB 17.7; hyd. no. 36; pour pt. 45 C; cloud pt. > 100 C; surf. tens. 46 mN/m (0.1%); wetting 80 s (0.1%); Ross-Miles foam 8.7 cm (0.1%, initial); 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 16M2** [Huntsman]

*Chem. Descrip.:* PEG-2 soya amine

CAS 61791-24-0

*Uses:* Wetting agent, dispersant, emulsifier for waxes and fats; formulation of leather dressing and metal cleaning compds., fiber lubricant applics. in the bldg. industry; formulation of lubricants and dye bath auxs.; wetting agent of hydrophobic surfs. used in metal, stone, paper, and textile processing; emulsion stabilizer; fat liquoring compds.

*Properties:* Liq.; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, min., paraffin and veg. oil, olein; sp.gr. 0.906; visc. 191 cps; m.p.  $-15 \pm 2$  C; HLB 9.5; surf. tens. 26.6 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic

**Teric™ 16M10** [Huntsman]

*Chem. Descrip.:* PEG-10 soya amine

CAS 61791-24-0

*Uses:* Wetting agent, dispersant, emulsifier for fats and waxes used in leather dressing compds.; fat liquoring compds.; fiber lubricant; formulation of lubricants and dye bath auxs.; wax emulsions for fiber board pkg. and particle board for bldg. industry; wetting agent of hydrophobic surfs. used in metal, stone, paper, and textile processing; emulsion stabilizer

*Properties:* Liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, min., veg. and paraffin oil, olein; sp.gr. 0.994; visc. 219 cps; m.p.  $-22 \pm 2$  C; HLB 12.1; cloud pt.  $89 \pm 2$  C; surf. tens. 36.1 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic

**Teric™ 16M15** [Huntsman]

*Chem. Descrip.:* PEG-15 soya amine

CAS 61791-24-0

*Uses:* Wetting agent and dispersant used in metal, cleaning, leather dressing and dye leveling compds., agric. sprays; emulsifier for fats and waxes; fiber lubricant; formulation of lubricants and dye bath auxs.; wax emulsion for the bldg. industry; wetting agent of hydrophobic surfs. used in metal, stone, paper, and textile processing; emulsion stabilizer; fat liquoring compds.

*Properties:* Liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol; sp.gr. 1.021; visc. 266 cps; m.p.  $-18 \pm 2$  C; HLB 13.8; cloud pt. > 100 C; surf. tens. 37.4 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic

**Teric™ 17A2** [Huntsman]

*Chem. Descrip.:* PEG-2 cetyl oleyl alcohol

CAS 8065-81-4

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 37 cps (20 C); HLB 6.0; hyd. no. 153; pour pt. 11 C; 0.5%

water; nonionic

*Environmental:* Biodeg.

**Teric™ 17A3** [Huntsman]

*Chem. Descrip.:* PEG-3 cetyl oleyl alcohol

CAS 8065-81-4

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 41 cps (20 C); HLB 7.5; hyd. no. 138; pour pt. 13 C; 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 17A6** [Huntsman]

*Chem. Descrip.:* PEG-6 cetyl oleyl alcohol

CAS 8065-81-4

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 60 cps (20 C); HLB 10.2; hyd. no. 107; pour pt. 15 C; 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 17A8** [Huntsman]

*Chem. Descrip.:* PEG-8 cetyl oleyl alcohol

CAS 8065-81-4

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 35 cps (50 C); HLB 11.6; hyd. no. 91; pour pt. 17 C; cloud pt. 41 C; surf. tens. 30.8 mN/m (0.1%); wetting 24 s (0.1%); Ross-Miles foam 9.6 cm (0.1%, initial); 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 17A10** [Huntsman]

*Chem. Descrip.:* PEG-10 cetyl oleyl alcohol

CAS 8065-81-4

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 43 cps (50 C); HLB 12.7; hyd. no. 81; pour pt. 24 C; cloud pt. 70-75 C; surf. tens. 32.9 mN/m (0.1%); wetting 27 s (0.1%); Ross-Miles foam 10.8 cm (0.1%, initial); 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 17A13** [Huntsman]

*Chem. Descrip.:* PEG-13 cetyl oleyl alcohol

CAS 8065-81-4

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 45 cps (50 C); HLB 13.0; hyd. no. 74; pour pt. 25 C; cloud pt. 79-81 C; surf. tens. 33 mN/m (0.1%); wetting 17 s (0.1%); Ross-Miles foam 10.4 cm (0.1%, initial); 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 17A25** [Huntsman]

*Chem. Descrip.:* PEG-25 cetyl oleyl alcohol

CAS 8065-81-4

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Properties:* Visc. 92 cps (50 C); HLB 16.2; hyd. no. 43; pour pt. 37 C; cloud pt. > 100 C; surf. tens. 42 mN/m (0.1%); wetting 102 s (0.1%); Ross-Miles foam 11.3 cm (0.1%, initial); 0.5% water; nonionic

*Environmental:* Biodeg.

**Teric™ 18M2** [Huntsman]

*Chem. Descrip.:* PEG-2 stearamine

CAS 9003-93-4; EINECS/ELINCS 233-520-3

*Uses:* Wetting agent; dispersant; emulsion stabilizer; emulsifier used in agric. toxicants and processing of textiles, paper, leather and bldg. board; corrosion inhibitor in lubricants and greases

*Properties:* Solid; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, min., paraffin and veg. oil, olein; sp.gr. 0.887 (50 C); visc. 75 cps (50 C); m.p.  $50 \pm 2$  C; HLB 8.5; pH 8-10 (1% aq.); 100% act.; nonionic

**Teric™ 18M5** [Huntsman]

*Chem. Descrip.:* PEG-5 stearamine

- CAS 26635-92-7  
*Uses:* Wetting agent; dispersant; emulsion stabilizer; emulsifier used in agric. toxicants and processing of textiles, paper, leather and bldg. board; corrosion inhibitor in lubricants and greases; softener and antistat in solv. cleaning of textiles and compd. of plastics  
*Properties:* Solid; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, min., paraffin and veg. oil, olein; disp. in water; sp.gr. 0.935 (50 C); visc. 46 cps (50 C); m.p. 35 ± 2 C; HLB 9.5; pH 8-10 (1% aq.); 100% act.; nonionic
- Teric™ 18M10** [Huntsman]  
*Chem. Descrip.:* PEG-10 stearamine  
 CAS 26635-92-7  
*Uses:* Wetting agent; dispersant; emulsion stabilizer; emulsifier used in agric. toxicants, textiles, paper, leather and bldg. board; corrosion inhibitor in lubricants and greases; softener, antistat for plastics, textiles  
*Properties:* Liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, veg. oil, olein; sp.gr. 0.997; visc. 255 cps; m.p. 18 ± 2 C; HLB 11.2; cloud pt. > 100 C; surf. tens. 34.0 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic
- Teric™ 18M20** [Huntsman]  
*Chem. Descrip.:* PEG-20 stearamine  
 CAS 26635-92-7  
*Uses:* Wetting agent; dispersant; emulsion stabilizer; emulsifier used in agric. toxicants and processing of textiles, paper, leather and bldg. board; corrosion inhibitor in lubricants and greases  
*Properties:* Paste; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, olein; sp.gr. 1.025 (50 C); visc. 66 cps (50 C); m.p. 28 ± 2 C; HLB 14.5; cloud pt. > 100 C; surf. tens. 40.3 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic
- Teric™ 18M30** [Huntsman]  
*Chem. Descrip.:* PEG-30 stearamine  
 CAS 26635-92-7  
*Uses:* Wetting agent; dispersant; emulsion stabilizer; emulsifier used in agric. toxicants and processing of textiles, paper, leather and bldg. board; corrosion inhibitor in lubricants and greases  
*Properties:* Solid; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol; sp.gr. 1.038 (50 C); visc. 116 cps (50 C); m.p. 28 ± 2 C; HLB 17.8; cloud pt. > 100 C; surf. tens. 43.0 dynes/cm; pH 8-10 (1% aq.); 100% act.; nonionic
- Teric™ 127** [Huntsman]  
*Chem. Descrip.:* Fatty acid EO condensate  
*Uses:* Antifoam; emulsifier; coemulsifier of veg. and min oils, paraffinic waxes and solvs.; lubricant for textile processing; foam control agent in paper mfg., industrial fermentation and distillation, textile dyeing  
*Properties:* Hazen > 250 liq.; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, veg. oil, olein; sp.gr. 0.978; visc. 87 cps; m.p. < 0 C; HLB 7.7; pH 8 (1% aq.); 100% act.; nonionic
- Teric™ 128** [Huntsman]  
*Chem. Descrip.:* Ethoxylated alkyl phenol  
*Uses:* Wetting agent, deinking agent for paper recycling; emulsifier; low foaming  
*Properties:* Liq.; 100% conc.; nonionic
- Teric™ 164** [Huntsman]  
*Uses:* Surfactant, defoamer for metal cleaning, textile processing, paper mfg., water treatment, mechanical dishwashing detergents, and low foaming heavy-duty/all-purpose laundry detergents; low foaming  
*Properties:* Visc. 65 cps (20 C); HLB 10.8; pour pt. 2 C; hyd. no. 84; cloud pt. 39 C (1%); 0.5% water; nonionic
- Teric™ 165** [Huntsman]  
*Uses:* Surfactant, defoamer for metal cleaning, textile processing, paper mfg., water treatment, mechanical dishwashing detergents, and low foaming heavy-duty/all-purpose laundry detergents; low foaming  
*Properties:* Visc. 68 cps (20 C); HLB 12.5; pour pt. 3 C; cloud pt. 30-38 C (1%); 10% water; nonionic
- Teric™ 167** [Huntsman]  
*Uses:* Surfactant, defoamer for metal cleaning, textile processing, paper mfg., water treatment, mechanical dishwashing detergents, and low foaming heavy-duty/all-purpose laundry detergents; low foaming  
*Properties:* Visc. 20 cps (20 C); pour pt. 4 C; 1% water; nonionic
- Teric™ 168** [Huntsman]  
*Uses:* Surfactant, defoamer for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, and low foaming heavy-duty/all-purpose laundry detergents
- Teric™ 170** [Huntsman]  
*Uses:* Surfactant, defoamer for metal cleaning, textile processing, paper mfg., water treatment, mechanical dishwashing detergents, and low foaming heavy-duty/all-purpose laundry detergents; low foaming  
*Properties:* Visc. 560 cps (20 C); pour pt. < 0 C; hyd. no. 225; 1% water; nonionic
- Teric™ 171** [Huntsman]  
*Uses:* Surfactant, defoamer for metal cleaning, textile processing, paper mfg., water treatment, mechanical dishwashing detergents, and low foaming heavy-duty/all-purpose laundry detergents; low foaming  
*Properties:* Visc. 450 cps (20 C); pour pt. < 0 C; hyd. no. 136; cloud pt. 71-75 C (1%); 0.5% water; nonionic
- Teric™ 173** [Huntsman]  
*Uses:* Surfactant, defoamer for metal cleaning, textile processing, paper mfg., water treatment, mech. dishwashing detergents, and low foaming heavy-duty/all-purpose laundry detergents
- Teric™ BL8** [Huntsman]  
*Chem. Descrip.:* C9-11 alcohol alkoxyolate  
*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment  
*Properties:* Visc. 63 cps (20 C); HLB 13.7; hyd. no. 92; pour pt. < 0 C; cloud pt. 57-61 C; surf. tens. 30.3 mN/m (0.1%); wetting 3 s (0.1%); Ross-Miles foam 13.1 cm (0.1%, initial); 0.5% water; nonionic  
*Environmental:* Biodeg.
- Teric™ G9A2** [Huntsman]  
*Chem. Descrip.:* PEG-2 C9-C11 alcohol  
 CAS 68439-46-3  
*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment  
*Properties:* Visc. 25 cps (20 C); HLB 8.7; hyd. no. 225; pour pt. < 0 C; 0.2% water; nonionic  
*Environmental:* Biodeg.
- Teric™ G9A6** [Huntsman]  
*Chem. Descrip.:* C9-11 parath-6  
 CAS 68439-46-3  
*Uses:* Emulsifier for agric., solvs.; filter cake dewatering; dust suppression in coal industry; domestic, laundry, hard surf. and window cleaners; leather; paper deinking; skin care prods.; textile wetting, carbonizing, leveling, scouring; surfactant for formulation of hard surf. cleaners, degreasers and dispersants in industrial and domestic applics.  
*Properties:* APHA 100 color; sol. in water, aromatics, ethyl acetate, glycol ethers, trichlorethylene, ethanol, ethylene glycol; sp.gr. 0.987; visc. 38 cps; HLB 12.4; pour pt. < 0 C; cloud pt. 50-55 C; pH 6-8; surf. tens. 24.0 dynes/cm (0.1%); 100% act.; nonionic
- Teric™ G9A8** [Huntsman]  
*Chem. Descrip.:* C9-11 parath-8  
 CAS 68439-46-3  
*Uses:* Emulsifier, dispersant, wetting agent for domestic, hard surf., laundry cleaners; paper deinking; degreaser, wetting agent for textiles  
*Properties:* APHA 100 color; sol. in water, aromatics, ethyl acetate, glycol ethers, trichlorethylene, ethanol, ethylene glycol; sp.gr. 0.988 (50 C); visc. 21 cps (50 C); HLB 13.7; pour pt. 13 C; cloud pt. 75-80 C; pH 6-8; surf. tens. 27.0 dynes/cm (0.1%); 100% act.; nonionic
- Teric™ G9A10** [Huntsman]  
*Chem. Descrip.:* C9-11 parath-10  
 CAS 68439-46-3  
*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment  
*Properties:* Visc. 25 cps (50 C); HLB 14.7; hyd. no. 93; pour pt. 22 C; surf. tens. 33 mN/m (0.1%); wetting 16 s (0.1%); Ross-Miles foam 14.2 cm (0.1%, initial); 0.5% water; nonionic  
*Environmental:* Biodeg.
- Teric™ G12A6** [Huntsman]  
*Chem. Descrip.:* C12-15 parath-6  
 CAS 68131-39-5  
*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment, hard surf. abrasives, metal descaling, domestic and

industrial use in laundries, sanitizing, dairy detergents; intermediate for metal cleaning

*Properties:* Hazen 250 liq. to paste; sp.gr. 0.955; visc. 24 cps (50 C); m.p.  $10 \pm 2$  C; HLB 11.2; cloud pt.  $40 \pm 2$  C; surf. tens. 27.8 dynes/cm; pH 6-8 (1% aq.); surf. tens. 27.7 mN/m (0.1%); wetting 7 s (0.1%); Ross-Miles foam 7 cm (0.1%, initial); 100% act.; nonionic

*Environmental:* Biodeg.

#### Teric™ G12A7 [Huntsman]

*Chem. Descrip.:* C12-15 parath-7

CAS 68131-39-5

*Uses:* Surfactant for skin care gels, dairy cleaning, laundry prods., lt. duty detergents, paper processing; fiber lubricant/antistat for textile spinning, cotton dye leveling

*Properties:* APHA 100 color; sol. in water, aromatics, ethyl acetate, glycol ethers, trichlorethylene, ethanol, ethylene glycol; sp.gr. 0.958 (50 C); visc. 26 cps (50 C); HLB 12.1; pour pt. 15 C; cloud pt. 48-52 C; pH 6-8; surf. tens. 30 dynes/cm (0.1%); wetting 8 s (0.1%); Ross-Miles foam 9.1 cm (0.1%, initial); 100% act.; nonionic

#### Teric™ G12A12 [Huntsman]

*Chem. Descrip.:* C12-15 parath-12 (11.5 EO)

CAS 68131-39-5

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment, hard surf. abrasives, metal descaling; intermediate for metal cleaning

*Properties:* Hazen 250 solid; sp.gr. 0.993; visc. 37 cps; m.p.  $24 \pm 2$  C; HLB 14.4; cloud pt.  $92 \pm 2$  C; surf. tens. 35.6 dynes/cm; pH 6-8 (1% aq.); surf. tens. 35.6 mN/m (0.1%); wetting 17 s (0.1%); Ross-Miles foam 12.6 cm (0.1%, initial); 100% act.; nonionic

*Environmental:* Biodeg.

#### Teric™ N2 [Huntsman]

*Chem. Descrip.:* Nonoxynol-2

CAS 9016-45-9; EINECS/ELINCS 248-291-5

*Uses:* W/o emulsifier, defoamer, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries, solv. emulsion cleaners, dry cleaning detergents; intermediate for prod. of anionics; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper/paperboard

*Properties:* Hazen 100 liq.; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, min., paraffin and veg. oil, olein; disp. in water; sp.gr. 1.001; visc. 620 cps; m.p. < 0 C; HLB 5.7; hyd. no. 178-185; pour pt. < 0 C; pH 6-8 (1% aq.); 100% act.; nonionic

#### Teric™ N4 [Huntsman]

*Chem. Descrip.:* Nonoxynol-4

CAS 9016-45-9; EINECS/ELINCS 230-770-5

*Uses:* W/o emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, metalworking lubricants, tank cleaning, dry cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries; antistat; lubricant; latex stabilizer; detergent for petrol. oils; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper

*Properties:* Hazen 100 liq.; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, min., paraffin and veg. oil, olein; disp. in water; sp.gr. 1.023; visc. 370 cps; m.p. < 0 C; HLB 8.9; hyd. no. 138-145; pH 6-8 (1% aq.); 100% act.; nonionic

#### Teric™ N5 [Huntsman]

*Chem. Descrip.:* Nonoxynol-5 (5.5 EO)

CAS 9016-45-9; EINECS/ELINCS 247-555-7

*Uses:* W/o emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, metalworking lubricants, tank cleaning, dry cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries; antistat; lubricant; latex stabilizer; detergent for petrol. oils; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper

*Properties:* Hazen 100 liq.; sol. in benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, kerosene, veg. oil, olein; disp. in water; sp.gr. 1.035; visc. 355 cps; m.p. < 0 C; HLB 10.5; hyd. no. 118-126; pH 6-8 (1% aq.); 100% act.; nonionic

#### Teric™ N6 [Huntsman]

*Chem. Descrip.:* Nonoxynol-6

CAS 9016-45-9

*Uses:* W/o and o/w emulsifier, wetting agent, detergent, surf. tens. reducer, penetrant, solubilizer, dispersant for household cleaners, industrial cleaners, textiles, agric., metal/min. processing, pulp/paper, metal cleaning, petrol., cosmetics, latex paints, cutting oils, household laundry detergents, emulsion polymerization, janitorial supply industries; deicing aid; rust inhibitor; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper/paperboard; low to mod. foaming; generally inert

*Properties:* Visc. 340 cps (20 C); HLB 10.9; pour pt. < 0 C; 0.5% water; nonionic

#### Teric™ N8 [Huntsman]

*Chem. Descrip.:* Nonoxynol-8 (8.5 EO)

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier, dispersant, solubilizer for concrete mfg., agric. sprays, pesticides, solv. cleaners, paints, detergents, emulsion polymerization, leather, textiles, pulp/paper; base surfactant for household and industrial detergents

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, veg. oil, olein; sp.gr. 1.056; visc. 350 cps; m.p.  $0 \pm 2$  C; HLB 12.3; cloud pt. 30-34 C; pH 6-8 (1% aq.); surf. tens. 29.4 dynes/cm (0.1%); wetting 4.1 s (0.1%); Ross-Miles foam 6.7 cm (0.1%, initial); 100% act.; nonionic

#### Teric™ N9 [Huntsman]

*Chem. Descrip.:* Nonoxynol-9

CAS 9016-45-9

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for concrete mfg., agric. sprays, solv. cleaners, detergents, emulsion polymerization, household cleaners, textiles, metal cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries, food pkg.; pitch dispersant for pulp/paper mills; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/board

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, veg. oil, olein; sp.gr. 1.060; visc. 330 cps; m.p.  $0 \pm 2$  C; HLB 12.8; cloud pt. 50-55 C; pH 6-8 (1% aq.); surf. tens. 30.6 dynes/cm (0.1%); wetting 3.8 s (0.1%); Ross-Miles foam 10.6 cm (0.1%, initial); 100% act.; nonionic

#### Teric™ N10 [Huntsman]

*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric. sprays, concrete mfg., metal cleaning, solv. cleaners, petrol., latex paints, detergents, emulsion polymerization, cosmetics, cutting oils, janitorial supply industries; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, veg. oil, olein; sp.gr. 1.063; visc. 360 cps; m.p.  $5 \pm 2$  C; HLB 13.3; cloud pt.  $67 \pm 2$  C; pH 6-8 (1% aq.); surf. tens. 30.6 dynes/cm (0.1%); wetting 5 s (0.1%); Ross-Miles foam 12.6 cm (0.1%, initial); 100% act.; nonionic

#### Teric™ N11 [Huntsman]

*Chem. Descrip.:* Nonoxynol-11

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, surf. tens. reducer, penetrant, dispersant, emulsifier, solubilizer for concrete mfg., agric. sprays, metal/min. processing, pulp/paper, household laundry detergents, industrial cleaners, textiles, solv. cleaners, paints, emulsion polymerization

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol, perchlorethylene, ethanol, olein; sp.gr. 1.069; visc. 410 cps; m.p.  $7 \pm 2$  C; HLB 13.7; cloud pt.  $74 \pm 2$  C; pH 6-8 (1% aq.); surf. tens. 34.8 dynes/cm (0.1%); wetting 9 s (0.1%); Ross-Miles foam 12.6 cm (0.1%, initial); 100% act.; nonionic

#### Teric™ N12 [Huntsman]

*Chem. Descrip.:* Nonoxynol-12

CAS 9016-45-9

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for concrete mfg., agric. sprays, solv. cleaners, latex paints, detergents, emulsion polymerization, household cleaners, textiles, metal cleaning, petrol., cosmetics, cutting oils, janitorial supply industries; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl lcinol,

perchloroethylene, ethanol, olein; sp.gr. 1.045 (50 C); visc. 67 cps (50 C); m.p.  $11 \pm 2$  C; HLB 13.9; cloud pt.  $82 \pm 2$  C; pH 6-8 (1% aq.); surf. tens. 35.2 dyens/cm (0.1%); wetting 8.9 s (0.1%); Ross-Miles foam 13 cm (0.1%, initial); 100% act.; nonionic

**Teric™ N13** [Huntsman]

*Chem. Descrip.:* Nonoxynol-13  
CAS 9016-45-9

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for concrete mfg., agric. sprays, solv. cleaners, latex paints, detergents, emulsion polymerization, household cleaners, textiles, metal cleaning, petrol., cosmetics, cutting oils, janitorial supply industries; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, olein; sp.gr. 1.049 (50 C); visc. 75 cps (50 C); m.p.  $14 \pm 2$  C; HLB 14.4; cloud pt.  $89 \pm 2$  C; pH 6-8 (1% aq.); surf. tens. 34.9 dynes/cm (0.1%); wetting 16.4 s (0.1%); Ross-Miles foam 12.3 cm (0.1%, initial); 100% act.; nonionic

**Teric™ N15** [Huntsman]

*Chem. Descrip.:* Nonoxynol-15  
CAS 9016-45-9

*Uses:* O/w emulsifier, wetting agent, detergent, penetrant, solubilizer, dispersant for household cleaners, textiles, agric., metal cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries, perfumes, detergents, sanitizers, emulsion polymerization, acid cleaners, hard surf. cleaners; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper/paperboard

*Properties:* Hazen 100 paste; sol. in water, benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, olein; sp.gr. 1.051 (50 C); visc. 82 cps (50 C); m.p.  $21 \pm 2$  C; HLB 15.0; cloud pt.  $95 \pm 2$  C; pH 6-8 (1% aq.); surf. tens. 33.4 dynes/cm (0.1%); wetting 13.9 s (0.1%); Ross-Miles foam 14.2 cm (0.1%, initial); 100% act.; nonionic

**Teric™ N20** [Huntsman]

*Chem. Descrip.:* Nonoxynol-20  
CAS 9016-45-9

*Uses:* O/w emulsifier, detergent, penetrant, solubilizer dispersant for household cleaners, textiles, agric., metal cleaning, crude oils, cosmetics, latex paints, cutting oils, janitorial supply industries, emulsion polymerization; wetting agent, coemulsifier in perfumes, detergents, sanitizers, latex stabilization; emulsifier for waxes, oils, fats, solvs.; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact coatings, paper/paperboard

*Properties:* Hazen 100 solid; sol. in water, benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, olein; sp.gr. 1.061 (50 C); visc. 100 cps (50 C); m.p.  $30 \pm 2$  C; HLB 16.0; hyd. no. 42-57; cloud pt.  $> 100$  C; pH 6-8 (1% aq.); surf. tens. 41.7 dynes/cm (0.1%); wetting 24.6 s (0.1%); Ross-Miles foam 13.9 cm (0.1%, initial); 100% act.; nonionic

**Teric™ N30** [Huntsman]

*Chem. Descrip.:* Nonoxynol-30  
CAS 9016-45-9

*Uses:* O/w emulsifier, detergent, penetrant, solubilizer dispersant for household cleaners, textiles, agric., metal cleaning, petrol., cosmetics, latex paints, cutting oils, janitorial supply industries, emulsion polymerization; wetting agent, coemulsifier in perfumes, detergents, sanitizers; food pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings

*Properties:* Hazen 150 flakes; sol. in water, benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol; sp.gr. 1.066 (50 C); visc. 150 cps (50 C); m.p.  $40 \pm 2$  C; HLB 17.2; hyd. no. 31-36; cloud pt.  $> 100$  C; pH 6-8 (1% aq.); surf. tens. 42.8 dynes/cm (0.1%); wetting 69 s (0.1%); Ross-Miles foam 14 cm (0.1%, initial); 100% act.; nonionic

**Teric™ N30L** [Huntsman]

*Chem. Descrip.:* Nonoxynol-30  
CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, surf. tens. reducer, penetrant, dispersant for agric., metal/min. processing, pulp/paper, household laundry detergents, industrial cleaners, textiles, emulsion polymerization; low to mod. foaming; generally inert

*Properties:* APHA 100 color; sp.gr. 1.095; visc. 2000 cps; HLB 17.2; pour pt.  $2$  C; pH 6-8; surf. tens. 43 dynes/cm (0.1%); wetting 69 s (0.1%); Ross-Miles foam 14 cm (0.1%, initial); 70% act.; nonionic

**Teric™ OF4** [Huntsman]

*Chem. Descrip.:* PEG-4 oleate  
CAS 9004-96-0; EINECS/ELINCS 233-293-0

*Uses:* Emulsifier used in o/w emulsions of veg. and min. oils, fats, waxes and solvs.; formulation of cutting oils; metal lubricant in metal cleaning formulations and in solv. degreasers; textile and paper finishing applics.; antistat in textile processing and mfg. of syn. fibers

*Properties:* Hazen  $> 250$  liq.; sol. in benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, kerosene, veg. oil, olein; disp. in water; sp.gr. 0.978; visc. 87 cps; m.p.  $< 0$  C; HLB 7.7; pH 8 (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Teric™ OF6** [Huntsman]

*Chem. Descrip.:* PEG-6 oleate  
CAS 9004-96-0

*Uses:* Emulsifier used in o/w emulsions of veg. and min. oils, fats, waxes and solvs.; formulation of cutting oils; metal lubricant in metal cleaning formulations and in solv. degreasers; textile and paper finishing applics.; antistat in textile processing and mfg. of syn. fibers

*Properties:* Hazen  $> 250$  liq.; sol. in benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, kerosene, veg. oil, olein; disp. in water; sp.gr. 0.992; visc. 82 cps; m.p.  $< 0$  C; HLB 9.7; pH 7-9 (1% aq.); surf. tens. 32.1 mN/m (0.1%); Ross-Miles foam 0.3 cm (0.1%, initial); 100% act.; nonionic

*Environmental:* Biodeg.

**Teric™ OF8** [Huntsman]

*Chem. Descrip.:* PEG-8 oleate  
CAS 9004-96-0

*Uses:* Emulsifier; aux. product and antistat in textile and paper finishing applics.

*Properties:* Hazen  $> 250$  liq.; sol. in benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, kerosene, veg. oil, olein; disp. in water; sp.gr. 1.012; visc. 120 cps; m.p.  $< 0$  C; HLB 11.1; pH 8-10 (1% aq.); surf. tens. 33.6 mN/m (0.1%); Ross-Miles foam 1 cm (0.1%, initial); 100% act.; nonionic

*Environmental:* Biodeg.

**Teric™ PE 61** [Huntsman]

*Chem. Descrip.:* POE (6) PPG 1750

*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper

*Properties:* Hazen 100 liq.; sol. in benzene, ethyl acetate, ethyl Icinol, perchloroethylene, veg. oil, olein; sp.gr. 1.017; visc. 388 cps; m.p.  $< 0$  C; HLB 3; cloud pt.  $24 \pm 2$  C; surf. tens. 39.0 dynes/cm; pH 6 (1% aq.); 100% act.; nonionic

**Teric™ PE 62** [Huntsman]

*Chem. Descrip.:* POE (17) PPG 1750

*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, veg. oil, olein; sp.gr. 1.032; visc. 440 cps; m.p.  $< 0$  C; HLB 7; cloud pt.  $32 \pm 2$  C; surf. tens. 42.1 dynes/cm; pH 6 (1% aq.); 100% act.; nonionic

**Teric™ PE 64** [Huntsman]

*Chem. Descrip.:* POE (25) PPG 1750

*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper

*Properties:* Hazen 100 liq.; sol. in water, benzene, ethyl acetate, ethyl Icinol, perchloroethylene, ethanol, olein; sp.gr. 1.051; visc. 1332 cps; m.p.  $8 \pm 2$  C; HLB 15; cloud pt.  $58 \pm 2$  C; surf. tens. 43.2 dynes/cm; pH 6 (1% aq.); 100% act.; nonionic

**Teric™ PE 68** [Huntsman]

*Chem. Descrip.:* POE (150) PPG 1750

*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, I&I cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper

*Properties:* Hazen 100 flakes; sol. in water, benzene, ethyl acetate, ethyl

Icinol, perchlorethylene, ethanol, olein; m.p. 50 ± 2 C; HLB 29; cloud pt. > 100 C; surf. tens. 49.0 dynes/cm; pH 6 (1% aq.); 100% act.; nonionic

**Teric™ PE 75** [Huntsman]

*Chem. Descrip.:* POE (50) PPG 2150

*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, l&l cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper

*Properties:* Visc. 240 cps (20 C); HLB 16.5; pour pt. 32 C; cloud pt. 79-85 C (1%); 0.5% water

**Teric™ PE 87** [Huntsman]

*Chem. Descrip.:* POE (125) PPG 2150

*Uses:* Defoamer for metalworking, textiles, pulp/paper, water treatment, l&l cleaners, industrial and mech. dishwash; rinse aid for automatic dishwashing and windshield washing; lubricant for metalworking; flotation collector for deinking and recycling of waste paper

*Properties:* Visc. 270 cps (20 C); HLB 24; pour pt. 40 C; cloud pt. > 100 C (1%); 0.8% water

**Teric™ PEG 200** [Huntsman]

*Chem. Descrip.:* PEG 200

CAS 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Binder for glazing; intermediate for PEG esters, methacrylate resins, PU foams; plasticizer/solvent for cork; toiletries; metalworking lubricants; paints/resins; paper/film; printing inks; textile emulsifier

*Properties:* APHA 25 color; sol. in water and most polar org. solvs.; m.w. 190-210; sp.gr. 1.127; visc. 4.2 cst (99 C); pour pt. -50 C; flash pt. (OC) > 170 C; ref. index 1.459; pH 4.5-7.5; surf. tens. 44.6 dynes/cm; 99% act.; nonionic

*Environmental:* Biodeg.

**Teric™ PEG 300** [Huntsman]

*Chem. Descrip.:* PEG 300 USP

CAS 25322-68-3; EINECS/ELINCS 220-045-1

*Uses:* Pesticide solubilizer/carrier; visc. modifier for brake fluids; intermediate for PEG esters, PU foams; plasticizer/solvent; cosmetics; metalworking lubricants; paints/resins; paper/film; printing inks; rubber release; textile aux.; liq. pharmaceutical preps., ointment bases; binder for capsules/pills

*Properties:* APHA 25 color; sol. in water and most polar org. solvs.; m.w. 285-315; sp.gr. 1.128; visc. 5.8 cst (99 C); pour pt. -12 C; flash pt. (OC) > 190 C; ref. index 1.463; pH 4.5-7.5; surf. tens. 44.6 dynes/cm; 99% act.; nonionic

*Environmental:* Biodeg.

**Teric™ PEG 400** [Huntsman]

*Chem. Descrip.:* PEG 400 USP

CAS 25322-68-3; EINECS/ELINCS 225-856-4

*Uses:* Emulsifier, antistat for textiles; rubber; inks; cosmetics; paper/film; pesticide solubilizer/carrier; intermediate for PEG esters, PU foams; plasticizer/solvent for cork; metalworking lubricants; paints/resins; pharmaceutical liq. preps., ointment bases, suppository bases; binder for capsules/pills; preservation of pathological specimens

*Properties:* APHA 25 color; sol. in water and most polar org. solvs.; m.w. 380-420; sp.gr. 1.130; visc. 7.3 cst (99 C); pour pt. 6 C; flash pt. (OC) > 215 C; ref. index 1.465; pH 4.5-7.5; surf. tens. 44.6 dynes/cm; 99% act.; nonionic

*Environmental:* Biodeg.

**Teric™ PEG 600** [Huntsman]

*Chem. Descrip.:* PEG 600 USP

CAS 25322-68-3; EINECS/ELINCS 229-859-1

*Uses:* Emulsifier for textiles; pesticide solubilizer/carrier; binder for ceramics; intermediate for PEG esters, PU foams; cosmetics; pharmaceuticals; metalworking lubricants; resins; paper/film; inks; rubber release

*Properties:* APHA 10 color (25% aq.); sol. in water and most polar org. solvs.; m.w. 560-630; sp.gr. 1.127; visc. 10.4 cst (99 C); pour pt. 19 C; flash pt. (OC) > 230 C; ref. index 1.454; pH 4.5-7.5; surf. tens. 44.6 dynes/cm; 99% act.; nonionic

*Environmental:* Biodeg.

**Teric™ PEG 1500** [Huntsman]

*Chem. Descrip.:* PEG 1500

*Uses:* Textile finishing and sizing; wood processing; latex lubricant; printing inks; pharmaceuticals; paper/film

*Properties:* APHA 30 color (25% aq.); sol. in water and most polar org. solvs.; m.w. 1430-1570; sp.gr. 1.208; visc. 28.4 cst (99 C); pour pt. 46 C; flash pt. (OC) > 260 C; ref. index 1.456; pH 4.5-7.5; surf. tens. 53.1 dynes/cm (50% aq.); 100% act.

*Environmental:* Biodeg.

**Teric™ PEG 4000** [Huntsman]

*Chem. Descrip.:* PEG 4000

CAS 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Binder/plasticizer for ceramics; intermediate for copolymers, PEG esters; cosmetics; pharmaceuticals; metalworking lubricants and electropolishes; resins; paper/film; printing inks; rubber antistat, release, compding. aid; textile aux.

*Properties:* APHA 50 color (25% aq.); sol. in water and most polar org. solvs.; m.w. 3300-4000; sp.gr. 1.217; visc. 130-180 cst (99 C); pour pt. 56 C; flash pt. (OC) > 260 C; ref. index 1.456; pH 4.5-7.5; surf. tens. 54.4 dynes/cm (50% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Teric™ T5** [Huntsman]

*Chem. Descrip.:* PEG-5 tallate

CAS 61791-00-2

*Uses:* Wetting agent and dispersant for oil-based systems; emulsifier, detergent, grinding aid for wet milling of pigments and resins; mfg. of lubricants for metal and textile industries; emulsifier for min. and animal oils, cosmetics, agric.; defoamer for effluent treatment, pulp/paper processes; low-foaming additive in detergents, l&l hard surf. cleaners, pulp/paper chems.

*Properties:* Hazen > 250 liq.; sol. in benzene, ethyl acetate, ethyl Icinol, perchlorethylene, ethanol, min. and veg. oil, olein; disp. in water; sp.gr. 1.018; visc. 196 cps; m.p. < 0 C; HLB 8.2; pH 8-10 (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Teric™ T10** [Huntsman]

*Chem. Descrip.:* PEG-10 tallate

CAS 61791-00-2

*Uses:* Wetting agent and dispersant for oil-based systems; emulsifier, detergent, grinding aid for wet milling of pigments and resins; mfg. of lubricants for metal and textile industries; emulsifier for min. and animal oils, cosmetics, agric.; defoamer for effluent treatment, pulp/paper processes; low-foaming additive in detergents, l&l hard surf. cleaners, pulp/paper chems.

*Properties:* Hazen > 250 liq.; sol. in benzene, ethyl acetate, ethyl Icinol, perchlorethylene, ethanol, veg. oil, olein; also disp. in water; sp.gr. 1.042; visc. 253 cps; m.p. 5 ± 2 C; HLB 11.7; pH 8-10 (1% aq.); surf. tens. 34.9 mN/m (0.1%); Ross-Miles foam 5.3 cm (0.1%, initial); 100% act.; nonionic

*Environmental:* Biodeg.

**Tetralon®** [Ciba Spec. Chems./Paper]

*Chem. Descrip.:* Polycarboxylic

*Uses:* Sequestrant to complex iron and other polyvalent metallic ions in pulp prior to bleaching processes

**Tetronic® 90R4** [BASF]

*Chem. Descrip.:* EO/PO ethylene diamine block copolymer

CAS 26314-40-5

*Uses:* Surfactant, emulsion stabilizer, solubilizer, dispersant, wetting agent, antistat, penetrant, plasticizer, defoamer, demulsifier in the petrol., paints, paper, cement, inks, cosmetics, pharmaceutical, plastics, detergent, and metalworking industries; rubber activator; R series for low foaming applics.

*Properties:* Liq.; m.w. 7240; visc. 3870 cps; HLB 1-7; pour pt. 12 C; cloud pt. 43 C (1% aq.); surf. tens. 43 dynes/cm (0.1%); 100% act.; nonionic  
*Toxicology:* LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; minimal skin and minimal to mild eye irritation

**Tetronic® 150R1** [BASF]

*Chem. Descrip.:* EO/PO ethylene diamine block copolymer

CAS 26314-40-5

*Uses:* Detergent, oil emulsifier, defoamer for machine dishwashing, metal cleaning, petrol., paints, paper, cement, inks, cosmetics, pharmaceuticals, plastics; rubber activator; low foaming

*Properties:* Liq.; m.w. 8000; visc. 1840 cps; HLB 1; pour pt. -17 C; cloud pt. 20 C (1% aq.); surf. tens. 33 dynes/cm (0.1%); 100% act.; nonionic  
*Toxicology:* LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; minimal skin and minimal to mild eye irritation

**Texapon® 842** [Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Sodium octyl sulfate

CAS 142-31-4; EINECS/ELINCS 205-535-5

*Uses:* Wetting agent for hydrophobic powds.; surfactant for mfg. of SB disp. and SBR/ABS by emulsion polymerization; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, BGA approved

- Properties:* Liq.; 41-43% act.; anionic
- Texapon® EHS** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium 2-ethylhexyl sulfate  
 CAS 126-92-1; EINECS/ELINCS 204-812-8  
*Uses:* Wetting agent, solubilizer, hydrotrope for cleaning agents, esp. in alkaline media; mfg. of S/B disps. and SBR/ABS by emulsion polymerization process; food-contact paper/paperboard; low foaming  
*Regulatory:* FDA 21CFR §176.170, BGA approved  
*Properties:* Liq.; 40% act.; anionic
- Texapon® K-12 C Powd.** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant, foaming agent for mfg. of all types of polymer dispersions; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard; high foaming power; suitable for mfg. of sm. particle size polymer disp.; high C-chain purity  
*Regulatory:* FDA 21CFR §176.170, 178.3400; BGA approved  
*Properties:* Powd.; >90.5% act.; anionic
- Texapon® K-12 Granules** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Foaming agent for polymer disp.; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Wh. gran.; > 88% act.; anionic
- Texapon® K-12 Needles** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Foaming agent for toothpaste, emulsion and cream shampoos, detergents, wettable powds., cleansing preps., polymer disp.; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Wh. to lt. yel. needles, almost odorless; dens. 400-500 g/l; pH 6.5-9.0 (1%); 88% min. act.; anionic  
*Storage:* 1 yr min. storage life in sealed orig. containers in dry place at temps. below 40 C
- Texapon® K-12 PA 15** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate aq. sol'n.  
 CAS 68585-47-7; EINECS/ELINCS 205-788-1  
*Uses:* Polymerization surfactant, foaming agent used for mfg. of all types of polymer dispersions; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; suitable for sm. particle size disps.  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400; SARA §311/312 reportable; BGA approved  
*Properties:* Colorless liq.; sl. odor; sp.gr. 0.96; dens. 8.0 lb/gal; flash pt. (PMCC) > 93 C; pH 9.0; 85% volatiles; 15% act.; anionic  
*Toxicology:* Causes skin and severe eye irritation; ing. may cause GI irritation, nausea, vomiting, diarrhea; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* Store @ > 25 C
- Texapon® K-1296 C Needles** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant, foaming agent for mfg. of all types of polymer dispersions; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard; high foaming power; suitable for mfg. of sm. particle size polymer disp.; high C-chain purity  
*Regulatory:* FDA 21CFR §176.170, 178.3400; BGA approved  
*Properties:* Needles; >90% act.; anionic
- Texapon® K-1296 Powd.** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate (96.5%), sodium sulfate (2.5%), sodium chloride (1%)  
*Uses:* Dispersant, wetting agent, cleansing agent, disintegrant, foaming agent for cleaning formulations, dentifrices, emulsion and cream shampoos, foaming bubble baths, cosmetic cleansers; additive for mech. latex foaming; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400, NF, BGA, DAB, Ph.Eur., JP compliance  
*Properties:* Wh. to sl. ysh. powd., almost odorless; completely sol. in water; sp.gr. 0.23-0.24; dens. 1.02-2.00 lb/gal; pH 6-9 (1%); 96% act.; anionic
- Toxicology:* LD50 (oral, rat) 1288 mg/kg; may cause gastrointestinal irritation, nausea, vomiting, and diarrhea if ingested; causes eye, skin, and respiratory irritation  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* 1 yr min. storage stability in orig. unopened containers at temps. below 40 C, protected from moisture
- Texapon® LS Highly Conc. Needles** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate (C12-C14)  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant for mfg. of polymer disp.; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Wh. to lt. yel. needles, almost odorless; dens. 400-500 g/l; pH 6.5-9.0 (1%); 87% min. act.; anionic
- Texapon® OT Highly Conc. Needles** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate C12-C18  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Detergent, shampoo base for bubble bath, soaps; emulsifier for emulsion polymerization; additive for mech. latex foaming, carpet and upholstery cleaners; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Needles; 91-92% act.; anionic
- Texapon® T 42** [Cognis KGaA/Care Chems.; Cognis KGaA/Plastics Tech.; Henkel/Pulcra]  
*Chem. Descrip.:* TEA-lauryl sulfate  
 CAS 139-96-8; EINECS/ELINCS 205-388-7  
*Uses:* Detergent, emulsifier for hair and rug shampoos, bubble baths, shower gels, fire fighting foams; surfactant for mfg. of polymer disp.; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved  
*Properties:* Liq.; m.w. 420; visc. < 100 mPa·s; pH 7.2-7.5 (10%); 40-43% act.; anionic
- Texapon® VHC Needles** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate (86%), sodium sulfate (6%), sodium chloride (2.5%), water (6%)  
*Uses:* Wetting agent, foaming agent, emulsifier, detergent for personal care prods., scouring agents, pigment dispersions, polymer dispersions, emulsion polymerization, PVC processing; cosmetic base; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA approved; SARA §311/312 reportable  
*Properties:* Wh. fine needles; mild odor; misc. with water; sp.gr. 0.45; dens. 3.75 lb/gal; pH 7-8 (1% aq.); 7.5 % max. volatiles; 86-90% act.; anionic  
*Toxicology:* LD50 (oral, rat) > 5 g/kg; causes skin, eye, respiratory irritation; ing. may cause GI irritation, nausea, vomiting, and diarrhea; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* Store in cool, dry place
- Texapon® ZHC Needles** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Foaming agent, dispersant, wetting agent for toothpaste, foaming bubble baths, cosmetic cleansing creams and emulsions, shampoos; air entraining agent; surfactant for mfg. of polymer disp.; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 178.3400; NF, JP compliance; SARA §311/312 reportable  
*Properties:* Wh. to sl. ysh. needles; fatty odor; completely sol. in water; sp.gr. 0.45; dens. 400-500 g/l; pH 6.5-9.0 (1%); 7.5 % max. volatiles; 88% min. act.; anionic  
*Toxicology:* LD50 (oral, rat) 1288 mg/kg; causes skin, eye, and respiratory irritation; ing. may cause GI irritation, nausea, vomiting, diarrhea; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* 1 yr min. storage life in orig. unopened containers at temps. below

40 C, protected from moisture

**Texapon® ZHC Powder** [Cognis/Care Chems.; Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Sodium lauryl sulfate

CAS 68955-19-1; EINECS/ELINCS 205-788-1

*Uses:* Foaming agent, dispersant, and wetting agent for bubble baths, cosmetic cleansing creams and emulsions, toothpaste, polymer disp., emulsion polymerization, mech. latex foaming, carpet and upholstery cleaners; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 178.3400, BGA, NF, JP compliance

*Properties:* Wh. to sl. ysh. fine powd., faint odor; dens. 200-300 g/l; pH 8.5-10.5 (1%); 90% min. act.; anionic

*Storage:* 1 yr min. storage life in orig. unopened containers at temps. below 40 C, protected from moisture

**Texicryl® 13-442** [Scott Bader]

*Chem. Descrip.:* Emulsion copolymers of the higher acrylic esters

*Uses:* Adhesive for nonremovable lt. paper labels; emulsions which dry to give films that are permanently tacky at R.T. and require the applic. of only lt. pressure to give good adhesion to most surfaces; good adhesion to difficult substrates such as polyethylene

*Properties:* Emulsion; 0.25 µ particle size; sp.gr. 1.00; visc. 0.6-1.25 poise; pH 8.0-9.5

**TH-44** [Nicca Chem. Co Ltd]

*Chem. Descrip.:* Paraffin wax, special polymer

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Water repellent for improved lubrication on surf. of papers by enhancing sizing effect

*Use Level:* 5-50 times diluted sol'n. for total of 0.5-4% per paper

*Properties:* Wh. emulsion; pH 7.5; cationic

**Thermoguard® S** [Laurel Ind.]

*Chem. Descrip.:* Antimony oxide

CAS 1309-64-4; EINECS/ELINCS 215-175-0

*Uses:* Flame retardant for use in plastics, paper, textiles, and paints; flame retardant pigment for PVC; used with chlorinated organics for producing flame-retardant polyesters, polyethylene compds.; mfg. of flame-retardant films, sheets, textiles, paper, paints; must be used with a halogen-containing compd. for flame retardant effect; high tinctorial str.

*Properties:* Wh. superfine powd., odorless; 1.3 µ avg. particle size; 99.9% thru 325 mesh; insol. in common org. solvs.; very sl. sol. in water; sol. in aq. HCl, potassium hydroxide, and tartaric acid; m.w. 291.52; sp.gr. 5.67; vapor pressure 0 mm (20 C); m.p. 656 C; b.p. 1435 C; ref. index 2.087; 99.5% Sb<sub>2</sub>O<sub>3</sub>; 83.0% antimony

*Toxicology:* May be irritating to respiratory system, eyes, skin; ing. may cause severe GI symptoms; antimony oxide has caused lung tumors in test animals; ACGIH TLV 0.5 mg/m<sup>3</sup> (as Sb); contains < 0.4% arsenic and < 0.4% lead; TSCA listed

*Precaution:* Incompat. with strong oxidizers, acids, halogenated acids

*Hazardous Decomp. Prods.:* Toxic antimony fumes

**Thermoguard® UF** [Laurel Ind.]

*Chem. Descrip.:* Antimony oxide

CAS 1309-64-4; EINECS/ELINCS 215-175-0

*Uses:* Flame retardant for plastic, textiles, paper, and paint applics.; superfine grade; high tinctorial str.; used in conjunction with halogenated flame retarders

*Properties:* Wh. free-flowing powd.; 0.1% on 325 mesh; 50% 0.2-0.5 µ; sp.gr. 5.67; bulk dens. 25 lb/ft<sup>3</sup>; m.p. 656 C; ref. index 2.1; 99.5% Sb<sub>2</sub>O<sub>3</sub>

*Toxicology:* May be irritating to respiratory system and eyes; avoid breathing dust and eye and skin contact

**Thermosil®** [Süd-Chemie AG]

*Chem. Descrip.:* Bentonite

CAS 1302-78-9; EINECS/ELINCS 215-108-5

*Uses:* Used when detrimental liquids impair function of coated papers, e.g., thermoreactive papers, carbonless copying papers

**Thiostop® N** [Uniroyal]

*Chem. Descrip.:* Sodium dimethyldithiocarbamate aq. sol'n.

CAS 128-04-1; EINECS/ELINCS 204-876-7

*Uses:* Polymerization short stop for SBR; reducing agent which reacts with and destroys oxidizing type inhibitors, thereby stopping polymerizations; ultra accelerator for NR and SBR latexes; slimicide in food-contact paper; food pkg. adhesives; food-contact rubber articles; nonstaining, nondiscoloring; suggested in combination with hydrocarbon free radicals to prevent polymer crosslinking and m.w. increases

*Regulatory:* FDA 21CFR §173.320, 175.105, 176.300, 177.2600

*Properties:* Yel. to amber clear liq.; sol. in polar solvs.; misc. with water; sp.gr. 1.18; 40% act.

*Toxicology:* Repeated minimal contact with skin can cause sensitization; exposure can produce an adverse reaction when alcohol is consumed

*Storage:* Good storage stability (> 1 yr when stored in cool, dry place away from direct sources of heat and light)

**T-Hydro® Sol'n.** [Lyondell]

*Chem. Descrip.:* t-Butyl hydroperoxide

CAS 75-91-2; EINECS/ELINCS 200-915-7

*Uses:* Free radical polymerization initiator; initiator in acrylic emulsion polymerization; coinitiator in polyethylene processes; finishing catalyst in emulsion polymerizations and unsat. polyester resin thermosets; intermediate for peroxygen derivs.; epoxidation reagent; oxidizing reagent; source of act. oxygen for pulp/paper bleaching, metal sulfide oxidations; flocculant for borine-contg. sol'ns. in ore, coal, slurry processing; recycling and waste treatment

*Properties:* Clear sol'n., pungent odor; sol. in alcohols, acetone, methyl t-butyl ether, dimethyl formamide, propylene glycol, hydrocarbon solvs.; m.w. 90.12; sp.gr. 0.935; dens. 7.8 lb/gal (20 C); visc. 4.1 cps; vapor pressure 23 mm Hg (20 C); f.p. -2.8 C; b.p. 96 C (760 mm Hg); flash pt. (TCC) 43 C; ref. index 1.3246; pH 4.3; 70% aq. sol'n., 12% act. oxygen

*Toxicology:* TSCA listed

**Ticaxan® Regular** [TIC Gums]

*Chem. Descrip.:* Xanthan gum

CAS 11138-66-2; EINECS/ELINCS 234-394-2

*Uses:* Stabilizer, thickener, emulsifier, suspending agent, binder, moisture control aid in foods (salad dressings, sauces, fruit beverages, dry mixes, refrigerated dough, cake mixes, relish, pie fillings, bakery emulsions), cosmetics/pharmaceuticals (ointments, shampoos, lotions, suspensions), industrial (agric. sprays, explosives, paper sizing, oil recovery, paints, textiles)

**TIC Pretested® Guar Gum TICOLV** [TIC Gums]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Thickener, film-former, binder for food (ice cream, dairy prods., instant soups, dressings, sauces, gravies, cakes, donuts, frozen foods, cheese, pet food), cosmetics/pharmaceuticals (suspension), industrial (processing aid, oil recovery, textile, printing, mining, paper, explosives); high visc., milk reactivity

*Properties:* Sol. in cold water

**Tinofix® AP** [Ciba Spec. Chems./Paper]

*Uses:* Color fixative for paper coloration incl. food-contact papers; formaldehyde-free

*Regulatory:* FDA and BGVV approved

*Properties:* Cationic

**Tinofix® ECO-N** [Ciba Spec. Chems./Paper]

*Uses:* Color fixative for paper coloration; formaldehyde-free

*Properties:* Cationic

**Tinofix® WSP** [Ciba Spec. Chems./Paper]

*Uses:* Color fixative for paper coloration

*Properties:* Liq.; cationic

**Tinopal®** [Ciba Spec. Chems./Paper]

*Uses:* Fluorescent whitening agent for paper

**Tinopal® SFP** [Ciba Spec. Chems./Addit.]

*Chem. Descrip.:* Stilbene-2,2'-disulfonic acid type

*Uses:* Optical brightening agent for use in water-borne coatings, photographic prints and paper; enhances the apparent whiteness of low dens. areas incl. that of borders; rec. for addition to the stabilizer or rinse baths during the photoprocessing of the photographic paper

*Use Level:* 1-5 g/l of the processing sol'n. (photography); lt. yel. powd.; m.w. 1305; sol. 150 g/l of deionized water @ 20 C; pH 7.0-8.0 (deionized water)

**Tiona® A-2000** [Millennium Inorg. Chems.]

*Chem. Descrip.:* Sulfate process titanium dioxide (anatase) slurry

CAS 13463-67-7; EINECS/ELINCS 236-675-5

*Uses:* Designed for paper wet end and coating applics.; improved optical performance, enhanced calcium stability

*Regulatory:* FDA compliance

*Properties:* 0.005% max. on 325 mesh; sp.gr. 2.130-2.182; visc. 100-1000 cps; f.p. 32 F; pH 9-10.5; 71.5-73% solids

*Storage:* Store @ high solids under mild agitation

**Tiona® A-3000** [Millennium Inorg. Chems.]

*Chem. Descrip.:* Titanium dioxide (anatase) dry

- CAS 13463-67-7; EINECS/ELINCS 236-675-5  
*Uses:* Paper applics.
- Tiona® RCS-P** [Millennium Inorg. Chems.]  
*Chem. Descrip.:* Rutile titanium dioxide aq. disp.  
 CAS 13463-67-7; EINECS/ELINCS 236-675-5  
*Uses:* For fine paper, paperboard, and specialty paper applics.
- Ti-Pure® R-794** [DuPont]  
*Chem. Descrip.:* Rutile titanium dioxide  
 CAS 1317-80-2; EINECS/ELINCS 236-675-5  
*Uses:* Opacifier, pigment in paper coatings, coated and uncoated printing and writing papers, paperboard, saturating papers  
*Regulatory:* DOT nonregulated; SARA §311/312 nonreportable; CERCLA nonreportable  
*Properties:* Wh. fine dry powd.; odorless; insol. in water; sp.gr. 3.8-4.3; flash pt. nonflamm.; pH 7-9; 93% TiO<sub>2</sub>, 4.5% Al<sub>2</sub>O<sub>3</sub>  
*Toxicology:* Skin contact may cause drying/cracking in sensitive individuals; inh. may cause upper respiratory irritation, cough, shortness of breath; overexposure to amorphous silica may cause eye/skin/lung irritation  
*Environmental:* LC50 (fathead minnows, 96 h) > 1000 mg/l  
 NFPA: Health 0; Flammability 0; Reactivity 0  
*Storage:* Protect containers from damage
- Ti-Pure® R-795** [DuPont]  
*Chem. Descrip.:* Rutile titanium dioxide  
 CAS 1317-80-2; EINECS/ELINCS 236-675-5  
*Uses:* Opacifier, pigment in paper coatings, coated and uncoated printing and writing papers, paperboard, saturating papers  
*Regulatory:* DOT nonregulated; SARA §311/312 nonreportable; CERCLA nonreportable  
*Properties:* Wh. fine dry powd.; odorless; insol. in water; sp.gr. 3.8-4.3; flash pt. nonflamm.; pH 6.5-8.5; 89% TiO<sub>2</sub>, 6% Al<sub>2</sub>O<sub>3</sub>, 2% SiO<sub>2</sub>  
*Toxicology:* Skin contact may cause drying/cracking in sensitive individuals; inh. may cause upper respiratory irritation, cough, shortness of breath; overexposure to amorphous silica may cause eye/skin/lung irritation  
*Environmental:* LC50 (fathead minnows, 96 h) > 1000 mg/l  
 NFPA: Health 0; Flammability 0; Reactivity 0  
*Storage:* Protect containers from damage
- Ti-Pure® RPD Vantage®** [DuPont]  
*Chem. Descrip.:* Rutile titanium dioxide  
 CAS 1317-80-2; EINECS/ELINCS 236-675-5  
*Uses:* Opacifier, pigment for coatings and wet end paper applics.; component of paper/paperboard in contact with aq./fatty/dry foods; exc. brightness; superior pigment disp.; highest opacity/hiding power; extremely efficient light scattering  
*Regulatory:* FDA 21CFR §176.170. 176.180; DOT nonregulated; SARA §311/312 nonreportable; CERCLA nonreportable  
*Properties:* Wh. powd.; odorless; insol. in water; sp.gr. 3.8-4.3; brightness (TAPPI) 96.3; flash pt. nonflamm.; ref. index 2.72; pH 4-10 (aq. extract)  
*Toxicology:* Skin contact may cause drying/cracking in sensitive individuals; inh. may cause upper respiratory irritation, cough, shortness of breath; overexposure to amorphous silica may cause eye/skin/lung irritation; TSCA listed  
*Environmental:* LC50 (fathead minnows, 96 h) > 1000 mg/l  
 NFPA: Health 0; Flammability 0; Reactivity 0  
*Storage:* Protect containers from damage
- Ti-Pure® RPS Vantage®** [DuPont]  
*Chem. Descrip.:* Rutile titanium dioxide aq. slurry  
 CAS 1317-80-2; EINECS/ELINCS 236-675-5  
*Uses:* Opacifier, pigment in paper coatings, coated and uncoated printing and writing papers, paperboard, saturating papers; component of paper/paperboard in contact with aq./fatty/dry foods; exc. brightness; superior pigment disp.; stable slurry; very resist. to bacterial growth; does not gel; settles very slowly; good compat.  
*Regulatory:* FDA 21CFR §176.170. 176.180; DOT nonregulated; SARA §311/312 nonreportable; CERCLA nonreportable  
*Properties:* Wh. opaque liq.; sl. amine odor; solids are insol. in water; sp.gr. 1.8-2.4; brightness (TAPPI) 97; f.p. 0 C; b.p. 100 C; flash pt. nonflamm.; pH 7-10.5; 97.5-99.9% TiO<sub>2</sub>, 0.1-5% aluminum hydroxide; anionic  
*Toxicology:* Repeated skin contact may cause drying/cracking in sensitive individuals; eye contact may cause irritation, tearing, pain, blurred vision; inh. may cause nose/throat/lung irritation, cough, difficulty breathing, shortness of breath; TSCA listed  
*Environmental:* LC50 (fathead minnows, 96 h) > 1000 mg/l

- Hazardous Decomp. Prods.:* None  
 NFPA: Health 0; Flammability 0; Reactivity 0  
*Storage:* Keep from freezing
- Tisyn®** [Burgess Pigment]  
*Chem. Descrip.:* Aluminum silicate, thermo-optic  
*Chem. Analysis:* Moisture (0.5% max.)  
 CAS 1327-36-2; EINECS/ELINCS 215-475-1  
*Uses:* High hiding pigment for paint formulations, paper coatings; reinforcing filler for plastics, rubber, water and solv. systems; U.S. patent 3,021,195  
*Properties:* Wh. thin flat plate; 0.15% max. on 325 mesh; sp.gr. 2.2; oil absorp. 73; ref. index 1.62; pH 4.0-4.5  
*Toxicology:* Nontoxic
- Tivar®-1000** [Poly Hi Solidur]  
*Chem. Descrip.:* UHMWPE  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Used in paper industry (pulp and finishing), textile industry (loom components), chemical industry (process equip.), food and beverage industry, mining and metals processing, transportation, consumer goods, industrial parts, porous molds; features high abrasion resist., high energy absorp., low coeff. of friction, high impact str., self-lubricating, zero water absorp.  
*Regulatory:* FDA compliance  
*Properties:* Sp.gr. 0.94 g/cc; tens. str. 6800 psi (break); tens. elong. 450% (break); Rockwell hardness R64; Izod impact no break notched; water absorp. nil.
- TL 4190** [Mace Adhesives & Coatings]  
*Chem. Descrip.:* Water-based polyurethane laminating adhesive  
*Uses:* Laminating adhesive with high adhesion to various metal foils and films incl. polyester, PU, and vinyl for paper, film, fabric, or foil constructions; fast wet tack; low foam coatability
- TLV 68-SB** [ADM Lecithin]  
*Chem. Descrip.:* Std. lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints and coatings; pesticides/herbicides; petroleum additives; putty/caulking compds.; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; paper coatings; dust control; drilling muds; food (baked goods, cheese, confections, dairy, instant foods, margarine)  
*Properties:* Opaque fluid; visc. 120 stokes; acid no. 28 max.; 1% water max.
- TLV 68-UB** [ADM Lecithin]  
*Chem. Descrip.:* Std. lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints and coatings; pesticides/herbicides; petroleum additives; putty/caulking compds.; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; paper coatings; dust control; drilling muds; food (baked goods, cheese, confections, dairy, instant foods, margarine)  
*Properties:* Opaque fluid; visc. 120 stokes; acid no. 28 max.; 1% water max.
- TLV 70-SB** [ADM Lecithin]  
*Chem. Descrip.:* Std. lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints and coatings; pesticides/herbicides; petroleum additives; putty/caulking compds.; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; paper coatings; dust control; drilling muds; food (baked goods, cheese, confections, dairy, instant foods, margarine)  
*Properties:* Opaque fluid; visc. 250 stokes; acid no. 28 max.; 1% water max.
- TLV 70-UB** [ADM Lecithin]  
*Chem. Descrip.:* Std. lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints and coatings; pesticides/herbicides; petroleum additives; putty/caulking compds.; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; paper coatings; dust control; drilling muds; food (baked goods, cheese, confections, dairy, instant foods, margarine)  
*Properties:* Opaque fluid; visc. 250 stokes; acid no. 28 max.; 1% water

max.

**Toatus 604T** [Nicca Chem. Co Ltd]*Chem. Descrip.:* Resin based on polyamide epoxy*Uses:* Wet str. agent for papermaking process for wetproofing corrugated containers, craft papers, or tissue papers when applied in sm. quantity*Use Level:* 0.5-2%, corrugated containers; 0.1-0.5%, to tissue papers*Properties:* Straw colored limpid visc. liq.; pH 4 (5%)**Tolcide® MBT** [Albright & Wilson UK]*Chem. Descrip.:* Methylenebis thiocyanate

CAS 6317-18-6

UN No. 2811

*Uses:* Biocide, slimicide, preservative for use in water treatment, paper, antifoulant paint, surf. coatings, adhesives, drilling muds, leather, timber preservation; food-contact paper; food-contact slimicide; thermally stable to 80 C; nonoxidizing; requires formulation in a solv.*Regulatory:* FDA 21CFR §176.170, 176.180, 176.300; EPA reg. no. 33677-1*Properties:* Pale yel. cryst. powd., irritating odor; sol. 40% in dimethylformamide, 30% in N-methyl pyrrolidone, 13% in diethylene glycol ethyl ether, 0.25% in water; m.p. 106 C; 99% assay**Tolcide® MW10** [Albright & Wilson Am.; Albright & Wilson UK]*Chem. Descrip.:* Methylenebis(thiocyanate) aq. disp.

CAS 6317-18-6

*Uses:* Microbicide for water treatment and papermaking; controls bacteria, algae, fungi, and yeasts in recirculating cooling towers, paper mills, air washer systems; biocide for in-can preservation of sol'ns., emulsions, adhesives or other aq.-based prods.; broad spectrum; nonoxidizing; best suited for neutral to acidic conditions*Properties:* Beige to cream-colored disp.; sl. pungent odor; 2-5 µ typ. particle size; m.w. 130; sp.gr. 1.030-1.060; visc. 150-350 cps; b.p. 101 C; f.p. 0 C; flash pt. 200 C; pH 3-5; 10-11% act.*Storage:* 6 mos shelf life in cool, dry place away from acids, alkalis, strong oxidizers**Tolcide® PS** [Albright & Wilson Am.]*Chem. Descrip.:* Tetrakis(hydroxymethyl) phosphonium sulfate

CAS 55566-30-8; EINECS/ELINCS 259-709-0

*Uses:* Biocide for industrial water treatment, oil recovery operations, paper production, and preservation of sol'ns. and emulsions; broad spectrum, fast acting, nonoxidizing*Environmental:* Degrades to virtually nontoxic compd.**Tolcide® PS25** [Albright & Wilson Am.; Albright & Wilson UK]*Chem. Descrip.:* Tetrakis(hydroxy-methyl) phosphonium sulfate

CAS 55566-30-8; EINECS/ELINCS 259-709-0

*Uses:* Biocide for paper and related industries*Properties:* 25% act. in water**Tolcide® PS 75** [Albright & Wilson Am.; Albright & Wilson UK]*Chem. Descrip.:* Tetrakis(hydroxymethyl) phosphonium sulfate

CAS 55566-30-8; EINECS/ELINCS 259-709-0

UN No. 2810

*Uses:* Biocide for paper and related industries; broad spectrum, rapid acting; extremely effective in the control of legionella and sulfate-reducing bacteria; rapid penetration and disp. of biological slimes; reduced oil field reservoir souring as a result of lower hydrogen sulfide generation*Properties:* Colorless to pale yel. liq.; pungent odor; sp.gr. 1.39 kg/m<sup>3</sup>; misc. in fresh water, sea water, oil field-produced water; visc. 32 cSt; pH 3.2 ± 0.6; 75% w/w*Environmental:* Biodeg.; degrades to virtually nontoxic compd.; low aquatic toxicity**Tolcide® PS 75LT** [Albright & Wilson Am.]*Chem. Descrip.:* Tetrakis(hydroxymethyl) phosphonium sulfate

CAS 55566-30-8; EINECS/ELINCS 259-709-0

*Uses:* Oil field biocide for applic. in colder climates; extremely effective against sulfate-reducing bacteria; nonfoaming; benign environmental toxicity profile*Regulatory:* EPA registration no. 4564-15*Properties:* Colorless clear to sl. hazy liq.; misc. with water, incl. seawater; m.w. 406; sp.gr. 1.38; visc. 30 cps; flash pt. nonflamm.; pH 3-4; 75% act.*Environmental:* Degrades rapidly; degrades to virtually nontoxic compd.**Tolcide® PS75M** [Albright & Wilson Am.; Albright & Wilson UK]*Chem. Descrip.:* Tetrakis(hydroxy-methyl) phosphonium sulfate

CAS 55566-30-8; EINECS/ELINCS 259-709-0

*Uses:* Biocide for paper and related industries*Properties:* 75% act.**Tolcide® PS 200** [Albright & Wilson Am.]*Chem. Descrip.:* Tetrakis(hydroxymethyl) phosphonium sulfate

CAS 55566-30-8; EINECS/ELINCS 259-709-0

*Uses:* Biocide providing effective control of Legionella and algae in cooling water systems, and for oil field and paper industries; broad spectrum; particularly effective against sulfate-reducing bacteria; aq. formulation; benign environmental toxicity profile*Regulatory:* EPA registration no. 4564-15*Properties:* Clear to sl. hazy liq.; misc. with water; m.w. 406; sp.gr. 1.09; visc. 1.6 cps; flash pt. nonflamm.; pH 3.2; 20% act. in water*Environmental:* Degrades rapidly; degrades to virtually nontoxic compd.**Tolcide® PS 352C** [Albright & Wilson Am.; Albright & Wilson UK]*Chem. Descrip.:* Tetrakis(hydroxymethyl) phosphonium sulfate (35%) and low-foaming anionic surfactant

UN No. 2810

*Uses:* Biocide for water treatment, sec. oil field recovery, paper; developed to enhance rapid kill chars. and broad spectrum act. in highly contaminated systems ensuring biofilm penetration and slime removal; compat. with most scale and corrosion inhibitors; effective in both acid and alkaline conditions*Properties:* Colorless clear liq.; pungent odor; misc. in fresh water, sea water, oil field-produced water; sp.gr. 1.165 kg/m<sup>3</sup>; visc. 2.12 cSt; pH 3.24 (conc. 4.66% w/v, 20 C); anionic*Environmental:* Biodeg.; degrades to virtually nontoxic compd.; low aq. toxicity**Tolcide® PS352CM** [Albright & Wilson Am.; Albright & Wilson UK]*Chem. Descrip.:* Tetrakis(hydroxy-methyl) phosphonium sulfate

CAS 55566-30-8; EINECS/ELINCS 259-709-0

*Uses:* Biocide for paper and related industries*Properties:* 35% act.**Tolcide® PS 355A** [Albright & Wilson Am.; Albright & Wilson UK]*Chem. Descrip.:* Tetrakis(hydroxymethyl) phosphonium sulfate (35%) with nonfoaming dispersant

UN No. 2810

*Uses:* Biocide for water treatment, paper; ready-to-use formulation; developed to be nonfoaming for applics. such as direct air cooling where absence of foam is important; compat. with most scale and corrosion inhibitors; effective at acid and alkaline pH, elevated temps. and pressures*Properties:* Colorless clear liq.; pungent odor; misc. in fresh water, sea water, oil field-produced water; sp.gr. 1.165 kg/m<sup>3</sup>; visc. 2.12 cSt; pH 3.24 (conc. 4.66% w/v, 20 C); nonflamm.*Environmental:* Biodeg.; degrades to virtually nontoxic compd.; low aq. toxicity**TonerClean 208, 209** [Nippon Nyukazai]*Chem. Descrip.:* Blend*Uses:* Deinking agent for reclaimed paper prod.*Properties:* Liq.; 100% conc.; nonionic**Topcat™ Cationic Additive** [Penford Prods.]*Uses:* Dry str. agent, dewatering agent for wet end furnishes contg. high levels of interfering substances; bonding agent in dirty systems, such as unbleached or groundwood-contg. systems; improves wet end cleanliness and runnability*Properties:* Cationic**Torez Resin P-215-A** [Kukdo]*Chem. Descrip.:* Polyacrylamide resin

CAS 9003-05-8

*Uses:* Dry str. resin for wrapping paper, printing paper, corrugated board*Properties:* Sl. y/sh.; completely sol. in water; visc. 3000-7000 cps; pH 5-7; 15% resin contents; anionic**Torez Resin P-1012** [Kukdo]*Chem. Descrip.:* Polyamide resin, epichlorohydrin-modified

CAS 9012-24-2

*Uses:* Wet str. resin for sanitation paper (towel, napkin, tissue paper, paper handkerchief), heavy-duty pkg. paper (kraft paper for salt, sugar, cement, fertilizer, etc.), card paper (fiber card board liner, core paper, tube paper container board), printing and writing paper*Properties:* Sl. y/sh.; completely sol. in water; sp.gr. 1.036-1.080; visc. 30-80 cps; f.p. -3 C; pH 4.0-5.5; 12.5% resin contents; cationic*Storage:* 3 mos max. stability @ R.T.**Torez Resin P-1020R** [Kukdo]*Uses:* Drainage aid, retention aid in papermaking, board paper, liner paper*Properties:* Sl. y/sh. transparent liq.; visc. 250-330 cps; pH 6.0-7.5; 24%

resin contents; cationic

**Torez Resin P-1025** [Kukdo]

*Chem. Descrip.:* Polyamide resin, epichlorohydrin-modified  
CAS 9012-24-2

*Uses:* Wet str. resin for sanitation paper (towel, napkin, tissue paper, paper handkerchief), heavy-duty pkg. paper (kraft paper for salt, sugar, cement, fertilizer, etc.), card paper (fiber card board liner, core paper, tube paper container board), printing and writing paper

*Properties:* Sl. y/sh.; completely sol. in water; sp.gr. 1.076-1.080; visc. 80-400 cps; f.p. -3 C; pH 3.3-5.5; 25% resin contents; cationic

*Storage:* 3 mos max. stability @ R.T.

**Torez Resin P-2000** [Kukdo]

*Uses:* Paper str. resin for liner paper, corrugating medium kraft paper

*Properties:* Sl. y/sh.; completely sol. in water; visc. 1000-5000 cps; pH 10 ± 0.5; 8.5% min. resin contents; amphoteric

**Torez Resin P-2010** [Kukdo]

*Uses:* Paper str. resin for liner paper, corrugating medium kraft paper

*Properties:* Sl. y/sh.; completely sol. in water; visc. 2000-8000 cps; pH 10 ± 0.5; 10% min. resin contents; amphoteric

**Torez Resin P-4010** [Kukdo]

*Uses:* Dry str. resin for wrapping paper, printing paper, liner paper, board paper

*Properties:* Transparent liq.; completely sol. in water; visc. 2000-8000 cps; pH 4.5 ± 0.5; 10% min. resin contents; cationic

**TP OC 370** [Bayer]

*Chem. Descrip.:* Iminodisuccinate, tetrasodium salt (26% min.)

*Uses:* Chelating agent for metal ions for use in detergents, agric., oil industry, pharmaceuticals, pulp/paper, and textiles; reduces hardness in water; stabilizes oxidation agents in aq. sol'n.

*Properties:* Colorless to lt. yel. sol'n.; sp.gr. 1.3 (20 C); visc. 30-60 mPa·s (20 C); pH 11-13.7

**Tramfloc™ 290** [Tramfloc]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Flocculant for use in variety of industrial, mining, papermaking, and municipal operations; flocculant used for conditioning primary and secondary digested sludges to aid in dewatering; flocculant used alone or with primary coagulants for clarification

*Use Level:* 0.2-0.5% (stock sol'n.), 0.05-0.1% (feed sol'ns.)

*Properties:* Emulsion; completely water sol.; cationic

*Precaution:* Avoid amphoteric metallic components; spillages are extremely slippery

*Storage:* Store in cool, dry place

**Trans-10** [Trans-Chemco]

*Chem. Descrip.:* Silicone emulsion

*Uses:* Defoamer for aq. systems incl. food processing, chem. processing, adhesives, inks, insecticides, latex processing, aq. paints, soaps, starch processing, petrol. (gas scrubbing, propane deasphalting), plastics/rubber, textiles, paper, lagoon aeration, boiler water, leather finishing, metalworking, swimming pools, waste treatment

*Regulatory:* FDA 21CFR §173.340

*Properties:* Wh. milky liq.; mild odor; disp. in water; sp.gr. 0.97-1.00; dens. 8.09-8.34 lb/gal; visc. 4220-4880 cps (73 F); b.p. 212 F; flash pt. none to 212 F; pH 7.9-8.2 (as is); 10% act.; nonionic

*Toxicology:* May cause sl. eye and skin irritation; minimal effect by ingestion  
HMIS: Health 0; Flammability 0; Reactivity 0

*Storage:* Store in well-ventilated area below 120 F; keep from freezing

**Trans-20** [Trans-Chemco]

*Chem. Descrip.:* Silicone emulsion

*Uses:* Defoamer for aq. systems incl. food processing, chem. processing, adhesives, inks, insecticides, latex processing, aq. paints, soaps, starch processing, petrol. (gas scrubbing, propane deasphalting), plastics/rubber, textiles, paper, lagoon aeration, boiler water, leather finishing, metalworking, waste treatment

*Regulatory:* FDA 21CFR §173.340

*Properties:* Wh. milky liq.; mild odor; water-disp.; sp.gr. 0.98-1.01; dens. 8.17-8.42 lb/gal; b.p. 212 F; flash pt. none to 212 F; pH 7.0-7.3 (5% aq. disp.); 20% act.; nonionic

*Toxicology:* May cause sl. eye and skin irritation; minimal effect by ingestion  
HMIS: Health 0; Flammability 0; Reactivity 0

*Storage:* Store in well-ventilated area below 120 F; keep from freezing

**Trans-30** [Trans-Chemco]

*Chem. Descrip.:* Silicone emulsion

*Uses:* Defoamer for aq. systems incl. food processing, chem. processing, adhesives, inks, insecticides, latex processing, aq. paints, soaps, starch processing, petrol. (gas scrubbing), plastics/rubber, textiles, paper, lagoon aeration, boiler water, leather finishing, metalworking, waste treatment

*Properties:* Wh. milky liq.; mild odor; water-disp.; sp.gr. 0.98-1.01; dens. 8.17-8.42 lb/gal; b.p. 212 F; flash pt. none to 212 F; pH 7.0-7.3 (5% aq. disp.); 30% act.

*Toxicology:* May cause sl. eye and skin irritation; minimal effects by ingestion  
HMIS: Health 0; Flammability 0; Reactivity 0

*Storage:* Store in well-ventilated area below 120 F; keep from freezing

**Trans-220** [Trans-Chemco]

*Chem. Descrip.:* Nonsilicone aq. emulsion

*Uses:* Antifoam for food processing, industrial use, corrugated paperboard mfg.; long-lasting

*Regulatory:* FDA 21CFR §173.340

*Properties:* Wh. creamy liq.; tasteless, odorless; water-disp. with agitation; sp.gr. 0.93-0.95; dens. 7.95 lb/gal; b.p. 212 F; flash pt. > 280 F; pH 7.0-7.2 (5% aq. disp.)

*Toxicology:* May cause sl. eye and skin irritation; minimal effects by ingestion  
*Storage:* Store in well-ventilated area below 120 F; keep from freezing

**Trans-278** [Trans-Chemco]

*Chem. Descrip.:* Silicone and polypropylene glycol aq. emulsion

*Uses:* Antifoam for industrial applics. such as wastewater and fermentations; food-grade antifoam, direct food additive in beet sugar/yeast processing; antifoam, indirect food additive in mfg. of food-contact paper/paperboard, and articles for processing, pkg. or holding food

*Regulatory:* FDA 21CFR §173.340, 176.170, 176.180, 176.210 compliant

*Properties:* Disp. in water with agitation; dens. 8.34 lb/gal; 19% act.

**Trans-290** [Trans-Chemco]

*Chem. Descrip.:* Modified water-based silicone

*Uses:* Antifoam for industrial use, incl. metalworking fluids and cleaning prods., and for mfg. of food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210 compliant

*Properties:* Disp. in water; dens. 8.42 lb/gal; 15% act.

**Trans-1741** [Trans-Chemco]

*Chem. Descrip.:* Nonsilicone aq. emulsion

*Uses:* Antifoam for aq. systems, food-grade applics., fermentations, distillations, scald baths for poultry defeathering, hog dehairing, food-contact paper/paperboard; defoamer for starch recovery and modification, starch-based operations, animal feed, food pkg. adhesives

*Regulatory:* FDA 21CFR §173.340, 175.105, 176.180, 176.200, 176.210

*Properties:* Disp. in water with agitation

**Translink® 77** [Engelhard]

*Chem. Descrip.:* Calcined aluminum silicate with vinyl functional surface treatment

*Chem. Analysis:* SiO<sub>2</sub> (52.0%), Al<sub>2</sub>O<sub>3</sub> (44.2%)

*Uses:* Reinforcing extender used in dielectric paper and EPDM med. and high-voltage wire and cable insulation, non-aq. coatings, adhesives and inks; exc. wet and dry elec. prods.; good processing; hydrophobic

*Properties:* Wh. highly pulverized powd.; 0.8 µm avg. particle size (pretreatment); 0.02% max. residue +325 mesh; sp.gr. 2.63 g/cc; bulk dens. 11 lb/ft<sup>3</sup> (loose), 21 lb/ft<sup>3</sup> (tamped); bulking value 0.046 gal/lb; oil absorp. 80-90 lb/100 lb; ref. index 1.62; brightness (GE) 90-92

**Trigonal® 12** [Akzo Nobel]

*Chem. Descrip.:* p-Phenylbenzophenone

CAS 2128-93-0; EINECS/ELINCS 218-345-2

*Uses:* UV initiator for printing ink and paper coating applics.

*Properties:* Powd.

**Trilon® A-92** [BASF; BASF AG]

*Chem. Descrip.:* Trisodium NTA monohydrate

CAS 5064-31-3; EINECS/ELINCS 225-768-6

*Uses:* Chelating agent used in soaps, detergents, water treatment, metal finishing and plating, pulp/paper mfg., synthesis of polymers, photographic prods., textiles, chemical cleaning for scale removal

*Properties:* Powd.; m.w. 275; chelating act. 375 mg CaCO<sub>3</sub>/g; 92% conc.

**Trilon® A Liq.** [BASF; BASF AG]

*Chem. Descrip.:* Trisodium NTA

CAS 5064-31-3; EINECS/ELINCS 225-768-6

*Uses:* Chelating agent for complexing iron in acid pH range for use in soaps, detergents, water treatment, metal finishing and plating, pulp/paper mfg., synthesis of polymers, photography, textiles, chemical cleaning for scale removal; detergent builder for nonphosphate liqs.; low m.w.; general pur-

pose

*Properties:* Liq.; m.w. 257; chelating act. 150 mg CaCO<sub>3</sub>/g; 38% conc. in water

**Trilon® B** [BASF; BASF AG]

*Chem. Descrip.:* Tetrasodium EDTA

CAS 64-02-8; EINECS/ELINCS 200-573-9

*Uses:* Chelating agent in soaps, detergents, water treatment, metal finishing, electroplating, pulp/paper bleaching, synthesis of polymers and rubber, photographic prods., textiles, chemical cleaning for scale removal, radioactive decontamination processes, rare earth separations; complexes most common metals over pH range, iron at acidic pH

*Properties:* Wh. powd.; sol. 1000 g/l in water (20 C); m.w. 380; bulk dens. 650 g/l; m.p. 400 C (dec. @ 150-200 C, releases water of cryst.); chelating act. 225 mg CaCO<sub>3</sub>/g; pH 11 (1% aq.); 87% act.

*Environmental:* Biodeg.

*Storage:* Hygroscopic

**Trilon® BS** [BASF; BASF AG]

*Chem. Descrip.:* H<sub>2</sub>EDTA

*Uses:* Chelating agent for soaps, detergents, water treatment, metal finishing, electroplating, pulp/paper mfg., synthesis of polymers, photographic prods., textiles, chemical cleaning for scale removal; used where sodium ion is undesirable

*Properties:* Wh. powd.; water-insol.; m.w. 292; bulk dens. 600 g/l; m.p. 220 C (dec.); chelating act. 340 mg CaCO<sub>3</sub>/g; 100% conc.

*Environmental:* Biodeg.

**Trilon® BVT** [BASF AG]

*Chem. Descrip.:* Tetrasodium EDTA-based with high specificity for Fe<sup>3+</sup>

*Uses:* Chelating agent for water softening, laundry detergents, soap, cleaners and degreasers, electroplating (passivating baths), rubber polymerization, paper, rare earth separations, radioactive decontamination processes, textile processing

*Properties:* Ylsh. brn. liq.; sol. in water in all proportions; dens. 1.22 g/cc; visc. 90 mPa·s; set pt. < 0 C; pH 11 (1% aq.)

*Toxicology:* Conc. sol'ns. are irritant

*Environmental:* Biodeg.

*Storage:* Store above 10 C

**Trilon® C Liq.** [BASF AG]

*Chem. Descrip.:* Pentasodium pentetate

CAS 140-01-2; EINECS/ELINCS 205-391-3

*Uses:* Chelating agent used in peroxide bleach systems, and for detergents, water treatment, metal finishing, pulp/paper, polymer synthesis, photography, textiles, chem. cleaning; used when higher metal chelate stability is required

*Properties:* Ylsh. clear liq.; sol. in water in all proportions; m.w. 503; dens. 1.26 g/cc; visc. 40 mPa·s; pour pt. -40 C; chelating act. 100 mg CaCO<sub>3</sub>/g; pH 11 (1% aq.); 40% act. in water

**Trilon® PC** [BASF; BASF AG]

*Chem. Descrip.:* Pentasodium salt of diethylenetriaminepentaacetic acid

CAS 140-01-2; EINECS/ELINCS 205-391-3

*Uses:* Chelating agent, complexing agent for pulp bleaching in paper industry

*Properties:* Liq.

**Trilon® DF-16** [Union Carbide; Union Carbide Europe]

*Chem. Descrip.:* Ethoxylated linear alcohol

*Uses:* Detergent, wetting agent for paper and textile processing, rinse aids, mech. dishwashing, metal cleaners, hard surf. cleaners; low-foam

*Properties:* APHA < 200 clear liq.; sol. in water < 97 F, many common solvs.; sp.gr. 0.987; dens. 8.2 lb/gal; visc. 35 cps; HLB 11.6; pour pt. 20 F; cloud pt. 36 C (1% aq.); flash pt. (PMCC) > 93 C; pH 6.0 (5% aq.); surf. tens. 28 dynes/cm (0.1%); Ross-Miles foam 2 mm (0.1%, initial, 120 F); 100% act.; nonionic

*Environmental:* Biodeg.

**Trilon® SP-135** [Union Carbide]

*Chem. Descrip.:* Ethoxylate chain hydrophile with hydrophobe (3.5 EO)

*Uses:* Surfactant for metalworking fluids, industrial laundry detergents, textile processing, pulp/paper mfg., metal cleaning formulations, industrial cleaning and processing operations, for waste treatment of effluent streams containing fats, oils, and greases; offers environmental benefits

*Properties:* VCS/Gardner 6 clear liq.; insol. in water; sp.gr. 0.9953 (20 C); visc. 72 cSt; HLB 8; pour pt. -4 C; cloud pt. insol.; pH 9 (5% aq.); 100% act.; nonionic

*Environmental:* Upon acid treatment, rapid biodeg. occurs

**Trilon® SP-140** [Union Carbide]

*Chem. Descrip.:* Ethoxylate chain hydrophile with hydrophobe (4 EO)

*Uses:* Surfactant for metalworking fluids, industrial laundry detergents, textile processing, pulp/paper mfg., metal cleaning formulations, industrial cleaning and processing operations, for waste treatment of effluent streams containing fats, oils, and greases; offers environmental benefits

*Properties:* VCS/Gardner 6 clear liq.; barely sol. in water; sp.gr. 1.0060 (20 C); visc. 72 cSt; HLB 9; pour pt. -3 C; cloud pt. disp.; pH 9 (5% aq.); 100% act.; nonionic

*Environmental:* Upon acid treatment, rapid biodeg. occurs

**Trilon® SP-160** [Union Carbide]

*Chem. Descrip.:* Ethoxylate chain hydrophile with hydrophobe (6 EO)

*Uses:* Surfactant for metalworking fluids, industrial laundry detergents, textile processing, pulp/paper mfg., metal cleaning formulations, industrial cleaning and processing operations, for waste treatment of effluent streams containing fats, oils, and greases; offers environmental benefits

*Properties:* VCS/Gardner 6 clear liq.; sol. in water; sp.gr. 1.0151 (20 C); visc. 84 cSt; HLB 11; pour pt. -3 C; cloud pt. 14 C; pH 9 (5% aq.); 100% act.; nonionic

*Environmental:* Upon acid treatment, rapid biodeg. occurs

**Trilon® SP-175** [Union Carbide]

*Chem. Descrip.:* Ethoxylate chain hydrophile with hydrophobe (7.5 EO)

*Uses:* Surfactant for metalworking fluids, industrial laundry detergents, textile processing, pulp/paper mfg., metal cleaning formulations, industrial cleaning and processing operations, for waste treatment of effluent streams containing fats, oils, and greases; offers environmental benefits

*Properties:* VCS/Gardner 6 sl. hazy liq.; sol. in water; sp.gr. 1.0262 (20 C); visc. 95 cSt; HLB 12; pour pt. 0 C; cloud pt. 38 C; pH 9 (5% aq.); 100% act.; nonionic

*Environmental:* Upon acid treatment, rapid biodeg. occurs

**Trilon® SP-190** [Union Carbide]

*Chem. Descrip.:* Ethoxylate chain hydrophile with hydrophobe (9 EO)

*Uses:* Surfactant for metalworking fluids, industrial laundry detergents, textile processing, pulp/paper mfg., metal cleaning formulations, industrial cleaning and processing operations, for waste treatment of effluent streams containing fats, oils, and greases; offers environmental benefits

*Properties:* VCS/Gardner 6 hazy liq.; sol. in water; sp.gr. 1.0354 (20 C); visc. 112 cSt; HLB 13; pour pt. 3 C; cloud pt. 59 C; pH 9 (5% aq.); 100% act.; nonionic

*Environmental:* Upon acid treatment, rapid biodeg. occurs

**Trilon® X-15** [Union Carbide; Union Carbide Europe]

*Chem. Descrip.:* Octoxynol-1

CAS 9002-93-1; EINECS/ELINCS 264-520-1

*Uses:* Surfactant, coupling agent, emulsifier for industrial/household cleaners, emulsion polymerization, agric., paints and coatings, paper and textile processing; latex stabilizer; defoamer in food-contact paper/paperboard; food pkg. adhesives

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, EPA compliance

*Properties:* APHA 250 liq.; sol. in aliphatic hydrocarbons; misc. with aromatics, alcohols, glycols, ethers, ketones; m.w. 250; sp.gr. 0.985; dens. 8.2 lb/gal; visc. 790 cps; HLB 3.6; flash pt. > 300 F (TOC); pour pt. 15 F; 100% act.; nonionic

**Trilon® X-35** [Union Carbide; Union Carbide Europe]

*Chem. Descrip.:* Octoxynol-3

CAS 9002-93-1

*Uses:* Surfactant, coupling agent, emulsifier for industrial/household cleaners, emulsion polymerization, agric., paints and coatings, paper and textile processing; latex stabilizer

*Regulatory:* FDA, EPA compliance

*Properties:* APHA 125 liq.; sol. in aliphatic hydrocarbons; misc. with aromatic hydrocarbons, alcohols, glycols, ethers, ketones; m.w. 338; sp.gr. 1.023; dens. 8.5 lb/gal; visc. 370 cps; HLB 7.8; flash pt. > 300 F (TOC); pour pt. -10 F; surf. tens. 29 dynes/cm (0.01%); Ross-Miles foam 5 mm (0.1%, initial, 120 F); 100% act.; nonionic

**Trilon® X-45** [Union Carbide; Union Carbide Europe]

*Chem. Descrip.:* Octoxynol-5

CAS 9002-93-1

*Uses:* Emulsifier, detergent, dispersant, wetting agent for solv. cleaners, metal cleaners, dry cleaning, insecticides, paints and coatings, paper and textile processing; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; food pkg. adhesives

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400, EPA compliance

- Properties:* Clear liq.; sol. in oil; misc. with alcohol, glycols, ethers, ketones, aromatic hydrocarbons; m.w. 426; sp.gr. 1.040; dens. 8.7 lb/gal; visc. 290 cps; HLB 10.4; cloud pt. < 0 C (1%); flash pt. > 300 F (TOC); pour pt. -26 C; surf. tens. 28 dynes/cm (0.1%); Ross-Miles foam 16 mm (0.1%, initial, 120 F); 100% act.; nonionic
- Triton® X-100** [Union Carbide; Union Carbide Europe]  
*Chem. Descr.:* Octoxynol-9 (9-10 EO)  
 CAS 9002-93-1  
*Uses:* Wetting agent, dispersant, detergent for household and industrial cleaners, metal cleaners, sanitizers, textile processing, wool scouring; emulsifier for insecticides and herbicides; solubilizer of perfumes; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; food pkg. adhesives  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400, EPA compliance  
*Properties:* Clear liq.; sol. in water, toluene, xylene, trichlorethylene, ethylene glycol, alcohols; m.w. 628; sp.gr. 1.065; dens. 8.9 lb/gal; visc. 240 cps; HLB 13.5; cloud pt. 65 C (1% aq.); flash pt. > 300 F (TOC); pour pt. 45 F; pH 6 (5% aq.); surf. tens. 30 dynes/cm (1%); Ross-Miles foam 110 mm (0.1%, 120 F); 100% act.; nonionic
- Triton® X-102** [Union Carbide; Union Carbide Europe]  
*Chem. Descr.:* Octoxynol-13 (12-13 EO)  
 CAS 9002-93-1  
*Uses:* Detergent, wetting agent, foam stabilizer for metal cleaning, industrial/household liq. detergents and cleaners, sanitizers, paints and coatings, paper and textile processing; solubilizer of anionic detergents; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; food pkg. adhesives; effective at high temps., in presence of electrolytes  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400, EPA compliance  
*Properties:* Lt. color clear liq.; sol. in water, many common org. solvs.; m.w. 756; sp.gr. 1.07; dens. 8.9 lb/gal; visc. 330 cps; HLB 14.6; cloud pt. 88 C (1% aq.); flash pt. > 300 F (TOC); pour pt. 60 F; surf. tens. 32 dynes/cm (1%); Ross-Miles foam 130 mm (0.1%, 120 F); 100% act.; nonionic
- Triton® X-114** [Union Carbide; Union Carbide Europe]  
*Chem. Descr.:* Octoxynol-8 (7-8 EO)  
 CAS 9002-93-1  
*Uses:* Detergent, wetting agent used in household and industrial laundry, metal cleaners, I&I hard surf. cleaners, paints and coatings, paper and textile processing; biodispersant and oil emulsifier in cooling towers; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; food pkg. adhesives; controlled foam  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400, EPA compliance  
*Properties:* Clear liq.; sol. in water, many common solvs.; m.w. 536; sp.gr. 1.05-1.06; dens. 8.8 lb/gal; visc. 260 cps; HLB 12.4; cloud pt. 25 C (1% aq.); flash pt. > 300 F (TOC); pour pt. 15 F; pH 6 (5% aq.); surf. tens. 29 dynes/cm (1%); Ross-Miles foam 25 mm (0.1%, 50 C); 100% act.; nonionic
- Triton® X-120** [Union Carbide; Union Carbide Europe]  
*Chem. Descr.:* Octoxynol-9 (9-10 EO)  
 CAS 9002-93-1  
*Uses:* Wetting agent, dispersant for agric. wettable powds.; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; food pkg. adhesives  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400  
*Properties:* Wh. solid; m.w. 628; 40% conc.; nonionic
- Triton® X-165-70%** [Union Carbide; Union Carbide Europe]  
*Chem. Descr.:* Octoxynol-16  
 CAS 9002-93-1  
*Uses:* Detergent, emulsifier, wetting agent for industrial/household cleaners, emulsion polymerization, paints and coatings, paper and textile processing; latex stabilizer  
*Regulatory:* FDA compliance  
*Properties:* APHA 125 aq. sol'n.; sol. in inorg. salt sol'ns., aq. min. acids; misc. with water, alcohols, glycols, ethers, ketones; m.w. 910; sp.gr. 1.080; dens. 9.0 lb/gal; visc. 540 cps; HLB 15.8; cloud pt. > 100 C (1%); flash pt. > 300 F (TOC); pour pt. 55 F; surf. tens. 35 dynes/cm (0.1%); Ross-Miles foam 145 mm (0.1%, initial, 120 F); 70% act.; nonionic
- Triton® X-305-70%** [Union Carbide; Union Carbide Europe]  
*Chem. Descr.:* Octoxynol-30  
 CAS 9002-93-1  
*Uses:* Detergent, emulsifier, wetting agent for household/industrial cleaners, emulsion polymerization, agric.; latex stabilizer; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; food pkg. adhesives  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400, EPA compliance  
*Properties:* APHA 150 liq.; sol. in inorg. salt sol'ns., aq. min. acids; misc. with water, alcohols, glycols, ethers, ketones; m.w. 1526; sp.gr. 1.095; dens. 9.1 lb/gal; visc. 470 cps; HLB 17.3; pour pt. 35 F; cloud pt. > 100 C (1%); flash pt. > 300 F (TOC); surf. tens. 37 dynes/cm (0.1%); Ross-Miles foam 150 mm (0.1%, initial, 120 F); 70% act.; nonionic
- Triton® X-405-70%** [Union Carbide; Union Carbide Europe]  
*Chem. Descr.:* Octoxynol-40  
 CAS 9002-93-1  
*Uses:* Detergent, emulsifier, wetting agent for household/industrial cleaners, emulsion polymerization, agric.; latex stabilizer; coupling agent in naphthol dyeing; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; food pkg. adhesives  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400, EPA compliance  
*Properties:* APHA 250 liq.; sol. in inorg. salt sol'ns., aq. min. acids; misc. with water, alcohols, glycols, ethers, ketones; m.w. 1966; sp.gr. 1.102; dens. 9.2 lb/gal; visc. 490 cps; HLB 17.9; cloud pt. > 100 C (1%); flash pt. > 212 F (TOC); pour pt. 25 F; surf. tens. 37 dynes/cm (0.1%); Ross-Miles foam 126 mm (0.1%, initial, 120 F); 70% act.; nonionic
- Triton® XL-80N** [Union Carbide]  
*Chem. Descr.:* Alcohol alkoxylate  
*Uses:* Detergent, wetting agent, leveling agent, coupling agent, emulsifier, dispersant, stabilizer for industrial/institutional/household cleaners, metal cleaning, laundry, paper deinking, textile processing, fiber lubricants, paints, oil field chems., water treatment, circuit board cleaners, leather operations  
*Properties:* APHA 25 clear to hazy liq., low odor; m.w. 442; sp.gr. 0.98; dens. 8.13 lb/gal; visc. 25 cps; pour pt. -2 C; cloud pt. 50 C (1% aq.); flash pt. (PMCC) 127 C; pH 6.5 (1% aq.); surf. tens. 28 dynes/cm (0.1% aq.); Draves wetting 4.6 s (0.1% aq.); Ross-Miles foam 95 mm (0.1% initial); 100% act.; nonionic  
*Environmental:* Biodeg.
- Tronox A-X** [Bayer]  
*Chem. Descr.:* Titanium dioxide  
 CAS 1317-80-2; EINECS/ELINCS 236-675-5  
*Uses:* Colorant for fine papers, specialty papers, cigarette papers
- Tronox R-PL-1** [Bayer]  
*Chem. Descr.:* Titanium dioxide  
 CAS 1317-80-2; EINECS/ELINCS 236-675-5  
*Uses:* Colorant for fine papers, specialty papers, cigarette papers
- Troykyd® D55** [Troy]  
*Chem. Descr.:* Hydrophobic inorg. disp.  
*Uses:* Defoamer for aq. resins and latex systems incl. printing inks, latex paints, pigment disps., joint cement compds., water-reducible systems, paper coatings, textiles  
*Use Level:* 0.2-0.6%  
*Regulatory:* FDA 21CFR §176.200, 176.210  
*Properties:* Liq.; sp.gr. 0.93; low-visc.; 100% act.; nonionic
- Troykyd® D666** [Troy]  
*Chem. Descr.:* Hydrocarbon-based surfactant  
*Uses:* Defoamer for metalworking fluids, printing inks, latex paints, adhesives/caulks/sealants, wood stains, paper coatings, water-reducible systems, warp sizes  
*Use Level:* 0.2-0.6%  
*Regulatory:* FDA compliance  
*Properties:* Liq.; sp.gr. 0.84-0.87; 100% act.
- Troykyd® D999** [Troy]  
*Chem. Descr.:* Fatty acid/hydrocarbon blend  
*Uses:* Defoamer for metalworking fluids, printing inks, latex paints, adhesives/caulks/sealants, wood stains, paper coatings, water-reducible systems  
*Use Level:* 0.2-0.6%  
*Properties:* Liq.; sp.gr. 0.86-0.89; 100% act.; nonionic
- Troykyd® USM DP336** [Troy]  
*Uses:* Defoamer for aq. coatings, inks, adhesives, food-contact adhesives/paper; non-silicone releasing  
*Regulatory:* FDA 21CFR §175.105, 176.210 compliant

**Troysan® 142 [Troy]**

*Chem. Descrip.:* 3,5-Dimethyltetrahydro-1,3,5,2H-thiadiazine-2-thione  
CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Bactericide, antimicrobial, fungicide, preservative for aq. systems, food pkg. adhesives/paper, dispersed colors, resin emulsions, powd. joint cements, protein colloids

*Regulatory:* FDA 21CFR §175.105, 176.170; EPA reg. no. 5383-7

*Properties:* Off-wh. free-flowing cryst. powd.; sl. distinctive odor; sol. 21% in ethylene dichloride, 19.5% in acetone, 0.12% in water; sp.gr. 1.39; dens. 11.6 lb/gal; m.p. 99.5 C; flash pt. (OC) 280 F; 95% min. act.

*Toxicology:* May be harmful if ingested; avoid contact with skin and eyes

*Storage:* Avoid storage at elevated temps. for prolonged periods of time

**Troysan® 586 [Troy]**

*Chem. Descrip.:* 1,2-Benzisothiazolin-3-one and propylene glycol aq. sol'n.

*Uses:* Biocide, broad-spectrum preservative for aq. systems such as paints and coatings, polymer emulsions, pigment dispersions, joint cements, adhesives, sealants, caulks, printing inks, and metalworking fluids; food pkg. adhesives, paper; food-contact slimicide; designed to inhibit growth of microorganisms such as bacteria, yeast, and fungi

*Use Level:* 0.02-0.35%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA reg. no. 49403-14-5383

*Properties:* Brn. liq.; sp.gr. 1.18-1.24; dens. 9.84-10.34 lb/gal; visc. 150-250 cps; flash pt. (CC) 93.3 C; pH 13-14

*Toxicology:* May cause chem. burns, skin and eye irritation in conc. form; harmful if swallowed, inhaled, or absorbed thru skin

*Storage:* Store in closed containers in dry place; do not store at elevated temps., keep from freezing

**Troysan® Polyphase® AF1 [Troy]**

*Chem. Descrip.:* 3-Iodo-2-propynyl butyl carbamate

CAS 55406-53-6; EINECS/ELINCS 259-627-5

*Uses:* Fungicide, preservative used in oil-based and latex paints, cutting oils, textiles, paper coatings, inks, plastics, adhesives, canvas, cordage; wood preservative

*Use Level:* 0.3-1.2%

*Regulatory:* EPA reg. no. 5383-63

*Properties:* Amber mobile liq., char. odor; sol. in aromatics and alcohols; disp. in aq. and solv.-based paints; sp.gr. 1.1-1.2; dens. 9.4-9.7 lb/gal; 40% act.

*Toxicology:* LD50 (oral, rat) 1470 mg/kg, (dermal, rat) > 2000 mg/kg; eye irritant; nonirritating to skin

*Storage:* Store above 0 C in tightly sealed drums

**Troysan® Polyphase® AF3 [Troy]**

*Uses:* Fungicide for interior and exterior paints, metalworking fluids, textiles, paper coatings, inks, adhesives, construction prods., resin systems, plastic coatings, etc.; broad spectrum; nonmetallic; stable to 60 C

*Use Level:* 0.3-2%

*Regulatory:* EPA registered

*Properties:* Water-wh. to straw colored liq.

**Troysan® Polyphase® CST [Troy]**

*Chem. Descrip.:* Glycol ether (20-40%), n-methyl pyrrolidinone (10-30%), and 3-Iodo-2-propynyl butyl carbamate (5-20%)

*Uses:* Fungicide for textiles, paper coatings, adhesives, inks, plastics, masonry coatings, syn. acrylic stucco, and canvas and cordage, mold and mildew control on film surfaces

*Use Level:* 0.2-0.5% (interior paints); 0.2-1.0% (masonry coatings and syn. acrylic stucco); 0.3-1.0% (exterior paints, inks)

*Regulatory:* EPA reg. no. 5383-74; SARA §313 reportable

*Properties:* Off-wh. liq.; mild char. odor; disp. in water; sp.gr. 1.11; flash pt. (Seta CC) 71 C; pH 7.3; 55% volatiles

*Toxicology:* May cause mod. skin irritation and blistering; ing. may cause GI irritation, nausea, vomiting, and diarrhea; inh. may cause respiratory irritation; excessive inh. may cause CNS effects; IPBC may cause severe but reversible eye irritation/injury; TSCA listed

*Environmental:* Toxic to fish; do not apply directly to water or wetlands

*Precaution:* Combustible; avoid heat or sources of ignition; incompat. with strong acids, bases, and oxidizers; avoid extended contact with air or oxygen

*Hazardous Decomp. Prods.:* Combustion may produce iodine vapors, CO, CO<sub>2</sub>, and NO<sub>x</sub>

NFPA: Health 2; Flammability 2; Reactivity 0

*Storage:* Keep tightly closed in cool, dry area

**Troysan® Polyphase® EC17 [Troy]**

*Chem. Descrip.:* 3-Iodo-2-propynyl butyl carbamate emulsifiable conc.

CAS 55406-53-6; EINECS/ELINCS 259-627-5

*Uses:* Fungicide, mildewcide for aq. and solv.-based paints, leather protection, inks, metalworking fluids, paper and textile coatings, adhesives, caulks, sealants, plastics, plastic coatings

*Use Level:* 0.06-0.18% (metalworking fluids), 0.1-1.0% (spin finishes), 0.23-2.3% (latex emulsions), 0.1-1.0% (pre-emulsified vehicles)

*Regulatory:* EPA reg. no. 5383-55

*Properties:* Sl. yel. lt. visc. liq.; sp.gr. 1.03-1.05; visc. (Gardner) A max.; flash pt. 68 C; 17% act.

*Toxicology:* LD50 (oral, rat) 1470 mg/kg, (dermal, rat) > 2000 mg/kg; eye irritant; nonirritating to skin

**Troysan® Polyphase® P-20T [Troy]**

*Chem. Descrip.:* 3-Iodo-2-propynyl butyl carbamate

CAS 55406-53-6; EINECS/ELINCS 259-627-5

*Uses:* Fungicide, mildewcide for solv. and water-based systems incl. paints, wood stains, wood preservatives, textile processing sol'ns., paper coatings, adhesives, caulks, inks, metalworking fluids, joint cements, plastic coatings; broad spectrum; nonmetallic, noncorrosive, reduced odor

*Use Level:* 0.5-1.5% (exterior solv. paint), 1.0-2.5% (exterior latex paint), 0.2-0.8% (interior paint), 1.0-1.5% (wood protective stain), 0.5-2.5% (paper coatings), 0.25-2.5% (inks)

*Regulatory:* EPA reg. no. 5383-74

*Properties:* Amber clear liq.; characteristic odor; sol. in aromatics and alcohol; sp.gr. 1.03-1.06; dens. 8.6-8.8 lb/gal; visc. (Gardner) A max.; 20% min. act.

*Toxicology:* LD50 (oral, rat) 1470 mg/kg, (dermal, rat) > 2000 mg/kg; eye irritant; nonirritating to skin

Prods.:* CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if cold; warm to 50 C, mix well**Trycol® 6984** [Cognis/Chems. Group]*Chem. Descrip.:* Octoxynol-40

CAS 9002-93-1

*Uses:* Dispersant, wetting agent, emulsifier for emulsion polymerization of acrylic and vinyl monomers, textile processing, agric. formulations; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles*Regulatory:* FDA 21 CFR §175.105, 176.170, 176.180, 178.3400; EPA-exempt; SARA nonreportable; DOT nonregulated*Properties:* Gardner 1 liq.; phenolic odor; sol. in water; sp.gr. 1.08; dens. 9.0 lb/gal; visc. 220 cSt (100 F); HLB 17.9; cloud pt. 74 C (10% saline); pour pt. 13 C; flash pt. (PMCC) > 93 C; 29-31% volatiles; 70% act. in water; nonionic*Toxicology:* May cause mild skin and eye irritation; pract. nontoxic by ing.; TSCA listed*Precaution:* Avoid strong oxidizing agents*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if cold; warm to 50 C, mix well**Trydret 2676** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-10 oleate

CAS 9004-96-0

*Uses:* Emulsifier, lubricant for pesticides, metal cleaners, textile detergents and dyeing assistants, leather; rewetting agent for paper*Regulatory:* EPA exempt*Properties:* Gardner 2 liq.; sol. in xylene; disp. in water; dens. 8.5 lb/gal; visc. 54 cSt (100 F); HLB 12.2; cloud pt. < 25 C; flash pt. 560 F; pour pt. 14 C; nonionic**Tryfac® 5556** [Cognis/Chems. Group; Cognis/Textiles]*Chem. Descrip.:* Phosphated nonyl phenyl ethoxylate, free acid form

CAS 51811-79-1

*Uses:* Wetting agent, dispersant, antistat in textile processing; solv. emulsifier for textile scours, detergents, pesticides; dry cleaning detergent; in emulsion polymerization; food pkg. adhesives, paper*Regulatory:* FDA 21 CFR §175.105; EPA exempt; SARA §311/312 reportable*Properties:* Gardner 2 liq.; mild odor; sol. in water, xylene; sp.gr. 1.12; dens. 9.3 lb/gal; visc. 1700 cSt (100 F); cloud pt. 68 C (5% saline); pour pt. 5 C; flash pt. (COC) 227 C; 100% act.; anionic*Toxicology:* Causes burns to skin, eyes, and respiratory tract; ing. may

cause GI irritation, nausea, vomiting, diarrhea; EO (carcinogenic/reproductive hazard); acetaldehyde and 1,4-dioxane (suspect human carcinogens); TSCA listed

*Environmental:* BOD5 93,925 ppm; COD 239,808 ppm

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, PO<sub>x</sub>

NFPA: Health 3; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if cold; warm to R.T., mix well

**Trylox® 5906** [Cognis/Chems. Group; Cognis/Textiles]

*Chem. Descrip.:* PEG-30 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, pigment dispersant, degreaser, lubricant for paper, textiles, agric. and lubricant applics.; visc. and emulsion stabilizer of PVAc and water-based paints

*Regulatory:* EPA exempt

*Properties:* Gardner 2 liq.; sol. in water, xylene; dens. 8.8 lb/gal; visc. 309 cSt (100 F); HLB 11.8; cloud pt. 55 C (1% saline); flash pt. 555 F; pour pt. 9 C; nonionic

**TurboCLEAR™ PC-1** [Sternson]

*Chem. Descrip.:* Polyaluminum chloride with 1-5% hydrochloric acid, and 1-5% sulfuric acid

UN No. 1760

*Uses:* Coagulant for industrial water and wastewater treatment, and paper processing applics.; coagulant for treatment of scale fines in steel mill wastewaters, chem. preconditioning of raw waters used for feedstocks in industrial processes such as cooling water, boiler waters, and process waters, and mine tailings effluents; effective over wide pH range; most effective in water and wastewaters containing very low to mod. levels of solids and/or very highly charged solids

*Properties:* Colorless to amber clear liq.; no appreciable odor; appreciable sol. in water @ 20 C; sp.gr. 1.205 ± 0.003 (20 C); visc. 7 ± 3 cps; vapor pressure 17 mm Hg; f.p. -12 ± 2 C; pH 2.6 ± 0.3; 70% volatile by vol.; 8.9 ± 0.5% Cl, 5.4 ± 0.2% Al, 2.9 ± 0.4% SO<sub>4</sub>; cationic

*Toxicology:* May cause skin irritation, swelling, dermatitis; will cause painful burning or stinging of eyes, inflamm. of conjunctiva; may cause nausea, vomiting on ing.; mist may irritate respiratory tract; lg. quantities may cause liver or kidney damage

*Precaution:* Corrosive; reacts with zinc and aluminum to form hydrogen gas; incompat. with strong alkalis, oxidizing agents; avoid contact with metals

*Hazardous Decomp. Prods.:* Hydrogen chloride gas; hydrogen gas

NFPA: Health 2; Flammability 0; Reactivity 1

*Storage:* > 1 yr shelf life @ 10-30 C in dry rubber-lined or plastic or FRP vessels

**Tychem® 68710-00** [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Carboxylated styrene-butadiene copolymer latex

*Uses:* Associative thickener for adhesives, suitable for coated and uncoated paper, Mylar, cellulose acetate, metalized polyester, aluminum, nonskid coating, and mastic substrates; very efficient

*Properties:* Wh. liq. emulsion; 0.11 µ particle size; readily disp. in cold water, neutralized with ammonia, amines, or fixed alkali; dens. 8.74 lb/gal; visc. 50 max. cps; acid no. 112; pH 4.5 ± 1.0; 34 ± 0.5% NV; anionic

*Storage:* 3 mos. shelf life @ 72 F; protect from freezing

**Tykote 1004** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Base resin providing high str. to functional paper coatings, food pkg.; high pigment compat.; exc. mech. stability, grease/water resist.; very high tens. str.

*Regulatory:* FDA approved for food contact

**Tykote 2200C** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Protective paper coating primarily for food pkg.; exc. oil/grease resist. even at elevated temps.; very good water resist.; superior antiblocking; contains no fluorocarbons

*Regulatory:* FDA approved for food contact

*Properties:* Clear

**Tykote 2300C** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Protective paper coating primarily for food pkg., multiwall bags, food wraps, liners; exc. oil/grease resist.; improved holdout for oils; breathes so moisture vapor can escape; contains no fluorocarbons; fluorocarbon replacement

*Regulatory:* FDA approved for food contact

*Properties:* Clear

**Tykote 2400C** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Paper plate coating; good water/grease resist.; exc. antiblocking; fully repulpable

*Regulatory:* FDA approved for food contact

*Properties:* Clear

**Tykote Base** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Barrier coating used as basecoat for paper coatings incl. food pkg.; rec. where heavier applics. or coatings with different functional props. need to be applied; provides some water resist.; enhanced grease/vapor resist.

*Regulatory:* FDA approved for food contact

*Properties:* Clear

**Tykote Base II** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Barrier coating used as basecoat for paper coatings incl. food pkg.; rec. where heavier applics. or coatings with different functional props. need to be applied; provides exc. vapor resist.; enhanced grease/moisture resist.

*Regulatory:* FDA approved for food contact

*Properties:* Clear

**Tykote WTR-3** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Paper coating providing some grease resist. for detergent boxes, paper/paperboard wraps, concrete and other dry-mix bags, food pkg.; exc. water/water vapor resist., antiblocking; fully repulpable

*Regulatory:* FDA approved for food contact

*Properties:* Clear

**Tykote WTR-AF** [Reichhold]

*Chem. Descrip.:* Latex-based compd.

*Uses:* Paper coating providing some grease resist. for detergent boxes, paper/paperboard wraps, concrete and other dry-mix bags, food pkg.; exc. water/water vapor resist., antiblocking; contains very low levels of ammonia

*Regulatory:* FDA approved for food contact

*Properties:* Clear

**Tylac® 037** [Reichhold]

*Chem. Descrip.:* Styrene/butadiene latex

CAS 9003-55-8

*Uses:* Binder, str. agent providing exc. glueability to most paperboard coatings incl. solid bleached sulfate, coated natural and recycled grades; exc. hot melt and aq. glueability; exc. print str.

**Tylac® 692** [Reichhold]

*Chem. Descrip.:* Styrene/butadiene latex

CAS 9003-55-8

*Uses:* Binder, str. agent for cast paper coatings; ideal flow props. for forming a coated surf. with extremely high smoothness and gloss; exc. release props.; very high str. for sheet-fed; exc. calcium ion stability

**Tylac® 757** [Reichhold]

*Chem. Descrip.:* Styrene/butadiene latex

CAS 9003-55-8

*Uses:* Binder for multipurpose paper coatings, matte or glossy, free-sheet and LWC applics., roto and offset formulations; exc. balance of key props.

*Properties:* Emulsion; 0.20 µ particle size; dens. 8.3 lb/gal; visc. 350 cps; pH 7.7; 57.5% solids; anionic

**Tylac® 820** [Reichhold]

*Chem. Descrip.:* Styrene/butadiene latex

CAS 9003-55-8

*Uses:* Binder, gloss aid, str. agent for web grades for offset printing, glossy or matte finishes, roto and offset formulations; compat. with most cobinders; exc. mech. stability; exc. high speed rheology

**Tylac® 936** [Reichhold]

*Chem. Descrip.:* Styrene/butadiene latex

CAS 9003-55-8

*Uses:* Binder, gloss aid, str. agent for web grades for offset printing, glossy or matte finishes, roto and offset formulations; compat. with most cobinders; exc. mech. stability; exc. high speed rheology

**Tylac® 979-RG** [Reichhold]

*Chem. Descrip.:* Styrene/butadiene latex

CAS 9003-55-8

*Uses:* Binder for coated papers for rotogravure printing, for LWC and freesheet processes; soft, compressible; exhibits very high smoothness; exc.

runnability; superior roto print gloss

**Tylac® 68217-00** [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Styrene-butadiene emulsion polymer, noncarboxylated, rosin acid emulsifier

CAS 9003-55-8

*Uses:* Suitable for coated paper, mastic substrates

*Properties:* 0.15 µ particle size; dens. 8.3 lb/gal; visc. 750 cps; surf. tens. 44 dynes/cm; pH 10.3; 52% solids; anionic

**Tylac® 68219-00** [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Carboxylated styrene-butadiene emulsion copolymer

*Uses:* Multipurpose base for foil laminating adhesives; food pkg. adhesives, paper; good freeze-thaw stability; exc. compat.; suitable for uncoated paper, metalized polyester, aluminum, and mastic substrates

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180 approved

*Properties:* Wh. liq.; dens. 8.3-8.5 lb/gal; visc. 500 cps; pH 7.5-8.5; surf. tens. 38 dynes; 51-53% NV; 54% bound styrene

*Storage:* 3 mos shelf life @ 72 F; protect from freezing

**Tylac® 68321-00** [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Acrylonitrile copolymer

*Uses:* Paper applics.; high internal bond str., high delamination resist., good wet tens. str., exc. heat age chars., good chem. resist.

*Properties:* PH 9.0; ≈ 41% NV

**Tylac® 68327-00** [Reichhold]

*Uses:* Paper applics.; high internal bond; high delamination resist.; good heat aging chars., chem. resist., wet tens. str.; can be crosslinked with external resins for inc. performance props.

*Properties:* PH 9.0; ≈ 47% NV

**Tylac® 68513-00** [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Acrylonitrile copolymer

*Uses:* Paper/web saturant; features med. nitrile content, low residual monomer, exc. processing and deposition chars. in wet end addition, good toughness, good oil/solv. resist., mod. flexibility

*Properties:* PH 9.5; ≈ 40% NV

**Tylac® 68520-00** [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Acrylonitrile copolymer

*Uses:* Paper/web saturant; features high nitrile content, low residual monomer, exc. processing with optimum curing capabilities, exc. str., and exc. oil/solv. resist.

*Properties:* PH 8.0; ≈ 44% NV

**Tylac® 97936-00** [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Styrene-butadiene emulsion polymer

CAS 9003-55-8

*Uses:* Binder for sheet and web offset paper coatings; general purpose

*Properties:* Emulsion; 0.14 µ particle size; dens. 8.3 lb/gal; visc. 200 cps; pH 7.7; 50% solids; anionic

**Tylose® C, CB Series** [Clariant]

*Chem. Descrip.:* Sodium CMC

CAS 9004-32-4; EINECS/ELINCS 265-995-8

*Uses:* Binder in pencil leads; thickener in batteries, rubber, cosmetics, food-stuffs, pharmaceuticals, tobacco, and textiles; dispersant, emulsifier for insecticides, fungicides, and herbicides; plasticizer in ceramics; surface sizing in paper industry; press aid and lubricant in welding electrodes

*Properties:* Gran., powd.; 100% act.; anionic

**Tylose® CBR Grades** [Clariant]

*Chem. Descrip.:* Sodium CMC

CAS 9004-32-4; EINECS/ELINCS 265-995-8

*Uses:* Binder for coatings; sedimenting aid in mining; gellant/binder/thickener in chemical tech. and rubber industry; sizing agent for paper and textiles; plasticizer/filler in soaps and hand cleaning pastes; graying inhibitor for detergents

*Properties:* Gran.; anionic

**Tylose® C-G1** [Clariant]

*Chem. Descrip.:* Sodium carboxymethyl cellulose, pure

CAS 9004-32-4; EINECS/ELINCS 265-995-8

*Uses:* Visc. control agent/consistency regulator in ceramic compds., engobes, glazes; plasticizer; binder; controls dewatering and drying; surf. treatment in paper industry; visc. modifier for pigment coating; print thickener, carpet backing finish in textiles; thickener in rubber industry and for graphite lubricants

*Properties:* Granules; visc. (Höppler) 20, 30, 100, 300, 600, 1000, 6000, 10,000 mPa·s (20 C) avail.; 7% moisture; 99% purity (bone-dry); anionic

**Tylose® CR** [Clariant]

*Chem. Descrip.:* Sodium CMC, tech.

CAS 9004-32-4; EINECS/ELINCS 265-995-8

*Uses:* Binder for coatings; sedimenting aid in mining; gellant/binder/thickener in chemical tech. and rubber industry; sizing agent for paper and textiles; plasticizer/filler in soaps and hand cleaning pastes

*Properties:* Gran.

**Tysul® WW 35** [Atofina SA]

*Chem. Descrip.:* Hydrogen peroxide

CAS 7722-84-1; EINECS/ELINCS 231-765-0

*Uses:* Oxidizing agent and reducing agent used for municipal and industrial wastewater treatment, food processing, foundries, ore mining, org. chems., petrol., pharmaceuticals, photography, plastics, pulp/paper, rubber, textiles, etc.; for sulfide odor and corrosion control; for destruction of excess hypochlorite, thiosulfate, phenols, and other select orgs., COD reduction; dec. to yield oxygen and water

*Properties:* Colorless clear liq.; sl. pungent irritating odor; misc. with water; m.w. 34.02; dens. 1.133 g/ml; visc. 1.11 cP; vapor pressure 23 mm Hg (30 C); b.p. 108 C; f.p. -33 C; pH 2.5; 35% conc.; 16.5% act. oxygen

*Toxicology:* ACGIH TLV 1 ppm, 1.4 mg/m<sup>3</sup>, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation; TSCA listed

*Environmental:* Aquatic LC50 (catfish, 96 h) 37.4 mg/l

*Precaution:* Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures

*Storage:* Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

**Tysul® WW 50** [Atofina SA]

*Chem. Descrip.:* Hydrogen peroxide

CAS 7722-84-1; EINECS/ELINCS 231-765-0

*Uses:* Oxidizing agent and reducing agent used for municipal and industrial wastewater treatment, food processing, foundries, ore mining, org. chems., petrol., pharmaceuticals, photography, plastics, pulp/paper, rubber, textiles, etc.; for sulfide odor and corrosion control; for destruction of excess hypochlorite, thiosulfate, phenols, and other select orgs., COD reduction; dec. to yield oxygen and water

*Properties:* Colorless clear liq.; sl. pungent irritating odor; misc. with water; m.w. 34.02; dens. 1.196 g/ml; visc. 1.17 cP; vapor pressure 18 mm Hg (30 C); b.p. 114 C; f.p. -52 C; pH 1.8; 50% conc.; 23.5% act. oxygen

*Toxicology:* ACGIH TLV 1 ppm, 1.4 mg/m<sup>3</sup>, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation; TSCA listed

*Environmental:* Aquatic LC50 (catfish, 96 h) 37.4 mg/l

*Precaution:* Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures

*Storage:* Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

**Tysul® WW 70 DG** [Atofina SA]

*Chem. Descrip.:* Hydrogen peroxide

CAS 7722-84-1; EINECS/ELINCS 231-765-0

*Uses:* Oxidizing agent for municipal and industrial wastewater treatment, food processing, foundries, ore mining, org. chems., petrol., pharmaceuticals, photography, plastics, pulp/paper, rubber, textiles, etc.; for sulfide odor and corrosion control; for destruction of excess hypochlorite, thiosulfate, phenols, and other select orgs., COD reduction; highly stabilized dilution grade; diluted to 35-50% storage in user's tank

*Properties:* Colorless clear liq.; sl. pungent irritating odor; m.w. 34.02; dens. 1.288 g/ml; visc. 1.93 cP; vapor pressure 11 mm Hg (30 C); b.p. 126 C; f.p. -40 C; pH 0.5; 70% conc.; 32.9% act. oxygen

*Toxicology:* ACGIH TLV 1 ppm, 1.4 mg/m<sup>3</sup>, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation; TSCA listed

*Environmental:* Aquatic LC50 (catfish, 96 h) 37.4 mg/l

*Precaution:* Corrosive, strong oxidizer; mixture with org. materials may be

explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures

*Storage:* Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

# U

## Ucar® VAGD [Union Carbide]

*Chem. Descrip.:* Hydroxyl-modified vinyl chloride/VA copolymer  
 CAS 9003-22-9

*Uses:* Sol'n. vinyl resin for coatings; food-contact paper/paperboard; general maintenance and marine coatings; adhesives

*Regulatory:* FDA 21CFR §176.170

*Properties:* Wh. powd.; 98% min. thru 20 mesh; m.w. 22,000; sp.gr. 1.39; bulk dens. 24-34 lb/ft<sup>3</sup>; visc. 400 cP (30% in MEK); hyd. no. 76; soften. pt. 110-180 C; 90% VC, 4% VA, 6% vinyl alcohol; 25% solids in MEK/toluene (50/50)

## Ucar® VAGH [Union Carbide]

*Chem. Descrip.:* Hydroxyl-modified vinyl chloride/VA copolymer  
 CAS 9003-22-9

*Uses:* Sol'n. vinyl resin for coatings; food-contact paper/paperboard; general maintenance and marine coatings; magnetic tape; inks; adhesives; wood finishes

*Regulatory:* FDA 21CFR §176.170

*Properties:* Wh. powd.; 98% min. thru 20 mesh; m.w. 27,000; sp.gr. 1.39; bulk dens. 24-34 lb/ft<sup>3</sup>; visc. 350 cP (30% in MEK); hyd. no. 76; soften. pt. 110-180 C; 90% VC, 4% VA, 6% vinyl alcohol; 20% solids in MEK/toluene (50:50)

## Ucar® VMCA [Union Carbide]

*Chem. Descrip.:* Carboxyl-modified vinyl chloride/VA copolymer  
 CAS 9003-22-9

*Uses:* Sol'n. vinyl resin for coatings; food-contact paper/paperboard; general maintenance and marine coatings; inks; adhesives

*Regulatory:* FDA 21CFR §176.180

*Properties:* Wh. powd.; 98% min. thru 20 mesh; m.w. 15,000; sp.gr. 1.34; visc. 370 cP (30% in MEK); bulk dens. 24-34 lb/ft<sup>3</sup>; acid no. 19; soften. pt. 110-180 C; 81% VC, 17% VA, 2% maleic acid; 30% solids in MEK/toluene (25/75)

## Ucar® VMCC [Union Carbide]

*Chem. Descrip.:* Carboxyl-modified vinyl chloride/VA copolymer  
 CAS 9003-22-9

*Uses:* Sol'n. vinyl resin for coatings; food-contact paper/paperboard; general maintenance and marine coatings; inks; adhesives

*Regulatory:* FDA 21CFR §176.180

*Properties:* Wh. powd.; 98% min. thru 20 mesh; m.w. 19,000; sp.gr. 1.34; visc. 370 cP (30% in MEK); bulk dens. 24-34 lb/ft<sup>3</sup>; acid no. 10; soften. pt. 110-180 C; 83% VC, 16% VA, 1% maleic acid; 25% solids in MEK/toluene (25/75)

## Ucar® VMCH [Union Carbide]

*Chem. Descrip.:* Carboxyl-modified vinyl chloride/VA copolymer  
 CAS 9003-22-9

*Uses:* Sol'n. vinyl resin for coatings; food-contact paper/paperboard; general maintenance and marine coatings; inks; adhesives

*Regulatory:* FDA 21CFR §176.180

*Properties:* Wh. powd.; 98% min. thru 20 mesh; m.w. 27,000; sp.gr. 1.35; visc. 150 cP (30% in MEK); bulk dens. 24-34 lb/ft<sup>3</sup>; acid no. 10; soften. pt. 110-180 C; 86% VC, 13% VA, 1% maleic acid; 20% solids in MEK/toluene (50/50)

## Ucarfloc® Polymer 300 [Union Carbide]

*Chem. Descrip.:* Polyethylene oxide  
 CAS 25322-68-3

*Uses:* Thickener, lubricant, binder, flocculant, wet adhesive for mining; foam

stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food pkg. coatings, paper, closures with sealing gaskets for food containers; thermoplastic resin

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 4,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 1650-5500 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

## Ucarfloc® Polymer 302 [Union Carbide]

*Chem. Descrip.:* Polyethylene oxide  
 CAS 25322-68-3

*Uses:* Thickener, lubricant, binder, flocculant, wet adhesive for mining; foam stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food pkg. coatings, paper, closures with sealing gaskets for food containers; thermoplastic resin

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 5,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 5500-7500 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

## Ucarfloc® Polymer 304 [Union Carbide]

*Chem. Descrip.:* Polyethylene oxide  
 CAS 25322-68-3

*Uses:* Thickener, lubricant, binder, flocculant, wet adhesive for mining; foam stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food pkg. coatings, paper, closures with sealing gaskets for food containers; thermoplastic resin

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

*Properties:* Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 7,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 7500-10,000 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

*Precaution:* Slippery when wet

*Storage:* Store in sealed containers below 25 C, away from heat; avoid dust buildup

## Ucarfloc® Polymer 309 [Union Carbide]

*Chem. Descrip.:* Polyethylene oxide  
 CAS 25322-68-3

*Uses:* Thickener, lubricant, binder, flocculant, wet adhesive for mining; foam stabilizer in fermented malt beverages (300 ppm max.); dispersant for vinyl polymerization; food pkg. coatings, paper, closures with sealing gaskets for food containers; thermoplastic resin

*Regulatory:* FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170,

176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

**Properties:** Wh. gran. powd., mild ammoniacal odor; 100% thru 10 mesh, 96% thru 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 8,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft<sup>3</sup>; visc. 10,000-15,000 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

**Precaution:** Slippery when wet

**Storage:** Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Ucon® 50-HB-55** [Union Carbide]

**Chem. Descrip.:** PPG-2-buteth-3

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators

**Properties:** Sol. in water, alcohol; m.w. 270 (avg.); sp.gr. 0.971 (20/20 C); dens. 8.08 lb/gal (20 C); visc. 55 SUS (38 C); pour pt. -65 C; flash pt. (TOC) 90 C; ref. index 1.4402 (20 C); nonionic

**Toxicology:** LD50 (oral, rat) 8530 mg/kg; mildly toxic by ing.; skin and severe eye irritant; TSCA listed

**Ucon® 50-HB-100** [Union Carbide]

**Chem. Descrip.:** PPG-3-buteth-5

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators

**Properties:** M.w. 520 (avg.); sp.gr. 1.023 (20/20 C); dens. 8.51 lb/gal (20 C); visc. 100 SUS (38 C); pour pt. -51 C; flash pt. (PMCC) 141 C; ref. index 1.4491 (20 C); nonionic

**Toxicology:** LD50 (oral, rat) 9170 mg/kg, (skin, rabbit) 14 g/kg; mildly toxic by ing. and skin contact; skin irritant; TSCA listed

**Ucon® 50-HB-170** [Union Carbide]

**Chem. Descrip.:** PPG-5-buteth-7

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators

**Properties:** M.w. 750 (avg.); sp.gr. 1.031 (20/20 C); dens. 8.58 lb/gal (20 C); visc. 170 SUS (38 C); pour pt. -43 C; flash pt. (PMCC) 185 C; ref. index 1.4531 (20 C); nonionic

**Ucon® 50-HB-260** [Union Carbide]

**Chem. Descrip.:** PPG-7-buteth-10

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; food pkg. adhesives; defoamer in food-contact paper; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators

**Regulatory:** FDA 21CFR §175.105, 176.210(d)(3), 178.3120

**Properties:** M.w. 970 (avg.); sp.gr. 1.035 (20/20 C); dens. 8.62 lb/gal (20 C); visc. 260 SUS (38 C); pour pt. -40 C; flash pt. (PMCC) 194 C; ref. index 1.4542 (20 C); nonionic

**Toxicology:** LD50 (oral, rat) 4000 mg/kg; mod. toxic by ing.; skin irritant; TSCA listed

**Ucon® 50-HB-400** [Union Carbide; Amerchol]

**Chem. Descrip.:** PPG-9-buteth-12

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; food pkg. adhesives; defoamer in food-contact paper; solvent, softener, and plasticizer for textile and paper

coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators

**Regulatory:** FDA 21CFR §175.105, 176.210(d)(3), 178.3120, 178.3910

**Properties:** Clear liq., char. odor; m.w. 1230 (avg.); sp.gr. 1.041 (20/20 C); dens. 8.67 lb/gal (20 C); visc. 400 SUS (38 C); pour pt. -38 C; flash pt. (PMCC) 204 C; ref. index 1.4576 (20 C); pH 5.5-7.5 (10% aq.); nonionic

**Toxicology:** LD50 (oral, rat) 5370 mg/kg; mildly toxic by ing.; skin irritant; TSCA listed

**Ucon® 50-HB-660** [Union Carbide; Amerchol]

**Chem. Descrip.:** PPG-12-buteth-16

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; food processing; food pkg. adhesives; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators, food contact

**Regulatory:** FDA 21CFR §173.310, 175.105, 176.210(d)(3), 178.3120, 178.3570, 178.3910

**Properties:** Clear liq., low char. odor; m.w. 1590 (avg.); sp.gr. 1.051 (20/20 C); dens. 8.75 lb/gal (20 C); visc. 660 SUS (38 C); pour pt. -34 C; flash pt. (PMCC) 202 C; ref. index 1.4576 (20 C); pH 5.5-7.5 (10% aq.); nonionic

**Toxicology:** LD50 (oral, rat) 18 g/kg; mildly toxic by ing.; skin irritant; TSCA listed

**Ucon® 50-HB-2000** [Union Carbide]

**Chem. Descrip.:** PPG-20-buteth-30

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; food processing; food pkg. adhesives; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators, food contact

**Regulatory:** FDA 21CFR §173.310, 175.105, 176.210(d)(3), 178.3120, 178.3570, 178.3910

**Properties:** M.w. 2660 (avg.); sp.gr. 1.062 (20/20 C); dens. 8.84 lb/gal (20 C); visc. 2000 SUS (38 C); pour pt. -32 C; flash pt. (PMCC) 172 C; ref. index 1.4590 (20 C); nonionic

**Toxicology:** LD50 (oral, rat) 21 g/kg; mildly toxic by ing.; skin irritant; TSCA listed

**Ucon® 50-HB-3520** [Union Carbide; Amerchol]

**Chem. Descrip.:** PPG-28-buteth-35

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; food processing; food pkg. adhesives; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators, food contact

**Regulatory:** FDA 21CFR §173.310, 175.105, 176.210(d)(3), 178.3120, 178.3570, 178.3910

**Properties:** Clear liq., char. odor; m.w. 3380 (avg.); sp.gr. 1.062 (20/20 C); dens. 8.81 lb/gal (20 C); visc. 3520 SUS (38 C); pour pt. -29 C; flash pt. (PMCC) 172 C; ref. index 1.4598 (20 C); pH 4.5-7.5 (10% aq.); nonionic

**Toxicology:** LD50 (oral, rat) 38 g/kg; mildly toxic by ing.; skin irritant; TSCA listed

**Ucon® 50-HB-5100** [Union Carbide; Amerchol]

**Chem. Descrip.:** PPG-33-buteth-45

CAS 9038-95-3

**Uses:** Emollient for cosmetics; lubricant for compressor, rubber, greases, textiles; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; solvent for inks and dyes; demulsifier; food processing; food pkg. adhesives; cellophane; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvs. for vinyl resins; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators, food contact

**Regulatory:** FDA 21CFR §173.310, 173.340, 175.105, 176.200, 176.210(d)(3), 177.1200, 178.3120, 178.3570, 178.3910

*Properties:* Clear visc. liq., low char. odor; m.w. 3930 (avg.); sp.gr. 1.063 (20/20 C); dens. 8.85 lb/gal (20 C); visc. 5100 SUS (38 C); pour pt. -29 C; flash pt. (PMCC) 180 C; ref. index 1.4596 (20 C); pH 5.5-7.5 (10% aq.); nonionic

*Toxicology:* LD50 (oral, rat) 49 g/kg; mildly toxic by ing.; skin irritant; TSCA listed

**Ucon® 75-H-450** [Union Carbide; Amerchol]

*Chem. Descrip.:* PEG/PPG-17/6 copolymer  
CAS 9003-11-6

*Uses:* Lubricant for antiperspirants; emollient; solvent; bodying agent; lubricant for textile spin finishes; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; demulsifier; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; food pkg. adhesives, animal glues; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.210(d)(3), 178.3120

*Properties:* Clear to cloudy liq., mild char. odor; m.w. 980 (avg.); sp.gr. 1.097 (20/20 C); dens. 9.13 lb/gal (20 C); visc. 450 SUS (38 C); pour pt. -15 C; flash pt. (PMCC) 188 C; ref. index 1.4655 (20 C); pH 5.5-7.5 (10% aq.)

**Ucon® 75-H-1400** [Union Carbide]

*Chem. Descrip.:* PEG/PPG-35/9 copolymer  
CAS 9003-11-6

*Uses:* Cosmetic emollient; lubricant for textile spin finishes; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; demulsifier; food pkg. adhesives, paper, cellophane, animal glues; defoamer in food-contact coatings, paper; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §175.105, 176.180, 176.200, 176.210(d)(3), 177.1200, 178.3120, 178.3570

*Properties:* Sol. in water, alcohol; m.w. 2470 (avg.); sp.gr. 1.099 (20/20 C); dens. 9.12 lb/gal (20 C); visc. 1400 SUS (38 C); pour pt. 4 C; flash pt. (PMCC) 219 C; ref. index 1.4653 (20 C)

**Ucon® 75-H-9500** [Union Carbide]

*Chem. Descrip.:* Linear polymer of ethylene and propylene oxide  
CAS 9003-11-6

*Uses:* Cosmetic emollient; lubricant for textile spin finishes; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; demulsifier; food pkg. adhesives, paper, cellophane, animal glues; defoamer in food-contact coatings, paper; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §175.105, 176.180, 176.200, 176.210(d)(3), 177.1200, 178.3120, 178.3570

*Properties:* M.w. 6950 (avg.); sp.gr. 1.094 (20/20 C); dens. 9.1 lb/gal (20 C); visc. 9500 SUS (38 C); pour pt. 4 C; flash pt. (PMCC) 222 C; ref. index 1.4665 (20 C)

**Ucon® 75-H-90000** [Union Carbide]

*Chem. Descrip.:* PEG/PPG-125/30 copolymer  
CAS 9003-11-6

*Uses:* Cosmetic emollient; lubricant for textile spin finishes; intermediate for prep. of resins, plasticizers, modifiers, and surfactants; demulsifier; food pkg. adhesives, paper, cellophane, animal glues; defoamer in food-contact coatings, paper; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §175.105, 176.180, 176.200, 176.210(d)(3), 177.1200, 178.3120, 178.3570

**Ucon® LB-65** [Union Carbide]

*Chem. Descrip.:* PPG-5 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient

*Properties:* M.w. 340 (avg.); sp.gr. 0.960 (20/20 C); dens. 7.99 lb/gal (20 C); visc. 65 SUS (38 C); pour pt. -57 C; flash pt. (PMCC) 119 C; ref. index 1.3281 (20 C); nonionic

**Ucon® LB-135** [Union Carbide]

*Chem. Descrip.:* PPG-9 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and

dye solvents for vinyl resins; demulsifier; cosmetic emollient

*Properties:* M.w. 640 (avg.); sp.gr. 0.981 (20/20 C); dens. 8.16 lb/gal (20 C); visc. 135 SUS (38 C); pour pt. -48 C; flash pt. (PMCC) 177 C; ref. index 1.4436 (20 C); nonionic

**Ucon® LB-165** [Union Carbide]

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient

*Properties:* M.w. 740 (avg.); sp.gr. 0.983 (20/20 C); dens. 8.18 lb/gal (20 C); visc. 165 SUS (38 C); pour pt. -46 C; flash pt. (PMCC) 190 C; ref. index 1.4453 (20 C)

**Ucon® LB-285** [Union Carbide]

*Chem. Descrip.:* PPG-15 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient; food pkg. adhesives; defoamer for food contact

*Regulatory:* FDA 21CFR §175.105, 176.210(d)(2) and (3), 178.3120, 178.3910

*Properties:* M.w. 1020 (avg.); sp.gr. 0.989 (20/20 C); dens. 8.23 lb/gal (20 C); visc. 285 SUS (38 C); pour pt. -40 C; flash pt. (PMCC) 179 C; ref. index 1.4482 (20 C); nonionic

**Ucon® LB-385** [Union Carbide]

*Chem. Descrip.:* PPG-18 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient; food pkg. adhesives; defoamer for food contact

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210(d)(2) and (3), 177.1200, 178.3120, 178.3910

*Properties:* Low color and odor; sol. in alcohol; insol. in water; m.w. 1200 avg.; sp.gr. 0.994 (20/20 C); dens. 8.27 lb/gal (20 C); visc. 385 SUS (100 F); pour pt. -37 C; flash pt. (PMCC) 177 C; ref. index 1.4489 (20 C); nonionic

**Ucon® LB-525** [Union Carbide]

*Chem. Descrip.:* PPG-22 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient; food pkg. adhesives; defoamer for food contact

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210(d)(2) and (3), 177.1200, 178.3120, 178.3910

*Properties:* M.w. 1420 (avg.); sp.gr. 0.997 (20/20 C); dens. 8.30 lb/gal (20 C); visc. 525 SUS (38 C); pour pt. -34 C; flash pt. (PMCC) 185 C; ref. index 1.4487 (20 C); nonionic

**Ucon® LB-625** [Union Carbide]

*Chem. Descrip.:* PPG-24 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient; food pkg. adhesives; defoamer for food contact

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210(d)(2) and (3), 177.1200, 178.3120, 178.3570, 178.3910

*Properties:* Low color and odor; sol. in alcohol; m.w. 1550; sp.gr. 1.00 (20/20

C); dens. 8.32 lb/gal (20 C); visc. 625 SUS (38 C); pour pt. -32 C; flash pt. (PMCC) 168 C; ref. index 1.4491 (20 C); nonionic

**Ucon® LB-1145** [Union Carbide; Amerchol]

*Chem. Descrip.:* PPG-33 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient; food pkg. adhesives; defoamer for food contact

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210(d)(2) and (3), 177.1200, 178.3120, 178.3570, 178.3910

*Properties:* Low color and odor; sol. in alcohol; m.w. 2080 (avg.); sp.gr. 1.002 (20/20 C); dens. 8.34 lb/gal (20 C); visc. 1145 SUS (38 C); pour pt. -29 C; flash pt. (PMCC) 190 C; ref. index 1.4499 (20 C); nonionic

**Ucon® LB-1715** [Union Carbide; Amerchol]

*Chem. Descrip.:* PPG-40 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agents and dye solvents for vinyl resins; demulsifier; cosmetic emollient; food pkg. adhesives; defoamer for food contact

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210(d)(2) and (3), 177.1200, 178.3120, 178.3570, 178.3910

*Properties:* Clear liq., low char. odor; sol. in alcohol; m.w. 2490 (avg.); sp.gr. 1.002 (20/20 C); dens. 8.34 lb/gal (20 C); visc. 1715 SUS (38 C); pour pt. -23 C; flash pt. (PMCC) 188 C; ref. index 1.4503 (20 C); pH 5.0-8.5 (10% w/v); nonionic

**Ucon® LB-3000** [Union Carbide]

*Chem. Descrip.:* PPG-53 butyl ether  
CAS 9003-13-8

*Uses:* Lubricant for two-stroke cycle engines, rubber, greases, textiles; reactive intermediate for resins, plasticizers, modifiers, and surfactant mfg.; antifoam in boiler water, latex processing, washing sol'ns., paints, adhesives, salt water evaporators; solvent for inks and dyes; solvent, softener, and plasticizer for textile and paper coatings, NC coatings; mold release agent and dye solv. for vinyl resins; demulsifier; cosmetic emollient; defoamer for food contact; food pkg. cellophane

*Regulatory:* FDA 21CFR §176.200, 177.1200, 178.3570, 178.3910

*Properties:* Low color and odor; sol. in alcohol; visc. 3000 SUS (38 C); nonionic

**Ufaryl DB 80** [Unger Fabrikker AS]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate, branched  
CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Detergent, wetting agent, foaming agent, emulsifier for lt. and heavy-duty detergents, dairy, metal, floor, vehicle and bottle cleaners; wetting agent in insecticides, metal pickling, printing inks, paper processing, textiles

*Properties:* Pale cream free-flowing powder.; m.w. 343-345; sp.gr. 420 g/l; pH 6-9 (1%); 79-83% act.; anionic

*Environmental:* Partially biodeg.

**Ufaryl DL 80 CW** [Unger Fabrikker AS]

*Chem. Descrip.:* Linear sodium dodecylbenzene sulfonate  
CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Detergent, wetting agent, anticaking agent for scouring, toilet blocks, dairy and brewery cleaners, agric., concrete mfg., paper prod., metal processing, textiles; high foaming; stable in hard water, acids, alkalis

*Properties:* Wh. to lt. yel. free-flowing powder.; m.w. 343-345; sp.gr. 430 ± 40 g/l; pH 10-11 (1%); 79-83% act.; anionic

**Ufaryl DL 85** [Unger Fabrikker AS]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate linear  
CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Detergent, emulsifier, wetting agent, anticaking agent for scouring, dairy and brewery cleaners, agric., concrete, paper prod., metal processing, textiles, toilet blocks; high foaming

*Properties:* Wh. to lt. yel. free-flowing powder.; m.w. 343-345; sp.gr. 420 ± 40 g/l; pH 10-11 (1%); 83-87% act.; anionic

**Ufaryl DL 90 C** [Unger Fabrikker AS]

*Chem. Descrip.:* Linear sodium dodecylbenzene sulfonate

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Detergent, wetting agent, emulsifier, anticaking agent for scouring, dairy and brewery cleaning, agric., concrete mfg., paper prod., metal processing, textiles, toilet blocks; high foaming

*Properties:* Wh. to lt. yel. free-flowing powder.; m.w. 343-345; sp.gr. 400 ± 40 g/l; pH 7-9 (1%); 88-92% act.; anionic

**UFH16** [Alcoa]

*Chem. Descrip.:* Hydrated alumina

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65.1%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant filler in polymer systems, epoxy, EVA, PVA, PVdC, SBR, vinylidene chloride; filler pigment in high whiteness papers; flame retardant filler, TiO<sub>2</sub> extender in textile coatings; nonsmoking; halogen-free; 100% reflectance; improved printability; noncorrosive

*Regulatory:* DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

*Properties:* Wh. cryst. powder.; 1.8 µm median particle size; odorless; insol. in water; dens. 2.4 g/cm<sup>3</sup> (20 C); bulk dens. 0.15-1.3 g/cm<sup>3</sup> (20 C); surf. area 5-7 m<sup>2</sup>/g; brightness 97-98; m.p. 2040 C; pH 8.5-10.2 (20 C, 20% aq.); 99% solids

*Toxicology:* Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; may aggravate asthma, chronic lung disease, skin rashes; TSCA listed

*Environmental:* Generally not hazardous for water

*Precaution:* Prevent formation of dust

*Hazardous Decomp. Prods.:* Dec. forming aluminum oxide and water vapor beginning at 200 C

*Storage:* Keep material dry

**1900 UHMW Polymers** [Montell N. Am.]

*Chem. Descrip.:* Ultrahigh m.w. PE resins

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* High-performance materials for fabricating equip. and mech. parts subjected to extraordinary wear for use in chemical, food and beverage, mining and metals processing, paper, and textile industries for processing equipment and materials handling systems components (ball valve seats, bearings, gaskets, mixer paddles, etc.); resins with m.w. range between three and six million; offers resistance to impact, abrasion, and chemicals, high-energy absorp., self-lubricating

**Ukanil 2111** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Alcohol alkoxylate

*Uses:* Antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, pulp/paper

*Properties:* Colorless liq.; sp.gr. 0.97; hyd. no. 50; pour pt. -2 C; cloud pt. 26 C (10% in 25% BDG); pH 6.3 (2.5%); surf. tens. 32.4 mN/m (0.5%, 20 C); nonionic

**Ukanil 2265** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* Alcohol alkoxylate

*Uses:* Antifoam for sugar beet processing, fermentation, antibiotics, citric acid, yeast, pulp/paper

*Properties:* Colorless liq.; sp.gr. 0.97; hyd. no. 55; pour pt. -2 C; cloud pt. 21 C (10% in 25% BDG); pH 6.3 (2.5%); nonionic

**Ukanil 3500** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* EO/PO copolymer on a polyfunctional alcohol

CAS 9003-11-6

*Uses:* Surfactant, antifoam for pulp/paper applics.

*Properties:* Pale yel. liq.; sp.gr. 1.01; hyd. no. 37.5; pour pt. -25 c; cloud pt. 9 C (10% aq.); pH 6.3 (2.5%); surf. tens. 32.6 mN/m (0.5%, 20 C); nonionic

**Ukanil 3501** [Uniqema/ICI Surf. Am.; Uniqema/ICI Surf. UK]

*Chem. Descrip.:* EO/PO copolymer on a polyfunctional alcohol

CAS 9003-11-6

*Uses:* Surfactant, antifoam for pulp/paper applics.

*Properties:* Colorless liq.; sp.gr. 1.01; hyd. no. 26.5; pour pt. -26 C; cloud pt. < 10 C (1% aq.); surf. tens. 37.2 mN/m (0.5%, 20 C); nonionic

**Ultimer™ 1460** [Nalco]

*Chem. Descrip.:* Water-based disp. polymer

*Uses:* Flocculant, retention aid, drainage aid for papermaking, food, and beverage industries; retains fillers such as TiO<sub>2</sub>, clays, CaCO<sub>3</sub>; improves machine runnability; better solids recovery; cleaner white water for reuse; improved saveall and DAF efficiency; reduced air emissions, toxicity, flamm., and transportation hazards

**Ultradur® B 2550** [BASF/Plastic Materials; BASF AG]*Chem. Descrip.:* Thermoplastic polyester resin (PBT)

CAS 26062-94-2

*Uses:* Resin used for coating paper and board for pkg. oven-ready deep-freeze and convenience foods; primarily for extrusion; low-visc.*Properties:* Dens. 1.30 g/cm<sup>3</sup>; m.p. 428-437 F; tens. str. 8700 psi (yield); tens. elong. 150% (break); Izod impact 0.8 ft lb/in. notched; distort. temp. 153 F (264 psi); flamm. HB; dielec. str. 410 V/mil; vol. resist. 10<sup>16</sup> ohm-cm.**Ultrapaque® PCC** [Specialty Mins.]*Chem. Descrip.:* Precipitated calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* TiO<sub>2</sub> extender/replacement, opacifier, brightener for paper; patented; similar morphology, size, and particle size distribution to TiO<sub>2</sub>*Properties:* Rhombohedral cryst.**Ultra-pHase™** [Hercules]*Uses:* Internal sizing agent for papermaking; for use in acid or neutral pH**Ultrathene® UE 631-04** [Equistar]*Chem. Descrip.:* EVA copolymer

CAS 24937-78-8

*Uses:* Resin for hot-melt and solv.-based adhesives and coatings; enhances gloss, clarity, flexibility, and str. props. of hot-melt coatings; food pkg. adhesives, paper, polymers; can produce adhesives with exc. tackiness, adhesion, flexibility, and stability*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1350 approved*Properties:* Melt index 2.4 g/10 min; dens. 0.94 g/cc; peak m.p. 86 C; soften. pt. (R&B) 174 C; tens. str. 2150 psi (break); tens. elong. 710% (break); Shore hardness A87; 19% VA**Ultrathene® UE 634-04** [Equistar]*Chem. Descrip.:* EVA copolymer

CAS 24937-78-8

*Uses:* Resin for hot-melt and solv.-based adhesives and coatings; enhances gloss, clarity, flexibility, and str. props. of hot-melt coatings; food pkg. adhesives, paper, polymers; can produce adhesives with exc. tackiness, adhesion, flexibility, and stability*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1350 approved*Properties:* Melt index 6.0 g/10 min; dens. 0.95 g/cc; peak m.p. 71 C; soften. pt. (R&B) 143 C; tens. str. 2200 psi (break); tens. elong. 800% (break); Shore hardness A78; 28% VA**Ultrathene® UE 634-04** [Equistar]*Chem. Descrip.:* EVA copolymer

CAS 24937-78-8

*Uses:* Flexible base resin for hot-melt adhesives, sealants, and coatings; food pkg. adhesives, paper, polymers; promotes higher temp. performance and adhesion to variety of substrates*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1350 compliant*Properties:* Sp.gr. 0.95; melt flow 6.0 g/10 min; peak m.p. 71 C; soften. pt. (R&B) 143 C; tens. str. 2200 psi (break); elong. 750% (break); hardness (Shore A) 78; 28% vinyl acetate**Ultrathene® UE 639-67** [Equistar]*Chem. Descrip.:* EVA copolymer

CAS 24937-78-8

*Uses:* Resin for hot-melt and solv.-based adhesives and coatings; enhances gloss, clarity, flexibility, and str. props. of hot-melt coatings; food pkg. adhesives, paper, polymers; can produce adhesives with exc. tackiness, adhesion, flexibility, and stability*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1350 approved*Properties:* Melt index 150 g/10 min; dens. 0.95 g/cc; peak m.p. 63 C; soften. pt. (R&B) 88 C; tens. str. 400 psi (break); tens. elong. 600% (break); Shore hardness A69; 28% VA**Ultrathene® UE 649-04** [Equistar]*Chem. Descrip.:* EVA copolymer

CAS 24937-78-8

*Uses:* Resin for hot-melt and solv.-based adhesives and coatings; enhances gloss, clarity, flexibility, and str. props. of hot-melt coatings; food pkg. adhesives, paper, polymers; can produce adhesives with exc. tackiness, adhesion, flexibility, and stability*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1350 approved*Properties:* Melt index 500 g/10 min; dens. 0.93 g/cc; soften. pt. *Uses:* Resin for hot-melt and solv.-based adhesives and coatings; enhances gloss, clarity, flexibility, and str. props. of hot-melt coatings; food pkg. adhesives, paper, polymers; can produce adhesives with exc. tackiness, adhesion, flexibility, and stability*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1350 approved*Properties:* Melt index 43 g/10 min; dens. 0.95 g/cc; peak m.p. 58 C; soften. pt. (R&B) 107 C; tens. str. 660 psi (break); tens. elong. 900% (break); Shore hardness A73; 33% VA**Ultrazym 100** [Novo Nordisk]*Chem. Descrip.:* Pectin-decomposing enzyme*Uses:* Enzyme for mash and juice treatment; processing aid in wine industry; pulp wash*Properties:* Liq.**Umbrellit® B 30** [Münzing Chemie GmbH]*Chem. Descrip.:* Chromium-III-stearate complex*Uses:* For impregnation and refinement of water repellent chrome leathers; waterproofing agent for paper and board; can be used during leather mfg. and after finishing, e.g., for drum impregnation in aq. sol'n. or diluted with water and alcohol for spraying process*Use Level:* 0.1-0.5 g/m<sup>2</sup> (paper and board)*Regulatory:* FDA, BGA approved*Properties:* Deep grn. sl. cloudy liq.; emulsifiable in water; sp.gr. 1.07 (20 C); visc. low; flash pt. > 100 C; pH 3 (2%); 30% act.; cationic*Storage:* 6 mos shelf life in closed package @ 15-25 C; sensitive to freezing**Umbrellit® B 30 Mod.** [Münzing Chemie GmbH]*Chem. Descrip.:* Chromium-III-fatty acid complex*Uses:* Waterproofing agent for paper and board*Use Level:* 0.1-0.5 g/m<sup>2</sup>*Regulatory:* FDA, BGA approved*Properties:* Grn. liq.; emulsifiable in water; sp.gr. 1.15 (20 C); visc. low; flash pt. > 100 C; pH 3 (2%); 40% act.; cationic*Storage:* 6 mos shelf life in closed package @ 15-25 C; sensitive to freezing**Umbrellit® S 30** [Münzing Chemie GmbH]*Chem. Descrip.:* Chromium-III-stearate complex, alcoholic sol'n.*Uses:* For impregnation and refinement of water repellent chrome leathers; waterproofing agent for paper and board; can be used during leather mfg. and after finishing, e.g., for drum impregnation in aq. sol'n. or diluted with water and alcohol for spraying process*Use Level:* 0.1-0.5 g/m<sup>2</sup> (paper and board)*Regulatory:* BGA approved*Properties:* Deeply grn. liq.; emulsifiable in water; sp.gr. 0.97 (20 C); visc. low; flash pt. 14 C; pH 3 (2%); 30% act.; cationic*Precaution:* Highly combustible; avoid open flames and rapid heating by means of vapor or hot plates*Storage:* 6 mos shelf life in closed package @ 15-25 C; sensitive to freezing**Unicid™ 350** [Baker Petrolite]*Chem. Descrip.:* Carboxylic acid, 80%*Uses:* Adhesion promoter in adhesives; pulp/paper process defoamer; charge control additive in toner applics.; emollient in personal care prods.; plastics processing additive (antiblock, lubricant); gloss aid in polishes; lubricant in textile and latex processing applics.; chem. intermediate; long chain acid; provides controlled compat., inc. high temp. stability, improved attraction/adhesion to polar materials; low odor and volatility*Properties:* M.w. 350; dens. 0.78 g/cc; visc. 5 cP (99 C); m.p. 89 C; acid no. 115**Unicid™ 425** [Baker Petrolite]*Chem. Descrip.:* Carboxylic acid, 80%*Uses:* Adhesion promoter in adhesives; pulp/paper process defoamer; charge control additive in toner applics.; emollient in personal care prods.; plastics processing additive (antiblock, lubricant); gloss aid in polishes; lubricant in

textile and latex processing applics.; chem. intermediate; long chain acid; provides controlled compat., inc. high temp. stability, improved attraction/adhesion to polar materials; low odor and volatility

*Properties:* M.w. 425; dens. 0.78 g/cc; visc. 6.5 cP (99 C); m.p. 93 C; acid no. 94

**Unicid™ 550** [Baker Petrolite]

*Chem. Descrip.:* Carboxylic acid, 80%

*Uses:* Adhesion promoter in adhesives; pulp/paper process defoamer; charge control additive in toner applics.; emollient in personal care prods.; plastics processing additive (antiblock, lubricant); gloss aid in polishes; lubricant in textile and latex processing applics.; chem. intermediate; long chain acid; provides controlled compat., inc. high temp. stability, improved attraction/adhesion to polar materials; low odor and volatility

*Properties:* M.w. 550; dens. 0.78 g/cc; visc. 7.5 cP (99 C); m.p. 101 C; acid no. 72.5

**Unicid™ 700 Acid** [Baker Petrolite]

*Chem. Descrip.:* C40-60 acid and polyethylene

*Uses:* Adhesion promoter in adhesives; pulp/paper process defoamer; charge control additive in toner applics.; emollient in personal care prods.; plastics processing additive (antiblock, lubricant); gloss aid in polishes; lubricant in textile and latex processing applics.; chem. intermediate; long chain acid; provides controlled compat., inc. high temp. stability, improved attraction/adhesion to polar materials; low odor and volatility

*Properties:* M.w. 700; dens. 0.78 g/cc; visc. 17 cP (99 C); m.p. 110 C; acid no. 63

**Unicrepe® 315D54** [Georgia-Pacific Resins]

*Uses:* Creping aid promoting adhesion onto Yankee dryers

*Properties:* 35% solids

**Unicrepe® 457T20** [Georgia-Pacific Resins]

*Uses:* Creping aid promoting adhesion onto Yankee dryers

*Properties:* 15% solids

**Unicrepe® C77** [Georgia-Pacific Resins]

*Chem. Descrip.:* Polyamide

CAS 25038-54-4

*Uses:* Creping aid promoting adhesion onto Yankee dryers; useful at the wet end as well as sprayed on

*Properties:* Amber clear liq.; visc. 38 cps; pH 4; 15% NV; cationic

**Unidri™ 4717** [Huntsman]

*Uses:* Dewatering aid for lime mud; low foaming

*Use Level:* 0.5-2.5 lb/ton

**Unidri™ M-40** [Huntsman]

*Uses:* Mineral processing surfactant; dewatering agent for vacuum filtration of minerals; drainage aid for drainage improvement over lime mud washers in pulp/paper industry

*Properties:* Liq.; 40% act.; anionic

**Unidri™ P-0820** [Huntsman]

*Uses:* Dewatering aid for lime mud; low foaming

*Use Level:* 0.5-2.5 lb/ton

**Unihib® 905** [Lonza]

*Chem. Descrip.:* Diethylene triamine pentamethylene phosphonic acid

CAS 15827-60-8

*Uses:* Dispersant, corrosion and scale inhibitor for cooling tower, boiler treatment, oil field applics., detergents, peroxide bleach stabilization, I&I cleaners, geothermal, pulp/paper bleaching, metal finishing, flash desalination; hydrolytically stable over wide pH range and at elevated temps.

*Use Level:* 1-5 ppm (cooling water treatment, CaSO<sub>4</sub>/CaCO<sub>3</sub> scale inhibition), 10-20 ppm (cooling water treatment, corrosion inhibition), 50-75 ppm (boiler water treatment), 5-15 ppm (oil field treatment)

*Properties:* Pale yel. to amber clear low-visc. liq.; pH < 2 (1%); 60% solids

*Toxicology:* Mildly irritating to skin; mod. eye irritant

**Unilin® 425 Alcohol** [Baker Petrolite]

*Chem. Descrip.:* C20-40 alcohols

*Uses:* Modifier of PP, PVC, PE, PS, and high-performance engineering resins; antioxidant; heat stabilizer; UV stabilizer; visc. depressant; antiblock in rubbers; in adhesives for food pkg.; promotes emollient protective films onto the skin in cosmetic creams and lotions; used in hot-melt and solv.-based coatings; textile/leather lubricants and finishes; chemical intermediate; defoamer for pulp/paper processing

*Regulatory:* FDA 21CFR §175.105

*Properties:* Off-wh. prills; sol. in aliphatic and aromatic solvs.; m.w. 460; sp.gr. 0.78 (99 C); dens. 0.985 g/cc; visc. 7.8 cps (99 C); m.p. 91 C; hyd. no. 105

**Uniplex 84** [Unitex]

*Chem. Descrip.:* Acetyl tributyl citrate

CAS 77-90-7; EINECS/ELINCS 201-067-0

*Uses:* Plasticizer for indirect and direct food contact applics., PVC toys, cellulose nitrate films, aerosol hair sprays, dairy prod. cartons, drink bottle caps, food jar caps, sol'n. coatings for foil and paper; milling lubricant for aluminum foil or sheet steel for use in cans for beverage and food prods.; food pkg. adhesives, coatings, paper, cellophane; produces resins with exc. heat stability and low toxicity

*Regulatory:* FDA 21CFR §172.515, 175.105, 175.300, 175.320, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 178.3910, 181.27

*Properties:* APHA 30 max. color, essentially odorless; insol. in water; m.w. 402.5; sp.gr. 1.045-1.055; dens. 8.74 lb/gal; visc. 33 cps; b.p. 173 C (1 mm Hg); pour pt. -75 C; flash pt. (COC) 204 C; ref. index 1.441; 99% min. assay

**Uniplex 108** [Unitex]

*Chem. Descrip.:* N-Ethyl o/p-toluene sulfonamide

CAS 80-39-7; EINECS/ELINCS 201-275-1

*Uses:* Plasticizer for nylon, shellac, cellulose acetate, protein materials, PVAc adhesives (metal-to-rubber joins, bookbinding, shoe), nitrocellulose lacquers; food pkg. adhesives, coatings, paper, cellophane; makes compds. resist. to oils, solvs., and greases

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1200, 177.1210

*Properties:* APHA 200 max. clear oily liq., char. odor; m.w. 199; sp.gr. 1.184-1.187; cryst. pt. 40 C; solid. pt. 0 C; b.p. 196 C (10 mm Hg); flash pt. (COC) 345 F; ref. index 1.535-1.545; 0.1% max. moisture

**Uniplex 150** [Unitex]

*Chem. Descrip.:* Dibutyl phthalate

CAS 84-74-2; EINECS/ELINCS 201-557-4

*Uses:* Solvent/plasticizer in fingernail polish, nail polish remover, hair sprays, org. peroxide catalysts, adhesives, coatings; food pkg. adhesives, coatings, paper, cellophane, polymers; compat. with cellulose, methacrylate, PS, PVB, vinyl chloride, urea-formaldehyde, melamine-formaldehyde, phenolics

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 177.1200, 177.2430

*Properties:* APHA 25 max. clear liq., mild odor; pract. insol. in water; m.w. 278; sp.gr. 1.042; dens. 8.72 lb/gal; visc. 59 cps (32 F); f.p. -35 C; b.p. 340 C (760 mm Hg); ref. index 1.4905; 99% min. assay

**Uniplex 155** [Unitex]

*Chem. Descrip.:* Diisobutyl phthalate

CAS 84-69-5; EINECS/ELINCS 201-553-2

*Uses:* Plasticizer for thermoplastic and thermoset resins; solvent/plasticizer in cellophane, resin coated sand for foundry casting, org. peroxides; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 177.1200, 177.2510, 177.2550, 177.2600, 177.2800, 177.2910

*Properties:* APHA 25 max. clear liq., mild odor; pract. insol. in water; m.w. 278; sp.gr. 1.038-1.040; dens. 8.65 lb/gal; b.p. 327 C (760 mm Hg); 99% min. assay

**Uniplex 250** [Unitex]

*Chem. Descrip.:* Dicyclohexylphthalate

CAS 84-61-7; EINECS/ELINCS 201-545-9

*Uses:* Plasticizer for heat-seal applics. such as food wrappers/labels, pharmaceutical labels and other applics. where delayed heat-activated adhesive is required, for printing ink formulations for paper, vinyl, textiles, other substrates; food pkg. adhesives, paper, cellophane; heat-activated

*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1200

*Properties:* Wh. cryst. solid lumps or gran.; essentially odorless @ 200 C; practically insol. in water; m.w. 330; sp.gr. 1.29; m.p. 63-65 C; b.p. 60 C (10 mm Hg); pour pt. 60 C; flash pt. (COC) 405 F; 99% assay

*Precaution:* Incompat. with strong oxidizing agents

**Uniplex 260** [Unitex]

*Chem. Descrip.:* Glyceryl tribenzoate

CAS 614-33-5; EINECS/ELINCS 210-379-6

*Uses:* Polymer modifier; plasticizer for heat-seal applics., lacquers, films, in PVAc-based adhesives, cellophane coatings, nitrocellulose coatings, nail lacquer formulations, printing inks, polishes; extrusion and inj. molding processing aid; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §174.5, 175.105, 175.365, 175.380, 175.390,

176.170, 176.180, 177.1210

*Properties:* Wh. cryst. lumps or gran.; m.w. 404; sp.gr. 1.2619 (30 C); m.p. 70-73 C; ref. index 1.565-1.570 (molten, 25 C)

*Toxicology:* LD50 (rat) > 11.7 g/kg

**Uniplex 280 CG** [Unitex]

*Chem. Descrip.:* Sucrose benzoate (> 98%), o-xylene (< 2%)

CAS 12738-64-6; EINECS/ELINCS 235-795-5

*Uses:* Plasticizer, gloss aid for clear coatings for wood/paper/metal, metallic/pigmented coatings, heat-seal coatings, and inks; modifier, gloss aid for clear lacquers; exc. UV stability; provides exc. clarity, UV resist., high film hardness, good flexibility

*Regulatory:* DOT nonregulated

*Properties:* Wh. glassy noncryst. solid; clear; odorless; misc. with acetic acid, acetone, benzene, CCl<sub>4</sub>, diethyl ether, MIBK, MEK, PEG's, toluene, xylene, etc.; insol. in water, aliphatic hydrocarbons; m.w. 1110; sp.gr. 1.25; soften. pt. (B&R) 98 C; acid no. < 0.1; iodine no. < 0.01; sapon. no. 153; hyd. no. 0.9; flash pt. (TOC) 260 C; ref. index 1.577

*Toxicology:* LD50 (oral, rat) > 5 g/kg; not a primary skin/eye irritant; may cause skin irritation; inh. of mist may cause respiratory tract irritation; may cause eye irritation, pain, corneal/conjunctival ulceration; ing. may cause burning in mouth/digestive; TSCA listed

*Hazardous Decomp. Prods.:* Combustion: CO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Store at ambient temps. in well-ventilated area in closed pressure-less containers

**Uniplex 600** [Unitex]

*Chem. Descrip.:* o,p-Toluenesulfonamide-formaldehyde resin

CAS 1338-51-8; EINECS/ELINCS 215-667-5

*Uses:* Modifier and adhesion promoter for syn. and natural resins used in adhesives and coatings applics.; extender in polyamide resins; food pkg. adhesives, paper, cellophane

*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1200

*Properties:* Pract. colorless hard solid particles, faint formaldehyde odor; sol. in usual lacquer solvs.; insol. in water, aliphatic hydrocarbons, veg. oils; sp.gr. 1.35; soften. pt. 62 C; ref. index 1.4275-1.4325 (25 g/75 g butyl acetate)

**Uniq-Print® 8000** [OMNOVA Sol'ns./Paper]

*Chem. Descrip.:* Styrene acrylate

CAS 9010-92-8

*Uses:* Surf. sizing agent for photocopying and laser printing; provides exc. ink jet performance (monochrome and color) and improves toner adhesion

*Properties:* Dens. 8.6 lb/gal; pH 8.5; 40% total solids

**Unisize® HA-25** [Celanese GmbH]

*Chem. Descrip.:* Polyvinyl alcohol, tackified

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Used for specialty paper applics.

**Unisize® HA-26** [Celanese GmbH]

*Chem. Descrip.:* Polyvinyl alcohol (Airvol 125) and boric acid

*Uses:* Tackified grade for paper/paperboard applics.; derived from super hydrolyzed grades; controlled gelation as the sol'n. begins to inc. in solids after applic. to paper surf.; superior surf. filming

*Properties:* Visc. 35-65 cps (5% aq.); pH 4.0-4.7 (5% aq.)

**Unisize® HA-70** [Celanese GmbH]

*Chem. Descrip.:* Polyvinyl alcohol (Airvol 165) and boric acid

*Uses:* Tackified grade for specialty paper applics.; derived from super hydrolyzed grades; controlled gelation as the sol'n. begins to inc. in solids after applic. to paper surf.; superior surf. filming

*Properties:* Visc. 80-155 cps (5% aq.); pH 3.9-4.6 (5% aq.)

**Unisoft® Yankee Dryer Coating** [Hercules]

*Uses:* Yankee dryer coating for softer and thicker coatings, and controlled and high adhesion in high-speed Yankee dryers

**Unisperse®** [Ciba Spec. Chems./Paper]

*Chem. Descrip.:* Org. pigment

*Uses:* Pigment for paper coloration

**Uni-Tac® 70** [Int'l. Paper]

*Chem. Descrip.:* Noncrystallizing stabilized rosin

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Tackifier for SBR, natural rubber, butyl rubber, ethylene-vinyl acetate and other polymers, water and solv.-based construction adhesives, pressure-sensitive, sealant, hot melt and rubber compding.; food pkg. adhesives, rubber articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600

*Properties:* Gardner 9 flakes, solid, or sol'n.; sol. in aromatic, aliphatic, and chlorinated solvs.; sol. ≥ 50% in ethanol, propanol, IPA; insol. in water; dens. 8.8 lb/gal; visc. (Gardner) Z (75% in min. spirits); soften. pt. (R&B) 80 C; acid no. 140; flas

**Unithox® 420** [Baker Petrolite]

*Chem. Descrip.:* C20-40 pareth-3

*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; provides silky lubricating feel, superior film-forming chars.; for coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics

*Properties:* Sol. in min. oil, butyl Cellosolve, xylene, toluene, MEK, perchloroethylene; sol. hazy in Stod., VM&P naphtha, kerosene; disp. in water, ethanol, IPA; m.w. 560; m.p. 91 C; HLB 4; hyd. no. 85; flash pt. 204 C; Ross-Miles foam 20 mm (initial, 50 C, 0.1%); nonionic

**Unithox® 450** [Baker Petrolite]

*Chem. Descrip.:* C20-40 pareth-10

*Uses:* PU mold release agent; metalworking additive; o/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; dispersant, compatibilizer for rubbers; provides silky lubricating feel, superior film-forming chars.; also for coatings, pulp/paper processing, textiles

*Properties:* Solid; sol. in min. oil, cyclohexane, butyl Cellosolve, xylene, toluene, MEK, perchloroethylene; sol. hazy in Stod., VM&P naphtha, kerosene, ethanol, IPA; disp. in water, ethylene glycol; m.w. 900; m.p. 91 C; HLB 10; hyd. no. 55; flash pt. 218 C; surf. tens. 45 dynes/cm (0.01% aq.); Ross-Miles foam 25 mm (initial, 50 C, 0.1%); 50% EO; nonionic

**Unithox® 480** [Baker Petrolite]

*Chem. Descrip.:* C20-40 pareth-40

*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; provides silky lubricating feel, superior film-forming chars.; also for coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics; dispersant, compatibilizer for rubbers

*Properties:* Sol. in min. oil, cyclohexane, ethylene glycol, butyl Cellosolve, xylene, toluene, MEK, perchloroethylene, ethyl acetate; sol. cloudy in Stod., VM&P naphtha, kerosene, ethanol, IPA; m.w. 2250; m.p. 86 C; HLB 16; hyd. no. 22; flash pt. 218 C; surf. tens. 52 dynes/cm (0.01% aq.); Ross-Miles foam 28 mm (initial, 50 C, 0.1%); nonionic

**Unithox® 520** [Baker Petrolite]

*Chem. Descrip.:* C30-50 pareth-3

*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; provides silky lubricating feel, superior film-forming chars.; also for coatings, metalworking fluids, pulp/paper processing, textiles; mold releases for plastics

*Properties:* M.w. 700; m.p. 99 C; HLB 4; hyd. no. 67; flash pt. 232 C; Ross-Miles foam 15 mm (initial, 50 C, 0.1%); nonionic

**Unithox® 550** [Baker Petrolite]

*Chem. Descrip.:* C30-50 pareth-10

*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; provides silky lubricating feel, superior film-forming chars.; also for coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics

*Properties:* M.w. 1100; m.p. 99 C; HLB 10; hyd. no. 41; flash pt. 232 C; surf. tens. 47 dynes/cm (0.01% aq.); Ross-Miles foam 26 mm (initial, 50 C, 0.1%); nonionic

**Unithox® 720** [Baker Petrolite]

*Chem. Descrip.:* C40-60 pareth-3

*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; provides silky lubricating feel, superior film-forming chars.; also for coatings, metalworking fluids, pulp/paper processing, textiles; mold releases for plastics

*Properties:* M.w. 875; m.p. 106 C; HLB 4; hyd. no. 52; flash pt. 232 C; Ross-Miles foam 15 mm (initial, 50 C, 0.1%); nonionic

**Unithox® 750** [Baker Petrolite]

*Chem. Descrip.:* C40-60 pareth-10

*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; provides silky lubricating feel, superior film-forming chars.; also for coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics

*Properties:* M.w. 1400; m.p. 106 C; HLB 10; hyd. no. 33; flash pt. 232 C; surf. tens. 53 dynes/cm (0.01% aq.); Ross-Miles foam 22 mm (initial, 50 C, 0.1%); nonionic

**Upaco® 2956** [Worthen Ind.]

*Chem. Descrip.:* Aliphatic polyester PU/acrylic resin in NMP

*Uses:* Adhesive polymer for wood floor coatings, fabric coatings, ink/paint vehicles, polyolefin adhesives, tiecoats/primers for low energy substrates, vinyl topcoating, and paper coatings; low VOC; water/chem. resist.; non-yellowing; tough, durable

*Properties:* Mild, pleasant odor; sol. in NMP; dens. 8.92 lb/gal; tens. str. 5800 psi; elong. 425%; pH 7.5-8.0; VOC 3%; 50% solids

**Upaco® 5430** [Worthen Ind.]

*Chem. Descrip.:* Aromatic polyether PU resin in water

*Uses:* Film, paper, and foil adhesive

*Properties:* Dens. 8.7 lb/gal; tens. str. 3000 psi (dried 7 days @ 49 C); elong. 500% (dried 7 days @ 49 C); pH 7.0-8.0; VOC zero; 38-42% solids

**USG® Paper Filler #1** [U.S. Gypsum]

*Chem. Descrip.:* Calcium sulfate anhyd.

CAS 7778-18-9; EINECS/ELINCS 231-900-3

*Uses:* Filler for addition to furnish of fine paper as a replacement for TiO<sub>2</sub>, bleached clay, and precipitated and fine ground CaCO<sub>3</sub> for providing good paper brightness; lower abrasiveness causes less wear on paper machine; most effective in paper mills with closed-in water systems that produce neutral to alkaline paper

*Properties:* Extremely wh. powd.; 97.5% th54ru 325 mesh; 7 μ avg. particle size; sp.gr. 2.96; oil absorp. 26 cc/100 g; brightness (GE) 95; ref. index 1.58; pH 10.4 (10% slurry)

**Utec® 3040** [Polialden Petroquimica SA]

*Chem. Descrip.:* UHMW polyethylene

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* High performance resin for use in engineering applics. such as coal industry and mining (linings, mixers, scrappers, bearing brushes, pipes),

chem. industry (pipes, pumps, valves, etc.); food and beverage industry (packing line guides, filling nozzles, pumps), pulp/paper (covers for suction boxes, rules), textiles (bumpers, guides, roll bearings), battery separators, sports, surgical goods, orthopedics; impact, chem., and abrasion resist.; self-lubricating

*Properties:* Nat. color; 120-220 μm av. particle size; sp.gr. > 0.93; bulk dens. > 0.4 g/cm<sup>3</sup>; water absorp. 0.01%; m.p. 133 C; tens. str. 25 MPa @ yield, 35 MPa @ break; ultimate elong. > 300%; impact str. (Charpy) > 170 kJ/m<sup>2</sup>; hardness (Shore D) 63; soften pt. (Vicat) 128 C; distort. temp. 79 C @ 0.45 MN/m<sup>2</sup>; sp. heat 0.48 cal/g C; dielec. str. 900 kV/cm; dielec. constant 2.3 (10<sup>6</sup> cps); vol. resist. > 10<sup>16</sup> ohm-cm

**Utec® 6540** [Polialden Petroquimica SA]

*Chem. Descrip.:* UHMW polyethylene

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* High performance resin for use in engineering applics. such as coal industry and mining (linings, mixers, scrappers, bearing brushes, pipes), chem. industry (pipes, pumps, valves, etc.); food and beverage industry (packing line guides, filling nozzles, pumps), pulp/paper (covers for suction boxes, rules), textiles (bumpers, guides, roll bearings), battery separators, sports, surgical goods, orthopedics; impact, chem., and abrasion resist.; self-lubricating

*Properties:* Nat. color; 120-220 μm av. particle size; sp.gr. > 0.93; bulk dens. ≥ 0.4 g/cm<sup>3</sup>; visc. m.w. > 6.0 x 10<sup>6</sup> g/mol; water absorp. 0.01%; m.p. 133 C; tens. str. 25 MPa @ yield, 35 MPa @ break; ultimate elong. ≥ 300%; impact str. (Charpy) > 80 kJ/m<sup>2</sup>; hardness (Shore D) 63; soften pt. (Vicat) 128 C; distort. temp. 79 C @ 0.45 MN/m<sup>2</sup>; sp. heat 0.48 cal/g C; dielec. str. 900 kV/cm; dielec. constant 2.3 (10<sup>6</sup> cps); vol. resist. > 10<sup>16</sup> ohm-cm

# V

## Valtac 56 [Air Prods./Polymers]

*Chem. Descrip.:* Water-based acrylic emulsion

*Uses:* Pressure-sensitive adhesive for mastic and tile adhesives, protective films and paper; tolerates high loadings with fillers and tackified resins; may be used to improve shear and thermal resist. of pressure sensitive adhesives

*Properties:* Visc. 100 cps (77 F); pH 4.5; 50 ± 1% solids

## Valtac F-66 [Air Prods./Polymers]

*Chem. Descrip.:* Water-based acrylic emulsion

*Uses:* Pressure-sensitive adhesive for freezer grade paper labels or low temp. tapes; nondiscoloring; esp. useful for clear labels or over-laminating films

*Properties:* Visc. 300 cps (77 F); pH 4.0 ± 1.0; 55 ± 1% solids

## Vancide® 51 [R.T. Vanderbilt]

*Chem. Descrip.:* Sodium dimethyldithiocarbamate (27.6%) and sodium 2-mercaptobenzothiazole (2.4%) in water

*Uses:* Fungicide for use as a preservative in latex and starch paste, adhesives; bactericide for sol. cutting fluids and coolants; paper mill slimicide; fungicide in petrol. storage tanks, recirculating cooling towers, paper and paperboard, cotton fabric; no ozone-depleting substances

*Regulatory:* EPA reg. no. 1965-8

*Properties:* Pale yel.-grn. liq.; sol. in water, acetone, alcohol; sp.gr. 1.15 ± 0.02; dens. 9.6 lb/gal; VOC 0%; nonflamm.; 30% in water

*Toxicology:* LD50 (oral, rat) 3929 mg/kg, (dermal, rabbit) > 2000 mg/kg; LC50 (inh., rat) > 2.05 mg/l; mild eye irritant; sl. skin irritant; not a skin sensitizer; may be harmful if swallowed or inhaled; may irritant nose and throat; TSCA listed

*Environmental:* Toxic to fish; do not discharge effluent into lakes, streams, ponds, sewer systems, etc.

*Storage:* Store in cool, dry place; prevent from freezing

## Vancide® MZ-96 [R.T. Vanderbilt]

*Chem. Descrip.:* Zinc dimethyldithiocarbamate

CAS 137-30-4; EINECS/ELINCS 205-288-3

*Uses:* Antimicrobial, preservative for starch and syn. latex adhesives, food pkg. adhesives; mold inhibitor for unmodified latex paints; fungicide in neoprene compositions; no ozone-depleting substances

*Regulatory:* EPA reg. no. 1965-79; FIFRA registered

*Properties:* Wh. powd.; mod. sol. in dilute caustic, toluene, carbon disulfide, chloroform; water-disp.; m.w. 305.82; dens. 1.71 ± 0.03 mg/m<sup>3</sup>; m.p. 252-260 C; 96% assay

*Toxicology:* LD50 (oral, rat) 320 mg/kg, (dermal, rabbit) > 2000 mg/kg; corrosive; causes eye and skin damage; harmful or fatal if swallowed; may be fatal if inhaled; TSCA listed

*Environmental:* Toxic to fish; do not apply directly to water

*Storage:* May be stored indefinitely at R.T. in closed containers; store in cool, dry place

## Vancide® MZ-96 Disp. [R.T. Vanderbilt]

*Chem. Descrip.:* Zinc dimethyldithiocarbamate (50%), inert ingreds. (50%)

CAS 137-30-4; EINECS/ELINCS 205-288-3

*Uses:* Mold inhibitor in latex paints, paperboard, soap wraps; does not discolor during exposure in sulfide atm.; no ozone-depleting substances

*Use Level:* 2-6% (exterior latex paints)

*Regulatory:* EPA reg. no. 1965-87

*Properties:* Wh. aq. disp.; misc. with water; m.w. 305.8; sp.gr. 1.28; dens. 10.66 lb/gal; m.p. 240-246 C

*Toxicology:* LD50 (oral, rat) > 1500 mg/kg, (skin, rabbit) > 2000 mg/kg; LC50 (inh., rat) 0.030 mg/l; corrosive; fatal if inhaled; causes irreversible eye damage; harmful if swallowed or absorbed thru skin; not a skin sensitizer

*Environmental:* Toxic to fish; do not apply directly to water

*Precaution:* Not for use in formulations contng. metallic drier; water run-off from copper flashing may discolor light-shaded paint; keep away from sparks and fire

*Storage:* Unlimited storage tightly closed @ R.T.; keep from freezing; may thicken and settle on standing, stir until disp. reverts to water-thin liq.

## Vancryl® 600 [Air Prods./Polymers]

*Chem. Descrip.:* Ethylene vinyl chloride emulsion

*Uses:* Water-based graphic arts polymer for high gloss coatings; food-contact paper/paperboard; alkali and corrosion resist.; low MVTR

*Regulatory:* FDA 21CFR § 176.170, 176.180

*Properties:* Emulsion; dens. 9.3 lb/gal; visc. 100 cps; surf. tens. 39 dynes/cm; acid no. < 10; pH 8.0; VOC < 0.5%; 50% NV

## Vancryl® 605 [Air Prods./Polymers]

*Chem. Descrip.:* Ethylene vinyl chloride emulsion

*Uses:* Water-based graphic arts polymer for high gloss coatings; food-contact paper/paperboard; alkali and corrosion resist.; low MVTR

*Regulatory:* FDA 21CFR § 176.170, 176.180

*Properties:* Emulsion; dens. 9.3 lb/gal; visc. 100 cps; surf. tens. 39 dynes/cm; acid no. < 10; pH 8.0; VOC < 0.5%; 50% NV

## Vancryl® 610 [Air Prods./Polymers]

*Chem. Descrip.:* Ethylene vinyl chloride emulsion

*Uses:* Water-based graphic arts polymer for high gloss coatings; food-contact paper/paperboard; alkali and corrosion resist.; low MVTR

*Regulatory:* FDA 21CFR § 176.170, 176.180

*Properties:* Emulsion; dens. 9.4 lb/gal; visc. 100 cps; surf. tens. 39 dynes/cm; acid no. < 10; pH 8.0; VOC < 0.5%; 50% NV

## Vancryl® 650 [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate aq. emulsion

CAS 9003-20-7

*Uses:* Graphic arts polymer for press-applied paper coatings; high gloss; high scrub; good high shear rheology

*Properties:* Emulsion; dens. 8.8 lb/gal; visc. 425 cps; pH 5.5; VOC < 0.5%; 55% NV

## Vandrox® 184 [R.T. Vanderbilt]

*Chem. Descrip.:* Crosslinked carboxymethyl corn starch

*Uses:* Visc. builder, rheology modifier, water retention aid for paper coatings; carboxymethyl cellulose replacement

*Properties:* Flake or powd.

## Vandrox® 185F [R.T. Vanderbilt]

*Chem. Descrip.:* Highly crosslinked sodium carboxymethyl corn starch

*Uses:* Visc. builder, water retention aid for paper coatings; calender coating to control curl in recycled paperboard; CMC replacement

*Properties:* Cream flake; sol. in water; visc. 1900-2900 cps (5% gel); pH 10.9-11.3 (5% gel); 5-10% moisture

## Vandrox® 186 [R.T. Vanderbilt]

*Chem. Descrip.:* Crosslinked carboxymethyl potato starch ether

*Uses:* Visc. builder, water retention aid for paper coatings; pigment grinding aid, dispersant for hard-to-disperse materials such as pearlescent mica

*Properties:* Flake

## Van Gel® B [R.T. Vanderbilt]

*Chem. Descrip.:* Colloidal magnesium aluminum silicate (smectite)

*Chem. Analysis:* Moisture (< 8%)

CAS 12199-37-0; EINECS/ELINCS 235-374-6

*Uses:* Suspending agent, thickener and emulsion/visc. stabilizer for aq. systems, industrial, household/institutional, and agric. uses requiring good color (auto polish, hard surf. cleaners, oven/grill cleaners, aq. paint strippers); thixotrope, flow aid, leveling agent for coatings; with associative thickeners, does not lower gloss of semigloss latex paints; filler in rubber compding.; suspending agent, visc. modifier for paper coatings; promotes uniform consistency, good flow and brushing chars., dripless applic. and leveling without sag; no ODP

*Use Level:* 0.15-.30 phr

*Properties:* Off-wh. small flakes, odorless; dens.  $2.60 \pm 0.03$  mg/m<sup>3</sup>; visc. 300-900 cps (4% aq. disp.); pH 8.5-9.5 (4% aq. disp.)

*Toxicology:* TSCA listed

#### Vantac® 6H [R.T. Vanderbilt]

*Chem. Descrip.:* Talc (hydrous magnesium silicate)

*Chem. Analysis:* SiO<sub>2</sub> (61.8%), MgO (31.3%), Fe<sub>2</sub>O<sub>3</sub> (1.3%)

CAS 14807-96-6; EINECS/ELINCS 238-877-9

*Uses:* Reinforcing filler/extender/pigment for rubber applics.; pigment, gloss control agent for coatings; TiO<sub>2</sub> extender, opacity and brightness aid at wet end in papermaking, coated paper base sheets, uncoated bond papers; food-contact coatings, closures with sealing gaskets for food containers; high purity, hydrophobicity, brightness and oil absorp.; mixes quickly into elastomers, gives low moisture pickup in vulcanizates; useful in industrial coatings where film smoothness and pigment suspension are important; no ozone-depleting substances

*Regulatory:* FDA 21CFR §175.300, 177.1210, 182.90

*Properties:* Wh. powd.; 2.0 µm median particle size; 99.9% < 325 mesh; dens. 2.7 mg/m<sup>3</sup>; bulk dens. 14 lb/ft<sup>3</sup> (compacted); oil absorp. 52; brightness 87; pH 9.6 (10% aq. slurry)

*Toxicology:* TSCA listed

#### Vanzak® 112 [R.T. Vanderbilt]

*Chem. Descrip.:* Surfactant blend

*Uses:* Pitch control agent to keep pitch from agglomerating and depositing on surfs. in the pulp mill

*Use Level:* 0.1-1.0 lb/ton pulp

*Properties:* APHA 75 max. clear liq.; dens. 0.993 mg/m<sup>3</sup>; cloud pt. 35-40 C (1% aq.); pH 5.5-7.5 (1%); 0.5% max. water; nonionic

*Environmental:* Fully biodeg.

#### Vanzak® 165 [R.T. Vanderbilt]

*Chem. Descrip.:* Surfactant blend

*Uses:* Pitch control agent to keep pitch from agglomerating and depositing on surfs. in the pulp mill

*Use Level:* 0.1-1.0 lb/ton pulp

*Properties:* Nonionic

#### Vanzyme® 191 [R.T. Vanderbilt]

*Chem. Descrip.:* Alpha amylase

CAS 9000-90-2; EINECS/ELINCS 232-565-6

*Uses:* Starch-converting enzyme for papermaking, wastewater treatment; 70,000 Liquifons/g activity; effective in continuous conversion systems; can improve turbidity by speeding up pigment settling

*Properties:* Liq.

*Storage:* Good shelf stability

#### Vanzyme® Powd. [R.T. Vanderbilt]

*Chem. Descrip.:* Alpha amylase

CAS 9000-90-2; EINECS/ELINCS 232-565-6

*Uses:* Starch-converting enzyme for papermaking; useful in batch conversion of size press or coating starch; liquefies starch by hydrolyzing random α-D (1-4) glucosidic bonds

*Properties:* Lt. tan powd.; pH 5.5 (1%)

*Storage:* 6-12 mos storage life @ 5 C, 3 mos @ 25 C

#### Varicid BCD [Schilling-Chemie]

*Chem. Descrip.:* Contains organically bound bromine

*Uses:* Disinfectant used to prevent the development of algae, fungi, slime, and legionella in industrial water systems and decorative fountains for paper, sugar, and food industries; highly effective; requires very low dosing; removes microbiological deposits quickly and safely; effective in pH range of 6.0-9.5; nonfoaming

*Use Level:* 1-5 mg/l of system water (shot dosage), 1-4 mg/l (permanent dosage)

*Regulatory:* US Dept. of Health approved; complies with German water laws

*Properties:* Wh. solid tablet; sol. 0.17% in water (20 C); sp.gr.  $0.96 \pm 0.01$

g/cm<sup>3</sup> (20 C); pH  $6.5 \pm 0.5$  (0.1%)

*Toxicology:* LD50 5000 mg/kg; suitable for use in paper, sugar, and food industry

#### Varonic® K-210 [Goldschmidt]

*Chem. Descrip.:* PEG-10 cocamine

CAS 61791-14-8

*Uses:* Dye leveling agent, dispersant in hair dyes, paper industry; coemulsifier and stabilizer for cosmetic emulsions; neutralizer; plasticizer; antistat for acidic systems; wetting agent, spreading agent, and emulsifier in insecticides and herbicides; tanning of leather and furs; wetting agent, redeposition aid in fur treating

*Properties:* Gardner 7 liq.; sol. in water, IPA, benzene, CCl<sub>4</sub>; sp.gr. 0.995; HLB 13.8; 99% solids; nonionic

#### Vazo® 56 WSP [DuPont]

*Chem. Descrip.:* Azo

*Uses:* Initiator for superabsorbent polymers (diapers, incontinence pads, feminine hygiene pads), pulp/paper (filler retention aids, flocculants, coagulants, dry str. additives, drainage aids, paper coatings, binders), water treatment (flocculants, coagulants), textiles (warp sizes), adhesives, pharmaceuticals (binders, thickeners, controlled-release tablets), personal care (hair fixatives), aq. printing inks, detergents (cobuilders with zeolites)

*Properties:* Wh. dry powd.; sol. in water

#### Vazo® 56 WSW [DuPont]

*Chem. Descrip.:* Azo initiator contg. polyethylene glycol to minimize dusting

*Uses:* Initiator for superabsorbent polymers (diapers, incontinence pads, feminine hygiene pads), pulp/paper (filler retention aids, flocculants, coagulants, dry str. additives, drainage aids, paper coatings, binders), water treatment (flocculants, coagulants), textiles (warp sizes), adhesives, pharmaceuticals (binders, thickeners, controlled-release tablets), personal care (hair fixatives), aq. printing inks, detergents (cobuilders with zeolites)

*Properties:* Wh. wet powd.; sol. in water

#### Vazo® 68 WSP [DuPont]

*Chem. Descrip.:* Azo

*Uses:* Initiator for superabsorbent polymers (diapers, incontinence pads, feminine hygiene pads), pulp/paper (filler retention aids, flocculants, coagulants, dry str. additives, drainage aids, paper coatings, binders), water treatment (flocculants, coagulants), textiles (warp sizes), adhesives, pharmaceuticals (binders, thickeners, controlled-release tablets), personal care (hair fixatives), aq. printing inks, detergents (cobuilders with zeolites)

*Properties:* Wh. dry powd.; sol. in water

#### V-Cap™/RC [ISP]

*Chem. Descrip.:* N-Vinyl-2-caprolactam

CAS 2235-00-9; EINECS/ELINCS 218-787-6

*Uses:* Reactive diluent for free radical radiation-curable coatings, inks, and adhesives for flooring, paper, wood, particle board, plastics, textiles, and vinyl

*Properties:* Cryst. solid; m.w. 139; sp.gr. 1.01 (40 C); visc. 3.51 (40 C); vapor pressure < 0.1 mm (20 C); f.p. 34 C; m.p. 35 C; b.p. 116 C (@ 10 mm); readily supercools: 98% assay

*Toxicology:* LD50 (oral, rat) 830-1114 mg/kg, (skin, rabbit) 1.7 g/kg; mod. eye irritant; min. skin irritant

*Storage:* Store @ R.T.; yellowing will result with prolonged storage @ elevated temps.

#### Veegum® T [R.T. Vanderbilt]

*Chem. Descrip.:* Magnesium aluminum silicate, tech. grade

CAS 12199-37-0; EINECS/ELINCS 235-374-6

*Uses:* Thickener, visc. modifier, emulsion stabilizer for industrial use; pigment dispersant; antisetling agent; bodying agent; thixotrope which produces latex paints with dripless applic. and leveling, sag resist.; suspending agent and visc. modifier for paper coatings; inorg.; not subject to attack by microorganisms; no ozone-depleting substances

*Properties:* Near wh. flakes, odorless, tasteless; insol. in water or alcohol; swells to many times original vol. in water to form colloidal disp.; dens. 2.8 mg/m<sup>3</sup>; visc. 250-800 cps (4% disp.); pH 9.5 (5% aq.); < 8% moisture

#### Vernoa™ Basic Black S Liq. [Bayer/Industrial Chems.]

*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers

*Properties:* Liq.

#### Verona™ Basic Blue GE Liq. [Bayer/Industrial Chems.]

*Uses:* Very brilliant blue basic dyestuff for papers (sized, acid, publication/directory/newsprint), and for tinting wh. papers; poor lightfastness; partially bleachable in hypochlorite; good affinity for clay fillers

- Properties:* Liq.; misc. in acidified water; dens. 8.9 lb/gal; visc. < 200 cps; pH 1.5
- Vernoa™ Basic Blue GS Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Verona™ Basic Blue R Liq.** [Bayer/Industrial Chems.]  
*Uses:* Very brilliant blue basic dyestuff for papers (sized, acid, publication/directory/newsprint) and for tinting wh. papers; poor lightfastness; partially bleachable in hypochlorite; very good affinity for clay fillers  
*Properties:* Liq.; misc. in acidified water; dens. 9.4 lb/gal; visc. < 400 cps; pH 2.0
- Vernoa™ Basic Blue RFK Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Vernoa™ Basic Brown Y Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Verona™ Basic Green M Liq.** [Bayer/Industrial Chems.]  
*Uses:* Very brilliant green basic dyestuff for papers (sized, acid, publication/directory/newsprint/decorative), suitable for coloration of all lignin pulps; poor lightfastness; partially bleachable in hypochlorite; very good affinity for clay fillers  
*Properties:* Liq.; misc. in acidified water; dens. 9.7 lb/gal; visc. < 300 cps; pH 1.0
- Verona™ Basic Green M Powd.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Powd.
- Verona™ Basic Orange G Liq.** [Bayer/Industrial Chems.]  
*Uses:* Extremely brilliant orange basic dyestuff for papers (sized, acid); poor lightfastness; pract. bleachable in hypochlorite; good affinity for clay fillers  
*Properties:* Liq.; misc. in acidified water; dens. 9.4 lb/gal; visc. < 100 cps; pH 3.0
- Vernoa™ Basic Red 4B Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Vernoa™ Basic Red 4G Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Verona™ Basic Red P Liq.** [Bayer/Industrial Chems.]  
*Uses:* Very brilliant blue-shade red basic dyestuff for papers (sized, acid, publication/directory/newsprint) and for tinting wh. papers; fair lightfastness; bleachable in hypochlorite; good affinity for clay fillers  
*Properties:* Liq.; misc. in acidified water; dens. 9.1 lb/gal; visc. < 150 cps; pH 3.0
- Vernoa™ Basic Violet 2B Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Verona™ Basic Violet M Liq.** [Bayer/Industrial Chems.]  
*Uses:* Very brilliant blue basic dyestuff for papers (sized, acid, publication/directory/newsprint) and for tinting wh. papers; poor lightfastness; partially bleachable in hypochlorite; very good affinity for clay fillers  
*Properties:* Liq.; misc. in acidified water; dens. 9.3 lb/gal; visc. < 200 cps; pH 1.5
- Verona™ Basic Yellow 4GN Liq. 125** [Bayer/Industrial Chems.]  
*Uses:* Brilliant grnsh.-shade yel. basic dyestuff for papers (lignin pulp grades: newsprint, directory, publication); economical; poor lightfastness; partially bleachable in sodium hydrosulfite; good/exc. affinity for kaolin clay and CaCO<sub>3</sub> fillers  
*Properties:* Liq.; misc. in water (may require acidification); sp.gr. 1.1; visc. < 100 cps; pH 2.0-2.5
- Vernoa™ Basic Yellow 7GLL Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Vernoa™ Basic Yellow 10G Liq.** [Bayer/Industrial Chems.]  
*Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Uses:* Colorant for dyeing ligneous pulps, wood-contg. printing papers and newsprint papers  
*Properties:* Liq.
- Versene 100** [Dow; Dow Europe]  
*Chem. Descrip.:* Tetrasodium EDTA  
CAS 64-02-8; EINECS/ELINCS 200-573-9  
*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; for control of common heavy metal ions to pH 12, iron to pH 8, water hardness ions above pH 6  
*Properties:* Lt. straw-colored liq.; m.w. 1.290-1.325; dens. 10.9 lb/gal; pH 11.0-11.8 (1% aq.); chel. value 102; 39% act.
- Versene 100 EP** [Dow Europe]  
*Chem. Descrip.:* Tetrasodium EDTA  
CAS 64-02-8; EINECS/ELINCS 200-573-9  
*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, foods, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; high purity version of Versene 100  
*Properties:* Liq.
- Versene 100 LS** [Dow]  
*Chem. Descrip.:* Tetrasodium EDTA  
CAS 64-02-8; EINECS/ELINCS 200-573-9  
*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, foods, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; low solids grade used in aerosols  
*Properties:* Liq.
- Versene 100 SRG** [Dow]  
*Chem. Descrip.:* Tetrasodium EDTA  
CAS 64-02-8; EINECS/ELINCS 200-573-9  
*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, foods; polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; syn. tire rubber grade; pH adjusted  
*Properties:* Liq.
- Versene 100 XL** [Dow]  
*Chem. Descrip.:* Tetrasodium EDTA  
CAS 64-02-8; EINECS/ELINCS 200-573-9  
*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, foods, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; low NTA version of Versene 100  
*Properties:* Clear liq.; m.w. 380; sp.gr. 1.255-1.290; bulk dens. 10.5 lb/gal; pH 11.0-11.8 (1% aq.); chel. value 100; 38% min. act.
- Versene 220** [Dow]  
*Chem. Descrip.:* Tetrasodium EDTA tetrahydrate  
CAS 64-02-8; EINECS/ELINCS 200-573-9  
*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; high purity, crystal form of Versene 100  
*Properties:* Wh. cryst.; m.w. 452; dens. 45 lb/ft<sup>3</sup>; pH 10.5-11.5 (1% aq.); chel. value 219; 99% act.
- Versene Acid** [Dow]  
*Chem. Descrip.:* EDTA  
CAS 60-00-4; EINECS/ELINCS 200-449-4  
*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; intermediate for prep. of other salt forms of EDTA  
*Properties:* Wh. powd.; m.w. 292; dens. 54 lb/ft<sup>3</sup>; pH 2.5-3.0 (sat. aq. sol'n.); chel. value 339; 99% act.
- Versene CA** [Dow]

*Chem. Descrip.:* Calcium-disodium EDTA  
CAS 62-33-9; EINECS/ELINCS 200-529-9

*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, foods, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; high purity direct food additive preventing metal catalyzed oxidative breakdown; also for medical and pharmaceutical preps.

*Regulatory:* FCC, USP, and kosher compliance

*Properties:* Wh. powd.; m.w. 410; dens. 40 lb/ft<sup>3</sup>; pH 6.5-7.5 (1%); 97-102% act.

#### Versene Diammonium EDTA [Dow]

*Chem. Descrip.:* Diammonium EDTA  
CAS 20824-56-0; EINECS/ELINCS 244-063-4

*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; used when very sol. chelates are required or where sodium ions are undesirable

*Properties:* Lt. straw-colored liq.; m.w. 326; sp.gr. 1.19-1.22; dens. 10.0 lb/gal; pH 4.6-5.2; chel. value 137; 44.6% act.

#### Versene NA [Dow]

*Chem. Descrip.:* Disodium EDTA dihydrate USP, FCC  
CAS 6381-92-6; EINECS/ELINCS 205-358-3

*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, foods, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; high purity direct food additive preventing metal catalyzed oxidative breakdown; also for medical and pharmaceutical preps.

*Regulatory:* FCC, USP, and Kosher compliance

*Properties:* Wh. cryst.; m.w. 372; dens. 67 lb/ft<sup>3</sup>; pH 4.3-4.7 (1%); chel. value 267; 99% act.

#### Versene Tetraammonium EDTA [Dow]

*Chem. Descrip.:* Tetraammonium EDTA

*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; used when very sol. chelates are required or where sodium ions are undesirable; for chelation of iron to pH 9.5

*Properties:* Lt. straw-colored liq.; m.w. 360; sp.gr. 1.16-1.19; dens. 9.7 lb/gal; pH 9.0-9.5; chel. value 130; 46.8% act.

#### Versenex 80 [Dow]

*Chem. Descrip.:* Pentasodium DTPA  
CAS 140-01-2; EINECS/ELINCS 205-391-3

*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; used when oxidative conditions exist or when chelates of greater stability are required

*Properties:* Lt. straw-colored liq.; m.w. 503; sp.gr. 1.28-1.32; dens. 10.8 lb/gal; pH 11.0-11.8 (1% aq.); chel. value 80; 40.2% act.

#### Versenol 120 [Dow]

*Chem. Descrip.:* Trisodium HEDTA  
CAS 139-89-9; EINECS/ELINCS 205-381-9

*Uses:* Chelating agent controlling trace metal ions to improve lathering and stability of personal care prods., pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copperplating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning and protection; for iron control to pH 10.5

*Properties:* Lt. straw-colored liq.; m.w. 344; sp.gr. 1.26-1.31; dens. 10.7 lb/gal; pH 11.0-11.8 (1% aq.); chel. value 120; 41.3% act.

#### Vestolen® A5016 [DSM Polyethylenes]

*Chem. Descrip.:* HDPE  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Used for coating photographic paper (offers good rheological properties, adheres well to substrate, and meets requirements of max. purity); narrow m.w. distribution; used for the prod. of lay-flat film about 15 µm thick for print-carrying substrates

*Properties:* Melt. flow 7 g/10 min; m.w. 52,000; dens. 0.950 g/cc; visc. (No. J) 145; m.p. 128-132 C; Vicat/A soften. pt. 124 C; tens. str. 25 MPa (yield); tens. elong. 600% (break); Izod impact 60 J/m notch; Ball indent. hardness 44 MPa; distort. temp. 44 C; dielec. str. 80 kV/mm; vol. resist. > 10<sup>10</sup> ohm-cm.

#### Vestowax® AO 1535 [Creanova]

*Chem. Descrip.:* Oxidized polyethylene wax  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Lubricant for PVC, PS; melting agent, water repellent, thixotrope, and antisetling agent for paints; textile and paper auxiliary; citrus fruit coating; corrosion inhibitor; dry-bright emulsion polish/preservative agent

*Properties:* Wh. pellets/powd.; sp.gr. 0.96 (23 C); visc. < 130 mPa·s (120 C); acid no. 16-19; sapon. no. 30-40; penetration no. 1-3; Mettler drop pt. 106-114 C max.

#### Vestowax® AO 1539 [Creanova]

*Chem. Descrip.:* Oxidized polyethylene wax  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Lubricant for PVC, PS; melting agent, water repellent for paints; processing aid for polyester; textile and paper auxiliary; abrasion-resist. printing ink emulsions; dry-bright/mixed saponified emulsion polish/preservative agent

*Properties:* Wh. pellets/powd.; sp.gr. 0.96 (23 C); visc. < 130 mPa·s (120 C); acid no. 20-25; sapon. no. 38-45; penetration no. 2-3; Mettler drop pt. 106-110 C max.

#### Vestowax® AO 2733 [Creanova]

*Chem. Descrip.:* Polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Lubricant for PVC, PS; melting agent, water repellent, thixotrope, and antisetling agent for paints; textile and paper auxiliary; citrus fruit coating; corrosion inhibitor

*Properties:* Nearly wh. pellets/powd.; sp.gr. 0.94 (23 C); visc. 280-4800 mPa·s; acid no. 16-19; sapon. no. 28-38; penetration no. 2-4; Mettler drop pt. 98-104 C max.

#### Vestowax® C 60 [Creanova]

*Chem. Descrip.:* Fischer-Tropsch wax, oxidate  
CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Lubricant for PVC, PS; mold release agent for plastics; dispersant for colorants in hot melts and wax compds.; textile and paper auxiliary; polish and preservative agent

*Properties:* Wh. pellets/powd.; sp.gr. 0.96 (23 C); visc. < 20 mPa·s (120 C); acid no. 29-34; sapon. no. 50-62; penetration no. 4-6; Mettler drop pt. 98-102 C

#### Vinac® 285 [Air Prods./Polymers]

*Chem. Descrip.:* Polyvinyl acetate homopolymer emulsion  
CAS 9003-20-7

*Uses:* Adhesive base for bag seam, paper, cup, spiral tube winding, and food pkg. adhesives; low-foaming, borax-stable; surfactant protection; for fast-setting, heat-resist. adhesives with superior water resist.

*Properties:* Visc. 50-300 cps; pH 5.0-6.5; 50% min. solids

#### Vinac® 828 [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate latex  
CAS 9003-20-7

*Uses:* Used for paper, paperboard, size press, and wallpaper; combination of wet and dry pick resist. for offset printed grades; good high shear rheology; low grit

*Properties:* 0.15 nm particle size; dens. 9.0 lb/gal; visc. 175 cps (LVF, 60 rpm, #2 spindle); pH 5.8; 50% solids; anionic

#### Vinac® 828M [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate  
CAS 9003-20-7

*Uses:* Coating binder for paper, paperboard, and size press, esp. high-solids blade coating applics., double blade coated SBS paperboard, and coated linerboard; exc. rheological chrs. and balance of wet and dry pick str.; outstanding water/ink receptivity; extremely low grit

*Properties:* 0.22 nm particle size; dens. 9.0 lb/gal; visc. 33 cps (LVF, 60 rpm, #2 spindle); pH 6.3; 47% solids; sl. anionic

#### Vinac® 884 [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate latex  
CAS 9003-20-7

*Uses:* Coating binder for paper/paperboard, size press, wallpaper applics., esp. mod. gloss level publication grades and matte and dull grades; outstanding wet and dry pick resist.; exc. blister resist. for web offset grades

- Properties:* 0.19 µm particle size; visc. 175 cps (60 rpm, #2 spindle); pH 5.8; 50% solids; sl. anionic
- Vinac® 1000** [Air Prods./Polymers]  
*Chem. Descrip.:* Polyvinyl acetate homopolymer emulsion  
 CAS 9003-20-7  
*Uses:* Adhesive base for wood and kraft paper; crosslinking; PVAL protection; once catalyzed, the emulsion meets ASTM D3110 Type II requirements and compoundable to comply with Type I specs  
*Properties:* Visc. 5500-6500 cps; pH 4.5-5.5; 52% min. solids
- Vinac® A50** [Air Prods. Polymers Europe]  
*Chem. Descrip.:* VA homopolymer disp.  
 CAS 9003-20-7  
*Uses:* Binder for fabrics, glass fibers; textile auxiliary and coating; paper coatings  
*Properties:* Disp.; 0.15 µm particle size; visc. 85 ± 30 mPa·s; pH 5; tens. str. 12 N/mm<sup>2</sup>; tens. elong. 100% (break); 50 ± 1% solids
- Vinac® H 60** [Air Prods. Polymers Europe]  
*Chem. Descrip.:* VA homopolymer disp.  
 CAS 9003-20-7  
*Uses:* Binder for fabrics, glass fibers; adhesive for wood, plastic, paper, pkg.; textile auxiliary and coating  
*Properties:* Disp.; 1-3 µm particle size; visc. 40,000 ± 10,000 mPa·s; pH 4; tens. str. 15 N/mm<sup>2</sup>; 60 ± 1% solids
- Vinac® M 503** [Air Prods. Polymers Europe]  
*Chem. Descrip.:* VA homopolymer disp.  
 CAS 9003-20-7  
*Uses:* Binder for fabrics, glass fibers; adhesive for paper, pkg.; textile auxiliary and coating  
*Properties:* Disp.; 0.5-2 µm particle size; visc. 1000 ± 300 mPa·s; pH 4; tens. str. 24 N/mm<sup>2</sup>; 50 ± 1% solids
- Vinac® XX-211** [Air Prods./Polymers]  
*Chem. Descrip.:* Polyvinyl acetate homopolymer  
 CAS 9003-20-7  
*Uses:* Water-based emulsion for adhesives; for use in sensitive applics. such as microwavable food pkg. and medical and personal health care; food pkg. adhesives, coatings, paper; mechanically and chemically stable; outstanding freeze-thaw stability; fast setting speeds; will accept sol'n. of partially hydrolyzed PVAL, but will separate at low-finished adhesive visc. upon addition of sol'n. of fully hydrolyzed PVAL  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 181.30  
*Properties:* Wh. emulsion; sl. odor; 0.2-2 µ particle size; dens. 8.9 lb/gal; visc. 1000-1400 cps; pH 4.5-6; 55% solids
- Vinac® XX-241** [Air Prods./Polymers]  
*Chem. Descrip.:* Polyvinyl acetate homopolymer  
 CAS 9003-20-7  
*Uses:* Water-based emulsion for adhesives; for use in sensitive applics. such as microwavable food pkg. and medical and personal health care; food pkg. adhesives, coatings, paper; mechanically and chemically stable; outstanding freeze-thaw stability; fast setting speeds; will accept sol'n. of partially hydrolyzed PVAL, but will separate at low-finished adhesive visc. upon addition of sol'n. of fully-hydrolyzed PVAL  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 181.30  
*Properties:* Wh. emulsion; sl. odor; 0.2-2 µ particle size; dens. 8.9 lb/gal; visc. 2900-3700 cps; pH 4.5-6; 55% solids
- Vinac® Z 50** [Air Prods. Polymers Europe]  
*Chem. Descrip.:* VA homopolymer disp.  
 CAS 9003-20-7  
*Uses:* Binder for fabrics, glass fibers; textile auxiliary and coating; paper coatings; sizing agent for glass fibers  
*Properties:* Disp.; 0.5-2 µm particle size; visc. 5500 ± 2000 mPa·s; pH 4; tens. str. 15 N/mm<sup>2</sup>; 50 ± 1% solids
- Vinfelt®** [Vinings Ind.]  
*Uses:* Felt/fabric cleaner/conditioner for pulp/paper industry for continuous and batch treatments
- Vinsol® Resin** [Hercules/Resins]  
*Chem. Descrip.:* Resin derived from southern pinewood  
*Uses:* In adhesives, asphalt emulsions, cement (air-entraining agents), elec. insulation, floor coverings, foundry molds, core washes, inks, paperboard and composition board, phenolic resin modification, plastics, primer and surface coatings, rubber, and shoes; for use in food-pkg. and -processing operations; used as resin, or in soap or sol'n. form; high-melting, thermoplastic resin with aliphatic hydrocarbon insol.
- Properties:* Dk. brn. solid, flake, pulverized, soap; 40% solids emulsion; 30% and 50% soap sol'ns.; 60% alcohol sol'n.; sol. in most oxygen containing solvs. such as alcohols, esters, ethers, ketones, and phenols; also sol. in most chlorinated and aromatic hydrocarbons; dens. 1.220 g/cc; soften. pt. (Hercules Drop) 124 C; flash pt. (P-M) 280 C; acid no. 96; sapon. no. 166
- Vinspel®** [Vinings Ind.]  
*Uses:* Boilout additive for removal of wide variety of org. and inorg. deposits on paper machines and in pulp mills
- Viscalex®** [Ciba Spec. Chems./Paper]  
*Uses:* Rheology modifier for paper coatings
- Vista LPA** [Condea Vista]  
*Chem. Descrip.:* Hydrotreated mixts. of mainly isoparaffins and naphthenes with very low levels of aromatics  
*Uses:* Chemical process solvent; carrier in pesticide formulations, waterless hand cleaners; solvent for dry-cleaning, household/industrial cleaners, metal rolling oils, paints, coatings, thinners, paper and mining chems., water treatment chems., food; as charcoal lighter fluids, degreasers, freeze pt. depressants, lamp oils, lubricating oils, printing ink oils; food pkg. adhesives, paper, cellophane, films, rubber, textiles; defoamer in food-contact coatings, paper/paperboard; high purity, med. flash pt.; broad boiling range  
*Regulatory:* FDA 21CFR §172.884, 173.340, 175.105, 176.180, 176.200, 176.210, 177.1200, 177.1400, 177.2260, 177.2600, 177.2800, 178.3120, 178.3570, 178.3620(b), 178.3650, 178.3910(b)(2)  
*Properties:* Clear liq., mild odor; m.w. 167; sp.gr. 0.809 (60/60 F); dens. 6.75 lb/gal (60 F); visc. 2.2 cSt (70 F); vapor pressure 1 mm Hg (100 F); f.p. -90 F; pour pt. -95 F; i.b.p. 362 F; flash pt. (TCC) 148 F; KB value 32  
*Precaution:* DOT: combustible liq.
- Vista LPA-142** [Condea Vista]  
*Chem. Descrip.:* Hydrotreated mixts. of mainly isoparaffins and naphthenes with very low levels of aromatics  
*Uses:* Solvent for industrial cleaning prods., pesticides, coatings, household prods., chemical process solvs., ink oils, water treatment, paper, and mining chems., and food applics.; diluent in polymer processing; in charcoal lighter fluid; food pkg. adhesives, paper, cellophane, films, rubber, textiles; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §172.884, 173.340, 175.105, 176.180, 176.200, 176.210, 177.1200, 177.1400, 177.2260, 177.2600, 177.2800, 178.3120, 178.3570, 178.3620(b), 178.3650, 178.3910(b)(2)  
*Properties:* Clear liq., mild odor; m.w. 152; sp.gr. 0.809 (60/60 F); dens. 6.75 lb/gal (60 F); visc. 1.8 cSt (70 F); vapor pressure 1.1 mm Hg (100 F); f.p. < -103 F; i.b.p. 368 F; pour pt. < -30 F; flash pt. (TCC) 146 F; KB value 35  
*Precaution:* DOT: combustible liq.
- Vista LPA-170** [Condea Vista]  
*Chem. Descrip.:* Hydrotreated mixts. of mainly isoparaffins and naphthenes with very low levels of aromatics  
*Uses:* Solvent for prod. of polymer emulsions, in mining solvent extraction processes, metal lubricants, specialty coatings, pesticides, household prods., chemical process solvs., ink oils, water treatment, paper, and mining chems.; food pkg. adhesives, paper, cellophane, films, rubber, textiles; defoamer in food-contact coatings, paper/paperboard  
*Regulatory:* FDA 21CFR §172.884, 173.340, 175.105, 176.180, 176.200, 176.210, 177.1200, 177.1400, 177.2260, 177.2600, 177.2800, 178.3120, 178.3570, 178.3620(b), 178.3650, 178.3910(b)(2)  
*Properties:* Clear liq., mild odor; m.w. 171; sp.gr. 0.811 (60/60 F); dens. 6.77 lb/gal (60 F); visc. 2.4 cSt (70 F); vapor pressure 0.37 mm Hg (100 F); f.p. -81 F; i.b.p. 413 F; pour pt. < -30 F; flash pt. (TCC) 178 F; KB value 32  
*Precaution:* DOT: combustible liq.
- Vista LPA-210** [Condea Vista]  
*Chem. Descrip.:* Hydrotreated mixts. of mainly isoparaffins and naphthenes with very low levels of aromatics  
*Uses:* Solvent for chem. processing, printing ink oils, metal lubricants, coatings, household prods., water treatment, paper, and mining chems.; pesticide carrier; food pkg. applics.; rec. for applics. where odor is critical  
*Regulatory:* FDA 21CFR §178.3620(c), 178.3910(a)(3)  
*Properties:* Clear liq., mild odor; m.w. 194; sp.gr. 0.823 (60/60 F); dens. 6.87 lb/gal (60 F); visc. 3.8 cSt (70 F); vapor pressure 0.10 mm Hg (100 F); f.p. -43 F; i.b.p. 465 F; pour pt. < -30 F; flash pt. (PM) 226 F; KB value 29
- Volan®** [DuPont; DuPont Canada]  
*Chem. Descrip.:* Methacrylate chromic chloride  
*Uses:* Bonding agent, coupling agent for glass fiber-reinforced laminates; improves adhesive bond on paper, wood, polymeric coatings, impregnants,

thermoset vinyl resins; antistat; in appliances, automotive, composites, computers, construction, consumer goods, marine, military, sporting goods, and textile industries

*Properties:* Dk. grnsh.; alcoholic odor; b.p. 79 C; water-misc.; sp.gr. 1.02; pH 3.1 (1% aq.); flash pt. 6 (TOC); tens. str. 46,400 psi; flex. str. 81,200 psi; 19-21% act.

#### Volan® L [DuPont; DuPont Canada]

*Chem. Descrip.:* Methacrylate chromic chloride

*Uses:* Bonding agent, coupling agent for glass fiber-reinforced laminates; improves adhesive bond on paper, wood, polymeric coatings, impregnants, thermoset vinyl resins; antistat; in appliances, automotive, composites, computers, construction, consumer goods, marine, military, sporting goods, and textile industries

*Properties:* Dk. grn.; alcoholic odor; b.p. 77 C; water-misc.; sp.gr. 0.95; pH 3.1 (1% aq.); flash pt. 7 C (TOC); tens. str. 48,400 psi; flex. str. 79,800 psi; 17-18% act.

#### Volpo C2 [Croda Oleochems.]

*Chem. Descrip.:* Ceteth-2

CAS 9004-95-9

*Uses:* Surfactant, antistat, detergent, dispersant, emulsifier, leveling agent, plasticizer, scouring agent, solubilizer, and wetting agent in detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., cosmetics, and pharmaceuticals

*Properties:* Wh. waxy solid; sol. in ethanol, trichloroethylene, butyl stearate, methyl oleate, xylene; partially sol. in min. oil and rapeseed oil; insol. in water, kerosene; HLB 5.3; acid no. 1.0 max.; hyd. no. 160-180; nonionic

*Toxicology:* Eye irritant

*Storage:* Hygroscopic

#### Volpo C20 [Croda Oleochems.]

*Chem. Descrip.:* Ceteth-20

CAS 9004-95-9

*Uses:* Surfactant, antistat, detergent, dispersant, emulsifier, leveling agent, plasticizer, scouring agent, solubilizer, and wetting agent in detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., cosmetics, and pharmaceuticals

*Properties:* Wh. waxy solid; sol. in water, ethanol, trichloroethylene, xylene; partially sol. in butyl stearate; insol. in min. oil, methyl oleate, rapeseed oil, kerosene; HLB 15.4; acid no. 1.0 max.; hyd. no. 45-60; nonionic

*Toxicology:* Eye irritant

*Storage:* Hygroscopic

#### Volpo CS2 [Croda Oleochems.]

*Chem. Descrip.:* Cetareth-2

CAS 68439-49-6

*Uses:* Emulsifier, wetting agent, solubilizer for skin care prods., detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., cosmetics, and pharmaceuticals; solubilizer for perfumes and essential oils

*Properties:* Wh. waxy solid; sol. in ethanol, kerosene, trichloroethylene, methyl oleate, xylene; partially sol. in min. oil, rapeseed oil, butyl stearate; insol. in water; HLB 5.0; acid no. 1.0 max.; hyd. no. 155-175; nonionic

*Toxicology:* Eye irritant

*Precaution:* Avoid use in prods. used near eyes or in high conc. in skin cosmetics

*Storage:* Hygroscopic

#### Volpo CS5 [Croda Oleochems.]

*Chem. Descrip.:* Cetareth-5

CAS 68439-49-6

*Uses:* Emulsifier, dispersant, wetting agent, gellant for industrial and cosmetic skin care applics., detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., and pharmaceuticals; solubilizer for perfumes and essential oils

*Properties:* Off wh. soft waxy solid; sol. in ethanol, trichloroethylene, oleic acid; partly sol. in min. oil, kerosene, butyl stearate, methyl oleate, rapeseed oil; HLB 9.2; acid no. 1 max.; hyd. no. 115-125; surf. tens. 33.0 dynes/cm (0.1% aq.); pH 6.0-7.5 (3%); 97% conc.; nonionic

#### Volpo CS10 [Croda Oleochems.]

*Chem. Descrip.:* Cetareth-10

CAS 68439-49-6

*Uses:* Emulsifier, dispersant, wetting agent, gellant for industrial and cosmetic skin care applics., detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., and pharmaceuticals; solubilizer for perfumes and essential oils

*Properties:* Off wh. soft waxy solid; sol. in ethanol, trichloroethylene, oleic acid, xylene; partly sol. in water, min. oil, kerosene, butyl stearate; HLB 12.9; acid no. 1 max.; hyd. no. 75-85; cloud pt. 68 C (1% aq.); surf. tens. 34.5 dynes/cm (0.1% aq.); pH 6.0-7.5 (3%); 97% conc.; nonionic

#### Volpo CS15 [Croda Oleochems.]

*Chem. Descrip.:* Cetareth-15

CAS 68439-49-6

*Uses:* Emulsifier, dispersant, wetting agent, gellant for industrial and cosmetic skin care applics., detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, agric., and pharmaceuticals; solubilizer for perfumes and essential oils; emulsifier in polishes

*Properties:* Off wh. waxy solid; sol. in ethanol, trichloroethylene, oleic acid, xylene; partly sol. in water; HLB 14.6; acid no. 1 max.; iodine no. 2 max.; hyd. no. 60-70; cloud pt. 94 C (1% aq.); surf. tens. 35.5 dynes/cm (0.1% aq.); pH 6.0-7.5 (3%); 97% conc.; nonionic

#### Volpo CS20 [Croda Oleochems.]

*Chem. Descrip.:* Cetareth-20

CAS 68439-49-6

*Uses:* Emulsifier, dispersant, wetting agent, gellant for industrial, cosmetic skin care, and pharmaceutical applics., detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, agric., and pharmaceuticals; solubilizer for perfumes and essential oils; emulsifier in polishes

*Properties:* Off-wh. hard waxy solid; sol. in water, ethanol, trichloroethylene, oleic acid, xylene; HLB 15.7; acid no. 1 max.; iodine no. 2 max.; hyd. no. 45-55; cloud pt. 78 C (1% aq.); surf. tens. 41.5 dynes/cm (0.1% aq.); pH 6.0-7.5 (3%); 97% conc.; nonionic

*Toxicology:* LD50 (oral, rat) 2.1 g/kg; mild skin irritant, moderate eye irritant

#### Volpo CS50 [Croda Oleochems.]

*Chem. Descrip.:* Cetareth-50

CAS 68439-49-6

*Uses:* Surfactant, antistat, detergent, dispersant, emulsifier, leveling agent, plasticizer, scouring agent, solubilizer, and wetting agent in detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., cosmetics, and pharmaceuticals

*Properties:* Wh. waxy solid; sol. in water, trichloroethylene, xylene; partially sol. in rapeseed oil; insol. in min oil, butyl stearate, kerosene, methyl oleate; HLB 17.8; acid no. 1.0 max.; hyd. no. 20-28; nonionic

*Toxicology:* Eye irritant

*Storage:* Hygroscopic

#### Volpo L3 [Croda Oleochems.]

*Chem. Descrip.:* PEG-3 lauryl alcohol

CAS 9002-92-0; EINECS/ELINCS 221-280-2

*Uses:* Surfactant, antistat, detergent, dispersant, emulsifier, leveling agent, plasticizer, scouring agent, solubilizer, and wetting agent in detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., cosmetics, and pharmaceuticals

*Properties:* Essentially colorless clear liq.; sol. in trichloroethylene, xylene, rapeseed oil, min oil, butyl stearate, kerosene, methyl oleate; insol. in water; HLB 7-8; acid no. 1.0 max.; hyd. no. 165-180; nonionic

*Toxicology:* Eye irritant

*Storage:* Hygroscopic

#### Volpo N3 [Croda Oleochems.]

*Chem. Descrip.:* Oleth-3, distilled

CAS 9004-98-2

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent for industrial and cosmetic skin care applics., detergents, textile and paper processing, dust control, adhesives, polymers, polishes, agric., and pharmaceuticals; solubilizer for perfumes and essential oils; emulsifier for metalworking fluids

*Properties:* Colorless to pale yel. clear to sl. hazy liq.; sol. in ethanol, min. oil, kerosene, trichloroethylene, rapeseed oil, methyl oleate, xylene; partly sol. in butyl stearate; insol. in water; HLB 6.6; acid no. 0.5 max.; iodine no. 58-66; hyd. no. 130-150; 97% conc.; nonionic

*Toxicology:* May cause skin/eye irritation

#### Volpo N5 [Croda Oleochems.]

*Chem. Descrip.:* Oleth-5, distilled

CAS 9004-98-2

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent for industrial and cosmetic skin care applics., detergents, textile and paper processing, dust control, adhesives, polymers, polishes, agric., and pharmaceuticals; solubilizer for perfumes and essential oils; emulsifier for metalworking

fluids

*Properties:* Wh. to off-wh. opaque liq.; sol. in ethanol, min. oil, trichloroethylene, rapeseed oil, methyl oleate, xylene; partly sol. in water, kerosene, butyl stearate; HLB 9.0; acid no. 0.5 max.; iodine no. 48-56; hyd. no. 106-122; 97% conc.; nonionic

*Toxicology:* May cause skin/eye irritation

**Volpo N10** [Croda Oleochems.]

*Chem. Descrip.:* Oleth-10, distilled

CAS 9004-98-2

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent for industrial and cosmetic skin care applics., detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric., and pharmaceuticals; solubilizer for perfumes and essential oils

*Properties:* Wh. turbid liq. to soft paste; sol. in water, ethanol, min. oil, trichloroethylene, xylene; partly sol. in kerosene, butyl stearate, rapeseed oil, methyl oleate; HLB 12.4; acid no. 0.5 max.; iodine no. 33-38; hyd. no. 75-90; 97% conc.; nonionic

*Toxicology:* May cause skin/eye irritation

**Volpo N20** [Croda Oleochems.]

*Chem. Descrip.:* Oleth-20, distilled

CAS 9004-98-2

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent, solubilizer for industrial applics., cosmetics, detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, agric., and pharmaceuticals; emulsifier in polishes

*Properties:* Wh. soft solid; sol. in water, ethanol, min. oil, trichloroethylene, xylene; partly sol. in butyl stearate, rapeseed oil; HLB 15.5; acid no. 0.5 max.; iodine no. 19-24; hyd. no. 45-55; 97% conc.; nonionic

*Toxicology:* May cause skin/eye irritation

**Volpo S2** [Croda Inc; Croda Oleochems.]

*Chem. Descrip.:* Steareth-2

CAS 9005-00-9

*Uses:* Emulsifier for o/w systems, cosmetics, pharmaceuticals, detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric.; stable over wide pH range; synergistic with Volpo 3, 5 and Polychols

*Use Level:* 0.5-5%

*Properties:* Wh. translucent plastic wax; sol. in alcohol, glycols, methyl oleate, xylene, ketones, most chlorinated and aromatic solvs., kerosene, min. oil; HLB 4.9; acid no. 1.0 max.; hyd. no. 150-170; cloud pt. < 55 C (1% aq.); pH 6.0-7.0 (3%); 100% conc.; nonionic

*Toxicology:* LD50 (oral, rat) 21 g/kg; mild skin irritation, nonirritating to eyes

**Volpo S10** [Croda Inc; Croda Chem. Ltd]

*Chem. Descrip.:* Steareth-10

CAS 9005-00-9

*Uses:* O/w emulsifier for cosmetics, topical pharmaceuticals, hair straighteners and relaxers, detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric.; stable over wide pH range; synergistic with Polychol 15, Volpo 10 and 20; provides superior stability to systems contg. cetyl or stearyl alcohols

*Use Level:* 0.5-5%

*Properties:* Wh. waxy solid, low odor; sol. in water, alcohol, glycol, ketone, most chlorinated and aromatic solvs.; insol. in oil; HLB 12.4; acid no. 1.0 max.; hyd. no. 75-90; cloud pt. 65-75 C (1% aq.); pH 6.0-7.0 (3%); 100% conc.; nonionic

*Toxicology:* LD50 (oral, rat) 2.1 g/kg; moderate skin irritant, severe eye irritant

**Volpo S20** [Croda Inc; Croda Oleochems.]

*Chem. Descrip.:* Steareth-20

CAS 9005-00-9

*Uses:* O/w emulsifier for cosmetics, topical pharmaceuticals, ethic hair straighteners and relaxers, detergents, metalworking, textile and paper processing, dust control, adhesives, polymers, polishes, agric.; stable over wide pH

range

*Use Level:* 0.5-5%

*Properties:* Wh. solid; sol. in water, alcohols, glycols, ketones, most chlorinated and aromatic solvs.; insol. in oil; HLB 15.3; acid no. 1.0 max.; hyd. no. 45-60; cloud pt. > 100 C (1% aq.); 100% conc.; nonionic

*Toxicology:* LD50 (oral, rat) 2.07 g/kg; nonirritating to skin; moderate eye irritant

**Volpo T5** [Croda Oleochems.]

*Chem. Descrip.:* Trideceth-5

CAS 24938-91-8

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent, solubilizer for industrial applics., cosmetics, detergents, textile and paper processing, dust control, adhesives, polymers, polishes, agric., and pharmaceuticals; wetting agent in metalworking fluids

*Properties:* Colorless liq.; sol. in kerosene, trichloroethylene, rapeseed oil, methyl oleate, xylene, ethanol; partly sol. in water, min. oil, butyl stearate; HLB 10.5; acid no. 1 max.; hyd. no. 130-145; 97% conc.; nonionic

**Volpo T10** [Croda Oleochems.]

*Chem. Descrip.:* Trideceth-10

CAS 78330-21-9

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent, solubilizer for industrial applics., cosmetics, detergents, textile and paper processing, dust control, polymers, polishes, agric., and pharmaceuticals; wetting agent in metal pickling baths, animal glues

*Properties:* Wh. soft paste; sol. in water, rapeseed oil, methyl oleate, xylene; partly sol. in kerosene, butyl stearate; insol. in min. oil; HLB 13.7; acid no. 1 max.; hyd. no. 8-95; 97% conc.; nonionic

**Volpo T15** [Croda Oleochems.]

*Chem. Descrip.:* Trideceth-15

CAS 78330-21-9

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent, solubilizer for industrial applics., cosmetics, detergents, textile and paper processing, dust control, polymers, polishes, agric., and pharmaceuticals; wetting agent in metal pickling baths

*Properties:* Wh. soft paste; sol. in water, ethanol, trichloroethylene, methyl oleate, xylene; partly sol. in butyl stearate, rapeseed oil; HLB 15.4; acid no. 1 max.; hyd. no. 65-75; 97% conc.; nonionic

**Vybar® 103** [Baker Petrolite]

*Chem. Descrip.:* Syn. wax; ethylene-derived hydrocarbon polymer

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Lubricant; anticaking agent; modifier for paraffin (inc. hardness, opacity); in candles to replace stearic acid; opacifies the candle and imparts resistance to thermal shock; pigment dispersant to wet inorg. pigments and fillers at high loading level; suitable for hot-melt inks, mold release compds., plastic lubricants, protective coatings, polishes, slip and antimar additives; emollient, gloss aid, lubricant for cosmetics; food pkg. adhesives, paper

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3850

*Properties:* Solid; limited sol. in org. solvs.; m.w. 2800; dens. 0.92 g/cc; visc. 345 cps (99 C); soften. pt. 74 C; iodine no. 14

**Vybar® 260** [Baker Petrolite]

*Chem. Descrip.:* Syn. wax; olefin-derived hydrocarbon polymer

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Paraffin wax modifier in polishes, industrial coatings, hot-melt inks, mold-release compds., plastic lubricants, and slip/antimar additives; emollient, gloss aid, lubricant for cosmetics; food pkg. adhesives, paper; hard, low-melting polymer with low melt visc.; additive producing blends with paraffin which are harder and more opaque; upgrades props. of lower-grade waxes

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3850

*Properties:* Solid; sol. in min. spirits, xylene, and trichloroethylene; m.w. 2600; dens. 0.90 g/cc; visc. 358 cps (99 C); soften. pt. 54 C; iodine no. 15

# W

## Wacker HDK® N20 [Wacker-Chemie GmbH; Wacker Silicones]

*Chem. Descrip.:* Fumed silica

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Thickener, thixotrope, antissetting agent for paints/coatings, pharmaceuticals/cosmetics (toothpaste, tablets, powds., aerosols, suspensions, ointments, creams), diazo paper, printing inks, PVC plastisols, rubbers, adhesives; reinforcing filler in silicone rubber; free-flow agent for powds., pigments, and salts; hydrophilic

*Use Level:* 5-35% (rubber), 15-35% (high temp. curing silicone rubber), 0.8-1.2% (adhesives)

*Properties:* Wh. powd.; bulk dens. 40 g/l (tamped); surf. area 200 ± 30 m<sup>2</sup>/g; ref. index 1.45; pH 3.6-4.3 (4% aq.)

*Storage:* 1 yr storage stability in unopened containers

## WAC® Paper [Atofina]

*Chem. Descrip.:* Basic polyaluminum chlorosulfate

*Uses:* Coagulant, anionic trash collector in papermaking, upstream retention prods. and processes, food-contact paper; coagulant for industrial and waste water; dec. pollution of process water loops; very stable

*Regulatory:* BgVV compliance

## Wax Emulsifier 4106 [Clariant]

*Chem. Descrip.:* Ceteoleth

CAS 68920-66-1

*Uses:* Emulsifier, wetting agent, leveling agent for waxes (polishes, leather, textile, paper coatings); free of alkylphenol ethoxylates

*Properties:* Wh. waxy solid; iodine no. < 2; cloud pt. 58-59 C; drop pt. 50-60 C; pH 6-7.5 (1%); nonionic

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; skin irritant

*Storage:* Keep in dry storage @ R.T.

## Wayfos® D-10N [Arch Chems.]

*Chem. Descrip.:* Poly(oxy-1,2-ethanediy), -nonylphenyl-hydroxy phosphate

*Uses:* Antistat, dispersant, corrosion inhibitor, emulsifier, stabilizer, solubilizer for textile processing, alkaline and acid soak cleaners, hard surf. cleaners, dishwashes, wax removers, emulsion polymerization, agric., paper processing

*Properties:* Gardner 1-2 visc. liq.; sol. in water, alcohols, glycol ethers, aromatic and aliphatic hydrocarbons, chlorinated solvs.; sp.gr. 1.10; dens. 9.15 lb/gal; pH 1.7-2.0 (5% aq.); Draves wetting 44 s (0.25%); Ross-Miles foam 133 mm (0.1%, initial); 100% act.; anionic

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; skin irritant; corrosive to eyes

## Wayfos® M-100 [Arch Chems.]

*Chem. Descrip.:* Aromatic phosphoate ester, free acid

*Uses:* Antistat, detergent for all-purpose heavy-duty formulations; corrosion inhibitor for nonferrous metals; pesticide emulsifier; pitch dispersant for paper pulp processing

*Properties:* Lt. amber visc. liq.; sol. in water, alcohols, glycol ethers, aliphatic hydrocarbons, chlorinated solvs.; disp. in aromatic hydrocarbons; sp.gr. 1.13; dens. 9.40 lb/gal; pH 2.0-2.5 (1% aq.); Draves wetting 10 s (0.25%); 100% act.; anionic

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; skin irritant; corrosive to eyes

## Webnix 69C [Crusader]

*Chem. Descrip.:* Silicone-based, protein-supported emulsion

*Uses:* Dewebber, defoamer, and antifoam for natural and syn. latexes in latex dipping industry (mfg. of toys, medical, household, and industrial gloves,

anesthesia bags); defoamer for pulp/paper mfg., influent and effluent wastewater treatment, boiler water treatment, paints, adhesives, and sealants; food-contact rubber articles

*Use Level:* 0.2-0.5 phr

*Regulatory:* FDA 21CFR §177.2600

*Properties:* Wh. creamy emulsion; completely disp. in water; sp.gr. 0.95 ± 0.1; visc. 50-600 cps; pH 9.0 ± 0.5

*Storage:* 6 mos shelf life stored @ ambient temps.; stir briefly before use; excessive heat over 105 F for prolonged periods or freezing temps. may destabilize prod.

## Webnix 1065-3 [Crusader]

*Chem. Descrip.:* Silicone-based, protein-supported emulsion

*Uses:* Dewebber and defoamer for latex dipping industry (mfg. of medical, surgical, household, and industrial gloves, anesthesia bags, catheters, balloons, condoms); defoamer for pulp/paper mfg., influent and effluent wastewater treatment, boiler water treatment, paints, adhesives, sealants, and inks; food-contact rubber articles

*Use Level:* 0.2-0.5 phr

*Regulatory:* FDA 21CFR §177.2600

*Properties:* Wh. milky emulsion; completely disp. in water; sp.gr. 0.95 ± 0.1; visc. 50-650 cps; pH 9.0 ± 0.5

*Storage:* 6 mos shelf life stored @ ambient temps.; stir briefly before use; excessive heat over 105 F for prolonged periods or freezing temps. may destabilize prod.

## Webnix 5113 [Crusader]

*Chem. Descrip.:* Silicone-based, gum-supported emulsion

*Uses:* Dewebber and antifoam for natural latex and syn. blends, esp. nitrile formulations and high visc. latexes in latex dipping industry (mfg. of medical, household, and industrial gloves, toys, balloons); defoamer for pulp/paper mfg., influent and effluent wastewater treatment, boiler water treatment, paints, adhesives, and sealants; food-contact rubber articles

*Use Level:* 0.2-0.5 phr

*Regulatory:* FDA 21CFR §177.2600

*Properties:* Wh. milky emulsion; completely disp. in water; sp.gr. 0.95 ± 0.1; visc. 200-950 cps; pH 9.0 ± 0.5

*Storage:* 6 mos shelf life stored @ ambient temps.; stir briefly before use; excessive heat over 105 F for prolonged periods or freezing temps. may destabilize prod.

## Webnix 5116 [Crusader]

*Chem. Descrip.:* Silicone-based, clay-supported emulsion

*Uses:* Dewebber and antifoam for natural latex and syn. blends, esp. nitrile formulations and high visc. latexes in latex dipping industry (mfg. of medical, household, and industrial gloves, toys, balloons); defoamer for pulp/paper mfg., influent and effluent wastewater treatment, boiler water treatment, paints, adhesives, and sealants; food-contact rubber articles

*Regulatory:* FDA 21CFR §177.2600

*Properties:* Wh. milky emulsion; completely disp. in water; sp.gr. 0.95 ± 0.1; visc. 200-950 cps; pH 9.0 ± 0.5

*Storage:* 6 mos shelf life stored @ ambient temps.; stir briefly before use; excessive heat over 105 F for prolonged periods or freezing temps. may destabilize prod.

## Webnix CAL-183 [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free emulsion

*Uses:* Dewebber and antifoam for natural latex and syn. blends, latex dipping industry (mfg. of medical and surgical gloves, balloons); antifoam for pulp/

paper mfg., wastewater treatment, boiler water treatment, inks; food-contact coatings, rubber articles

*Use Level:* 0.2-0.5 phr

*Regulatory:* FDA 21CFR §175.300, 177.2600

*Properties:* Off-wh. emulsion; completely disp. in water; sp.gr. 1.00 ± 0.1; visc. 200-750 cps; pH 8.5-9.5

*Storage:* 6 mos shelf life stored @ ambient temps.; stir briefly before use; excessive heat over 105 F for prolonged periods or freezing temps. may destabilize prod.

**Webnix FreeSil 581** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives

**Webnix FreeSil 622** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives

**Webnix FreeSil 642** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives

**Webnix FreeSil A** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives; food-contact rubber articles

*Regulatory:* FDA 21CFR §177.2600

*Properties:* Amber liq.; completely disp. in water; sp.gr. 0.95 ± 0.5; visc. 500 cps max.; pH 7.5-9.5

*Storage:* 1 yr shelf life when stored @ ambient temps.; not subject to destabilization or deterioration; settling may occur, mix before use

**Webnix FreeSil B** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives

*Regulatory:* FDA approval pending

*Properties:* Amber liq.; completely disp. in water; sp.gr. 0.90 ± 0.5; visc. 100 cps max.; pH 5.5-7.5

*Storage:* 1 yr shelf life when stored @ ambient temps.; not subject to destabilization or deterioration; settling may occur, mix before use

**Webnix FreeSil C** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives; food-contact rubber articles

*Regulatory:* FDA 21CFR §177.2600

*Properties:* Amber liq.; completely disp. in water; sp.gr. 0.95 ± 0.5; visc. 300 cps max.; pH 7.5-9.5

*Storage:* 1 yr shelf life when stored @ ambient temps.; not subject to destabilization or deterioration; settling may occur, mix before use

**Webnix FreeSil G** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives

*Regulatory:* FDA approval pending

*Properties:* Amber liq.; completely disp. in water; sp.gr. 0.92 ± 0.5; visc. 350 cps max.; pH 7.5-9.5

*Storage:* 1 yr shelf life when stored @ ambient temps.; not subject to destabilization or deterioration; settling may occur, mix before use

**Webnix FreeSil H** [Crusader]

*Chem. Descrip.:* Silicone-free, protein-free conc. sol'n.

*Uses:* Dewebber and antifoam for latex formulations esp. latex dipped goods @ low dosage levels, pulp/paper mfg., wastewater treatment, boiler water treatment, inks, paints, and adhesives

*Regulatory:* FDA approval pending

*Properties:* Amber liq.; completely disp. in water; sp.gr. 0.88 ± 0.5; visc. 100 cps max.; pH 7.5-9.5

*Storage:* 1 yr shelf life when stored @ ambient temps.; not subject to destabilization or deterioration; settling may occur, mix before use

**Weston® 618** [GE Spec.]

*Chem. Descrip.:* Distearyl pentaerythritol diphosphate

CAS 3806-34-6; EINECS/ELINCS 223-276-6

*Uses:* Antioxidant for polyester, PE, PP, PS, ABS, PVC, polybutadiene, EPDM; exc. UV synergist; food-contact paper/paperboard, polymers; non-discoloring, synergistic

*Regulatory:* FDA 21CFR §176.170, 177.1520

*Properties:* Wh. powd. or flakes

*Toxicology:* Nontoxic

**Westvaco® Rosin T** [Westvaco]

*Chem. Descrip.:* Tall oil rosin

CAS 8052-10-6; EINECS/ELINCS 232-475-7

*Uses:* Raw material for rubber processing oils, ink resins, dk. unfortified paper size, other applics. not sensitive to color

*Properties:* Dens. 8.2 lb/gal; soften. pt. (R&B) 130 F; acid no. 100; sapon. no. 135

**Wetsan™ DI284-1** [BASF]

*Uses:* Deinking agent, surfactant, dispersant for inks and other contaminants for newsprint and wood-free paper

**W.G.S. Hydrogenated Fish Glyceride 117** [Werner G. Smith]

*Chem. Descrip.:* Triester of long chain fatty acids (mostly arachidic and behenic) and glycerin

CAS 68424-59-9

*Uses:* Softener, plasticizer used in wax compds., textile softeners and sizes, yarn lubricants, grease sticks, polishes, crayons, candles, leather stuffing, wire drawing compds., paper coatings, and plastics; environmentally friendly

*Properties:* Off-wh. flakes, faint waxy odor; negligible sol. in water; sp.gr. 0.891 (60 F); m.p. 47-51 C; acid no. 6 max.; iodine no. 35 max.; sapon. no. 186-201; flash pt. 500 F

*Toxicology:* Nontoxic; irritating to eyes, skin, respiratory system, GI tract

*Environmental:* Readily biodeg.

*Precaution:* Incompat. with oxidizing agents; keep away from heat, sources of ignition

*Hazardous Decomp. Prods.:* Oxides of carbon, smoke

*Storage:* Keep container closed when not in use

**W.G.S. Hydrogenated Fish Glyceride 128** [Werner G. Smith]

*Chem. Descrip.:* Triester of long chain fatty acids (mostly arachidic and behenic) and glycerin

*Uses:* Used for wax compds., textile sizing, grease sticks for polishing, lubricating greases, adhesives, Japan wax replacements, crayons, leather stuffings, stearates, wire drawing compds. of calcium soap type, paper coatings, and plastics; environmentally friendly

*Properties:* Color (Lovibond 5¼) 20Y-2.0R max.; sp.gr. 0.856; m.p. 53-57 C; acid no. 5.0 max.; iodine no. 5.0; sapon. no. 188-195

*Toxicology:* Nontoxic

*Environmental:* Readily biodeg.

**Wickit™** [Hercules]

*Uses:* Absorbency aid for tissue and towel grades

**Witcamide® MAS** [Goldschmidt]

*Chem. Descrip.:* Stearamide MEA-stearate

CAS 14351-40-7; EINECS/ELINCS 238-310-5

*Uses:* Opacifier, conditioner, lubricant, gellant for personal care, household, and institutional liq. soaps; as partial or total replacement for veg. waxes in polishes; coating agent for paper and textiles; mold release agent for industrial processing; additive for raising melting pts. of petrol. waxes or glyceride waxes and fats; ingred. of insulating coatings or barriers, and of water-repellent compds.

*Properties:* Lt. cream waxy flakes; mild char. odor; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, alcohol, ketones, esters; sp.gr. 0.844; m.p. 81 C; acid no. 5.0; 100% conc.; nonionic

**Witcobond® W-213** [Crompton/Witco]

*Chem. Descrip.:* PU aq. disp.

*Uses:* Binder; protective coating or surf. treatment primarily for textiles, nonwovens, fiberglass, paper, wood, urethane foam, or other porous substrates; forms strong, cohesive films by evaporation of water content; rec. where the props. of a light-stable, water-based urethane are suitable; low VOC

*Properties:* Semitranslucent liq.; char. odor; colloidal particle size; sp.gr. 1.04; dens. 8.7 lb/gal; visc. < 100 cps; flash pt. (PMCC) > 100 C; pH 4-6; surf. tens. 39 dynes/cm; VOC 206 g/l; Film props.: tens. str. 5000 psi; tens.

**WorléeSin MS 235**

---

elong. 365% (ultimate); 30% solids; cationic

**WorléeSin MS 235** [Worlée-Chemie]

*Uses:* For spirit lacquers and paper varnishes

*Properties:* Gardner 8 max. color; m.p. 130-145 C; acid no. 180-200

**WW Filler™** [IMERYS]

*Chem. Descrip.:* Specially fractionated water-washed kaolin

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Filler, opacifier for paper industry; improves brightness, printability

*Properties:* Spray-dried, slurry; 0.03% 325-mesh residue, 60% finer than 2  $\mu$  particle size; sp.gr. 2.62; visc. 300 cps (70% solids); brightness (GE) 84-85; ref. index 1.56; pH 6.2-7.5 (20% aq.); hardness (Mohs) 2; 0.3-1.0% moisture (spray-dried), 29-31% moisture (slurry)

# XY

## Xanthan Gum [ADM Food Addit.]

*Chem. Descrip.:* Xanthan gum  
 CAS 11138-66-2; EINECS/ELINCS 234-394-2  
*Uses:* Thickener, bodying agent, stabilizer for food, cosmetics, pharmaceuticals, and industrial applics.; food-contact paper/paperboard, polymers  
*Regulatory:* FDA 21CFR §172.645, 172.695, 176.170, 176.180, 177.1350, 182.99, 573.1010; NF, FCC, JECFA  
*Toxicology:* LD50 (rat) > 5000 mg/kg  
*Environmental:* Biodeg.  
*Storage:* Store in tightly closed container

## XC-33 [Releasomers]

*Chem. Descrip.:* Water-based fluorochemical copolymer  
*Uses:* Release agent for rubber, plastic, and metal industries; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170(a)  
*Properties:* Milky wh. emulsion; sp.gr. < 1; pH > 5  
*Storage:* Store below 32 C; protect from freezing

## X-Link 2833 [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking vinyl acrylic copolymer emulsion  
*Uses:* Imparts fold endurance, tear str., delamination resist., lightfastness, durability, and toughness to paper saturation (tag and label stock); soft and durable; exc. adhesion to rayon and polyester fibers; crosslinking imparts str. and durability; exc. compd., size press, saturation, and spray stability; acceptable for skin contact applics.  
*Properties:* 0.2 µ particle size; dens. 8.8 lb/gal; visc. 200 cps; pH 4.5; 45% solids; anionic

## X-Link 2893 [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking vinyl acrylic copolymer emulsion  
*Uses:* Dry and wet str. agent for paper saturation (wallcovering); imparts water repellency into sat. paper; features softness and durability; exc. saturation and size press stability; exc. adhesion to nat. and syn. substrates; crosslinking provides str. and solv. resist.  
*Properties:* 0.2 µ particle size; dens. 8.8 lb/gal; visc. 200 cps; pH 4.5; 45% solids; anionic

## X-Link 5627 [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking vinyl acrylic copolymer emulsion  
*Uses:* Dry and wet str. agent for paper saturation (air and vacuum filtration); features firmness, durability, exc. mech. and saturation stability; fast penetration into paper; exc. adhesion to nat. and syn. substrates; crosslinking imparts str. and toughness  
*Properties:* 0.20 µ particle size; dens. 8.8 lb/gal; visc. 100 cps; pH 6.5; 45% solids; anionic

## XZ 26001.00 [Dow]

*Chem. Descrip.:* Styrene acrylic copolymer aq. sol'n.  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent for acid, alkaline, neutral, or unsized paper; improves ink-jet printability, toner adhesion, and optical brightness; exc. flexibility; very high mech. stability  
*Properties:* Ylsh.-wh. sl. turbid sol'n.; visc. 2000 mPa·s; pH 9; 20% solids; anionic

## XZ 26005.00 [Dow]

*Chem. Descrip.:* Styrene acrylic copolymer aq. sol'n.

## CAS 9010-92-8

*Uses:* Surf. sizing agent for acid, alkaline, neutral, or unsized paper; improves ink-jet printability, toner adhesion, and optical brightness; exc. flexibility; very high mech. stability  
*Properties:* Ylsh.-wh. sl. turbid sol'n.; visc. 200 mPa·s; pH 9; 15% solids; anionic

## Yelkin® DS [ADM Lecithin]

*Chem. Descrip.:* Standardized soya lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Drink mixes; candies; adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; drilling muds; dust control; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints; paper coatings; pesticides/herbicides; pet foods; petrol. additives; putty/caulks; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; acid no. 30 max.; 1% max. water

## Yelkin® SS [ADM Lecithin]

*Chem. Descrip.:* Standardized soya lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints and coatings; pesticides/herbicides; petroleum additives; putty/caulking compounds; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; paper coatings; dust control; drilling muds; dough conditioner, pan lubricant for foods; emulsifier for w/o emulsions  
*Properties:* Translucent fluid; visc. 65-85 stokes; HLB 4.0; acid no. 30 max.; 1% max. water

## Yelkin® T [ADM Lecithin]

*Chem. Descrip.:* Standardized soya lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints and coatings; pesticides/herbicides; petroleum additives; putty/caulking compounds; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; paper coatings; dust control; drilling muds; food (candies, margarine, baked goods, icings, frostings); emulsifier for w/o emulsions  
*Properties:* Opaque plastic; HLB 4.0; acid no. 25 max.; 1% max. water

## Yelkin® TS [ADM Lecithin]

*Chem. Descrip.:* Standardized soya lecithin  
 CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* Adhesives; animal feeds; asphalt; concrete; cosmetics; detergents; explosives; fertilizers; inks; leather tanning; lubricants; magnetic tapes; paints and coatings; pesticides/herbicides; petroleum additives; putty/caulking compounds; release agents; rust/corrosion inhibitors; textiles; waxes; polishes; wood preservatives; paper coatings; dust control; drilling muds; food (chocolate, frosting, baked goods, icings, margarine); emulsifier for w/o emulsions  
*Properties:* Translucent fluid; visc. 65-85 stokes; HLB 4.0; acid no. 30 max.; 1% max. water

# Z

## ZAA [Magnesium Elektron]

*Chem. Descrip.:* Zirconium acetate

CAS 7585-20-8

*Uses:* Ingred. of zirconium/wax water repellents for semi-durable textile fabrics and paper; catalyst for curing silicone resins in water repellent treatments for textiles and leather; re-tan or filling for high quality leather goods; component of corrosion-inhibiting pretreatment process for metal; refractory binder for mfg. of high temp. stabilized zirconia shapes; coatings requiring UV lt. reflectance; starting material for other zirconium compds., esp. soaps

*Properties:* Clear mildly acidic sol'n.; sp.gr. 1.3; pH 3.3; ZrO<sub>2</sub> (22%); CH<sub>3</sub>COOH (17%); Na (250 ppm); SO<sub>4</sub> (350 ppm)

*Storage:* Indefinite shelf life @ ambient temps.; can withstand med./long-term exposure to nat. temp. extremes; precipitates due to extreme cold will usually dissolve; hydrolysis causes irreversible damage

## Zelec® ECP-1410-M [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (mica)

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Lt. gray powd.; 8 μ particle size; sp.gr. 3.5 g/cc; dens. 0.6 g/cc (tapped); surf. area 30-40 m<sup>2</sup>/g; resist. 50-150 ohm-cm; 4% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-1410-T [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (TiO<sub>2</sub>)

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Lt. gray powd.; 5 μ particle size; sp.gr. 5 g/cc; dens. 1.1 g/cc (tapped); surf. area 15-25 m<sup>2</sup>/g; resist. 2-5 ohm-cm; 4% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-1610-S [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (silica shell)

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Lt. gray powd.; 9 μ particle size; sp.gr. 4 g/cc; dens. 0.4 g/cc (tapped); surf. area 30-60 m<sup>2</sup>/g; resist. 4-15 ohm-cm; 6.5% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-1703-S [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (silica shell)

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Lt. green powd.; 9 μ particle size; sp.gr. 4 g/cc; dens. 0.35 g/cc

(tapped); surf. area 40-50 m<sup>2</sup>/g; resist. 20-80 ohm-cm; 2.5% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-2610-S [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (silica shell)

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Lt. gray powd.; 4 μ particle size; sp.gr. 4 g/cc; dens. 0.4 g/cc (tapped); surf. area 30-60 m<sup>2</sup>/g; resist. 4-15 ohm-cm; 6.5% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-2703-S [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (silica shell)

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Lt. green powd.; 4 μ particle size; sp.gr. 4 g/cc; dens. 0.35 g/cc (tapped); surf. area 40-50 m<sup>2</sup>/g; resist. 20-80 ohm-cm; 2.5% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-3005-XC [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide without core particles

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Green powd.; 0.7 μ particle size; sp.gr. 6.5-7.5 g/cc; dens. 0.8 g/cc (tapped); surf. area 15-30 m<sup>2</sup>/g; resist. 0.5-3 ohm-cm; 6.5% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-3010-XC [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide without core particles

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Blue powd.; 2 μ particle size; sp.gr. 6.5-7.5 g/cc; dens. 0.5 g/cc (tapped); surf. area 60-80 m<sup>2</sup>/g; resist. 0.5-3 ohm-cm; 10% antimony

*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin

*Storage:* Store in cool, dry area in closed containers

## Zelec® ECP-3410-T [Milliken]

*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (TiO<sub>2</sub>)

*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity

*Properties:* Lt. gray powd.; 1 μ particle size; sp.gr. 5 g/cc; dens. 1.1 g/cc

- (tapped); surf. area 15-25 m<sup>2</sup>/g; resist. 2-5 ohm-cm; 4% antimony  
*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin  
*Storage:* Store in cool, dry area in closed containers
- Zelac® ECP-3610-S** [Milliken]  
*Chem. Descrip.:* Antimony-doped tin oxide coated onto inert core (silica shell)  
*Uses:* Electroconductive additive in coatings and plastics; for ESD protection in electronic component pkg., floor/wall coatings, plastics, laminates; electrostatic painting (automotive primers); dielec. film and paper; toners; non-corrosive, non-sloughing, not affected by high temps. or chemicals, humidity independent conductivity  
*Properties:* Lt. gray powd.; 2 µ particle size; sp.gr. 4 g/cc; dens. 0.4 g/cc (tapped); surf. area 30-60 m<sup>2</sup>/g; resist. 4-15 ohm-cm; 6.5% antimony  
*Toxicology:* Low oral toxicity; moderate eye irritant; nonirritating to skin  
*Storage:* Store in cool, dry area in closed containers
- Zenix™** [Hercules]  
*Uses:* Deposit control agent, scale control agent for pulp, paper, and paper-board mfg.
- Zeolex® 23P** [J.M. Huber/Chems.]  
*Chem. Descrip.:* Sodium silicoaluminate  
 CAS 1344-00-9; EINECS/ELINCS 215-684-8  
*Uses:* Paper filler  
*Properties:* 5 µ avg. particle size; surf. area 73 m<sup>2</sup>/g; oil absorp. 115 cc/100 g; pH 10.2
- Zetafil 1** [Microfill K. Zafranias]  
*Chem. Descrip.:* Calcium carbonate (99.7%)  
 CAS 471-34-1; EINECS/ELINCS 207-439-9  
*Uses:* Pigment for industrial paints, emulsion paints, powd. coatings, paper/board coatings; high brightness  
*Properties:* Very wh. rhombohedral crystals; 80% < 2 µ; sp.gr. 2.7; bulk dens. 0.70 g/ml (packed); surf. area 10.1 m<sup>2</sup>/g; oil absorp. 21/100 g; dry brightness 95.5%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture
- Zetafil 2** [Microfill K. Zafranias]  
*Chem. Descrip.:* Calcium carbonate (99.7%)  
 CAS 471-34-1; EINECS/ELINCS 207-439-9  
*Uses:* Pigment for plastics (PVC, PU, polyester, polyolefins), emulsion paints, primers, powd. coatings, adhesives, paper/board; high brightness; enables reduction of TiO<sub>2</sub> levels in coatings  
*Properties:* Very wh. rhombohedral crystals; 60% < 2 µ; sp.gr. 2.7; bulk dens. 0.9 g/ml (packed); oil absorp. 21/100 g; dry brightness 95.5%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture
- Zetafil 3** [Microfill K. Zafranias]  
*Chem. Descrip.:* Calcium carbonate (99.7%)  
 CAS 471-34-1; EINECS/ELINCS 207-439-9  
*Uses:* Pigment for plastics (PVC, PU, polyester, polyolefins), emulsion paints, primers, powd. coatings, adhesives, paper/board; high brightness; enables reduction of TiO<sub>2</sub> levels in coatings  
*Properties:* Very wh. rhombohedral crystals; 49% < 2 µ; sp.gr. 2.7; bulk dens. 0.9 g/ml (packed); oil absorp. 20/100 g; dry brightness 95%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture
- Zetag®** [Ciba Spec. Chems./Paper]  
*Uses:* Flocculant for sludge dewatering in effluent treatment for paper industry
- Zohar ZDB** [Zohar Detergent Factory]  
*Chem. Descrip.:* Microbially produced surf. act. polymer  
*Uses:* Dispersant for paper, cosmetics, detergents, water treatment, ceramics, textile, dyes, etc.; wet grinding aid; polymer that adheres to particles of org. and inorg. compds. such as limestone or pigments, changing their surf. props.
- Zonarez® 1040** [Arizona]  
*Chem. Descrip.:* Polyterpene resin  
 CAS 9003-74-1  
*Uses:* Tackifier for adhesives, food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 4 color; soften. pt. (R&B) 40 C
- Zonarez® 1085** [Arizona]  
*Chem. Descrip.:* Polyterpene resin  
 CAS 9003-74-1  
*Uses:* Tackifier for adhesives, food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210
- Zonarez® 1115T** [Arizona]  
*Chem. Descrip.:* Polyterpene resin  
 CAS 9003-74-1  
*Uses:* Tackifier for adhesives, food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 2 color; soften. pt. (R&B) 85 C
- Zonarez® 1115T** [Arizona]  
*Chem. Descrip.:* Polyterpene resin  
 CAS 9003-74-1  
*Uses:* Tackifier for adhesives, food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 2 color; soften. pt. (R&B) 115 C
- Zonarez® 1125** [Arizona]  
*Chem. Descrip.:* Polyterpene resin  
 CAS 9003-74-1  
*Uses:* Tackifier for adhesives, food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 1+ color; soften. pt. (R&B) 125 C
- Zonarez® 1135** [Arizona]  
*Chem. Descrip.:* Polyterpene resin  
 CAS 9003-74-1  
*Uses:* Tackifier for adhesives, food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 1+ color; soften. pt. (R&B) 135 C
- Zonarez® 7115** [Arizona]  
*Chem. Descrip.:* Polyterpene resin produced from dipinene  
 CAS 9003-74-1  
*Uses:* Polymer imparting high levels of tack and adhesion to elastomeric and polymeric materials in mfg. of pressure-sensitive adhesives, rubber cements, hot-melt adhesives/coatings, can sealants, caulking, inks, paints, concrete waterproofing agents; varnishes, chewing and bubble gum bases, moisture-resist. soft gelatin capsules and powds. of ascorbic acid and its salts; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; bright, clear, pale-colored, low m.w.; LITE resins feature water-wh. color  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 4 color; sp.gr. 0.99; soften. pt. (R&B) 115 C; flash pt. (CC) > 400 F
- Zonarez® 7115 LT** [Arizona]  
*Chem. Descrip.:* Polyterpene resin produced from dipinene  
 CAS 9003-74-1  
*Uses:* Polymer imparting high levels of tack and adhesion to elastomeric and polymeric materials in mfg. of pressure-sensitive adhesives, rubber cements, hot-melt adhesives/coatings, can sealants, caulking, inks, paints, concrete waterproofing agents; varnishes, chewing and bubble gum bases, moisture-resist. soft gelatin capsules and powds. of ascorbic acid and its salts; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; bright, clear, pale-colored, low m.w.; LITE resins feature water-wh. color  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 2+ color; sp.gr. 0.99; soften. pt. (R&B) 115 C; flash pt. (CC) > 400 F
- Zonarez® 7125** [Arizona]  
*Chem. Descrip.:* Polyterpene resin produced from dipinene  
 CAS 9003-74-1  
*Uses:* Polymer imparting high levels of tack and adhesion to elastomeric and polymeric materials in mfg. of pressure-sensitive adhesives, rubber cements, hot-melt adhesives/coatings, can sealants, caulking, inks, paints, concrete waterproofing agents; varnishes, chewing and bubble gum bases, moisture-resist. soft gelatin capsules and powds. of ascorbic acid and its salts; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; bright, clear, pale-colored, low m.w.; LITE resins feature water-wh. color  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210  
*Properties:* Gardner 4 color; sp.gr. 0.99; soften. pt. (R&B) 125 C; flash pt. (CC) > 400 F
- Zonarez® 7125 LT** [Arizona]

*Chem. Descrip.:* Polyterpene resin produced from dipinene  
CAS 9003-74-1

*Uses:* Polymer imparting high levels of tack and adhesion to elastomeric and polymeric materials in mfg. of pressure-sensitive adhesives, rubber cements, hot-melt adhesives/coatings, can sealants, caulking, inks, paints, concrete waterproofing agents; varnishes, chewing and bubble gum bases, moisture-resist. soft gelatin capsules and powds. of ascorbic acid and its salts; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; bright, clear, pale-colored, low m.w.; LITE resins feature water-wh. color

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 3- color; sp.gr. 0.99; soften. pt. (R&B) 125 C; flash pt. (CC) > 400 F

#### Zonarez® A-25 [Arizona]

*Chem. Descrip.:* Polyterpene resin based on  $\alpha$ -pinene  
CAS 9003-74-1

*Uses:* Tackifier and str. enhancer for adhesives; cotackifier for the mfg. of pressure-sensitive adhesives, solv.-based adhesives, emulsion adhesives, and hot-melt adhesives/coatings; plasticizing and softening props.; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact paper/paper-board; clear, light-colored thermoplastic; increases hard resin loading; esp. designed as cotackifier for mfg. of adhesive systems based on thermoplastic block copolymer such as Kraton®

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.210, 177.1210

*Properties:* Gardner 4 color; sol. in aliphatic, aromatic, and chlorinated HC, esters, terpenes, ethyl ether, some alcohols; sp.gr. 0.90; soften. pt. (R&B) 25 C; flash pt. (CC) > 400 F

#### Zonarez® B-115 [Arizona]

*Chem. Descrip.:* Polyterpene resin  
CAS 9003-74-1

*Uses:* Polymer imparting high levels of tack and adhesion to many elastomeric and polymeric materials in the mfg. of pressure-sensitive adhesives, rubber cements, emulsion adhesives, hot-melt adhesives/coatings, can sealants, caulking and general sealants; inks, paints, concrete waterproofing agents, varnishes, chewing and bubble gum bases; stabilizer; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; low m.w., thermoplastic; imparts stability in adhesive systems, resistance to attack by acids, alkalis, salts, and water, aging properties

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 3+ clear, bright color; sol. in 2-ethyl hexyl alcohol, aliphatic hydrocarbons, aromatic hydrocarbons, chlorinated hydrocarbons, ester, terpenes, ethyl ether, and petrol. ether; sp.gr. 0.98; soften. pt. (R&B) 115 C; acid no. < 1; sapon. no. < 1

#### Zonarez® B-125 [Arizona]

*Chem. Descrip.:* Polyterpene resin  
CAS 9003-74-1

*Uses:* Polymer imparting high levels of tack and adhesion to many elastomeric and polymeric materials in the mfg. of pressure-sensitive adhesives, rubber cements, emulsion adhesives, hot melt adhesives/coatings, can sealants, caulking and general sealants; inks, paints, concrete waterproofing agents, varnishes, chewing and bubble gum bases; stabilizer; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; low m.w., thermoplastic; imparts stability in adhesive systems, resistance to attack by acids, alkalis, salts, and water, aging properties

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 3+ clear, bright color; sol. in 2-ethyl hexyl alcohol, aliphatic hydrocarbons, aromatic hydrocarbons, chlorinated hydrocarbons, ester, terpenes, ethyl ether, and petrol. ether; sp.gr. 0.97; soften. pt. (R&B) 125 C; acid no. < 1; sapon. no. < 1

#### Zonarez® M-1115 [Arizona]

*Chem. Descrip.:* Polyterpene resin produced from  $\beta$ -pinene  
CAS 9003-74-1

*Uses:* Tackifier resin for mfg. of pressure-sensitive adhesives used in tapes and labels, solv.-based adhesives, emulsion adhesives, hot-melt adhesives and coatings; food pkg. adhesives, pressure-sensitive adhesives,

coatings, paper, closures with sealing gaskets for food containers; oxidation-resist., low m.w. thermoplastic; rec. for adhesive systems based on the thermoplastic block copolymer Kraton® 1107, and also natural rubber-based adhesives

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210

*Properties:* Water-wh. bright clear color; sp.gr. 0.98; sol. in aliphatic, aromatic, and chlorinated HC, esters, terpenes, drying oils, rosin, and rosin derivs.; soften. pt. (R&B) 115 C; flash pt. (CC) > 400 F

#### Zonarez® T-4115 [Arizona]

*Chem. Descrip.:* Polyterpene resin  
CAS 9003-74-1

*Uses:* Tackifier for adhesives, food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 2 color; soften. pt. (R&B) 115 C

#### Zonatac® 105 [Arizona]

*Chem. Descrip.:* Styrenated terpene hydrocarbon resin  
CAS 9003-74-1

*Uses:* Tackifier in hot-melt adhesives and coatings, hot-melt pressure-sensitive adhesives, and solv.-based thermoplastic elastomer pressure-sensitive adhesive systems; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; light-colored, low odor thermoplastic

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 3+ color; sp.gr. 1.02; soften. pt. (R&B) 105 C; flash pt. (CC) 480 F

#### Zonatac® 105L [Arizona]

*Chem. Descrip.:* Styrenated terpene hydrocarbon resin  
CAS 9003-74-1

*Uses:* Tackifier in hot-melt adhesives and coatings, hot-melt pressure-sensitive adhesives, and solv.-based thermoplastic elastomer pressure-sensitive adhesive systems; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; light-colored, low odor thermoplastic

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Water-wh.; sp.gr. 1.02; soften. pt. (R&B) 105 C; flash pt. (CC) 480 F

#### Zonatac® 115L [Arizona]

*Chem. Descrip.:* Styrenated terpene hydrocarbon resin  
CAS 9003-74-1

*Uses:* Tackifier in hot-melt adhesives and coatings, hot-melt pressure-sensitive adhesives, and solv.-based thermoplastic elastomer pressure-sensitive adhesive systems; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; light-colored, low odor thermoplastic

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Water-wh.; sp.gr. 1.02; soften. pt. (R&B) 115 C; flash pt. (CC) 480 F

#### Zonatac® 501 [Arizona]

*Chem. Descrip.:* Styrenated terpene resin  
CAS 9003-74-1

*Uses:* Tackifier for food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 3+ color; soften. pt. (R&B) 105 C

#### Zonatac® 501L [Arizona]

*Chem. Descrip.:* Styrenated terpene resin  
CAS 9003-74-1

*Uses:* Tackifier for food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 3- color; soften. pt. (R&B) 105 C

#### Zonatac® M-105 [Arizona]

*Chem. Descrip.:* Styrenated terpene resin  
CAS 9003-74-1

*Uses:* Tackifier for adhesives, food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 1+ color; soften. pt. (R&B) 105 C

#### Zonester® 25 [Arizona]

*Chem. Descrip.:* Rosin ester

*Uses:* Tackifier for adhesives, food pkg. adhesives, coatings, paper, closures with sealing gaskets in food containers; defoamer in food-contact paper/

paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 177.1210  
*Properties:* Gardner 7 max. color; soften. pt. (R&B) 26 C; acid no. 20-24

**Zonester® 85** [Arizona]  
*Chem. Descrip.:* Tall oil glycerides  
 CAS 97722-02-6; EINECS/ELINCS 307-751-6  
*Uses:* Tackifier for NR, SBR, IR, SBS, SIS, in chewing gums, hot-melt adhesives, hot-melt coatings, mastic adhesives, contact cements, and pressure-sensitive adhesives; food pkg. adhesives, pressure-sensitive adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard; thermoplastic resin ester  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1210, 178.3870  
*Properties:* Gardner 8 max. solid or flakes; sp.gr. 1.06; soften. pt. (R&B) 82 C; acid no. 10 max.; flash pt. (CC) > 400 F

**Zonester® 100** [Arizona]  
*Chem. Descrip.:* Pentaerythritol ester of tall oil rosin  
 CAS 8050-26-8; EINECS/ELINCS 232-479-9  
*Uses:* Tackifier for NR, SBR, IR, SBS, hot-melt adhesives, mastic adhesives, contact cements, and pressure-sensitive adhesives; in emulsion form used in SBR, natural rubber, and neoprene latex adhesives; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; defoamer in food-contact paper/paperboard; high-melting  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 177.1210  
*Properties:* Amber; sp.gr. 1.06; soften. pt. (R&B) 94 C; flash pt. (CC) > 400 F; acid no. 14 max.

**Zonyl® A** [DuPont]  
*Chem. Descrip.:* EO-ester condensate  
*Uses:* Emulsifier; lubricant; textile wetting agent for fibers and fabrics during dyeing; leveling agent and antifoam in pigment coatings in paper industry; used in metal processing  
*Properties:* Clear-pale yel. liq.; mild odor; sol. in water, polar and nonpolar solvs.; sp.gr. 1.07; HLB 6.7; surf. tens. 26 dynes/cm (0.1% aq.); 100% act.; nonionic

**Zonyl® FSA** [DuPont; DuPont Canada]  
*Chem. Descrip.:* Fluorochemical surfactant  
*Uses:* Wetting agent, emulsifier, dispersant, corrosion inhibitor, leveling agent for adhesives, agric., polishes, polymerization, pigment grinding, cleaners, fire fighting, paper, ink, oil, plastics, and textile industries; mold release and calcium sulfate scale removal in polymer processing; leveling agent and gloss aid in paints and coatings  
*Properties:* Liq.; sol > 2% in water, methanol; sp.gr. 1.03 mg/m<sup>3</sup>; dens. 8.6 lb/gal; flash pt. (PMCC) 21 C; surf. tens. 18 dynes/cm (0.1%); Ross-Miles foam 100 mm (0.1%, initial, 41 C); 25% solids in water/IPA (1:1); anionic  
*Precaution:* Flamm.

**Zonyl® FSB** [DuPont]  
*Chem. Descrip.:* Fluorochemical surfactant  
*Uses:* Wetting agent, emulsifier, dispersant, corrosion inhibitor, leveling agent for adhesives, agric., polishes, polymerization, pigment grinding, cleaners, coatings and paints, fire fighting, paper, ink, oil, plastics, and textile industries; foamer, froth flotation agent for solv. cleaners, elastomers  
*Properties:* Liq.; sol. > 2% in water, IPA, methanol; dens. 8.8 lb/gal; flash pt. 67 F (PMCC); surf. tens. 17 dynes/cm (0.1%); 40% solids in IPA/water; amphoteric

**Zonyl® FSC** [DuPont; DuPont Canada]  
*Chem. Descrip.:* Fluorochemical surfactant  
*Uses:* Wetting agent, emulsifier, dispersant, corrosion inhibitor, leveling agent for adhesives, agric., polishes, polymerization, pigment grinding, cleaners, coatings and paints, fire fighting, paper, ink, oil, plastics, and textile industries; foamer, froth flotation agent for solv. cleaners, elastomers  
*Properties:* Liq.; sol. > 2% in water, IPA, methanol, acetone; sp.gr. 1.16 mg/

m<sup>3</sup>; dens. 9.7 lb/gal; flash pt. (PMCC) 21 C; surf. tens. 19 dynes/cm (0.1% aq.); 50% solids in water/IPA (25:25); cationic  
*Precaution:* Flamm.

**Zonyl® FSN** [DuPont]  
*Chem. Descrip.:* Fluorochemical surfactant  
*Uses:* Wetting agent, emulsifier, dispersant, corrosion inhibitor, leveling agent for adhesives, agric., polishes, polymerization, pigment grinding, cleaners, fire fighting, paper, ink, oil, plastics, and textile industries; antifogging agent in polymer processing; leveling agent, gloss aid, antisoiling aid, flow rheology modifier for paints and coatings  
*Properties:* Liq.; sol. > 2% in water, IPA, methanol, acetone, ethyl acetate, THF; sp.gr. 1.06 mg/m<sup>3</sup>; dens. 8.8 lb/gal; flash pt. (PMCC) 22 C; surf. tens. 23 dynes/cm (0.1%); Ross-Miles foam 145 mm (0.1%, initial, 41 C); 40% solids in water/IPA (30:30); nonionic  
*Precaution:* Flamm.

**Zonyl® FSP** [DuPont]  
*Chem. Descrip.:* Fluorochemical surfactant  
*Uses:* Wetting agent, emulsifier, dispersant, corrosion inhibitor, leveling agent, antifoam for adhesives, agric., polishes, polymerization, pigment grinding, cleaners, fire fighting, paper, ink, oil, plastics, and textile industries; lubricant, mold release, and calcium sulfate scale removal in polymer processing; leveling agent and gloss aid in paints and coatings; flow rheology modified  
*Properties:* Liq.; sol. > 2% in water, methanol; sp.gr. 1.15 mg/m<sup>3</sup>; dens. 9.6 lb/gal; flash pt. (PMCC) 24 C; surf. tens. 21 dynes/cm (0.1%); Ross-Miles foam 35 mm (0.1%, initial, 41 C); 35% solids in water/IPA (45:20); anionic  
*Precaution:* Flamm.

**Zonyl® NF** [DuPont; DuPont Canada]  
*Chem. Descrip.:* Fluorochemical surfactant  
*Uses:* Fluoridizer, wetting agent, oil and grease repellent for paper and paperboard, food and beverage pkg.  
*Properties:* Liq.; 95% conc.; anionic

**Zonyl® RP** [DuPont; DuPont Canada]  
*Chem. Descrip.:* Fluorochemical surfactant  
*Uses:* Fluoridizer, wetting agent, oil and grease repellent for paper and paperboard, food and beverage pkg.  
*Properties:* Amber liq.; sol. in water; dens. 9.5 lb/gal; visc. 10 cps; flash pt. > 28 C; pH 7-8; 34% conc.; anionic

**Zusolat 1004** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol polyglycol ether (4 EO)  
*Uses:* Basic material for mfg. of washing and cleaning agents, dishwasher, metal cleaners, household and industrial cleaners; aux. prods. for leather, textile, and paper industries  
*Properties:* Colorless liq.; water-disp.; cloud pt. 57-61 C (5 g/20 ml 25% BDG); pH 6 (10%); 100% act.; nonionic

**Zusolat 1005/85** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol polyglycol ether (5 EO)  
*Uses:* Dispersant, emulsifier, wetting agent for mfg. of washing and cleaning agents, dishwasher, household/industrial and metal cleaners, textile, leather, and paper aux.  
*Properties:* Colorless liq.; water-sol.; cloud pt. 65-68 C (5 g/20 ml butyl diglycol 25%); pH 5-7 (10%); 85% act. in water; nonionic

**Zusolat 1008/85** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol polyglycol ether (8 EO)  
*Uses:* Washing and cleansing agent for dishwasher, industrial/household and metal cleaners, textile, leather and paper aux.  
*Properties:* Colorless liq.; water-sol.; cloud pt. 66-70 C (1% aq.); pH 5-7 (10%); 85% act. in water; nonionic

**Zusolat 1010/85** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol polyglycol ether (10 EO)  
*Uses:* Washing and cleansing agent for dishwasher, industrial/household and metal cleaners, textiles, leather and paper aux.  
*Properties:* Colorless liq.; water-sol.; cloud pt. 87-91 C (1% aq.); pH 5-7 (10%); 85% act. in water; nonionic

## Acetic acid

CAS 64-19-7; EINECS/ELINCS 200-580-7; UN No. 2789 (DOT), 2790 (DOT); FEMA 2006

**Synonyms:** Ethanoic acid; Ethyllic acid; Methanecarboxylic acid; Pyroigneous acid; Vinegar acid

**Classification:** Aliphatic organic acid

**Empirical:** C<sub>2</sub>H<sub>4</sub>O<sub>2</sub>

**Formula:** CH<sub>3</sub>COOH

**Properties:** Clear colorless liq., pungent odor, sharply acid taste; misc. with water, alcohol, glycerol, ether; insol. in carbon disulfide; m.w. 60.03; dens. 1.0492 (20/4 C); m.p. 16.63 C; b.p. 118 C (765 mm); visc. 1.22 cps (20 C); vapor pressure 11.4 mm Hg (20 C); flash pt. (OC) 43 C; ref. index 1.3715 (20 C)

**Toxicology:** ACGIH TLV/TWA 10 ppm; STEL 15 ppm; LD50 (oral, rat) 3310 mg/kg, (skin, rabbit) 1060 mg/kg; mod. toxic by ingestion, inhalation; corrosive; strong irritant to eyes, skin, and tissue; caustic; can cause burns, lachrymation; human systemic effects by ing.; experimental reproductive effects; mutation data reported; TSCA listed

**Precaution:** Flamm.; moderate fire and explosion hazard exposed to heat or flame; can react vigorously with oxidizers; explosive or violent reactions possible; incompat. with many chems.; a common air contaminant

**Hazardous Decom. Prods.:** Heated to decomp., emits irritating fumes

**NFPA:** Health 2; Flammability 3; Reactivity 0

**Uses:** Mfg. of acetic anhydride, cellulose acetate, vinyl acetate monomer; acetic esters; prod. of plastics, pharmaceuticals, cosmetics, aroma chems., dyes, insecticides, photographic chemicals, food additives; solvent reagent; acidifier; flavoring agent; etchant (semiconductor mfg.); aluminum brightener; laundry sour; boiler water additive; coagulant for latex; buffer in cosmetics; solvent/vehicle in foods, pharmaceuticals; color diluent; sanitizing solutions for food contact

**Use Level:** 39 ppm (nonalcoholic beverages), 32 ppm (ice cream), 52 ppm (candy), 38 ppm (baked goods), 15 ppm (pudding), 60 ppm (chewing gum), 5900 ppm (condiments); ADI no limit (EU)

**Regulatory:** FDA 21CFR §73.85, 133, 172.814, 178.1010, 184.1005, GRAS; USDA 9CFR §318.7; BP; Europe listed; UK approved; USP/NF, BP compliance

**Acetic acid, bromo-, ethylene ester.** See 1,2-Bis (bromoacetoxy) ethane

**Acetic acid 2-butoxy ester.** See s-Butyl acetate

**Acetic acid 2-butyl ester.** See s-Butyl acetate

**Acetic acid, s-butyl ester.** See s-Butyl acetate

**Acetic acid, cellulose ester.** See Cellulose acetate

**Acetic acid, cobalt (2+) salt, tetrahydrate.** See Cobalt acetate (ous)

**Acetic acid, ethenyl ester.** See Vinyl acetate

**Acetic acid, ethenyl ester, homopolymer.** See Polyvinyl acetate

**Acetic acid ethenyl ester polymer with chloroethene.** See Vinyl chloride/vinyl acetate copolymer

**Acetic acid ethenyl ester, polymer with chloroethene.** See Vinyl chloride/vinyl acetate copolymer

**Acetic acid, ethenyl ester, polymer with ethene.** See Ethylene/VA copolymer

**Acetic acid, (ethylene dinitrilo) tetra-, calcium disodium salt.** See Calcium disodium EDTA

**Acetic acid, (ethylenedinitrilo) tetra-, tetrasodium salt.** See Tetrasodium EDTA

**Acetic acid, (ethylenedinitrilo) tetra-, trisodium salt.** See Trisodium EDTA

**Acetic acid, ethylene ether.** See Vinyl acetate

**Acetic acid, ethyl ester.** See Ethyl acetate

**Acetic acid, hydroxy-, compd. with N-[3-(dimethylamine) propyl] soyamide.** See Soyamidopropyl dimethylamino glycolate

**Acetic acid isopropyl ester.** See Isopropyl acetate

**Acetic acid, 2-methoxy-1-methylethyl ester.** See Propylene glycol methyl ether acetate

**Acetic acid 1-methylethyl ester.** See Isopropyl acetate

**Acetic acid 1-methylpropyl ester.** See s-Butyl acetate

**Acetic acid potassium salt.** See Potassium acetate

**Acetic acid propyl ester.** See Propyl acetate

**Acetic acid n-propyl ester.** See Propyl acetate

**Acetic acid, vinyl ester.** See Vinyl acetate

**Acetic acid, vinyl ester compd. with chloroethene.** See Vinyl chloride/vinyl acetate copolymer

**Acetic acid, vinyl ester, polymer.** See Polyvinyl acetate

**Acetic acid, vinyl ester, polymer with chloroethylene.** See Vinyl chloride/vinyl acetate copolymer

**Acetic acid vinyl ester polymers.** See Polyvinyl acetate

**Acetic acid, zirconium salt.** See Zirconium acetate

**Acetic ester.** See Ethyl acetate

**Acetic ether.** See Ethyl acetate

**Acetic, 1,2,3-propanetriyl ester.** See Triacetin

**Acetin.** See Triacetin

**Acetodiphosphonic acid.** See Etidronic acid

#### Acetone

CAS 67-64-1; EINECS/ELINCS 200-662-2; UN No. 1090 (DOT), 1091 (DOT); FEMA 3326

**Synonyms:** DMK; Acetone oils; Dimethylketone; Dimethylketal; Dimethyl formaldehyde; Ketone, dimethyl; Ketone propane;  $\beta$ -Ketopropane; Methyl ketone; Propanone; 2-Propanone; Pyroacetic acid; Pyroacetic ether

**Classification:** Aliphatic ketone

**Empirical:** C<sub>3</sub>H<sub>6</sub>O

**Formula:** CH<sub>3</sub>COCH<sub>3</sub>

**Properties:** Colorless volatile transparent liq., sweetish odor, pungent sweetish taste; sol. in water, alcohol, chloroform, dimethylformamide, ether, most volatile oils; m.w. 58.09; sp.gr. 0.792 (20/20 C); vapor pressure 400 mm Hg (39.5 C); m.p. -94.3 C; b.p. 56.2 C; flash pt. (CC) -18 C

**Toxicology:** ACGIH TLV/TWA 750 ppm; STEL 1000 ppm; LD50 (oral, mouse) 3000 mg/kg; narcotic in high conc.; moderately toxic by ingestion and inhalation; lg. doses may cause narcosis; extreme concs. may cause collapse, coma, death; inh. irritates lungs; ing. may cause throat, esophagus, and stomach irritation; peeling and splitting of nails, skin rashes; eye irritant; common air contaminant; TSCA listed

**Environmental:** BOD 0.31-1.63; COD 1.12-2.07

**Precaution:** DOT: flamm. liq.; dangerous fire risk; explosive limit in air 2.6-12.8%; reacts violently with oxidizing agents, chlorinated solv./alkali mixts.; reacts vigorously with sulfur dichloride, potassium t-butoxide, hexachloromelamine

**Hazardous Decomp. Prods.:** Complete combustion yields CO<sub>2</sub>, water vapor; incomplete combustion can produce CO

**NFPA:** Health 1; Flammability 3; Reactivity 0

**Storage:** Store in cool, dry, well-ventilated area, out of direct sunlight

**Uses:** Solvent for paints, varnishes, lacquers, resins, fats, waxes, adhesives, printing inks, cellulose resins, plastics, pharmaceuticals; degreasing agent; for cleaning and drying precision equip.; delustrant for cellulose acetate fibers; extraction solvent for foods, essential oils; mfg. of acetate rayon, photographic film, paint removers, glues, cements, plastics, rubber, dyes, explosives; denaturant, solvent in cosmetics; color diluent for foods; flavoring agent; in food-pkg. adhesives; adjuvant in resinous/polymeric food-contact coatings; adjuvant in slimicides in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §73.1, 73.30, 73.345, 73.615, 173.210, 175.105, 175.320, 176.300, 182.99; 40CFR §180.1001; 30 ppm tolerance in spice oleoresins; FEMA GRAS; Japan approved with restrictions; USP/NF, BP compliance; VOC-exempt

**Manuf./Distrib.:** Aldrich; Alfrebro; Allchem Ind.; Amyl; Arch Chems.; Aristech; Ashland; Atofina; BASF; BP Amoco; BP Chems. Ltd; Baychem; C.P. Hall; Captree; Chemcentral; Chemconnect; Chemical; Columbus Chem. Ind.; Dow; E-Chemicals; Eastman; Exxon; Fisher Scientific; Fluka; GE Plastics; General Chem.; Georgia Gulf; Haltermann Prods. UK; Harcros; Herdillia Chems. Ltd; Honeywell Perf. Polymers; Houghton Chem.; Hukill; J.T. Baker; JLM Marketing; Kyowa Hakko Kogyo; Mitsubishi Chem.; Nippon Petrochems.; Phenolchemie; Primachem; Quaker City; R.E. Carroll; Romil Ltd; Ruger; Sal Chem.; Samson; Seeler Ind.; Shell; Sigma; Spectrum Quality Prods.; Sumitomo Chem.; Sunnyside; Sunoco; Texaco; Total Spec. Chems.; Union Carbide; Van Waters & Rogers; Veckridge

**Trade Names Containing:** Cerol® M Liq.

**Acetone oils.** See Acetone

**Acetose.** See Cellulose acetate

**Acetoxyethane.** See Ethyl acetate

**1-Acetoxyethylene.** See Vinyl acetate

**Acetoxyyl.** See Benzoyl peroxide

**(Acetoxymercuri) benzene.** See Phenylmercuric acetate

**2-Acetoxy-1-methoxypropane.** See Propylene glycol methyl ether acetate

**2-Acetoxypropane.** See Isopropyl acetate

**Acetoxyphenylmercury.** See Phenylmercuric acetate

**1-Acetoxypropane.** See Propyl acetate

**2-Acetoxypropane.** See Isopropyl acetate

**4-[[4-Acetyl( amino) phenyl] amino]-1-amino-9,10-dihydro-9,10-dioxo-2-anthracenesulfonic acid, monosodium salt.** See Acid blue 40

**5-(4-Acetyl( amino)-2-sulfophenylazo)-6-amino-4-hydroxy naphthalene-2-sulfonic acid, disodium salt.** See Acid red 37

**Acetyl butyl citrate.** See Acetyl tributyl citrate

**Acetylcellulose.** See Cellulose acetate

**Acetylcitric acid, tributyl ester.** See Acetyl tributyl citrate

**Acetylene black.** See Carbon black

**Acetylenic glycol.** See Tetramethyl decynediol

**Acetyl hydroperoxide.** See Peracetic acid

**2-(Acetyloxy)-1,2,3-propanetricarboxylic acid, tributyl ester.** See Acetyl tributyl citrate

**2-(Acetyloxy)-1,2,3-propanetricarboxylic acid, triethyl ester.** See Acetyl triethyl citrate

#### Acetyl peroxide

CAS 110-22-5; EINECS/ELINCS 203-748-8; UN No. 2084

**Synonyms:** Diacetone peroxides; Diacetyl peroxide

**Classification:** Organic peroxide

**Empirical:** C<sub>4</sub>H<sub>6</sub>O<sub>4</sub>

**Formula:** (CH<sub>3</sub>CO)<sub>2</sub>O<sub>2</sub>

**Properties:** Colorless crystals; very pungent odor; sl. sol. in cold water, sol. in alcohol and ether; m.w. 118.10; dens. 1.18 (20 C); f.p. ≈ -8 C; m.p. 30 C; b.p. 63 C (21 mm); flash pt. (OC) 45 C

**Toxicology:** TDLo (unreported, mouse) 283 mg/kg; strong irritant to skin, eyes, mucous membranes; questionable carcinogen; experimental tumorigen; TSCA listed

**Precaution:** Flamm.; mod. fire risk; strong oxidizer; can cause ignition of organics on contact; severe explosion hazard when shocked or exposed to heat; reacts with water or steam to produce heat; can react vigorously with reducing materials

**Hazardous Decomp. Prods.:** Emits toxic fumes on contact with acid or acid fumes

**NFPA:** Health 1; Flammability 2; Reactivity 4

**Storage:** Should not be stored after preparation, nor heated above 30 C; store in original container with vented cap

**Uses:** Initiator and catalyst for resins; polymerization catalyst for paper/paperboard in contact with aq./fatty foods; food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105, 176.170

#### Acetyl tributyl citrate

CAS 77-90-7; EINECS/ELINCS 201-067-0; FEMA 3080

**Synonyms:** ATBC; Acetyl butyl citrate; Acetylcitric acid, tributyl ester; 2-(Acetyloxy)-1,2,3-propanetricarboxylic acid, tributyl ester; Acetyl tri-n-butyl citrate; Citric acid, tributyl ester, acetate; 1,2,3-Propanetricarboxylic acid, 2-(acetyloxy)-, tributyl ester; Tributyl acetyl citrate; Tributyl O-acetylcitrate; Tri-n-butyl O-acetylcitrate; Tributyl 2-(acetyloxy)-1,2,3-propanetricarboxylate; Tributyl citrate acetate; Tri-n-butyl citrate acetate

**Classification:** Aliphatic ester

**Definition:** Ester of citric acid

**Empirical:** C<sub>20</sub>H<sub>34</sub>O<sub>8</sub>

**Formula:** CH<sub>3</sub>COOC<sub>3</sub>H<sub>7</sub>(COOC<sub>3</sub>H<sub>7</sub>)<sub>3</sub>

**Properties:** Colorless sl. visc. liq., sweet herbaceous odor; sol. in alcohol; insol. in water; m.w. 402.49; dens. 1.14; b.p. > 300 C; flash pt. 204 C; ref. index 1.4408

**Toxicology:** LD50 (IP, mouse) > 4 g/kg; low toxicity by ing., skin contact, and IP routes; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Plasticizer for vinyl resins, cellulosic resins, rubber, food pkg.; synthetic flavoring for foods and pharmaceuticals; solvent in household, I&I cleaners; solvent, film-former, and plasticizer for inks, adhesives, coatings; film-former in cosmetics; in surf. lubricants for mfg. of food-contact metallic articles

**Regulatory:** FDA 21CFR §172.515, 175.105, 175.300, 175.320, 178.3910, 181.22, 181.27; FEMA GRAS

**Manuf./Distrib.:** AC Ind.; Aldrich; Allan; Allchem Ind.; Jungbunzlauer; Kyowa Hakko Kogyo; Morflex; Pechiney World Trade USA; Pfizer Int'l.; Reilly Chems. SA; Sanken Chem.; Unitex

*Trade Names:* ATBC; Citroflex® A-4; Citroflex® A-4 Special; Uniplex 84

**Acetyl tri-n-butyl citrate.** See Acetyl tributyl citrate

**Acetyl triethyl citrate**

CAS 77-89-4; EINECS/ELINCS 201-066-5

*Synonyms:* ATEC; 2-(Acetyloxy)-1,2,3-propanetricarboxylic acid, triethyl ester; Tricarballic acid-β-acetoxytributyl ester; Triethyl acetylcitrate; Triethyl o-acetylcitrate

*Classification:* Aliphatic ester

*Empirical:* C<sub>14</sub>H<sub>22</sub>O<sub>8</sub>

*Formula:* CH<sub>3</sub>COOC<sub>2</sub>H<sub>5</sub>(COOC<sub>2</sub>H<sub>5</sub>)<sub>3</sub>

*Properties:* Colorless liq.; odorless; sl. sol. in water; m.w. 318.36; dens. 1.135 (25 C); m.p. -50 C; flash pt. 187 C

*Toxicology:* Moderate toxicity by intraperitoneal route; mild toxicity by ingestion; TSCA listed

*Precaution:* Combustible

*Uses:* Plasticizer for cellulose, primarily ethyl cellulose, food pkg.; solvent for household, I&I cleaners, pharmaceuticals; plasticizer for pharmaceutical coatings; film-former in cosmetics; solvent, film-former, plasticizer for inks, adhesives, coatings; in food-pkg. adhesives; in surf. lubricants for mfg. of food-contact metallic articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 178.3910, 181.22, 181.27

*Manuf./Distrib.:* Aldrich; Morflex; Pfizer Ltd; Unitec

*Trade Names:* ATEC; Citroflex® A-2

**Acid blue 1**

CAS 129-17-9; EINECS/ELINCS 204-934-1

*Synonyms:* Ammonium, (4-(α-(p-(diethylamino) phenyl)-2,4-disulfobenzylidene)-2,5-cyclohexadien-1-ylidene) diethyl-, hydroxide, monosodium salt; Anhydro-4,4'-bis (diethylamino) triphenylmethanol-2',4''-disulfonic acid, monosodium salt; CI 42045; 4,4'-Di (diethylamino)-4',6''-disulfotriphenylmethanol anhydride, sodium salt; N-[4-[[4-(Diethylamino) phenyl] (2,4-disulfophenyl) methylene]-2,5-cyclohexadien-1-ylidene]-N-ethylethaniminium, hydroxide, inner salt, sodium salt; Ethanaminium, N-4-[[4-(diethylamino) phenyl] (2,4-disulfophenyl) methylene]-2,5-cyclohexadien-1-ylidene]-N-ethyl-, hydroxide, inner salt, sodium salt; Food blue 3; Leather blue G; Patent blue; Patent blue VF; Sulfan blue

*Classification:* Triphenylmethane color

*Empirical:* C<sub>27</sub>H<sub>31</sub>N<sub>2</sub>NaO<sub>6</sub>S<sub>2</sub>

*Properties:* Purple or dk. greenish-blk. powd.; sol. ≥ 1 g/100 ml in water (21 C); m.w. 566.67; m.p. 0 C

*Toxicology:* LD50 (IV, rat) 5 g/kg, (IP, mouse) 3 g/kg; LD (oral, rat) > 3 g/kg; harmful by ing., inh., skin contact; possible risk of irreversible effects; may cause anaphylaxis, reproductive system tumors; possible carcinogen, neoplastigen; tumorigen; mutagen; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* N, NO<sub>x</sub>, CO, CO<sub>2</sub>, SO<sub>x</sub>, irritating and toxic fumes and gases

*Storage:* Store in cool, dry place; keep container closed when not in use

*Uses:* Dye for wool, silk, inks, and paper; colorant in hair dyes

*Manuf./Distrib.:* Acros Org.; Aldrich; Dudley; Sigma

**Acid blue 20**

CAS 8004-99-7

*Synonyms:* CI 50405; Indulin B

*Uses:* Acid dye for paper, leather, wax

*Manuf./Distrib.:* Sigma

**Acid blue 29**

CAS 5850-35-1; EINECS/ELINCS 227-449-7

*Synonyms:* 4-Amino-5-hydroxy-3-[(m-nitrophenyl) azo]-6-(phenylazo)-2,7-naphthalenedisulfonic acid, 2,7-disodium salt; CI 20460; 2,7-Naphthalenedisulfonic acid, 4-amino-5-hydroxy-3-[(3-nitrophenyl) azo]-6-(phenylazo)-, disodium salt

*Classification:* Azobenzene

*Empirical:* C<sub>22</sub>H<sub>14</sub>N<sub>6</sub>Na<sub>2</sub>O<sub>9</sub>S<sub>2</sub>

*Properties:* M.w. 616.49

*Uses:* Dye for wool, silk, polyamide, and paper

*Manuf./Distrib.:* Aldrich; Sigma

**Acid blue 40**

CAS 642-85-7; EINECS/ELINCS 229-190-5

*Synonyms:* 4-[[4-Acetylamino) phenyl] amino]-1-amino-9,10-dihydro-9,10-dioxo-2-anthracenesulfonic acid, monosodium salt; CI 62125

*Classification:* Azobenzene

*Empirical:* C<sub>22</sub>H<sub>16</sub>N<sub>2</sub>NaO<sub>6</sub>S

*Properties:* M.w. 473.44

*Uses:* Dye for wool, silk, polyamide, and paper

*Manuf./Distrib.:* Aldrich

**Acid blue 9 aluminum lake.** See FD&C Blue No. 1 aluminum lake

**Acid brilliant green SF.** See Acid green 5

**Acid butyl phosphate.** See Butyl acid phosphate

**Acid green 1**

CAS 19381-50-1; EINECS/ELINCS 243-010-2

*Synonyms:* CI 10020; D&C Green No. 1; Ext. D&C Green No. 1; Ferrate(3-), tris [5,6-dihydro-5-(hydroxyimino)-6-oxo-2-naphthalenesulfonato(2-)-N<sup>5</sup>,O<sup>6</sup>]-, trisodium; Iron, tris (5,6-dihydro-5,6-dioxo-2-naphthalenesulfonic acid-5-oximate)-, trisodium salt; Naphthol green; Naphthol green B; Pigment green 12; Sodium tris (1,2-naphthalenedione 1-oximate-O,O') ferrate (II); Tris [5,6-dihydro-5-(hydroxyimino)-6-oxo-2-naphthalenesulfonato(2-)-N<sup>5</sup>,O<sup>6</sup>] ferrate (3), trisodium

*Classification:* Azobenzene; nitroso color

*Empirical:* C<sub>30</sub>H<sub>15</sub>FeN<sub>3</sub>O<sub>15</sub>S<sub>3</sub> • 3Na

*Properties:* M.w. 878.47

*Toxicology:* LD50 (IV, mouse) 460 mg/kg; mutagen; TSCA listed

*Uses:* Dye for wool, paper, polyamides, and cosmetics; colorant in hair dyes

*Manuf./Distrib.:* ABCR; Acros Org.; Aldrich; Dudley; Fluka; Sigma

**Acid green 5**

CAS 5141-20-8; EINECS/ELINCS 225-906-5

*Synonyms:* Acid brilliant green SF; Ammonium, ethyl (4-(p-(ethyl-(m-sulfobenzyl) amino)-α-(p-sulfophenyl) benzylidene)-2,5-cyclohexadien-1-ylidene)-(m-sulfobenzyl)-, hydroxide, inner salt, disodium salt; CI 42095; D&C Green No. 4; N-Ethyl-N-[4-[[4-[(ethyl[(3-sulfophenyl) methyl] amino) phenyl] (4-sulfophenyl) methylene]-2,5-cyclohexadien-1-ylidene]-3-sulfobenzenemethaniminium inner salt, disodium salt; FD&C Green No. 2; FD&C Green No. 2 aluminum lake; Food green 2; Leather green SF; Light green CF; Light green SF yellowish; Light green yellowish

*Classification:* Azobenzene

*Empirical:* C<sub>37</sub>H<sub>36</sub>N<sub>2</sub>Na<sub>2</sub>O<sub>9</sub>S<sub>3</sub>

*Properties:* Reddish-brn. powd.; sol. in water; m.w. 794.91; m.p. 288 C

*Toxicology:* LD50 (oral, rat) > 2 g/kg, (subcut., mouse) 525 mg/kg, (IV, mouse) 700 mg/kg; harmful by inh., ing., skin contact; eye irritant; digestive tract irritant; possible risk of irreversible effects; may cause methemoglobinemia, wt. loss; cancer suspect agent; tumorigen; neoplastigen; reproductive effector; mutagen; target organ: male reproductive system, blood; TSCA listed

*Storage:* Store in cool, dry, well-ventilated area away from incompat. substances

*Uses:* Dye for wool, silk, polyamide, and paper; biological stain

*Regulatory:* Delisted by FDA in 1966 for use in foods, drugs, and cosmetics

*Manuf./Distrib.:* Acros Org.; Aldrich; Dudley; Fisher Scientific; Fluka; ProSciTech; Sigma

**Acid green 9**

*Synonyms:* CI 42100

*Empirical:* C<sub>37</sub>H<sub>34</sub>ClN<sub>2</sub>NaO<sub>6</sub>S<sub>2</sub>

*Properties:* M.w. 725.26

*Uses:* Dye for wool, silk, polyamide, and paper

*Manuf./Distrib.:* Aakash Chems. & Dyestuffs; Leadertech Colors; Org. Dyestuffs

**Acid green 16**

CAS 12768-78-4

*Synonyms:* Acid pure green V; CI 44025; Naphthalene green V

*Empirical:* C<sub>27</sub>H<sub>25</sub>N<sub>2</sub>NaO<sub>6</sub>S<sub>2</sub>

*Properties:* M.w. 560.62

*Toxicology:* Mutagen; TSCA listed

*Uses:* Dye for wool, silk, polyamide, paper, and plastics

*Manuf./Distrib.:* Aakash Chems. & Dyestuffs; Aashiana Dyestuffs; Albanil Dyestuff Int'l.; Classic Dyestuffs; Indo Colchem; Org. Dyestuffs

**Acid green 20**

*Synonyms:* CI 20495

*Empirical:* C<sub>22</sub>H<sub>14</sub>N<sub>4</sub>Na<sub>2</sub>O<sub>7</sub>S<sub>2</sub>

*Properties:* M.w. 586.51

*Uses:* Dye for wool, silk, polyamide, leather, and paper

*Manuf./Distrib.:* Aakash Chems. & Dyestuffs; Fabricolor; Leadertech Colors; Org. Dyestuffs; Rite Ind.

#### Acid green 25

CAS 4403-90-1; EINECS/ELINCS 224-546-6

*Synonyms:* Alizarin cyanine green F; 2,2'-(1,4-Anthraquinonylenediimino) bis (5-methylbenzenesulfonic acid) disodium salt; 6,6'-(1,4-Anthraquinonylenediimino) di-m-toluenesulfonic acid disodium salt; Benzenesulfonic acid, 2,2'-(1,4-anthraquinonylenediimino) bis (5-methyl)-, disodium salt; Benzenesulfonic acid, 2,2'-[(9,10-dihydro-9,10-dioxo-1,4-anthracenediyl) diimino] bis (5-methyl)-, disodium salt; CI 61570; D&C Green No. 5; 2,2'-[(9,10-Dihydro-9,10-dioxo-1,4-anthracenediyl) diimino] bis (5-methylbenzenesulfonic acid) disodium salt

*Classification:* Anthraquinone color

*Empirical:* C<sub>28</sub>H<sub>20</sub>N<sub>2</sub>Na<sub>2</sub>O<sub>8</sub>S<sub>2</sub>

*Properties:* Grn. powd.; sol. 0.5-1.0 g/100 ml water (21 C); sl. sol. in acetone, alcohol, pyridine; insol. in chloroform, toluene; dull blue sol'n. in conc. H<sub>2</sub>SO<sub>4</sub>, turning turquoise on dil.; m.w. 622.58; m.p. 340 C

*Toxicology:* LD50 (oral, rat) > 10 g/kg; primary irritant; irritating to eyes, skin, respiratory system; TSCA listed

*Storage:* Store in cool, dry place; keep container closed when not in use

*Uses:* Dye for wool, silk, polyamide, paper, stains, and soap; colorant in hair dyes, nylon sutures

*Regulatory:* Permitted in drugs and cosmetics, excluding use in eye area

*Manuf./Distrib.:* Acros Org.; Aldrich

**Acidic metanil yellow.** See Acid yellow 36

**Acid leather orange extra.** See Acid orange 7

**Acid metanil yellow.** See Acid yellow 36

#### Acid orange 7

CAS 633-96-5; EINECS/ELINCS 211-199-0

*Synonyms:* Acid leather orange extra; Acid orange 7 monosodium salt; Benzenesulfonic acid, 4-((2-hydroxy-1-naphthalenyl) azo)-, monosodium salt; Betanaphthol orange; CI 15510; D&C Orange No. 4; 4-[(2-Hydroxy-1-naphthalenyl) azo] benzenesulfonic acid monosodium salt; 4-(2-Hydroxy-1-naphthylazo) benzenesulfonic acid sodium salt; p-((2-Hydroxy-1-naphthyl) azo) benzenesulfonic acid sodium salt; Naphthalene Orange G; Naphthol orange; β-Naphthol orange; β-Naphthyl orange; Orange II; Persian orange; Sodium 4-[(2-hydroxy-1-naphthyl) azo] benzenesulfonate

*Classification:* Monoazo color

*Empirical:* C<sub>16</sub>H<sub>12</sub>N<sub>2</sub>NaO<sub>4</sub>S

*Formula:* C<sub>16</sub>H<sub>12</sub>N<sub>2</sub>O<sub>4</sub>S · Na

*Properties:* M.w. 351.35

*Toxicology:* TDLo (oral, male rat, 43 wks) 150 g/kg; irritating to eyes, skin, respiratory system; may cause liver and blood changes; experimental reproductive effects; mutagenic data; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of NO<sub>x</sub> and SO<sub>x</sub>

*Uses:* Orange dye for wool, silk, polyamide, and paper; colorant for cosmetics (hair dyes) and external pharmaceuticals; biological stain; pH indicator

*Regulatory:* D&C Orange No. 4; FDA 21CFR §74.1254, 74.2254, 82.1254; permanently listed

*Manuf./Distrib.:* Acros Org.; Aldrich; BFGoodrich Hilton Davis; Costec; Crompton & Knowles; Dudley; Fluka; ProSciTech; Ruger; Sigma; Warner-Jenkinson

#### Acid orange 8

CAS 5850-86-2; EINECS/ELINCS 227-458-6

*Synonyms:* CI 15575; 4-(2-Hydroxynaphthalen-1-ylazo)-3-methylbenzenesulfonic acid, sodium salt; 4-[(2-Hydroxy-1-naphthyl) azo]-3-methylbenzenesulfonic acid, monosodium salt

*Classification:* Azobenzene

*Empirical:* C<sub>17</sub>H<sub>13</sub>N<sub>2</sub>NaO<sub>4</sub>S

*Properties:* M.w. 364.35

*Toxicology:* TSCA listed

*Uses:* Dye for wool, silk, polyamide, jute, and paper

*Manuf./Distrib.:* Aldrich; Sigma

#### Acid orange 10

CAS 1936-15-8; EINECS/ELINCS 217-705-6

*Synonyms:* Acid orange 10, disodium salt; CI 16230; D&C Orange No. 3; Food orange 4; 7-Hydroxy-8-(phenylazo)-1,3-naphthalenedisulfonic acid, disodium salt; 1,3-Naphthalenedisulfonic acid, 7-hydroxy-8-(phenylazo)-, disodium salt; Orange G; 1-Phenylazo-2-naphthol-6,8-disulfonic acid, disodium salt; Wool orange G

*Classification:* Azobenzene

*Empirical:* C<sub>16</sub>H<sub>10</sub>N<sub>2</sub>Na<sub>2</sub>O<sub>7</sub>S<sub>2</sub>

*Properties:* Orange microcryst. solid; sl. odor; sol. 5-10 g/100 ml water (23.5 C); sol. < 1 mg/ml in DMSO, 95% ethanol, acetone; sl. sol. in Cello-solve; insol. in org. solvs.; m.w. 452.37; vapor pressure negligible; m.p. 300-375 C (dec.)

*Toxicology:* ACGIH 10 mg/m<sup>3</sup> total dust (nuisance particulates); TDLo (oral, rat, 15 wks continuous) 26,250 mg/kg; irritating to eyes, skin, respiratory system; may cause changes in liver/spleen wt., normocytic anemia; tumorigen; reproductive effector; mutagenic data but inconclusive; TSCA listed

*Precaution:* Probably combustible; incompat. with oxidizing agents; becomes redder and more dull when mixed with copper; almost destroyed when mixed with iron

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of CO<sub>x</sub>, NO<sub>x</sub>, SO<sub>x</sub>, disodium oxide; burning will produce oxides of carbon, nitrogen and sulfur

*Storage:* Store in cool, dry place; keep containers tightly closed

*Uses:* Dye for wool, silk, leather, paper, wood, stains, and inks; biological stain; in foods, drugs, cosmetics

*Manuf./Distrib.:* Acros Org.; Aldrich; Dudley; Fisher Scientific; Fluka; ProSciTech; Sigma

#### Acid orange 11

CAS 596-03-2; EINECS/ELINCS 209-876-0

*Synonyms:* CI 45370; CI 45370:1; D&C Orange No. 5; 4',5'-Dibromo-3',6'-dihydroxyspiro [isobenzofuran-1(3H),9'-(9H)] xanthen-3-one; 4,5-Dibromo-3,6-fluorandiol; Dibromofluorescein; 4',5'-Dibromofluorescein; 2-(4,5-Dibromo-6-hydroxy-3-oxo-3H-xanthen-9-yl) benzoic acid; Eosinic acid; Fluorescein, 4',5'-dibromo-; Japan orange 201; Solvent red 72; Spiro (isobenzofuran-1(3H),9'-(9H) xanthen)-3-one, 4',5'-dibromo-3',6'-dihydroxy-

*Classification:* Azobenzene

*Empirical:* C<sub>20</sub>H<sub>10</sub>Br<sub>2</sub>O<sub>5</sub>

*Properties:* Red plates; sol. in ethanol, acetone; sl. sol. in water; m.w. 490.12; m.p. 285 C

*Toxicology:* TDLo (oral, rat, 21 days continuous) 15,556 mg/kg; may cause changes in urine and serum composition, changes in ovarian wt.; mutagen; TSCA listed

*Uses:* Dye for wool, silk, and paper; D&C Orange No. 5 as colorant in lipsticks, mouthwashes, and dentifrices

*Manuf./Distrib.:* ABCR; Acros Org.; Aldrich; Dudley; Fluka; Sigma

#### Acid orange 51

CAS 8003-88-1; EINECS/ELINCS 232-328-7

*Synonyms:* CI 26550

*Classification:* Azobenzene

*Empirical:* C<sub>38</sub>H<sub>28</sub>N<sub>4</sub>Na<sub>2</sub>O<sub>11</sub>S<sub>3</sub>

*Properties:* M.w. 919.81

*Toxicology:* TSCA listed

*Uses:* Dye for wool, silk, polyamide, paper, and resins

*Manuf./Distrib.:* Aldrich; Sigma

**Acid orange 10, disodium salt.** See Acid orange 10

**Acid orange 7 monosodium salt.** See Acid orange 7

**Acid pure green V.** See Acid green 16

#### Acid red 4

CAS 5858-39-9; EINECS/ELINCS 227-490-0

*Synonyms:* Acid red 4, monosodium salt; CI 14710; 4-Hydroxy-3-(2-methoxyphenylazo) naphthalene-1-sulfonic acid, sodium salt; 1-Naphthalenesulfonic acid, 4-hydroxy-3-((2-methoxyphenyl) azo)-, monosodium salt

*Classification:* Azobenzene

*Empirical:* C<sub>17</sub>H<sub>14</sub>N<sub>2</sub>NaO<sub>5</sub>S

*Properties:* M.w. 381.35

*Toxicology:* TSCA listed  
*Uses:* Dye for wool, paper  
*Manuf./Distrib.:* Aldrich; Sigma

**Acid red 26**

CAS 3761-53-3; EINECS/ELINCS 223-178-3  
*Synonyms:* Acid red 26, disodium salt; CI 16150; D&C Red No. 5; 4-((2,4-Dimethylphenyl)azo)-3-hydroxy-2,7-naphthalenedisulfonic acid, disodium salt; Disodium (2,4-dimethylphenylazo)-2-hydroxynaphthalene-3,6-disulfonate; Food red 5; 3-Hydroxy-4-(2,4-xylylazo)-3,7-naphthalenedisulfonic acid, disodium salt; 2,7-Naphthalenedisulfonic acid, 3-hydroxy-4-(2,4-xylylazo)-, disodium salt; Ponceau MX; Ponceau red; Xylidine ponceau; Xylidine red; 1-Xylylazo-2-naphthol-3,6-disulfonic acid, disodium salt; 1-(2,4-Xylylazo)-2-naphthol-3,6-disulfonic acid, disodium salt

*Classification:* Azobenzene

*Empirical:* C<sub>18</sub>H<sub>14</sub>N<sub>2</sub>Na<sub>2</sub>O<sub>5</sub>S<sub>2</sub>

*Properties:* Dk. red cryst.; sol. (mg/ml): 1-10 mg water (20 C), < 1 mg in DMSO, 95% ethanol, methanol, acetone, toluene (20 C); very sl. sol. in ether; insol. in oil, org. solvs.; m.w. 480.44; m.p. > 300 C

*Toxicology:* LD50 (oral, rat) 23,160 mg/kg, (IP, rat) > 1 g/kg, (IV, mouse) 1530 mg/kg; harmful by inh., skin contact; danger of cumulative effects; may cause somnolence, muscle weakness, ataxia, convulsions, antipsychotic behavior, changes in liver/kidney/spleen wt.; suspected carcinogen; tumorigen; mutagen; TSCA listed

*Precaution:* Probably combustible; incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of CO, CO<sub>2</sub>, NO<sub>x</sub>, SO<sub>x</sub>

*Storage:* Store @ ambient temps.

*Uses:* Dye for wool, polyamide, silk, paper, inks, wood stains, drugs, cosmetics, leather, fruit, confectionery and meat prods., soaps, face lotions

*Manuf./Distrib.:* John Campbell

**Acid red 37**

CAS 6360-07-2; EINECS/ELINCS 228-823-2  
*Synonyms:* 5-(4-Acetylamino-2-sulfophenylazo)-6-amino-4-hydroxy naphthalene-2-sulfonic acid, disodium salt; CI 17045

*Classification:* Azobenzene

*Empirical:* C<sub>18</sub>H<sub>14</sub>N<sub>4</sub>Na<sub>2</sub>O<sub>8</sub>S<sub>2</sub>

*Properties:* M.w. 524.44

*Toxicology:* Irritating to eyes, skin, respiratory system; TSCA listed

*Uses:* Dye for wool, silk, polyamide, paper, soap, and lacquers

*Manuf./Distrib.:* Aldrich

**Acid red 52**

CAS 3520-42-1; EINECS/ELINCS 222-529-8  
*Synonyms:* Acid rhodamine B; CI 45100; N-[6-(Diethylamino)-9-(2,4-disulfophenyl)-3H-xanthen-3-ylidene]-N-ethyl ethanaminium, hydroxide, inner salt, sodium salt; Ethanaminium, N-[6-(diethylamino)-9-(2,4-disulfophenyl)-3H-xanthen-3-ylidene]-N-ethyl-, hydroxide, inner salt, sodium salt; Food red 106; Red 106; Xanthylum, 3,6-bis(diethylamino)-9-(2,4-disulfophenyl)-, hydroxide, inner salt, sodium salt; Xylene red B

*Classification:* Xanthene color; azobenzene

*Empirical:* C<sub>27</sub>H<sub>29</sub>N<sub>2</sub>NaO<sub>7</sub>S<sub>2</sub>

*Properties:* M.w. 580.69

*Toxicology:* LD50 (oral, mouse) 10,300 mg/kg; mutagen; TSCA listed

*Storage:* Photosensitive

*Uses:* Dye for wool, silk, polyamide, and paper; colorant in hair dyes

*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Acid red 87**

CAS 548-26-5; 17372-87-1; EINECS/ELINCS 208-953-6; 241-409-6  
*Synonyms:* Bromofluoresceic acid; CI 45380; D&C Red No. 22; Disodium 2-(2,4,5,7-tetrabromo-6-oxido-3-oxoxanthen-9-yl) benzoate; Eosin disodium; Eosine; Eosine G; Eosin Y; Eosin YS; Spiro [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one, 2',4',5',7'-tetrabromo-3',6'-dihydroxy-, disodium salt; 2',4',5',7'-Tetrabromo-3',6'-dihydroxyspiro [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one disodium salt; Tetrabromofluorescein

*Classification:* Indelible xanthene color

*Definition:* Disodium salt of eosin

*Empirical:* C<sub>20</sub>H<sub>8</sub>Br<sub>4</sub>Na<sub>2</sub>O<sub>5</sub>

*Formula:* C<sub>20</sub>H<sub>8</sub>O<sub>5</sub>Br<sub>4</sub>Na<sub>2</sub>

*Properties:* Red cryst. with bluish tinge or brnsh. red powd.; freely sol. in

water; m.w. 693.90; dens. 1.015

*Toxicology:* LD50 (IV, mouse) 550 mg/kg; tumorigen; mutagen; TSCA listed  
*Uses:* Dye for red inks, wool, silk, paper, stains; colorant in cosmetics, hair dyes, pharmaceuticals; in microbiological differential media; as biological stain

*Regulatory:* D&C Red No. 22; FDA 21CFR §74.1322, 74.2122, 82.1322; FDA approved for orals; permanently listed

*Manuf./Distrib.:* AMRESCO; Aldrich; BFGoodrich Hilton Davis; Costec; Fluka; Ruger; Sigma; Warner-Jenkinson

**Acid red 88**

CAS 1658-56-6; EINECS/ELINCS 216-760-3  
*Synonyms:* CI 15620; Ext. D&C Red. No. 8; Fast red A; 4-(2-Hydroxynaphthalen-1-ylazo) naphthalene-1-sulfonic acid, sodium salt; 4-((2-Hydroxy-1-naphthalenyl)azo)-1-naphthalene sulfonic acid sodium salt; 1-Naphthalenesulfonic acid, 4-((2-hydroxy-1-naphthalenyl)azo)-, monosodium salt; Red No. 506; Roccelline; Roccelline; Solid red A

*Classification:* Azobenzene

*Empirical:* C<sub>20</sub>H<sub>14</sub>N<sub>2</sub>NaO<sub>5</sub>S

*Properties:* M.w. 401.41; m.p. 280 C

*Toxicology:* Mutagen; TSCA listed

*Storage:* Store in cool, dry place; keep container closed when not in use

*Uses:* Dye for wool, silk, polyamide, paper, jute, stains, and soap

*Manuf./Distrib.:* Acros Org.; Aldrich; Sigma

**Acid red 97**

CAS 10169-02-5; EINECS/ELINCS 233-439-3  
*Synonyms:* Acid red 97, disodium salt; (1,1'-Biphenyl)-2,2'-disulfonic acid, 4,4'-bis((2-hydroxy-1-naphthalenyl)azo)-, disodium salt; 4,4'-Bis((2-hydroxy-1-naphthalenyl)azo)-(1,1'-biphenyl)-2,2'-disulfonic acid, disodium salt; CI 22890

*Classification:* Azobenzene

*Empirical:* C<sub>32</sub>H<sub>20</sub>N<sub>2</sub>Na<sub>2</sub>O<sub>8</sub>S<sub>2</sub>

*Properties:* Red powd.; sol. (mg/ml): 1-10 mg water (20 C), < 1 mg in DMSO, 95% ethanol, acetone (20 C); m.w. 698.64; m.p. > 300 C

*Toxicology:* Mutagenic data; TSCA listed

*Precaution:* Probably combustible; incompat. with oxidizing and reducing agents; copper dulls color; iron makes it much duller

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of NO<sub>x</sub> and SO<sub>x</sub>

*Storage:* Store @ ambient temps.

*Uses:* Dye for wool, silk, polyamide, paper, jute

*Manuf./Distrib.:* Aldrich

**Acid red 137**

*Synonyms:* CI 17755  
*Empirical:* C<sub>20</sub>H<sub>17</sub>N<sub>3</sub>NaO<sub>6</sub>S  
*Properties:* M.w. 464.43  
*Uses:* Dye for paper  
*Manuf./Distrib.:* Aakash Chems. & Dyestuffs

**Acid red 26, disodium salt.** See Acid red 26

**2-Acrylamido-2-methylpropane sulfonate.** See 2-Acrylamido-2-methylpropanesulfonic acid

**2-Acrylamido-2-methylpropanesulfonic acid**

CAS 15214-89-8; EINECS/ELINCS 239-268-0

**Synonyms:** AMPS; 2-AMPS; 2-Acrylamido-2-methylpropane sulfonate; 2-Acryloylamido-2-methylpropanesulfonic acid monomer

**Empirical:**  $\text{C}_7\text{H}_{13}\text{NO}_4\text{S}$

**Formula:**  $\text{H}_2\text{C}=\text{CHCONHC}(\text{CH}_3)_2\text{CH}_2\text{SO}_3\text{H}$

**Properties:** M.w. 207.25; m.p. 195 C

**Toxicology:** Cancer suspect agent

**Precaution:** Corrosive

**Uses:** Comonomer (anionic flocculants/dispersants); protective colloid and/or copolymerizable surfactant in acrylic/modified acrylic latexes for use in paints, inks, adhesives, and sealants; in food-contact paper/paperboard

**Manuf./Distrib.:** ABCR UK; Aldrich; CBC Europe; Fisher Scientific UK; Fluka; Lancaster Synthesis UK; Lubrizol; Sigma; Toagosei; Transol Chems. UK Ltd

**Trade Names:** AMPS® 2401 Monomer; AMPS® 2404 Monomer

**Acrylates/acrylamide copolymer**

**Synonyms:** AA/AM; Acrylamide/acrylic acid copolymer; Acrylic acid/acrylamide copolymer; Propenamide, polymer with propenoic acid, butenoic acid, and/or alkyl propenoates

**Definition:** Polymer of acrylamide and one or more monomers of acrylic acid, methacrylic acid or one of their simple ester

**Properties:** Nonionic

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Dispersant in boiler water treatment; mineral scale control aid; flocculant and coagulant aid in water and wastewater treatment, sugar processing; film-former in cosmetics; hair spray resin; in food-pkg. adhesives; in food-contact paper/paperboard

**Use Level:** Limitation 10 ppm (cane or beet liquor for clarification), 2.5 ppm (cane or beet juice/liquor for min. scale control)

**Regulatory:** FDA 21CFR §173.5, 175.105, 176.110

**Trade Names:** Accostrength® 1000 Dry Strength Resin; Amerfloc® 275; Sterocoll® BL

**Acrylates/C10-30 alkyl acrylate crosspolymer**

**Definition:** C10-30 alkyl acrylates and monomer(s) of acrylic or methacrylic acid or esters crosslinked with an allyl ether of sucrose or pentaerythritol

**Properties:** Anionic

**Uses:** Film-former, rheology agent, emulsifier, stabilizer, moisturizer, thickener, gellant for cosmetic emulsions, skin care prods., topical pharmaceuticals; emulsion stabilizer; food-pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

**Trade Names:** Carbopol® 1342; Carbopol® 1382

**Acrylates copolymer**

CAS 25133-97-5

**Synonyms:** Acrylic/acrylate copolymer; Acrylic copolymer; 2-Propenoic acid, 2-methyl-, polymer with ethyl 2-propenoate and methyl 2-methyl-2-propenoate

**Definition:** Polymers of two or more monomers consisting of acrylic acid, methacrylic acid, or their simple esters

**Properties:** Anionic

**Toxicology:** TSCA listed

**Uses:** Detergent polymer; for surface coatings; emulsions; paints; paper and leather finishes; water treatment; dispersant and scale inhibitor for oil field water treatment; antistat, binder, film-former in cosmetics; thickener, stabilizer for cosmetics, paints, inks, waxes, polishes, detergents, etc.; in food-pkg. adhesives; in paper/paperboard in contact with dry food

**Use Level:** 1-6%

**Regulatory:** FDA 21CFR §175.105, 175.210, 175.300, 175.320, 176.170, 176.180, 177.1010, 178.3790

**Manuf./Distrib.:** Abco Ind.; Air Prods.; Ashland; BFGoodrich; Chemcentral; Cognis; Complex Quimica SA; D.N. Lukens; Essential Ind.; GCA; Hampshire; Hickson Danchem; Interpolymer; Lenape Ind.; Monomer-Polymer & Dajac Labs; Nat'l. Starch & Chem.; NeoResins; Reichhold; Rhodia; Rohm & Haas; S.C. Johnson Polymer; Samson; Scott Bader; StanChem; Synthron; Tamms Ind.; Thibaut & Walker; Tri-Iso; Union Carbide

**Trade Names:** Acronal®; Acrosol®; Acusol® 810; Acusol® 820; Acusol® 830; Acusol® 842; Basoplast® 250 D; Basoplast® 265 D; Basoplast® 335 D; Carboset® 515; Carboset® GA1086; Carboset® GA1604;

Elvacite® 2013, 2014, 2016, 2028, 2614, 2550, 2552, 6016; Nacrylic X 4280; NeoCryl® A-630; NeoCryl® BT-175; Perglulin® K 175 EP; Prox® ASN 165 R

**Acrylates/PVP copolymer**

CAS 26589-26-4

**Synonyms:** 2-Propenoic acid, 2-methyl-, polymer with 1-ethenyl-2-pyrrolidinone and ethyl 2-methyl-2-propenoate

**Definition:** Copolymer of PVP and one or more monomers of acrylic acid, methacrylic acid, or their simple esters

**Formula:**  $(C_8H_{10}O_2 \cdot C_6H_9NO \cdot C_4H_6O)$

**Toxicology:** TSCA listed

**Uses:** Antistat, binder, film-former in cosmetics; hair care fixative; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.210

**Acrylates/VA copolymer**

CAS 25067-02-1

**Synonyms:** Acrylates/vinyl acetate copolymer; Vinyl acetate-acrylic copolymer

**Definition:** Copolymer of vinyl acetate and one or more monomers of acrylic acid, methacrylic acid, or their simple esters

**Uses:** Film-former, visc. control agent in cosmetics; binder for nonwoven fabrics; paper impregnant; in adhesives; in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §176.180

**Trade Names:** Polyco® 6108NP

**Acrylates/vinyl acetate copolymer.** See Acrylates/VA copolymer

**Acrylic acid**

CAS 79-10-7; EINECS/ELINCS 201-177-9

**Synonyms:** AA; Acroleic acid; Acrylic acid, glacial; Ethylene carboxylic acid; Propenoic acid; 2-Propenoic acid; Propene acid; Vinylformic acid

**Empirical:**  $C_3H_4O_2$

**Formula:**  $H_2C:CHCOOH$

**Properties:** Colorless liq., acrid odor; misc. with water, alcohol, ether, acetone, benzene; m.w. 72.07; dens. 1.052 (20/20 C); b.p. 140.9 C; m.p. 12.1 C; flash pt. (OC) 54.5 C; ref. index 1.4224 (20 C); polymerizes readily

**Toxicology:** TLV 10 ppm in air; LD50 (oral, rat) 250 mg/kg; severe skin and eye irritant; toxic by inhalation; experimental teratogen; TSCA listed

**Precaution:** May polymerize explosively; flamm. liq.; corrosive material; fire hazard exposed to heat or flame

**Uses:** Carboxylated comonomer for polyacrylic and polymethacrylic acids, other acrylic acids, acrylic polymers, styrene-butadiene, vinyl acetate, nitrile latex; comonomer for radiation-cured polyester/polyurethane resin; paints; antimigrant for pigment pad dyeing

**Manuf./Distrib.:** Aldrich; Alfa Aesar; Allchem Ind.; Ashland; Atofina; BASF; BCH Brühl; Brøste; Celanese; Chemconnect; Degussa-Hüls AG; Fluka; G.J. Chem.; Idemitsu Petrochem.; Mitsubishi Chem.; Nichimen Am.; Nippon Shokubai; Osaka Org. Chem. Ind.; Penta Mfg.; Rohm & Haas; Spectrum Quality Prods.; Sumitomo Chem.; Total Spec. Chems.; Union Carbide; Whyte Chems. Ltd

**Trade Names Containing:** Rohamere® 8596

**Acrylic acid/acrylamide copolymer**

CAS 9003-06-9

**Synonyms:** Acrylamide/acrylate copolymer; Acrylamide/acrylate polymer; Acrylamide/acrylic acid copolymer; Acrylamide/acrylic acid resin; Acrylamide/acrylic resin; Acrylic acid/acrylamide polymer; Acrylic acid, polymer with acrylamide; Hydrolyzed polyacrylamide; Poly (acrylamide-co-acrylic acid); Polyacrylamide, hydrolyzed; Poly (acrylic acid-acrylamide); 2-Propenamide, polymer with 2-propenoic acid; 2-Propenamide-2-propenoic acid polymer; 2-Propenoic acid, polymer with 2-propenamide

**Classification:** Acrylic

**Empirical:**  $(C_3H_5NO \cdot C_3H_4O_2)_x$

**Formula:**  $[CH_2CH(CONH_2)]_x[CH_2CH(CO_2H)]_y$

**Properties:** Solid; sol. in water and some protonic solvs.; m.w. (143.14); sp.gr. 0.750

**Toxicology:** LD50 (oral, rat) 2500 mg/kg, (skin, rabbit) 10,000 mg/kg; LC50 (inh., rat, 4 h) 720 mg/l; irritating to eyes, skin, mucous membranes, upper respiratory tract; severe eye irritant; may be harmful by inh., ing., or skin

absorb.

**Precaution:** Incompat. with strong oxidizing agents, copper, copper alloys, aluminum; insolubilized by chromic salts; capable of creating dust explosion in powd. form

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>, NO<sub>x</sub>, ammonia; emits toxic fumes under fire conditions

**Storage:** Store in cool, dry place; keep tightly closed

**Uses:** Thickener; binder; sizing agent; flocculant; crosslinking agent; filter aid; lubricant; drag reduction aid; polymer recovery agent

**Trade Names Containing:** Hartfloc® A-414

See also Acrylates/acrylamide copolymer

**Acrylic acid/acrylamide polymer.** See Acrylic acid/acrylamide copolymer

**Acrylic acid, butyl ester.** See Butyl acrylate

**Acrylic acid, n-butyl ester.** See Butyl acrylate

**Acrylic acid, diester with tetraethylene glycol.** See PEG-4 diacrylate

**Acrylic acid, 2-(diethylamino) ethyl ester.** See Diethylaminoethyl acrylate

**Acrylic acid-N,N-diethylaminoethyl ester.** See Diethylaminoethyl acrylate

**Acrylic acid, 2-(dimethylamino) ethyl ester.** See Dimethylaminoethyl acrylate

**Acrylic acid, ethyl ester.** See Ethyl acrylate

**Acrylic acid, 2-ethylhexyl ester.** See Octyl acrylate

**Acrylic acid, glacial.** See Acrylic acid

**Acrylic acid homopolymer.** See Polyacrylic acid

**Acrylic acid 2-hydroxyethyl ester.** See 2-Hydroxyethyl acrylate

**Acrylic acid, hydroxypropyl ester.** See Hydroxypropyl acrylate

**Acrylic acid isodecyl ester.** See Isodecyl acrylate

**Acrylic acid, 2-methyl-.** See Methacrylic acid

**Acrylic acid methyl ester.** See Methyl acrylate

**Acrylic acid, 2-methyl-, methyl ester.** See Methyl methacrylate

**Acrylic acid, monoester with 1,2-propanediol.** See Hydroxypropyl acrylate

**Acrylic acid, oxybis (ethyleneoxyethylene) ester.** See PEG-4 diacrylate

**Acrylic acid, pentaerythritol triester.** See Pentaerythrityl triacrylate

**Acrylic acid polymer.** See Polyacrylic acid

**Acrylic acid, polymer with acrylamide.** See Acrylic acid/acrylamide copolymer

**Acrylic acid, polymers.** See Polyacrylic acid

**Acrylic acid, polymer with sucrose-polyallyl ether.** See Carbomer

**Acrylic acid, propylenebis (oxypropylene) ester.** See PPG-3 diacrylate

**Acrylic acid resin.** See Polyacrylic acid

**Acrylic acid/sulfonic acid copolymer**

CAS 97953-25-8

**Uses:** Dispersant and scale inhibitor for use in water treatment, food-contact paper/paperboard mfg.

**Trade Names:** Good-Rite® K-776 Polymer

**Acrylic acid-(3-sulfopropyl) ester, potassium salt.** See Potassium (3-sulfopropyl) acrylate

**Acrylic acid vinyl ester.** See Vinyl acrylate

**Acrylic/acrylate copolymer.** See Acrylates copolymer

**Acrylic aldehyde.** See Acrolein

**Acrylic amide.** See Acrylamide

**Acrylic copolymer.** See Acrylates copolymer

**Acrylic fiber.** See Acrylic resin; Polyacrylonitrile

**Acrylic polymer.** See Polyacrylic acid

**Acrylic polymer resins.** See Polyacrylic acid

**Acrylic resin**

**Synonyms:** Acrylic fiber; Acrylic sheet

**Definition:** Thermoplastic polymer or copolymer of acrylic acid, methacrylic acid, esters of these acids, or acrylonitrile

**Properties:** Varies from hard to brittle solids to fibrous elastomeric structures, to viscous liqs.; able to transmit light for sheet and rod forms

**Toxicology:** Dust may cause skin, eye, and respiratory tract irritation; TSCA listed

**Precaution:** Combustible

**Uses:** Hard, shatterproof transparent or colored material, glass substitute in medical, dental, and industrial applics.; impact modifier, processing aid for PVC; dispersant, antiscalant, corrosion inhibitor for water systems; food pkg.

**Regulatory:** FDA 21CFR §177.1010

**Manuf./Distrib.:** Air Prods./Polymers; Akzo Nobel; Anderson Development; Ashland; BFGoodrich; Bayer/Fiber, Addits., Rubber; Cognis/Coatings & Inks; Conap; Cook Composites & Polymers; Cyro Ind.; Cytec Ind.; Deeks; Dianal Am.; Dock Resins; DuPont; Eastern Color & Chem.; Elementis Spec. Colorants/Addit.; FRP Services; H.B. Fuller; Kaneka; King Ind.; McWhorter Tech.; Miller-Stephenson; Morton Int'l.; Nat'l. Starch & Chem.; NeoResins; Nylon Engineering; Plaskolite; Reichhold; Rohm & Haas; Rohm Tech; S.C. Johnson Polymer; Seegott; Showa Highpolymer; Thibaut & Walker; Toyota Tsusho Am.; Union Carbide; Westvaco

**Trade Names:** CarboSet® 525; Cogum®; Elvacite® 2008, 2009, 2010, 2021, 2041, 6010; Elvacite® 2042, 2043; Esi-Rez™ 50; Esi-Rez™ 53; Esi-Rez™ 60; Esi-Rez™ 65; Flexcryl® 1625; Flexcryl® 1685; Hycar® 2671; Hycar® 2679; Hycar® 26084; Hycar® 26092; Hycar® 26106; Hycar® 26138; Hycar® 26322; Korad Klear; Niccasolt PTOL; Rhoplex® ASE-75; Rhoplex® ASE-95NP; Rhoplex® ASE-108NP; Rhoplex® B-15J; Rhoplex® B-60A; Rhoplex® B-85; Rhoplex® B-88; Rhoplex® B-959; Rhoplex® E-1691; Rhoplex® GL-618; Rhoplex® GL-623; Rhoplex® HA-12; Rhoplex® TR-520; Rohagit® SL 252; Rohatol® BV 411; Rohatol® BV 596; Rohatol® D 362; Rohatol® D 471; Rohatol® D 541; Rohatol® DV 242; Rohatol® DV 440; Rohatol® DV 477; Rohatol® DV 544; Rohatol® DV 571; Rohatol® M 600; Rohatol® M 630; Rohatol® M 712; Rohatol® MV 604; Synthemul® 97982-00; Valtac 56; Valtac F-66

**Trade Names Containing:** CarboSet® 514A; CarboSet® 514H; CarboSet® 531

See also Polyacrylic acid

**Acrylic sheet.** See Acrylic resin

#### Acrylic/styrene

**Uses:** High gloss polymer for flexo/gravure ink and coating applics., paper/paperboard applics.; binder

#### Acrylonitrile

CAS 107-13-1; EINECS/ELINCS 203-466-5; UN No. 1093 (DOT)

**Synonyms:** ACN; AN; Acrylonitrile monomer; Cyanoethylene; Propenenitrile; 2-Propenenitrile; Vinyl cyanide

**Classification:** Nitrile

**Empirical:** C<sub>3</sub>H<sub>3.5</sub>N

**Formula:** H<sub>2</sub>C:CHCN

**Properties:** Colorless, mobile liq.; pungent odor similar to garlic or onion; sol. in acetone, alcohol, benzene, ether, org. solvs., partially misc. in water; m.w. 53.06; dens. 0.8004 (25 C); f.p. -83 C; b.p. 77.3-77.4 C; flash pt. (TOC) 32 F

**Toxicology:** ACGIH TLV/TWA 2 ppm; LD50 (oral, rat) 78 mg/kg; toxic by inh. and skin absorp.; lachrymator; can cause irritation of respiratory tract, lack of oxygen, headache, dizziness, nausea, vomiting, tremors, diarrhea, signs of liver dysfunction; skin contact can cause blisters, toxic and allergic dermatitis; readily absorbed thru skin; vapor or liq. can cause severe eye irritation, corneal damage; ing. may cause sore throat, abdominal pain, possibly death; a carcinogen; TSCA listed

**Precaution:** Flamm.; dangerous fire risk; potentially explosive; explosive limits in air 3-17%; unstable and polymerizes violently when heated, in absence of oxygen, or on exposure to visible light; normally stable when inhibited

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>, NO<sub>x</sub>, hydrogen cyanide

**NFPA:** Health 4; Flammability 3; Reactivity 2

**Uses:** Monomer for acrylic and modacrylic fibers, paints; in prod. of ABS and SAN copolymers, nitrile rubber, surfactants, adhesives, polyols, barrier resins, carbon fibers; organic synthesis; formerly as pesticide fumigant

**Regulatory:** SARA reportable

**Manuf./Distrib.:** Aldrich; Alfa Aesar; Allchem Ind.; Asahi Chem. Ind.; BP Chems. Ltd; Chemconnect; Cytec Ind.; DSM NV; DuPont; Fluka; Mitsubishi Chem.; Mitsui Toatsu; Monomer-Polymer & Dajac Labs; Monsanto; Nitto Chem. Ind.; Showa Denko; Solutia; Sterling Chems.; Sumitomo Chem.; Whyte Chems. Ltd

**Trade Names Containing:** Rohamere® 132; Rohamere® 587; Rohamere® 8464; Rohamere® 87219

**Acrylonitrile/butadiene copolymer.** See Butadiene/acrylonitrile copolymer

**Acrylonitrile/butadiene rubber.** See Butadiene/acrylonitrile copolymer

#### Acrylonitrile/butadiene/styrene copolymer

CAS 9003-56-9

**Synonyms:** ABS; Acrylonitrile/butadiene/styrene polymer; Acrylonitrile/butadiene/styrene resin; Butadiene/acrylonitrile/styrene copolymer; Poly (acrylonitrile-butadiene-styrene); Poly (acrylonitrile-co-butadiene-co-styrene)

**Classification:** Polymer

**Definition:** Engineering thermoplastic resin grafted from the 3 monomers from which its name is derived

**Formula:** [CH<sub>2</sub>CH(CN)]<sub>x</sub>(CH<sub>2</sub>CH=CHCH<sub>2</sub>)<sub>y</sub>[CH<sub>2</sub>CH(C<sub>6</sub>H<sub>5</sub>)<sub>z</sub>

**Properties:** Powd.; sol. in acetone, MEK, CH<sub>2</sub>Cl<sub>2</sub>; insol. in alcohols, aliphatic hydrocarbons, min. and veg. oils; dens. ≈ 1.04; tens. str. ≈ 6500 psi; flex. str. ≈ 10,000 psi

**Toxicology:** Cancer suspect agent; TSCA listed

**Precaution:** Combustible, but slow burning; attacked by nitric and sulfuric acids, and by aldehydes, ketones, esters, and chlorinated hydrocarbons

**Uses:** Engineering plastic for automotive body parts, telephones, pkg., shower stalls, boats, building panels, pipe, machinery housings; processing aid, impact modifier for PVC; ABS/PVC blends; ABS/PC blends; ABS/polysulfone blends; latex used for waterproof and greaseproof coatings, leather finishes, paints, paper coatings, and nonwoven binders and saturation; foods (films, coatings, rigid and semirigid pkg., pressure-sensitive adhesives)

**Regulatory:** FDA 21CFR §175.125, 175.300, 175.320, 177.1020, 177.1200, 181.32

**Manuf./Distrib.:** Acros Org.; Aiscondel SA; Aldrich; Allchem Ind.; Bayer; GE Spec.; Japan Syn. Rubber; LG Petrochem. Co. Ltd; Magna-Kron; Marco Polo Int'l.; Mitsubishi Int'l./Plastics; Nylon Engineering; Toyota Tsusho Am.; Westchem; Whyte Chems. Ltd

**Trade Names:** Hycar® 1577; Hycar® 1578X1; SNAP 2042; SNAP 2048; SNAP 2054; Styronal™ NX 4489 X; Styronal™ NX 4680

**Acrylonitrile/butadiene/styrene polymer.** See Acrylonitrile/butadiene/styrene copolymer

**Acrylonitrile/butadiene/styrene resin.** See Acrylonitrile/butadiene/styrene copolymer

#### Acrylonitrile copolymer

**Synonyms:** Propenenitrile copolymer; Vinyl cyanide copolymer

**Uses:** Specialty elastomer for automotive and industrial applics., e.g., seals, gaskets, membranes, cable jackets, extruded profiles, rubber linings, hoses, bellows, sleeves, oil field parts; textile coatings; binder, saturant for textile coatings, adhesives; in food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105

**Trade Names:** Tylac® 68321-00; Tylac® 68513-00; Tylac® 68520-00

**Trade Names Containing:** Dualite® M6050AE; Dualite® MS7000; Dualite® MS7020

**Acrylonitrile homopolymer.** See Polyacrylonitrile

**Acrylonitrile monomer.** See Acrylonitrile

**Acrylonitrile polymer.** See Polyacrylonitrile

**Acrylonitrile, polymeric.** See Polyacrylonitrile

**Acrylonitrile, polymers.** See Polyacrylonitrile

**Acrylonitrile rubber.** See Butadiene/acrylonitrile copolymer

**2-Acryloylamido-2-methylpropanesulfonic acid monomer.** See 2-Acrylamido-2-methylpropanesulfonic acid

**3-Acryloyloxy-propene-1-sulfonic acid, potassium salt.** See Potassium (3-sulfopropyl) acrylate

**Activated alumina.** See Alumina

**Activated aluminum oxide.** See Alumina

**Activated carbon.** See Carbon, activated

**Activated charcoal.** See Carbon, activated

**Active carbon.** See Carbon, activated

**β-ADA.** See β-Alanine diacetic acid

**Adeps bovis.** See Tallow

**Adeps lanae.** See Lanolin

**1,4A-Dimethyl-7-isopropyl-1,2,3,4,4A,9,10,10A-octahydro-1-phenanthrene methylamine.** See Dehydroabietylamine

#### Adipic acid

CAS 124-04-9; EINECS/ELINCS 204-673-3; UN No. NA 9077 (DOT); FEMA 2011

**Synonyms:** AA; 1,4-Butanedicarboxylic acid; Butane-1,4-dicarboxylic acid; Dicarboxylic acid C<sub>6</sub>; Hexanedioic acid; 1,6-Hexanedioic acid

**Classification:** Organic dicarboxylic acid

**Empirical:** C<sub>6</sub>H<sub>10</sub>O<sub>4</sub>

*Formula:* HOOC(CH<sub>2</sub>)<sub>4</sub>COOH

*Properties:* Wh. monoclinic prisms, pract. odorless; very sol. in alcohol; sol. in acetone, oxygenated solvs.; sl. sol. in water; m.w. 146.16; dens. 1.360 (25/4 C); vapor pressure 1 mm Hg (159.5 C); m.p. 152 C; b.p. 337.5 C; flash pt. (CC) 385 F

*Toxicology:* LD50 (oral, mouse) 1900 mg/kg; ACGIH TLV/TWA 5 mg/m<sup>3</sup>; poison by IP route; mod. toxic by other routes; severe eye irritant; may cause occupational asthma; TSCA listed

*Precaution:* Combustible; can react with oxidizing material

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

NFPA: Flammability 1; Reactivity 0

*Uses:* Mfg. of nylon and polyurethane foams; intermediate for paints; preparation of esters for use as plasticizers and lubricants; alkyd resin comonomer; starch crosslinking agent; buffer in cosmetics; foods (flavoring, leavening, acidulant, buffering agent, neutralizer); baking powders; buffer, neutralizing agent in pharmaceuticals; adhesives

*Use Level:* Limitation 0.05% (baked goods), 0.005% (nonalcoholic beverages), 5% (condiments), 0.45% (dairy prods.), 0.3% (fats/oil), 0.0004% (frozen dairy desserts), 0.55% (gelatin, puddings), 0.1% (gravies), 0.3% (meat prods.), 1.3% (snack foods), 0.02% (other)

*Regulatory:* FDA 21CFR §131.44, 172.515, 184.1009, GRAS; FEMA GRAS; USDA 9CFR §318.7; Japan approved; Europe listed (ADI 0-5 mg/kg, free acid basis); UK approved

*Manuf./Distrib.:* ADA Int'l.; Aldrich; Alfa Aesar; Allchem Ind.; Asahi Chem. Ind.; Ashland; BASF AG; BCH Brühl; Brown; C.P. Hall; Chemical; Coyne; Degussa-Hüls AG; DuPont; E-Chemicals; Fluka; Grau Aromatics; Honeywell Perf. Polymers; Houghton Chem.; Inolex; KIC Chems.; Kanto Denka Kogyo; Miljic; Monsanto; Penta Mfg.; Rhodia; Samson; Sigma; Solutia; Spectrum Quality Prods.; Sumitomo Chem.; Total Spec. Chems.; U.S. Chems.; UCB; United Min. & Chem.; Universal Preserv. A-Chem; Van Waters & Rogers; Whyte Chems. Ltd

*Trade Names:* Adi-pure®

*Trade Names Containing:* Hartfloc® C-470

**Adipic acid, diethylenetriamine, epichlorohydrin polymer.** See Adipic acid/epoxypropyl diethylenetriamine copolymer

**Adipic acid, diethylenetriamine, epichlorohydrin resin.** See Adipic acid/epoxypropyl diethylenetriamine copolymer

**Adipic acid/dimethylaminohydroxypropyl diethylenetriamine copolymer**  
CAS 61840-27-5

*Synonyms:* Polyamide-polyamine-epichlorohydrin resin

*Classification:* Condensation polymer

*Uses:* Antistat, film-former in cosmetics; polymer substantive to hair; lubricant/conditioner for shampoos, hair conditioners; binder component in aq. inks; wet str. additive in paper; in paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170

**Adipic acid dimethyl ester.** See Dimethyl adipate

**Adipic acid/epoxypropyl diethylenetriamine copolymer**

CAS 52932-31-7; 25212-19-5

*Synonyms:* Adipic acid, diethylenetriamine, epichlorohydrin polymer; Adipic acid, diethylenetriamine, epichlorohydrin resin; Diethylenetriamine, epichlorohydrin, adipic acid polymer; Epichlorohydrin, adipic acid, diethylenetriamine polymer; Hexanedioic acid, polymer with N-(2-aminoethyl)-1,2-ethanediamine and (chloromethyl) oxirane

*Classification:* Condensation polymer

*Uses:* Antistat, film-former in cosmetics; hair care resin used in permanent solns. and hair sprays; in paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170

**ADPA.** See Etidronic acid

**Agricultural lime.** See Calcium hydroxide

**Agricultural limestone.** See Calcium carbonate

**AIBN.** See 2,2'-Azobisisobutyronitrile

**Alabaster.** See Calcium sulfate dihydrate

**β-Alanine diacetic acid**

CAS 6245-75-6; EINECS/ELINCS 228-360-6

*Synonyms:* β-ADA; Beta-alanine diacetic acid

*Classification:* Aminocarboxylic acid

*Empirical:* C<sub>7</sub>H<sub>11</sub>NO<sub>6</sub>

*Formula:* (HOOCCH<sub>2</sub>)<sub>2</sub>NCH<sub>2</sub>CH<sub>2</sub>COOH

*Environmental:* Readily biodeg.

*Uses:* Chelating agent in cosmetics, detergents, cleaners, pulp/paper, electroplating, water softening, textiles

**Albacol.** See Propyl alcohol

**Albumen**

CAS 9006-50-2; EINECS/ELINCS 232-936-2

*Synonyms:* Albumin; Dried egg white; Egg albumin

*Definition:* Dried whites of chicken eggs

*Properties:* Yel. amorphous lumps, scales, or powd.; swells in water, then dissolves gradually; decomp. in moist air; dens. 1.035; m.p. -0.42 C; coagulating temp. 61 C; ref. index 1.356; pH 7.6

*Toxicology:* May cause allergic reactions in people allergic to milk or eggs; TSCA listed

*Uses:* Protective colloid and emulsifier in baking; clarifying and refining wines and vinegar; textile dye mordant; adhesives and veneers; emulsifier, film-former in pharmaceuticals; film-former in cosmetics; antidote to mercury poisoning; microencapsulation; binder; coagulant; skin conditioner

*Regulatory:* FDA 21CFR §160.145

*Manuf./Distrib.:* Alfa Aesar; Alfa Chem; Am. Labs; Am. Tartaric Prods.; Fluka; Penta Mfg.; Schweizerhall; Sigma; Spectrum Quality Prods.; Spice King; U.S. Biochemical

*Trade Names:* Sol-U-Tein EA

**Albumin.** See Albumen

**Alcalase.** See Protease

**Alcohol**

CAS 64-17-5; EINECS/ELINCS 200-578-6; UN No. 1170 (DOT), 1986 (DOT), 1987 (DOT); FEMA 2419

*Synonyms:* EtOH; IMS; Absolute alcohol; Absolute ethanol; Distilled spirits; Ethanol; Ethanol, undenatured; Ethyl alcohol; Ethyl alcohol, undenatured; Ethyl hydrate; Ethyl hydroxide; Grain alcohol; Industrial methylated spirit; Methylcarbinol; Spirits of wine

*Definition:* Undenatured ethyl alcohol

*Empirical:* C<sub>2</sub>H<sub>6</sub>O

*Formula:* CH<sub>3</sub>CH<sub>2</sub>OH

*Properties:* Colorless limpid, volatile liq., vinous odor, pungent taste; misc. with water, methanol, ether, chloroform, 95% acetone, oxygenated/chlorinated solvs.; m.w. 46.08; dens. 0.816 (15.5 C); b.p. 78.3 C; f.p. -117.3 C; flash pt. (CC) 12.7 C; ref. index 1.365 (15 C)

*Toxicology:* ACGIH TLV/TWA 1000 ppm; LD50 (oral, rat) 7060 mg/kg, (IP, rat) 3750 mg/kg; mod. toxic to humans by ing.; mod. toxic by IV and IP routes; mildly toxic by inh., skin contact; eye, skin, and mucous membrane irritant; severe skin irritant; human systemic effects; CNS depressant; ing. of lg. doses can cause alcohol poisoning; human carcinogen; experimental tumorigen, teratogen; human reproductive effects by ing., IV; human mutagenic data; TSCA listed

*Precaution:* DOT: Flamm. liq.; dangerous fire and explosion hazard; can react vigorously with oxidizers; reacts violently with many chemicals  
NFPA: Health 0; Flammability 3; Reactivity 0

*Storage:* Hygroscopic

*Uses:* Solvent/cosolvent in paints, inks, dyes, lacquer thinners; extraction medium; mfg. of acetaldehyde, denatured alcohol, paints, waterborne coatings, pharmaceuticals (tonics, colognes), perfumery, organic synthesis; octane booster in gasoline; solvent/coupling agent/wetting agent in cleaners, polishes, coatings; solvent in cosmetics; disinfectant; in food-pkg. adhesives; antimicrobial, extraction solvent, vehicle for foods; alcoholic beverages; active ingred. in OTC drug prods.; topical antiseptic; defoamer in food-contact coatings and paper/paperboard

*Use Level:* Limitation 2% (pizza crusts); ADI not specified (FAO/WHO)

*Regulatory:* FDA 21CFR §169.3, 169.175, 169.176, 169.177, 169.178, 169.180, 169.181, 172.340, 172.560, 175.105, 176.200, 176.210, 177.1440, 184.1293, GRAS; 27CFR §2.5, 2.12; FEMA GRAS; USP/NF, BP, Ph.Eur. compliance; Japan restricted

*Manuf./Distrib.:* A.E. Staley Mfg.; ADM; AMRESCO; Aldrich; Alfa Aesar; Amyl; Ashland; BP Amoco; Baychem; C.P. Hall; Chematch; Chemcentral; Condea Vista; Coyne; Eastman; Equistar; Fluka; Georgia-Pacific Resins; Gist-brocades SpA; Grain Processing; Great Western; Harcros; Houghton Chem.; Hukill; J.T. Baker; JLM Marketing; Midwest Grain

Prods.: Quaker City; Romil Ltd; Ruger; Samson; Sigma; Spectrum Quality Prods.; Sunnyside; Union Carbide; Van Waters & Rogers

*Trade Names Containing:* Ancowet A-70; Ancowet S-60; Arquad® 210-50; DeWET SDO-75E; Disponil® SUS IC 865; Disponil® SUS IC 875; Geropon® WT-27; GPRI™ 4000; GPRI™ BKS-2600; GPRI™ BKS-2900; GPRI™ BKS-2901; Modacure® Resin; Monawet MO-70E; Monawet MO-75E; Resimene® 797; Resimene® 7111; Resimene® 7112

**Alcohol C-3.** See Propyl alcohol

**Alcohols, tallow, hydrogenated.** See Hydrogenated tallow alcohol

**Aldehyde C-1.** See Formaldehyde

**Algaroba.** See Locust bean (*Ceratonia siliqua*) gum

## Algin

CAS 9005-38-3; FEMA 2015

*Synonyms:* Alginate, sodium salt; Alginic acid, sodium salt; Algin (polysaccharide); Sodium alginate; Sodium polymannuronate

*Classification:* Hydrophilic polysaccharide

*Definition:* Purified carbohydrate prod. extracted from brown seaweed; sodium salt of alginic acid

*Empirical:* (C<sub>6</sub>H<sub>7</sub>NaO<sub>6</sub>)<sub>n</sub>

*Properties:* Cream-colored powd., pract. odorless and tasteless; sol. in water forming a gel; insol. in alcohol, ether, chloroform; m.w. 198.11; dens. 1.59 kg/l; dec. on heating above 150 C

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (IV, rat) 1000 mg/kg, (IP, cat) 250 mg/kg; poison by IV and IP routes; causes blood hemorrhage in mice; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of Na<sub>2</sub>O  
HMIS: Health 1; Flammability 0; Reactivity 0

*Uses:* Stabilizer in mfg. of ice cream; stabilizer/gelling agent for prepared food prods.; emulsifier; firming agent; flavor enhancer; formulation aid; processing aid; surfactant; texturizer; thickener for textile printing pastes; binder, visc. control agent in cosmetics; plasticizer/binding agent for welding rod coatings; suspending agent, gellant, emulsifier, excipient, tablet binder, film-former, stabilizer for pharmaceuticals; boiler water additive for food processing

*Use Level:* 0.1-2%; limitation 1% (condiments), 6% (pimento for stuffed olives), 0.3% (confections), 4% (gelatins, puddings), 10% (hard candy), 2% (processed fruits), 1% (other foods); ADI 0-50 mg/kg (EU)

*Regulatory:* FDA 21CFR §133.133, 133.134, 133.162, 133.178, 133.179, 150.141, 150.161, 173.310, 184.1724, GRAS; FEMA GRAS; Japan approved; Europe listed; UK approved; FDA approved for orals; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* ADA Int'l.; Aldrich; Alfa Chem; Allchem Ind.; CarboMer; Colony Ind.; Fallek; Fluka; Frutarom Meer; Indofine; Int'l. Chem. Inc; Monsanto; Penta Mfg.; Ruger; San Yuan; Sigma; Spectrum Quality Prods.; V.L. Clark

*Trade Names:* Colloid 488T; KELCOSOL®; KELGIN® F; KELGIN® HV; KELGIN® LV; KELGIN® MV; KELGIN® XL; KELSET®; Scogin™ F; Scogin™ HV; Scogin™ HVF; Scogin™ LV; Scogin™ MV; Scogin™ QH; Scogin™ QL; Scogin™ QM; Sodium Alginate HV NF/FCC; Sodium Alginate LV; Sodium Alginate LVC; Sodium Alginate MV NF/FCC

**Alginate, sodium salt.** See Algin

**Algin gum.** See Calcium carrageenan

## Alginic acid

CAS 9005-32-7; EINECS/ELINCS 232-680-1

*Synonyms:* Norgine; Polymannuronic acid

*Definition:* Hydrophilic colloidal carbohydrate derived from brown seaweed, *Phaeophyceae*; polysaccharide composed of β-d-mannuronic acid residues

*Empirical:* (C<sub>6</sub>H<sub>8</sub>O<sub>6</sub>)<sub>n</sub>

*Properties:* Wh. to yel. fibrous powd., odorless, tasteless; sol. in alkaline sol'ns.; very sl. sol. in water; insol. in org. solvs.; capable of absorbing 200-300 times its wt. of water; m.w. ≈ 240,000; acid no. ≥ 230; pH 1.5-3.5 (3% disp.)

*Toxicology:* LD50 (IP, rat) 1600 mg/kg; moderately toxic by IP route; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Suspending, thickening, gelling/binding agent, emulsifying, and stabilizing agent in foods and pharmaceuticals; binder, visc. control agent in cosmetics; protective colloid in ice cream, toothpaste, cosmetics, pharmaceuticals; tablet binder/disintegrant; textile sizing; binder in paper coatings/sizing; plasticizer/binder in welding rod coatings; thickener/binder in animal feeds; waterproofing concrete; boiler water treatment; oil well drilling muds; storage of gasoline as a solid

*Use Level:* ADI 0-50 mg/kg (EU)

*Regulatory:* FDA 21CFR §184.1011, GRAS; Japan approved; Europe listed; UK approved; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* Aldrich; Alfa Aesar; CarboMer; Danisco Ingreds. USA; FMC Biopolymer; Fluka; ISP Alginates; Penta Mfg.; Penwest Pharmaceuticals; Sigma; Spectrum Quality Prods.; Stauber Perf. Ingreds.

*Trade Names:* KELACID®

**Alginic acid, ester with 1,2-propanediol.** See Propylene glycol alginate

**Alginic acid, sodium salt.** See Algin

**Algin (polysaccharide).** See Algin

**Aliphatic (C16-C18) alcohol, ethoxylated.** See Ceteareth

**Alizarin cyanine green F.** See Acid green 25

**Alizarin oil.** See Sulfated castor oil

**Alkane C-6.** See Hexane

**Alkane C<sub>7</sub>.** See Heptane

**Alkanes, C10-11-iso.** See C10-11 isoparaffin

**Alkanes, C11-12-iso.** See C11-12 isoparaffin

**Alkanes, C11-13-iso.** See C11-13 isoparaffin

**Alkanes, C13-14-iso.** See C13-14 isoparaffin

**Alkanes, iso-, C10-11.** See C10-11 isoparaffin

**Alkanes, iso-, C11-12.** See C11-12 isoparaffin

**Alkanes, iso-, C11-13.** See C11-13 isoparaffin

**Alkanes, iso-, C13-14.** See C13-14 isoparaffin

**n-Alkanol (C16-C18).** See Cetearyl alcohol

**Alkenyl (C<sub>10</sub>, C<sub>12</sub>) succinic anhydride.** See Dodeceny succinic anhydride

## Alkenyl succinic anhydride

CAS 70983-55-0

*Synonyms:* (2-Alkenyl) succinic anhydride

*Definition:* (2-Alkenyl) succinic anhydrides in which the alkenyl groups are derived from olefins which contain not less than 78% C<sub>30</sub> and higher groups

*Uses:* Intermediate for defoamers, demulsifiers, emulsifiers, foam boosters, wetting agents, detergents; corrosion inhibitor; hardener for cosmetics and pharmaceuticals; engine oil lubricant additive; paper sizing agent for paper/paperboard in contact with aq./fatty foods; in food-pkg. adhesives; in paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Manuf./Distrib.:* Aceto; Alfa Aesar; Dixie; Eka Chems.; Humphrey; Lubrizol; Milliken

*Trade Names:* Alkenyl Succinic Anhydride C1618 (ASA); ASA 100; Bersize® 6900; Bersize® 6918; LASAR™; NovaSize® ASA; Pentasize 68

**(2-Alkenyl) succinic anhydride.** See Alkenyl succinic anhydride

**Alkyd.** See Alkyd resin

## Alkyd resin

CAS 63148-69-6; 68459-31-4

*Synonyms:* Alkyd

*Classification:* Thermosetting polymer

## Alkylbenzenesulfonic acid

*Uses:* Thermosetting coating polymer; vehicle in exterior house paints, marine paints, and baking enamels; molded resins in elec. components, encapsulation; latex modifier

*Manuf./Distrib.:* Akzo Nobel; Arakawa USA; Bayer AG; Celanese; Chemical; Croda Resins Ltd; D.B. Becker; DSM UK; Dar-Tech; Degen; EMCO Chem. Distributors; Eastech; GFI; Lomas Int'l.; McWhorter Tech.; PPG Ind.; Prism Int'l.; Ranbar Tech.; Scott Bader; Seegott; Thibaut & Walker; U.S. Polymers; Whyte Chems. Ltd

*Trade Names:* Chempol 13-1905

**Alkylbenzenesulfonic acid.** See Dodecylbenzenesulfonic acid

**Alkylbenzyltrimethylammonium chloride.** See Benzalkonium chloride

**Alkyl (C16-C18) methacrylate.** See Stearyl methacrylate

**Alkyl (C-13) polyethoxylates (ethoxy 5).** See Trideceth-6

**Alkyl dimethyl benzyl ammonium chloride.** See Benzalkonium chloride

**Alkyldimethyl (phenylmethyl) quaternary ammonium chlorides.** See Benzalkonium chloride

**Alkyl ((ethylphenyl) methyl) dimethyl quaternary ammonium chlorides.** See Benzalkonium chloride

### Alkyl ketene dimer

*Uses:* Adjuvant in food-contact paper/paperboard; in cellophane for food pkg.

*Regulatory:* FDA 21CFR §176.120, 177.1200

*Manuf./Distrib.:* Eka Chems.; Haltermann GmbH; NOF Am.

*Trade Names:* Keydime® A Series; Keydime® C Series; Keydime® D Series; Keydime® E Series; NovaSize® AKD; Opticoll 23

**Alkyl-phenol formaldehyde resin.** See Phenolic resin

**Allied whiting.** See Calcium monocarbonate

**Allomaleic acid.** See Fumaric acid

**Allyl aldehyde.** See Acrolein

**3-Allyloxy-2-hydroxy-1-propanesulfonic acid, sodium salt.** See Sodium 2-hydroxy-3-(2-propenyloxy) 1-propanesulfonate

**Alpha hydroxy ketone.** See  $\alpha$ -Hydroxy ketone

**Alum.** See Aluminum sulfate; Potassium alum anhydrous; Potassium alum dodecahydrate; Sodium alum

**Alum, ammonium.** See Ammonium alum

**Alum flour.** See Potassium alum dodecahydrate

## Alumina

CAS 1344-28-1; 1333-84-2 (hydrate); EINECS/ELINCS 215-691-6

*Synonyms:* Activated alumina; Activated aluminum oxide; Alumina, activated; Alumina, calcined; Alumina, tabular; Aluminum oxide; Aluminum oxide (2:3); Aluminium oxide alumite; Aluminium oxydes C; Alumite; Alundum; Calcined alumina; Tabular alumina

*Classification:* Inorganic compd.

*Definition:* Occurs in nature as the minerals bauxite, bayerite, boehmite, corundum, diasporite, gibbsite

*Empirical:* Al<sub>2</sub>O<sub>3</sub>

*Properties:* Wh. cryst. powd., balls, or lumps, odorless, tasteless; pract. insol. in water; very sl. sol. in min. acids; m.w. 101.96; dens. 3.5-4; vapor pressure 1 mm Hg (2158 C); bulking value 0.032 gal/lb; m.p. 2050 C; b.p. 2977 C; oil absorp. 13; hardness (Mohs) 8.8

*Toxicology:* TLV/TWA 10 mg/m<sup>3</sup> (dust); toxic by inhalation of dust; inh. may cause Shaver's disease; may be irritating to respiratory tract; eye irritant by mech. abrasion; skin drying, peeling; experimental tumorigen and neoplastigen by implant; TSCA listed

*Precaution:* Noncombustible; incompat. with hot chlorinated rubber

*Hazardous Decomp. Prods.:* Exothermic reaction above 200 C with halocarbon vapors produces toxic HCl and phosgene

*Storage:* Very hygroscopic

*Uses:* Prod. of aluminum, polyethylene, abrasives, refractories, ceramics, alloys, elec. insulators, catalysts and catalyst supports, paper, spark plugs, crucibles and lab ware; adsorbent for gases/water vapors, chromatographic analysis, heat-resist. fibers; drying agent; desiccant; filter medium; filler for paints, varnishes, thermoset plastics; dental cements; glass; steel; artificial gems; flame retardant; adsorbent; food additives; dispersant in foods and pharmaceuticals; pharmaceutical colorant; abrasive, opacifier, visc. control agent in cosmetics; in melamine-formaldehyde resins for food-contact molded articles

*Regulatory:* FDA 21CFR §73.1010, 177.1460; exempt from certification; BP compliance (anhyd., basic)

*Manuf./Distrib.:* Air Prods.; Alcan; Alcoa; Aldrich; Alfa Aesar; AluChem;

Atlantic Equip. Engrs.; Atomergic Chemetals; Baikowski Int'l.; Chemconnect; Composition Materials; Condea Vista; Degussa-Hüls; Electro Abrasives; Ferro/Transelco; Fluka; H.M. Royal; Honeywell Spec. Chems.; Kahn & Co; LaRoche Ind.; Lonza Sarl; Nissam Chem. Ind.; Noah; Norton Chem. Process Prods.; PO; Reade Advanced Materials; Rhodia; San Yuan; Spectrum Quality Prods.; Sumitomo Chem.; Van Waters & Rogers; Whittaker, Clark & Daniels; Wilshire; Zircar Prods.

*Trade Names:* Aluminasol 100; Aluminasol 200; SAFFIL High Alpha Grade; SAFFIL Low Alpha Grade

**Alumina, activated.** See Alumina

**Alumina, calcined.** See Alumina

**Alumina hydrate.** See Aluminum hydroxide

**Alumina hydrated.** See Aluminum hydroxide

**Alumina, tabular.** See Alumina

**Aluminate, sodium.** See Sodium aluminate

**Alumina trihydrate.** See Aluminum hydroxide

**Aluminic acid.** See Aluminum hydroxide

**Aluminium.** See Aluminum

**Aluminium oxide alumite.** See Alumina

**Aluminium oxydes C.** See Alumina

**Aluminophosphoric acid.** See Aluminum orthophosphate

**Aluminosilicates, zeolites.** See Zeolite

**Aluminosilicic acid, magnesium salt.** See Magnesium aluminum silicate

**Aluminosilicic acid, sodium salt.** See Sodium silicoaluminate

## Aluminum

CAS 7429-90-5; EINECS/ELINCS 231-072-3; UN No. 1309 (DOT), 1396 (DOT), NA 9260

*Synonyms:* Aluminium; Aluminum bronze; Aluminum flake; Aluminum dehydrated; Aluminum metal; Aluminum powder; CI 77000; Pigment metal 1

*Classification:* Metallic element

*Empirical:* Al

*Properties:* Silvery wh. cryst. solid; sol. in HCl, sulfuric acid; insol. in water, alcohol; a.w. 26.98; dens. 2.708; m.p. 660 C; b.p. 2450 C

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup> (dust), 2 mg/m<sup>3</sup> (sol. salt), 5 mg/m<sup>3</sup> (welding fumes); inh. of fine powds. can cause pulmonary fibrosis; over-exposure may cause skin, eye, and respiratory tract irritation; TSCA listed

*Precaution:* Flamm. in air; dust is explosive by heat, flame, or reaction with oxidizers; reactive; no stable isotopes; dangerous when wet

HMIS: Health 1; Flammability 0; Reactivity 3

*Storage:* Moisture-sensitive

*Uses:* Building and construction; corrosion-resistant chemical equip. (desalination plants); die-cast auto parts; elec. industry (power transmission lines); photoengraving plates; permanent magnets; cryogenic technology; machinery; tubes for ointments; in cooking utensils; fencing; dental alloys; powder as filler, in aluminothermics, as flashlight in photography, in explosives, fireworks, paints; colorant for coatings, foods, and external pharmaceuticals; in food-pkg. adhesives; colorant in food-pkg. polymers, paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §73.1645, 73.2645, 175.105, 175.300, 176.170, 177.1460, 178.3297; BP compliance; Japan approved

*Manuf./Distrib.:* Aarbor Int'l.; Aldrich; Alfa Aesar; Atlantic Equip. Engrs.; Belmont Metals; Canbro; D.N. Lukens; Fluka; Harcros; J.H. Calo; Kaiser Aluminum; Noah; Punda Mercantile; Reade Advanced Materials; Royale Pigments & Chems.; Ruger; Seegott; U.S. Aluminum; Vanguard Chem. Int'l.; Whittaker, Clark & Daniels

*Trade Names Containing:* Kronos® 2020; Kronos® 2073; Kronos® 2081; Kronos® 2101; Kronos® 2160; Kronos® 2200; Kronos® 2210; Kronos® 2220; Kronos® 2230; Kronos® 2310; Metalure® L-53520; Metalure® L-54893; Metalure® L-54894; Metalure® L-54949; Metalure® L-55350; Metalure® L-55700; Metalure® L-56161; Metalure® L-56716

## Aluminum acetate

CAS 139-12-8; EINECS/ELINCS 205-354-1

*Synonyms:* Acetic acid, aluminum salt; Aluminum acetate, basic; Aluminum hydroxide acetate; Aluminum subacetate; Hydroxyaluminum di (acetate)

*Definition:* Aluminum salt of acetic acid

*Empirical:* C<sub>2</sub>H<sub>3</sub>O<sub>2</sub> · 1/3Al

*Formula:* (CH<sub>3</sub>COO)<sub>3</sub>Al

*Properties:* Wh. powd.; water-sol.; m.w. 69.02; m.p. 54 C

*Toxicology:* Harmful if swallowed, inhaled, or absorbed thru skin; irritant; inh.

of dust may cause irritation to upper respiratory tract; dust may irritate eyes  
**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>  
**Storage:** Keep in tightly closed containers  
**Uses:** Antimicrobial in cosmetics; antiseptic; astringent; antiperspirant; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods  
**Regulatory:** FDA 21CFR §175.105, 176.170  
**Manuf./Distrib.:** Alemark; Alfa Aesar; Chattem; Jarchem Ind.; OM Group; Spectrum Quality Prods.

**Aluminum acetate, basic.** See Aluminum acetate

**Aluminum ammonium bis (sulfate).** See Ammonium alum

**Aluminum ammonium sulfate.** See Ammonium alum

**Aluminum bronze.** See Aluminum

#### Aluminum caprylate

CAS 6028-57-5; EINECS/ELINCS 227-902-9

**Synonyms:** Aluminum octanoate; Aluminum trioctanoate; Octanoic acid, aluminum salt

**Definition:** Aluminum salt of caprylic acid

**Empirical:** C<sub>8</sub>H<sub>16</sub>O<sub>2</sub> · 1/3Al

**Uses:** Emulsion stabilizer, opacifier, visc. control agent in cosmetics; binder, emulsifier, anticaking agent in foods; food-pkg. adhesives; drier in food-contact coatings; defoamer in food-contact paper coatings, paper/paperboard

**Regulatory:** FDA 21CFR §172.863, 175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.2260, 178.3910

**Aluminum chlorhydroxide.** See Polyaluminum chloride

**Aluminum chloride basic.** See Polyaluminum chloride

**Aluminum chloride hydroxide.** See Polyaluminum chloride

**Aluminum chlorohydrate.** See Polyaluminum chloride

**Aluminum chlorhydroxide.** See Polyaluminum chloride

**Aluminum dehydrated.** See Aluminum

**Aluminum, dihydroxy (octadecanoato-o-).** See Aluminum stearate

#### Aluminum distearate

CAS 300-92-5; EINECS/ELINCS 206-101-8

**Synonyms:** Aluminum hydroxide distearate; Aluminum, hydroxybis (octadecanoato-o-); Aluminum, hydroxybis (stearato-); Aluminum hydroxydistearate; Hydroxyaluminum distearate; Monohydroxyaluminum distearate

**Definition:** Aluminum salt of stearic acid

**Empirical:** C<sub>36</sub>H<sub>77</sub>AlO<sub>5</sub>

**Formula:** [CH<sub>3</sub>(CH<sub>2</sub>)<sub>16</sub>COO]<sub>2</sub>Al(OH)

**Properties:** Wh. powd.; insol. in water, alcohol, ether; forms gel w/ aliphatic and aromatic hydrocarbons; m.w. 611.05; dens. 1.009; m.p. 145 C

**Toxicology:** ACGIH TLV/TWA 10 mg/m<sup>3</sup>; nuisance dust; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**HMS:** Health 1; Flammability 0; Reactivity 0

**Uses:** Thickener, gellant in cosmetics, paints, inks, greases; emulsion stabilizer, opacifier, visc. control agent in cosmetics; water repellent; lubricant in plastics and cordage, in cement prod.; processing lubricant for amino resins; additive in polymers and coatings; food binder, emulsifier, anticaking agent; food-pkg. adhesives; stabilizer migrating from food pkg.; metal soap stabilizer; colorant in food-pkg. polymers, paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §172.863, 173.340, 175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1460, 177.2260, 178.3297, 178.3910, 179.45, 181.22, 181.29

**Manuf./Distrib.:** Am. Int'l.; Jarchem Ind.; Ruger

**Aluminum distearate and aluminum tristearate.** See Aluminum stearates

**Aluminum di/tristearate.** See Aluminum stearates

**Aluminum flake.** See Aluminum

#### Aluminum formate

CAS 7360-53-4; EINECS/ELINCS 230-898-1

**Synonyms:** Aluminum formate, trihydrate; Aluminum triformate; Formic acid, aluminum salt

**Definition:** Aluminum salt of formic acid

**Empirical:** C<sub>3</sub>H<sub>3</sub>AlO<sub>6</sub>

**Properties:** Wh. cryst.; m.w. 152.03

**Precaution:** Aq. sol'n. explodes when heated in air

**Uses:** Antimicrobial in cosmetics; antisloughing agent for syndet bars; water repellent additive; mordant in dyeing; in tanning; paper wet str. improver; precipitant, fixing agent for mfg. of acid-free papers; in antiperspirants

**Manuf./Distrib.:** ABCR; Aceto

**Trade Names:** Altriform®; Ecco Aluminum Formate

**Aluminum formate, trihydrate.** See Aluminum formate

**Aluminum hydrate.** See Aluminum hydroxide

#### Aluminum hydroxide

CAS 21645-51-2; EINECS/ELINCS 244-492-7

**Synonyms:** ATH; Alumina hydrate; Alumina hydrated; Alumina trihydrate; Aluminic acid; Aluminum oxide hydrate; Aluminum hydrate; Aluminum trihydroxide; Aluminum trihydrate; Hydrated alumina; Hydrated aluminum oxide; Trihydrated alumina

**Classification:** Inorganic compd.

**Empirical:** AlH<sub>3</sub>O<sub>3</sub>

**Formula:** Al(OH)<sub>3</sub>

**Properties:** Wh. cryst. powd. or gran.; odorless; insol. in water, alcohol; sol. in min. acids, caustic soda; m.w. 78.01; dens. 2.42; bulking value 0.050 gal/lb; m.p. loses water @ 300 C; oil absorp. 32-38; GE brightness 93-99; ref. index 1.57; hardness (Mohs) 2.5-3.5

**Toxicology:** TLV/TWA 2 mg (Al)/m<sup>3</sup>; LDLo (IP, rat) 150 mg/kg; poison by IP route; human systemic effects by ing. (fever, GI effects); irritant; no known skin toxicity; mutagenic data; TSCA listed

**Precaution:** Incompat. with chlorinated rubber; when coprecipitated with bismuth hydroxide, and reduced by H<sub>2</sub>, it is violently flamm. in air; incompat. with strong acids, strong bases

**HMS:** Health 1; Flammability 0; Reactivity 1

**Storage:** Store in closed containers; avoid generating dust

**Uses:** Adsorbent; emulsifier; filtering medium; prod. of aluminum, salts; mfg. of glass, fire clay, paper, pottery, dyes, lubricants, paints, printing inks; filler/extender in paints, plastics; improves brightness; waterproofing fabrics; textile finishing; flame retardant for plastics, rubber, carpet backing, paper, adhesives, coatings; mordant in dyeing; rubber reinforcing agent; food and pharmaceutical use; filler; abrasive; emollient, humectant, visc. control agent in cosmetics; mild astringent; gastric antacid; in antiperspirants; dentifrices; colorant in food-pkg. polymers, paper/paperboard in contact with aq./fatty foods; filler in food-contact rubber articles for repeated use

**Regulatory:** FDA 21CFR §175.300, 176.170, 177.1200, 177.2600, 178.3297, 182.90; BP compliance (dried, gel, mixt., oral susp.)

**Manuf./Distrib.:** Actrachem; Akrochem; Alcan; Alcoa; Aldrich; Alfa Aesar; AluChem; Ashland; Atomegic Chemetals; Condea Vista; Costec; D.N. Lukens; Fluka; Frank E. Dempsey; Franklin Ind. Mins.; Georgia Marble; J.M. Huber/Chems.; Kaiser Alumina Chems.; Lohmann; Noah; Nyco Mins.; Omya Croxton+Garry; PQ; Polyad; R.E. Carroll; Reheis; Rhodia; Ruger; Seimi Chem.; Sigma; Smith Chem.; Spectrum Quality Prods.; Total Spec. Chems.; Warner-Jenkinson; Whittaker, Clark & Daniels

**Trade Names:** Alcan Superfine SF 2; Alcan Superfine SF 4; Alcan Superfine SF 7; Alcan Superfine SF 9; Alcan Superfine SF 11; Alcan Ultrafine UF15; Alcan Ultrafine UF25; Alcan Ultrafine UF35; Alcoa® Grade C-231; Alcoa® Grade C-333; Alcoa® KB30; Hydrad™ 10; Hydrad™ 10W; Hydrad™ 15; Hydrad™ 15W; Hydrad™ 20; Hydrad™ C; Hydrad™ F; Hydrad™ HBC; Hydrad™ HBF; Hydral® 710; Hydral® 716; Hydral® PGA; Hydral® Brite 100 Slurry; Hydral® Coat 2; Hydral® Coat 5; Hydral® Coat 7; Hydrax™ H-312; Hydrax™ H-470; Hydrax™ H-490; Hydrax™ H-550; Hydrax™ H-636; Hydrax™ H-910; KC-350; KC-500; KC-750; KC-900; Martinal® OL-104; Micral® 532; Micral® 916; Micral® 932; Path® 9; SB-332; SB-805; UHF16

**Aluminum hydroxide acetate.** See Aluminum acetate

**Aluminum hydroxide distearate.** See Aluminum distearate

**Aluminum hydroxide silicate sulfate.** See Aluminum hydroxide sulfate

#### Aluminum hydroxide sulfate

CAS 53810-32-5

**Synonyms:** Aluminum hydroxide silicate sulfate; Basic aluminum sulfate; Polyaluminum silicate sulfate

**Properties:** Colorless clear liq.; odorless; f.p. < 0 C; b.p. dec. @ 90 C; noncombustible

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; mist causes respiratory tract irritation; may cause irritation to skin, eyes, mouth, and digestive tracts

## Aluminum, hydroxybis (octadecanoato-o)-

*Precaution:* Avoid contact with strong alkalis, oxidizers, hydro-reactive materials; hydrolyzes in water

*Hazardous Decomp. Prods.:* May liberate SO<sub>2</sub> and aluminum oxides when boiled to dryness or heated above 200 C

*Uses:* Coagulant in potable water and industrial wastewater treatment, pulp and papermaking

*Trade Names:* Pass®-55; Pass®-70; Pass®-80; PASS®-100

**Aluminum, hydroxybis (octadecanoato-o)-.** See Aluminum distearate

**Aluminum, hydroxybis (stearato)-.** See Aluminum distearate

**Aluminum hydroxychloride.** See Polyaluminum chloride

**Aluminum hydroxydistearate.** See Aluminum distearate

**Aluminum magnesium silicate.** See Magnesium aluminum silicate

**Aluminum metal.** See Aluminum

**Aluminum monobasic stearate.** See Aluminum stearate

**Aluminum monopalmitate.** See Aluminum palmitate

**Aluminum monostearate.** See Aluminum stearate

### Aluminum myristates/palmitates

*Synonyms:* Aluminum trimyristate/tripalmitate; Myristic acid, palmitic acid, mixture, aluminum salt

*Uses:* Emulsion stabilizer, opacifier, visc. control agent in cosmetics; in food-pkg. adhesives; in resinous/polymeric food-contact coatings for polyolefin films; in paper/paperboard in contact with aq./fatty foods; defoamer in food-contact coatings and paper/paperboard; in cellophane for food pkg.; in resin-bonded filters for food contact; in surf. lubricants for mfg. of food-contact metallic articles

*Regulatory:* FDA 21CFR §172.863, 175.105, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.2260, 178.3910

**Aluminum octanoate.** See Aluminum caprylate

### Aluminum oleate

CAS 688-37-9; EINECS/ELINCS 211-702-3

*Synonyms:* 9-Octadecenoic acid, aluminum salt; 9-Octadecenoic acid, (2)-, aluminum salt (3:1); Oleic acid aluminum salt

*Empirical:* C<sub>24</sub>H<sub>46</sub>O<sub>6</sub>

*Formula:* [CH<sub>3</sub>(CH<sub>2</sub>)<sub>7</sub>CH=CH(CH<sub>2</sub>)<sub>7</sub>COO]<sub>3</sub>Al

*Properties:* Ylsh. visc. mass; sol. in alcohol, benzene, ether, oil turpentine; pract. insol. in water; m.w. 871.36

*Precaution:* Combustible

*Uses:* Waterproofing agent; drier for paints; thickener for lubricating oils; medicine; as lacquer for metals; lubricant for plastics; food additive; migrating to foods from paper/paperboard; drier in food-contact coatings

*Regulatory:* FDA 21CFR §175.300, 182.90, GRAS

### Aluminum orthophosphate

CAS 7784-30-7; EINECS/ELINCS 232-056-9; UN No. 1760 (DOT)

*Synonyms:* Aluminum phosphate; Aluminophosphoric acid; Phosphoric acid, aluminum salt (1:1)

*Empirical:* AlO<sub>4</sub>P

*Formula:* AlPO<sub>4</sub>

*Properties:* Wh. cryst.; insol. in water and alcohol; sl. sol. in HCl, nitric acid; m.w. 121.95; dens. 2.566; m.p. 1500 C; isomorphous with quartz

*Toxicology:* Sol'ns. are corrosive to tissue; avoid contact and inhalation; TSCA listed

*Uses:* Lubricant; refractory bonding agent; flux for ceramics; dental cements; cosmetics; paints and varnishes; pharmaceuticals; pulp and paper; ant-acid

*Manuf./Distrib.:* Aldrich; Alfa Aesar; Fluka; Honeywell Spec. Chems.; Noah; Sigma

**Aluminum oxide.** See Alumina

**Aluminum oxide (2:3).** See Alumina

**Aluminum oxide hydrate.** See Aluminum hydroxide

**Aluminum oxide silicate.** See Aluminum silicate

### Aluminum palmitate

*Synonyms:* Hexadecanoic acid aluminum salt; Palmitic acid aluminum salt; Aluminum monopalmitate

*Empirical:* C<sub>48</sub>H<sub>92</sub>O<sub>6</sub>

*Formula:* [CH<sub>3</sub>(CH<sub>2</sub>)<sub>14</sub>COO]<sub>3</sub>Al

*Properties:* Wh. to yel. mass or powd.; pract. insol. in water or alcohol; dissolves in petrol. ether or oil turpentine when fresh; m.w. 793.25; dens. 1.072

*Precaution:* Combustible

*Uses:* Waterproofing leather, paper, textiles; thickener for lubricating oils; thickener, suspending agent for paints and inks; prod. of high gloss on leather and paper; in varnishes; lubricant for plastics; food additive; migrating to foods from paper; drier in food-contact coatings

*Regulatory:* FDA 21CFR §175.300, 182.90, GRAS

**Aluminum phosphate.** See Aluminum orthophosphate

**Aluminum potassium alum.** See Potassium alum anhydrous

**Aluminum potassium disulfate.** See Potassium alum anhydrous

**Aluminum potassium sulfate.** See Potassium alum anhydrous; Potassium alum dodecahydrate

**Aluminum potassium sulfate alum.** See Potassium alum anhydrous

**Aluminum potassium sulfate, anhydrous.** See Potassium alum anhydrous

**Aluminum powder.** See Aluminum

### Aluminum silicate

CAS 1327-36-2; EINECS/ELINCS 215-475-1

*Synonyms:* Aluminum oxide silicate; Cl 77004; Pyrophyllite; Willinite

*Definition:* Complex inorganic salt with 1 mole alumina, 1-3 moles silica; naturally occurring forms: andalusite, cyanite, sillimanite; other aluminum silicate mins. incl. kaolinite, kochite, mullite, newtonite, pyrophyllite, etc.

*Properties:* Varying proportions of Al<sub>2</sub>O<sub>3</sub> and SiO<sub>2</sub>; wh. mass, crystals, or whiskers; high str.; insol. in water; dens. 2.63; oil absorp. 35-45; GE brightness 82-92; ref. index 1.56; hardness (Mohs) 2

*Toxicology:* Essentially harmless when given orally or applied to skin; questionable carcinogen with experimental tumorigenic data by implantation

*Uses:* Clay, reinforcing extender, pigment used in reinforced plastics, dental cements, glass industry, rubber, wire and cable insulation; paint filler/extender; mfg. of semiprecious stones, enamels, colored lakes; catalyst in refining petroleum; filler in rubber, shoe soles, paper, printing inks; water softener; in detergents; abrasive, absorbent, opacifier in cosmetics; thickener for foods, beverages, pharmaceuticals; pigment; TiO<sub>2</sub> extender; in washing compds.; in cellophane for food pkg.; filler in food-contact rubber articles for repeated use

*Regulatory:* FDA 21CFR §175.300, 177.1200, 177.1460, 177.2600, 184.1155

*Manuf./Distrib.:* Akrochem; Alfa Aesar; Baikowski Int'l.; Boehle; Burgess Pigment; C.P. Hall; CE Mins.; Cimbar Perf. Mins.; D.N. Lukens; Degussa-Hüls; ECC Int'l.; Engelhard; IMERYS; J.M. Huber/Chems.; Jesse S. Young; Kaopolite; Kyowa Chem. Ind.; Lenape Ind.; R.E. Carroll; R.T. Vanderbilt; Solvay SA; Southern Clay Prods.; Takeda USA; Tamms Ind.; Thiele Kaolin; Tomita Pharmaceutical; U.S. Silica; Whittaker, Clark & Daniels

*Trade Names:* Hydragloss; Iceberg®; Icecap® K; Optiwhite®; Tisyn®

*Trade Names Containing:* Translink® 77

### Aluminum silicate dihydrate

*Synonyms:* Clay

*Empirical:* Al<sub>2</sub>O<sub>3</sub>SiO<sub>2</sub> · 2H<sub>2</sub>O

*Properties:* Reddish-brn. to pale buff fine irreg. crystals; odorless; insol. in water and org. clays; m.w. 222.13

*Uses:* In ceramic prods.; in oil-well drilling fluids; filler for rubber and plastic prods., films, paper coatings; decolorizing oils; carrier in insecticide sprays

*Manuf./Distrib.:* ABCR

See also Kaolin

**Aluminum silicate hydrated.** See Kaolin

**Aluminum silicate hydrous.** See Kaolin

**Aluminum silicate hydroxide.** See Kaolin

**Aluminum sodium oxide.** See Sodium aluminate

**Aluminum sodium silicate.** See Sodium silicoaluminates

**Aluminum sodium sulfate.** See Sodium alum

### Aluminum stearate

CAS 7047-84-9; EINECS/ELINCS 230-325-5

*Synonyms:* Aluminum, dihydroxy (octadecanoato-o-); Aluminum monobasic stearate; Aluminum monostearate; Aluminum stearate, monobasic; Dihydroxyaluminum monostearate; Dihydroxyaluminum stearate; Octadecanoic acid, aluminum salt; Stearic acid, aluminum salt; Stearic acid, aluminum dihydroxide salt

*Classification:* Aliphatic organic; sat. aliphatic carboxylic acid salt

*Definition:* Aluminum salt of stearic acid

*Empirical:* C<sub>18</sub>H<sub>37</sub>AlO<sub>4</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>16</sub>COOAl(OH)<sub>2</sub>

*Properties:* Wh. to yls. fine powd., faint char. odor; sol. in alkali, petrol, turpentine oil; insol. in water, alcohol, ether; m.w. 344.48; dens. 1.070; m.p. 115 C

*Toxicology:* ACGIH TWA 10 mg/m<sup>3</sup>; TLV/TWA 2 mg(Al)/m<sup>3</sup>; LD50 (oral, rat) > 5 g/kg; essentially nontoxic; nuisance dust; inh. of high concs. of dust may cause coughing and mild temporary irritation; sl. eye irritant; TSCA listed

*Precaution:* Combustible dust; may form explosive dust-air mixts.; incompat. with acids (reacts vigorously)

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, aluminum oxide; heated to decomp., emits acrid smoke and irritating fumes

HMS: Health 1; Flammability 1; Reactivity 0

*Storage:* Store in cool area away from ignition sources

*Uses:* Paint, varnish drier; greases; waterproofing agent for fabric, rope, cement; cement additive; lubricant for unsat. polyester resins, textile fibers; thickener in lubricating oils, cutting compds.; flattening agent; colorant in cosmetics; gelling agent in pharmaceuticals; wetting agent; defoamer in beet sugar and yeast processing; drier in food-contact coatings; food-pkg. adhesives; colorant in food-pkg. polymers, paper/paperboard in contact with aq./fatty foods; adjuvant in food-contact textiles

*Regulatory:* FDA §121.1099, 172.863, 173.340, 175.105, 175.210, 175.300, 176.170, 176.200, 176.210, 177.1200, 177.1460, 177.2260, 177.2800, 178.3297, 178.3910, 179.45, 181.22, 181.29; USP/NF compliance

*Manuf./Distrib.:* AC Ind.; Acme-Hardesty; Aerchem; Alfa Aesar; Am. Int'l.; Ashland; Atofina; Ayers Int'l.; Crompton/Witco; Eastech; Fallek; Ferro/Grant; Ferro; Fluka; Geo Spec. Chems.; Halstab; Harcros; Honeywell Spec. Chems.; Lohmann; Los Angeles Chem.; Magnesia GmbH; NOF; Norac; Norman, Fox; Pechiney World Trade USA; Pfaltz & Bauer; Ruger; Sea-Land; Spectrum Quality Prods.; Universal Preserv-A-Chem; Van Waters & Rogers

See also Aluminum tristearate

**Aluminum stearate, monobasic.** See Aluminum stearate

#### Aluminum stearates

*Synonyms:* Aluminum distearate and aluminum tristearate; Aluminum di/tristearate

*Definition:* Mixt. of aluminum distearate and aluminum tristearate (1:1)

*Uses:* Emollient, emulsion stabilizer, opacifier, visc. control agent in cosmetics; food pkg. adhesives; food-contact resinous/polymeric coatings; in food-contact paper/paperboard; defoamer in food-contact coatings, paper/paperboard; food-contact cellophane; resin-bonded filters for food contact; in surf. lubricants for mfg. of food-contact metallic articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.2260, 178.3910, 179.45

**Aluminum subacetate.** See Aluminum acetate

#### Aluminum sulfate

CAS 10043-01-3 (anhyd.); 17927-65-0 (hydrate); EINECS/ELINCS 233-135-0; UN No. 1760 (sol'n.) (DOT)

*Synonyms:* Alum; Aluminum trisulfate; Cake alum; Dialuminum sulfate; Dialuminum trisulfate; Papermakers' alum; Patent alum; Pearl alum; Sulfuric acid aluminum salt; Sulfuric acid, aluminum salt (3:2)

*Classification:* Inorganic salt

*Empirical:* Al<sub>2</sub>O<sub>12</sub>S<sub>3</sub>

*Formula:* Al<sub>2</sub>(SO<sub>4</sub>)<sub>3</sub> · 14H<sub>2</sub>O

*Properties:* Wh. cryst. powd., odorless, sweet taste; sol. 36.4% in water (20 C); insol. in alcohol; m.w. 342.14 (anhyd.); dens. 2.71; b.p. dec. @ 770 C; stable in air

*Toxicology:* ACGIH TLV-TWA 2 mg/m<sup>3</sup>; LD50 (oral, mouse) 6207 mg/kg; mod. toxic by ing. and IP routes; irritating to skin, eyes, respiratory tract; ing. causes nausea, vomiting, abdominal pain; hydrolyzes to form sulfuric acid which irritates tissue, esp. lungs; TSCA listed

*Precaution:* Forms sulfuric acid with water; dec. to sulfur oxides at high temps.

*Hazardous Decomp. Prods.:* SO<sub>2</sub>

HMS: Health 1; Flammability 0; Reactivity 0

*Storage:* Hygroscopic

*Uses:* Coagulant in pulp and paper mills, water purification plants, drinking water treatment; leather tanning; textiles; gypsum treatment; in fire retardants; deodorizer; decolorizer; food additive; firming agent in foods and pharmaceuticals; in pkg.; flocculant; iron and manganese removal; activa-

tion of silica for water treatment; sizing paper; lakes; dyeing mordant; foaming agent in firefighting foams; fireproofing cloth; catalyst for methane mfg.; pH control for paper; waterproofing concrete; antiperspirant agent, deodorant agent in cosmetics

*Regulatory:* FDA 21CFR §172.892, 173.3120, 182.1125, GRAS; USP/NF, BP, Ph. Eur. compliance

*Manuf./Distrib.:* Albemarle; Alcan; Alchem; Aldrich; Alfa Aesar; Allan; Allchem Ind.; Altivia; Asada Chem. Ind.; Ashland; BK Giulini Chemie; Barker Ind.; Bay Chem. & Supply; Calabrian; Chemconnect; Columbus Chem. Ind.; Delta; General Alum & Chem.; General Chem.; Geo Spec. Chems.; Harcros; Holland; Honeywell Spec. Chems.; Int'l. Chem. Inc.; Kemira Water Treatment; Lohmann; Los Angeles Chem.; Melchemie bv; Mutchler; P.B. & S.; Polymer Systems Inc; Rasa Ind.; Rhodia; Ruger; Sal Chem.; San Yuan; Seeler Ind.; Southern Ionics; Spectrum Quality Prods.; Van Waters & Rogers; Veckridge

*Trade Names:* Alcan Aluminum Sulphate Sol'n.; Alcan Aluminum Sulphate Solid; Clar+Ion™ A410P; Papermaker's Alum

*Trade Names Containing:* Clar+Ion™ 603; Clar+Ion™ 605; Clar+Ion™ 610; Clar+Ion™ 610M; Clar+Ion™ A405P; Clar+Ion™ A415P; Clar+Ion™ A420P

**Aluminum trioctanoate.** See Aluminum caprylate

#### Aluminum tristearate

CAS 637-12-7; EINECS/ELINCS 211-279-5

*Synonyms:* Aluminum stearate; Octadecanoic acid, aluminum salt; Stearic acid, aluminum salt; Tribasic aluminum stearate

*Definition:* Aluminum salt of stearic acid

*Empirical:* C<sub>54</sub>H<sub>105</sub>O<sub>6</sub> · Al

*Formula:* [CH<sub>3</sub>(CH<sub>2</sub>)<sub>14</sub>COO]<sub>3</sub>Al

*Properties:* Wh. powd.; sol. in alcohol, benzene, oil turpentine, min. oils; pract. insol. in water; m.w. 877.35; dens. 1.070; m.p. 117-120 C

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup>; nuisance dust; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating vapors

*Uses:* Paint and varnish drier; greases; waterproofing agent for paper, textile coatings; cement additive; thickening lubricants; gelling agent in deodorants, cleansing lotions; cutting compds.; flattening agent; pharmaceuticals; lt.-sensitive photographic compositions; emollient, emulsion stabilizer, opacifier, visc. control agent in cosmetics; defoamer in beet sugar and yeast processing; stabilizer migrating from food pkg.; food-pkg. adhesives; colorant in food-pkg. polymers, paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §172.863, 173.340, 175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1460, 177.2260, 178.3297, 178.3910, 179.45, 181.22, 181.29

*Manuf./Distrib.:* Katsuta Kako; Kawamura Kasei ind.

### Aminomethyl propanol

CAS 124-68-5; EINECS/ELINCS 204-709-8

**Synonyms:** AMP; 2-Amino-2,2-dimethylethanol; 2-Amino-2-methyl-1-propanol; 1,1-Dimethyl-2-hydroxyethylamine; Isobutanolamine; Isobutanol-2 amine; 2-Methyl-2-amino-1-propanol

**Classification:** Substituted aliphatic alcohol

**Empirical:** C<sub>4</sub>H<sub>11</sub>NO

**Formula:** CH<sub>3</sub>(CH<sub>3</sub>)(NH<sub>2</sub>)CH<sub>2</sub>OH

**Properties:** Solid or visc. liq.; nearly odorless; very sol. in alcohol; misc. with water; sl. sol. in aromatic hydrocarbons; m.w. 89.14; dens. 0.93 (20/4 C); m.p. 30 C; b.p. 165 C (760 mm); flash pt. (TOC) 67 C; pH 11.3 (0.1M aq.)

**Toxicology:** Moderately toxic by ingestion; irritating to eyes and skin; TSCA listed

**Precaution:** Flamm. exposed to heat or flame; can form explosive mixts. with air  $\geq$  67 C; corrosive to copper, brass, and aluminum

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO, CO<sub>2</sub>, NO<sub>x</sub>

**NFPA:** Health 2; Flammability 2; Reactivity 0

**Uses:** Additive for latex paint; pigment dispersant; solubilizer for resins; emulsifier for oils, waxes, creams/lotions; neutralizer for boiler water treatment; corrosion inhibitor; absorbent for acidic gases; amine soaps (metalworking fluids); food-pkg. adhesives; organic synthesis; corrosion inhibitor for boiler water systems; carbon dioxide absorber; synthesis of surfactants; buffer in cosmetics, pharmaceutical, diagnostic, and biochem. applics.; catalyst (as acid salt); dispersant, pigment suspending agent in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §175.105, 176.170

**Manuf./Distrib.:** ANGUS; Aldrich; Alfa Aesar; Allchem Ind.; Ashland; Exaxol; Fluka; Quaker City; Sigma; Spectrum Quality Prods.

**2-Amino-2-methyl-1-propanol.** See Aminomethyl propanol

**1-Aminooctadecane.** See Stearamine

**1-Amino-2-propanol.** See Isopropanolamine

**1-Aminopropan-2-ol.** See Isopropanolamine

### N-(3-Aminopropyl) diethanolamine

CAS 4985-85-7; UN No. 1760 (DOT)

**Synonyms:** APDEA; Ethanol, 2,2'-((3-aminopropyl)imino)bis-

**Classification:** Alkanolamine

**Properties:** Colorless clear liq.; ammonia-like odor; sol. > 10% in water; sp.gr. 1.07; vapor pressure < 1 mm Hg (68 F); b.p. 167 C (760 mm); flash pt. (COC) 340 F; ref. index 1.4965

**Toxicology:** LD50 (oral, rat) 3.50 ml/kg (sl. toxic), (dermal, rabbit) > 2.50 ml/kg (sl. toxic); causes eye and skin burns; harmful or fatal if swallowed; harmful if absorbed thru skin; causes respiratory tract irritation and can cause damage; TSCA listed

**Environmental:** LC50 (96 h) > 100-1000 ppm; pract. nontoxic

**Precaution:** Corrosive; reacts violently with acids

**Hazardous Decomp. Prods.:** Burning in limited air supply may produce

combustion prods. of nitrogen, CO, CO<sub>2</sub>, irritating aldehydes and ketones, and toxic levels of ammonia

**HMIS:** Health 3; Flammability 1; Reactivity 0

**Storage:** Minimize exposure to high temps.; avoid water contamination

**Uses:** Intermediate in prep. of surfactants, pharmaceuticals, fabric softeners, skin care prods., tube/fuel additives such as dispersants and detergents, corrosion inhibitors for metalworking, drugs, dyes, flocculants for paper mfg. and wastewater treatment; integral skin PU, EPDM rubbers to improve blending and tear resist., buffers, chelating agents

**Regulatory:** SARA §311 acute hazard

**Manuf./Distrib.:** Huntsman

**Aminosulfonic acid.** See Sulfamic acid

**Aminotriacetic acid.** See Nitrilotriacetic acid

**Aminotriethanoic acid.** See Nitrilotriacetic acid

### Aminotrimethylene phosphonic acid

CAS 6419-19-8; EINECS/ELINCS 229-146-5

**Synonyms:** AMP; ATMP; NTF; NTMP; NTPA; Aminotri (methylenephosphonic acid); Aminotri (methylphosphonic acid); Aminotris (methanephosphonic acid); Aminotris (methylphosphonic acid); Aminotris (methylene phosphonic acid); Nitrilotrimethanephosphonic acid; Nitrilotrimethylphosphonic acid; Nitrilotrimethylenephosphonic acid; Nitrilotris (methylenephosphonic acid); Nitrilotris (methylene) triphosphonic acid; Nitrilotris (methylphosphonic acid); Phosphonic acid, (nitrilotris (methylene) tri-; Tris (phosphonomethyl) amine

**Classification:** Organic compd.

**Empirical:** C<sub>3</sub>H<sub>12</sub>NO<sub>9</sub>P<sub>3</sub>

**Formula:** (HOPOOH)<sub>3</sub>N(CH<sub>2</sub>)<sub>2</sub>

**Properties:** M.w. 299.07; dens. 1.33; m.p. -14 C; b.p. 105 C

**Toxicology:** LD50 (oral, rat) 2100 mg/kg, (skin, rabbit) > 6310 mg/kg; mod. toxic by ing.; irritating to eyes and skin; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NO<sub>x</sub> and PO<sub>x</sub>

**Uses:** Scale and corrosion inhibitor, chelant for cooling water treatment, boiler and oil field treatment; aq. process additive for paper, textiles, and metals; sequestrant in industrial and commercial cleaning formulations; sludge conditioner for boiler water treatment; oil drilling muds; powd. detergents; photographic applics.; pigment/filler/clay dispersant for ceramics, paper, paints; chelating agent in cosmetics

**Manuf./Distrib.:** Acros Org.; Aldrich; Allchem Ind.; Excel Ind.; Fluka; Pfaltz & Bauer; TCI Am.

**Trade Names:** Aquacid-108 EX; Dequest® 2000; Dequest® 2000LC

**Aminotri (methylenephosphonic acid).** See Aminotrimethylene phosphonic acid

**Aminotri (methylenephosphonic acid) pentasodium salt.** See Pentasodium aminotrimethylene phosphonate

**Aminotri (methylphosphonic acid).** See Aminotrimethylene phosphonic acid

**Aminotris (methanephosphonic acid).** See Aminotrimethylene phosphonic acid

**Aminotris (methylene phosphonic acid).** See Aminotrimethylene phosphonic acid

**Aminotris (methylphosphonic acid).** See Aminotrimethylene phosphonic acid

### Ammonia

CAS 7664-41-7; EINECS/ELINCS 231-635-3; UN No. 1005 (anhyd.), 2672, 2073 (sol'ns.)

**Synonyms:** Ammonia anhydrous; Ammonia gas; Anhydrous ammonia

**Classification:** Inorganic nitrogen compd.

**Empirical:** H<sub>3</sub>N

**Formula:** NH<sub>3</sub>

**Properties:** Colorless gas or liq., sharp, intensely irritating odor; easily liquefied by pressure; sol. in water, alcohol, ether; m.w. 17.03; sp.gr. 0.682 (-33.4 C); f.p. -77 C; b.p. -33.5 C; pH 11.6 (1N aq.)

**Toxicology:** ACGIH TLV/TWA 25 ppm; STEL 35 ppm; LD50 (inh., mouse, 1 h) 4837 ppm, (oral, rat) 350 mg/kg (ammonium hydroxide); corrosive; inh. of conc. fumes may be fatal; irritating to eyes and mucous membranes; shown to produce cancer of the skin in human doses of 1000 mg/kg of body wt.; TSCA listed

**Precaution:** Moderate fire risk; caustic

**Hazardous Decomp. Prods.:** Exposed to heat, emits toxic fumes of NH<sub>3</sub> and NO<sub>x</sub>

NFPA: Health 3; Flammability 1; Reactivity 0

*Uses:* Fertilizer; refrigerant; nitriding of steel; condensation catalyst; neutralizer; extraction solvent; petroleum industry; latex preservative; explosives; taste and odor control agent in water treatment; condensate corrosion inhibitor; buffer in cosmetics; foods (processing aid); pharmaceuticals (alkalizing agent, buffer); microbial fermentation nutrient

*Regulatory:* FDA 27CFR §21.95; SARA reportable (anhyd.); Japan approved; BP compliance

*Manuf./Distrib.:* Agrium; Air Prods.; Aldrich; Arch Chems.; Ashland; BASF AG; Brown; Chemconnect; Chemical; Columbus Chem. **Ammonia solution.** See Ammonium hydroxide

**Ammonia solution, strong.** See Ammonium hydroxide

**Ammonia water.** See Ammonium hydroxide

**Ammonioformaldehyde.** See Hexamethylenetetramine

**Ammonium acetate**

CAS 631-61-8; EINECS/ELINCS 211-162-9

*Synonyms:* Acetic acid ammonium salt

*Classification:* Aliphatic organic compd.

*Empirical:* C<sub>2</sub>H<sub>7</sub>NO<sub>2</sub>

*Formula:* CH<sub>3</sub>COONH<sub>4</sub>

*Properties:* Colorless or wh. crystals, sl. acetous odor; sol. in alcohol, oxygenated solvs.; sl. sol. in acetone; very sl. sol. in water; m.w. 77.08; dens. 1.07; m.p. 114 C; pH 6.7-7.3 (5%)

*Toxicology:* LD50 (IP, rat) 632 mg/kg, (IV, mouse) 386 mg/kg; poison by IV route; mod. toxic by IP route; gastric irritant; TSCA listed

*Precaution:* Combustible

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub> and NH<sub>3</sub>

HMS: Health 2; Flammability 0; Reactivity 0

*Storage:* Hygroscopic, deliq.; store @ 2-8 C

*Uses:* Reagent in analytical chemistry; textile dyeing; preserving meats; foam rubbers; vinyl plastics; explosives; microbial fermentation nutrient; buffer in cosmetics, pharmaceuticals; diuretic/diaphoretic drug

*Regulatory:* BP compliance

*Manuf./Distrib.:* AMRESCO; Aldrich; Alemark; Alfa Aesar; Allan; Allchem Ind.; Am. Biorganics; Am. Int'l.; Cater Chems.; Daito Chem. Ind.; Daiwa; Fluka; General Chem.; Great Western; Heico; Honeywell Spec. Chems.; Honig; Jarchem Ind.; Johnson Matthey; Kishida Chem.; Lohmann; Magnablend; Min. R&D; Noah; Ruger; Sigma; Spectrum Quality Prods.; Tomiyama Pure Chem. Ind.; Verdugt BV; Yoneyama Chem. Ind.

*Trade Names Containing:* Protec ZA7

**Ammonium acid phosphate.** See Ammonium phosphate

**Ammonium, alkylidimethyl (phenylmethyl)-, chloride.** See Benzalkonium chloride

**Ammonium alum**

CAS 7784-25-0; 7784-26-1; EINECS/ELINCS 232-055-3

*Synonyms:* Alum, ammonium; Aluminum ammonium bis (sulfate); Aluminum ammonium sulfate; Ammonium aluminum sulfate; Ammonium aluminum alum; Burnt ammonium alum; Exsiccated ammonium alum; Sulfuric acid, aluminum ammonium salt (2:1:1), dodecahydrate

*Classification:* Inorganic aluminum compd.

*Empirical:* Al • H<sub>3</sub>N • 2H<sub>2</sub>O<sub>4</sub>S • 12H<sub>2</sub>O

*Formula:* AlNH<sub>4</sub>(SO<sub>4</sub>)<sub>2</sub> • 12H<sub>2</sub>O

*Properties:* Wh. cryst. powd., odorless, strong sweet astringent taste; freely sol. in glycerol; pract. insol. in alcohol; sol. 1 g/7 ml in water; m.w. 453.33; dens. 1.645; m.p. 94.5 C; b.p. dec. > 280 C; noncombustible

*Toxicology:* TLV/TWA 2 mg/m<sup>3</sup> (sol. salts, as Al); irritating if inhaled or in-

gested; causes redness and irritation to skin and eyes when sulfuric acid forms in presence of moisture

*Precaution:* Incompat. with strong bases (can react vigorously)

*Hazardous Decomp. Prods.:* On decomp., emits toxic fumes of NO<sub>x</sub> and SO<sub>x</sub>

HMS: Health 1; Flammability 0; Reactivity 0

*Storage:* Store in cool, dry area in labeled dust-tight containers; keep closed when not in use

*Uses:* Mordant in dyeing; sizing paper; retanning leather; clarifying agent; food additive: mild astringent, antiseptic; mfg. of lakes and pigments; fur treatment; coagulant, taste and odor control agent for water and sewage treatment/purification; buffer, neutralizer in baking powd.; waterproofing and fireproofing agent (textiles); electroplating bath ingred.; hardener for gelatin; antiperspirant agent in cosmetics; in food-contact animal glues

*Regulatory:* FDA 21CFR §178.3120, 182.90, 182.1127, GRAS; Japan approved except for miso

*Manuf./Distrib.:* Aerchem; Alfa Aesar; Allchem Ind.; Am. Int'l.; Cooper Chem.; Dudley; Fluka; Holland; Independent Chem.; Noah; Ruger; Sal Chem.; Spectrum Quality Prods.; Universal Preserv-A-Chem; Van Waters & Rogers; Wego Chem. & Min.

**Ammonium aluminum alum.** See Ammonium alum

**Ammonium aluminum sulfate.** See Ammonium alum

**Ammonium amidosulfate.** See Ammonium sulfamate

**Ammonium, benzylidimethyloctadecyl-, chloride.** See Stearalkonium chloride

**Ammonium, benzyltriethyl-, chloride.** See Benzyltriethyl ammonium chloride

**Ammonium biphosphate.** See Ammonium phosphate

**Ammonium, (4-(bis (p-(dimethylamino) phenyl) methylene)-2,5-cyclohexadien-1-ylidene) dimethyl-, chloride.** See Basic violet 3

**Ammonium bromide**

CAS 12124-97-9; EINECS/ELINCS 235-183-8

*Synonyms:* Hydrobromic acid monoammoniate

*Empirical:* H<sub>4</sub>BrN

*Formula:* NH<sub>4</sub>Br

*Properties:* Colorless cryst. or yls. wh. powd.; sol. in water and alcohol; m.w. 97.96; dens. 2.33 kg/l (15 C); vapor pressure 1 mm Hg (198.3 C); m.p. 452 C (subl.); b.p. 235 C (in vacuum); noncombustible

*Toxicology:* LD50 (oral, rat) 2700 mg/kg, (IP, mouse) 559 mg/kg; mod. toxic by ing., IP routes; mutation data reported; TSCA listed

*Precaution:* Incompat. with BrF<sub>3</sub>, IF<sub>7</sub>, K

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub>, Br<sup>-</sup>, and NH<sub>3</sub>

HMS: Health 2; Flammability 0; Reactivity 0

*Storage:* Sl. hygroscopic

*Uses:* Flame retardant for plastics, textiles, wood, paper, chipboard, plywood; anticorrosive agents; precipitating silver salts for photographic plates; medicine (for its bromide ion); analytical chemistry; process engraving; textile finishing; biocide in industrial water systems, paper mills

*Manuf./Distrib.:* Advance Research Chems.; Albemarle; Aldrich; Alfa Aesar; AmeriBrom; Atomergic Chemetals; BCH Brühl; Barker Ind.; Cerac; Charkit; D&O; Dead Sea Bromine; Fluka; Great Lakes; Hawks Chem. Co Ltd; Honeywell Spec. Chems.; Johnson Matthey plc; Mallinckrodt Baker; Morre-Tec Ind.; Noah; Ocean Chems.; Rhodia; Richman; Ruger; Sigma; Sinochem Liaoning; Spectrum Quality Prods.

*Trade Names:* FR-11

*Trade Names Containing:* FRCROS 349

**Ammonium, (9-(o-carboxyphenyl)-6-(diethylamino)-3H-xanthen-3-ylidene) diethyl-, chloride.** See Basic violet 10

**Ammonium caseinate**

CAS 9005-42-9

*Synonyms:* Casein, ammonium salt

*Definition:* Ammonium salt of casein

*Properties:* Anionic

*Uses:* Dispersant; leveling agent; antistat in cosmetics; food additive; in adhesives for beer bottle labeling, foil-paper lamination, wood door adhesives; binder in paper coatings; protective colloid in emulsion polymerization

*Regulatory:* Granted prior sanction via clearance for optional use in food standards for frozen desserts

## Ammonium castor oil sulfate

### Ammonium castor oil sulfate

*Synonyms:* Castor oil, sulfated, ammonium salt

*Uses:* Defoamer in food-contact paper coatings

*Regulatory:* FDA 21CFR §176.200

**Ammonium, diallyl dimethyl-, chloride, polymers.** See Polyquaternium-6

**Ammonium, didecyl dimethyl-, chloride.** See Didecyl dimonium chloride

**Ammonium, (4-( $\alpha$ -(p-(diethylamino) phenyl)-2,4-disulfobenzylidene)-2,5-cyclohexadien-1-ylidene) diethyl-, hydroxide, monosodium salt.** See Acid blue 1

**Ammonium di (2-ethylhexyl) sulfosuccinate.** See Dioctyl ammonium sulfosuccinate

**Ammonium dihydrogen orthophosphate.** See Ammonium phosphate

**Ammonium dihydrogen phosphate.** See Ammonium phosphate

**Ammonium, (4-(p-(dimethylamino)- $\alpha$ -(p-ethyl (m-sulfobenzyl) amino) phenyl) benzylidene)-2,5-cyclohexadien-1-ylidene) ethyl (m-sulfobenzyl)-, hydroxide, inner salt, sodium salt.** See Acid violet 49

**Ammonium, dimethyldioctadecyl-, chloride.** See Distearyl dimonium chloride

### Ammonium dinonyl sulfosuccinate

CAS 27501-55-9; EINECS/ELINCS 248-501-5

*Trade Names Containing:* Ancowet A-70

**Ammonium dodecyl sulfate.** See Ammonium lauryl sulfate

**Ammonium-N-dodecyl sulfate.** See Ammonium lauryl sulfate

**Ammonium, ethyl (4-(p-(ethyl (m-sulfobenzyl) amino)- $\alpha$ -(p-sulfophenyl) benzylidene)-2,5-cyclohexadien-1-ylidene)-(m-sulfobenzyl)-, hydroxide, inner salt, disodium salt.** See Acid green 5

### Ammonium fructoheptonate

*Uses:* Chelating agent in mfg. of food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.150

### Ammonium glucoheptonate

*Uses:* Chelating agent in food-contact paper/paperboard mfg.

*Regulatory:* FDA 21CFR §176.150

### Ammonium hydroxide

CAS 1336-21-6; EINECS/ELINCS 215-647-6; UN No. NA 2672 (DOT)

*Synonyms:* Ammonia aqua; Ammonia aqueous; Ammonia solution; Ammonia solution, strong; Ammonia water; Aqua ammonia; Aqua ammonium; Aqueous ammonia; Spirit of Hartshorn; Strong ammonia solution

*Classification:* Inorganic base

*Empirical:* H<sub>3</sub>NO

*Formula:* NH<sub>4</sub>OH

*Properties:* Clear colorless liq., very pungent odor, acrid taste; sol. in water; m.w. 35.06; dens. 0.90; m.p. -77 C; flash pt. none; pH 13.6

*Toxicology:* LD50 (oral, rat) 350 mg/kg; LDLo (IV, rabbit) 10 mg/kg; human poison by ingestion; experimental poison by inh. and ing.; inhalation irritant; severe eye irritant; liq. can inflict burns; mutation data; TSCA listed

*Precaution:* DOT: Corrosive material; vapor will ignite, but not readily; incompat. with acrolein, nitromethane, acrylic acid, chlorosulfonic acid, dimethyl sulfate, halogens, HCl, HF, HNO<sub>3</sub>, propylene oxide, etc.

*Hazardous Decomp. Prods.:* Heated to decomp., emits NH<sub>3</sub> and NO<sub>x</sub>

NFPA: Health 3; Flammability 1; Reactivity 0

*Storage:* Keep cool in strong glass, plastic, or rubber-stoppered bottles not completely filled; store below 26 C

*Uses:* Food additive, alkali, leavening agent, pH control agent, processing aid; boiler water additive; corrosion inhibitor for steam generating systems; taste and odor control in water treatment; textiles; mfg. of rayon, rubber, fertilizers; org. synthesis; refrigeration; condensation polymerization; photography; soaps; lubricants; fireproofing wood; ink mfg.; explosives; ceramics; saponifying fats and oils; buffer, denaturant in cosmetics; food coloring diluent/solvent; alkalinizing agent for pharmaceuticals

*Use Level:* ADI no limit (EU)

*Regulatory:* FDA 21CFR §163.110, 182.90, 184.1139, GRAS; Europe listed; UK approved; USP/NF compliance

*Manuf./Distrib.:* Agrium; Aldrich; Alexander; Ashland; Brown; Charkit; Chemical; Coyne; Cytec Ind.; Fisher Scientific; Honeywell Perf. Polymers; Koch Microelectronic; LaRoche Ind.; Miljac; Romil Ltd; Ruger; Sal Chem.; Sigma; Spectrum Quality Prods.; Universal Preserv-A-Chem; Van Waters & Rogers

*Trade Names Containing:* Carboset® 514H; Carboset® 531; Protec ZA7; Protec ZZA

**Ammonium hyposulfite.** See Ammonium thiosulfate

### Ammonium isobutyl oleate sulfate

*Synonyms:* Isobutyl oleate, sulfated, ammonium salt

*Uses:* In paper/paperboard in contact with aq./fatty food

*Regulatory:* FDA 21CFR §176.170

### Ammonium laureth sulfate

CAS 32612-48-9 (generic); 67762-19-0

*Synonyms:* Ammonium lauryl ether sulfate; PEG (1-4) lauryl ether sulfate, ammonium salt; POE (1-4) lauryl ether sulfate, ammonium salt

*Definition:* Ammonium salt of ethoxylated lauryl sulfate

*Formula:* (C<sub>2</sub>H<sub>4</sub>O)<sub>n</sub> • C<sub>12</sub>H<sub>26</sub>O<sub>4</sub>S • H<sub>3</sub>N, avg. n = 1-4

*Properties:* Anionic

*Toxicology:* LD50 (oral, rat) 630 mg/kg; moderate toxicity by ingestion; skin and eye irritant; TSCA listed

*Uses:* Surfactant, emulsifier for emulsion polymerization (acrylics, styrene-acrylic, vinyl acrylics, S/B, paints, coatings), lt.-duty detergents, cosmetics, hair and skin detergents, pharmaceutical creams and lotions; breaks up and holds oils and soil; visc. builder; foaming agent for plasterboard, lightweight concrete prod.; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105

*Manuf./Distrib.:* Albright & Wilson Am.; Allchem Ind.; Ashland; Chemron; Clariant; Cognis/Care Chems.; Crompton/Witco; Cytec Ind.; DeForest Enterprises; E-Chemicals; Great Western; Independent Chem.; Int'l. Chem. Inc.; Kraft Chem.; Lonza; Norman, Fox; Patco Chem. Ind.; Pilot; Rhodia HPCII; Sea-Land; Stepan; Surfactants Inc; Universal Preserv-A-Chem; Van Waters & Rogers

*Trade Names:* Paxnol ALES; POLYSTEP® B-11; Stanfax 238; Stanfax 968; Stanfax 1012

### Ammonium laureth-12 sulfate

CAS 32612-48-9 (generic)

*Synonyms:* Ammonium POE (12) lauryl ether sulfate; PEG-12 lauryl ether sulfate, ammonium salt; PEG (12) lauryl ether sulfate, ammonium salt; POE (12) lauryl ether sulfate, ammonium salt

*Definition:* Ammonium salt of ethoxylated lauryl sulfate

*Empirical:* (C<sub>2</sub>H<sub>4</sub>O)<sub>x</sub> • C<sub>12</sub>H<sub>26</sub>O<sub>4</sub>S • H<sub>3</sub>N

*Formula:* (C<sub>2</sub>H<sub>4</sub>O)<sub>n</sub> • C<sub>12</sub>H<sub>26</sub>O<sub>4</sub>S • H<sub>3</sub>N, avg. n = 12

*Properties:* Anionic

*Toxicology:* TSCA listed

*Uses:* Surfactant, emulsifier for acrylic copolymers, emulsion polymerization, paints and coatings, cosmetics; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105

*Trade Names:* POLYSTEP® B-22

### Ammonium laureth-30 sulfate

CAS 32612-48-9 (generic)

*Formula:* (C<sub>2</sub>H<sub>4</sub>O)<sub>n</sub> • C<sub>12</sub>H<sub>26</sub>O<sub>4</sub>S • H<sub>3</sub>N, n = 30

*Properties:* Anionic

*Uses:* Emulsifier for emulsion polymerization (acrylics, styrene-acrylics, vinyl acrylics), floor finish latexes, paints and coatings; food-pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Trade Names:* POLYSTEP® B-20

**Ammonium lauryl ether sulfate.** See Ammonium laureth sulfate

### Ammonium lauryl sulfate

CAS 2235-54-3; 68081-96-9; 90583-12-3; EINECS/ELINCS 218-793-9

*Synonyms:* Ammonium dodecyl sulfate; Ammonium-N-dodecyl sulfate; Dodecyl ammonium sulfate; Lauryl ammonium sulfate; Lauryl sulfate ammonium salt; Sulfuric acid, lauryl ester, ammonium salt; Sulfuric acid, monododecyl ester, ammonium salt

*Definition:* Ammonium salt of lauryl sulfate

*Empirical:* C<sub>12</sub>H<sub>26</sub>O<sub>4</sub>S • H<sub>3</sub>N

*Properties:* M.w. 283.48; HLB 31.0; anionic

*Toxicology:* Skin and eye irritant; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NH<sub>3</sub>, NO<sub>x</sub>, SO<sub>x</sub>

*Uses:* Detergent, emulsifier, foaming agent, dispersant, wetting agent for personal care prods., pharmaceuticals, coatings, carpet shampoos, firefighting foams, lt. duty cleaners, dry wall mfg., dyes, chemical specialties, emulsion polymerization; visc. builder; in food-pkg. adhesives; in

paper/paperboard in contact with aq./fatty foods; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §175.105, 175.210, 176.170, 177.1200

**Manuf./Distrib.:** Allchem Ind.; Ashland; Chemron; Clariant; Cognis/Care Chems.; Crompton/Witco; DeForest Enterprises; E-Chemicals; Independent Chem.; Int'l. Chem. Inc.; Kraft Chem.; Lonza; Patco Chem. Ind.; Pilot; Rhodia HPCII; Sea-Land; Stepan; Universal Preserv-A-Chem; Van Waters & Rogers

**Trade Names:** Paxnol ALS; POLYSTEP® B-7; Rhodapon® L-22

#### Ammonium maleic anhydride/diisobutylene copolymer

**Synonyms:** Maleic anhydride/diisobutylene copolymer, ammonium salt

**Uses:** In food-pkg. adhesives; in paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §175.105, 176.180

#### Ammonium naphthalene sulfonate

**Properties:** Anionic

**Uses:** Dispersant for pigments, carbon black, dyestuffs, in ceramics, paints; visc. depressant; emulsion polymerization; food-pkg. adhesives/paper; emulsifier in mfg. of food-contact articles

**Trade Names:** Lomar® PWA

**Trade Names Containing:** Lomar® PWA Liq.

#### Ammonium nitrate

CAS 6484-52-2; EINECS/ELINCS 229-347-8; UN No. 1942 (DOT), 2426 (DOT)

**Synonyms:** Ammonium (I) nitrate (1:1); Ammonium saltpeter; Nitrate of ammonia; Nitric acid ammonium salt; Norway saltpeter

**Empirical:** H<sub>5</sub>N<sub>3</sub>O<sub>3</sub>

**Formula:** NH<sub>4</sub>NO<sub>3</sub>

**Properties:** Colorless cryst.; sol. in water, alcohol, alkalis; m.w. 80.06; dens. 1.725; m.p. 169.6 C; b.p. dec. @ 210 C with evolution of nitrous oxide

**Toxicology:** LD50 (oral, rat) 2217 mg/kg; allergen; TSCA listed

**Precaution:** Strong oxidizing agent; may explode under confinement and high temps., but not readily detonated; violent or explosive spontaneous reactions possible; ignites on contact with certain chems.; can react vigorously with reducing agents

**Hazardous Decomp. Prods.:** Heated to decomp., emits highly toxic fumes of NO<sub>x</sub>

**NFPA:** Health 0; Flammability 0; Reactivity 3

**Storage:** Hygroscopic; ventilate well; keep as cool as possible

**Uses:** Fertilizer; explosives; pyrotechnics; herbicides/insecticides; mfg. of nitrous oxide; absorbent for nitrogen oxides; ingred. of freezing mixtures; oxidizing agent in solid rocket propellants; nutrient for antibiotics and yeast; catalyst; in paper/paperboard in contact with dry food

**Regulatory:** FDA 21 CFR §176.180; SARA reportable (sol'n.)

**Manuf./Distrib.:** Agrium; Air Prods.; Aldrich; Alfa Aesar; Allan; Charkit; Chemical; Continental Ind. Group; Fluka; GFS; Honeywell Perf. Polymers; Hummel Croton; LaRoche Ind.; Lutianhua; Miljac; Nitron; Noah; Norsk Hydro AS; Prodigia; Ruger; Sigma; Spectrum Quality Prods.; Total Spec. Chems.; U.S. Chems.

**Ammonium (I) nitrate (1:1).** See Ammonium nitrate

#### Ammonium nonoxynol-4 sulfate

CAS 9051-57-4 (generic); 31691-97-1 (generic); 63351-73-5

**Synonyms:** PEG-4 nonyl phenyl ether sulfate, ammonium salt; PEG 200 nonyl phenyl ether sulfate, ammonium salt; POE (4) nonyl phenyl ether sulfate, ammonium salt

**Definition:** Ammonium salt of sulfated nonoxynol-4

**Formula:** (C<sub>7</sub>H<sub>4</sub>O)<sub>x</sub>C<sub>15</sub>H<sub>24</sub>O<sub>4</sub>S • H<sub>3</sub>N

**Properties:** Anionic

**Toxicology:** TSCA listed

**Uses:** High-foaming surfactant, wetting agent, dispersant, emulsifier for cosmetics, shampoos, skin cleansers, lt. duty cleaners, emulsion polymerization (vinyl acetate, acrylates, methacrylates, styrene, butadiene, latex); dyeing assistant; antistat; surfactant in adhesives, paints, paper coatings, textile, and industrial and architectural coatings; emulsifier in mfg. of food-contact articles

**Regulatory:** FDA 21CFR §178.3400

**Trade Names:** Abex® EP-100; Rhodapex® CO-436

#### Ammonium nonoxynol-9 sulfate

CAS 9051-57-4 (generic)

**Properties:** Anionic

**Uses:** Emulsifier, stabilizer for emulsion polymerization; for adhesives, paints, paper, textile, and industrial coatings

**Trade Names:** Abex® EP-110

#### Ammonium nonoxynol-30 sulfate

CAS 9051-57-4 (generic); 31691-97-1 (generic)

**Synonyms:** PEG-30 nonyl phenyl ether sulfate, ammonium salt; POE (30) nonyl phenyl ether sulfate, ammonium salt

**Definition:** Ammonium salt of sulfated nonoxynol-30

**Properties:** Anionic

**Toxicology:** TSCA listed

**Uses:** Emulsifier for emulsion polymerization, adhesives, paints, paper, textile, and industrial coatings; surfactant in cosmetics

**Trade Names:** Abex® EP-120

**Ammonium octadecanoate.** See Ammonium stearate

**Ammonium 9-octadecenoate.** See Ammonium oleate

#### Ammonium oleate

CAS 544-60-5; EINECS/ELINCS 208-873-1

**Synonyms:** Ammonium 9-octadecenoate; 9-Octadecenoic acid, ammonium salt; Oleic acid ammonium salt

**Classification:** Ammonium soap

**Definition:** Ammonium salt of oleic acid

**Empirical:** C<sub>18</sub>H<sub>37</sub>NO<sub>2</sub>

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>7</sub>CH=CH(CH<sub>2</sub>)<sub>7</sub>COONH<sub>4</sub>

**Properties:** Ylsh.-brn. paste; ammonia odor; sol. in water; sl. sol. in acetone, ethanol, methanol, benzene, CCl<sub>4</sub>, xylene, naphtha; m.w. 299.50; soften. pt. 50-55 F; m.p. 70-72 F; dec. on heating

**Toxicology:** TSCA listed

**Precaution:** Combustible

**Uses:** Detergent; solidifying alcohol; demonstrating liq. crystals; surfactant, emulsifier in cosmetics; in food-pkg. adhesives; in resinous/polymeric food-contact coatings for polyolefin films; in paper/paperboard in contact with aq./fatty foods; defoamer in food-contact coatings and paper/paperboard; in cellophane for food pkg.; in resin-bonded filters for food contact

**Regulatory:** FDA 21CFR §175.105, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.2260

**Manuf./Distrib.:** Hart Prods.; Independent Chem.; Original Bradford Soap Works

**Trade Names:** EW-POL 9110

#### Ammonium oleic acid sulfate

**Uses:** Defoamer in food-contact paper coatings

**Regulatory:** FDA 21CFR §176.200

#### Ammonium oleic sulfate

**Properties:** Anionic

**Uses:** Mold release agent; lubricant; emulsifier

**Trade Names:** Actrasol SR 75

**Ammonium peroxydisulfate.** See Ammonium persulfate

#### Ammonium persulfate

CAS 7727-54-0; EINECS/ELINCS 231-786-5; UN No. 1444 (DOT)

**Synonyms:** Ammonium peroxydisulfate; Diammonium peroxodisulfate; Peroxydisulfuric acid diammonium salt

**Classification:** Inorganic salt

**Empirical:** H<sub>8</sub>N<sub>2</sub>O<sub>8</sub>S<sub>2</sub>

**Formula:** (NH<sub>4</sub>)<sub>2</sub>S<sub>2</sub>O<sub>8</sub>

**Properties:** Wh. cryst. solid; sol. in water; m.w. 228.20; dens. 1.982; m.p. dec. @ 120 C; dec. in water forming O<sub>2</sub>

**Toxicology:** ACGIH TLV/TWA 5 mg(S<sub>2</sub>O<sub>8</sub>)<sub>2</sub>/m<sup>3</sup>; LD50 (oral, rat) 689 mg/kg, (IP, rat) 226 mg/kg, (IV, rabbit) 178 mg/kg; poison by IV and IP routes; mod. toxic by ing.; TSCA listed

**Precaution:** Powerful oxidizer; corrosive; fire risk in contact with reducers; releases oxygen when heated; mixts. with sodium peroxide are explosive; violent reaction with iron or sol'ns. of ammonia + silver salts

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of SO<sub>x</sub>, NH<sub>3</sub>, and NO<sub>x</sub>

**Storage:** Store @ R.T.

**Uses:** Oxidizing agent for dyestuffs; bleaching agent in cosmetics; textile bleach stabilizer; photographic chem.; etchant for printed circuit boards, copper; electroplating; deodorizing oils; aniline dyes; depolarizer in batter-

## Ammonium phosphate

ies; washing infected yeast; mfg. of other persulfates; crosslinking agent; polymerization initiator for latex, polyacrylonitrile, styrene copolymers; hair coloring agent; food preservative; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §172.892, 175.105, 176.170, 177.1200, 178.3520; Japan approved

**Manuf./Distrib.:** AMRESKO; Aceto; Aldrich; Alfa Aesar; Allchem Ind.; Am. Int'l.; Ashland; Ayers Int'l.; BCH Brühl; Brown; Browning; Chem One; Chemconnect; Chemical; Coyne; Dastech Int'l.; Degussa-Hüls; E-Chemicals; EM Ind.; FMC; Fluka; GIBCO; Harcross; Hydrite; Independent Chem.; Int'l. Chem. Inc.; JTS Enterprises; Kaltron/Pettibone; Los Angeles Chem.; Miljac; Mitsubishi Int'l.; Monomer-Polymer & Dajac Labs; Noah; Pacific West; Primachem; Research Organics; Sigma; Spectrum Quality Prods.; Total Spec. Chems.; Van Waters & Rogers; Westco

## Ammonium phosphate

CAS 7722-76-1; EINECS/ELINCS 231-764-5

**Synonyms:** MAP; Ammonium acid phosphate; Ammonium biphosphate; Ammonium dihydrogen orthophosphate; Ammonium dihydrogen phosphate; Ammonium phosphate monobasic; Monoammonium phosphate; Primary ammonium phosphate

**Empirical:** H<sub>2</sub>NO<sub>2</sub>P

**Formula:** NH<sub>4</sub>H<sub>2</sub>PO<sub>4</sub>

**Properties:** Brilliant wh. cryst. or powd., odorless; mildly acidic in reaction; moderately sol. in water; sl. sol. in alcohol; pract. insol. in acetone; m.w. 115.04; dens. 1.803; m.p. 190 C; pH 4.5 (1%, 20 C)

**Toxicology:** LD50 (oral, rat) 3160-4500 mg/kg; irritant; TSCA listed

**Precaution:** Incompat. with NaOCl

**NFPA:** Health 2; Flammability 0; Reactivity 0

**Storage:** Store @ R.T.

**Uses:** Fertilizer ingred.; plant nutrient sol'ns.; analytical chemistry; as flameproofing agent for textiles, paints, paper, cellulosic fabrics, wood prods.; dyeing aux.; buffer in cosmetics; oral care agent; mfg. of yeast, vinegar, yeast foods and bread improvers; yeast/microbial fermentation nutrient; mold culture nutrient in mfg. of pharmaceuticals; food additive, buffer, dough conditioner, leavening agent

**Regulatory:** FDA 21CFR §184.1141a, GRAS; Japan approved

**Manuf./Distrib.:** AMRESKO; Agrium; Albright & Wilson Am.; Aldrich; Alfa Aesar; Am. Biorganics; Ashland; Browning; Cargill Fertilizer; Cater Chems.; Charkit; Chisso Am.; Coyne; E-Chemicals; FMC Foret; Fluka; Heico; IMC Global; Int'l. Chem. Inc.; Monsanto; Noah; Occidental; Poly Research; Research Organics; Rhodia Food Ingreds.; Ruger; San Yuan; Showa Denko; Sigma; Solutia; Spectrum Quality Prods.; Total Spec. Chems.

See also Ammonium phosphate, dibasic

## Ammonium phosphate, dibasic

CAS 7783-28-0; EINECS/ELINCS 231-987-8

**Synonyms:** DAP; Ammonium phosphate; Diammonium hydrogen orthophosphate; Diammonium hydrogen phosphate; Diammonium phosphate; Dibasic ammonium phosphate; Phosphoric acid diammonium salt; Secondary ammonium phosphate

**Classification:** Inorganic salt

**Empirical:** H<sub>2</sub>N<sub>2</sub>O<sub>7</sub>P

**Formula:** (NH<sub>4</sub>)<sub>2</sub>HPO<sub>4</sub>

**Properties:** Wh. cryst. or powd., odorless, cooling salty taste; mildly alkaline in reaction; sol. 1 g/1.7 ml in water; pract. insol. in alcohol, acetone; m.w. 132.07; dens. 1.619; m.p. 155 C (dec.); pH ≈ 8 (1%); noncombustible

**Toxicology:** LD50 (oral, rat) 3160-4500 mg/kg; low to moderate toxicity; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of PO<sub>x</sub>, NO<sub>x</sub>, and NH<sub>3</sub>

**HMS:** Health 1; Flammability 0; Reactivity 0

**Storage:** Store @ R.T.; keep well closed

**Uses:** Flame retardant for wood, paper, textiles, plastics, cellulose; prevents afterglow in matches; fertilizer; plant nutrient sol'ns.; feed additive; flux for soldering, purifying sugar; binder in refractory bricks, tiles; in ammoniacal dentifrices; yeast/microbial fermentation nutrient; mfg. of yeast, vinegar; bread improvers, buffer, dough conditioner, leavening agent in foods, wines, pharmaceuticals

**Regulatory:** FDA 21CFR §573.320, 184.1141b, GRAS; BATF 27CFR 240.1051, limitation 0.17% as yeast nutrient in wine prod., 0.8% in sparkling wines; Japan approved; USP/NF compliance

**Manuf./Distrib.:** AMRESKO; Agrium; Albright & Wilson Am.; Aldrich; Alfa Aesar; Am. Biorganics; Ashland; Brown; Browning; Cargill Fertilizer; Cater Chems.; Chisso Am.; Coyne; E-Chemicals; EM Ind.; Fluka; Heico; IMC Global; Int'l. Chem. Inc.; LaRoche Ind.; Monsanto; Noah; Occidental; Poly Research; Research Organics; Rhodia Food Ingreds.; Ruger; San Yuan; Seeler Ind.; Sigma; Solutia; Spectrum Quality Prods.; Telechem Int'l.

See also Ammonium phosphate

**Ammonium phosphate monobasic.** See Ammonium phosphate

**Ammonium POE (12) lauryl ether sulfate.** See Ammonium laureth-12 sulfate

## Ammonium polyacrylate

CAS 9003-03-6

**Synonyms:** Poly (acrylic acid), ammonium salt; 2-Propenoic acid, homopolymer, ammonium salt

**Definition:** Ammonium salt of polyacrylic acid

**Empirical:** (C<sub>3</sub>H<sub>3</sub>O<sub>2</sub>)<sub>x</sub> · xH<sub>3</sub>N

**Properties:** Pale yel. liq. (sol'n.); dens. 1.12 kg/l (20 C); anionic

**Uses:** Pigment dispersant for paints and coatings, ceramics, paper; thickener and stabilizer for syn. latexes; stabilizer for emulsion polymerization; wetting agent for cement/pigment mfg.; visc. stabilizer; in coatings; adhesives; dipped, cast, and molded goods; cements for rug backing; spraying, spreading, brushing, and extruding compds.; surfactant in cosmetics; in food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105

**Manuf./Distrib.:** R.T. Vanderbilt

**Trade Names:** Dumasperse 543; SER-AD® FX 504

## Ammonium polycarboxylate

**Properties:** Anionic

**Uses:** Pigment dispersant for coatings, latexes, adhesives

**Trade Names:** SER-AD® FX 505

## Ammonium polymethacrylate

**Properties:** Pale yel. liq. (sol'n.); dens. 1.12 kg/l (20 C); visc. 50 mPa·s; pH 8.5-9.0 (5%)

**Uses:** Stabilizer and thickener in latex rubber processing; dispersant for pigments/fillers/clays in latex paints, ceramics, paper; also for polymerization and clay coating

## Ammonium polyphosphate

CAS 14728-39-3; 68333-79-9

**Synonyms:** APP; Polyphosphoric acid, ammonium salt

**Empirical:** H<sub>2</sub>NO<sub>2</sub>P

**Properties:** Wh. powd.; m.w. 97.01; dec. @ 250 C, with rapid decomp. @ 300 C

**Toxicology:** TSCA listed

**Uses:** Flame retardant for plastics, adhesives, elastomers, paints, intumescent coatings, mastics, PU foams, wood, chipboard, paper and textile coatings; intumescent paint ingred.; catalyst; sequestrant; in fertilizers, cement, refractories; environmentally friendly

**Manuf./Distrib.:** Albright & Wilson Am.; Celanese; Fabricchem; LaRoche Ind.; Miljac; Monsanto; Solutia; Total Spec. Chems.

**Trade Names:** Antiblaze® CL; Antiblaze® TR; FRCROS 481; FRCROS 484; Pyrex FA

## Ammonium pyrophosphate

**Uses:** Flame retardant for wood, paper, textiles, cellulosic materials

**Trade Names:** FRCROS 334

**Trade Names Containing:** FRCROS 349

**Ammonium saltpeter.** See Ammonium nitrate

## Ammonium stearate

CAS 1002-89-7; EINECS/ELINCS 213-695-2

**Synonyms:** Ammonium octadecanoate; Octadecanoic acid, ammonium salt; Stearic acid, ammonium salt

**Classification:** Sat. aliphatic carboxylic acid salt

**Definition:** Ammonium salt of stearic acid

**Empirical:** C<sub>18</sub>H<sub>39</sub>NO<sub>2</sub>

**Formula:** C<sub>17</sub>H<sub>35</sub>COONH<sub>4</sub>

**Properties:** Wh. to tan wax-like solid, free from ammonia odor; sol. in boiling water, hot toluene; partly sol. hot in butyl acetate, ethanol; m.w. 301.50; dens. 0.89 (22 C); m.p. 73-75 C; anionic

**Toxicology:** ACGIH TLV-TWA 10 mg/m<sup>3</sup> (stearates); LD50 (oral, rat) > 5 g/kg, (skin, guinea pig) > 3 g/kg; essentially nontoxic; nuisance dust; inh. of high concs. of dust may cause coughing and mild temporary irritation; sl. eye irritant; ing. may cause irritation, nausea, diarrhea; TSCA listed

**Precaution:** Probable combustible dust; may form explosive dust-air mixts.; incompat. with acids (reacts vigorously)

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO, CO<sub>2</sub>, NO<sub>x</sub>, ammonia

**Storage:** Store in cool area away from ignition sources

**Uses:** Waterproofing of cements, concrete, stucco, paper, textiles; frothing aid and foam stabilizer in acrylic and SBR latex systems; foam rubber additive; foam stabilizer; scouring agent; surfactant, lubricant, emulsifier in cosmetics (hand creams, brushless shaving creams, etc.); in food-pkg. adhesives; in resinous/polymeric food-contact coatings for polyolefin films; in paper/paperboard for contact with aq./fatty foods; defoamer in food-contact coatings and paper/paperboard; in cellophane for food pkg.; in resin-bonded filters for food contact

**Regulatory:** FDA 21CFR §175.105, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.2260

**Manuf./Distrib.:** Ashland; Bencorp Int'l.; Davidson Labs; Huntsman; Jarchem Ind.; Magnesia GmbH; Northern Prods.; Original Bradford Soap Works; Pro Chem; Total Spec. Chems.; Universal Preserv-A-Chem

**Trade Names:** Stanfax 320; Stanfax 388

#### Ammonium sulfamate

CAS 7773-06-0; EINECS/ELINCS 231-871-7; UN No. 9089 (NA)

**Synonyms:** AMS; Ammonium amidosulfate; Monoammonium sulfamate; Sulfamic acid, monoammonium salt

**Classification:** Salt of sulfamic acid

**Empirical:** H<sub>2</sub>N<sub>2</sub>O<sub>3</sub>S

**Formula:** NH<sub>2</sub>SO<sub>3</sub>NH<sub>4</sub>

**Properties:** Colorless to wh. cryst. solid; odorless; sol. 225 g/100 ml water; sol. in liq. NH<sub>3</sub>, formamide, glycerol; m.w. 114.14; m.p. 131 C; b.p. 160 C (dec.); pH 5.2 (5%)

**Toxicology:** ACGIH TLV/TWA 10 mg/m<sup>3</sup>; LD50 (oral, rat) 3900 mg/kg, (43% sol'n., dermal, rabbit) > 2000 mg/kg; mod. toxic by ing. and IP routes; sl. eye irritation; TSCA listed

**Precaution:** Powerful oxidizer; somewhat explosive when heated or by spontaneous chem. reaction in hot acid sol'n.

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NH<sub>3</sub>, NO<sub>x</sub>, SO<sub>x</sub>

**Storage:** Deliq., hygroscopic

**Uses:** Flameproofing agent for textiles, wood, and paper; herbicide; weed and brush killer; electroplating bath ingred.; generation of nitrous oxide; latent catalyst for urea-formaldehyde resins; in food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105; SARA reportable

**Manuf./Distrib.:** Aldrich; Alfa Aesar; Allchem Ind.; Am. Int'l.; Coyne; Dharamsi Morarji; Fluka; Heico; Int'l. Chem. Inc.; Int'l. Resources; Kaltron/Pettibone; Magna-Kron; Morre-Tec Ind.; Nissan Chem. Ind.; Northern Prods.; Sigma; Spartan Flame Retardants; Spectrum Quality Prods.

**Trade Names:** Necco Fire Retardant 2750; Necco Fire Retardant 2758; Necco Fire Retardant 2762

#### Ammonium sulfate

CAS 7783-20-2; EINECS/ELINCS 231-984-1; UN No. 2506 (DOT)

**Synonyms:** Diammonium sulfate; Mascagnite; Sulfuric acid diammonium salt; Sulfate of ammonia

**Classification:** Inorganic salt

**Empirical:** H<sub>8</sub>N<sub>2</sub>O<sub>4</sub>S

**Formula:** (NH<sub>4</sub>)<sub>2</sub>SO<sub>4</sub>

**Properties:** Colorless or wh. cryst. or gran., odorless; sol. in water; insol. in alcohol, acetone; m.w. 132.16; dens. 1.77; m.p. > 280 C (dec.)

**Toxicology:** LD50 (oral, rat) 2840 mg/kg, (oral, mouse) 640 mg/kg; moderately toxic by several routes; TSCA listed

**Precaution:** Incandescent reaction on heating with potassium chlorate; reaction with sodium hypochlorite gives the unstable explosive nitrogen trichloride

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of NO<sub>x</sub>, NH<sub>3</sub>, and SO<sub>x</sub>

**HMS:** Health 2; Flammability 0; Reactivity 0

**Storage:** Store @ R.T.

**Uses:** Taste/odor control in water treatment; fertilizers; microbial fermentation nutrient; fire/flameproofing paper, textiles, wood; viscose rayon; tanning;

aluminum etchant ingred.; photographic chem.; textile/leather aux.; reducing agent, visc. control agent in cosmetics; food additive (dough conditioner, yeast food, firming agent, processing aid); in cellophane for food pkg.

**Use Level:** Limitation 0.15% (baked goods), 0.1% (gelatins, puddings)

**Regulatory:** FDA 21CFR §177.1200, 184.1143, GRAS; Japan approved

**Manuf./Distrib.:** AMRESCO; Accurate Chem. & Scientific; Advance Research Chems.; Agrium; Aldrich; Alfa Aesar; Allan; Am. Biorganics; Ashland; Atofina N. Am./Basic Chem.; BASF AG; BASF; Bethlehem Steel; Brown; Cater Chems.; Charkit; Chemconnect; Dakota Gasification; Fluka; GIBCO; General Alum & Chem.; General Chem.; Heico; Holland; Honeywell Perf. Polymers; LTV Steel; Lomac; Mallinckrodt Baker; Nissan Chem. Ind.; Noah; PCL Group; QC Corp.; Research Organics; Ruger; Sal Chem.; San Yuan; Showa Denko; Sigma; Spectrum Quality Prods.; Total Spec. Chems.

**Trade Names Containing:** Lomar® PWA Liq.

#### Ammonium tallate

CAS 68132-50-3; EINECS/ELINCS 268-643-1

**Synonyms:** Fatty acids, tall oil, ammonium salts; Tall oil fatty acids, ammonium salts

**Definition:** Ammonium salt of tall oil acid

**Uses:** Surfactant, emulsifier in cosmetics; in resinous/polymeric food-contact coatings for polyolefin films; in food-contact paper/paperboard; food-contact cellophane; in resin-bonded filters for food contact

**Regulatory:** FDA 21CFR §175.320, 176.170, 176.200, 177.1200, 177.2260

#### Ammonium tallow sulfate

**Synonyms:** Tallow sulfated, ammonium salt

**Uses:** Defoamer in food-contact coatings; in paper/paperboard in contact with aq./fatty food

**Regulatory:** FDA 21CFR §176.170, 176.200

#### Ammonium thiosulfate

CAS 7783-18-8; EINECS/ELINCS 231-982-0

**Synonyms:** Ammonium hyposulfite; Diammonium thiosulfate; Thiosulfuric acid, diammonium salt

**Empirical:** H<sub>8</sub>N<sub>2</sub>O<sub>3</sub>S<sub>2</sub>

**Formula:** (NH<sub>4</sub>)<sub>2</sub>S<sub>2</sub>O<sub>3</sub>

**Properties:** Wh. cryst.; very sol. in water; m.w. 148.22; dec. by heat

**Toxicology:** LD50 (oral, rat) 2890 mg/kg, (oral, guinea pig) 1098 mg/kg; mod. toxic by ing.; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NH<sub>3</sub> and SO<sub>x</sub>

**Uses:** Photographic fixing agent; analytical reagent; fungicide; reducing agent; brightener in silver plating baths; cleaning compounds for zinc-base die-cast metals; hair waving preparations; fog screens; fertilizers; source of sulfur in nitrogen in fertilizer formulations; dechlorination in waste treatment; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §175.105, 176.170

**Manuf./Distrib.:** Aldrich; DuPont; Duso; E-Chemicals; Esseco SpA; FMC Foret; Fluka; General Chem.; Goodpasture; Honeywell Spec. Chems.; Jupiter; Montana Sulphur & Chem.; Sal Chem.; Spectrum Quality Prods.; Tessengerlo Kerley; Tilley; Van Waters & Rogers; Wm. Blythe Ltd

**Ammonium tricarbonatozirconate.** See Ammonium zirconyl carbonate  
**Ammonium, trimethyloctadecyl-, chloride.** See Steartrimonium chloride

#### Ammonium zirconium carbonate

CAS 68309-95-5

**Synonyms:** AZC; Zirconate (2-), bis[carbonate (2-)-0] dihydroxy-diammonium; Zirconium ammonium carbonate

**Empirical:** C<sub>2</sub>H<sub>16</sub>N<sub>2</sub>O<sub>8</sub>Zr

**Formula:** (NH<sub>4</sub>)<sub>2</sub>[Zr(CO<sub>3</sub>)<sub>2</sub>(OH)<sub>2</sub>]

**Uses:** Binder insolubilizer for paper and board coatings, nonwoven fabrics; deposit control agent in wet-end paper processes; str. additive for alkaline-sized paper; component of waterborne inks, overprint varnishes, adhesives; textile, leather, and paper water-repellent formulations; antimicrobial treatment for textiles and timber; coagulant in mfg. of syn. leather cloth; metal pretreatment coatings; precursor to zirconia in catalyst systems

**Manuf./Distrib.:** Sinochem Tianjin; Southern Ionics

**Trade Names:** Bacote™ 20; Nopcote® 1680

**Trade Names Containing:** Protec ZZA

**Ammonium zirconyl carbonate**

CAS 12616-24-9

*Synonyms:* Ammonium tricarbonatozirconate*Definition:* Avail. commercially as aq. sol'n.*Empirical:* C<sub>3</sub>H<sub>13</sub>N<sub>3</sub>O<sub>10</sub>Zr*Formula:* (NH<sub>4</sub>)<sub>2</sub>ZrOH(CO<sub>3</sub>)<sub>3</sub>*Properties:* M.w. 342.36; Dihydrate: Prisms; sol. in water; dec. in dil. acids, alkalis; dens. 1.238 (24/24 C); unstable in air; aq. sol'ns. dec. rapidly above 60 C producing ammonia, CO<sub>2</sub>, and zirconia*Uses:* Water-repellent for paper and textiles; textile fungicidal treatments; insolubilizing agent for starch, casein, soya protein paper binders; catalyst; stabilizer in latex emulsion paints; ingred. in floor wax to aid resist. to detergents; lubricant in fabrication of glass fibers; leaves zirconium residue after evaporation of ammonia and CO<sub>2</sub>*Manuf./Distrib.:* Southern Ionics**Amorphous silica.** See Diatomaceous earth, amorphous; Silica, amorphous hydrated**Amorphous silica dust.** See Silica, fumed**AMP.** See Aminomethyl propanol; Aminotrimethylene phosphonic acid**AMPS.** See 2-Acrylamido-2-methylpropanesulfonic acid**2-AMPS.** See 2-Acrylamido-2-methylpropanesulfonic acid**AMS.** See Ammonium sulfamate**Amsonic acid.** See 4,4'-Diaminostilbene-2,2'-disulfonic acid**s-Amyl acetate**

CAS 626-38-0; UN No. 1104 (DOT)

*Synonyms:* 2-Acetoxypentane; 1-Methylbutyl acetate; 2-Pentanol acetate; 2-Pentyl acetate*Classification:* Carboxylic acid ester*Empirical:* C<sub>7</sub>H<sub>14</sub>O<sub>2</sub>*Formula:* CH<sub>3</sub>COOCH(CH<sub>3</sub>)CH<sub>2</sub>CH<sub>2</sub>CH<sub>3</sub>*Properties:* Colorless clear liq.; fruity odor; sol. in alcohol, ether; sl. sol. in water; m.w. 130.19; sp.gr. 0.862-0.866 (20/20 C); m.p. -78.5 C; b.p. 134 C; flash pt. (CC) 32 C*Toxicology:* ACGIH TLV/TWA 125 ppm; LCLo (inh., guinea pig, 5 h) 10,000 ppm; mild skin and eye irritant; inh. of vapor may cause nose/throat irritation; higher exposure may cause difficulty breathing, increased heart rate, CNS depression symptoms; ing. may cause mouth/throat irritation, increased heart rate, headache, dizziness, weakness; unconsciousness on severe exposure; TSCA listed*Precaution:* Flamm.; mod. explosive as vapor exposed to heat or flame; incompat. with oxidizing materials (increase fire/explosion hazard), strong acids, strong bases, reducing materials (decomp. can occur)*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1; Flammability 3; Reactivity 0

*Storage:* Store in cool, dry, well-ventilated area, out of direct sunlight; avoid generating mist*Uses:* Solvent for nitrocellulose, ethylcellulose; mfg. of lacquers, varnishes, cements, artificial leather, nail enamels, coated paper, printing compds.; plastic wood; textile sizing*Manuf./Distrib.:* E-Chemicals; Penta Mfg.**n-Amyl alcohol**

CAS 71-41-0; EINECS/ELINCS 200-752-1; UN No. 1105 (DOT); FEMA 2056

*Synonyms:* Alcohol C-5; Amyl alcohol, normal; n-Butyl carbinol; 1-Pentanol; Pentanol-1; Pentan-1-ol; n-Pentanol; Pentyl alcohol; n-Pentyl alcohol; Primary amyl alcohol*Classification:* Primary aliphatic alcohol*Empirical:* C<sub>5</sub>H<sub>12</sub>O*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>4</sub>OH*Properties:* Colorless clear liq., somewhat sweet balsamic odor; sl. sol. in water; misc. with alcohol, ether; m.w. 88.15; sp.gr. 0.812 (20/4 C); m.p. -79 C; b.p. 137-139 C; flash pt. (CC) 38 C; ref. index 1.409*Toxicology:* LD50 (oral, rat) 3030 mg/kg, (skin, rabbit) 4490 mg/kg; highly toxic and narcotic; ingestion of 30 mg can cause death in humans; irritating to respiratory tract; severe eye and skin irritant; can be absorbed thru skin in toxic amts.; inh. can cause nose/throat irritation, CNS depression; extreme exposure may cause double vision, deafness, delirium, fatalities; may cause severe lung damage, respiratory/cardiac arrest, or death if aspirated into lungs; TSCA listed*Precaution:* DOT: Flamm. liq.; incompat. with oxidizing agents (increases fire/explosion risk)

NFPA: Health 1; Flammability 3; Reactivity 0

*Storage:* Store in cool, dry, well-ventilated area, out of direct sunlight*Uses:* Solvent in organic synthesis, for nail lacquers; extraction solvent for mineral processing; process solvent; raw material for pharmaceutical preparations; plastics processing; synthetic flavoring agent for foods and pharmaceuticals; fragrance; defoamer in food-contact paper/paperboard*Use Level:* 18 ppm (nonalcoholic beverages), 15 ppm (ice cream, ices), 35 ppm (candy), 24 ppm (baked goods), 7.7-50 ppm (gelatins, puddings), 150-340 ppm (chewing gum),  
*Regulatory:* FDA 21CFR §172.515, 176.210; FEMA GRAS; BP compliance

*Empirical:* O<sub>3</sub>Sb<sub>2</sub>

*Formula:* Sb<sub>2</sub>O<sub>3</sub>

*Properties:* Wh. cubic or orthorhombic cryst., odorless; sol. in KOH, HCl and sulfuric acids, strong alkalis; very sl. sol. in water; m.w. 291.52; dens. 5.67; bulking value 0.022 gal/lb; oil absorp. 11; m.p. 655 C; b.p. 1425 C; ref. index 2.087

*Toxicology:* ACGIH TLV/TWA 0.5 mg(Sb)/m<sup>3</sup>; LD50 (rats) > 20 g/kg; poison by IV and subcut. routes; confirmed carcinogen, moderate toxicity otherwise; experimental teratogen, reproductive effects; mutation data; TSCA listed

*Precaution:* Incompat. with chlorinated rubber, heat (216 C), and BrF<sub>3</sub>

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic Sb fumes

*Uses:* Flame retardant for textiles, paper, plastics, PVC, rubber, cellulose, paint; as white pigment for paints and plastics; opacifier for ceramics, glass, porcelain, glazes; staining iron and copper; phosphorus; mordant; glass decolorization; catalyst; intermediate; filler for thermoplastic and thermoset plastics, rubbers, coatings; in enamels; glasses; mfg. of tartar emetic; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105

*Manuf./Distrib.:* Acme-Hardesty; Akrochem; Aldrich; Alfa Aesar; Alfa Chem; Allchem Ind.; Amspec; Asarco; Ashland; Atlantic Equip. Engrs.; Atofina; Atomergic Chemetals; Auer-Remy; Celanese; Chem-Met; Chemisphere Ltd; Chemson Ltd; D.N. Lukens; First Continental Int'l.; Fluka; GNC Group; Gredmann USA; H.M. ## Arachidic acid

### Arachidic acid

CAS 506-30-9; EINECS/ELINCS 208-031-3

*Synonyms:* Arachic acid; Eicosanoic acid

*Classification:* Fatty acid

*Empirical:* C<sub>20</sub>H<sub>40</sub>O<sub>2</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>18</sub>COOH

*Properties:* Shining wh. cryst. leaflets; very sol. in hot abs. alcohol, ether; sl. sol. in alcohol; insol. in water; m.w. 312.54; dens. 0.8240 (100/4 C); m.p. 75.4 C; b.p. 328 C; ref. index 1.4250

*Toxicology:* TDLo (implant, mouse) 1000 mg/kg; questionable carcinogen; experimental neoplastigen by implant route; tumorigen; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

*Uses:* Organic synthesis; lubricating greases; waxes; plastics; source of arachidyl alcohol; biochemical research; emulsifier in cosmetics

*Manuf./Distrib.:* Aldrich; Crompton/Witco; Fluka; Sigma

*Trade Names Containing:* Safacid 20/22 LF

### Arachidyl alcohol

CAS 629-96-9; EINECS/ELINCS 211-119-4

*Synonyms:* Alcohol C20; Eicosanol; 1-Eicosanol

*Classification:* Nonaromatic fatty alcohol

*Empirical:* C<sub>20</sub>H<sub>42</sub>O

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>18</sub>CH<sub>2</sub>OH

*Properties:* Wh. wax-like solid; insol. in water; sol. in alcohol, hot benzene; m.w. 298.56; m.p. 66.5 C; b.p. 369 C

*Toxicology:* TSCA listed

*Precaution:* Combustible

*Uses:* Emollient in cosmetics; lubricants; rubber; plastics; textiles; research; pharmaceutical raw material; emollient, lubricant, consistency factor for pharmaceutical topicals

*Manuf./Distrib.:* Aldrich; Condea Vista; Fluka; Indofine; Jarchem Ind.; M. Michel; Sigma

*Trade Names Containing:* Nafol® 1822; Nafol® 1822 B; Nafol® 1822 C

**Arachis hypogaea.** See Peanut (*Arachis hypogaea*) oil

**Arachis oil.** See Peanut (*Arachis hypogaea*) oil

### Aramid

*Definition:* Generic name for class of highly aromatic polyamide fibers which are characterized by flame retardant properties

*Uses:* Used in protective clothing, dust-filter bags, tire cord, bullet-resistant structures; as thixotropic additive for coatings, adhesives

*Trade Names:* Kevlar® 29, 49

**Aromatic castor oil.** See Castor (*Ricinus communis*) oil

**Arrowroot starch.** See Starch

**Artificial barite.** See Barium sulfate

**Artificial gum.** See Dextrin

**Artificial heavy spar.** See Barium sulfate

**Arylamide yellow RN.** See Pigment yellow 65

**ASA.** See Dodeceny succinic anhydride

### Asbestos

CAS 1332-21-4; 12001-29-5 (chrysotile); UN No. NA 2212 (DOT), 2590 (DOT)

*Synonyms:* Asbestos, chrysotile; Asbestos fiber; Chrysotile; Chrysotile asbestos; Fibrous grunerite; Serpentine asbestos; White asbestos

*Definition:* Natural magnesium silicate mineral fiber, of two types: serpentine and amphibole; common forms are chrysotile, anthophyllite, amosite, tremolite, crocidolite

*Empirical:* H<sub>3</sub>Mg<sub>3</sub>O<sub>7</sub>Si<sub>2</sub>

*Properties:* Grayish-wh. soft fibers; odorless; insol. in water; m.w. 277.13; dens. 2.56; bulking value 0.047 gal/lb; nonflamm.

*Toxicology:* ACGIH TLV/TWA 2 fibers/cc; highly toxic by inh. of dust particles; inh. of high concs. of fibers may cause irritation of nose and throat; unlikely to cause any short-term effects on skin, eyes, or GI system; overexposure may cause dyspnea, interstitial fibrosis, restricted pulmonary function; confirmed human carcinogen; causes lung tumors; experimental tumorigen; mutation data; TSCA listed

*Precaution:* A common air contaminant

*Uses:* In thermal and noise insulation materials; floor covering materials; roofing compositions; friction prods. (brake linings); paper; felts; fireproofing textiles; filler in paints, rubber, thermoplastics and thermosets; chemi-

cal filler; reinforcing agent in rubber, plastics, cements, food-contact cross-linked polyesters; diaphragm cells; furnace and hot pipe coverings; in food-pkg. adhesives; filler in food-contact rubber articles for repeated use

*Regulatory:* FDA 21CFR §175.105, 177.2420, 177.2600

**Asbestos, chrysotile.** See Asbestos

**Asbestos fiber.** See Asbestos

**L-Aspartic acid, N-(3-carboxy-1-oxo-2-sulfopropyl)-N-octadecyl-, tetrasodium salt.** See Tetrasodium dicarboxyethyl stearyl sulfosuccinamate

**L-Aspartic acid, N-(3-carboxy-1-oxosulfopropyl)-N-octadecyl-, tetrasodium salt.** See Tetrasodium dicarboxyethyl stearyl sulfosuccinamate

### Asphalt

CAS 8052-42-4; UN No. NA 1999 (DOT)

*Synonyms:* Asphalt, petroleum; Asphaltum; Bitumen; Judean pitch; Mineral pitch; Petroleum asphalt; Petroleum bitumen; Petroleum pitch; Petroleum roofing tar; Road asphalt; Road tar; Trinidad pitch

*Properties:* Blk. solid or visc. liq.; sol. in carbon disulfide, oil turpentine, petroleum, chloroform, ether, acetone; insol. in water, alcohol, acids, alkalis; dens. ≈ 1.0; b.p. < 470 C; soften. pt. (R&B) 25-170 C; flash pt. 132 C

*Toxicology:* ACGIH TLV/TWA 5mg/m<sup>3</sup>; toxic by inh. of fume; moderate irritant; suspected carcinogen; tumorigen; mutagen; TSCA listed

*Precaution:* Flamm. liq.

NFPA: Health 0; Flammability 1; Reactivity 0

*Uses:* Paving and road-coating; roofing; sealing and joint filling; special paints; adhesive in electrical laminates and hot-melt compositions; diluent in low-grade rubber products; fluid loss control in hydraulic fracturing of oil wells; medium for radioactive waste disposal; pipeline and underground cable coating; rust-preventative hot-dip coatings; base for synthetic turf; water-retaining barrier for sandy soils; supporter of rapid bacterial growth; in food-pkg. adhesives; in internal sizing for paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §175.105, 176.170

*Manuf./Distrib.:* Crompton/Witco; Crowley Tar Prods.; Pioneer Asphalt; Ziegler Chem. & Min.

**Asphalt, petroleum.** See Asphalt

**Asphaltum.** See Asphalt

**A-stage resin.** See Phenolic resin

**Astraphloxin.** See Basic red 12

**Astraphloxine.** See Basic red 12

**Atactic butadiene polymer.** See Polybutadiene

**Atactic poly(acrylic acid).** See Polyacrylic acid

**Atactic polypropylene.** See Polypropylene; Polypropylene, amorphous

**Atactic polystyrene.** See Polystyrene

**Atactic poly(vinyl chloride).** See Polyvinyl chloride

**ATBC.** See Acetyl tributyl citrate

**Auramine yellow.** See Basic yellow 2

**Azacyclotridecane-2-one, homopolymer.** See Nylon 12

**Azacyclotridecane-2-one polyamide.** See Nylon 12

**3-Azapentane-1,5-diamine.** See Diethylenetriamine

**AZC.** See Ammonium zirconium carbonate

**Azeite.** See Olive (*Olea europaea*) oil

**Aziridine, homopolymer.** See Polyethylenimine

**Aziridine, 2-methyl-.** See Propyleneimine

**Azobisisobutyronitrile.** See 2,2'-Azobisisobutyronitrile

**α,α'-Azobisisobutyronitrile.** See 2,2'-Azobisisobutyronitrile

**Azobisisobutyronitrile.** See 2,2'-Azobisisobutyronitrile

### 2,2'-Azobisisobutyronitrile

CAS 78-67-1; EINECS/ELINCS 201-132-3; UN No. 2952 (DOT)

*Synonyms:* AIBN; Azobisisobutyronitrile; α,α'-Azobisisobutyronitrile; Azobisisobutyronitrile; 2,2'-Azobis(2-methylpropanenitrile); 2,2'-Azobis(2-methylpropionitrile); Azodisobutyronitrile; α,α'-Azodisobutyronitrile; 2,2'-Dicyano-2,2'-azopropane; 2,2'-Dimethyl-2,2'-azodipropionitrile; Propanenitrile, 2,2'-azobis (2-methyl-); Propionitrile, 2,2'-azobis (2-methyl)

*Empirical:* C<sub>8</sub>H<sub>12</sub>N<sub>4</sub>

*Formula:* (CH<sub>3</sub>)<sub>2</sub>C(CN)NNCN(CH<sub>3</sub>)<sub>2</sub>

*Properties:* Wh. cryst. powd.; odorless; sol. in alcohol, many org. solvs., vinyl monomers; insol. in water, m.w. 164.24; m.p. 105 C (dec.); gas yield 125 cc/g

*Toxicology:* LD50 (oral, mouse) 0.7 g/kg, (IP, mouse) 25 mg/kg; mod. toxic by ingestion; poison by IP route; TSCA listed

*Precaution:* Flamm. solid; easily oxidized; unstable; violent exothermic reaction on heating; explodes when heated with heptane; container may explode if exposed to > 50 C

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub> and CN<sup>-</sup>

*Uses:* Catalyst/initiator for vinyl polymerizations and for curing unsaturated polyester resins; free radical generator; blowing agent for plastics esp. for PVC prod. of floats, buoys; polymerization catalyst for paper/paperboard in contact with aq./fatty foods; catalyst in food-contact crosslinked polyesters; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105, 176.170, 177.2420

*Manuf./Distrib.:* ABCR; Aceto; Aldrich; Alfa Aesar; Biddle Sawyer; Century Multech; Charkit; Eiwa Chem. Ind.; Fabricchem; Fluka; Japan Hydrozine; Monomer-Polymer & Dajac Labs; Otsuka Chem.; Pfaltz & Bauer; Sigma

**2,2'-Azobis(2-methylpropanenitrile).** See 2,2'-Azobisisobutyronitrile

**2,2'-Azobis(2-methylpropionitrile).** See 2,2'-Azobisisobutyronitrile

**Azodiisobutyronitrile.** See 2,2'-Azobisisobutyronitrile

**α,α'-Azodiisobutyronitrile.** See 2,2'-Azobisisobutyronitrile

**Azoic diazo component 48.** See Dianisidine

**Azovan blue.** See Direct blue 53

**BA.** See Butyl acrylate

**Bacillus subtilis Carlsberg.** See Protease

**Baking soda.** See Sodium bicarbonate

**Balsam capivi.** See Balsam copaiba (Copaifera officinalis)

**Balsam copaiba.** See Balsam copaiba (Copaifera officinalis)

**Balsam copaiba (Copaifera officinalis)**

*Synonyms:* Balsam capivi; Balsam copaiba; Copaiba; Copaiba balsam; Copaiba oleoresin; Copaifera officinalis balsam; Jesuit's balsam

*Definition:* Oleoresin obtained from *Copaifera officinalis*

*Properties:* Pale yel. to brnsh.-yel. visc. transparent liq.; peculiar odor; bitter, acid, nauseating taste; sol. in oxygenated, aromatic and chlorinated solvs., benzene, chloroform, ether, oils, carbon disulfide, abs. alcohol, petrol. ether; insol. in water; dens. 0.930-0.995; acid no. 28-95

*Toxicology:* TSCA listed

*Precaution:* Incompat. with min. acids, magnesia, water

*Uses:* In varnishes; for removing old oil varnish from oil paintings; mfg. of photographic paper; perfume fixative in soaps; fragrance ingred.; moisturizer and lubricant for hair and skin care prods.

*Manuf./Distrib.:* Penta Mfg.; Polarome Int'l.; Spectrum Quality Prods.

**BAPP.** See Bis(aminopropyl) piperazine

**Barite.** See Barium sulfate

**Barium borate.** See Barium metaborate

**Barium boron oxide.** See Barium metaborate

**Barium carbonate**

CAS 513-77-9; EINECS/ELINCS 208-167-3; UN No. 1564 (DOT)

*Synonyms:* Carbonic acid barium salt

*Classification:* Inorganic barium salt

*Definition:* Occurs in nature as the mineral witherite

*Empirical:* CBaO<sub>3</sub>

*Formula:* BaCO<sub>3</sub>

*Properties:* Wh. powd.; odorless; sol. in acids except sulfuric, sol'n. of ammonium chloride + ammonium nitrate; pract. insol. in water; m.w. 197.37; sp.gr. 4.4; bulking value 0.027 gal/lb; oil absorp. 14; b.p. 1450 C

*Toxicology:* ACGIH TLV/TWA 0.5 mg(Ba)/m<sup>3</sup>; LD50 (oral, rat) 418 mg/kg, (IP, mouse) 50 mg/kg; poison by ing., IV, IP routes; human systemic effects by ing. (stomach ulcers, muscle weakness, paresthesia, paralysis, diarrhea, nausea, vomiting, lung changes); overexposure may cause cardiac arrest or death due to respiratory failure; experimental reproductive effects; TSCA listed

*Precaution:* DOT: Poisonous material; incompat. with BrF<sub>3</sub> and 2-furanpercarboxylic acid

*Storage:* Keep containers sealed

*Uses:* Treatment of brines in chlorine-alkali cells to remove sulfates; rodenticide; production of barium salts; ceramic flux; in clay tiles; optical glass; case-hardening baths; ferrites; in radiation-resistant glass for color television tubes, CRT screens; boiler water treatment; filler in rubber, thermoset plastics, photographic paper; paints; enamels; marble substitutes; electrodes; as analytical reagent; weighting agent in drilling muds

*Manuf./Distrib.:* AMC Chems.; Aldrich; All Chemie Ltd; Allan; BCH Brühl; Barium & Chems.; BassTech Int'l.; Cerac; FMC Foret; Fluka; Great Western; Hammill & Gillespie; Hummel Croton; ICC Ind.; Mallinckrodt Baker; Osram Sylvania; Poly Research; Prior; Rhodia; San Yuan; Sigma; Sinochem Liaoning; Solvay GmbH; Spectrum Quality Prods.; U.S. Petrochem. Ind.; Wego Chem. & Min.

**Barium diborate.** See Barium metaborate

**Barium hydroxide.** See Barium hydroxide lime

**Barium hydroxide lime**

CAS 17194-00-2 (anhyd.); 12230-71-6 (octahydrate); EINECS/ELINCS 241-234-5

*Synonyms:* Barium hydroxide

*Definition:* Mixt. of barium hydroxide octahydrate and calcium hydroxide

*Empirical:* BaH<sub>2</sub>O<sub>2</sub>

*Formula:* Ba(OH)<sub>2</sub>

*Properties:* Wh. or grayish wh. gran.; sl. sol. in water; m.w. 171.36 (anhyd.), 315.48 (octahydrate); dens. 2.20; m.p. > 300

*Toxicology:* Highly toxic; corrosive; target organs: nerves, heart, kidneys, GI system; TSCA listed

*Precaution:* Incompat. with chlorinated rubber

*Uses:* Sorbent for CO<sub>2</sub> in pharmaceuticals; aesthetic apparatus; filler in paper, sealants; reagent for vegetable oil, sugar production; vulcanization accelerator

*Regulatory:* USP compliance

*Manuf./Distrib.:* Aldrich; BassTech Int'l.; Fluka; Sigma

**Barium metaborate**

CAS 13701-59-2

*Synonyms:* Barium borate; Barium boron oxide; Barium diborate; Boric acid barium salt

*Empirical:* BHO<sub>2</sub> • ½Ba

*Properties:* Wh. powd.; sol. 3-4 g/l water; m.w. 176.54; m.p. 1000 C

*Toxicology:* TSCA listed

*Uses:* Flame retardant/mold-resist. additive for plastics, paints, textiles, paper; rust-inhibitive pigment, extender for paints; fungicide for PVC; tannin stain blocker; preservative for coatings and sizings used in paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180

*Manuf./Distrib.:* Atomergic Chemetals; BassTech Int'l.; Buckman Labs; CasChem; D.N. Lukens; Joseph Storey; Seachem; Seegott

*Trade Names:* Busan® 11-M2

**Barium sulfate**

CAS 7727-43-7; EINECS/ELINCS 231-784-4; UN No. 1564 (DOT)

*Synonyms:* Artificial barite; Artificial heavy spar; Barite; Barium sulfate (1:1); Baryta white; Barytes; Blanc fixe; Blanc fixe (artificial, precipitated); Cl 77120; Enamel white; Heavy spar; Permanent white; Pigment white 21; Precipitated barium sulfate; Process white; Sulfuric acid barium salt (1:1)

*Classification:* Inorganic salt

*Empirical:* BaO<sub>3</sub>S

*Formula:* BaSO<sub>4</sub>

*Properties:* Wh. or yllsh. fine powd. free from grittiness, odorless, tasteless; sol. in conc. sulfuric acid; pract. insol. in water, dilute acids, alcohol; m.w. 233.40; dens. 4.25-4.5; bulking value 0.027 gal/lb; oil absorp. 7-14; GE brightness 80-95; m.p. 1580 C; ref. index 1.64; hardness (Mohs) 3.0-3.5

*Toxicology:* ACGIH TLV/TWA 10/mg<sup>3</sup> (total dust); poisonous when ingested; frequently causes skin reactions when applied; possible carcinogen; experimental tumorigen; mutagenic data; TSCA listed

*Precaution:* Heating with aluminum can cause explosion; incompat. with Al, P

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>x</sub>

*Uses:* Filler; extender; weighting mud in oil drilling; paper coating; printing inks; paints; filler and delustrant for textiles, rubber, plastics, and lithographic inks; radiation shield; x-ray contrast media; storage batteries; glass ingred.; extender pigment; filler pigment in floor coverings, paints,

**Formula:**  $(\text{CH}_3)_2\text{C}(\text{CN})\text{NNC}(\text{CN})(\text{CH}_3)_2$

**Properties:** Wh. cryst. powd.; odorless; sol. in alcohol, many org. solvs., vinyl monomers; insol. in water, m.w. 164.24; m.p. 105 C (dec.); gas yield 125 cc/g

## Barium sulfate (1:1)

plastic foams; opacifier in cosmetics; in food-pkg. adhesives; colorant in food-contact polymers, paper/paperboard in contact with aq./fatty foods; filler in food-contact rubber articles for repeated use

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.170, 177.1460, 177.2600, 178.3297; FDA approved for use in intrauterine prods.; BP compliance  
**Manuf./Distrib.:** Aldrich; Am. Biorganics; Am. Int'l.; Archway Sales; Arlington Int'l.; Atomergic Chemetals; Barium & Chems.; Barker Ind.; Baychem; Charkit; Cimbar Perf. Mins.; EM Ind.; Fluka; Gredmann USA; H.M. Royal; J.M. Huber/Chems.; J.T. Baker; Lenape Ind.; Lomas Int'l.; Mallinckrodt Baker; Mitsubishi Chem.; Ore & Chem.; R.E. Carroll; Rit-Chem; Rona; Ruger; Sachtleben Chemie GmbH; San Yuan; Sigma; Solvay SA; Spectrum Quality Prods.; Whittaker, Clark & Daniels

**Barium sulfate (1:1).** See Barium sulfate

**Baryta white.** See Barium sulfate

**Barytes.** See Barium sulfate

**Basic aluminum chloride.** See Polyaluminum chloride

**Basic aluminum sulfate.** See Aluminum hydroxide sulfate

### Basic blue 7

CAS 2390-60-5; EINECS/ELINCS 219-232-0  
**Synonyms:** Brilliant blue; CI 42595; N-[4-[[4-(Diethylamino) phenyl] [4-ethylamino)-1-naphthalenyl] methylene]-2,5-cyclohexadien-1-ylidene]-N-ethylethanaminium chloride; Victoria blue  
**Classification:** Azobenzene; triphenylmethane color  
**Empirical:** C<sub>33</sub>H<sub>40</sub>ClN<sub>3</sub>  
**Properties:** M.w. 514.15  
**Toxicology:** TSCA listed  
**Uses:** Basic dye for paper; pigment in printing inks; solvent dye for ballpen inks, printer ribbons; colorant in hair dyes  
**Manuf./Distrib.:** Aldrich; Sigma

**Basic chromic sulfate.** See Chromium sulfate, basic

**Basic chromium sulfate.** See Chromium sulfate, basic

**Basic copper sulfate.** See Cupric sulfate anhydrous

**Basic magnesium carbonate.** See Magnesium carbonate hydroxide

### Basic orange 1

CAS 4438-16-8  
**Synonyms:** Basic orange 1, monohydrochloride; 1,3-Benzenediamine, 4-methyl-6-(phenylazo)-, monohydrochloride; CI 11320; Methylchrysoidine; 5-(Phenylazo) toluene-3,4-diamine monohydrochloride; Toluene-2,4-diamine, 5-(phenylazo)-, monohydrochloride  
**Empirical:** C<sub>13</sub>H<sub>15</sub>ClN<sub>4</sub>  
**Formula:** C<sub>13</sub>H<sub>14</sub>N<sub>4</sub> • ClH  
**Properties:** M.w. 262.74  
**Uses:** Dye for cotton, bast, paper, leather, printing ink  
**Manuf./Distrib.:** Aakash Chems. & Dyestuffs; Albanil Dyestuff Int'l.; John Campbell; Org. Dyestuffs; Passaic Color & Chem.

**Basic orange 1, monohydrochloride.** See Basic orange 1

### Basic red 1

CAS 989-38-8; EINECS/ELINCS 213-584-9  
**Synonyms:** Basic red 1, monohydrochloride; Basic rhodamine yellow; Basic rhodaminic yellow; Benzoic acid, o-(6-(ethylamino)-3-(ethylimino)-2,7-dimethyl-3H-xanthen-9-yl)-, ethyl ester, monohydrochloride; CI 45160; Ethyl o-(6-(ethylamino)-3-(ethylimino)-2,7-dimethyl-3H-xanthen-9-yl) benzoate monohydrochloride; Rhodamine 6G; Xanthylum, 9-(2-(ethoxycarbonyl) phenyl)-3,6-bis(ethylamino)-2,7-dimethyl-, chloride  
**Classification:** Azobenzene  
**Empirical:** C<sub>28</sub>H<sub>31</sub>ClN<sub>2</sub>O<sub>3</sub>  
**Formula:** C<sub>28</sub>H<sub>30</sub>N<sub>2</sub>O<sub>3</sub> • ClH  
**Properties:** Bluish-pink cryst. or red-brn. solid; sol. (mg/ml): ≥ 100 mg in 95% ethanol (19.5 C), < 1 mg in water, DMSO, acetone (20 C); m.w. 479.02; volatilizes @ 200 C  
**Toxicology:** LD50 (IP, mouse) 6150 µg/kg; LDLo (oral, rat) 125 mg/kg; poison by ing., IP route; harmful by inh., skin contact; may cause severe eye irritation and possible injury; causes digestive/respiratory tract irritation, nausea, vomiting and diarrhea; possible risk of irreversible effects; may cause cardiac/liver/spleen changes, hemolysis, wt. loss; possible carcinogen; experimental tumorigen, teratogen; reproductive effector; mutagen; TSCA listed  
**Precaution:** Probably combustible; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** Hydrogen chloride, CO, CO<sub>2</sub>; heated to decomp., emits very toxic fumes of Cl<sup>-</sup> and NO<sub>x</sub>

**Storage:** Refrigerate; store in cool, dry place in tightly closed container

**Uses:** Pigment for printing inks, lacquers, paper coatings; dye in tunable lasers; dye for silk, cotton, wool, paper; tracing agent in water pollution studies; in leather dyeing; an adsorption indicator

**Manuf./Distrib.:** Acros Org.; Aldrich; Dudley; Fluka; Sigma

### Basic red 2

CAS 477-73-6; EINECS/ELINCS 207-518-8  
**Synonyms:** CI 50240; Cotton red; 3,7-Diamino-2,8-dimethyl-5-phenylphenazinium chloride; Gossypimine; Safranin Y; Safranin A  
**Classification:** Phenazine color  
**Empirical:** C<sub>20</sub>H<sub>16</sub>N<sub>4</sub> • Cl  
**Properties:** M.w. 350.85  
**Toxicology:** LDLo 1600 mg/kg; irritant; TSCA listed  
**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NO<sub>x</sub> and Cl<sup>-</sup>  
**Uses:** Indicator; dye for cotton, wool, silk, leather, paper, and solvents; colorant in hair dyes  
**Manuf./Distrib.:** Aldrich; Fluka; Salor; Sigma

### Basic red 12

CAS 6320-14-5  
**Synonyms:** Astraphloxin; Astraphloxine; CI 48070; 3H-Indolium, 1,3,3-trimethyl-2-(3-(1,3,3-trimethyl-2-indolinylidene) propenyl)-, chloride; Verona paper red  
**Empirical:** C<sub>26</sub>H<sub>29</sub>ClN<sub>2</sub>  
**Properties:** M.w. 392.96  
**Toxicology:** LD50 (oral, rat) 18 mg/kg; poison by ing.; TSCA listed  
**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NO<sub>x</sub> and Cl<sup>-</sup>  
**Uses:** Dye for cotton, bast, acetate, nylon, paper, and leather  
**Manuf./Distrib.:** Aakash Chems. & Dyestuffs; Fabricolor; Leadertech Colors

**Basic red 1, monohydrochloride.** See Basic red 1

**Basic rhodamine yellow.** See Basic red 1

**Basic rhodaminic yellow.** See Basic red 1

**Basic violet.** See Basic violet 4

### Basic violet 3

CAS 548-62-9; EINECS/ELINCS 208-953-6  
**Synonyms:** Ammonium, (4-(bis(p-(dimethylamino) phenyl) methylene)-2,5-cyclohexadien-1-ylidene) dimethyl-, chloride; Aniline violet; N-[4-Bis(4-(dimethylamino) phenyl) methylene]-2,5-cyclohexadien-1-ylidene]-N-methylmethanaminium chloride; Bismuth violet; CI 42555; Crystal violet; Gentian violet; Hexamethylparosaniline chloride; Hexamethyl p-rosaniline chloride; Hexamethyl p-rosaniline hydrochloride; Hexamethyl violet; Methylrosaniline chloride; Methyl violet; Parosaniline, N,N,N',N',N'',N'''-hexamethyl-, chloride  
**Classification:** Triphenylmethane color  
**Empirical:** C<sub>25</sub>H<sub>30</sub>ClN<sub>3</sub>  
**Properties:** Dk. grn. solid; sol. 0.01-0.1 g/100 ml in water (15.5 C); sol. in chloroform; sol. 1 g/10 ml alcohol, 1 gt/15 ml glycerin; pract. insol. in ether; m.w. 407.98; dens. 1.050; vapor pressure negligible; m.p. 215 C  
**Toxicology:** LD50 (oral, rat) 420 mg/kg, (IP, rat) 8900 µg/kg; LDLo (IV, mouse) 20 mg/kg; toxic by inh., ing.; primary irritant; irritating to eyes, skin, respiratory system; cancer suspect agent; may cause heritable genetic damage; tumorigen; reproductive effector; mutagen; TSCA listed  
**Storage:** Light-sensitive; protect from light; store in cool, dry, well-ventilated area away from incompat. substances  
**Uses:** Basic purple dye for cotton, silk, paper, wood; pigment in printing inks; solvent dye for ballpen inks, printer ribbons, rotogravure inks; as biological stain; differentiating gram-negative and gram-positive bacteria; staining chromatin and nucleoli in plant tissue; topical antiseptic, anti-infective, antimicrobial; anthelmintic  
**Manuf./Distrib.:** ABCR; Acros Org.; Aldrich; Dudley; Fisher Scientific; Fluka; Schütz; Sigma

### Basic violet 4

CAS 2390-59-2; EINECS/ELINCS 219-231-5  
**Synonyms:** Basic violet; CI 42600; Ethanaminium, N-(4-(bis(4-(diethylamino) phenyl) methylene)-2,5-cyclohexadien-1-ylidene)-N-ethyl-, chloride; Ethyl violet; Ethyl purple 6B

**Classification:** Azobenzene

**Empirical:** C<sub>31</sub>H<sub>42</sub>ClN<sub>3</sub>

**Properties:** Olive green; m.w. 492.15; m.p. 0 C

**Toxicology:** Prevent direct contact with skin or eyes; prevent inh.; TSCA listed

**Uses:** Dye for cotton; pigment for paper

**Manuf./Distrib.:** Acros Org.; Aldrich; Dudley; Fluka; Sigma

### Basic violet 10

CAS 81-88-9; EINECS/ELINCS 201-383-9

**Synonyms:** Ammonium, (9-(o-carboxyphenyl)-6-(diethylamino)-3H-xanthen-3-ylidene) diethyl-, chloride; 9-o-Carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene 3-ethochloride; (9-(o-Carboxyphenyl)-6-(diethylamino)-3H-xanthen-3-ylidene) diethylammonium chloride; N-[9-Carboxyphenyl]-6-(diethylamino)-3H-xanthen-3-ylidene]-N-ethylethaniminium chloride; CI 45170; D&C Red No. 19; Diethyl-m-aminophenolphthalein hydrochloride; 3-Ethochloride of 9-o-carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene; FD&C Red No. 19; Food red 15; Rhodamine B; Rhodamine, tetraethyl-; Tetraethyldiamino-o-carboxyphenyl xanthenyl chloride; Tetraethylrhodamine

**Classification:** Xanthene color

**Empirical:** C<sub>28</sub>H<sub>31</sub>ClN<sub>2</sub>O<sub>3</sub>

**Properties:** Greenish cryst. or yel. powd.; turns violet in sol'n.; strong odor; sol. in water, ethanol; sl. sol. in HCl, NaOH; m.w. 479.02; vapor pressure negligible; m.p. 210-211 C

**Toxicology:** LD50 (oral, mouse) 887 mg/kg, (IP, rat) 112 mg/kg, (IV, rat) 89 mg/kg, (subcut., mouse) 180 mg/kg; harmful by ing., inh., skin contact; handle with gloves; possible risk of irreversible effects; may cause changes in liver/kidney wt., wt. loss; carcinogen; tumorigen; mutagen; experimental reproductive effects; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of NO<sub>x</sub>, NH<sub>3</sub>, and Cl<sup>-</sup>

**Storage:** Store in cool, dry place in tightly closed container

**Uses:** Basic dye for paper, leather; pigment in paints, printing inks; solvent dye in ballpen inks, printer ribbon, solvents; colorant for external pharmaceuticals; as a reagent for antimony, bismuth, cobalt, niobium, gold, manganese, mercury, molybdenum, tungsten, etc.; as a biological stain

**Regulatory:** D&C Red No. 19; Permanently listed in 1988; ruling reversed, no longer authorized for use in U.S.

**Manuf./Distrib.:** ABCR; AMRESCO; Acros Org.; Aldrich; Dudley; Fluka; Sigma

### Basic yellow 2

CAS 2465-27-2; EINECS/ELINCS 219-567-2; UN No. 3143

**Synonyms:** Aniline, 4,4'-(imidocarbonyl) bis (N,N-dimethyl-, hydrochloride; Auramine hydrochloride; Auramine O; Auramine Pure; Auramine yellow; Basic yellow 2, monohydrochloride; Benzenamine, 4,4'-carbonimidoylbis (N,N-dimethyl-, monohydrochloride; 4,4'-Bis (dimethylamino) benzohydrilideneimine hydrochloride; 4,4'-Bis (dimethylamino) benzophenone-imine hydrochloride; 1,1-Bis (p-dimethylaminophenyl) methylenimine hydrochloride; Canary yellow; 4,4'-Carbonimidoylbis (N,N-dimethylbenzenamine monohydrochloride; CI 41000; 4,4'-(Imidocarbonyl) bis (N,N-dimethylaniline) monohydrochloride

**Classification:** Azobenzene

**Empirical:** C<sub>17</sub>H<sub>22</sub>ClN<sub>3</sub>

**Properties:** Yel. flakes or powd.; odorless; sol. in ether, chloroform, glycerol; sol. (mg/ml): < 1 mg in water, DMSO, 95% ethanol, methanol, acetone, toluene (18 C); m.w. 303.84; dens. > 1; vapor pressure negligible; m.p. 267 C; flash pt. 250 C

**Toxicology:** LD50 (oral, mouse) 480 mg/kg, (IP, rat) 135 mg/kg, (skin, mouse) 300 mg/kg; toxic by ing. and skin contact; may cause eye/skin/respiratory/digestive tract irritation; may cause irreversible eye injury; readily absorbed thru skin; possible carcinogen; experimental neoplastigen; equivocal tumorigen; mutagen effects; TSCA listed

**Precaution:** Probably combustible; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** Hydrogen chloride, CO, CO<sub>2</sub>, NO<sub>x</sub>

**Storage:** Store in tightly closed container in cool, dry, well-ventilated area away from incompat. substances

**Uses:** Dye for cotton, paper, silk, leather; biological stain for staining acid-fast bacteria in sputum or in paraffin sections of infected tissue; chelating agent; fungicide; antiseptic

**Manuf./Distrib.:** Acros Org.; Aldrich; Dudley; Fisher Scientific; Fluka; ProSciTech; Sigma

### Basic yellow 37

**Synonyms:** CI 41001

**Empirical:** C<sub>21</sub>H<sub>30</sub>ClN<sub>3</sub>

**Properties:** M.w. 359.94

**Uses:** Dye for paper, printing inks

**Manuf./Distrib.:** Aakash Chems. & Dyestuffs; Dye Specialties; Org. Dyestuffs; Spectra Colors

**Basic yellow 2, monohydrochloride.** See Basic yellow 2

**Battery acid.** See Sulfuric acid

**BBAB.** See 1,4-Bis (bromoacetoxy)-2-butene

**BBP.** See Butyl benzyl phthalate

**BCDMH.** See 1-Bromo-3-chloro-5,5-dimethyl hydantoin

**Beef tallow.** See Tallow

### Beef tallow triglycerides

**Uses:** Defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.210

### Beeswax

CAS 8006-40-4 (white); 8012-89-3 (yellow); EINECS/ELINCS 232-383-7; FEMA 2126 (wh.)

**Synonyms:** Cera alba; White wax; White beeswax; Yellow wax; Yellow beeswax

**Definition:** Purified wax from the honeycomb of the bee, *Apis mellifera*; commonly called white wax when bleached, yellow wax when not bleached

**Properties:** Brown or wh. (bleached) solid with faint odor; sl. balsamic taste; pract. insol. in water; sl. sol. in cold alcohol; sol. in hot alcohol, chloroform, benzene, ether, CS<sub>2</sub>, and oils; dens. 0.95; m.p. 62-65 C; acid no. 17-24; sapon. no. 84

**Toxicology:** Essentially nontoxic; mild allergen; may cause contact dermatitis, human intolerance reaction; TSCA listed

**Precaution:** Combustible when heated

**Storage:** Store away from heat

**Uses:** Food additive; flavoring agent; candy glaze/polish; furniture and floor waxes; shoe polishes; leather dressings; anatomical specimens; artificial fruit; textile sizes and finishes; candles; adhesive compds.; chewing gum base; emollient, emulsifier, film-former in cosmetics; pharmaceutical aid; wax paper; wood and paper finishes; viscosifier; tablet coating agent; filler, stiffener, emulsifier in pharmaceuticals

**Use Level:** 0.065% (chewing gum), 0.005% (confections, frostings), 0.04% (hard candy), 0.1% (soft candy), 0.002% (other food)

**Regulatory:** FDA 21CFR §184.1973, GRAS; FEMA GRAS (white); Japan approved; Europe listed; UK approved; FDA approved for orals, topicals; USP/NF, BP, Ph. Eur. compliance

**Manuf./Distrib.:** Aldrich; Alfa Chem; British Wax Refining; CC Pollen; Dussek Campbell; Fluka; Frank B. Ross; Koster Keunen; Penta Mfg.; Spectrum Quality Prods.; Strahl & Pitsch

**Trade Names:** Koster Keunen Beeswax; Ross Beeswax

**Beeswax, synthetic.** See Synthetic beeswax

### Behenic acid

CAS 112-85-6; EINECS/ELINCS 204-010-8

**Synonyms:** Docosanoic acid

**Classification:** Fatty acid

**Empirical:** C<sub>22</sub>H<sub>44</sub>O<sub>2</sub>

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>20</sub>COOH

**Properties:** Colorless waxy solid; faint odor; water-sol.; m.w. 340.57; dens. 0.8221 (100/4 C); m.p. 80 C; b.p. 306 C (60 mm), 265 C (15 mm); ref. index 1.4270 (100 C)

**Toxicology:** No known toxicity; TSCA listed

**Uses:** Emulsifier in cosmetics; waxes; plasticizers; chemicals; stabilizers; lubricating oils; lubricant for plastics processing; pharmaceutical opacifier, lubricant, emulsifier

**Manuf./Distrib.:** Acme-Hardesty; Aldrich; Alfa Aesar; Crompton/Witco; Fluka; Jarchem Ind.; Lutianhua; Sigma

**Trade Names Containing:** Safacid 20/22 LF

**Behenic imidazoline.** See Behenyl hydroxyethyl imidazoline

### Behentrimonium chloride

CAS 17301-53-0; EINECS/ELINCS 241-327-0

**Synonyms:** Behenyl trimethyl ammonium chloride; 1-Docosanaminium,

## Behenyl alcohol

N,N,N-trimethyl-, chloride; N,N,N-Trimethyl-1-docosanaminium chloride  
**Classification:** Quaternary ammonium salt  
**Empirical:** C<sub>22</sub>H<sub>46</sub>N • Cl  
**Formula:** [CH<sub>3</sub>(CH<sub>2</sub>)<sub>20</sub>CH<sub>2</sub>N(CH<sub>3</sub>)<sub>3</sub>]<sup>+</sup> Cl<sup>-</sup>  
**Properties:** M.w. 404.16; cationic  
**Uses:** Preservative in cosmetics; base, antistat, emulsifier, softener, emollient, conditioner for hair care prods., skin creams/lotions; germicide (duckweed killer) for water treatment; germicide for petroleum, textiles, foods, pulp/paper; plastics antistat  
**Trade Names:** Nissan Cation VB

## Behenyl alcohol

CAS 661-19-8; EINECS/ELINCS 211-546-6  
**Synonyms:** Alcohol C<sub>22</sub>; 1-Docosanol  
**Definition:** Mixture of fatty alcohols chiefly of n-docosanol  
**Empirical:** C<sub>22</sub>H<sub>46</sub>O  
**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>20</sub>CH<sub>2</sub>OH  
**Properties:** Colorless waxy solid; sol. in oxygenated solvs., ethanol, chloroform; insol. in water, m.w. 326.61; m.p. 71 C; b.p. 180 C (0.22 mm)  
**Toxicology:** Low toxicity; TSCA listed  
**Uses:** Synthetic fibers; lubricants; evaporation retardant on water surfaces; surfactant for polymerization; emollient in cosmetics; foam control agent; cosolvent; plasticizer; pharmaceutical raw material; as antihistamine; in surf. lubricants for mfg. of food-contact metallic articles  
**Regulatory:** FDA 21CFR §178.3910  
**Manuf./Distrib.:** AC Ind.; Aldrich; Brown; Condea Vista; Crompton/Witco; Fluka; Jarchem Ind.; M. Michel; Pechiney World Trade USA; Schweizerhall; Sea-Land; Sigma  
**Trade Names Containing:** Nafol® 1822; Nafol® 1822 B; Nafol® 1822 C

## Behenyl hydroxyethyl imidazoline

CAS 39957-00-1; EINECS/ELINCS 254-719-1  
**Synonyms:** Behenic imidazoline; Behenyl imidazoline; 1H-Imidazole-1-ethanol, 4,5-dihydro-2-docosanyl-  
**Classification:** Heterocyclic compd.  
**Empirical:** C<sub>26</sub>H<sub>47</sub>N<sub>2</sub>O  
**Properties:** Tan solid; m.w. 383; m.p. 45-49 C; cationic  
**Uses:** Antistat in cosmetics; dispersant; wetting agent; emulsifier; microbicide; acid cleaning; polishes; surface treatment; textile processing; paints; metal processing; agric.; cosmetic intermediate; in resinous/polymeric food-contact coatings; defoamer in mfg. of food-contact paper/paperboard; in food-contact textiles  
**Regulatory:** FDA 21CFR §175.300, 176.210, 177.2800

**Behenyl imidazoline.** See Behenyl hydroxyethyl imidazoline

## Behenyl methacrylate

**Uses:** Dispersant; lubricant additive; modifier for fibers; coating agent for paper; used in paints, inks, adhesives  
**Trade Names:** Blemmer VMA

**Behenyl trimethyl ammonium chloride.** See Behentrimonium chloride

**BEHP.** See s-Dioctyl phthalate

**Benne oil.** See Sesame (Sesamum indicum) oil

**Bentone.** See Kaolin

## Bentonite

CAS 1302-78-9; EINECS/ELINCS 215-108-5  
**Synonyms:** Bentonite magma; CI 77004; Mineral soap; Soap clay; Southern bentonite; Wilkinite  
**Definition:** Native hydrated colloidal aluminum silicate clay  
**Formula:** Al<sub>2</sub>O<sub>3</sub> • 4SiO<sub>2</sub> • nH<sub>2</sub>O  
**Properties:** Light to cream-colored impalpable powd., odorless, sl. earthy taste; forms colloidal suspension in water, thixotropic properties; insol. in water and org. solvs.; pH 9.5-10.5  
**Toxicology:** LD50 (IV, rat) 35 mg/kg; poison by IV route causing blood clotting; inert and generally nontoxic; questionable carcinogen with experimental tumorigenic data; TSCA listed  
**HMIS:** Health 1; Flammability 0; Reactivity 0  
**Storage:** Hygroscopic  
**Uses:** Oil-well drilling aid; cement slurries for oil-well casings; thickener; fireproofing; decolorizing agent; filler in ceramics, refractories, paper coatings; emulsifier for oils; suspending agent in pharmaceuticals; base for plasters; abrasives; extender for paints; asphalt modifier; polishes; bonding

agent in foundry sands and pelletizing of iron ores; sealant for canal walls; absorbent, emulsion stabilizer, visc. control agent in cosmetics; food additive, colorant, pigment, stabilizer for wine; coagulant, color removal aid for water treatment; in food-pkg. adhesives; colorant in food-contact polymers, paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.170, 177.1460, 178.3297, 184.1155, GRAS; Japan restricted (0.5% max. residual); Europe listed; UK approved; USP/NF, BP, Ph.Eur. compliance; FDA approved for orals, topicals; USP/NF compliance

**Manuf./Distrib.:** Akzo Nobel; Aldrich; Allchem Ind.; Am. Colloid; Asbury Carbons; Cimbar Perf. Mins.; D.N. Lukens; Fluka; H.M. Royal; Hammill & Gillespie; IMERYS; Indofine; Kaopolite; Kraft Chem.; L.A. Salomon; Landers-Segal Color; Lomas Int'l; Norsk Hydro AS; Punda Mercantile; R.E. Carroll; R.T. Vanderbilt; Reade Advanced Materials; Ruger; Sal Chem.; Seegott; Sigma; Smectite; Southern Clay Prods.; Spectrum Quality Prods.; Süd-Chemie AG; Tamms Ind.; U.S. Silica; Whittaker, Clark & Daniels; Wyo-Ben

**Trade Names:** Aquagel Gold Seal™ 200; Aquagel Gold Seal™ 325; Copisil®; Lightcoat; Opazil®; Printosil®; Thermosil®

**Bentonite magma.** See Bentonite

## Benzalkonium chloride

CAS 8001-54-5; 61789-71-7; 63449-41-2; 68391-01-5; 68424-85-1; 68989-00-4; 85409-22-9; EINECS/ELINCS 204-479-9; 263-080-8; 264-151-6; 269-919-4; 270-325-2; 273-544-1; 287-089-1; UN No. 1760 (DOT)

**Synonyms:** Alkylbenzyltrimethylammonium chloride; Alkyl dimethyl benzyl ammonium chloride; Alkyldimethyl (phenylmethyl) quaternary ammonium chlorides; Alkyl ((ethylphenyl) methyl) dimethyl quaternary ammonium chlorides; Ammonium, alkyldimethyl (phenylmethyl)-, chloride; Octyloctadecyl dimethyl ethylbenzyl ammonium chlorides; Quaternary ammonium compds., benzyl-C8-18-alkyldimethyl, chlorides

**Classification:** Quaternary ammonium salt  
**Definition:** Mixt. of alkylbenzyltrimethylammonium chlorides

**Formula:** C<sub>8</sub>H<sub>5</sub>CH<sub>2</sub>N(CH<sub>3</sub>)<sub>2</sub>Cl, R = C<sub>8</sub>H<sub>17</sub> to C<sub>18</sub>H<sub>37</sub>

**Properties:** Wh. or ysh.-wh. amorphous powd. or gelatinous pieces; aromatic odor; bitter taste; very sol. in water, alcohol, acetone; sl. sol. in benzene; insol. in ether; m.p. 34-37 C; cationic

**Toxicology:** LD50 (oral, rat) 240 mg/kg, (IP, rat) 14,500 µg/kg; highly toxic; poison by parenteral, ing., IP, IV routes; human poison by ing.; large systemic doses can cause nausea, vomiting, muscle paralysis, CNS depression, local tissue damage; human skin and severe eye irritant; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

**Precaution:** DOT: Corrosive material; incompat. with anionic detergents  
**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of Cl<sup>-</sup>, NH<sub>3</sub>, and NO<sub>x</sub>

**HMIS:** Health 2; Flammability 0; Reactivity 1

**Uses:** Surfactant; detergent; surface antiseptic, bactericide, fungicide, antimicrobial preservative, disinfectant, wetting agent, solubilizer in pharmaceuticals; latex coagulation, flotation; electrostatic paints; demulsification of hydrocarbons; emulsifier for emulsion polymerization; algicide and slimicide in swimming pool and industrial water and wastewater treatment; preservative in cosmetics; in food-pkg. adhesives; slimicide in food-contact paper/paperboard; as sanitizing solution for food contact

**Use Level:** 0.1-0.3%

**Regulatory:** USA not restricted; FDA 21CFR §175.105, 176.300, 178.1010; FDA approved for ophthalmics, injectables, otics, topicals; Japan, Europe listed; USP/NF, BP, Ph.Eur. compliance

**Manuf./Distrib.:** Akzo Nobel; Aldrich; Alfa Chem; Allchem Ind.; Amyl; Chemron; DeForest Enterprises; EM Ind.; Fluka; Gresco Mfg.; Jame Fine Chem.; Lonza Ltd; Mason; Rhodia HPCII France; Ruger; Schütz; Sigma; Spectrum Quality Prods.; Stepan Europe; Stepan; Triple Crown Am.; Universal Preserv-A-Chem

**Trade Names:** Alkaquat® DMB-451-50, DMB-451-80; Barquat® MB-50; Hyamine® 3500 50%; Paxgard BK 20; Paxgard BKC; Protectol® KLC 50; Protectol® KLC 80

**Benzenamine, 4,4'-carbonimidoylbis (N,N-dimethyl-, monohydrochloride.** See Basic yellow 2

**Benzene, (2-bromo-2-nitroethyl)-.** See β-Bromo-β-nitrostyrene  
**1,3-Benzenediamine, 4-methyl-6-(phenylazo)-, monohydrochloride.** See Basic orange 1

**Benzene diazonium, 4-(phenylamino)-, sulfate.** See p-Diazodiphenylamine

sulfate  
**1,4-Benzenedicarbonyl chloride.** See Terephthaloyl chloride  
**1,4-Benzenedicarbonyl dichloride.** See Terephthaloyl chloride

 CAS 16470-24-9  
*Synonyms:* 2,2'-Stilbenedisulfonic acid, 4,4'-bis ((4-bis (2-hydroxyethyl) amino)-6-(p-sulfoanilino)-s-triazin-2-yl) amino)-, tetrasodium salt  
*Empirical:* C<sub>40</sub>H<sub>44</sub>N<sub>12</sub>O<sub>16</sub>S<sub>4</sub> • 4Na

*Properties:* M.w. 1169.01

*Uses:* Optical brightener for food-contact paper/paperboard; fluorescent probe

*Regulatory:* FDA 21CFR §176.170, 176.180

*Trade Names:* Leucophor® U Liq.; Leucophor® UO Liq.

**Benzenesulfonic acid, 2,2'-(1,2-ethylenediyl) bis (5-amino)-.** See 4,4'-Diaminostilbene-2,2'-disulfonic acid

**Benzenesulfonic acid, 4-(2-hydroxy-1-naphthalenyl) azo-, monosodium salt.** See Acid orange 7

**Benzenesulfonic acid, 3-((4-(phenylamino) phenyl) azo)-, monosodium salt.** See Acid yellow 36

**Benzenol.** See Phenol

## Benzidine

CAS 92-87-5; EINECS/ELINCS 202-199-1; UN No. 1885

*Synonyms:* P-Benzidine; Benzidine base; 4,4'-Bianiline; p,p'-Bianiline; 4,4'-Biphenyldiamine; (1,1'-Biphenyl)-4,4'-diamine; Biphenyl, 4,4'-diamino-; 4,4'-Biphenylenediamine; CI 37225; CI azoic diazo component 112; 4,4'-Diaminobiphenyl; 4,4'-Diamino-1,1'-biphenyl; p,p'-Diaminobiphenyl; 4,4'-Diaminodiphenyl; p-Diaminodiphenyl; p,p'-Dianiline; 4,4'-Diphenylenediamine; Fast corinth base B

*Empirical:* C<sub>12</sub>H<sub>12</sub>N<sub>2</sub>

*Formula:* NH<sub>2</sub>C<sub>6</sub>H<sub>4</sub>C<sub>6</sub>H<sub>4</sub>NH<sub>2</sub>

*Properties:* Wh., grayish-yel., or reddish-gray cryst. powd.; odorless; sol. in DMSO, acetone, less polar solvs.; sol. 10-50 mg/ml in 95% ethanol; sol. 1 g/50 ml in ether; sol. < 1 mg/ml in water; m.w. 184.23; sp.gr. 1.250 (20/4 C); m.p. 128 C; b.p. 400 C (740 mm); can be sublimed

*Toxicology:* LD50 (oral, rat) 309 mg/kg, (IP, mouse) 110 mg/kg; poison by ing. and IP routes; toxic by inh., skin contact; rapidly absorbed thru skin; severe eye/skin irritant; any exposure considered extremely hazardous; may cause nausea, vomiting, liver/kidney/blood damage, skin sensitization, painful urination, cystitis, etc.; may be fatal; human carcinogen which produces bladder tumors and blood in urine; experimental carcinogen, tumorigen; human mutagenic data; target organs: bladder, liver; TSCA listed

*Environmental:* Very toxic to aquatic organisms; may cause long-term adverse effects in aquatic environment; avoid release to environment

*Precaution:* Combustible; a weak base that forms insol. salts with sulfuric acid; can be diazotized, acetylated, alkylated; hypergolic with red fuming nitric acid; darkens on exposure to air and light; avoid heat

*Hazardous Decomp. Prods.:* Heated to decomp., emits highly toxic fumes of CO, CO<sub>2</sub>, NO<sub>x</sub>; emits toxic fumes under fire conditions

*Storage:* Keep container tightly closed under inert atmosphere; store refrigerated; protect from light

*Uses:* Precursor in synthesis of dyes and pigments used to color textiles, rubber, plastics, printing inks, paints, lacquers, leather, paper prods.; mfg. of organic chems.; stiffening agent in rubber compounding; reagent for hydrogen peroxide; in milk; detection of blood stains; stain in microscopy; mfg. of plastic films; prod. of security paper; laboratory reagent in determining hydrogen cyanide, sulfate, nicotine, and certain sugars

*Regulatory:* SARA §313 reportable; use prohibited in UK

*Manuf./Distrib.:* AccuStandard; Fluka; George Uhe; Isotec; Pfaltz & Bauer; Riedel-deHaën; Sigma; Supelco; TCI Am.

**p-Benzidine.** See Benzidine

CAS 81846-81-3

*Uses:* Solvent for aerosols, adhesives, electronic parts mfg. and cleaning, industrial cleaning, inks and paper coatings, metal cleaning, paints, plastics, sealants, tile mfg.

(1,1'-Biphenyl)-4,4'-diamine. See Benzidine

4,4'-Biphenyldiamine. See Benzidine

Biphenyl, 4,4'-diamino-. See Benzidine

(1,1'-Biphenyl)-2,2'-disulfonic acid, 4,4'-bis ((2-hydroxy-1-naphthalenyl) azo)-, disodium salt. See Acid red 97

4,4'-Biphenylenediamine. See Benzidine

1,1'-Biphenyl, 2,2',4,4',5,5'-hexachloro-. See 2,2',4,4',5,5'-Hexachlorobiphenyl

Biphenyl, isopropyl. See 1,1'-Biphenyl (1-methylethyl)

1,1'-Biphenyl (1-methylethyl)

CAS 25640-78-2

Synonyms: Biphenyl, isopropyl; Isopropyl diphenyl; Isopropylbiphenyl; Monoisopropyl biphenyl; (1-Methylethyl) 1,1'-biphenyl

Empirical: C<sub>15</sub>H<sub>16</sub>

Properties: M.w. 196.31

Toxicology: LD50 (oral, rat) 4570 mg/kg; LDLo (oral, rabbit) 4 g/kg; mod. toxic by ingestion; mutagen; may cause altered sleep time, tremors, ataxia; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

Uses: Solvent for aerosols, adhesives, electronic parts mfg. and cleaning, industrial cleaning, inks and paper coatings, metal cleaning, paints, plastics, sealants, tile mfg.

(1,1'-Biphenyl)-2-ol. See o-Phenylphenol

2-Biphenylol. See o-Phenylphenol

o-Biphenylol. See o-Phenylphenol

(1,1'-Biphenyl)-2-ol, sodium salt. See Sodium o-phenylphenate

2-Biphenylol, sodium salt. See Sodium o-phenylphenate

3,3'-(4,4'-Biphenylene) bis (azo) bis (5-amino-4-hydroxy)-2,7-naphthalenedisulfonic acid, tetrasodium salt. See Direct blue 6

4-Biphenyl phenyl ketone. See p-Phenylbenzophenone

p-Biphenyl phenyl ketone. See p-Phenylbenzophenone

((1,1'-Biphenyl)-4-yl) phenylmethanone. See p-Phenylbenzophenone

Biphenyl-4-yl-phenylmethanone. See p-Phenylbenzophenone

Bis (2-aminoethyl) amine. See Diethylenetriamine

Bis (β-aminoethyl) amine. See Diethylenetriamine

N,N'-Bis (2-aminoethyl)-1,2-diaminoethane. See Triethylenetetramine

N,N'-Bis (2-aminoethyl)-1,2-ethanediamine. See Triethylenetetramine

N,N'-Bis (2-aminoethyl) ethylenediamine. See Triethylenetetramine

N,N'-Bis (2-aminoethyl)-1,2-ethylenediamine. See Triethylenetetramine

4,4'-Bis (1-amino-8-hydroxy-2,4-disulfo-7-naphthylazo)-3,3'-bitolyl, tetrasodium salt. See Direct blue 53

4,4'-Bis [7-(1-amino-8-hydroxy-2,4-disulfo) naphthylazo]-3,3'-bitolyl, tetrasodium salt. See Direct blue 53

Bis(aminopropyl) piperazine

CAS 7209-38-3; UN No. 1760 (DOT)

Synonyms: BAPP; 1,4-Bis (aminopropyl) piperazine; 1,4-Bis-(3-aminopropyl) piperazine

Classification: Heterocyclic organic compd.

Empirical: C<sub>10</sub>H<sub>24</sub>N<sub>4</sub>

Properties: Clear liq.; m.w. 200.38; sp.gr. 0.97; m.p. 15 C; b.p. 295 C; flash pt. (COC) 325 F; ref. index 1.5001

Toxicology: LD50 (IV, mouse) 3500 µg/kg; poison by IV route; corrosive; irritating to eyes, skin, mucous membranes; TSCA listed

Precaution: Corrosive

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NO<sub>x</sub>

Uses: Intermediate for prep. of textile and paper treating resins, dyestuffs, epoxy curing agents, pharmaceuticals, surfactants, polyamides; dietary supplement

Manuf./Distrib.: Aceto; Aldrich; BASF AG

1,4-Bis (aminopropyl) piperazine. See Bis(aminopropyl) piperazine

1,4-Bis-(3-aminopropyl) piperazine. See Bis(aminopropyl) piperazine

4,4'-Bis ((4-anilino-6-bis (2-hydroxyethyl) amino-w-triazin-2-yl) amino)-2,2'-stilbenedisulfonic acid disodium salt. See Disodium 2,2'-(1,2-ethenediyl) bis [5-[[4-[bis (2-hydroxyethyl) amino]-6-(phenylamine)-1,3,5-triazin-2-yl] amino] benzenesulfonate

N,N-Bis [2-[bis (carboxymethyl) amino] ethyl] glycine. See Pentetic acid

N,N-Bis[2-[bis (carboxymethyl) amino] ethyl] glycine, pentasodium salt. See Pentasodium pentetate

2,2-Bis ((3-(3,5-bis (1,1-dimethylethyl)-4-hydroxyphenyl)-1-oxopropoxy) methyl)-1,3-propanediyl ester. See Pentaerythrityl tetrakis [3-(3',5'-di-*t*-butyl-4-hydroxyphenyl) propionate]

1,4-Bis (bromoacetoxy)-2-butene

CAS 20679-58-7; EINECS/ELINCS 243-962-9; UN No. 1760

Synonyms: BBAB; Acetic acid, bromo-, 2-butene-1,4-diyl ester; Acetic acid, bromo-, 2-butenylene ester; Bis-1,4-bromoacetoxy-2-butene; Bis (bromoacetoxy)-2-butene; Butene-1,4-diol bis (bromoacetate); 2-Butene-1,4-diol bis (bromoacetate); 1,4-Di (bromoacetoxy) butenediol

Empirical: C<sub>8</sub>H<sub>10</sub>Br<sub>2</sub>O<sub>4</sub>

Properties: Dk. brn. oily liq.; sharp odor; sol. in acetone, toluene, methylene chloride; pract. insol. in water; m.w. 329.98; m.p. < -20 C; b.p. 135-136 C (0.05 mm Hg)

Toxicology: LD50 (oral, rat) 191 mg/kg, (dermal, rabbit) 983 mg/kg; corrosive to eyes, skin, mucous membranes; toxic, corrosive by ing.; causes burns; may be absorbed thru skin in sufficient amount to cause systemic toxicity; inh. may cause sore throat, coughing, shortness of breath, nasal irritation

Environmental: LC50 (zebra fish, 48 h) 0.32 mg/l; toxic to aquatic organisms; marine pollutant; biodeg.

Precaution: DOT corrosive liq.; incompat. with strong oxidizers, strong bases; avoid high temps.; contamination by water

Hazardous Decomp. Prods.: Heated to decomp., may release poisonous fumes of hydrogen bromide and bromine

Storage: Store in cool, dry, well-ventilated area away from incompat. materials; keep containers tightly closed

Uses: Biocide, slimicide for paper mill wastewater treatment; pesticide; slimicide in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.300

Manuf./Distrib.: Dead Sea Bromine

Bis-1,4-bromoacetoxy-2-butene. See 1,4-Bis (bromoacetoxy)-2-butene

Bis (bromoacetoxy)-2-butene. See 1,4-Bis (bromoacetoxy)-2-butene

1,2-Bis (bromoacetoxy) ethane

CAS 3785-34-0

Synonyms: Acetic acid, bromo-, diester with ethylene glycol; Acetic acid, bromo-, 1,2-ethanedyl ester; Acetic acid, bromo-, ethylene ester; 1,2-Bis (monobromoacetoxy) ethane; Bromoacetic acid ethylene ester; 1,2-Ethanedyl bromoacetate; Ethylene bis (bromoacetate); Ethylene bromoacetate; Ethylene glycol, bis (bromoacetate)

Empirical: C<sub>6</sub>H<sub>8</sub>Br<sub>2</sub>O<sub>4</sub>

Properties: M.w. 303.96

Toxicology: LD50 (IP, mouse) 39 mg/kg, (IV, mouse) 56 mg/kg; eye irritant; may cause somnolence, acute pulmonary edema

Uses: Slimicide in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.300

5,5-Bis (bromoacetoxy) methyl m-dioxane

Uses: Slimicide in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.300

Bis (3-*t*-butyl-4-hydroxy-6-methylphenyl) sulfide. See 4,4'-Thiobis-6-(*t*-butyl-*m*-cresol)

Bis (n-butyl) sebacate. See Dibutyl sebacate

N-[2-[Bis(carboxymethyl) amino] ethyl]-N-(2-hydroxyethyl) glycine, trisodium salt. See Trisodium HEDTA

3,6-Bis (carboxymethyl)-3,5-diazoctanedioic acid. See Edetic acid

N,N-Bis(carboxymethyl)glycine. See Nitriolotriacetic acid

N,N-Bis (carboxymethyl) glycine trisodium salt. See Trisodium NTA

Bis (2-chloroethyl) vinylphosphonate. See Bis (β-chloroethyl) vinyl phosphonate

Bis (β-chloroethyl) vinyl phosphonate

CAS 115-98-0

Synonyms: Bis (2-chloroethyl) vinylphosphonate; Di (2-chloroethyl) vinylphosphonate; Vinylphosphonic acid bis (2-chloroethyl) ester

Empirical: C<sub>4</sub>H<sub>11</sub>Cl<sub>2</sub>O<sub>3</sub>P

Formula: (ClCH<sub>2</sub>CH<sub>2</sub>O)<sub>2</sub>POCH=CH<sub>2</sub>

Properties: M.w. 233.04

Toxicology: LD50 (oral, rat) 990 mg/kg; mod. toxic by ing.; TSCA listed  
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of PO<sub>x</sub> and Cl<sup>-</sup>

- Uses:* Reactive flame retardant for plastics, textiles, wood, and paper applics.; fire-retarded vinyl latex comonomer  
*Manuf./Distrib.:* ABCR; Akzo Nobel
- Bis (5-chloro-2-hydroxyphenyl) methane.** See Dichlorophene
- Bis (2,4-di-t-butylphenyl) pentaerythritol diphosphite**  
CAS 26741-53-7; EINECS/ELINCS 247-952-5  
*Synonyms:* Bis (2,4-di-t-butylphenyl) pentaerythritol diphosphite; Cyclic neopentane tetrayl bis (2,4-di-t-butylphenyl) ester phosphorous acid; Phosphorous acid, cyclic neopentane tetrayl bis (2,4-di-t-butylphenyl) ester; 2,4,8,10-Tetraoxa-3,9-diphosphaspiro (5.5) undecane, 3,9-bis (2,4-bis (1,1-dimethylethyl) phenoxy)-  
*Empirical:* C<sub>33</sub>H<sub>50</sub>O<sub>6</sub>P<sub>2</sub>  
*Formula:* C<sub>33</sub>H<sub>50</sub>(O<sub>2</sub>POC<sub>6</sub>H<sub>3</sub>(C[CH<sub>3</sub>])<sub>2</sub>)<sub>2</sub>  
*Properties:* M.w. 604.77  
*Toxicology:* LD50 (oral, rat) 5580 mg/kg, (skin, rabbit) > 200 mg/kg; LC50 (inh., rat) > 2 g/m<sup>3</sup>; low toxicity by ing., inh., and skin contact; TSCA listed  
*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of PO,  
*Uses:* Antioxidant for polyolefins, polyamides, polyesters, PVC, PS, rubbers, food-grade polymers; impact modifier for PVC  
*Regulatory:* FDA 21CFR §178.2010  
*Manuf./Distrib.:* Aldrich; Ciba Spec. Chems./Addit.; GE Spec.  
*Trade Names:* Alkanox® P-24
- Bis (2,4-di-t-butylphenyl) pentaerythritol diphosphite.** See Bis (2,4-di-t-butylphenyl) pentaerythritol diphosphite
- Bis (2,6-diisopropylphenyl) carbodiimide**  
CAS 2162-74-5; EINECS/ELINCS 218-487-5  
*Empirical:* C<sub>25</sub>H<sub>34</sub>N<sub>2</sub>  
*Properties:* Wh. to lt. ysh. cryst.; sol. in acetone, insol. in water; m.w. 362.56; m.p. 48 C  
*Toxicology:* LD50 (oral, rat) 2395 mg/kg; nonirritant to skin or eyes; may cause sensitization, allergic skin reaction on repeated/prolonged exposure; TSCA listed  
*Precaution:* Incompat. with acids, alkalis, oxidizing agents; dust can form explosive mixts. with air  
*Hazardous Decomp. Prods.:* NO<sub>x</sub>, isocyanates  
*Storage:* Keep away from sources of ignition  
*Uses:* Stabilizer protecting polymers against hydrolysis in processing and long-term aging  
*Trade Names:* Stabilizer 7000
- 4,4'-Bis (dimethylamino)-benzhydridenimine hydrochloride.** See Basic yellow 2
- 4:4'-Bis (dimethylamino) benzophenone-imine hydrochloride.** See Basic yellow 2
- 2,6-Bis (dimethylaminomethyl) cyclohexanone**  
*Formula:* [(CH<sub>3</sub>)<sub>2</sub>NCH<sub>2</sub>]<sub>2</sub>C<sub>6</sub>H<sub>8</sub>O  
*Properties:* Dens. 0.95 (20 C)  
*Uses:* Preservative for aq. paint systems, casein, pigment disps., adhesives; slimicide in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.300
- N-[4-Bis [4-(dimethylamino) phenyl] methylene]-2,5-cyclohexadien-1-ylidene]-N-methylmethanaminium chloride.** See Basic violet 3

**BNS.** See β-Nitrostyrene

**Boletic acid.** See Fumaric acid

**Bolus alba.** See Kaolin

### Bone black

CAS 8021-99-6

**Synonyms:** Bone char; Bone charcoal; Pigment black 9

**Definition:** Black pigment produced from carbonization of bones; primarily tricalcium phosphate with about 10% carbon

**Precaution:** Flamm. as suspended dust; nonflamm. in bulk

**Uses:** Pigment in paints, varnishes; mfg. activated carbon; decolorizing agent and filter medium; sugar/solvent decolorizing agent; cementation agent; adsorptive medium in gas masks; clarifying shellac; water purification

**Manuf./Distrib.:** Allchem Ind.; Ebonex; Landers-Segal Color

**Trade Names:** Cosmic Black 8-S; Cosmic Black AP; Cosmic Black D-2; Ebonex SC-5

**Bone char.** See Bone black

**Bone charcoal.** See Bone black

**Bone glue.** See Animal glue

**Boracic acid.** See Boric acid

**Borates, tetra, sodium salt, anhydrous.** See Sodium borate

**Borates, tetra, sodium salts, pentahydrate.** See Sodium tetraborate pentahydrate

**Borax.** See Sodium borate decahydrate

**Borax decahydrate.** See Sodium borate decahydrate

**Borax, fused.** See Sodium borate

### Boric acid

CAS 10043-35-3; EINECS/ELINCS 233-139-2

**Synonyms:** Boracic acid; Boron trihydroxide; Orthoboric acid

**Classification:** Inorganic acid

**Empirical:** H<sub>3</sub>BO<sub>3</sub>

**Formula:** BH<sub>3</sub>O<sub>3</sub>

**Properties:** Wh. or colorless cryst. powd., gran.; odorless; almost tasteless or sl. acidic taste; sol. in water, alcohol, glycerol; insol. in ether, benzene; m.w. 61.83; dens. 1.435; m.p. 171 C; b.p. 300 C; loses 1.5 H<sub>2</sub>O @ 300 C; nonflamm.

**Toxicology:** LD50 (oral, rat) 2660 mg/kg, (subcut., rat) 1400 mg/kg, (IV, rat) 1330 mg/kg; LDLo (IP, mouse) 800 mg/kg; poison by inh., subcut. routes; mod. toxic by IP, IV routes; human poison by ing.; mod. toxic to humans by skin contact, subcut. routes; human skin irritant; human systemic effects; acute poisoning causes digestive upsets in man, CNS stimulation, depression, renal damage, circulatory collapse; dose of 5-20 g in adults may be fatal; experimental reproductive effects; mutagenic data; TSCA listed

**Precaution:** Hygroscopic

**Hazardous Decomp. Prods.:** Boric anhydride

**NFPA:** Health 0; Flammability 0; Reactivity 0

**Storage:** Store @ R.T.

**Uses:** Heat-resist. glass; porcelain enamels; boron chemicals; metallurgy; flame retardant (cellulosic insulation, mattress batting, cotton textiles, wood, paper); fungistat in citrus fruits, ointments, eyewash; nickel electroplating baths; insecticide; preservative (foods/pharmaceuticals, rubber latex); medicine (protective disinfectant); antiseptic; antimicrobial in cosmetics; oral care agent; photography; leather finishing; buffering agent (eye drops, chrome plating, aluminum anodizing); oxidation catalyst; welding/brazing fluxes; in food-pkg. adhesives; preservative in coatings for paper/paperboard in contact with dry food; antioxidant/stabilizer for food-grade polymers

**Use Level:** 0.01-1.0%

**Regulatory:** FDA 21CFR §175.105, 176.180, 178.2010, 181.22, 181.30; USA not restricted; Europe listed; permitted in Switzerland and Sweden as preservative in some processed seafood; FDA approved for ophthalmics, otics, topicals; USP/NF, BP, Ph.Eur. compliance

**Manuf./Distrib.:** AMRESCO; Advance Research Chems.; Aldrich; Allchem Ind.; Am. Int'l.; Ashland; BCH Brühl; Coyne; Dragoco; Fluka; Nippon Denko; Occidental; Research Organics; Ruger; Sal Chem.; San Yuan; Schaefer Tech.; Seeler Ind.; Sigma; Spectrum Quality Prods.; U.S. Borax; Varsal Instruments; Veckridge

**Trade Names Containing:** Unisize® HA-26; Unisize® HA-70

**Boric acid barium salt.** See Barium metaborate

**Boric acid disodium salt.** See Sodium borate decahydrate

**Boric acid, disodium salt, pentahydrate.** See Sodium tetraborate pentahydrate

### Boron carbide

CAS 12069-32-8; EINECS/ELINCS 235-111-5

**Synonyms:** Carbon tetraboride

**Empirical:** CB<sub>4</sub>

**Formula:** B<sub>4</sub>C

**Properties:** Hard blk. cryst.; insol. in water; m.w. 55.26; dens. 2.510; m.p. 2350 C; b.p. > 3500 C; hardness (Mohs) 9.3; resist. to chem. attack; dec. by molten alkalis at red heat; does not burn in oxygen flame

**Toxicology:** Harmful dust; avoid inhalation of dust or particles; TSCA listed

**Uses:** Raw material for paint mfg.; alloying agent; mfg. of chem.-resist. ceramics; grinding wheel abrasive; neutron absorber; reinforcing agent in composites for military aircraft; control rods in nuclear reactors; polishing papers; abrasion resister and refractory; abrasion-resist. nozzles and surfaces

**Manuf./Distrib.:** Advanced Refractory Tech.; Alfa Aesar; Atlantic Equip. Engrs.; Atomergic Chemetals; Electro Abrasives; Noah; Reade Advanced Materials

**Boron sodium oxide, pentahydrate.** See Sodium tetraborate pentahydrate

**Boron trihydroxide.** See Boric acid

### Borosilicate glass

**Definition:** A soda-lime glass contg. approx. 5% boric oxide; heat-resistant glass

**Toxicology:** Irritating to eyes, skin, and respiratory system

**Uses:** Heat-resist. glass used in sunlight lamps, etc.; may be suitable as storage-disposal medium for high-level radioactive wastes; extender/filler for plastics, etc.; improves flow and leveling, provides hiding and corrosion protection, reduces VOC's in paint and coating systems, incl. primers, alkyd interior enamels, PU acrylic topcoats, epoxy polyamide topcoats; extends wh. pigments

**Manuf./Distrib.:** Aldrich; Sigma

**Trade Names:** Q-Cel® 6019

**BP.** See Benzoyl peroxide

**$\beta$ -Bromo- $\beta$ -nitrotrimethylene glycol.** See 2-Bromo-2-nitropropane-1,3-diol

**Burnt sienna.** See Iron oxide red  
**Buta-1,3-diene.** See Polybutadiene  
**Butadiene/acrylonitrile copolymer**  
 CAS 9003-18-3  
*Synonyms:* NBR; Acrylonitrile rubber; Acrylonitrile/butadiene copolymer; Acrylonitrile/butadiene rubber; 1,3-Butadiene, polymer with 2-propenenitrile; Nitrile elastomer; Nitrile rubber; Nitrile/butadiene rubber; 2-Propenenitrile, polymer with 1,3-butadiene  
*Classification:* Polymer  
*Definition:* Synthetic rubber made by random polymerization of acrylonitrile and butadiene by free-radical catalysis  
*Empirical:* (C<sub>4</sub>H<sub>6</sub>N)<sub>x</sub>  
*Formula:* [CH<sub>2</sub>CH=CHCH<sub>2</sub>]<sub>x</sub>[CHCNCH<sub>2</sub>]<sub>y</sub>  
*Properties:* Dens. 0.980; tens. str. 1000-3000 psi; elong. 100-700%  
*Toxicology:* Suspected carcinogen  
*Precaution:* Combustible  
*Uses:* Elastomer for oil-well parts, fuel hoses, gaskets, hydraulic equip. (high ACN), general-purpose oil-resist. applics., shoe soles, kitchen mats, printing rolls (med. ACN), gaskets, grommets, o-rings (low ACN); binder; fuel binder in solid rocket propellants; in plasticizer masterbatches; as impact modifier for thermoplastics (PVC, ABS); film-former, visc. control agent in cosmetics; in coatings/adhesives/films for food, food-pkg. pressure-sensitive adhesives; for food-contact articles for repeated use  
*Regulatory:* FDA 21CFR §175.125, 175.300, 175.320, 177.1200, 177.1200, 177.2600, 181.32  
*Manuf./Distrib.:* Aldrich; Sigma  
*Trade Names:* Darex® 110L; Hycar® 1552; Hycar® 1561; Hycar® 1562; Hycar® 1571; Hycar® 1572; Hycar® 1572X64; Perbunan N Latex 2818; Perbunan N Latex 3310; Perbunan N Latex 3415 M; Perbunan N Latex T; Perbunan N Latex VT

 CAS 3068-00-6; EINECS/ELINCS 221-323-5  
*Classification:* Nonaromatic alcohols  
*Empirical:* C<sub>4</sub>H<sub>10</sub>O<sub>3</sub>  
*Formula:* HOCH<sub>2</sub>CH<sub>2</sub>OCH<sub>2</sub>CH<sub>2</sub>OH  
*Properties:* Almost colorless liq.; odorless; misc. in water and ethanol; m.w. 106.12; dens. 1.184; b.p. 190-191 C (18 mm); flash pt. 166 C; ref. index 1.473  
*Toxicology:* Irritating to eyes, skin, respiratory system; TSCA listed  
*Precaution:* Combustible  
*Storage:* Hygroscopic  
*Uses:* Intermediate for alkyd resins, explosives, paints; cellulose plasticizer; emulsifier for cosmetics, inks, finishes, paper, cork, textiles  
*Manuf./Distrib.:* Aldrich; BASF; Chemcentral; Fluka  
**Butanol.** See Butyl alcohol  
**1-Butanol.** See Butyl alcohol  
**Butan-1-ol.** See Butyl alcohol  
**2-Butanol**  
 CAS 78-92-2; EINECS/ELINCS 201-158-5; UN No. 1120 (DOT)  
*Synonyms:* SBA; s-Butanol; Butan-2-ol; 2-Butyl alcohol; s-Butyl alcohol; Butylene hydrate; Ethylmethyl carbinol; 2-Hydroxybutane; Methyl ethyl carbinol; 1-Methyl propanol; Secondary butyl alcohol  
*Classification:* Sec. aliphatic alcohol  
*Empirical:* C<sub>4</sub>H<sub>10</sub>O  
*Formula:* CH<sub>3</sub>CH<sub>2</sub>CH(OH)CH<sub>3</sub>  
*Properties:* Colorless liq.; sweet odor; sol. in water, ethanol, ether, acetone, benzene; m.w. 74.12; sp.gr. 0.807 (20/4 C); m.p. -89 C; b.p. 99-100 C; flash pt. 23 C; ref. index 1.3972 (20 C)  
*Toxicology:* ACGIH TLV/TWA 100 ppm; LD50 (oral, rat) 6480 mg/kg, (IP, rabbit) 277 mg/kg; poison by IV and IP routes; mildly toxic by ing.; skin and eye irritant; excessive inh. may cause nose/throat irritation, headache, nausea, fatigue, dizziness; unconsciousness, coma in extreme cases; if aspirated into lungs, may cause severe lung damage, respiratory and cardiac arrest, possibly death  
*Precaution:* Flamm.; incompat. with alkali metals (increases fire/explosion risk, forms flamm. hydrogen gas), acids, acid chlorides, acid anhydrides (vigorous reactions), chlorine, isocyanates, ethylene oxide  
*Hazardous Decomp. Prods.:* Unstable peroxides may form after prolonged storage  
 NFPA: Health 1; Flammability 3; Reactivity 0  
*Storage:* Store in cool, well-ventilated area out of direct sunlight  
*Uses:* Solvent for coatings, paint removers, adhesives, resins, lacquers, industrial cleaners; prep. of methyl ethyl ketone; petroleum octane booster; extraction of fish protein; ingred. in hydraulic brake fluids; perfumes; syn. flavoring agent in foods; in paper/paperboard in contact with dry food  
*Regulatory:* FDA 21CFR §172.515, 176.180  
*Manuf./Distrib.:* Ashland; Chemcentral; E-Chemicals; Exxon; Fluka; Houghton Chem.; Hukill; Quaker City; Shell; Spectrum Quality Prods.; Total Spec. Chems.; Van Waters & Rogers  
**Butan-2-ol.** See 2-Butanol

**2-Butanone.** See Methyl ethyl ketone

**3-Butanone.** See Methyl ethyl ketone

**Butene-1.** See 1-Butene

### 1-Butene

CAS 106-98-9; 25167-67-3; EINECS/ELINCS 203-449-2; UN No. 1012 (DOT)

**Synonyms:** But-1-ene; Butene-1; Butylene;  $\alpha$ -Butylene; C-4 alpha olefin; Ethylethylene

**Classification:** Liquefied petrol. gas

**Empirical:** C<sub>4</sub>H<sub>8</sub>

**Formula:** CH<sub>2</sub>:CHCH<sub>2</sub>CH<sub>3</sub>

**Properties:** Colorless liquefied gas; sol. in most org. solvs.; insol. in water; m.w. 56.11; dens. 0.5951 (20/4 C); vapor pressure 50 psig (100 F); f.p. -185 C; b.p. -6.3 C; flash pt. -79 C

**Toxicology:** Asphyxiant gas; handling hazards incl. fire, suffocation, and frostbite; TSCA listed

**Environmental:** Marine pollutant

**Precaution:** Highly flamm. gas; flamm. limits in air 1.6-9.3% by vol.; dangerous fire and explosion risk

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Chemical intermediate; polybutenes, butadiene, polyethylene and other polymers; C4 and C5 aldehydes, alcohols, maleic anhydride, plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricant; polymer and alkylate gasoline; intermediate for biodeg. surfactants, household detergents, hard surface and industrial hand cleaners, shampoos, bubble baths

**Manuf./Distrib.:** Air Prods.; Albemarle; Aldrich; BP Amoco; Chemconnect; ChevronPhillips; Coyne; Exxon; Fluka; MG Ind.; Shell; Texas Petrochem.

**Trade Names:** Gulfene® 4

**But-1-ene.** See 1-Butene

**But-1-ene compd. with but-2-ene.** See Hydrogenated polybutene

**2-Butenedioic acid.** See Fumaric acid

**(E)-Butenedioic acid.** See Fumaric acid

**trans-Butenedioic acid.** See Fumaric acid

**2-Butenedioic acid, (Z)-, dioctyl ester.** See Dioctyl maleate

**cis-Butenedioic anhydride.** See Maleic anhydride

**Butene-1,4-diol bis (bromoacetate).** See 1,4-Bis (bromoacetoxy)-2-butene

**2-Butene-1,4-diol bis (bromoacetate).** See 1,4-Bis (bromoacetoxy)-2-butene

**Butene, homopolymer.** See Polybutene

**1-Butene, homopolymer.** See Polybutene

**Butene polymer.** See Polybutene

**Butene, polymers.** See Polybutene

**2-Butenoic acid, ethyl ester.** See Ethyl crotonate

**trans-2-Butenoic acid ethyl ester.** See Ethyl crotonate

**2-Butenoic acid, polymer with ethenyl acetate.** See VA/crotonates copolymer; Vinyl acetate/crotonic acid copolymer

**Butoxydiethylene glycol.** See Butoxydiglycol

### Butoxydiglycol

CAS 112-34-5; EINECS/ELINCS 203-961-6

**Synonyms:** DEGBE; Butoxydiethylene glycol; 2-(2-Butoxyethoxy) ethanol; Butyl 'Carbitol'; o-Butyl diethylene glycol; Butyldiglycol; Diethylene glycol butyl ether; Diethylene glycol n-butyl ether; Diethylene glycol monobutyl ether; Diglycol butyl ether; Diglycol monobutyl ether; PEG-2 butyl ether

**Classification:** Aliphatic ether alcohol; aliphatic glycol ether

**Empirical:** C<sub>8</sub>H<sub>18</sub>O<sub>3</sub>

**Formula:** C<sub>8</sub>H<sub>18</sub>OCH<sub>2</sub>CH<sub>2</sub>OCH<sub>2</sub>CH<sub>2</sub>OH

**Properties:** Colorless liq.; faint butyl odor; very sol. in ether, alcohol, acetone; sol. in oils and water; misc. with most org. solvs.; m.w. 162.26; sp.gr. 0.9553 (20/4 C); vapor pressure 0.02 mm Hg (20 C); m.p. -68.1 C; b.p. 230.6 C; flash pt. (CC) 78 C; ref. index 1.4316 (20 C)

**Toxicology:** LD50 (oral, rat) 6.56 g/kg, (skin, rabbit) 4120 mg/kg; mod. toxic by ing., IP routes; mildly toxic by skin contact; severe eye irritant; TSCA listed

**Precaution:** Flamm. exposed to heat or flame; incompat. with strong oxidizers (increases risk of fire and explosion)

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO, CO<sub>2</sub>; heated to

decomp., emits acrid smoke and irritating fumes

NFPA: Health 1; Flammability 2; Reactivity 0

**Storage:** Store in cool, dry area away from heat and ignition sources

**Uses:** Coupling solvent for liq. cleaners, cutting fluids, textile auxs., nitrocellulose, coatings, oils, dyes, gums, soaps, polymers, stamp pad inks, high-based enamels, household cleaners; plasticizer intermediate; diluent for hydraulic brake fluids; coalescing agent for latex paints; dispersant for vinyl chloride resins in organosols; wetting-out sol'n. in textile industry; solvent in cosmetics; in food-pkg. adhesives; in paper/paperboard in contact with dry foods; surf. lubricant in mfg. of food-contact metallic articles

**Regulatory:** FDA 21CFR §175.105, 176.180, 178.3910

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Ashland; BCH Brühl; Brown; Eastman; Fluka; Lyondell; Occidental; Ruger; Sal Chem.; Shell; Union Carbide

**Trade Names Containing:** Monawet MO-70

### Butoxyethanol

CAS 111-76-2; EINECS/ELINCS 203-905-0; UN No. 2369 (DOT)

**Synonyms:** N-Butoxyethanol; 2-n-Butoxyethanol; 2-Butoxyethanol; 2-Butoxy-1-ethanol; o-Butyl ethylene glycol; Butyl glycol; n-Butyl glycol; Ethylene glycol butyl ether; Ethylene glycol n-butyl ether; Ethylene glycol monobutyl ether; Ethylene glycol mono-n-butyl ether; Glycol butyl ether; Glycol monobutyl ether; Monobutyl glycol ether; 3-Oxa-1-heptanol

**Classification:** Ether alcohol

**Empirical:** C<sub>6</sub>H<sub>14</sub>O<sub>2</sub>

**Formula:** HOCH<sub>2</sub>CH<sub>2</sub>OC<sub>4</sub>H<sub>9</sub>

**Properties:** Colorless clear mobile liq.; mild pleasant odor; sol. in water, alcohol, ether; misc. wit most org. solvs.; m.w. 118.20; sp.gr. 0.9019 (20/20 C); vapor pressure 300 mm Hg (140 C); m.p. -74.8 C; b.p. 171.2 C; flash pt. 62 C

**Toxicology:** ACGIH TLV/TWA 25 ppm (skin); LD50 (oral, rat) 1480 mg/kg, (IP, rat) 220 mg/kg, (skin, rabbit) 490 mg/kg; poison by ing., skin contact, IP, IV routes; mod. toxic by inh., subcut.; human systemic effects; skin/eye irritant; TSCA listed

**Precaution:** DOT: Poisonous material; flamm. exposed to heat or flame; incompat. with oxidizers, strong caustics; attacks some types of rubber, plastics, and coatings

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 2; Flammability 2; Reactivity 0

**Storage:** Store in tightly closed, grounded containers in cool, ventilated area, away from work areas; use in minimal quantities

**Uses:** Solvent for nitrocellulose, natural/syn. resins, sol. oils, lacquers, varnishes, adhesives, enamels, insecticides, herbicides, dry-cleaning compds., textiles, organosol prod., cosmetics; cosolvent; flume wash water additive for food processing; coupling agent in cleaners; in textile dyeing/printing; leather treatment; prod. of plasticizers; stabilizer in metal and household cleaners, hydraulic fluids, insecticides, herbicides, rust removers; hydraulic brake fluids; gas chromatography; wetting agent; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; solvent in food-contact polysulfide polymer/polyeoxy resins

**Use Level:** Limitation 1 ppm (in wash water)

**Regulatory:** FDA 21CFR §173.315, 175.105, 176.210, 177.1650, 178.1010, 178.3297, 178.3570

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Ashland; Brown; Eastman; Fluka; Lyondell; Occidental; Ruger; Sal Chem.; Shell; Sigma; Spectrum Quality Prods.; Union Carbide

**Trade Names Containing:** Dehydran® 1293; Surfynol® 104BC

**2-Butoxyethanol.** See Butoxyethanol

**2-Butoxy-1-ethanol.** See Butoxyethanol

**2-n-Butoxyethanol.** See Butoxyethanol

**n-Butoxyethanol.** See Butoxyethanol

**2-Butoxyethanol phosphate.** See Tributoxyethyl phosphate

**2-(2-Butoxyethoxy) ethanol.** See Butoxydiglycol

**Button lac.** See Shellac

**2-Butyl acetate.** See s-Butyl acetate

### s-Butyl acetate

CAS 105-46-4; EINECS/ELINCS 203-300-1; UN No. 1123 (DOT)

**Synonyms:** Acetic acid 2-butoxy ester; Acetic acid, s-butyl ester; Acetic acid 2-butyl ester; Acetic acid 1-methylpropyl ester; 2-Butanol acetate; 2-Butyl acetate; s-Butyl alcohol acetate; 1-Methylpropyl acetate

**Classification:** Carboxylic acid ester

**Definition:** Ester of butyl alcohol and acetic acid

**Empirical:** C<sub>8</sub>H<sub>12</sub>O<sub>2</sub>

**Formula:** CH<sub>3</sub>COOCH(CH<sub>2</sub>)(C<sub>2</sub>H<sub>5</sub>)

**Properties:** Colorless liq.; mild fruity odor; sol. in oxygenated solvs., alcohol, ether, acetone; insol. in water; m.w. 116.16; sp.gr. 0.870 (20/4 C); m.p. -146 C; b.p. 112.2 C; flash pt. (OC) 31 C; ref. index 1.389 (20 C)

**Toxicology:** ACGIH TLV/TWA 200 ppm; STEL 150 ppm; mild skin and eye irritant; allergen; inh. of vapors can probably irritate nose and throat; ing. may irritate mouth and throat; high concs. may cause CNS depression, headache, dizziness, nausea, unconsciousness; TSCA listed

**Precaution:** Flamm.; incompat. with strong oxidizers (increases fire/explosion risk), strong acids, strong bases (decomp. can occur)

**Hazardous Decomp. Prods.:** S-Butyl alcohol, acetic acid; heated to decomp., emits acid and irritating fumes

**NFPA:** Health 1; Flammability 3; Reactivity 0

**Storage:** Store in a cool, dry, well-ventilated area, out of direct sunlight; avoid generating mist

**Uses:** Solvent for nitrocellulose lacquers, varnishes, thinners, nail enamels, leather finishes, adhesives; textile sizes; paper coatings

**Manuf./Distrib.:** Aldrich; E-Chemicals; Hukill; Schweizerhall; Van Waters & Rogers

### Butyl acid phosphate

CAS 12788-93-1; UN No. 1718 (DOT)

**Synonyms:** Acid butyl phosphate; n-Butyl acid phosphate; Butyl phosphoric acid; n-Butylphosphoric acid; Phosphoric acid, butyl ester

**Empirical:** C<sub>4</sub>H<sub>11</sub>O<sub>4</sub>P

**Properties:** Water-wh. liq.; sol. in alcohol, acetone, toluene; insol. in water, petrol. naphtha; m.w. 154.10; dens. 1.120-1.125 (25/40 C); flash pt. (COC) 110 C; ref. index 1.429

**Toxicology:** Toxic and corrosive; strong irritant to skin and tissue; TSCA listed

**Precaution:** DOT: Corrosive material; combustible when exposed to heat or flame

**Hazardous Decomp. Prods.:** Heated to decomp., emits highly toxic fumes of PO<sub>4</sub>

**Uses:** High reactivity catalyst used in coatings and inks; for appliance, automotive, floor, furniture, paper, and other finishes; polymerizing agent; curing catalyst/accelerator in resins and coatings, special detergents; also for antistatic agents, corrosion inhibitors, solder fluxes, lubricants, and tanning chems.; ingred. in industrial cleaning agents

**Manuf./Distrib.:** Akzo Nobel; Alfa Aesar; Occidental

**Trade Names:** Albrite® N-Butyl Acid Phosphate

**n-Butyl acid phosphate.** See Butyl acid phosphate

### Butyl acrylate

CAS 141-32-2; EINECS/ELINCS 205-480-7; UN No. 2348 (DOT)

**Synonyms:** BA; Acrylic acid, butyl ester; Acrylic acid, n-butyl ester; n-Butyl acrylate; Butyl-2-propenoate; 2-Propenoic acid, n-butyl ester

**Empirical:** C<sub>7</sub>H<sub>12</sub>O<sub>2</sub>

**Formula:** CH<sub>2</sub>:CHCOOC<sub>4</sub>H<sub>9</sub>

**Properties:** Water-wh. liq.; fruity odor; freely misc. with most org. solvs.; insol. in water; m.w. 128.19; dens. 0.89 (25/25 C); vapor pressure 4.3 mbar (20 C); f.p. -64.6 C; b.p. 69 C (50 mm); flash pt. (OC) 120 F; ref. index 1.415 (20 C)

**Toxicology:** ACGIH TLV/TWA 10 ppm; LD50 (oral, rat) 900 mg/kg, (IP, rat) 550 mg/kg, (skin, rabbit) 2000 mg/kg; LC50 (inh., rat, 4 h) 2730 ppm; mod. toxic by ing., inh., skin contact, IP routes; skin and eye irritant; TSCA listed

**Precaution:** Flamm. liq. exposed to heat or flame; incompat. with oxidizers; extremely reactive monomer

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid and irritating fumes

**Storage:** Store in inhibited condition under air (not under inert gases)

**Uses:** Intermediate in organic synthesis; monomer in mfg. of homopolymers and copolymers; polymers and copolymers for solvent coatings, adhesives, paints, binders, emulsifiers; modifier for oils/alkyds in food-contact coatings; acrylic toughener; acrylic resin comonomer

**Regulatory:** FDA 21CFR §175.300

**Manuf./Distrib.:** Aldrich; Alfa Aesar; Allchem Ind.; Ashland; BASF; Bencorp Int'l.; Bröste; Celanese; Filo; Fluka; G.J. Chem.; Monomer-Polymer & Dajac Labs; Total Spec. Chems.; Union Carbide; United Min. & Chem.;

Varsal Instruments; Whyte Chems. Ltd

**Trade Names:** Norsocryl® BA; Rohamere® FF-20

**Trade Names Containing:** Rohamere® 587; Rohamere® 626; Rohamere® 1410; Rohamere® 1900-D; Rohamere® 8437; Rohamere® FF-6; Rohamere® FF+40

**n-Butyl acrylate.** See Butyl acrylate

### Butyl acrylate/acrylonitrile/styrene copolymer

**Synonyms:** N-Butyl acrylate/acrylonitrile/styrene copolymer

**Uses:** Binder for paper/paperboard coatings

**Trade Names:** Acronal® S 504

**n-Butyl acrylate/acrylonitrile/styrene copolymer.** See Butyl acrylate/acrylonitrile/styrene copolymer

### Butyl alcohol

CAS 71-36-3; EINECS/ELINCS 200-751-6; UN No. 1120 (DOT); FEMA 2178

**Synonyms:** Butanol; 1-Butanol; n-Butanol; Butan-1-ol; n-Butyl alcohol; Butyl hydroxide; Butyric alcohol; 1-Hydroxybutane; Methylolpropane; Propyl carbinol; Propylmethanol

**Classification:** Primary aliphatic alcohol

**Empirical:** C<sub>4</sub>H<sub>10</sub>O

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>3</sub>CH<sub>2</sub>OH

**Properties:** Colorless clear mobile liq., char. penetrating vinous odor; sol. in water; misc. with alcohol, ether, many org. solvs.; m.w. 74.14; sp.gr. 0.8109 (20/20 C); vapor pressure 5.5 mm Hg (20 C); m.p. -90 C; b.p. 117.7 C; flash pt. 35 C; ref. index 1.3993 (20 C)

**Toxicology:** ACGIH TLV/CL 50 ppm (skin); LD50 (oral, rat) 790 mg/kg, (IV, mouse) 377 mg/kg, (skin, rabbit) 3400 mg/kg; poison by IV route; mod. toxic by skin contact, ing., subcut., IP routes; skin and severe eye irritant; CNS depressant; TSCA listed

**Precaution:** Flamm.; dangerous fire hazard exposed to heat, flame, oxidizers; mod. explosive exposed to flame; incompat. with oxidizing materials, aluminum, chromium trioxides; increased fire and explosion hazard; reacts at elevated temps. with Al

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**NFPA:** Health 1; Flammability 3; Reactivity 0

**Storage:** Store in cool, well-ventilated area, out of direct sunlight

**Uses:** Prep. of esters; solvent for fats, waxes, resins, gums, shellac, varnish, plasticizers, paints, inks; extraction solvent for mineral processing; mfg. of rayon, detergents, other butyl compds.; hydraulic fluids; dehydration agents; denaturant; syn. flavoring agent for foods and pharmaceuticals; color diluent for confectionery; solvent in pharmaceutical orals; in food-pkg. adhesives; adjuvant in resinous/polymeric food-contact coatings; defoamer in food-contact paper coatings; fragrance; surfactant intermediate; solvent in food-contact polysulfide polymer/polyepoxy resins

**Use Level:** 12 ppm (nonalcoholic beverages), 1 ppm (alcoholic beverages), 7 ppm (ice cream, ices), 34 ppm (candy), 32 ppm (baked goods), 4 ppm (cream)

**Regulatory:** FDA 21CFR §73.1, 172.515, 172.560, 175.105, 175.320, 176.180, 176.200, 177.1200, 177.1440, 177.1650; 27CFR §21.99; FEMA GRAS; FDA approved for orals; USP/NF, BP compliance

**Manuf./Distrib.:** Aldrich; Alfbro; Allchem Ind.; Amyl; Ashland; BASF; BP Chems. Ltd; Baychem; Celanese; Chemcentral; Chisso Am.; Condea Vista; Coyne; Eastman; Fisher Scientific; Fluka; GNC Group; Grau Aromatics; Harcross; Houghton Chem.; Hukill; J.T. Baker; Jilin Chem. Ind.; Penta Mfg.; Punda Mercantile; R.E. Carroll; Romil Ltd; Ruger; Sal Chem.; Shell; Sigma; Spectrum Quality Prods.; Sunnyside; Union Carbide; Van Waters & Rogers

**Trade Names Containing:** Albrite® PA-75; Ancamide® 700-B-75; Beetle® 216-8; Beetle® 227-8; Beetle® 1050; Cymel® 245-8; Cymel® 247-10; Cymel® 248-8; Cymel® 1158; GPRI™ 4000; GPRI™ 7550; GPRI™ 7590; GPRI™ 7597; Resimene® 717; Resimene® BM-5901; Resimene® CE-6517; Resimene® U-901; Resimene® U-918; Resimene® U-920; Surfynol® SM-745

**2-Butyl alcohol.** See 2-Butanol

**n-Butyl alcohol.** See Butyl alcohol

**s-Butyl alcohol.** See 2-Butanol

**t-Butyl alcohol**

CAS 75-65-0; EINECS/ELINCS 200-889-7; UN No. 1120 (DOT)

*Synonyms:* TBA; t-Butanol; t-Butyl hydroxide; 1,1-Dimethylethanol; 2-Methyl-2-propanol; 2-Methylpropan-2-ol; 2-Propanol, 2-methyl-; Trimethyl carbinol*Classification:* Tertiary aliphatic alcohol*Empirical:* C<sub>4</sub>H<sub>10</sub>O*Formula:* (CH<sub>3</sub>)<sub>3</sub>COH*Properties:* Colorless liq. or rhombic prisms; unpleasant camphor-like odor; sol. in ethanol, ether, water; m.w. 74.12; sp.gr. 0.786 (20 C); vapor pressure 40 mm Hg (24.5 C); m.p. 25-26 C; b.p. 83 C; flash pt. (CC) 11 C; ref. index 1.3870 (20 C)*Toxicology:* ACGIH TLV/TWA 100 ppm; STEL 150 ppm; LD50 (oral, rat) 3500 mg/kg; toxic; irritant to mucous membranes; inh. of 25 ppm causes pulmonary problems in man; CNS depressant; inh. of high concs. can cause headache, drowsiness, unconsciousness; ing. can cause headache, dizziness, drowsiness; may cause severe lung damage, respiratory/cardiac arrest, and death if aspirated into lungs; skin contact can cause contact dermatitis, possible allergic reactions; eye irritant; mutagenic data; TSCA listed*Precaution:* Flamm.; dangerous fire hazard exposed to heat, flame; mod. explosive as vapor; incompat. with strong oxidizers, potassium-sodium alloy, hydrogen peroxide and sulfuric acid (fire/explosion risk), strong min. acids (can dec. to flamm. isobutylene gas)

NFPA: Health 1; Flammability 3; Reactivity 0

*Storage:* Store in cool, dry, well-ventilated area, out of direct sunlight*Uses:* Solvent, coupling agent, processing aid for pharmaceuticals, personal care prods., aq. coatings and adhesives, agric. formulations, polymer processing, cleaners/disinfectants; alcohol denaturant; dehydration agent; fragrance/flavoring ingred.; perfumery; chem. intermediate; paint removers; prep. of methyl methacrylate; octane improver in unleaded gasoline; denaturant, solvent, and processing aid for pharmaceuticals; defoamer in food-contact paper coatings; surf. lubricant in mfg. of food-contact metallic articles*Regulatory:* FDA 21CFR §176.200, 178.3910, 27CFR §21.100*Manuf./Distrib.:* AC Ind.; Aldrich; Alfa Aesar; Allchem Ind.; Artek; Ashland; Bencorp Int'l.; Columbia Sales Int'l.; Creanova; E-Chemicals; Filo; Fluka; J.H. Calo; Lyondell; Mitsui & Co. USA; Pechiney World Trade USA; Quaker City; Romil Ltd; Sigma; Spectrum Quality Prods.; Van Waters & Rogers**s-Butyl alcohol acetate.** See s-Butyl acetate**n-Butylaldehyde.** See n-Butyraldehyde**Butylated hydroxyanisole.** See BHA**Butylated polyoxytoluene.** See BHT**Butylated polyoxymethylene urea.** See Urea/formaldehyde resin, butylated**Butylated triphenyl phosphate.** See t-Butylphenyl diphenyl phosphate**Butyl benzyl phthalate**

CAS 85-68-7; EINECS/ELINCS 201-622-7

*Synonyms:* BBP; 1,2-Benzenedicarboxylic acid, butyl phenylmethyl ester; Benzyl butyl phthalate; Benzyl n-butyl phthalate; n-Butyl benzyl phthalate*Classification:* Aromatic ester*Empirical:* C<sub>19</sub>H<sub>20</sub>O<sub>4</sub>*Formula:* C<sub>4</sub>H<sub>9</sub>OOCC<sub>6</sub>H<sub>4</sub>COOC<sub>2</sub>H<sub>5</sub>*Properties:* Clear oily liq., sl. odor; insol. in water; m.w. 312.39; dens. 1.116 (25/25 C); m.p. < -35 C; b.p. 370 C; flash pt. 390 F; ref. index 1.535-1.540*Toxicology:* LD50 (oral, rat) 20,400 mg/kg, (IP, mouse) 3160 mg/kg; moderate toxicity by ingestion, IP routes; experimental carcinogen and reproductive effects; TSCA listed*Precaution:* Combustible exposed to heat or flame; can react with oxidizers  
*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes*Uses:* High-solvating plasticizer for polyvinyl and cellulosic resins incl. NC lacquers and films, PVC flooring/plastisols, PVAc adhesives/sealants/caulks, acrylic coatings, chlorinated rubber, cellulose propionate, polyamide, castable PU; organic intermediate; film-former in cosmetics; plasticizer in food-contact polymers; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods; solvent for adjuvants in food-contact crosslinked polyesters*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.2420, 178.3740; SARA reportable*Manuf./Distrib.:* Aldrich; Allchem Ind.; Ashland; Bayer; Bencorp Int'l.; Solutia; Westtec Ind.**n-Butyl benzyl phthalate.** See Butyl benzyl phthalate**s-Butylbiphenyl***Uses:* Carbonless papers*Trade Names:* Sure Sol®-290*Trade Names Containing:* Sure Sol®-333**n-Butyl carbinol.** See n-Amyl alcohol**Butyl 'Carbitol'.** See Butoxydiglycol**Butyl carbobutoxymethyl phthalate.** See n-Butyl phthalyl-n-butyl glycolate**2-Butyl-1-decanol**

*Manuf./Distrib.:* Jarchem Ind.*Trade Names Containing:* Jarcol™ I-14T**o-Butyl diethylene glycol.** See Butoxydiglycol**Butyldiglycol.** See Butoxydiglycol**Butylene.** See 1-Butene**α-Butylene.** See 1-Butene**Butylene glycol montanate**

CAS 73138-44-0

*Synonyms:* Fatty acids, montan wax, 1-methyl-1,3-propanediyl esters; Montan acid, butylene glycol ester; Montan wax acid, 1,3-butanediol diester*Definition:* Ester of butylene glycol and montan acid wax*Uses:* Emollient in cosmetics*Trade Names Containing:* Hoechst Wax OP**Butylene hydrate.** See 2-Butanol**Butylene oxide.** See Tetrahydrofuran**Butyl ethylene.** See 1-Hexene**o-Butyl ethylene glycol.** See Butoxyethanol**Butyl glycol.** See Butoxyethanol**n-Butyl glycol.** See Butoxyethanol**t-Butyl hydroperoxide**

CAS 75-91-2; EINECS/ELINCS 200-915-7; UN No. 2093 (DOT), 2094 (DOT)

*Synonyms:* TBHP; 1,1-Dimethylethylhydroperoxide; 2-Hydroperoxy-2-methylpropane*Classification:* Organic peroxide*Empirical:* C<sub>4</sub>H<sub>10</sub>O<sub>2</sub>*Formula:* (CH<sub>3</sub>)<sub>2</sub>COOH*Properties:* Water-wh. liq.; very sol. in esters and alcohols; sol. in org. solvs.; sl. sol. in water; m.w. 90.12; dens. 0.896 (20/4 C); m.p. -8 C; b.p. 35 C; flash pt. 62 C; ref. index 1.4007*Toxicology:* LD50 (oral, rat) 560 mg/kg, (dermal, rat) 790 mg/kg; LC50 (inh., rat, 4 h) 500 ppm; poison by ing. and inh.; severe skin and eye irritant; may cause severe depression, cyanosis, death at highest dosage levels; mutagenic data; TSCA listed*Precaution:* Flamm. oxidizing liq.; very dangerous fire hazard when exposed to heat or flame or by spontaneous chem. reaction; mod. explosive*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes*Uses:* Initiator, catalyst in polymerization reactions, esp. latex; oxidative membrane in RBC suspensions; introduces peroxy group into organic molecules; raw material for paints; sulfonation catalyst; deodorizing; oxidizing reagent; source of act. oxygen for pulp and paper bleaching, metal sulfide oxidations; flocculant for borine-contg. sol'ns. in ore, coal, slurry processing; recycling and waste treatment; in food-pkg. adhesives; polymerization catalyst in mfg. of paper/paperboard in contact with aq./fatty foods*Regulatory:* FDA 21CFR §175.105, 176.170*Manuf./Distrib.:* Akzo Nobel; Aldrich; Allchem Ind.; Atofina; Aztec Peroxides; Crompton/Witco; Fluka; Lyondell; SAF Bulk Chems.; Sigma*Trade Names:* T-Hydro® Sol'n.**Butyl hydroxide.** See Butyl alcohol**t-Butyl hydroxide.** See t-Butyl alcohol**Butylhydroxyanisole.** See BHA**2(3)-t-Butyl-4-hydroxyanisole.** See BHA**t-Butylhydroxyanisole.** See BHA

**t-Butyl-4-hydroxyanisole.** See BHA

**4,4'-Butylidenebis (6-t-butyl-m-cresol)**

CAS 85-60-9

**Synonyms:** 1,1-Bis (2-methyl-4-hydroxy-5-t-butylphenyl) butane; 4,4'-Butylidenebis (6-t-butyl-3-methylphenol); 4,4'-Butylidenebis (3-methyl-6-t-butylphenol)

**Empirical:** C<sub>26</sub>H<sub>38</sub>O<sub>2</sub>

**Formula:** [(CH<sub>3</sub>)<sub>2</sub>CC<sub>6</sub>H<sub>3</sub>(OH)(CH<sub>2</sub>)<sub>2</sub>CHC<sub>3</sub>H<sub>7</sub>]

**Properties:** Wh. powd.; m.w. 382.64; dens. 1.03; m.p. 209 C (min.)

**Toxicology:** LDLo (oral, rat) 17 g/kg; mildly toxic by ing.; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Antioxidant for rubber and latexes, NR, synthetics, cellulose, EVA, polyamide, polyesters, polyolefins, PVC, PU, PS; polymer stabilizer; in food-pkg. adhesives; can end cement for food contact; finish component for poly (phenyleneterephthalamide) food-pkg. resins; antioxidant in food-contact rubber articles for repeated use; antioxidant/stabilizer for food-grade polymers

**Regulatory:** FDA 21CFR §175.105, 175.300, 177.1632, 177.2600, 178.2010

**Manuf./Distrib.:** Aldrich; Flexsys Am.; Monsanto; PMC Spec.; R.T. Vanderbilt; Salor

**Trade Names:** Santowhite® BBMC

**4,4'-Butylidenebis (6-t-butyl-3-methylphenol).** See 4,4'-Butylidenebis (6-t-butyl-m-cresol)

**4,4'-Butylidenebis (3-methyl-6-t-butylphenol).** See 4,4'-Butylidenebis (6-t-butyl-m-cresol)

**Butyl-3-iodo-2-propynylcarbamate.** See Iodopropynyl butylcarbamate

**Butyl methacrylate**

CAS 97-88-1; EINECS/ELINCS 202-615-1; UN No. 2227 (DOT)

**Synonyms:** N-Butyl methacrylate; Butyl-2-methacrylate; Butyl 2-methyl-2-propenoate; Methacrylic acid butyl ester; 2-Methyl butylacrylate

**Definition:** Ester of n-butyl alcohol and methacrylic acid

**Empirical:** C<sub>8</sub>H<sub>14</sub>O<sub>2</sub>

**Formula:** CH<sub>2</sub>:C(CH<sub>3</sub>)COO(CH<sub>2</sub>)<sub>3</sub>CH<sub>3</sub>

**Properties:** Colorless liq., ester odor; insol. in water; m.w. 142.22; dens. 0.895 (20/4 C); vapor pressure 4.9 mm (20 C); b.p. 163 C; flash pt. (TOC) 126 F

**Toxicology:** LD50 (oral, rat) 22,600 mg/kg, (IP, rat) 2304 mg/kg, (skin, rabbit) 11,300 mg/kg; mod. toxic by IP route; mildly toxic by ing., inh., skin contact; skin irritant; experimental teratogen, reproductive effector; TSCA listed

**Precaution:** Combustible; mod. fire risk; violent polymerizations can be caused by heat, moisture, oxidizers; explosive as vapor exposed to heat or flame

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Monomer for acrylic resins, solvent coatings, adhesives, lube oil additives; emulsions for textiles, leather, paper finishing; modifier for fibers; coating agent for paper; dispersant; modifier for oils/alkyds in food-contact coatings; visc. control agent in cosmetics

**Regulatory:** FDA 21CFR §175.300, 177.2420

**Manuf./Distrib.:** Aldrich; Ashland; Degussa-Hüls; Fluka; Monomer-Polymer & Dajac Labs; ProSciTech; Rohm & Haas; Rohm Tech; Rohm Am.; San Esters; Sigma; Whyte Chems. Ltd

**Trade Names:** Blemmer BMA; Mhoromer® AM 103H

**Trade Names Containing:** Elvacite® 2044, 2045, 2046

**Butyl-2-methacrylate.** See Butyl methacrylate

**N-Butyl methacrylate.** See Butyl methacrylate

**t-Butyl-4-methoxyphenol.** See BHA

**Butyl 2-methyl-2-propenoate.** See Butyl methacrylate

**Butyl myristate**

CAS 110-36-1; EINECS/ELINCS 203-759-8

**Synonyms:** N-Butyl myristate; Butyl tetradecanoate; Butyl n-tetradecanoate; Tetradecanoic acid, butyl ester

**Definition:** Ester of butyl alcohol and myristic acid

**Empirical:** C<sub>18</sub>H<sub>36</sub>O<sub>2</sub>

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>12</sub>COOC<sub>4</sub>H<sub>9</sub>

**Properties:** Water-wh. oily liq.; sol. in acetone, castor oil, chloroform, methanol, min. oil, toluene; insol. in water; dens. 0.850-0.858; f.p. 1-7 C; b.p.

167-197 C (5 mm); sapon. no. 193-203

**Toxicology:** LD50 (oral, rat) > 8 g/kg; low toxicity by ing.; irritating to skin; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**Uses:** Emollient, solubilizer, lubricant for cosmetics; chemical intermediate; chemical synthesis; plasticizer, lubricant in min., cutting, lamination, textile oils, and rust inhibitors; textile and leather applic.; paper stencils; defoamer in food-contact paper/paperboard; in food-contact textiles

**Regulatory:** FDA 21CFR §176.210, 177.2800

**Manuf./Distrib.:** Alzo; Penta Mfg.; Phoenix; Thornley; Uniqema N. Am.

**n-Butyl myristate.** See Butyl myristate

**Butyl octadecanoate.** See Butyl stearate

**n-Butyl octadecanoate.** See Butyl stearate

**Butyl 9-octadecenoate.** See Butyl oleate

**2-Butyl octanoic acid**

CAS 27610-92-0

**Uses:** Emollient for cosmetics and pharmaceuticals; in detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles

**Manuf./Distrib.:** Jarchem Ind.

**Trade Names:** Jaric I-12

**Butyloctanol**

CAS 3913-02-8; EINECS/ELINCS 223-470-0

**Synonyms:** 2-Butyloctanol; 2-Butyl-1-octanol; 2-Butyloctan-1-ol; 2-Butyloctyl alcohol

**Classification:** Nonaromatic alcohol

**Empirical:** C<sub>12</sub>H<sub>26</sub>O

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>5</sub>CHCH<sub>2</sub>OHCH<sub>2</sub>(CH<sub>2</sub>)<sub>2</sub>CH<sub>3</sub>

**Properties:** Liq.; m.w. 186.38; dens. 0.8355 (20/20 C); m.p. -80 C; b.p. 253.3 C; flash pt. (COC) 120 C

**Toxicology:** LD50 (oral, rat) 13 g/kg; mildly toxic by ing.; skin and eye irritant; TSCA listed

**Precaution:** Combustible exposed to heat or flame; incompat. with oxidizing materials

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid and irritating fumes

**Uses:** Humectant for cosmetics; solubilizer for cosmetics, pharmaceuticals

**Manuf./Distrib.:** Aldrich; Jarchem Ind.

**Trade Names:** Jarcol™ I-12

**2-Butyloctanol.** See Butyloctanol

**2-Butyl-1-octanol.** See Butyloctanol

**2-Butyloctan-1-ol.** See Butyloctanol

**2-Butyloctyl alcohol.** See Butyloctanol

**Butyl oleate**

CAS 142-77-8; EINECS/ELINCS 205-559-6

**Synonyms:** Butyl 9-octadecenoate; n-Butyl oleate; 9-Octadecenoic acid, butyl ester

**Definition:** Ester of butyl alcohol and oleic acid

**Empirical:** C<sub>22</sub>H<sub>42</sub>O<sub>2</sub>

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>7</sub>CH:CH(CH<sub>2</sub>)<sub>7</sub>COOC<sub>4</sub>H<sub>9</sub>

**Properties:** Pale yel. oleaginous liq.; mild odor; misc. with alcohol, ether, veg. and min. oils; insol. in water; m.w. 338.58; dens. 0.873; f.p. opaque @ 12 C; solid @ -26.4 C; b.p. 173-227 C (2 mm); iodine no. 76.8; flash pt. 204 C; nonionic

**Toxicology:** Skin irritant; TSCA listed

**Precaution:** Combustible exposed to heat or flame; incompat. with oxidizing materials

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Plasticizer for PVC, PVB, PVAc, PS, cellulose, surface coatings; solvent; lubricant in rolling oils; water-resisting agent; coatings; polishes; waterproofing compds.; emulsifier/bodying agent/emollient for cosmetics and toiletries; plasticizer in food-contact rubber articles for repeated use; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.210, 177.2600, 177.2800

**Manuf./Distrib.:** Anar; C.P. Hall; Cardinal; Chemol; Crompton/Witco; Eastech; Ferro/Keil; Harwick; Indofine; Inolex; Intl. Paper; Jarchem Ind.; Novachem

## n-Butyl oleate

Corp.; Sea-Land; Sigma; Sybron; Thornley; Uniqema N. Am.; Uniqemal Oleochems.; Velsicol

**n-Butyl oleate.** See Butyl oleate

**Butyl oleate sulfate.** See Sulfated butyl oleate

**Butyl oleate, sulfated.** See Sulfated butyl oleate

**t-Butyl peroxide.** See Di-t-butyl peroxide

## t-Butylphenyl diphenyl phosphate

CAS 56803-37-3

**Synonyms:** Butylated triphenyl phosphate; Diphenyl t-butylphenyl phosphate

**Empirical:** C<sub>22</sub>H<sub>22</sub>O<sub>4</sub>P

**Properties:** M.w. 382.39; dens. 1.15-1.18 (20 C); flash pt. (COC) 246 C; ref. index 1.553

**Toxicology:** LD50 (oral, rat) > 4640 mg/kg

**Uses:** Flame retardant plasticizer in PVC, vinyl and vinyl nitrile foams, PVAc emulsions, cellulosic resins; as fire-retardant hydraulic fluid

**Manuf./Distrib.:** Akzo Nobel; Ashland; C.P. Hall; FMC; Monsanto

**Trade Names:** Phosflex® 61B; Phosflex® 71B

## t-Butylphenyl phosphate

**Uses:** Antiwear and extreme pressure agent

**Trade Names:** Durad® 110B; Durad® 150B; Durad® 620B

## Butyl phosphate

CAS 68439-39-4

**Properties:** Liq.; sl. sol. in water; sp.gr. 1.13; acid no. 430; flash pt. (TCC) 265 F; anionic

**Uses:** Acid catalyst in resin curing; chemical intermediate in formulation of rust preventatives; antistat; textile lubricant; oil additive; heavy metal extractant; surfactant

**Manuf./Distrib.:** Albright & Wilson Am.

**Trade Names:** Servoxyl® VPIZ 100

See also Tributyl phosphate

**n-Butyl phosphate.** See Tributyl phosphate

**Butyl phosphoric acid.** See Butyl acid phosphate

**n-Butylphosphoric acid.** See Butyl acid phosphate

**Butyl phthalate.** See Dibutyl phthalate

**n-Butyl phthalate.** See Dibutyl phthalate

**Butyl phthalate butyl glycolate.** See n-Butyl phthalyl-n-butyl glycolate

**Butyl phthalyl butyl glycolate.** See n-Butyl phthalyl-n-butyl glycolate

## n-Butyl phthalyl-n-butyl glycolate

CAS 85-70-1; EINECS/ELINCS 201-624-8

**Synonyms:** 1,2-Benzenedicarboxylic acid, 2-butoxy-2-oxoethyl, butyl ester; Butyl carbobutoxymethyl phthalate; Butyl phthalate butyl glycolate; Butyl phthalyl butyl glycolate; Dibutyl-o-(o-carboxybenzoyl) glycolate; Dibutyl-o-carboxybenzoyloxyacetate

**Classification:** Aromatic ester

**Empirical:** C<sub>18</sub>H<sub>24</sub>O<sub>6</sub>

**Formula:** C<sub>4</sub>H<sub>9</sub>OOCC<sub>6</sub>H<sub>4</sub>COOCH<sub>2</sub>COOC<sub>4</sub>H<sub>9</sub>

**Properties:** Colorless liq., odorless; insol. in water; m.w. 336.42; dens. 1.093-1.103 (25/25 C); b.p. 219 C (5 mm); flash pt. 390 F; ref. index 1.4880; extremely light-stable

**Toxicology:** LD50 (oral, rat) 7 g/kg, (IP, rat) 6889 mg/kg; mildly toxic by IP; eye irritant; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid and irritating fumes

**Uses:** Plasticizer for PVC, in food-contact coatings; plasticizer migrating from food pkg.; film-former in cosmetics; in food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 181.22, 181.27

**Manuf./Distrib.:** Aldrich; Fabrichem; Morflex

**Trade Names Containing:** Morflex® 190

**Butyl-2-propenoate.** See Butyl acrylate

**Butyl rubber.** See Isobutylene/isoprene copolymer

## Butyl stearate

CAS 123-95-5; EINECS/ELINCS 204-666-5; FEMA 2214

**Synonyms:** Butyl octadecanoate; n-Butyl octadecanoate; n-Butyl stearate; Octadecanoic acid butyl ester

**Definition:** Ester of butyl alcohol and stearic acid

**Empirical:** C<sub>22</sub>H<sub>44</sub>O<sub>2</sub>

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>16</sub>COO(CH<sub>2</sub>)<sub>3</sub>CH<sub>3</sub>

**Properties:** Colorless liq., solidifying @ 19 C; pract. odorless; sol. in alcohol, ether, hydrocarbon oils; sl. sol. in water; m.w. 340.60; dens. 0.86 (20/4 C); m.p. 17-22 C; b.p. 343 C; flash pt. (CC) 160 C; ref. index 1.4430 (20 C)

**Toxicology:** LD50 (oral, rat) 32 g/kg; low toxicity by ing.; skin irritant; experimental reproductive data; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Solvent, spreading agent, softener in plastics, textiles, cosmetics, rubbers; syn. flavoring agent for foods and pharmaceuticals; plasticizer for food-pkg. materials; plasticizer/flow improver for plastics, rubber, lacquers; lubricant/slip agent for coatings and inks; polishes; lubricant for metals, textiles, molding; dye solvent in wax polishes; chlorinated rubber; carbon paper and inks; emollient in cosmetics, pharmaceuticals; dampproof for concrete; pigment wetting agent/dispersant; in food-pkg. adhesives; defoamer in food-contact coatings; plasticizer in food-contact rubber articles for repeated use; in surf. lubricants for mfg. of food-contact metallic articles

**Use Level:** 1 ppm (nonalcoholic beverages), 5 ppm (alcoholic beverages), 2 ppm (ice cream, ices), 190 ppm (candy), 340 ppm (baked goods), 330 ppm (chewing gum)

**Regulatory:** FDA 21CFR §172.515, 173.340, 175.105, 175.300, 175.320, 176.200, 176.210, 177.2260, 177.2600, 177.2800, 178.3910, 181.22, 181.27; FDA approved for topicals; FEMA GRAS

**Manuf./Distrib.:** Aldrich; Alzo; Amerchol; Anar; Ashland; C.P. Hall; Chemol; Cognis/Chems. Group; Fluka; Independent Chem.; Indofine; Inolex; Int'l. Paper; Jarchem Ind.; Kenrich Petrochems.; Kraft Chem.; Lipo; Mosselman NV; NOF Am.; Norman, Fox; Penta Mfg.; Phoenix; Ruger; Sea-Land; Seabrook Ind.; Sigma; Spectrum Quality Prods.; Stepan; Thornley; Uniqema N. Am.; Unitex; Universal Preserv-A-Chem

**n-Butyl stearate.** See Butyl stearate

**Butyl tetradecanoate.** See Butyl myristate

**Butyl n-tetradecanoate.** See Butyl myristate

**Butyral.** See n-Butyraldehyde

## n-Butyraldehyde

CAS 123-72-8; EINECS/ELINCS 204-646-6; UN No. 1129 (DOT); FEMA 2219

**Synonyms:** Butal; Butaldehyde; Butalyde; Butanal; n-Butanal; n-Butylaldehyde; Butyral; Butyric aldehyde

**Classification:** Aldehyde

**Empirical:** C<sub>4</sub>H<sub>8</sub>O

**Formula:** CH<sub>3</sub>CH<sub>2</sub>CH<sub>2</sub>CHO

**Properties:** Colorless liq.; sol. in water; misc. with ether @ 75 C, org. solvs.; m.w. 72.10; sp.gr. 0.800; m.p. -99 C; f.p. 12 F; b.p. 75-76 C; flash pt. (CC) 20 F; ref. index 1.3843

**Toxicology:** LD50 (oral, rat) 2490 mg/kg, (IP, rat) 800 mg/kg, (skin, rabbit) 3560 mg/kg; LCLo (inh., rat, 4 h) 8000 ppm; mod. toxic by ing., inh., skin contact, IP, and subcut. routes; severe skin and eye irritant; delayed hypersensitivity; suspected carcinogen; TSCA listed

**Precaution:** DOT: Flamm. liq.; dangerous fire hazard when exposed to heat and flame; incompat. with oxidizing materials; reacts vigorously with chlorosulfonic acid, HNO<sub>3</sub>, H<sub>2</sub>SO<sub>4</sub>

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Plasticizers; rubber accelerators; solvents; high polymers; intermediate for paints; synthetic flavoring agent in foods and pharmaceuticals; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

**Use Level:** 0.71 ppm (nonalcoholic beverages), 0.5 ppm (alcoholic beverages), 4.8 ppm (ice cream, ices), 2.9 ppm (candy), 5.4 ppm (baked goods), 0.25 ppm (icings)

**Regulatory:** FDA 21CFR §172.515, 175.105, 176.170; FEMA GRAS

**Manuf./Distrib.:** Aldrich; Alfa Aesar; Alfrebro; BASF AG; Celanese; Chisso Am.; Eastman; Fluka; Honeywell Perf. Polymers; Penta Mfg.; Union Carbide; Van Waters & Rogers

**Butyric alcohol.** See Butyl alcohol

**Butyric aldehyde.** See n-Butyraldehyde

**CA.** See Cellulose acetate

**CAB.** See Cellulose acetate butyrate

**n-Butyl oleate**

Corp.; Sea-Land; Sigma; Sybron; Thornley; Uniqema N. Am.; Uniqemal Oleochems.; Velsicol

**n-Butyl oleate.** See Butyl oleate

**Butyl oleate sulfate.** See Sulfated butyl oleate

**Butyl oleate, sulfated.** See Sulfated butyl oleate

**t-Butyl peroxide.** See Di-t-butyl peroxide

**t-Butylphenyl diphenyl phosphate**

CAS 56803-37-3

*Synonyms:* Butylated triphenyl phosphate; Diphenyl t-butylphenyl phosphate

*Empirical:* C<sub>22</sub>H<sub>22</sub>O<sub>4</sub>P

*Properties:* M.w. 382.39; dens. 1.15-1.18 (20 C); flash pt. (COC) 246 C; ref. index 1.553

*Toxicology:* LD50 (oral, rat) > 4640 mg/kg

*Uses:* Flame retardant plasticizer in PVC, vinyl and vinyl nitrile foams, PVAc emulsions, cellulosic resins; as fire-retardant hydraulic fluid

*Manuf./Distrib.:* Akzo Nobel; Ashland; C.P. Hall; FMC; Monsanto

*Trade Names:* Phosflex® 61B; Phosflex® 71B

**t-Butylphenyl phosphate**

*Uses:* Antiwear and extreme pressure agent

*Trade Names:* Durad® 110B; Durad® 150B; Durad® 620B

**Butyl phosphate**

CAS 68439-39-4

*Properties:* Liq.; sl. sol. in water; sp.gr. 1.13; acid no. 430; flash pt. (TCC) 265 F; anionic

*Uses:* Acid catalyst in resin curing; chemical intermediate in formulation of rust preventatives; antistat; textile lubricant; oil additive; heavy metal extractant; surfactant

*Manuf./Distrib.:* Albright & Wilson Am.

*Trade Names:* Servoxyl® VPIZ 100

See also Tributyl phosphate

**n-Butyl phosphate.** See Tributyl phosphate

**Butyl phosphoric acid.** See Butyl acid phosphate

**n-Butylphosphoric acid.** See Butyl acid phosphate

**Butyl phthalate.** See Dibutyl phthalate

**n-Butyl phthalate.** See Dibutyl phthalate

**Butyl phthalate butyl glycolate.** See n-Butyl phthalyl-n-butyl glycolate

**Butyl phthalyl butyl glycolate.** See n-Butyl phthalyl-n-butyl glycolate

**n-Butyl phthalyl-n-butyl glycolate**

CAS 85-70-1; EINECS/ELINCS 201-624-8

*Synonyms:* 1,2-Benzenedicarboxylic acid, 2-butoxy-2-oxoethyl, butyl ester; Butyl carbobutoxymethyl phthalate; Butyl phthalate butyl glycolate; Butyl phthalyl butyl glycolate; Dibutyl-o-(o-carboxybenzoyl) glycolate; Dibutyl-o-carboxybenzoyloxyacetate

*Classification:* Aromatic ester

*Empirical:* C<sub>18</sub>H<sub>24</sub>O<sub>6</sub>

*Formula:* C<sub>4</sub>H<sub>9</sub>OOCC<sub>6</sub>H<sub>4</sub>COOCH<sub>2</sub>COOC<sub>4</sub>H<sub>9</sub>

*Properties:* Colorless liq., odorless; insol. in water; m.w. 336.42; dens. 1.093-1.103 (25/25 C); b.p. 219 C (5 mm); flash pt. 390 F; ref. index 1.4880; extremely light-stable

*Toxicology:* LD50 (oral, rat) 7 g/kg, (IP, rat) 6889 mg/kg; mildly toxic by IP; eye irritant; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

*Precaution:* Combustible

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid and irritating fumes

*Uses:* Plasticizer for PVC, in food-contact coatings; plasticizer migrating from food pkg.; film-former in cosmetics; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 181.22, 181.27

*Manuf./Distrib.:* Aldrich; Fabrichem; Morflex

*Trade Names Containing:* Morflex® 190

**Butyl-2-propenoate.** See Butyl acrylate

**Butyl rubber.** See Isobutylene/isoprene copolymer

**Butyl stearate**

CAS 123-95-5; EINECS/ELINCS 204-666-5; FEMA 2214

*Synonyms:* Butyl octadecanoate; n-Butyl octadecanoate; n-Butyl stearate; Octadecanoic acid butyl ester

*Definition:* Ester of butyl alcohol and stearic acid

*Empirical:* C<sub>22</sub>H<sub>44</sub>O<sub>2</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>16</sub>COO(CH<sub>2</sub>)<sub>3</sub>CH<sub>3</sub>

*Properties:* Colorless liq., solidifying @ 19 C; pract. odorless; sol. in alcohol, ether, hydrocarbon oils; sl. sol. in water; m.w. 340.60; dens. 0.86 (20/4 C); m.p. 17-22 C; b.p. 343 C; flash pt. (CC) 160 C; ref. index 1.4430 (20 C)

*Toxicology:* LD50 (oral, rat) 32 g/kg; low toxicity by ing.; skin irritant; experimental reproductive data; TSCA listed

*Precaution:* Combustible

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Solvent, spreading agent, softener in plastics, textiles, cosmetics, rubbers; syn. flavoring agent for foods and pharmaceuticals; plasticizer for food-pkg. materials; plasticizer/flow improver for plastics, rubber, lacquers; lubricant/slip agent for coatings and inks; polishes; lubricant for metals, textiles, molding; dye solvent in wax polishes; chlorinated rubber; carbon paper and inks; emollient in cosmetics, pharmaceuticals; dampproof for concrete; pigment wetting agent/dispersant; in food-pkg. adhesives; defoamer in food-contact coatings; plasticizer in food-contact rubber articles for repeated use; in surf. lubricants for mfg. of food-contact metallic articles

*Use Level:* 1 ppm (nonalcoholic beverages), 5 ppm (alcoholic beverages), 2 ppm (ice cream, ices), 190 ppm (candy), 340 ppm (baked goods), 330 ppm (chewing gum)

*Regulatory:* FDA 21CFR §172.515, 173.340, 175.105, 175.300, 175.320, 176.200, 176.210, 177.2260, 177.2600, 177.2800, 178.3910, 181.22, 181.27; FDA approved for topicals; FEMA GRAS

*Manuf./Distrib.:* Aldrich; Alzo; Amerchol; Anar; Ashland; C.P. Hall; Chemol; Cognis/Chems. Group; Fluka; Independent Chem.; Indofine; Inolex; Int'l. Paper; Jarchem Ind.; Kenrich Petrochems.; Kraft Chem.; Lipo; Mosselman NV; NOF Am.; Norman, Fox; Penta Mfg.; Phoenix; Ruger; Sea-Land; Seabrook Ind.; Sigma; Spectrum Quality Prods.; Stepan; Thornley; Uniqema N. Am.; Unitex; Universal Preserv-A-Chem

**n-Butyl stearate.** See Butyl stearate

**Butyl tetradecanoate.** See Butyl myristate

**Butyl n-tetradecanoate.** See Butyl myristate

**Butyral.** See n-Butyraldehyde

**n-Butyraldehyde**

CAS 123-72-8; EINECS/ELINCS 204-646-6; UN No. 1129 (DOT); FEMA 2219

*Synonyms:* Butal; Butaldehyde; Butalyde; Butanal; n-Butanal; n-Butylaldehyde; Butyral; Butyric aldehyde

*Classification:* Aldehyde

*Empirical:* C<sub>4</sub>H<sub>8</sub>O

*Formula:* CH<sub>3</sub>CH<sub>2</sub>CH<sub>2</sub>CHO

*Properties:* Colorless liq.; sol. in water; misc. with ether @ 75 C, org. solvs.; m.w. 72.10; sp.gr. 0.800; m.p. -99 C; f.p. 12 F; b.p. 75-76 C; flash pt. (CC) 20 F; ref. index 1.3843

*Toxicology:* LD50 (oral, rat) 2490 mg/kg, (IP, rat) 800 mg/kg, (skin, rabbit) 3560 mg/kg; LCLo (inh., rat, 4 h) 8000 ppm; mod. toxic by ing., inh., skin contact, IP, and subcut. routes; severe skin and eye irritant; delayed hypersensitivity; suspected carcinogen; TSCA listed

*Precaution:* DOT: Flamm. liq.; dangerous fire hazard when exposed to heat and flame; incompat. with oxidizing materials; reacts vigorously with chlorosulfonic acid, HNO<sub>3</sub>, H<sub>2</sub>SO<sub>4</sub>

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

*Uses:* Plasticizers; rubber accelerators; solvents; high polymers; intermediate for paints; synthetic flavoring agent in foods and pharmaceuticals; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

*Use Level:* 0.71 ppm (nonalcoholic beverages), 0.5 ppm (alcoholic beverages), 4.8 ppm (ice cream, ices), 2.9 ppm (candy), 5.4 ppm (baked goods), 0.25 ppm (icings)

*Regulatory:* FDA 21CFR §172.515, 175.105, 176.170; FEMA GRAS

*Manuf./Distrib.:* Aldrich; Alfa Aesar; Alfrebro; BASF AG; Celanese; Chisso Am.; Eastman; Fluka; Honeywell Perf. Polymers; Penta Mfg.; Union Carbide; Van Waters & Rogers

**Butyric alcohol.** See Butyl alcohol

**Butyric aldehyde.** See n-Butyraldehyde

**CA.** See Cellulose acetate

**CAB.** See Cellulose acetate butyrate

**C-8 acid.** See Caprylic acid

**C40-60 acid**

*Definition:* Mixt. of syn. aliphatic acids with 40-60 carbons in the alkyl chain

*Uses:* Emulsifier in cosmetics

*Trade Names Containing:* Unidac™ 700 Acid

**Cake alum.** See Aluminum sulfate

**Calcia.** See Calcium oxide

**Calciate (2-), ((ethylenedinitrilo) tetraacetato)-, disodium.** See Calcium disodium EDTA

**Calcined alumina.** See Alumina

**Calcined kaolin.** See Kaolin, calcined

**Calcined kaolin clay.** See Kaolin, calcined

**Calcined magnesite.** See Magnesium oxide

**Calcined magnesite.** See Magnesium oxide

**Calcined soda.** See Sodium carbonate

**Calcite.** See Calcium carbonate

**Calcium abietate.** See Calcium resinolate

**Calcium acid sulfite.** See Calcium hydrogen sulfite

**Calcium bisulfite.** See Calcium hydrogen sulfite

**Calcium carbonate**

CAS 1317-65-3

*Synonyms:* Agricultural limestone; Calcite; Calcium carbonate natural; Chalk; CI 77220; Dolomite; Franklin; Limestone; Lithographic stone; Marble; Natural calcium carbonate; Paris white; Pigment white 18; Portland stone; Vaterite; Whiting

*Classification:* Inorganic salt

*Definition:* Found in nature as the minerals limestone, marble, aragonite, calcite, and vaterite

*Empirical:* CO<sub>3</sub> • Ca

*Properties:* Wh. powd. or cryst.; odorless, tasteless; sol. in dil. acids; very sl. sol. in water; insol. in alcohol; m.w. 100.09; dens. 2.7-2.95; m.p. 825 C (dec.); stable in air; noncombustible

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup> of air (nuisance particulate); severe eye and mod. skin irritant; common air contaminant; TSCA listed

*Precaution:* Ignites on contact with F<sub>2</sub>; incompat. with acids, alum, ammonium salts

*Storage:* Hygroscopic; store @ R.T.

*Uses:* Alkali; mfg. of lime; neutralizer; paper opacifier; putty; tooth powds.; whitewash; Portland cement; filler/extender in paint, rubber, plastics, caulks, cements, ceramics, coatings; insecticides; in chemical analysis; precipitant in waste treatment; filler; pigment; coagulant/flocculant in potable water treatment; foods (nutrient, dough conditioner, yeast food, colorant, alkali); pharmaceuticals (alkali, neutralizer, colorant, opacifier, tablet/capsule diluent, antacid, antidiarrheal medicine); food-contact applics.

*Manuf./Distrib.:* Hammill & Gillespie

*Trade Names:* Atomite®; Carbital® 35; Carbital® 75; Carbital® 90; CC™-103; Micro-White® 10 Slurry; Micro-White® 25 Slurry; Micro-White® Superamide; Opacimite™

*Trade Names Containing:* Kotamite®

See also Calcium monocarbonate; CI 77220

**Calcium carbonate (1:1).** See Calcium monocarbonate

**Calcium carbonate natural.** See Calcium carbonate

**Calcium carbonate, precipitated.** See Calcium monocarbonate

**Calcium carbonate, prepared.** See Whiting

**Calcium carrageenan**

CAS 9049-05-2

*Synonyms:* Algin gum; Calcium carrageenin; Calcium carrageenate; Carrageenan, calcium salt; Carrageenan, calcium (II) salt

*Definition:* Calcium salt of carrageenan; mixt. of highly sulfated polygalactosides, extracted from seaweed

*Toxicology:* LD50 (oral, rat) 5140 mg/kg, (oral, mouse) 8710 mg/kg; mod. toxic by ing.; experimental reproductive effects; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>x</sub>

*Uses:* Emulsion stabilizer, film-former, visc. control agent in cosmetics; emulsifier, stabilizer, thickener for foods and pharmaceuticals; in paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §136.110, 136.115, 136.130, 136.160, 136.180, 139.121, 139.122, 150.141, 150.161, 172.626, 176.170; approved for orals

**Calcium carrageenin.** See Calcium carrageenan

**Calcium carrageenate.** See Calcium carrageenan

**Calcium chlorohydrochlorite.** See Calcium hypochlorite

**Calcium dihydrogen sulfite.** See Calcium hydrogen sulfite

**Calcium dihydroxide.** See Calcium hydroxide

**Calcium disodium edathamil.** See Calcium disodium EDTA

**Calcium disodium edetate.** See Calcium disodium EDTA

**Calcium disodium EDTA**

CAS 62-33-9 (anhyd.); 23411-34-9; EINECS/ELINCS 200-529-9

*Synonyms:* Acetic acid, (ethylene dinitrilo) tetra-, calcium disodium salt; Calciate (2-), ((ethylenedinitrilo) tetraacetato)-, disodium; Calcium disodium edathamil; Calcium disodium edetate; Calcium disodium ethylenediamine tetraacetic acid; Calcium EDTA; Disodium calcium ethylenediaminetetraacetate; Edetate calcium disodium; Edetic acid calcium disodium salt; EDTA calcium disodium salt; Ethylenediaminetetraacetic acid, calcium disodium salt; Sodium calcium edetate

*Classification:* Substituted diamine

*Definition:* Mixt. of calcium disodium ethylenediaminetetraacetate dihydrate (predominantly) and trihydrate

*Empirical:* C<sub>10</sub>H<sub>12</sub>CaN<sub>2</sub>Na<sub>2</sub>O<sub>8</sub>

*Formula:* CaNa<sub>2</sub>C<sub>10</sub>H<sub>12</sub>N<sub>2</sub>O<sub>8</sub>

*Properties:* Wh. cryst. powd. or gran., odorless, faint salt taste; sol. in water; insol. in org. solvs.; m.w. 374.27 (anhyd.), 410.30 (dihydrate); bulk dens. 0.67; pH 6.5-8.0; stable in air

*Toxicology:* LD50 (oral, rat) 10 g/kg, (IP, rat) 3850 mg/kg; mod. toxic by IP route; mildly toxic by ing. and IV routes; possible link to liver damage in test animals; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of NO<sub>x</sub>

*Storage:* Sl. hygroscopic

*Uses:* Preservative, chelating agent, sequestrant in cosmetics, foods, pharmaceuticals, water treatment, textiles, soaps/detergents, electroless copper plating, polymer prod., disinfectants, pulp/paper; hog scald agent; scale control aid in water treatment; medicine (treating lead poisoning); food antioxidant; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

*Use Level:* Limitation 220 ppm (pickled cabbage), 33 ppm (soft drinks), 25 ppm (alcoholic beverages), 200 ppm (egg prods.), 75 ppm (mayonnaise), 75 ppm (oleomargarine), 75 ppm (sauces); ADI 0-2.5 mg/kg (EU)

*Regulatory:* FDA 21CFR §155.200, 161.173, 166.110, 169.115, 169.140, 169.150, 172.120, 175.105, 176.170; USDA 9CFR §318.7; Japan approved (0.035 g/kg max.); Europe listed; permitted in UK only in canned fish, shellfish; FDA approved for injectables (IM, IV), intravenous, orals

*Manuf./Distrib.:* Akzo Nobel; Am. Biorganics; Hampshire; Hickson Danchem; Int'l. Sourcing; R.W. Greeff; Ruger; Sigma; Universal Preserv-A-Chem  
*Trade Names:* Versene CA

**Calcium disodium ethylenediamine tetraacetic acid.** See Calcium disodium EDTA

**Calcium distearate.** See Calcium stearate

**Calcium EDTA.** See Calcium disodium EDTA

**Calcium hydrate.** See Calcium hydroxide

**Calcium hydrogen sulfite**

CAS 13780-03-5; UN No. 1923 (DOT)

*Synonyms:* Calcium acid sulfite; Calcium bisulfite; Calcium dihydrogen sulfite

*Empirical:* H<sub>2</sub>CaO<sub>2</sub>S<sub>2</sub>

*Formula:* Ca(HSO<sub>3</sub>)<sub>2</sub>

*Properties:* Ylsh. liq.; strong sulfur dioxide odor; m.w. 204.24; dens. 1.06

*Toxicology:* Irritating and corrosive to skin and tissue

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>x</sub>

*Uses:* Antichlor in bleaching textiles; paper pulp (dissolving lignin) preservative; bleaching sponges; hydroxylamine salts; germicide; disinfectant

**Calcium hydrosilicate.** See Calcium silicate

**Calcium hydroxide**

CAS 1305-62-0; EINECS/ELINCS 215-137-3

*Synonyms:* Agricultural lime; Calcium dihydroxide; Calcium hydrate; Carboxide; Caustic lime; Hydrated lime; Lime, hydrated; Lime milk; Lime, slaked; Lime water; Milk of lime; Slaked lime

*Classification:* Inorganic base

*Empirical:* H<sub>2</sub>CaO<sub>2</sub>

*Formula:* Ca(OH)<sub>2</sub>

*Properties:* Wh. soft cryst. powd., alkaline sl. bitter taste; sl. sol. in water; sol. in glycerol, syrup, acid; insol. in alcohol; m.w. 74.10; dens. 2.34; m.p. loses water at 580 C; pH 12.4 (sat. sol'n. @ 25 C)

*Toxicology:* ACGIH TLV/TWA 5 mg/m<sup>3</sup>; LD50 (oral, rat) 7.34 g/kg; mildly toxic by ingestion; severe eye irritant; irritating to skin, mucous membrane, respiratory tract; dust is industrial hazard; causes dermatitis; mutation data reported; common air contaminant; TSCA listed

*Precaution:* Corrosive material; violent reaction with maleic anhydride, nitroethane, nitromethane, nitroparaffins, etc.; reaction with polychlorinated phenols + potassium nitrate forms extremely toxic prods.

HMIS: Health 2; Flammability 0; Reactivity 1

*Uses:* Mortar; plasters; cements; calcium salts; disinfectant; lubricants; pesticides; mfg. of paper pulp; activator in vulcanization; coagulant, color removal, iron/manganese removal, pH control, softener in water treatment; depilatory; filler; causticizing soda; dehairing hides; whitewash; soil conditioner; ammonia recovery; rubber accelerator; petrochemicals; buffer in cosmetics; food additive, buffer, neutralizing agent, firming agent, processing aid; in beer-making; pharmaceuticals

*Use Level:* ADI no limit (EU)

*Regulatory:* FDA 21CFR §135.110, 184.1205, GRAS; USDA 9CFR §318.7; Japan restricted (1% max. as calcium); Europe listed; UK approved; FDA approved for injectables, orals, topicals; BP compliance

*Manuf./Distrib.:* Aldrich; Am. Biorganics; Charkit; EM Ind.; Fluka; Int'l. Chem. Inc; Int'l. Sourcing; Kraft Chem.; Lohmann; Mallinckrodt Baker; Mississippi Lime; O.C. Lugo; Pfizer Int'l.; Ruger; Sigma; Specialty Mins.; Spectrum Quality Prods.; U.S. Gypsum; Universal Preserv-A-Chem; Varsal Instruments; Whittaker, Clark & Daniels

**Calcium hypochloride.** See Calcium hypochlorite

### Calcium hypochlorite

CAS 7778-54-3; EINECS/ELINCS 231-908-7; UN No. 1748 (dry) (DOT), 2208 (DOT), 2880 (hydrated) (DOT)

*Synonyms:* Calcium hypochloride; Calcium oxychloride; Chlorinated lime; Lime, chlorinated; Lime chloride; Bleaching powder; Calcium chlorohydrochlorite; Hypochlorous acid, calcium salt

*Classification:* Salt of hypochlorous acid

*Definition:* Commercial grade usu. 50% or more Ca(OCl)<sub>2</sub>

*Empirical:* CaCl<sub>2</sub>O<sub>2</sub>

*Formula:* Ca(OCl)<sub>2</sub>

*Properties:* Wh. cryst. solid, strong chlorine odor; dec. in water, alcohol; m.w. 142.99; sp.gr. 2.35; dec. > 100 C; pH 11.5 (5%)

*Toxicology:* LD50 (oral, rat) 850 mg/kg; moderate toxicity by ingestion; severe skin, eye, and mucous membrane irritant; corrosive; tumorigen, mutagen; TSCA listed

*Precaution:* Dangerous; strong oxidizer capable of igniting materials that are combustible (wood, grease, org. materials); mod. explosive in solid form when heated

*Hazardous Decomp. Prods.:* Heated to decomp., or on contact with acid or acid fumes, emits highly toxic fumes of HCl and explodes; reacts with water to produce toxic and corrosive fumes of Cl<sup>-</sup> and HCl

NFPA: Health 3; Flammability 0; Reactivity 2

*Uses:* Algicide; bactericide; slimicide; deodorant; bleaching agent; oxidizing agent; odor control; potable water purification; disinfectant for pools; water sanitization; cooling water and sewage treatment; bacteria/algae control in reservoirs, water mains; treatment plants; bleaching paper and textiles; tanning aux.; agric. use; food, dairy, and beverage processing plants; sanitizer in household, institutional use; chlorinating agent; as sanitizing solution for food contact

*Regulatory:* FDA 21CFR §178.1010; SARA reportable

*Manuf./Distrib.:* Aldrich; AllChem Ind.; Alloychem; Arch Chems.; Ashland; Bencorp Int'l.; Bio-Lab; Browning; Coyne; Dastech Int'l.; Fluka; Great Lakes; Harcros; Los Angeles Chem.; Melchemie bv; PPG Ind.; Quadra; Robeco; Rochem Int'l.; RYTE Prods.; Sal Chem.; Schaefer Tech.; Sedco; Spectrum Quality Prods.; Surpass; Tomen Am.; United Min. & Chem.; Van Waters & Rogers; Wegco Chem. & Min.

*Trade Names:* Induclor®; Pittchlor®

### Calcium isostearate

*Uses:* Stabilizer with decyl alcohol for calcium stearate disps. in paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170

**Calcium lignin sulfonate.** See Calcium lignosulfonate

### Calcium lignosulfonate

CAS 8061-52-7; 68131-32-8 (fermented)

*Synonyms:* Calcium lignin sulfonate; Lignin calcium sulfonate; Lignosulfonic acid, calcium salt

*Definition:* Calcium salt of polysulfonated lignin

*Properties:* Anionic

*Toxicology:* TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Dispersant; emulsifier; emulsion stabilizer; wetting agent; binder; gypsum board; industrial use; refractories; construction; insecticides; pesticides; extender for adhesives and binder systems; dispersant for water treatment, oil-well drilling muds; concrete admixtures; emulsifier in cosmetics; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §172.715, 175.105, 176.170, 176.210

*Manuf./Distrib.:* LignoTech USA; R.T. Vanderbilt; Wesco Tech. Ltd

*Trade Names Containing:* Lignosite® AC

### Calcium metasilicate

CAS 10101-39-0

*Synonyms:* Calcium silicate; Calcium silicate n-hydrate; Silicic acid, calcium salt; Silicic acid, calcium salt (1:1); Silicic acid (H<sub>2</sub>SiO<sub>3</sub>), calcium salt (1:1)

*Empirical:* CaH<sub>2</sub>O<sub>3</sub>Si

*Properties:* Wh. powd.; m.w. 118.18

*Toxicology:* Irritating dust; TSCA listed

*Uses:* Extender for paints; absorbent, antacid, filler for paper, paper coatings, cosmetics; anticaking additive for foods; mfg. of glass and Portland cement; in food-pkg. adhesives

*Use Level:* Use in foods restricted to 5% in baking powd., 2% in table salt

*Regulatory:* FDA 21CFR §175.105

*Manuf./Distrib.:* Am. Colloid; Nyco Mins.; R.T. Vanderbilt

See also Calcium silicate

### Calcium monocarbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Synonyms:* Allied whiting; Calcium carbonate; Calcium carbonate (1:1); Calcium carbonate, precipitated; Carbonic acid calcium salt; Carbonic acid calcium salt (1:1); Monocalcium carbonate; Pigment white 18; Precipitated calcium carbonate; Precipitated chalk; Prepared chalk; Vienna white; White powder; Whiting

*Classification:* Inorganic salt

*Empirical:* CCaO<sub>3</sub>

*Formula:* CO<sub>3</sub> · Ca

*Properties:* Wh. powd. or colorless crystals, odorless, tasteless; sol. in dil. acids; very sl. sol. in water; insol. in alcohol; m.w. 100.09; dens. 2.7-2.95; bulking value 0.045 gal/lb; oil absorp. 63; m.p. 825 C (dec.); stable in air

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup> of air (nuisance particulate); LD50 (oral, rat) 6450 mg/kg; mildly toxic by ing.; severe eye and mod. skin irritant; irritating to respiratory system; common air contaminant; may cause kidney damage, CNS effects; TSCA listed

*Precaution:* Incompat. with acids, alum, ammonium salts

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating vapors

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Hygroscopic; store in a cool, dry, well-ventilated area away from incompatible substances

*Uses:* Alkali; source of lime; neutralizer; paper opacifier; putty; dentifrices; whitewash; Portland cement; filler/extender in paint, rubber, plastics, adhesives; insecticides; ceramics; polishes; in chemical analysis; precipitant (waste treatment); polishes; inks; crayons; insulation; coagulant/flocculant in water treatment; foods (nutrient, dough conditioner, yeast food, colorant); pharmaceuticals (neutralizer, colorant, opacifier, tablet/capsule diluent, antacid); oral care agent; abrasive, buffer, opacifier, colorant in cosmetics; colorant in food-contact polymers; in resinous/polymeric food-contact coatings; in melamine-formaldehyde food-contact molded articles

*Use Level:* ADI not specified; WHO limitation: 40 g/kg (cheese), 200 mg/kg (jams, jellies)

*Regulatory:* FDA 21CFR §73.1070, 137.105, 137.155, 137.160, 137.165,

137.170, 137.175, 137.180, 137.185, 137.350, 169.115, 175.300, 177.1460, 178.3297, 181.22, 181.29, 182.5191, 184.1191, 184.1409, GRAS; BATF 27CFR §240.1051, limitation 30 lb/1000 gal of wine; Japan approved (1-2%); Europe listed; UK approved; FDA approved for implants, orals, otics; USP/NF, BP, Ph.Eur. compliance

**Manuf./Distrib.:** ABCR; AMRESCO; Acros Org.; Aldrich; AluChem; Am. Ingreds.; Archway Sales; BASF; C.P. Hall; Cerac; ECC Int'l.; EM Ind.; Engelhard; Fisher Scientific; Fluka; Genstar Stone Prods.; Georgia Marble; H.M. Royal; J.M. Huber/Chems.; J.T. Baker; Jesse S. Young; Landers-Segal Color; Lohmann; Mallinckrodt Baker; Melchemie bv; Miljac; Mississippi Lime; NeoResins; Pfizer Int'l.; Punda Mercantile; R.E. Carroll; Ruger; Seegott; Sigma; Spectrum Quality Prods.; Tamms Ind.; Whittaker, Clark & Daniels

**Trade Names:** Albacar® 5970; Albacar® PCC; Albalfil® PCC; Albaglos® PCC; Calcitem S; Calwhite®; Camel-CAL®; Camel-CAL® Slurry; Camel-FINE; Camel-WITE®; Camel-WITE® Slurry; Gamaco®; Gama-Sperse® 80; Gama-Sperse® 255; G-White; Hubercarb® Optifil; Hubercarb® Q 1; Hubercarb® Q 2; Hubercarb® Q 3; Hubercarb® Q 4; Hubercarb® Q 6; Hubercarb® Q 6-20; Hubercarb® Q 20-60; Hubercarb® Q 40-200; Hubercarb® Q 60; Hubercarb® Q 100; Hubercarb® Q 200; Hubercarb® Q 325; Hubercarb® W 2; Hubercarb® W 3; Hubercarb® W 3N; Hubercarb® W 4; H-White; Hydrocarb 60-ME 78%; Hydrocarb 75-ME 78%; Hydrocarb 90-ME 78%; Jetcoat™ PCC; Magnum Gloss; Megafil® PCC; Microblanc 1; Microblanc 2; Microblanc 3; Microblanc 5; Microtem 95; Opacarb® PCC; RO-40; Ultrapaque® PCC; Zetafil 1; Zetafil 2; Zetafil 3

**Trade Names Containing:** Camel-CAL® ST; Camel-WITE® ST; Dualite® M6050AE; Dualite® MS7000; Dualite® MS7020; Hubercarb® Optifil T; Hubercarb® Q 1T; Hubercarb® Q 2T; Hubercarb® Q 3T; Hubercarb® Q 200T; Hubercarb® W 2T; Hubercarb® W 3T

See also Calcium carbonate; Whiting

**Calcium monosilicate.** See Calcium silicate

#### Calcium montanate

CAS 68308-22-5; EINECS/ELINCS 269-637-1

**Synonyms:** Montan acid, calcium salt

**Definition:** Calcium salt of the acids derived from montan acid wax

**Properties:** Solid; m.p. 1223 C

**Uses:** Lubricant for PVC; cosmetic additive

**Trade Names Containing:** Hoechst Wax OP

**Calcium octadecanoate.** See Calcium stearate

#### Calcium oxide

CAS 1305-78-8; EINECS/ELINCS 215-138-9; UN No. 1910 (DOT)

**Synonyms:** Burnt lime; Calcia; Calx; Fluxing lime; Lime; Pebble lime; Quicklime; Unslaked lime

**Classification:** Alkaline earth oxide

**Empirical:** CaO

**Properties:** Wh. or gray cryst. or powd., odorless; sol. in acids, glycerol, sugar sol'n.; sol. in water forming Ca(OH)<sub>2</sub> and generating heat; pract. insol. in alcohol; m.w. 56.08; dens. 3.40; m.p. 2570 C; b.p. 2850 C; noncombustible

**Toxicology:** ACGIH TLV/TWA 2 mg/m<sup>3</sup>; strong caustic; may cause severe irritation to skin, mucous membranes, eyes; a common air contaminant; TSCA listed

**Precaution:** DOT: Corrosive material; powd. may react explosively with water; mixts. with ethanol may ignite if heated; violent reactions with B<sub>2</sub>O<sub>3</sub> + CaCl<sub>2</sub>; interhalogens; F<sub>2</sub>; HF; P<sub>2</sub>O<sub>5</sub> + heat; incandescent reaction with liq. HF

NFPA: Health 3; Flammability 0; Reactivity 1

**Storage:** Moisture-sensitive

**Uses:** Refractory; insecticides; fungicides; mfg. of steel, aluminum; flotation of nonferrous ores; mfg. of glass, paper, Ca salts; in drilling fluids, lubricants; laboratory; desiccant for extruded rubber goods; pharmaceutical topicals; filler; activator; coagulant, color removal, Fe/Mn removal, pH control, softening, corrosion control for water treatment; sewage treatment; bauxite processing reagent; buffer in cosmetics; foods (alkali, nutrient, dietary supplement, dough conditioner, yeast food, hog/poultry scald agent)

**Use Level:** ADI no limit (EU)

**Regulatory:** FDA 21CFR §182.1210, 182.5210, 184.1210, GRAS; USDA 9CFR §318.7, 381.147; Europe listed; UK approved

**Manuf./Distrib.:** Aldrich; AluChem; Am. Int'l.; Ash Grove Cement; Atlantic Equip. Engrs.; Cerac; Fluka; Kraft Chem.; Mallinckrodt Baker; Mins. Tech.; Mississippi Lime; Pfizer Int'l.; Reade Advanced Materials; Ruger; Schaefer Tech.; Sigma; Specialty Mins.; Spectrum Quality Prods.; U.S. Gypsum; Universal Preserv-A-Chem; Whittaker, Clark & Daniels

**Calcium oxychloride.** See Calcium hypochlorite

**Calcium polysilicate.** See Calcium silicate

#### Calcium resinate

CAS 9007-13-0; UN No. 1313 (DOT), 1314 (DOT)

**Synonyms:** Calcium abietate; Calcium rosinate; Limed rosin; Rosin, lime-hardened

**Empirical:** C<sub>98</sub>H<sub>124</sub>CaO<sub>8</sub>

**Formula:** Ca(C<sub>24</sub>H<sub>32</sub>O<sub>4</sub>)<sub>8</sub>

**Properties:** Ylsh. -wh. amorphous powd. or lumps, rosin odor; sol. in acid, amyl acetate, butyl acetate, ether, amyl alcohol; insol. in water; m.w. 1349.5; soften. pt. 115-165 C

**Toxicology:** TSCA listed

**Precaution:** Flamm. solid; dangerous fire risk; spontaneous heating; reactive with oxidizing materials

**Hazardous Decom. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Waterproofing; mfg. of paint driers, porcelains, perfumes, cosmetics, enamels; color diluent for egg shells; coating for fabrics, wood, paper; tanning leather; binder in printing inks, wood varnishes; drier in food-contact coatings; component of food-contact articles

**Regulatory:** FDA 21CFR §73.1, 175.300, 178.3870

**Manuf./Distrib.:** Arakawa USA; Ascona; Barium & Chems.; Hummel Croton; Resinall

**Calcium rosinate.** See Calcium resinate

#### Calcium silicate

CAS 1344-95-2; EINECS/ELINCS 215-710-8

**Synonyms:** Calcium hydrosilicate; Calcium monosilicate; Calcium polysilicate; Okenite; Silicic acid, calcium salt

**Classification:** Carbonates

**Definition:** Hydrous or anhydrous silicate with varying proportions of calcium oxide and silica

**Empirical:** (1) CaO<sub>3</sub>Si; (2) Ca<sub>2</sub>O<sub>4</sub>Si; (3) Ca<sub>3</sub>O<sub>5</sub>Si

**Formula:** Common forms: (1) CaSiO<sub>3</sub>, (2) Ca<sub>2</sub>SiO<sub>4</sub>, (3) Ca<sub>3</sub>SiO<sub>5</sub>

**Properties:** Wh. or cream-colored powd.; odorless; sol. in nitriilotriacetic acid; pract. insol. in water; forms a gel with min. acids; m.w. 116.16 (1); dens. 2.10; bulk dens. 15-16 lb/ft<sup>3</sup>; absorp. power 600% (water); surf. area 95-175 m<sup>2</sup>/g; m.p. 1540 C; pH 8.4-10.2 (5% aq. susp.); nonflamm.

**Toxicology:** ACGIH TLV/TWA 10 mg/m<sup>3</sup> (total dust); nuisance particulate; pract. nontoxic orally, but inh. may cause respiratory tract irritation; TSCA listed

**Precaution:** Avoid prolonged contact with water (sol'n. reverts to sol. calcium salts and amorphous silica)

**Uses:** Constituent of lime glass, Portland cement; reinforcing filler in elastomers, plastics, coatings; absorbent for liqs., gases, vapors; suspending agent; pigment and pigment extender; binder for refractories; in chromatography; road building; absorbent, opacifier, visc. control agent in cosmetics; anticaking agent, filter aid for foods and pharmaceuticals; glazing, release agents (sweets); dusting agent (chewing gum); antacid (pharmacology); colorant in food-contact polymers, paper/paperboard in contact with aq./fatty foods

**Use Level:** ADI not specified (FAO/WHO)

**Regulatory:** FDA 21CFR §172.410, 175.300, 176.170, 177.1460, 178.3297, 182.2227, GRAS (limitation 2% in table salt, 5% in baking powd.); Europe listed; UK approved; approved for orals; USP/NF compliance

**Manuf./Distrib.:** Aldrich; BPI; Cary; Celite; Chem-Materials; Crosfield; D.N. Lukens; Degussa-Hüls; Eastech; Great Western; H.M. Royal; J.M. Huber/Chems.; Kraft Chem.; R.T. Vanderbilt; Ruger; Seegott

**Trade Names:** Micro-Cel® T-26; Micro-Cel® T-49

See also Calcium metasilicate

**Calcium silicate n-hydrate.** See Calcium metasilicate

#### Calcium stearate

CAS 1592-23-0; EINECS/ELINCS 216-472-8

**Synonyms:** Calcium distearate; Calcium octadecanoate; Octadecanoic acid

calcium salt; Stearic acid, calcium salt  
*Classification:* Aliphatic organic compd.  
*Definition:* Calcium salt of stearic acid  
*Empirical:* C<sub>36</sub>H<sub>70</sub>CaO<sub>4</sub>  
*Formula:* Ca(C<sub>18</sub>H<sub>35</sub>O<sub>2</sub>)<sub>2</sub>  
*Properties:* Wh. impalpable powd., sl. char. odor; insol. in water, alcohol, ether; sl. sol. in hot alcohol, hot veg. and min. oils; m.w. 607.04; bulk dens. 20 lb/ft<sup>3</sup>; m.p. 149 C  
*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup> (total dust); nuisance dust; TSCA listed  
*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes  
 HMIS: Health 1; Flammability 0; Reactivity 0  
*Uses:* Water repellent; flattening agent in paints, emulsions; release agent for plastic molding powd.; foundry mold release; lubricant, stabilizer for PVC resins; lubricant for paper coating; slip agent; thickener; cement/stucco additive; wax ingred.; in pencils; crayons; explosives; fabric waterproofing agent; emulsifier in hair creams; colorant in cosmetics; conditioning agent in foods and pharmaceuticals; anticaking agent; binder; emulsifier; lubricant; release agent; stabilizer; thickener; tablet lubricant; drier in food-contact coatings; plasticizer in food-contact rubber articles for repeated use; stabilizer for food-grade polymers  
*Use Level:* ADI not specified (FAO/WHO)  
*Regulatory:* FDA 21CFR §169.179, 169.182, 172.863, 173.340; must conform to FDA specs for fats or fatty acids derived from edible oils, 175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.2260, 177.2410, 177.2600, 178.2010, 179.45; 181.22, 181.29, 184.1229, GRAS; FDA approved for implants, orals, rectals, topicals; USP/NF, BP, Ph.Eur. compliance  
*Manuf./Distrib.:* Adeka Fine Chem.; Alfa Chem; Allan; Allchem Ind.; Atofina N. Am./Wire Mill Prods.; Chemisphere; Cognis/Chems. Group; Comets; Crompton/Witco; Eka Chems. Ltd; Fallek; Ferro/Grant; Harwick; In-Cide Tech.; Lohmann; Mallinckrodt Baker; Miljac; NOF; Norac; PPG Ind.; R.T. Vanderbilt; Ruger; Sea-Land; Spectrum Quality Prods.  
*Trade Names:* Calsan™ 50; Calsan™ 55; Calsan™ 65; Cecavon® CA 31; Cecavon® CA 350 P; Lubracal® 48; Lubracal® 53; Lubracal® 60; Nopcote® 6510 Free; Nopcote C-104; Nopcote® C-104-HS; Nopcote® C-104-HS Free; Ombrelub® CD; Petrac® Calcium Stearate CP-11; Petrac® Calcium Stearate CP-11 LS; Struktol® Calcium Stearate; Sunkote® 450; Sunkote® 452; Sunkote® 455  
*Trade Names Containing:* Estane® 5715; Sunkote® 460

**Calcium stearoyl lactylate**

CAS 5793-94-2; EINECS/ELINCS 227-335-7  
*Synonyms:* Calcium stearoyl-2-lactylate; Calcium stearyl-2-lactylate; Calcium stelate; Octadecanoic acid, 2-(1-carboxyethoxy)-1-methyl-2-oxoethyl ester, calcium salt; Stearic acid ester with lactate of lactic acid calcium salt  
*Definition:* Calcium salt of stearic acid ester of lactyl lactate  
*Empirical:* C<sub>48</sub>H<sub>86</sub>CaO<sub>12</sub>  
*Properties:* Cream-colored nonhygroscopic powd., caramel odor; sparingly sol. in water; m.w. 895.30; m.p. 45-60 C; HLB 5.1; acid no. 50-86; pH 4.7 (2% aq. susp.); anionic  
*Toxicology:* No known toxicity; TSCA listed  
*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes  
*Uses:* Dough conditioner for bakery prods.; stabilizer; whipping agent; emulsifier in cosmetics, foods, and pharmaceuticals; acid neutralizer/acceptor/scavenger for polyolefins, flame retardants, pigments; lubricant for PVC; in paper/paperboard in contact with aq./fatty foods; in cellophane for food pkg.  
*Use Level:* Limitation 0.5 parts/100 parts flour (bakery prods.), 0.05% (egg white), 0.3% (whipped vegetable topping), 0.5% (dehydrated potatoes); ADI 0-20 mg/kg (EU)  
*Regulatory:* FDA 21CFR §172.844, 176.170, 177.1200; must conform to FDA specs for fats or fatty acids derived from edible oils; Japan approved with restrictions; Europe listed; UK approved  
*Manuf./Distrib.:* Aceto; Am. Ingreds./Patco; R.I.T.A.; Wilshire

**Calcium stearoyl-2-lactylate.** See Calcium stearoyl lactylate  
**Calcium stearyl-2-lactylate.** See Calcium stearoyl lactylate  
**Calcium stelate.** See Calcium stearoyl lactylate

**Calcium sulfamate**

*Empirical:* CaH<sub>4</sub>N<sub>2</sub>O<sub>6</sub>S<sub>2</sub> · 4H<sub>2</sub>O  
*Formula:* Ca(SO<sub>3</sub>NH<sub>2</sub>)<sub>2</sub> · 4H<sub>2</sub>O  
*Properties:* Wh. cryst.; sol. in water  
*Uses:* Flameproofing agent for textiles and certain grades of paper

**Calcium sulfate**

CAS 7778-18-9; EINECS/ELINCS 231-900-3  
*Synonyms:* Anhydrite (natural form); Anhydrous calcium sulfate; Anhydrous gypsum; Calcium sulfate (1:1); Calcium sulfonate; Gypsum; Plaster of Paris  
*Classification:* Inorganic salt  
*Empirical:* CaO<sub>4</sub>S  
*Formula:* Ca · H<sub>2</sub>O<sub>4</sub>S  
*Properties:* Wh. to sl. yel.-wh. powd. or crystals, odorless, tasteless; sl. sol. in water; sol. in 3 N HCl; m.w. 136.14; dens. 2.964; bulking value 0.052 gal/lb; oil absorp. 10; m.p. 1450 C; Rust preventive, detergent for diesels; pigment dispersant for thermoplastic and epoxy color concs.; visc. stabilizer; anionic  
*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup> (total dust); nuisance dust; ingestion may result in intestinal obstruction because it absorbs water and hardens; no known toxicity on the skin; irritant; TSCA listed  
*Precaution:* Reacts violently with aluminum when heated; mixts. with phosphorus ignite at high temps.  
*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>2</sub>  
 HMIS: Health 1; Flammability 0; Reactivity 0  
*Uses:* Filler, extender, pigment, drier in paints; plastics; Portland cement retarder; paper filler, coatings; polishes; dyeing/printing; metallurgy; desiccant; pharmaceuticals (excipient, tablet diluent; abrasive in dentifrices; surgical casts); soil conditioner; foods (nutrient, dietary supplement, yeast food, dough conditioner/strengthener, firming agent, sequestrant, anticaking agent, coloring agent, leavening agent, pH control agent, processing aid, stabilizer, texturizer, thickener); abrasive, opacifier in cosmetics; visc. stabilizer; pigment dispersant for thermoplastic and epoxy color concs.; rust preventive, detergent for diesels; colorant in food-contact polymers, paper/paperboard in contact with aq./fatty foods  
*Use Level:* Limitation 1.3% (baked goods), 3% (frostings), 0.5% (frozen dairy desserts), 0.4% (gelatins, puddings), 0.5% (grain prods., pasta), 0.35% (processed vegetables), 0.07% (other food); ADI not specified (EU)  
*Regulatory:* FDA 21CFR §133.102, 133.106, 133.111, 133.141, 133.165, 133.181, 133.195, 137.105, 137.155, 137.160, 137.165, 137.170, 137.175, 137.180, 137.185, 150.141, 150.161, 155.200, 175.300, 176.170, 177.1460, 178.3297, 184.1230, GRAS; BATF 27CFR §240.1051, limitation 16.69 lb/1000 gal; Japan approved with restrictions (1% max.); Europe listed; UK approved; FDA approved for orals; USP/NF compliance  
*Manuf./Distrib.:* AMRESCO; Advance Research Chems.; Aldrich; Am. Ingreds.; EM Ind.; Fluka; Franklin Ind. Mins.; H.M. Royal; J.T. Baker; Kemira Kemi AB; Lohmann; R.E. Carroll; Ruger; Seegott; U.S. Gypsum; Universal Preserv-A-Chem; Van Waters & Rogers; Varsal Instruments; Whittaker, Clark & Daniels  
*Trade Names:* USG® Paper Filler #1  
**Calcium sulfate (1:1).** See Calcium sulfate  
**Calcium sulfate dihydrate**  
 CAS 10101-41-4; EINECS/ELINCS 231-900-3  
*Synonyms:* Alabaster; Calcium(II) sulfate dihydrate (1:1:2); CI 77231; Gypsum; Gypsum stone; Land plaster; Light spar; Magnesia white; Mineral white; Native calcium sulfate; Pigment white 25; Precipitated calcium sulfate; Terra alba  
*Classification:* Calcium compd.; sulfate salt  
*Empirical:* CaO<sub>4</sub>S · 2H<sub>2</sub>O  
*Formula:* CaSO<sub>4</sub> · 2H<sub>2</sub>O  
*Properties:* Wh. lumps or powd.; odorless; sol. in water; very slowly sol. in glycerol; pract. insol. in most org. solvs.; m.w. 172.10; dens. 2.32; m.p. 128 C (loses 1.5 H<sub>2</sub>O); b.p. 163 C (loses 2 H<sub>2</sub>O)  
*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup> (total dust); nuisance dust; irritant; human systemic effects by inh. (fibrosing alveolitis, respiratory system effects, effects on nose); questionable carcinogen  
*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>2</sub>  
 HMIS: Health 1; Flammability 0; Reactivity 0  
*Storage:* Hygroscopic

*Uses:* Mfg. of Portland cement, plaster of Paris, artificial marble, sulfuric acid, calcium carbide, and ammonium sulfate; as white pigment, filler, extender, glaze in paints, pharmaceuticals, paper, insecticide dusts, yeast, polishing powds.; soil conditioner; water treatment; flame retardant for plastics; pharmaceuticals (excipient, filler, desiccant, tablet/capsule diluent; in plaster casts); food-contact applics.

*Regulatory:* FDA approved for orals; USP/NF, BP, JP compliance

*Manuf./Distrib.:* Aldrich; EM Ind.; Fluka; Franklin Ind. Mins.; R.E. Carroll; Ruger; Sigma; Spectrum Quality Prods.; Whittaker, Clark & Daniels

**Calcium(II) sulfate dihydrate (1:1:2).** See Calcium sulfate dihydrate

#### Calcium sulfate hemihydrate

CAS 10034-76-1; 26499-65-0; EINECS/ELINCS 231-900-3

*Synonyms:* Dried calcium sulfate; Dried gypsum; Gypsum hemihydrate; Plaster of Paris

*Formula:* CaO,S • ½H<sub>2</sub>O

*Properties:* Wh. or almost wh. fine powd., odorless, tasteless; sl. sol. in water; sol. in dil. min. acids; pract. insol. in alcohol; m.w. 145.15; m.p. 163 C (loses ½ water to form anhyd. material); nonflamm.

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup> (calcium sulfate); ing. of large amts. may cause blockage of upper intestinal tract; pract. nontoxic by inh.; high concs. of dust may cause coughing and mild temporary irritation; dust is nonirritating to skin and eyes; alpha form may cause severe skin burns when mixed with water (3:1)

*Precaution:* Nonhazard reaction with water to produce gypsum

*Storage:* Hygroscopic

*Uses:* Wall plasters, 'gypsum' wallboard, tiles, stucco, blocks, and moldings for building industry; statues; jewelry castings; paper industry; pharmaceuticals (plaster of Paris bandages, orthopedic and dental casts)

*Regulatory:* FDA approved for orals; BP, JP compliance

*Manuf./Distrib.:* Aldrich; Fluka

#### Calcium sulfite

CAS 10257-55-3

*Synonyms:* Sulfurous acid, calcium salt (1:1)

*Empirical:* CaO<sub>3</sub>S

*Formula:* CaSO<sub>3</sub>

*Properties:* Wh. powd.; sol. in sulfurous acid; sl. sol. in water; m.w. 120.14

HMS: Health 1; Flammability 0; Reactivity 0

*Uses:* Textiles (antichlor); disinfectant in sugar industry, brewing, biological cleansing; food preservative and discoloration retarder; paper mfg.; in cement

*Manuf./Distrib.:* Ruger

**Calcium sulfonate.** See Calcium sulfate

#### Calcium-zinc complex

*Uses:* Heat stabilizer for rigid and plasticized PVC, food-grade polymers, profiles, bottles, pipe, plastisols; stabilizer for flooring base coats, artificial leather, wallpaper, conveyor belts; compat. with isocyanate adhesion promoter

**C-10 alcohol.** See Decyl alcohol

#### C8-10 alcohols

CAS 85566-12-7

*Synonyms:* Alcohols, C8-10

*Uses:* Chemical intermediate; also for lube oil additives, plasticizers, surfactant feedstocks

*Trade Names:* Nafol® 810 D

#### C10 alcohols

*Synonyms:* Alcohols, C10

*Uses:* Intermediate for mfg. of toiletries, cosmetics, detergents, laundry softeners, lubricating oil additives, plasticizers, plastics additives, textile/leather additives, disinfectants, agrochem., paper defoamers, flotation agents

#### C10-14 alcohols

EINECS/ELINCS 283-066-5

*Synonyms:* Alcohols, C10-14

*Uses:* Lubricant in polymer processing, metal rolling, emollients/lubricants for cosmetics, defoamers; surfactant intermediate

*Trade Names:* Nafol® 1014

#### C12-18 alcohols

CAS 67762-25-8; EINECS/ELINCS 267-006-5

*Synonyms:* Alcohols, C12-18

*Uses:* Surfactant intermediate; polymerization; lubricant in polymer processing, metal rolling; emollient for cosmetics

*Trade Names:* Nafol® 1218

**C16-18 alcohols.** See Cetearyl alcohol

#### C20-24 alcohols

EINECS/ELINCS 307-145-1

*Synonyms:* Alcohols, C20-24

*Uses:* Intermediate for mfg. of toiletries, cosmetics, detergents, laundry softeners, lubricating oil additives, plasticizers, plastics additives, textile/leather additives, disinfectants, agrochem., paper defoamers, flotation agents

*Trade Names:* Nafol® 20+

#### C20-40 alcohols

*Synonyms:* Alcohols, C20-40

*Definition:* Mixture of syn. fatty alcohols with 20-40 carbons in the alkyl chain

*Uses:* Antioxidant; heat stabilizer; UV stabilizer; visc. depressant; emulsifier in cosmetics; promotes emollient protective films for skin care prods.; food-pkg. adhesives; chemical intermediate for oxidation, ethoxylation, sulfation, amination, esterification; coemulsifier and direct additive in coatings; plastics additive (processing aid, lubricant, dispersant)

*Trade Names:* Unilin® 425 Alcohol

**C18-alkenyl succinic anhydride.** See Octadecenyl succinic anhydride

**Callitris quadrivalvis.** See Sandarac (Callitris quadrivalvis) gum

**Callitris quadrivalvis gum.** See Sandarac (Callitris quadrivalvis) gum

**C-4 alpha olefin.** See 1-Butene

**C12 alpha olefin.** See Dodecene-1

#### C12-14 alpha olefin

CAS 64743-02-8 (generic); 68855-58-3 (generic); 68866-68-3; EINECS/ELINCS 272-492-7; UN No. NA 1993

*Properties:* Water-wh. liq.; dens. 0.764 g/ml (20 C); pour pt. -35 C; b.p. 216-250 C (5-95%); flash pt. (TCC) 81 C

*Toxicology:* LD50 (oral) > 10,000 mg/kg, (dermal) > 10,000 mg/kg; low acute toxicity; nonirritating to eyes and skin

*Precaution:* Combustible liq.; avoid contact with air or oxygen (explosion danger, adverse effect on subsequent reactions)

*Storage:* Store under nitrogen

*Uses:* Intermediate for biodeg. surfactants and specialty industrial chemicals; prod. of amines, amine oxides, oxo alcohols, alkylated aromatics, epoxides, and syn. fatty acids

*Manuf./Distrib.:* Albemarle

*Trade Names:* Neodene® 12/14

#### C14-16 alpha olefin

CAS 64743-02-8 (generic); 68855-59-3 (generic); EINECS/ELINCS 272-493-2

*Definition:* Blend of tetradecene and hexadecene

*Properties:* Water-wh. clear liq.; dens. 0.776 g/ml (20 C); b.p. 245-279 C (5-95%); pour pt. -14 C; flash pt. (PMCC) 113 C

*Toxicology:* Low acute toxicity by oral and dermal exposure; not expected to be skin or eye irritant

*Precaution:* Avoid contact with air or oxygen (explosion danger from peroxide formation, adverse effect on subsequent reactions)

*Storage:* Store under nitrogen blanket

*Uses:* Intermediate in prod. of biodeg. surfactants, oxo alcohols, alkylated aromatics, epoxides, tanning oils, syn. fatty acids, and alpha olefin sulfonates

*Manuf./Distrib.:* Albemarle; BP Amoco

*Trade Names:* Neodene® 14/16

#### C16-18 alpha olefin

CAS 64743-02-8 (generic); 68866-60-7; EINECS/ELINCS 272-494-8

*Properties:* Water-wh. liq.; dens. 0.787 g/ml (20 C); pour pt. -2 C; b.p. 285-316 C (5-95%); flash pt. (PMCC) 135 C

*Toxicology:* LD50 (oral) > 10,000 mg/kg, (dermal) > 10,000 mg/kg; low acute toxicity; nonirritating to eyes and skin

*Precaution:* Avoid contact with air or oxygen (explosion danger, adverse effect on subsequent reactions)

*Storage:* Store under nitrogen

## C20-24 alpha olefin

*Uses:* Intermediate for biodeg. surfactants and specialty industrial chemicals; prod. of oxo alcohols, alkylated aromatics, epoxides, tanning oils, syn. fatty acids, alpha olefin sulfonates

*Manuf./Distrib.:* Albemarle

*Trade Names:* Neodene® 16/18

## C20-24 alpha olefin

CAS 64743-02-8 (generic)

*Uses:* Intermediate for surfactants for personal care, specialty industrial chems. (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)

*Trade Names:* Gulftene® 20-24; Neodene® 20/22/24

## C24-28 alpha olefin

*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)

*Trade Names:* Gulftene® 24-28

## C30 alpha olefin

*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)

*Trade Names:* Gulftene® 30+

**Calx.** See Calcium oxide

**Canarium indicum resinoid.** See Elemi gum

**Canary yellow.** See Basic yellow 2

**Candelilla.** See Candelilla (*Euphorbia cerifera*) wax

**Candelilla cera.** See Candelilla (*Euphorbia cerifera*) wax

## Candelilla (*Euphorbia cerifera*) wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0; FEMA 3479

*Synonyms:* Candelilla; Candelilla cera; Candelilla wax; *Euphorbia cerifera* wax

*Definition:* Wax from *Euphorbia cerifera*

*Properties:* Yel.-brown to translucent solid; sol. in acetone, benzene, carbon disulfide, hot petrol. ether, gasoline, oils, turpentine, CCl<sub>4</sub>; sparingly sol. in alcohol; pract. insol. in water; dens. 0.983; m.p. 67-68 C; acid no. 10-20; sapon. no. 50-65; ref. index 1.4555

*Toxicology:* No known toxicity

*Precaution:* Combustible

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Mfg. of cosmetics, rubber substitutes, polishes, candles, sealing waxes, varnishes, leather dressing, cements, creams; for waterproofing; insect proofing; elec. insulation; inks; molding compositions; sizing paper; hardening other waxes; paint removers; food additive, lubricant, protective coating for citrus; masticatory substance in chewing gum base; pharmaceutical skin preps. and orals; emollient, film-former, gellant in cosmetics; in food-pkg. adhesives; adjuvant in resinous/polymeric food-contact coatings; in paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §175.105, 175.320, 176.180, 184.1976, GRAS; FEMA GRAS; Japan approved; approved for orals, topicals

*Manuf./Distrib.:* Aldrich; Allyson Enterprises; Charkit; Charlotte Chem.; Darwin; Frank B. Ross; Hansotech; Koster Keunen; Mutchler; Penta Mfg.; R.I.T.A.; Ruger; Spectrum Quality Prods.; Stevenson Cooper; Strahl & Pitsch; Universal Preserv-A-Chem

*Trade Names:* Candelilla Wax SP 50; Candelilla Wax SP 75; Candelilla Wax SP 76; Candelilla Wax SP 78 Prime Quality Crude; Candelilla Wax SP 99; Candelilla Wax SP 350; Candelilla Wax Fine; Koster Keunen Candelilla; Ross Candelilla Wax

*Trade Names Containing:* Ross Beeswax Substitute No. 628/5

## Candelilla synthetic

CAS 136097-95-5

*Uses:* Gellant, thickener, stabilizer, and moisturizer for cosmetics, leather dressings, furniture and other polish; cements; varnishes; sealing wax; elec. insulating compositions; phonograph records; rubber; waterproofing; wax for pharmaceuticals, precision casting, lubricants, adhesives, paper coatings/sizing, chewing gum base, candles

*Trade Names:* Candelilla Wax SP 24A; Candelilla Wax SP 803; Koster Keunen Synthetic Candelilla

**Candelilla wax.** See Candelilla (*Euphorbia cerifera*) wax

**Canola oil (low erucic acid rapeseed oil).** See Rapeseed (*Brassica campestris*) oil

**Caoutchouc.** See Natural rubber

**CAP.** See Cellulose acetate propionate

## Capramide DEA

CAS 136-26-5; EINECS/ELINCS 205-234-9

*Synonyms:* Capric acid diethanolamide; N,N-Bis (2-hydroxyethyl) decanamide; Decanamide, N,N-bis(2-hydroxyethyl)-

*Definition:* Mixture of ethanolamides of capric acid

*Empirical:* C<sub>14</sub>H<sub>29</sub>NO<sub>3</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>8</sub>CON(CH<sub>2</sub>CH<sub>2</sub>OH)<sub>2</sub>

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Surfactant; antistat, visc. control agent in cosmetics; foam booster/stabilizer; wetting agent; thickener; defoamer in food-contact paper/paperboard; in resin-bonded filters for food contact; in food-contact textiles

*Regulatory:* FDA 21CFR §176.210, 177.2260, 177.2800

## Capric acid

CAS 334-48-5; EINECS/ELINCS 206-376-4; FEMA 2364

*Synonyms:* N-Capric acid; Capric acid; Caprylic acid; Carboxylic acid C<sub>10</sub>; Decanoic acid; n-Decanoic acid; Decoic acid; n-Decoic acid; Decylic acid; n-Decylic acid; 1-Nonanecarboxylic acid

*Classification:* Fatty acid

*Empirical:* C<sub>10</sub>H<sub>20</sub>O<sub>2</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>8</sub>COOH

*Properties:* Wh. to pale yel. crystals, unpleasant odor; sol. in org. solvs. incl. ethanol, alkalis; insol. in water; m.w. 172.27; dens. 0.8858 (40 C); m.p. 31.5 C; b.p. 270 C; acid no. 320-330; ref. index 1.4288 (40 C)

*Toxicology:* LD50 (IV, mouse) 129 mg/kg; poison by IV route; skin irritant; mutagenic data; TSCA listed

*Precaution:* Combustible

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Esters for perfumes and flavors; base for wetting agents; emulsifier in cosmetics; intermediate for chemical synthesis, food-grade additives; plasticizer; resins; foods (defoamer, lubricant); pharmaceutical flavoring agent; in food-pkg. adhesives; in food-contact paper/paperboard; defoamer in food-contact paper coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.210, 172.860, 173.340, 175.105, 175.320, 176.170, 176.200, 176.210, 177.1010, 177.1200, 177.2260, 177.2600, 177.2800, 178.3570, 178.3910; FEMA GRAS

*Manuf./Distrib.:* Akzo Nobel; Aldrich; Ashland; Berje; Cognis/Chems. Group; Conдор; Fluka; Grau Aromatics; Independent Chem.; JarChem Ind.; Kraft Chem.; Penta Mfg.; Primachem; Procter & Gamble; Robeco; Sea-Land; Sigma; Uniqema N. Am.; Universal Preserv-A-Chem; Varsal Instruments

**n-Capric acid.** See Capric acid

**Capric acid diethanolamide.** See Capramide DEA

**Capric alcohol.** See Decyl alcohol

**Caprinic acid.** See Capric acid

**Caprinic alcohol.** See Decyl alcohol

## Caprolactone acrylate monomer

*Formula:* CH<sub>2</sub>HOCOCH<sub>2</sub>CH<sub>2</sub>OCOCH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>OH

*Uses:* Adhesion props. for UV and electron beam curing; as protective coating for metal, plastics, wood, and paper; as acrylic adhesive for metal, plastics, PC, acrylic sheet, and paper

*Trade Names:* SR 495

**1-Caprylene.** See Octene-1

## Caprylic acid

CAS 124-07-2; EINECS/ELINCS 204-677-5; FEMA 2799

*Synonyms:* C-8 acid; n-Caprylic acid; 1-Heptanecarboxylic acid; Octanoic acid; n-Octanoic acid; Octic acid; Octoic acid; n-Octoic acid; n-Octylic acid

*Classification:* Fatty acid

*Empirical:* C<sub>8</sub>H<sub>16</sub>O<sub>2</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>6</sub>COOH

*Properties:* Colorless leaf or oily liq.; unpleasant odor; burning rancid taste; sol. in alkalis, ethanol, chloroform, ether, carbon disulfide, petrol. ether,

glac. acetic acid; sl. sol. in water; m.w. 144.21; dens. 0.91 (20/4 C); m.p. 16 C; b.p. 237.5 C; ref. index 1.4280

**Toxicology:** LD50 (oral, rat) 10,080 mg/kg, (IV, mouse) 600 mg/kg; mod. toxic by IV route; mildly toxic by ing.; skin irritant; yields irritating vapors which can cause coughing; mutagenic data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Mfg. of dyes, drugs, perfumes; antimicrobial agent; component of food- and pharmaceutical-grade additives; defoamer; flavoring agent; fragrance; lubricant; antimicrobial preservative in cheese wraps; plasticizer; emulsifier in cosmetics; in food-pkg. adhesives; in food-contact paper/paperboard; defoamer in food-contact paper coatings, paper/paperboard

**Use Level:** Limitation 0.013% (baked goods), 0.04% (cheese), 0.005% (fats, oils, frozen dairy desserts, gelatins/puddings, meat prods., soft candy), 0.016% (snack foods), 0.001% (other food)

**Regulatory:** FDA 21CFR §172.210, 172.860, 173.340, 175.105, 175.320, 176.170, 176.200, 176.210, 177.1010, 177.1200, 177.2260, 177.2600, 177.2800, 178.3570, 178.3910, 184.1025, 186.1025, GRAS; GRAS as indirect additive; FEMA GRAS; BP compliance

**Manuf./Distrib.:** ADA Int'l.; Akzo Nobel; Aldrich; Alfrebro; Ashland; Berje; Cognis/Chems. Group; Condor; Fluka; Grau Aromatics; Independent Chem.; Indofine; JarChem Ind.; Kraft Chem.; Napp Tech.; Penta Mfg.; Primachem; Procter & Gamble; Robeco; Sea-Land; Sigma; Spectrum Quality Prods.; Uniqema N. Am.; Uniqema/Oleochems.; United Coconut Chem.; Varsal Instruments

**n-Caprylic acid.** See Caprylic acid

**Caprylic acid, methyl ester.** See Methyl caprylate

**Caprylic, capric acid, propylene glycol diester.** See Propylene glycol dicaprylate/dicaprate

**Caprynic acid.** See Capric acid

### Captan

CAS 133-06-2; EINECS/ELINCS 205-087-0

**Synonyms:** 1H-Isindole-1,3(2H)-dione, 3a,4,7,7a-tetrahydro-2-(trichloromethyl)thio-; 1,2,3,6-Tetrahydro-N-(trichloromethylthio)phthalimide; N-Trichloromethylmercapto-4-cyclohexene-1,2-dicarboximide; N-Trichloromethylthio-4-cyclohexene-1,2-dicarboximide; N-(Trichloromethylthio)cyclohex-4-ene-1,2-dicarboximide; N-Trichloromethylthiotetrahydrophthalimide

**Classification:** Organic compd.

**Empirical:** C<sub>8</sub>H<sub>8</sub>Cl<sub>3</sub>NO<sub>2</sub>S

**Properties:** Crystal, odorless; pract. insol. in water; partly sol. in benzene, chloroform, tetrachloroethane; m.w. 300.59; dens. 1.74; m.p. 178 C

**Toxicology:** ACGIH TLV/TWA 5 mg/m<sup>3</sup>; LD50 (oral, rat) 9000 mg/kg; LC50 (inh., mouse, 2 h) 5000 mg/m<sup>3</sup>; LDLo (IP, rat) 25 mg/kg; poison by IP route; mod. toxic to humans by ing.; mod. toxic by inh.; irritant; tumorigen; experimental teratogen; questionable carcinogen; human mutation data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of Cl<sub>2</sub>, SO<sub>x</sub>, and NO<sub>x</sub>

**Uses:** Seed treatment; fungicide, mildewcide, and bacteriostat in plants, plastics, solv.-based coatings, leather, fabrics, fruit preservation; plastics biostabilizer; gas odorant; antimicrobial preservative for topical pharmaceuticals; mold- and mildew-proofing agent in food-contact coatings; in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.170; SARA reportable

**Manuf./Distrib.:** R. T. Vanderbilt

**Carbamic acid, butyl-3-iodo-2-propynyl ester.** See Iodopropynyl butylcarbamate

**Carbamic acid, dimethyldithio-, anhydrosulfide.** See Tetramethylthiuram monosulfide

**Carbamic acid, dimethyldithio-, potassium salt, hydrate.** See Potassium dimethyldithiocarbamate

**Carbamic acid, dimethyldithio-, zinc salt (2:1).** See Zinc dimethyldithiocarbamate

**Carbamic acid, homopolymer, octadecyl-ethenyl ester.** See Polyvinyl octadecyl carbamate

**Carbamic acid, N-hydroxymethyl-n-methyldithio-, potassium salt.** See Potassium N-hydroxymethyl-N-methyldithiocarbamate

**Carbamide.** See Urea

**Carbamide resin.** See Urea

**Carbamic acid.** See Urea

**Carbamimidic acid.** See Urea

**Carbamodithioic acid, cyano-, disodium salt.** See Disodium cyanodithioimidocarbonate

**Carbamodithioic acid, dimethyl-, potassium salt.** See Potassium dimethyldithiocarbamate

**Carbamodithioic acid, dimethyl-, sodium salt.** See Sodium dimethyldithiocarbamate

**Carbamodithioic acid, N-methyl-N-hydroxymethyl-, potassium salt.** See Potassium N-hydroxymethyl-N-methyldithiocarbamate

**Carbazole violet.** See Pigment violet 23

### Carbendazim

CAS 10605-21-7; 63090-40-4; 63278-70-6; 83601-81-4; 105268-95-9; EINECS/ELINCS 234-232-0

**Synonyms:** BMC; MBC; 2-Benzimidazolecarbamic acid, methyl ester; 1H-Benzimidazol-2-ylcarbamic acid methyl ester; 1H-Benzimidazole-2-yl methyl carbamate; N-2-(Benzimidazolyl) carbamate; Carbendazol; 2-(Methoxycarbonylamino) benzimidazol; 2-(Methoxycarbonylamino) benzimidazole; Methyl 2-benzimidazolecarbamate; Methyl benzimidazole-2-yl carbamate; Methyl benzimidazol-2-yl carbamate; 2-(Methyloxycarbonylamino) benzimidazole

**Empirical:** C<sub>8</sub>H<sub>8</sub>N<sub>2</sub>O<sub>2</sub>

**Properties:** Nearly wh. powd.; odorless; sol. in DMF; sl. sol. in most solvs.; sol. < 1 g/100 g in xylene, cyclohexanone; m.w. 190.18; m.p. 302-307 C (dec.)

**Toxicology:** LD50 (oral, rat) 6400 mg/kg, (skin, rat) 2 g/kg, (IP, rat) 1720 mg/kg; mod. toxic by skin contact, mildly toxic by ing. and IP routes; experimental teratogen, reproductive effector; mutagen; human mutagenic data; TSCA listed

**Environmental:** Aquatic LC50 (carp, 96 h) 4 mg/l, (rainbow trout, 96 h) 2.3 mg/l; avian LD50 (oral, Japanese quail) 10,996 mg/kg; nontoxic to bees

**Precaution:** Heated to decomp., emits toxic fumes of NO<sub>x</sub>

**Uses:** Systemic fungicide; pesticide; biocide for preservatives

**Manuf./Distrib.:** Aldrich; BASF/Agri; Gilmore; Helm AG; Hoechst Schering AgrEvo

**Trade Names:** Protectol<sup>®</sup> BCM; Protectol<sup>®</sup> BCM-FL

**Carbendazol.** See Carbendazim

**Carbinol.** See Methyl alcohol

**'Carbitol'.** See Ethoxydiglycol

**'Carbolic acid'.** See Phenol

### Carbomer

CAS 9003-01-4 (generic); 9007-16-3 (generic); 9007-17-4 (generic); 9007-20-9; 9062-04-8; 54182-57-9; 76050-42-5

**Synonyms:** Acrylic acid, polymer with sucrose-polyallyl ether; Carboxypolymethylene

**Definition:** Homopolymer of acrylic acid crosslinked with an allyl ether of pentaerythritol or an allyl ether of sucrose

**Properties:** Wh. fluffy powd., odorless; dens. 1.41; anionic

**Toxicology:** LD50 (oral, rat) 4100 mg/kg; mod. toxic by ingestion; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Storage:** Hygroscopic

**Uses:** Emulsifier; thickener; stabilizer; suspending agent; for lubricating, quenching and silicone emulsions; graphite; polyethylene; fiber and paper suspensions; textile backcoatings; pharmaceuticals; emulsion stabilizer, visc. control agent in cosmetics; solvent thickener for cosmetics, pharmaceuticals; food-pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

**Use Level:** 0.4% (suspending agent), 0.5-5% (aq. ointment base)

**Regulatory:** FDA approved for orals, rectals, topicals; BP compliance

**Manuf./Distrib.:** Aldrich; Sigma; Spectrum Quality Prods.

**Trade Names:** Acritamer<sup>®</sup> 501E; Acritamer<sup>®</sup> 504E; Carbopol<sup>®</sup> 2984; Carbopol<sup>®</sup> 5984

**Trade Names Containing:** Foambreaker

### Carbomer 910

CAS 9003-01-4 (generic)

**Definition:** Polymer of acrylic acid crosslinked with allyl ether of pentaerythritol

**Properties:** Wh. fluffy powd., sl. char. odor; when neutralized with alkali

hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 750,000; visc. 3000-7000 cps (1% aq. disp.); pH 3 (1% disp.); anionic

*Toxicology:* TSCA listed

*Storage:* Hygroscopic

*Uses:* Suspending agent, thickener for pharmaceuticals; emulsifier; thickener; stabilizer; suspending agent

*Regulatory:* USP/NF compliance

*Manuf./Distrib.:* Aldrich; Sigma; Spectrum Quality Prods.

*Trade Names:* Carbopol® 910

#### Carbomer 934

CAS 9003-01-4 (generic); 9007-16-3 (generic)

*Definition:* Polymer of acrylic acid crosslinked with allyl ether of sucrose

*Properties:* Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 3,000,000; visc. 30,500-39,400 cps (0.5% aq. disp.); pH 3 (1% disp.); anionic

*Toxicology:* LD50 (oral, rat) 4100 mg/kg, (oral, mouse) 4550 mg/kg; TSCA listed

*Storage:* Hygroscopic

*Uses:* Thickener, suspending agent, dispersant, emulsifier for pharmaceuticals

*Regulatory:* FDA approved for orals, rectals, topicals; USP/NF compliance

*Manuf./Distrib.:* Aldrich; Sigma

*Trade Names:* Carbopol® 934

#### Carbomer 940

CAS 9003-01-4 (generic); 9007-17-4 (generic)

*Definition:* Polymer of acrylic acid crosslinked with allyl ether of pentaerythritol

*Properties:* Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 4,000,000; visc. 40,000-60,000 cps (0.5% aq. disp.); pH 3 (1% disp.); anionic

*Toxicology:* No known toxicity; TSCA listed

*Storage:* Hygroscopic

*Uses:* Thickener, suspending agent, dispersant, emulsifier for pharmaceuticals

*Regulatory:* FDA approved for ophthalmics, topicals; USP/NF compliance

*Manuf./Distrib.:* Aldrich; Sigma; Spectrum Quality Prods.

*Trade Names:* Carbopol® 940; Carbopol® 980

#### Carbomer 941

CAS 9003-01-4 (generic)

*Definition:* Polymer of acrylic acid crosslinked with allyl ether of pentaerythritol

*Properties:* Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 1,250,000; visc. 4000-11,000 cps (0.5% aq. disp.); pH 3 (1% disp.); anionic

*Toxicology:* No known toxicity; TSCA listed

*Storage:* Hygroscopic

*Uses:* Thickener, suspending agent, dispersant, emulsifier for pharmaceuticals

*Regulatory:* FDA approved for topicals; USP/NF compliance

*Manuf./Distrib.:* Aldrich; Sigma; Spectrum Quality Prods.

*Trade Names:* Carbopol® 941; Carbopol® 971P; Carbopol® 981

#### Carbomer 934P

CAS 9003-01-4 (generic)

*Synonyms:* Carpolene

*Definition:* Polymer of acrylic acid crosslinked with allyl ether of sucrose

*Properties:* Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 3,000,000; visc. 29,400-39,400 cps (0.5% aq. disp.); pH 3 (1% disp.); anionic

*Toxicology:* TSCA listed

*Storage:* Hygroscopic

*Uses:* Emulsifier, suspending agent, thickener for pharmaceuticals

*Regulatory:* USP/NF compliance

*Manuf./Distrib.:* Aldrich; BFGoodrich; Sigma; Spectrum Quality Prods.

*Trade Names:* Carbopol® 934P; Carbopol® 974P

#### Carbon, activated

CAS 7440-44-0; 16291-96-6; 64365-11-3; EINECS/ELINCS 231-153-3; UN No. NA 1361 (DOT), 1362 (DOT)

*Synonyms:* Activated carbon; Activated charcoal; Active carbon; CI 77265; Charcoal, activated; Decolorizing carbon; Graphite; Pigment black 10

*Definition:* The residue from the destructive distillation of various org. materials, treated to increase its adsorptive power

*Empirical:* C

*Properties:* Black porous solid, coarse gran., or powd.; odorless; tasteless; insol. in water, org. solvs.; m.w. 12.01; dens. 0.08-0.5

*Toxicology:* Toxic by inh. of dust; dust irritant, esp. to eyes and mucous membranes; TSCA listed

*Precaution:* Flamm. solid; DOT: spontaneously combustible; dust is flamm. and explosive when exposed to heat, flame, or oxides

*HMIS:* Health 0; Flammability 1; Reactivity 0

*Uses:* Adsorbent; clarifying, deodorizing, decolorizing, filtering, dechlorination for air, water and wastewater treatment; solvent recovery; SO<sub>2</sub> removal from stack gases and clean rooms; decolorizing, taste/odor control agent in food processing; brewing; removal of jet fumes from airports; catalyst/natural gas purification; chromium electroplating; air conditioning; refining of pharmaceutical chemicals; car catalytic converters; in medicine as antidote, adsorptive; in diarrheal prods.; in closure-sealing gaskets for food containers

*Use Level:* Limitation 0.9% (wine), 0.25% (pale dry sherry), 0.4% (red and blk. grape juice); ADI not specified (FAO/WHO)

*Regulatory:* FDA 21CFR §177.1210, 240.361, 240.365, 240.401, 240.405, 240.527, 240.527a, GRAS; BATF 27CFR §240.1051; USDA 9CFR §318.7; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* Aldrich; Asbury Carbons; Atofina; Calgon Carbon; Carbochem; Ceca SA; Fluka; Harcros; Honeywell Perf. Polymers; Melchemie bv; Norit Am.; O.C. Lugo; Pica SA; ProSciTech; Reade Advanced Materials; Ruger; Sigma; Spectrum Quality Prods.; Süd-Chemie Inc; Westvaco

*Trade Names:* Actitex®

**Carbonate magnesium.** See Magnesium carbonate

#### Carbon black

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Synonyms:* Acetylene black; Carbon black acetylene; Channel black; Charcoal; CI 77266; Furnace black; Lamp black; Oil-furnace black; Pigment black 6; Pigment black 7; Thermal acetylene black; Thermal atomic black; Thermal black; Vegetable carbon

*Definition:* Finely divided particles of elemental carbon obtained by incomplete combustion of hydrocarbons (channel or impingement process)

*Properties:* Insol. in water, ethanol, veg. oil

*Toxicology:* ACGIH TLV/TWA 3.5 mg/m<sup>3</sup>; TCLo (inh., rat, 6 h) 50 mg/m<sup>3</sup>; TLV 3.5 mg/m<sup>3</sup>; low toxicity by ingestion, inhalation, and skin contact; nuisance dust in high concs.; suspected carcinogen; tumorigen, mutagen; TSCA listed

*Uses:* Conductive colorant, filler, reinforcing agent in plastics; antistat; opacifier; in tire treads; belt covers; abrasion-resistant rubber prods.; leather; UV light absorber; colorant for paints, printing inks, carbon paper, typewriter ribbons; dye for paper; stove polish; phonograph records; nucleating agent in weather modification; battery electrodes; expander in battery plates; solar-energy absorber; antioxidant for rubber and latex; color additive, purification agent in food processing; colorant in food-contact polymers (channel process); in polymer systems for food contact (channel process); filler in food-contact rubber articles for repeated use (channel or furnace process)

*Regulatory:* Banned by U.S. FDA; channel carbon black: FDA 21CFR §176.170, 177.1650, 177.2400, 177.2600, 178.3297; may be used in foods for the European community; UK approved

*Manuf./Distrib.:* Akrochem; Akzo Nobel; Alfa Chem; Ameripol Synpol; Archway Sales; Asbury Carbons; BASF; BFGoodrich Hilton Davis; Cabot/Cab-O-Sil; Chem-Materials; Columbian Chems.; Continental Carbon; D.N. Lukens; Degussa-Hüls; Elementis Spec. Colorants/Addit.; Engelhard; Engineered Carbons; Exxon; Heucotech Ltd; J.M. Huber/Chems.; Landers-Segal Color; R.T. Vanderbilt; Reade Advanced Materials; Royale Pigments & Chems.; San Yuan; Spectrum Quality Prods.; Tamms Ind.; Tiarco; Whittaker, Clark & Daniels; Zeochem

*Trade Names:* Black Pearls® 430; Black Pearls® 450; Black Pearls® L; Continex® LH-10; Continex® N351; Mogul® L; Ponolith™ Fast Black P Liq.; Ponolith™ Supra Black B Liq.; Printex® XE 2; Raven® H2O;

Regal® 99I; Regal® 99R; Regal® 300R; Regal® 330; Regal® 330R;  
Regal® 400; Regal® 400R; Regal® SRF-S; Sterling® R  
*Trade Names Containing:* T-1133A; T-2005A; T-9087A

**Carbon black acetylene.** See Carbon black

### Carbon dioxide

CAS 124-38-9; EINECS/ELINCS 204-696-9; UN No. 1013 (DOT), 1015 (DOT), 1041 (DOT), 1845 (DOT), 1952 (DOT), 2187 (DOT)

*Synonyms:* Carbonic acid anhydride; Carbonic acid gas; Carbonic anhydride; Dry ice

*Classification:* Gas

*Empirical:* CO<sub>2</sub>

*Properties:* Colorless gas; odorless; sol. 1 vol. dissolves in about 1 vol. of water; m.w. 44.01; m.p. subl. @ -78.5 C; nonflamm.

*Toxicology:* ACGIH TLV/TWA 5000 ppm; STEL 30,000 ppm; LCLo, (inh., human, 1 min) 10 pph; asphyxiant at > 10%; skin contact can cause burns; experimental teratogen; TSCA listed

*Precaution:* Various dusts explode in CO<sub>2</sub> atmospheres; several bulk metals will burn in CO<sub>2</sub>; reacts vigorously with various chems.; incompat. with acrylaldehyde, aziridine, metal acetylides, sodium peroxide

*Uses:* Refrigeration; aerosol propellant; chemical intermediate; fire extinguishing; inert atmospheres; medicine; oil wells; mining; blowing agent; municipal water treatment; precipitant for waste stream treatment; pH control; silica activation; recarbonation in water softening; propellant in cosmetics; food additive, preservative, aerating agent, carbonation, cooling agent, leavening agent, pH control agent, processing aid, propellant, carbonated beverages; air displacement in pharmaceutical inhalants

*Regulatory:* FDA 21CFR §169.115, 169.140, 169.150, 184.120, GRAS, 193.45 (modified atm. for pest control); USDA 9CFR §318.7, 381.147; BATF 27CFR 240.1051; Japan approved; Europe listed; UK approved; FDA approved for inhalants; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* Air Liquide Am.; Air Prods.; Aldrich; BOC Gases; Carbonic Ind.; Great Western; MG Ind.; Nissan Chem. Ind.; Norsk Hydro AS; Nova Ltd; Praxair; Scott Spec. Gases; Showa Denko

*Trade Names Containing:* MS-122DF

**Carbonic acid anhydride.** See Carbon dioxide

**Carbonic acid barium salt.** See Barium carbonate

**Carbonic acid calcium salt.** See Calcium monocarbonate; Whiting

**Carbonic acid calcium salt (1:1).** See Calcium monocarbonate

**Carbonic acid, cyclic propylene ester.** See Propylene carbonate

**Carbonic acid disodium salt.** See Sodium carbonate

**Carbonic acid gas.** See Carbon dioxide

**Carbonic acid magnesium salt.** See Magnesium carbonate

**Carbonic acid magnesium salt (1:1).** See Magnesium carbonate

**Carbonic acid magnesium salt (2:1).** See Magnesium carbonate

**Carbonic acid monosodium salt.** See Sodium bicarbonate

**Carbonic acid, 1,2-propylene glycol ester.** See Propylene carbonate

**Carbonic acid, zinc salt (1:1).** See Zinc carbonate

**Carbonic anhydride.** See Carbon dioxide

**4,4'-Carbonimidoylbis (N,N-dimethylbenzenamine monohydrochloride).**  
See Basic yellow 2

**Carbon tetraboride.** See Boron carbide

**Carbonyldiamine.** See Urea

**1,3-Carbonyl dioxypropane.** See Propylene carbonate

**Carbothialdine.** See 3,5-Dimethyl tetrahydro-2-H,1,3,5-thiadiazole-2-thione

**Carboxide.** See Calcium hydroxide

**3-Carboxy-4-hydroxybenzenesulfonic acid.** See 5-Sulfosalicylic acid

**3-Carboxy-4-hydroxybenzenesulfonic acid, dihydrate.** See 5-Sulfosalicylic acid dihydrate

**3-Carboxy-5-hydroxy-1-p-sulfophenyl-4-p-sulfophenylazopyrazole trisodium salt.** See Tartrazine

### Carboxylated styrene butadiene

*Synonyms:* Carboxylated styrene-butadiene copolymer

*Uses:* Nonwoven binder for textiles; in interior vapor barrier primer sealers and flat wall paint; binder for paper coatings; food-pkg. adhesives/paper

*Trade Names:* GenFlo® 557; GenFlo® 559; GenFlo® 576; Hitex-S103; Hitex-S107; Hitex-S108; Hitex-S301; Rovene® 4100; Rovene® 4106; Rovene® 4112; Rovene® 4305; Rovene® 4402; Rovene® 5005; Styronal™ BN 4204; Styronal™ BN 4606X; Styronal™ ND 430;

Styronal™ ND 656; Styronal™ ND 810; Styronal™ ND 834; Styronal™ NX 4515 X; Tychem® 68710-00; Tylac® 68219-00

### Carboxylated styrene-butadiene-acrylonitrile

*Uses:* Latex in papermaking; binder for printing papers

*Trade Names:* GenCryl® 9705; GenCryl® 9715

**Carboxylated styrene-butadiene copolymer.** See Carboxylated styrene butadiene

**Carboxylic acid C<sub>10</sub>.** See Capric acid

**Carboxylic acid C<sub>18</sub>.** See Stearic acid

**Carboxymethylcellulose.** See Carboxymethylcellulose sodium

### Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

*Synonyms:* CMC; NaCMC; SCMC; Carboxymethylcellulose; Carboxymethylcellulose, sodium salt; Carboxymethyl ether cellulose sodium salt; Carmellose sodium; Cellulose carboxymethyl ether; Cellulose carboxymethyl ether sodium salt; Cellulose glycolic acid sodium salt; Cellulose gum; Cellulose, polyanionic; Cellulose sodium glycolate; CMC sodium salt; Sodium carboxymethylcellulose; Sodium cellulose glycolate; Sodium CMC; Sodium CM-cellulose

*Classification:* Synthetic cellulose gum

*Definition:* Sodium salt of the polycarboxymethyl ether of cellulose

*Formula:* R<sub>n</sub>OCH<sub>2</sub>COONa

*Properties:* Colorless or wh. powd. or gran., odorless; water sol. depends on degree of substitution; insol. in org. liqs.; m.w. 21,000-500,000; visc. various; m.p. > 300 C; pH 6.5-8.5 (1%); anionic

*Toxicology:* LD50 (oral, rat) 27,000 mg/kg; LC50 (inh., 4 h, rat) > 5800 mg/m<sup>3</sup>; mildly toxic by ing.; questionable carcinogen; experimental reproductive effects, neoplastigenic data; tumorigen; migrates to food from pkg. materials; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of Na<sub>2</sub>O  
HMIS: Health 1; Flammability 1; Reactivity 0

*Storage:* Hygroscopic

*Uses:* Viscosifier/fluid loss agent in drilling muds; in detergents as soil-suspending agent; in emulsion paints; adhesives; inks; textile sizes; protective colloid in paints, inks; binder in paper coatings; in rubber industry; dry-str. additive in paper; flotation depressant; thickener in cosmetics, printing dyes; binder, emulsion stabilizer, film-former in cosmetics; weakly acidic ion-exchange resins; food stabilizer, binder, thickener, extender, boiler water additive; in pharmaceuticals as suspending agent, excipient, viscosity modifier; dispersant; emulsifier; in food-pkg. adhesives

*Use Level:* ADI 0-25 mg/kg (FAO/WHO)

*Regulatory:* FDA 21CFR §133.134, 133.178, 133.179, 150.141, 150.161, 173.310, 175.105, 175.300, 182.70, 182.1745, GRAS; USDA 9CFR 318.7, limitation 1.5%, must be added dry; 9CFR 381.147; Japan restricted (2% max.); Europe listed; UK approved; approved for dentals, injectables, orals, topicals; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* Akzo Nobel; Aldrich; Alfa Chem; Browning; CarboMer; FMC; Fabrichem; Fluka; Hercules/Aqualon; J.W.S. Delavau; Ruger; Sigma; Sinochem Tianjin; Spectrum Quality Prods.

*Trade Names:* Aqualon® CMC-T; Tylose® C, CB Series; Tylose® CBR Grades; Tylose® C-G1; Tylose® CR

**Carboxymethylcellulose, sodium salt.** See Carboxymethylcellulose sodium

### Carboxymethyl corn starch

*Uses:* Visc. builder and water retention aid in aq. pigment coatings, paper coatings

*Trade Names:* Vandrox® 184

**N-(Carboxymethyl)-N,N-dimethyl-1-hexadecanaminium hydroxide, inner salt.** See Cetyl betaine

**Carboxymethyl ether cellulose sodium salt.** See Carboxymethylcellulose sodium

### Carboxymethyl guar

*Uses:* Thickener, suspending agent for personal care prods.

*Manuf./Distrib.:* P.L. Thomas

*Trade Names:* Jaguar® 8707

**(Carboxymethyl) hexadecyldimethylammonium hydroxide, inner salt.** See Cetyl betaine

**N-(Carboxymethyl)-N'-(2-hydroxyethyl)-N,N'-ethylenedi-, trisodium salt.**

See Trisodium HEDTA

**Carboxymethyl hydroxypropyl guar**

CAS 68130-15-4

*Synonyms:* Guar gum, carboxymethyl 2-hydroxypropyl ether, sodium salt

*Definition:* Sodium salt of a propylene glycol ether of carboxymethyl guar

*Uses:* Emulsion stabilizer, visc. control agent in cosmetics; thickener; suspending agent

*Manuf./Distrib.:* Aldrich; P.L. Thomas

*Trade Names:* Jaguar® 418

**N-Carboxymethyliminobis (ethylenenitrilo) tetra (acetic acid).** See Pentetic acid

**N-(3-Carboxy-1-oxosulfo)propyl-N-octadecyl-L-aspartic acid, tetrasodium salt.** See Tetrasodium dicarboxyethyl stearyl sulfosuccinamate

**9-o-Carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene 3-ethochloride.** See Basic violet 10

**(9-(o-Carboxyphenyl)-6-(diethylamino)-3H-xanthen-3-ylidene) diethylammonium chloride.** See Basic violet 10

**N-[9-Carboxyphenyl)-6-(diethylamino)-3H-xanthen-3-ylidene]-N-ethylethanaminium chloride.** See Basic violet 10

**Carboxypolymethylene.** See Carbomer

**Carmellose sodium.** See Carboxymethylcellulose sodium

**Carnauba.** See Carnauba (*Copernicia cerifera*) wax

**Carnauba (*Copernicia cerifera*) wax**

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Synonyms:* Brazil wax; Carnauba; Carnauba wax; Cera carnauba; Copernicia cerefera wax; Copernicia cerifera wax; Waxes, carnauba

*Definition:* Wax obtained from leaves and leaf buds of the carnauba palm, *Copernicia cerifera*

*Properties:* Yel. greenish brown lumps, solid, char. odor; sol. in ether, alkalis, warm benzene, warm chloroform, toluene; sl. sol. in boiling alcohol; insol. in water; dens. 0.995 (15/15 C); m.p. 82-85.5 C; acid no. 2-7; sapon. no. 78-89; ref. index 1.4500

*Toxicology:* Essentially nontoxic; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Storage:* Protect from light

*Uses:* Leather finishes; varnishes; waterproofing; hardening candles; paraffin wax modifier; substitute for beeswax; plasticizer for dental compds.; barrier, emollient, film-former, stabilizer in cosmetics; film-former; slip agent, lubricant in paints; car/floor/furniture/shoe polish ingred.; carbon paper ingred.; foods (anticaking agent, candy glaze/polish, formulation aid, lubricant, release agent, surface-finishing agent); pharmaceutical coating agent; adjuvant in resinous/polymeric food-contact coatings

*Regulatory:* FDA 21CFR §175.320, 184.1978, GRAS; Japan approved; Europe listed (permitted only in chocolate prods.); UK approved; approved for orals, topicals; USP/NF, BP, Ph.Eur., JP compliance

*Manuf./Distrib.:* Aldrich; Allchem Ind.; Allyson Enterprises; Bruchem; Charkit; Chemcor; Frank B. Ross; Hansotech; Koster Keunen; Maypro Ind.; Mitsui & Co. USA; Mutchler; Pangaea Sciences; Penta Mfg.; Ruger; Scheel; Serra Int'l. Trading; Shamrock Tech.; Sigma; Specialty Prods.; Spectrum Quality Prods.; Stevenson Cooper; Strahl & Pitsch; Universal Preserv-A-Chem; Zetapharm

*Trade Names:* Carnauba Wax SP 8; Carnauba Wax SP 59-2; Carnauba Wax SP 63; Carnauba Wax SP 63 NF; Carnauba Wax SP 64 (Extra Light); Carnauba Wax SP 135; Carnauba Wax SP 142; Carnauba Wax SP 200; Carnauba Wax Coarse; Carnauba Wax Fine; Carnauba Wax Hard; Carnauba Wax Soft; Carnauba Wax Superfine; Koster Keunen Carnauba; Ross Carnauba Wax; Shamrock Hydrocer EC 98; Shamrock S-Nauba 5021

**Carnauba wax.** See Carnauba (*Copernicia cerifera*) wax

**Carob bean gum.** See Locust bean (*Ceratonia siliqua*) gum

**Carob flour.** See Locust bean (*Ceratonia siliqua*) gum

**Carob gum.** See Locust bean (*Ceratonia siliqua*) gum

**C<sub>8</sub> aromatics.** See Xylene

**Carpolene.** See Carbomer 934P

**Carrageen.** See Carrageenan (*Chondrus crispus*)

**Carrageenan.** See Carrageenan (*Chondrus crispus*)

**Carrageenan, calcium salt.** See Calcium carrageenan

**Carrageenan, calcium (II) salt.** See Calcium carrageenan

**Carrageenan (*Chondrus crispus*)**

CAS 9000-07-1; EINECS/ELINCS 232-524-2

*Synonyms:* 3,6-Anhydro-d-galactan; Carrageen; Carrageenan; Carrageenan gum; Carrageenin; Carragheanin; Carraghennan; Chondrus; Gum carrageenan; Irish gum; Irish moss

*Classification:* Sulfated polysaccharide

*Definition:* Hydrocolloid obtained from various members of the *Gigartinales* or *Solieriales* families of the red seaweed, *Rhodophyceae*; consists of sulfite esters of galactose and 3,6-anhydrogalactose copolymers

*Properties:* Yel. wh. powd., odorless, tasteless; sol. in hot water, hot conc. NaCl sol'n; insol. in oils and org. solvs.

*Toxicology:* LDLo (IV, rabbit) 5 mg/kg; poison by IV route; experimental tumorigen; suspected carcinogen; linked to ulcers in colon, fetal damage in test animals; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

*Uses:* Emulsifier, binder, extender, stabilizer, thickener, gelling agent in food prods. (milk/dairy prods.), toothpaste, cosmetics, pharmaceuticals; stabilizing aid in ice cream; protective colloid; in paper/paperboard in contact with aq./fatty foods

*Use Level:* 1-5%; ADI 75 mg/kg; 1-5%

*Regulatory:* FDA 21CFR §133.133, 133.134, 133.162, 133.178, 133.179, 136.110, 136.115, 136.130, 136.160, 136.180, 139.121, 139.122, 150.141, 150.161, 172.620, 172.623, 172.626, 176.170, 182.7255, GRAS; USDA 9CFR §318.7, 381.147; Japan approved; JSCI, European listed; UK approved; FDA approved for orals, topicals; USP/NF compliance

*Manuf./Distrib.:* AEP Colloids; Active Organics; Aldrich; Alfa Chem; Ashland; Browning; CarboMer; Carrageenan Co.; Charkit; Chart; Colloides Naturels; Colony Ind.; Dastech Int'l.; FMC; Fabrichem; Frutarom Meer; Gumix Int'l.; Helm NY; Hercules/Aqualon; Nitta Gelatin NA; P.L. Thomas; Rambach; Rochem Int'l.; Sarcom; Schweizerhall; Seppic; Sigma; Spectrum Quality Prods.; Spice King; TIC Gums; Tomen Am.; Toyota Tsusho Am.; Universal Preserv-A-Chem; V.L. Clark

**Carrageenan gum.** See Carrageenan (*Chondrus crispus*)

**Carrageenan, potassium salt.** See Potassium carrageenan

**Carrageenan, sodium salt.** See Sodium carrageenan

**Carrageenin.** See Carrageenan (*Chondrus crispus*)

**Carragheanin.** See Carrageenan (*Chondrus crispus*)

**Carraghennan.** See Carrageenan (*Chondrus crispus*)

**Carthamus tinctorius.** See Safflower (*Carthamus tinctorius*) oil

**Carthamus tinctorious oil.** See Safflower (*Carthamus tinctorius*) oil

**Casal green.** See Chromium oxide (Ic)

**Casein**

CAS 9000-71-9; EINECS/ELINCS 232-555-1

*Synonyms:* Milk protein, casein; Proteins, milk

*Definition:* Mixt. of phosphoproteins obtained from cow's milk

*Properties:* Wh. powd.; sol. in alkaline sol'ns.

*Toxicology:* Mild sensitive reactions in persons allergic to cow's milk; TSCA listed

*Storage:* Hygroscopic

*Uses:* Dietary supplement; animal feed ingred.; food processing aid (Japan); cheesemaking; frozen desserts; migrating to food from paper/paperboard; pharmaceuticals (slow-release, microencapsulation); raw material for paints; plastic items; binder in paper coatings; adhesives; textile sizing/finishing agent; textile fibers; binder in foundry sands; protective colloid in emulsion polymerization; stabilizer in rosin paper sizes; antistat in cosmetics

*Regulatory:* FDA 21CFR §166.110, 182.90, GRAS; Japan restricted; BP compliance

*Manuf./Distrib.:* Aabbitt Adhesives; Aldrich; Alfa Chem; Allchem Ind.; Am. Biorganics; Am. Casein; Browning; Chemical; Fluka; Houghton Chem.; Int'l. Casein; Nat'l. Casein; Research Organics; Sigma; Spectrum Quality Prods.; Trugman Nash; Ultra Additives

See also Milk protein

**Casein, ammonium salt.** See Ammonium caseinate

**Casein-sodium.** See Sodium caseinate

**Casein-sodium complex.** See Sodium caseinate

**Casein sodium salt.** See Sodium caseinate

**Caseins, sodium complexes.** See Sodium caseinate

**Castor oil.** See Castor (*Ricinus communis*) oil

**Castor oil acid, methyl ester.** See Methyl ricinoleate

**Castor oil aromatic.** See Castor (*Ricinus communis*) oil  
**Castor oil ethoxylate.** See PEG castor oil  
**Castor oil, hydrogenated.** See Hydrogenated castor oil  
**Castor oil, hydrogenated, ethoxylated.** See PEG hydrogenated castor oil

**Castor oil, potassium salt.** See Potassium castorate  
**Castor oil, sodium salt.** See Sodium castorate  
**Castor oil sulfated.** See Sulfated castor oil  
**Castor oil, sulfated, ammonium salt.** See Ammonium castor oil sulfate  
**Castor oil, sulfated, potassium salt.** See Potassium castor oil sulfate  
**Castor oil, sulfated, sodium salt.** See Sodium castor oil sulfate  
**Castor oil, sulfonated.** See Sulfated castor oil

#### Castor oil triglycerides

Uses: Defoamer in food-contact paper/paperboard  
 Regulatory: FDA 21CFR §176.210

#### Castor (*Ricinus communis*) oil

CAS 1323-38-2; 8001-79-4; EINECS/ELINCS 232-293-8; FEMA 2263  
 Synonyms: Castor oil; Aromatic castor oil; Castor oil aromatic; Ricinus oil; Aceite de ricino; Huile de ricini; Oleum ricini; Ricini oleum; Oil of Palma Christi; Ricinus communis oil; Tangantangan oil

Classification: Vegetable oil

Definition: Fixed oil obtained from seeds of *Ricinus communis*

Properties: Colorless to pale yel. viscous oily liq., char. odor; sol. in alcohol; misc. with glac. acetic acid, chloroform, ether; negligible sol. in water; dens. 0.961; m.p. -12 C; b.p. 313 C; acid no. < 4; iodine no. 83-88; sapon. no. 176-187; hyd. no. 160-168; flash pt. 230 C; ref. index 1.478; surf. tens. 39 dynes/cm (20 C)

Toxicology: Moderately toxic by ingestion; allergen; eye irritant; mild skin irritant; mist may cause sl. irritation of nose and throat; purgative, laxative in large doses; TSCA listed

Precaution: Combustible when exposed to heat; spontaneous heating may occur; incompat. with acids and bases (hydrolysis can occur), strong oxidizing agents (increased fire hazard)

Hazardous Decomp. Prods.: @ 340-400 C, pyrolysis occurs yielding heptaldehyde and undecylenic acids; further decomp. yields CO, CO<sub>2</sub>, possibly acrolein

NFPA: Health 0; Flammability 1; Reactivity 0

Storage: Store in cool, dry, well-ventilated area, out of direct sunlight; avoid generating mist

Uses: Plasticizer in lacquers, nitrocellulose, inks; PU coatings; drying oil; hydraulic fluids; in mfg. of Turkey red oil, soaps; leather treatment; surfactants; lubricant (metal drawing, machine lubrication, engine fuels); emollient in cosmetics; rubber preservative; food additive (emulsifier, stabilizer, foamer, antisticking agent, release agent, drying oil, flavoring); component of protective coatings; pharmaceutical vehicle, plasticizer, solvent, cosolvent; embalming fluids; laxative; drying oil in food-contact coatings; plasticizer in food-contact rubber articles for repeated use; in food-contact textiles, paper; in lubricants for incidental food-contact use; in surf. lubricants for mfg. of food-contact metallic articles

Use Level: 500 ppm max. (finished foods), 500 ppm max. (hard candy); 0.08-23 mg (solid oral dosage forms); 5-12.5% (topicals)

Regulatory: FDA 21CFR §73.1, 172.510, 172.876, 175.300, 176.210, 177.2600, 177.2800, 178.3120, 178.3570, 178.3910, 181.22, 181.26, 181.28; FEMA GRAS; FDA approved for injectables, orals, topicals; USP/NF, BP, Ph.Eur., JP compliance

Manuf./Distrib.: Actrachem; Air Prods.; Aldrich; Alzo; Am. Oil & Supply; Amber Syn.; Arista Ind.; Ashland; CasChem; Costec; Dastech Int'l.; Degen; Fanning; Fluka; George Uhe; Harcross; Indofine; J.H. Calo; Lanaetex Prods.; Lipo; Norman, Fox; Penta Mfg.; RTD; Rhodia HPCII; Ruger; Sea-Land; Sigma; Spectrum Quality Prods.; Stevenson Cooper; Süd-Chemie AG; Thornley; Uniqema/ICI Surf. Am.; Van Waters & Rogers; Vliengenthart BV; Welch, Holme & Clark; Zeochem

**Castorwax.** See Hydrogenated castor oil

**Catechol.** See Pyrocatechol

**Caustic lime.** See Calcium hydroxide

**Caustic soda.** See Sodium hydroxide

**(C16-C18) fatty alcohol, ethylene oxide reaction prod.** See Cetareth

#### C8, C12 olefin polymer, hydrogenated

CAS 163149-29-9

Classification: Olefin polymer, hydrogenated

Trade Names Containing: Chevron Clarity® Synthetic Paper Machine Oil ISO 100; Chevron Clarity® Synthetic Paper Machine Oil ISO 150; Chevron Clarity® Synthetic Paper Machine Oil ISO 220; Chevron Clarity® Synthetic Paper Machine Oil ISO 320; Chevron Clarity® Synthetic Paper Machine Oil ISO 460

**Cellaburate.** See Cellulose acetate butyrate

**Celloidin.** See Nitrocellulose

#### Cellophane

CAS 9006-02-4; 61788-77-0; EINECS/ELINCS 270-493-7

Synonyms: Cellulose, regenerated; Rayon; Rayon flock; Regenerated cellulose; Viscose rayon

Definition: Syn. fibers and filaments composed of regenerated cellulose

Formula: (C<sub>6</sub>H<sub>10</sub>O<sub>5</sub>)<sub>n</sub>

Properties: Transparent film or fiber; dens. 1.51 kg/l; strong, flexible; resist. to grease, oil, air

Toxicology: TDLo (implant, rat) 18 mg/kg; tumorigen

Environmental: Environmentally friendly; biodegradable

Precaution: Flamm.; mod. fire risk; untreated film loses str. @ 149 C and dec. @ 176-204 C on exposure to heat; non-self-extinguishing

Uses: Wrapping film or protective pkg. for fabricated articles, industrial applics., food, tobacco prods.; cellulose sponges; textile fibers; visc. control agent in cosmetics; in paper/paperboard in contact with aq./fatty foods

Regulatory: FDA 21CFR §176.170, 177.1200

#### Cellulase

CAS 9012-54-8; EINECS/ELINCS 232-734-4

Classification: Enzyme complex

Definition: Derived from *Aspergillus niger*

Properties: Off-wh. powd.; m.w. ≈ 31,000

Toxicology: May cause respiratory allergy in susceptible individuals, mild skin or irritation on prolonged or direct contact

Storage: Refrigerate; hygroscopic; keep under argon

Uses: Enzyme; digestive aid in medicine and brewing industry; aids bacteria in the hydrolysis of cellulose; paper size and coatings; textile desizing; starch adhesives; cleaning starch processing equip.

Regulatory: FDA 21CFR §173.120, GRAS; UK, Japan approved

Manuf./Distrib.: Enzyme Development; Fluka; Schweizerhall; Sigma; Spectrum Quality Prods.; Whyte Chems. Ltd

**Celluloid.** See Nitrocellulose

#### Cellulose

CAS 9004-34-6; 65996-61-4; EINECS/ELINCS 232-674-9

Synonyms: α-Amylose; α-Cellulose; Cellulose crystalline; Cellulose gel; Cellulose powder; Cellulose, powdered; Cellulose pulp; Cotton fiber; Crystalline cellulose; Hydroxycellulose; Powdered cellulose; Pyrocellulose; Wood pulp, bleached

Definition: Natural polysaccharide derived from plant fibers

Properties: Colorless to wh. solid, odorless; sl. sol. in sodium hydroxide sol'n.; insol. in water, dil. acids, and org. solvs.; m.w. 160,000-560,000; dens. ≈ 1.5

Toxicology: ACGIH TLV/TWA 10 mg/m<sup>3</sup> (total dust); nuisance dust; cannot be digested by humans; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Fibers: reinforcing filler, visc./sag control for textile, paper, rubber, plastics, coatings, grouts; for mfg. of nitrocellulose, cellulose acetate, etc.; in chromatography; as ion exchange material; in resin-bonded filters for food contact; absorbent, opacifier, visc. control agent in cosmetics; microcrystalline: as binder-disintegrants in pharmaceutical tableting; colloidal: stabilizer, emulsifier, thickener, dispersant, anticaking agent, binding agent in foods

Use Level: ADI not specified; 5-20% (tablet binders, disintegrants), 30% (capsule diluent)

Regulatory: FDA 21CFR §177.2260; GRAS; Europe listed; use in baby foods not permitted in UK; FDA approved for buccals, dentals, orals; powdered USP/NF, BP, Ph.Eur., JP compliance

Manuf./Distrib.: Aldrich; Alfa Chem; Am. Fillers & Abrasives; CarboMer; Celite; Degussa-Hüls; Eastman; FMC; Fluka; Hercules Ltd; NB Entre-

preneurs; Penwest Pharmaceuticals; Reed; Sigma; Spectrum Quality Prods.; U.S. Synthetics; Whittaker, Clark & Daniels

**α-Cellulose.** See Cellulose

**Cellulose acetate**

CAS 9004-35-7

**Synonyms:** CA; Acetate cotton; Acetate ester of cellulose; Acetic acid, cellulose ester; Acetose; Acetylcellulose; Cellulose, acetate; Cellulose 2,5-acetate; Cellulose acetate ester; Cellulose, 2,5-diacetate; Cellulose monoacetate; Cellulose, triacetate; Monoacetylcellulose; Secondary cellulose acetate

**Classification:** Cellulosics; thermoplastic resin

**Properties:** Triacetate insol. in water, alcohol, ether, sol. in glacial acetic acid; tetraacetate insol. in water, alcohol, ether, glacial acetic acid, methanol; pentaacetate insol. in water, sol. in alcohol; m.w. ≈ 37,000; dens. 1.300

**Uses:** Mfg. of rubber and celluloid substitutes; nonflamm. photographic and cinema films; airplane dopes; varnishes; lacquers; waterproofing and sizing for textiles; textile fibers; coating skins; insulating elec. wires; acetate fiber; transparent sheeting and household goods; thermoplastic molding composition; cigarette filters; magnetic tapes; osmotic cell membranes; migrating to food from paper/paperboard; polymer membrane, coating agent for pharmaceuticals; film-former in cosmetics; in food-contact coatings

**Regulatory:** FDA 21CFR §175.300, 182.90, GRAS; USP/NF, BP, Ph.Eur. compliance

**Manuf./Distrib.:** Akzo Nobel; Aldrich; CarboMer; Celanese; Eastman; FMC; Fluka; Kingsfield; Rotuba Extruders; Scientific Adsorbents; Sigma

**Trade Names:** CA-394-60S; CA-398-3; CA-398-6; CA-398-10; CA-398-30

**Cellulose, acetate.** See Cellulose acetate

**Cellulose 2,5-acetate.** See Cellulose acetate

**Cellulose, acetate butanoate.** See Cellulose acetate butyrate

**Cellulose acetate butyrate**

CAS 9004-36-8

**Synonyms:** CAB; Cellaburate; Cellulose, acetate butanoate; Cellulose acetobutyrate

**Classification:** Thermoplastic resin

**Definition:** Butyric acid ester of a partially acetylated cellulose

**Properties:** Wh. pellets or gran.; sol. in ketones, org. acetates, lactates, methylene, ethylene, and propylene chlorides, high-boiling solvs.; dens. 1.250; exc. weathering props.; high dielec. str.; high resist. to oil and grease; high transparency

**Precaution:** Combustible

**Uses:** Thermoplastic for automotive, tool, building, furniture industries, domestic appliances, lighting, elec., radio, and TV industries, optical, photographic film, stationery, toys, toiletries, pkg. applics., protective coatings, printing inks, lacquers; molding compositions; pipe coatings; film and sheet; taillight lenses; water desalination membranes piping and tubing; hydrometers; excipient for formulation of drug-loaded microparticles; film-former in cosmetics, coatings, adhesives; in food-pkg. adhesives; in hot-melt strippable food coatings; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §175.105, 175.230, 175.300, 177.1200

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Bencorp Int'l.; Eastman; FMC; KIC Chems.; Sigma; Van Waters & Rogers; Whitfield Chem. Ltd

**Trade Names:** CAB-171-15; CAB-321-0.1; CAB-381-0.1; CAB-381-0.5; CAB-381-2; CAB-381-2BP; CAB-381-20; CAB-500-1; CAB-500-5; CAB-531-1; CAB-551-0.01; CAB-551-0.2; CAB-553-0.4

**Cellulose acetate ester.** See Cellulose acetate

**Cellulose, acetate propanoate.** See Cellulose acetate propionate

**Cellulose acetate propionate**

CAS 9004-39-1

**Synonyms:** CAP; CP; Cellulose, acetate propanoate; Cellulose acetate propionate ester; Cellulose acetopropionate; Cellulose propionate

**Classification:** Thermoplastic

**Definition:** Propionic acid ester of a partially acetylated cellulose

**Properties:** Dens. 1.18-1.23 kg/l; high transparency; scratch resist.; tough

**Uses:** Thermoplastic for automotive, tool, building, furniture industries, domestic appliances, lighting, elec., radio, and TV industries, optical, photographic, stationery, toy, toiletries, and pkg. applics.; paints; printing inks; paper and cloth coatings; lacquer resin; film-former in cosmetics, inks,

coatings, polishes; in food-pkg. adhesives; excipient for pharmaceuticals; in hot-melt strippable food coatings; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §175.105, 175.230, 175.300, 177.1200

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Eastman; SAF Bulk Chems.

**Trade Names:** CAP-482-0.5; CAP-482-20; CAP-504-0.2

**Cellulose acetate propionate ester.** See Cellulose acetate propionate

**Cellulose acetobutyrate.** See Cellulose acetate butyrate

**Cellulose acetopropionate.** See Cellulose acetate propionate

**Cellulose carboxymethyl ether.** See Carboxymethylcellulose sodium

**Cellulose carboxymethyl ether sodium salt.** See Carboxymethylcellulose sodium

**Cellulose crystalline.** See Cellulose

**Cellulose, 2,5-diacetate.** See Cellulose acetate

**Cellulose gel.** See Cellulose

**Cellulose glycolic acid sodium salt.** See Carboxymethylcellulose sodium

**Cellulose gum.** See Carboxymethylcellulose sodium

**Cellulose hydroxyethylate.** See Hydroxyethylcellulose

**Cellulose hydroxyethyl ether.** See Hydroxyethylcellulose

**Cellulose, 2-hydroxyethyl ether.** See Hydroxyethylcellulose

**Cellulose, 2-hydroxypropyl ether.** See Hydroxypropylcellulose

**Cellulose methyl.** See Methylcellulose

**Cellulose methylate.** See Methylcellulose

**Cellulose methyl ether.** See Methylcellulose

**Cellulose monoacetate.** See Cellulose acetate

**Cellulose nitrate.** See Nitrocellulose

**Cellulose, polyanionic.** See Carboxymethylcellulose sodium

**Cellulose powder.** See Cellulose

**Cellulose, powdered.** See Cellulose

**Cellulose propionate.** See Cellulose acetate propionate

**Cellulose pulp.** See Cellulose

**Cellulose, regenerated.** See Cellophane

**Cellulose sodium glycolate.** See Carboxymethylcellulose sodium

**Cellulose tetranitrate.** See Nitrocellulose

**Cellulose, triacetate.** See Cellulose acetate

**Cera alba.** See Beeswax

**Cera carnauba.** See Carnauba (Copernica cerifera) wax

**Cera microcrystallina.** See Microcrystalline wax

**Ceratonina.** See Locust bean (Ceratonina siliqua) gum

**Ceratonina siliqua.** See Locust bean (Ceratonina siliqua) gum

**Ceratonina siliqua gum.** See Locust bean (Ceratonina siliqua) gum

**Ceresin**

CAS 8001-75-0; EINECS/ELINCS 232-290-1

**Synonyms:** Cerin; Ceresine; Ceresine wax; Ceresin wax; Earth wax; Mineral wax; White ceresin wax; White ozokerite wax

**Definition:** Waxy mixture of hydrocarbons obtained by purification of ozokerite

**Properties:** Wh. or yel. waxy cake; tasteless; odorless (wh.), sl. odor (yel.); sol. in benzene, chloroform, naphtha, hot oils, petrol. ether, 30 parts abs. alcohol, most org. solvs.; insol. in water; dens. 0.92-0.94; m.p. 68-72 C

**Toxicology:** May cause allergic reactions; TSCA listed

**Precaution:** Combustible

**Uses:** Candles; wax figures; sizing; bottles for hydrofluoric acid; antifouling paints; waterproofing textiles; substitute for beeswax; dental wax compds.; rubber compounding; elec. insulation; waxed paper and cloth; coating wax (pkg., textiles); heat-seal/hot melt flow additive; in food-pkg. adhesives; wood/shoe/leather/car polish ingred.; antistat, binder, emulsion stabilizer, opacifier, visc. control agent; gellant; stabilizer; thickener in pharmaceutical protective creams

**Regulatory:** FDA 21CFR §175.105

**Manuf./Distrib.:** Allyson Enterprises; Frank B. Ross; Hansotech; Koster Keunen; Ruger; Scheel; Spectrum Quality Prods.; Stevenson Cooper; Strahl & Pitsch; Universal Preserv-A-Chem

**Trade Names:** Koster Keunen Ceresine; Ross Ceresine Wax

**Ceresin wax.** See Ceresin

**Cerin.** See Ceresin

**Ceteareth**

CAS 68439-49-6 (generic)

**Synonyms:** Alcohols, C16-18, ethoxylated; Aliphatic (C16-C18) alcohol, ethoxylated; (C16-C18) alkyl alcohol ethoxylate; Cetomacrogolum; Cetylstearyl alcohol ethoxylates; (C16-C18) fatty alcohol, ethylene oxide reaction prod.; Ethoxylated fatty alcohols (C16-18); Polyoxyl cetostearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{CH}_2\text{CH}_2\text{O})_n\text{OH}$ , R = cetylstearyl, n = 3-100**Properties:** Soft solids; nonionic

**Toxicology:** LD50 (oral, rat) 1260 mg/kg; LDLo (rabbit, skin) 1260 mg/kg; primary irritant; mod. skin and eye irritant; may cause changes to respiration, GI, liver, and food intake (animal)

**Uses:** Emulsifier for fatty amines, amides, oils, solvs., waxes; antistat, lubricant for wool carding, textile spin finishes; lubricant for hydrophobic fibers; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paper-board

**Trade Names:** Serdiox® NKL 6; Surfonic® L68-18**Ceteareth-2**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-2 cetyl/stearyl ether; PEG 100 cetyl/stearyl ether; POE (2) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 2**Properties:** Nonionic**Toxicology:** TSCA listed

**Uses:** Detergent, emollient, wetting agent, emulsifier, dispersant, solubilizer, and coupling agent for cosmetics, textiles, metalworking lubricants, household prods., and industrial applics.

**Trade Names:** Volpo CS2**Ceteareth-5**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-5 cetyl/stearyl ether; POE (5) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 5**Properties:** Nonionic**Toxicology:** TSCA listed

**Uses:** Detergent, emulsifier, leveling agent, gellant in personal care prods., wax, oil and textiles, scouring agents, dyes, household formulations, silicone emulsification, surfactants; intermediate

**Trade Names:** Volpo CS5**Ceteareth-10**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-10 cetyl/stearyl ether; PEG 500 cetyl/stearyl ether; POE (10) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 10**Properties:** Nonionic**Toxicology:** TSCA listed

**Uses:** Rubber emulsifier; lubricant; dye and fulling assistant; emulsifier, conditioner, and emollient for personal care prods., pharmaceuticals; emulsion polymerization; floor waxes; paper finishes; in food-contact textiles

**Regulatory:** FDA 21CFR §177.2800**Trade Names:** Volpo CS10**Ceteareth-11**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-11 cetyl/stearyl ether; POE (11) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 11**Properties:** Nonionic**Toxicology:** TSCA listed

**Uses:** Solubilizer, emulsifier, dispersant for cosmetic and pharmaceutical preparations; coating material for foam suppressant, enzymes, etc.; dyeing auxiliaries; in food-contact textiles; binding agent

**Regulatory:** FDA 21CFR §177.2800**Trade Names:** Oxetal TG 111**Ceteareth-14**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-14 cetyl/stearyl ether; POE (14) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 14**Properties:** Nonionic

**Uses:** Rubber emulsifier; lubricant; dye and fulling assistant; conditioner and emollient for personal care prods., pharmaceuticals; emulsion polymerization; floor waxes; paper finishes; textile lubricant

**Ceteareth-15**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-15 cetyl/stearyl ether; POE (15) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 15**Properties:** Nonionic**Toxicology:** TSCA listed

**Uses:** Surfactant, detergent, emulsifier, leveling agent, intermediate used in personal care prods., wax, oil, textiles, scouring agents, dyes, household formulations, silicone emulsification, surfactants; emollient in pharmaceutical topicals; in food-contact textiles

**Regulatory:** FDA 21CFR §177.2800; approved for topicals**Trade Names:** Volpo CS15**Ceteareth-18**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-18 cetyl/stearyl ether; POE (18) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 18**Properties:** Nonionic**Toxicology:** TSCA listed

**Uses:** Dispersant; prod. of powd. detergents; binding agent and base material for solid cleaning agents (toilet sticks); coating material for foam suppressant, enzymes, etc.; dyeing auxiliaries; emulsifier in cosmetics; in food-contact textiles

**Regulatory:** FDA 21CFR §177.2800**Trade Names:** Oxetal TG 118**Ceteareth-20**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-20 cetyl/stearyl ether; POE (20) cetyl/stearyl ether; Polyoxyl 20 cetostearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 20

**Properties:** Cream-colored waxy unctuous mass, melting to brnsh. yel. clear liq.; sol. in water, alcohol, acetone; insol. in hexane; HLB 15.6; acid no. 0.5 max.; sapon. no. 2 max.; hyd. no. 42-60; pH 4.5-7.5 (10%); nonionic

**Toxicology:** TSCA listed

**Uses:** Surfactant, emulsifier, dispersant, solubilizer, wetting agent, detergent, solubilizer, visc. control agent for cosmetics, pharmaceuticals, and industrial applics.; emulsion polymerization; in food-contact textiles

**Regulatory:** FDA 21CFR §177.2800; FDA approved for topicals; USP/NF compliance**Manuf./Distrib.:** Aldrich; Fluka; Sigma**Trade Names:** Volpo CS20**Ceteareth-50**

CAS 68439-49-6 (generic)

**Synonyms:** PEG-50 cetyl/stearyl ether; POE (50) cetyl/stearyl ether

**Definition:** PEG ether of cetearyl alcohol**Formula:**  $R(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R = blend of cetyl and stearyl radicals, avg. n = 50**Properties:** Nonionic**Toxicology:** TSCA listed

**Uses:** Wetting agent, detergent for industrial/domestic applics.; emulsifier, foam control agent in syn. heavy-duty detergents; emulsion polymerization; surfactant, emulsifier in cosmetics; emulsion stabilizer; in food-contact

textiles

Regulatory: FDA 21CFR §177.2800

Trade Names: Volpo CS50

**Cetareth-60**

CAS 68439-49-6 (generic)

Synonyms: PEG-60 cetyl/stearyl ether; POE (60) cetyl/stearyl ether

Definition: PEG ether of cetyl alcohol

Formula:  $R(OCH_2CH_2)_nOH$ , R = blend of cetyl and stearyl radicals, avg. n = 60

Properties: Nonionic

Uses: Surfactant, emulsifier in cosmetics

Trade Names: Rhodasurf® A-60

**Cetearyl alcohol**

CAS 8005-44-5; 67762-27-0; EINECS/ELINCS 267-008-6

Synonyms: Alcohols, C16-18; n-Alkanol (C16-C18); C16-18 alcohols;

Cetostearyl alcohol; Cetyl-stearyl alcohol; Stearyl-cetyl alcohol

Definition: Mixture of fatty alcohols, predominantly cetyl and stearyl alcohols

Empirical:  $C_{18}H_{38}O$ Formula:  $CH_3(CH_2)_nOH$ , n = 15-17

Properties: Wh. unctuous flakes or gran., faint char. odor, bland mild taste; sol. in alcohol, ether; insol. in water; m.w. 270.50; m.p. 48-55 C; acid no. ≤ 2; iodine no. ≤ 4; hyd. no. 208-228; nonionic

Toxicology: TSCA listed

Uses: Surfactant intermediate; raw material for ethoxylation, sulfation, etc.; stabilizer in emulsion polymerization; lubricant in rigid PVC; emollient, emulsifier, emulsion stabilizer, opacifier, visc. control agent in cosmetics; cosolvent, emollient, consistency factor for pharmaceutical creams, hand lotions, bath oils, shaving creams; pearlescent shampoo ingred.; antiseptic in topical anti-infective prods.; in food-pkg. adhesives

Regulatory: FDA 21CFR §175.105; FDA approved for orals, otics, topicals; USP/NF, BP, Ph.Eur. compliance

Manuf./Distrib.: Ruger; Sea-Land; Spectrum Quality Prods.; Westco; Whyte Chems. Ltd

Trade Names: Loxiol® G 53

Cetene. See Hexadecene-1

**Ceteth-2**

CAS 9004-95-9 (generic); 5274-61-3

Synonyms: 2-[2-Hexadecyloxy] ethanol; PEG-2 cetyl ether; PEG 100 cetyl ether; POE (2) cetyl ether

Classification: Nonaromatic ether

Definition: PEG ether of cetyl alcohol

Empirical:  $C_{20}H_{42}O_3$ Formula:  $CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH$ , avg. n = 2

Properties: Nonionic

Toxicology: TSCA listed

Uses: Detergent, emulsifier, leveling agent, thickener, stabilizer, solubilizer, conditioner in cosmetics, household formulations, silicone emulsification, textile processing; emulsifier in pharmaceutical topicals; intermediate

Regulatory: Approved for topicals

Manuf./Distrib.: Aldrich; Seabrook Ind.; Sigma

Trade Names: Volpo C2

**Ceteth-3**

CAS 9004-95-9 (generic); 4484-59-7

Synonyms: 2-[2-[2-(Hexadecyloxy) ethoxy] ethoxy] ethanol; PEG-3 cetyl ether; POE (3) cetyl ether

Classification: Nonaromatic ether

Definition: PEG ether of cetyl alcohol

Empirical:  $C_{22}H_{46}O_4$ Formula:  $CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH$ , avg. n = 3

Properties: Nonionic

Toxicology: TSCA listed

Uses: Surfactant; emulsifier, cleaner, dispersant for cosmetics, esp. creams and lotions; defoamer in food-contact paper coatings

Regulatory: FDA 21CFR §176.200

Manuf./Distrib.: Aldrich; Fluka; Sigma

**Ceteth-4**

CAS 9004-95-9 (generic); 5274-63-5

Synonyms: PEG-4 cetyl ether; POE (4) cetyl ether

Classification: Nonaromatic ether

Definition: PEG ether of cetyl alcohol

Empirical:  $C_{24}H_{50}O_5$ Formula:  $CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH$ , avg. n = 4

Properties: Nonionic

Toxicology: TSCA listed

Uses: Emulsifier, cleaner, dispersant for cosmetics, esp. creams and lotions; defoamer in food-contact paper coatings

Regulatory: FDA 21CFR §176.200

Manuf./Distrib.: Aldrich; Fluka; Sigma

**Ceteth-5**

CAS 9004-95-9 (generic); 4478-97-1

Synonyms: PEG-5 cetyl ether; 3,6,9,12,15-Pentaoxahentriacontan-1-ol; POE (5) cetyl ether

Classification: Nonaromatic ether

Definition: PEG ether of cetyl alcohol

Empirical:  $C_{26}H_{54}O_6$ Formula:  $CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH$ , avg. n = 5

Properties: Nonionic

Toxicology: TSCA listed

Uses: Emulsifier, cleaner, dispersant for cosmetics and pharmaceuticals, esp. creams and lotions; defoamer in food-contact paper coatings

Regulatory: FDA 21CFR §176.200

Manuf./Distrib.: Aldrich; Fluka; Sigma

**Ceteth-6**

CAS 9004-95-9 (generic); 5168-91-2

Synonyms: 3,6,9,12,15,18-Hexaoxotetratriacontan-1-ol; PEG-6 cetyl ether; PEG 300 cetyl ether; POE (6) cetyl ether

Classification: Nonaromatic ether

Definition: PEG ether of cetyl alcohol

Empirical:  $C_{28}H_{58}O_7$ Formula:  $CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH$ , avg. n = 6

Properties: Nonionic

Toxicology: TSCA listed

Uses: Emulsifier in cosmetics and pharmaceuticals; defoamer in food-contact paper coatings

Regulatory: FDA 21CFR §176.200

Manuf./Distrib.: Aldrich; Fluka; Sigma

**Ceteth-7**

CAS 9004-95-9 (generic)

Synonyms: PEG-7 cetyl ether; POE (7) cetyl ether

Classification: Nonaromatic ether

Definition: PEG ether of cetyl alcohol

Formula:  $CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH$ , avg. n = 7

Properties: Nonionic

Toxicology: LD50 (oral, mouse) 2602 mg/kg; TSCA listed

Uses: Emulsifier for cosmetic and pharmaceuticals; defoamer in food-contact paper coatings

Regulatory: FDA 21CFR §176.200

Manuf./Distrib.: Aldrich; Fluka; Sigma

**Ceteth-10**

CAS 9004-95-9 (generic); 14529-40-9

Synonyms: 3,6,9,12,15,18,21,24,27,30-Dexaoxahexatetracontan-1-ol; PEG-10 cetyl ether; PEG 500 cetyl ether; POE (10) cetyl alcohol; POE (10) cetyl ether

Classification: Nonaromatic ether

Definition: PEG ether of cetyl alcohol

Empirical:  $C_{36}H_{74}O_{11}$ Formula:  $CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH$ , avg. n = 10

Properties: HLB 12.9; nonionic

Toxicology: TSCA listed

Uses: Surfactant, emulsifier, defoamer, wetting agent, conditioner for personal care prods.; solubilizer for fragrances; emulsifier for pharmaceuticals; leveling agent; defoamer in food-contact paper coatings

Regulatory: FDA 21CFR §176.200, 177.2800

Manuf./Distrib.: Aldrich; Seabrook Ind.; Sigma

**Ceteth-11**

CAS 9004-95-9 (generic)

Synonyms: PEG-11 cetyl ether; POE (11) cetyl ether

*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 11$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200

**Ceteth-12**

CAS 9004-95-9 (generic); 13149-83-2  
*Synonyms:* 3,6,9,12,15,18,21,24,27,30,33,36-Dodecaoxapentacontan-1-ol; PEG-12 cetyl ether; PEG 600 cetyl ether; POE (12) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 12$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant, emulsifier, cleaner, dispersant for cosmetics and pharmaceuticals, esp. creams and lotions; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200, 177.2800  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-14**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-14 cetyl ether; POE (14) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 14$   
*Properties:* Nonionic  
*Uses:* Surfactant, emulsifier in cosmetics; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-15**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-15 cetyl ether; POE (15) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 15$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant, emulsifier, cleaner, dispersant for cosmetics and pharmaceuticals, esp. creams and lotions; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200, 177.2800  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-16**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-16 cetyl ether; POE (16) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 16$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant, emulsifier, lubricant in cosmetics and pharmaceuticals; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-17**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-17 cetyl ether; POE (17) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier, cleaner, dispersant for cosmetics, esp. creams and lotions; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-20**

CAS 9004-95-9 (generic)  
*Synonyms:* Cetomacrogol 1000; PEG-20 cetyl ether; PEG 1000 cetyl ether; PEG 1000 monocetyl ether; POE (20) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 20$   
*Properties:* Waxy solid; sol. in water; HLB 15.7; pour pt.  $\approx 39$  C; cloud pt.  $\approx 45$  C; nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant, emulsifier, wetting agent, antistat, solubilizer, defoamer, detergent, lubricant, emulsion stabilizer for cosmetics, pharmaceuticals, industrial applics.; solubilizer for fragrances; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200, 177.2800; FDA approved for topicals; BP compliance  
*Manuf./Distrib.:* Aldrich; Fluka; Ruger; Seabrook Ind.; Sigma  
*Trade Names:* Volpo C20

**Ceteth-23**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-23 cetyl ether; POE (23) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 23$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier for cosmetic and pharmaceuticals; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-24**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-24 cetyl ether; POE (24) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 24$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant, emulsifier, cleaner, dispersant for cosmetics and pharmaceuticals, esp. creams and lotions; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200, 177.2800  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-25**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-25 cetyl ether; POE (25) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 25$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant, emulsifier for cosmetic and pharmaceuticals; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200, 177.2800  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-30**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-30 cetyl ether; POE (30) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 30$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier in cosmetics and pharmaceuticals; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200, 177.2800  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-40**

CAS 9004-95-9 (generic)

*Synonyms:* PEG-40 cetyl ether; POE (40) cetyl ether  
*Classification:* Nonaromatic ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 40$   
*Properties:* Nonionic  
*Toxicology:* LD50 (oral, mouse) 2602 mg/kg; TSCA listed  
*Uses:* Emulsifier for cosmetic and pharmaceuticals; defoamer in food-contact paper coatings  
*Regulatory:* FDA 21CFR §176.200  
*Manuf./Distrib.:* Aldrich; Fluka; Sigma

**Ceteth-45**

CAS 9004-95-9 (generic)  
*Synonyms:* PEG-45 cetyl ether; POE (45) cetyl ether  
*Definition:* PEG ether of cetyl alcohol  
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , avg.  $n = 45$   
*Uses:* Surfactant in cosmetics; defoamer in food-contact paper coatings; in food-contact textiles  
*Regulatory:* FDA 21CFR §176.200, 177.2800

**Cetoleth**

CAS 8065-81-4 (generic); 68920-66-1 (generic)  
*Synonyms:* Cetyloleylethyl alcohol ethoxylates; PEG monocetyloleylethyl ether; Poly (oxy-1,2-ethanediy),  $\alpha$ -hexadecyl- $\omega$ -hydroxy-, mixt. with (Z)- $\alpha$ -9-octadecenyl- $\omega$ -hydroxypoly (oxy-1,2-ethanediy)  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Formula:*  $\text{RO}(\text{CH}_2\text{CH}_2\text{O})_n\text{H}$ , R = cetyl/oleyl and  $n = 2-55$   
*Properties:* Pale yel. to wh. paste or solid; nonionic  
*Toxicology:* LD50 (IP, rat) 490 mg/kg; TDLo (oral, rat, 12 wks continuous) 42 g/kg; may cause vascular, blood, and metabolism changes  
*Uses:* Emulsifier for hydrocarbon oils, waxes; antistat for textile spin finishes  
*Trade Names:* Wax Emulsifier 4106

**Cetoleth-2**

CAS 8065-81-4 (generic); 68920-66-1 (generic)  
*Synonyms:* PEG-2 cetyl/oleyl ether; POE (2) cetyl/oleyl ether  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Properties:* Nonionic  
*Uses:* Emulsifier; mfg. of textile lubricants, solvent and waterless hand cleaners; coemulsifier; detergent additive in petrol. oils; intermediate for anionic surfactants  
*Trade Names:* Teric™ 17A2

**Cetoleth-3**

CAS 8065-81-4 (generic)  
*Synonyms:* PEG-3 cetyl/oleyl ether; POE (3) cetyl/oleyl ether  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Properties:* Nonionic  
*Uses:* Emulsifier; mfg. of textile lubricants, solvent and waterless hand cleaners; coemulsifier; detergent additive in petrol. oils; intermediate for anionic surfactants  
*Trade Names:* Teric™ 17A3

**Cetoleth-6**

CAS 8065-81-4 (generic)  
*Synonyms:* PEG-6 cetyl/oleyl ether; POE (6) cetyl/oleyl ether  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Formula:*  $\text{R}(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R rep. cetyl/oleyl radicals, avg.  $n = 6$   
*Properties:* Nonionic  
*Uses:* Emulsifier, mfg. of textile lubricants, solvent and waterless hand cleaners; coemulsifier; detergent additive in petrol. oils; intermediate for anionic surfactants; surfactant in cosmetics; plastics antistat  
*Trade Names:* Teric™ 17A6

**Cetoleth-8**

CAS 8065-81-4 (generic)  
*Synonyms:* PEG-8 cetyl/oleyl ether; POE (8) cetyl/oleyl ether  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Properties:* Nonionic  
*Uses:* Wetting agent, dispersant, emulsifier; used in processing of yarns and fabrics; textile dyeing; horticultural sprays; removal of oil slicks  
*Trade Names:* Teric™ 17A8

**Cetoleth-10**

CAS 8065-81-4 (generic)

*Synonyms:* PEG-10 cetyl/oleyl ether; POE (10) cetyl/oleyl ether  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Properties:* Nonionic  
*Uses:* Wetting agent, dispersant, emulsifier; used in processing of yarns and fabrics; textile dyeing; horticultural sprays; removal of oil slicks; solubilizer for sanitation chemicals; emulsion polymerization; costabilizer  
*Trade Names:* Teric™ 17A10

**Cetoleth-13**

CAS 8065-81-4 (generic)  
*Synonyms:* PEG-13 cetyl/oleyl ether; PEG (13) cetyl/oleyl ether  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Properties:* HLB 14; nonionic  
*Uses:* Wetting agent, dispersant, emulsifier; used in processing of yarns and fabrics; textile dyeing; horticultural sprays; removal of oil slicks; solubilizer for sanitation chemicals; emulsion polymerization; latex stabilizer; dye leveling agent  
*Trade Names:* Teric™ 17A13

**Cetoleth-25**

CAS 8065-81-4 (generic); 54045-08-8  
*Synonyms:* PEG-25 cetyl/oleyl ether; POE (25) cetyl/oleyl ether  
*Definition:* PEG ether of cetyl alcohol and oleyl alcohol  
*Formula:*  $\text{R}(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R rep. cetyl/oleyl radicals, avg.  $n = 25$   
*Properties:* Nonionic  
*Uses:* Wetting agent; dispersant; emulsifier; emulsion polymerization; processing of yarns and fabrics; textile dyeing; horticultural sprays; removal of oil slicks; solubilizer for sanitation chemicals; surfactant in cosmetics; costabilizer; plasticizer for soap prod.; food-contact paper/paperboard  
*Trade Names:* Disponil® O 250; Teric™ 17A25

**Cetomacrogol 1000.** See Ceteth-20

**Cetomacrogolum.** See Cetearth

**Cetostearyl alcohol.** See Cetearyl alcohol

**Cetrimonium chloride**

CAS 112-02-7; EINECS/ELINCS 203-928-6  
*Synonyms:* Cetyl trimethyl ammonium chloride; Hexadecyl trimethyl ammonium chloride; Palmityl trimethyl ammonium chloride; N,N,N-Trimethyl-1-hexadecanaminium chloride  
*Classification:* Quaternary ammonium salt  
*Empirical:*  $\text{C}_{19}\text{H}_{42}\text{ClN}$   
*Formula:*  $\text{C}_{16}\text{H}_{33}(\text{CH}_3)_3\text{NCl}$   
*Properties:* M.w. 320.01; cationic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier, dispersant, emollient, surfactant, softener, conditioner, bactericide, fungicide, odor inhibitor in personal care prods., pharmaceuticals; preservative in cosmetics; antistat for hair, fibers, plastics; antistat/softener for textile finishes; gel sensitizer in latex foam prod.; emulsion polymerization; germicide (duckweed killer), dispersant, coagulant for water treatment; coagulant in antibiotic prod.  
*Regulatory:* FDA approved for topicals  
*Manuf./Distrib.:* Aldrich; Fluka  
*Trade Names:* Chemquat 16/50; Nissan Cation PB-40; Nissan Cation PB-300  
*Trade Names Containing:* Arquad® 16-50

**Cetyl alcohol**

CAS 124-29-8; 36653-82-4; EINECS/ELINCS 253-149-0; FEMA 2554  
*Synonyms:* Alcohol C16; C16 linear primary alcohol; Ethal; Ethol; 1-Hexadecanol; Hexadecyl alcohol; Palmityl alcohol  
*Classification:* Fatty alcohol  
*Empirical:*  $\text{C}_{16}\text{H}_{34}\text{O}$   
*Formula:*  $\text{CH}_3(\text{CH}_2)_{14}\text{CH}_2\text{OH}$   
*Properties:* Wh. waxy solid; partially sol. in alcohol, chloroform, ether; pract. insol. in water; m.w. 242.27; dens. 0.8176 (49.5 C); m.p. 49.3 C; b.p. 344 C; acid no.  $\leq 2$ ; iodine no.  $\leq 5$ ; hyd. no. 218-238; flash pt.  $> 110$  C; ref. index 1.4283; surface-active dispersant, wetting agent, and compatibility aid for enhancing color acceptance in high solids coatings (alkyds, epoxies, UV and EB-cured coatings); emulsifier for emulsion polymerization  
*Toxicology:* LD50 (oral, rat) 6400 mg/kg; mod. toxic by ingestion, intraperitoneal routes; eye and human skin irritant; can cause hives; TSCA listed  
*Precaution:* Flamm. when exposed to heat or flame; can react with oxidizing materials

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**HMIS:** Health 1; Flammability 0; Reactivity 1

**Uses:** Perfumery; emulsifier; emollient; coupling agent; surface-active dispersant; wetting agent; foam stabilizer in detergents; opacifier; thickener; chemical intermediate; external mold release for acrylics; raw material for antioxidants; emulsion polymerization; color enhancer in high-solids coatings; flavoring agent, color diluent, intermediate for confectionery, food supplements in tablet form, gum; cosolvent; pharmaceutical acid (emulsifier, stiffener); emollient, emulsifier, opacifier, visc. control agent in cosmetics; in food-pkg. adhesives; in food-contact coatings; defoamer in food-contact paper coatings; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §73.1, 73.1001, 172.515, 172.864, 175.105, 175.300, 176.200, 177.1010, 177.1200, 177.2800, 178.3480, 178.3910; FEMA GRAS; FDA approved for ophthalmics, orals, otics, rectals, topicals; USP/NF, BP, Ph.Eur. compliance

**Manuf./Distrib.:** AC Ind.; Aarhus Oliefabrik A/S; Albemarle; Aldrich; Alfa Aesar; Allchem Ind.; Amerchol; Ashland; Brown; Chemron; Cognis/Chems. Group; Condea Vista; Croda Chem. Ltd; E-Chemicals; Fluka; Jarchem Ind.; Lipo; Lonza; M. Michel; Norman, Fox; Penta Mfg.; Procter & Gamble; Protameen; R.W. Greeff; Rhodia HPCII; Ruger; Salim Oleochems.; Sea-Land; Sigma; Spectrum Quality Prods.; Stepan; Whyte Chems. Ltd

**Trade Names:** Kessco® Cetyl Alcohol NF

**Trade Names Containing:** Ross Beeswax Substitute No. 628/5

#### Cetyl arachidol

CAS 17658-63-8; EINECS/ELINCS 241-637-6

**Synonyms:** 1-Eicosanol, 2-hexadecyl-; Hexadecyl eicosanol; 2-Hexadecyl-1-eicosanol

**Classification:** Aliphatic alcohol

**Empirical:** C<sub>36</sub>H<sub>74</sub>O

**Uses:** Wax substitute; skin softener in stick formulations; emollient in cosmetics; in pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles

**Manuf./Distrib.:** Jarchem Ind.

**Trade Names:** Jarcol™ I-36

**Trade Names Containing:** Jarcol™ I-34T

#### Cetyl betaine

CAS 693-33-4; EINECS/ELINCS 211-748-4

**Synonyms:** N-(Carboxymethyl)-N,N-dimethyl-1-hexadecanaminium hydroxide, inner salt; (Carboxymethyl) hexadecyldimethylammonium hydroxide, inner salt; N,N-Dimethyl-N-hexadecylglycine; 1-Hexadecanaminium, N-(carboxymethyl)-N,N-dimethyl-, hydroxide, inner salt; Hexadecylbetaine

**Classification:** Zwitterion (inner salt)

**Empirical:** C<sub>20</sub>H<sub>41</sub>NO<sub>2</sub>

**Properties:** M.w. 327.62; amphoteric

**Toxicology:** LD50 (oral, rat) 1620 mg/kg, (IP, rat) 150 mg/kg; poison by IP route; mod. toxic by ing.; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NO<sub>x</sub>

**Uses:** Wetting agent; detergent; emulsifier; dispersant; surfactant; conditioner; dyeing applics.; softener for textiles; leveling and rewetting agent in the paper industry; dyeing assistant and degreaser in the leather industry; antistat on plastic films; alkaline peroxide bleaching systems; surfactant, antistat in cosmetics

**Trade Names:** Product BCO

#### Cetyl dimethicone copolyol

**Definition:** Copolymer of cetyl dimethicone and dimethicone copolyol

**Properties:** Nonionic

**Uses:** Surfactant, emollient for creams and lotions, pharmaceuticals; emulsifier for cyclomethicone, cosmetics

**Trade Names:** TEGO® Flow 354

#### Cetylic acid. See Palmitic acid

#### Cetyl methacrylate

CAS 2495-27-4

**Synonyms:** Hexadecyl methacrylate; Hexadecyl 2-methyl-2-propenoate; Methacrylic acid, hexadecyl ester; Palmityl methacrylate; 2-Propenoic acid, 2-methyl-, hexadecyl ester

**Empirical:** C<sub>20</sub>H<sub>38</sub>O<sub>2</sub>

**Properties:** M.w. 310.52

**Uses:** Additive for lubricating oil, paint, adhesives; modifier for fibers; coating agent for paper

**Manuf./Distrib.:** ABCR

**Trade Names:** Blemmer CMA

**Cetyloleyl alcohol ethoxylates.** See Ceteleth

**Cetyl-stearyl alcohol.** See Cetearyl alcohol

**Cetylstearyl alcohol ethoxylates.** See Ceteareth

**Cetyl trimethyl ammonium chloride.** See Cetrimonium chloride

**Chalk.** See Calcium carbonate

**Channel black.** See Carbon black

**Charcoal.** See Carbon black

**Charcoal, activated.** See Carbon, activated

**China clay.** See Kaolin

**Chinawood oil.** See Tung oil

**Chinese bean oil.** See Soybean (Glycine soja) oil

**Chinese blue.** See Ferric ferrocyanide

**Chinese tung oil.** See Tung oil

**Chinese white.** See Zinc oxide

**Chloracetamide.** See Chloroacetamide

#### Chloral hydrate

CAS 302-17-0; EINECS/ELINCS 206-117-5; UN No. 2075

**Synonyms:** 1,1-Ethanediole, 2,2,2-trichloro-; Knockout drops; Trichloroacetaldehyde hydrate; Trichloroacetaldehyde, hydrated; Trichloroacetaldehyde monohydrate; 1,1,1-Trichloro-2,2-dihydroxyethane; 1,1,1-Trichloro-2,2-ethanediole; 2,2,2-Trichloro-1,1-ethanediole; Trichloro ethylidene glycol

**Empirical:** C<sub>2</sub>H<sub>2</sub>Cl<sub>3</sub>O<sub>2</sub>

**Formula:** CCl<sub>3</sub>CH(OH)<sub>2</sub>

**Properties:** Colorless transparent cryst.; aromatic, penetrating, sl. acrid odor; sl. bitter sharp taste; sol. in water, alcohol, chloroform, ether, olive oil, turpentine oil; m.w. 165.40; dens. 1.901; m.p. 52 C; b.p. 97.5 C

**Toxicology:** LD50 (oral, rat) 479 mg/kg, (skin, rat) 3030 mg/kg, (IV, mouse) 530 mg/kg, (IP, rat) 472 mg/kg; TDLo (oral, human female) 465 mg/kg; LDLo (oral, human) 4 mg/kg; overdose is toxic; hypnotic drug; dangerous to eyes; skin irritant; may cause nausea, vomiting, somnolence, ataxia, coma, arrhythmias, blood pressure decrease, pulse rate increase; reproductive effector; mutagen; tumorigen; TSCA listed

**Precaution:** Slowly volatilizes when exposed to air

**Storage:** Hygroscopic

**Uses:** Polymerization reaction control agent in paper/paperboard in contact with dry food; in food-pkg. adhesives; medicine (sedative); mfg. of DDT, liniments

**Regulatory:** FDA 21CFR §175.105, 176.180

**Manuf./Distrib.:** Amend Drug & Chem.; Anmar Int'l.; Ceres Chem.; F.T.L. Int'l.; Fluka; McGean-Rohco; Ruger; Schütz; Sigma; Spectrum Quality Prods.; Zetapharm

**Chlorallyl methenamine chloride.** See Quaternium-15

**Chloramien blue 2B.** See Direct blue 6

**Chloramine black C.** See Direct black 38

**Chloramine brown M.** See Direct brown 2

**Chloramine carbon black S.** See Direct black 38

**Chloramine red 3B.** See Direct red 39

**Chlorate of soda.** See Sodium chlorate

**Chlorazol black E.** See Direct black 38

**Chlorazole black E.** See Direct black 38

**Chlorosane.** See Paraffin, chlorinated

**p-Chlor-m-cresol.** See p-Chloro-m-cresol

**Chlorhydric acid.** See Hydrochloric acid

**Chloric acid sodium salt.** See Sodium chlorate

**Chlorinated lime.** See Calcium hypochlorite

**Chlorinated paraffin.** See Paraffin, chlorinated

**Chlorinated polypropylene.** See Polypropylene, chlorinated

**Chlorinated PP.** See Polypropylene, chlorinated

**Chlorinated rubber.** See Rubber, chlorinated

#### Chlorine dioxide

CAS 10049-04-4; EINECS/ELINCS 233-162-8; UN No. NA 9191

**Synonyms:** Anthium dioxide; Chlorine oxide; Chlorine (IV) oxide; Chlorine peroxide; Chloroperoxyl; Chloryl radical

**Classification:** Halogen oxide

**2-(Chloromethyl) oxirane.** See Epichlorohydrin  
**4-Chloro-3-methylphenol.** See p-Chloro-m-cresol

**1-[(2-Chloro-4-nitrophenyl) azo]-2-naphthalenol**  
 CAS 2814-77-9; EINECS/ELINCS 220-562-2  
*Synonyms:* 1-[(2-Chloro-4-nitrophenyl) azo]-2-naphthol; CI 12085; D&C Red no. 36; Flaming red; Paranitroaniline red, chlorinated; Permanent red R; Pigment red 4; Tiger orange; Vulcan red R  
*Classification:* Monoazo color  
*Empirical:* C<sub>16</sub>H<sub>10</sub>ClN<sub>3</sub>O<sub>3</sub>  
*Properties:* M.w. 327.73  
*Toxicology:* TSCA listed  
*Uses:* Pigment for resins, paper, printing inks; colorant for cosmetics, pharmaceutical orals and topicals  
*Regulatory:* D&C Red No. 36; FDA 21CFR §74.1333, 74.1336, 74.2333, 74.2336, 82.1336; FDA approved for orals, topicals  
*Manuf./Distrib.:* Avesia Pigments/Addit.; Costec; Ruger; Sun Chem./Pigments; Warner-Jenkinson

**1-[(2-Chloro-4-nitrophenyl) azo]-2-naphthol.** See 1-[(2-Chloro-4-nitrophenyl) azo]-2-naphthalenol

**Chloroparaffin.** See Paraffin, chlorinated  
**Chloroperoxy.** See Chlorine dioxide  
**Chloroprene polymer.** See Polychloroprene  
**Chloroprene resin.** See Polychloroprene  
**Chloroprene rubber.** See Polychloroprene  
**Chloropropylene oxide.** See Epichlorohydrin  
**3-Chloro-1,2-propylene oxide.** See Epichlorohydrin  
**γ-Chloropropylene oxide.** See Epichlorohydrin  
**Chlorosulfona.** See Bis (trichloromethyl) sulfone  
**Chlorotrifluoroethene, homopolymer.** See Chlorotrifluoroethylene polymer

**Chlorotrifluoroethylene polymer**  
 CAS 9002-83-9  
*Synonyms:* PCTFE; Chlorotrifluoroethene, homopolymer; Chlorotrifluoroethylene polymers; Chlorotrifluoroethylene resin; Ethylene, chlorotrifluoro-, polymers; Fluoroethene; Poly(chlorotrifluoroethene); Polychlorotrifluoroethylene; Poly (monochlorotrifluoroethylene); Polytrifluorochloroethylene; Poly (trifluoroethylene chloride); Poly (trifluoromonochloroethylene); Poly(trifluorovinyl chloride); Trifluorochloroethylene polymer  
*Classification:* Thermoplastic polymer; fluorocarbon resin  
*Definition:* A polymer of chlorotrifluoroethylene, usually incl. vinylidene fluoride  
*Empirical:* (C<sub>2</sub>ClF<sub>3</sub>)<sub>x</sub>  
*Formula:* [CF<sub>2</sub>CFCl]<sub>x</sub>  
*Properties:* M.w. 116.47; dens. 2.10-2.15; m.p. -158 C; b.p. -28.4 C; flash pt. -18 F; ref. index 1.43; tens. str. 30-40 MPa; tens. mod. 1300 MPa; elong. (@ break) 150-200%; relatively inert; low gas permeability  
*Toxicology:* LD50 (oral, rat) > 9200 mg/kg; LD (skin, rabbit) > 3700 mg/kg; mod. toxic by skin contact; low toxicity by ing.; TSCA listed  
*Precaution:* Dangerous fire risk  
*Hazardous Decomp. Prods.:* Heated to decomp., emits very toxic fumes of Cl<sup>-</sup> and F<sup>-</sup>  
*Uses:* Lubricant, EP additive for chem., aerospace, hydraulic fluids, metalworking, nuclear, pulp/paper, other industries; chemical piping; chem.-resist. seals/o-rings; gaskets; tank linings; wire/cable insulation; mold release for plastics, rubber; plasticizer; electronic components; transparent vapor barrier layer (electroluminescent devices, pharmaceutical pkg.); transparent chem.-resist. moldings; film-former in cosmetics; food pkg.  
*Regulatory:* FDA 21CFR §177.1380  
*Manuf./Distrib.:* Aldrich; Sigma  
*Trade Names:* Halocarbon Grease 25-10M; Halocarbon Grease 25-20M; Halocarbon Grease X90-10M; Halocarbon Oil 0.8; Halocarbon Oil 1.8; Halocarbon Oil 4.2; Halocarbon Oil 6.3; Halocarbon Oil 27; Halocarbon Oil 56; Halocarbon Oil 95; Halocarbon Oil 200; Halocarbon Oil 400; Halocarbon Oil 700; Halocarbon Oil 1000N; Halocarbon Wax 40; Halocarbon Wax 600; Halocarbon Wax 1200; Halocarbon Wax 1500  
*Trade Names Containing:* Halocarbon Grease 19; Halocarbon Grease 25-5S; Halocarbon Grease 28; Halocarbon Grease 28LT; Halocarbon Grease 32

**Chlorotrifluoroethylene polymers.** See Chlorotrifluoroethylene polymer  
**Chlorotrifluoroethylene resin.** See Chlorotrifluoroethylene polymer

**Chromium (III) oxide (2:3).** See Chromium oxide (ic)  
**Chromium oxide green.** See Chromium oxide (ic)  
**Chromium oxide greens.** See Chromium oxide (ic)

**Chromium oxide (ic)**  
 CAS 1308-38-9; EINECS/ELINCS 215-160-9  
*Synonyms:* Anadonis green; Casalis green; Chrome green; Chrome ocher; Chrome oxide; Chrome oxide green; Chrome oxide pigment; Chromia; Chromic acid green; Chromic oxide; Chromic sesquioxide; Chromium oxide; Chromium (III) oxide; Chromium (III) oxide (2:3); Chromium oxide green; Chromium oxide greens; Chromium sesquioxide; Chromium (3+) trioxide; CI 77288; Dichromium trioxide; Green chrome oxide; Green chromic oxide; Green cinnabar; Green rouge; Leaf green; Oxide of chromium; Pigment green 17; Ultramarine green  
*Classification:* Inorganic color  
*Empirical:* Cr<sub>2</sub>O<sub>3</sub>  
*Properties:* Ylsh. grn. hard cryst. solid; turns brn. on heating, reverts to grn. on cooling; sl. sol. in acids, alkalis; pract. insol. in water, alcohol, acetone; m.w. 151.99; dens. 5.21; m.p. 2435 C; b.p. 4000 C  
*Toxicology:* ACGIH TLV/TWA 0.5 mg(Cr)/m<sup>3</sup>; TDLo (IP, rat) 90 mg/kg; TCLo (inh., rat, 4 h, 6 wks intermittent) 150 mg/m<sup>3</sup>; harmful solid; toxic by ing. and inh.; probably severely irritating to eyes, skin, mucous membranes; sensitizer; avoid contact and inh.; confirmed carcinogen; tumorigen; mutagenic data  
*Precaution:* Powerful oxidizer; violent reactions with ClF<sub>3</sub>  
*Storage:* Hygroscopic  
*Uses:* Metallurgy; green pigment in paints, plastics, ceramics, concrete, roofing tiles, enamels, glass; green granules in asphalt roofing; colorant in cosmetics, hair dyes, eye makeup, soap, external pharmaceuticals; catalyst in org. and inorg. reactions; component of refractory brick; stainless steel polishing abrasive; in elec. semiconductors; in alloys; printing fabrics and banknotes; colorant in food-contact polymers  
*Regulatory:* FDA 21CFR §72.2327, 173.1327, 178.3297  
*Manuf./Distrib.:* ABCR; Acros Org.; Aldrich; Atlantic Equip. Engrs.; Atomergic Chemetals; Cleveland Pigment & Color; Costec; D.N. Lukens; Engelhard; Ferro/Color; Fisher Scientific; Fluka; Great Western; Harcros; Hoover Color; Landers-Segal Color; Min. Pigments; Noah; Reade Advanced Materials; Seegott; Sigma; Spectrum Quality Prods.; Tammis Ind.; Universal Color Disps.; Warner-Jenkinson; Whittaker, Clark & Daniels  
*Trade Names:* Synox HG-5040; Synox HG-5050; Synox HG-5060; Synox HG-5080

**Chromium potassium sulfate**  
 CAS 10141-00-1; 7788-99-0 (dodecahydrate)  
*Synonyms:* Chrome alum; Chrome potash alum; Chromic potassium sulfate; Chromium (III) potassium sulfate; Chromium potassium sulfate (1:1:2); Potassium chrome alum; Potassium chromium sulfate  
*Definition:* Avail. commercially as the dodecahydrate

**CI azoic coupling component 1.** See  $\beta$ -Naphthol  
**CI azoic diazo component 48.** See Dianisidine  
**CI azoic diazo component 112.** See Benzidine

**CI pigment yellow 74.** See Pigment yellow 74

**C10-11 isoparaffin**

CAS 64742-48-9 (generic)  
*Synonyms:* Alkanes, C10-11-iso-; Alkanes, iso-, C10-11  
*Definition:* Mixt. of branched chain aliphatic hydrocarbons with 9-11 carbons in the alkyl chain  
*Uses:* Solvent in cosmetics; solvent, diluent, carrier for personal care prods. for sprays; solvent for coatings, odorless alkyd/acrylic paints; extremely low surf. tens. to improve flow and wetting; thinner; cleaner; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; minimizes VOC; virtually HAPs-free  
*Regulatory:* FDA 21CFR §172.882, 173.340  
*Trade Names:* Isopar® G

**C11-12 isoparaffin**

CAS 64742-48-9 (generic)  
*Synonyms:* Alkanes, C11-12-iso-; Alkanes, iso-, C11-12  
*Definition:* Mixt. of branched chain aliphatic hydrocarbons with 11 or 12 carbons in the alkyl chain  
*Uses:* Solvent, diluent, carrier for personal care prods. for sprays; solvent for coatings, odorless alkyd/acrylic paints; extremely low surf. tens. to improve flow and wetting; thinner; cleaner; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; minimizes VOC; virtually HAPs-free  
*Regulatory:* FDA 21CFR §172.882, 173.340  
*Trade Names:* Isopar® H; Isopar® K

**C11-13 isoparaffin**

CAS 64742-48-9 (generic)  
*Synonyms:* Alkanes, C11-13-iso-; Alkanes, iso-, C11-13  
*Definition:* Mixt. of branched chain aliphatic hydrocarbons with 11 to 13 carbons in the alkyl chain  
*Uses:* Solvent for cosmetics, skin care prods., coatings, odorless alkyd/acrylic paints; extremely low surf. tens. to improve flow and wetting; thinner; cleaner; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; minimizes VOC; virtually HAPs-free  
*Regulatory:* FDA 21CFR §172.882, 173.340  
*Trade Names:* Isopar® L

**C13-14 isoparaffin**

CAS 64742-48-9 (generic)  
*Synonyms:* Alkanes, C13-14-iso-; Alkanes, iso-, C13-14  
*Definition:* Mixt. of branched chain aliphatic hydrocarbons with 13 or 14 carbons in the alkyl chain  
*Uses:* Solvent for hair sprays, coatings, antiperspirants, laundry prewash, furniture/floor polishes, waterless hand cleaners, agrochemicals, thinners, cleaners, degreasers; suitable for odorless alkyd/acrylic paints; in anti-biotic gels; emollient, solvent in cosmetics; carrier for insecticide actives; dispersant; flow control agent; wetting agent; food-contact paper, rubber articles; defoamer in food-contact paper/paper; minimizes VOC; virtually HAPs-free  
*Regulatory:* FDA 21CFR §172.882, 173.340  
*Trade Names:* Isopar® M

**Citric acid**

CAS 77-92-9 (anhyd.); EINECS/ELINCS 201-069-1; FEMA 2306  
*Synonyms:* 2-Hydroxy-1,2,3-propanetricarboxylic acid; 2-Hydroxypropane-1,2,3-tricarboxylic acid;  $\beta$ -Hydroxytricarballic acid  
*Classification:* Organic acid  
*Empirical:*  $C_6H_8O_7$   
*Formula:*  $HOC(COOH)(CH_2COOH)_2$   
*Properties:* Colorless translucent crystals or powd., odorless, strongly acidic tart taste; very sol. in water, alcohol, and ether; very sl. sol. in ether; m.w. 192.43; dens. 1.542; m.p. 153 C; flash pt. 212 F  
*Toxicology:* LD50 (oral, rat) 6730 mg/kg; poison by IV; mod. toxic by subcut. and IP routes; poison by IV route; mildly toxic by ingestion; primary irritant; severe eye, mod. skin irritant; some allergenic props.; erodes tooth enamel; TSCA listed  
*Precaution:* Combustible; potentially explosive reaction with metal nitrates  
*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke, fumes  
*HMS:* Health 1; Flammability 0; Reactivity 0  
*Uses:* Prep. of citrates; acidulant in beverages, foods; flavoring extracts, confections, soft drinks; antioxidant, chelating agent in foods; sequestrant; dispersant; detergent builder; metal cleaner; curing accelerator; intermediate for paints; complexing agent for iron in cooling water systems; removes mill scale, heavy iron oxide and copper deposits; efflorescent powds.; mineral flotation agent; electroplating/anodizing reagent; regulates set time in concrete, mortar, plaster; buffer in textile dyeing, leather tanning; chelating agent in paper and plastics mfg.; buffer, chelating agent in cosmetics; skin care additive; pharmaceuticals (buffer, flavoring)  
*Use Level:* 2500 ppm (nonalcoholic beverages), 1600 ppm (ice cream, ices), 4300 ppm (candy), 1200 ppm (baked goods), 3600 ppm (chewing gum); ADI no limit (EU)  
*Regulatory:* FDA 21CFR §131.111, 131.112, 131.136, 131.138, 131.144, 131.146, 133, 145.131, 145.145, 146.187, 150.141, 150.161, 155.130, 161.190, 166.40, 166.110, 169.115, 169.140, 169.150, 172.755, 173.160, 173.165, 173.280, 182.1033, 182.6033, GRAS; USDA 9CFR §318.7, 381.147; BATF 27CFR §240.1051, limitation 5.8 lb/1000 gal; FEMA GRAS; Japan approved; Europe listed; UK approved; FDA approved for injectables, buccals, inhalants, nasals, ophthalmics, topicals, orals, otics; USP/NF, BP, Ph.Eur.  
*Manuf./Distrib.:* A.E. Staley Mfg.; ADA Int'l.; ADM; AMC Chems.; AMRESO; Aktiva Ltd; Aldrich; Alfa Chem; Allan; Ashland; BCH Brühl; Baychem; Browning; Cargill/Citric Acid; Chemical; FBC Ind.; Fluka; Gadot Biochem.; Haarmann & Reimer; Harcros; Hoffmann-LaRoche; Int'l. **Cobalt acetate (ous)**

CAS 6147-53-1; EINECS/ELINCS 200-755-8  
*Synonyms:* Acetic acid, cobalt (2+) salt, tetrahydrate; Cobalt acetate tetrahydrate; Cobalt (I) acetate tetrahydrate; Cobalt diacetate tetrahydrate; Cobaltous acetate; Cobaltous acetate tetrahydrate  
*Classification:* Carboxylic acid salt  
*Empirical:*  $C_4H_6CoO_4 \cdot 4H_2O$

*Formula:*  $\text{Co}(\text{C}_2\text{H}_3\text{O}_2)_2 \cdot 4\text{H}_2\text{O}$

*Properties:* Reddish-violet cryst.; sol. in water, acids, alcohol; m.w. 177.02 (anhyd.); 249.11 (tetrahydrate); dens. 1.7043; m.p. loses water @ 140°C

*Toxicology:* ACGIH TLV/TWA 0.05 mg (Co)/m<sup>3</sup>; LD50 (oral, rat) 708 mg/kg; mod. toxic by ing.; avoid inh.; skin and eye irritant; cancer suspect agent; human mutagenic data; target organs: thyroid, lungs; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Storage:* Hygroscopic, deliq.

*Uses:* Inks; paint and varnish driers; catalyst; anodizing; mineral supplement in feed additives; foam stabilizer; in food-pkg. adhesives; polymerization catalyst in mfg. of paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §175.105, 176.170

*Manuf./Distrib.:* AC Ind.; Aldrich; Alemark; Atomergic Chemetals; BCH Brühl; Barker Ind.; Celtic Chem. Ltd; Fluka; Hall Chem.; Mallinckrodt Baker; Min. R&D; Noah; OM Group; Shepherd; Sigma; Spectrum Quality Prods.

**Cobalt acetate tetrahydrate.** See Cobalt acetate (ous)

**Cobalt (I) acetate tetrahydrate.** See Cobalt acetate (ous)

#### **Cobalt aluminate**

*Uses:* Colorant in food-contact polymers, paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170, 178.3297

*Manuf./Distrib.:* Bayer; Ferro/Color

**Cobalt diacetate tetrahydrate.** See Cobalt acetate (ous)

**Cobaltous acetate.** See Cobalt acetate (ous)

**Cobaltous acetate tetrahydrate.** See Cobalt acetate (ous)

#### **Cocamide**

CAS 61789-19-3; EINECS/ELINCS 263-039-4

*Synonyms:* Amides, coco; Amides, coconut oil; Coco amide; Coconut acid amide; Coconut oil amides

*Classification:* Aliphatic amide

*Formula:*  $\text{RCO-NH}_2$ , where RCO- represents fatty acids derived from coconut oil

*Toxicology:* TSCA listed

*Uses:* Dry-cleaning detergent; internal lubricant, slip agent for plastics, coatings, films; foam/visc. stabilizer; water repellent for textiles; emulsifier, emulsion stabilizer, surfactant, visc. control agent in cosmetics; in closure-sealing gaskets for food containers; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.320, 176.210, 177.1210

#### **Cocamide DEA**

CAS 8051-30-7; 61791-31-9; 68603-42-9; EINECS/ELINCS 263-163-9; 271-657-0

*Synonyms:* Amides, coco, N,N-bis (2-hydroxyethyl)-; N,N-Bis (2-hydroxyethyl) coco amides; N,N-Bis (2-hydroxyethyl) coco fatty acid amide; Coconut acid diethanolamide; Coconut acid polydiethanolamide (2:1 type); Coconut acid superamide (1:1 type); Coconut diethanolamide; Cocoyl diethanolamide; Diethanolamine coconut fatty acid condensate

*Definition:* Ethanolamides of coconut acid

*Formula:*  $\text{RCO-N}(\text{CH}_2\text{CH}_2\text{OH})_2$ , RCO- represents the coconut acid radical

*Properties:* Amber liq.

*Toxicology:* May produce contact sensitivity; TSCA listed

*Uses:* Detergent, thickener, emulsifier, foam booster/stabilizer, wetting agent, solubilizer for cosmetics, pharmaceutical topicals, industrial and household cleaners, textiles, etc.; thickener, conditioner, stabilizer in shampoos; surfactant, emulsion stabilizer in cosmetics; plastics antistat; foods (delimiting of cottonseed for prod. of cottonseed oil); byprods. for use in animal feeds; in cellophane for food pkg.; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §172.710, 173.322 (0.2% max.), 175.105, 176.210, 177.1200, 177.2260, 177.2800; FDA approved for topicals

*Manuf./Distrib.:* Custom Ingreds.; McIntyre; Mitsui & Co. USA; Rhodia HPCII; Venus Ethoxyethers

*Trade Names:* DeMIDE MFM-200; DeMIDE MFS-200; DeMIDE RCN-100; DeMIDE RCN-100HV; DeMIDE RCN-200; DeMIDE RCN-276; DeMIDE RCN-MCY-100; DeMIDE RCN-ME-100; Norfox® DCS; Stafoam F

#### **Cocamidopropylamine oxide**

CAS 68155-09-9; EINECS/ELINCS 268-938-5

*Synonyms:* Amides, coco, N-[3-(dimethylamino) propyl], N-oxides; Cocamidopropyl dimethylamine oxide; Coco amides, N-[3-(dimethylamino) propyl], N-oxide; Cocoamidopropyldimethylamine oxide; N-[3-(Dimethylamino) propyl] coco amides-N-oxide

*Classification:* Tertiary amine oxide

*Formula:*  $\text{RCO-NH}(\text{CH}_2)_3\text{N}(\text{CH}_3)_2\text{O}$ , RCO- represents the coconut fatty acids

*Toxicology:* TSCA listed

*Uses:* Detergent, wetting agent, emulsifier, softener, conditioner, foam booster/stabilizer for rug shampoos, laundry detergents, dishwashing, shampoos, bath prods., cleaners, antistatic softeners; foam stabilizer in foam rubber, electroplating, paper coatings; surfactant in cosmetics; emulsifier for pharmaceuticals

*Trade Names:* DeMOX CAPO; Rhodamox® CAPO

**Cocamidopropyl dimethylamine oxide.** See Cocamidopropylamine oxide

#### **Coceth-5**

CAS 61791-13-7 (generic)

*Synonyms:* PEG-5 coconut alcohol; POE (5) coconut ether

*Definition:* PEG ether of coconut alcohol

*Formula:*  $\text{R}(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R represents coconut radical, avg.  $n = 5$

*Properties:* Nonionic

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics; emulsifier in cosmetics

*Trade Names:* Genapol® C-050

#### **Coceth-8**

CAS 61791-13-7 (generic)

*Synonyms:* PEG-8 coconut alcohol; PEG 400 coconut ether; POE (8) coconut ether

*Definition:* PEG ether of coconut alcohol

*Formula:*  $\text{R}(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R represents coconut radical, avg.  $n = 8$

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics; emulsifier in cosmetics; defoamer in food-contact paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §176.210, 177.2800

*Trade Names:* Genapol® C-080

#### **Coceth-10**

CAS 61791-13-7 (generic)

*Synonyms:* PEG-10 coconut alcohol; PEG 500 coconut ether; POE (10) coconut ether

*Definition:* PEG ether of coconut alcohol

*Formula:*  $\text{R}(\text{OCH}_2\text{CH}_2)_n\text{OH}$ , R represents coconut radical, avg.  $n = 10$

*Properties:* Nonionic

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics; emulsifier in cosmetics; in food-contact textiles

*Regulatory:* FDA 21CFR §177.2800

*Trade Names:* Genapol® C-100

#### **Coceth-15**

CAS 61791-13-7 (generic)

*Synonyms:* PEG-15 coconut alcohol; POE (15) coconut ether

*Definition:* PEG ether of coconut alcohol

*Properties:* Nonionic

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics

*Trade Names:* Genapol® C-150

#### **Coceth-20**

CAS 61791-13-7 (generic)

*Synonyms:* PEG-20 coconut alcohol; POE (20) coconut ether

*Definition:* PEG ether of coconut alcohol

*Properties:* Nonionic

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics

*Trade Names:* Genapol® C-200

#### **Cocoalkonium chloride**

*Synonyms:* Cocoalkyl dimethyl benzyl ammonium chloride; Coco dimethyl

benzyl ammonium chloride; Coco dimonium chloride; Dimethyl cocobenzyl ammonium chloride; Quaternary ammonium compds., benzylcoco alkyldimethyl, chlorides

**Classification:** Quaternary ammonium salt

**Properties:** Liq.; cationic

**Uses:** Bactericide; fungicide; sanitizer; swimming pool treatment; demulsification of hydrocarbons; antistat in cosmetics, plastics; latex coagulation; flotation; electrostatic paints; disinfectant in detergent sanitizers; corrosion inhibitor for oil drilling; emulsifier in metalworking fluids; emulsifier and dispersant for sludge in oil drilling and wastewater treatment; germicide (duckweed killer) in water treatment, petrol., textiles, paper

**Trade Names:** Nissan Cation F2-20R; Nissan Cation F2-40E; Nissan Cation F2-50; Nissan Cation F2-50E; Nissan Cation F2-CONC.

**Cocoalkyl dimethyl benzyl ammonium chloride.** See Cocoalkonium chloride

#### Coco alkyl isoquinolinium bromide

**Uses:** Germicide (duckweed killer) for water treatment; germicide for textiles and pulp and paper industries; cosmetics rinse; germicide, insecticide in agric.

**Trade Names:** Firet Q

**Coco amide.** See Cocamide

**Coco amides, N-[3-(dimethylamino) propyl], N-oxide.** See Cocamidopropylamine oxide

**Cocoamidopropyldimethylamine oxide.** See Cocamidopropylamine oxide

**Cocoamine ethoxylates.** See PEG cocamine

**Cocoamino betaine.** See Coco-betaine

#### Coco-betaine

CAS 68424-94-2; 85409-25-2; EINECS/ELINCS 270-329-4

**Synonyms:** Betaines, coco alkyldimethyl; Cocoamino betaine; Cocodimethylamino betaine; Coco dimethyl betaine; Coco dimethyl glycine; Coconut betaine; Dimethylcocoamino betaine; Quaternary ammonium compds., carboxymethyl (coco alkyl) dimethyl hydroxides, inner salts

**Classification:** Zwitterion (inner salt)

**Formula:** RN<sup>+</sup>(CH<sub>3</sub>)<sub>2</sub>CH<sub>2</sub>COO<sup>-</sup>, where R = alkyl groups derived from coconut oil

**Properties:** Amphoteric

**Toxicology:** TSCA listed

**Uses:** Surfactant, detergent, wetting agent, emulsifier, foaming agent, solubilizer, biocide, bactericide, conditioner, visc. builder in industrial, household, pharmaceutical, and cosmetic applics.; plastics antistat

**Trade Names:** Paxogen COB

**Coco bis-2-hydroxyethylamine oxide.** See Dihydroxyethyl cocamine oxide

**Coco di(hydroxyethyl) amine oxide.** See Dihydroxyethyl cocamine oxide

**Cocodimethylamino betaine.** See Coco-betaine

**Coco dimethyl benzyl ammonium chloride.** See Cocoalkonium chloride

**Coco dimethyl betaine.** See Coco-betaine

**Coco dimethyl glycine.** See Coco-betaine

**Coco dimonium chloride.** See Cocoalkonium chloride

**Coco fatty acid.** See Coconut acid

**Coco fatty acids, potassium salts.** See Potassium cocoate

#### Coconut acid

CAS 61788-47-4; 8037-14-7; 67701-05-7; 68937-85-9; EINECS/ELINCS 262-978-7

**Synonyms:** Coco fatty acid; Coconut fatty acid; Coconut fatty acids; Coconut oil acids; Coconut oil fatty acids; Fatty acids, coco

**Definition:** Mixtures of fatty acids

**Empirical:** C<sub>12</sub>H<sub>24</sub>O<sub>2</sub>

**Formula:** RCOOH, R = coco

**Properties:** Pale yel. solid; insol. in water; m.w. 200.32; m.p. 23-27 C; acid no. 260-270; sapon. no. 262-272

**Toxicology:** TSCA listed

**Uses:** Lubricant; intermediate used in alkyd resins, rubber compding., detergents, water repellents, polishes, soaps, abrasives, cutting oils, candles, crayons, emulsifiers, personal care prods.; source of long-chain alkyl groups; activator; surfactant, emulsifier, emollient in cosmetics; in foods; emulsifier in pharmaceutical topicals; in food-pkg. adhesives; defoamer in food-contact paper coatings, paper/paperboard; in food-contact textiles

**Regulatory:** FDA 21CFR §175.105, 175.320, 176.200, 176.210, 177.1010, 177.2260, 177.2600, 177.2800, 178.3570, 178.3910; approved for topicals

**Manuf./Distrib.:** ABITEC; Acme-Hardesty; Akzo Nobel; Alnor Oil; Chem. Distribution; Eastech; Magna-Kron; NOF Am.; Norman, Fox; Nottingham; Procter & Gamble; Sea-Land; Uniqema N. Am.

**Coconut acid amide.** See Cocamide

**Coconut acid diethanolamide.** See Cocamide DEA

**Coconut acid, hydrogenated.** See Hydrogenated coconut acid

**Coconut acid methyl ester.** See Methyl cocoate

**Coconut acid polydiethanolamide (2:1 type).** See Cocamide DEA

**Coconut acid, potassium salt.** See Potassium cocoate

**Coconut acid superamide (1:1 type).** See Cocamide DEA

#### Coconut alcohol

CAS 68425-37-6; EINECS/ELINCS 270-351-4

**Synonyms:** Alcohols, coco; Coconut fatty alcohol

**Definition:** Mixture of fatty alcohols

**Toxicology:** TSCA listed

**Uses:** Emollient, emulsifier in cosmetics; superfatting agent in shampoos; raw material for sulfation, ethoxylation; defoamer in food-contact paper/paperboard; in food-contact textiles

**Regulatory:** FDA 21CFR §176.210, 177.2800

**Coconut betaine.** See Coco-betaine

**Coconut butter.** See Coconut (Cocos nucifera) oil

#### Coconut (Cocos nucifera) oil

CAS 8001-31-8; EINECS/ELINCS 232-282-8; UN No. 1363 (DOT)

**Synonyms:** Copra oil; Cocos nucifera; Coconut butter; Coconut oil; Coconut palm oil

**Classification:** Saturated fat

**Definition:** Fixed oil obtained from kernels of seeds of *Cocos nucifera*

**Properties:** Wh. fatty solid or liq., sweet nutty taste; sol. in oxygenated and chlorinated solvs.; very sol. in chloroform, ether, CS<sub>2</sub>; pract. insol. in water; dens. 0.903 (0/4 C); m.p. 21-27 C; acid no. < 6; iodine no. 8-9.5; sapon. no. 255-258; ref. index 1.4485-1.4495; flash pt. (CC) 550 F; surf. tens. 33.4 dynes/cm

**Toxicology:** May cause allergic skin reaction; TSCA listed

**Precaution:** Flamm. solid when exposed to heat or flame; may spontaneously heat and ignite if stored wet and hot

**Hazardous Decomp. Prods.:** CO<sub>2</sub> from combustion

**HMIS:** Health 0; Flammability 1; Reactivity 0

**Uses:** Emollient, solvent, superfatting agent, clouding agent, detergent, wetting agent, emulsifier in cosmetics and pharmaceuticals; drying oil for paints; soap ingred.; dyeing cotton; syn. detergents; source of fatty acids and alcohols; base for leather preps.; delivery/absorp. enhancement; diluent; foods (coating agent, emulsifier, formulation aid, texturizer); shortening/margarine ingred.; in food-pkg. adhesives; in food-contact coatings and textiles; defoamer in food-contact paper coatings, paper/paperboard

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.2800, 182.70; GRAS; FDA approved for orals, topicals; BP compliance

**Manuf./Distrib.:** ABITEC; Akzo Nobel; Alban Muller; Aldrich; Alnor Oil; Amber Syn.; Arista Ind.; Chemron; Jarchem Ind.; Lipo; Lomas Int'l.; Protameen; Rhodia HPCI; Ruger; Sea-Land; Sigma; Spectrum Quality Prods.; Stevenson Cooper; Thornley; Tri-K Ind.; Universal Preserv-A-Chem; Welch, Holme & Clark

**Coconut diethanolamide.** See Cocamide DEA

**Coconut fatty acid.** See Coconut acid

**Coconut fatty acids.** See Coconut acid

**Coconut fatty acids, magnesium salts.** See Magnesium cocoate

**Coconut fatty acids, 1-methyl-1,2-ethanediyl ester.** See Propylene glycol dicocoate

**Coconut fatty acid, sodium salt.** See Sodium cocoate

**Coconut fatty alcohol.** See Coconut alcohol

**Coconut hydroxyethyl imidazoline.** See Cocoyl hydroxyethyl imidazoline

**Coconut oil.** See Coconut (Cocos nucifera) oil

**Coconut oil acids.** See Coconut acid

**Coconut oil amides.** See Cocamide

**Coconut oil fatty acids.** See Coconut acid

**Coconut oil fatty acids, hydrogenated.** See Hydrogenated coconut acid

**Coconut oil fatty acids, sodium salt.** See Sodium cocoate

## Coconut oil, hydrogenated

**Coconut oil, hydrogenated.** See Hydrogenated coconut oil

### Coconut oil triglycerides

Uses: Foods (soft fat and filling for prod. of cooling fillings); defoamer in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.210

**Coconut palm oil.** See Coconut (Cocos nucifera) oil

**Coconut trimethyl ammonium chloride.** See Cocotrimonium chloride

**Cocos nucifera.** See Coconut (Cocos nucifera) oil

### Cocotrimonium chloride

CAS 61789-18-2; EINECS/ELINCS 263-038-9

Synonyms: Coconut trimethyl ammonium chloride; Cocoyl trimethyl ammonium chloride; Quaternary ammonium compds., coco alkyl trimethyl chlorides

Classification: Quaternary ammonium salt

Formula:  $[RN(CH_3)_3]^+Cl^-$ , R rep. alkyl groups from coconut oil

Properties: Cationic

Toxicology: TSCA listed

Uses: Emulsifier; dispersant; corrosion inhibitor; for oil field brines and HCl acidizing systems; antistat and lubricant for syn. fibers, plastics; bactericide; fungicide; disinfectant; sanitizer; antimicrobial, antistat, surfactant in cosmetics; germicide (duckweed killer) for water treatment, petrol. industry

Trade Names: Nissan Cation FB

Trade Names Containing: Arquad® C-50

**Cocoyl diethanolamide.** See Cocamide DEA

### Cocoyl hydroxyethyl imidazoline

CAS 61791-38-6; EINECS/ELINCS 263-170-7

Synonyms: Coconut hydroxyethyl imidazoline; 2-Cocoyl-1-(hydroxyethyl) imidazoline; Cocoyl imidazoline; 1H-Imidazole-1-ethanol, 4,5-dihydro-2-norcoco alkyl derivs.; 1H-Imidazole-1-ethanol, 4,5-dihydro-2-norcocoyl

Classification: Heterocyclic compd.

Formula:  $R=N-N-(CH_2)_2OH$ , R is derived from coconut fatty radical

Toxicology: TSCA listed

Uses: Emulsifier for industrial detergents, cleaners; emulsifier, antistat, corrosion inhibitor, softener for textiles, plastics, asphalt, tar emulsion breakers, paints, printing inks; water repellent treatment of cement, concrete, and plaster; fungicide; surfactant in cosmetics

Trade Names: Miramine® CC

**2-Cocoyl-1-(hydroxyethyl) imidazoline.** See Cocoyl hydroxyethyl imidazoline

**Cocoyl imidazoline.** See Cocoyl hydroxyethyl imidazoline

**Cocoyl trimethyl ammonium chloride.** See Cocotrimonium chloride

### Cod liver oil

CAS 8001-69-2; EINECS/ELINCS 232-289-6

Synonyms: Gadidae oil; Gadi lecur; Morrhuia oil

Definition: Fixed oil expressed from fresh livers of *Gadus morrhua* and other species of codfish, contg. vitamins A and D, omega 3 fatty acid

Properties: Amber thin oily liq., sl. fishy odor and taste; sol. in ether, chloroform, ethyl acetate, carbon disulfide, petroleum ether; sl. sol. in alcohol; negligible sol. in water; dens. 0.918-0.927; iodine no. 145-180; sapon. no. 180-192; ref. index 1.4705-1.4745

Toxicology: No known toxicity

Precaution: Combustible

Hazardous Decomp. Prods.:  $CO_2$  from combustion

HMIS: Health 1; Flammability 0; Reactivity 0

Uses: Medicine (vitamin A and D content); protectant in diaper rash ointment; dietary supplement in foods and pharmaceuticals; chamois-leather tanning; in food-pkg. adhesives; defoamer in food-contact paper coatings, paper/paperboard

Regulatory: FDA 21CFR §175.105, 176.200, 176.210, 177.2800; GRAS for use in dietary supplements; BP compliance

Manuf./Distrib.: Allan; Am. Roland; Arista Ind.; Artek; Bruchem; F.H. Taussig; Integra; J.H. Calo; Jedwards Int'l.; Marine Bio-Prods.; Maypro Ind.; Mutchler; Penta Mfg.; R.W. Greeff; Ruger; Sigma; Spectrum Quality Prods.

**Collagen hydrolysates.** See Hydrolyzed collagen

**Collodion.** See Nitrocellulose

**Collodion cotton.** See Nitrocellulose

**Copaifera officinalis balsam.** See Balsam copaiba (Copaifera officinalis)

**Copernicia cerefera wax.** See Carnauba (Copernicia cerifera) wax

**Copernicia cerifera wax.** See Carnauba (Copernicia cerifera) wax

**Copper-8.** See Copper 8-quinolinolate

**Copperas red.** See Iron oxide red

**Copper dihydroxide.** See Copper hydroxide (ic)

**Copper dinitrate.** See Copper nitrate (ic)

**Copper hydrate.** See Copper hydroxide (ic)

**Copper (2+) hydroxide.** See Copper hydroxide (ic)

**Copper (II) hydroxide.** See Copper hydroxide (ic)

### Copper hydroxide (ic)

CAS 20427-59-2

Synonyms: Copper dihydroxide; Copper hydrate; Copper (II) hydroxide; Copper (2+) hydroxide; Copper oxide hydrated; Cupric hydroxide

Empirical:  $H_2CuO_2$

Formula:  $Cu(OH)_2$

Properties: Bluish-grn. powd.; sol. in acids and ammonium hydroxide; insol. in water; m.w. 97.59; dens. 3.368; m.p. dec. above 100 C producing cupric oxide

Toxicology: LD50 (oral, rat) 1000 mg/kg; toxic by ing. and inh.; eye irritant; TSCA listed

Uses: Copper salts; mordant; paper staining; pesticide; fungicide; catalyst; cuprammonium rayon process reagent; pigment; feed additive

Manuf./Distrib.: Agtrol Chem. Prods.; Aldrich; Am. Chemet; Cuproquim; Drexel; Faesy & Besthoff; Griffin; Helm AG; Lohmann

**Copper hydroxy quinolate.** See Copper 8-quinolinolate

**Copper-8-hydroxyquinolate.** See Copper 8-quinolinolate

**Copper-8-hydroxyquinoline.** See Copper 8-quinolinolate

**Copper monosulfate.** See Cupric sulfate anhydrous

**Copper (2+) nitrate.** See Copper nitrate (ic)

**Copper (II) nitrate.** See Copper nitrate (ic)

### Copper nitrate (ic)

CAS 3251-23-8 (anhyd.); 10031-43-3 (trihydrate); EINECS/ELINCS 221-838-5; UN No. NA 1479 (DOT)

Synonyms: Copper dinitrate; Copper (2+) nitrate; Copper (II) nitrate; Copper (II) nitrate trihydrate; Cupric dinitrate; Cupric nitrate; Cupric nitrate hexahydrate; Cupric nitrate trihydrate

Definition: Avail. commercially as the trihydrate

Empirical:  $CuN_2O_6 \cdot 3H_2O$ ;  $CuN_2O_6 \cdot 6H_2O$

Formula:  $Cu(NO_3)_2 \cdot 3H_2O$  or  $Cu(NO_3)_2 \cdot 6H_2O$

Properties: Anhyd.: Blue-grn. cryst.; sol. in water, ethyl acetate, dioxane; m.w. 187.55; dens. 2.047; m.p. 255-256 C; sublimes @ 150-225 C; Trihydrate: Dk. blue cryst., deliq.; sol. in water and ethanol; m.w. 241.60; dens. 2.32 kg/l; m.p. 114 C; Hexahydrate: Blue cryst. flakes, deliq.; sol. in water, ethanol; m.w. 295.66; dens. 2.0

Toxicology: Anhyd.: ACGIH TLV/TWA 1 mg (Cu)/m<sup>3</sup>; LD50 (oral, rat) 940 mg/kg; mod. toxic by ing.; severe skin and eye irritant; Trihydrate: ACGIH TLV/TWA 1 mg (Cu)/m<sup>3</sup>; LD50 (oral, rat) 940 mg/kg; mod. toxic by ing.; mutagenic data

Precaution: Anhyd.: Explosive or violent reactions possible; can ignite on

**Uses:** Source of glucose; visc. control agent in cosmetics; filler in baking powder; thickener in food prods.; dietary supplement; adhesives; coatings; additive in plastics; pharmaceutical excipient, filler, tablet disintegrant; powd. in rubber gloves; in food pkg., food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105, 178.3520, 182.70, 182.90; GRAS for use in dietary supplements; BP, Ph.Eur. compliance

**Manuf./Distrib.:** A.E. Staley Mfg.; ADM Corn Processing; Aldrich; Bruchem; Cerestar UK; Cerestar USA; Chemstar Prods.; Corn Prods.; Grain Processing; Houghton Chem.; NB Entrepreneurs; Nalco; Nat'l. Starch & Chem.; Penford Prods.; Ruger; Sigma; Varsal Instruments; Westco

**Trade Names:** Apollo® 4200 Cationic Starches; Apollo® Cationic Starches; B20F; B200; C110; Chargemaster® R415; Chargemaster® R462; Chargemaster® R515; Chargemaster® R615; Cleer-Cote® 625; Coatmaster® K61F; D12F; D120; Douglas® Starches; Electra® 7458; Ethylex® 2005, 2015, 2020, 2025, 2035, 2040, 2065, 2075, 2095; ICB® 3000, 3100, 3200; ICB® 3000D; Interbond® C; Koldex® 50, 60; Lok-Size® 30; Pearl; Pearl AP, R; Pencat® Cationic Starches; Penford® Gum; Sta-Lok® 120, 160, 180, 182; Sta-Lok® 140; Sta-Lok® 156; Sta-Lok® 300, 310, 330; Sta-Lok® 356; Sta-Lok® 374, 376; Staramic® 105; Staramic® 747; Star\*pol® 136; Star\*pol® 410; Star\*pol® 468, 469, 600; Star\*pol® 700, 800; Staysize® 140

**Cosmetic talc.** See Talc

**Cotton fiber.** See Cellulose

**Cotton oil.** See Cottonseed (Gossypium) oil

**Cotton red.** See Basic red 2

#### Cottonseed acid

CAS 68308-51-0; EINECS/ELINCS 269-656-5

**Synonyms:** Acids, cottonseed; Cottonseed fatty acids; Distilled fatty acids, cottonseed oil; Fatty acids, cottonseed oil

**Definition:** Mixture of fatty acids derived from cottonseed oil

**Uses:** Emollient in cosmetics; in food pkg. adhesives/coatings; defoamer in food-contact paper coatings, paper/paperboard; in food-contact textiles

**Regulatory:** FDA 21CFR §175.105, 175.320, 176.200, 176.210, 177.2800

**Cottonseed fatty acids.** See Cottonseed acid

#### Cottonseed (Gossypium) oil

CAS 8001-29-4; EINECS/ELINCS 232-280-7

**Synonyms:** Aceite de Algodon; Cotton oil; Cottonseed oil; Cottonseed oil, winterized; Deodorized winterized cottonseed oil; Gossypium; Oleum Gossypii seminis

**Definition:** Refined fixed oil from seeds of various species of *Gossypium*

**Properties:** Pale yel. oily liq., nearly odorless; sol. in ether, benzene, chloroform; sl. sol. in alcohol; negligible sol. in water; dens. 0.915-0.921; f.p. 0-5°C; solid. pt. 31-33°C; iodine no. 109-120; sapon. no. 190-198; flash pt. (CC) 486 F

**Toxicology:** Questionable carcinogen; experimental tumorigen and teratogen; allergen; TSCA listed

**Precaution:** Combustible exposed to heat or flame; may be dangerous hazard due to spontaneous heating

**Hazardous Decomp. Prods.:** CO<sub>2</sub> from combustion

**NFPA:** Health 0; Flammability 1; Reactivity 0

**Storage:** Light-sensitive

**Uses:** Emollient; foods (coating agent, emulsifier, formulation aid, texturizer); drying oil for paints; leather dressing; soap stock; lubricant; glycerol; cosmetic base; waterproofing compositions; pharmaceutical vehicle, solvent; in food-pkg. adhesives; defoamer in food-contact paper coatings, paper/paperboard; drying oil and surf. lubricant in food-contact coatings; in food-contact textiles

**Use Level:** 56-92% (intramuscular preps.), 0.002-402 mg (solid oral dosage forms)

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.2800, GRAS; FDA approved for intramuscular injectables, orals; USP/NF compliance

**Manuf./Distrib.:** ABITEC; Aldrich; Allyson Enterprises; Alnor Oil; Amber Syn.; Arista Ind.; Croda Inc; Mutchler; Natural Oils Int'l.; Oilseeds Int'l.; Ruger; Sea-Land; Sigma; Spectrum Quality Prods.; Thornley; Tri-K Ind.; Welch, Holme & Clark

**Cottonseed oil.** See Cottonseed (Gossypium) oil

#### Cottonseed oil triglycerides

**Uses:** Defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.210

**Cottonseed oil, winterized.** See Cottonseed (Gossypium) oil

**Coumarin, 7-diethylamino-4-methyl-.** See 7-Diethylamino-4-methylcoumarin

**Coumarone/indene copolymer.** See Coumarone/indene resin

#### Coumarone/indene resin

CAS 35343-70-5

**Synonyms:** Coumarone/indene copolymer; Coumarone resin; Indene/coumarone resin; Poly (coumarone-co-indene); Polyindene resin

**Classification:** Thermosetting resin

**Properties:** Brn. solid; soft and sticky at R.T.; hardens on heating to solid; sol. in hydrocarbon solvs., pyridine, acetone, carbon disulfide, CCl<sub>4</sub>; insol. in water, alcohol; dens. 1.140; soften. pt. 126°C; flash pt. > 109°C; ref. index 1.63-1.64

**Toxicology:** May be harmful by inh., ing., or skin absorption; may cause eye/skin irritation; may be irritating to mucous membranes and upper respiratory tract; TSCA listed

**Precaution:** Combustible; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>; heated to decomp., emits acrid smoke and irritating fumes; emits toxic fumes under fire conditions

**Storage:** Keep tightly closed; store in a cool, dry place

**Uses:** Extender in epoxy systems, adhesives, printing inks; floor tile binder; friction tape; aluminum paints; varnishes; enamels; plasticizer, softener, reinforcer, tackifier in rubbers; plasticizer/softener in PVC, bitumen, adhesives; tung oil-coumarone resins (aluminum decorative/structure paints, plaster, cement primer paints); protective coating on grapefruit, lemons, limes, oranges, tangerines; in chewing gum; in food-pkg. adhesives; in food-contact coatings; plasticizer in food-contact rubber articles for repeated use

**Use Level:** Limitation 200 ppm on fresh wt. basis (citrus coating)

**Regulatory:** FDA 21CFR §172.215, 175.105, 175.300, 177.2600

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Natrochem; Neville

**Trade Names:** Cumar® LX®-509; Cumar® R-3; Cumar® R-11; Cumar® R-12 (V-2, V-2½); Cumar® R-13; Cumar® R-17

**Coumarone resin.** See Coumarone/indene resin

**CP.** See Cellulose acetate propionate

#### C9-11 pareth-2

CAS 68439-46-3 (generic)

**Synonyms:** Pareth-91-2; PEG-2 C9-11 alcohol ether

**Classification:** Linear alcohol ethoxylate

**Definition:** PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 2 moles EO

**Properties:** Nonionic

**Uses:** Detergent, emulsifier; intermediate for sulfation giving high foaming anionics; polishes, waxes; dry cleaning; I&I cleaning

**Trade Names:** Teric™ G9A2

#### C9-11 pareth-3

CAS 68439-46-3 (generic)

**Synonyms:** Pareth-91-3; PEG-3 C9-11 alcohol ether

**Classification:** Linear alcohol ethoxylate

**Definition:** PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 3 moles EO

**Properties:** Nonionic

**Toxicology:** TSCA listed

**Uses:** Emulsifier in cosmetics; wetting agent; intermediate; dispersant; surfactant

**Trade Names:** Imbentin-C/91/025

#### C9-11 pareth-4

CAS 68439-46-3 (generic)

**Synonyms:** Pareth-91-4; PEG-4 alkyl C9-11 alcohol

**Classification:** Linear alcohol ethoxylate

**Definition:** PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 4 moles EO

**Properties:** Nonionic

**Uses:** Scouring agent for textiles; soaking assistant in leather industry

**Trade Names:** Imbentin-C/91/040

**C9-11 pareth-5**

CAS 68439-46-3 (generic)  
*Synonyms:* Pareth-91-5; PEG-5 alkyl C9-11 alcohol  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 5 moles EO  
*Properties:* Nonionic  
*Uses:* Wetting agent, emulsifier; for hard surf. cleaners, degreasers and dispersants  
*Trade Names:* Imbentin-C/91/35

**C9-11 pareth-6**

CAS 68439-46-3 (generic)  
*Synonyms:* Pareth-91-6; PEG-6 C9-11 alcohol ether  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 6 moles EO  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier in cosmetics; wetting agent; intermediate; dispersant; surfactant; coupling agent; solubilizer; filter cake dewatering; dust suppression in coal industry  
*Trade Names:* Imbentin-C/91/060; Synperonic 91/6; Teric™ G9A6

**C9-11 pareth-8**

CAS 68439-46-3 (generic)  
*Synonyms:* Pareth-91-8  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 8 moles EO  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier in cosmetics; detergent; wetting agent; intermediate; dispersant; solubilizer; degreaser  
*Trade Names:* Imbentin-C/91/080 I; Imbentin-C/91/080 OFA; Synperonic 91/8; Synperonic 91/8T; Teric™ G9A8

**C9-11 pareth-9**

CAS 68439-46-3 (generic)  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 9 moles EO  
*Properties:* Nonionic  
*Uses:* O/w emulsifier for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment  
*Trade Names:* Imbentin-C/91/85

**C9-11 pareth-10**

CAS 68439-46-3 (generic)  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 10 moles EO  
*Properties:* Nonionic  
*Uses:* Detergent, emulsifier, wetting and scouring agent for agric. and oil field applics.  
*Trade Names:* Teric™ G9A10

**C9-11 pareth-12**

CAS 68439-46-3 (generic)  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C9-11 fatty alcohols with avg. 12 moles EO  
*Properties:* Nonionic  
*Uses:* Emulsifier, dispersant, stabilizer, solubilizer, wetting agent; used in detergent formulations for domestic use; degreaser in textile applics.  
*Trade Names:* Imbentin-C/91/120

**C10-12 pareth-3**

CAS 66455-15-0 (generic)  
*Classification:* Linear alcohol ethoxylate  
*Properties:* Nonionic  
*Uses:* Surfactant intermediate; emulsifier; wetting agent; adjuvant for pesticides; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg.

of food-contact articles; defoamer in food-contact coatings

*Trade Names:* Surfonic® L12-2.6; Surfonic® L12-3

**C10-12 pareth-5**

CAS 66455-15-0 (generic)  
*Synonyms:* PEG-5 C10-12 alcohol  
*Classification:* Linear alcohol ethoxylate  
*Properties:* Nonionic  
*Uses:* Detergent, wetting agent, emulsifier, foaming agent, intermediate, dispersant  
*Trade Names:* Alfonic® 1012-5.5

**C10-12 pareth-6**

CAS 66455-15-0 (generic)  
*Classification:* Linear alcohol ethoxylate  
*Properties:* Nonionic  
*Uses:* Surfactant, wetting agent, o/w emulsifier for detergent, laundry, hard surf. cleaners, personal care prods., agric. pesticides; rewetting agent for paper; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Trade Names:* Surfonic® L12-6

**C10-12 pareth-8**

CAS 66455-15-0 (generic)  
*Classification:* Linear alcohol ethoxylate  
*Properties:* Nonionic  
*Uses:* Surfactant, wetting agent, o/w emulsifier for detergent, laundry prespotters, hard surf. cleaners, personal care prods., agric. pesticides; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings  
*Trade Names:* Surfonic® L12-8

**C11-15 pareth-3**

CAS 68131-40-8 (generic)  
*Synonyms:* Pareth-15-3  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C11-15 fatty alcohols with avg. 3 moles EO  
*Properties:* Nonionic  
*Toxicology:* LD50 (oral, rat) 32 ml/kg, (skin, rabbit) 5660 µl/kg; primary irritant; TSCA listed  
*Uses:* Detergent, emulsifier, wetting agent used in textile processing applics.; textile lubricant; latex emulsions; plastics antistat; surfactant in textiles, solvent cleaners, dry-cleaning, metalworking fluids, water treatment, oil field chems., pulp/paper deinking, latex emulsions; emulsifier in cosmetics  
*Manuf./Distrib.:* Sigma  
*Trade Names:* Tergitol® 15-S-3

**C11-15 pareth-5**

CAS 68131-40-8 (generic)  
*Synonyms:* Pareth-15-5  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C11-15 fatty alcohols with avg. 5 moles EO  
*Properties:* Nonionic  
*Toxicology:* LD50 (oral, rat) 32 ml/kg, (skin, rabbit) 5660 µl/kg; primary irritant; TSCA listed  
*Uses:* Detergent, emulsifier, wetting agent used in textile processing applics.; textile lubricant; latex emulsion stabilizer; plastics antistat; emulsifier in cosmetics  
*Manuf./Distrib.:* Sigma  
*Trade Names:* Tergitol® 15-S-5

**C11-15 pareth-7**

CAS 68131-40-8 (generic)  
*Synonyms:* Pareth-15-7  
*Classification:* Linear alcohol ethoxylate  
*Definition:* PEG ether of a mixt. of syn. C11-15 fatty alcohols with avg. 7 moles EO  
*Properties:* Nonionic  
*Toxicology:* LD50 (oral, rat) 32 ml/kg, (skin, rabbit) 5660 µl/kg; primary irritant; TSCA listed  
*Uses:* Detergent, emulsifier, wetting agent, stabilizer used in textile processing

## C11-15 pareth-9

applics.; textile lubricant; dyeing aid, dye leveling agent for leather and textile processing; household and industrial detergents; paper; paints; agric.; metal cleaners; oil field chems.; water treatment; emulsifier in cosmetics; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §178.3400

*Manuf./Distrib.:* Sigma

*Trade Names:* Tergitol® 15-S-7

## C11-15 pareth-9

CAS 68131-40-8 (generic)

*Synonyms:* Pareth-15-9

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C11-15 fatty alcohols with avg. 9 moles EO

*Properties:* Nonionic

*Toxicology:* LD50 (oral, rat) 32 ml/kg, (skin, rabbit) 5660 µl/kg; primary irritant; TSCA listed

*Uses:* Detergent, emulsifier, wetting agent, stabilizer used in textile processing applics.; textile lubricant; dyeing aid, dye leveling agent for leather and textile processing; household and industrial detergents; paper; paints; agric.; metal cleaners; oil field chems.; water treatment; surfactant in cosmetics; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §178.3400

*Manuf./Distrib.:* Sigma

*Trade Names:* Tergitol® 15-S-9

## C11-15 pareth-12

CAS 68131-40-8 (generic)

*Synonyms:* Pareth-15-12

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C11-15 fatty alcohols with avg. 12 moles EO

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Detergent, emulsifier, wetting agent, stabilizer used in textile processing applics.; textile lubricant; dyeing aid, dye leveling agent for leather and textile processing; household and industrial detergents; paper; paints; agric.; metal cleaners; oil field chems.; water treatment; surfactant, emulsifier in cosmetics; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §178.3400

*Trade Names:* Tergitol® 15-S-12

## C11-15 pareth-15

CAS 68131-40-8 (generic)

*Synonyms:* Pareth-15-15

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C11-15 fatty alcohols with avg. 15 moles EO

*Properties:* Nonionic

*Uses:* Detergent, emulsifier, wetting agent used in textile processing applics.; textile lubricant; pulp/paper processing aid; latex stabilizer; emulsifier in cosmetics

*Trade Names:* Tergitol® 15-S-15

## C12-13 pareth-7

CAS 66455-14-9 (generic)

*Synonyms:* Pareth-23-7; PEG-7 C12-13 fatty alcohol ether

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-13 fatty alcohols with avg. 7 moles EO

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Detergent intermediate used in preparation of sulfates for high-foaming liq. detergents; surfactant in cosmetics; wetting agent

*Trade Names:* Imbentin-C/123/065

## C12-14 pareth-1

CAS 68439-50-9 (generic)

*Synonyms:* PEG-1 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 1 mole EO

*Properties:* Nonionic

*Uses:* Surfactant intermediate; w/o emulsifier for detergents, personal care

prods.; sulfation intermediate; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings

*Trade Names:* Surfonic® L24-1.3

## C12-14 pareth-2

CAS 68439-50-9 (generic)

*Synonyms:* PEG-2 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 2 moles EO

*Properties:* Nonionic

*Uses:* Surfactant intermediate

*Trade Names:* Imbentin-AG/124/020 I; Imbentin-AG/124S/020 I

## C12-14 pareth-3

CAS 68439-50-9 (generic)

*Synonyms:* PEG-3 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 3 moles EO

*Properties:* Nonionic

*Uses:* Surfactant intermediate; costabilizer; agric. adjuvant; emulsifier, wetting agent for detergents, laundry prespotters, hard surf. cleaners, personal care prods., agric. pesticides; rewetting agent for paper; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard; food-contact slimeicide

*Trade Names:* Imbentin-AG/124/030 B; Imbentin-AG/124S/030; Surfonic® L24-3

## C12-14 pareth-4

CAS 68439-50-9 (generic)

*Synonyms:* PEG-4 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 4 moles EO

*Properties:* Nonionic

*Uses:* Surfactant intermediate; w/o and o/w emulsifier, wetting agent for detergents, laundry prespotters, personal care prods.; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Trade Names:* Imbentin-AG/124/040 I; Imbentin-AG/124S/040; Surfonic® L24-4

## C12-14 pareth-5

CAS 68439-50-9 (generic)

*Synonyms:* PEG-5 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 5 moles EO

*Properties:* Nonionic

*Uses:* Surfactant, wetting, washing, emulsifying, and dispersing agent; polymerization surfactant

*Trade Names:* Imbentin-AG/124/050; Imbentin-AG/124S/045; Surfonic® L24-5

## C12-14 pareth-6

CAS 68439-50-9 (generic)

*Synonyms:* PEG-6 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 6 moles EO

*Properties:* Nonionic

*Uses:* Surfactant intermediate

*Trade Names:* Imbentin-AG/124S/060

## C12-14 pareth-7

CAS 68439-50-9 (generic)

*Synonyms:* PEG-7 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 7 moles EO

*Properties:* Nonionic

*Uses:* Detergent; foaming agent; surfactant intermediate; agric. adjuvant; surfactant, wetting agent, o/w emulsifier for detergents, laundry prespotters, hard surf. cleaners, personal care prods.; pitch dispersant for pulp/paper processing; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Trade Names:* Imbentin-AG/124S/065; Imbentin-AG/124S/070; Sipol LAL-7; Surfonic® L24-7

**C12-14 pareth-8**

CAS 68439-50-9 (generic)

*Synonyms:* PEG-8 C12-14 alcohol; PEG-8 C12-14 fatty alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 8 moles EO

*Properties:* Nonionic

*Uses:* Detergent, wetting agent, dispersant, emulsifier for detergents, hard surf. cleaners, personal care prods.; agric. adjuvant; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Trade Names:* Imbentin-AG/124/075 90%; Imbentin-AG/124S/080 90%; Surfonic® L24-9

**C12-14 pareth-9**

CAS 68439-50-9 (generic)

*Synonyms:* PEG-9 C12-14 alcohol; PEG-9 C12-14 fatty alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 9 moles EO

*Properties:* Nonionic

*Uses:* Detergent, wetting agent, dispersant, emulsifier

*Trade Names:* Alfonic® 1412-9

**C12-14 pareth-11**

CAS 68439-50-9 (generic)

*Synonyms:* PEG-11 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 11 moles EO

*Properties:* Nonionic

*Uses:* Surfactant intermediate; wetting agent, emulsifier, solubilizer for cleaners, cosmetics; agric. adjuvant; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard

*Trade Names:* Imbentin-AG/124S/110 90%; Surfonic® L24-12

**C12-14 pareth-17**

CAS 68439-50-9 (generic)

*Synonyms:* PEG-17 C12-14 alcohol; POE (17) C12-14 alkyl

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 17 moles EO

*Properties:* Nonionic

*Uses:* Emulsifier, wetting agent, dispersant, detergent for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Trade Names:* Surfonic® L24-17

**C12-14 pareth-22**

CAS 68439-50-9 (generic)

*Synonyms:* PEG-22 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 22 moles EO

*Properties:* Nonionic

*Uses:* Emulsifier, wetting agent, dispersant, detergent for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Trade Names:* Surfonic® L24-22

**C12-14 pareth-23**

CAS 68439-50-9 (generic)

*Synonyms:* PEG-23 C12-14 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-14 fatty alcohols with avg. 23 moles EO

*Properties:* Nonionic

*Uses:* Solubilizer, cleaning agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, metal treatment, paper processing

*Trade Names:* Imbentin-AG/124S/230 G

**C12-15 pareth-3**

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-3; PEG-3 C12-15 fatty alcohol ether

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 3 moles EO

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Emulsifier, detergent intermediate for dishwashing, personal care prods., industrial applics.; textile lubricant; gellant; dispersant; wetting agent; solubilizer; in surf. lubricants for mfg. of food-contact metallic articles

*Regulatory:* FDA 21CFR §178.3910

*Trade Names:* Imbentin-C/125/030; Teric™ 12A3

**C12-15 pareth-5**

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-5; PEG-5 C12-15 alkyl ether

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 5 moles EO

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Detergent; wetting agent; emulsifier in cosmetics; textile surfactant and lubricant; gellant; dispersant; solubilizer

*Trade Names:* Imbentin-C/125/050

**C12-15 pareth-6**

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-6; PEG-6 C12-15 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 6 moles EO

*Properties:* Nonionic

*Uses:* Wetting agent, dispersant, detergent, chemical intermediate; used in textile processing, hard surface abrasives, metal descaling, detergent for household and industrial use in laundries; metal cleaning, sanitizer

*Trade Names:* Teric™ G12A6

**C12-15 pareth-7**

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-7; PEG-7 C12-15 fatty alcohol ether

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 7 moles EO

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Detergent, emulsifier, wetting agent, dispersant for sanitizers, metal cleaners, hard surface cleaners; detergent intermediate; for paper, paint, leather; emulsifier in cosmetics; coupler and solubilizer for perfumes and org. additives

*Trade Names:* Imbentin-C/125/070; Teric™ G12A7

**C12-15 pareth-8**

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-8; PEG-8 C12-15 alkyl ether

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 8 moles EO

*Properties:* Nonionic

*Uses:* Detergent intermediate

*Trade Names:* Imbentin-C/125/55 90%

**C12-15 pareth-9**

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-9; PEG-9 C12-15 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 9 moles EO

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Detergent intermediate used in preparation of sulfates for high-foaming liq. detergents; surfactant in textile processing, metal cleaners, paper, paint, leather applics.; coupler, solubilizer for perfumes; surfactant, emulsifier in cosmetics

*Trade Names:* Imbentin-C/125/090; Teric™ 12A9

#### C12-15 pareth-10

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-10; PEG-10 C12-15 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 10 moles EO

*Properties:* Nonionic

*Uses:* Emulsifier, dispersant, wetting agent, gellant, scouring agent, solubilizer for industrial and cosmetic applics.

*Trade Names:* Imbentin-C/125/85

#### C12-15 pareth-12

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-12; PEG-12 C12-15 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 12 moles EO

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Surfactant in cosmetics; detergent; emulsifier; wetting agent; detergent intermediate; coupling agent; solubilizer; pharmaceutical emollient

*Trade Names:* Teric™ G12A12

#### C12-15 pareth-13

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-13; PEG-13 C12-15 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 13 moles EO

*Properties:* Nonionic

*Uses:* O/w emulsifier for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment

*Trade Names:* Imbentin-C/125/130 80%

#### C12-15 pareth-23

CAS 68131-39-5 (generic)

*Synonyms:* Pareth-25-23; PEG-23 C12-15 alcohol

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 23 moles EO

*Properties:* Nonionic

*Uses:* Surfactant

*Trade Names:* Teric™ 12A23

#### C12-16 pareth-1

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. formulations

#### C12-16 pareth-2

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. adjuvant

*Trade Names:* Imbentin-AG/124PG/020

#### C12-16 pareth-3

CAS 68551-12-2 (generic)

*Synonyms:* PEG-3 C12, C14, C16 alcohols

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. adjuvant

*Trade Names:* Imbentin-AG/124PG/030

#### C12-16 pareth-5

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. adjuvant

*Trade Names:* Genapol® 26-L-5

#### C12-16 pareth-6

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. adjuvant

*Trade Names:* Genapol® 26-L-45

#### C12-16 pareth-7

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. adjuvant

*Trade Names:* Genapol® 26-L-50; Genapol® 26-L-60; Imbentin-AG/124PG/070

#### C12-16 pareth-8

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. formulations

#### C12-16 pareth-9

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Detergent intermediate for carboxylation or phosphorylation for use in household and I&I cleaners, textile wet processing, emulsions and dispersions, paper processing, agric. adjuvants

*Trade Names:* Genapol® 26-L-80

#### C12-16 pareth-11

CAS 68551-12-2 (generic)

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant, detergent, wetting/spreading agent, emulsifier, foaming agent, intermediate, dispersant, lubricant for household and hard surf. cleaners, textile processing, pulp processing, agric. adjuvant

#### C12-18 pareth-7

*Synonyms:* PEG-7 C12-18 alcohol

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Emulsifier, detergent

*Trade Names:* Imbentin-AG/128/070 90%

#### C12-18 pareth-11

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* O/w emulsifier for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing

*Trade Names:* Imbentin-AG/128/110 90%

**C13-15 pareth-3**

CAS 68131-39-5 (generic)

*Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* General purpose detergent, emulsifier; textile lubricant/antistat; filter cake dewatering; intermediate for phosphate ester prod., carboxymethylate mfg.*Trade Names:* Imbentin-C/135/030**C13-15 pareth-4**

CAS 68131-39-5 (generic)

*Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* Detergent, emulsifier for cleaners, personal care prods., textiles; sulfation intermediate; textile lubricant/antistat*Trade Names:* Imbentin-C/135/040**C13-15 pareth-7**

CAS 68131-39-5 (generic)

*Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* General purpose detergent, emulsifier; dye leveling agent; textile lubricant/antistat; coal dust suppression; tin plating*Trade Names:* Imbentin-C/135/070; Synperonic A7**C13-15 pareth-9**

CAS 68131-39-5 (generic)

*Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* Wetting agent, detergent, scouring agent, dye leveler, emulsifier for personal care, industrial, steel phosphation, oil field, agrochem. applics.*Trade Names:* Imbentin-C/135/090; Synperonic A9**C13-15 pareth-11**

CAS 68131-39-5 (generic)

*Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* General purpose detergent, emulsifier; dye leveling agent; textile lubricant/antistat*Trade Names:* Imbentin-C/135/110 85%; Synperonic A11**C13-15 pareth-20**

CAS 68131-39-5 (generic)

*Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* General purpose detergent, emulsifier, dispersant; latex stabilizer; solubilizer for fragrances*Trade Names:* Imbentin-C/135/200**C14-15 pareth-3**

CAS 68951-67-7 (generic)

*Synonyms:* Pareth-45-3; PEG-3 C14-15 alcohol ether*Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C14-15 fatty alcohols with avg. 3 moles EO*Properties:* Nonionic*Uses:* Wetting agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicone and wax emulsions, metal treatment, paper processing*Trade Names:* Imbentin-C/145/030**C14-15 pareth-4**

CAS 68951-67-7 (generic)

*Synonyms:* Pareth-45-4; PEG-4 C14-15 alcohol ether*Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C14-15 fatty alcohols with avg. 4 moles EO*Properties:* Nonionic*Uses:* Wetting agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicone and wax emulsions, metal treatment, paper processing*Trade Names:* Imbentin-L/145/040**C14-15 pareth-7**

CAS 68951-67-7 (generic)

*Synonyms:* Pareth 45-7; PEG-7 C14-15 alcohol ether*Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C14-15 fatty alcohols with avg. 7 moles EO*Properties:* Nonionic*Uses:* Detergent intermediate used in preparation of sulfates for high-foaming liq. detergents; emulsifier in cosmetics*Trade Names:* Imbentin-C/145/070**C14-15 pareth-8**

CAS 68951-67-7 (generic)

*Synonyms:* Pareth-45-8; PEG-8 C14-15 alcohol ether*Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C14-15 fatty alcohols with avg. 8 moles EO*Properties:* Nonionic*Uses:* O/w emulsifier for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing*Trade Names:* Imbentin-L/145/080**C14-15 pareth-11**

CAS 68951-67-7 (generic)

*Synonyms:* Pareth-45-11; PEG-11 C14-15 alcohol ether*Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C14-15 fatty alcohols with avg. 11 moles EO*Properties:* Nonionic*Uses:* Detergent intermediate used in preparation of sulfates for high-foaming liq. detergents; emulsifier in cosmetics*Trade Names:* Imbentin-C/145/110**C14-16 pareth-4***Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* Wetting agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing*Trade Names:* Imbentin-AG/146/040**C14-16 pareth-7***Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* Surfactant, detergent, o/w emulsifier, wetting agent, foamer, penetrant, intermediate for detergent, laundry prespotters, hard surf. cleaners, personal care prods., agric. pesticides; food-pkg. adhesives, coatings, paper, cellophane; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard*Trade Names:* Imbentin-AG/146/070; Surfonic® L46-7**C16-18 pareth-2***Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* W/o emulsifier, wetting agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing*Trade Names:* Imbentin-AG/168S/020; Imbentin-POA/020 5055; Imbentin-POA/024 5055**C16-18 pareth-5***Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* Intermediate for prod. of nonionic biodeg. surfactants and emulsifiers for use in household laundry detergents, liq. cleaners, hard surf. cleaners, cosmetics, and industrial solvs. and degreasers*Trade Names:* Imbentin-POA/050 7075**C16-18 pareth-6***Classification:* Linear alcohol ethoxylate*Properties:* Nonionic*Uses:* Wetting agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing

*Trade Names:* Imbentin-AG/168S/060; Imbentin-POA/060

**C16-18 pareth-8**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* O/w emulsifier, wetting agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing

*Trade Names:* Imbentin-AG/168S/080; Imbentin-POA/080 90%

**C16-18 pareth-11**

*Synonyms:* PEG-11 sat. C16-18 alcohol

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Detergent, wetting, dispersing and emulsifying agent used in chemical industry, for household and industrial detergents; costabilizer

*Trade Names:* Imbentin-AG/168S/110

**C16-18 pareth-14**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Wetting agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing

*Trade Names:* Imbentin-AG/168S/140

**C16-18 pareth-16**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Trade Names:* Teric™ 16A16

**C16-18 pareth-18**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Detergent, wetting, dispersing and emulsifying agent used in chemical industry, for household and industrial detergents

*Trade Names:* Imbentin-AG/168S/180 G; Imbentin-POA/180; Imbentin-POA/220 G

**C16-18 pareth-20**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Solubilizer, cleaning agent for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, metal treatment, paper processing

*Trade Names:* Imbentin-AG/168S/200 G

**C16-18 pareth-22**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Trade Names:* Teric™ 16A22

**C16-18 pareth-25**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Detergent, wetting, dispersing and emulsifying agent used in chemical industry, for household and industrial detergents; binder; emulsion stabilizer

*Trade Names:* Imbentin-AG/168S/250 G; Imbentin-POA/220 6065 G

**C16-18 pareth-29**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Wetting agent, emulsifier, dispersant for oil- and water-based systems, consumer detergents, cosmetics, agric., min. processing, pulp/paper, textiles, water treatment

*Trade Names:* Teric™ 16A29

**C16-18 pareth-30**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Surfactant; costabilizer to increase mechanical or salt stability in polymer dispersions

*Trade Names:* Imbentin-AG/168S/300 G

**C16-18 pareth-31**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Solubilizer for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, metal treatment, paper processing

*Trade Names:* Imbentin-POA/310 G

**C16-18 pareth-33**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Solubilizer for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, metal treatment, paper processing

*Trade Names:* Imbentin-AG/168S/330 G

**C16-18 pareth-36**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Solubilizer for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, metal treatment, paper processing

*Trade Names:* Imbentin-AG/168S/360 G

**C16-18 pareth-50**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Detergent, wetting, dispersing and emulsifying agent used in chemical industry, for household and industrial detergents; binder; emulsion stabilizer

*Trade Names:* Imbentin-AG/168S/500 G

**C16-18 pareth-60**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Solubilizer for household/industrial detergents, cosmetics, toiletries, textiles, leather, agric., paints/coatings, emulsion polymerization, lubricants, metal treatment, paper processing

*Trade Names:* Imbentin-AG/168S/600 G

**C16-18 pareth-80**

*Classification:* Linear alcohol ethoxylate

*Properties:* Nonionic

*Uses:* Wetting and dispersing agents for engineering, industrial, and household cleaners

*Trade Names:* Imbentin-AG/168S/800 G; Imbentin-POA/800 G

**C20-40 pareth-3**

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C20-40 alcohols with avg. 3 moles EO

*Properties:* Nonionic

*Uses:* Emulsifier in cosmetics; vehicle; coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics

*Trade Names:* Unithox® 420

**C20-40 pareth-10**

*Classification:* Linear alcohol ethoxylate

*Definition:* PEG ether of a mixt. of syn. C20-40 alcohols with avg. 10 moles EO

*Properties:* Nonionic

*Uses:* Mold release agent for plastics; metalworking additive; pulp/paper processing; vehicle for colorants, oils, and waxes; film-former; dispersant, compatibilizer for rubbers; o/w emulsifier for cosmetics; surfactant for textiles, metal lubricants/coatings, ceramic binders, fiberglass processing, printing inks

*Trade Names:* Unithox® 450

**C20-40 pareth-40***Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C20-40 alcohols with avg. 40 moles EO*Properties:* Nonionic*Uses:* Emulsifier for cosmetics; vehicle; coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics*Trade Names:* Unithox® 480**C30-50 pareth-3***Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C30-50 alcohols with avg. 3 moles EO*Properties:* Nonionic*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; also for coatings, metalworking fluids, pulp/paper processing, textiles, mold releases*Trade Names:* Unithox® 520**C30-50 pareth-10***Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C30-50 alcohols with avg. 10 moles EO*Properties:* Nonionic*Uses:* Emulsifier in cosmetics; vehicle; coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics*Trade Names:* Unithox® 550**C40-60 pareth-3***Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C40-60 alcohols with avg. 3 moles of EO*Properties:* Nonionic*Uses:* O/w emulsifier for cosmetics; vehicle for inert, difficult-to-disperse colorants, oils, and waxes; provides silky lubricating feel, superior film-forming chars.; also for coatings, metalworking fluids, pulp/paper processing, textiles, mold releases*Trade Names:* Unithox® 720**C40-60 pareth-10***Classification:* Linear alcohol ethoxylate*Definition:* PEG ether of a mixt. of syn. C40-60 alcohols with avg. 10 moles EO*Properties:* Nonionic*Uses:* Emulsifier for cosmetics; vehicle; coatings, metalworking fluids, pulp/paper processing, textiles; mold release for plastics*Trade Names:* Unithox® 750**CR.** See Polychloroprene**Crotonic acid, ethyl ester.** See Ethyl crotonate**Crotonic acid homopolymer***Uses:* In paper/paperboard in contact with dry food*Regulatory:* FDA 21CFR §176.180**Crotonic acid, polymer with vinyl acetate.** See Vinyl acetate/crotonic acid copolymer**Crystalline cellulose.** See Cellulose**Crystal violet.** See Basic violet 3**Crystal carbonate.** See Sodium carbonate**Cube alum.** See Potassium alum dodecahydrate**Cumene hydroperoxide**

CAS 80-15-9; EINECS/ELINCS 201-254-7; UN No. 2116 (DOT)

*Synonyms:* CHP; Cumenyl hydroperoxide; Cumyl hydroperoxide;  $\alpha$ -Cumyl hydroperoxide;  $\alpha$ , $\alpha$ -Dimethylbenzyl hydroperoxide; 7-Hydroperoxykumen; Isopropylbenzene hydroperoxide*Classification:* Organic peroxide*Empirical:* C<sub>9</sub>H<sub>12</sub>O<sub>2</sub>*Formula:* C<sub>9</sub>H<sub>12</sub>C(CH<sub>3</sub>)<sub>2</sub>OOH*Properties:* Colorless to pale yel. liq.; sol. in alcohol, acetone, esters, hydrocarbons, most org. solvs.; sl. sol. in water; m.w. 152.21; dens. 1.030; b.p. 153 C; flash pt. 175 F; ref. index 1.5210*Toxicology:* LD50 (oral, rat) 382 mg/kg, (IP, mouse) 270 mg/kg, (skin, rat) 95 mg/kg; poison by ing. and IP routes; mod. toxic by inhalation and skin

absorption; readily absorbed thru skin; experimental tumorigen; mutagenic data; skin and eye irritant; target organs: liver, kidneys; TSCA listed

*Precaution:* Combustible; corrosive; strong oxidizer; avoid contact with strong min. acids, other oxidizers, reducing agents, accelerators; explosive reactions, violent decomp., and vigorous exothermic reactions possible*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes*Uses:* Prod. of acetone and phenol; polymerization catalyst/initiator/inhibitor; curing/crosslinking agent for unsat. polyester resins; used in gel coats; in food-pkg. adhesives; polymerization catalyst in mfg. of paper/paperboard in contact with aq./fatty foods; catalyst in food-contact crosslinked polyesters*Regulatory:* FDA 21CFR §175.105, 176.170, 177.2420*Manuf./Distrib.:* AC Ind.; Aldrich; Aristech; Atofina; Crompton/Witco; Dastech Int'l.; Degussa-Hüls AG; Fluka; JLM Marketing; Monomer-Polymer & Dajac Labs; Sigma**Cumenyl hydroperoxide.** See Cumene hydroperoxide**Cumyl hydroperoxide.** See Cumene hydroperoxide **$\alpha$ -Cumyl hydroperoxide.** See Cumene hydroperoxide**Cupric dinitrate.** See Copper nitrate (ic)**Cupric hydroxide.** See Copper hydroxide (ic)**Cupric-8-hydroxyquinolate.** See Copper 8-quinolinolate**Cupric nitrate.** See Copper nitrate (ic)**Cupric nitrate hexahydrate.** See Copper nitrate (ic)**Cupric nitrate trihydrate.** See Copper nitrate (ic)**Cupric sulfate.** See Cupric sulfate anhydrous**Cupric sulfate anhydrous**

CAS 7758-98-7; EINECS/ELINCS 231-847-6; UN No. NA 9109 (DOT)

*Synonyms:* Basic copper sulfate; Blue copper; Bluestone; Blue vitriol; Copper monosulfate; Copper sulfate; Copper (II) sulfate; Cupric sulfate; Sulfuric acid, copper salt*Classification:* Inorganic copper salt*Definition:* Copper salt of sulfuric acid; avail. commercially as the monohydrate or pentahydrate*Empirical:* CuO<sub>4</sub>S*Formula:* CuSO<sub>4</sub>*Properties:* Blue cryst. or cryst. gran. or powd.; odorless; nauseous metallic taste; sol. in water; insol. in alcohol; m.w. 159.60; dens. 3.6; m.p. dec. @ 560 C*Toxicology:* LD50 (oral, rat) 300 mg/kg; strong irritant; experimental tumorigen; human poison, systemic effects by ingestion: gastritis, diarrhea, nausea, vomiting, hemolysis; eye irritant; no known skin toxicity; mutagen; TSCA listed*Environmental:* Hazardous to the environment*Precaution:* Reacts violently with hydroxylamine, magnesium*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>2</sub>, HMIS: Health 2; Flammability 0; Reactivity 0*Storage:* Hygroscopic*Uses:* Soil additive; pesticides; germicides; textile mordant; leather; pigments; batteries; electroplated coatings; copper salts; analytical reagent; wood and pulp preservative; process engraving; lithography; ore flotation; mfg. of petroleum, rubber, steel; ore flotation; reagent in analytical chemistry; micronutrient for plants; fungicide; cosmetic additive; treatment for natural asphalt; medicine (antidote to phosphorus); foods (nutrient supplement, processing aid); feed additive*Regulatory:* FDA 21CFR §184.1261, 582.80; FDA approved for orals; SARA reportable; Japan approved (0.6 mg/L as copper in milk)*Manuf./Distrib.:* Adheswara Chems. Pvt. Ltd.; Aldrich; Allan; Allchem Ind.; Farleyway Chem. Ltd; Fluka; Old Bridge; Phelps Dodge Refining; Ruger; Sigma; Spectrum Quality Prods.**Cyamopsis gum.** See Guar (Cyanopsis tetragonoloba) gum**Cyanine green toner.** See Phthalocyanine green**Cyanodithioimidocarbonate, disodium.** See Disodium cyanodithioimidocarbonate**Cyanoethylene.** See Acrylonitrile**Cyanoguanidine.** See Dicyandiamide**N-Cyanoguanidine.** See Dicyandiamide**Cyanopsis tetragonoloba.** See Guar (Cyanopsis tetragonoloba) gum**Cyanopsis tetragonoloba gum.** See Guar (Cyanopsis tetragonoloba) gum

### Cyclohexane

CAS 110-82-7; EINECS/ELINCS 203-806-2; UN No. 1145 (DOT)

**Synonyms:** Benzene hexahydride; Hexahydrobenzene; Hexamethylene; Hexanaphthene

**Classification:** Sat. aliphatic hydrocarbon

**Empirical:** C<sub>6</sub>H<sub>12</sub>

**Properties:** Colorless mobile liq., pungent gasoline-like odor; sol. in ether, chlorinated/aromatic solvs.; misc. with ethanol, acetone, benzene, ethyl ether, CCl<sub>4</sub>; insol. in water; m.w. 84.16; dens. 0.779 (20/4 C); f.p. 4.6 C; m.p. 6.5 C; b.p. 80.7 C; flash pt. (CC) -18.3 C; ref. index 1.4264

**Toxicology:** ACGIH TLV/TWA 300 ppm; LD50 (oral, rat) 29,820 mg/kg; LDLo (IV, rabbit) 77 mg/kg; poison by IV; mod. toxic by ingestion, inhalation, skin contact; systemic and skin irritant; overexposure may cause eye and respiratory irritation, drowsiness, dermatitis, narcosis, coma; mutagenic data; TSCA listed

**Precaution:** DOT: Flamm. liq.; dangerous fire hazard exposed to heat or flame; reactive with oxidizers; mod. explosion hazard as vapor exposed to flame; explosive mixed hot with liq. dinitrogen tetraoxide

**Hazardous Decom. Prods.:** Heated to decomp., emits acid smoke, irritating fumes

**NFPA:** Health 1; Flammability 3; Reactivity 0

**Storage:** Store in cool, dry, well-ventilated area out of direct sunlight

**Uses:** Solvent for cellulose ethers, fats, oils, waxes, inks, lacquers, resins, coatings; paint and varnish remover; extraction solvent for essential oils; glass substitutes; laboratory reagent; chemical intermediate; in fungicidal formulations; mfg. of nylon, adipic acid, benzene, cyclohexanone, etc.; mfg. of solid fuel for camp stoves; solvent in cosmetics; color diluent for foods; in pharmaceutical orals; in food-pkg. adhesives; defoamer in food-contact paper coatings

**Regulatory:** FDA 21CFR §175.105, 176.200; FDA approved for orals; BP compliance

**Manuf./Distrib.:** Aldrich; Ashland; ChevronPhillips; Exxon Europe; Exxon; Fisher Scientific; Fluka; Hukill; Huntsman; Indofine; Koch Chem. Spec.; Romil Ltd; Sigma; Spectrum Quality Prods.; Sunoco; Triple Crown Am.

### Cyclohexane dimethanol diacrylate

**Uses:** Monomer for PC coatings, window films, solder masks, wood/plastic/paper coatings, metalized surf. coating

**Trade Names:** CD-406

### Cyclohexane dimethanol dimethacrylate

**Classification:** Cycloaliphatic methacrylate monomer

**Uses:** Monomer for window films, PC coatings, solder masks, wood/plastic/paper coatings, dry film photo imaging, metalized surf. coating

**Trade Names:** CD-401

### Cyclohexanol

CAS 108-93-0; EINECS/ELINCS 203-630-6

**Synonyms:** 1-Cyclohexanol; Cyclohexyl alcohol; Hexahydrophenol; Hexalin; Hydrophenol; Hydroxycyclohexane

**Classification:** Alicyclic alcohol

**Empirical:** C<sub>6</sub>H<sub>12</sub>O

**Formula:** CH<sub>2</sub>(CH<sub>2</sub>)<sub>4</sub>CHOH

**Properties:** Colorless oily liq. or cryst. (below 25 C); camphor-like odor; sol. in methanol, ethanol, acetone, ether, benzene, most org. solvs.; mod. sol. in water; m.w. 100.09; sp.gr. 0.937 (37.4 C); m.p. 23 C; b.p. 160.9 C; flash pt. 67.7 C; ref. index 1.4656 (20 C)

**Toxicology:** ACGIH TLV/TWA 50 ppm (skin); LD50 (oral, rat) 2.06 g/kg; toxic; poison by IV, mod. toxic by ing., subcut., intramuscular routes; mild skin irritant; lachrymator; mod. to severe eye irritant on direct contact; nose/throat irritant; narcotic-like; high concs. may cause headache, nau-

sea, vomiting, tremors; can be absorbed thru skin; ing. of large doses can probably cause kidney/liver damage, unconsciousness, death; experimental reproductive effects; human mutagenic data; TSCA listed

**Precaution:** Combustible; incompat. with strong oxidizing agents (reacts vigorously or explosively generating heat and pressure); ignites on contact with chromium trioxide; violent reaction with HNO<sub>3</sub>

**Hazardous Decom. Prods.:** Heated to decomp., emits acrid smoke and fumes

**NFPA:** Health 1; Flammability 2; Reactivity 0

**Storage:** Hygroscopic; store in cool, dry, well-ventilated area

**Uses:** Stabilizer, homogenizer in soap making and detergents to incorporate solvents and phenolic insecticides; solvent for alkyd and phenolic resins, paints, lacquers, shellacs, varnishes, rubber, inks, fats, oils; source of adipic acid for nylon prod., textile finishing; plasticizer prod.; dye solvent and carrier; leather degreasing; polishes; plasticizers; germicides; in food-pkg. adhesives; defoamer in food-contact coatings, paper/paperboard

**Regulatory:** FDA 21CFR §175.105, 176.200, 176.210

**Manuf./Distrib.:** Aldrich; Ashland; BASF AG; BASF; Chemcentral; Fluka; Harcos; Honeywell Perf. Polymers; J.T. Baker; Nipa Labs; Spectrum Quality Prods.; Sunnyside; UCB; Van Waters & Rogers

**1-Cyclohexanol.** See Cyclohexanol

**Cyclohexyl alcohol.** See Cyclohexanol

### Cyclohexyl methacrylate

CAS 101-43-9; EINECS/ELINCS 202-943-5

**Classification:** Monomer

**Empirical:** C<sub>10</sub>H<sub>16</sub>O<sub>2</sub>

**Formula:** H<sub>2</sub>C=C(CH<sub>3</sub>)COOC<sub>6</sub>H<sub>11</sub>

**Properties:** Colorless monomeric liq.; insol. in water; m.w. 168.24; dens. 0.9626 (20/20 C); b.p. 210 C

**Precaution:** Combustible

**Uses:** Acrylic resin comonomer; polymer modifier for optical lens systems, adhesives, floor polishes, vinyl polymerization, anaerobic adhesives, food pkg.; azo or peroxide catalyst; dental resins; encapsulation of electronic assemblies

**Manuf./Distrib.:** Aldrich; CPS; Fluka; Monomer-Polymer & Dajac Labs; Polysciences; Rohm Tech; Sigma

**Trade Names:** Mhoromer® BM 711

**N-Cyclohexyl-4-methylbenzenesulfonamide.** See N-Cyclohexyl-p-toluenesulfonamide

### N-Cyclohexyl-p-toluenesulfonamide

CAS 80-30-8

**Synonyms:** Benzenesulfonamide, N-cyclohexyl-4-methyl-; N-Cyclohexyl-4-methylbenzenesulfonamide; p-Toluenesulfonamide, N-cyclohexyl-

**Empirical:** C<sub>13</sub>H<sub>19</sub>NO<sub>2</sub>S

**Properties:** Ylsh. brn. solid; sol. in oxygenated and aromatic solvs.; insol. in water; m.w. 253.36; dens. 1.13 kg/l; m.p. 86 C; b.p. 350 C

**Toxicology:** LD (oral, rat) > 500 mg/kg; TSCA listed

**Uses:** Plasticizer for polyamide hot-melt adhesives; in food-pkg. adhesives; in paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §175.105, 176.180

**Manuf./Distrib.:** Salor

**Cyclopropanecarboxylic acid, 2,2-dimethyl-3-(2-methylpropenyl)-, ester with 4-hydroxy-3-methyl-2-(2,4-pentadienyl)-2-cyclopenten-1-one.** See Pyrethrin I

**Cyclotetramethylene oxide.** See Tetrahydrofuran

**DAC.** See Dimethyl diallyl ammonium chloride

**Dactin.** See 1,3-Dichloro-5,5-dimethyl hydantoin

**DADMAC.** See Dimethyl diallyl ammonium chloride

**Decane.** See n-Decane

#### n-Decane

CAS 124-18-5; UN No. 2247 (DOT)

**Synonyms:** Decane

**Classification:** Sat. aliphatic hydrocarbon

**Empirical:** C<sub>10</sub>H<sub>22</sub>

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>8</sub>CH<sub>3</sub>

**Properties:** Colorless liq.; gasoline-like odor; sol. in most org. solvs.; insol. in water; m.w. 142.29; sp.gr. 0.734; m.p. -29.6 C; b.p. 174 C; flash pt. 46 C; ref. index 1.4114 (20 C)

**Toxicology:** LC50 (inh., mouse) 2 h) 72,300 mg/m<sup>3</sup>; TDLo (skin, mouse, 52 wks intermittent) 25 g/kg; relatively low oral toxicity unless aspirated into lungs; mod. to severe skin irritant; probably mod. to severe eye irritant; narcotic; simple asphyxiant; conc. vapor may cause nose/throat irritation, headache, drowsiness, nausea, difficulty breathing; ing. may cause nau-

sea, vomiting, swelling of abdomen, headache, depression; questionable carcinogen, tumorigen; TSCA listed

**Precaution:** Combustible; mod. fire risk; incompat. with strong oxidizing agents (increases fire and explosion hazard); mod. explosive as vapor

**Hazardous Decomp. Prods.:** None

**NFPA:** Health 0; Flammability 2; Reactivity 0

**Storage:** Store in cool, dry, well-ventilated area out of direct sunlight

**Uses:** Component of gasoline, jet fuel, kerosene, petrol. solvents such as wh. spirit; solvent; standardized hydrocarbon; org. synthesis; paper and rubber industries; constituent of polyolefin mfg. wastes

**Manuf./Distrib.:** Aldrich; ChevronPhillips; Fluka; Sigma; Triple Crown Am.

**Decanedioic acid, dibutyl ester.** See Dibutyl sebacate

**Decanoic acid.** See Capric acid

#### Decene-1

CAS 872-05-9; EINECS/ELINCS 212-819-2; UN No. 1993

**Synonyms:** 1-Decene; Decylene; Linear C10 alpha olefin

**Empirical:** C<sub>10</sub>H<sub>20</sub>

**Formula:** H<sub>2</sub>C:CH(CH<sub>2</sub>)<sub>7</sub>CH<sub>3</sub>

**Properties:** Colorless liq., mild hydrocarbon odor; sol. in alcohol, most org. solvs.; sl. sol. in water; m.w. 140.27; dens. 0.741 (20/4 C); f.p. -66.3 C; b.p. 166-171 C; flash pt. (Seta) 114 F; ref. index 1.421 (20 C)

**Toxicology:** LD50 (oral) > 10,000 mg/kg, (dermal) > 10,000 mg/kg; low acute inhalation toxicity; sl. toxic by ingestion

**Precaution:** Flamm. liq.; avoid contact with air or oxygen (explosion danger, adverse effect on subsequent reactions)

**Storage:** Store under nitrogen

**Uses:** Intermediate for surfactants, specially industrial chemicals (flavors, perfumes, pharmaceuticals, dyes, oils, resins); comonomer for certain copolymers; prod. of epoxides, amines, oxo alcohols, syn. lubricants, syn. fatty acids, alkylated aromatics

**Manuf./Distrib.:** Albemarle; Aldrich; Fluka; Monomer-Polymer & Dajac Labs; Shell; Sigma

**Trade Names:** Gulftene® 10

**1-Decene.** See Decene-1

#### 1-Decene, homopolymer, hydrogenated

CAS 68037-01-4

**Classification:** Syn. hydrocarbon base oil

**Properties:** Colorless liq.; odorless; sol. < 0.1% in water; sp.gr. 0.83 (15.6 C); vapor pressure < 1 mm Hg (20 C); pour pt. -60 C max.; flash pt. (PMCC) 238 C

**Toxicology:** Inh. of oil mist or vapors at elevated temps. may cause respiratory irritation; no significant eye or skin irritation expected; TSCA listed

**Precaution:** Incompat. with strong oxidizing agents; avoid temp. sources which induce thermal decomp.

**Hazardous Decomp. Prods.:** Incomplete burning can produce CO, CO<sub>2</sub>, other harmful prods.

**HMIS:** Health 0; Flammability 0; Reactivity 0

**Storage:** Store @ 10-50 C

**Uses:** Food-contact articles; lubricant for incidental food contact in meat/poultry plants

**Regulatory:** FDA 21CFR §178.3620(b); USDA approved; DOT nonregulated; SARA §302/311/312/313 nonreportable

**Trade Names Containing:** Chevron Clarity® Synthetic Paper Machine Oil ISO 100; Chevron Clarity® Synthetic Paper Machine Oil ISO 150; Chevron Clarity® Synthetic Paper Machine Oil ISO 220; Chevron Clarity® Synthetic Paper Machine Oil ISO 320; Chevron Clarity® Synthetic Paper Machine Oil ISO 460

**Deceth-4**

CAS 5703-94-6; 26183-52-8 (generic)

*Synonyms:* PEG-4 decyl ether; PEG 200 decyl ether; POE (4) decyl ether; 3,6,9,12-Tetraoxadocosan-1-ol*Definition:* PEG ether of decyl alcohol*Empirical:* C<sub>18</sub>H<sub>38</sub>O<sub>5</sub>*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>8</sub>CH<sub>2</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 4*Properties:* Nonionic*Uses:* Wetting and penetrating agent for textile processing, clay soils, and fire fighting prods.; emulsifier for polyethylene emulsions; detergent*Manuf./Distrib.:* Fluka; Seabrook Ind.; Sigma*Trade Names:* Oxetal D 104**Deceth-4 phosphate**

CAS 9004-80-2 (generic); 52019-36-0 (generic); 68130-47-2

*Synonyms:* PEG-4 decyl ether phosphate; PEG 200 decyl ether phosphate; POE (4) decyl ether phosphate*Definition:* Complex mixture of phosphoric acid esters of deceth-4*Properties:* Anionic*Toxicology:* TSCA listed*Uses:* Surfactant; detergent, foaming agent, dispersant, wetting agent for household, industrial, textile wet processing; coupling agent used in liq. alkali detergents; lubricant; antistat; corrosion inhibitor; emulsion polymerization; defoamer in food-contact paper/paperboard*Regulatory:* FDA 21CFR §176.210*Trade Names:* Monafax 1214**Dechlorane.** See Perchloropentacyclodecane**Decoic acid.** See Capric acid**n-Decoic acid.** See Capric acid**Decolorizing carbon.** See Carbon, activated**Decyl acrylate homopolymer***Uses:* In paper/paperboard in contact with dry food*Regulatory:* FDA 21CFR §176.180**Decyl alcohol**

CAS 112-30-1; 68526-85-2; EINECS/ELINCS 203-956-9; FEMA 2365

*Synonyms:* Alcohol C-10; C-10 alcohol; Capric alcohol; Caprinic alcohol; Decanal dimethyl acetal; Decanol; 1-Decanol; Decan-1-ol; n-Decanol; Decylic alcohol; n-Decyl alcohol; 1-Hydroxydecane; Noncarbinol; Nonylcarbinol; Primary decyl alcohol*Classification:* Primary aliphatic alcohol*Empirical:* C<sub>10</sub>H<sub>22</sub>O*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>8</sub>CH<sub>2</sub>OH*Properties:* Colorless to lt. yel. mod. visc. liq., sweet odor; sol. in alcohol, ether, acetone, benzene, chloroform, acetic acid; pract. insol. in water; m.w. 158.32; sp.gr. 0.8297 (20/4 C); m.p. 7 C; b.p. 232.9 C; flash pt. (OC) 82 C; ref. index 1.43587; surf. tens. 28.9 dynes/cm (20 C)*Toxicology:* LD50 (oral, rat) 4720 mg/kg; mod. toxic by skin contact; mildly toxic by ing., inh.; irritating to eyes, skin, respiratory system; inh. may cause nose/throat irritation; high concs. may cause CNS depression, headache, nausea, drowsiness; ing. may cause headache, dizziness, nausea, vomiting, and unconsciousness or coma in severe cases; if aspirated into lungs, may cause severe lung damage and possibly death; possible carcinogen, tumorigen; TSCA listed*Precaution:* Combustible; flamm. when exposed to heat or flame; incompat. with oxidizing agents (increases fire/explosion risk)*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>; heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 0; Flammability 2; Reactivity 0

*Storage:* Store in cool, dry area*Uses:* In mfg. of plasticizers, syn. lubricants, petroleum additives, herbicides, surfactants, solvents, coatings; emulsion polymerization; antifoaming agent; as solvent; fragrance ingred. in perfumes; in food-contact coatings; syn. flavoring agent in foods and pharmaceuticals; growth retardant; stabilizer with calcium isostearate for calcium stearate disps. for food-contact paper/paperboard coatings; emollient; visc. control agent*Use Level:* 2.1 ppm (nonalcoholic beverages), 4.6 ppm (ice cream, ices), 5.2 ppm (candy), 5.2 ppm (baked goods), 3 ppm (chewing gum)*Regulatory:* FDA 21CFR §172.515, 172.864, 175.300, 176.170, 178.3480, 178.3910; FEMA GRAS; Japan approved as flavoring*Manuf./Distrib.:* Albemarle; Aldrich; Brown; Cognis/Chems. Group; Condea

Vista; Exxon; Fluka; Grau Aromatics; Haarmann &amp; Reimer GmbH; Indofine; Jarchem Ind.; M. Michel; Penta Mfg.; Schweizerhall; Sigma; Universal Preserv-A-Chem

*Trade Names:* Nafol® 10 D**n-Decyl alcohol.** See Decyl alcohol**Decylbenzene sodium sulfonate.** See Sodium decylbenzene sulfonate**Decylbenzenesulfonic acid, sodium salt.** See Sodium decylbenzene sulfonate**N-Decyl-N,N-dimethyl-1-decanaminium chloride.** See Didecylidimonium chloride**Decylene.** See Decene-1**Decylic acid.** See Capric acid**n-Decylic acid.** See Capric acid**Decylic alcohol.** See Decyl alcohol**Decyl octyl alcohol.** See Stearyl alcohol**2-Decyl tetradecanoic acid**

CAS 93778-52-0

*Uses:* In cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles*Manuf./Distrib.:* Jarchem Ind.*Trade Names:* Jaric I-24**Decyltetradecanol.** See 2-Decyl-1-tetradecanol**2-Decyltetradecanol.** See 2-Decyl-1-tetradecanol**2-Decyl-1-tetradecanol**

CAS 58670-89-6; EINECS/ELINCS 216-385-0

*Synonyms:* Decyltetradecanol; 2-Decyltetradecanol; Isolignoceryl alcohol; 1-Tetradecanol, 2-decyl-*Classification:* Aliphatic alcohol*Empirical:* C<sub>24</sub>H<sub>50</sub>O*Properties:* Liq.; insol. in water; m.w. 354.66; dens. 0.84 kg/l (17 C)*Uses:* Emollient; solvent for cosmetics/toiletries; solubilizer; in cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles*Trade Names:* Jarcol™ I-24**DEGBE.** See Butoxydiglycol**DEGEE.** See Ethoxydiglycol**DEHP.** See s-Dioctyl phthalate**Dehydroabietylamine**

CAS 1446-61-3; EINECS/ELINCS 215-899-7

*Synonyms:* 1,4A-Dimethyl-7-isopropyl-1,2,3,4,4A,9,10,10A-octahydro-1-phenanthrene methylamine*Classification:* Aromatic amine*Empirical:* C<sub>20</sub>H<sub>31</sub>N*Properties:* M.w. 285.48; m.p. 43-45 C; ref. index 1.5460*Toxicology:* Primary irritant; TSCA listed*Uses:* Base used for resolution of acids*Manuf./Distrib.:* Aldrich; Fluka*Trade Names:* Amine D®**Deionized water.** See Water**DELA.** See Diethanolamine**Deodorized kerosene**

CAS 8008-20-6; EINECS/ELINCS 232-366-4; UN No. 1223 (DOT)

*Synonyms:* Kerosene, deodorized; Kerosene, odorless; Odorless kerosene*Definition:* Mixt. of petrol.-derived hydrocarbons contg. 10 to 16 carbon atoms*Toxicology:* TSCA listed*Precaution:* DOT: Flamm. liq.

HMIS: Health 1; Flammability 2; Reactivity 1

*Uses:* Solvent for paints/coatings, printing inks, floor polishes; metal degreasing/cleaning solvents; domestic lamp oil; dust control agent; quench oil; pesticide diluent; froth flotation; liq. candles; charcoal lighter fluid; polishes; cleaners; cosmetics and pharmaceuticals; defoamer in food-contact coatings and paper/paperboard*Regulatory:* FDA 21CFR §176.200, 176.210*Manuf./Distrib.:* Ruger*Trade Names:* PD-23**Deodorized winterized cottonseed oil.** See Cottonseed (Gossypium) oil

**DETA.** See Diethylenetriamine

**Detergent enzyme.** See Protease

**DETPMPA.** See Diethylene triamine pentamethylene phosphonic acid

**3,6,9,12,15,18,21,24,27,30-Dexaohexatetracontan-1-ol.** See Ceteth-10

**3,6,9,12,15,18,21,24,27,30-Dexaooctatetracontan-1-ol.** See Steareth-10

**Dextrins.** See Dextrin

#### Dextrin

CAS 9004-53-9; EINECS/ELINCS 232-675-4

*Synonyms:* Artificial gum; British gum; Dextrins; Dextrine; Dextrins; Pyrodextrin; Starch gum; Tapioca; Vegetable gum; White dextrin; Yellow dextrin

*Definition:* Gum produced by incomplete hydrolysis of starch

*Empirical:*  $(C_6H_{10}O_5)_n \cdot xH_2O$

*Properties:* Wh., yel. or brn. powd. or gran.; sol. in water; insol. in alcohol, ether; forms colloids

*Toxicology:* Mildly toxic by IV route

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Storage:* Hygroscopic

*Uses:* Thickener; adhesives, glues, mucilage; sizing paper and textiles; thickening dye pastes and mordants; substitute for natural gums; printing inks; in penicillin mfg.; fuel in pyrotechnic devices; in matches, explosives; absorbent; binder, colloidal stabilizer, extender, formulation aid, processing aid, surface-finishing agent, thickener for foods; emulsifier, suspending agent, thickener for pharmaceuticals; tablet binder/diluent; as adhesive/stiffener in surgical dressings; visc. control agent

*Use Level:* ADI 0-70 mg/kg (JECFA)

*Regulatory:* FDA 21CFR §184.1277, 186.1275, GRAS; USDA 9CFR §318.7, 381.147; FDA approved for orals, topicals; USP/NF compliance

*Manuf./Distrib.:* A.E. Staley Mfg.; Aldrich; Cerestar USA; Fluka; Grain Processing; Nat'l. Starch & Chem.; Sigma; Spectrum Quality Prods.

**Dextrine.** See Dextrin

**Dextrins.** See Dextrin

**DEZ.** See Diethyl zinc

**DEZn.** See Diethyl zinc

**DGEBA.** See Bisphenol A diglycidyl ether

**DGH.** See Dodecylguanidine hydrochloride

**Diacetone peroxides.** See Acetyl peroxide

#### Diacetylated tallow monoglyceride, tartaric acid ester

*Synonyms:* Diacetyltartaric acid ester of tallow monoglyceride

*Uses:* Defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210

**Diacetyl peroxide.** See Acetyl peroxide

**Diacetyltartaric acid ester of tallow monoglyceride.** See Diacetylated tallow monoglyceride, tartaric acid ester

#### Dialdehyde guar gum

*Uses:* Wet str. additive in mfg. of paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170

#### Dialdehyde locust bean gum

*Uses:* Wet str. additive in mfg. of paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170

#### Dialkyl (C16-C18) carbamoyl chloride

*Uses:* Sizing agent in mfg. of paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170

#### Dialkyl dimethyl ammonium chloride

CAS 68514-95-4

*Synonyms:* Dimethyl dialkyl ammonium chloride

*Properties:* Cationic

*Toxicology:* TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Softener; surfactant; bactericide; algicide decolorizing agent in clarification of refinery sugar liquors; in cellophane for food pkg.

*Use Level:* Limitation 700 ppm of sugar solids

*Regulatory:* FDA 21CFR §173.400, 177.1200

*Trade Names:* Querton 442P; Querton 442P-11

#### Dialkyl methyl benzyl ammonium chloride

CAS 68391-06-0

*Uses:* Biocide; slimicide in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.300

*Trade Names Containing:* Barquat® 1552

**Diallyl dimethyl ammonium chloride.** See Dimethyl diallyl ammonium chloride

**Diallyldimethyl ammonium chloride with acrylamide.** See Polyquaternium-7

#### Diallyl fumarate homopolymer

*Uses:* In paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180

#### Diallyl maleate homopolymer

*Uses:* In paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180

#### Diallyl phthalate

CAS 131-17-9; EINECS/ELINCS 205-016-3

*Synonyms:* DAP; Di-2-propenyl ester, 1,2-benzenedicarboxylic acid; Phthalic acid, diallyl ester; o-Phthalic acid, diallyl ester

*Empirical:*  $C_{14}H_{14}O_4$

*Formula:*  $C_6H_4(COOCH_2CH=CH_2)_2$

*Properties:* Colorless oily liq.; mild odor; sol. in oxygenated and chlorinated solvs.; limited sol. in gasoline, min. oil, glycerol, glycols; insol. in water; m.w. 246.27; dens. 1.120 (20/20 C); b.p. 158-165 (4 mm); f.p. -70 C; flash pt. 165.5 C; ref. index 1.519

*Toxicology:* LD50 (oral, rat) 656 mg/kg, (skin, rabbit) 3400 mg/kg, (IP, mouse) 700 mg/kg; mod. toxic by ing., skin contact, IP, and subcut. routes; primary eye irritant; lachrymator; avoid inh.; suspect carcinogen; tumorigen; mutagen; TSCA listed

*Precaution:* Combustible exposed to heat or flame; can be reactive with oxidizers

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Storage:* Store under nitrogen

*Uses:* Primary plasticizer; plasticizer/tackifier for PVC; peroxide crosslinking coactivator; intermediate; catalyst extender; mfg. of paints; reactive diluent in polyester laminating resins; forms low-pressure laminates with fillers such as glass cloth, paper, etc. for elec. insulation

*Manuf./Distrib.:* Aldrich; Allchem Ind.; Ashland; BP Chems. Ltd; C.P. Hall; Chemcentral; FMC; Fluka; Lyondell; Monomer-Polymer & Dajac Labs; Occidental; Punda Mercantile; Rogers; Samson; Sigma; Van Waters & Rogers

#### Diallyl phthalate homopolymer

*Uses:* In paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180

**Dialuminum dipotassium sulfate.** See Potassium alum anhydrous

**Dialuminum sulfate.** See Aluminum sulfate

**Dialuminum trisulfate.** See Aluminum sulfate

**1,2-Diaminoethane.** See Ethylenediamine

## 4,4'-Diaminostilbene-2,2'-disulfonic acid

### 4,4'-Diaminostilbene-2,2'-disulfonic acid

CAS 81-11-8; 65941-98-2

**Synonyms:** DAS; DASD; Amsonic acid; Benzenesulfonic acid, 2,2'-(1,2-ethylenediyl) bis (5-amino)-; CI 40002; CI 40003; 4,4'-Diamino-2,2'-stilbenedisulfonic acid; Direct orange 15; 2,2'-(1,2-Ethylenediyl) bis (5-aminobenzenesulfonic acid); Flavonic acid; 2,2'-Stilbenedisulfonic acid, 4,4'-diamino-

**Empirical:** C<sub>16</sub>H<sub>14</sub>N<sub>2</sub>O<sub>6</sub>S<sub>2</sub>

**Formula:** C<sub>8</sub>H<sub>7</sub>(NH<sub>2</sub>)(SO<sub>3</sub>H)CHCHC<sub>8</sub>H<sub>7</sub>(SO<sub>3</sub>H)(NH<sub>2</sub>)

**Properties:** Yel. microscopic needles; sol. in alcohol, ether, oxygenated solvs.; very sl. sol. in water; m.w. 370.41; m.p. > 325 C

**Toxicology:** LD50 (oral, guinea pig) 47 g/kg; sl. toxic by ingestion; experimental reproductive effects; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NO<sub>x</sub> and SO<sub>x</sub>

**Uses:** Optical brightener; dye for cotton, paper, leather; mfg. of bleaching agents; for household and I&I detergents, textiles

**Manuf./Distrib.:** ABCR; Acros Org.; Aldrich; Alfa Aesar; China Nat'l. Chem. Construction; Hickson & Welch Ltd; Lancaster Synthesis; Pfaltz & Bauer; TCI Am.; Wilshire

**4,4'-Diamino-2,2'-stilbenedisulfonic acid.** See 4,4'-Diaminostilbene-2,2'-disulfonic acid

**Diammonium edetate.** See Diammonium EDTA

### Diammonium EDTA

CAS 20824-56-0; EINECS/ELINCS 244-063-4

**Synonyms:** Diammonium edetate; Diammonium N,N'-1,2-ethanediybis[N-(carboxymethyl)glycine]; Diammonium ethylene diamine tetraacetate; Edetate diammonium

**Classification:** Substituted diamine

**Empirical:** C<sub>10</sub>H<sub>16</sub>N<sub>2</sub>O<sub>8</sub> · 2H<sub>2</sub>N

**Formula:** NCH<sub>2</sub>CH<sub>2</sub>N(CH<sub>2</sub>COOH)<sub>2</sub>(CH<sub>2</sub>COONH<sub>4</sub>)<sub>2</sub>

**Uses:** Chelating agent; photographic developer; for cosmetics, pharmaceuticals, in water treatment, textiles, soaps/detergents, electroless copper plating, polymer prod., disinfectants, pulp/paper, enhanced oil recovery, metal cleaning/protection

**Manuf./Distrib.:** Fluka

**Trade Names:** Versene Diammonium EDTA

**Diammonium N,N'-1,2-ethanediybis[N-(carboxymethyl)glycine].** See Diammonium EDTA

**Diammonium ethylene diamine tetraacetate.** See Diammonium EDTA

**Diammonium hydrogen orthophosphate.** See Ammonium phosphate, dibasic

**Diammonium hydrogen phosphate.** See Ammonium phosphate, dibasic

**Diammonium peroxodisulfate.** See Ammonium persulfate

**Diammonium phosphate.** See Ammonium phosphate, dibasic

**Diammonium sulfate.** See Ammonium sulfate

**Diammonium thiosulfate.** See Ammonium thiosulfate

**1,2:3,4-Dianhydro-DL-threitol.** See DL-Diepoxybutane

**p,p'-Dianiline.** See Benzidine

**1,4-Dianilinobenzene.** See N,N'-Diphenyl-p-phenylenediamine

### Dianisidine

CAS 119-90-4; EINECS/ELINCS 204-355-4

**Synonyms:** DMOB; Acetamine diazo black RD; Azoic diazo component 48; Benzidine, 3,3'-dimethoxy; Bianisidine; Blue base; CI 37235; CI azoic diazo component 48; CI disperse black 6; 4,4'-Diamino-3,3'-biphenyldiol dimethyl ether; 4,4'-Diamino-3,3'-dimethoxybiphenyl; Di-p-aminodimethoxydiphenyl; o-Dianisidine; o,o'-Dianisidine; 3,3'-Dianisidine; 3,3'-Dimethoxybenzidine; 3,3'-Dimethoxy-1,1'-biphenyl-4,4'-diamine; 3,3'-Dimethoxy-4,4'-diaminobiphenyl; Fast blue

**Classification:** Primary amine

**Empirical:** C<sub>14</sub>H<sub>12</sub>N<sub>2</sub>O<sub>2</sub>

**Formula:** [C<sub>6</sub>H<sub>3</sub>(OCH<sub>3</sub>)NH<sub>2</sub>]<sub>2</sub>

**Properties:** Colorless cryst. or lt. brn. powd.; turns violet on standing; sol. in DMSO, alcohol, ether, benzene, chloroform; probably sol. in most lipids and most org. solvs.; sol. 5-10 mg/ml in acetone; insol. in water; m.w. 244.32; m.p. 137-138 C; flash pt. 206 C

**Toxicology:** LD50 (oral, rat) 1920 mg/kg; LDLo (oral, dog) 600 mg/kg; mod. toxic by ing.; toxic by inh., skin contact; irritating to eyes, skin, respiratory system; can be absorbed thru skin; stannator; may cause headaches,

drowsiness, cyanosis, severe nose irritation, sneezing, bladder cancer; carcinogen; tumorigen; mutagen; target organ: bladder; TSCA listed

**Precaution:** Combustible; weak base; incompat. with strong oxidizing agents; sensitive to heat, air, and prolonged exposure to light

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of CO, CO<sub>2</sub>, NO<sub>x</sub>; emits toxic fumes under fire conditions

**NFPA:** Flammability 1; Reactivity 0

**Storage:** Store in cool, dry place; store refrigerated; store in tightly closed container under inert atmosphere; protect from light

**Uses:** Chemical intermediate for prod. of azo dyes and o-dianisidine diisocyanate; dye for leather, paper, plastics, rubber, textiles; in detection of metals, thiocyanates, and nitrites

**Regulatory:** SARA §313 reportable

**Manuf./Distrib.:** ABCR; AccuStandard; Acros Org.; Aldrich; Alfa Aesar; Fluka; George Uhe; ICN Biomed. Research Prods.; Lancaster Synthesis; Pfaltz & Bauer; Research Organics; Sigma; Spectrum Quality Prods.; TCI Am.

**3,3'-Dianisidine.** See Dianisidine

**o-Dianisidine.** See Dianisidine

**o,o'-Dianisidine.** See Dianisidine

**Diantimony pentoxide.** See Antimony pentoxide

**Diantimony trioxide.** See Antimony trioxide

### Diaryl iodonium hexafluoroantimonate

**Uses:** Photoinitiator for use in coatings (metal, paper, wood, plastic) and inks; enhances adhesion to metallic substrates; offers fast cure speeds in epoxy, vinyl ether, and other cationically cured resin systems

**Trade Names:** SR-1012

### Diatomaceous earth

CAS 6067-86-0; 7631-86-9; 68855-54-9; EINECS/ELINCS 231-545-4

**Synonyms:** Diatomite; Diatomaceous silica; Fossil flour; Infusorial earth; Kieselguhr; Siliceous earth; Silicon dioxide, diatomaceous

**Definition:** Mineral material consisting chiefly of the siliceous frustules and fragments of various species of diatoms

**Properties:** Wh. to pale buff soft bulky solid; insol. in water, acids except HF, dil. alkalis; sol. in strong alkalis; dens. 1.9-2.35; bulk dens. 8-15 lb/ft<sup>3</sup>; bulking value 0.06 gal/lb; oil absorp. 135-185%; GE brightness 87-90; ref. index 1.42-1.49; hardness (Mohs) 4.5-6.0; 88% silica

**Toxicology:** TLV/TWA 10 mg/m<sup>3</sup> (dust); poison by inhalation and ingestion; dust may cause fibrosis of the lungs; tumorigen

**Precaution:** Noncombustible

**HMS:** Health 1; Flammability 0; Reactivity 0

**Uses:** Filtration, clarifying, decolorizing, disinfection, Fe/Mn removal, taste/odor control in water treatment; insulation absorbent; mild abrasive; catalyst carrier; anticaking agents in fertilizer; conditioning agent for dusts, soil; flattening agent; filler, processing aid for rubber; filler in cosmetics, paper, plastics; filler/extender for paints, thermosets and thermoplastics; mfg. heat insulators; fat refining aid, filter aid (foods); filter aid; sorbent; dentifrice abrasive; colorant in food-contact polymers, paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §73.1, 133.146, 160.105, 160.185, 172.230, 172.480, 173.340, 175.300, 176.170, 177.1460, 177.2410, 178.3297, 182.90, 193.135, 561.145, 576.940; USDA 9CFR §318.7; Japan restricted (0.5% max. residual); USP/NF, BP compliance

**Manuf./Distrib.:** Alban Muller; Aldrich; Ashland; CR Mins.; Celite; Coyne; D.N. Lukens; Eagle-Picher; Gelest; Great Western; Kraft Chem.; L.A. Salomon; Landers-Segal Color; Lomas Int'l.; Sal Chem.; Seefast (Europe) Ltd; Seegott; Sigma; Spectrum Quality Prods.; Tamms Ind.; Van Waters & Rogers; Whittaker, Clark & Daniels

**Trade Names:** Celite® 263; Celite® 321; Celite® 388

### Diatomaceous earth, amorphous

CAS 61790-53-2

**Synonyms:** Amorphous silica; Diatomaceous earth, natural; Diatomaceous silica; Diatomite; Infusorial earth; Kieselguhr

**Definition:** Diatomaceous earth contg. < 1% cryst. silica

**Properties:** Wh. to tan solid; sol. in hydrofluoric acid; insol. in water

**Toxicology:** ACGIH TLV/TWA 10 mg/m<sup>3</sup> (total dust); NIOSH REL:TWA 6 mg/m<sup>3</sup>; harmful dust; nuisance dust; may cause fibrosis of the lungs; irritating to eyes, respiratory system; possible carcinogen; tumorigen; TSCA listed

## Dibutyl-1,2-benzene dicarboxylate

*Manuf./Distrib.:* Wall Chem.

**Dibutyl-1,2-benzene dicarboxylate.** See Dibutyl phthalate

**2,5-Di-t-butylbenzene-1,4-diol.** See Di-t-butylhydroquinone

**Dibutyl-o-(o-carboxybenzoyl) glycolate.** See n-Butyl phthalyl-n-butyl glycolate

**Dibutyl-o-carboxybenzoyloxyacetate.** See n-Butyl phthalyl-n-butyl glycolate

**2,6-Di-t-butyl-p-cresol.** See BHT

**Dibutyl decanedioate.** See Dibutyl sebacate

**Dibutyl fumarate homopolymer**

*Uses:* In paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180

**2,5-Di-t-butyl hydroquinone.** See Di-t-butylhydroquinone

**Di-t-butylhydroquinone**

CAS 88-58-4; EINECS/ELINCS 201-841-8

*Synonyms:* 2,5-Bis (1,1-dimethylethyl)-1,4-benzenediol; 2,5-Di-t-butylbenzene-1,4-diol; 2,5-Di-t-butyl hydroquinone; Hydroquinone, 2,5-di-t-butyl-

*Empirical:* C<sub>14</sub>H<sub>22</sub>O<sub>2</sub>

*Formula:* [C(CH<sub>3</sub>)<sub>2</sub>]<sub>2</sub>C<sub>6</sub>H<sub>2</sub>(OH)<sub>2</sub>

*Properties:* Wh. powd.; sol. in acetone, alcohol, benzene; insol. in water, aq. alkali; m.w. 222.23; m.p. 210-212 C; flash pt. (COC) 216 C

*Toxicology:* LDLo (oral, rat) 800 mg/kg; mod. toxic by ing.; irritant; tumorigen; questionable carcinogen; TSCA listed

*Hazardous Decom. Prods.:* Heated to decomp., emits acrid smoke and irritating vapors

*Uses:* Polymerization inhibitor, antioxidant, stabilizer against UV deterioration of rubber; in food-pkg. adhesives; antioxidant for fatty-based coating adjuvants for food-contact paper/paperboard; in paper/paperboard in contact with dry food; defoamer in food-contact paper/paperboard; in lubricants for rayon fiber finishing for food-contact filters; in food-contact textiles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210, 177.2260, 177.2420, 177.2800

*Manuf./Distrib.:* Aldrich; Eastman; Fluka; Sigma; Skymart Enterprises

**Dibutyl itaconate homopolymer**

*Uses:* In paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180

**Dibutyl maleate homopolymer**

*Uses:* In paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180

**2,6-Di-t-butyl-4-methylphenol.** See BHT

**Di-t-butyl peroxide**

CAS 110-05-4; EINECS/ELINCS 203-733-6; UN No. 2102 (DOT)

*Synonyms:* DTBP; Bis (1,1-dimethylethyl) peroxide; t-Butyl peroxide; (Tributyl) peroxide

*Classification:* Organic peroxide

*Empirical:* C<sub>8</sub>H<sub>18</sub>O<sub>2</sub>

*Formula:* (CH<sub>3</sub>)<sub>3</sub>COOC(CH<sub>3</sub>)<sub>3</sub>

*Properties:* Clear water-wh. liq.; distinctive odor; sol. in styrene, ketones, ethanol, most resin monomers; most aliphatic and aromatic hydrocarbons; pract. insol. in water; m.w. 146.23; dens. 0.791 (25/25 C); vapor pressure 19.51 mm (20 C); f.p. -40 C; b.p. 111 C; dec. @ 190 C; flash pt. (OC) 18.3 C

*Toxicology:* LD50 (oral, rat) > 25,000 mg/kg, (IP, rat) 3210 mg/kg; mod. toxic by IP route; powerful irritant by ing. and inh.; skin and eye irritant; inh. of high concs. may cause irritation of nose, throat, lungs; questionable carcinogen; experimental tumorigen; TSCA listed

*Precaution:* Flamm.; dangerous fire hazard; strong oxidizer; may ignite org. materials or explode when shocked or in contact with reducing materials

*Hazardous Decom. Prods.:* Combustion prods.: CO, CO<sub>2</sub>; heated to decomp., emits acrid smoke and fumes (acetone, ethane)

NFPA: Health 3; Flammability 2; Reactivity 4

*Uses:* Polymerization catalyst/initiator for resins (e.g., olefins, styrene, styrenated alkyds, silicones); crosslinking agent for rubber and resins; curing agent for certain resins; ignition accelerator for diesel fuel; organic synthesis; intermediate; raw material for paints; polymerization catalyst in mfg. of paper/paperboard in contact with aq./fatty foods; accelerator for food-contact rubber articles for repeated use

*Regulatory:* FDA 21CFR §176.170, 177.2600

*Manuf./Distrib.:* Akzo Nobel; Aldrich; Amber Syn.; Atofina; Crompton/Witco; Fluka; Monomer-Polymer & Dajac Labs

**Dibutyl phthalate**

CAS 84-74-2; EINECS/ELINCS 201-557-4; UN No. 9095 (DOT)

*Synonyms:* DBP; 1,2-Benzenedicarboxylic acid, dibutyl ester; o-Benzene-dicarboxylic acid dibutyl ester; Benzene-o-dicarboxylic acid di-n-butyl ester; n-Butyl phthalate; Butyl phthalate; Dibutyl-1,2-benzene dicarboxylate; Di-n-butyl phthalate

*Definition:* Aromatic diester of butyl alcohol and phthalic acid

*Empirical:* C<sub>16</sub>H<sub>22</sub>O<sub>4</sub>

*Formula:* C<sub>8</sub>H<sub>7</sub>(COOC<sub>4</sub>H<sub>9</sub>)<sub>2</sub>

*Properties:* Colorless stable oily liq., odorless; misc. with common org. solvs.; insol. in water; m.w. 278.17; dens. 1.0484 (20/20 C); f.p. -35 C; b.p. 340 C; flash pt. (COC) 340 F; ref. index 1.4920

*Toxicology:* ACGIH TLV/TWA 5 mg/m<sup>3</sup>; LD50 (oral, rat) 8000 mg/kg, (IP, rat) 3050 mg/kg; mod. toxic by IP, IV routes; mildly toxic by ing.; irritant; if ingested can cause GI upset, human systemic effects (hallucinations, nausea, vomiting); vapor irritating to eyes and mucous membranes; may cause kidney or bladder changes; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

*Precaution:* Combustible exposed to heat or flame; can react with oxidizers; reacts explosively with chlorine

*Hazardous Decom. Prods.:* Heated to decomp., emits acrid smoke and fumes

NFPA: Health 0; Flammability 1; Reactivity 0

*Uses:* Plasticizer-solvent in nitrocellulose lacquers, elastomers, explosives, nail polishes, solid rocket propellants, adhesives, sealants; solvent for resins, perfume oils; perfume fixative; textile lubricating agent; as insect repellent; nonreactive epoxy resin diluent; safety glass; printing inks; paper coatings; in oral pharmaceuticals; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods; adjuvant in silicides in food-contact paper/paperboard; in cellophane for food pkg.; solvent for adjuvants in food-contact crosslinked polyesters; plasticizer in food-contact rubber articles for repeated use

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.300, 177.1200, 177.2420, 177.2600; FDA approved for orals; SARA reportable; BP, Ph.Eur. compliance

*Manuf./Distrib.:* Aldrich; Alfa Chem; Allchem Ind.; Aristech; Ashland; BCH Brühl; BP Chems. Ltd; C.P. Hall; Chisso Am.; Coyne; Eastman; Fluka; Great Western; Houghton Chem.; Indofine; Ruger; Sigma; Spectrum Quality Prods.; Unitek; Universal Preserv-A-Chem

*Trade Names:* Uniplex 150

*Trade Names Containing:* Morflex® 190

**Di-n-butyl phthalate.** See Dibutyl phthalate

**Dibutyl sebacate**

CAS 109-43-3; EINECS/ELINCS 203-672-5; FEMA 2373

*Synonyms:* DBS; Bis (n-butyl) sebacate; Decanedioic acid, dibutyl ester; Dibutyl decanedioate; Di-n-butyl sebacate; Sebacic acid, dibutyl ester

*Definition:* Diester of butyl alcohol and sebacic acid

*Empirical:* C<sub>18</sub>H<sub>34</sub>O<sub>4</sub>

*Formula:* C<sub>8</sub>H<sub>17</sub>OCO(CH<sub>2</sub>)<sub>8</sub>OCOC<sub>8</sub>H<sub>17</sub>

*Properties:* Colorless clear liq., odorless; sol. in alcohol, IPA, min. oil; sl. sol. in propylene glycol; insol. in water; m.w. 314.47; dens. 0.936 (20/20 C); b.p. 349 C (760 mm); f.p. -11 C; acid no. 0.1 max.; sapon. no. 352-357; flash pt. 350 F; ref. index 1.429-1.441

*Toxicology:* LD50 (oral, rat) 16 g/kg; mildly toxic by ingestion; experimental reproductive effects; TSCA listed

*Precaution:* Combustible when exposed to heat or flame; can react with oxidizing materials

*Hazardous Decom. Prods.:* Heated to decomp., emits acrid smoke and fumes

NFPA: Health 0; Flammability 1; Reactivity 0

*Uses:* Plasticizer for polyvinyl butyral, food-contact coatings; surf. lubricant in food-contact coatings; rubber softener; dielectric liquid; cosmetics and perfumes; lubricant in metalworking; syn. flavoring agent in foods; plasticizer migrating from food pkg.; plasticizer in food-contact rubber articles for repeated use; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods; oral pharmaceuticals; in surf. lubricants for mfg. of food-contact metallic articles

*Use Level:* 1-5 ppm (nonalcoholic beverages), 2-5 ppm (ice cream, ices), 15

ppm (candy), 15 ppm (baked goods)

**Regulatory:** FDA 21CFR §172.515, 175.105, 175.300, 175.320, 176.170, 177.2600, 178.3910, 181.22, 181.27; FEMA GRAS; FDA approved for orals; USP/NF compliance

**Manuf./Distrib.:** C.P. Hall; Dastech Int'l.; Fluka; GNC Group; Haltermann Prods. UK; Harwick; Int'l. Paper; Jarchem Ind.; Morflex; Phoenix; Richman; Sigma; Unitex; Velsicol

**Di-n-butyl sebacate.** See Dibutyl sebacate

**Dicarboxylic acid C<sub>6</sub>.** See Adipic acid

### Di (C7, C9-alkyl) adipate

**Uses:** Plasticizer in food-contact polymers; in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §176.170, 178.3740

**Dichlorantin.** See 1,3-Dichloro-5,5-dimethyl hydantoin

**2,2'-((3,3'-Dichloro(1,1'-biphenyl)-4,4'-diyl) bis (azo)) bis (N-(2-methylphenyl)-3-oxobutamide.** See Pigment yellow 14

**8,18-Dichloro-5,15-dihydro-5,15-dihydrodiindolo [3,2-b:3',2'-m] triphenodioxazine.** See Pigment violet 23

**5,5'-Dichloro-2,2'-dihydroxydiphenylmethane.** See Dichlorophene

**Dichlorodimethylhydantoin.** See 1,3-Dichloro-5,5-dimethyl hydantoin

### 1,3-Dichloro-5,5-dimethyl hydantoin

CAS 118-52-5; EINECS/ELINCS 204-258-7

**Synonyms:** DDH; DCDMH; Dactin; Dichlorantin; Dichlorodimethylhydantoin; 1,3-Dichloro-5,5-dimethyl-2,4-imidazolidinedione; 1,3-Dichloro-5,5'-methyl hydantoin; Halane; Hydantoin, 1,3-dichloro-5,5-dimethyl-

**Classification:** Chlorinated hydantoin

**Empirical:** C<sub>4</sub>H<sub>6</sub>Cl<sub>2</sub>N<sub>2</sub>O<sub>2</sub>

**Formula:** CINCONCIO(CH<sub>3</sub>)<sub>2</sub>

**Properties:** Wh. powd., mild chlorine odor; sol. in benzene, chloroform, ethylene dichloride, alcohol, chlorinated and highly polar solvs.; sl. sol. in water; m.w. 185.01; sp.gr. 1.5 (20 C); m.p. 132-134 C; flash pt. (CC) 174 C; pH 4.4 (aq.); subl. @ 100 C; conflagrates @ 212 C

**Toxicology:** ACGIH TLV/TWA 0.2 mg/m<sup>3</sup>; STEL 0.4 mg/m<sup>3</sup>; LD50 (oral, rat) 452 mg/kg; LCLo (inh., rat, 1 h) 20 g/m<sup>3</sup>; toxic by inhalation; mod. toxic by ingestion; severe skin irritant; causes cancer when injected into rats; mutation data reported; TSCA listed

**Precaution:** Combustion with evolution of chlorine; will react with water or steam to produce toxic and corrosive fumes; mixts. with xylene may explode

**Hazardous Decom. Prods.:** Heated to decomp., emits toxic fumes of Cl and NO<sub>x</sub>

**Uses:** Bleaching agent in household laundry bleach, laundry detergents; water treatment; mild chlorinating agent; pharmaceutical intermediate; catalyst

**Manuf./Distrib.:** Aldrich; Alfa Chem; Fluka; Harcos; Morre-Tec Ind.

**Trade Names Containing:** Dantobrom® RW Briquette

**1,3-Dichloro-5,5-dimethyl-2,4-imidazolidinedione.** See 1,3-Dichloro-5,5-dimethyl hydantoin

**1,1-Dichloroethene polymer with chloroethene.** See Vinylidene chloride/vinyl chloride copolymer

**1,1-Dichloroethylene-monochloroethylene polymer.** See Vinylidene chloride/vinyl chloride copolymer

**1,1-Dichloroethylene polymer with chloroethylene.** See Vinylidene chloride/vinyl chloride copolymer

### 1,3-Dichloro-5-ethyl-5-methylhydantoin

CAS 89415-87-2; EINECS/ELINCS 401-570-7

**Synonyms:** 2,4-Imidazolidinedione, 1,3-dichloro-5-ethyl-5-methyl-

**Trade Names Containing:** Dantobrom® RW Briquette

**Di (2-chloroethyl) vinylphosphonate.** See Bis (β-chloroethyl) vinyl phosphonate

**Dichlorofen.** See Dichlorophene

### Dichlorofluoroethane

CAS 1717-00-6

**Synonyms:** HCFC-141b; R 141b; 1,1-Dichloro-1-fluoroethane; Ethane, 1,1-dichloro-1-fluoro-

**Empirical:** C<sub>2</sub>H<sub>3</sub>Cl<sub>2</sub>F

**Formula:** CCl<sub>2</sub>FCH<sub>3</sub>

**Properties:** Colorless liq.; faint ethereal odor; insol. in water; m.w. 116.95; dens. 1.20; vapor pressure 520 mm Hg (70 F); f.p. -103 C; b.p. 32 C; flash pt. none

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg, (inh., rat, 2 h) 240 g/m<sup>3</sup>, (skin, rabbit) > 2000 mg/kg; sl. toxic by inh.; mild eye irritant; repeated/prolonged contact may cause skin irritation and defatting; inh. may cause dizziness, CNS effects, cardiac arrhythmia; can cause asphyxiation; TSCA listed

**Precaution:** No flash pt. but will burn when diluted with air; incompat. with strong oxidizers and active metals; flamm. limits 7.4-15.1%; dec. above 480 F and emits poisonous fumes

**Hazardous Decom. Prods.:** HF, HCl, carbonyl halides, CO, CO<sub>2</sub>; heated to decomp., emits toxic vapors of F and Cl

**Uses:** Blowing agent in rigid board, foam systems, flexible foam; refrigerant gas

**Regulatory:** DOT nonregulated

**Manuf./Distrib.:** LaRoche Ind.; Spectrum Quality Prods.

**Trade Names Containing:** Krytox® DF; MS-122DF

**1,1-Dichloro-1-fluoroethane.** See Dichlorofluoroethane

**Di-(5-chloro-2-hydroxyphenyl) methane.** See Dichlorophene

**4,4'-Dichloro-2,2'-methylenediphenol.** See Dichlorophene

**1,3-Dichloro-5,5'-methyl hydantoin.** See 1,3-Dichloro-5,5-dimethyl hydantoin

**Dichlorophen.** See Dichlorophene

### Dichlorophene

CAS 97-23-4; EINECS/ELINCS 202-567-1

**Synonyms:** DDDM; DDM; Bis (5-chloro-2-hydroxyphenyl) methane; Bis-2-hydroxy-5-chlorophenyl) methane; 5,5'-Dichloro-2,2'-dihydroxydiphenylmethane; Di-(5-chloro-2-hydroxyphenyl) methane; Dichlorofen; 4,4'-Dichloro-2,2'-methylenediphenol; Dichlorophen; Dichlorphen; 2,2'-Dihydroxy-5,5'-dichlorodiphenylmethane; 2,2'-Methylenebis (4-chlorophenol)

**Classification:** Halogenated phenolic compd.

**Empirical:** C<sub>13</sub>H<sub>10</sub>Cl<sub>2</sub>O<sub>2</sub>

**Formula:** (C<sub>6</sub>H<sub>4</sub>ClO)<sub>2</sub>CH<sub>2</sub>

**Properties:** Lt. tan free-flowing cryst. powd., sl. phenolic odor; sol. in acetone, alcohols, oxygenated solvs.; sl. sol. in benzene, toluene, CCl<sub>4</sub>; insol. in water; m.w. 269.12; vapor pressure 10<sup>-4</sup> mm (100 C); m.p. 177 C

**Toxicology:** LD50 (oral, male rat) 1506 mg/kg, IV, rat) 17 mg/kg; poison by IV route; mod. toxic by ing.; skin and severe eye irritant; may cause cramps and diarrhea; mutagenic data; TSCA listed

**Environmental:** Toxic to fish; keep away from drinking water sources

**Hazardous Decom. Prods.:** Heated to decomp., emits toxic fumes of Cl

**Uses:** Fungicide; bactericide, antimicrobial in soaps and toiletries; mildewproofing agent; moss control agent (turf treatment); textile preservative; biostabilizer for textiles, rubber, wood; antimicrobial in cooling water systems, evaporate condensers; slimicide in paper mills; preservative for paints, adhesives, syn. polymer latexes, latex emulsions; antimicrobial for aq. prods., thickeners, slurries; deodorant agent; some dermatological and cosmetic applics.; veterinary medicine; agric.; FDA OTC drug (anthelmintic); in food-pkg. adhesives; preservative for coating formulations for paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §175.105, 176.170; SARA reportable

**Manuf./Distrib.:** Aceto; Alchemie USA; Aldrich; Aquapharm; Sigma

**Dichlorphen.** See Dichlorophene

**Dichromium trioxide.** See Chromium oxide (ic)

### Dicocamine

CAS 61789-76-2; EINECS/ELINCS 263-086-0

**Synonyms:** Amines, dicoco alkyl; Dicoco alkyl amine

**Definition:** Secondary aliphatic amine derived from coconut acid

**Formula:** R<sub>2</sub>NH, R represents the coconut radical

**Properties:** Solid; m.p. 40-47 C; cationic

**Toxicology:** TSCA listed

**Uses:** Synthesis intermediate, anticaking agent, flotation agent, antistripping for road making, soil stabilization; auxs. for fuel additives, corrosion inhibitor, paint; chemical intermediate for quats., betaines, amine oxides; emulsifier; emollient

**Trade Names:** Armeen® 2C

**Dicoco alkyl amine.** See Dicocamine

**Di (coco alkyl) dimethyl ammonium chloride.** See Dicocodimonium chloride

## Dicoco dimethyl ammonium chloride

**Dicoco dimethyl ammonium chloride.** See Dicocodimonium chloride

### Dicocodimonium chloride

CAS 61789-77-3; EINECS/ELINCS 263-087-6

**Synonyms:** Di (coco alkyl) dimethyl ammonium chloride; Dicoco dimethyl ammonium chloride; Dimethyldicocoammonium chloride; Quaternium-34

**Classification:** Quaternary ammonium salt

**Empirical:** C<sub>26</sub>H<sub>56</sub>ClN

**Formula:** [RN(CH<sub>2</sub>)<sub>2</sub>R]<sup>+</sup>Cl<sup>-</sup> where R rep. the coconut radical

**Properties:** M.w. 418.20; cationic

**Toxicology:** TSCA listed

**Uses:** Emulsifier; corrosion inhibitor; coupling agent; bactericide; biocide in oil field applics.; textile/fabric softener; antistat; asphalt emulsifier; hair conditioner; for car spray waxes; dust control oil; spot removal; petroleum processing; detergent; germicide, sanitizer, slimicide; retardant for acrylics; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §172.710, 177.1200

**Trade Names Containing:** Arquad® 2C-75

### Dicoco nitrite

**Trade Names Containing:** Arquad® 2C-70 Nitrite

### Dicy. See Dicyandiamide

### Dicyandiamide

CAS 461-58-5; EINECS/ELINCS 207-312-8

**Synonyms:** DCD; Cyanoguanidine; N-Cyanoguanidine; Dicy; Dicyandiamin; Dicyanodiamide

**Classification:** Aliphatic organic compd.

**Empirical:** C<sub>2</sub>H<sub>4</sub>N<sub>4</sub>

**Formula:** NH<sub>2</sub>C(NH)(NHCN)

**Properties:** Pure wh. crystals; sol. in liq. ammonia; partly sol. in hot water; sl. sol. in alcohol; m.w. 84.08; dens. 1.4 (25 C); m.p. 207-209 C; stable when dry; nonflamm.

**Toxicology:** LD50 (oral, rat) > 500 mg/kg; TSCA listed

**Precaution:** Mixts. with ammonium nitrate, potassium chlorate, and related compds. are powerful explosives

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of CN<sup>-</sup> and NO<sub>x</sub>

**Uses:** Fertilizers; nitrocellulose stabilizer; org. synthesis, esp. of melamine, barbituric acid, and guanidine salts; explosives; epoxy curing agent, catalyst for epoxy resin, powd. coatings, structural laminates, adhesives, film adhesives; pharmaceuticals; flotation depressant (copper ores); intumescent paint ingred.; electrostatic powd. coating ingred.; fireproofing compds.; stabilizer in detergents; modifier for starch prod.; plasticizer for starch adhesives; thinner for oil-well drilling muds; in food-pkg. adhesives; modifier for amino resins or fluidizing agent in starch/protein coatings for food-contact paper/paperboard; retarder in food-contact rubber articles for repeated use; antioxidant/stabilizer for food-grade polymers

**Regulatory:** FDA 21CFR §175.105, 176.170, 177.2600, 178.2010; BP compliance

**Manuf./Distrib.:** AMC Chems.; Aldrich; Allchem Ind.; Ashland; Austin; BCH Brühl; Benco; Brook-Chem; CP PhibroChem; CPB Int'l.; CVC Spec. Chem.; Chemical; Chemway Int'l.; Dastech Int'l.; Eastech; F.T.L. Int'l.; Fluka; Gulf Chem. Int'l.; Industrial Chem. Trading; Int'l. Resources; Kaltron/Peltibone; Kimson; Maypro Ind.; Miljac; Monomer-Polymer & Dajac Labs; Quaker City; Rochem Int'l.; SKW Chems.; San Yuan; Sigma; Thomas Swan; Total Spec. Chems.; United Min. & Chem.; Wegu Chem. & Min.; Whyte Chems. Ltd

### Dicyandiamin. See Dicyandiamide

**2,2'-Dicyano-2,2'-azopropane.** See 2,2'-Azobisisobutyronitrile

### Dicyanodiamide. See Dicyandiamide

### Dicyclohexyl phthalate

CAS 84-61-7; EINECS/ELINCS 201-545-9

**Synonyms:** DCHP; 1,2-Benzenedicarboxylic acid, dicyclohexyl ester; Phthalic acid, dicyclohexyl ester

**Classification:** Aromatic ester

**Empirical:** C<sub>20</sub>H<sub>26</sub>O<sub>4</sub>

**Formula:** C<sub>6</sub>H<sub>11</sub>(COOC<sub>6</sub>H<sub>11</sub>)<sub>2</sub>

**Properties:** Wh. gran. solid; mildly aromatic odor; sol. in most org. solvs.; insol. in water; m.w. 330.43; dens. 1.20 (25/25 C); m.p. 62-65 C; b.p. 245-246 C (1.3 kPa); flash pt. 405 F; nonvolatile

**Toxicology:** LD50 (oral, rat) 30 g/kg; mildly toxic by ing.; irritant; TSCA listed  
**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**Uses:** Plasticizer for foil lacquers, cellophane lacquers, nitrocellulose, ethylcellulose, chlorinated rubber, PVAc, PVC, food-contact polymers; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180, 177.1200, 178.3740

**Manuf./Distrib.:** Aldrich; Alfa Chem; Bayer; Morflex; P.A.T. Prods.; Schweizerhall; Unitex

**Trade Names:** Uniplex 250

### Didecyl dimethyl ammonium chloride. See Didecylidimonium chloride

### Didecylidimonium chloride

CAS 7173-51-5; EINECS/ELINCS 230-525-2

**Synonyms:** Ammonium, didecylidimethyl-, chloride; N-Decyl-N,N-dimethyl-1-decanaminium chloride; Didecyl dimethyl ammonium chloride; Dimethyl didecyl ammonium chloride; N,N-Dimethyldidecylammonium chloride; Quaternium-12

**Classification:** Quaternary ammonium chloride

**Empirical:** C<sub>22</sub>H<sub>48</sub>ClN

**Formula:** [CH<sub>3</sub>(CH<sub>2</sub>)<sub>9</sub>N(CH<sub>2</sub>)<sub>2</sub>(CH<sub>2</sub>)<sub>9</sub>CH<sub>3</sub>]<sup>+</sup>Cl<sup>-</sup>

**Properties:** Liq.; sol. in acetone; extremely sol. in benzene; m.w. 362.08; cationic

**Toxicology:** LD50 (oral, rat) 84 mg/kg, (IP, rat) 45 mg/kg; poison by ing. and IP routes; primary irritant; causes eye damage and skin irritation; harmful if swallowed; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of NO<sub>x</sub>, NH<sub>3</sub>, and Cl<sup>-</sup>

**Uses:** Biocide for disinfectant and laundry formulations; disinfectant; sanitizer; mildew preventive in commercial laundries; water treatment; wood preservatives; fungicide, bactericide for food processing, breweries; hard-surf. disinfection/sanitization; surfactant; antistat; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §172.712, 177.1200

**Manuf./Distrib.:** Dishman USA; Lonza

**Trade Names Containing:** Arquad® 210-50

### Didecyl phthalate

CAS 84-77-5

**Synonyms:** DDP; Di-n-decyl phthalate; Phthalic acid, didecyl ester

**Empirical:** C<sub>28</sub>H<sub>48</sub>O<sub>4</sub>

**Formula:** C<sub>6</sub>H<sub>4</sub>(COOC<sub>10</sub>H<sub>21</sub>)<sub>2</sub>

**Properties:** Lt. colored liq.; insol. in water; m.w. 446.74; dens. 0.9675 (20/20 C); vapor pressure 0.3 mm Hg (200 C); m.p. 4 C; b.p. 261 C (5 mm); flash pt. 229 C

**Toxicology:** LD50 (skin, rabbit) 16,800 mg/kg; LDLo (IP, mouse) 2233 mg/kg; primary irritant; mild skin irritant; may cause ptosis, somnolence; TSCA listed

**Precaution:** Combustible

**Uses:** Plasticizer, esp. for vinyl resins; plasticizer in food-contact rubber articles for repeated use; adjuvant in slimicides in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.300, 177.2600

**Manuf./Distrib.:** KIC Chems.; Pfaltz & Bauer

### Di-n-decyl phthalate. See Didecyl phthalate

### 4,4'-Di (diethylamino)-4',6'-disulfotriphenylmethanol anhydride, sodium salt. See Acid blue 1

### 1,2:3,4-Diepoxybutane. See DL-Diepoxybutane

### (±)-1,2:3,4-Diepoxybutane. See DL-Diepoxybutane

### DL-Diepoxybutane

CAS 298-18-0; EINECS/ELINCS 215-979-1; UN No. 2929

**Synonyms:** 2,2'-Bioxirane; (R\*,R\*)-(±)-2,2'-Bioxirane; (±)-DL-1,3-Butadiene diepoxide; DL-Butadiene dioxide; Butane, (±)-1,2:3,4-diepoxy-; 1,2:3,4-Dianhydro-DL-threitol; 1,2:3,4-Diepoxybutane; DL-1,2:3,4-Diepoxybutane; (±)-1,2:3,4-Diepoxybutane

**Empirical:** C<sub>4</sub>H<sub>6</sub>O<sub>2</sub>

**Properties:** Colorless to yel. liq.; sol. in water, DMSO, acetone; sol. 5-10 mg/ml in 95% ethanol; m.w. 86.09; sp.gr. 1.1157 (20/4 C); vapor pressure 3.9 mm Hg (20 C); m.p. 4 C; b.p. 144 C; flash pt. 45 C; ref. index

1.4340 (20 C)

**Toxicology:** LD50 (oral, rat) 210 mg/kg, (skin, rabbit) 800 mg/kg; LC50 (inh., rat 4 h) 56 ppm; highly toxic by ing., inh., and skin contact; readily absorbed thru skin and respiratory tract; irritating to eyes, skin, mucous membranes, upper respiratory tract; may cause severe burns, lacrimation, clouding of cornea, labored breathing, lung congestion, etc.; may be fatal by pulmonary edema/shock; experimental carcinogen, equivocal tumorigen, neoplastigen; target organs: liver, pancreas, nerves, cardiovasc.

**Precaution:** Combustible; incompat. with acids, bases, strong oxidizing agents; reacts with 4-(4-nitrobenzyl) pyridine, alcohols, amines, phenols, other reactive substances; slowly hydrolyzed in water; unstable in sol'n.

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of CO, CO<sub>2</sub>; emits toxic fumes under fire conditions

**Storage:** Store refrigerated; keep tightly closed; store away from min. acids and bases

**Uses:** Curing of polymers; crosslinking textile fibers; prevention of microbial spoilage; treating polymers, paper, and textiles; chem. intermediate; prep. of erythritol and other pharmaceuticals; in laboratory as theoretical model in study of carcinogens

**Manuf./Distrib.:** Fluka; Pfaltz & Bauer; Spectrum Quality Prods.

**DL-1,2:3,4-Diepoxybutane.** See DL-Diepoxybutane

### Diethanolamine

CAS 111-42-2; EINECS/ELINCS 203-868-0; UN No. 1760

**Synonyms:** DEA; DELA; Bis (2-hydroxyethyl) amine; N,N-Bis (2-hydroxyethyl) amine; Diethylolamine; 2,2'-Dihydroxydiethylamine; Di (2-hydroxyethyl) amine; Diolamine; 2,2'-Iminobisethanol; 2,2'-Iminodiethanol

**Classification:** Aliphatic amine; alkanolamine

**Empirical:** C<sub>4</sub>H<sub>11</sub>NO<sub>2</sub>

**Formula:** (HOCH<sub>2</sub>CH<sub>2</sub>)<sub>2</sub>NH

**Properties:** Colorless cryst. or liq., mild ammoniacal odor; very sol. in water and alcohol; misc. with acetone, chloroform, glycerin; insol. in ether, benzene; m.w. 105.09; dens. 1.0881 (30/4 C); m.p. 28 C; b.p. 268 C; flash pt. 300 F; ref. index 1.4770

**Toxicology:** ACGIH TLV/TWA 3 ppm in air; LD50 (oral, rat) 12.76 g/kg, (IP, mouse) 2300 mg/kg, (subcut., mouse) 3553 mg/kg, (skin, rabbit) 12,200 mg/kg; mod. toxic by ing., IP, and subcut. routes; severe eye and skin irritant; mucous membrane irritant; experimental reproductive effects; TSCA listed

**Precaution:** Combustible; DOT: corrosive material; normally stable; slowly oxidized by air; incompat. with oxidizing agents, strong acids, acid anhydrides, nitrosating agents

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>, NO<sub>x</sub>, ammonia

NFPA: Health 1; Flammability 1; Reactivity 0

**Storage:** Hygroscopic, deliq.; light-sensitive; store @ R.T. in cool, dry, well-ventilated area away from heat and ignition sources

**Uses:** Absorbent in gas scrubbing; rubber chemicals intermediate; mfg. of surfactants for textiles, herbicides, petroleum demulsifier; detergent, emulsifier and dispersant in coatings, agric., cosmetics, pharmaceuticals, cutting oils, cleaners, polishes; textile lubricants/processing; humectant; softener; in organic synthesis; crosslinker for flexible PU foam slabstock; hydrogen sulfide extraction solvent in gas processing; solubilizer (metal-working fluids, printing inks, textile aux.); in food-pkg. adhesives; adjunct to control pulp absorbency and pitch content in mfg. of paper/paperboard in contact with aq./fatty/dry foods; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180, 176.210, 177.2600; FDA approved for injectables (IV), ophthalmics; USP/NF, BP compliance; SARA reportable

**Manuf./Distrib.:** AMRESKO; Akzo Nobel; Aldrich; Allchem Ind.; Ashland; BASF AG; Coyne; Degussa-Hüls AG; Fluka; Great Western; Houghton Chem.; Huntsman; Occidental; Oxiteno; Ruger; Sal Chem.; Sigma; Spectrum Quality Prods.; Union Carbide; Varsal Instruments; Whyte Chems. Ltd

### Diethylaminoethanol

CAS 100-37-8; EINECS/ELINCS 202-845-2; UN No. 2686 (DOT)

**Synonyms:** DEAE; 2-Diethylaminoethanol; β-Diethylaminoethanol; N-Diethylaminoethanol; N,N-Diethyl-2-aminoethanol; β-Diethylaminoethyl alcohol; Diethylethanolamine; N,N-Diethylethanolamine; N,N-Diethyl-N-(β-hydroxyethyl) amine; Ethanol, 2-(diethylamino)-; 2-Hydroxytriethylamine

**Classification:** Aliphatic amino alcohol

**Empirical:** C<sub>6</sub>H<sub>15</sub>NO

**Formula:** (C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>NCH<sub>2</sub>CH<sub>2</sub>OH

**Properties:** Colorless liq.; strong ammonia-like odor; sol. in water, alcohol, acetone, ether, benzene, petrol. ether; misc. with most org. solvs.; m.w. 117.19; dens. 0.88-0.89 (20/20 C); vapor pressure 1.4 mm Hg (20 C); f.p. -70 C; b.p. 161 C; flash pt. (OC) 140 F; ref. index 1.4389

**Toxicology:** ACGIH TLV/TWA 10 ppm (skin); LD50 (oral, rat) 1300 mg/kg, (IP, rat) 1220 mg/kg, (subcut., mouse) 1561 mg/kg, (IV, mouse) 188 mg/kg; poison by IP, IV routes; mod. toxic by ing., skin contact, subcut. routes; human systemic effects by inh. (nausea, vomiting); skin, severe eye irritant; corrosive; TSCA listed

**Precaution:** DOT: Flamm. liq.; moderate fire risk; reactive with oxidizing materials

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NO<sub>x</sub>

NFPA: Health 3; Flammability 2; Reactivity 0

**Storage:** Hygroscopic

**Uses:** Chem. intermediate for prod. of emulsifiers, detergents, solubilizers; water-sol. salts; textile/fabric softeners; cosmetics; pharmaceuticals; emulsifier in acid media; curing agent for resins; surface coatings; pigment dispersant in paints; solvent (gas sweetening); catalyst in PU foams; petrol. and gas processing chems.; boiler water additive for food contact; corrosion inhibitor for boiler water treatment; textile/leather/paper aux.

**Regulatory:** FDA 21CFR §173.310 (15 ppm max. in steam)

**Manuf./Distrib.:** Aldrich; Ashland; Atofina; BASF; Fluka; Spectrum Quality Prods.; Union Carbide

**2-Diethylaminoethanol.** See Diethylaminoethanol

**β-Diethylaminoethanol.** See Diethylaminoethanol

**N-Diethylaminoethanol.** See Diethylaminoethanol

**N,N-Diethyl-2-aminoethanol.** See Diethylaminoethanol

### Diethylaminoethyl acrylate

CAS 2426-54-2

**Synonyms:** Acrylic acid, 2-(diethylamino) ethyl ester; Acrylic acid-N,N-diethylaminoethyl ester; N,N-Diethylaminoethyl acrylate; β-Diethylaminoethyl acrylate; 2-(Diethylamino) ethyl acrylate; 2-Propenoic acid, 2-(diethylamino)ethyl ester

**Classification:** Amine monomer

**Empirical:** C<sub>8</sub>H<sub>17</sub>NO<sub>2</sub>

**Formula:** CH<sub>2</sub>=CHCOOCH<sub>2</sub>CH<sub>2</sub>N(C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>

**Properties:** M.w. 171.24; dens. 0.925 (20/4 C); b.p. 202 C

**Toxicology:** LD50 (oral, rat) 770 mg/kg, (skin, rabbit) 200 mg/kg; LDLo (IP, mouse) 31 mg/kg; poison by skin contact and IP routes; mod. toxic by ing.; corrosive; severe skin and eye irritant; harmful if swallowed or inhaled; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NO<sub>x</sub>

**Uses:** Industrial and automotive coatings; dye and lube oil additives; cationic quat. monomers; intermediate for water treatment chemicals; silane coupling agent; conductive paper coatings; retention aids for paper mfg.; flocculant and coagulant; crosslinking agent; catalyst for epoxy resins; detergent for jet fuels; comonomer for acrylic resins

**Manuf./Distrib.:** Aldrich; CPS; Monomer-Polymer & Dajac Labs; Rhodia

**Trade Names:** Ageflex FA-2

**2-(Diethylamino) ethyl acrylate.** See Diethylaminoethyl acrylate

**β-Diethylaminoethyl acrylate.** See Diethylaminoethyl acrylate

**N,N-Diethylaminoethyl acrylate.** See Diethylaminoethyl acrylate

**Diethylaminoethyl acrylate dimethyl sulfate quat.**

CAS 21810-39-9

## β-Diethylaminoethyl alcohol

*Classification:* Quat. ammonium monomer

*Formula:*  $[\text{CH}_2=\text{CHCOOCH}_2\text{CH}_2\text{N}(\text{C}_2\text{H}_5)_2\text{CH}_3]^+\text{CH}_3\text{OSO}_3^-$

*Properties:* M.w. 297.37

*Uses:* Antistatic finish for polyester fibers; flocculant and coagulant polymers for water treatment, mineral recovery, ion-exchange resins, adhesives, acid dye receptivity; retention aid for paper mfg.; food-contact paper/paperboard

*Trade Names:* Ageflex FA-2Q50DMS

**β-Diethylaminoethyl alcohol.** See Diethylaminoethanol

### Diethylaminoethyl methacrylate

CAS 105-16-8

*Synonyms:* 2-(Diethylamino) ethyl methacrylate; β-(Diethylamino) ethyl methacrylate; 2-(N,N-Diethylamino) ethyl methacrylate; Methacrylic acid, 2-(diethylamino) ethyl ester; 2-Propenoic acid, 2-methyl-, 2-(diethylamino) ethyl ester

*Classification:* Amine monomer

*Empirical:*  $\text{C}_{10}\text{H}_{19}\text{NO}_2$

*Formula:*  $\text{CH}_2=\text{C}(\text{CH}_3)\text{COOCH}_2\text{CH}_2\text{N}(\text{C}_2\text{H}_5)_2$

*Properties:* M.w. 185.29

*Toxicology:* LD50 (oral, rat) 4696 mg/kg; LC50 (inh., rat, 4 h) 11 g/m<sup>3</sup>; mildly toxic by ing. and inh.; severe eye and skin irritant; harmful if swallowed; TSCA listed

*Precaution:* Combustible

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of NO<sub>x</sub>

*Uses:* Industrial and automotive coatings; dye additives; intermediate for water treatment and oil field chemicals; stabilizer for fuel oils; acrylic modifier; intermediate for polymethacrylates and dispersants

*Manuf./Distrib.:* Aldrich; CPS; Monomer-Polymer & Dajac Labs; Polysciences; Rhodia

*Trade Names:* Ageflex FM-2

**2-(Diethylamino) ethyl methacrylate.** See Diethylaminoethyl methacrylate

**2-(N,N-Diethylamino) ethyl methacrylate.** See Diethylaminoethyl methacrylate

**β-(Diethylamino) ethyl methacrylate.** See Diethylaminoethyl methacrylate

**7-(Diethylamino)-4-methyl-2H-1-benzopyran-2-one.** See 7-Diethylamino-4-methylcoumarin

**7-(Diethylamino)-4-methyl-2-benzopyrone.** See 7-Diethylamino-4-methylcoumarin

**Diethylaminomethylcoumarin.** See 7-Diethylamino-4-methylcoumarin

### 7-Diethylamino-4-methylcoumarin

CAS 91-44-1; EINECS/ELINCS 202-068-9

*Synonyms:* MDAC; 2H-1-Benzopyran-2-one, 7-(diethylamino)-4-methyl; Coumarin, 7-diethylamino-4-methyl-; 7-(Diethylamino)-4-methyl-2H-1-benzopyran-2-one; 7-(Diethylamino)-4-methyl-2-benzopyrone; Diethylaminomethylcoumarin; Fluorescent brightener 140; 4-Methyl-7-(diethylamino) coumarin

*Classification:* Lactone

*Empirical:*  $\text{C}_{14}\text{H}_{17}\text{NO}_2$

*Formula:*  $\text{CH}_3\text{C}_9\text{H}_6\text{O}(\text{O})\text{N}(\text{C}_2\text{H}_5)_2$

*Properties:* Lt. tan gran.; sol. in aq. acid sol'ns, resins, varnishes, vinyls and nearly all common org. solvs.; sl. sol. in aliphatic hydrocarbons; m.w. 231.32; m.p. 68-72 C

*Toxicology:* LD50 (oral, rat) 5 g/kg, (IV, mouse) 180 mg/kg; poison by IV route; mod. toxic by ing.; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub>

*Uses:* Fluorescent brightener agent for polyamide, acetate, polyester, paper, detergents; optical brightener/bleach in textile industry, in coatings for paper, labels, book covers, etc.; to lighten plastics, resins, varnishes, and lacquers; invisible marking agent

*Manuf./Distrib.:* Aldrich

**Diethyl-m-aminophenolphthalein hydrochloride.** See Basic violet 10

**N-[4-[[4-(Diethylamino) phenyl] (2,4-disulfo)phenyl] methylene]-2,5-cyclohexadien-1-ylidene]-N-ethylethanaminium, hydroxide, inner salt, sodium salt.** See Acid blue 1

**N-[4-[[4-(Diethylamino) phenyl] [4-ethylamino]-1-naphthalenyl] methylene]-2,5-cyclohexadien-1-ylidene]-N-ethylethanaminium chloride.** See Basic blue 7

**Di(2-ethylbutyl) phthalate.** See Dihexyl phthalate

**Diethylene glycol butyl ether.** See Butoxydiglycol

**Diethylene glycol n-butyl ether.** See Butoxydiglycol

### Diethylene glycol dibenzoate

CAS 120-55-8; EINECS/ELINCS 204-407-6

*Synonyms:* Benzoic acid, diester with diethylene glycol; Dibenzoyldiethyleneglycol ester; PEG 100 dibenzoate; PEG-2 dibenzoate; POE (2) dibenzoate

*Classification:* Aromatic ester

*Definition:* PEG diester of benzoic acid

*Empirical:*  $\text{C}_{18}\text{H}_{18}\text{O}_5$

*Formula:*  $\text{C}_6\text{H}_5\text{COO}(\text{CH}_2)_2\text{O}(\text{CH}_2)_2\text{OOC}\text{C}_6\text{H}_5$

*Properties:* High-boiling liq. or solid; mild ester odor; sol. in aliphatic and aromatic solvs.; insol. in water; m.w. 314.36; dens. 1.1765-1.178 (20 C); m.p. 16 C; b.p. 225-227 C (3 mm); flash pt. (PMCC) 232 C; ref. index 1.5424-1.5449 (20 C)

*Toxicology:* LD50 (oral, rat) 2830 mg/kg, (skin, rabbit) 20 g/kg; mod. toxic by ing.; primary skin and eye irritant; TSCA listed

*Precaution:* Combustible; can react with oxidizers

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

NFPA: Health 0; Flammability 1; Reactivity 0

*Uses:* Plasticizer for polymers, vinyl acetate resins, adhesives, latex coatings; in food-pkg. adhesives; plasticizer for PVAc coatings for paper/paperboard in contact with aq./fatty foods; plasticizer for polymers for paper/paperboard in contact with dry food; emollient

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Manuf./Distrib.:* Aldrich; Allchem Ind.; Haltermann GmbH; Kalama; Unitex; Velsicol

*Trade Names:* Benzoflex® 2-45

*Trade Names Containing:* Benzoflex® 50

**Diethylene glycol dioleate.** See PEG-2 dioleate

**Diethylene glycol distearate.** See PEG-2 distearate

**Diethylene glycol ethyl ether.** See Ethoxydiglycol

**Diethylene glycol laurate.** See PEG-2 laurate

**Diethylene oximide.** See Morpholine

### Diethylenetriamine

CAS 111-40-0; EINECS/ELINCS 203-865-4; UN No. 2079 (DOT)

*Synonyms:* DETA; DTA; Aminoethylethandiamine; N-(2-Aminoethyl)-1,2-ethanediamine; N-(2-Aminoethyl) ethylenediamine; 3-Azapentane-1,5-diamine; Bis (2-aminoethyl) amine; Bis (β-aminoethyl) amine; 2,2'-Diaminodiethylamine; 2,2'-Iminobisethylamine; 2,2'-Iminodiethylamine

*Classification:* Aliphatic polyamine

*Empirical:*  $\text{C}_4\text{H}_{13}\text{N}_3$

*Formula:*  $\text{NH}_2\text{C}_2\text{H}_4\text{NHC}_2\text{H}_4\text{NH}_2$

*Properties:* Colorless to yel. visc. liq.; ammoniacal odor; sol. in water and hydrocarbons; misc. with oxygenated and aromatic solvs.; immisc. with aliphatic solvs.; strongly alkaline; m.w. 103.17; dens. 0.9542 (20/20 C); vapor pressure 0.22 mm Hg (20 C); f.p. -39 C; b.p. 206.7 C; flash pt. (TOC) 99 C

*Toxicology:* ACGIH TLV/TWA 1 ppm (skin); LD50 (oral, rat) 1080 mg/kg, (IP, rat) 74 mg/kg, (skin, rabbit) 1090 mg/kg; toxic by IP, ing., inh., and skin absorption; strong irritant to eyes and skin; high conc. of vapors causes respiratory tract irritation, nausea, vomiting; repeated exposure may cause asthma, skin sensitization; TSCA listed

*Precaution:* Combustible exposed to heat or flame; can react with oxidizers; mixt. with nitromethane is a shock-sensitive explosive; ignites on contact with cellulose nitrate; corrosive to copper and its alloys; absorbs CO<sub>2</sub> from air to form carbamate salts

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO,  
NFPA: Health 3; Flammability 1; Reactivity 0

*Storage:* Hygroscopic

*Uses:* Solvent for sulfur, acid gases, various resins, dyes; saponification agent for acidic materials; fuel component; epoxy curing agent and hardener; intermediate for textile finishes; curing agent for two-pkg. protective coatings; mfg. of chelating agents, surfactants, softeners, corrosion inhibitors; modifier for amino resins for paper/paperboard in contact with aq./fatty foods; in paper/paperboard in contact with dry food; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180, 176.210

*Manuf./Distrib.:* Akzo Nobel; Aldrich; Allchem Ind.; Ashland; BASF AG; Charkit; Coyne; Diamines & Chems. Ltd; Fabrichem; Fluka; Houghton Chem.; Lowenstein Dyes & Cosmetics; Rhodia HPCII; Sigma; Tosoh; Union Carbide

*Trade Names:* Ancamine® DETA

**Diethylenetriamine, epichlorohydrin, adipic acid polymer.** *See* Adipic acid/epoxypropyl diethylenetriamine copolymer

**Diethylene triamine pentaacetic acid.** *See* Pentetic acid

**1,1,4,7,7-Diethylenetriaminepentaacetic acid.** *See* Pentetic acid

**Diethylenetriaminepentaacetic acid, pentasodium salt.** *See* Pentasodium pentetate

**Diethylene triamine pentamethylene phosphonic acid**

CAS 15827-60-8

*Synonyms:* DETPMPA; Phosphonic acid, [(phosphonomethyl) imino] bis [2,1-ethanediylnitribis (methylene)] tetrakis-; [(Phosphonomethyl) imino] bis [ethane-2,1-diylnitribis (methylene)] tetrakisphosphonic acid

*Empirical:* C<sub>9</sub>H<sub>26</sub>N<sub>3</sub>O<sub>15</sub>P<sub>5</sub>

*Properties:* Sol. in water; m.w. 573.19; dens. 1.14 kg/l

*Uses:* Peroxide stabilizer in pulp/paper bleaching; scale inhibitor/chelating agent for boilers, cooling towers, oil field treatment; sequestrant for powd. laundry and industrial detergents; deflocculant; dispersant for water treatment, I&I cleaners

*Manuf./Distrib.:* Excel Ind.

*Trade Names:* Aquacid-106 EX; Briquest® 543-45AS; Dequest® 2060; Unihib® 905

**Diethylenetriamine penta (methylene phosphonic acid), pentasodium salt.**

*See* Pentasodium diethylene triamine pentamethylene phosphonate

**Diethylene triamine penta (methylene phosphonic acid) sodium salt.** *See* Sodium diethylenetriamine penta (methylene phosphonate)

**Diethylenimine oxide.** *See* Morpholine

**Diethylethanolamine.** *See* Diethylaminoethanol

**N,N-Diethylethanolamine.** *See* Diethylaminoethanol

**Di (2-ethylhexyl) orthophthalate.** *See* s-Dioctyl phthalate

**Di (2-ethylhexyl) phthalate.** *See* s-Dioctyl phthalate

**N,N-Diethyl-N-(β-hydroxyethyl) amine.** *See* Diethylaminoethanol

**Diethylolamine.** *See* Diethanolamine

**Diethyl zinc**

CAS 557-20-0; EINECS/ELINCS 209-161-3; UN No. 1366 (DOT)

*Synonyms:* DEZ; DEZn; Zinc diethyl; Zinc ethide; Zinc ethyl

*Classification:* Organometallic compd.

*Empirical:* C<sub>4</sub>H<sub>10</sub>Zn

*Formula:* (C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>Zn

*Properties:* Colorless clear liq.; garlic-like odor; misc. with ether, petrol. ether, benzene, other hydrocarbon solvs.; dec. in water; m.w. 123.49; dens. 1.2065 (20/4 C); vapor pressure 20 hPa (20 C); m.p. -28 C; b.p. 118 C; flash pt. (CC) -40 C; ref. index 1.4936

*Toxicology:* Toxic by inh., ing., skin contact; corrosive; causes burns; TSCA listed

*Precaution:* Highly flamm.; ignites spontaneously in air; burns with blue flame, giving off peculiar, garlic-like odor; reacts violently with water; contact with water liberates extremely flamm. gases

*Hazardous Decomp. Prods.:* Air- and moisture-sensitive; handle and store under nitrogen; store in cool, dry, well-ventilated area away from incompat. substances (water)

NFPA: Health 3; Flammability 4; Reactivity 3

*Uses:* Catalyst for Ziegler-Natta polymerization of olefins and dienes; catalyst for epoxidation; in organic synthesis; synthesis of cyclopropanes and ketocarbenes; in preservation of archival papers; reactant in prod. of

transition metal catalysts

*Manuf./Distrib.:* ABCR; Acros Org.; Akzo Nobel; Aldrich; Fluka

**Diglycol oleate.** *See* PEG-2 oleate

**Diglycol stearate.** *See* PEG-2 stearate

**Diguanidine hydrogen phosphate.** *See* Guanidine phosphate, dibasic

**Diguanidine phosphate.** *See* Guanidine phosphate, dibasic

**Dihexyl phthalate**

CAS 84-75-3; 68515-50-4; EINECS/ELINCS 201-559-5

*Synonyms:* 1,2-Benzenedicarboxylic acid, dihexyl ester; Di-n-hexyl phthalate; Di(2-ethylbutyl) phthalate; Phthalic acid, dihexyl ester

*Empirical:* C<sub>20</sub>H<sub>30</sub>O<sub>4</sub>

*Formula:* C<sub>6</sub>H<sub>4</sub>(COOC<sub>6</sub>H<sub>13</sub>)<sub>2</sub>

*Properties:* Oily, sl. aromatic liq.; m.w. 334.50; sp.gr. 1.008; b.p. 350 C (735 mm); f.p. -50 C; flash pt. (TCC) 380 F

*Toxicology:* LD50 (oral, rat) 29,600 mg/kg, (skin, rabbit) 20 g/kg; very mildly toxic by ing. and skin contact; eye and skin irritant; experimental reproductive effects

*Precaution:* Combustible; can react with oxidizers

*Uses:* Plasticizer for cellulose ester and vinyl plastics, food-contact polymers; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105, 178.3740

*Manuf./Distrib.:* Exxon; Frinton Labs; Unitex

*Trade Names:* Jayflex® DHP

**Di-n-hexyl phthalate.** *See* Dihexyl phthalate

**Dihexyl sodiosulfosuccinate.** *See* Dihexyl sodium sulfosuccinate

**Dihexyl sodium sulfosuccinate**

CAS 3006-15-3; 2373-38-8; 6001-97-4; EINECS/ELINCS 221-109-1

*Synonyms:* Bis (1-methylamyl) sodium sulfosuccinate; Butanedioic acid, sulfo-, 1,4-dihexyl ester, sodium salt; Dihexyl sodiosulfosuccinate; Dihexyl sulfosuccinate sodium salt; Sodium dihexyl sulfosuccinate; Sodium di-(2-methylpentyl) sulfosuccinate; Sulfosuccinic acid, sulfo-, 1,4-dihexyl ester, sodium salt

*Definition:* Sodium salt of the diester of 1-methylamyl alcohol and sulfosuccinic acid

*Empirical:* C<sub>16</sub>H<sub>30</sub>NaO<sub>7</sub>S

*Formula:* C<sub>16</sub>H<sub>30</sub>O<sub>7</sub>S · Na

*Properties:* Clear visc. liq. or wh. waxy particles; readily sol. in hot water, slowly in cold water; sol. in benzene, CCl<sub>4</sub>, acetone, glycerol; m.w. 389.51; anionic

*Toxicology:* LD50 (oral, rat) 1750 mg/kg, (oral, mouse) 2315 mg/kg; mod. toxic by ing.; TSCA listed

*Precaution:* Flamm. when exposed to heat, flame, oxidizers; hydrolyzes in alkaline media

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of SO<sub>2</sub> and Na<sub>2</sub>O

*Uses:* Emulsifier/dispersant for emulsion polymerization, wax, polish, hand cleaners; ore leaching/electroplating additive; photographic chemical; pigment dispersant; wetting agent/penetrant in glass cleaners, paint strippers, batteries; textile wetting agent; solubilizer; wetting agent/emulsifier for waterborne industrial coatings (PVAc, acrylics), printing inks; emulsifier in food pkg.; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods; in closure-sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1210, 178.3400

*Manuf./Distrib.:* Finetex; Sigma; Venchem

*Trade Names:* Aerosol® MA-80; DeWET SMA-80

*Trade Names Containing:* Monawet MM-80

**Dihexyl sulfosuccinate sodium salt.** *See* Dihexyl sodium sulfosuccinate

**Dihydroabietyl alcohol.** *See* Hydroabietyl alcohol

*Uses:* Developer for heat-sensitive papers  
*Trade Names:* BPS-24; BPS-P

**2,2'-Dihydroxydipropyl ether.** See Dipropylene glycol

**1,2-Dihydroxyethane.** See Glycol

**Di (2-hydroxyethyl) amine.** See Diethanolamine

**Dihydroxyethyl cocamine oxide**  
 CAS 61791-47-7; EINECS/ELINCS 263-180-1  
*Synonyms:* N,N (Bis (2-hydroxyethyl) cocamine oxide; Bis (2-hydroxyethyl) cocoamine oxide; Coco bis-2-hydroxyethylamine oxide; Coco di(hydroxyethyl) amine oxide; N,N-Di-(2-hydroxyethyl) cocoamine oxide; Ethanol, 2,2'-iminobis, N-coke alkyl, N-oxide  
*Classification:* Tertiary amine oxide  
*Empirical:* C<sub>16</sub>H<sub>26</sub>NO<sub>3</sub>  
*Formula:* R-N(CH<sub>2</sub>CH<sub>2</sub>OH)<sub>2</sub>, R represents the coconut radical  
*Properties:* Clear liq.; m.w. 289.47  
*Toxicology:* TSCA listed  
*Uses:* Surfactant; softener, conditioner, emulsifier, wetting agent, visc. builder, stabilizer, antistat for cosmetics; emollient, lubricant, and slip agent for shave creams; for textiles, petrol. additives, paper, plastics, rubber; gel sensitizer for latex; foam booster for bubble baths; hydrotrope/thickener for hypochlorite cleaners; thixotrope for water-based paints; emulsion stabilizer  
*Trade Names:* Aromox® C/12-W  
*Trade Names Containing:* Aromox® C/12

**N,N-Di-(2-hydroxyethyl) cocoamine oxide.** See Dihydroxyethyl cocamine oxide

**N,N-Di (2-hydroxyethyl) oleylamine.** See PEG-2 oleamine

**2,2'-Dihydroxyisopropyl ether.** See Dipropylene glycol

**2,4-Dihydroxy-2-methylpentane.** See Hexylene glycol

**N,N'-Dihydroxymethylurea.** See Dimethylol urea

**1,2-Dihydroxypropane.** See Propylene glycol

**2,3-Dihydroxypropyl octadecanoate.** See Glyceryl stearate

**1-(Diiodomethyl) sulfonyl)-4-methylbenzene.** See Diiodomethyl tolylsulfone

**4-(Diiodomethylsulfonyl) toluene.** See Diiodomethyl tolylsulfone

**Diiodomethyl tolylsulfone**  
 CAS 20018-09-1; EINECS/ELINCS 243-468-3  
*Synonyms:* Benzene, 1-((diiodomethyl) sulfonyl)-4-methyl-; 1-((Diiodomethyl) sulfonyl)-4-methylbenzene; 4-(Diiodomethylsulfonyl) toluene; Diiodomethyl p-tolyl sulfone

*Classification:* Organic compd.

*Empirical:* C<sub>8</sub>H<sub>8</sub>I<sub>2</sub>O<sub>2</sub>S

*Properties:* M.w. 422.02

*Toxicology:* TDLo (oral, rat) 5 g/kg; reproductive effector; TSCA listed  
*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of SO<sub>x</sub> and I<sup>-</sup>

*Uses:* Antimicrobial; mildewcide, fungicide, preservative for adhesives and sealants, paints, and in lumber, construction, home improvement, textile, leather, and automotive industries; antifungal preservative in food-pkg. adhesives; preservative in side seam cements for food-contact containers; antifungal preservative in food-contact sealants and caulking materials for repeated use

*Regulatory:* FDA 21CFR §175.105, 175.300, 177.2600

*Manuf./Distrib.:* ANGUS

*Trade Names:* Amical® 48

**Diiodomethyl p-tolyl sulfone.** See Diiodomethyl tolylsulfone

**Diisobutyl carbinol.** See 2,6-Dimethyl heptanol-4

**Diisobutyl phthalate**

CAS 84-69-5; EINECS/ELINCS 201-553-2

*Synonyms:* DIBP; Phthalic acid, diisobutyl ester

*Classification:* Aromatic ester

*Empirical:* C<sub>16</sub>H<sub>22</sub>O<sub>4</sub>

*Properties:* Colorless liq.; insol. in water; m.w. 278.35; dens. 1.040 (20 C); f.p. -50 C; m.p. -64 C; b.p. 327 C; flash pt. (PMCC) 185 C; ref. index 1.490

*Toxicology:* LD50 (oral, rat) 15 g/kg, (IP, rat) 3749 mg/kg, (skin, guinea pig) 10 g/kg; mod. toxic by IP route; mildly toxic by ing. and skin contact; experimental teratogen, reproductive effects; TSCA listed

*Precaution:* Combustible

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

*Uses:* Plasticizer-solvent for PVC, PVAc, PVB, PS, cellulosics, paints; as vehicles for pigment dispersions; in food-pkg. adhesives; in cellophane for food pkg.

*Regulatory:* FDA 21CFR §175.105, 177.1200

*Manuf./Distrib.:* Aldrich; Allchem Ind.; KIC Chems.; Novachem Corp.; Unitex

*Trade Names:* Uniplex 155

**Diisobutyl sodium sulfosuccinate**

CAS 127-39-9; EINECS/ELINCS 204-839-5

*Synonyms:* 1,4-Bis (2-methylpropyl) sulfobutanedioate, sodium salt; Sodium 1,2-diisobutoxycarbonylethanesulfonate; Sodium diisobutyl sulfosuccinate; Sulfosuccinic acid diisobutyl ester, sodium salt

*Definition:* Sodium salt of the diester of isobutyl alcohol and sulfosuccinic acid

*Empirical:* C<sub>12</sub>H<sub>21</sub>NaO<sub>5</sub>S

*Properties:* Wh. powd.; sol. 760 g/l in water (25 C); sol. in glycerol, pine oil, oleic acid; m.w. 332.34; anionic

*Toxicology:* Irritating to eyes, mucous membranes; TSCA listed

*Uses:* Wetting agent for metal leaching, electroplating; penetrant; emulsion polymerization of styrene, butadiene and copolymers; emulsifier in food pkg.; aq. paints; agric.; paper coating; water treatment

*Regulatory:* FDA 21CFR §178.3400

*Trade Names:* Geropon® CYA/DEP; Monawet MB-45

**Diisononyl adipate**

CAS 33703-08-1; EINECS/ELINCS 251-646-7

*Synonyms:* DINA; Diisononyl hexanedioate; Dinonyl adipate; Hexanedioic acid, diisononyl ester

*Definition:* Diester of isononyl alcohol and adipic acid

*Empirical:* C<sub>24</sub>H<sub>46</sub>O<sub>4</sub>

*Formula:* C<sub>9</sub>H<sub>19</sub>OOC(CH<sub>2</sub>)<sub>4</sub>COOC<sub>9</sub>H<sub>19</sub>

*Properties:* Colorless liq.; insol. in water; m.w. 398.63; dens. 0.924; visc. 25 mPa·s (20 C); b.p. 250-260 C; flash pt. (TCC) 390 F

*Precaution:* Combustible

*Uses:* Emollient; plasticizer for PVC, PS, cellulosics, food-contact polymers

*Regulatory:* FDA 21CFR §178.3740

*Manuf./Distrib.:* Aristech; Ashland; Bayer; Exxon; Unitex

*Trade Names:* Jayflex® DINA

**Diisononyl hexanedioate.** See Diisononyl adipate

**Diisononyl phthalate**

CAS 14103-61-8; 28553-12-0; 68515-48-0; EINECS/ELINCS 249-079-5; 271-090-9

**Synonyms:** DINP; 1,2-Benzenedicarboxylic acid, diisononyl ester; Phthalic acid, diisononyl ester

**Classification:** Aromatic ester

**Empirical:** C<sub>26</sub>H<sub>44</sub>O<sub>4</sub>

**Properties:** M.w. 420.64; dens. 0.973; flash pt. (TCC) 415 F; ref. index 1.4850

**Toxicology:** TDLo (oral, rat, 28 days, continuous) 11,256 mg/kg; cancer suspect agent; possible teratogen; reproductive hazard; target organ: liver, blood; TSCA listed

**Uses:** Plasticizer for PVC cable compds., plastisols, PS, cellulose, paints, food-contact polymers; as vehicles for pigment dispersions

**Regulatory:** FDA 21CFR §178.3740

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Aristech; Ashland; BASF; Bencorp Int'l.; C.P. Hall; Chemisphere Ltd; Chisso Am.; Cognis; Exxon; Fluka; Harwick; KIC Chems.; Unitex; Westtec Ind.

**Trade Names:** Jayflex® DINP

**Diisooctyl phthalate**

CAS 27554-26-3; EINECS/ELINCS 248-523-5

**Synonyms:** DIOP; 1,2-Benzenedicarboxylic acid, diisooctyl ester; Bis (6-methyleptyl) ester of phthalic acid; Isooctyl phthalate; Phthalic acid, diisooctyl ester

**Classification:** Aromatic ester

**Empirical:** C<sub>24</sub>H<sub>38</sub>O<sub>4</sub>

**Formula:** (C<sub>8</sub>H<sub>17</sub>COO)<sub>2</sub>C<sub>6</sub>H<sub>4</sub>

**Properties:** Nearly colorless visc. liq., mild odor; insol. in water; m.w. 390.62; dens. 0.980-0.983 (20/20 C); m.p. -50 C; b.p. 370 C; flash pt. 450 F; ref. index 1.4860

**Toxicology:** LD50 (oral, rat) 22 g/kg, (skin, rabbit) 13 g/kg; mod. toxic by ing.; mildly toxic by skin contact; skin irritant; cancer suspect agent; possible teratogen; reproductive hazard; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Plasticizer for PVC, cellulosic, acrylate resins, synthetic rubber, adhesives, sealants, emulsion paints, food pkg.; syn. lubricant basestock; in food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105, 175.300, 181.27

**Manuf./Distrib.:** Aldrich; C.P. Hall; Exxon; KIC Chems.; Occidental; Unitex; Velsicol

**Trade Names:** Jayflex® DIOP

**Diisooctyl sodium sulfosuccinate. See Sodium diisooctyl sulfosuccinate****N,N-Diisopropanolamide of tallow fatty acids. See Tallow diisopropanolamide****Diisopropanolamine**

CAS 110-97-4; EINECS/ELINCS 203-820-9

**Synonyms:** DIPA; Bis (2-hydroxypropyl) amine; Bis (2-propanol) amine; Dipropyl-2,2'-dihydroxyamine; 1,1'-Iminobis-2-propanol; 1,1'-Iminobis (propan-2-ol); 1,1'-Iminodi-2-propanol; 1,1'-Iminobis-2-propanol; 1,1'-Iminodi-2-propanol; 1,1'-Iminodipropan-2-ol

**Classification:** Aliphatic amine alcohol compd.

**Empirical:** C<sub>6</sub>H<sub>15</sub>NO<sub>2</sub>

**Formula:** HN(CH<sub>2</sub>CHOHCH<sub>3</sub>)<sub>2</sub>

**Properties:** Wh. cryst. solid; mild ammoniacal odor; very sol. in water; sol. in ethanol, acetone; sl. sol. in diethyl ether; m.w. 133.19; dens. 1.004; m.p. 44.5-45.5 C; b.p. 249-250 C (745 mm); flash pt. 126 C

**Toxicology:** LD50 (oral, rat) 6720 mg/kg, (IP, mouse) 96 mg/kg; poison by IP route; mildly toxic by ing.; skin and severe eye irritant; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NO, NFPA: Health 2; Flammability 1; Reactivity 0

**Storage:** Hygroscopic; protect from light

**Uses:** Emulsifier for polishes, textile specialties, leather compounds, insecticides, cutting oils, aq. paints, topical pharmaceuticals; neutralizer for cosmetics and toiletries; solvent in desulfurization and offgas treatment; solubilizer, corrosion inhibitor in metalworking fluids; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR § 175.105, 176.210; FDA approved for topicals;

USP/NF

**Manuf./Distrib.:** Aldrich; Ashland; BASF AG; BASF; Coyne; Dow; Fluka; Ruger; Universal Preserv-A-Chem; Van Waters & Rogers

**Diisopropyl biphenyl. See Bis(methylethyl)-1,1'-biphenyl****Diisopropylene glycol. See Dipropylene glycol****Diisopropyl naphthalene**

CAS 38640-62-9

**Synonyms:** Bis (isopropyl) naphthalene; Bis (1-methylethyl) naphthalene; Naphthalene, bis (1-methylethyl)-; Naphthalene diisopropyl-

**Empirical:** C<sub>16</sub>H<sub>20</sub>

**Properties:** M.w. 212.34

**Uses:** Solvent for carbonless copy paper

**Manuf./Distrib.:** Koch Spec. Chem.

**Diisopropyl percarbonate. See Diisopropyl perdicarbonate****Diisopropyl perdicarbonate**

CAS 105-64-6

**Synonyms:** IPP; Diisopropyl percarbonate; Diisopropyl peroxydicarbonate; Isopropyl percarbonate; Isopropyl peroxydicarbonate; Peroxydicarbonic acid, bis (1-methylethyl) ester

**Empirical:** C<sub>8</sub>H<sub>14</sub>O<sub>6</sub>

**Formula:** (CH<sub>3</sub>)<sub>2</sub>CHO(C(O)OOC(O)OCH(CH<sub>3</sub>)<sub>2</sub>)<sub>2</sub>

**Properties:** Colorless cryst. solid or liq.; misc. with aliphatic, aromatic, and chlorinated hydrocarbons, esters, ethers; pract. insol. in water; m.w. 206.22; dens. 1.080 (15.5/4 C); m.p. 8-10 C; rapid decomp. @ 63 F; ref. index 1.4034 (20 C)

**Toxicology:** LD50 (oral, rat) 2140 mg/kg, (skin, rabbit) 2025 mg/kg; mod. toxic by ing. and skin contact; primary severe eye irritant; TSCA listed

**Precaution:** Dangerous fire risk; unstable above 10 C; impact- and heat-sensitive explosive; spontaneous decomp. @ R.T. releases flamm. and corrosive prods.; explodes on heating; explodes on contact with amines or potassium iodide, possibly organics

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Storage:** Store in open containers @ low temps. with adequate ventilation

**Uses:** Low-temp. polymerization catalyst; initiator for polymerization of unsat. monomers, PVC; in food-pkg. adhesives; polymerization catalyst in mfg. of paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §175.105, 176.170

**Manuf./Distrib.:** PPG Ind.

**Diisopropyl peroxydicarbonate. See Diisopropyl perdicarbonate****Dilaurin. See Glyceryl dilaurate****Dilinoleic acid**

CAS 6144-28-1

**Synonyms:** Dimer acid; 9,12-Octadecadienoic acid, dimer

**Definition:** 36-Carbon dicarboxylic acid formed by the catalytic dimerization of linoleic acid

**Empirical:** C<sub>36</sub>H<sub>64</sub>O<sub>4</sub>

**Formula:** C<sub>34</sub>H<sub>62</sub>(COOH)<sub>2</sub>

**Properties:** Lt. yel. visc. liq.; sl. odor; dens. 0.921 (100 C); iodine no. 80; ref. index 1.4851

**Toxicology:** TSCA listed

**Precaution:** Combustible

**Uses:** Lubricant, corrosion inhibitor, mildness additive in household detergents, plastics, and protective coatings; modifier for alkyd and polyamide resins, polyester or metallic soap for petroleum additive; emulsifier; adhesives; shellac substitute; emollient; to upgrade drying oils; as extender and crosslinking agent for high polymeric systems; defoamer in food-contact coatings and paper/paperboard; in surf. lubricants for mfg. of food-contact metallic articles

**Regulatory:** FDA 21CFR §176.200, 176.210, 178.3910

**Manuf./Distrib.:** Allchem Ind.; Arizona; Cognis/Chems. Group; Int'l. Paper; Uniqema N. Am.; Welch, Holme & Clark

**Trade Names:** Empol® 1007; Empol® 1008; Empol® 1016; Empol® 1018; Empol® 1020; Empol® 1022; Empol® 1024; Empol® 1026

**DIMDAC. See Dimethyl diallyl ammonium chloride****Dimelamine phosphate**

CAS 56974-60-8

## Dimer acid

*Empirical:* C<sub>2</sub>H<sub>18</sub>N<sub>12</sub>O<sub>4</sub>P

*Properties:* Wh. powd.; sol. 2 g/l in water; m.w. 350.24; dens. 1.66 kg/l; dec. @ 300 C

*Uses:* Flame retardant for polymers, intumescent coatings and paints, plastics (polyesters, polymethyl methacrylate, polyolefins, PS, PU foams), and paper; intumescent paint/mastic ingred.

*Manuf./Distrib.:* DSM Chem. N. Am.

**Dimer acid.** See Dilinoleic acid

### Dimer acid, hydrogenated

CAS 68783-41-5

*Properties:* Dens. 0.950; flash pt. 235 F; ref. index 1.4770

*Toxicology:* TSCA listed

*Uses:* Polymer building block/modifier; for hot-melt adhesives, surf. coatings; polyamide for thermographic inks

*Manuf./Distrib.:* Aldrich

*Trade Names:* Empol® 1004

### Dimercury dichloride

CAS 10112-91-1; EINECS/ELINCS 233-307-5; UN No. 2025

*Synonyms:* Mercurous chloride; Mercury chloride; Mercury (I) chloride; Mercury subchloride

*Classification:* Halide

*Empirical:* Cl<sub>2</sub>Hg<sub>2</sub>

*Formula:* Hg<sub>2</sub>Cl<sub>2</sub>

*Properties:* Off-wh. heavy powd. or cryst.; odorless; tasteless; pract. insol. in water; insol. in alcohol, ether, cold dil. acids; m.w. 472.08; dens. 7.15; m.p. 302 C; b.p. 384 C; sublimes @ 400-500 C without melting; dec. by sunlight into mercuric chloride and metallic mercury; dec. by alkalis

*Toxicology:* LD50 (oral, rat) 210 mg/kg; TDLo (oral, rat, 12 wks intermittent) 84 mg/kg; toxic; poison by ing.; sensitizer; eyes/skin/respiratory system irritant; excessive doses may cause mercury poisoning; neurologic hazard; readily absorbed thru skin; may cause proteinuria, changes in urine, kidney damage, CNS effects, reproductive and fetal effects; possible mutagen; target organ: kidneys, CNS; TSCA listed

*Precaution:* Incompat. with bromides, iodides, alkali chlorides, sulfates, sulfites, carbonates, hydroxides, lime water, acacia, ammonia, golden antimony sulfide, cyanides, copper salts, hydrogen peroxide, iodine, lead and silver salts, soaps

*Hazardous Decomp. Prods.:* Hydrogen chloride, mercury oxides; heated to decomp., emits toxic vapors of Cl<sup>-</sup> and Hg

*Storage:* Light-sensitive; protect from light

*Uses:* Dk. green Bengal lights; calomel paper; mixed with gold in painting on porcelain; for calomel electrodes; insecticide; soil fungicide; in agric. to control root maggots; pyrotechnics; electrodes; pharmaceuticals; cathartic; diuretic; antiseptic

### Dimethicone

CAS 9006-65-9

*Synonyms:* Dimethicones; Dimethylpolysiloxane; Dimethyl silicone; Dimeticone; Polydimethylsiloxane; Poly (oxy (dimethylsilylene)), α-(trimethylsilyl)-ω-methyl-; α-(Trimethylsilyl)-ω-methylpoly [oxy (dimethylsilylene)]

*Definition:* Silicone oil consisting of a mixt. of fully methylated linear siloxane polymers end-blocked with trimethylsiloxy units

*Empirical:* (C<sub>2</sub>H<sub>6</sub>O<sub>Si</sub>)<sub>x</sub>C<sub>4</sub>H<sub>12</sub>Si

*Properties:* Colorless clear liq.; misc. with chloroform, ether; immisc. with water, alcohol; visc. inc. with degree of polymerization

*Uses:* Oleaginous ointment and topical drug vehicle; skin protectant; antifoam; defoamer for oil processing, water/waste treatment, food applics.; surfactant; release agent; used in cosmetics; adhesives; inks; latexes; soap mfg.; starch mfg.; paint mfg.; emollient; lubricant in polishes, precision bearings; antiadhesion coatings; dielec. fluids; heat transfer agents; textile softener; textile/paper sizing additive; barrier creams; chewing gum base; prosthetic aid (soft tissue); antiflatulent; in food-pkg. adhesives; release agent in food-contact coatings; in paper/paperboard in contact with aq./fatty foods; defoamer in food-contact coatings and paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §145.180, 145.181, 146.185, 173.340, 175.105, 175.300, 176.170, 176.200, 176.210, 177.2260, 177.2600, 177.2800, 178.3570, 178.3910, 181.22, 181.28; USDA 9CFR §318.7, 381.147; Europe listed; UK approved; FDA approved for topicals; USP/NF, BP,

Ph.Eur. compliance

*Manuf./Distrib.:* Acros Org.; Aldrich; Ashland; BASF; Biosil Tech.; Costec; Crompton/Witco; Dow Corning; EMCO Chem. Distributors; Fanning; GE Silicones; Goldschmidt; Lanaetex Prods.; Norman, Fox; Rhodia HPCII; Sigma; Wacker Silicones

*Trade Names:* CS-100; Foamkill® 810F; Foamkill® 830F; L-45 Series; Lambent E-2140; Lambent E-2140 35% Food Grade; SWS-101 Dimethyl Fluids

*Trade Names Containing:* Foambreaker; Sag 730

### Dimethicone copolyol

CAS 63148-55-0; 64365-23-7; 67762-96-3

*Synonyms:* Dimethylsiloxane/glycol copolymer; Siloxanes and silicones, dimethyl, hydroxy-terminated, ethoxylated propoxylated

*Definition:* Copolymer of polydimethylsiloxane and polyoxyalkylene ether

*Properties:* Sol. in water and lower alcohols

*Toxicology:* Very low toxicity; TSCA listed

*Uses:* Silicone surfactant; dispersant; emulsifier; antistat; leveling and flow control agent; antifogging agent; lubricant; antiblock; slip additive; for adhesives; agric.; automotive; coatings; printing inks; textiles; household specialties; cutting fluid; emollient; pharmaceuticals; in flexible slabstock PU foam; defoamer in food-contact paper/paperboard

*Regulatory:* FDA approved for injectables (percutaneous)

*Manuf./Distrib.:* Biosil Tech.; C.P. Hall; Costec; Crompton/Witco; Dow Corning; Fanning; GE Silicones; Goldschmidt; Koster Keunen; Lanaetex Prods.; Phoenix; Thornley; Wacker Silicones

*Trade Names:* Silwet® L-720 AP; Silwet® L-722; Silwet® L-7001; Silwet® L-7002; Silwet® L-7500; TEGO® Foamex 1488; TEGO® Foamex 3062; TEGO® Foamex 7447; TEGO® Glide 100; TEGO® Glide B 1484; TEGO® Glide ZG 400

See also Polysiloxane polyether copolymer

**Dimethicones.** See Dimethicone

### Dimethiconol

CAS 31692-79-2; 70131-67-8

*Synonyms:* Poly[oxy(dimethylsilylene)], α-hydro-ω-hydroxy-; Siloxanes and silicones, dimethyl, hydroxy-terminated

*Definition:* Dimethyl silicone terminated with hydroxyl groups

*Properties:* Anionic

*Toxicology:* TSCA listed

*Uses:* Silicone surfactant, textile softener, etc.; raw material for silicone RTV systems, textile/paper coatings; plasticizer/processing aid for silicone elastomers, in water repellents; antifoam; emollient, spreading agent for cosmetics

*Manuf./Distrib.:* Fluka

*Trade Names:* Masil® SFR 70; Masil® SFR 100; Masil® SFR 750; Masil® SFR 2000; Masil® SFR 3500; Masil® SFR 50,000

**3,3'-Dimethoxybenzidine.** See Dianisidine

**3,3'-Dimethoxy-1,1'-biphenyl-4,4'-diamine.** See Dianisidine

**3,3'-Dimethoxy-4,4'-diaminobiphenyl.** See Dianisidine

### 2,2-Dimethoxy-2-phenylacetophenone

CAS 24650-42-8; EINECS/ELINCS 246-386-6

*Synonyms:* Benzil dimethyl acetal; Benzil α,α-dimethyl acetal; Benzylidimethyl ketal; α,α-Dimethoxy-α-phenylacetophenone; 1,2-Diphenylethane-1,2-dione, dimethyl ketal; Ethanone, 2,2-dimethoxy-1,2-diphenyl-

*Empirical:* C<sub>16</sub>H<sub>16</sub>O<sub>3</sub>

*Formula:* C<sub>6</sub>H<sub>5</sub>COC(OCH<sub>3</sub>)<sub>2</sub>C<sub>6</sub>H<sub>5</sub>

*Properties:* Wh. cryst. solid; sol. in acrylates, dichloromethane, DOP; m.w. 256.30; m.p. 63-68 C

*Toxicology:* May cause skin and eye irritation; may be harmful by inhalation, ingestion, or skin absorption; TSCA listed

*Storage:* Light-sensitive

*Uses:* Photoinitiator for UV-curable systems incl. coatings, lacquers, adhesives, inks, printing plates, photopolymers, electronic photoresists, polyester-styrene wood filler composites

*Manuf./Distrib.:* Aceto; Aldrich; Alemark; Amber Syn.; BCH Brühl; ChemFirst; Ciba Spec. Chems./Addit.; Fabricchem; Fluka; Gallard-Schlesinger Ind.; Morre-Tec Ind.

*Trade Names:* Esacure® KB1; Photomer® 51

**$\alpha,\alpha$ -Dimethoxy- $\alpha$ -phenylacetophenone.** See 2,2-Dimethoxy-2-phenylacetophenone

**Dimethoxy polyethylene glycol.** See PEG dimethyl ether

**Dimethyl adipate**

CAS 627-93-0; EINECS/ELINCS 211-020-6

**Synonyms:** Adipic acid dimethyl ester; Dimethyl hexanedioate; Hexanedioic acid, dimethyl ester; Methyl adipate

**Classification:** Dicarboxylic acid ester

**Definition:** Diester of methyl alcohol and adipic acid

**Empirical:**  $C_8H_{14}O_4$

**Formula:**  $CH_3O_2C(CH_2)_4CO_2CH_3$

**Properties:** Colorless liq.; sol. in oxygenated solvs.; insol. in water; m.w. 174.22; dens. 1.062 (20/4 C); m.p. 9-11 C; b.p. 115 C (13 mm); flash pt. 107 C

**Toxicology:** LD50 (IP, rat) 1809 mg/kg; mod. toxic by IP route; suspected teratogen and reproductive effects; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Solvent for coatings, cleaners, inks, textile lubricants, urethane prod.; plasticizer for flexible thermoset polyester; polymer intermediate for polyester polyols for urethanes, wet-str. paper resins, polyester resins; emollient; specialty chemical intermediate

**Manuf./Distrib.:** Aldrich; Ashland; DuPont; Eastern Chem.; Fluka; Haltermann Prods. UK; Morflex; Sigma; UCB

**Trade Names:** DBE-6

**Trade Names Containing:** DBE; DBE-2, -2SPG; DBE-3; DBE-9

**Dimethylamine/epichlorohydrin copolymer**

CAS 25988-97-0

**Synonyms:** Epichlorohydrin/dimethylamine copolymer; Poly(dimethylamino-co-epichlorohydrin)

**Formula:**  $[N(CH_3)_2(Cl)CH_2CH(OH)CH_2]_n$

**Properties:** Dens. 1.100; visc. 175 cps (50% aq.); ref. index 1.4270

**Toxicology:** Irritant

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Coagulant/flocculant for water treatment, paper processing; as drainage and retention aid; decolorizing agent, flocculant for clarification of refinery sugar liquors and juices; retention aid in mfg. of paper/paperboard in contact with aq./fatty foods

**Use Level:** 150 ppm max. of sugar solids

**Regulatory:** FDA 21CFR §173.60, 176.170

**Manuf./Distrib.:** Aldrich

**Trade Names:** Agefloc A4506; Agefloc A4510; Agefloc B50LV; Agefloc B4508P

**p-Dimethylaminobenzene diazonium chloride, zinc chloride double salt.**

See p-Diazodimethylaniline zinc chloride double salt

**$\beta$ -Dimethylaminoethanol.** See Dimethylethanolamine

**N,N-Dimethylaminoethanol.** See Dimethylethanolamine

**2-(Dimethylamino) ethanol methacrylate.** See Dimethylaminoethyl methacrylate

**Dimethylaminoethyl acrylate**

CAS 2439-35-2; EINECS/ELINCS 219-460-0

**Synonyms:** Acrylic acid, 2-(dimethylamino) ethyl ester; 2-Dimethylaminoethyl acrylate; 2-Propenoic acid, 2-(dimethylamino) ethyl ester

**Empirical:**  $C_7H_{13}NO_2$

**Formula:**  $CH_2=C(CH_3)COOCH_2CH_2N(CH_3)_2$

**Properties:** Colorless to sl. brn. liq.; sol. in water, alcohol, ethyl acetate, benzene; m.w. 143.19; dens. 0.943; f.p. -75 C; m.p. -55 C; b.p. 64 C (12 mm); flash pt. 58 C; ref. index 1.4380 (20 C)

**Toxicology:** LD50 (oral, rat) 455 mg/kg; LC50 (inh., rat, 4 h) 66 mg/m<sup>3</sup>; highly toxic; poison by inh.; mod. toxic by ing.; corrosive; severe skin and eye irritant; harmful if swallowed or inhaled; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NO<sub>x</sub>

**Uses:** Adhesion promoter in UV and EB cured coatings for metal, plastic, paper, and wood; catalyst; intermediate for water treatment chemicals, acrylamide copolymers, aminated polyacrylate resins, etc.; textile finishing, adhesives

**Manuf./Distrib.:** Aldrich; Atofina; CPS; Monomer-Polymer & Dajac Labs

**Trade Names:** Ageflex FA-1

**2-Dimethylaminoethyl acrylate.** See Dimethylaminoethyl acrylate

**Dimethylaminoethyl acrylate dimethyl sulfate**

CAS 13106-44-0

**Classification:** Quat. ammonium monomer

**Uses:** Antistatic finish for polyester fibers; flocculant and coagulant polymers for water treatment, mineral recovery, ion-exchange resins, adhesives, acid dye receptivity; retention aid for paper mfg.; food-contact paper/paperboard

**Manuf./Distrib.:** Aldrich

**Trade Names:** Ageflex FA-1Q80DMS

**Dimethylaminoethyl acrylate methyl chloride quat.**

CAS 44992-01-0

**Empirical:**  $C_8H_{16}ClNO_2$

**Formula:**  $[CH_2=CHCOOCH_2CH_2N(CH_3)_3]^+Cl^-$

**Properties:** M.w. 193.68

**Uses:** Antistatic finish for polyester fibers; flocculant and coagulant polymers for water treatment, mineral recovery, ion-exchange resins, adhesives, acid dye receptivity; retention aid for paper mfg.; food-contact paper/paperboard

**Trade Names:** Ageflex FA-1Q80MC

**$\beta$ -Dimethylaminoethyl alcohol.** See Dimethylethanolamine

**2-(Dimethylamino) ethyl ester methacrylic acid.** See Dimethylaminoethyl methacrylate

**Dimethylaminoethyl methacrylate**

CAS 2867-47-2; EINECS/ELINCS 220-688-8; UN No. 2522 (DOT)

**Synonyms:** DMAEMA; 2-(Dimethylamino) ethanol methacrylate; 2-(Dimethylamino) ethyl ester methacrylic acid; N,N-Dimethylaminoethyl methacrylate;  $\beta$ -Dimethylaminoethyl methacrylate; 2-(Dimethylamino) ethyl methacrylate; 2-(Dimethylamino) ethyl 2-methyl-2-propenoate

**Classification:** Amine monomer; aliphatic ester amine

**Empirical:**  $C_8H_{15}NO_2$

**Formula:**  $CH_2=C(CH_3)COOCH_2CH_2N(CH_3)_2$

**Properties:** Liq.; sol. in water and org. solvs.; m.w. 157.21; dens. 0.933 (25 C); b.p. 182-190 C; flash pt. (TOC) 73.9 C

**Toxicology:** LD50 (oral, rat) 1751 mg/kg, (IP, mouse) 25 mg/kg; LC50 (inh., rat, 4 h) 620 mg/m<sup>3</sup>; poison by IP route; mod. toxic by inh., ing.; harmful if swallowed; causes severe eye burns, skin and mucous membrane irritation; strong lachrymator; TSCA listed

**Precaution:** Combustible; flamm. exposed to sparks, heat, open flames, or oxidizers

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NO<sub>x</sub>

**Uses:** Visc. index improvers; visc. control agent; automotive and industrial coatings; dye additives; lube oil additives; detergent and sludge dispersant in lubricant oils; flocculant for wastewater treatment; retention aid for paper making; acrylic floor polish; resin and rubber modifier; acid scavenger in PU foams; corrosion inhibitor; binder for coatings; textile chems.; antistats; stabilizer for chlorinated polymers; ion-exchange resins; cationic precipitants; comonomer for thermoset acrylics; food pkg.

**Regulatory:** FDA 21CFR §178.3520

**Manuf./Distrib.:** Aldrich; Atofina; CPS; Ciba Spec. Chems./Water Treatment; Eastech; Fluka; Monomer-Polymer & Dajac Labs; Polysciences; Rhodia; Rohm Tech; San Esters; Sigma; Whyte Chems. Ltd

**Trade Names:** Ageflex FM-1

**2-(Dimethylamino) ethyl methacrylate.** See Dimethylaminoethyl methacrylate

**$\beta$ -Dimethylaminoethyl methacrylate.** See Dimethylaminoethyl methacrylate

**N,N-Dimethylaminoethyl methacrylate.** See Dimethylaminoethyl methacrylate

**Dimethylaminoethyl methacrylate dimethyl sulfate quat.**

CAS 6891-44-7

**Classification:** Quat. ammonium monomer

**Formula:**  $[CH_2=C(CH_3)COOCH_2CH_2N(CH_3)_3]^+CH_3OSO_3^-$

**Properties:** M.w. 283.35

**Uses:** Antistatic finish for polyester fibers; flocculant and coagulant polymers for water treatment, mineral recovery, ion-exchange resins, adhesives, acid dye receptivity; retention aid for paper mfg.; food-contact paper/

## Dimethylaminoethyl methacrylate methyl chloride quat.

paperboard  
*Manuf./Distrib.:* Aldrich  
*Trade Names:* Ageflex FM-1Q80DMS

## Dimethylaminoethyl methacrylate methyl chloride quat.

CAS 5039-78-1  
*Synonyms:* TMAEMC; 2-Methacryloxyethyltrimethyl ammonium chloride; Trimethylammoniummethyl methacrylate chloride; 2-Trimethylammoniumethyl methacrylate chloride; 2-Trimethylammoniummethyl methacrylic chloride  
*Classification:* Quat. ammonium monomer  
*Empirical:* C<sub>9</sub>H<sub>18</sub>ClNO<sub>2</sub>  
*Formula:* [CH<sub>2</sub>=C(CH<sub>3</sub>)COOCH<sub>2</sub>CH<sub>2</sub>N(CH<sub>3</sub>)<sub>3</sub>]<sup>+</sup>Cl<sup>-</sup>  
*Properties:* M.w. 207.70  
*Uses:* Antistatic finish for polyester fibers; flocculant and coagulant polymers for water treatment, mineral recovery, ion-exchange resins, adhesives, acid dye receptivity; retention aid for paper mfg.; food-contact paper/paperboard; adhesion promoter; prod. of cationic acrylamide copolymers  
*Manuf./Distrib.:* Aldrich  
*Trade Names:* Ageflex FM-1Q75MC

**2-(Dimethylamino) ethyl 2-methyl-2-propenoate.** See Dimethylaminoethyl methacrylate

**N-[3-(Dimethylamino) propyl] coco amides-N-oxide.** See Cocamidopropylamine oxide

**2,2'-Dimethyl-2,2'-azodipropionitrile.** See 2,2'-Azobisisobutyronitrile

**Dimethylbenzene.** See Xylene

**1,2-Dimethylbenzene.** See o-Xylene

**o-Dimethylbenzene.** See o-Xylene

**Dimethylbenzene sulfonic acid, sodium salt.** See Sodium xylenesulfonate

**α,α-Dimethylbenzyl hydroperoxide.** See Cumene hydroperoxide

**Dimethylbenzyl octadecyl ammonium chloride.** See Stearalkonium chloride

**6,6'-[(3,3'-Dimethyl [1,1'-biphenyl]-4,4'-diyl) bis (azo)] bis [4-amino-5-hydroxy-1,3-naphthalenedisulfonic acid] tetrasodium salt.** See Direct blue 53

**Dimethyl butanedioate.** See Dimethyl succinate

**Dimethyl carbamodithioic acid, zinc salt.** See Zinc dimethyl dithiocarbamate

**Dimethyl carbinol.** See Isopropyl alcohol

**Dimethylcocoamino betaine.** See Coco-betaine

**Dimethyl cocobenzyl ammonium chloride.** See Cocoalkonium chloride

**Dimethyl dialkyl ammonium chloride.** See Dialkyl dimethyl ammonium chloride

## Dimethyl diallyl ammonium chloride

CAS 7398-69-8; EINECS/ELINCS 230-993-8  
*Synonyms:* DAC; DADMAC; DIMDAC; Diallyl dimethyl ammonium chloride; 2-Propen-1-aminium, N,N-dimethyl-N-2-propenyl-, chloride  
*Classification:* Quat. ammonium monomer  
*Empirical:* C<sub>8</sub>H<sub>16</sub>ClN  
*Formula:* (CH<sub>3</sub>)<sub>2</sub>N(CH<sub>2</sub>CH=CH<sub>2</sub>)<sub>2</sub><sup>+</sup>Cl<sup>-</sup>  
*Properties:* M.w. 161.80  
*Toxicology:* LD50 (oral, rat) > 10 g/kg; TSCA listed  
*Precaution:* Nonhazardous (DOT); protect from oxidizers, strong alkali; mildly corrosive  
*Uses:* Antistatic finish for polyester fibers, flocculant and coagulant polymers for water treatment, min. recovery, ion exchange resins, adhesives, acid dye receptivity, retention aid for paper mfg.; demulsifier for petrol. recovery, elec. conductive paper and coatings, wet and dry str. resins, antistatic additives and coatings  
*Manuf./Distrib.:* Aldrich; CPS; Fluka; Monomer-Polymer & Dajac Labs

**Dimethyldicocoammonium chloride.** See Dicotrimonium chloride

**Dimethyl didecyl ammonium chloride.** See Didecyltrimonium chloride

**N,N-Dimethyldidecyl ammonium chloride.** See Didecyltrimonium chloride

**Dimethyl di (hydrogenated tallow) ammonium chloride.** See Quaternium-18

**Dimethyldioctadecyl ammonium chloride.** See Distearyltrimonium chloride

**1,4-Dimethyl-3,6-dioxo-1-heptanol.** See PPG-2 methyl ether

**Dimethyldithiocarbamate zinc salt.** See Zinc dimethyldithiocarbamate

**Dimethyldithiocarbamic acid sodium salt.** See Sodium dimethyldithiocarbamate

**N,N-Dimethyl-1-dodecanamine-N-oxide.** See Lauramine oxide

**Dimethyldodecylamine-N-oxide.** See Lauramine oxide

**N,N-Dimethyldodecylamine oxide.** See Lauramine oxide

**N,N-Dimethyldodecylamine-N-oxide.** See Lauramine oxide

**Dimethylenediamine.** See Ethylenediamine

**Dimethylene oxide.** See Ethylene oxide

**1,1-Dimethylethanol.** See t-Butyl alcohol

## Dimethylethanolamine

CAS 108-01-0; EINECS/ELINCS 203-542-8; UN No. 2051 (DOT)  
*Synonyms:* DMAE; DMEA; Deanol; 2-Dimethylaminoethanol; β-Dimethylaminoethanol; N,N-Dimethylaminoethanol; β-Dimethylaminoethyl alcohol; N,N-Dimethyl ethanolamine; N,N-Dimethyl-2-hydroxyethylamine; Ethanol, 2-(dimethylamino)-; β-Hydroxyethyl dimethylamine  
*Classification:* Amino alcohol; alkanolamine  
*Empirical:* C<sub>4</sub>H<sub>11</sub>NO  
*Formula:* (CH<sub>3</sub>)<sub>2</sub>NCH<sub>2</sub>CH<sub>2</sub>OH  
*Properties:* Colorless to pale yel. liq., amine odor; sol. in water, alcohol, ether; misc. with oxygenated and aromatic solvs.; m.w. 89.14; dens. 0.8866 (20/4 C); visc. 3.8 cps (20 C); f.p. -64 C; b.p. 133 C; flash pt. (TCC) 39 C; ref. index 1.430  
*Toxicology:* LD50 (oral, rat) 2 g/kg, (IP, rat) 1080 mg/kg, (subcut., mouse) 961 mg/kg, (skin, rabbit) 1370 mg/kg; mod. toxic by ing., inh., skin contact, IP, subcut. routes; skin and severe eye irritant; CNS stimulant; TSCA listed  
*Precaution:* Flamm.; corrosive; can form explosive mixts. with air ≥ 39 C; incompat. with oxidizing agents, strong acids, acid anhydrides, acid chlorides, nitrates, nitrous acid  
*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, NO<sub>x</sub>  
NFPA: Health 2; Flammability 2; Reactivity 0  
*Storage:* Hygroscopic; store in cool, dry, well-ventilated area away from heat and ignition sources  
*Uses:* Synthesis of dyestuffs, pharmaceuticals, textile and paper auxiliaries; catalyst for PU foam and slabstock; curing agent for epoxy, PU; polymer aggregation agent; emulsifier in paints and coatings; pH control agent; process solvent (offgas treatment); solubilizer for radiation-cured coatings, inks; corrosion inhibitor for ferrous metals, in boiler water and condensate steam systems; corrosion inhibitor/solubilizer in metalworking fluids; medicine (CNS stimulant; antidepressant drug)  
*Manuf./Distrib.:* Air Prods.; Aldrich; Allchem Ind.; Ashland; Atofina; BASF AG; BASF; Fluka; Great Western; Huntsman; Nippon Nyukazai; Pelron; Sigma; Union Carbide

**N,N-Dimethyl ethanolamine.** See Dimethylethanolamine

**1,1-Dimethylethylhydroperoxide.** See t-Butyl hydroperoxide

**(1,1-Dimethylethyl)-4-methoxyphenol.** See BHA

**Dimethyl formaldehyde.** See Acetone

## Dimethyl formamide

CAS 68-12-2; EINECS/ELINCS 200-679-5; UN No. NA 1693 (DOT), 2265 (DOT)  
*Synonyms:* DMF; DMFA; N,N-Dimethylformamide; N-Formyldimethylamine  
*Classification:* Amide  
*Empirical:* C<sub>3</sub>H<sub>7</sub>NO  
*Formula:* CHCON(CH<sub>3</sub>)<sub>2</sub>  
*Properties:* Water-wh. liq.; fishy unpleasant odor; a dipolar aprotic solv.; sol. in water; misc. with alcohol, ether, acetone, benzene, most org. solvs.; insol. in aliphatic hydrocarbons; m.w. 73.10; sp.gr. 0.953-0.954 (15.6/15.6 C); f.p. -61 C; b.p. 152.8 C; flash pt. 57.7 C; ref. index 1.423-1.431  
*Toxicology:* ACGIH TLV/TWA 10 ppm (skin); LD50 (oral, rat) 2800 mg/kg, (IP, rat) 1400 mg/kg, (IV, rat) 2000 mg/kg; mod. toxic by ing., IV, IP, subcut. routes; mildly toxic by skin contact, inh.; strong irritant to skin and tissue; severe eye irritant; inh. may cause abdominal pains, loss of appetite, nausea, vomiting, constipation, diarrhea, increased blood pressure, liver injury, irritation of mucous membranes of respiratory tract; suspected carcinogen; teratogen; human mutagenic data; TSCA listed  
*Precaution:* Combustible; moderate fire risk; incompat. with strong oxidizers, halogen gases, halogenated compds., 2,4,6-trichloro-1,3,5-triazine; vigorous reactions possible; polymerizes violently on contact with methylene bisphenyl diisocyanate  
*Hazardous Decomp. Prods.:* On decomp., emits toxic fumes of NO<sub>x</sub>  
NFPA: Health 1; Flammability 2; Reactivity 0  
*Storage:* Store in cool, dry, well-ventilated area, out of direct sunlight  
*Uses:* Solvent for liqs., gases, in vinyl resins, acetylene, butadiene, acid gases, paints, paint strippers, cleaners, zinc electroplating, acrylic fiber

spinning; mfg. of polyacrylic fibers, butadiene, pharmaceuticals, dyes, petroleum prods.; organic synthesis; carrier for gases; reagent; extraction solvent for aromatics; petroleum anti-icing additive; process solvent; catalyst in carboxylation reactions; in food-pkg. adhesives; adjuvant in silicides in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.300

*Manuf./Distrib.:* AMRESO; Aceto; Air Prods.; Aldrich; Allchem Ind.; Ashland; BASF; Baychem; Brown; Browning; Chemcentral; Coyne; DuPont; Fluka; Great Western; Haltermann Prods. UK; Harcross; Houghton Chem.; J.T. Baker; Kessler; Mallinckrodt Baker; Monomer-Polymer & Dajac Labs; Nissan Chem. Ind.; Romil Ltd; Ruger; Sigma; Spectrum Quality Prods.; UCB; Van Waters & Rogers; Whyte Chems. Ltd

**N,N-Dimethylformamide.** See Dimethyl formamide

**Dimethylformcarbothialdine.** See 3,5-Dimethyl tetrahydro-2-H,1,3,5-thiadiazono-2-thione

#### Dimethyl glutarate

CAS 1119-40-0; EINECS/ELINCS 214-277-2

*Synonyms:* Dimethyl pentanedioate; Pentanedioic acid, dimethyl ester

*Empirical:* C<sub>7</sub>H<sub>12</sub>O<sub>4</sub>

*Formula:* CH<sub>3</sub>OCO(CH<sub>2</sub>)<sub>3</sub>COOCH<sub>3</sub>

*Properties:* Colorless liq.; sol. in oxygenated solvs.; m.w. 160.17; dens. 1.087 (20/4 C); m.p. -42 C; b.p. 230 C; flash pt. 97 C; ref. index 1.424 (20 C)

*Uses:* Solvent for coatings, cleaners, inks, textile lubricants, urethane prod.; plasticizer for flexible thermoset polyester; polymer intermediate for polyester polyols for urethanes, wet-str. paper resins, polyester resins; anti-stat; specialty chemical intermediate

*Manuf./Distrib.:* Aldrich; Ashland; Fluka; Sigma

*Trade Names:* DBE-5

*Trade Names Containing:* DBE; DBE-2, -2SPG; DBE-3; DBE-9

#### 2,6-Dimethyl heptanol-4

CAS 108-82-7; EINECS/ELINCS 203-619-6

*Synonyms:* Diisobutyl carbinol; 2,6-Dimethyl-4-heptanol; 4-Heptanol, 2,6-dimethyl-; s-Nonyl alcohol

*Classification:* Nonaromatic alcohol

*Empirical:* C<sub>9</sub>H<sub>20</sub>O

*Formula:* [(CH<sub>3</sub>)<sub>2</sub>CHCH<sub>2</sub>]<sub>2</sub>CH<sub>2</sub>O

*Properties:* Colorless liq.; sol. in alcohol and ether; insol. in water; m.w. 144.29; sp.gr. 0.812; f.p. sets to glass at ≈ -65 C; b.p. 177.2-180 C; flash pt. 66 C; ref. index 1.423 (21 C)

*Toxicology:* LD50 (oral, rat) 3560 mg/kg, (IP, rat) 800 mg/kg, (skin, rabbit) 4600 mg/kg; primary irritant; mild skin/eye irritant; TSCA listed

*Precaution:* Combustible

*Uses:* Surfactants; lubricant additives; rubber chemicals; flotation agents; antifoam; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210

*Manuf./Distrib.:* Aldrich; Pfaltz & Bauer

**2,6-Dimethyl-4-heptanol.** See 2,6-Dimethyl heptanol-4

**2,6-Dimethyl-4-heptylphenol (o and p).** See Nonylphenol

**N,N-Dimethyl-N-hexadecylglycine.** See Cetyl betaine

**Dimethyl hexanedioate.** See Dimethyl adipate

**3,5-Dimethyl-1-hexyne-3-ol.** See Dimethyl hexynol

#### Dimethyl hexynol

CAS 107-54-0; EINECS/ELINCS 203-500-9; UN No. 1993 (DOT)

*Synonyms:* 3,5-Dimethyl-1-hexyne-3-ol; 3,5-Dimethyl-1-hexyn-3-ol

*Empirical:* C<sub>8</sub>H<sub>14</sub>O

*Formula:* HC≡CCO(CH<sub>3</sub>)CH<sub>2</sub>CH(CH<sub>3</sub>)<sub>2</sub>

*Properties:* Colorless liq., camphor-like odor; sl. sol. in water; m.w. 126.20; dens. 0.8545 (20/20 C); b.p. 150-151 C; flash pt. 56.6 C; nonionic

*Precaution:* Moderate fire risk

*Uses:* Stabilizer for chlorinated organic compds., surface active agents, intermediate, solvent lubricant; glass cleaner additive; surfactant, wetting agent used for paper coatings, inks, floor polishes, electroplating, glass cleaning; cleaner in silicon wafer industry; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105

*Manuf./Distrib.:* Aldrich

*Trade Names:* Surfynol® 61

**3,5-Dimethyl-1-hexyn-3-ol.** See Dimethyl hexynol

#### Dimethyl hydantoin-formaldehyde polymer

CAS 9065-13-8; 26811-08-5

*Synonyms:* DMHF; Dimethyl hydantoin formaldehyde resin; 5,5-Dimethyl-2,4-imidazolidinedione, polymer with formaldehyde; Formaldehyde, polymer with 5,5-dimethyl-2,4-imidazolidinedione; 2,4-Imidazolidinedione, dimethyl-, polymer with formaldehyde

*Definition:* Resin formed by heating MDM hydantoin

*Empirical:* C<sub>6</sub>H<sub>10</sub>N<sub>2</sub>O<sub>3</sub>

*Formula:* (CH<sub>3</sub>)<sub>2</sub>CN(CH<sub>2</sub>OH)CONHCO

*Properties:* Wh. crystalline solid, odorless; sol. in water, methanol, acetone, MEK, chloroform, methylene chloride, hot glycerol; insol. in hydrocarbons, benzene, xylene, CCl<sub>4</sub>; dens. 1.30; m.p. 110-117 C; soften. pt. 59-80 C

*Uses:* Antimicrobial; film-former; textile and paper finishing; sizing; adhesives; blending agent; aerosol hair sprays; preservative for cosmetics; source of formaldehyde; intermediate

*Manuf./Distrib.:* Lonza

**Dimethyl hydantoin formaldehyde resin.** See Dimethyl hydantoin-formaldehyde polymer

**1,1-Dimethyl-2-hydroxyethylamine.** See Aminomethyl propanol

**N,N-Dimethyl-2-hydroxyethylamine.** See Dimethylethanolamine

**5,5-Dimethyl-2,4-imidazolidinedione, polymer with formaldehyde.** See Dimethyl hydantoin-formaldehyde polymer

#### Dimethyl isophthalate

CAS 1459-93-4; EINECS/ELINCS 215-951-9

*Synonyms:* 1,3-Benzenedicarboxylic acid, dimethyl ester; Isophthalic acid, dimethyl ester

*Empirical:* C<sub>10</sub>H<sub>10</sub>O<sub>4</sub>

*Formula:* C<sub>6</sub>H<sub>4</sub>(COOCH<sub>3</sub>)<sub>2</sub>

*Properties:* Needles; sl. sol. in alcohol; m.w. 194.19; m.p. 66-67 C; b.p. 282 C; flash pt. (COC) 143 C

*Toxicology:* LDLo (IP, mouse) 971 mg/kg; mod. toxic by IP route; primary eye irritant; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

*Uses:* Plasticizer for PVC, PVB, PS, cellulose; chemical intermediate; comonomer for polyarylate resins; perfume fixative

*Manuf./Distrib.:* Aldrich; Fluka; Morflex; Unitex

*Trade Names:* Morflex® 1129

**Dimethylketal.** See Acetone

**Dimethylketone.** See Acetone

**Dimethyl lauramine oxide.** See Lauramine oxide

**Dimethyl laurylamine oxide.** See Lauramine oxide

**Dimethyl myristyl benzylammonium chloride.** See Myristalkonium chloride

**N,N-Dimethyl-N-octadecylbenzenemethanaminium chloride.** See Stearalkonium chloride

**Dimethyloctadecylbenzyl ammonium chloride.** See Stearalkonium chloride

**N,N-Dimethyl-N-octadecyl-1-octadecanaminium chloride.** See Distearyl-dimmonium chloride

#### Dimethylol urea

CAS 140-95-4; EINECS/ELINCS 205-444-0

*Synonyms:* DMU; N,N'-Bis(hydroxymethyl) urea; 1,3-Bishydroxymethyl urea; N,N'-Dihydroxymethylurea; 1,3-Dimethylolurea; Methurol; Oxymethurea

*Empirical:* C<sub>3</sub>H<sub>8</sub>N<sub>2</sub>O<sub>3</sub>

*Formula:* HOCH<sub>2</sub>NHCONHCH<sub>2</sub>OH

*Properties:* Cryst. powd.; sl. formaldehyde odor; very sol. in cold water, hot ethanol, methanol; insol. in ether; m.w. 120.11; m.p. 137-139 C

*Toxicology:* LD50 (oral, rat) 3400 mg/kg; mod. toxic by ing.; irritant to skin; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub>

*Uses:* Cotton shrink- and crease-proofing; photographic developers; textile/leather/paper finishes; permanent press fabrics; finishing, drying, sizing; in tanning; pesticide; first stage of urea formaldehyde resins; inc. hardness and fire resist. in plywood; antiseptic; biocide, disinfectant for hospital use; preservative in paints, chain lubricants, polymer and wax dispersions; fungicidal treatment for paper glues, pigment slurries

*Manuf./Distrib.:* Fluka; Sigma

*Trade Names:* Protectol® DMU

## 1,3-Dimethylolurea. See Dimethylol urea

**Dimethyl oxazolidine**

CAS 51200-87-4; EINECS/ELINCS 257-048-2

*Synonyms:* 4,4-Dimethyloxazolidine; Oxazolidine A*Classification:* Heterocyclic compd.*Empirical:* C<sub>5</sub>H<sub>11</sub>NO*Properties:* Sol. in water and oil; m.w. 101.17; dens. 0.942; flash pt. 48 C; ref. index 1.4320*Toxicology:* LD50 (oral, rat) 950 mg/kg, (dermal, rabbit) 1400 mg/kg; irritant; mod. toxic by ing. and skin contact; mildly toxic by inh.; mutagenic data; TSCA listed*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub>*Uses:* Preservative, biocide, antimicrobial for cosmetics, pharmaceutical topicals, paints and coatings, metalworking fluids, oil field chems., recirculating water systems; emulsifier, corrosion inhibitor, alkaline pH stabilizer for metalworking fluids and aq. systems*Use Level:* 0.05-0.5%*Regulatory:* USA not restricted; Europe listed*Manuf./Distrib.:* Aldrich*Trade Names:* Nuosept® 166

## 4,4-Dimethyloxazolidine. See Dimethyl oxazolidine

**Dimethyl pentanedioate.** See Dimethyl glutarate

## 4-((2,4-Dimethylphenyl) azo)-3-hydroxy-2,7-naphthalenedisulfonic acid, disodium salt. See Acid red 26

**Dimethylpolysiloxane.** See Dimethicone; Polydimethylsiloxane**Dimethylpolysiloxane hydrolyzate.** See Dimethyl siloxane

## 2,2'-((2,2-Dimethyl-1,3-propanediyl) bis (oxymethylene)) bisoxirane. See Neopentyl glycol diglycidyl ether

**N,N-Dimethyl-N-2-propenyl-2-propen-1-aminium chloride, homopolymer.** See Polyquaternium-6**N,N-Dimethyl-N-2-propenyl-2-propen-1-aminium chloride, polymer with 2-propenamides.** See Polyquaternium-7**Dimethyl silicone.** See Dimethicone**Dimethyl siloxane**

CAS 63148-62-9

*Synonyms:* Dimethylpolysiloxane hydrolyzate;  $\alpha$ -Methyl- $\omega$ -methoxypolydimethylsiloxane; Polydimethylsiloxane, methyl end-blocked; Poly (oxy (dimethylsilylene)); Polyoxy (dimethylsilylene),  $\alpha$ -(trimethylsilyl)- $\omega$ -hydroxy; Silicone oil; Silicone oils; Siloxanes and silicones, dimethyl-; Siloxane, dimethyl-;  $\alpha$ -(Trimethylsilyl) poly (oxy (dimethylsilylene))- $\omega$ -methyl;  $\alpha$ -(Trimethylsilyl)- $\omega$ -(trimethylsilyl) oxy*Classification:* Silane*Properties:* Dens. 0.963; b.p. > 140 C (0.002 mm); ref. index 1.4040*Toxicology:* TDLo (subcut., mouse) 120 g/kg; questionable carcinogen; experimental tumorigen; mutagen; TSCA listed*Uses:* Antifoam; release agent in mfg. of medical devices and appliances, food-pkg. materials*Manuf./Distrib.:* Aldrich*Trade Names:* Antifoam FD-62; Antifoam FD-82; Formasil® 45**Dimethylsiloxane/glycol copolymer.** See Dimethicone copolyol**Dimethyl stearyl benzyl ammonium chloride.** See Stearalkonium chloride**Dimethyl succinate**

CAS 106-65-0; EINECS/ELINCS 203-419-9; FEMA 2396

*Synonyms:* Butanedioic acid, dimethyl ester; Dimethyl butanedioate; Methyl succinate; Succinic acid, dimethyl ester*Empirical:* C<sub>8</sub>H<sub>10</sub>O<sub>4</sub>*Formula:* CH<sub>3</sub>OCOCH<sub>2</sub>CH<sub>2</sub>COOCH<sub>3</sub>*Properties:* Colorless liq., ethereal winey odor; sol. 8 g/l in water; m.w. 146.14; dens. 1.119 (20/4 C); m.p. 16-19 C; b.p. 190-193 C; flash pt. 90 C; ref. index 1.419*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. toxic by ing. and skin contact; TSCA listed*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating vapors*Uses:* Light and heat stabilizer for polyolefins, ABS polymer systems, flexible PVC, food pkg.; emollient; syn. flavoring agent for foods and pharmaceuticals; solvent for coatings, cleaners, inks, textile lubricants, urethane prod.; plasticizer for flexible thermoset polyester; polymer intermediate for polyester polyols for urethanes, wet-str. paper resins, polyester resins;

specialty chemical intermediate

*Use Level:* 1.0-100 ppm (nonalcoholic beverages), 5.0 ppm (ice cream, ices, chewing gum), 15 ppm (candy, baked goods)*Regulatory:* FDA 21CFR §172.515; FEMA GRAS*Manuf./Distrib.:* Aldrich; Ashland; DSM Chem. N. Am.; DSM Chemie Linz GmbH; DuPont; Fluka; Penta Mfg.; Schweizerhall; Sigma*Trade Names:* DBE-4*Trade Names Containing:* DBE; DBE-2, -2SPG; DBE-3; DBE-9**N,N-Dimethyl-N-tetradecylbenzenemethanaminium chloride.** See Myristalkonium chloride**3,5-Dimethyltetrahydro-1,3,5,2H-thiadiazine-2-thione.** See 3,5-Dimethyl tetrahydro-2-H,1,3,5-thiadiazine-2-thione**3,5-Dimethyl-1,3,5,2H-tetrahydrothiadiazine-2-thione.** See 3,5-Dimethyl tetrahydro-2-H,1,3,5-thiadiazine-2-thione**3,5-Dimethyl tetrahydro-2-H,1,3,5-thiadiazine-2-thione**

CAS 533-74-4; EINECS/ELINCS 208-576-7

*Synonyms:* DMTT; Carbothaldine; Dazomet; Dimethylformocarbothaldine; 3,5-Dimethyltetrahydro-1,3,5,2H-thiadiazine-2-thione; 3,5-Dimethyl-1,3,5,2H-tetrahydrothiadiazine-2-thione; Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione; Tetrahydro-3,5-dimethyl-1,3,5-thiadiazine-2-thione; 2H-1,3,5-Thiadiazine-2-thione, tetrahydro-3,5-dimethyl-; 2-Thio-3,5-dimethyltetrahydro-1,3,5-thiadiazine*Classification:* Organosulfur compd.*Empirical:* C<sub>5</sub>H<sub>10</sub>N<sub>2</sub>S<sub>2</sub>*Properties:* Wh. to gray cryst. solid, weakly pungent odor; sl. sol. in water, alcohol; sol. in acetone; m.w. 162.29; m.p. 100 C*Toxicology:* LD50 (oral, rat) 363 mg/kg, (skin, rat) 2260 mg/kg, (IP, rat) 87 mg/kg; TLV 10 mg/m<sup>3</sup>; toxic by ingestion, inhalation, IP routes; skin and severe eye irritant; TSCA listed*Environmental:* LC50 (trout) 0.16 mg/l; LD50 (bobwhite quail) 415 mg/kg; nontoxic to bees; dec. in moist soil to yield fumigant gas*Hazardous Decomp. Prods.:* Heated to decomp., emits very toxic fumes of NO<sub>x</sub> and SO<sub>x</sub>*Uses:* Fungicide, bactericide, slimicide, microbicide for paint, adhesives, agric., latex, mineral slurries, inks, metalworking fluids, leather, glue casein, starch, paper, water treatment, soil treatment, other industries; soil fumigant; preservative in pigment slurries, food-pkg. adhesives and food-contact paper/paperboard; slimicide in food-contact paper/paperboard; preservative in food-contact animal glues*Regulatory:* FDA 21CFR §175.105, 176.230, 176.300, 178.3120; SARA reportable*Manuf./Distrib.:* Aldrich; BASF*Trade Names:* Amerstat® 233; Busan® 1058; Busan® 1059; Busan® 1059-W; Metasol® RB-20; Nuosept® 120; Nuosept® S; Protectol® TOE; Protectol® TOE Granules; Troysan® 142**Dimeticone.** See Dimethicone**DINA.** See Diisononyl adipate**Dinonyl adipate.** See Diisononyl adipate**Dinonylphenol ethoxylate.** See Nonyl nonoxynol**DINP.** See Diisononyl phthalate**Diocetadecyl dimethyl ammonium chloride.** See Distearaldimonium chloride**O,O'-Diocetadecylpentaerythritol bis (phosphite).** See Distearyl pentaerythrityl diphosphite**Diocetyl ammonium sulfosuccinate***Synonyms:* Ammonium di (2-ethylhexyl) sulfosuccinate*Properties:* Anionic*Uses:* Wetting agent, emulsifier, demulsifier, stabilizer in water treatment and petrol. processing*Manuf./Distrib.:* Venchem*Trade Names:* Octowet 70A**Diocetyl fumarate homopolymer***Uses:* In paper/paperboard in contact with dry food*Regulatory:* FDA 21CFR §176.180**Diocetyl maleate**

CAS 2915-53-9

*Synonyms:* DOM; Bis (1-octyl) maleate; 2-Butenedioic acid, (Z)-, dioctyl ester; Di-N-octyl maleate*Empirical:* C<sub>20</sub>H<sub>36</sub>O<sub>4</sub>

**Properties:** M.w. 340.56

**Toxicology:** LD50 (oral, rat) 14,200 mg/kg, (skin, rabbit) 14 g/kg; mildly toxic by ing.; TSCA listed

**Precaution:** Combustible

**Hazardous Decom. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Intermediate; emollient, fragrance coupler, solubilizer for benzophenone-3, antitackifier in antiperspirants, conditioner for hair prods.; in copolymerization of PVC and vinyl acetates; modifier, plasticizer for vinyl resins; also in latex paints; surface-active agent; cleanser and wax solvent

**Manuf./Distrib.:** Allchem Ind.; Aristech; BASF; Celanese; DSM Chemie Linz GmbH; Finetex; Monomer-Polymer & Dajac Labs; NOF; Unitek; Velsicol; Whyte Chems. Ltd

**Trade Names:** Octomer DOM

**Di-N-octyl maleate.** *See* Dioctyl maleate

### Dioctyl maleate homopolymer

**Uses:** In paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §176.180

**Dioctyl phthalate.** *See* s-Dioctyl phthalate

### s-Dioctyl phthalate

CAS 117-81-7

**Synonyms:** BEHP; DEHP; 1,2-Benzenedicarboxylic acid, bis (2-ethylhexyl) ester; Bis (2-ethylhexyl)-1,2-benzenedicarboxylate; Bis (2-ethylhexyl) phthalate; Di (2-ethylhexyl) orthophthalate; Di (2-ethylhexyl) phthalate; Dioctyl phthalate; Di-s-octyl phthalate; Ethylhexyl phthalate; 2-Ethylhexyl phthalate; Phthalic acid, bis (2-ethylhexyl) ester; Phthalic acid, dioctyl ester

**Definition:** Diester of 2-ethylhexyl alcohol and phthalic acid

**Empirical:** C<sub>24</sub>H<sub>38</sub>O<sub>4</sub>

**Formula:** C<sub>8</sub>H<sub>17</sub>[COOCH<sub>2</sub>CH(C<sub>2</sub>H<sub>5</sub>)C<sub>4</sub>H<sub>9</sub>]<sub>2</sub>

**Properties:** Lt. colored liq.; odorless; misc. with min. oil; insol. in water; m.w. 390.56; dens. 0.985 (20/4 C); vapor pressure 1.32 mm Hg (20 C); pour pt. -46 C; b.p. 231 C (5 mm); flash pt. 199 C; ref. index 1.486 (20 C)

**Toxicology:** ACGIH TLV/TWA 5 mg/m<sup>3</sup>; STEL 10 mg/m<sup>3</sup>; LD50 (oral, rat) 30 g/kg, (IP, rat) 30,700 mg/kg, (IV, rat) 250 mg/kg, (skin, rabbit) 25 g/kg; poison by IV route; GI effects on ing.; primary irritant; may cause irritation of eyes and mucous membranes on overexposure; experimental teratogen; tumorigen, mutagen, reproductive effector; confirmed carcinogen; TSCA listed

**Precaution:** Combustible

**Hazardous Decom. Prods.:** Heated to decomp., emits acrid smoke

**NFPA:** Health 0; Flammability 1; Reactivity 0

**Uses:** Plasticizer for resins, elastomers, flexible vinyl prods., adhesives, PVA emulsion paints, lacquers, food-contact coatings; replacement for PCBs in dielec. fluids for electrical capacitors; nonreactive epoxy resin diluent; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; flow promoter in acrylic food pkg.; in cellophane for food pkg.; surf. lubricant in mfg. of food-contact metallic articles

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.380, 175.390, 176.170, 176.210, 177.1010, 177.1200, 177.1210, 177.1400, 177.2600, 178.3120, 178.3910, 181.22, 181.27; FDA approved for ophthalmics, injectables

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Ashland; Chisso Am.; Eastman; Fluka; Spectrum Quality Prods.

**Di-s-octyl phthalate.** *See* s-Dioctyl phthalate

### Dioctyl sodium sulfosuccinate

CAS 577-11-7; 1369-66-3; EINECS/ELINCS 209-406-4

**Synonyms:** DSS; NaDOSS; Bis (2-ethylhexyl) sodium sulfosuccinate; 1,4-Bis (2-ethylhexyl) sulfolbutanedioic acid sodium salt; Dioctyl sulfosodiumsuccinate; Dioctyl sulfosuccinate sodium salt; Docusate sodium; 2-Ethylhexyl sulfosuccinate sodium; Sodium bis (2-ethylhexyl) sulfosuccinate; Sodium 1,4-bis(2-ethylhexyl) sulfosuccinate; Sodium di(2-ethylhexyl) sulfosuccinate; Sodium dioctyl sulfosuccinate; Sulfolbutanedioic acid 1,4-bis(2-ethylhexyl) ester sodium salt; Sulfosuccinic acid 1,4-bis(2-ethylhexyl) ester sodium salt

**Definition:** Sodium salt of the diester of 2-ethylhexyl alcohol and sulfosuccinic acid

**Empirical:** C<sub>20</sub>H<sub>37</sub>NaO<sub>5</sub>S

**Formula:** C<sub>8</sub>H<sub>17</sub>OOCCH<sub>2</sub>CH(SO<sub>3</sub>Na)COOC<sub>8</sub>H<sub>17</sub>

**Properties:** Wh. wax-like solid, char. octyl alcohol odor; slowly sol. in water; freely sol. in alcohol, glycerol, CCl<sub>4</sub>, acetone, xylene, hexane; m.w. 445.63; m.p. 173-179 C; anionic

**Toxicology:** LD50 (oral, rat) 1900 mg/kg, (IP, rat) 590 mg/kg, (IV, mouse) 60 mg/kg; mod. toxic by ing., IP routes; poison by IV route; skin, severe eye irritant; TSCA listed

**Hazardous Decom. Prods.:** Heated to decomp., emits toxic fumes of SO<sub>2</sub> and Na<sub>2</sub>O

**HMS:** Health 2; Flammability 1; Reactivity 0

**Storage:** Hygroscopic

**Uses:** Food additive; emulsifier, processing aid in sugar industry; stabilizer for hydrophilic colloids; wetting agent, dispersant, emulsifier in cosmetic, pharmaceutical, food, emulsion polymerization, and industrial applics.; adjuvant in tableting; emulsifier wax for polish, firefighting, germicide, metal cleaner, mold release agent; dispersant in paints, inks, paper, photography; solubilizer (foods); processing aid; rust preventative; soldering flux; wallpaper removal; water treatment; surfactant in food-contact coatings; in food-pkg. adhesives; in resinous/polymeric food-contact coatings; in paper/paperboard in contact with aq./fatty foods; defoamer in food-contact paper/paperboard; emulsifier in food pkg.

**Use Level:** Limitation 9 ppm (finished food), 75 ppm (cocoa beverage), 15 ppm (gelatin dessert), 10 ppm (beverage/fruit drinks), 25 ppm (molasses), 0.5% (gums)

**Regulatory:** FDA 21CFR §73.1, with cocoa, 131.130, 131.132, 133.124, 133.133, 133.134, 133.162, 133.178, 133.179, 163.114, 163.117, 169.115, 169.150, 172.520, 172.808, 172.810, 175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.1010, 178.3400; USDA 9 CFR §318.7, 381.147; FDA approved for injectables (IM), orals, topicals; USP/NF, BP compliance

**Manuf./Distrib.:** Alco; Aldrich; Ashland; Atlas Refinery; Brotherton Ltd; Burlington Chem.; Chemax; Cognis/Chems. Group; Cytec Ind.; DeForest Enterprises; EM Ind.; Eastern Color & Chem.; Finetex; Fluka; Hart Prods.; Independent Chem.; Lambert Tech.; McIntyre; Norman, Fox; Rhodia HPCII; Ruger; Scher; Sigma; Spectrum Quality Prods.; Thornley; Uniqema; Universal Preserv-A-Chem; Venchem

**Trade Names:** Aerosol® OT-75%; Aerosol® OT-100%; Aerosol® OT-S; Drewfax® 0007; Geroxon® DOS; Geroxon® SDS; Octowet 40; Octowet 55; Octowet 60; Octowet 60-I; Octowet 65; Octowet 70; Octowet 70BC; Octowet 70PG; Octowet 75; Octowet 75E; Pentex® 99; Rapisol B-30, B-80, B-90, C-70; Rewopol® SBDO 70; Serwet® WH 170; Surfonic® DOS-70MS

**Trade Names Containing:** Aerosol® OT-70 PG; Aerosol® OT-75-PG; Aerosol® OT-B; Ancowet S-60; Ancowet S-70PG; DeWET SDO-70PG; DeWET SDO-75E; Disponil® SUS IC 865; Disponil® SUS IC 875; Geroxon® 99; Geroxon® SS-O-70PG; Geroxon® WT-27; Monawet MO-70; Monawet MO-70E; Monawet MO-70R; Monawet MO-70S; Monawet MO-75E; Monawet MO-84R2W; Monawet MO-85P; Octowet 70D; Pentasol DO-70PG; SER-AD® FA 620

### Dipentaerythrityl pentaacrylate

**Uses:** Highly reactive monomer exhibiting exc. chem. and abrasion resist.; curing agent; for pigmented systems to improve cure and wetting characteristics

**Manuf./Distrib.:** Monomer-Polymer & Dajac Labs

**Trade Names:** SR 399

**o-Diphenol.** *See* Pyrocatechol

### Diphenylamine

CAS 122-39-4; EINECS/ELINCS 204-539-4

**Synonyms:** DPA; Anilinobenzene; CI 10355; N,N-Diphenylamine; N-

## N,N-Diphenylamine

Phenylaniline; N-Phenylbenzeneamine

*Classification:* Aromatic sec. amine

*Empirical:* C<sub>12</sub>H<sub>11</sub>N

*Formula:* C<sub>6</sub>H<sub>5</sub>NHC<sub>6</sub>H<sub>5</sub>

*Properties:* Very pale tan-amber to brn. cryst. solid; discolors in light; floral odor; very sol. in ethanol, propanol, CCl<sub>4</sub>; sol. in benzene, ether, glacial acetic acid, CS<sub>2</sub>, oxygenated and aromatic solvs.; pract. insol. in water; m.w. 169.24; dens. 1.159 (20°C); vapor pressure 1 mm Hg (108.3°C); m.p. 52.9°C; b.p. 302°C; flash pt. (CC) 153°C

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup>; OSHA PEL-TWA 10 mg/m<sup>3</sup>; LD50 (oral, rat) 2000 mg/kg; toxic by ing.; may be fatal if inhaled, absorbed thru skin, or swallowed; experimental teratogen; TSCA listed

*Precaution:* Combustible exposed to heat or flame; may form explosive dust-air mixts.; can react violently with hexachloromelamine, trichloromelamine; incompat. with strong oxidizers, strong acids; avoid light, high dust concs., static discharge

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, NO<sub>x</sub>; heated to decomp., emits highly toxic fumes of NO<sub>x</sub>

NFPA: Health 3; Flammability 1; Reactivity 0

*Storage:* Light-sensitive; store in cool, dry, well-ventilated area out of direct sunlight, away from heat and ignition sources, in tightly closed, labeled containers

*Uses:* Insecticide; antioxidant, stabilizer for plastics and solid rocket propellants; antioxidant for lubricants; rubber antioxidant and accelerator; mfg. of pharmaceuticals, pesticides, explosives, and dyes; veterinary medicine; storage preservation of apples; stabilizer for nitrocellulose; analytical chemistry; antioxidant for fatty-based coating adjuvants in paper/paperboard in contact with aq./fatty/dry foods

*Regulatory:* FDA 21CFR §176.170, 176.180

*Manuf./Distrib.:* Aceto; Aristech; Bencorp Int'l.; GFS; Kessler; Mitsui & Co. USA; Rambach; Spectrum Quality Prods.; Uniroyal; Wall Chem.

**N,N-Diphenylamine.** See Diphenylamine

**N,N-Diphenyl-1,4-benzenediamine.** See N,N'-Diphenyl-p-phenylenediamine

**Diphenyl blue 2B.** See Direct blue 6

**Diphenyl brown.** See Direct brown 2

**Diphenyl t-butylphenyl phosphate.** See t-Butylphenyl diphenyl phosphate

**Diphenyl dark green.** See Direct green 1

### Diphenyldimethoxysilane

CAS 6843-66-9

*Empirical:* C<sub>14</sub>H<sub>16</sub>O<sub>2</sub>Si

*Formula:* (C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>Si(OCH<sub>3</sub>)<sub>2</sub>

*Properties:* Liq.; sol. in acetone, benzene, methanol; m.w. 244.4; dens. 1.080 (25°C); b.p. 191 (53 mm); flash pt. 120°C; ref. index 1.5404

*Toxicology:* TSCA listed

*Precaution:* Combustible

HMS: Health 3; Flammability 1; Reactivity 1

*Uses:* Treatment of powders, glass, paper, and fabrics; coupling agent, chem. intermediate, blocking agent, release agent, lubricant, primer, reducing agent; treatment of powders, glass, paper, and fabrics

*Manuf./Distrib.:* Fluka; Gelest

**4,4'-Diphenylenediamine.** See Benzidine

**1,2-Diphenylethane-1,2-dione, dimethyl ketal.** See 2,2-Dimethoxy-2-phenylacetophenone

### Diphenylguanidine

CAS 102-06-7; EINECS/ELINCS 203-002-1

*Synonyms:* DPG; N,N'-Diphenylguanidine; 1,3-Diphenylguanidine; sym-Diphenylguanidine; Melaniline

*Empirical:* C<sub>13</sub>H<sub>13</sub>N<sub>3</sub>

*Formula:* HN:C(NHC<sub>6</sub>H<sub>5</sub>)<sub>2</sub>

*Properties:* Wh. powd., bitter taste, sl. odor; sol. in ethanol, CCl<sub>4</sub>, chloroform, hot benzene, hot toluene, oxygenated and chlorinated solvs.; very sl. sol. in water; m.w. 211.29; dens. 1.13; m.p. 147°C; dec. > 170°C

*Toxicology:* LD50 (oral, rat) 375 mg/kg, (IP, rat) 75 mg/kg; toxic; poison by ing., IP and other routes; eye irritant; possible sensitizer; experimental teratogen and reproductive effects; tumorigen; mutagenic data; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub>

*Uses:* Basic rubber accelerator; accelerator for food-contact rubber articles for repeated use; primary standard for acids

*Regulatory:* FDA 21CFR §177.2600

*Manuf./Distrib.:* Akzo Nobel; Aldrich; Chemapol Usa; Cytec Ind.; Fabriche; Fluka; GP Chems.; Howard Hall; K3; Monsanto

*Trade Names:* DPG; Perkacit® DPG

**1,3-Diphenylguanidine.** See Diphenylguanidine

**N,N'-Diphenylguanidine.** See Diphenylguanidine

**sym-Diphenylguanidine.** See Diphenylguanidine

**Diphenyl ketone.** See Benzophenone

**Diphenyl methanone.** See Benzophenone

**o-Diphenylol.** See o-Phenylphenol

### N,N'-Diphenyl-p-phenylenediamine

CAS 74-31-7; EINECS/ELINCS 200-806-4

*Synonyms:* DPPD; 1,4-Bis(phenylamino)benzene; N,N-Diphenyl-1,4-benzenediamine; 1,4-Dianilinobenzene

*Classification:* Aromatic organic compd.; alkylated p-phenylenediamine

*Empirical:* C<sub>18</sub>H<sub>16</sub>N<sub>2</sub>

*Formula:* (C<sub>6</sub>H<sub>5</sub>NH)<sub>2</sub>C<sub>6</sub>H<sub>4</sub>

*Properties:* Gray powd.; insol. in water; sol. in acetone, benzene, monochlorobenzene, isopropyl acetate, DMF, ether, chloroform, ethyl acetate, glacial acetic acid; m.w. 260.36; dens. 1.28; m.p. 145-152°C; b.p. 220-225°C (0.5 mm)

*Toxicology:* LD50 (oral, rat) 2370 mg/kg, (IP, mouse) 300 mg/kg; poison by intravenous, intraperitoneal routes; moderately toxic by ingestion; eye irritant; weak allergen; suspected carcinogen; TSCA listed

*Precaution:* Combustible; incompat. with oxidizing materials; emits toxic fumes of NO<sub>x</sub>

*Uses:* Flex-resistant antioxidant/antiozonant in rubbers, polyolefins; antioxidant/antiozonant in lubricants; stabilizer; polymerization inhibitor; retards copper degradation; intermediate for dyes, drugs, plastics, detergents; in food-pkg. adhesives; polymerization inhibitor in sodium 2-sulfoethyl methacrylate for food pkg.; antioxidant/antiozonant in food-contact rubber articles for repeated use; in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.320, 176.170, 177.2600

*Manuf./Distrib.:* Aldrich; Fluka; R. T. Vanderbilt; Skymart Enterprises; Sumitomo Chem.; Uniroyal

**4-Diphenylphenyl ketone.** See p-Phenylbenzophenone

**Di-2-propenyl ester, 1,2-benzenedicarboxylic acid.** See Diallyl phthalate

**Dipropyl-2,2'-dihydroxyamine.** See Diisopropanolamine

**Dipropylene carbonate.** See Propylene carbonate

### Dipropylene glycol

CAS 110-98-5; EINECS/ELINCS 203-821-4

*Synonyms:* DPG; Bis (hydroxypropyl) ether; Bis (2-hydroxypropyl) ether; 2,2'-Dihydroxydipropyl ether; 2,2'-Dihydroxyisopropyl ether; Diisopropylene glycol; Di-1,2-propylene glycol; Methyl-2(methyl-2)oxybispropanol; 1,1'-Oxybis-2-propanol; 1,1'-Oxydi-2-propanol; 1,1'-Oxydiopropan-2-ol; 2-Propanol, 1,1'-oxydi-

*Classification:* Nonaromatic ether; glycol

*Empirical:* C<sub>6</sub>H<sub>14</sub>O<sub>3</sub>

*Formula:* CH<sub>3</sub>CHOHCH<sub>2</sub>OCH<sub>2</sub>CHOHCH<sub>3</sub>

*Properties:* Colorless sl. visc. liq., nearly odorless; very sol. in diethyl ether; sol. in ethanol, toluene, water; misc. with oxygenated solvs.; m.w. 134.18; dens. 1.023; vapor pressure 1 mm (73.8°C); b.p. 233°C; flash pt. (OC) 124°C; ref. index 1.4410

*Toxicology:* LD50 (oral, rat) 14,850 mg/kg, (IP, mouse) 10 g/kg, (IV, rat) 5800

mg/kg, (skin, rabbit) > 20 ml/kg; mildly toxic by ing.; primary skin and eye irritant; may cause somnolence, tremors, kidney/ureter/bladder changes; mutagenic data; TSCA listed

**Precaution:** Combustible when exposed to heat and flame; can react vigorously with oxidizing materials

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1; Flammability 1; Reactivity 0

**Storage:** Hygroscopic

**Uses:** Solvent in hydraulic brake fluids, cutting oils, textile lubricants, printing inks; aromatics extraction solvent; comonomer in unsat. polyester and alkyd resins; reinforced plastics; plasticizers; in paints; cosmetics; in food-pkg. adhesives; fragrance fixative/diluent; petroleum anti-icing additive; PU chain extender; surfactant for unsat. polyester resins, paints; in paper/paperboard in contact with aq./fatty foods; defoamer in food-contact coatings; in surf. lubricants for mfg. of food-contact metallic articles

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.200, 178.3910

**Manuf./Distrib.:** ABCR; Acros Org.; Aldrich; Alfa Aesar; Allchem Ind.; Arch Chems./Perf. Urethanes; Ashland; Bayer; Berje; Brown; C.P. Hall; Chemcentral; Coyne; Dow; Eastman; Fluka; G.J. Chem.; Great Western; Houghton Chem.; Huntsman; Lyondell; PMC Spec.; Penta Mfg.; Pharmco Prods.; Ruger; Samson; Sunnyside; TCI Am.; Union Carbide; Van Waters & Rogers; Whyte Chems. Ltd

**Trade Names Containing:** Proxel® DL; Proxel® GXL; Surfynol® DF-110D

**Di-1,2-propylene glycol.** See Dipropylene glycol

### Dipropylene glycol dibenzoate

CAS 94-51-9; 27138-31-4; EINECS/ELINCS 202-340-7; 248-258-5

**Synonyms:** Benzoic acid diester with dipropylene glycol; Benzoic acid-n-dipropylene glycol diester; Dibenzoyl dipropylene glycol ester; Dipropanediol dibenzoate; 3,3'-Oxydi-1-propanol dibenzoate; 3,3'-Oxydi-1-propanol dibenzoate; Oxydipropyl dibenzoate; POP (2) dibenzoate; PPG-2 dibenzoate; PPG (2) dibenzoate

**Definition:** Polyoxypropylene glycol diester of benzoic acid

**Empirical:** C<sub>20</sub>H<sub>22</sub>O<sub>5</sub>

**Properties:** Lt.-colored liq.; mild ester odor; sol. in aliphatic and aromatic solvs.; insol. in water; m.w. 342.42; dens. 1.1271 (20/20 C); pour pt. -19 C; m.p. 200 C; b.p. 250 C (10 mm)

**Toxicology:** LD50 (oral, rat) 9800 mg/kg; mildly toxic by ingestion

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Plasticizer for cellulose, PVC, plastisols, PS, PVB, PVAc adhesives, VCA, castable PU; latex and lacquer coating applics.; enhances film formation and surf. wetting in PVAc homopolymer emulsion adhesives; emollient; plasticizer for PVAc coatings for food-contact paper/paperboard; plasticizer for polymers in paper/paperboard in contact with dry food; in food-pkg. adhesives

**Regulatory:** FDA 21CFR §175.105, 176.170

**Manuf./Distrib.:** Aldrich; Allchem Ind.; Ashland; Haltermann GmbH; Kalama; Unitex; Velsicol

**Trade Names:** Benzoflex® 9-88

**Trade Names Containing:** Benzoflex® 50

**Dipropylene glycol methyl ether.** See PPG-2 methyl ether

**Dipropylene glycol monomethyl ether.** See PPG-2 methyl ether

**Dipropylene glycol monooleate.** See PPG-2 oleate

**Dipropylene glycol monostearate.** See PPG-2 stearate

**Dipropyl methane.** See Heptane

### Direct black 38

CAS 1937-37-7; EINECS/ELINCS 217-710-3

**Synonyms:** 4-Amino-3-((4'-((2,4-diaminophenyl) azo) (1,1'-biphenyl)-4-yl) azo)-5-hydroxy-6-(phenylazo)-2,7-naphthalenedisulfonic acid, disodium salt; Brilliant chrome leather black H; Chloramine black C; Chloramine carbon black S; Chlorazol black E; Chlorazole black E; Chrome leather black E; CI 30235; CI direct black 38; CI direct black 38, disodium salt; Columbia black EP; Diamine deep black EC; Diazine black E; Direct black A; Meta black; 2,7-Naphthalenedisulfonic acid, 4-amino-3-((4'-((2,4-diaminophenyl) azo) (1,1'-biphenyl)-4-yl) azo)-5-hydroxy-6-(phenylazo)-, disodium salt; Paper black T

**Empirical:** C<sub>34</sub>H<sub>28</sub>N<sub>6</sub>O<sub>7</sub>S<sub>2</sub> • 2Na

**Properties:** Gray-blk. to blk. microcryst. powd.; mod. sol. in Cellosolve, ethylene glycol monoethyl ether; sol. 1-5 mg/ml in water, DMSO; sol. < 1 mg/ml in 95% ethanol, methanol, acetone, toluene; insol. in other org. solvs.; m.w. 781.78; m.p. dec.; b.p. dec.

**Toxicology:** LD50 (oral, rat) 7600 mg/kg; may be absorbed thru skin; irritating to eyes; may cause skin irritation; may be harmful by inh., ing., or skin absorp.; may cause urine changes, bladder tumors, wt. loss, etc.; experimental tumorigen, carcinogen; mutagenic data; target organ: liver; TSCA listed

**Precaution:** Probably combustible; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of CO, CO<sub>2</sub>, NO<sub>x</sub>, SO<sub>x</sub>, disodium oxide

**Storage:** Store under ambient temps.; keep away from oxidizing materials

**Uses:** Dye for fabric, leather, cotton, cellulosic materials, paper, wool, silk, hog's hair, plastics, vegetable-ivory buttons, wood flour used as a resin filler, acetate, and nylon; stain for wood and biological materials; colorant in aq. inks, artists' colors; reportedly as colorant in hair dye

**Regulatory:** SARA §313 reportable

**Manuf./Distrib.:** Acros Org.; Alfa Aesar; Fluka; ICN Biomed. Research Prods.; Pfaltz & Bauer; Sigma; TCI Am.

### Direct black 80

CAS 8003-69-8

**Synonyms:** 6-((7-Amino-1-hydroxy-3-sulfo-2-naphthalenyl) azo)-3-(((4-amino-6 (or 7)-sulfo-1-naphthalenyl) azo) phenyl) azo)-4-hydroxy-2-naphthalenesulfonic acid, trisodium salt; CI 31600; CI direct black 80; Diazophenyl black BW; 2-Naphthalenesulfonic acid, 6-((7-amino-1-hydroxy-3-sulfo-2-naphthalenyl) azo)-3-(((4-amino-6 (or 7)-sulfo-1-naphthalenyl) azo) phenyl) azo)-4-hydroxy-, trisodium salt; Phenazo black OB

**Empirical:** C<sub>36</sub>H<sub>26</sub>N<sub>6</sub>O<sub>11</sub>S<sub>3</sub> • 3Na

**Properties:** Bluish-blk. to blk. powd.; odorless; sol. 1-10 mg/ml in water; sol. < 1 mg/ml in DMSO, 95% ethanol, acetone; m.w. 911.81; m.p. > 300 C

**Precaution:** Probably combustible; incompat. with oxidizing agents, reducing agents

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NO, SO<sub>x</sub>

**Storage:** Store under ambient temps.

**Uses:** In leather dyeing; in beater dyeing on paper

**Direct black A.** See Direct black 38

**Direct black green.** See Direct green 1

### Direct blue 6

CAS 2502-46-2

**Synonyms:** 3,3'-((4,4'-Biphenylene) bis (azo)) bis (5-amino-4-hydroxy)-2,7-naphthalenedisulfonic acid, tetrasodium salt; Blue 2B; Chloramien blue 2B; Chrome leather blue 2B; CI 22610; CI direct blue 6; CI direct blue 6, tetrasodium salt; Diamine blue 2B; Diazine blue 2B; Diazol blue 2B; Diphenyl blue 2B; Direct blue A; Indigo blue 2B; Phenamine blue 2B; Sodium diphenyl-4,4'-bis-azo-2''-8''-amino-1''-naphthol-3'',6''-disulfonate

**Empirical:** C<sub>32</sub>H<sub>20</sub>N<sub>6</sub>O<sub>14</sub>S<sub>4</sub> • 4Na

**Properties:** Dk. blue microcryst. powd.; sol. 5-10 mg/ml in water; sol. 1-5 mg/ml in DMSO; sol. < 1 mg/ml in 95% ethanol, acetone; sl. sol. in ethanol, Cellosolve; insol. in other org. solvs.; m.w. 932.78; m.p. dec.; b.p. dec.

**Toxicology:** Absorbed thru skin; experimental carcinogen, neoplastigen, tumorigen, teratogen; suspected human carcinogen; other experimental reproductive effects; mutagenic data

**Precaution:** Probably combustible; incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of NO<sub>x</sub>, NaO<sub>x</sub>, SO<sub>x</sub>

**Storage:** Store under ambient temps.; keep away from oxidizing materials

**Uses:** Dye for fabric, leather, cotton, cellulosic materials, paper, silk, wool and nylon fibers; biological stain; prod. of aq. printing inks; reportedly used in hair dyes

**Regulatory:** Not presently used in cosmetic industry

**Manuf./Distrib.:** Pfaltz & Bauer; TCI Am.

### Direct blue 53

CAS 314-13-6; EINECS/ELINCS 206-242-5

**Synonyms:** Azovan blue; 4,4'-Bis [7-(1-amino-8-hydroxy-2,4-disulfo) naphthylazo]-3,3'-bitolyl, tetrasodium salt; 4,4'-Bis (1-amino-8-hydroxy-2,4-disulfo-7-naphthylazo)-3,3'-bitolyl, tetrasodium salt; CI 23860; CI di-

## Direct blue A

rect blue 53; CI direct blue 53, tetrasodium salt; Diamine sky blue FF; 6,6'-[(3,3'-Dimethyl [1,1'-biphenyl]-4,4'-diyl) bis (azo)] bis [4-amino-5-hydroxy-1,3-naphthalenedisulfonic acid] tetrasodium salt; Dye Evans blue; Evans blue; Evans blue dye; 1,3-Naphthalenedisulfonic acid, 6,6'-[(3,3'-dimethyl-4,4'-biphenylene) bis (azo)] bis (4-amino-5-hydroxy-, tetrasodium salt

*Empirical:*  $C_{24}H_{24}N_6O_{14}S_4 \cdot 4Na$

*Properties:* Bluish cryst. with grnsh.-bronze luster or blk. powd.; m.w. 960.83; sol. in acids, alkalis; sol. 10-50 mg/ml in water; sol. 1-10 mg/ml in DMSO; sol. < 1 mg/ml in 95% ethanol, acetone; insol. in  $CCl_4$ , chloroform, ether, benzene

*Toxicology:* LD50 (IP, mouse) 340 mg/kg; LDLo (IV, rat) 5 g/kg; poison by IP route; mod. toxic by IV route; harmful by inh., ing., skin contact; may cause irritation; may cause liver tumors, leukemia; experimental carcinogen, teratogen, reproductive effector; equivocal tumorigen; mutation data; target organ: liver; TSCA listed

*Precaution:* Probably combustible; can react with strong reducing and oxidizing agents

*Hazardous Decomp. Prods.:* Heated to decomp., emits very toxic fumes of CO,  $CO_2$ ,  $SO_x$ ,  $Na_2O$ ,  $NO_x$ ; emits toxic fumes under fire conditions

*Storage:* Store refrigerated; keep tightly closed; keep away from oxidizers

*Uses:* Diagnostic aid for measurement of blood volume; indicator changing color at pH 10; dyeing textiles, leather, and paper; useful in a simple double-labeling procedure for studying axonal branching

*Manuf./Distrib.:* ABCR; Acros Org.; Aldrich; Alfa Aesar; Dudley; Fisher Scientific; Fluka; ICN Biomed. Research Prods.; J.T. Baker; Pfaltz & Bauer; Sigma; Spectrum Quality Prods.; TCI Am.

**Direct blue A.** See Direct blue 6

## Direct brown 2

CAS 2429-82-5

*Synonyms:* 5-[[4'-[(7-Amino-1-hydroxy-3-sulfo-2-naphthyl) azo] [1,1'-biphenyl]-4-yl] azo]-2-hydroxybenzoic acid, disodium salt; Benzoic acid, 5-((4'-[(7-amino-1-hydroxy-3-sulfo-2-naphthalenyl) azo] (1,1'-biphenyl)-4-yl) azo)-2-hydroxy-, disodium salt; Brown M; Chloramine brown M; Chrome leather brow M; CI 22311; CI direct brown 2, disodium salt; Diamine brown; Diazine brown; Diphenyl brown; Direct fast brown; Phenamine brown MB

*Empirical:*  $C_{29}H_{19}N_5O_7S \cdot 2Na$

*Properties:* Reddish-brn. to dk. brn. powd.; sol. 1-10 mg/ml in water, DMSO; sol. < 1 mg/ml in 95% ethanol, acetone; insol. in most org. solvs.; m.w. 627.54

*Precaution:* Probably combustible

*Storage:* Store refrigerated

*Uses:* Dye for paper and leather

*Manuf./Distrib.:* TCI Am.

**Direct dark green.** See Direct green 1

**Direct fast brown.** See Direct brown 2

## Direct green 1

CAS 3626-28-6

*Synonyms:* Benzo dark green; Chrome leather dark green; CI 30280; CI direct green 1; CI direct green 1, disodium salt; Diamine dark green; Diazine dark green; Diphenyl dark green; Direct black green; Direct dark green; 2,7-Naphthalenedisulfonic acid, 4-amino-5-hydroxy-3-((4'-((4-hydroxyphenyl) azo) (1,1'-biphenyl)-4-yl) azo)-6-(phenylazo)-, disodium salt; Naphthamine dark green B; Pontamine green S

*Empirical:*  $C_{24}H_{23}N_7O_8S_2 \cdot 2Na$

*Properties:* Dull grn. to blk. powd.; sol. 10-50 mg/ml in water; sol. 1-10 mg/ml in DMSO, 95% ethanol; sol. < 1 mg/ml in acetone; m.w. 767.71

*Precaution:* Probably combustible

*Storage:* Store refrigerated

*Uses:* Dye for leather, paper, aq. inks; regenerated cellulose film

**Direct orange 15.** See 4,4'-Diaminostilbene-2,2'-disulfonic acid

## Direct red 39

CAS 6358-29-8

*Synonyms:* Benzyl scarlet 3BS; Chloramine red 3B; Chrome leather scarlet 3BS; CI 23630; CI direct red 39; Diamine scarlet 3BA-CF; Diphenyl red 3BS; Diphenyl scarlet 3BS; Direct scarlet 3BS; 8-((4'-((4-Ethoxyphenyl) azo)-3,3'-dimethyl (1,1'-biphenyl)-4-yl) azo)-7-hydroxy-1,3-naphthalene-

disulfonic acid, disodium salt; Phenamine scarlet 3B; Triazol fast scarlet 3B

*Empirical:*  $C_{32}H_{26}N_4O_8S_2 \cdot 2Na$

*Properties:* Dk. red powd.; sol. in conc. sulfuric acid; sol. < 1 mg/ml in water, DMSO, 95% ethanol, methanol, acetone, toluene; m.w. 704.71; m.p. 285 C (dec.)

*Toxicology:* TSCA listed

*Precaution:* Probably combustible

*Storage:* Store at ambient temps.

*Uses:* Dye for wool, silk, acetate, nylon, cotton, leather, paper

*Manuf./Distrib.:* TCI Am.

**Direct scarlet 3BS.** See Direct red 39

**Disodium acid phosphate.** See Sodium phosphate dibasic anhydrous

**Disodium calcium ethylenediaminetetraacetate.** See Calcium disodium EDTA

**Disodium carbonate.** See Sodium carbonate

## Disodium cyanodithioimidocarbamate

*Toxicology:* Harmful if swallowed; may cause skin and eye irritation

*Uses:* In food-contact paper/paperboard

*Regulatory:* FDA 21CFR §181.30; SARA reportable

*Manuf./Distrib.:* Buckman Labs

## Disodium cyanodithioimidocarbonate

CAS 138-93-2

*Synonyms:* Carbamodithioic acid, cyano-, disodium salt; Cyanodithioimidocarbonate, disodium; Imidocarbonic acid, cyanodithio-, disodium salt

*Empirical:*  $C_2N_2Na_2S_2$

*Properties:* Orangish powd.; m.w. 162.1

*Uses:* Antimicrobial for use in cane-sugar and beet-sugar mills; in food-pkg. adhesives; slimeicide in food-contact paper/paperboard; preservative in food-contact animal glues

*Regulatory:* FDA 21CFR §173.320, 175.105, 176.300, 178.3120

## Disodium 1,4-dihydro-9,10-dihydroxyanthracene

CAS 73347-80-5

*Synonyms:* 9,10-Anthracenediol, 1,4-dihydro-, disodium salt

*Empirical:*  $C_{14}H_{10}Na_2O_2$

*Properties:* M.w. 256.21

*Uses:* Catalyst in the alkaline pulping of lignocellulosic materials for paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §176.170

**Disodium dihydrogen ethylenediaminetetraacetate.** See Disodium EDTA

**Disodium (2,4-dimethylphenylazo)-2-hydroxynaphthalene-3,6-disulfonate.** See Acid red 26

**Disodium dioxide.** See Sodium peroxide

**Disodium disulfite.** See Sodium metabisulfite

**Disodium dithionate.** See Sodium hydrosulfite

**Disodium dithionite.** See Sodium hydrosulfite

**Disodium edetate.** See Disodium EDTA

## Disodium EDTA

CAS 139-33-3 (anhyd.); 6381-92-6 (dihydrate); EINECS/ELINCS 205-358-3

*Synonyms:* Disodium edetate; Disodium ethylenediamine tetraacetate; Disodium dihydrogen ethylenediaminetetraacetate; Edetate disodium; Ethylenediaminetetraacetic acid, disodium salt; (Ethylenedinitrilo) tetraacetic acid, sodium salt; Glycine, N,N'-1,2-ethanediybis[N-(carboxymethyl)-, disodium salt dihydrate

*Classification:* Substituted diamine

*Empirical:*  $C_{10}H_{14}N_2Na_2O_8$

*Formula:*  $(OOCCH_2)_2NCH_2CH_2N(CH_2COO^-)_2 \cdot 2H^+ \cdot 2Na^+$

*Properties:* Wh. cryst. powd.; odorless; freely sol. in water; m.w. 336.24 (anhyd.), 372.24 (dihydrate); m.p. 252 (dec.); pH 4-6

*Toxicology:* LD50 (oral, rat) 2 g/kg, (IV, mouse) 56 mg/kg, (IP, mouse) 260 mg/kg; poison by IP and IV route; mod. toxic by ing.; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of  $NO_x$  and  $Na_2O$

HMS: Health 2; Flammability 1; Reactivity 0

*Storage:* Store @ R.T.

*Uses:* Chelant in cosmetics, pharmaceuticals, water treatment, textiles, soaps/detergents, electroless copper plating, polymer prod., disinfectants, pulp/

paper, enhanced oil recovery, metal cleaning/protection; scale inhibitor (boiler water treatment); textile/leather processing aux.; antioxidant for cosmetics; prevents metal-catalyzed oxidative breakdown; food preservative, stabilizer, chelant, sequestrant; hog scald agent; anticoagulant; pharmaceutical aid; visc. control agent; chelating agent in food-contact paper/paperboard mfg.; in cellophane for food pkg.; chelating agent/sequestrant in lubricants for incidental food-contact use; in food-pkg. adhesives

*Use Level:* 0.1-0.5%; to 145 ppm (canned black eye peas), to 165 ppm (canned kidney beans, as preservative), to 500 ppm (canned strawberry pie filling), to 75 ppm (dressings, mayonnaise), to 100 ppm (sandwich spread), to 150 ppm (aq. multivitamins)

*Regulatory:* FDA 21CFR §155.200, 169.115, 169.140, 169.150, 172.135, 175.105, 176.150, 176.170, 177.1200, 177.2800, 178.3570, 178.3910, 573.360; USDA 9CFR §318.7; Japan approved (0.25 g/kg max. as calcium disodium EDTA); FDA approved for injectables, inhalants, IV, ophthalmics, orals, otics, rectals, topicals; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* AMRESCO; Aldrich; Fluka; Hampshire; Int'l. Sourcing; Jarchem Ind.; R.W. Greeff; Ruger; Sigma; Spectrum Quality Prods.

*Trade Names:* Versene NA

**Disodium 1,2-ethanebis (carbamodithioate).** See Nabam

**Disodium 2,2'-(1,2-ethenediyl) bis [5-[4-[bis (2-hydroxyethyl) amino]-6-(phenylamino)-1,3,5-triazin-2-yl] amino] benzenesulfonate**  
CAS 4193-55-9

*Synonyms:* 4,4'-Bis ((4-anilino-6-bis (2-hydroxyethyl) amino-w-triazin-2-yl) amino)-2,2'-stilbenedisulfonic acid disodium salt; 2,2'-Stilbenedisulfonic acid, 4,4'-bis ((4-anilino-6-bis (2-hydroxyethyl) amino-s-triazinyl) amino)-, disodium salt

*Empirical:* C<sub>40</sub>H<sub>40</sub>N<sub>12</sub>O<sub>10</sub>S<sub>2</sub> • 2Na

*Properties:* M.w. 959.02

*Toxicology:* LD50 (oral, rat) 14,530 mg/kg, (IP, rat) 350 mg/kg, (subcut., mouse) 1000 mg/kg; poison by ing., IP routes; mod. toxic by subcut. route; primary eye irritant; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits very toxic fumes of NO<sub>x</sub>, Na<sub>2</sub>O, and SO<sub>x</sub>

*Uses:* Optical brightener

*Trade Names Containing:* Optiblanc® NL

**Disodium ethylene bisdithiocarbamate.** See Nabam

**Disodium ethylene-1,2-bisdithiocarbamate.** See Nabam

**Disodium ethylenediamine tetraacetate.** See Disodium EDTA

**Disodium hydrogen orthophosphate.** See Sodium phosphate dibasic anhydrous

**Disodium hydrogen phosphate.** See Sodium phosphate dibasic anhydrous

**Disodium metasilicate.** See Sodium metasilicate

**Disodium 4-[1-methyl-2-[(1-oxooctadec-9-enyl) amino] ethyl] 2-sulfonatosuccinate.** See Disodium oleamido MIPA-sulfosuccinate

**Disodium monohydrogen orthophosphate.** See Sodium phosphate dibasic anhydrous

**Disodium monohydrogen phosphate.** See Sodium phosphate dibasic anhydrous

**Disodium monooleamido MIPA-sulfosuccinate.** See Disodium oleamido MIPA-sulfosuccinate

**Disodium monosilicate.** See Sodium metasilicate

**Disodium octadecyl sulfosuccinamate.** See Disodium stearyl sulfosuccinamate

**Disodium oleamido MIPA-sulfosuccinate**

CAS 43154-85-4; 67815-88-7; EINECS/ELINCS 256-120-0; 267-199-6

*Synonyms:* Butanedioic acid, sulfo-, 1-[1-methyl-2-[(1-oxo-9-octadecenyl) amino] ethyl] ester, disodium salt; Butanedioic acid, sulfo-, 4-[1-methyl-2-[(1-oxo-9-octadecenyl) amino] ethyl] ester, disodium salt; Disodium 4-[1-methyl-2-[(1-oxooctadec-9-enyl) amino] ethyl] 2-sulfonatosuccinate; Disodium monooleamido MIPA-sulfosuccinate; Disodium oleic monoisopropanolamide sulfosuccinate; Disodium oleoyl isopropanolamide sulfosuccinate; Oleoyl monoisopropanolamide disodium sulfosuccinate; Sulfbutanedioic acid, 4-[1-methyl-2-[(1-oxo-9-octadecenyl) amino] ethyl] ester, disodium salt

*Definition:* Disodium salt of a substituted isopropanolamide half ester of sulfosuccinic acid

*Empirical:* C<sub>25</sub>H<sub>43</sub>Na<sub>2</sub>NO<sub>6</sub>S

*Properties:* Amber liq.; m.w. 549.65; anionic

*Toxicology:* TSCA listed

*Uses:* Mild high-foaming surfactant, dispersant, wetting agent, foaming agent, detergent, conditioner, and emulsifier for bubble bath, shampoos, cleansers for cosmetics and toiletries; emulsion polymerization; flotation frother; antistat; in food-pkg. adhesives; in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170

**Disodium oleic monoisopropanolamide sulfosuccinate.** See Disodium oleamido MIPA-sulfosuccinate

**Disodium oleoyl isopropanolamide sulfosuccinate.** See Disodium oleamido MIPA-sulfosuccinate

**Disodium orthophosphate.** See Sodium phosphate dibasic anhydrous

**Disodium peroxide.** See Sodium peroxide

**Disodium phosphate.** See Sodium phosphate dibasic anhydrous

**Disodium phosphoric acid.** See Sodium phosphate dibasic anhydrous

**Disodium pyrosulfite.** See Sodium metabisulfite

**Disodium stearyl sulfosuccinamate**

CAS 14481-60-8; EINECS/ELINCS 238-479-5

*Synonyms:* Disodium octadecyl sulfosuccinamate; Disodium N-stearyl sulfosuccinamate; 4-(Octadecylamino)-4-oxo-2-sulfbutanedioic acid, disodium salt; Sulfbutanedioic acid, monoctadecyl ester, disodium salt

*Definition:* Disodium salt of a stearyl amide of sulfosuccinic acid

*Empirical:* C<sub>22</sub>H<sub>41</sub>NO<sub>6</sub>S • 2Na

*Properties:* Liq.; m.w. 493.61; anionic

*Toxicology:* TSCA listed

*Uses:* Emulsifier, dispersant, foamer, detergent, solubilizer for soaps and surfactants, alkaline cleaner formulations, brick and tile cleaners; emulsion polymerization of vinyl chloride and SBR; foaming agent for rubber/carpet-backing latexes; textile softener; emulsifier in resin latex coatings for paper/paperboard in contact with aq./fatty/dry foods

*Regulatory:* FDA 21CFR §176.170, 176.180

*Trade Names:* Aerosol® 18

**Disodium N-stearyl sulfosuccinamate.** See Disodium stearyl sulfosuccinamate

**Disodium sulfate.** See Sodium sulfate

**Disodium sulfite.** See Sodium sulfite

**Disodium 9-(sulfonatoxy) octadecanoate.** See Sodium oleic sulfate

**Disodium 2-(2,4,5,7-tetrabromo-6-oxido-3-oxoxanthen-9-yl) benzoate.** See Acid red 87

**Disodium thiosulfate.** See Sodium thiosulfate anhydrous

**Disodium tin trioxide.** See Sodium stannate

**Disproportionated rosin.** See Rosin

**Disproportionated tall oil fatty acid.** See Tall oil acid

**N,N'-Distearoylethylenediamine.** See Ethylene distearamide

**Distearyl dimethyl ammonium chloride.** See Distearyldimonium chloride

**Distearyldimonium chloride**

CAS 107-64-2; EINECS/ELINCS 203-508-2

*Synonyms:* Ammonium, dimethyldioctadecyl-, chloride; Dimethyldioctadecylammonium chloride; N,N-Dimethyl-N-octadecyl-1-octadecanaminium chloride; Dioctadecyl dimethyl ammonium chloride; Distearyl dimethyl ammonium chloride; Octadecanaminium, N,N-dimethyl-N-octadecyl-, chloride; Quaternium-5

*Classification:* Quaternary ammonium salt

*Empirical:* C<sub>38</sub>H<sub>80</sub>N • Cl

*Properties:* Paste; m.w. 586.52; m.p. 36-44 C; cationic

*Toxicology:* LD50 (oral, rat) 11,300 mg/kg; mildly toxic by ing.; TSCA listed  
*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of NO<sub>x</sub> and Cl

*Uses:* Detergent, fabric softener, conditioner, antistat for commercial and institutional laundries; conditioner, antistat for hair prods.; foam and visc. builder in personal care prods.; dispersant for coatings, cosmetics, pigments, inks, textiles; agric.; wastewater treatment; antistatic coating for ABS, acrylic, cellulose, nylon, polyacetal, PP, PS, PVC; visc. builder in pharmaceuticals; in cellophane for food pkg.

*Regulatory:* FDA 21CFR §172.712, 177.1200

*Manuf./Distrib.:* Fluka

*Trade Names Containing:* Arquad® 218-75

**Distearyl pentaerythrityl diphosphite**

CAS 3806-34-6; EINECS/ELINCS 223-276-6

**Synonyms:** 3,9-Bis (octadecyloxy)-2,4,8,10-tetraoxa-3,9-diphosphaspiro (5.5) undecane; Cyclic neopentane tetraethyl bis (octadecyl phosphite); O,O'-Dioctadecylpentaerythritol bis (phosphite); 2,4,8,10-Tetraoxa-3,9-diphosphaspiro (5.5) undecane, 3,9-bis (octadecyloxy)-

**Empirical:** C<sub>41</sub>H<sub>82</sub>O<sub>6</sub>P<sub>2</sub>

**Properties:** Solid; m.w. 733.05; dens. 0.920-0.935; m.p. 44-47 C; ref. index 1.4560-1.4590; flash pt. (PMCC) 185 C

**Toxicology:** May be harmful by inh., ing., or skin absorption; may cause skin/eye/mucous membrane/upper respiratory tract irritation; ing. can cause GI disturbances; TSCA listed

**Precaution:** Incompat. with strong oxidizing agents, acids, stearyl alcohol; readily hydrolyzed

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>, phosphine, pentaerythritol, phosphorous acid; emits toxic fumes under fire conditions

**Storage:** Keep tightly closed; store in cool, dry place

**Uses:** Color and m.w. stabilizer, antioxidant, melt flow aid for polymer processing (polyolefins, polyesters, elastomers, styrenics, engineering thermoplastics), adhesives, coatings; antioxidant, UV stabilizer for polyolefins, food-grade polymers

**Regulatory:** FDA 21CFR §178.2010

**Manuf./Distrib.:** Aldrich; GE Spec.

**Trade Names:** Weston® 618

**Distillates (petroleum), hydrotreated (mild) light naphthenic.** See Naphthenic oil

**Distilled fatty acids, cottonseed oil.** See Cottonseed acid

**Distilled spirits.** See Alcohol

**Distilled water.** See Water

**Disulfurous acid disodium salt.** See Sodium metabisulfite

**Dithionous acid disodium salt.** See Sodium hydrosulfite

**Dithionous acid, zinc salt (1:1).** See Zinc hydrosulfite

#### Ditridecyl sodium sulfosuccinate

CAS 2673-22-5; EINECS/ELINCS 220-219-7

**Synonyms:** Sodium 1,2-bis (tridecylloxycarbonyl) ethanesulfonate; Sodium bis(tridecyl sulfosuccinate); Sodium ditridecyl sulfosuccinate; Sulfobutanedioic acid, 1,4-ditridecyl ester, sodium salt

**Definition:** Sodium salt of the diester of tridecyl alcohol and sulfosuccinic acid

**Empirical:** C<sub>30</sub>H<sub>57</sub>NaO<sub>5</sub>S

**Properties:** M.w. 584.83; anionic

**Toxicology:** TSCA listed

**Uses:** Emulsifier; surfactant; detergent; foam modifier; wetting agent; dispersant; visc. depressant, stabilizer, emulsifier for emulsion polymerization; dispersant, processing aid for resins, pigments, polymers, paints, and dyes; base for rust inhibitors; emulsifier in food pkg.; in food-pkg. adhesives; in paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §175.105, 176.180, 178.3400

**Trade Names:** Aerosol® TR-70; DeWET SDTD-70; Geropon® BIS/SODICO-2

**Trade Names Containing:** Monawet MT-70; Monawet MT-80H2W

#### Di/tri-isopropylbiphenyl

**Uses:** Carbonless paper; coatings; resins

**Trade Names:** Sure Sol®-300

**Trade Names Containing:** Sure Sol®-333

**Diuretic salt.** See Potassium acetate

#### Divinylbenzene homopolymer

**Uses:** In paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §176.180

**Manuf./Distrib.:** Monomer-Polymer & Dajac Labs

**DKP.** See Potassium phosphate dibasic

**DMAE.** See Dimethylethanolamine

**DMAEMA.** See Dimethylaminoethyl methacrylate

**DMEA.** See Dimethylethanolamine

**DMF.** See Dimethyl formamide

**DMFA.** See Dimethyl formamide

**DMHF.** See Dimethyl hydantoin-formaldehyde polymer

**DMK.** See Acetone

**DMOB.** See Dianisidine

**DMTT.** See 3,5-Dimethyl tetrahydro-2-H,1,3,5-thiadiazole-2-thione

**DMU.** See Dimethylol urea

**1-Docosanaminium, N,N,N-trimethyl-, chloride.** See Behentrimonium chloride

**Docosanoic acid.** See Behenic acid

**1-Docosanol.** See Behenyl alcohol

**Docosenamide.** See Erucamide

**13-Docosenamide.** See Erucamide

**cis 13-Docosenamide.** See Erucamide

**(Z)-Docos-13-enamide.** See Erucamide

**3-(Docosenyl) dihydro-2,5-furandione.** See Docosenylsuccinic anhydride

#### Docosenylsuccinic anhydride

CAS 58598-42-8

**Synonyms:** 3-(Docosenyl) dihydro-2,5-furandione; 3-Docosenylsuccinic anhydride; 2,5-Furandione, 3-(docosenyl) dihydro

**Empirical:** C<sub>26</sub>H<sub>46</sub>O<sub>3</sub>

**Properties:** M.w. 406.65

**Trade Names Containing:** Accosize® 100 Synthetic Size

**3-Docosenylsuccinic anhydride.** See Docosenylsuccinic anhydride

**Docusate sodium.** See Dioctyl sodium sulfosuccinate

**1,1a,2,2,3,3a,4,5,5a,5b,6-Dodecachlorooctahydro-1,3,4-metheno-1H-cyclobuta (cd) pentalene.** See Perchloropentacyclodecane

**Dodecachlorooctahydro-1,3,4-metheno-1H-cyclobuta (c,d) pentalene.** See Perchloropentacyclodecane

**Dodecachlorooctahydro-1,3,4-metheno-2H-cyclobuta (c,d) pentalene.** See Perchloropentacyclodecane

**Dodecachloropentacyclodecane.** See Perchloropentacyclodecane

**Dodecahydro-1,4a-dimethyl-7-(1-methylethyl)-1-phenanthrenemethanol.** See Hydroabietyl alcohol

**Dodecanoic acid.** See Lauric acid

**n-Dodecanoic acid.** See Lauric acid

**Dodecanoic acid, 2,2-bis [[(1-oxododecyl) oxy] methyl]-1,3-propanediyl ester.** See Pentaerythrityl tetralaurate

**Dodecanoic acid, diester with 1,2,3-propanetriol.** See Glyceryl dilaurate

**Dodecanoic acid, 2,3-dihydroxypropyl ester.** See Glyceryl laurate

**Dodecanoic acid, ester with 1,2-ethanediol.** See Glycol laurate SE

**Dodecanoic acid 1,2-ethanediyl ester.** See Glycol dilaurate

**Dodecanoic acid 2-(2-hydroxyethoxy) ethyl ester.** See PEG-2 laurate

**Dodecanoic acid, 2-hydroxypropyl ester.** See Propylene glycol laurate

**Dodecanoic acid methyl ester.** See Methyl laurate

**Dodecanoic acid, 1-methyl-1,2-ethanediyl ester.** See Propylene glycol dilaurate

**Dodecanoic acid, 1-methylethyl ester.** See Isopropyl laurate

**Dodecanoic acid, monoester with 1,2-propanediol.** See Propylene glycol laurate

**Dodecanoic acid, monoester with 1,2,3-propanetriol.** See Glyceryl laurate

**Dodecanoic acid, potassium salt.** See Potassium laurate

**Dodecanoic acid sodium salt.** See Sodium laurate

**Dodecanoic acid, zinc salt.** See Zinc laurate

**1-Dodecanol, 2-octyl-.** See Octyldodecanol

**3,6,9,12,15,18,21,24,27,30,33,36-Dodecaoxapentacontan-1-ol.** See Ceteth-12

#### Dodecene-1

CAS 112-41-4; EINECS/ELINCS 203-968-4; UN No. NA 1933

**Synonyms:** C12 alpha olefin; 1-Dodecene; Dodec-1-ene; n-Dodec-1-ene; α-Dodecene; α-Dodecylene; Tetrapropylene

**Empirical:** C<sub>12</sub>H<sub>24</sub>

**Formula:** H<sub>2</sub>C=CH(CH<sub>2</sub>)<sub>9</sub>CH<sub>3</sub>

**Properties:** Colorless liq.; insol. in water; sol. in alcohol, acetone, ether, petrol., coal tar solvs.; m.w. 168.32; dens. 0.764; m.p. -31.5 C; b.p. 213-215 C; flash pt. (Seta) 168 F; ref. index 1.430

**Toxicology:** LD50 (oral, rat) > 5 g/kg; low acute inhalation toxicity; sl. toxic by ingestion; narcotic in high concs.; irritating to eyes, skin, respiratory system; TSCA listed

**Precaution:** Combustible liq.; avoid contact with air or oxygen (explosion danger, adverse effect on subsequent reactions)

**Storage:** Store under nitrogen

**Uses:** Intermediate for surfactants and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants); flavors; perfumes; medicine; oils; dyes; resins

**Manuf./Distrib.:** ABCR; Acros Org.; Albemarle; Aldrich; Fluka; Shell; Sigma; Supelco

*Trade Names:* Gultfene® 12

**1-Dodecene.** See Dodecene-1

**Dodec-1-ene.** See Dodecene-1

**α-Dodecene.** See Dodecene-1

**n-Dodec-1-ene.** See Dodecene-1

**3-(Dodeceny)l dihydro-2,5-furandione.** See Dodeceny succinic anhydride

### Dodeceny succinic anhydride

CAS 25377-73-5; EINECS/ELINCS 246-917-1

*Synonyms:* ASA; DDS; DDSA; n-DDSA; Alkenyl (C<sub>10</sub>-C<sub>14</sub>) succinic anhydride; 3-(Dodeceny)l dihydro-2,5-furandione; 2,5-Furandione, 3-(dodeceny)l dihydro-

*Empirical:* C<sub>16</sub>H<sub>26</sub>O<sub>3</sub>

*Properties:* Lt. yel. clear visc. oily liq.; m.w. 266.38; dens. 1.003-1.008 (60 F); b.p. 150 C (3 mm); flash pt. 343-347 F; anionic

*Toxicology:* LD50 (IP, mouse) 320 mg/kg; LCLo (inh., rat, 4 h) 1220 mg/m<sup>3</sup>; toxic by inh., skin contact; poison by IP route; irritant and sensitizer; TSCA listed

*Precaution:* Combustible when exposed to open flame; can react with oxidizers

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Epoxy curing agent; corrosion inhibitor for nonaq. lubricating oils; intermediate for prep. of alkyl or unsat. polyester resins, plasticizers, paints; intermediate in chem. reactions; wetting agent for bituminous compds., vulcanizable prods.; detergent raw material; paper sizing ingred.

*Manuf./Distrib.:* Aldrich; Allchem Ind.; Anhydrides & Chems.; Buffalo Color; Cambridge Ind. Co. of Am.; Dixie; Electron Microscopy Sciences; Fluka; Haltermann GmbH; Humphrey; Lonza; Lubrizol; Milliken; ProSciTech

**Dodecoic acid.** See Lauric acid

**Dodecyl alcohol, hydrogen sulfate, sodium salt.** See Sodium lauryl sulfate

**Dodecyl ammonium sulfate.** See Ammonium lauryl sulfate

**Dodecylbenzene sodium sulfonate.** See Sodium dodecylbenzenesulfonate

**Dodecylbenzenesulfonate, sodium salt.** See Sodium dodecylbenzenesulfonate

### Dodecylbenzenesulfonic acid

CAS 27176-87-0; 68411-32-5; 68584-22-5; 68608-88-8; 85117-49-3; 85536-14-7; EINECS/ELINCS 248-289-4; 271-807-5

*Synonyms:* ABS; DBBSA; Alkylbenzenesulfonic acid; Benzenesulfonic acid, dodecyl-; n-Dodecylbenzenesulfonic acid; Laurylbenzenesulfonic acid

*Classification:* Substituted aromatic acid

*Empirical:* C<sub>18</sub>H<sub>30</sub>O<sub>3</sub>S

*Properties:* Wh. to lt. yel. flakes, granules, and powd.; m.w. 326.54; anionic

*Toxicology:* LD50 (oral, rat) 650 mg/kg; mod. toxic by ing.; TSCA listed

*Environmental:* Biodeg.

*Precaution:* DOT: Corrosive

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic vapors of SO<sub>2</sub>

*Uses:* Surfactant, detergent raw material in heavy and lt. duty detergents, hand cleaning gels, machine degreasers, tank cleaners; emulsifier for metalworking fluids, pesticides, emulsion polymerization; in paints and coatings; catalyst in acid catalyzed reactions; defoamer in food-contact paper/paperboard; emulsifier in food pkg.

*Regulatory:* FDA 21CFR §176.210, 178.1010, 178.3400

*Manuf./Distrib.:* Albright & Wilson Am.; Allchem Ind.; Ashland; Biddle Sawyer; Browning; Chem. Distribution; Expo Chem.; Harcross; Pilot; Rhodia HPCI; Rutgers Org.; Spectrum Quality Prods.; Stepan; Tradig; Tulstar Prods.; Van Waters & Rogers

*Trade Names:* BIO-SOFT® S-120; Calimulse EM-99; Calsoft® LAS-99; POLYSTEP® A-13; POLYSTEP® A-17; SULFONIC 100

**n-Dodecylbenzenesulfonic acid.** See Dodecylbenzenesulfonic acid

**Dodecylbenzenesulfonic acid, compd. with 1-amino-2-propanol (1:1).** See MIPA-dodecylbenzenesulfonate

**Dodecylbenzenesulfonic acid, compd. with isopropylamine (1:1).** See Isopropylamine dodecylbenzenesulfonate

**Dodecylbenzenesulfonic acid, compd. with 2-propanamine (1:1).** See Isopropylamine dodecylbenzenesulfonate

**Dodecylbenzenesulfonic acid, potassium salt.** See Potassium dodecylbenzenesulfonate

**Dodecylbenzenesulfonic acid sodium salt.** See Sodium dodecylbenzenesulfonate

**Dodecyl dimethylamine oxide.** See Lauramine oxide

**N-Dodecyl dimethylamine oxide.** See Lauramine oxide

**α-Dodecylene.** See Dodecene-1

**1-Dodecylguanidine acetate.** See Dodine

**N-Dodecylguanidine acetate.** See Dodine

### Dodecylguanidine hydrochloride

CAS 13590-97-1

*Synonyms:* DGH; Guanidine, dodecyl-, monohydrochloride

*Empirical:* C<sub>13</sub>H<sub>29</sub>N<sub>3</sub> · ClH

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>11</sub>NHCNH<sub>2</sub><sup>+</sup>NH<sub>2</sub>Cl<sup>-</sup>

*Properties:* M.w. 263.91

*Toxicology:* LDLo (unknown route of entry, mouse) 13 mg/kg; poison by unspecified route; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of HCl and NO<sub>x</sub>

*Uses:* Biocide in water treatment systems, pulp/paper prods.; antimicrobial in paper/paperboard in contact with nonalcoholic/dry foods; slimicide in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.300

*Trade Names:* Metasol® 350

**Dodecylguanidine monoacetate.** See Dodine

**1-Dodecylguanidinium acetate.** See Dodine

### Dodecylhexadecanol

CAS 72388-18-2; EINECS/ELINCS 276-627-0

*Synonyms:* 2-Dodecylhexadecanol

*Classification:* Branched alcohol

*Empirical:* C<sub>28</sub>H<sub>58</sub>O

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>13</sub>C(CH<sub>2</sub>)<sub>10</sub>CH<sub>2</sub>HCH<sub>2</sub>OH

*Uses:* Wax substitute; skin softener in stick formulations, e.g., deodorant sticks, lip salves; in cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles

*Manuf./Distrib.:* Jarchem Ind.

*Trade Names:* Jarcol™ I-28

**2-Dodecylhexadecanol.** See Dodecylhexadecanol

**Dodecyl methacrylate.** See Lauryl methacrylate

**n-Dodecyl methacrylate.** See Lauryl methacrylate

**Dodecyl 2-methyl-2-propenoate.** See Lauryl methacrylate

**2-[2-(Dodecyloxy) ethoxy] ethoxy ethanol.** See Laureth-3

### Dodecyl phthalate

*Uses:* Adjuvant in slimicides in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.300

**Dodecyl sodium sulfate.** See Sodium lauryl sulfate

**Dodecylsulfate sodium salt.** See Sodium lauryl sulfate

**Dodecyl trimethyl ammonium chloride.** See Laurtrimonium chloride

### Dodine

CAS 2439-10-3; 96923-04-5

*Synonyms:* N-Dodecylguanidine acetate; 1-Dodecylguanidine acetate; Dodecylguanidine monoacetate; 1-Dodecylguanidinium acetate; Dodine acetate; Lauryl guanidine acetate

*Empirical:* C<sub>15</sub>H<sub>33</sub>N<sub>3</sub>O<sub>2</sub>

*Formula:* C<sub>12</sub>H<sub>25</sub>NHC(NH)NH<sub>2</sub> · CH<sub>3</sub>COOH

*Properties:* Crystals; sol. in hot water, alcohol; sl. sol. in other solvs.; m.w. 287.51

*Toxicology:* LD50 (oral, rat) 566 mg/kg, (dermal, rabbit) > 1500 mg/kg; LC50 (inh., mouse, 2 h) 129 mg/m<sup>3</sup>; poison by ing. and inh.; mod. toxic by skin contact; strong irritant to eyes and skin at > 50% conc.; questionable carcinogen; tumorigen; mutagen; TSCA listed

*Environmental:* Toxic to fish

*Hazardous Decomp. Prods.:* Heated to decomp., emits very toxic fumes of NO<sub>x</sub>

*Uses:* Fungicide; pesticide; antimicrobial in paper/paperboard in contact with nonalcoholic/dry foods

*Regulatory:* FDA 21CFR §176.170; SARA reportable

**Dodine acetate.** See Dodine

### Dodoxynol-4

CAS 9014-92-0 (generic); 26401-47-8 (generic)

## Dodoxynol-5

*Synonyms:* PEG-4 dodecyl phenyl ether; POE (4) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Formula:*  $C_{12}H_{25}C_6H_4(OCH_2CH_2)_nOH$ , avg.  $n = 4$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Low-foaming surfactant, w/o emulsifier, wetting agent for paper industry, dry cleaner formulations; emulsifier for agric. oils; degreasers  
*Trade Names:* Surfonic® DDP-40

## Dodoxynol-5

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-5 dodecyl phenyl ether; POE (5) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:*  $C_{28}H_{50}O_6$   
*Formula:*  $C_{12}H_{25}C_6H_4(OCH_2CH_2)_nOH$ , avg.  $n = 5$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier, coemulsifier, wetter, surfactant for agric., pesticide, industrial cleaners, dry cleaning, formulation of concs. for metal lubricants, cutting, milling and grinding aids, textile processing aid and mineral drilling lubricants; in food-pkg. adhesives; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400  
*Trade Names:* Surfonic® DDP-50

## Dodoxynol-6

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-6 dodecyl phenyl ether; POE (6) dodecyl phenyl ether; PEG 300 dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:*  $C_{30}H_{54}O_7$   
*Formula:*  $C_{12}H_{25}C_6H_4(OCH_2CH_2)_nOH$ , avg.  $n = 6$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant; emulsifier for solvent and emulsion cleaners; rewetting agent, emulsifier for paper, textiles; in food-pkg. adhesives  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400  
*Trade Names:* Igepal® RC-520

## Dodoxynol-7

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-7 dodecyl phenyl ether; POE (7) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:*  $C_{32}H_{58}O_8$   
*Formula:*  $C_{12}H_{25}C_6H_4(OCH_2CH_2)_nOH$ , avg.  $n = 7$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier; surfactant for solvents; solvent and emulsion cleaning; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400

## Dodoxynol-9

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-9 dodecyl phenyl ether; POE (9) dodecyl phenyl ether; PEG 450 dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:*  $C_{36}H_{66}O_{10}$   
*Formula:*  $C_{12}H_{25}C_6H_4(OCH_2CH_2)_nOH$ , avg.  $n = 9$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant; emulsifier, detergent, wetting agent for emulsion cleaners; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400

## Dodoxynol-10

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-10 dodecyl phenyl ether; POE (10) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Formula:*  $C_{12}H_{25}C_6H_4(OCH_2CH_2)_nOH$ , avg.  $n = 10$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Detergent, wetting agent, emulsifier, dispersant, penetrant, stabilizer, coemulsifier for agric., household/industrial cleaners; dedusting agent; paint

pigment dispersant; emulsifier; surfactant for solvs.; low-foaming detergent for paper, textiles; emulsifier in mfg. of food-contact articles  
*Trade Names:* T-Det® DD-10

## Dodoxynol-12

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-12 dodecyl phenyl ether; POE (12) dodecyl phenyl ether; PEG 600 dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Formula:*  $C_{12}H_{25}C_6H_4(OCH_2CH_2)_nOH$ , avg.  $n = 12$   
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant; detergent, wetting agent, emulsifier, dispersant for household/industrial cleaners; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400

## Dolomite

CAS 16389-88-1  
*Classification:* Natural mineral  
*Definition:* A carbonate of calcium and magnesium  
*Empirical:*  $C_2CaMgO_6$   
*Formula:*  $CaCO_3 \cdot MgCO_3$   
*Properties:* Gray, pink, or wh. color with vitreous luster; dens. 2.85; hardness (Mohs) 3.5-4.0; noncombustible  
*Uses:* Filler/extender in plastics, sealants, and coatings; raw material for sulfite pulp process in papermaking; water treatment chemical; prod. of calcined dolomite; refractory for furnaces; mfg. of magnesium compds. and magnesium metals; as building material; in fertilizers; removal of sulfur dioxide from stack gases; min. wool  
*Manuf./Distrib.:* Maypro Ind.; Stauber Perf. Ingreds.  
*See also* Calcium carbonate

## Dodoxynol-5

*Synonyms:* PEG-4 dodecyl phenyl ether; POE (4) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Formula:* C<sub>12</sub>H<sub>25</sub>C<sub>6</sub>H<sub>4</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 4  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Low-foaming surfactant, w/o emulsifier, wetting agent for paper industry, dry cleaner formulations; emulsifier for agric. oils; degreasers  
*Trade Names:* Surfonic® DDP-40

## Dodoxynol-5

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-5 dodecyl phenyl ether; POE (5) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:* C<sub>28</sub>H<sub>50</sub>O<sub>6</sub>  
*Formula:* C<sub>12</sub>H<sub>25</sub>C<sub>6</sub>H<sub>4</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 5  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier, coemulsifier, wetter, surfactant for agric., pesticide, industrial cleaners, dry cleaning, formulation of concs. for metal lubricants, cutting, milling and grinding aids, textile processing aid and mineral drilling lubricants; in food-pkg. adhesives; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400  
*Trade Names:* Surfonic® DDP-50

## Dodoxynol-6

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-6 dodecyl phenyl ether; POE (6) dodecyl phenyl ether; PEG 300 dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:* C<sub>30</sub>H<sub>54</sub>O<sub>7</sub>  
*Formula:* C<sub>12</sub>H<sub>25</sub>C<sub>6</sub>H<sub>4</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 6  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant; emulsifier for solvent and emulsion cleaners; rewetting agent, emulsifier for paper, textiles; in food-pkg. adhesives  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400  
*Trade Names:* Igepal® RC-520

## Dodoxynol-7

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-7 dodecyl phenyl ether; POE (7) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:* C<sub>32</sub>H<sub>58</sub>O<sub>8</sub>  
*Formula:* C<sub>12</sub>H<sub>25</sub>C<sub>6</sub>H<sub>4</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 7  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier; surfactant for solvents; solvent and emulsion cleaning; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400

## Dodoxynol-9

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-9 dodecyl phenyl ether; POE (9) dodecyl phenyl ether; PEG 450 dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Empirical:* C<sub>36</sub>H<sub>66</sub>O<sub>10</sub>  
*Formula:* C<sub>12</sub>H<sub>25</sub>C<sub>6</sub>H<sub>4</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 9  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant; emulsifier, detergent, wetting agent for emulsion cleaners; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400

## Dodoxynol-10

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-10 dodecyl phenyl ether; POE (10) dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Formula:* C<sub>12</sub>H<sub>25</sub>C<sub>6</sub>H<sub>4</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 10  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Detergent, wetting agent, emulsifier, dispersant, penetrant, stabilizer, coemulsifier for agric., household/industrial cleaners; dedusting agent; paint

pigment dispersant; emulsifier; surfactant for solvs.; low-foaming detergent for paper, textiles; emulsifier in mfg. of food-contact articles  
*Trade Names:* T-Det® DD-10

## Dodoxynol-12

CAS 9014-92-0 (generic); 26401-47-8 (generic)  
*Synonyms:* PEG-12 dodecyl phenyl ether; POE (12) dodecyl phenyl ether; PEG 600 dodecyl phenyl ether  
*Classification:* Ethoxylated alkyl phenol  
*Formula:* C<sub>12</sub>H<sub>25</sub>C<sub>6</sub>H<sub>4</sub>(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>OH, avg. n = 12  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Surfactant; detergent, wetting agent, emulsifier, dispersant for household/industrial cleaners; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.710, 175.105, 176.210, 178.3400

## Dolomite

CAS 16389-88-1  
*Classification:* Natural mineral  
*Definition:* A carbonate of calcium and magnesium  
*Empirical:* C<sub>2</sub>CaMgO<sub>6</sub>  
*Formula:* CaCO<sub>3</sub> • MgCO<sub>3</sub>  
*Properties:* Gray, pink, or wh. color with vitreous luster; dens. 2.85; hardness (Mohs) 3.5-4.0; noncombustible  
*Uses:* Filler/extender in plastics, sealants, and coatings; raw material for sulfite pulp process in papermaking; water treatment chemical; prod. of calcined dolomite; refractory for furnaces; mfg. of magnesium compds. and magnesium metals; as building material; in fertilizers; removal of sulfur dioxide from stack gases; min. wool  
*Manuf./Distrib.:* Maypro Ind.; Stauber Perf. Ingreds.

CAS 53520-67-5

**Synonyms:** 3-(Eicosenyl) dihydro-2,5-furandione; 2,5-Furandione, 3-(eicosenyl) dihydro; 3-Icosenylsuccinic anhydride**Empirical:** C<sub>24</sub>H<sub>42</sub>O<sub>3</sub>**Properties:** M.w. 378.60**Trade Names Containing:** Accosize® 100 Synthetic Size**Elaeis guineensis.** See Palm (Elaeis guineensis) kernel oil; Palm (Elaeis

guineensis) oil

**Elaeis guineensis oil.** See Palm (Elaeis guineensis) oil**Elaeis guineensis seed oil.** See Palm (Elaeis guineensis) kernel oil**Elaic acid.** See Oleic acid**Electrolyte acid.** See Sulfuric acid**Elemi.** See Elemi gum**Elemi absolute.** See Elemi gum**Elemi anhydrol.** See Elemi gum**Elemi gum**

CAS 8023-89-0; FEMA 2407

**Synonyms:** Canarium indicum resinoid; Elemi; Elemi absolute; Elemi anhydrol; Elemi oil; Elemi resin; Elemi resinoid; Gum elemi; Manila elemi copal; Resins, Manila elemi**Definition:** A soft, balsam-like resin obtained from a tree in the Philippines**Properties:** Pale yel. to yel. visc. liq. or solid; peppery lemony woody balsam odor; sol. in coal tar hydrocarbons, alcohols; insol. in petrol. solvs., ketones, water; ref. index 1.5100-1.5300 (20 C)**Toxicology:** LD50 (oral, rat) 3370 mg/kg, (skin, rabbit) 5 g/kg; primary irritant; TSCA listed**Uses:** Plasticizer; film-former; adhesion of lacquers to metals; cements; adhesives; wax compositions; printing inks; textile and paper coatings; perfumery; waterproofing; engraving; paints; varnishes; lacquers; linoleum; in food-pkg. adhesives; in food-contact coatings**Regulatory:** FDA 21CFR §175.105, 175.300**Manuf./Distrib.:** Charkit; P.L. Thomas; Penta Mfg.; Polarome Int'l.**Elemi oil.** See Elemi gum**Elemi resin.** See Elemi gum**Elemi resinoid.** See Elemi gum**EMA.** See Ethylene/MA copolymer; Ethyl methacrylate**EMAA.** See Ethylene/methacrylic acid copolymer**Enamel white.** See Barium sulfate**English white.** See Whiting**Entsufon.** See Sodium octoxynol-2 ethane sulfonate**Entsufon sodium.** See Sodium octoxynol-2 ethane sulfonate**Enzactin.** See Triacetin**EO.** See Ethylene oxide**EOEOEA.** See 2-(2-Ethoxyethoxy) ethyl acrylate**EO/PO block polymer or copolymer**

CAS 9003-11-6 (generic); 106392-12-5

**Synonyms:** Ethylene glycol/propylene glycol block copolymer; POE/POP copolymer; Polyoxyethylene/polyoxypropylene copolymer; Polyoxypropylene/polyoxyethylene block polymer; Polyoxypropylene/polyoxyethylene copolymer; POP/POE copolymer**Formula:** (C<sub>3</sub>H<sub>6</sub>O · C<sub>3</sub>H<sub>4</sub>O)<sub>n</sub>**Properties:** Liq., powd., or flake; 10-80% EO content; m.w. 1100-10,000; HLB 9.5-18.7; nonionic**Toxicology:** LD50 (IV, mouse) 129 mg/kg; TSCA listed**Uses:** Defoamer (metal cleaners, antifreeze, cutting fluids, water treatment, paper, textiles, rinse aids); demulsifier for drilling muds/crude oil processing; emulsifier/dispersant for pesticides, paint, emulsion polymerization; leather tanning aux.; wetting agent for pesticides, foundry resins, paper additives, rinse aids; wetting agent, defoamer for bottle washing detergents; surfactant; detergent; gellant; solubilizer; lubricant base for medical/pharmaceutical applics.; agric. adjuvant; in paper/paperboard in contact with aq./fatty foods; in cellophane for food pkg.**Regulatory:** FDA 21CFR §176.170, 177.1200**Trade Names:** Adekanol 25R-1; Adekanol 25R-2; Adekanol F-68; Adekanol F-88; Adekanol F-108; Adekanol F-127; Adekanol L-31; Adekanol L-34; Adekanol L-44; Adekanol L-61; Adekanol L-62; Adekanol L-64; Adekanol L-71; Adekanol L-72; Adekanol L-101; Adekanol L-121; Adekanol L-122; Adekanol P-84; Adekanol P-85; Adekanol P-103; Adekanol TR-701; Adekanol TR-702; Adekanol TR-704; Adekanol TR-913; Crisanol FA-260; Crisanol FA-660; Etopol 31-L; Etopol 61-L; Etopol 62-L; Etopol 62LF-L; Etopol 63-L; Etopol 81-L; Etopol 101-L; Imbentin-PAP/6100; Imbentin-PAP/6200; Imbentin-PAP/10200; Nonionic 1025-R; Nonionic 2025-R; Nonionic 4017-R; Nonionic 4025-R; Nonionic 5025-R; Nonionic 8017R; Nonionic 8025R; Pluronic® L10; Poly-Tergent® E-17A; Poly-Tergent® E-17B; Poly-Tergent® E-20B; Poly-Tergent® E-25B; Poly-Tergent® P-32A; Surfonic® POA-25R2; Surfonic® POA-L42; Surfonic® POA-L44; Surfonic® POA-L61; Surfonic® POA-L62; Surfonic® POA-L62LF; Surfonic®

POA-L64; Surfonic® POA-L81; Surfonic® POA-L101; Surfonic® POA-LF1; Surfonic® POA-LF2; Surfonic® POA-LF5; Surfonic® POA-S38; Synperonic PE/L62LF; T-Det® EPO-61; T-Det® EPO-62L; T-Det® EPO-64L; T-Det® EPO-104; Ucon® 75-H-9500; Ukanil 3500; Ukanil 3501

**EO/PO ethylenediamine block copolymer**

CAS 26314-40-5; 107397-59-1

*Synonyms:* Ethylenediamine propoxylate/ethoxylate

*Definition:* Block copolymer with PO blocks adjacent to the amine group; prods. with EO block in this position are also avail.

*Properties:* Liq. or flakes; nonionic

*Uses:* Demulsifier for crude oil; low-foaming surfactant for domestic/industrial cleaners; dispersant/thickener for paints, printing inks, cosmetics, rubber; solubilizer/wetting agent for textile/paper auxs.

*Trade Names:* Tetronic® 90R4; Tetronic® 150R1

**Eosin disodium.** See Acid red 87

**Eosine.** See Acid red 87

**Eosine G.** See Acid red 87

**Eosinic acid.** See Acid orange 11

**Eosin Y.** See Acid red 87

**Eosin YS.** See Acid red 87

**Epichlorohydrin**

CAS 106-89-8; EINECS/ELINCS 203-439-8; UN No. 2023 (DOT)

*Synonyms:* ECH; 1-Chloro-2,3-epoxypropane; 3-Chloro-1,2-epoxypropane; (Chloromethyl) ethylene oxide; Chloromethyloxirane; 2-(Chloromethyl) oxirane; Chloropropylene oxide;  $\gamma$ -Chloropropylene oxide; 3-Chloro-1,2-propylene oxide;  $\alpha$ -Epichlorohydrin; 1,2-Epoxy-3-chloropropane; 2,3-Epoxypropyl chloride; Glycerol epichlorohydrin

*Classification:* Chlorinated epoxide

*Empirical:* C<sub>3</sub>H<sub>5</sub>ClO

*Properties:* Colorless, highly volatile unstable liq., chloroform-like odor; sol. in ethanol, diethyl ether, chloroform, trichloroethylene, CCl<sub>4</sub>; misc. with oxygenated solvs.; sl. sol. in water; m.w. 92.53; dens. 1.17 kg/l; f.p. -25 C; b.p. 115.2 C; flash pt. 33.9 C; ref. index 1.4358

*Toxicology:* ACGIH TLV/TWA 2 ppm (skin); LD50 (oral, rat) 90 mg/kg, (IP, rat) 13 mg/kg, (subcut., rat) 150 mg/kg, (IV, rat) 154 mg/kg; poison by ing., skin contact, IV, and IP routes; mod. toxic by inh.; readily absorbed thru skin; corrosive; sensitizer; primary skin and eye irritant; human systemic effects by inh.; confirmed carcinogen; tumorigen; mutagen; experimental teratogen; human mutagenic data; TSCA listed

*Precaution:* Flamm.; mod. fire risk; explosive reaction with aniline; violent reaction with sulfuric acid or isopropylamine; exothermic polymerization with strong acids, caustic alkalis, aluminum, zinc, etc.; heating may cause polymerization

*Hazardous Decom. Prods.:* CO, CO<sub>2</sub>, hydrogen chloride gas, phosgene gas; heated to decomp., emits toxic fumes of Cl

NFPA: Health 3; Flammability 3; Reactivity 2

*Uses:* Intermediate for paints; major raw material for epoxy and phenoxy resins; mfg. of glycerol; solvent for cellulose esters and ethers; high wet-str. resins for paper industry; starch crosslinking agent

*Regulatory:* SARA reportable

*Manuf./Distrib.:* Aldrich; BASF; Fluka; ICC Chem.; Jarchem Ind.; Kessler; Rit-Chem; Sigma; United Min. & Chem.

**$\alpha$ -Epichlorohydrin.** See Epichlorohydrin

**Epichlorohydrin, adipic acid, diethylenetriamine polymer.** See Adipic acid/epoxypropyl diethylenetriamine copolymer

**Epichlorohydrin/dimethylamine copolymer.** See Dimethylamine/epichlorohydrin copolymer

**Epichlorohydrin/ethylene oxide copolymer**

*Classification:* Epichlorohydrin elastomer

*Definition:* Vulcanizate characterized by good solvent resist. and reasonable low temp. flexibility

*Formula:* (CHCH<sub>2</sub>ClCH<sub>2</sub>OCH<sub>2</sub>CH<sub>2</sub>O)<sub>x</sub>

*Uses:* Elastomer used for fuel pump diaphragms, pipe gaskets, hose for fuel, oil, and gas, vibration isolators, motor mounts, rolls, adhesives, sponge goods, boots, seals, o-rings, bladders; paper/printing/copier roller coverings; vehicle seals, hoses, and membranes

**Epoxides, polymers, epoxy resins.** See Epoxy resin

**Epoxydized soybean oil acrylate**

*Uses:* Offers good flexibility, pigment wetting; for use in UV and EB curing compositions incl. overprint varnishes, lithographic inks

*Trade Names:* CN 111

**Epoxy acrylate**

*Synonyms:* Bisphenol A epoxy acrylate; Epoxy-acrylate resins

*Definition:* Acrylate oligomonomer

*Empirical:* C<sub>6</sub>H<sub>6</sub>O<sub>3</sub>

*Formula:* CH<sub>2</sub>CHCOOCH<sub>2</sub>CHOCH<sub>2</sub>

*Uses:* Curing agent for paper clear coatings, wood top coatings, screen inks, litho inks, polyethylene coatings, metal decorative coatings, adhesive papers, wood fillers, solder masks and photoresists; binder for radiation-cured printing inks, paper-foil lacquers; UV-reactive inks and varnishes

*Manuf./Distrib.:* Monomer-Polymer & Dajac Labs

*Trade Names:* CN 104; CN 117; CN 118; CN 120; CN 124; Ebecryl® 3500; Ebecryl® 3701; Ebecryl® 3702; Epotuf® 3000; Epotuf® 3020-20 HDDA; Epotuf® 3020-25 TPGDA; Epotuf® 3210; Epotuf® 3230

*Trade Names Containing:* CN 104 A80; CN 104 B80; CN 120 A75; CN 120 B60; CN 120 B80; CN 120 C60; CN 120 C80; CN 120 D80; CN 120 E50; CN 120 M50; Ebecryl® 3701-20T; Photomer® 3016-20T; Photomer® 3016-40R; Photomer® 3016-40T; Photomer® 3038

**Epoxy-acrylate resins.** See Epoxy acrylate

**Epoxy, bisphenol A**

*Synonyms:* Bisphenol A epoxy resin; Epoxy bisphenol A resin

*Toxicology:* TSCA listed

*Uses:* Heat stabilizer for PVC; exc. halogen capture for flame retardant resins; vehicle or binder in surf. coatings; food-contact coatings; laminating, potting, encapsulation, casting, tooling, coatings, and flooring applics.

*Manuf./Distrib.:* Archway Sales; Ashland; Baychem; Cardolite; Ciba Spec. Chems./Addit.; GCA; Lenape Ind.; Lomas Int'l.; Reichhold; Samson; Shell; United Min. & Chem.

*Trade Names:* EPON® Resin 825; EPON® Resin 826; EPON® Resin 828; EPON® Resin 1001F; EPON® Resin 1004F; EPON® Resin 1007F; EPON® Resin 1009F

*Trade Names Containing:* Araldite® PY 302-2; EPON® Resin 2002-FC-10

**Epoxy bisphenol A resin.** See Epoxy, bisphenol A

**Epoxy, bisphenol F**

*Synonyms:* Epoxy-bisphenol F resin

*Uses:* Resin modifier; visc. modifier for epoxy novolacs; for adhesives; tank linings; flooring; filament winding; casting; pultrusion; RTM; surf. coating applics; food-contact coatings

*Manuf./Distrib.:* Eastech; K&S Ind.; Seegott; Vantico AG

*Trade Names:* Araldite® 93-100

*Trade Names Containing:* Araldite® PY 302-2

**Epoxy-bisphenol F resin.** See Epoxy, bisphenol F

**1,4-Epoxybutane.** See Tetrahydrofuran

**1,2-Epoxy-3-chloropropane.** See Epichlorohydrin

**Epoxy compds.** See Epoxy resin

**Epoxy cresol novolac**

CAS 29690-82-2

*Synonyms:* ECN; Epoxy-cresol-novolac resin; Poly ((o-cresyl glycidyl ether)-co-formaldehyde)

*Classification:* Polymer

*Properties:* Dens. 1.120; m.p. 85-95 C

*Toxicology:* Irritating to eyes, skin, respiratory system; possible sensitizer; TSCA listed

*Uses:* Epoxy resin for high-temp. adhesives, coatings, food-contact coatings, electrical and laminating product areas; modifier for powd. coatings; hardener in adhesives, fiber sizing, textiles, paper treatment

*Manuf./Distrib.:* Aldrich; Chugai Boyeki Am.; GCA; K&S Ind.; Vantico AG

*Trade Names:* Araldite® 94-105; Araldite® ECN 1400; Araldite® PY 323; Araldite® PZ 3917; Araldite® XU 3900; Araldite® XU 3903

*Trade Names Containing:* Araldite® PZ 3901

**Epoxy-cresol-novolac resin.** See Epoxy cresol novolac

**Epoxyethane.** See Ethylene oxide

**1,2-Epoxyethane.** See Ethylene oxide

**Epoxy novolac acrylate**

*Uses:* Provides heat and solvent resist. to solder resists, marking inks, adhesion on metalized substrates, low shrinkage coatings, heat-resist. applics.

*Trade Names Containing:* CN 112 C60

**2,3-Epoxy-1-propanol, methacrylate.** See Glycidyl methacrylate**2,3-Epoxypropyl chloride.** See Epichlorohydrin**2,3-Epoxypropyl methacrylate.** See Glycidyl methacrylate**Epoxy resin**

CAS 25928-94-3

*Synonyms:* Condensation prods., epoxy; Epoxides, polymers, epoxy resins; Epoxy compds.; Ethers, cyclic, epoxides, polymers; Plastics, epoxy; Polyethers, epoxy resins

*Classification:* Polymer

*Definition:* A thermosetting resin based on the reactivity of the epoxide group

*Toxicology:* LD50 (oral, rat) 2200 mg/kg; strong skin irritant in uncured state; poison by inhalation; moderately toxic by ingestion; little or no toxicity in cured state

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of Cl

*Uses:* Plasticizer for surface coatings; adhesive for composites, metals, glass, ceramics; casting metal-forming tools and dies; encapsulation of elec. parts; cements and mortars; rigid foams; stabilizer, modifier for other resins; biomaterial for pharmaceutical topicals, slow-release, and microencapsulation prods.; diluent; in food-contact coatings; in food-contact polysulfide polymer/polyeoxy resins

*Regulatory:* FDA 21CFR §175.300, 177.1390, 177.1650

*Manuf./Distrib.:* Abatron; Archway Sales; Ashland; Cardolite; Celanese; Chemcentral; Cognis; Conap; Crompton/Witco; Dow Plastics; Elementis Spec. Perf. Polymers; Emerson & Cuming; Ferro/Bedford; GCA; ICC Chem.; Key Polymer; Miljac; Monomer-Polymer & Dajac Labs; Monsanto; Morton Int'l.; Reichhold; Samson; Sartomer; Seegott; U.S. Chems.; Union Carbide; United Min. & Chem.; Vantico AG; Whyte Chems. Ltd

*Trade Names:* Adeka Optomer KR Series

**Epsom salts.** See Magnesium sulfate anhydrous; Magnesium sulfate heptahydrate**Erucamide**

CAS 112-84-5; EINECS/ELINCS 204-009-2

*Synonyms:* Docosenamide; 13-Docosenamide; cis 13-Docosenamide; (Z)-Docos-13-enamide; Erucic acid amide; Erucylamide

*Classification:* Aliphatic amide

*Empirical:* C<sub>22</sub>H<sub>43</sub>NO

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>7</sub>CH=CH(CH<sub>2</sub>)<sub>11</sub>CONH<sub>2</sub>

*Properties:* Wh. waxy beads; sol. in IPA; sl. sol. in alcohol, acetone, oxygenated solvs.; insol. in water; dens. 0.888; m.p. 75-80 C; iodine no. 72-80

*Precaution:* Combustible

*Uses:* Foam stabilizer; solvent for waxes and resins, emulsions; slip/antiblock agent for polyethylene; lubricant, mold release for rubber and plastics; slip improvement additive in printing inks; opacifier; visc. control agent; lamination of polyethylene to cellophane and in polyethylene extrusion coatings; release agent in food-contact polymers and petroleum wax; in food-pkg. adhesives; in paper/paperboard in contact with dry food; in closure-sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 176.180, 177.1200, 177.1210, 178.3860

*Manuf./Distrib.:* Akzo Nobel; Aldrich; Allchem Ind.; Century Multech; Chemax; Croda Universal Ltd; Dama Chems.; Eastech; Fallek; Ferro; Lutianhua; Sigma; Uniqema N. Am.; Vilax

*Trade Names:* Struktol® TR 131

**Erucic acid amide.** See Erucamide**Erucylamide.** See Erucamide**Ethal.** See Cetyl alcohol**Ethanaminium, N-(4-(bis(4-(diethylamino) phenyl) methylene)-2,5-cyclohexadien-1-ylidene)-N-ethyl-, chloride.** See Basic violet 4**Ethanaminium, N-[6-(diethylamino)-9-(2,4-disulfophenyl)-3H-xanthen-3-ylidene]-N-ethyl-, hydroxide, inner salt, sodium salt.** See Acid red 52**Ethanaminium, N-4-[[4-(diethylamino) phenyl] (2,4-disulfophenyl) methylene]-2,5-cyclohexadien-1-ylidene]-N-ethyl-, hydroxide, inner salt, sodium salt.** See Acid blue 1**Ethanaminium, N,N,N-trimethyl-2-[(2-methyl-1-oxo-2-propenyl) oxy]-, methyl sulfate, polymer with 2-propenamide.** See Polyquaternium-5**Ethanedial.** See Glyoxal**1,2-Ethanedial.** See Glyoxal**1,2-Ethanediamine.** See Ethylenediamine**1,2-Ethanediamine, N-(2-aminoethyl)-N'-(2-((2-aminoethyl) amino) ethyl)-.** See Tetraethylenepentamine**Ethane, 1,1-dichloro-1-fluoro-.** See Dichlorofluoroethane**1,2-Ethandiol.** See Glycol**Ethane-1,2-diol.** See Glycol**1,2-Ethandiol dimethacrylate.** See Ethylene glycol dimethacrylate**1,1-Ethandiol, 2,2,2-trichloro-.** See Chloral hydrate**1,2-Ethanediybiscarbamodithioic acid disodium salt.** See Nabam**N,N'-1,2-Ethanediybis[N-(carboxymethyl) glycine].** See Edetic acid**N,N'-1,2-Ethanediybis (N-(carboxymethyl) glycine) tetrasodium salt.** See Tetrasodium EDTA**N,N'-1,2-Ethanediybis [N-(carboxymethyl) glycine], trisodium salt.** See Trisodium EDTA**(1,2-Ethanediybis (nitrilobis (methylene))) tetrakisphosphonic acid.** See Ethylenediaminetetra (methylene phosphonic acid)**N,N'-1,2-Ethanediybisoctadecanamide.** See Ethylene distearamide**N,N'-1,2-Ethanediybis-9-octadecanamide.** See Ethylene dioleamide**1,2-Ethanediybis (oxy) bismethanol**

*Uses:* Biocide

*Trade Names:* Nipacide® FC

**1,2-Ethanediy bromoacetate.** See 1,2-Bis (bromoacetoxyl) ethane**Ethane-1-hydroxy-1,1-diphosphonate.** See Etidronic acid**Ethane-1-hydroxy-1,1-diphosphonic acid, tetrasodium salt.** See Tetrasodium etidronate**Ethaneperoxic acid.** See Peracetic acid**1,1,1-Ethanetriol diphosphonate.** See Etidronic acid**Ethanoic acid.** See Acetic acid**Ethanoic acid, ethenyl ester.** See Vinyl acetate**Ethanol.** See Alcohol**Ethanolamine**

*Empirical:* C<sub>2</sub>H<sub>7</sub>NO

*Formula:* NH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>OH

*Properties:* Colorless clear mod. visc. liq., ammoniacal odor; misc. with water, alcohol, acetone, glycerin; sol. in chloroform; sl. sol. in benzene; m.w. 61.10; dens. 1.012; m.p. 10.5 C; b.p. 170 C; flash pt. 93 C; ref. index 1.4540

*Toxicology:* ACGIH TLV/TWA 3 ppm; LD50 (oral, rat) 2140 mg/kg, (skin, rat) 1500 mg/kg; poison by IP route; mod. toxic by ingestion, skin contact, subcut., IV routes; corrosive irritant to eyes, skin, mucous membranes; TSCA listed

*Precaution:* DOT: Corrosive material; flamm. exposed to heat or flame; powerful reactive base

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NO<sub>x</sub>, NFPA: Health 3; Flammability 2; Reactivity 0

*Storage:* Hygroscopic; store in cool, dry well-ventilated area away from heat and ignition sources

*Uses:* Scrubbing acid gases, esp. in synthesis of ammonia; nonionic detergents for dry-cleaning wool treatment, emulsion paints, polishes, agricultural sprays; chemical intermediate; emulsifier for pharmaceuticals; corrosion inhibitor; chem. intermediate for mfg. rubber, vulcanization accelerators; flume wash water additive for food processing; dispersant for agric. chems., polishes, cleansers, paints, cosmetics; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; adjuvant in silicides in food-contact paper/paperboard; in food-contact animal glues; buffering agent

*Use Level:* Limitation 0.3 ppm (in wash water)

*Regulatory:* FDA 21CFR §173.315, 175.105, 176.210, 176.300, 178.3120; not permitted for use in foods intended for babies and young infants in UK; USP/NF, BP compliance

*Manuf./Distrib.:* Aldrich; Allchem Ind.; BP Chems. Ltd; Degussa-Hüls AG; Fluka; Houghton Chem.; Huntsman; Int'l. Chem. Inc; Occidental; Oxiteno;

Research Organics; Romil Ltd; Ruger; Sal Chem.; Sigma; Spectrum Quality Prods.; Union Carbide; Varsal Instruments; Whyte Chems. Ltd  
*Trade Names:* MEA Commercial Grade; MEA Low Freeze Grade; MEA Low Iron Grade; MEA Low Iron-Low Freeze Grade; MEA NF Grade

**β-Ethanolamine.** See Ethanolamine

**Ethanol, 2,2'-((3-aminopropyl)imino)bis-**. See N-(3-Aminopropyl) diethanolamine

**Ethanol, undenatured.** See Alcohol

**Ethanone, 2,2-dimethoxy-1,2-diphenyl-**. See 2,2-Dimethoxy-2-phenylacetophenone

**Ethene, chloro-, homopolymer.** See Polyvinyl chloride

**trans-1,2-Ethenedicarboxylic acid.** See Fumaric acid

**Ethene, 1,1-dichloro-, homopolymer.** See Polyvinylidene chloride

**Ethene, 1,1-dichloro-, polymer with chloroethene.** See Vinylidene chloride/vinyl chloride copolymer

**2,2'-(1,2-Ethenediyl) bis (5-aminobenzenesulfonic acid).** See 4,4'-Diaminostilbene-2,2'-disulfonic acid

**Ethene, homopolymer.** See Polyethylene

**Ethene, homopolymer, oxidized.** See Polyethylene, oxidized

**Ethene oxide.** See Ethylene oxide

**Ethene polymer.** See Polyethylene

**Ethenol homopolymer.** See Polyvinyl alcohol

**Ethenyl acetate.** See Vinyl acetate

**Ethenyl acetate, homopolymer.** See Polyvinyl acetate

**Ethenyl acetate, polymer with 2-butenic acid.** See VA/crotonates copolymer

**Ethenylbenzene homopolymer.** See Polystyrene

**Ethenylbenzene polymer with 1,3-butadiene.** See Styrene/butadiene polymer

**Ethenyl ethanoate.** See Vinyl acetate

**1-Ethenyl-2-pyrrolidinone homopolymer.** See PVP

**1-Ethenyl-2-pyrrolidinone, polymer with ethenylbenzene.** See Styrene/PVP copolymer

**1-Ethenyl-2-pyrrolidinone polymers.** See PVP

**Ethers, cyclic, epoxides, polymers.** See Epoxy resin

**Ethiops iron.** See Iron oxide black

**3-Ethochloride of 9-o-carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene.** See Basic violet 10

**Ethol.** See Cetyl alcohol

**Ethoxycarbonylethylene.** See Ethyl acrylate

**9-(2-Ethoxycarbonyl) phenyl-3,6-bis (ethylamino)-2,7-dimethylxanthylumolybdatetungstatephosphate.** See Pigment red 81

**Ethoxydiglycol**

CAS 111-90-0; EINECS/ELINCS 203-919-7

*Synonyms:* DEGEE; Carbitol; Diethylene glycol ethyl ether; Diethylene glycol monoethyl ether; Diglycol monoethyl ether; Ethanol, 2-(2-ethoxyethoxy); 2-(2-Ethoxyethoxy) ethanol; Ethyl diethylene glycol; Ethylene diglycol monoethyl ether

*Classification:* Aliphatic ether alcohol

*Empirical:* C<sub>6</sub>H<sub>14</sub>O<sub>3</sub>

*Formula:* CH<sub>2</sub>OHCH<sub>2</sub>OCH<sub>2</sub>CH<sub>2</sub>OC<sub>2</sub>H<sub>5</sub>

*Properties:* Colorless liq., mild pleasant odor; sol. in water and org. solvs., e.g., acetone, benzene, chloroform, ethanol, ether; m.w. 134.20; dens. 0.990 (20 C); m.p. -76 C; b.p. 195-202 C; flash pt. (OC) 96.1 C; ref. index 1.425 (25 C)

*Toxicology:* LD50 (oral, rat) 5500 mg/kg, (IP, rat) 6310 mg/kg, (IV, rat) 2200 mg/kg, (skin, rat) 6000 mg/kg; mod. toxic by ing., IP, IV, and other routes; mildly toxic by skin contact; skin and eye irritant; can be absorbed thru skin, but health effects unlikely; ing. may cause CNS depression, respiratory depression, sl. kidney injury, thirst, metabolic acidosis and cyanosis; high/repeated exposure may affect kidney; experimental reproductive

effects; mutation data; TSCA listed

*Precaution:* Combustible liq. and vapor; peroxide former; can react with oxidizers

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Store in cool, dry, well-ventilated area, out of direct sunlight; very hygroscopic

*Uses:* Solvent for dyes, nitrocellulose, resins, paints, inks, textile printing, lacquers, quick-dry varnishes, enamels, wood stains, thinners, cosmetics; mutual solvent for mineral oil-soap and mineral oil-sulfonated oil mixts.; humectant; soaps; organic synthesis; brake fluid diluent; mfg. of plasticizers; solvent, thinner in nail enamels; solvent, solubilizer, cosurfactant for pharmaceuticals; in food-pkg. adhesives; in paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §175.105, 176.180

*Manuf./Distrib.:* Aldrich; Allchem Ind.; Ashland; Eastman; Fluka; Great Western; M.M.P.; Occidental; Oxiteno; Ruger; Sigma; Spectrum Quality Prods.; Union Carbide

*Trade Names Containing:* FC-520

**2-(2-Ethoxyethoxy) ethanol.** See Ethoxydiglycol

**Ethoxyethoxyethyl acrylate.** See 2-(2-Ethoxyethoxy) ethyl acrylate

**2-(2-Ethoxyethoxy) ethyl acrylate**

*Synonyms:* EEOEOA; Ethoxyethoxyethyl acrylate

*Uses:* Monomer, reactive diluent for radiation-curable ink and coating formulations

*Manuf./Distrib.:* Monomer-Polymer & Dajac Labs; Morton Int'l.

*Trade Names Containing:* CN 970 H75; CN 973 H85

**Ethoxylated fatty alcohols (C16-18).** See Ceteareth

**Ethoxylated tridecyl alcohol.** See Trideceth

**8-((4'-((4-Ethoxyphenyl) azo)-3,3'-dimethyl (1,1'-biphenyl)-4-yl) azo)-7-hydroxy-1,3-naphthalenedisulfonic acid, disodium salt.** See Direct red 39

**Ethyl acetate**

CAS 141-78-6; EINECS/ELINCS 205-500-4; UN No. 1173 (DOT); FEMA 2414

*Synonyms:* Acetic acid, ethyl ester; Acetic ester; Acetic ether; Acetoxyethane; Ethyl acetic ester; Ethyl ethanoate; Vinegar naphtha

*Classification:* Sat. aliphatic carboxylic acid ester

*Definition:* Ester of ethyl alcohol and acetic acid

*Empirical:* C<sub>4</sub>H<sub>8</sub>O<sub>2</sub>

*Formula:* CH<sub>3</sub>COOC<sub>2</sub>H<sub>5</sub>

*Properties:* Colorless liq., fragrant fruity odor, acetous burning taste; sol. in chloroform, alcohol, ether, acetone, benzene, fixed and volatile oils; sl. sol. in water; m.w. 88.12; dens. 0.902 (20/4 C); bulk dens. 0.8945 g/ml; f.p. -83.6 C; b.p. 77 C; flash pt. -4.4 C; ref. index 1.3723; surf. tens. 24 dynes/cm (20 C)

*Toxicology:* ACGIH TLV/TWA 400 ppm; LD50 (oral, rat) 5620 mg/kg, (IP, mouse) 709 mg/kg; LC50 (inh., rat, 8 h) 1600 ppm; poison by inh.; mod. toxic by IP and subcut. routes; mildly toxic by ing.; irritant to eyes, skin, mucous membranes; human systemic effects by inh.; mildly narcotic; CNS depressant; can cause dermatitis; high concs. can cause liver/kidney congestion; mutagenic data; TSCA listed

*Precaution:* DOT: Flamm. liq.; very dangerous fire hazard exposed to heat or flame; can react vigorously with oxidizers; incompat. with strong oxidizers, strong acids, bases, potassium t-butoxide

*Hazardous Decomp. Prods.:* Ethanol, acetic acid; heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1; Flammability 3; Reactivity 0

*Storage:* Store in cool, dry, well-ventilated area, out of direct sunlight, away from heat/ignition sources

*Uses:* General solvent in automotive paints, coatings, plastics, lacquers, printing inks, adhesives, organic synthesis, smokeless powders, artificial leather, photographic films and plates, pharmaceuticals; vehicle in cosmetics; synthetic fruit essences; flavoring agent in foods/pharmaceuticals; fragrance ingred.; spotting solvent (dry cleaning); cleaning textiles; nail polish removers; color diluent, extraction solvent for food use; reagent; adjuvant in resinous/polymeric food-contact coatings; in cellophane for food pkg.

*Use Level:* 67 ppm (nonalcoholic beverages), 50-65 ppm (alcoholic bever-

ages), 99 ppm (ice cream, ices), 170 ppm (candy), 170 ppm (baked goods), 200 ppm (gelatins, puddings), 1400 ppm (chewing gum); ADI 0-25 mg/kg (FAO/WHO)

*Regulatory:* FDA 21CFR § 73.1, 172.560, 173.228, 175.320, 177.1200, 182.60, GRAS; 27CFR § 21.106; FEMA GRAS; Japan approved with restrictions; FDA approved for ophthalmics, orals, topicals; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* Aldrich; Alfrebro; Allchem Ind.; Ashland; BP Amoco; BP Chems. Ltd; Baychem; Berje; Brown; Celanese; Chemcentral; Chisso Am.; Degussa-Hüls AG; Eastman; Fisher Scientific; Fluka; Harcross; Houghton Chem.; Hukill; J.T. Baker; Lonza Ltd; Mallinckrodt Baker; Monsanto; Penta Mfg.; Punda Mercantile; Romil Ltd; Ruger; Sal Chem.; Samson; Sigma; Spectrum Quality Prods.; Sunnyside; Union Carbide; Van Waters & Rogers

*Trade Names Containing:* Metalure® L-55350

**Ethyl acetic ester.** See Ethyl acetate

### Ethyl acrylate

CAS 140-88-5; EINECS/ELINCS 205-438-8; UN No. 1917 (DOT); FEMA 2418

*Synonyms:* Acrylic acid, ethyl ester; Ethoxycarbonylethylene; Ethyl propenoate; Ethyl 2-propenoate; 2-Propenoic acid, ethyl ester

*Definition:* Esterification of acrylic acid

*Empirical:* C<sub>5</sub>H<sub>8</sub>O<sub>2</sub>

*Formula:* CH<sub>2</sub>:CHCOOC<sub>2</sub>H<sub>5</sub>

*Properties:* Colorless liq., penetrating and persistent odor; sol. in alcohol, ether, oxygenated solvs.; sl. sol. in water; m.w. 100.12; sp.gr. 0.918; m.p. -71 to -75 C; f.p. 60 F; b.p. 99-100 C; ref. index 1.4068

*Toxicology:* ACGIH TLV/TWA 5 ppm; STEL 15 ppm; LD50 (oral, rat) 800 mg/kg, (IP, rat) 450 mg/kg; LC50 (inh., mouse) 16,200 mg/m<sup>3</sup>; poison by ing. and inh.; mod. toxic by skin contact and IP routes; skin and eye irritant; human systemic effects by inh.; pulmonary changes; can severely irritate gastroenteric tract; may cause dyspnea, cyanosis, convulsions; migrates to food from pkg.; delisted as human carcinogen; TSCA listed

*Precaution:* Flamm. liq.; very dangerous fire hazard exposed to heat/flame; can react vigorously with oxidizers; readily polymerized; violent reaction with chlorosulfonic acid

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Acrylic resin comonomer for paints, adhesives, textiles, leather, paper coatings; nitrile rubber comonomer; synthetic flavoring agent in foods and pharmaceuticals; nonwoven binder; modifier for oils/alkyds in food-contact coatings

*Use Level:* 0.13-0.26 ppm (nonalcoholic beverages), 0.06-1 ppm (ice cream, ices), 1.1 ppm (candy), 1.1 ppm (baked goods), 0.1 ppm (chewing gum)

*Regulatory:* FDA 21CFR § 172.515, 175.300; FEMA GRAS; SARA reportable; BP compliance

*Manuf./Distrib.:* Aldrich; Allchem Ind.; Ashland; Bencorp Int'l.; Celanese; Filo; Fluka; G.J. Chem.; LG Chem. Am.; Union Carbide; Whyte Chems. Ltd

*Trade Names:* Rohamere® 84116

*Trade Names Containing:* Rohamere® 21; Rohamere® 61; Rohamere® 132; Rohamere® 568; Rohamere® 977; Rohamere® 1900-D; Rohamere® 1960-D; Rohamere® 3045; Rohamere® 8437; Rohamere® 8464; Rohamere® 8478; Rohamere® 8596; Rohamere® 8662; Rohamere® 9158; Rohamere® 84124; Rohamere® 87219

### Ethyl acrylate/2-ethylhexylacrylate copolymer

CAS 26376-86-3

*Uses:* Defoamer, deaerator in lubricating oil dispersions

*Trade Names:* Modaflow® 2100; Modaflow® Resin

*Trade Names Containing:* Modaflow® Powder 2000; Modaflow® Powder III; Multiflow® Resin

**Ethyl acrylate latex.** See Polyethylacrylate

**Ethyl acrylate resin.** See Polyethylacrylate

**Ethyl acrylate resin polymer.** See Polyethylacrylate

**Ethyl alcohol.** See Alcohol

**Ethyl alcohol, undenatured.** See Alcohol

**2-((6-Ethylamino)-3-ethylimino-2,7-dimethyl-3H-xanthene-9-yl) benzoic acid, ethyl ester with molybdenum tungsten hydroxide oxide phosphate.** See Pigment red 81

**2-(N-Ethylanilino) ethanol.** See Phenylethylethanolamine

**Ethyl trans-2-butenate.** See Ethyl crotonate

**Ethyl carbinol.** See Propyl alcohol

**Ethyl citrate.** See Triethyl citrate

### Ethyl crotonate

CAS 623-70-1; 10544-63-5; EINECS/ELINCS 210-808-7; UN No. 1862 (DOT); FEMA 3486

*Synonyms:* 2-Butenoic acid, ethyl ester; trans-2-Butenoic acid ethyl ester; Crotonic acid, ethyl ester; Ethyl trans-2-butenate; Ethyl α-crotonate; Ethyl β-methylacrylate

*Definition:* Obtained by esterification of crotonic acid with ethyl alcohol in presence of conc. H<sub>2</sub>O<sub>4</sub>

*Empirical:* C<sub>8</sub>H<sub>10</sub>O<sub>2</sub>

*Formula:* CH<sub>3</sub>CH:CHCOOC<sub>2</sub>H<sub>5</sub>

*Properties:* Water-wh. solid or liq., char. pungent persistent odor; sol. in alcohol, ether, oxygenated solvs.; insol. in water; m.w. 114.15; dens. 0.916 (20/4 C); m.p. 45 C; b.p. 126 C (cis), 145 C (trans); flash pt. 2 C; ref. index 1.425 (20 C)

*Toxicology:* LD50 (oral, rat) 3 g/kg; corrosive; sl. toxic by ing.; lachrymator; strong irritant to eyes, skin, respiratory system; TSCA listed

*Precaution:* Highly flamm.; dangerous fire risk

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Storage:* Keep away from ignition sources

*Uses:* Solvent; softening agent; lacquers; organic synthesis; fragrance ingred.; synthetic flavoring agent for foods and pharmaceuticals; mfg. of copolymers with vinyl acetate used in lacquers and paper sizing; mfg. of DL-threonine, vitamin A

*Regulatory:* FDA 21CFR § 172.515; FEMA GRAS

*Manuf./Distrib.:* Aldrich; Fluka; Grau Aromatics

**Ethyl α-crotonate.** See Ethyl crotonate

**Ethyl diethylene glycol.** See Ethoxydiglycol

### Ethyl 4-(dimethylamino) benzoate

CAS 10287-53-3; EINECS/ELINCS 233-634-3

*Synonyms:* 4-Dimethylaminobenzoic acid, ethyl ester; Ethyl-p-(dimethylamino) benzoate

*Classification:* Amine

*Empirical:* C<sub>11</sub>H<sub>15</sub>NO<sub>2</sub>

*Properties:* Sol. in acrylates; m.w. 193.25; m.p. 61-64 C

*Toxicology:* TSCA listed

*Uses:* UV photoinitiator, photoactivator, synergist for UV-cured coatings, lacquers, printing inks

*Manuf./Distrib.:* Aldrich; ChemFirst; Fluka; Hampford Research; Nordic Synthesis AB

*Trade Names:* Esacure® EDB

**Ethyl-p-(dimethylamino) benzoate.** See Ethyl 4-(dimethylamino) benzoate  
**N-Ethyl-N,N-dimethyl-3-[(1-oxoisooctadecyl) amino]-1-propanaminium ethyl sulfate.** See Isostearamidopropyl ethyldimonium ethosulfate

**Ethyldimethyl [3-[(1-oxoisooctadecyl) amino] propyl] ammonium ethyl sulfate.** See Isostearamidopropyl ethyldimonium ethosulfate

### Ethylene/acrylic acid copolymer

CAS 9010-77-9

*Synonyms:* EAA; Poly (ethylene-co-acrylic acid); 2-Propenoic acid with ethene; 2-Propenoic acid, polymer with ethene

*Definition:* Copolymer of ethylene and acrylic acid monomers

*Formula:* (CH<sub>2</sub>CH<sub>2</sub>)<sub>x</sub>[CH<sub>2</sub>CH(CO<sub>2</sub>H)]<sub>y</sub>

*Properties:* Solid; dens. 0.960

*Toxicology:* Irritant; TSCA listed

*Uses:* Binder for nonwoven fibers; lubricant and processing aid for plastics; pigment dispersant; gellant for cosmetic oils; anticorrosion agent; flattening/antisetling agent in paints; emulsion stabilizer; film-former; adhesive film (carpet underlay); laminating adhesives (aluminum/plastic film); mold release; in polishes; coatings; in food pkg.; in paper/paperboard in contact with aq./fatty foods; food-contact surfaces

*Regulatory:* FDA 21CFR § 176.170, 177.1310, 178.1005

*Manuf./Distrib.:* Aldrich

*Trade Names:* A-C® 540; A-C® 540A; A-C® 580; A-C® 5120; A-C® 5180; Nucrel® 3990

**Ethylene/acrylic acid/VA copolymer.** See Ethylene/acrylic acid/vinyl acetate copolymer

**Ethylene/acrylic acid/vinyl acetate copolymer**

CAS 26713-18-8

*Synonyms:* Ethylene/acrylic acid/VA copolymer; 2-Propenoic acid, polymer with ethene and ethenyl acetate

*Definition:* Copolymer of ethylene, acrylic acid, and vinyl acetate monomers

*Uses:* Film-former for adhesives, floor finishes, general coatings; emulsions; food-pkg. adhesives; in paper/paperboard in contact with dry food

*Trade Names:* ACTer® 1450

**Ethylene alcohol.** See Glycol

**Ethylene aldehyde.** See Acrolein

**Ethylene bis (bromoacetate).** See 1,2-Bis (bromoacetoxy) ethane

**Ethylenebis (dithiocarbamate) disodium salt.** See Nabam

**Ethylenebis (dithiocarbamic acid) disodium salt.** See Nabam

**Ethylenebis (iminodiacetic acid) tetrasodium salt.** See Tetrasodium EDTA

**N,N'-Ethylenebisoleamide.** See Ethylene dioleamide

**Ethylene bis (stearamide).** See Ethylene distearamide

**N,N'-Ethylene bisstearamide.** See Ethylene distearamide

**Ethylenebisstearamide.** See Ethylene distearamide

**Ethylenebis (stearylamide).** See Ethylene distearamide

**Ethylene bromoacetate.** See 1,2-Bis (bromoacetoxy) ethane

**Ethylene/butyl acrylate copolymer**

CAS 25750-84-9

*Synonyms:* Poly (ethylene-co-butyl acrylate)

*Classification:* Acrylic polymer

*Definition:* Copolymer of ethylene and butyl acrylate monomers

*Formula:*  $(\text{CH}_2\text{CH}_2)_x[\text{CH}_2\text{CH}[\text{CO}_2(\text{CH}_2)_3\text{CH}_3]]_y$

*Properties:* Pellets; melt index 35-45 g/10 min (35% butyl acrylate); sp.gr. 0.930

*Toxicology:* May be harmful by inh., ing., or skin absorption; may cause eye/skin irritation; may irritate mucous membranes and upper respiratory tract; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents, acids; capable of creating a dust explosion in powd. form

*Hazardous Decomp. Prods.:* Toxic fumes of CO, CO<sub>2</sub>; emits toxic fumes under fire conditions

*Storage:* Store in cool, dry place; keep tightly closed

*Uses:* For extrusion coating, adhesives, food-pkg. adhesives; for coatings and laminations with oriented PP, PET, papers, clay-coated board and nylon substrates for specialty pkg.

*Manuf./Distrib.:* Aldrich

*Trade Names:* Enathene® EA 720-009

**Ethylenecarboxamide.** See Acrylamide

**Ethylene carboxylic acid.** See Acrylic acid

**Ethylene, chloro-, polymer.** See Polyvinyl chloride

**Ethylene, chlorotrifluoro-, polymers.** See Chlorotrifluoroethylene polymer

**Ethylenediamine**

CAS 107-15-3 (anhyd.); 6780-13-8 (monohydrate); EINECS/ELINCS 203-468-6; UN No. 1604 (DOT)

*Synonyms:* EDA; 1,2-Diaminoethane; Dimethylenediamine; 1,2-Ethanediamine

*Classification:* Aliphatic organic compd.; aliphatic polyamine

*Empirical:* C<sub>2</sub>H<sub>6</sub>N<sub>2</sub>

*Formula:* NH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>NH<sub>2</sub>

*Properties:* Colorless to sl. yel. clear volatile liq., ammonia-like odor; sol. in acetone, ethanol, dimethylsulfoxide, benzene, water; sl. sol. in diethyl ether, heptane; misc. with water, alcohol, oxygenated and aromatic solvs.; m.w. 60.12; dens. 0.8994 (20/4 C); m.p. 8.5 C; b.p. 117.2 C; flash pt. (CC) 42 C; ref. index 1.4565

*Toxicology:* TLV/TWA 10 ppm; LD50 (oral, rat) 500 mg/kg; human irritant poison by inh.; mod. toxic by ingestion, skin contact; corrosive; severe skin and eye irritant; lachrymator; allergen, sensitizer; mutagenic data; TSCA listed

*Precaution:* DOT: Corrosive material; flamm. exposed to heat, flame, oxidizers; can react violently with acetic acid, acetic anhydride, acrylic acid, epichlorohydrin, many others; absorbs CO<sub>2</sub> from air to form the carbamate salt

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, hydrogen cyanide, volatile amines;

heated to decomp., emits toxic fumes of NO<sub>x</sub> and NH<sub>3</sub>

NFPA: Health 3; Flammability 2; Reactivity 0

*Storage:* Hygroscopic; air-sensitive

*Uses:* Chemical intermediate in mfg. of fungicides, chelating agents, polyamide resins, corrosion inhibitors, rubber chems., dimethylolethylene-urea resins, syn. waxes, fuel additives; solvent; emulsifier; textile lubricants; antifreeze inhibitor; agric.; ion-exchange resins; epoxy curing agent; thermoplastics lubricants; stabilizer for dyes; solvent for shellac; flume wash water additive for food processing; antimicrobial for cane-sugar/beet-sugar mills; stabilizer, buffer for pharmaceuticals; in food-pkg. adhesives; adjuvant in slimicides in food-contact paper/paperboard; in food-contact animal glues

*Use Level:* Limitation 0.1 ppm (in wash water), zero tolerance (milk)

*Regulatory:* FDA 21CFR §173.315, 173.320 (1 ppm max.), 175.105, 176.300, 178.3120, 556.270, 181.30; FDA approved for IV, injectables, orals, rectals, topicals; USP, BP, Ph.Eur., JP compliance

*Manuf./Distrib.:* Aldrich; Allchem Ind.; BASF AG; BASF; Coyne; Diamines & Chems. Ltd; Dow; Fluka; Houghton Chem.; Nova Molecular Tech.; Sigma; Spectrum Quality Prods.; Tosoh; Union Carbide

**Ethylenediamine acetic acid trisodium salt.** See Trisodium EDTA

**Ethylenediamine bisstearamide.** See Ethylene distearamide

**N,N'-Ethylenediaminediacetic acid tetrasodium salt.** See Tetrasodium EDTA

**Ethylenediamine propoxylate/ethoxylate.** See EO/PO ethylenediamine block copolymer

**Ethylenediamine steardiamide.** See Ethylene distearamide

**Ethylenediaminetetraacetic acid.** See Edetic acid

**Ethylenediaminetetraacetic acid, calcium disodium salt.** See Calcium disodium EDTA

**Ethylenediaminetetraacetic acid, disodium salt.** See Disodium EDTA

**Ethylenediaminetetraacetic acid, sodium salt.** See Tetrasodium EDTA

**Ethylenediaminetetraacetic acid, tetrasodium salt.** See Tetrasodium EDTA

**Ethylenediaminetetraacetic acid, trisodium salt.** See Trisodium EDTA

**Ethylenediaminetetra (methylene phosphonic acid)**

CAS 1429-50-1

*Synonyms:* EDTMPA; EDTPO; Editempa acid; (1,2-Ethanediybis (nitriolobis (methylene))) tetrakisphosphonic acid; N,N,N',N'-Ethylenediamine tetra (methylene)phosphonic acid; (Ethylenedinitriolo)-tetramethylenephosphonic acid; Phosphonic acid, (1,2-ethanediybis (nitriolobis (methylene))) tetrakis-

*Empirical:* C<sub>4</sub>H<sub>20</sub>N<sub>2</sub>O<sub>12</sub>P<sub>4</sub>

*Properties:* Wh. cryst. solid; m.w. 436.13

*Uses:* Electroplating bath additive; scale inhibitor/chelating agent for boilers, cooling towers, oil field water systems; sequestant in laundry and industrial detergents; sequestant, dispersant, scale inhibitor for I&I cleaning, detergents, metal cleaning, pulp and paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Trade Names:* Aquacid-109 EX; Dequest® 2041

**N,N,N',N'-Ethylenediamine tetra (methylene phosphonic acid).** See Ethylenediaminetetra (methylene phosphonic acid)

**Ethylene diamine tetra (methylene phosphonic acid), pentasodium salt.**

See Pentasodium ethylene diamine tetramethylene phosphonate

**1,2-Ethylenedicarboxylic acid.** See Fumaric acid

**trans-1,2-Ethylenedicarboxylic acid.** See Fumaric acid

**Ethylene, 1,1-dichloro-, polymer with chloroethylene.** See Vinylidene chloride/vinyl chloride copolymer

**Ethylene diglycol monoethyl ether.** See Ethoxydiglycol

**Ethylene dihydrate.** See Glycol

**Ethylene dimethacrylate.** See Ethylene glycol dimethacrylate

**(Ethylenedinitriolo) tetraacetic acid.** See Edetic acid

**(Ethylenedinitriolo) tetraacetic acid, sodium salt.** See Disodium EDTA

**(Ethylenedinitriolo)-tetramethylenephosphonic acid.** See Ethylenediaminetetra (methylene phosphonic acid)

**Ethylene dioleamide**

CAS 110-31-6; EINECS/ELINCS 203-756-1

*Synonyms:* N,N'-Dioleoylethylenediamine; N,N'-1,2-Ethanediybis-9-octadecenamamide; N,N'-Ethylenbisoleamide; 9-Octadecenamamide, N,N'-1,2-ethanediybis-

*Classification:* Diamide

*Empirical:* C<sub>38</sub>H<sub>72</sub>N<sub>2</sub>O<sub>2</sub>

**Toxicology:** TSCA listed

**Uses:** Syn. wax used as plastics processing lubricant and release agent, antistat, antiblock, slip agent, m.p. modifier for waxes, industrial asphalts and tar, pigment dispersant for resin systems; polyamide-paraffin coupling agent; visc. control agent; in adhesive tapes; coatings; food-pkg. materials; release agent in food-contact coatings, PVC films; in paper/paperboard in contact with aq./fatty foods; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §175.300, 175.320, 176.170, 177.1200, 178.3860

**Manuf./Distrib.:** Aldrich

**Trade Names:** Advawax® 240; Kemamide® W-20

#### Ethylene distearamide

CAS 110-30-5; 68955-45-3; EINECS/ELINCS 203-755-6; 273-277-0

**Synonyms:** 1,2-Bis (octadecanamido) ethane; 1,2-Bis (stearoylamino) ethane; N,N-Bis-stearoylthylenediamide; N,N'-Distearoylthylenediamine; N,N'-1,2-Ethanediybisoctadecanamide; Ethylene bis (stearamide); N,N'-Ethylene bisstearamide; Ethylenebisstearoamide; Ethylenebis (stearylamide); Ethylenediamine bisstearamide; Ethylenediamine steardiamide; N,N'-Ethylenedistearamide; N,N'-Ethylene distearylamine; Octadecanamide, N,N'-1,2-ethanediybis-; Octadecanamide, N,N'-ethylenebis-; Stearic acid, ethylenediamine diamide

**Classification:** Diamide

**Empirical:** C<sub>38</sub>H<sub>76</sub>N<sub>2</sub>O<sub>2</sub>

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>16</sub>CONH(CH<sub>2</sub>)<sub>2</sub>NHCO(CH<sub>2</sub>)<sub>16</sub>CH<sub>3</sub>

**Properties:** Solid; insol. in water; m.w. 593.04; bulk dens. 0.6 g/ml; m.p. 143 C; flash pt. (COC) 290 C; nonionic

**Toxicology:** TSCA listed

**Uses:** Lubricant, processing aid for PVC, PS, ABS, nylon; mold release agent for plastics; peptizing agent and dispersant for tech. NR articles; paint raw material; defoamer for pulp/paper, water treatment; visc. control agent; release agent in food-contact coatings; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.170, 177.1200

**Manuf./Distrib.:** Aldrich; Am. Int'l.; Chemax; Eastech; Fabrichem; H & C Ind.; Hexagon Enterprises; Lipo; Lonza; Mercator; Rhodia HPCII; SCI Int'l. USA; Shen Enterprise; Thornley; Uniqema N. Am.; Venus Ethoxyethers

**Trade Names:** Acrawax® C; Advawax® 280; Advawax® 290; Alkamide® STEDA; Glycowax® 765; Kemamide® W-39; Kemamide® W-40; Kemamide® W-45; Lipowax C; Ross Wax #140

**N,N'-Ethylenedistearamide.** See Ethylene distearamide

**N,N'-Ethylene distearylamine.** See Ethylene distearamide

**Ethylene glycol.** See Glycol

**Ethylene glycol, acrylate.** See 2-Hydroxyethyl acrylate

**Ethylene glycol, bis (bromoacetate).** See 1,2-Bis (bromoacetoxy) ethane

**Ethylene glycol butyl ether.** See Butoxyethanol

**Ethylene glycol n-butyl ether.** See Butoxyethanol

**Ethylene glycol dilaurate.** See Glycol dilaurate

#### Ethylene glycol dimethacrylate

CAS 97-90-5; EINECS/ELINCS 202-617-2

**Synonyms:** EDMA; 1,2-Bis (methacryloyloxy) ethane; 1,2-Ethandiol dimethacrylate; Ethylene dimethacrylate

**Empirical:** C<sub>10</sub>H<sub>14</sub>O<sub>4</sub>

**Formula:** CH<sub>2</sub>:C(CH<sub>3</sub>)COOCH<sub>2</sub>CH<sub>2</sub>OCOC(CH<sub>3</sub>):CH<sub>2</sub>

**Properties:** Pale yel. liq.; insol. in water; m.w. 198.22; dens. 1.053 (20/4 C); b.p. 66-68 C; flash pt. (COC) 113 C; ref. index 1.545 (20 C)

**Toxicology:** LD50 (oral, rat) 3300 mg/kg, (oral, mouse) 2 g/kg; moderately toxic by ingestion, intraperitoneal routes; irritating to eyes, respiratory system; lachrymator; mutagen; TSCA listed

**Storage:** Photosensitive; refrigerate

**Uses:** Crosslinker and modifier for ABS, acrylic sheet and rods, PVC; peroxide crosslinking agent (rubber); rubber modifier; comonomer for cross-linked acrylic/vinyl resins; ion exchange resins; glaze coatings; dental polymers; paper processing aids; adhesives; optical polymers; leather finishing; moisture barrier films

**Manuf./Distrib.:** Akzo Nobel; Aldrich; CPS; Fluka; Hampford Research; Monomer-Polymer & Dajac Labs; Rohm Tech; Sartomer; Sigma

**Trade Names:** Bisoimer EGDMA

**Trade Names Containing:** Ageflex EGDMA

**Ethylene glycol dioleate.** See Glycol dioleate

**Ethylene glycol distearate.** See Glycol distearate

**Ethylene glycol methacrylate.** See 2-Hydroxyethyl methacrylate

**Ethylene glycol monoacrylate.** See 2-Hydroxyethyl acrylate

**Ethylene glycol monobutyl ether.** See Butoxyethanol

**Ethylene glycol mono-n-butyl ether.** See Butoxyethanol

**Ethylene glycol monolaurate.** See Glycol laurate

**Ethylene glycol monomethacrylate.** See 2-Hydroxyethyl methacrylate

**Ethylene glycol monooleate.** See Glycol oleate

**Ethylene glycol monopalmitate.** See Glycol palmitate

**Ethylene glycol monopropyl ether.** See Ethylene glycol propyl ether

**Ethylene glycol mono-n-propyl ether.** See Ethylene glycol propyl ether

**Ethylene glycol monoricinoleate.** See Glycol ricinoleate

**Ethylene glycol monostearate.** See Glycol stearate

**Ethylene glycol monostearate SE.** See Glycol stearate SE

**Ethylene glycol nonyl phenyl ether.** See Nonoxynol-1

**Ethylene glycol octyl phenyl ether.** See Octoxynol-1

**Ethylene glycol/propylene glycol block copolymer.** See EO/PO block polymer or copolymer

#### Ethylene glycol propyl ether

CAS 2807-30-9; EINECS/ELINCS 220-548-6

**Synonyms:** Ethanol, 2-propoxy; Ethylene glycol monopropyl ether; Ethylene glycol mono-n-propyl ether; Monopropyl ether of ethylene glycol; 2-Propoxyethanol; Propyl<sup>1</sup>Cellosolve<sup>1</sup>

**Empirical:** C<sub>5</sub>H<sub>12</sub>O<sub>2</sub>

**Formula:** CH<sub>2</sub>OHCH<sub>2</sub>OCH<sub>2</sub>CH<sub>2</sub>CH<sub>3</sub>

**Properties:** Liq.; sol. in water; m.w. 104.17; dens. 0.913 (20/20 C); f.p. -90 C; b.p. 149.5 C; flash pt. (TCC) 49 C

**Toxicology:** LD50 (oral, rat) 3089 mg/kg, (skin, rabbit) 960 mg/kg; LC50 (inh., mouse, 7 h) 1530 ppm; mod. toxic by ing. and skin contact; mild toxicity by inh.; skin and severe eye irritant; experimental teratogen, reproductive effector; TSCA listed

**Precaution:** Combustible; can react with oxidizers

**Hazardous Decom. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Solvent for coatings, cosmetics, resins; coupling solvent for resin/water systems

**Manuf./Distrib.:** Aldrich; Ashland; Eastman; Sal Chem.

**Trade Names Containing:** Araldite® PZ 3901

**Ethylene glycol stearate.** See Glycol stearate

**Ethylene homopolymer.** See Polyethylene

**Ethyleneimine, homopolymer.** See Polyethylenimine

**Ethyleneimine polymer.** See Polyethylenimine

**Ethyleneimine resin.** See Polyethylenimine

**Ethylene latex.** See Polyethylene

#### Ethylene/MA copolymer

CAS 9006-26-2

**Synonyms:** EMA; Ethylene/maleic anhydride copolymer; 2,5-Furandione, polymer with ethene; Maleic anhydride/polyethylene copolymer

**Definition:** Polymer of ethylene and maleic anhydride monomers

**Formula:** [CH<sub>2</sub>CH<sub>2</sub>]<sub>x</sub>[CHCOOHCHCOOH]<sub>y</sub>

**Properties:** Fine powd.; water-sol.

**Precaution:** Reacts readily with alcohols and amines

**Uses:** Binder; film-former; dispersant for detergents, oil-well drilling muds; thickener in textile printing pastes, cosmetics; textile sizes; printing inks; stabilizer, thickener in liq. detergents, cosmetics, paints; water-sol. films for pharmaceutical capsules; bonding/compatibilizing agent for substrates, polymers, and polymer blends for paper coatings, wood prods., adhesives/sealants, plastics (olefin blends and filled olefins); suspending agent; ceramic binders; food pkg.; closure-sealing gaskets for food containers

**Regulatory:** FDA 21CFR §175.105, 177.1210, 177.1520

**Manuf./Distrib.:** Aldrich; Sigma

**Ethylene/maleic anhydride copolymer.** See Ethylene/MA copolymer

#### Ethylene/methacrylic acid copolymer

CAS 25053-53-6

**Synonyms:** EMAA; Poly (ethylene-co-methacrylic acid)

**Classification:** Acrylic polymer

**Formula:** (CH<sub>2</sub>CH<sub>2</sub>)<sub>x</sub>[CH<sub>2</sub>C(CH<sub>3</sub>)(CO<sub>2</sub>H)]<sub>y</sub>

**Properties:** Pellets; dens. 0.970; m.p. 76-83 C; tens. str. 21.4-25 MPa

## Ethylene/methyl acrylate/acrylic acid terpolymer

**Toxicology:** May be harmful by inh., ing., or skin absorption; may cause eye/skin irritation; TSCA listed

**Precaution:** Incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** Toxic fumes of CO, CO<sub>2</sub>, acids, aldehydes, alcohols; emits toxic fumes under fire conditions

**Storage:** Store in cool, dry place; keep tightly closed

**Uses:** Copolymer for extrusion into sheet, film, and coatings; inj. molding; blow molding; thermoforming; hot-melt adhesives; sealants; food pkg.

**Manuf./Distrib.:** Aldrich

**Trade Names:** Nucrel® 0407; Nucrel® 0609HS; Nucrel® 0908HS; Nucrel® 0910HS; Nucrel® 1214

## Ethylene/methyl acrylate/acrylic acid terpolymer

CAS 41525-41-1

**Synonyms:** Poly (ethylene-co-methyl acrylate-co-acrylic acid)

**Classification:** Olefin; acrylic

**Formula:** (CH<sub>2</sub>CH<sub>2</sub>)<sub>x</sub>[CH<sub>2</sub>CH(CO<sub>2</sub>CH<sub>3</sub>)<sub>y</sub>][CH<sub>2</sub>CH(CO<sub>2</sub>H)]<sub>z</sub>

**Properties:** Pellets; dens. 0.942; m.p. 65 C; acid no. 45

**Toxicology:** ACGIH TLV/TWA 10 mg/m<sup>3</sup> (nuisance particulates); may be harmful by inh., ing., or skin absorption; may cause irritation to eyes, skin, respiratory system

**Precaution:** In powd. form, capable of creating a dust explosion; static charge buildup can be a potential fire hazard when used in presence of volatile/flamm. mixts.; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>; emits toxic fumes under fire conditions

**Storage:** Keep tightly closed; store in cool dry place

**Uses:** Impact modifier for engineering thermoplastics; adhesion modifier for rubber compds., TPOs, adhesives; food-pkg. adhesives, paper/paperboard; adhesive for biaxially oriented nylon and PC films

**Manuf./Distrib.:** Aldrich

**Trade Names:** Escor® AT-310; Escor® AT-320; Escor® AT-325

## Ethylene oxide

CAS 75-21-8; EINECS/ELINCS 200-849-9; UN No. 1040 (DOT); FEMA 2433

**Synonyms:** EO; ETO; Dihydrooxirene; Dimethylene oxide; Epoxyethane; 1,2-Epoxyethane; Ethene oxide; Oxacyclopropane; Oxane; Oxidoethane; α,β-Oxidoethane; Oxirane

**Empirical:** C<sub>2</sub>H<sub>4</sub>O

**Properties:** Colorless gas or liq.; very sol. in ether; sol. in org. solvs.; misc. with water, alcohol, oxygenated solvs.; m.w. 44.06; dens. 0.8711 (20/20 C); m.p. -111.3 C; b.p. 10.73 C; flash pt. 0 F

**Toxicology:** ACGIH TLV/TWA 1 ppm; LD50 (oral, rat) 72 mg/kg; poison by ing., IP, subcut., IV routes; mod. toxic by inh.; irritating to eyes, skin, respiratory tract; human systemic effects by inh. (convulsions, nausea, vomiting, pulmonary changes); suspected human carcinogen; experimental tumorigen, neoplastigen, teratogen; mutagenic data; TSCA listed

**Precaution:** Flamm.; severe explosion hazard exposed to flame; violent polymerization on contact with ammonia, alkali hydroxides, amines, acids, etc.

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Mfg. of ethylene glycol and higher glycols, surfactants, acrylonitrile, ethanolamines, ethoxylates; petroleum demulsifier; rocket propellant; industrial sterilant (medical plastic tubing); fungicide; fumigant in sizing for paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §176.180; FEMA GRAS; FDA approved for ophthalmics, topicals; SARA reportable; BP compliance

**Manuf./Distrib.:** Aldrich; BASF; BP Amoco; Celanese; Cognis/Chems. Group; Degussa-Hüls AG; Dow; Eastman; Equistar; Honeywell Perf. Polymers; Huntsman; MG Ind.; Occidental; Rhodia HPCII; Shell; Sunoco; Total Spec. Chems.; Union Carbide

**Ethylene oxide adduct of 2,4,7,9-tetramethyl-5-decyn-4,7-diol.** See PEG tetramethyl decynediol

**Ethylene polymer.** See Polyethylene

**Ethylene polymers.** See Polyethylene

**Ethylene resin.** See Polyethylene

## Ethylene/VA copolymer

CAS 24937-78-8

**Synonyms:** EVA; EVM; VAE; Acetic acid, ethenyl ester, polymer with

ethene; Ethylene vinyl acetate; Ethylene/vinyl acetate copolymer; EVA copolymer; Poly (ethylene-co-vinyl acetate); VA/ethylene copolymer; Vinyl acetate/ethylene copolymer

**Classification:** Elastomer

**Definition:** Thermoplastic copolymer of ethylene and vinyl acetate monomers

**Formula:** (CH<sub>2</sub>CH<sub>2</sub>)<sub>x</sub>[CH<sub>2</sub>CH(O<sub>2</sub>CCH<sub>3</sub>)<sub>y</sub>]

**Properties:** Dens. 0.930; m.p. 99 C

**Toxicology:** Suspected cancer agent, mutagen

**Uses:** Syn. rubber for tech. moldings and extrudates, lamp seals, cable sheathings and insulations, cellular rubber goods, footwear soles, water-proof sheeting, hot-melt and pressure-sensitive hot-melt adhesives, coatings, inks, lacquers, sealants; impact modifier for PVC; coating binder and saturant for paper/paperboard, nonwovens, medical/surgical applics., fiber laminates; in thermoplastics; in pharmaceutical ophthalmics, otics, topicals, slow-release, microencapsulation; emulsion stabilizer; film-former; flattening and antisetting agent in paints/coatings; dispersant and color enhancer in color concs.; in food-contact coatings and surfaces; in closure-sealing gaskets for food containers; in cellophane for food pkg.

**Regulatory:** FDA 21CFR §175.300, 177.1200, 177.1210, 177.1350, 178.1005; FDA approved for ophthalmics, otics

**Manuf./Distrib.:** Air Prods.; Aldrich; Allchem Ind.; Ashland; Bayer; Chemcentral; Dow; Equistar; Focus; Honeywell Perf. Polymers; Kingsfield; Marco Polo Int'l.; Monomer-Polymer & Dajac Labs; Nat'l. Casein; Nat'l. Starch & Chem.; Tamms Ind.; Union Carbide

**Trade Names:** A-C® 400; A-C® 400A; A-C® 405(M); A-C® 405(S); A-C® 405(T); A-C® 430; Airflex® 100 HS; Airflex® 105; Airflex® 108; Airflex® 110; Airflex® 124; Airflex® 144; Airflex® 300; Airflex® 320; Airflex® 323; Airflex® 400; Airflex® 426; Airflex® 440; Airflex® 440H; Airflex® 465; Airflex® 7200; Dur-O-Set® E-623; Dur-O-Set® E-646; Dur-O-Set® Elite 22; Dur-O-Set® Elite 33; Elvace® 731; Elvace® 733; Elvace® 734; Elvace® 735; Elvace® 736; Elvace® 739; Elvace® 40713-00; Elvace® 40722-00; Elvace® 40724-00; Elvace® 97955-00; Elvax® 310; Elvax® 350; Elvax® 360; Elvax® 550, 560; Hoechst Wax PE 890; Microthene® FE 532-00; Ultrathene® UE 631-04; Ultrathene® UE 634-04; Ultrathene® UE 634-67; Ultrathene® UE 639-67; Ultrathene® UE 649-04; Ultrathene® UE 653-67; Ultrathene® UE 654-67

**Ethylene vinyl acetate.** See Ethylene/VA copolymer

**Ethylene/vinyl acetate copolymer.** See Ethylene/VA copolymer

## Ethylene/vinyl chloride copolymer

**Uses:** Crosslinkable flexible binder and saturant for paper/paperboard applics.; food-contact paper/paperboard; nonwoven binder for fiberfill and high loft stock requiring flame retardancy; imparts flexibility and water resist. to caulks, mastics, barrier coats in building applics; high build flexible coatings; low MVTR coatings

**Trade Names:** Airflex® 4500; Airflex® 4514; Airflex® 4530; Vancryl® 600; Vancryl® 605; Vancryl® 610

**Ethylenimine, polymers.** See Polyethylenimine

**Ethyl ethanoate.** See Ethyl acetate

**Ethyl o-(6-(ethylamino)-3-(ethylimino)-2,7-dimethyl-3H-xanthen-9-yl) benzoate monohydrochloride.** See Basic red 1

**Ethylethylene.** See 1-Butene

**N-Ethyl-N-[4-[[4-[ethyl[(3-sulfophenyl) methyl] amino] phenyl] (4-sulfophenyl) methylene]-2,5-cyclohexadien-1-ylidene]-3-sulfobenzene-methanaminium inner salt, disodium salt.** See Acid green 5

**4-Ethyl-2-(8-heptadecenyl)-4,5-dihydro-4-oxazolemethanol.** See Ethyl hydroxymethyl oleyl oxazoline

**4-Ethyl-2-(8-heptadecenyl)-2-oxazoline-4-methanol.** See Ethyl hydroxymethyl oleyl oxazoline

## 2-Ethylhexanol

CAS 104-76-7; EINECS/ELINCS 203-234-3; FEMA 3151

**Synonyms:** 2-EH; Alcohol C<sub>8</sub>; 2-Ethyl-1-hexanol; 2-Ethylhexan-1-ol; 2-Ethylhexyl alcohol; 1-Hexanol, 2-ethyl

**Classification:** Alcohol

**Empirical:** C<sub>8</sub>H<sub>18</sub>O

**Formula:** CH<sub>3</sub>(CH<sub>2</sub>)<sub>3</sub>CHC<sub>2</sub>H<sub>5</sub>CH<sub>2</sub>OH

**Properties:** Colorless clear liq., mild oily sweet sl. rose fragrance; sol. in ethanol, ether, diethyl ether, DMSO, acetone, benzene, chloroform; misc. with most org. solvs.; sl. sol. in water; m.w. 130.26; dens. 0.83 (20 C); vapor pressure 0.05 mm Hg (20 C); f.p. -76 C; b.p. 183.5 C; flash pt. 81.1

C; ref. index 1.4300 (20 C); surf. tens. 27.6 dynes/cm (20 C)  
**Toxicology:** LD50 (oral, rat) 2049 mg/kg, (IP, rat) 500 mg/kg, (subcut., rat) 650 mg/kg, (skin, rabbit) 1970 mg/kg; mod. toxic by ing., skin contact, IP, subcut., parenteral routes; severe eye irritant; moderate skin irritant; experimental teratogen, reproductive effects; mutagenic data; TSCA listed  
**Precaution:** Combustible; dangerous fire hazard exposed to heat or flame; can react vigorously with oxidizing materials; incompat. with strong oxidizing agents and strong acids  
**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>; heated to decomp., emits acrid smoke and fumes  
**NFPA:** Health 2; Flammability 2; Reactivity 0  
**Storage:** Store under ambient temps. away from oxidizing materials and acids  
**Uses:** Plasticizer for PVC resins; defoamer; wetting agent; organic synthesis; solvent for nitrocellulose, paints, waterborne coatings, dyes, resins, oils, antifoaming agents; penetrant for plasticizing inks, etc.; disinfectant; flotation frothing agent; in mercerizing textiles; in textile finishing compds.; in paint lacquers, baking finishes, inks, rubber, paper, lubricants, photography, dry cleaning; in food-pkg. adhesives; syn. flavoring agent for foods and pharmaceuticals; defoamer in food-contact paper/paperboard; in cellophane for food pkg.  
**Regulatory:** FDA 21CFR §175.105, 176.210, 177.1200, 178.3480; FEMA GRAS  
**Manuf./Distrib.:** ABCR; Aldrich; Allchem Ind.; Aristech; Ashland; BASF; BP Chems. Ltd; Bencorp Int'l.; Celanese; Chisso Am.; Coyne; Eastman; Expo Chem.; Fluka; GNC Group; Houghton Chem.; Irvanhoe Ind.; KIC Chems.; Penta Mfg.; Rhodia HPCII; Shell; Total Spec. Chems.; Union Carbide; Van Waters & Rogers  
**Trade Names Containing:** Foambreaker; Surfynol® 104A  
**2-Ethyl-1-hexanol.** See 2-Ethylhexanol  
**2-Ethylhexan-1-ol.** See 2-Ethylhexanol  
**2-Ethyl-1-hexanol, hydrogen sulfate, sodium salt.** See Sodium 2-ethylhexyl sulfate  
**2-Ethylhexanol phosphate.** See Trioctyl phosphate  
**2-Ethyl-1-hexanol phosphate.** See Trioctyl phosphate  
**2-Ethylhexanol, phosphate triester.** See Trioctyl phosphate  
**2-Ethyl-1-hexanol sulfate sodium salt.** See Sodium 2-ethylhexyl sulfate  
**2-Ethylhexyl acrylate.** See Octyl acrylate  
**2-Ethylhexyl acrylate homopolymer**  
**Uses:** In paper/paperboard in contact with dry food  
**Regulatory:** FDA 21CFR §176.180  
**2-Ethylhexyl alcohol.** See 2-Ethylhexanol  
**2-Ethylhexyl hydrogenated tallowalkyl methosulfate**  
**Properties:** Cationic  
**Uses:** Surfactant, dispersant for protective coatings, pigments, inks, textiles, agric., acid pickling baths, marine applics, metalworking, electroplating, fuel treatment, emulsion/plastic mfg., wastewater treatment, min. processing, paper  
**Regulatory:** EPA listed  
**Trade Names:** Arquad® HTL8(W) MS-85  
**2-Ethylhexyl methacrylate**  
CAS 688-84-6; EINECS/ELINCS 211-708-6  
**Synonyms:** 2-EHMA; 2-Ethyl-1-hexyl methacrylate; Octyl methacrylate  
**Empirical:** C<sub>12</sub>H<sub>22</sub>O<sub>2</sub>  
**Properties:** M.w. 198.34  
**Toxicology:** LD50 (IP, mouse) 2614 mg/kg; mod. toxic by intraperitoneal route; TSCA listed  
**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes  
**Uses:** Comonomer for acrylic resins; dispersant; additive for lubricating oil; modifier for fibers; coating agent for paper; in paints, inks, adhesives; plasticizer for adhesives, resins, coatings  
**Manuf./Distrib.:** Allchem Ind.; Ashland; BASF; Celanese; Monomer-Polymer & Dajac Labs; Rohm Tech; Union Carbide  
**Trade Names:** Blemmer EHMA; Mhoromer® BM 713  
**2-Ethyl-1-hexyl methacrylate.** See 2-Ethylhexyl methacrylate  
**2-Ethylhexyl octadecanoate.** See Octyl stearate

**2-Ethylhexyl phosphate**  
CAS 12645-31-7  
**Synonyms:** Octyl acid phosphate  
**Properties:** Anionic  
**Uses:** Detergent in dry-cleaning, emulsifier in formulation of metal cleaners, paints in emulsion polymerization; pesticide and cosmetic preparations; catalyst  
**Trade Names:** DePHOS HP-739; Servoxy® VPTZ 100  
**Ethylhexyl phthalate.** See s-Dioctyl phthalate  
**2-Ethylhexyl phthalate.** See s-Dioctyl phthalate  
**2-Ethylhexyl propenoate.** See Octyl acrylate  
**2-Ethylhexyl 2-propenoate.** See Octyl acrylate  
**2-Ethylhexyl sodium sulfate.** See Sodium 2-ethylhexyl sulfate  
**2-Ethylhexyl stearate.** See Octyl stearate  
**2-Ethylhexyl sulfosuccinate sodium.** See Dioctyl sodium sulfosuccinate  
**Ethyl hydrate.** See Alcohol  
**Ethyl hydroxide.** See Alcohol  
**Ethyl (β-hydroxyethyl) aniline.** See Phenylethylethanolamine  
**N-Ethyl-N-(2-hydroxyethyl) aniline.** See Phenylethylethanolamine  
**N-Ethyl-N-(2-hydroxyethyl)-m-toluidine.** See N-Ethyl-N-hydroxyethyl-m-toluidine  
**N-Ethyl-N-hydroxyethyl-m-toluidine**  
CAS 91-88-3; EINECS/ELINCS 202-105-9  
**Synonyms:** Ethanol, 2-(N-ethyl-m-toluidino)-; N-Ethyl-N-(2-hydroxyethyl)-m-toluidine; 2-(N-Ethyl-m-toluidino) ethanol; N-Hydroxyethyl-N-ethyl-m-toluidine  
**Classification:** Aromatic amine  
**Empirical:** C<sub>11</sub>H<sub>17</sub>NO  
**Formula:** CH<sub>3</sub>C<sub>6</sub>H<sub>4</sub>N(C<sub>2</sub>H<sub>5</sub>)CH<sub>2</sub>CH<sub>2</sub>OH  
**Properties:** Solid or liq.; m.w. 179.26; dens. 1.019; m.p. 23 C; b.p. 237 C; flash pt. > 110 C; ref. index 1.5550 (20 C)  
**Toxicology:** LD50 (oral, rat) 1370 mg/kg; mod. toxic by ing.; TSCA listed  
**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NO<sub>x</sub>  
**Uses:** Coupling agent for disperse dyes for syn. fibers; photosensitive chemical for paper coatings; accelerator for polyester resins; dye intermediate  
**Manuf./Distrib.:** Aldrich; ChemFirst  
**Ethyl hydroxymethyl oleyl oxazoline**  
CAS 68140-98-7; 88543-32-2; EINECS/ELINCS 268-820-3  
**Synonyms:** 4-Ethyl-2-(8-heptadecenyl)-4,5-dihydro-4-oxazolmethanol; 4-Ethyl-2-(8-heptadecenyl)-2-oxazoline-4-methanol  
**Classification:** Substituted heterocyclic compd.  
**Empirical:** C<sub>23</sub>H<sub>43</sub>NO<sub>2</sub>  
**Properties:** Yel. clear liq.; sol. in most org. solvs. and oils; pract. insol. in water; m.w. 365.60; dens. 0.93 kg/l; f.p. -31 C; amphoteric  
**Uses:** Emulsifier, corrosion inhibitor in sol. cutting oils; antifoam for antibiotic prod.; pigment grinding aid and dispersant; wetting agent for paper, textiles, metal cleaners; detergent; antioxidant; emulsion stabilizer; acid acceptor; in salts, soaps; antistat  
**Trade Names:** Alkaterge®-E  
**2-Ethyl-2-(hydroxymethyl)-1,3-propanediol triacrylate.** See 1,1,1-Trimethylolpropane triacrylate  
**Ethyllic acid.** See Acetic acid  
**Ethyl methacrylate**  
CAS 97-63-2; EINECS/ELINCS 202-597-5; UN No. 2277 (DOT)  
**Synonyms:** EMA; Ethyl-α-methyl acrylate; Ethyl-2-methylacrylate; Ethyl 2-methyl-2-propenoate; Methacrylic acid, ethyl ester; 2-Methyl-2-propenoic acid, ethyl ester; 2-Propenoic acid, 2-methyl-, ethyl ester  
**Definition:** Ester of ethyl alcohol and methacrylic acid  
**Empirical:** C<sub>6</sub>H<sub>9</sub>O<sub>2</sub>  
**Formula:** H<sub>2</sub>C=C(CH<sub>3</sub>)COOC<sub>2</sub>H<sub>5</sub>  
**Properties:** Colorless liq.; sol. in oxygenated solvs.; insol. in water; m.w. 114.16; dens. 0.911; m.p. -75 C; b.p. 119 C; flash pt. (TOC) 21.1 C; ref. index 1.4116  
**Toxicology:** LD50 (oral, rat) 14,800 mg/kg, (IP, rat) 1223 mg/kg; LC50 (inh., rat, 4 h) 8300 ppm; LDLo (subcut., rat) 25 g/kg; mod. toxic by ing., IP routes; mildly toxic by inh.; lachrymator; skin irritant; mutagen; experimental teratogen, reproductive effects; TSCA listed  
**Precaution:** Flamm. liq.; explosive; explosive limits 1.8% to saturation; can react with oxidizers

## Ethyl-2-methylacrylate

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Storage:** Heat-sensitive; refrigerate; protect from light

**Uses:** Visc. control agent; polymers; chemical intermediates; acrylic acid comonomer; food pkg.

**Manuf./Distrib.:** AccuStandard; Acros Org.; Aldrich; Alfa Aesar; Fluka; Lancaster Synthesis; Pfaltz & Bauer; Rohm & Haas; TCI Am.; Whyte Chems. Ltd

**Trade Names:** Mhoromer® AM 101

**Ethyl-2-methylacrylate.** See Ethyl methacrylate

**Ethyl-α-methyl acrylate.** See Ethyl methacrylate

**Ethyl β-methylacrylate.** See Ethyl crotonate

**N-Ethyl-p-methylbenzene sulfonamide.** See Ethyl toluenesulfonamide

**Ethylmethyl carbinol.** See 2-Butanol

**Ethyl methyl ketone.** See Methyl ethyl ketone

**Ethyl 2-methyl-2-propenoate.** See Ethyl methacrylate

**Ethylolamine.** See Ethanolamine

### 2-(N-Ethylperfluorooctanesulfonamido) ethyl acrylate

**Synonyms:** 2-(N-Ethylperfluorooctylsulfonamido) ethyl acrylate

**Empirical:** C<sub>15</sub>H<sub>17</sub>F<sub>17</sub>NO<sub>2</sub>S

**Formula:** CH<sub>2</sub>CHCOOCH<sub>2</sub>CH<sub>2</sub>NC<sub>2</sub>H<sub>5</sub>SO<sub>2</sub>(CF<sub>2</sub>)<sub>7</sub>CF<sub>3</sub>

**Properties:** M.w. 625.30

**Uses:** Acrylic resin comonomer for textile finishes; comonomer for water-resist. paper coatings; mfg. of paper sizes, surfactants, inert fluids; monomer for polymerization reactions; provides oil/water repellency, lubricity, and release

**Trade Names:** Fluorad® FX-13

**2-(N-Ethylperfluorooctylsulfonamido) ethyl acrylate.** See 2-(N-Ethylperfluorooctanesulfonamido) ethyl acrylate

**2-(Ethylphenylamino) ethanol.** See Phenylethylethanolamine

**Ethyl phenyl ethanolamine.** See Phenylethylethanolamine

**N,N-Ethylphenylethanolamine.** See Phenylethylethanolamine

**N-Ethyl-N-phenylethanolamine.** See Phenylethylethanolamine

**Ethyl propenoate.** See Ethyl acrylate

**Ethyl 2-propenoate.** See Ethyl acrylate

**Ethyl purple 6B.** See Basic violet 4

### Ethyl toluenesulfonamide

**CAS** 80-39-7; 1077-56-1; **EINECS/ELINCS** 201-275-1; 214-073-3

**Synonyms:** N-Ethyl-p-methylbenzene sulfonamide; Ethyl p-toluenesulfonamide; N-Ethyltoluene-2-sulfonamide; Ethyl tosylamide; p-Toluene ethylsulfonamide; N-Tosyl ethylamine

**Classification:** Mixture of isomers of aromatic amides

**Empirical:** C<sub>9</sub>H<sub>13</sub>NO<sub>2</sub>S

**Formula:** C<sub>2</sub>H<sub>5</sub>NHSO<sub>2</sub>C<sub>6</sub>H<sub>4</sub>CH<sub>3</sub>

**Properties:** Colorless cryst.; sol. in alcohol; m.w. 199.27; dens. 1.190; m.p. 64 C; flash pt. 126 C; ref. index 1.540

**Toxicology:** Irritant

**Precaution:** Combustible

**Uses:** Plasticizer for cellulosics, resins, adhesives, coatings, inks, PS, PVAc, PVB, polyamide hot-melt adhesives, electroplating sol'n's, thermoplastics and thermosets, nitrocellulose lacquers, shellac; film-former; in food-pkg. adhesives; in side seam cements for food-contact containers

**Regulatory:** FDA 21CFR §175.105, 175.300

**Manuf./Distrib.:** Akzo Nobel; Aldrich; BASF; Charkit; F.T.L. Int'l.; Monsanto; Rit-Chem; Rutgers Org.; Seal Sands Chems. Ltd; Spectrum Quality Prods.; Unitex

**Trade Names:** Uniplex 108

**N-Ethyltoluene-2-sulfonamide.** See Ethyl toluenesulfonamide

**Ethyl p-toluenesulfonamide.** See Ethyl toluenesulfonamide

**2-(N-Ethyl-m-toluidino) ethanol.** See N-Ethyl-N-hydroxyethyl-m-toluidine

**Ethyl tosylamide.** See Ethyl toluenesulfonamide

**Ethyl violet.** See Basic violet 4

### Etidronic acid

**CAS** 2809-21-4; **EINECS/ELINCS** 220-552-8; **UN No.** 1760

**Synonyms:** ADPA; HEDP; HEDPA; Acetodiphosphonic acid; Ethane-1-hydroxy-1,1-diphosphonate; 1,1,1-Ethanetriol diphosphonate; 1-Hydroxy-1,1-diphosphonoethane; Hydroxyethanediphosphonic acid; (1-Hydroxyethylidene) bisphosphonic acid; (1-Hydroxyethylidene) diphosphonic acid;

1-Hydroxyethylidene-1,1-diphosphonic acid; Oxyethylidenediphosphonic acid

**Classification:** Organic diphosphonic acid

**Empirical:** C<sub>2</sub>H<sub>6</sub>O<sub>2</sub>P<sub>2</sub>

**Formula:** CH<sub>3</sub>C(OH)(PO<sub>3</sub>H<sub>2</sub>)<sub>2</sub>

**Properties:** M.w. 206.03; heated above 200 C, dec. violently emitting toxic fumes

**Toxicology:** LD50 (oral, mouse) 1800 mg/kg; mod. toxic by ingestion; TSCA listed

**Precaution:** DOT: Corrosive; strong acid

**Hazardous Decomp. Prods.:** Heated above 200 C, dec. violently to produce toxic fumes of phosphine, phosphoric acid, and PO<sub>x</sub>

**Uses:** Chelating agent for heavy metal ions; corrosion inhibitor, scale inhibitor, and sequestrant for water treatment (cooling towers, water floods, boiler water); oil-drilling muds; dispersant in laundry detergents; photography; stabilizer, antioxidant for cosmetic/pharmaceutical hair/skin preps.; sequestrant for radioactive pharmaceuticals

**Regulatory:** FDA 21CFR §173.310; SARA immediate health hazard

**Manuf./Distrib.:** ABCR; Albright & Wilson UK; Biddle Sawyer; Charkit; China Nat'l. Chem. Construction; Excel Ind.; Fluka; Sigma; Strem Chems.; TCI Am.

**Trade Names:** Aquacid-105 EX; Briquest® ADPA-60AW; Dequest® 2010

**ETO.** See Ethylene oxide

**EtOH.** See Alcohol

**Euphorbia cerifera wax.** See Candelilla (*Euphorbia cerifera*) wax

**EVA.** See Ethylene/VA copolymer

**EVA copolymer.** See Ethylene/VA copolymer

**Evans blue.** See Direct blue 53

**Evans blue dye.** See Direct blue 53

**EVM.** See Ethylene/VA copolymer

**Expanded polyvinyl chloride.** See Polyvinyl chloride

**Exsiccated alum.** See Potassium alum anhydrous

**Exsiccated ammonium alum.** See Ammonium alum

**Exsiccated sodium phosphate.** See Sodium phosphate dibasic anhydrous

**Exsiccated sodium sulfite.** See Sodium sulfite

**Ext. D&C Green No. 1.** See Acid green 1

**Ext. D&C Red No. 8.** See Acid red 88

**Ext. D&C Yellow No. 1.** See Acid yellow 36

**Fast blue.** See Dianisidine

**Fast corinth base B.** See Benzidine

**Fast red A.** See Acid red 88; Pigment red 3

**Fats and glyceridic oils, vegetable, hydrogenated.** See Hydrogenated vegetable oil

**Fatty acids, castor oil, potassium salts.** See Potassium castorate

**Fatty acids, coco.** See Coconut acid

**Fatty acids, coco, ester with propylene glycol.** See Propylene glycol dicooate

**Fatty acids, coco, hydrogenated.** See Hydrogenated coconut acid

**Fatty acids, coco, magnesium salt.** See Magnesium cocoate

**Fatty acids, coco, methyl esters.** See Methyl cocoate

**Fatty acids, coco, 1-methyl-1,2-ethanediyl esters.** See Propylene glycol dicooate

**Fatty acids, coconut oil, magnesium salt.** See Magnesium cocoate

**Fatty acids, coconut oil, potassium salts.** See Potassium cocoate

**Fatty acids, coconut oil, sodium salts.** See Sodium cocoate

**Fatty acids, coconut oil, triethanolamine salts.** See TEA cocoate

**Fatty acids, coco, potassium salts.** See Potassium cocoate

**Fatty acids, coco, sodium salts.** See Sodium cocoate

**Fatty acids, corn oil.** See Corn acid

**Fatty acids, corn oil, potassium salts.** See Potassium cornate

**Fatty acids, cottonseed oil.** See Cottonseed acid

**Fatty acids, C18, unsaturated, trimers.** See Trilinoleic acid

**Fatty acids, linseed oil.** See Linseed acid

**Fatty acids, menhaden oil, hydrogenated.** See Hydrogenated menhaden acid

**Fatty acids, montan wax.** See Montan acid wax

**Fatty acids, montan wax, 1-methyl-1,3-propanediyl esters.** See Butylene glycol montanate

**Fatty acids, soya, esters with propylene glycol.** See Propylene glycol soyate

**Fatty acids, tall oil.** See Tall oil acid

**Fatty acids, tall oil, ammonium salts.** See Ammonium tallate

**Fatty acids, tall oil, butyl esters, sulfated.** See Sulfated butyl tallate

**Fatty acids, tall oil, potassium salts.** See Potassium tallate

**Fatty acids, tall oil, sulfated, potassium salts.** See Sulfated tall oil, potassium salt

**Fatty acids, tall oil, sulfated, sodium salts.** See Sulfated tall oil, sodium salt

**Fatty acids, tallow.** See Tallow acid

**Fatty acids, tallow, hydrogenated.** See Hydrogenated tallow acid

**Fatty acids, tallow, isobutyl esters.** See Isobutyl tallowate

**Fatty acids, tallow, isopropyl esters.** See Isopropyl tallowate

**Fatty acids, tallow, magnesium salt.** See Magnesium tallowate

**Fatty acids, tallow, potassium salts.** See Potassium tallowate

#### FD&C Blue No. 1 aluminum lake

CAS 15792-67-3; 53026-57-6; 68921-42-6; EINECS/ELINCS 272-939-6

*Synonyms:* Acid blue 9 aluminum lake; Blue no. 3; Blue no. 1; CI 42090:2

*Definition:* Aluminum salt of FD&C Blue No. 1 extended on an alumina substrate

*Empirical:* C<sub>37</sub>H<sub>36</sub>N<sub>2</sub>O<sub>9</sub>S<sub>3</sub> · xAl

*Properties:* Water-insol.

*Uses:* Colorant for pharmaceuticals; in paper/paperboard in contact with dry foods

*Regulatory:* FDA 21CFR §81.1, 82.50, 82.51, 82.101, 176.180

*Manuf./Distrib.:* Costec; Crompton & Knowles; Warner-Jenkinson

#### FD&C Green No. 2. See Acid green 5

#### FD&C Green No. 2 aluminum lake. See Acid green 5

#### FD&C Red No. 19. See Basic violet 10

#### FD&C Violet No. 1. See Acid violet 49

#### FD&C Yellow No. 5. See Tartrazine

#### FD&C Yellow No. 10. See Acid yellow 3

#### FD&C Yellow No. 5 Aluminum Lake

CAS 12225-21-7; 12227-69-9; 53026-63-4; EINECS/ELINCS 235-428-9

*Synonyms:* CI 19140:1

*Definition:* Insoluble pigment composed of the aluminum salt of FD&C Yellow No. 5 extended on an alumina substrate; noncertified batch known as Acid yellow 23 aluminum lake (INCI)

*Uses:* Pigment in resinous/polymeric food-contact coatings, paper/paperboard in contact with dry food, molded food-contact melamine-formaldehyde resins

*Regulatory:* FDA 21CFR §81.1, 82.51, 175.300, 176.180, 177.1460

*Manuf./Distrib.:* Costec; Warner-Jenkinson

#### Ferrate(3-), hexacyano-, tripotassium. See Potassium ferricyanide

#### Ferrate(4-), hexakis(cyano-C)-, iron(3+) (3:4). See Ferric ferrocyanide

#### Ferrate(3-), tris [5,6-dihydro-5-(hydroxymino)-6-oxo-2-naphthalenesulfonato(2-)-N<sup>-</sup>,O<sup>2-</sup>]-, trisodium. See Acid green 1

#### Ferric chloride

CAS 7705-08-0; EINECS/ELINCS 231-729-4; UN No. 1773 (DOT), 2582 (DOT)

*Synonyms:* Ferric trichloride; Iron chloride; Iron (III) chloride; Iron chlorides; Iron trichloride

*Classification:* Inorganic salt

*Empirical:* Cl<sub>3</sub>Fe

*Properties:* Black-brown solid; sol. in water, alcohol, glycerol, methanol, ether, acetone; sl. sol. in CS<sub>2</sub>; readily absorbs water in air to form hexahydrate; m.w. 162.21; dens. 2.898; vapor pressure 1 mm (194 C); m.p. 292 C; b.p. 319 C

*Toxicology:* ACGIH TLV/TWA 1 mg (Fe)/m<sup>3</sup>; LD50 (oral, rat) 450 mg/kg, (IV, mouse) 58 mg/kg; poison by ing., IV routes; corrosive to skin, eyes, mucous membranes; reproductive effector; mutagen; TSCA listed

*Precaution:* DOT: Corrosive; catalyzes potentially explosive polymerization of ethylene oxide, chlorine + monomers; violent reaction with allyl chloride; reacts with water to form toxic and corrosive fumes

*Hazardous Decomp. Prods.:* Heated to decomp., emits highly toxic fumes of HCl

*Storage:* Deliq.; very hygroscopic; keep well closed

*Uses:* Coagulant for treatment of water, sewage, industrial wastes; phosphate removal; sludge conditioning and dewatering; trace metal removal; odor control; precipitation and removal of sol. arsenic and selenium ions in mineral industry; mfg. of Fe salts; chlorination of Ag and Cu ores; etching agent; mordant; disinfectant; pigments; ink; oxidizing agent in dye mfg.; feed additive; catalyst in org. reactions; in photoengraving; photography;

foods (flavoring agent; dietary supplement (Japan)); in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §175.105, 176.170, 184.1297, GRAS; Japan approved

*Manuf./Distrib.:* AMRESKO; Aldrich; Am. Biorganics; Asahi Denka Kogyo; BASF; Coyne; DuPont; Eaglebrook; Eka Chems. AB; Fluka; Gulbrandsen; Lohmann; Mallinckrodt Baker; P.B. & S.; PVS; Penta Mfg.; Rasa Ind.; Sal Chem.; Sigma; Spectrum Quality Prods.; U.S. Petrochem. Ind.

#### Ferric citrate

CAS 3522-50-7 (anhyd.); 2338-05-8 (monohydrate); EINECS/ELINCS 219-045-4

*Synonyms:* Iron (III) citrate; Iron citrate

*Empirical:* C<sub>6</sub>H<sub>5</sub>FeO<sub>7</sub> (anhyd.); C<sub>6</sub>H<sub>5</sub>FeO<sub>7</sub> · H<sub>2</sub>O (monohydrate)

*Properties:* Garnet-red transparent scales or pale brn. powd., odorless, sl. ferruginous taste; slowly but completely sol. in cold water, readily sol. in hot water; pract. insol. in alcohol; m.w. 244.95 (anhyd.), 262.97 (monohydrate)

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Blueprint paper; nutrient supplement; may be used in infant formulas

*Regulatory:* FDA 21CFR §184.1298, GRAS; Japan approved

*Manuf./Distrib.:* Fluka; Lohmann; Sigma

#### Ferric ferrocyanide

CAS 14038-43-8; EINECS/ELINCS 237-875-5

*Synonyms:* Bronze blue; Chinese blue; CI 77510; CI 77520; Ferrate(4-), hexakis(cyano-C)-, iron(3+) (3:4); Iron blue; Iron ferrocyanide; Milori blue; Non-bronze blue; Pigment blue 27; Potash blue; Prussian blue

*Classification:* Inorganic salt

*Empirical:* C<sub>6</sub>FeN<sub>6</sub> · 4/3Fe

*Properties:* M.w. 286.38

*Toxicology:* TSCA listed

*Uses:* Pigment in printing inks, paints, paper coatings; zinc green pigment component; blue pigment for cosmetics and toiletries; colorant for external pharmaceuticals

*Regulatory:* FDA 21CFR §73.1299, 73.2299; permanently listed

*Manuf./Distrib.:* Aldrich

*See also* CI 77510

#### Ferric ferrous oxide. See Iron oxide black

#### Ferric oxide

CAS 1309-37-1 (anhyd.); EINECS/ELINCS 215-168-2

*Synonyms:* Anhydrous iron oxide; CI 77491; Colloidal ferric oxide; Ferric oxide red; Ferrosoferric oxide; Iron (III) oxide; Iron oxide red; Iron sesquioxide; Natural iron oxides; Natural red oxide; Pigment brown 6; Pigment brown 7; Pigment red 101; Pigment red 102; Red iron oxide; Red iron trioxide; Yellow ferric oxide

*Classification:* Inorganic color; syn. iron oxide

*Empirical:* Fe<sub>2</sub>O<sub>3</sub>

*Properties:* Red-brn. to blk. cryst.; sol. in acids; insol. in water, alcohol, ether; m.w. 159.69; dens. 5.240; m.p. 1538 C (dec.)

*Toxicology:* ACGIH TLV/TWA 5 mg (Fe)/m<sup>3</sup> (vapor, dust); LD50 (IP, rat) 5500 mg/kg; LDLo (subcut., dog) 30 mg/kg; irritant; poison by subcut. route; avoid inhalation; suspected human carcinogen; experimental tumorigen; TSCA listed

*Precaution:* Catalyzes the potentially explosive polymerization of ethylene oxide; explosive and violent reactions possible

HMS: Health 1; Flammability 0; Reactivity 1

*Uses:* Metallurgy; gas purification; in thermite; polishing compounds; mordant; laboratory reagent; catalyst; electronic pigments for TV; permanent magnets; memory cores for computers; magnetic tapes; polishing agent for glass, diamonds; pigment in paints/coatings, rubber, latexes, paper, linoleum, ceramics, glass, fabric coatings, cements/concrete; paint for ship hulls; colorant in cosmetics, food, feed, ingested pharmaceuticals; colloidal sol'ns. as stain for polysaccharides; colorant in food-grade polymers; in food pkg.; strong anti-ozone chars.

*Regulatory:* FDA 21CFR §73.200 (limitation 0.25%), 186.1300, 186.1374, GRAS as indirect food additive; FDA approved for orals; USP/NF compliance

*Manuf./Distrib.:* ABCR; Acros Org.; Advance Research Chems.; Aldrich;

## Ferric oxide red

Atlantic Equip. Engrs.; BASF; Bayer/Fiber, Addits., Rubber; Crompton & Knowles; Fisher Scientific; Fluka; Kerr-McGee; Pentad Group; Ruger; Spectrum Quality Prods.

*Trade Names:* Octotint 825

**Ferric oxide red.** See Ferric oxide

**Ferric trichloride.** See Ferric chloride

**Ferrite yellow.** See Iron oxide yellow

**Ferrosulfate.** See Ferric oxide; Iron oxide black

## Ferrous ammonium sulfate

CAS 10045-89-3

*Synonyms:* Mohr's salt; Salt of Mohr; Iron ammonium sulfate

*Empirical:*  $\text{FeH}_8\text{N}_2\text{O}_6\text{S}_2$

*Formula:*  $\text{Fe}(\text{SO}_4) \cdot (\text{NH}_4)_2\text{SO}_4 \cdot 6\text{H}_2\text{O}$  (hexahydrate)

*Properties:* Lt. green crust.; sol. in water; insol. in alcohol; m.w. 284.07; dec. @ 100-110 C

*Toxicology:* LD50 (oral, rat) 3.25 g/kg; TSCA listed

*Storage:* Affected by light; keep well closed and protected from light

*Uses:* Analytical standard in photography; polymerization catalyst; in dosimeters; metallurgy; in paper/paperboard in contact with aq./fatty foods; in cellophane for food pkg.

*Regulatory:* FDA 21CFR §176.170, 177.1200

*Manuf./Distrib.:* Aithaca; Allpro; Am. Int'l.; Barker Ind.; Crown Tech.; GFS; Lohmann; Ruger; Spectrum Quality Prods.

**Ferrous ferrite.** See Iron oxide red

**Fiberglass.** See Glass

**Fibrous glass.** See Glass

**Fibrous grunerite.** See Asbestos

**Fischer-Tropsch wax.** See Synthetic wax

**Fischer-Tropsch wax, oxidized.** See Synthetic wax

**Fish oil, hydrogenated.** See Hydrogenated fish oil

## Fish oil triglycerides

*Uses:* Defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210

**Flaming red.** See 1-[(2-Chloro-4-nitrophenyl) azo]-2-naphthalenol

**Flavonic acid.** See 4,4'-Diaminostilbene-2,2'-disulfonic acid

**Flaxseed oil.** See Linseed (*Linum usitatissimum*) oil

**Fleshing grease, sulfated sodium salt.** See Sodium tallow sulfate

**Flexible collodion.** See Nitrocellulose

**Flour sulfur.** See Sulfur

**Flowers of antimony.** See Antimony trioxide

**Flowers of sulfur.** See Sulfur

**Flowers of zinc.** See Zinc oxide

**Fluorescein, 4',5'-dibromo-.** See Acid orange 11

**Fluorescent brightener 140.** See 7-Diethylamino-4-methylcoumarin

**Fluorothene.** See Chlorotrifluoroethylene polymer

**Fluxing lime.** See Calcium oxide

**Food blue 3.** See Acid blue 1

**Food green 2.** See Acid green 5

**Food orange 4.** See Acid orange 10

**Food red 5.** See Acid red 26

**Food red 15.** See Basic violet 10

**Food red 106.** See Acid red 52

**Food violet 1.** See Acid violet 17

**Food violet 2.** See Acid violet 49

**Food yellow 3.** See Acid yellow 3

**Food yellow 4.** See Tartrazine

**Food yellow 13.** See Acid yellow 3

## Formaldehyde

CAS 50-00-0; EINECS/ELINCS 200-001-8; UN No. 1198 (DOT), 2209 (DOT)

*Synonyms:* Aldehyde C-1; Formalin; Formic aldehyde; Formol; HOCH; Methanal; Methyl aldehyde; Methylene glycol; Methylene oxide; Oxy-methylene; Paraform; Polyoxymethylene glycols

*Empirical:*  $\text{CH}_2\text{O}$

*Formula:*  $\text{HCHO}$

*Properties:* Colorless gas, strong pungent odor; avail. commercially as aq. sol'ns. (37-50% in methanol); sol. in water, alcohol; m.w. 30.03; dens. 1.083; b.p. -19 C; f.p. -118 C; flash pt. 56 C; ref. index 1.3765

*Toxicology:* ACGIH TLV/TWA 1 ppm; LD50 (oral, rat) 800 mg/kg, (subcut., rat) 420 mg/kg, (IV, rat) 87 mg/kg; LC50 (inh., rat) 590 mg/m<sup>3</sup>; poison by ing., skin contact, inh., IV, IP, subcut. routes; human poison by ing., systemic effects, skin/eye irritant; vapor intensely irritating to mucous membranes; if ingested, causes violent vomiting and diarrhea and possible collapse; suspected human carcinogen; experimental tumorigen, teratogen; mutagenic data; common air contaminant; TSCA listed

*Precaution:* Combustible when exposed to heat, or flame; mod. fire risk; mod. explosion hazard; explosive limits 7-73%; can react vigorously with oxidizers; violent reactions possible

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and fumes

HMIS: Health 3; Flammability 2; Reactivity 1

*Uses:* Urea/melamine resins; polyacetal resins; phenolic resins; fertilizers; preservative for hides/skins; reducing agent; corrosive inhibitor; intermediate for paints; antimicrobial preservative for pharmaceuticals; nickel plating brightener; disinfectant; crosslinker (paper waterproofing); latex coagulant; textile finishing agent; embalming fluids; methylation/chloromethylation reagent; preservative in food processing defoamers; animal glue adjuvant; sterilizer for kidney dialyzer membranes; in food-pkg. adhesives; preservative for coatings for paper/paperboard in contact with aq./fatty/dry foods; preservative for defoamers in food-contact coatings; defoamer in food-contact paper/paperboard; preservative in food-contact textiles

*Regulatory:* FDA 21CFR §173.340 (1% of dimethicone content), 175.105, 175.210, 176.170, 176.180, 176.200, 176.210, 177.2410, 177.2800, 178.3120, 573.460; FDA approved for topicals; BP compliance (sol'n.); SARA reportable

*Manuf./Distrib.:* Ashland; Borden; C.P. Hall; Celanese; Degussa-Hüls; DuPont; Farleyway Chem. Ltd; Fluka; Georgia-Pacific Resins; Hercules/Aqualon; Houghton Chem.; ISP; J.T. Baker; Mallinckrodt Baker; Miljac; Monomer-Polymer & Dajac Labs; Monsanto; Perstorp Polyols; Praxair; Ruger; Sigma; Solutia; Spectrum Quality Prods.; U.S. Chems.; Van Waters & Rogers; Veckridge; Wright

*Trade Names:* Hercules® 37M6-8

**p-Formaldehyde.** See Paraformaldehyde

**Formaldehyde copolymer with urea.** See Urea/formaldehyde resin

**Formaldehyde hydrosulfite.** See Sodium formaldehyde sulfoxylate

**Formaldehyde, polymer with 5,5-dimethyl-2,4-imidazolidinedione.** See Dimethyl hydantoin-formaldehyde polymer

**Formaldehyde sodium bisulfite adduct.** See Sodium formaldehyde sulfoxylate

**Formaldehyde sodium sulfoxylate.** See Sodium formaldehyde sulfoxylate

**Formaldehyde/urea condensate.** See Urea/formaldehyde resin

**Formaldehyde/urea copolymer.** See Urea/formaldehyde resin

**Formaldehyde/urea polymer.** See Urea/formaldehyde resin

**Formaldehyde/urea precondensate.** See Urea/formaldehyde resin

**Formaldehyde/urea prepolymer.** See Urea/formaldehyde resin

**Formaldehyde/urea resin.** See Urea/formaldehyde resin

**Formalin.** See Formaldehyde

**Formalin/urea copolymer.** See Urea/formaldehyde resin

**Formamidine sulfinic acid.** See Thiourea dioxide

## Formic acid

CAS 64-18-6; EINECS/ELINCS 200-579-1; UN No. 1779 (DOT); FEMA 2487

*Synonyms:* Aminic acid; Formylic acid; Hydrogen carboxylic acid; Methanoic acid

*Classification:* Organic acid

*Empirical:*  $\text{CH}_2\text{O}_2$

*Formula:*  $\text{HCOOH}$

*Properties:* Colorless fuming liq., penetrating odor; sol. in water, alcohol, ether; m.w. 46.03; dens. 1.22 (20/4 C); m.p. 8.3 C; b.p. 100.8 C; flash pt. (OC) 69 C; ref. index 1.3714

*Toxicology:* ACGIH TLV/TWA 5 ppm; STEL 10 ppm; LD50 (oral, rat) 1100 mg/kg, (IP, mouse) 940 mg/kg; LC50 (inh., rat, 15 min) 15 g/m<sup>3</sup>; poison by inh., IV, IP routes; mod. toxic by ing.; corrosive; skin and severe eye irritant; migrates to food from pkg.; mutagenic data; TSCA listed

*Precaution:* Flamm.; DOT: corrosive material; can react vigorously with oxidizers; explosive with furfuryl alcohol, nitromethane, etc.

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 3; Flammability 2; Reactivity 0

**Uses:** Reducing agent/pH control in dyeing, electroplating, pickling baths; dyeing and finishing of textiles; leather treatment; chemicals; mfg. of fumigants, insecticides, refrigerants; solvent for perfumes, lacquers; silvering glass; preservative; ore flotation; reagent; paper mfg. aid; latex coagulant; antibacterial preservative for foods; disinfectant; syn. flavoring adjunct for foods and pharmaceuticals; fragrance; in food pkg. paper/paperboard; silage fermentation additive

**Use Level:** 1 ppm (nonalcoholic beverages), 5 ppm (ice cream, ices), 5-18 ppm (candy), 5-6.1 ppm (baked goods); ADI 0-3 mg/kg (EU)

**Regulatory:** FDA 21CFR §172.515, 186.1316, GRAS as indirect additive, 573.480; FEMA GRAS; Europe listed; prohibited in UK

**Manuf./Distrib.:** Aldrich; Alfa Chem; Alfrebro; Ashland; BASF AG; BASF; BCH Brühl; BP Chems. Ltd; Celanese; Coyne; Fisher Scientific; Fluka; Grau Aromatics; Harcros; Houghton Chem.; Independent Chem.; Mallinckrodt Baker; Norsk Hydro AS; Rochem Int'l.; Romil Ltd; Sal Chem.; Sigma; Spectrum Quality Prods.; Varsal Instruments

**Formic acid, aluminum salt.** See Aluminum formate

**Formic aldehyde.** See Formaldehyde

**Formol.** See Formaldehyde

**N-Formyldimethylamine.** See Dimethyl formamide

**Formylic acid.** See Formic acid

**Fossil flour.** See Diatomaceous earth; Silica, fumed

**Fossil wax.** See Ozokerite

**Franklin.** See Calcium carbonate

**French chalk.** See Talc

**β-D-Fructofuranosyl-α-D-glucopyranoside benzoate.** See Sucrose benzoate

#### Fumaric acid

CAS 110-17-8; EINECS/ELINCS 203-743-0; UN No. 9126 (DOT); FEMA 2488

**Synonyms:** Allomaleic acid; Boletic acid; 2-Butenedioic acid; trans-Butenedioic acid; (E)-Butenedioic acid; trans-1,2-Ethenedicarboxylic acid; trans-1,2-Ethylenedicarboxylic acid; 1,2-Ethylenedicarboxylic acid; Lichenic acid

**Classification:** Unsat. aliphatic dicarboxylic acid

**Empirical:** C<sub>4</sub>H<sub>4</sub>O<sub>4</sub>

**Formula:** HOOCCH:CHCOOH

**Properties:** Wh. cryst. solid; odorless; acidic taste; mod. sol. in ethanol and acetone @ 30 C; sl. sol. in water, ether, oxygenated solvs.; ; very sl. sol. in chloroform; m.w. 116.08; dens. 1.635 (20/4 C); vapor pressure 1.7 mm Hg; m.p. 287 C; b.p. 290 C; flash pt. 230 C

**Toxicology:** LD50 (oral, male rat) 10,700 mg/kg, (IP, mouse) 587 mg/kg, (dermal, rabbit) > 20,000 mg/kg; poison by IP route; mildly toxic by ing. and skin contact; skin and eye irritant; mutagenic data; TSCA listed

**Precaution:** Combustible exposed to heat or flame; can react vigorously with oxidizers; incompat. with bases, amines, reducing agents; can form explosive dust-air mixts.; sol'ns. react with metals (Al, Fe, Zn) releasing flamm. hydrogen gas

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>; heated to decomp., emits acrid smoke and irritating fumes

**HMIS:** Health 1; Flammability 0; Reactivity 0

**Storage:** Store in a cool, dry, well-ventilated area away from heat and ignition sources

**Uses:** Modifier for polyester, alkyd and phenolic resins; paper sizing resins; rosin esters and adducts; alkyd resin coatings; upgrading natural drying oils; mordant in dyeing; organic synthesis; printing inks; chem. intermediate for plasticizers; comonomer for alkyd and unsat. polyester resins; food additive (acidulant, flavoring agent, leavening agent, antioxidant, preservative); pharmaceuticals (acidulant, antidandruff ingred.; cleaning agent for dentures); in food-pkg. adhesives; in cellophane for food pkg.

**Use Level:** 50 ppm (nonalcoholic beverages), 1300 ppm (baked goods), 3600 ppm (gelatins, puddings); ADI 0-6 mg/kg (EU)

**Regulatory:** FDA 21CFR §172.350, 175.105, 177.1200; USDA 9CFR §318.7, 381.147; BATF 27CFR §240.1051, limitation 25 lb/1000 gal wine; FEMA GRAS; Japan approved; Europe listed; UK approved; FDA approved for orals; USP/NF, BP compliance

**Manuf./Distrib.:** ADA Int'l.; Aceto; Aldrich; Alfa Chem; Allchem Ind.; Am. Biorganics; Ashland; BCH Brühl; Balchem; Bartek Ingreds.; Bayer/Fiber, Addits., Rubber; Browning; Chemical; DSM Chemie Linz UK; Fluka; Gadot Biochem.; Haarmann & Reimer; Jungbunzlauer; Lonza;

#### Fumaric acid homopolymer

**Uses:** In paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §176.180

**Fumaric resin.** See Maleic resin

**Fumed silica.** See Silica, fumed

**Fumed silicon dioxide.** See Silica, fumed

**2,5-Furandione.** See Maleic anhydride

**2,5-Furandione, dihydro-3-(octadecenyl)-.** See Octadecenyl succinic anhydride

**2,5-Furandione, 3-(docosenyl) dihydro.** See Docosenylsuccinic anhydride

**2,5-Furandione, 3-(dodecenyl) dihydro-.** See Dodecenylsuccinic anhydride

**2,5-Furandione, 3-(eicosenyl) dihydro.** See Eicosenyl succinic anhydride

**2,5-Furandione, 3-(hexadecenyl) dihydro-.** See Hexadecenyl succinic anhydride

**2,5-Furandione, homopolymer.** See Maleic anhydride homopolymer

**2,5-Furandione, polymer with ethene.** See Ethylene/MA copolymer

**2,5-Furandione, polymer with ethenylbenzene.** See Styrene/MA copolymer

**2,5-Furandione, polymer with methoxyethene.** See PVM/MA copolymer

**2,5-Furandione, polymer with methoxyethylene.** See PVM/MA copolymer

**2,5-Furandione, polymer with 2-methyl-1-propene.** See Isobutylene/MA copolymer

**Furanidine.** See Tetrahydrofuran

**Furan, tetrahydro-.** See Tetrahydrofuran

#### Furcelleran

CAS 9000-21-9; EINECS/ELINCS 232-531-0

**Synonyms:** Danish agar; Furcelleran gum

**Definition:** Refined hydrocolloid obtained by aq. extraction of *Furcellaria fastigiata* of the class of red seaweed, *Rhodophyceae*

**Properties:** Wh. powd., odorless; sol. in warm water

**Toxicology:** LD50 (oral, rat) 5000 mg/kg, (oral, mouse) 6 mg/kg; mod. toxic by ingestion; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Emulsifier, gellant, stabilizer, thickener in foods, toothpaste; bacterial culture media; pharmaceuticals; in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §172.655, 176.170; Japan approved

**Manuf./Distrib.:** P.L. Thomas

**Furcelleran gum.** See Furcelleran

**Furnace black.** See Carbon black

**Gadidae oil.** See Cod liver oil

**Gadi lecur.** See Cod liver oil

**Galactasol.** See Guar (Cyanopsis tetragonoloba) gum

#### Gallic acid

CAS 149-91-7; 5995-86-8 (monohydrate); EINECS/ELINCS 205-749-9

**Synonyms:** 3,4,5-Trihydroxybenzoic acid

**Empirical:** C<sub>7</sub>H<sub>6</sub>O<sub>5</sub> (anhyd.); C<sub>7</sub>H<sub>6</sub>O<sub>5</sub> • H<sub>2</sub>O (monohydrate)

**Formula:** C<sub>6</sub>H<sub>2</sub>(OH)<sub>3</sub>CO<sub>2</sub>H (anhyd.) or C<sub>6</sub>H<sub>2</sub>(OH)<sub>3</sub>CO<sub>2</sub>H • H<sub>2</sub>O (monohydrate)

**Properties:** Wh. to pale fawn-colored cryst. or need.; odorless; sol. (1 g/ml): 87 ml water, 6 ml alcohol, 100 ml ether, 10 ml glycerin, 5 ml acetone; pract. insol. in benzene, chloroform, petroleum ether; m.w. 170.12 (anhyd.), 188.14 (monohydrate); dens. 1.694; m.p. 258-265 C (dec.)

**Toxicology:** LD50 (oral, rabbit) 5 g/kg, (IP, mouse) 4300 mg/kg, (IV, mouse) 320 mg/kg; poison by IV route; mod. toxic by IP route; irritant; mutagenic data; experimental reproductive effector; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**HMIS:** Health 1; Flammability 0; Reactivity 0

**Storage:** Hygroscopic; protect from light

**Uses:** Additive; photography; writing ink; dyeing; mfg. of pyrogallol, tannins, paper; tanning agent; pharmaceuticals (astringent, antioxidant); engraving; lithography; analytical reagent; food additive; food antioxidant (Japan)

**Regulatory:** Japan approved; BP compliance

**Manuf./Distrib.:** Aceto; Aldrich; Alfa Chem; BCH Brühl; Fluka; Fuji Chem.

NFPA: Health 3; Flammability 2; Reactivity 0

*Uses:* Reducing agent/pH control in dyeing, electroplating, pickling baths; dyeing and finishing of textiles; leather treatment; chemicals; mfg. of fumigants, insecticides, refrigerants; solvent for perfumes, lacquers; silvering glass; preservative; ore flotation; reagent; paper mfg. aid; latex coagulant; antibacterial preservative for foods; disinfectant; syn. flavoring adjunct for foods and pharmaceuticals; fragrance; in food pkg. paper/paperboard; silage fermentation additive

*Use Level:* 1 ppm (nonalcoholic beverages), 5 ppm (ice cream, ices), 5-18 ppm (candy), 5-6.1 ppm (baked goods); ADI 0-3 mg/kg (EU)

*Regulatory:* FDA 21CFR §172.515, 186.1316, GRAS as indirect additive, 573.480; FEMA GRAS; Europe listed; prohibited in UK

*Manuf./Distrib.:* Aldrich; Alfa Chem; Alfrebro; Ashland; BASF AG; BASF; BCH Brühl; BP Chems. Ltd; Celanese; Coyne; Fisher Scientific; Fluka; Grau Aromatics; Harcros; Houghton Chem.; Independent Chem.; Mallinckrodt Baker; Norsk Hydro AS; Rochem Int'l.; Romil Ltd; Sal Chem.; Sigma; Spectrum Quality Prods.; Varsal Instruments

Miljac; Monomer-Polymer & Dajac Labs; Monsanto; NOF; Penta Mfg.; Ruger; Schweizerhall; Sigma; Spectrum Quality Prods.; U.S. Chems.; United Min. & Chem.; V.L. Clark; Van Waters & Rogers; Varsal Instruments; Whyte Chems. Ltd

**Formic acid, aluminum salt.** See Aluminum formate

**Formic aldehyde.** See Formaldehyde

**Formol.** See Formaldehyde

**N-Formyl dimethylamine.** See Dimethyl formamide

**Formylic acid.** See Formic acid

**Fossil flour.** See Diatomaceous earth; Silica, fumed

**Fossil wax.** See Ozokerite

**Franklin.** See Calcium carbonate

**French chalk.** See Talc

**β-D-Fructofuranosyl-α-D-glucopyranoside benzoate.** See Sucrose benzoate

### Fumaric acid

CAS 110-17-8; EINECS/ELINCS 203-743-0; UN No. 9126 (DOT); FEMA 2488

*Synonyms:* Allomaleic acid; Boletic acid; 2-Butenedioic acid; trans-Butenedioic acid; (E)-Butenedioic acid; trans-1,2-Ethenedicarboxylic acid; trans-1,2-Ethylenedicarboxylic acid; 1,2-Ethylenedicarboxylic acid; Lichenic acid

*Classification:* Unsat. aliphatic dicarboxylic acid

*Empirical:* C<sub>4</sub>H<sub>4</sub>O<sub>4</sub>

*Formula:* HOOCCH:CHCOOH

*Properties:* Wh. cryst. solid; odorless; acidic taste; mod. sol. in ethanol and acetone @ 30 C; sl. sol. in water, ether, oxygenated solvs.; ; very sl. sol. in chloroform; m.w. 116.08; dens. 1.635 (20/4 C); vapor pressure 1.7 mm Hg; m.p. 287 C; b.p. 290 C; flash pt. 230 C

**Gadi lecur.** See Cod liver oil

**Galactasol.** See Guar (Cyanopsis tetragonoloba) gum

### Gallic acid

CAS 149-91-7; 5995-86-8 (monohydrate); EINECS/ELINCS 205-749-9

*Synonyms:* 3,4,5-Trihydroxybenzoic acid

*Empirical:* C<sub>7</sub>H<sub>6</sub>O<sub>5</sub> (anhyd.); C<sub>7</sub>H<sub>6</sub>O<sub>5</sub> · H<sub>2</sub>O (monohydrate)

*Formula:* C<sub>6</sub>H<sub>2</sub>(OH)<sub>3</sub>CO<sub>2</sub>H (anhyd.) or C<sub>6</sub>H<sub>2</sub>(OH)<sub>3</sub>CO<sub>2</sub>H · H<sub>2</sub>O (monohydrate)

*Properties:* Wh. to pale fawn-colored cryst. or need.; odorless; sol. (1 g/ml): 87 ml water, 6 ml alcohol, 100 ml ether, 10 ml glycerin, 5 ml acetone; pract. insol. in benzene, chloroform, petroleum ether; m.w. 170.12 (anhyd.), 188.14 (monohydrate); dens. 1.694; m.p. 258-265 C (dec.)

*Toxicology:* LD<sub>50</sub> (oral, rabbit) 5 g/kg, (IP, mouse) 4300 mg/kg, (IV, mouse) 320 mg/kg; poison by IV route; mod. toxic by IP route; irritant; mutagenic data; experimental reproductive effector; TSCA listed

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Hygroscopic; protect from light

*Uses:* Additive; photography; writing ink; dyeing; mfg. of pyrogallol, tannins, paper; tanning agent; pharmaceuticals (astringent, antioxidant); engraving; lithography; analytical reagent; food additive; food antioxidant (Japan)

*Regulatory:* Japan approved; BP compliance

*Manuf./Distrib.:* Aceto; Aldrich; Alfa Chem; BCH Brühl; Fluka; Fuji Chem.

## Gallotannic acid

Ind.; Integra; Lowenstein Dyes & Cosmetics; Mallinckrodt Baker; Nipa Labs; Penta Mfg.; Rochem Int'l.; Ruger; Sigma; Spectrum Quality Prods.; Triple Crown Am.; U.S. Biochemical

**Gallotannic acid.** See Tannic acid

**Gallotannin.** See Tannic acid

**Garnet lac.** See Shellac

**GDO.** See Glyceryl dioleate

## Gelatin

CAS 9000-70-8; EINECS/ELINCS 232-554-6

*Synonyms:* Gelatine; Gelatins; White gelatin

*Definition:* Complex combination of proteins obtained from partial hydrolysis of collagen derived from animal skin, connective tissues, and bones; Type A is derived from acid-treated precursor, Type B from alkali-treated precursor

*Properties:* Faint yel. or amber flake or powd., sl. char. bouillon-like odor in sol'n., tasteless; sol. in warm water, glycerol, acetic acid; insol. in org. solvs., alcohol, chloroform, ether, fixed and volatile oils; amphoteric

*Toxicology:* LD50 (oral, rat) 5 g/kg; may cause anaphylactoid reactions; experimental teratogen, reproductive effector; TSCA listed

*Precaution:* Stable in air when dry, but subject to microbial decomp. when moist or in sol'n.

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Visc. control agent; photographic film; sizing; textile and paper adhesives; cements; capsules for medications; matches; clarifying agent; protective colloid in ice cream; stabilizer, thickener, texturizer in food; dietary supplements; chewing gum base; extender; raw material in paints; pharmaceuticals (emulsifier, vehicle, binder, suspending agent, tablet binder/coating, wound/burn healing, surgical sponges)

*Use Level:* ADI not specified (FAO/WHO)

*Regulatory:* FDA 21CFR §133.133, 133.134, 133.162, 133.178, 133.179, 182.70; GRAS; Japan approved; FDA approved for dentals, inhalants, intramuscular injectables, intravenous, IV (infusion), orals, topicals; USP/NF, BP, Ph.Eur. compliance

*Manuf./Distrib.:* Aldrich; Am. Gelatin; Ashland; Atlantic Gelatin; Browning; Croda Oleochems.; DynaGel; GMI Prods.; Hormel Foods; Int'l. Chem. Inc.; Norland Prods.; Ruger; Sigma; Spectrum Quality Prods.; Triple Crown Am.; Vyse Gelatin; Whyte Chems. Ltd

**Gelatine.** See Gelatin

**Gelatins.** See Gelatin

**Gentian violet.** See Basic violet 3

**Ghatti gum.** See Gum ghatti

**Gingelly oil.** See Sesame (*Sesamum indicum*) oil

**Gingilli oil.** See Sesame (*Sesamum indicum*) oil

## Glass

CAS 65997-17-3

*Synonyms:* Fiberglass; Fibrous glass; Glass fiber; Glass fibers

*Definition:* Ceramic material containing silica (sand) (75%), soda ash (20%), and lime (5%), often combined with metallic oxides; the blend is heated to fusion temps., then annealed to a rigid, friable state

*Properties:* Plate, sheet, fiber, flakes, filament, fabric, rods, tubing, pipe, powd., beads, flakes, or hollow spheres; sp.gr. 2.5; hardness (Mohs) 5.5; high str., dimensional stability, heat and chem. resist.

*Toxicology:* Fibrous glass: ACGIH TLV 10 mg/m<sup>3</sup> of air (fibers or dust); TDL0 (IP, rat) 50 mg/kg; tumorigen; mutagen

*Uses:* Windows; structural building blocks; chem. reaction equip.; pumps; piping; vacuum tubes; light bulbs; yarns; fabrics; containers; glass spheres with partial vacuum interior and treated exterior in compounding resins, potting compds., other composites; fibers as fillers for thermoplastics and thermosets, in thermal/acoustic/elec. insulation, fabrics, carpet backing, reinforcement for cement, tire cord, filter medium, reinforcement in food-contact crosslinked polyesters

*Regulatory:* FDA 21CFR §177.2420

*Manuf./Distrib.:* Cataphote; Ferro/Elec. & Spec. Glass; General Color & Chem.

*Trade Names:* A-Series Glass Beads

**Glass fiber.** See Glass

**Glass fibers.** See Glass

**Glassy sodium.** See Sodium hexametaphosphate

**Glauber's salt.** See Sodium sulfate

**1,4-D-Glucan glucanohydrolase.** See Amylase

**Glucaptate, sodium.** See Sodium glucoheptonate

**Glucitol.** See Sorbitol

**D-Glucitol.** See Sorbitol

**Glucuheptonic acid, sodium salt.** See Sodium glucoheptonate

**D-Gluconic acid, compd. with n-[3-(dimethylamine) propyl] soyamide.**

See Soyamidopropyl dimethylamino gluconate

**D-Gluconic acid monosodium salt.** See Sodium gluconate

**Gluconic acid sodium salt.** See Sodium gluconate

**Glue, animal.** See Animal glue

## Glutaral

CAS 111-30-8; EINECS/ELINCS 203-856-5

*Synonyms:* Glutaraldehyde; Glutaric dialdehyde; Pentanedial; 1,5-Pentanedial;

Pentane-1,5-dial; 1,5-Pentanedione

*Classification:* Aliphatic dialdehyde

*Empirical:* C<sub>5</sub>H<sub>8</sub>O<sub>2</sub>

*Formula:* OHC(CH<sub>2</sub>)<sub>3</sub>CHO

*Properties:* Colorless oily liq.; pungent aldehyde odor; sol. in water, alcohol, benzene; m.w. 100.12; dens. 0.72; b.p. 188 C (dec.); f.p. -14 C; flash pt. none

*Toxicology:* ACGIH TLV/CL 0.2 ppm; LD50 (oral, rat) 468 mg/kg, (IP, rat) 17,900 µg/kg, (subcut., rat) 2390 mg/kg, (dermal, rabbit) 795 mg/kg; poison by ing., IV, IP routes; mod. toxic by inh., skin contact, subcut. routes; severe eye and human skin irritant; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

*Precaution:* Corrosive

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*Uses:* Preservative, antimicrobial for cosmetic, toiletry, metalworking fluids, and chemical specialty prods.; biocide in water cooling towers, oil field applics.; intermediate; fixative for tissues; for crosslinking protein and polyhydroxy materials; tanning of soft leathers; gelatin hardener; in microcapsules that contain flavoring agents; antimicrobial in beet-sugar mills; fixing agent in immobilization of enzyme preps.; sterilant in medical/dental equip., fiberoptic endoscopes; in food-pkg. adhesives; antimicrobial in pigment and filler slurries for mfg. of paper/paperboard in contact with aq./fatty foods; slimicide in food-contact paper/paperboard

*Use Level:* 0.02-0.2% (50%)

*Regulatory:* FDA 21CFR §172.230 (250 ppm max.), 173.357, 175.105, 176.170, 176.180, 176.300; EPA reg. 10352-39; Japan MITI; Europe provisional list 0.1% max.; BP compliance (sol'n.)

*Manuf./Distrib.:* AMRESCO; Aldrich; Allchem Ind.; BASF; Charkit; Fabricchem; Fluka; Sigma; Spectrum Quality Prods.; Transol Chems. UK Ltd; Triple Crown Am.; Union Carbide

*Trade Names:* Metasol® 550; Paxgard GDA; Paxgard GT 10; Paxgard GT 20; Protectol® GDA

**Glutaraldehyde.** See Glutaral

**Glutaric dialdehyde.** See Glutaral

**Glutaronitrile, 2-bromo-2-(bromomethyl).** See Methyl dibromo glutaronitrile

**Glycerides, coconut oil mono-.** See Glyceryl cocoate

**Glycerides, hydrogenated lard mono-.** See Hydrogenated lard glyceride

**Glycerides, hydrogenated tallow mono-.** See Hydrogenated tallow glyceride

**Glycerides, hydrogenated vegetable mono-.** See Hydrogenated vegetable glyceride

**Glycerides, lard mono-, di- and tri-, hydrogenated.** See Hydrogenated lard glycerides

**Glycerides, lard mono-, hydrogenated.** See Hydrogenated lard glyceride

**Glycerides, palm oil mono-, hydrogenated.** See Hydrogenated palm glyceride

**Glycerides, soya mono-, di- and tri-, hydrogenated.** See Hydrogenated soy glycerides

**Glycerides, soya mono-, hydrogenated.** See Hydrogenated soy glyceride

**Glycerides, soybean oil, hydrogenated, mono.** See Hydrogenated soy glyceride

**Glycerides, tall oil mono-, di- and tri-.** See Tall oil glycerides

**Glycerides, tallow, hydrogenated.** See Hydrogenated tallow glycerides

**Glycerides, tallow mono-.** See Tallow glyceride

**Glycerides, tallow mono-, di- and tri-.** See Tallow glycerides

**Glycerides, tallow mono-, di- and tri-, hydrogenated.** See Hydrogenated

tallow glycerides

**Glycerides, tallow mono-, hydrogenated.** See Hydrogenated tallow glyceride

**Glycerides, vegetable mono-, di-, and tri, hydrogenated.** See Hydrogenated vegetable glycerides

**Glycerides, vegetable mono-, hydrogenated.** See Hydrogenated vegetable glyceride

**Glycerides, vegetable oil, hydrogenated.** See Hydrogenated vegetable glycerides

**Glycerine triacetate.** See Triacetin

**Glycerin monoleate.** See Glyceryl oleate

**Glycerin monostearate.** See Glyceryl stearate

**Glycerite.** See Tannic acid

**D-Glycero-D-gulo-heptonic acid, monosodium salt.** See Sodium glucoheptonate

**Glycerol dioleate.** See Glyceryl dioleate

**Glycerol epichlorohydrin.** See Epichlorohydrin

**Glycerol mono coconut oil.** See Glyceryl cocoate

**Glycerol monolaurate.** See Glyceryl laurate

**Glycerol monoleate.** See Glyceryl oleate

**Glycerol monomethacrylate.** See Glyceryl methacrylate

**Glycerol monooleate.** See Glyceryl oleate

**Glycerol monoricinoleate.** See Glyceryl ricinoleate

**Glycerol 1-monoricinoleate.** See Glyceryl ricinoleate

**Glycerol monostearate.** See Glyceryl stearate

**Glycerol oleate.** See Glyceryl oleate

**Glycerol ricinoleate.** See Glyceryl ricinoleate

**Glycerol stearate.** See Glyceryl stearate

**Glycerol triacetate.** See Triacetin

**Glycerol trioleate.** See Triolein

**Glyceryl butyl ricinoleate**

*Synonyms:* Glyceryl monobutyl ricinoleate

*Uses:* In food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §175.105, 176.170

**Glyceryl caprate**

CAS 26402-22-2; EINECS/ELINCS 247-667-6

*Synonyms:* Glyceryl monocaprate; Decanoic acid, monoester with 1,2,3-propanetriol

*Definition:* Monoester of glycerin and capric acid

*Empirical:* C<sub>13</sub>H<sub>26</sub>O<sub>4</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>8</sub>COOCH<sub>2</sub>COHHCH<sub>2</sub>OH

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Food emulsifier; solubilizer; absorption promoter; antimicrobial agent; moisturizer; emollient; refatting agent; in paper/paperboard in contact with dry food

*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2800

*Manuf./Distrib.:* Sigma

**Glyceryl caprylate**

CAS 26402-26-6; EINECS/ELINCS 247-668-1

*Synonyms:* Glyceryl monocaprylate; Octanoic acid, monoester with 1,2,3-propanetriol; Monoctanoin

*Definition:* Monoester of glycerin and caprylic acid

*Empirical:* C<sub>11</sub>H<sub>22</sub>O<sub>4</sub>

*Formula:* CH<sub>3</sub>(CH<sub>2</sub>)<sub>6</sub>COOCH<sub>2</sub>COHHCH<sub>2</sub>OH

*Properties:* Crystals; m.p. 39.5-40.5 C; nonionic

*Toxicology:* TSCA listed

*Uses:* Solubilizer, emulsifier for pharmaceutical drugs, cosmetics; carrier/vehicle for drugs in capsules; antistat for syn. materials; solvent, solubilizer for active ingreds.; softener for chewing gum base; defoamer in food-contact paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §176.210, 177.2800

**Glyceryl caprylate/caprate**

*Definition:* Mixture of monoglycerides of caprylic and capric acids

*Properties:* Nonionic

*Uses:* Cosolvent and coupler for org. compds.; w/o emulsifier; antistat and lubricant for syn. materials; emulsifier for cosmetics, foods, pharmaceuticals; solvent, dispersant, solubilizer, vehicle, penetrant for pharmaceuticals;

defoamer in food-contact paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §176.210, 177.2800

**Glyceryl cocoate**

CAS 61789-05-7; EINECS/ELINCS 263-027-9

*Synonyms:* Glycerides, coconut oil mono-; Glycerol mono coconut oil; Glyceryl cocoate

*Definition:* Monoester of glycerin and coconut fatty acids

*Formula:* RCO-OCH<sub>2</sub>COHHCH<sub>2</sub>OH, RCO- represents the fatty acids derived from coconut oil

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Food emulsifier; surfactant for pharmaceutical formulations; solubilizer; plasticizer; lubricant; refatting agent; penetrant; carrier; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2800

**Glyceryl coconate.** See Glyceryl cocoate

**Glyceryl dilaurate**

CAS 27638-00-2; EINECS/ELINCS 248-586-9

*Synonyms:* Dilaurin; Dodecanoic acid, diester with 1,2,3-propanetriol

*Definition:* Diester of glycerin and lauric acid

*Empirical:* C<sub>27</sub>H<sub>52</sub>O<sub>5</sub>

*Formula:* C<sub>11</sub>H<sub>23</sub>COOCH<sub>2</sub>CHCH<sub>2</sub>OHOCOC<sub>11</sub>H<sub>23</sub>

*Properties:* Wh. to off-wh. solid; sol. in min. oil, 95% ethanol, IPM, oleyl alcohol, castor oil; insol. in water, glycerin, propylene glycol; sapon. no. 219-229; ref. index 1.4520-1.4560 (35 C); nonionic

*Toxicology:* LD50 (oral, rat) > 5 g/kg; nonirritating to eyes and skin; TSCA listed

HMIS: Health 0; Flammability 1; Reactivity 0

*Uses:* Emollient lipid; coupling agent; plasticizer; emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants, cosmetics, pharmaceuticals; in food-pkg. adhesives

*Regulatory:* FDA 21CFR §175.105, 1876.210

*Manuf./Distrib.:* Ruger; Sigma

**Glyceryl dilaurate SE**

EINECS/ELINCS 248-586-9

*Properties:* Anionic

*Uses:* W/o emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants, cosmetics, pharmaceuticals

**Glyceryl dioleate**

CAS 25637-84-7; EINECS/ELINCS 247-144-2

*Synonyms:* GDO; Glycerol dioleate; 9-Octadecenoic acid, diester with 1,2,3-propanetriol

*Definition:* Diester of glycerin and oleic acid

*Empirical:* C<sub>39</sub>H<sub>72</sub>O<sub>5</sub>

*Properties:* Pale yel. liq.; HLB 1.8; nonionic

*Toxicology:* TSCA listed

HMIS: Health 0; Flammability 1; Reactivity 0

*Uses:* Surfactant for cosmetics, foods, pharmaceuticals, industrial applics.; emulsifier; thickener; stabilizer; emollient; lubricant for pharmaceuticals; internal processing lubricant for PVC; antifog for PVC film; solvent for dyes and pigments; defoamer for paints; emulsifier, lubricant for textile spin finishes, metalworking fluids; superfatting agent for soaps, hand cleaners; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2800

*Manuf./Distrib.:* A.P.; Ruger; Sigma; Universal Preserv-A-Chem

**Glyceryl distearate**

CAS 1323-83-7; EINECS/ELINCS 215-359-0

*Synonyms:* Octadecanoic acid, diester with 1,2,3-propanetriol

*Definition:* Diester of glycerin and stearic acid

*Empirical:* C<sub>39</sub>H<sub>76</sub>O<sub>5</sub>

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Emulsifier, coemulsifier, stabilizer, wetting agent, lubricant, and antistat used in cosmetic, pharmaceutical, industrial, food applics.; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; in food-contact

textiles

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2800; Europe listed; FDA approved for orals

*Manuf./Distrib.:* Sigma

### Glycerol hydrogenated rosin

*Synonyms:* Rosin, hydrogenated, glycerol ester

*Definition:* Monoester of glycerin and hydrogenated mixed long chain acids derived from rosin

*Uses:* Thermoplastic syn. resin; as softener/plasticizer for the masticatory agent in chewing gum bases; as resin modifier for film-formers, elastomers, and waxes in adhesive and protective coating compositions; as tackifier in adhesives, coatings; in food-pkg. and -processing operations

*Trade Names:* Staybelite® Ester 10

### Glycerol hydroxystearate

CAS 1323-42-8; EINECS/ELINCS 215-355-9

*Synonyms:* Glycerol 12-hydroxystearate; Glycerol mono-hydroxy stearate; Glycerol mono-12-hydroxystearate; Hydroxystearic acid, monoester with glycerol

*Definition:* Monoester of glycerin and hydroxystearic acid

*Empirical:*  $C_{21}H_{40}O_5$

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Emulsifier, emollient, opacifier, bodying agent, thickener for cosmetics, pharmaceuticals, household prods.; beeswax substitute; pigment wetting in paints, inks; paper industry; lubricant and mold release in plastics; textile and leather processing; detergency and cleaning prods.; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods; defoamer in food-contact coatings; in closure-sealing gaskets for food containers; in food-contact textiles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.200, 177.1210, 177.2800

**Glycerol 12-hydroxystearate.** See Glycerol hydroxystearate

**Glycerol lactostearate.** See Glycerol stearate lactate

### Glycerol laurate

CAS 142-18-7; EINECS/ELINCS 205-526-6

*Synonyms:* Dodecanoic acid, 2,3-dihydroxypropyl ester; Dodecanoic acid, monoester with 1,2,3-propanetriol; Glycerol monolaurate; Glycerol monolaurate; 1-Monolaurin

*Definition:* Monoester of glycerin and lauric acid

*Empirical:*  $C_{15}H_{30}O_4$

*Formula:*  $CH_3(CH_2)_{10}COOCH_2COHHCH_2OH$

*Properties:* Cream-colored paste, faint odor; disp. in water; sol. in methanol, ethanol, toluene, naphtha, min. oil; dens. 0.98; m.p. 23-27°C; HLB 5.2; pH 8-8.6; nonionic

*Toxicology:* LD50 (oral, rat) 53 g/kg; mildly toxic by ing.; TSCA listed

*Precaution:* Combustible

*Hazardous Decom. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 0; Flammability 1; Reactivity 0

*Uses:* Emulsifier, dispersant for food prods., oils, waxes, solvents; antifoaming agent; dry-cleaning soap base; plasticizer for PVC, PS, cellulose; stabilizer/thickener/opacifier for skin creams/lotions, shampoos; emulsifier, stabilizer, solubilizer, carrier in pharmaceuticals; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; in food-contact textiles

*Use Level:* 0.1-1.0%

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2800, GRAS; Japan approved; Europe listed

*Manuf./Distrib.:* ABITEC; Cognis/Chems. Group; Danisco Ingreds.; Degussa-Hüls AG; Goldschmidt; Heterene; Inolex; Lanaetex Prods.; Lonza; PPG Ind.; Protameen; Ruger; Stepan; Thornley; Uniqema N. Am.; Van Waters & Rogers; Velsicol

### Glycerol methacrylate

CAS 5919-74-4

*Synonyms:* Glycerol monomethacrylate

*Uses:* Acrylic resin for paint, adhesive, soft contact lens, medical applics.; photosensitive resin; modifier for fiber and paper

*Trade Names:* Blemmer GLM

**Glycerol monobutyl ricinoleate.** See Glycerol butyl ricinoleate

**Glycerol monocaprate.** See Glycerol caprate

**Glycerol monocaprylate.** See Glycerol caprylate

**Glycerol 1-mono-12-hydroxy-cis-9-octadecenoate.** See Glycerol ricinoleate

**Glycerol monohydroxy stearate.** See Glycerol hydroxystearate

**Glycerol mono-12-hydroxystearate.** See Glycerol hydroxystearate

**Glycerol monolaurate.** See Glycerol laurate

**Glycerol monomyristate.** See Glycerol myristate

**Glycerol monooleate.** See Glycerol oleate

**Glycerol monoricinoleate.** See Glycerol ricinoleate

**Glycerol 1-monoricinoleate.** See Glycerol ricinoleate

**Glycerol monorosinate.** See Glycerol rosin

**Glycerol monostearate.** See Glycerol stearate

**Glycerol monostearate SE.** See Glycerol stearate SE

**Glycerol monotristearate.** See Tristearin

### Glycerol myristate

CAS 589-68-4; 27214-38-6; EINECS/ELINCS 248-329-0

*Synonyms:* Glycerol monomyristate; Monomyristin; Tetradecanoic acid, monoester with 1,2,3-propanetriol

*Definition:* Monoester of glycerin and myristic acid

*Empirical:*  $C_{17}H_{34}O_4$

*Formula:*  $CH_3(CH_2)_{12}COOCH_2COHHCH_2OH$

*Properties:* Nonionic

*Toxicology:* TSCA listed

*Uses:* Component in w/o and o/w creams; lubricant, antistat, antifogging agent in plastics; coemulsifier, solubilizer, carrier for lipophilic drugs; in food-pkg. adhesives; defoamer in food-contact paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2800

### Glycerol oleate

CAS 111-03-5; 25496-72-4 (generic); 37220-82-9; 68424-61-3 (generic); EINECS/ELINCS 203-827-7; 247-038-6; 253-407-2; FEMA 2526

*Synonyms:* Glycerin monooleate; Glycerol monooleate; Glycerol monooleate; Glycerol oleate; Glycerol monooleate; Monoglycerol oleate; Monoolein; Monooleoylglycerol; 9-Octadecenoic acid, monoester with 1,2,3-propanetriol; Oleic acid glycerol monoester; Oleic acid monoglyceride; Oleoylglycerol; Oleyl monoglyceride

*Definition:* Monoester of glycerin and oleic acid

*Empirical:*  $C_{21}H_{40}O_4$

*Formula:*  $CH_3(CH_2)CH=CH(CH_2)CHOHOOCCH_2CCH_2OH$

*Properties:* Yel. oil or soft solid; insol. in water; somewhat sol. in alcohol, most org. solvs.; m.w. 356.55; dens. 0.940-0.960; m.p. 149-19°C; HLB 3.4; acid no. 3 max.; iodine no. 65-80; sapon. no. 166-174; nonionic

*Toxicology:* Skin and eye irritant; TSCA listed

*Precaution:* Combustible

*Hazardous Decom. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 0; Flammability 1; Reactivity 0

*Uses:* Emulsifier (hydrocarbon oils, textile spin finishes); coemulsifier; wetting agent; antistat; emollient/thickener/opacifier (cosmetics); mold release agent/processing lubricant in plastics; internal antistat for PE, PP, PVC; antifog/cling agent/lubricant for PVC film; visc. stabilizer (paints); rust-preventive oils; softener in textile finishes; flavor adjuvant/solvent/vehicle/defoamer/dispersant/emulsifier/plasticizer for foods, food pkg.; pharmaceutical excipient; plasticizer in food-contact coatings; defoamer in food-contact paper/paperboard; in food-contact textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.210, 177.2800, 181.22, 181.27, 182.4505, 184.1323, GRAS; FEMA GRAS; FDA approved for orals

*Manuf./Distrib.:* A.P.; ABITEC; Am. Ingreds.; Cognis/Chems. Group; Croda Oleochems.; Danisco Ingreds.; Fallek; Ferro/Keil; Fluka; Inolex; Lambent Tech.; Lonza; Ruger; Seabrook Ind.; Sigma; Spectrum Quality Prods.; Stepan; Uniqema N. Am.; Uniqema/ICI Surf. Am.; Uniqema; Venus Ethoxyethers

*Trade Names:* Lumulse™ GMO

### Glycerol palmitate/stearate

*Synonyms:* Glycerol stearate palmitate

*Classification:* Triester

*Definition:* Monoester of glycerin and a blend of palmitic and stearic acids

*Empirical:*  $C_{63}H_{116}O_{12}$

*Properties:* Nonionic

*Uses:* Stabilizer, emulsifier, dispersant for cosmetics; food emulsifier; starch

complexer; lubricant and binder in pharmaceuticals; suspending agent; thickener; defoamer in food-contact paper/paperboard; in food-contact textiles

**Regulatory:** FDA 21CFR §176.210, 177.2800

### Glyceryl ricinoleate

CAS 141-08-2; EINECS/ELINCS 205-455-0

**Synonyms:** GMRO; Glycerol monoricinoleate; Glycerol 1-monoricinoleate; Glycerol ricinoleate; Glyceryl 1-mono-12-hydroxy-cis-9-octadecenoate; Glyceryl monoricinoleate; Glyceryl 1-monoricinoleate; 12-Hydroxy-9-octadecenoic acid 2,3-dihydroxypropyl ester; 12-Hydroxy-9-octadecenoic acid, monoester with 1,2,3-propanetriol; Monoricinolein;  $\alpha$ -Monoricinolein

**Classification:** Fatty acid ester

**Definition:** Monoester of glycerin and ricinoleic acid

**Empirical:**  $C_{21}H_{40}O_5$

**Formula:**  $C_3H_5(OOCC_{18}H_{32}OH)_3$

**Properties:** Lt. yel. oily liq.; sol. in ethanol, ether, acetone, benzene, cottonseed oil, ethyl acetate; sl. sol. in methanol; insol. in water, min. oil, aliphatic hydrocarbons; m.w. 372.55; dens. 1.028 (20 °C); m.p. < -5 °C; cloud pt. -10 °C; HLB 2.1; flash pt. (COC) 265 °C; ref. index 1.470; nonionic

**Toxicology:** LD50 (oral, mouse) > 25 ml/kg; low oral toxicity; ing. of lg. amts. may cause nausea, vomiting, cramps, diarrhea; unlikely to cause skin irritation; inh. may cause sl. nose/throat irritation; exposure to vapors unlikely to occur; TSCA listed

**Precaution:** Avoid generating mist; incompat. with acids and bases; decomp. (hydrolysis) can occur

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO, CO<sub>2</sub>

**Storage:** Store away from heat and ignition sources in suitable containers, protected from damage

**Uses:** Emulsifier; plasticizer for PVB, cellulotics; emulsifier, solubilizer for cosmetic, pharmaceutical, household prods., coatings, and printing inks; antifoaming agent; antifogging agent for food pkg.; solvent; leather processing; lubricant for plastics processing; freeze-thaw stabilizer (latex paint); food emulsifier, stabilizer, wetting agent; in food-pkg. adhesives; in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.210, 178.3130; FDA approved for orals, topicals

**Manuf./Distrib.:** AC Ind.; CasChem; Lambent Tech.; Lonza

### Glyceryl rosinat

CAS 8050-31-5; EINECS/ELINCS 232-482-5

**Synonyms:** Glyceryl monorosinate; Rosin, glyceryl ester

**Definition:** Monoester of glycerin and mixed long chain acids derived from rosin

**Properties:** Drop soften. pt. 88-96 °C

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Thermoplastic resin gum; clouding agent in beverages; in chewing gums; inks; tackifier, softener, plasticizer, modifier for adhesives, coatings; processing aid for rubber; in food-contact articles and coatings

**Regulatory:** FDA 21CFR §172.615, 172.735, limitation 100 ppm in finished beverage, 175.105, 175.300, 178.3120, 178.3800, 178.3870

**Trade Names:** Aquatac® 6085

### Glyceryl stearate

CAS 123-94-4 (pure grade); 11099-07-3 (crude grade); 31566-31-1 (generic); 85666-92-8 (generic); 85251-77-0; EINECS/ELINCS 204-664-4; 234-325-6; 250-705-4; 286-490-9; FEMA 2527

**Synonyms:** GMS; 2,3-Dihydroxypropyl octadecanoate; Glycerin monostearate; Glycerol monostearate; Glycerol stearate; Glyceryl monostearate; Monostearin; Octadecanoic acid, monoester with 1,2,3-propanetriol; 1,2,3-Propanetriol octadecanoate; Stearic acid, monoester with glycerol; Stearic monoglyceride

**Classification:** Aliphatic carboxylic acid ester

**Definition:** Monoester of glycerin and stearic acid

**Empirical:**  $C_{21}H_{42}O_4$

**Formula:**  $CH_3(CH_2)_{16}COOCH_2COHHCH_2OH$

**Properties:** Wh. to cream wax-like flakes, sl. fatty odor and taste; sol. in hot org. solvs.; insol. in water, ethanol, glycerin, propylene glycol; disp. in min. oil; m.w. 358.57; sp. gr. 0.97; m.p. 56-59 °C; b.p. 238-240 °C; HLB 3.8; acid no. 6 max.; iodine no. 3 max.; sapon. no. 162-175; hyd. no. 300-330; flash pt. (OC) 230 °C; pH 9.3 (3%); nonionic

**Toxicology:** ACGIH TLV/TWA 10 mg<sup>h</sup> (stearates); LD50 (IP, mouse) 200 mg/kg; poison by IP route; TSCA listed

**Precaution:** Combustible dust; incompat. with oxidizing materials (increased risk of fire and explosion)

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**HMIS:** Health 1; Flammability 0; Reactivity 0

**Storage:** Store in a cool, dry, well-ventilated area, out of direct sunlight, away from heat/ignition sources; light-sensitive

**Uses:** Emulsifier for cosmetics, toiletries, food, pharmaceuticals, oils, waxes, solvents; thickener, visc. builder for emulsions; plasticizer for cellulose nitrate; antistat, antifog, lubricant, processing aid for plastics; detackifier; stabilizer/thickener/opacifier (cosmetics); oil-well drilling mud lubricant; protective coating for hygroscopic powds.; softener (textile finishes); food additive (thickener, emulsifier, antisticking, antistalant, solvent); pharmaceutical excipient; surf. lubricant in food-contact coatings; defoamer in food-contact paper coatings, paper/paperboard

**Regulatory:** FDA 21CFR §139.110, 139.115, 139.117, 139.120, 139.121, 139.122, 139.125, 139.135, 139.138, 139.140, 139.150, 139.155, 139.160, 139.165, 139.180, 175.105, 175.210, 175.300, 176.200, 176.210, 177.2800, 184.1324, GRAS; FEMA GRAS; Europe listed; FDA approved for orals, ophthalmics, otics, rectals, topicals; USP/NF, BP, Ph. Eur. compliance

**Manuf./Distrib.:** A.P.; ABITEC; Allan; Am. Ingreds./Patco; Atul Org. Pvt. Ltd.; Cognis/Chems. Group; Croda Oleochems.; Danisco Ingreds.; Eastman; Falck; Goldschmidt; Hart Prods.; ISP Van Dyk; Inolex; Jarchem Ind.; Koster Keunen; Lambent Tech.; Lanaetex Prods.; Lipo; Lonza; Protameen; Rhodia HPCII; Ruger; Seabrook Ind.; Spectrum Quality Prods.; Stepan; Uniqema/ICI Surf. Am.; Venus Ethoxyethers

**Trade Names:** Aldo® MS LG FG; Kemester® 5500; Petrac® GMS

### Glyceryl stearate lactate

**Synonyms:** Glyceryl lactostearate

**Definition:** Lactic acid ester of glyceryl stearate

**Empirical:**  $C_{24}H_{46}O_6$

**Properties:** Nonionic

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Food emulsifier; starch gelling agent in industrial processes; (improves aeration and foam stabilization; emulsion stabilizer; in paper/paperboard in contact with aq./fatty foods

**Regulatory:** FDA 21CFR §176.170; USDA 9CFR §318.7, 381.147

### Glyceryl stearate palmitate. See Glyceryl palmitate/stearate

### Glyceryl stearate SE

CAS 31566-31-1 (generic); 11099-07-3; 85666-92-8 (generic); 977053-96-5; EINECS/ELINCS 234-325-6; 286-490-9

**Synonyms:** GMS-SE; Glyceryl monostearate SE

**Definition:** Self-emulsifying grade of glyceryl stearate contg. some sodium and/or potassium stearate

**Empirical:**  $C_{21}H_{42}O_4$

**Properties:** Wh. to cream flakes; sol. in oyley alcohol; partly sol. in water, veg. oil, ethanol, propylene glycol; m.w. 358.63; m.p. 57-59 °C; HLB 11.0; sapon. no. 150-160; anionic

**Toxicology:** LD50 (IP, mouse) 200 mg/kg; TSCA listed

**HMIS:** Health 1; Flammability 0; Reactivity 0

**Uses:** Aux. emulsifier for soap o/w emulsions; emulsifier for polymers; lubricant, antistat, antifog for plastics prod.; thickener, emulsifier, stabilizer, wetting agent, flavoring in foods; aux. emulsifier in pharmaceutical topicals

**Regulatory:** FDA approved for topicals

**Manuf./Distrib.:** Atul Org. Pvt. Ltd; Ruger

**Trade Names:** Kemester® 6000SE

### Glyceryl triacetate. See Triacetin

### Glyceryl tribenzoate

CAS 614-33-5; EINECS/ELINCS 210-379-6; FEMA 3398

**Synonyms:** GTB; 1,2,3-Propanetriol tribenzoate; Tribenzoin

**Definition:** Benzoic acid triester with glycerin

**Empirical:**  $C_{24}H_{20}O_6$

**Properties:** Colorless liq.; insol. in water; sol. in alcohol, ether; m.w. 404.44; dens. 1.032; m.p. < -75 °C; b.p. 305-309 °C

**Toxicology:** LD50 (oral, rat) 11,700 mg/kg; mildly toxic by ingestion; TSCA listed

## Glycerol trioleate

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Processing aid, modifier for thermoplastics, hot-melt adhesives, lacquers; plasticizer in vinyl and acrylic systems; in food-pkg. adhesives; flavoring agent in pharmaceuticals; plasticizer in polymeric coatings for paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §175.105, 176.180; FEMA GRAS

**Manuf./Distrib.:** Aldrich; Unitex; Velsicol

**Trade Names:** Uniplex 260

**Glycerol trioleate.** See Triolein

**Glycerol tristearate.** See Tristearin

## Glycidyl methacrylate

CAS 106-91-2; EINECS/ELINCS 203-441-9; UN No. 2810 (DOT)

**Synonyms:** GMA; 2,3-Epoxy-1-propanol, methacrylate; 2,3-Epoxypropyl methacrylate; Glycidyl  $\alpha$ -methyl acrylate; Methacrylic acid 2,3-epoxypropyl ester; 2-Methyl-2-propenoic acid, oxiranylmethyl ester

**Empirical:**  $C_7H_{10}O_3$

**Properties:** Colorless liq.; fruity odor; sol. in ethanol, acetone, diethyl ether, benzene; mod. sol. in water; m.w. 142.15; dens. 1.042; m.p. 79 C; b.p. 189 C; flash pt. 76 C; ref. index 1.450 (20 C)

**Toxicology:** LD50 (oral, rat) 597 mg/kg, (skin, rabbit) 469 mg/kg; mod. toxic by skin contact and IP route; poison by ingestion; skin and eye irritant; readily absorbed thru skin; possible sensitizer; cancer suspect agent; mutagen; target organ: nerves; TSCA listed

**Precaution:** Nonhazardous polymerization occurs when heated, on exposure to light, or in presence of peroxides or strong bases; usually contains an inhibitor

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>; heated to decomp., emits acrid smoke and fumes

**Uses:** Polyfunctional monomer; adhesion promoting/crosslinking comonomer for acrylic and vinyl resins; reactive diluent; modifier for paints, adhesives, and fibers; in hydrogels for contact lenses and membranes, molding and casting compds., impregnating paper, concrete, wood, coatings, printing inks, adhesives, sealants, elastomers, paints

**Manuf./Distrib.:** Aceto; Aldrich; Estron; Fluka; Monomer-Polymer & Dajac Labs; Polysciences; Richman; San Esters; Sartomer; Sigma; Spectrum Quality Prods.

**Trade Names:** SR 379

## Glycidyl methacrylate homopolymer

**Uses:** In paper/paperboard in contact with dry food

**Regulatory:** FDA 21CFR §176.180

## Glycidyl $\alpha$ -methyl acrylate. See Glycidyl methacrylate

**Glycine, N,N-bis(carboxymethyl)-.** See Nitrilotriacetic acid

**Glycine, N,N-bis(carboxymethyl)-, trisodium salt.** See Trisodium NTA

**Glycine, N,N'-1,2-ethanediyldis[N-(carboxymethyl)-, disodium salt dihydrate.** See Disodium EDTA

**Glycine soja.** See Soybean (Glycine soja) oil

**Glycine soja oil.** See Soybean (Glycine soja) oil

**Glycinol.** See Ethanolamine

**Glycogenase.** See Amylase

## Glycol

CAS 107-21-1; EINECS/ELINCS 203-473-3

**Synonyms:** EG; MEG; 1,2-Dihydroxyethane; 1,2-Ethandiol; Ethane-1,2-diol; Ethylene alcohol; Ethylene dihydrate; Ethylene glycol; Glycol alcohol; Monoethylene glycol

**Classification:** Aliphatic dihydric alcohol

**Empirical:**  $C_2H_6O_2$

**Formula:** HOCH<sub>2</sub>CH<sub>2</sub>OH

**Properties:** Colorless clear liq., sweet taste (poisonous); sol. in water, lower aliphatic alcohols, glycerol, glycol ethers, acetone, most org. solvs.; poor sol. in toluene, benzene, chloroform; m.w. 62.07; sp.gr. 1.1135 (20/4 C); visc. 17.3 cps; m.p. -13 C; b.p. 197.6 C; flash pt. (OC) 115 C; ref. index 1.43063

**Toxicology:** ACGIH TLV/CL 50 ppm (vapor); LD50 (oral, rat) 4700 mg/kg; toxic by inh.; mod. toxic by ing., subcut., IV, IM routes; human poison by ing.; vapor can cause nose/throat irritation and burning; irritating to eyes, skin, mucous membranes; may be absorbed thru skin; human systemic effects by ing./inh. (lacrimation, anesthesia, headache, cough, nausea, vomiting, pulmonary/kidney/liver changes); lethal dose for humans 100

ml; experimental teratogen; human mutagenic data; TSCA listed

**Precaution:** Combustible; incompat. with strong oxidizing agents, perchloric acid, strong bases, phosphorus (V) sulfide, strong acids, silvered copper wires carrying dc current; mod. explosion hazard; violent reactions possible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1; Flammability 1; Reactivity 0

**Storage:** Very hygroscopic; store in cool, dry, well-ventilated area

**Uses:** Antifreeze (cooling/heating systems); in hydraulic brake fluids; humectant (starch adhesives); solvent in paints, plastics, printing inks; softener for cellophane; stabilizer; in explosives; alkyd resins; elastomers; waxes; asphalt; PU chain extender; wood stains; raw material for prod. of syn. polyester fibers, latex paints, polyester/alkyd resins; plasticizer (regenerated cellulose film); heat transfer agent; low-pressure laminates; textile processing; foam stabilizer; pharmaceutical solvent; in food-pkg. adhesives; adjuvant in slimicides in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §175.105, 176.300; FDA approved for topicals; BP compliance

**Manuf./Distrib.:** AMRESKO; Aldrich; Arch Chems.; Ashland; BASF; Baychem; C.P. Hall; CasChem; Celanese; Chemcentral; Cognis/Chems. Group; Coyne; Degussa-Hüls AG; Dow; Eastman; Equistar; Fluka; Haltermann Prods. UK; Harcos; Houghton Chem.; Hukill; Huntsman; J.T. Baker; Lanaetex Prods.; Laporte Perf. Chems.; Mobil; Occidental; Oxiteno; Reliance Ind. Ltd; Rhodia; Robeco; Ruger; Sal Chem.; Shell; Sigma; Spectrum Quality Prods.; Sunnyside; Union Carbide; Uniqema/ICI Surf. Am.; Van Waters & Rogers

**Trade Names Containing:** Advantage® DF 110; Metasol® TK-100 Disp. W; Octowet 70D; Surfynol® 104E; Surfynol® 104H; Surfynol® TG

**Glycol alcohol.** See Glycol

## Glycol/butylene glycol montanate

CAS 73138-45-1

**Definition:** Mixt. of diesters of montan acid wax with ethylene glycol and butylene glycol

**Uses:** Lubricant for plastics compounding; release agent; antiblocking agent; wax for polishes, emulsions, citrus fruit coating

**Trade Names:** Hoechst Wax E; Hoechst Wax KSL

**Glycol butyl ether.** See Butoxyethanol

## Glycol dilaurate

CAS 624-04-4; EINECS/ELINCS 210-827-0

**Synonyms:** Ethylene glycol dilaurate; Lauric acid, 1,2-ethanediy ester; Dodecanoic acid 1,2-ethanediy ester

**Definition:** Diester of ethylene glycol and lauric acid

**Empirical:**  $C_{26}H_{50}O_4$

**Formula:**  $CH_3(CH_2)_{10}COOCH_2CH_2OCO(CH_2)_{10}CH_3$

**Properties:** Colorless amorphous mass; insol. in alcohol, ether; m.w. 426.66; m.p. 50-52 C; b.p. 188 C (20 mm); nonionic

**Uses:** Plasticizer in lacquers and varnishes; emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants; emollient in cosmetics/pharmaceuticals

## Glycol dilaurate SE

**Properties:** Anionic

**Uses:** Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants

## Glycol dioleate

CAS 928-24-5

**Synonyms:** Ethylene glycol dioleate; 9-Octadecenoic acid, 1,2-ethanediy ester

**Definition:** Diester of ethylene glycol and oleic acid

**Empirical:**  $C_{38}H_{70}O_4$

**Properties:** Sp.gr. 0.950; m.p. 0 C; flash pt. (COC) 296 C; ref. index 1.461; nonionic

**Uses:** Emulsifier, dispersant, spreading agent, oil-phase ingred. for cosmetics; plasticizer for PVC, some cellulosics; emulsifier, dispersant, antistat for textile, paper processing, polishes, latexes, lubricants

**Manuf./Distrib.:** A.P.

## Glycol dioleate SE

**Properties:** Anionic

Uses: Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants

**Glycol distearate**

CAS 627-83-8; 91031-31-1; EINECS/ELINCS 211-014-3

Synonyms: EGDS; Ethylene glycol distearate; Octadecanoic acid, 1,2-ethanediyl ester

Definition: Diester of ethylene glycol and stearic acid

Empirical:  $C_{38}H_{74}O_4$

Formula:  $CH_3(CH_2)_{16}COOCH_2CH_2OCO(CH_2)_{16}CH_3$

Properties: Wh. to yel. powd.; m.w. 595.00; dens. 0.97; m.p. 60 C; HLB 1.6; flash pt. (COC) 171 C; nonionic

Toxicology: TSCA listed

Uses: Pearlescent; opacifier; thickener; intermediate; lubricant; emulsifier; emollient; for emulsion shampoos and foam baths; plasticizer, lubricant, antistat for plastics and rubber; surfactant in paints; pharmaceutical surfactant; specialized solvent; defoamer in food-contact paper/paperboard

Regulatory: FDA 21CFR §73.1, 176.210

Manuf./Distrib.: A.P.; Ashland; Cedar Concepts; Inolex; Lonza; PPG Ind.; Rhodia HPCII; Ruger

Trade Names: Cithrol EGDS N/E; Lumulse™ EGDS; Mackester™ EGDS; Polypax EGDS

**Glycol distearate SE**

Properties: Anionic

Uses: Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants

**Glycol laurate**

CAS 4219-48-1; EINECS/ELINCS 253-458-0

Synonyms: Ethylene glycol monolaurate

Definition: Ester of ethylene glycol and lauric acid

Properties: Nonionic

Uses: Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants

**Glycol laurate SE**

EINECS/ELINCS 237-725-9

Synonyms: Dodecanoic acid, ester with 1,2-ethanediol

Properties: Anionic

Uses: Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants

**Glycol methacrylate.** See 2-Hydroxyethyl methacrylate

**Glycol monobutyl ether.** See Butoxyethanol

**Glycol monomethacrylate.** See 2-Hydroxyethyl methacrylate

**Glycol monooleate.** See Glycol oleate

**Glycol monopalmitate.** See Glycol palmitate

**Glycol monoricinoleate.** See Glycol ricinoleate

**Glycol monostearate.** See Glycol stearate

**Glycol oleate**

CAS 4500-01-0; EINECS/ELINCS 224-806-9

Synonyms: Ethylene glycol monooleate; Glycol monooleate; 2-Hydroxyethyl 9-octadecanoate

Definition: Ester of ethylene glycol and oleic acid

Empirical:  $C_{20}H_{38}O_3$

Formula:  $CH_3(CH_2)_7CH=CH(CH_2)_7COOCH_2CH_2OH$

Properties: Nonionic

Toxicology: TSCA listed

Uses: Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants; defoamer in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.210

Manuf./Distrib.: A.P.; AC Ind.

**Glycol oleate SE**

Properties: Anionic

Uses: Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants

**Glycol palmitate**

CAS 4219-49-2; EINECS/ELINCS 224-160-8

Synonyms: Ethylene glycol monopalmitate; Glycol monopalmitate; 2-Hydroxyethyl hexadecanoate

Definition: Ester of ethylene glycol and palmitic acid

Empirical:  $C_{18}H_{36}O_3$

Formula:  $CH_3(CH_2)_{14}COOCH_2CH_2OH$

Properties: M.w. 300.54; nonionic

Toxicology: LD50 (IP, mouse) 3 g/kg

Uses: Emulsifier; cosmetic thickener and gellant; defoamer in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.210

**Glycol ricinoleate**

CAS 106-17-2; EINECS/ELINCS 203-369-8

Synonyms: Ethylene glycol monoricinoleate; Glycol monoricinoleate; 2-Hydroxyethyl 12-hydroxy-9-octadecanoate

Definition: Ester of ethylene glycol and ricinoleic acid

Empirical:  $C_{20}H_{38}O_4$

Formula:  $C_{17}H_{32}(OH)COO(CH_2)_2OH$

Properties: Clear, moderately visc. pale-yel. liq., mild odor; misc. with most org. solvs.; insol. in water; dens. 0.965 (25/25 C); nonionic

Uses: Plasticizer, wetting agent, dispersant, emulsifier, antistat for textiles, paper processing, greases, polishes, latexes; urethane polymers; defoamer in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.210

**Glycol ricinoleate SE**

Properties: Anionic

Uses: Emulsifier, dispersant, antistat for textile, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants

**Glycols, polyethylene, dimethyl ether.** See PEG dimethyl ether

**Glycols, polyethylene, mono (nonylphenyl) ether.** See Nonoxynol

**Glycols, polyethylene, monostearate.** See PEG stearate

**Glycols, polyethylene, mono (p-(1,1,3,3-tetramethylbutyl) phenyl) ether.** See Octoxynol

**Glycol stearate**

CAS 111-60-4; 9004-99-3 (generic); 97281-23-7; EINECS/ELINCS 203-886-9; 306-522-8

Synonyms: EGMS; Ethylene glycol monostearate; Ethylene glycol stearate; Glycol monostearate; 2-Hydroxyethyl ester stearic acid; 2-Hydroxyethyl octadecanoate; PEG-1 stearate; POE (1) stearic acid; Stearic acid, monoester with ethylene glycol

Definition: Ester of ethylene glycol and stearic acid

Empirical:  $C_{20}H_{40}O_3$

Formula:  $CH_3(CH_2)_{16}COOCH_2CH_2OH$

Properties: Wh. to yel. waxy solid; sol. in alcohol, hot ether, acetone; insol. in water; m.w. 328.60; dens. 0.96 (25 C); m.p. 57-60 C; HLB 2.9; nonionic

Toxicology: LD50 (IP, mouse) 200 mg/kg; poison by IP route; primary skin irritant; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

HMS: Health 1; Flammability 0; Reactivity 0

Uses: Opacifier/pearlescent/emulsifier/visc. modifier for cosmetics; plasticizer for cellulose nitrate; lubricant for plasticized PVC; surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, water treatment; specialized solvent; pharmaceutical excipient; defoamer in food-contact paper/paperboard

Regulatory: FDA 21CFR §176.210; FDA approved for topicals

Manuf./Distrib.: A.P.; Alzo; Ashland; C.P. Hall; Costec; Fanning; Goldschmidt; ISP Van Dyk; Inolex; Lanaetex Prods.; Lipo; McIntyre; Norman; Fox; PPG Ind.; Phoenix; Protameen; R.I.T.A.; Rhodia HPCII; Ruger; Scher; Stepan; Thornley; Uniqema N. Am.

Trade Names: Cithrol EGMS N/E; Mackester™ EGMS; Polypax EGMS Trade Names Containing: Mackester™ IP; Mackester™ SP

**Glycol stearate SE**

CAS 86418-55-5

Synonyms: Ethylene glycol monostearate SE

Definition: Self-emulsifying grade of glycol stearate contg. some sodium and/or potassium stearate

Properties: Wh. to cream flakes; disp. in water, peanut oil, oleyl alcohol; insol. in min. oil, ethanol, glycerin, propylene glycol, IPM; m.p. 57-60 C;

sapon. no. 181-191; anionic  
*Uses:* Emulsifier for o/w creams and lotions; visc. builder, opacifier; base in topical pharmaceuticals  
*Trade Names:* Cithrol EGMS S/E

**Glyco stearin.** See PEG-2 stearate

#### Glyoxal

CAS 107-22-2; EINECS/ELINCS 203-474-9  
*Synonyms:* Biformyl; Ethanediol; 1,2-Ethanediol; Oxalaldehyde  
*Classification:* Aliphatic dialdehyde  
*Empirical:* C<sub>2</sub>H<sub>2</sub>O<sub>2</sub>  
*Formula:* O=HCCH=O  
*Properties:* Yel. crystals or lt. yel. liq., mild odor; sol. in anhyd. solvs.; m.w. 58.04; dens. 1.14 (20/20 C); m.p. 15 C; b.p. 51 C; ref. index 1.3826 (20 C)  
*Toxicology:* LD50 (oral, rat) 7070 mg/kg, (skin, rabbit) 10 g/kg; low toxicity by ing., skin contact; skin irritant; TSCA listed  
*Precaution:* Powerful reducing agent; mixts. with air may explode; violent polymerization in contact with water; violent reactions with chlorosulfonic acid, ethylene imine, NaOH, etc.; can explode during mfg.  
*Hazardous Decom. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes  
*Storage:* May spontaneously polymerize and ignite during storage  
*Uses:* Insolubilizing agent; embalming fluids; reducing agent (textiles); organic synthesis; glues; biocides; leather tanning; wet resist. additive in paper coatings; in food-pkg. adhesives; crosslinking agent for vinyl acetate/acrylic resins; disinfectant; gelatin hardener; textile finishing agent (permanent-press fabrics); insolubilizer in starch- and protein-based food-contact coatings; curing system additive for bisphenol A-epichlorohydrin epoxies for food contact  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.2280  
*Manuf./Distrib.:* AMRESCO; Aldrich; BFGoodrich/Textile; Chisso Am.; Clariant; Fluka; Sigma; Whyte Chems. Ltd  
*Trade Names:* Protectol® GL 40

#### Glyoxal/urea/formaldehyde condensate

CAS 27013-01-0  
*Uses:* Starch insolubilizer in coatings for paper/paperboard in contact with dry food  
*Regulatory:* FDA 21CFR §176.180

#### Glyoxal/urea polymer

CAS 53037-34-6  
*Uses:* Starch insolubilizer for paper/paperboard in contact with dry food  
*Regulatory:* FDA 21CFR §176.180

**GMA.** See Glycidyl methacrylate; 2-Hydroxyethyl methacrylate

**GMRO.** See Glycerol ricinoleate

**GMS.** See Glycerol stearate

**GMS-SE.** See Glycerol stearate SE

**Golden yellow.** See Vat yellow 4

**Gomenoleo oil.** See Olive (*Olea europaea*) oil

**Gossypimine.** See Basic red 2

**Gossypium.** See Cottonseed (Gossypium) oil

**Grain alcohol.** See Alcohol

**Graphite.** See Carbon, activated

**Green chrome oxide.** See Chromium oxide (ic)

**Green chromic oxide.** See Chromium oxide (ic)

**Green cinnabar.** See Chromium oxide (ic)

**Green rouge.** See Chromium oxide (ic)

**Griffith's zinc white.** See Lithopone

**Groundnut oil.** See Peanut (*Arachis hypogaea*) oil

**GTB.** See Glycerol tribenzoate

**p-Guaiacol.** See Hydroquinone monomethyl ether

**Guanidine, dodecyl-, monohydrochloride.** See Dodecylguanidine hydrochloride

**Guanidine hydrogen phosphate.** See Guanidine phosphate, dibasic

#### Guanidine phosphate, dibasic

CAS 5423-23-4; EINECS/ELINCS 226-552-4  
*Synonyms:* Diguandine phosphate; Diguandine hydrogen phosphate; Guanidine hydrogen phosphate  
*Empirical:* C<sub>2</sub>H<sub>13</sub>N<sub>3</sub>O<sub>4</sub>P

*Formula:* [NH<sub>2</sub>C(=NH)NH<sub>2</sub>]<sub>2</sub> · H<sub>3</sub>PO<sub>4</sub>

*Properties:* Colorless solid; sol. in water; m.w. 216.13; dens. 1.48 kg/l; m.p. 246 C

*Toxicology:* Harmful by ing., inh.; skin/eye irritant

*Uses:* Fire retardant for wood, paper, and textiles

*Manuf./Distrib.:* Aldrich; Fluka

#### Guanidine stearate

*Empirical:* C<sub>19</sub>H<sub>41</sub>N<sub>3</sub>O<sub>2</sub>

*Properties:* M.w. 343.56

*Uses:* Emulsifier and wetting agent for surface coatings, paper prod.

*Manuf./Distrib.:* SKW Chems.

#### Guanidine sulfamate

*Empirical:* CH<sub>8</sub>N<sub>4</sub>O<sub>3</sub>S

*Properties:* M.w. 156.16

*Uses:* Fire retardant for Japanese paper screens

*Manuf./Distrib.:* Austin; Chisso Am.; SKW Chems.

**Guar.** See Guar (*Cyanopsis tetragonoloba*) gum

**Guaran.** See Guar (*Cyanopsis tetragonoloba*) gum

#### Guar (*Cyanopsis tetragonoloba*) gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8; FEMA 2537

*Synonyms:* Cyamopsis gum; *Cyanopsis tetragonoloba*; *Cyanopsis tetragonoloba* gum; Galactasol; Guar; Guaran; Guar flour; Gum cyanopsis; Gum guar; Jaguar gum

*Classification:* Nonaromatic alcohol

*Definition:* Natural material derived from the ground endosperms of *Cyamopsis tetragonoloba*; consists of high m.w. hydrocolloidal polysaccharide composed of galactomannan units

*Properties:* Ylsh.-wh. free-flowing powd.; aq. sol'ns. tasteless, odorless; sol. in hot or cold water; insol. in oil, greases, hydrocarbons, ketones, esters; m.w. ≈ 220,000

*Toxicology:* LD50 (oral, rat) 8100 mg/kg; mildly toxic by ing.; may cause contact dermatitis; tumorigen; mutagen; experimental reproductive effects; TSCA listed

*Hazardous Decom. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

HMS: Health 0; Flammability 1; Reactivity 0

*Uses:* Paper coating/sizing/dry str. additive; filter aid/flocculant in mining industry; coagulant in water treatment; viscosifier (oil-well fluids, slurry explosives); protective colloid/stabilizer/thickener/emulsifier for foods/pharmaceuticals/cosmetics; binder, emulsion stabilizer, film-former in cosmetics; dietary bulking agent; pharmaceutical tablet binder/disintegrant; as bulk laxative, appetite suppressant; pharmaceutical jelly formulations; treatment of peptic ulcers; 5-8 times the thickening power of starch  
*Use Level:* Limitation 0.35% (baked goods), 1.2% (cereal), 0.8% (cheese), 1% (dairy prods.), 2% (fats, oils), 1.2% (gravies), 1% (jams), 0.6% (milk prods.), 2% (processed vegetables), 0.8% (soups), 1% (sweet sauces), 0.5% (other foods)

*Regulatory:* FDA 21CFR §133.124, 133.133, 133.134, 133.162, 133.178, 133.179, 150.141, 150.161, 184.1339, GRAS; FEMA GRAS; FDA approved for buccals, orals; USP/NF compliance; Japan approved; Europe listed; UK approved; ADI not specified (WHO)

*Manuf./Distrib.:* AEP Colloids; Aldrich; Alfa Chem; Ashland; CarboMer; Charkit; Chart; Colloides Naturels; Fabricchem; Folexco; Frutarom Meer; Gumix Int'l.; Hercules/Aqualon; Hercules; Houghton Chem.; Int'l. Chem. Inc; Multi-Kem; Nat'l. Starch & Chem.; P.L. Thomas; Penta Mfg.; Rhodia HPCII; Ruger; Sarcom; Sigma; Spectrum Quality Prods.; Stan Chem Int'l. Ltd; TIC Gums; Tomen Am.; V.L. Clark

*Trade Names:* Jaguar® 2100®; Jaguar® CB-11; Jaguar® CB-123; Jaguar® CP-13; Liporol SP; Lycold® 260; Powdered Guar Gum Type A; Powdered Guar Gum Type AA; Powdered Guar Gum Type B; Powdered Guar Gum Type BB; Powdered Gum Guar NF Type 80 Mesh B/T; Powdered Gum Guar Type 140 Mesh B/T; Powdered Gum Guar Type ECM; Powdered Gum Guar Type M; Powdered Gum Guar Type MM FCC; Powdered Gum Guar Type MM (HV); Powdered Gum Guar Type MMM 1/2; Powdered Gum Guar Type MMW; TIC Pretested® Guar Gum TICOLV

**Guar flour.** See Guar (*Cyanopsis tetragonoloba*) gum

**Guar gum, carboxymethyl 2-hydroxypropyl ether, sodium salt.** See Carboxymethyl hydroxypropyl guar

**Guar gum, 2-hydroxypropyl ether.** See Hydroxypropyl guar

**Gulf red.** See Iron oxide red

**Gulitol.** See Sorbitol

**Gum carrageenan.** See Carrageenan (*Chondrus crispus*)

**Gum cyanopsis.** See Guar (*Cyanopsis tetragonoloba*) gum

**Gum Damar.** See Dammar

**Gum Dammar.** See Dammar

**Gum elemi.** See Elemi gum

#### Gum ghatti

CAS 9000-28-6; FEMA 2519

**Synonyms:** Ghatti gum; Indian gum

**Classification:** Water-soluble polysaccharide

**Definition:** Gummy exudate from wounds in the bark of *Anogeissus latifolia*

**Properties:** Colorless to pale yel. solid; almost odorless and tasteless; partly sol. in water; can be solubilized by autoclaving; insol. in 90% alcohol

**Toxicology:** LD50 (oral, rat) 17 g/kg; mildly toxic by ing.; can cause allergy

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Thickener, stabilizer in soft drinks, cake mixes, glazes, confectionery; protective colloid; emulsifier for waxes, fats, and oils; stabilizer, emulsifier, binder for beverages, pharmaceuticals, coating and barrier applics.; substitute for acacia

**Use Level:** Limitation 0.2% (nonalcoholic beverages), 0.1% (other food)

**Regulatory:** FDA 21CFR §184.1333, GRAS; FEMA GRAS; Japan approved

**Manuf./Distrib.:** AEP Colloids; Houghton Chem.; P.L. Thomas; Sarcom; Sigma; V.L. Clark

**Trade Names:** Granular Gum Ghatti #1; Powdered Gum Ghatti #1; Powdered Gum Ghatti #2; Staform P

**Gum guar.** See Guar (*Cyanopsis tetragonoloba*) gum

**Gum karaya.** See Karaya (*Sterculia urens*) gum

**Gum lac.** See Shellac

**Gum rosin.** See Rosin

**Gum sandarac.** See Sandarac (*Callitris quadrivalvis*) gum

**Gum, Shorea Robusta.** See Dammar

**Gum sterculia.** See Karaya (*Sterculia urens*) gum

**Gum turpentine.** See Turpentine

**Guncotton.** See Nitrocellulose

**Gypsum.** See Calcium sulfate; Calcium sulfate dihydrate

**Gypsum hemihydrate.** See Calcium sulfate hemihydrate

**Gypsum stone.** See Calcium sulfate dihydrate

**HA.** See Hydroquinone monomethyl ether

**Halane.** See 1,3-Dichloro-5,5-dimethyl hydantoin

**Halite.** See Sodium chloride

**Halowax.** See Tetrachloronaphthalene

**Hard paraffin.** See Paraffin

**HBD.** See Tributyltin oxide

**HCB.** See Hexachlorobenzene

**HCFC-141b.** See Dichlorofluoroethane

**HCl.** See Hydrochloric acid

**HDDA.** See 1,6-Hexanediol diacrylate

**HDODA.** See 1,6-Hexanediol diacrylate

**HDPE.** See Polyethylene, high-density

**HDSA.** See Hexadecenyl succinic anhydride

**n-HDSA.** See Hexadecenyl succinic anhydride

**HEA.** See 2-Hydroxyethyl acrylate

**Heavy mineral oil.** See Mineral oil

**Heavy naphtha.** See Naphtha

**Heavy spar.** See Barium sulfate

**HEC.** See Hydroxyethylcellulose

**HE cellulose.** See Hydroxyethylcellulose

**HEDP.** See Etidronic acid

**HEDPA.** See Etidronic acid

**HEDTAN<sub>3</sub>.** See Trisodium HEDTA

**HEDTA, trisodium salt.** See Trisodium HEDTA

**HEEDTAN<sub>3</sub>.** See Trisodium HEDTA

**HEEDTA, trisodium salt.** See Trisodium HEDTA

**Helanthrene yellow.** See Vat yellow 4

**Helianthus annuus.** See Sunflower (*Helianthus annuus*) seed oil

**Helianthus annuus oil.** See Sunflower (*Helianthus annuus*) seed oil

**HEMA.** See 2-Hydroxyethyl methacrylate

**1-Heptadecanecarboxylic acid.** See Stearic acid

**Heptadecanoic acid, 16-methyl-** See Isostearic acid

**2-(8-Heptadecenyl)-4,5-dihydro-1H-imidazole-1-ethanol.** See Oleyl hydroxyethyl imidazoline

**2-(8-Heptadecenyl)-2-imidazoline-1-ethanol.** See Oleyl hydroxyethyl imidazoline

#### 2-Heptadecenyl-4-methyl-4-hydroxymethyl-2-oxazoline

**Uses:** Defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.210

**2-Heptadecyl-4,5-dihydro-1H-imidazole.** See Stearyl hydroxyethyl imidazoline

**2-Heptadecyl-1-hydroxyethylimidazoline.** See Stearyl hydroxyethyl imidazoline

**2-Heptadecyl-2-imidazoline-1-ethanol.** See Stearyl hydroxyethyl imidazoline

#### Heptane

CAS 142-82-5; 64742-89-8; EINECS/ELINCS 205-563-8; UN No. 1206 (DOT)

**Synonyms:** Alkane C<sub>7</sub>; Dipropyl methane; n-Heptane; Heptyl hydride

**Classification:** Sat. aliphatic hydrocarbon

**Empirical:** C<sub>7</sub>H<sub>16</sub>

**Formula:** CH<sub>2</sub>(CH<sub>2</sub>)<sub>5</sub>CH<sub>3</sub>

**Properties:** Volatile colorless liq.; gasoline-like odor; sol. in alcohol, ether, chloroform; misc. with oxygenated, chlorinated, and hydrocarbon solvs.; insol. in water; m.w. 100.21; dens. 0.68368 (20 C); m.p. -91 C; b.p. 98.428 C; flash pt. (CC) -3.89 C; ref. index 1.38764 (20 C)
