# Preface

Paper and pulp processing and additive chemicals represent a \$10 billion a year global industry. These chemicals are an integral part of the total papermaking process from pulp slurry, through sheet formation, to effluent disposal. Environmental concerns, increased use of recycled waste paper as a replacement for virgin pulp, changes in bleaching and pulping processes, increased efficiency requirements for the papermaking process, limits on effluent discharge as well as international competitiveness have greatly impacted the paper and pulp chemical additive market.

The *Handbook of Paper and Pulp Chemicals* is designed to function as a selection tool for papermaking additives at all points of the process. It centralizes information on currently available chemicals from the major manufacturers of these products by profiling both trade name and generic chemicals, detailing their properties, uses, use levels, regulatory status, toxicology, sources for purchase, etc.

This Handbook includes information on process additives that improve the operation of the paper machine (retention and drainage aids, biocides, dispersants, and defoamers); functional additives that improve the properties of the paper product (fillers, sizing agents, colorants and dyes, optical brighteners, and wet-strength and dry-strength additives), and effluent mitigating chemicals (sludge conditioners and wastewater antifoamers/defoamers).

This reference is organized so that the reader can access the information on paper chemicals based on the trade name, chemical composition, function and application area, manufacturer, CAS number, and EINECS/ELINCS number. It is divided into four parts and includes four important Appendixes:

## Part I

**Trade Name Reference** provides an alphabetical listing of almost 6000 trade name chemicals and materials that are used as part of the papermaking process. Each entry includes the manufacturer's name; chemical/material description; its detailed functions and applications in all aspects of industry; physical properties, such as form, molecular weight, density, solubility, boiling point, cloud point, flash point, pH, freezing point, activity; toxicology, storage, precautions, etc.

## Part II

**Chemical Component Cross-Reference** covers more than 2000 chemicals and materials that are contained in the trade name products profiled in Part I or generic chemicals that are not linked to trade names but are used in papermaking. Each entry contains information including the following: CAS (Chemical Abstract Service), EINECS/ELINCS (European Inventory of Existing Commercial Chemical Substances/Euro-

pean List of Notified Chemical Substances), and UN/DOT reference numbers, classification, definition, chemical synonyms, empirical and molecular formulas, properties, toxicology, precautions, storage, uses, use level, regulatory details, manufacturers and distributors. All chemical/material synonyms are cross-referenced back to the main entry. These entries are followed by a listing of the trade name products that are either equivalent to the monograph entry or contain it as one or more of its ingredients.

## Part III

**Functional/Application Index** is a powerful tool for locating the trade names and chemicals based on their function and/or industrial application area. By searching for key functional words such as dye, optical brightener, sizing agent, deposit control agent, water repellent, combined with a specific application area, such as coatings, furnishes, paper mill effluents, etc., the user is directed to the trade names and/or chemicals that have that specific functional/application attribute. The generic component names are distinguished from the trade names by italic type.

## Part IV

**Manufacturers Directory** contains detailed contact information for the more than 2400 worldwide manufacturers and their branches of trade name products and chemical components that are referenced in this handbook. Wherever possible, telephone, fax, toll-free numbers, e-mail and Internet addresses, and complete mailing addresses are included for each manufacturer.

## Appendixes

**CAS Number Index** contains CAS number entries followed by a listing of their trade name product and chemical equivalents in alphabetical order. The chemical name is in boldfaced type.

**EINECS/ELINCS Number Index** contains EINECS/ELINCS number entries followed by a listing of its trade name product and generic chemical equivalents in alphabetical order. The chemical name is in boldfaced type.

**FDA Regulatory Number Index** contains specific CFR section numbers followed by the list of trade names and chemicals/materials that have been approved as indirect food additives for paper and paper-board components.

**Glossary** contains definitions of terminology associated with paper and pulp additives and processing.

We are confident that those involved in any aspect of the paper and pulp industries will find this compendium an important addition to their refer-

---

ence library. We are also pleased to provide this reference as an electronic product.

This reference is the culmination of many years of research, investigation of product sources acquired through personal contacts and correspondences with major chemical manufacturers worldwide, as well as

toxicological databases, chemical reference books, trade magazines and journals. We would especially like to express our gratitude to Roberta Dakan for her contribution to standardizing the entry format and managing the trade name and chemical database that represents the basis of this and future chemical references. Her untiring efforts have been instrumental in the production of this source book.

M. & I. Ash

**NOTE:**

The information contained in this reference is accurate to the best of our knowledge; however, no liability will be assumed by the publisher or the authors for the correctness or comprehensiveness of such information. The determination of the suitability of these products for prospective use is the responsibility of the user. It is herewith recommended that those who plan to use any of the products referenced seek the manufacturers instructions for the handling of that chemical.

# A

## Abalyn® [Hercules/Resins]

*Chem. Descrip.:* Methylrosinate

CAS 68186-14-1; EINECS/ELINCS 269-035-9

*Uses:* Softener, tackifier for NR, SBR, reclaimed rubber, chlorinated rubber, IIR, EVA, CR, polyisobutylene, PS; improves processing and pigment disp.; tackifier for cements; surf.-wetting properties; used in lacquers, inks, paper coatings, varnishes, adhesives, sealing compds., plastics, rubber, wood preservatives, and perfumes

*Properties:* Amber visc. liq.; sol. in esters, ketones, alcohols, ethers, petrol. hydrocarbons, and veg. and min. oils; water-insol.; sp.gr. 1.03; dens. 1.03 kg/l; visc. (G-H) Z1; b.p. 352-356 C; acid no. 6; sapon. no. 160; ref. index 1.5300; flash pt. (COC) 180 C

## Abex® 12S [Rhodia HPCII]

*Chem. Descrip.:* Sodium alkyl ether sulfate

*Uses:* Emulsifier for vinyl acetate, acrylates, methacrylates, styrene, butadiene polymerization for paper coatings, textile coatings, paints, adhesives, industrial coatings

*Properties:* Liq.; 30% act.; anionic

## Abex® 18S [Rhodia HPCII]

*Chem. Descrip.:* Proprietary/sodium

*Uses:* Detergent, emulsifier for polymerization of vinyl acetate, acrylates, styrene, butadiene; mineral oil emulsifier; rewetting agent; surfactant for paper coatings, textile coatings, paints, adhesives, industrial coatings, floor polishes; in food pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods; low foaming

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Gardner 2 clear liq.; dens. 8.5 lb/gal; visc. 1000 cps; cloud pt. 10 C (lower), > 100 C (upper); pH 7.5-8.5 (10%); surf. tens. 48 dynes/cm (1%); Draves wetting 45-50 s (0.1%); 35% act.; anionic

## Abex® 22S [Rhodia HPCII]

*Chem. Descrip.:* Proprietary/sodium

*Uses:* Detergent, emulsifier for use in polymerization of vinyl acetate and acrylates; mineral oil emulsifier; rewetting agent; surfactant for paper coatings, textile coatings, paints, adhesives, industrial coatings, floor polish, pigment binders; in food pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods; low foaming

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Pale yel. liq.; dens. 8.7 lb/gal; visc. 1000 cps; cloud pt. 23 C (lower), > 100 C (upper); pH 8 (10%); surf. tens. 55 dynes/cm (@ CMC); 25% solids; anionic

## Abex® 23S [Rhodia HPCII]

*Chem. Descrip.:* Sodium laureth sulfate

CAS 9004-82-4; EINECS/ELINCS 221-416-0

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylates, methacrylates, styrene, butadiene for paper coatings, textile coatings, paints, adhesives, industrial coatings

*Properties:* Liq.; surf. tens. 40 dynes/cm (@ CMC); 60% conc.; anionic

## Abex® 26S [Rhodia HPCII]

*Chem. Descrip.:* Sodium alkylaryl ethoxy sulfate

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylates, methacrylates, styrene, butadiene for paper coatings, textile coatings, paints, adhesives, industrial coatings; food pkg. adhesives; component in paper/paperboard in contact with aq./fatty/dry foods

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; BGA XIV compliance

*Properties:* Pale yel. liq.; dens. 8.8 lb/gal; visc. 100 cps; cloud pt. 10 C (lower), > 100 C (upper); pH 8 (10%); surf. tens. 55 dynes/cm (@ CMC); 33% solids; anionic

## Abex® 33S [Rhodia HPCII]

*Chem. Descrip.:* Sodium alkylaryl ethoxy sulfate

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylates, methacrylates, styrene, butadiene for paper coatings, textile coatings, paints, adhesives, industrial coatings; base for scrub soaps, rug shampoos, general detergent applics.; lime soap dispersant

*Properties:* Gardner 5 clear liq.; sp.gr. 1.06; dens. 8.8 lb/gal; visc. 1500 cps max.; cloud pt. 20 C max.; pH 7.5-9.0 (10%); surf. tens. 37 dynes/cm (@ CMC); 26-28% act.; anionic

## Abex® 2005 [Rhodia HPCII]

*Chem. Descrip.:* Proprietary

*Uses:* Surfactant; emulsifier for latexes; steric and electrostatic stabilizer for emulsion polymerization; food pkg. adhesives; defoamer in food-contact paper coatings; APE-free; rec. for environmentally sensitive applics.

*Regulatory:* FDA 21CFR §175.105, 176.200; BGA XIV compliance

*Properties:* Liq.; surf. tens. 34.5 dynes/cm; 30% solids in water; anionic

## Abex® 2020 [Rhodia HPCII]

*Uses:* Emulsifier in vinyl acrylic, acrylic, and styrene acrylic latexes; food pkg. adhesives; in paper/paperboard in contact with dry food; low VOC; surfactant alternative for environmentally sensitive requirements

*Regulatory:* FDA 21CFR §175.105, 176.180; BGA XIV compliance

*Properties:* Liq.; surf. tens. 41.0 dynes/cm; 30% act.; anionic

*Environmental:* Biodeg.

## Abex® 2515 [Rhodia HPCII]

*Uses:* Emulsifier in vinyl acrylic, ethylene vinyl acetate, acrylic, and styrene acrylic copolymers; food pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods; low VOC; surfactant alternative for environmentally sensitive requirements

*Use Level:* 3-5% (sole emulsifier); 3% total emulsifier

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; BGA XIV compliance

*Properties:* Liq.; HLB 16.3; surf. tens. 38.0 dynes/cm; 50% act.; nonionic

*Environmental:* Biodeg.

## Abex® 2525 [Rhodia HPCII]

*Uses:* Emulsifier in vinyl acrylic, ethylene vinyl acetate, acrylic, and styrene acrylic copolymers; food pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods; low VOC; surfactant alternative for environmentally sensitive requirements

*Use Level:* 3-5% (sole emulsifier); 3% total emulsifier

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; BGA XIV compliance

*Properties:* Liq.; HLB 17.4; surf. tens. 43.5 dynes/cm; 50% act.; nonionic

*Environmental:* Biodeg.

## Abex® 2535 [Rhodia HPCII]

*Uses:* Emulsifier in vinyl acrylic, ethylene vinyl acetate, acrylic, and styrene acrylic copolymers; food pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods; low VOC; surfactant alternative for environmentally sensitive requirements

*Use Level:* 3-5% (sole emulsifier); 3% total emulsifier

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; BGA XIV compliance

*Properties:* Liq.; HLB 18; surf. tens. 45.1 dynes/cm; 50% act.; nonionic

*Environmental:* Biodeg.

## Abex® 2545 [Rhodia HPCII]

*Uses:* Emulsifier in vinyl acrylic, ethylene vinyl acetate, acrylic, and styrene acrylic copolymers; food pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods; low VOC; surfactant alternative for environmentally sensitive requirements

*Use Level:* 3-5% (sole emulsifier); 3% total emulsifier

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; BGA XIV compliance

*Properties:* Liq.; HLB 18.3; surf. tens. 45.5 dynes/cm; 50% act.; nonionic

*Environmental:* Biodeg.

**Abex® 3594** [Rhodia HPCII]

*Chem. Descrip.:* Aq. surfactant blend

*Uses:* Surfactant, emulsifier for latex or paper coatings, carpet backings, textiles, pressure-sensitive adhesives, esp. S/B, styrene/acrylic, and acrylic emulsion polymer systems; low color, mech. stability, low coagulum in latex systems; water resist.

*Properties:* Gardner 10 max. clear liq.; water-sol.; dens. 1.06 g/ml; visc. 30-100 cps; f.p. -1 C; flash pt. > 100 C; pH 7.8-8.8 (10%); surf. tens. 32 dynes/cm (@ CMC); 397.5-39.5% NV solids; anionic

**Abex® AAE-301** [Rhodia HPCII]

*Chem. Descrip.:* Sodium octylphenol ethoxy sulfate

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylates, methacrylates, styrene, butadiene for paper coatings, textile coatings, paints, adhesives, industrial coatings

*Properties:* Liq.; 20% conc.; anionic

**Abex® EP-100** [Rhodia HPCII]

*Chem. Descrip.:* Ammonium nonoxynol-4 sulfate

CAS 9051-57-4

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylates, methacrylates, styrene, butadiene, latex for adhesives, paints, paper coatings, textile, and industrial and architectural coatings; surfactant for mild light-duty liqs.; no VOC or alcohol

*Properties:* Gardner 3 max. clear to sl. cloudy liq.; sol. in water; sp.gr. 1.04; f.p. -2 C; flash pt. > 100 C; pH 6.5-7.5; surf. tens. 33 dynes/cm (@ CMC); 26-28% act.; anionic

**Abex® EP-110** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Ammonium nonoxynol-9 sulfate

CAS 9051-57-4

*Uses:* Primary emulsifier and stabilizer for vinyl acetate, vinyl acetate/acrylic, all acrylic, styrene/acrylic, and S/B emulsion copolymers; wetting agent, dispersant for agric. formulations; surfactant for adhesives, paints, paper, textiles, and industrial coatings; food pkg. adhesives; component of paper/paperboard in contact with dry foods

*Regulatory:* FDA 21CFR §175.105, 176.180; EPA compliance; BGA XIV compliance

*Properties:* Pale yel. liq.; sp.gr. 1.04; visc. 91.0 cks; pour pt. 0 C; surf. tens. 38.3 dynes/cm (1%); 30% act.; anionic

**Abex® EP-120** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Ammonium nonoxynol-30 sulfate

CAS 9051-57-4

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylates, methacrylates, styrene, butadiene for paints, adhesives, paper, textile, and industrial coatings; stabilizer; wetting agent, dispersant for agric. formulations; food pkg. adhesives, paper; provides mech. and freeze/thaw stability

*Regulatory:* FDA 21CFR §175.105, 176.180; BGA XIV compliance

*Properties:* Pale yel. liq.; sp.gr. 1.06; visc. 111 cks; pour pt. 8 C; surf. tens. 40 dynes/cm (1%); 30% solids; anionic

**Abex® EP-277** [Rhodia HPCII]

*Chem. Descrip.:* Sodium octylphenol ethoxy sulfate

CAS 69011-84-3

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylates, methacrylates, styrene, butadiene for adhesives, paints, paper, textile, and industrial coatings

*Properties:* Liq.; 30% conc.; anionic

**Abex® JKB** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Proprietary ammonium surfactant

*Uses:* Emulsifier for high-acid polymerization systems, highly carboxylated acrylic monomers, latexes for thickening, alkali-sol. resins, metalized floor finishes, textile sizing agents and hand modifiers; food pkg. adhesives, paper

*Regulatory:* FDA 21CFR §175.105, 176.170; BGA XIV compliance

*Properties:* Clear liq.; pH 6.5; surf. tens. 40 dynes/cm (@ CMC); 30% solids; anionic

**Abex® VA 50** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Octoxynol-33, sodium laureth sulfate

*Uses:* Surfactant, emulsifier for high solids vinyl acetate emulsions; food pkg. adhesives; in paper/paperboard in contact with aq./fatty/dry foods

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Pale yel. liq.; visc. 400 cps; f.p. 3 ± 2 C; cloud pt. none; pH 8 (10%); surf. tens. 44 dynes/cm (@ CMC); 46% solids; anionic

*Storage:* Protect from settling or freezing

**Abitol®-E** [Hercules]

*Chem. Descrip.:* Hydroabietyl alcohol

CAS 1333-89-7; EINECS/ELINCS 247-574-0

*Uses:* Plasticizer, tackifier for nat. and syn. rubber, nitrocellulose, plastics, lacquers, inks, and pressure-sensitive, emulsion, solv., and hot-melt adhesives; fixative for essential oils and aromatics in perfumes; chem. intermediate in prod. of oil-modified and oil-free alkyd resins, lubricating oil additives, nonionic surfactants; food-contact adhesives, paper/paperboard, rubber articles; defoamer in mfg. of food-contact paper/paperboard; good tack and adhesion; high m.w.; compat. with resins, film-formers, and oils; resist. to oxidation; reactive hydroxyl group; low volatility

*Regulatory:* FDA 21CFR §175.105, 176.180, 176.210, 177.2600

*Properties:* Colorless, tacky resin; mild pleasant odor; sol. in common org. solvs. incl. alcohols, esters, ketones, chlorinated solvs., aliphatic, aromatic or terpene hydrocarbons; insol. in water; sp.gr. 1.008; visc. 6500 mPa·s (50 C); acid no. 0.1; sapon. no. 26; ref. index 1.5236 (20 C); 83% act.

*Storage:* Maintain strict inventory control

**Abluhide LB660** [Taiwan Surf.]

*Chem. Descrip.:* Aromatic compd.

*Uses:* Surfactant used for mold prevention at various stages of leather and paper industry

**Ablunol NP9** [Taiwan Surf.]

*Chem. Descrip.:* Nonoxynol-9

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier for textile scouring, warp sizing, carbonizing and bleaching, household/industrial cleaners, paper, and leather industries; wetting agent in metal processing

*Properties:* Liq.; water-sol.; sp.gr. 1.05; HLB 12.9; cloud pt. 50-56 C; 100% act.; nonionic

**Ablunol NP30** [Taiwan Surf.]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* Emulsifier for vinyl acetate and acrylate emulsion polymerizations, latex paints, floor finishes, paper coatings, textiles; stabilizer

*Properties:* Solid; sp.gr. 1.08 (50 C); HLB 17.1; cloud pt. 74 C (1% in 10% NaCl); 100% act.; nonionic

**Ablunol NP30 70%** [Taiwan Surf.]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* Emulsifier for vinyl acetate and acrylate emulsion polymerizations, latex paints, floor finishes, paper coatings, textiles; stabilizer

*Properties:* Liq.; HLB 17.1; cloud pt. 74 C (1% in 10% NaCl); 70% act.; nonionic

**Ablunol NP40** [Taiwan Surf.]

*Chem. Descrip.:* Nonoxynol-40

CAS 9016-45-9

*Uses:* Emulsifier for vinyl acetate and acrylate emulsion polymerizations, latex paints, floor finishes, paper coatings, textiles; stabilizer

*Properties:* Solid; sp.gr. 1.08 (50 C); HLB 17.8; cloud pt. 76 C (1% in 10% NaCl); 100% act.; nonionic

**Ablunol NP40 70%** [Taiwan Surf.]

*Chem. Descrip.:* Nonoxynol-40

CAS 9016-45-9

*Uses:* Emulsifier for vinyl acetate and acrylate emulsion polymerizations, latex paints, floor finishes, paper coatings, textiles; stabilizer

*Properties:* Liq.; HLB 17.8; cloud pt. 76 C (1% in 10% NaCl); 70% act.; nonionic

**Ablunol NP50** [Taiwan Surf.]

*Chem. Descrip.:* Nonoxynol-50

CAS 9016-45-9

*Uses:* Emulsifier for vinyl acetate and acrylate emulsion polymerizations, latex paints, floor finishes, paper coatings, textiles; stabilizer

*Properties:* Solid; sp.gr. 1.08 (60 C); HLB 18.2; cloud pt. 76 C (1% in 10% NaCl); 100% act.; nonionic

**Ablunol NP50 70%** [Taiwan Surf.]

*Chem. Descrip.:* Nonoxynol-50

CAS 9016-45-9

*Uses:* Emulsifier for vinyl acetate and acrylate emulsion polymerizations, latex paints, floor finishes, paper coatings, textiles; stabilizer

*Properties:* Liq.; HLB 18.2; cloud pt. 76 C (1% in 10% NaCl); 70% act.; nonionic

**Ablupol AF** [Taiwan Surf.]

*Chem. Descrip.:* Mixt.

*Uses:* Antifoamer for coating color formulation of paper

**Ablupol D1101** [Taiwan Surf.]

*Chem. Descrip.:* Synergistic blend of surfactants

*Uses:* Surfactant; deinking agent for waste paper reproduction (flotation method)

**Ablupol FD101** [Taiwan Surf.]

*Chem. Descrip.:* Synergistic blend of surfactants

*Uses:* Surfactant; felt detergent for paper machines

**Ablupol PD100** [Taiwan Surf.]

*Chem. Descrip.:* Cationic and nonionic surfactant

*Uses:* Surfactant, debonder, and softener for tissue paper

**Ablusol PD100** [Taiwan Surf.]

*Uses:* Surfactant; debonder and softener for tissue paper

*Properties:* Cationic/nonionic

**Ablusol SEP40** [Taiwan Surf.]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* Surfactant; dispersant for paper coating

*Properties:* Anionic

**Abscents® 1000** [UOP]

*Chem. Descrip.:* Organophilic molecular sieve (sodium aluminosilicate)

CAS 1318-02-1; EINECS/ELINCS 215-283-8

*Uses:* Odor adsorbent for odor control for feminine protection prods., baby diapers, body or foot powds., deodorants, nonwoven wipes, ostomy prods., adult incontinence prods.; removes ammonia or amine odors in presence of variety of other odor compds.

*Regulatory:* FDA 21CFR §174.5 (d)(1); DOT nonregulated SARA; §313 nonreportable

*Properties:* Wh. dry powd.; odorless; 3.5-5.5  $\mu$  avg. particle size; insol. in water or org. solvs.; bulk dens. 25 lb/ft<sup>3</sup> (poured); surf. area > 500 m<sup>2</sup>/g; pH 4-5 (10%)

*Toxicology:* TSCA listed

*Environmental:* Nonbiodeg.

HMS: Health 0; Flammability 0; Reactivity 0

*Storage:* Store tightly closed

**Abscents® 2000** [UOP]

*Chem. Descrip.:* Organophilic molecular sieve (sodium aluminosilicate)

CAS 1318-02-1; EINECS/ELINCS 215-283-8

*Uses:* Hypo-allergenic deodorizing powd. for odor control in unscented personal care prods. (feminine protection, diapers, body/foot powds., deodorants, nonwoven wipes, ostomy prods.); attracts odors and traps them tightly within its porous structure

*Regulatory:* FDA 21CFR §174.5 (d)(1); DOT nonregulated; SARA §313 nonreportable

*Properties:* Wh. dry powd.; odorless; sl. sol. in water; sp.gr. 2.0; pH 4-10 (aq. slurry)

*Toxicology:* TSCA listed

*Environmental:* Nonbiodeg.

HMS: Health 0; Flammability 0; Reactivity 0

*Storage:* Store tightly closed

**Abscents® 3000** [UOP]

*Chem. Descrip.:* Organophilic molecular sieve (sodium aluminosilicate)

CAS 1318-02-1; EINECS/ELINCS 215-283-8

*Uses:* Polymer additive for adsorbing low m.w. organics such as aliphatics, alcohols, aldehydes, ketones, chlorinated hydrocarbons, org. acids, and aromatics for use in adhesives, coatings, and polymers; component of food pkg. materials; food-grade; rec. for use with reactive compds. like aldehydes and ketones

*Regulatory:* FDA GRAS; DOT nonregulated; SARA §313 nonreportable

*Properties:* Wh. dry powd.; odorless; 3  $\mu$  avg. particle size; insol. in water or org. solvs.; surf. area > 400 m<sup>2</sup>/g; pH 9-10 (10%)

*Toxicology:* TSCA listed

*Environmental:* Nonbiodeg.

HMS: Health 0; Flammability 0; Reactivity 0

*Storage:* Store tightly closed

**A-C® 6** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for use in adhesives, ink, floor finishes, paper coatings, personal care, plastics, rubber, textiles, wax blends, solv.-based polishes, inks, paints, and lacquers; defoamer in food-contact coatings, paper; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Wh. waxy prills, powd., char. waxy odor; negligible sol. in water; dens. 0.92 g/cc; visc. 375 cps (140 C); drop pt. 106 C; acid no. nil; flash pt. (COC) 307 C; hardness 4.0 dmm

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; mild skin irritant; dust may cause mech. eye and respiratory tract irritation; OSHA TWA 5 mg/m<sup>3</sup> (respirable dust), 15 mg/m<sup>3</sup> (total dust) recommended

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Oxides of carbon, various oxidized and nonoxidized hydrocarbons

**A-C® 6A** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for use in adhesives, inks, floor finishes, paper coatings, personal care, plastics, rubber, textiles, and wax blends; matting, anticaking flow additive providing surf. props. for powd. coatings; defoamer; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Wh. waxy prills, powd., char. waxy odor; negligible sol. in water; dens. 0.92 g/cc; visc. 375 cps (140 C); drop pt. 106 C; acid no. nil; flash pt. > 231 C; hardness 4.0 dmm

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; mild skin irritant; dust may cause mech. eye and respiratory tract irritation; OSHA TWA 5 mg/m<sup>3</sup> (respirable dust), 15 mg/m<sup>3</sup> (total dust) recommended

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Oxides of carbon, various oxidized and nonoxidized hydrocarbons

**A-C® 7** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Processing lubricant; melt index modifier; pigment dispersant; mold release aid; external lubricant for PVC, color concs., polyolefin flow modifiers; thickener for cosmetic and pharmaceutical gels; solv.-based polishes, inks, paints, and lacquers; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Prills, powd.; sol. in hot min. oil and fatty esters; dens. 0.92 g/cc; visc. 450 cps (140 C); drop pt. 109 C; acid no. nil; flash pt. (COC) 304 C; hardness 2.5 dmm

**A-C® 7A** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Processing lubricant; melt index modifier; pigment dispersant; mold release aid; external lubricant for PVC, color concs., polyolefin flow modifiers; thickener for cosmetic and pharmaceutical gels; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Prills, powd.; sol. in hot min. oil and fatty esters; dens. 0.92 g/cc; visc. 450 cps (140 C); drop pt. 109 C; acid no. nil; hardness 2.5 dmm

**A-C® 8** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; processing lubricant; melt index modifier; pigment dispersant; mold release aid; emollient; heat stabilizer; external lubricant for PVC, color concs., polyolefin flow modifiers; in polishes, inks, paints, lacquers; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Prills, powd.; dens. 0.93 g/cc; visc. 400 cps (140 C); drop. pt. 116 C; acid no. nil; flash pt. (COC) 307 C; hardness 1.0 dmm

#### A-C® 8A [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Matting, anticaking flow additive which enhances powd. coating performance; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; processing lubricant; melt index modifier; pigment dispersant; mold release aid; external lubricant for PVC, color concs., polyolefin flow modifiers; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Powd., dens. 0.93 g/cc; visc. 450 cps (140 C); drop pt. 113 C (Mettler); acid no. nil; hardness 1.0 dmm

#### A-C® 9, 9A, 9F [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; processing lubricant; melt index modifier; pigment dispersant; mold release aid; external lubricant for PVC, color concs., polyolefin flow modifiers; additive in paints; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Prills, powd., fine powd.; avg. particle size 220 µ (9A), 110 µ (9F); dens. 0.94 g/cc; visc. 450 cps (140 C); drop. pt. 117 C; acid no. nil; flash pt. (COC) 318 C (A-C 9); hardness 0.5 dmm

#### A-C® 15 [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for use in inks, personal care prods., adhesives, coatings, plastics, paper, rubber, textiles; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Prills; dens. 0.93 g/cc; visc. 125 cps (140 C); drop pt. 109 C; acid no. nil; hardness 2.5 dmm

#### A-C® 16 [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; additive for plastics, rubber, adhesives, coatings, inks, paper, polishes, textiles; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Prills; dens. 0.91 g/cc; visc. 525 cps (140 C); drop. pt. 102 C; acid no. nil; hardness 5.5 dmm

#### A-C® 316 [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized HDPE homopolymer  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for ink, floor finishes, personal care, plastics, rubber, textiles, wax blends; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.260, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1620, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Gran., powd.; dens. 0.98 g/cc; visc. 8500 cps (150 C); drop pt. 140 C; acid no. 16; hardness < 0.5 dmm

#### A-C® 316A [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized HDPE homopolymer  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for ink, floor finishes, personal care, plastics, rubber, textiles, wax blends; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.260, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1620, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Gran., powd.; dens. 0.98 g/cc; visc. 8500 cps (150 C); drop pt. 140 C; acid no. 16; hardness < 0.5 dmm

#### A-C® 325 [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized HDPE  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for polishes, finishes, emulsions, adhesives, coatings, inks, plastics, rubber, textiles; food pkg. adhesives, paper/paperboard, textiles; defoamer in food-contact coatings/paper; heel-mark resistance and compatibility

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Gran.; sp.gr. 0.99; visc. 4400 cps (150 C); drop pt. 136 C; acid no. 25; hardness < 0.5 dmm

#### A-C® 330 [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized HDPE  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for polishes, finishes, emulsions, adhesives, coatings, plastics, rubber, textiles; food pkg. adhesives, paper/paperboard, textiles; defoamer in food-contact coatings/paper; heel-mark resistance and compatibility

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Gran.; sp.gr. 0.99; visc. 3600 cps (150 C); drop pt. 137 C; acid no. 30; hardness < 0.5 dmm

#### A-C® 392 [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized HDPE  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for polishes, finishes, emulsions, adhesives, coatings, plastics, rubber, textiles; food pkg. adhesives, paper/paperboard, textiles; defoamer in food-contact coatings/paper; heel-mark resistance and compatibility

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Gran.; sp.gr. 0.99; visc. 4500 cps (150 C); drop pt. 138 C; acid no. 30; flash pt. (COC) 293 C; hardness < 0.5 dmm

#### A-C® 395, 395A [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized HDPE homopolymer  
CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for use in inks, personal care prods., adhesives, coatings, plastics, rubber, textiles; food pkg. adhesives, paper/paperboard, textiles; defoamer in food-contact coatings/paper

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Gran.; dens. 1.00 g/cc; visc. 2500 cps (150 C); drop pt. 137 C; acid no. 41; hardness < 0.5 dmm

#### A-C® 400 [Honeywell Spec. Chems.]

*Chem. Descrip.:* Ethylene/VA copolymer  
CAS 24937-78-8

*Uses:* Additive wax for use in adhesives, inks, coatings, personal care, wax blends, plastics, rubber, textiles; gellant for oils in personal care prods.; film-

former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings/paper; increases permanency, moisture retention, water resist.

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

**Properties:** Prills, powd.; dens. 0.92 g/cc; visc. 575 cps (140 C); drop pt. 92 C; flash pt. (COC) 296 C; hardness 9.5 dmm; 13% VA

**A-C® 400A** [Honeywell Spec. Chems.]

**Chem. Descrip.:** Low m.w. EVA copolymer  
CAS 24937-78-8

**Uses:** Wax additive for use in adhesives, inks, personal care prods., wax blends; pigment dispersant; PS color concs.; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings/paper; increases permanency, moisture retention, water resist.

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

**Properties:** Prills, powd.; dens. 0.92 g/cc; visc. 575 cps (140 C); drop pt. 92 C; hardness 9.5 dmm; 13% VA

**A-C® 405(M)** [Honeywell Spec. Chems.]

**Chem. Descrip.:** EVA copolymer  
CAS 24937-78-8

**Uses:** Controlled rheology wax additive for adhesives, inks, coatings, personal care, wax blends, plastics, rubber, textiles; esp. suitable for applics. where it must be dispersed in org. solvs. (automotive topcoats, cosmetics, etc.); food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings/paper

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

**Properties:** Prills; dens. 0.92 g/cc; visc. 600 cps (140 C); drop pt. 101 C; cloud pt. 50-54.4 C (10% in xylene); hardness 5.0 dmm; 8% VA

**A-C® 405(S)** [Honeywell Spec. Chems.]

**Chem. Descrip.:** EVA copolymer  
CAS 24937-78-8

**Uses:** Controlled rheology wax additive for adhesives, inks, coatings, personal care, wax blends, plastics, rubber, textiles; esp. suitable for applics. where it must be dispersed in org. solvs. (automotive topcoats, cosmetics, etc.); food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings/paper; low disp. visc.; lower sol. than 405M or 405T

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

**Properties:** Prills; dens. 0.92 g/cc; visc. 600 cps (140 C); drop pt. 95 C; cloud pt. 45-49.9 C (10% in xylene); hardness 7.0 dmm; 11% VA

**A-C® 405(T)** [Honeywell Spec. Chems.]

**Chem. Descrip.:** EVA copolymer  
CAS 24937-78-8

**Uses:** Controlled rheology wax additive for adhesives, inks, coatings, personal care, wax blends, plastics, rubber, textiles; esp. suitable for applics. where it must be dispersed in org. solvs. (automotive topcoats, cosmetics, etc.); defoamer; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; increases permanency, moisture retention, water resist.; higher sol. than 405M, 405S

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

**Properties:** Prills; dens. 0.92 g/cc; visc. 600 cps (140 C); drop pt. 103 C; cloud pt. 54.5-59 C (10% in xylene); hardness 4.0 dmm; 6% VA

**A-C® 430** [Honeywell Spec. Chems.]

**Chem. Descrip.:** EVA copolymer  
CAS 24937-78-8

**Uses:** Wax additive for adhesives, coatings, personal care, wax blends, plastics, rubber, textiles; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer;

suspending agent for active ingreds. in cosmetics; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, lubricants; defoamer in food-contact coatings/paper; increases permanency, moisture retention, water resist.

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.2600, 178.3570, 178.3850, 179.45

**Properties:** Grease-like; dens. 0.93 g/cc; visc. 600 cps (140 C); drop pt. 80 C; flash pt. (COC) 274 C;

**A-C® 540** [Honeywell Spec. Chems.]

**Chem. Descrip.:** Ethylene-acrylic acid copolymer  
CAS 9010-77-9

**Uses:** Plastics lubricant and processing aid; pigment dispersant; internal lubricant for PVC, nylon 6, nylon color concs.; for adhesives, floor finishes, personal care, plastics, wax blends; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, lubricants, textiles; food-contact defoamer; increases permanency, moisture retention, water resist.

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1310, 177.2600, 177.2800, 178.3570, 178.3850

**Properties:** Prills; dens. 0.93 g/cc; visc. 575 cps (140 C); drop pt. 105 C; acid no. 40; flash pt. (COC) 296 C; hardness 2.0 dmm

**A-C® 540A** [Honeywell Spec. Chems.]

**Chem. Descrip.:** Ethylene-acrylic acid copolymer  
CAS 9010-77-9

**Uses:** Plastics lubricant and processing aid; pigment dispersant; internal lubricant for PVC, nylon 6, nylon color concs.; for adhesives, floor finishes, personal care, plastics, wax blends; modifier for carboxyl functional powd. coatings; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, lubricants, textiles; defoamer; increases permanency, moisture retention, water resist.

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1310, 177.2600, 177.2800, 178.3570, 178.3850

**Properties:** Powd.; dens. 0.93 g/cc; visc. 575 cps (140 C); drop pt. 105 C; acid no. 40; hardness 2.0 dmm

**A-C® 580** [Honeywell Spec. Chems.]

**Chem. Descrip.:** Ethylene/acrylic acid copolymer  
CAS 9010-77-9

**Uses:** Additive for recyclable hot-melt and aq. adhesives and coatings; plastics and rubber processing; modifier of carboxyl-functional powd. coatings; defoamer in food-contact coatings/paper; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, lubricants, textiles; alkali-dispersible; increases permanency, moisture retention, water resist.

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1310, 177.2600, 177.2800, 178.3570, 178.3850

**Properties:** Prills; dens. 0.94 g/cc; visc. 650 cps (140 C); drop pt. 102 C; acid no. 75; flash pt. (COC) 313 C; hardness 4.0 dmm

**A-C® 617** [Honeywell Spec. Chems.]

**Chem. Descrip.:** Polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

**Uses:** Additive wax for use in inks, plastics, rubber, and personal care prods.; thickener for cosmetic and pharmaceutical gels; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, lubricants; defoamer in food-contact coatings/paper; increases permanency, moisture retention, water resist.

**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 178.3570, 178.3850

**Properties:** Wh. waxy prills, powd., char. waxy odor; sol. in hot min. oil and fatty esters; negligible sol. in water; dens. 0.91 g/cc; visc. 200 cps (140 C); drop pt. 101 C; acid no. nil; flash pt. (COC) 317 C; hardness 7.0 dmm

**Toxicology:** LD50 (oral, rat) > 2000 mg/kg; mild skin irritant; dust may cause mech. eye and respiratory tract irritation; OSHA TWA 5 mg/m<sup>3</sup> (respirable dust), 15 mg/m<sup>3</sup> (total dust) recommended

**Precaution:** Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Oxides of carbon, various oxidized and nonoxidized hydrocarbons

**A-C® 617A** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for use in inks, plastics, rubber, and personal care prods.; nonirritating, mild abrasive for personal care prods.; thickener for cosmetic and pharmaceutical gels; film-former; oil or fragrance encapsulator; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, lubricants; defoamer in food-contact coatings/paper; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 178.3570, 178.3850

*Properties:* Wh. waxy prills, powd., char. waxy odor; sol. in hot min. oil and fatty esters; negligible sol. in water; dens. 0.91 g/cc; visc. 200 cps (140 C); drop pt. 101 C; acid no. nil; flash pt. (COC) 317 C; hardness 7.0 dmm

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; mild skin irritant; dust may cause mech. eye and respiratory tract irritation; OSHA TWA 5 mg/m<sup>3</sup> (respirable dust), 15 mg/m<sup>3</sup> (total dust) recommended

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Oxides of carbon, various oxidized and nonoxidized hydrocarbons

**A-C® 629** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized polyethylene homopolymer

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for adhesives, ink, floor finishes, paper coatings, trade sales and industrial coatings, personal care, plastics, textiles, wax blends; processing lubricant; mold release aid; PVC lubricant; film-former; oil or fragrance encapsulator; gellant for oils in personal care prods.; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings/paper; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.260, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1620, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Wh. waxy prills, powd., char. waxy odor; negligible sol. in water; dens. 0.93 g/cc; visc. 200 cps (140 C); drop pt. 101 C; acid no. 15; flash pt. (COC) 274 C; hardness 5.5 dmm

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg; nonirritating to skin and eyes; dust may cause mech. irritation; OSHA TWA 5 mg/m<sup>3</sup> (respirable dust), 15 mg/m<sup>3</sup> (total dust) recommended

*Precaution:* Avoid strong oxidizing agents and amines; very slippery on floors

*Hazardous Decomp. Prods.:* Oxides of carbon, various oxidized and nonoxidized hydrocarbons

*Storage:* Store away from heat sources

**A-C® 629A** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized polyethylene homopolymer

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for adhesives, ink, floor finishes, paper coatings, personal care, plastics, textiles, wax blends; processing lubricant; mold release aid; PVC lubricant; film-former; oil or fragrance encapsulator; gellant for oils in personal care prods.; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings/paper; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §172.260, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1620, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Prills, powd.; dens. 0.93 g/cc; visc. 200 cps (140 C); drop pt. 101 C; acid no. 15; hardness 5.5 dmm

**A-C® 655** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized polyethylene homopolymer

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for use in adhesives, inks, floor finishes, paper coatings, personal care, plastics, rubber, textiles, and wax blends; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings/paper

*Regulatory:* FDA 21CFR §172.260, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1620, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Prills; dens. 0.93 g/cc; visc. 210 cps (140 C); drop pt. 107 C; acid no. 16; flash pt. (COC) 274 C; hardness 2.5 dmm

**A-C® 656** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized polyethylene homopolymer

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive wax for use in adhesives, inks, floor finishes, paper coatings, personal care, plastics, and rubber; food pkg. adhesives, textiles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Prills; dens. 0.92 g/cc; visc. 185 cps (140 C); drop pt. 98 C; acid no. 15; flash pt. (COC) 260 C; hardness 9.0 dmm

**A-C® 680** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized polyethylene

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Wax for polishes, finishes, and emulsions; food pkg. adhesives, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings, paper/paperboard; slip resistance; emulsifiable

*Regulatory:* FDA 21CFR §172.260, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1620, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Prills; dens. 0.93 g/cc; visc. 250 cps (140 C); drop pt. 108 C; acid no. 16; flash pt. (COC) 277 C; hardness 1.5 dmm

**A-C® 712** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive for plastics, rubber, adhesives, coatings, inks, paper, polishes, textiles; food pkg. adhesives, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Diced form; sp.gr. 0.92; visc. 1600 cps (140 C); drop pt. 108 C; acid no. nil; flash pt. (COC) 296 C; hardness 3.5 dmm

**A-C® 715** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Gellant for plastics, rubber, adhesives, coatings, inks, paper, polishes, textiles; food pkg. adhesives, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Diced form; sp.gr. 0.92; visc. 4000 cps (140 C); drop pt. 109 C; acid no. nil; flash pt. (COC) 302 C; hardness 2.5 dmm

**A-C® 725** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive for plastics, rubber, adhesives, coatings, inks, paper, polishes, textiles; food pkg. adhesives, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Diced form; sp.gr. 0.92; visc. 1400 cps (140 C); drop pt. 108 C; acid no. nil; hardness 3.5 dmm

**A-C® 735** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive for plastics, rubber, adhesives, coatings, inks, paper, polishes, textiles; food pkg. adhesives, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Diced form; sp.gr. 0.92; visc. 6000 cps (140 C); drop pt. 110 C; acid no. nil; hardness 2.5 dmm

**A-C® 1702** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Polyethylene homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Gellant for oils, emollient, moisture retention aid, heat stabilizer in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; additive for plastics, rubber, adhesives, coatings, inks, paper,

polishes, textiles; processing aid; increases permanency  
*Properties:* Grease-like; negligible sol. in water; dens. 0.88 g/cc; visc. 40 cps (140 C); drop. pt. 92 C; acid no. nil; flash pt. (COC) 232 C; hardness 90.0 dmm (D1321)

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; mild skin irritant

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Oxides of carbon, various oxidized and nonoxidized hydrocarbons

**A-C® 5120** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Low m.w. ethylene-acrylic acid copolymer  
 CAS 9010-77-9

*Uses:* Additive for recyclable hot-melt and aq. adhesives and coatings; modifier of carboxyl-functional powd. coatings; plastics and rubber processing; defoamer in food-contact coatings, paper/paperboard; gellant for personal care and household prods. (cosmetics, protective moisturizers, medications, dental adhesives, deodorizers); food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1310, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Prills; alkali-dispersible; dens. 0.94 g/cc; visc. 650 cps (140 C); drop pt. 92 C; acid no. 120; flash pt. (COC) 307 C; hardness 11.5 dmm

**A-C® 5180** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Low m.w. ethylene-acrylic acid copolymer  
 CAS 9010-77-9

*Uses:* Additive for recyclable hot-melt and aq. adhesives and coatings; plastics and rubber processing; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1310, 177.2600, 177.2800, 178.3570, 178.3850

*Properties:* Grease-like; alkali-dispersible; dens. 0.96 g/cc; visc. 650 cps (140 C); drop pt. 76 C; acid no. 180; hardness 50 dmm

**A-C® 6702** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Oxidized polyethylene  
 CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Additive for plastics, rubber, adhesives, coatings, inks, paper, polishes, textiles; gellant for oils in personal care prods.; film-former; oil or fragrance encapsulator; nonirritating abrasive; emollient; heat stabilizer; food pkg. adhesives; increases permanency, moisture retention, water resist.

*Regulatory:* FDA 21CFR §175.105

*Properties:* Grease-like; dens. 0.85 g/cc; visc. 35 cps (140 C); drop pt. 85 C; acid no. 15; hardness 90.0 dmm (D1321)

**Acclaim® 2200** [Lyondell]

*Chem. Descrip.:* Polypropylene glycol  
 CAS 25322-69-4; EINECS/ELINCS 200-338-0

*Uses:* Polyol for use in coatings, adhesives, sealants, elastomers, epoxy flexibilizers, and defoamers; food pkg. adhesives, paper/paperboard; improves tens. str., elong. at break, tear str., resilience, dynamic props.; reduces compression set and hysteresis

*Regulatory:* FDA 21CFR §175.105, 176.180, 177.1680

*Properties:* Pt-Co 20 color (50 C); water wh. to sl. haze; m.w. 2000; sp.gr. 1.004 (20 C); dens. 8.38 lb/gal (20 C); visc. 475 mP·s (20 C); acid no. 0.025; hyd. no. 56; pour pt. -36 C; flash pt. (PMCC) 420 F; 0.03% water

**Acclaim® 3201** [Lyondell]

*Chem. Descrip.:* Polyoxyethylene-polyoxypropylene polymer  
 CAS 53637-25-5

*Uses:* Polyol for use in coatings, adhesives, sealants, elastomers, epoxy flexibilizers, and defoamers; food pkg. adhesives, paper/paperboard; improves tens. str., elong. at break, tear str., resilience, dynamic props.; reduces compression set and hysteresis

*Regulatory:* FDA 21CFR §175.105, 176.180, 177.1680

*Properties:* Pt-Co 20 color (50 C); water wh. to sl. haze; m.w. 3000; sp.gr. 1.014 (20 C); dens. 8.46 lb/gal (20 C); visc. 780 mP·s (20 C); acid no. 0.025; hyd. no. 37.4; pour pt. -36 C; flash pt. (PMCC) 420 F; 0.03% water

**Acclaim® 4200** [Lyondell]

*Chem. Descrip.:* Polypropylene glycol  
 CAS 25322-69-4; EINECS/ELINCS 200-338-0

*Uses:* Polyol for use in coatings, adhesives, sealants, elastomers, epoxy flexibilizers, and defoamers; food pkg. adhesives, paper/paperboard; improves tens. str., elong. at break, tear str., resilience, dynamic props.;

reduces compression set and hysteresis

*Regulatory:* FDA 21CFR §175.105, 176.180, 177.1680

*Properties:* Pt-Co 20 color (50 C); water wh. to sl. haze; m.w. 4000; sp.gr. 1.003 (20 C); dens. 8.37 lb/gal (20 C); visc. 1100 mP·s (20 C); acid no. 0.025; hyd. no. 28; pour pt. -33 C; flash pt. (PMCC) 415 F; 0.03% water

**Acclaim® 6300** [Lyondell]

*Chem. Descrip.:* Glycerol-propylene oxide polyether triol  
 CAS 25791-96-2

*Uses:* Polyol for use in coatings, adhesives, sealants, elastomers, epoxy flexibilizers, and defoamers; food pkg. adhesives, paper/paperboard; improves tens. str., elong. at break, tear str., resilience, dynamic props.; reduces compression set and hysteresis

*Regulatory:* FDA 21CFR §175.105, 176.180, 177.1680

*Properties:* Pt-Co 20 color (50 C); water wh. to sl. haze; m.w. 6000; sp.gr. 1.007 (20 C); dens. 8.40 lb/gal (20 C); visc. 1900 mP·s (20 C); acid no. 0.025; hyd. no. 28; pour pt. -30 C; flash pt. (PMCC) 425 F; 0.03% water

**Acclaim® 8200** [Lyondell]

*Chem. Descrip.:* Polypropylene glycol  
 CAS 25322-69-4; EINECS/ELINCS 200-338-0

*Uses:* Polyol for use in coatings, adhesives, sealants, elastomers, epoxy flexibilizers, and defoamers; food pkg. adhesives, paper/paperboard; improves tens. str., elong. at break, tear str., resilience, dynamic props.; reduces compression set and hysteresis

*Regulatory:* FDA 21CFR §175.105, 176.180, 177.1680

*Properties:* Pt-Co 20 color (50 C); water wh. to sl. haze; m.w. 8000; sp.gr. 1.003 (20 C); dens. 8.37 lb/gal (20 C); visc. 4300 mP·s (20 C); acid no. 0.025; hyd. no. 14; pour pt. -27 C; flash pt. (PMCC) 375 F; 0.03% water

**Accosize® 60R Cationic Starch** [Cytec Ind.]

*Chem. Descrip.:* Potato starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Sizing agent for papermaking; improved filler retention and sheet str. props.

*Regulatory:* DOT nonregulated

*Properties:* Wh. powd.; odorless; completely sol. in water; sp.gr. 0.1 g/cc; 17-21% volatile; cationic

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 2000 mg/kg; LC50 (inh., rat, 4 h) > 20 mg/l; may cause minimal eye and skin irritation on direct contact; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents; dust may be explosive if mixed with air in critical proportions in presence of ignition source

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, hydrogen chloride, NO<sub>x</sub>

NFPA: Health 0; Flammability 1; Reactivity 0

**Accosize® 100 Synthetic Size** [Cytec Ind.]

*Chem. Descrip.:* Hexadecenylsuccinic anhydride (55-65%), octadecenylsuccinic anhydride (35-45%), eicosenylsuccinic anhydride (0-10%), docosenylsuccinic anhydride (0-2%)

*Uses:* Sizing agent for fine paper and board

*Regulatory:* DOT nonregulated

*Properties:* Lt. orange-brn. clear liq.; sl. oily odor; insol. in water; sp.gr. 0.94; vapor pressure < 1 mm Hg (20 C); m.p. 4 C; b.p. 250 C; flash pt. (PMCC) 204 C; VOC 0.15 lb/gal

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 10,000 mg/kg; causes mod. skin irritation; may cause mild eye irritation, allergic skin reaction; inh. may cause irritation of respiratory tract and eyes; TSCA listed

*Environmental:* Readily biodeg.; LC50 (mysid shrimp, 96 h) 169 mg/l, (trout, 96 h) 510 mg/l; BOD (28 day) 2.4 mg O<sub>2</sub>/mg prod.

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, SO<sub>x</sub>

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* Store in cool, dry area below 29 C; keep container tightly closed when not in use; protect from water contact or high moisture conditions

**Accostrength® 1000 Dry Strength Resin** [Cytec Ind.]

*Chem. Descrip.:* Acrylamide/acrylic acid copolymer

*Uses:* Dry str. agent for papermaking; inc. sheet str. or maintains specs with weaker or recycled fibers

*Regulatory:* DOT nonregulated; no OSHA regulated components

*Properties:* Clear to pale yel. visc. liq.; odorless; completely sol. in water; sp.gr. 1.072 (23 C); pH 4.2-5.5; VOC 0.72 lb/gal; 79-82% volatiles

*Toxicology:* LD50 (oral, rat) > 16 ml/kg, (dermal, rabbit) > 8 ml/kg; may cause minimal eye and skin irritation; not expected to be harmful by ing.; TSCA listed

*Environmental:* BOD (5 day) 630 mg/l oxygen; COD 250,000 ppm

**Precaution:** Spills are very slippery; incompat. with strong oxidizing agents, caustics, alkanolamines, aldehydes, ammonia  
**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>, ammonia, NO<sub>x</sub>  
**NFPA:** Health 0; Flammability 1; Reactivity 0  
**Storage:** Avoid iron, copper, or aluminum containers/equip. for handling/storage

**Accurac® 105 Retention Aid** [Cytec Ind.]

**Chem. Descrip.:** Polyacrylamide w/o emulsion with petroleum distillate hydrotreated light (CAS 64742-47-8, ≈ 22%) and IPA (0-1%)  
**Uses:** Retention aid, production aid for papermaking; improves sheet qualities and runnability  
**Regulatory:** DOT nonregulated  
**Properties:** Wh. opaque visc. liq.; sl. hydrocarbon odor; sp.gr. ≈ 1.0; m.p. -18 C; flash pt. (CC) > 93 C; pH 4-6 (aq. dil.); ≈ 60% volatiles; cationic  
**Toxicology:** LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 2000 mg/kg; LC50 (inh., rat, 4 h) > 20 mg/l; causes mod. skin irritation; may cause mild eye irritation  
**Precaution:** Incompat. with strong oxidizing agents  
**Hazardous Decomp. Prods.:** Ammonia, CO, CO<sub>2</sub>, hydrogen chloride  
**NFPA:** Health 2; Flammability 1; Reactivity 0  
**Storage:** Avoid iron, copper, or aluminum containers/equip. in handling/storage

**Accurac® T-100 Retention/Drainage Aid** [Cytec Ind.]

**Chem. Descrip.:** Liq. polymer mixt. with petrol. distillate hydrotreated light (CAS 64742-47-8, 30-35%)  
**Uses:** Retention aid, drainage aid, production aid for papermaking; improves sheet qualities and runnability  
**Regulatory:** DOT nonregulated  
**Properties:** Clear to cloudy visc. liq.; hydrocarbon odor; sp.gr. ≈ 1.0; vapor pressure 45 mm Hg (40 C); m.p. -20 C; flash pt. (PMCC) > 100 C; pH 7-9 (emulsion); VOC 3.25 lb/gal; 45-75% volatiles  
**Toxicology:** LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 2000 mg/kg; LC50 (inh., rat, 4 h) > 20 mg/l; causes mod. skin irritation; may cause mild eye irritation; TSCA listed  
**Precaution:** Incompat. with strong oxidizing agents  
**Hazardous Decomp. Prods.:** CO<sub>2</sub>, CO, ammonia, NO<sub>x</sub>  
**NFPA:** Health 2; Flammability 1; Reactivity 0  
**Storage:** Avoid iron, copper, or aluminum containers/equip. for handling/storage

**Acematt™ TS100** [Degussa-Hüls]

**Chem. Descrip.:** Fumed silica  
 CAS 112945-52-5; EINECS/ELINCS 231-545-4  
**Uses:** Flattening agent for vinyl coatings, air-dried polyurethane or leather coating applics., lacquers for film and polyurethane textile coatings, paper coating applics., long-oil alkyd systems, water-based coatings; exc. in baked finishes and films which require high transparency  
**Properties:** Wh. powd., odorless; 4 μm avg. particle size of agglomerates; insol. in water; dens. 2.2 g/cc; tapped dens. 50 g/l; oil absorp. 360 g/100 g; m.p. 1700 C; ref. index 1.45; pH 7 (4% aq.); > 99.8% SiO<sub>2</sub>  
**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; nonirritating to skin and mucous membranes

**Acilan™ W Liq.** [Bayer/Industrial Chems.]

**Uses:** Colorant for paper

**Acintol® R Type S** [Arizona]

**Chem. Descrip.:** Tall oil rosin  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
**Uses:** Printing ink binder as resin or salt; paper sizing agent; emulsifier for SBR polymerization as soap; tackifier resin in adhesives; imidazoline modifier in corrosion inhibitors; elastomer modifier in emulsion polymerization; dust control additive; film former/plasticizer in lacquers and varnishes; tackifier and softener for IIR, SBR, CR, acetyl polypropylene; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, wood preservatives  
**Regulatory:** FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.210, 177.1200, 177.1210, 177.2600, 178.3120, 178.3800, 178.3850, 178.3870  
**Properties:** Gardner 7 color; sp.gr. 1.01; soften. pt. (R&B) 76 C; acid no. 175-178; flash pt. (OC) 226 C; anionic

**Acrawax® C** [Lonza]

**Chem. Descrip.:** N,N'-Ethylene bisstearamide  
 CAS 110-30-5; EINECS/ELINCS 203-755-6  
**Uses:** Internal and surf. lubricant in PVC, PP, PE, ABS, nylon, acetal,

thermoplastic polyester, PS, phenolic, PU; plasticizer, compatibilizer, slip/antiblock, flow improver, pigment dispersant in hot-melt adhesives and coatings; lubricant, processing aid, detackifier, mold release agent, antiblocking agent in SR; food-contact applics.; powd. and atomized grades as lubricant and binder for cold compaction of powd. metal parts; papermaking

**Regulatory:** FDA clearance for food-contact applics.

**Properties:** Avail. as beads, prills, powd., atomized or aq. disp. (33% solids); 10% max. on 10 mesh (beads); 2% max. on 40 mesh (prilled); 1% max. on 100 mesh (powd.); 0.1% max. on 325 mesh (atomized); insol. in water; sp.gr. 0.97; m.p. 140-145 C; acid no. 8 max.; flash pt. 285 C

**Acriflow 041-S** [Witton]

**Chem. Descrip.:** Sodium polyacrylate aq. sol'n.

CAS 9003-04-7

**Uses:** Dispersant and scale inhibitor in process industries, e.g. mining and min. handling (china clay, metal ores), inorg. pigment disp., papermaking, textile processing, sugar processing, paint mfg., boiler water treatment; treatment of swimming pool water, prod. of potable water from sea water; food-contact paper/paperboard  
**Regulatory:** FDA 21CFR §176.170, 176.180; BGA Ch. 36; UK Drinking Water Inspectorate approved

**Properties:** Aq. sol'n.; sp.gr. 1.1-1.3; visc. 150-350 cps; pH 7.0-8.5; 40-42% solids

**Toxicology:** Nonhazardous

**Acriflow 050-S** [Witton]

**Chem. Descrip.:** Polyacrylic acid aq. sol'n.

CAS 9003-01-4

**Uses:** Dispersant and scale inhibitor in process industries, e.g. mining and min. handling (china clay, metal ores), inorg. pigment disp., papermaking, textile processing, sugar processing, paint mfg., boiler water treatment; treatment of swimming pool water, prod. of potable water from sea water; food-contact paper/paperboard; may be neutralized with sodium, ammonium, or potassium alkalis for applic. in neutral pH range

**Regulatory:** FDA 21CFR §176.170, 176.180; BGA Ch. 36; UK Drinking Water Inspectorate approved

**Properties:** Clear pale yel. liq.; visc. 400-600 cps; pH 2.8-4.2; 50-52% solids

**Toxicology:** Nonhazardous

**Acriflow 141 S** [Witton]

**Chem. Descrip.:** Sodium polyacrylate

CAS 9003-04-7

**Uses:** Dispersant and scale inhibitor in process industries, e.g. mining and min. handling (china clay, metal ores), inorg. pigment disp., papermaking, textile processing, sugar processing, paint mfg., boiler water treatment; treatment of swimming pool water, prod. of potable water from sea water; food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.170, 176.180; BGA Ch. 36; UK Drinking Water Inspectorate approved

**Properties:** Aq. sol'n.; sp.gr. 1.1-1.3; visc. 350-700 cps; pH 7.5-9.0; 40-42% solids

**Toxicology:** Nonhazardous

**Acriflow 241-M** [Witton]

**Chem. Descrip.:** Sodium polyacrylate aq. sol'n.

CAS 9003-04-7

**Uses:** Dispersant and scale inhibitor in process industries, e.g. mining and min. handling (china clay, metal ores), inorg. pigment disp., papermaking, textile processing, sugar processing, paint mfg., boiler water treatment; treatment of swimming pool water, prod. of potable water from sea water; food-contact paper/paperboard

**Regulatory:** FDA 21CFR §176.170, 176.180; BGA Ch. 36; UK Drinking Water Inspectorate approved

**Properties:** Aq. sol'n.; sp.gr. 1.1-1.3; visc. 850-1300 cps; pH 7.5-9.0; 40-42% solids

**Toxicology:** Nonhazardous

**Acriflow 241-SA** [Witton]

**Chem. Descrip.:** Sodium polyacrylate aq. sol'n.

CAS 9003-04-7

**Uses:** Dispersant and scale inhibitor in process industries, e.g. mining and min. handling (china clay, metal ores), inorg. pigment disp., papermaking, textile processing, sugar processing, paint mfg., boiler water treatment; treatment of swimming pool water, prod. of potable water from sea water; food-contact paper/paperboard; rec. where ammonium ions are acceptable and sodium ions are not

- Regulatory:* FDA 21CFR §176.170, 176.180; BGA Ch. 36; UK Drinking Water Inspectorate approved  
*Properties:* Aq. sol'n.; sp.gr. 1.1-1.3; visc. 500-1000 cps; pH 6.5-8.0; 40-42% solids  
*Toxicology:* Nonhazardous
- Acritamer® 501E** [R.I.T.A.]  
*Chem. Descrip.:* Carbomer  
 CAS 9003-01-4  
*Uses:* Thickener, dispersant, suspending agent for emulsion stabilization of various cosmetics applics., industrial use (paper mfg. and treatment, fiber-glass prod., low visc. lubricants, nat. and syn. fiber processing), mod. ionic systems, textured paints  
*Properties:* Wh. powd.; sol. in water, alcohol; visc. 2500-6400 cps (0.2wt%); bulk dens. 0.2 g/ml  
*Toxicology:* Acute eye, oral, skin irritation  
*Storage:* Hygroscopic; ensure bags are sealed completely during storage; use as soon as possible after opening
- Acritamer® 504E** [R.I.T.A.]  
*Chem. Descrip.:* Carbomer  
 CAS 9003-01-4  
*Uses:* Thickener, dispersant, suspending agent for stabilization of water or solvent-based lubricants, emulsions, and graphite, polyethylene, fiber, and paper suspensions  
*Properties:* Wh. powd.; sol. in water, alcohol; visc. 2000-5450 cps (0.2wt%); bulk dens. 0.2 g/ml  
*Toxicology:* Acute eye, oral, skin irritation  
*Storage:* Hygroscopic; ensure bags are sealed completely during storage; use as soon as possible after opening
- Acronal®** [BASF AG]  
*Chem. Descrip.:* Acrylate homo- and copolymers  
 CAS 25133-97-5  
*Uses:* Binder for paper and board coating; binder and coating agent for prod. of materials based on leather fibers
- Acronal® NX 4786** [BASF]  
*Chem. Descrip.:* Butyl acrylate/styrene aq. copolymer dispersion  
*Uses:* Binder for label paper coatings and as clear coats on paper where abrasion resist. is required; exc. alkali, abrasion, and water resist.
- Acronal® S 504** [BASF]  
*Chem. Descrip.:* n-Butyl acrylate/acrylonitrile/styrene copolymer aq. disp.  
*Uses:* Binder for paper/paperboard coatings, incl. those used for food pkg.; contains no plasticizers or solvs.; exc. lightfastness; outstanding print mottle resist.; yields coatings with exc. print gloss and smoothness
- Acronal® S 728** [BASF]  
*Chem. Descrip.:* n-Butyl acrylate/styrene copolymer aq. disp.  
*Uses:* Binder for paper/paperboard coatings; provides paper coatings with exc. sheet and print gloss; exc. runnability; contains no plasticizers or solvs.
- Acrosol®** [BASF AG]  
*Chem. Descrip.:* Acrylic acid ester copolymers  
 CAS 25133-97-5  
*Uses:* Cobinder for paper coatings
- Acrosol™ B 37 D** [BASF]  
*Chem. Descrip.:* Acrylic acid/acrylic ester/acrylonitrile copolymer aq. disp.  
*Uses:* Binder for coating colors in papermaking; contains no plasticizers or solvs.  
*Properties:* Anionic
- Acrosol™ C 50 L** [BASF]  
*Chem. Descrip.:* Acrylic acid/acrylic ester/acrylonitrile copolymer  
*Uses:* Cobinder for coating paper on board; modifies visc., water retention, and rheology of coating colors; activates fluorescent brighteners in coatings; enhances runnability of metered size presses; contains no plasticizers or solvs.
- Acrosol™ PR 8720 X** [BASF]  
*Chem. Descrip.:* Acrylic ester/acrylonitrile copolymer aq. sol'n.  
*Uses:* Cobinder for coating of paperboard; improves gluability of coated paperboards by incorporating porosity and structure to the coating; protein substitute in paperboard coating without the requirement of cooking; provides better water retention than protein prods. and improves final sheet brightness; contains no plasticizers or solvs.
- Acrylidone® Resins** [ISP]  
*Chem. Descrip.:* Linear, random copolymer of vinylpyrrolidone and acrylic acid
- Uses:* For water-resist. coatings for ink jet recording media; dispersant in preparation of carbonless paper microcapsules and ceramic glazes  
*Properties:* Wh. free-flowing powd.; disp. in water; sol. in strong aq. bases or acids; m.w. 80,000-250,000; 50% hexadecene; also avail. as 55% solids in isopropanol
- AcryPrint™ 2115** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Acrylate latex  
*Uses:* Latex for paperboard; component of paper/paperboard in contact with aq./fatty/dry foods; exc. gloss, print mottle; inc. ink holdout and str.; contributes to folding chars. and offset water/ink absorp. balance  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Sm. particle size; visc. 300 cps; pH 7; 47% total solids
- AcryPrint™ 2129** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Acrylate latex  
*Uses:* Latex for paperboard; component of paper/paperboard in contact with aq./fatty/dry foods; exc. gloss, print ink uniformity; inc. ink holdout and str.; contributes to glueability, print mottle, folding chars. and offset water/ink absorp. balance  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Med. particle size; visc. 140 cps; pH 6.5; 48% total solids
- AcryPrint™ 2163** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Terpolymer latex  
*Uses:* Stiffener for paperboard; component of paper/paperboard in contact with aq./fatty/dry foods; aids printability, str., and mylar adhesion; inc. ink holdout; contributes to glueability, print mottle, folding chars. and offset water/ink absorp. balance  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Sm. particle size; visc. 300 cps; pH 7; 47% total solids
- Acter® 1450** [Honeywell Spec. Chems.]  
*Chem. Descrip.:* Ethylene/acrylic acid/vinyl acetate copolymer  
 CAS 26713-18-8  
*Uses:* Used for floor polishes, emulsion formulas; food pkg. adhesives; in paper/paperboard in contact with dry food  
*Regulatory:* FDA 21CFR §175.105, 176.180  
*Properties:* Acid no. 33-36; ester no. 21-25; hardness 4-6 dmm
- Acticide® DW** [Thor UK]  
*Chem. Descrip.:* 2-N-Octyl-4-isothiazolin-3-one  
*Uses:* Biocide, algicide, fungicide for protection of aq. and solv.-based coatings, films, and other prods.; preservative, biocide, bactericide, fungicide, slimicide for paper/pulp  
*Properties:* Liq.; 15% act.
- Acticide® HF** [Thor UK]  
*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one, 2-methyl-4-isothiazolin-3-one, with formaldehyde donor  
*Uses:* Biocide for complete wet-state preservation of wide range of aq. prods.; preservative, biocide, bactericide, fungicide, slimicide for paper/pulp; broad spectrum activity  
*Properties:* Liq.
- Acticide® SPX** [Thor UK]  
*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one, 2-methyl-4-isothiazolin-3-one  
*Uses:* Biocide for wet-state preservation of wide range of aq., formaldehyde-sensitive prods.; preservative, biocide, bactericide, fungicide, slimicide for paper/pulp; solv.-free; formaldehyde-free  
*Properties:* Liq.; 1.4-1.6% act.
- Acticide® WT** [Thor UK]  
*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one, 2-methyl-4-isothiazolin-3-one  
*Uses:* Biocide, bactericide, fungicide for water treatment and paper mill applics.; formaldehyde-free  
*Properties:* Liq.; 1.5% act.
- Acticide® WTC** [Thor UK]  
*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one, 2-methyl-4-isothiazolin-3-one  
*Uses:* Microbicide for wet-state protection of aq. formulations, for industrial water treatment, and prod. of preservatives; biocide, bactericide, fungicide, slimicide in paper/pulp; formaldehyde-free; protects against bacteria, yeasts, and fungi  
*Properties:* Liq.; 13.5-14.5% act.
- Actiron® DTF 021** [Synthron SA]  
*Uses:* Hydrosulfite stabilizer for mech. pulp mfg.
- Actiron® DTP 298** [Synthron SA]

- Uses:* Peroxide stabilizer for pulp deinking; very effective; enables sodium silicate to be reduced or omitted
- Actiron® NS** [Synthron SA]  
*Uses:* Peroxide stabilizer improving level of whiteness in mech. pulp mfg. and deinking; total or partial replacement of sodium silicate
- Actiron® PME** [Synthron SA]  
*Uses:* Peroxide stabilizer in mech. pulp mfg.
- Actitex®** [Pica USA]  
*Chem. Descrip.:* Activated carbon fabric  
CAS 7440-44-0; EINECS/ELINCS 231-153-3  
*Uses:* Fabric for adsorption of volatile compds. (paint solvs., polymers, paper industry, surf. cleaning and treatments), gas separation, adsorption of odors (air conditioning, air filtration), retention of toxic gases, gas storage, catalyst support; aids recycling or protection of the environment
- Actrafoam C** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Blend of glycols, fatty acids, and nonionic surfactants in a hydrocarbon base  
*Uses:* Defoamer for water sewage applics., pulp/paper mfg.  
*Properties:* Lt. yel. oily liq., bland odor; dens. 7.30 lb/gal; acid no. 7.5; flash pt. (COC) 305 F  
*Storage:* May become solid at lower temps.; store at 70 F for at least 24 h if prod. should freeze
- Actrasol 6092** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated rapeseed oil  
CAS 617788-68-9  
*Uses:* Lubricant, emulsifier in pigment flushing, cleaners, textiles, paper processing
- Actrasol C-50** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated castor oil, sodium neutralized  
*Uses:* Pigment wetting agent/dispersant for pigment flushing, cleaners, textiles, and paper processing; lubricant and emulsifier for metalworking fluids  
*Properties:* Liq.; 50% act. in water; anionic
- Actrasol C-75** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated castor oil, sodium neutralized  
*Uses:* Pigment wetting agent/dispersant for pigment flushing, cleaners, textiles, and paper processing; lubricant and emulsifier for metalworking fluids  
*Properties:* Liq.; water-sol.; 70% act. in water; anionic
- Actrasol C-85** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated castor oil, sodium neutralized  
*Uses:* Pigment wetting agent/dispersant for pigment flushing, cleaners, textiles, and paper processing; lubricant and emulsifier for metalworking fluids  
*Properties:* Liq.; 75% act. in water; anionic
- Actrasol OY-75** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated soybean oil, sodium neutralized  
*Uses:* Lubricant, emulsifier in pigment flushing, cleaners, textiles, paper processing  
*Properties:* Liq.; water-disp.; 75% conc.  
*Environmental:* Biodeg.
- Actrasol PSR** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated ricinoleic acid, potassium neutralized  
*Uses:* Pigment wetting agent/dispersant; aluminum lubricant; lubricant, emulsifier for pigment flushing, cleaners, textiles, paper processing  
*Properties:* Dk. amber liq.; 75% conc.; anionic
- Actrasol SBO** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated butyl oleate, sodium neutralized  
*Uses:* Lubricant, emulsifier in pigment flushing, cleaners, textiles, paper processing  
*Properties:* Anionic
- Actrasol SP** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfonated tall oil fatty acid, sodium neutralized  
EINECS/ELINCS 268-372-9  
*Uses:* Wet process phosphoric acid defoamer; lubricant, emulsifier for pigment flushing, cleaners, textiles, paper processing  
*Properties:* Liq.; water-sol.; 50% conc.; anionic
- Actrasol SP 175K** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated tall oil, potassium neutralized  
EINECS/ELINCS 272-349-9  
*Uses:* Lubricant, emulsifier for pigment flushing, cleaners, textiles, paper processing  
*Properties:* Liq.; water-disp.; 75% conc.; anionic  
*Environmental:* Biodeg.
- Actrasol SR 75** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated oleic acid, ammonium neutralized  
*Uses:* Mold release agent; lubricant, emulsifier for pigment flushing, cleaners, textiles, paper processing  
*Properties:* Liq.; water-disp.; 75% conc.; anionic  
*Environmental:* Biodeg.
- Actrasol SRK 75** [Georgia-Pacific/Actrachem]  
*Chem. Descrip.:* Sulfated oleic acid, potassium neutralized  
*Uses:* Mold release agent; lubricant, emulsifier for pigment flushing, cleaners, textiles, paper processing  
*Properties:* Liq.; water-disp.; 75% conc.; anionic  
*Environmental:* Biodeg.
- Acumer® 1000** [Rohm & Haas]  
*Chem. Descrip.:* Partial sodium salt of polyacrylic acid, 20% neutralized  
CAS 9003-04-7  
*Uses:* Scale inhibitor for industrial water treatment and oil prod. applics.; reduces precipitation of low sol. inorg. salts; crystal modifier; dispersant preventing precipitated crystals from agglomerating and depositing on surfaces; food pkg. adhesives, paper/paperboard; inhibits deposition of calcium carbonate, calcium sulfate, barium sulfate, etc.; effective over wide range of pH, water hardness, and temps.; exc. freeze-thaw stability  
*Regulatory:* FDA 21CFR §173.310, 175.105, 176.170, 176.180  
*Properties:* Colorless to straw-colored clear to sl. hazy homogeneous sol'n.; sol. in brine sol'ns.; m.w. 2000 (avg.); dens. 10.3 lb/gal; visc. 100-400 cps; pH 3.2-4.0; 47-49% total solids  
*Toxicology:* Sl. eye and skin irritant  
*Storage:* Can develop sl. hazy appearance after long-term cold storage, and cause separation; does not impair performance, but recommend that prod. not freeze in order to avoid remixing
- Acumer® 1020** [Rohm & Haas]  
*Chem. Descrip.:* Polyacrylic acid  
CAS 9003-01-4  
*Uses:* Scale inhibitor for industrial water treatment and oil prod. applics.; reduces precipitation of low sol. inorg. salts; crystal modifier; dispersant preventing precipitated crystals from agglomerating and depositing on surfaces; food pkg. adhesives, paper/paperboard; inhibits deposition of calcium carbonate, calcium sulfate, barium sulfate, etc.; effective over wide range of pH, water hardness, and temps.; exc. freeze-thaw stability  
*Regulatory:* FDA 21CFR §175.105, 176.180; as sodium salt: 173.310, 176.170  
*Properties:* Colorless to straw colored, clear to sl. hazy homogeneous sol'n.; sol. in brine sol'ns.; m.w. 2000 (avg.); dens. 10.1 lb/gal; visc. < 1000 cps; pH 2.1-2.5; 39% act.  
*Toxicology:* Mod. eye irritant  
*Storage:* Can develop sl. hazy appearance after long-term cold storage, and cause separation; does not impair performance, but recommend that prod. not freeze in order to avoid remixing
- Acumer® 1100** [Rohm & Haas]  
*Chem. Descrip.:* Partial sodium salt of polyacrylic acid, 20% neutralized  
CAS 9003-04-7  
*Uses:* Scale inhibitor for industrial water treatment and oil prod. applics.; reduces precipitation of low sol. inorg. salts; crystal modifier; dispersant preventing precipitated crystals from agglomerating and depositing on surfaces; food pkg. adhesives, paper/paperboard; inhibits deposition of calcium carbonate, calcium sulfate, barium sulfate, etc.; effective over wide range of pH, water hardness, and temps.; exc. freeze-thaw stability  
*Regulatory:* FDA 21CFR §173.310, 175.105, 176.170, 176.180  
*Properties:* Colorless to straw colored, clear to sl. hazy homogeneous sol'n.; sol. in brine sol'ns.; m.w. 4500 (avg.); dens. 10.2 lb/gal; visc. 500-1200 cps; pH 3.2-4.0; 44% act.  
*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. eye and skin irritant  
*Environmental:* LC50 (daphnia, 48 h) > 1000 ppm, (trout, 96 h) 700 ppm  
*Storage:* Can develop sl. hazy appearance after long-term cold storage, and cause separation; does not impair performance, but recommend that prod. not freeze in order to avoid remixing
- Acumer® 1110** [Rohm & Haas]  
*Chem. Descrip.:* Sodium polyacrylate  
CAS 9003-04-7  
*Uses:* Water treatment polymer for scale inhibition in stressed cooling water, boiler water sludge control; food-contact paper/paperboard; does not contain phosphorus; exc. freeze/thaw stability  
*Regulatory:* FDA 21CFR §173.310, 176.170, 176.180  
*Properties:* Colorless to straw colored, clear to sl. hazy homogeneous sol'n.;

m.w. 4500 (avg.); dens. 11.1 lb/gal; visc. 500-1200 cps; pH 6.7; 33.5% act.

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. eye irritant, nonirritating to skin

*Environmental:* LC50 (daphnia, 48 h) > 1000 ppm, (trout, 96 h) 700 ppm

*Storage:* Can develop sl. hazy appearance after long-term cold storage, and cause separation; does not impair performance, but recommend that prod. not freeze in order to avoid remixing

**Acumer® 1510** [Rohm & Haas]

*Chem. Descrip.:* Polyacrylic acid homopolymer colloidal sol'n.

CAS 9003-01-4

*Uses:* Dispersant for water treatment; modifier for aq. formulations, cleaners, binders, adhesives, emulsion paints; in reproduction processes; ceramic applics.; its salts as thickeners and dispersants for latex systems; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §173.310, 175.105, 176.170

*Properties:* Colorless clear visc. liq.; infinite dilutability with water; m.w. ≈ 60,000; visc. 160 cps; pH ≈ 2 (5% aq.); 25% solids

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 3 g/kg; causes eye damage and sl. skin irritation; vapors may be irritating to eyes and respiratory tract, and cause headache and nausea in poorly ventilated areas

**Acumer® 1850** [Rohm & Haas]

*Chem. Descrip.:* Sodium salt of polycarboxylate

CAS 37199-81-8

*Uses:* Acrylic water treatment polymer for applics. such as scale inhibition in stressed cooling water and boiler water sludge control; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §173.310, 175.105, 175.300, 176.170

*Properties:* M.w. 30,000; pH 9-10.8; 23% act.

**Acumer® 2100** [Rohm & Haas]

*Chem. Descrip.:* Carboxylate/sulfonate copolymer

*Uses:* Boiler water additive, cooling water additive, pulp/paper processing additive; dispersant for calcium carbonate, preventing scale buildup; food-contact paper/paperboard; thermally stable; offers exc. iron tolerance

*Use Level:* 15-20%

*Regulatory:* FDA 21CFR §173.310, 176.170, 176.180

*Properties:* Clear liq.; m.w. 11,000; visc. 80-180 cps; pH 4.3-5.3; 37% solids

**Acumer® 4161** [Rohm & Haas]

*Chem. Descrip.:* Phosphinopolycarboxylic acid aq. sol'n., partially neutralized

*Uses:* Scale inhibitor and dispersant used in the water treatment industry, in boiler and cooling water, pulp/papermaking systems; food-contact paper/paperboard; resist. to chlorine and compat. with most microbiological control agents

*Regulatory:* FDA 21CFR §173.310, 176.170, 176.180

*Properties:* Clear to sl. hazy liq.; m.w. 3300-3900; sp.gr. 1.20-1.25; dens. 10.0-10.4 lb/gal; visc. 500-2000 cps; pH 3.0-3.5; 50-52% total solids

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 5 g/kg; may cause eye irritation and sl. skin irritation

*Storage:* Can develop sl. hazy appearance after long-term cold storage; does not impair performance; recommended that prod. not be frozen in order to avoid remix

**Acumer® 9000** [Rohm & Haas]

*Chem. Descrip.:* Acrylic copolymer, sodium salt

CAS 9003-04-7

*Uses:* Dispersant and stabilizer for high solids min. slurries; adjuvant in coatings; food-contact paper/paperboard; works well with all kaolin clays and calcium carbonate

*Use Level:* < 2% (coatings)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* M.w. 2500; pH 7.5; 44% solids; anionic

**Acumer® 9141** [Rohm & Haas]

*Chem. Descrip.:* Polyacrylic acid, sodium salt

CAS 9003-04-7

*Uses:* Dispersant and stabilizer for high solids min. slurries; adjuvant in coatings; food-contact paper/paperboard; works well with all kaolin clays and calcium carbonate

*Regulatory:* FDA 21CFR §176.170, 176.180 approved

*Properties:* M.w. 2000; pH 7.0; 48% solids; anionic

**Acumer® 9300** [Rohm & Haas]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* Scale inhibitor for industrial water treatment and oil prod. applics.; reduces precipitation of low sol. inorg. salts; crystal modifier; dispersant preventing precipitated crystals from agglomerating and depositing on surfaces; food-contact paper/paperboard; inhibits deposition of calcium carbonate, calcium sulfate, barium sulfate, etc.; effective over wide range of pH, water hardness, and temps.; exc. freeze-thaw stability

*Regulatory:* FDA 21CFR §173.310, 176.170, 176.180

*Properties:* Colorless to straw-colored clear to sl. hazy homogeneous sol'n.; sol. in brine sol'ns.; m.w. 4500; dens. 11.1 lb/gal; visc. 500-1200 cps; pH 6.5-8.0; 44-46% total solids

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. eye irritant; nonirritating to skin

*Environmental:* LC50 (daphnia, 48 h) > 1000 ppm, (trout, 96 h) 700 ppm, (sunfish, 96 h) > 1000 ppm

**Acumer® 9400** [Rohm & Haas]

*Chem. Descrip.:* Polyacrylic acid, sodium salt

CAS 9003-04-7

*Uses:* Dispersant and stabilizer for high solids min. slurries; thickener for nat. rubber latex coatings; pigment dispersant in coatings; food-contact paper/paperboard; works well with all kaolin clays and calcium carbonate

*Use Level:* < 2% (rubber latex coatings); < 0.25% (pigment dispersant)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* M.w. 3600; pH 7.0; 42.5% solids; anionic

**Acumer® 9460** [Rohm & Haas]

*Chem. Descrip.:* Polyacrylic acid, partly neutralized sodium salt

CAS 9003-04-7

*Uses:* Dispersant and stabilizer for high solids min. slurries; thickener for nat. rubber latex coatings; pigment dispersant in coatings; food-contact paper/paperboard; works well with all kaolin clays and calcium carbonate

*Use Level:* < 2% (rubber latex coatings); < 0.25% (pigment dispersant)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* M.w. 3600; pH 5.5; 43% solids; anionic

**ACumist® A-12** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized oxidized polyethylene homopolymer

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, rubber applics.; provides matting and surf. props. to powd. coatings; suspension aid, flattening and texturizing agent, and binder for personal care prods.; food pkg. adhesives, paper/paperboard, textiles; exc. mar and abrasion resist., COF reduction, recoatability; esp. for high temp. resist. systems

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Micronized powd.; 12 μ avg. particle size; dens. 0.99 g/cc; drop pt. 136 C; acid no. 26-40; hardness < 0.5 dmm

**ACumist® A-18** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized oxidized polyethylene homopolymer

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, coatings, personal care, and rubber applics.; suspension aid, flattening and texturizing agent, and binder for personal care prods.; food pkg. adhesives, paper/paperboard, textiles; exc. mar and abrasion resist., COF reduction, recoatability; esp. for high temp. resist. systems

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Micronized powd.; 18 μ avg. particle size; dens. 0.99 g/cc; drop pt. 136 C; acid no. 26-40; hardness < 0.5 dmm

**ACumist® B-6** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized HDPE homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, rubber applics.; provides matting, surf. props. to powd. coatings; good performance in solv.-based coatings; suspension aid, flattening and texturizing agent, and binder for personal care prods.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; exc. mar and abrasion resist.; exc. recoatability

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 6 μ avg. particle size; dens. 0.96 g/cc; drop pt. 126 C; acid no. nil; hardness < 0.5 dmm

**ACumist® B-9** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized HDPE homopolymer

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, and rubber applics.; good performance in solv.-based coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; exc. mar and abrasion resist.; exc. recoatability

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 9 μ avg. particle size; dens. 0.96 g/cc; drop pt. 126 C; acid no. nil; hardness < 0.5 dmm

**ACumist® B-12** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized HDPE homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, and rubber applics.; provides matting, surf. props. to powd. coatings; good performance in solv.-based coatings; suspension aid, flattening and texturizing agent, and binder for personal care prods.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; exc. mar and abrasion resist., exc. recoatability

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 12 μ avg. particle size; dens. 0.96 g/cc; drop pt. 126 C; acid no. nil; hardness < 0.5 dmm

**ACumist® B-18** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized HDPE homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, and rubber applics.; good performance in solv.-based coatings; suspension aid, flattening and texturizing agent, and binder for personal care prods.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants; exc. mar and abrasion resist., exc. recoatability

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 18 μ avg. particle size; dens. 0.96 g/cc; drop pt. 126 C; acid no. nil; hardness < 0.5 dmm

**ACumist® C-5** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, and rubber applics.; abrasion resist. aid and slip resist. aid for coatings; suspension aid, flattening agent, texturizing agent, and binder for personal care prods.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 5 μ avg. particle size; dens. 0.95 g/cc; drop pt. 121 C; acid no. nil; hardness 1.0 dmm

**ACumist® C-9** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, and rubber applics.; abrasion resist. aid and slip resist. aid for coatings; suspension aid, flattening agent, texturizing agent, and binder for personal care prods.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 9 μ avg. particle size; dens. 0.95 g/cc; drop pt. 121 C; acid no. nil; hardness 1.0 dmm

**ACumist® C-12** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, and rubber applics.; abrasion resist. aid and slip resist. aid for coatings; suspension aid, flattening agent, texturizing agent, and binder for personal care prods.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800,

178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 12 μ avg. particle size; dens. 0.95 g/cc; drop pt. 121 C; acid no. nil; hardness 1.0 dmm

**ACumist® C-18** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for adhesives, inks, personal care, and rubber applics.; abrasion resist. aid and slip resist. aid for coatings; suspension aid, flattening agent, texturizing agent, and binder for personal care prods.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 18 μ avg. particle size; dens. 0.95 g/cc; drop pt. 121 C; acid no. nil; hardness 1.0 dmm

**ACumist® C-30** [Honeywell Spec. Chems.]

*Chem. Descrip.:* Micronized polyethylene homopolymer  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax additive for inks, coatings, rubber applics.; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles, textiles, lubricants  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45

*Properties:* Micronized powd.; 30 μ avg. particle size; dens. 0.95 g/cc; drop pt. 121 C; acid no. nil; hardness 1.0 dmm

**Acusol® 810** [Rohm & Haas]

*Chem. Descrip.:* Acrylic crosslinked copolymer  
CAS 25133-97-5

*Uses:* Detergent polymer, processing aid, stabilizer, thickener for detergents and cleaners, oven cleaners, dishwash liqs., highly loaded surfactant formulations, food industry cleaners, water treatment, min. processing, other industrial markets; food pkg. adhesives, paper/paperboard; best for extremely high pH

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Alkali-sol.; sp.gr. 1.046; visc. 1700-2700 cps (1% neutralized); pH 2.4-3.4; 18% solids; anionic

**Acusol® 820** [Rohm & Haas]

*Chem. Descrip.:* Acrylic copolymer emulsion  
CAS 25133-97-5

*Uses:* Detergent polymer, processing aid, thickener, and stabilizer for cosmetics, detergents and cleaners, abrasive creams, floor cleaners, rinse aids, dishwash liqs., alkaline toilet cleaners, water treatment, min. processing, other industrial markets; foam stabilizer; food-contact paper/paperboard; very thixotropic

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Off-wh. milky liq.; alkali-sol.; m.w. 500,000; sp.gr. 1.06; dens. 8.75 lb/gal; visc. 20 cps; pH 2.7; 30% solids; anionic

*Toxicology:* LD50 (oral, rats) > 5 g/kg; mod. irritating to eyes, sl. irritating to skin

*Storage:* Protect from freezing

**Acusol® 823** [Rohm & Haas]

*Chem. Descrip.:* Hydrophobically modified acrylic polymer emulsion

*Uses:* Detergent polymer, thickener, and stabilizer for household and institutional detergents (liq. abrasive cleaners, oven cleaners, all purpose cleaners, dishwashing liq.); food-contact paper/paperboard; high electrolyte tolerance; high alkaline tolerance; low shear thinning

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Clear sol'n.; alkali-sol.; sp.gr. 1.04; visc. 30 cps; pH 3.2; 30% polymer; anionic

**Acusol® 830** [Rohm & Haas]

*Chem. Descrip.:* Acrylic crosslinked copolymer  
CAS 25133-97-5

*Uses:* Detergent polymer, thickener, stabilizer for detergents, floor polishes, window cleaners, solv.-based cleaners, paint strippers, lubricant emulsions, car polishes, antifreeze, water treatment, min. processing, other industrial markets; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Alkali-sol.; sp.gr. 1.054; visc. 10 cps; pH 3; 28% solids; anionic

**Acusol® 842** [Rohm & Haas]

*Chem. Descrip.:* Acrylic copolymer  
CAS 25133-97-5

- Uses:* Detergent polymer, thickener for detergents and cleaners (abrasive cleaners, scourers, machine dishwashing liqs., floor cleaners); foam stabilizer; good particulate suspension; film forming; food-contact paper/paperboard; good surfactant tolerance; good divalent ion tolerance; rheology close to cellulotics
- Regulatory:* FDA 21CFR §176.170, 176.180
- Properties:* Alkali-sol.; sp.gr. 1.050; visc. 200 cps; pH 2.5-3.5; 17.5-18.5% solids; anionic
- Adeka PEG-200** [Asahi Denka Kogyo]  
*Chem. Descrip.:* PEG-4  
 CAS 25322-68-3; EINECS/ELINCS 203-989-9  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Transparent liq.; m.w. 200; nonionic  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-300** [Asahi Denka Kogyo]  
*Chem. Descrip.:* PEG-6  
 CAS 25322-68-3; EINECS/ELINCS 220-045-1  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Transparent liq.; m.w. 300; nonionic  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-400** [Asahi Denka Kogyo]  
*Chem. Descrip.:* PEG-8  
 CAS 25322-68-3; EINECS/ELINCS 225-856-4  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Transparent liq.; m.w. 400; nonionic  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-600** [Asahi Denka Kogyo]  
*Chem. Descrip.:* PEG-12  
 CAS 25322-68-3; EINECS/ELINCS 229-859-1  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Transparent liq.; m.w. 600; nonionic  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-1000** [Asahi Denka Kogyo]  
*Chem. Descrip.:* PEG-20  
 CAS 25322-68-3; EINECS/ELINCS 203-989-9  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Wh. paste; m.w. 1000; nonionic  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-1500** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Polyethylene glycol  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Wh. paste; m.w. 1500  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-4000** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Polyethylene glycol  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Wh. flake; m.w. 4000  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-6000** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Polyethylene glycol  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Wh. flake; m.w. 6000  
*Toxicology:* Low toxicity; mild irritation
- Adeka PEG-20,000** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Polyethylene glycol  
*Uses:* Surfactant, wetting agent, lubricant for textiles, paper, syn. resins, cosmetics, and pharmaceutical industries; good sol. and compat.  
*Properties:* Wh. flake; m.w. 20,000  
*Toxicology:* Low toxicity; mild irritation
- Adeka Catioace DM-30A** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Tetraammonium salt type polymer  
*Uses:* Surfactant, pigment dispersant for water-based systems; paper/pulp conductive agents  
*Properties:* Cationic
- Adekahope DES-3025** [Asahi Denka Kogyo]  
*Chem. Descrip.:* High alcohol ether sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries; polymerization emulsifier  
*Properties:* Liq.; 25% solids; anionic
- Adekahope DS-25** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Higher alcohol sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries; polymerization emulsifier  
*Properties:* Liq.; 25% solids; anionic
- Adekahope HAN-40** [Asahi Denka Kogyo]  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries  
*Properties:* Powd.; 40% solids; anionic
- Adekahope LS-35** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Nat. alcohol sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries; polymerization emulsifier  
*Properties:* Liq.; 35% solids; anionic
- Adekahope LS-90** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Nat. alcohol sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries; polymerization emulsifier  
*Properties:* Liq.; 90% solids; anionic
- Adekahope LST** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Nat. alcohol sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries; polymerization emulsifier  
*Properties:* Liq.; 35% solids; anionic
- Adekahope MS-30C** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Nat. alcohol sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries  
*Properties:* Paste; 30% solids; anionic
- Adekahope MS-90P** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Nat. alcohol sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries  
*Properties:* Powd.; 90% solids; anionic
- Adekahope NES-60N** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Aromatic ether sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries; polymerization emulsifier  
*Properties:* Yel. liq.; pH 7.0 (3% aq.); 60% solids; anionic
- Adekahope SAN-40PD** [Asahi Denka Kogyo]  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries  
*Properties:* Powd.; 40% solids; anionic
- Adekahope TR-45** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Sulfated oil  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries  
*Properties:* Liq.; 45% solids; anionic
- Adekahope YES-25** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Nat. alcohol ether sulfate  
*Uses:* Emulsifier, detergent for cosmetics, textiles, paper/pulp, petrol., paints, inks, dyes, pharmaceuticals, agric., metal cleaning, rubber, and plastics industries; polymerization emulsifier  
*Properties:* Liq.; 25% solids; anionic
- Adeka Hypote** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Sodium hypochlorite

- CAS 7681-52-9; EINECS/ELINCS 231-668-3  
*Uses:* Bleaching agent for fiber, pulp/paper, chemicals, food, water treatment
- Adekamine 4DAC-80** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Dialkyl type tetraammonium salt  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent and dispersant for pigments and paints  
*Properties:* Sl. brn. liq.; 80% solid; cationic  
*Toxicology:* Mild irritation
- Adekamine 4DAC-85** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Dialkyl type tetraammonium salt  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Sl. brn. liq.; 85% solid; cationic  
*Toxicology:* Mild irritation
- Adekamine 4MAC-30** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Monoalkyl type tetraammonium salt  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Transparent liq.; 30% solid; cationic  
*Toxicology:* Mild irritation
- Adekamine ADG-30** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Alkyl glycine type  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Liq.; 30% solid; cationic  
*Toxicology:* Mild irritation
- Adekamine E Series** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Mono- or di-alkyl tetraammonium salts  
*Uses:* Surfactant, softener, antistat, emulsifier in textiles, paper depitching, cosmetic, pharmaceutical, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Cationic  
*Toxicology:* Mildly irritating
- Adekamine LDM** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Alkylamine oxide  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Transparent liq.; 35% solid; cationic  
*Toxicology:* Mild irritation
- Adekamine MD-30** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Alkylamine oxide  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Liq.; 30% solid; cationic
- Adekamine MT-50** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Monoalkyl type tetraammonium salt  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Sl. brn. liq.; 50% solid; cationic
- Adekamine PMS-100** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Polyamine derivative  
*Uses:* Surfactant, antistat, softener, emulsifier, dispersant in textiles, paper depitching, cosmetics, pharmaceuticals, rubber, plastics applics.; emulsion breaker in petrol.; wetting agent, dispersant for pigments and paints  
*Properties:* Sl. yellowish flake; 100% solid; cationic
- Adekanate B-107F** [Asahi Denka Kogyo]  
*Uses:* Defoamer for polymer cement, papermaking, wastewater, paints, inks, dyes, rubber, plastics applics.  
*Properties:* Wh. powd.; pH 7.0 (3% aq.); 100% solids
- Adekanate B-187** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Blended mineral oils  
*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper/pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect  
*Use Level:* 50-100 ppm (resin emulsion)

*Properties:* Lt. yel. liq.; sp.gr. 0.91; pH 7.5 (3% aq.); 100% act.

**Adekanate B-190** [Asahi Denka Kogyo]

*Chem. Descrip.:* Silicone blend

*Uses:* Defoamer for syn. resin emulsion, emulsion-type adhesives, emulsion-type paints, latex prod., paper/pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Properties:* Lt. yel. liq.; sp.gr. 1.02; pH 7.0 (3% aq.); 100% act.; nonionic

**Adekanate B-192** [Asahi Denka Kogyo]

*Chem. Descrip.:* Silicone blend

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper/pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Properties:* Lt. yel. liq.; sp.gr. 1.02; pH 7.0 (3% aq.); 100% act.; nonionic

**Adekanate B-505** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper/pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Properties:* Lt. yel. liq.; sp.gr. 0.90; pH 9.0 (3% aq.); 100% solids

**Adekanate B-556** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Surfactant, defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., textiles, wastewater, paints, inks, dyes, rubber, plastics, paper industry, recovery of pulping liquor; good foam breaking; long lasting defoaming

*Use Level:* 1-100 ppm (paper industry); 0.05-0.5% (textile dyeing)

*Properties:* Lt. yel. liq.; sp.gr. 0.90; pH 9.0 (3% aq.); 100% solids

**Adekanate B-590** [Asahi Denka Kogyo]

*Chem. Descrip.:* Special nonionics

*Uses:* Antifoam for paper/pulp, wastewater, paints, inks, dyes, rubber, and plastics

*Properties:* Amber liq.; sp.gr. 0.95; pH 4.0 (3% aq.); 100% act.

**Adekanate B-748A** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Use Level:* 50-100 ppm (resin emulsion)

*Properties:* Wh. milky liq.; sp.gr. 0.90; pH 9.5 (3% aq.); 100% solids

**Adekanate B-925** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Use Level:* 0.05-2% (adhesives); 0.01-0.1% owf (textile finishing)

*Properties:* Lt. yel. liq.; sp.gr. 1.02; pH 7.0 (3% aq.); 100% solids; nonionic

**Adekanate B-940** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Use Level:* 50-100 ppm (resin emulsion); 0.05-0.5% (textile dyeing)

*Properties:* Lt. yel. liq.; sp.gr. 0.90; pH 5.0 (3% aq.); 100% solids

**Adekanate B-970** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Properties:* Lt. yel. liq.; sp.gr. 1.02; pH 8.0; 100% solids; nonionic

**Adekanate B-988** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Properties:* Lt. yel. liq.; sp.gr. 1.01; pH 7.0 (3% aq.); 100% solids

**Adekanate B-1011** [Asahi Denka Kogyo]

*Chem. Descrip.:* Blended mineral oils

*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect

*Properties:* Lt. yel. liq.

**Adekanate B-1012** [Asahi Denka Kogyo]

- Chem. Descrip.:* Silicone blend  
*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect  
*Properties:* Lt. yel. liq.; sp.gr. 1.01; pH 7.0 (3% aq.); 100% solids; nonionic
- Adekanate B-1015** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Silicone blend  
*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect  
*Use Level:* 50-100 ppm (resin emulsion); 0.05-0.5% (textile dyeing)  
*Properties:* Lt. yel. transparent liq.; sp.gr. 1.01; pH 7.0 (3% aq.); 100% solids; nonionic
- Adekanate B-1016** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Silicone blend  
*Uses:* Defoamer for syn. resin emulsions, emulsion-type adhesives, emulsion-type paints, latex prod., paper pulp industry, wastewater, paints, inks, dyes, rubber, and plastics; good foam breaking; long lasting defoaming effect  
*Use Level:* 50-100 ppm (resin emulsion); 0.05-2% (adhesives); 0.05-0.5% (textile dyeing)  
*Properties:* Wh. suspension; sp.gr. 1.02; pH 6.0 (3% aq.); 100% solids; nonionic
- Adekanate B-1019** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Silicone-based emulsion  
*Uses:* Antifoam for paper/pulp, wastewater, paints, inks, dyes, rubber, and plastics  
*Properties:* Milky wh. liq.; sp.gr. 1.02; pH 7.0 (3% aq.); 45% act.
- Adekanate B-3056A** [Asahi Denka Kogyo]  
*Chem. Descrip.:* Mineral oil-based  
*Uses:* Defoamer for glossy paints, resin emulsions, syn. rubber and latexes, food-contact coatings/paper  
*Use Level:* 100-500 ppm  
*Regulatory:* FDA 21CFR §176.200, 176.210, 176.250  
*Properties:* Amber suspension; sp.gr. 0.90; pH 5.0 (3% aq.); 100% solids
- Adekanol 25R-1** [Asahi Denka Kogyo]  
*Chem. Descrip.:* POE-POP block copolymer  
CAS 9003-11-6  
*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; detergent in auto dishwasher, bottle washing, etc.; low foaming; highly stable to acid, alkali, peroxide metallic ion  
*Properties:* Transparent liq.; nonionic  
*Toxicology:* Low toxicity
- Adekanol 25R-2** [Asahi Denka Kogyo]  
*Chem. Descrip.:* POE-POP block copolymer  
CAS 9003-11-6  
*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; detergent in auto dishwasher, bottle washing, etc.; low foaming; highly stable to acid, alkali, peroxide metallic ion  
*Properties:* Transparent liq.; nonionic  
*Toxicology:* Low toxicity
- Adekanol B-608** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-713** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 36 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-714** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 43 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-722** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming
- Properties:* Transparent or semi-transparent liq.; cloud pt. 16 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-733** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; pigment wetting agent; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; sp.gr. 1.00; cloud pt. 31 C; pH 7.0 (3% aq.); 100% solids; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-750** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 4 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-762** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; pigment wetting agent; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; sp.gr. 1.00; cloud pt. 40 C; pH 7.0 (3% aq.); 100% solids; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-786** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 0 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-795** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; pigment wetting agent; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; sp.gr. 1.00; cloud pt. 37 C; pH 7.0 (3% aq.); 100% solids; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-797** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; pigment wetting agent; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; sp.gr. 1.00; cloud pt. 32 C; pH 7.0 (3% aq.); 100% solids; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-2020** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 24 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-2030** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 17 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-4001** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 66 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol B-4009** [Asahi Denka Kogyo]  
*Uses:* Surfactant, detergent for metal, paper/pulp, paints, agric., and textiles; high detergency, low foaming  
*Properties:* Transparent or semi-transparent liq.; cloud pt. 66 C; nonionic  
*Toxicology:* Mild irritation; low toxicity
- Adekanol F-68** [Asahi Denka Kogyo]  
*Chem. Descrip.:* POE-POP block copolymer  
CAS 9003-11-6  
*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion  
*Properties:* Wh. flake; nonionic  
*Toxicology:* Low toxicity
- Adekanol F-88** [Asahi Denka Kogyo]  
*Chem. Descrip.:* POE-POP block copolymer  
CAS 9003-11-6  
*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymeriza-

tion emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Wh. flake; nonionic

*Toxicology:* Low toxicity

**Adekanol F-108** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Wh. flake; nonionic

*Toxicology:* Low toxicity

**Adekanol F-127** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Wh. flake; nonionic

*Toxicology:* Low toxicity

**Adekanol G-135, G-145** [Asahi Denka Kogyo]

*Uses:* Foam breaking and foam preventive additive for papermaking

**Adekanol G-683** [Asahi Denka Kogyo]

*Chem. Descrip.:* Silicone defoamer

*Uses:* Defoamer for papermaking

**Adekanol KS-220** [Asahi Denka Kogyo]

*Chem. Descrip.:* Nonsilicone

*Uses:* Antifoam for papermaking, wastewater treatment; does not affect performance of sizing agents; long-lasting effects

*Properties:* Emulsion

**Adekanol L-31** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-34** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-44** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-61** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, defoamer, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, fermentation, syn. resin emulsions, adhesives, paint pigments, oil, leather, photography, agric. forest industries; polymerization emulsifier; detergent in auto dishwasher, bottle washing, etc.; highly stable to acid, alkali, peroxide metallic ion

*Use Level:* 0.005-0.1% (fermentation); 0.05-2% (adhesives)

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-62** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-64** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-71** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Use Level:* 0.05-0.5% (paint)

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-72** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Use Level:* 0.05-0.5% (paint)

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-101** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-121** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol L-122** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Transparent or translucent liq.; nonionic

*Toxicology:* Low toxicity

**Adekanol LG-109** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; detergent

in auto dishwasher, bottle washing, etc.; good foam breaking/prevention

*Use Level:* 0.005-0.1%

*Properties:* Transparent liq.

**Adekanol LG-121** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; detergent in auto dishwasher, bottle washing, etc.; good foam breaking/prevention

*Properties:* Transparent liq.

**Adekanol LG-126** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; detergent in auto dishwasher, bottle washing, etc.; suitable for org. acids, amino acids, and antibiotics; good foam breaking/prevention

*Use Level:* 0.005-0.1% (fermentation); 0.001-0.1% (wastewater treatment)

*Properties:* Transparent liq.

**Adekanol LG-131N** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, slate prod., and wastewater treatment; good foam breaking/prevention

*Properties:* Transparent liq.

**Adekanol LG-135** [Asahi Denka Kogyo]

*Chem. Descrip.:* Ester

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, slate prod., and wastewater treatment; good foam breaking/prevention

*Properties:* Lt. yel. liq.; nonionic

**Adekanol LG-139** [Asahi Denka Kogyo]

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, elec., cosmetics, syn. resin paint pigments, textiles, electronics, and wastewater treatment; good foam breaking/prevention

*Properties:* Lt. yel. liq.; nonionic

**Adekanol LG-141** [Asahi Denka Kogyo]

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, slate prod., and wastewater treatment; good foam breaking/prevention

*Properties:* Lt. yel. liq.; nonionic

**Adekanol LG-142** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactant

*Uses:* Antifoam for fermentation, recycled beet liquor, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Properties:* Lt. yel. liq.; nonionic

**Adekanol LG-145** [Asahi Denka Kogyo]

*Chem. Descrip.:* Ester

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Use Level:* 10-100 ppm (textile dyeing)

*Properties:* Lt. yel. liq.; nonionic

**Adekanol LG-150** [Asahi Denka Kogyo]

*Chem. Descrip.:* Mineral oil type

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Properties:* Lt. yel. liq.

**Adekanol LG-163** [Asahi Denka Kogyo]

*Chem. Descrip.:* Mineral oil type

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Properties:* Lt. yel. liq.

**Adekanol LG-200B** [Asahi Denka Kogyo]

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; antifoam in monomer stripping in production of rubber latexes with soap-based emulsifiers, esp. in SBR type latexes; good foam breaking/prevention

*Use Level:* 100-500 ppm (rubbers/latexes)

*Properties:* Wh. emulsion; nonionic

**Adekanol LG-294** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Use Level:* 0.005-0.1%

*Properties:* Transparent liq.; highly disp. in water

**Adekanol LG-295S** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Use Level:* 0.005-0.1%

*Properties:* Transparent liq.

**Adekanol LG-297** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Use Level:* 0.005-0.1%

*Properties:* Transparent liq.

**Adekanol LG-674** [Asahi Denka Kogyo]

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Properties:* Wh. emulsion; nonionic

**Adekanol LG-805** [Asahi Denka Kogyo]

*Chem. Descrip.:* Polyether type surfactants

*Uses:* Antifoam for fermentation, paper/pulp, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, textiles, and wastewater treatment; good foam breaking/prevention

*Use Level:* 0.005-0.1%

*Properties:* Transparent liq.

**Adekanol P-84** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Wh. paste; nonionic

*Toxicology:* Low toxicity

**Adekanol P-85** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Wh. paste; nonionic

*Toxicology:* Low toxicity

**Adekanol P-103** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer

CAS 9003-11-6

*Uses:* Surfactant, emulsifier, solubilizer, detergent, dispersant, lubricant for textiles, pulp/paper, metal, pharmaceuticals, cosmetics, syn. resin paint pigments, oil, leather, photography, and agric. forest industries; polymerization emulsifier; low foaming; highly stable to acid, alkali, peroxide metallic ion

*Properties:* Wh. paste; nonionic

*Toxicology:* Low toxicity

**Adekanol RP-605D** [Asahi Denka Kogyo]

*Uses:* Surfactant, deinking agent for waste paper; detergent; flotation system; offers good wetting, penetration, readhesion prevention of carbon; carbon cohesive type

*Properties:* Lt. yel. transparent liq.; nonionic

**Adekanol RP-807** [Asahi Denka Kogyo]

*Uses:* Surfactant; deinking agent for waste paper; detergent; flotation system; offers good wetting, penetration, readhesion prevention of carbon; carbon cohesive type

*Properties:* Transparent liq.; nonionic

**Adekanol RP-870** [Asahi Denka Kogyo]

*Uses:* Surfactant; deinking agent for waste paper; detergent; flotation system; offers good wetting, penetration, readhesion prevention of carbon; carbon cohesive type

*Properties:* Transparent liq.; nonionic

**Adekanol RP-882** [Asahi Denka Kogyo]

*Uses:* Surfactant; deinking agent for waste paper; detergent; flotation system; offers good wetting, penetration, readhesion prevention of carbon; carbon cohesive type

*Properties:* Transparent liq.; nonionic

**Adekanol TR-701** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer (ethylene diamine based)  
CAS 9003-11-6

*Uses:* Surfactant, defoamer for textiles, paper/pulp, petrol., paints, pharmaceuticals, cosmetics, agric., syn. resin emulsions, rubber, plastics, adhesives, and metal industries

*Use Level:* 0.05-2% (adhesives)

*Properties:* Sl. yellowish transparent liq.; nonionic

*Toxicology:* Low toxicity; mild irritation

**Adekanol TR-702** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer (ethylene diamine based)  
CAS 9003-11-6

*Uses:* Surfactant for textiles, paper/pulp, petrol., paints, pharmaceuticals, cosmetics, agric., rubber, plastics, and metal industries; low foaming

*Properties:* Sl. yellowish transparent liq.; nonionic

*Toxicology:* Low toxicity; mild irritation

**Adekanol TR-704** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer (ethylene diamine based)  
CAS 9003-11-6

*Uses:* Surfactant for textiles, paper/pulp, petrol., paints, pharmaceuticals, cosmetics, agric., rubber, plastics, and metal industries; low foaming

*Properties:* Sl. yellowish transparent liq.; nonionic

*Toxicology:* Low toxicity; mild irritation

**Adekanol TR-913** [Asahi Denka Kogyo]

*Chem. Descrip.:* POE-POP block copolymer (ethylene diamine based)  
CAS 9003-11-6

*Uses:* Surfactant for textiles, paper/pulp, petrol., paints, pharmaceuticals, cosmetics, agric., rubber, plastics, and metal industries; low foaming

*Properties:* Sl. yellowish transparent liq.; nonionic

*Toxicology:* Low toxicity; mild irritation

**Adekanol TS-401** [Asahi Denka Kogyo]

*Uses:* Surfactant, wetting agent, scouring detergent, and bleaching penetrant for textiles; surfactant for paper/pulp, metal cleaning

*Properties:* Transparent liq.; nonionic

*Environmental:* Biodeg.

**Adekanol TS-403A** [Asahi Denka Kogyo]

*Uses:* Surfactant, wetting agent, scouring detergent, and bleaching penetrant for textiles; surfactant for paper/pulp, metal cleaning

*Properties:* Lt. yel. transparent liq.; nonionic/anionic

*Environmental:* Biodeg.

**Adekanol TS-406** [Asahi Denka Kogyo]

*Uses:* Surfactant, wetting agent, scouring detergent, and bleaching penetrant for textiles; surfactant for paper/pulp, metal cleaning

*Properties:* Lt. yel. transparent liq.; nonionic/anionic

*Environmental:* Biodeg.

**Adekanol TS-415A** [Asahi Denka Kogyo]

*Uses:* Surfactant, wetting agent, scouring detergent, and bleaching penetrant for textiles; surfactant for paper/pulp, metal cleaning

*Properties:* Lt. yel. transparent liq.; nonionic/anionic

*Environmental:* Biodeg.

**Adekanol TS-661** [Asahi Denka Kogyo]

*Uses:* Surfactant, scouring detergent for textiles; surfactant for paper/pulp, metal cleaning; low foaming; high acid resist.

*Properties:* Transparent liq.; nonionic

**Adekanol TS-751** [Asahi Denka Kogyo]

*Uses:* Surfactant, scouring detergent for textiles; surfactant for paper/pulp, metal cleaning; good dispersion

*Properties:* Transparent liq.; nonionic

**Adekanol TS-780** [Asahi Denka Kogyo]

*Uses:* Surfactant, scouring detergent for textiles; surfactant for paper/pulp, metal cleaning; good dispersion

*Properties:* Transparent liq.; nonionic

**Adekanol TS-800** [Asahi Denka Kogyo]

*Uses:* Surfactant, soaping agent for textiles; surfactant for paper/pulp, metal cleaning; low foaming

*Properties:* Lt. yel. transparent liq.; anionic

**Adekanol TS-800C** [Asahi Denka Kogyo]

*Uses:* Surfactant, soaping agent for textiles; surfactant for paper/pulp, metal cleaning; low foaming

*Properties:* Lt. yel. transparent liq.; anionic

**Adekanol TS-801C** [Asahi Denka Kogyo]

*Uses:* Surfactant, soaping agent for textiles; surfactant for paper/pulp, metal cleaning; low foaming

*Properties:* Lt. yel. transparent liq.; anionic

**Adekanol TS-830** [Asahi Denka Kogyo]

*Uses:* Surfactant, soaping agent for textiles; surfactant for paper/pulp, metal cleaning; low foaming

*Properties:* Lt. yel. transparent liq.; anionic

**Adekanol TS-840** [Asahi Denka Kogyo]

*Uses:* Surfactant, soaping agent for textiles; surfactant for paper/pulp, metal cleaning; low foaming

*Properties:* Lt. yel. transparent liq.; anionic

**Adekanol TS-843** [Asahi Denka Kogyo]

*Uses:* Surfactant, soaping agent for textiles; surfactant for paper/pulp, metal cleaning; low foaming

*Properties:* Lt. yel. transparent liq.; anionic

**Adekanol TS-845** [Asahi Denka Kogyo]

*Uses:* Surfactant, soaping agent for textiles; surfactant for paper/pulp, metal cleaning; low foaming

*Properties:* Lt. yel. transparent liq.; anionic

**Adeka Optomer KR Series** [Asahi Denka Kogyo]

*Chem. Descrip.:* One-component epoxy resin, UV curing

CAS 25928-94-3

*Uses:* Primers for materials such as metal/plastic/paper, finishing varnishes, protective varnishes, inks, adhesives, insulating coatings, conductive coatings

**Adekatol LO-3** [Asahi Denka Kogyo]

*Chem. Descrip.:* Primary alcohol ethoxylate

*Uses:* Surfactant for textiles, paper/pulp, metal, syn. resin paint pigments, and agric. forest industries

*Properties:* Transparent liq.; cloud pt. < 10 C; HLB 8.5; nonionic

**Adekatol LO-7** [Asahi Denka Kogyo]

*Chem. Descrip.:* Primary alcohol ethoxylate

*Uses:* Surfactant for textiles, paper/pulp, metal, syn. resin paint pigments, and agric. forest industries

*Properties:* Transparent liq.; cloud pt. 45 C; HLB 11.9; nonionic

**Adekatol LO-9** [Asahi Denka Kogyo]

*Chem. Descrip.:* Primary alcohol ethoxylate

*Uses:* Surfactant for textiles, paper/pulp, metal, syn. resin paint pigments, and agric. forest industries

*Properties:* Transparent liq.; cloud pt. 65 C; HLB 13.0; nonionic

**Adekatol SO-105** [Asahi Denka Kogyo]

*Chem. Descrip.:* Secondary alcohol ethoxylate

*Uses:* Surfactant, detergent for textiles, paper/pulp, metals, syn. resin paint pigments, and agric. forest industries

*Properties:* Transparent liq.; HLB 10.5; nonionic

**Adekatol SO-120** [Asahi Denka Kogyo]

*Chem. Descrip.:* Secondary alcohol ethoxylate

*Uses:* Surfactant, detergent for textiles, paper/pulp, metals, syn. resin paint pigments, and agric. forest industries

*Properties:* Transparent liq.; cloud pt. 33 C; HLB 12.0; nonionic

**Adekatol SO-135** [Asahi Denka Kogyo]

*Chem. Descrip.:* Secondary alcohol ethoxylate

*Uses:* Surfactant, detergent for textiles, paper/pulp, metals, syn. resin paint pigments, and agric. forest industries

*Properties:* Transparent liq.; cloud pt. 57 C; HLB 13.5; nonionic

**Adekatol SO-145** [Asahi Denka Kogyo]

*Chem. Descrip.:* Secondary alcohol ethoxylate

*Uses:* Surfactant, detergent for textiles, paper/pulp, metals, syn. resin paint pigments, and agric. forest industries

*Properties:* Wh. powd.; cloud pt. 82 C; HLB 14.5; nonionic

**Adekatol SO-160** [Asahi Denka Kogyo]

*Chem. Descrip.:* Secondary alcohol ethoxylate

*Uses:* Surfactant, detergent for textiles, paper/pulp, metals, syn. resin paint

pigments, and agric. forest industries

*Properties:* Wh. solid; cloud pt. 95 C; HLB 16.0; nonionic

**Adelite** [Asahi Denka Kogyo]

*Chem. Descrip.:* Colloidal silica

EINECS/ELINCS 231-545-4

*Uses:* Antislip agent for paper; fiber binder for metal casting and refractory materials; catalyst carrier; reinforcing agent for adhesives and paints

**Adi-pure®** [DuPont Nylon]

*Chem. Descrip.:* High purity adipic acid

CAS 124-04-9; EINECS/ELINCS 204-673-3

*Uses:* Chem. intermediate; used in adhesives, coatings (alkyd, PU, gel coat, polyester), nylon 66, PU foams/elastomers/fibers, unsat. polyester resins, plasticizers, lubricants, textile treatments, cosmetic emollients; pH buffer; wet str. paper resins; food acidulant

*Regulatory:* FDA 21CFR §184.1009

*Properties:* Wh. free-flowing cryst. powd.; sol. 2.5% in water; m.w. 146.14; dens. 1.34 (18 C); bulk dens. 40-45 lb/ft<sup>3</sup> (loose); melt visc. 4.54 cP (160 C); vapor pressure 0.106 mm Hg; m.p. 152-153 C; b.p. 337 C with decomp.; flash pt. (TCC) 196 C; pH 3.2 (1 g/l in water); > 99.9% assay

*Toxicology:* LD50 (oral, mice) 1900 mg/kg; sl. acute toxicity; eye and upper respiratory tract irritant; mild skin irritant

*Environmental:* Aquatic toxicity LC50 (fathead minnows, 96 h) 88 mg/l

*Precaution:* Combustible; under severe dusting conditions may form explosive mixts. in air; incompat. with strong oxidants; slowly decomp. above b.p.

*Storage:* Store in well ventilated area in tightly closed container; keep away from heat, sparks, flames; avoid dust generation

**Admex® 515** [Velsicol]

*Chem. Descrip.:* Med.-low m.w. polymeric adipate polyester

*Uses:* Plasticizer for plastisols, oil filter plastisols, paper coatings; exc. rheological chars., low visc.; nonmigratory in paper coatings

*Properties:* Lt. colored clear bright fluid to visc. liq., mild ester odor; m.w. 2300; sp.gr. 1.060; visc. 600 cps; pour pt. 35 F; acid no. 2; hyd. no. 17; flash pt. 475 F; ref. index 1.463

**Admex® 6996** [Velsicol]

*Chem. Descrip.:* Low m.w. polymeric adipate polyester

*Uses:* Plasticizer for pressure-sensitive adhesives, elec. tape, coated fabrics, high temp. elec. applics., paper coatings; imparts low temp. flexibility; nonvolatile; flexible; nonmigratory; permanent; low visc.

*Properties:* Lt. colored clear bright fluid to visc. liq., mild ester odor; m.w. 1800; sp.gr. 1.070; visc. 550 cps; pour pt. -15 F; acid no. 1; hyd. no. 7; flash pt. 480 F; ref. index 1.463

**Admiral® Water Soluble Polymer** [Hercules]

*Chem. Descrip.:* Polymer

*Uses:* Rheology modifier, thickener, retention aid for paper coatings

**Adogen® 412** [Goldschmidt]

*Chem. Descrip.:* Lauryl trimethyl ammonium chloride

CAS 112-00-5; EINECS/ELINCS 203-927-0

*Uses:* Softener for textiles, laundry, paper, etc.

**Adox 3125** [Int'l. Dioxide]

*Chem. Descrip.:* Sodium chlorite

CAS 7758-19-2; EINECS/ELINCS 231-836-6

UN No. 1908

*Uses:* Antimicrobial for water and waste treatment, starch and cherry bleaching; slimicide in papermaking; in mech. generation of chlorine dioxide for biological control in paper mills, food processing, flumes, water treatment equip., cooling towers; ClO<sub>2</sub>; used as disinfectant and oxidant in bleaching flour, potable water purification, sanitizing of food processing equip., poultry chiller water and meat processing plants; taste and odor control in potable water

*Regulatory:* EPA reg. no. 9150-7; GRAS; ANSI/NSF 60 certified

*Properties:* Pale yel. clear liq.; faint bleach-like odor; misc. in water; m.w. 90.45; sp.gr. 1.23 (20 C); dens. 10.2 lb/gal; f.p. -4.5 C; b.p. 103.6 C; pH 12.5-13; 25% conc. in water

*Toxicology:* LD50 (oral, rat) 165 mg/kg; skin irritant; severe eye irritant; possible permanent eye damage; inh. irritates nose and throat; ing. irritates GI tract; may cause vomiting, nausea, diarrhea, pain, liver/kidney/blood cell damage

*Precaution:* Corrosive; does not burn but combustibles wetted with prod. and subsequently dried are easily ignited and burn vigorously; incompat. with reducing agents, sulfur-contg. materials, powd. metals, ammonium compds., acids

*Hazardous Decomp. Prods.:* Reacts on mixing with acids to give toxic chlorine dioxide and chlorine gas; residues will give off oxygen on being heated strongly

HMIS: Health 3; Flammability 1; Reactivity 1

*Storage:* Store in cool, dry, fireproof building; keep away from combustibles and acids

**Adox 8125** [Int'l. Dioxide]

*Chem. Descrip.:* Sodium chlorite

CAS 7758-19-2; EINECS/ELINCS 231-836-6

UN No. 1908

*Uses:* Antimicrobial for bleaching (pulp/paper, textile dyestuffs, fats, oils, leather, cherry), industrial (recycled flume water, slimicide, cooling tower algicide, oil well bacterial control, food processing microbicide, beverage plant sanitization); wastewater/oxidant (sulfide, phenol, cyanide, manganese, and iron destruction), potable water disinfection (trihalomethane control, taste, odor, and bacterial control)

*Regulatory:* EPA reg. no. 9150-7; GRAS; ANSI/NSF 60 certified

*Properties:* Pale grn. clear liq.; faint bleach-like odor; misc. in water; m.w. 90.45; sp.gr. 1.24 (20 C); f.p. -9 C; b.p. 106 C; pH 12.5-13; 25% conc. in water

*Toxicology:* LD50 (oral, rat) 165 mg/kg; skin irritant; severe eye irritant; possible permanent eye damage; inh. irritates nose and throat; ing. irritates GI tract; may cause vomiting, nausea, diarrhea, pain, liver/kidney/blood cell damage

*Precaution:* Corrosive; does not burn but combustibles wetted with prod. and subsequently dried are easily ignited and burn vigorously; incompat. with reducing agents, sulfur-contg. materials, powd. metals, ammonium compds., acids

*Hazardous Decomp. Prods.:* Reacts on mixing with acids to give toxic chlorine dioxide and chlorine gas; residues will give off oxygen on being heated strongly

HMIS: Health 3; Flammability 1; Reactivity 1

*Storage:* Store in cool, dry, fireproof building; keep away from combustibles and acids

**Advantage® 5 Defoamer** [Hercules]

*Uses:* Defoamer for acid and alkaline papermaking systems, deinking systems

*Regulatory:* FDA compliance

*Properties:* Brick, soapy odor; disp. in water; sp.gr. 0.96; m.p. 54 C; 100% conc.

**Advantage® 6 Defoamer** [Hercules]

*Uses:* Defoamer for acid and alkaline papermaking systems, deinking systems

*Regulatory:* FDA compliance

*Properties:* Brick, soapy odor; disp. in water; sp.gr. 0.96; m.p. 54 C; 100% conc.

**Advantage® 7EH Defoamer** [Hercules]

*Uses:* Defoamer for acid and alkaline papermaking systems, deinking systems, kraft pulp mill screening operations

*Regulatory:* FDA compliance

*Properties:* Brick, soapy odor; disp. in water; sp.gr. 0.96; m.p. 54 C; 100% conc.

**Advantage® 10 Defoamer** [Hercules]

*Chem. Descrip.:* Fatty acid/fatty alcohol-based

*Uses:* Defoamer for acid and alkaline papermaking systems, wastepaper deinking systems, coatings, food-contact coatings/paper; improves drainage and prod. rates of washing operations; stable to freezing

*Regulatory:* FDA 21CFR §176.200, 176.210

*Properties:* Solid brick, soapy odor; emulsifiable in water; sp.gr. 0.96; m.p. 54 C; 100% conc.

**Advantage® 52-B** [Hercules]

*Chem. Descrip.:* Oil-based

*Uses:* Defoamer, drainage aid for pulp mill brownstock washing operations or other high-temp. surfactant-stabilized foam systems

*Regulatory:* FDA compliance

*Properties:* Tannish-gray liq.; dens. 7.5 lb/gal; visc. 3500 ± 1000 cps

**Advantage® 52EH Defoamer** [Hercules]

*Chem. Descrip.:* Oil-based

*Uses:* Defoamer, drainage aid for pulp mill brownstock washing operations or other high-temp. surfactant-stabilized foam systems

*Regulatory:* FDA compliance

*Properties:* Liq.; dens. 7.59 lb/gal; visc. 1500-3000 cps

**Advantage® 52-JS** [Hercules]

*Chem. Descrip.:* Oil-based

*Uses:* Defoamer, drainage aid for pulp mill brownstock washing operations or other high-temp. surfactant-stabilized foam systems

*Regulatory:* FDA compliance

*Properties:* Tannish-gray liq.; dens. 7.5 lb/gal; visc. 3500 ± 1000 cps

**Advantage® 91WW** [Hercules]

*Chem. Descrip.:* Silica/silicone-based

*Uses:* Defoamer, drainage aid for kraft pulp mill brownstock washing operations, cold-stock systems, pulp mill bleaching and screening; grind and letdown defoamer for gloss and deep tint paints; removes entrained air and surface foam

*Regulatory:* FDA compliance

*Properties:* Off-wh. liq.; sp.gr. 1.00; dens. 8.32 lb/gal; visc. 1500-4000 cps

*Storage:* Infinite shelf life; efficiency is not affected by aging; prod. may settle during prolonged storage; redispense before using

**Advantage® 136Z Defoamer** [Hercules]

*Chem. Descrip.:* Silica/amide/silicone/hydrocarbon oil-based

*Uses:* Defoamer, drainage aid for kraft pulp mill brownstock washing operations, coatings; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §176.200, 176.210

*Properties:* Lt. tan liq.; dens. 7.3 lb/gal; visc. 1500-2500 cps (22 C)

*Storage:* Infinite shelf life; efficiency is not affected by aging; prod. may settle during prolonged storage; redispense before using

**Advantage® 187Z Defoamer** [Hercules]

*Chem. Descrip.:* Hydrocarbon oil-based

*Uses:* Defoamer, drainage aid for kraft pulp mill brownstock washing operations; defoamer in metalworking fluids, latex paints, and printing inks, in paper/paperboard in contact with aq./fatty/dry foods

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Lt. brn. liq.; dens. 7.7 lb/gal; visc. 1500-3000 cps (22 C)

*Storage:* Infinite shelf life; efficiency is not affected by aging; prod. may settle during prolonged storage; redispense before using

**Advantage® 340F** [Hercules]

*Chem. Descrip.:* Hydrocarbon oil-based defoamer

*Uses:* Defoamer for use in controlling foam that occurs during the stripping operation in the mfg. of polymer latexes; provides good foam control during mfg. and applic. of latex-based coatings and aq. adhesives; food pkg. adhesives, paper/paperboard, animal glue; good knockdown ability and persistence

*Regulatory:* FDA 21CFR §175.105, 176.180, 176.200, 178.3120

*Properties:* Lt. brn. liq.; dens. 0.91 kg/l; visc. 3000 cps

*Storage:* Infinite shelf life; during prolonged storage product may settle, redispense before using

**Advantage® 344 Defoamer** [Hercules]

*Uses:* All-purpose defoamer for wet-end use in acid or alkaline papermaking systems or pulp mill effluents, wastewater and effluent treatment; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210

*Properties:* Straw liq.; dens. 7.3 lb/gal

**Advantage® 357 Defoamer** [Hercules]

*Chem. Descrip.:* Silica/hydrocarbon oil-based defoamer

*Uses:* Antifoam for wet-end acid and alkaline papermaking operations, water-based paint systems incl. S/B, PVAc, and acrylic latexes, semigloss and gloss paints, aq. adhesives, cutting oils, water-based printing inks, liq. floor polishes, drilling muds; textile dyeing, finishing and scouring operations; improves drainage rate in dewatering and filtering operations; food pkg. adhesives, paper/paperboard, cellophane, animal glue; controls entrained air and surface foam;

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120

*Properties:* Greenish-brn. oily liq.; sp.gr. 0.91; dens. 7.62 lb/gal

*Storage:* Infinite shelf life; prod. may settle during prolonged storage; redispense before using

**Advantage® 388 Defoamer** [Hercules]

*Chem. Descrip.:* Amide/glycol/hydrocarbon oil-based

*Uses:* All-purpose defoamer for aq. foaming systems, flat and semigloss paints, mill effluent and waste treatment systems, kraft pulp mill screening and bleaching operations, acid and alkaline papermaking systems; defoamer in food-contact paper/paperboard; quick-dispersing; effective at high temps. and in many different surfactant-stabilized foam systems

*Regulatory:* FDA 21CFR §176.210

*Properties:* Tan oily liq.; sp.gr. 0.86; dens. 7.2 lb/gal; 100% conc.

*Storage:* 1 yr shelf life; efficiency is not affected by aging; prod. may settle during prolonged storage; redispense before using

**Advantage® 491A Defoamer** [Hercules]

*Chem. Descrip.:* Water-based defoamer formulated with high alcohol/fatty acid partial esters

*Uses:* Defoamer for acid and alkaline papermaking systems, calender and size press sol'ns., process water and plant effluent systems, coatings, other aq. foaming systems, food-contact coatings/paper

*Regulatory:* FDA 21CFR §176.200, 176.210

*Properties:* Wh. liq., hydrocarbon odor; dens. 7.85 lb/gal; visc. 300 cps; pH 7.4

*Storage:* Protect from freezing

**Advantage® 494** [Hercules]

*Chem. Descrip.:* Water-based defoamer

*Uses:* Defoamer for use in acid and alkaline papermaking operations, calender and size press sol'ns., various process water and plant effluent systems, other aq. foaming systems, food-contact coatings/paper; high-efficiency water-based; formulated with high alcohol/fatty-acid partial esters

*Regulatory:* FDA 21CFR §176.200, 176.210

*Properties:* Wh. liq.; dens. 0.94 kg/l; visc. 300 cps; pH 7.5±1.0

*Storage:* 180 day shelf life; protect from freezing

**Advantage® 831 Defoamer** [Hercules]

*Chem. Descrip.:* Hydrophobic silica/hydrocarbon oil-based defoamer

*Uses:* Defoamer for latex mfg., paper coatings, adhesives, detergents, starch cooking, textiles, metalworking fluids; rapid bubble-break time and persistence

*Regulatory:* FDA compliance

*Properties:* Lt. gray liq.; water-disp.; sp.gr. 0.91; dens. 7.62 lb/gal; visc. 500-1500 cps

**Advantage® 833 Defoamer** [Hercules]

*Chem. Descrip.:* Hydrocarbon oil-based

*Uses:* Defoamer for size press applics., latex paints, detergents, printing inks, adhesives, and paper coatings

*Regulatory:* FDA compliance

*Properties:* Tan oily liq.; dens. 7.2 lb/gal; visc. 2000 cps

**Advantage® 951 Defoamer** [Hercules]

*Chem. Descrip.:* Hydrocarbon oil-based

*Uses:* Defoamer, drainage aid for kraft pulp mill brownstock washing operations

*Regulatory:* FDA compliance

*Properties:* Lt. tan liq.; dens. 7.3 lb/gal; visc. 1500-2500 cps

**Advantage® 1280PD** [Hercules]

*Uses:* Production aid for elimination of entrained air and surface foam for pulp/paper industry, wet-end processes, size press sol'ns., calender stack, waste treatment and effluent systems, paints, food-contact paper/paperboard; water-based high-efficiency

*Regulatory:* FDA 21CFR §176.210

*Properties:* Wh. opaque emulsion; sp.gr. 0.98; dens. 8.21 lb/gal; visc. 500-2500 cps

*Storage:* 5 mos shelf life; protect from freezing

**Advantage® 1512 Defoamer** [Hercules]

*Chem. Descrip.:* Hydrocarbon oil-based

*Uses:* Defoamer, drainage aid for kraft pulp mill brownstock washing operations

*Regulatory:* FDA compliance

*Properties:* Gray liq.; dens. 7.7 lb/gal; visc. 600 cps

**Advantage® DF 110** [Hercules]

*Chem. Descrip.:* Glycol- and hydrocarbon oil-based

*Uses:* Defoamer for papermaking systems, food-contact paper/paperboard; stable to freezing

*Regulatory:* FDA 21CFR §176.210

*Properties:* Straw liq., hydrocarbon odor; disp. in water; dens. 7.42 lb/gal; visc. 30 cps

**Advantage® DF 285** [Hercules]

*Chem. Descrip.:* Polypropylene glycol-based

*Uses:* Defoamer for papermaking systems, semigloss and gloss paints, food-contact paper/paperboard; stable to freezing

*Regulatory:* FDA 21CFR §176.210

*Properties:* Clear liq., hydrocarbon odor; nondisp. in water; sp.gr. 1.01; dens. 8.40 lb/gal; visc. 400 cps

**Advantage® Eff-101 Defoamer** [Hercules]

*Chem. Descrip.:* Silica/hydrocarbon oil-based

*Uses:* Multipurpose defoamer for paper machines, pulp mills, other industrial operations, esp. in effluent and wastewater treatment

*Regulatory:* FDA compliance

*Properties:* Grayish-brn. oily liq.; disp. in water; dens. 7.62 lb/gal; visc. 500-1000 cps

**Advantage® M104Z Defoamer** [Hercules]

*Uses:* Defoamer, drainage aid for kraft pulp mill brownstock washing operations

*Regulatory:* FDA compliance

*Properties:* Lt. tan liq.; dens. 7.3 lb/gal; visc. 1500-4000 cps

**Advantage® M201 Defoamer** [Hercules]

*Chem. Descrip.:* Water-extended defoamer

*Uses:* Defoamer, drainage aid for kraft paper machine systems, effluent treatment

*Regulatory:* FDA compliance

*Properties:* Wh. liq.; dens. 7.7 lb/gal; visc. 2000-4000 cps

**Advantage® M1251 Production Aid** [Hercules]

*Uses:* Defoamer, production aid for papermaking applics. and waste/effluent treatment; defoamer in food-contact paper/paperboard; removes entrained air and surface foam

*Regulatory:* FDA 21CFR §176.210

*Properties:* Colorless liq.; water-disp.; dens. 8.2 lb/gal; visc. < 1000 cps; pH 6-9

*Storage:* 12 mos shelf life

**Advawax® 240** [Morton Int'l./Spec. Chem.]

*Chem. Descrip.:* N,N'-Ethylene bisoleamide

CAS 110-31-6; EINECS/ELINCS 203-756-1

*Uses:* Processing lubricant and release agent for plastics; antistat, m.p. modifier for waxes, industrial asphalts and tar; pigment dispersant for resin systems; polyamide-paraffin coupling agent; in adhesive tapes, coatings; food pkg. paper, cellophane; release agent for food contact

*Regulatory:* FDA 21CFR §176.170, 176.180, 177.1200, 178.3860

*Properties:* Gardner 13 max. sm. bead; 20 mesh; insol. in water and most org. solvs. @ R.T.; sol. hot in CCl<sub>4</sub>, DMF, ethanol, heptane, kerosene, MEK, MIBK, naphtha, toluene, xylene; dens. 5 lb/gal; bulk dens. 38 lb/ft<sup>3</sup>; m.p. 115-118 C; acid no. 12 max.; flash pt. (COC) 270 C; fire pt. (COC) 310 C

*Precaution:* May form combustible or explosive mixts. of dust and air during handling

**Advawax® 280** [Morton Int'l./Spec. Chem.]

*Chem. Descrip.:* N,N'-Ethylene bisstearamide

CAS 110-30-5; EINECS/ELINCS 203-755-6

*Uses:* Processing lubricant and release agent for plastics; antistat, m.p. modifier for waxes, industrial asphalts and tar; pigment dispersant for resin systems; polyamide-paraffin coupling agent; in adhesive tapes, coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane

*Use Level:* 2.0 phr max. (NSF for PVC potable water formulations)

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1200; NSF approved

*Properties:* Gardner 5 max. sm. bead; 40 mesh; insol. in water and most org. solvs. @ R.T.; sol. hot in DMF, heptane, kerosene, MIBK, naphtha, toluene, xylene; dens. 4.7 lb/gal; bulk dens. 36.8 lb/ft<sup>3</sup>; m.p. 144-146 C; acid no. 10 max.; flash pt. (COC) 280 C; fire pt. (COC) 315 C

*Precaution:* May form combustible or explosive mixts. of dust and air during handling

**Advawax® 290** [Morton Int'l./Spec. Chem.]

*Chem. Descrip.:* N,N'-Ethylene bisstearamide

CAS 110-30-5; EINECS/ELINCS 203-755-6

*Uses:* Processing lubricant and release agent for plastics; m.p. modifier for waxes and resin blends and industrial asphalt and tar; pigment dispersant for resin systems; defoamer in paper/paperboard in contact with aq./fatty/dry foods; in adhesive tapes, coatings, PP; food pkg. adhesives, cellophane

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1200

*Properties:* Gardner 9 max. sm. beads; insol. in water and most org. solvs. @ R.T.; sol. hot in Cellosolve, MIBK, benzene, xylene, kerosene, heptane, naphtha; dens. 4.75 lb/gal; bulk dens. 35.6 lb/ft<sup>3</sup>; m.p. 143-146 C; acid no. 10 max.; flash pt. (COC) 290 C; fire pt. (COC) 310 C

*Precaution:* May form combustible or explosive mixts. of dust and air during handling

**Aerosil® 200** [Degussa-Hüls; Degussa-Hüls AG]

*Chem. Descrip.:* Fumed silica USP/NF

*Chem. Analysis:* SiO<sub>2</sub> (> 99.8%), Al<sub>2</sub>O<sub>3</sub> (< 0.05%), TiO<sub>2</sub> (< 0.03%), HCl (<

0.025%)

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Thickener, reinforcing agent, anticaking agent, free-flow agent for adhesive, food, cosmetics, paint, paper, film, pesticides, pharmaceuticals, plastics, silicone rubber, inks, sealants industries; thixotrope for greases and min. oils; thixotrope/suspending agent for acrylic enamels, epoxy coatings, anticorrosion primers, air-drying coatings, baking enamels, water-reducible coatings; high absorp. capacity

*Regulatory:* FDA 21CFR §133.146(b), 160.105(a)(d), 172.230(a), 172.480, 173.340(a), 175, 176, 177, 573.940; ≤ 3% for cosmetics, internal pharmaceuticals

*Properties:* Wh. fluffy powd.; 12 nm avg. particle size; sp.gr. 2.2; dens. ≈ 120 g/l (densed); surf. area 200 ± 25 m<sup>2</sup>/g; pH 3.6-4.3 (4% aq. susp.)

*Toxicology:* TLV 10 mg/m<sup>3</sup> total dust; LD50 > 20,000 mg/kg; may cause eye, skin, or respiratory tract irritation on overexposure

*Precaution:* Incompat. with strong bases and hydrofluoric acid

**Aerosil® K315** [Degussa-Hüls; Degussa-Hüls AG]

*Chem. Descrip.:* Fumed silica aq. disp. based on Aerosil® MOX 170

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Reinforcing agent, adhesion promoter, antislip agent, stabilizer, and surf. tackiness reducer in nat. and syn. latex, paints/coatings, adhesives, paper and cardboard, aq. emulsions, etc.

*Properties:* Wh. milky liq.; sp.gr. ≈ 1.08; visc. < 100 mPa·s; pH 5-6

**Aerosil® K328** [Degussa-Hüls; Degussa-Hüls AG]

*Chem. Descrip.:* Fumed silica aq. disp. based on Aerosil® MOX 80

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Reinforcing agent, adhesion promoter, antislip agent, stabilizer, and surf. tackiness reducer in nat. and syn. latex, paints/coatings, adhesives, paper and cardboard, aq. emulsions, etc.

*Properties:* Wh. milky liq.; sp.gr. ≈ 1.15; visc. < 150 mPa·s; pH 5-6

**Aerosil® K330** [Degussa-Hüls; Degussa-Hüls AG]

*Chem. Descrip.:* Fumed silica aq. disp. based on Aerosil® OX 50

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Reinforcing agent, adhesion promoter, antislip agent, stabilizer, and surf. tackiness reducer in nat. and syn. latex, paints/coatings, adhesives, paper and cardboard, aq. emulsions, etc.

*Properties:* Wh. milky liq.; sp.gr. ≈ 1.15; visc. < 100 mPa·s; pH 9-10

**Aerosil® K342** [Degussa-Hüls; Degussa-Hüls AG]

*Chem. Descrip.:* Fumed silica aq. disp. based on Aerosil® OX 50

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Reinforcing agent, adhesion promoter, antislip agent, stabilizer, and surf. tackiness reducer in nat. and syn. latex, paints/coatings, adhesives, paper and cardboard, aq. emulsions, etc.

*Properties:* Wh. milky liq.; sp.gr. ≈ 1.18; visc. < 200 mPa·s; pH 9-10

**Aerosol® 18** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Disodium stearyl sulfosuccinamate

CAS 14481-60-8; EINECS/ELINCS 238-479-5

*Uses:* Emulsifier, dispersant, foaming agent, detergent, solubilizer for soaps and surfactants, alkaline cleaner formulations, brick and tile cleaners, emulsion polymerization of vinyl chloride and SBRs; emulsifier for oils and waxes, household detergents, cleaning paper mill felts; foaming agent for foamed latexes and plastics; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Gardner 10 max. creamy paste; m.w. 493; water-disp.; sp.gr. 1.07; dens. 8.9 lb/gal; acid no. 4.0 max.; flash pt. (Seta CC) > 200 F; surf. tens. 39 dynes/cm; 35 ± 1.5% solids; anionic

*Toxicology:* LD50 (oral, rat) 2.68 mg/kg; mild skin, mild to moderate eye irritation

*Environmental:* Biodeg.

*Storage:* Store in tightly closed containers

**Aerosol® 22** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Tetrasodium dicarboxyethyl stearyl sulfosuccinamate

CAS 38916-42-6; EINECS/ELINCS 222-273-7

*Uses:* Emulsifier; dispersant; solubilizer; surfactant; emulsion polymerization of vinyl monomers; polishing waxes; surf. tension depressant for writing and drawing inks; demulsifier for w/o emulsions; cleaning of paper mill felts; industrial, household, and metal cleaners; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400; EPA exempt 40CFR §180.1001(d)

*Properties:* Lt. tan clear to cloudy liq.; water-sol.; m.w. 653; sp.gr. 1.12; dens. 9.4 lb/gal; visc. 53 cps; m.p. > 200 C; flash pt. (Seta CC) 143 F; acid no.

2.0; pH 7-8; surf. tens. 41 dynes/cm; 35% act. in water/alcohol; anionic  
*Toxicology:* LD50 (acute oral, rat) 18.7 ml/kg (sol'n.); mild skin and eye irritant  
*Environmental:* Biodeg.

**Aerosol® C-61** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Ethoxylated alkyl guanidine-amine complex  
*Uses:* Antistat; pigment dispersant; flushing agent; wetting agent; settling agent; alkaline, cement, brick, and tile cleaner formulations for crystal growth control, emulsion breaking; alkaline metal and paint brush cleaners; paint removers; textile softener; demulsifying agent; foaming agent; for plastics, paper, textiles, adhesive industries

*Properties:* Lt. tan creamy paste; strong ammoniacal odor; sol. in org. solvs. in presence of alcohol; disp. in water; sp.gr. 1.00; dens. 8 lb/gal; flash pt. (Seta CC) 94 F; surf. tens. 34 dynes/cm; 70.4% act.; cationic

*Environmental:* Partially biodeg.

**Aerosol® MA-80** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Dihexyl sodium sulfosuccinate  
 CAS 3006-15-3; EINECS/ELINCS 221-109-1

*Uses:* Dispersant; textile wetting agent; emulsifier; solubilizer; penetrant; used for emulsion polymerization, battery separators, electroplating, ore leaching; germicidal act.; solubilizer for shampoos; food pkg. adhesives, paper/paperboard, polymers; emulsifier in mfg. of food-contact articles; not as rapidly biodeg. as Aerosol 18 and 22

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 177.1210, 178.3400

*Properties:* APHA 50 max. clear slightly visc. liq.; sol. in water, alcohol, and org. solvs.; sp.gr. 1.13; dens. 9.4 lb/gal; f.p. -28 C; m.p. 199-292 C; flash pt. (Seta CC) 115 F; surf. tens. 28 dynes/cm; 80% act. in IPA; anionic

**Aerosol® NPES 930** [Cytec Ind.]

*Chem. Descrip.:* Ammonium salt of sulfated nonylphenoxy POE ethanol  
 CAS 9051-57-4

*Uses:* Emulsifier for emulsion polymerization of vinyl acetate, acrylic copolymers, styrene acrylic copolymers; imparts superior water resistance in films; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.180; EPA exempt 40CFR §180.1001(d)

*Properties:* Yel. clear liq.; water-sol.; insol. in org. solvs.; m.w. 713; sp.gr. 1.04; dens. 8.7 lb/gal; visc. 90 cps; gel pt. < 55 F; flash pt. (Seta CC) > 200 F; pH 7.0-7.5 (10%); surf. tens. 33 dynes/cm; 30% act. in water; anionic  
*Toxicology:* LD50 (oral, rat) > 10 g/kg; severe skin and eye irritation

**Aerosol® NPES 3030** [Cytec Ind.]

*Chem. Descrip.:* Ammonium salt of sulfated nonylphenoxy POE ethanol  
 CAS 9051-57-4

*Uses:* Emulsifier for emulsion polymerization of acrylic, vinyl acetate and styrene-acrylic systems; forms films with superior water resist.; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.180; EPA exempt 40CFR §180.1001(d)

*Properties:* Yel. clear liq.; water-sol.; insol. in org. solvs.; m.w. 1637; sp.gr. 1.05-1.07; dens. 8.8 lb/gal; visc. 110 cps; gel pt. < 55 F; flash pt. (Seta CC) > 200 F; pH 7.0-7.5 (10%); surf. tens. 43 dynes/cm; 30% act. in water; anionic

*Toxicology:* LD50 (oral, rat) > 10 g/kg; minimal skin and eye irritation

**Aerosol® OT-70 PG** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Sodium dioctyl sulfosuccinate, propylene glycol/water

*Uses:* Wetting agent; surf. tens. depressant; emulsifier; surfactant; face and hand creams; food pkg. adhesives, coatings, paper/paperboard, cellophane, textiles; emulsifier in mfg. of food-contact articles; for use where high flash required

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.2800, 178.3400

*Properties:* Clear to slightly yel. liq.; limited water sol.; sol. in org. solvs.; sp.gr. 1.09; visc. 200-400 cps; flash pt. (Seta CC) > 200 F; surf. tens. 26 dynes/cm; 70% act.; anionic

*Environmental:* Biodeg.

**Aerosol® OT-75%** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4

*Uses:* Wetting agent/surf. tens. depressant in textiles, rubber, petrol., paper, metal, paints, plastics, agric.; antistat for cosmetics, dry cleaning detergents, emulsions, plastics, pipelines, suspension polymerization; soldering flux; wallpaper removal; emulsifier wax for polishes, firefighting, germicides, metal cleaners, mold release agents; dispersant in paints, inks, paper, photography; process aid; rust preventative; food pkg. adhesives, coatings,

paper/paperboard, cellophane, textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.2800, 178.3400

*Properties:* APHA 100 max. clear visc. liq.; m.w. 444; sol. org. solv.; limited water sol.; sp.gr. 1.09; visc. 200 cps; flash pt. 85 C (OC); acid no. 2.5 max.; surf. tens. 28.7 dynes/cm (0.1% aq.); 75 ± 2% solids in water/alcohol; anionic

*Environmental:* Biodeg.

**Aerosol® OT-75-PG** [Cytec Ind.]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate in propylene glycol and water  
*Uses:* Wetting agent and surf. tens. depressant used in textiles, rubber, petrol., paper, metals, paints, plastics, and agric. industries; antistat for cosmetics, dry cleaning detergents, emulsions, plastics, pipelines, and suspension polymerization; emulsifier wax for polishes, firefighting, germicides, metal cleaners, mold release agents; dispersant in paints and inks, paper, photography; process aid; rust preventative; soldering flux; wallpaper removal; food-contact emulsifier; very high flash pt.

*Regulatory:* FDA 21CFR §178.3400

*Properties:* Liq.; sol. in org. solvs.; sol. 2 g/100 ml in water; flash pt. (Seta CC) > 200 F; surf. tens. 26 dynes/cm min.; 75% act.; anionic

*Environmental:* Completely biodeg.

**Aerosol® OT-100%** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate

CAS 577-11-7; EINECS/ELINCS 209-406-4

*Uses:* Emulsifier, dispersant, lubricant, wetting agent, mold release agent for emulsion and suspension polymerization, dry cleaning, industrial cleaners, paints; surfactant for water-free systems; emulsifier for waxes; food pkg. adhesives, coatings, paper/paperboard, cellophane, textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.2800, 178.3400

*Properties:* APHA 100 max. waxy solid; m.w. 444; sol. in polar and nonpolar solv.; sol. in oil, fat, and wax @ 75 C; disp. in water; sp.gr. 1.1; m.p. 153-157 C; acid no. 2.5 max.; surf. tens. 28.7 dynes/cm (0.1% aq.); 100% conc.; anionic

*Environmental:* Biodeg.

**Aerosol® OT-B** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, sodium benzoate

*Uses:* Wetting agent, dispersant, solubilizer, adjuvant for agric. chem. wettable powds.; pigment dispersant in plastics; in face powds. and powd. shampoos; food pkg. adhesives, coatings, paper/paperboard, cellophane, textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.2800, 178.3400

*Properties:* Wh. powd.; bulk particle size 15-150 µ; m.w. 444; water-disp.; sp.gr. 1.1; m.p. < 300 C; acid no. 2.5 max.; surf. tens. 28.7 dynes/cm (0.1% aq.); 85% act., 15% sodium benzoate; anionic

**Aerosol® OT-S** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate

CAS 577-11-7; EINECS/ELINCS 209-406-4

*Uses:* Wetting agent, surf. tens. depressant, emulsifier for plastics, organosols, lacquers, varnishes, all org. media, dry cleaning, corrosion-resistant lubricants, agric. emulsions; food pkg. adhesives, coatings, paper/paperboard, cellophane, textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.2800, 178.3400

*Properties:* Lt. amber, transparent liq.; limited water sol., good org. solv.; sp.gr. 1.0; visc. 200-300 cps; flash pt. (Seta CC) 134 F; surf. tens. 26 dynes/cm; 70% act. in lt. petrol. distillate; anionic

*Environmental:* Biodeg.

**Aerosol® TR-70** [Cytec Ind.; Cytec Ind. BV]

*Chem. Descrip.:* Ditridecyl sodium sulfosuccinate

CAS 2673-22-5; EINECS/ELINCS 220-219-7

*Uses:* Emulsifier, surfactant in emulsion polymerization of vinyl chloride and vinyl acetate, suspension polymerization of vinyl chloride; dispersant for resins, pigments, polymers, and dyes in org. systems; pigment dispersant in printing inks; rust preventative; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400

*Properties:* Clear liq.; sol. in org. media; limited water sol.; sp.gr. 0.995; dens. 8.3 lb/gal; visc. 110 cps; f.p. -40 C; surf. tens. 26 dynes/cm; 70% act. in water/alcohol; anionic

*Environmental:* Biodeg.

**Aerotech®** [Vinings Ind.]

*Uses:* Defoamer for pulp/paper

**AF 10 IND** [Harcros]

*Chem. Descrip.:* Polydimethylsiloxane

CAS 9016-00-6

*Uses:* Emulsifier, antifoam for aq. systems, agric., cutting oils, drilling muds, effluents, chemicals, detergents, textiles, abrasive slurries, adhesive and ink mfg., latex and starch processing, pulp slurries

*Regulatory:* FDA 21CFR §180.1001c,d

*Properties:* Wh. liq.; water-disp.; sp.gr. 1.00; dens. 8.3 lb/gal; flash pt. > 212 F (PMCC); pH 4-5 (1% aq.); 10% act.; nonionic

**AF 60** [GE Silicones]

*Chem. Descrip.:* Dimethyl polysiloxane aq. emulsion

CAS 9016-00-6

*Uses:* Defoamer in adhesives, inks, latexes, soaps, starches, paints, and other aq. industrial systems; antifoam for NR and SR latexes, adhesives, paper, textiles, leather

*Regulatory:* DOT nonregulated; SARA §302/311/312/313 nonreportable

*Properties:* Milky wh. liq.; sorbic acid odor; sol. in water, alcohol; sp.gr. 1.01; dens. 8.4 lb/gal; visc. 500 cps; f.p. 0 C; b.p. 100 C; pH 5-7; 30% silicone, 44.5% solids, 60% volatile; nonionic

*Toxicology:* May irritate eyes

*Hazardous Decomp. Prods.:* (thermal): CO, CO<sub>2</sub>, SiO<sub>2</sub>, formaldehyde

HMS: Health 0; Flammability 0; Reactivity 0

*Storage:* 12 mos storage life when stored in original unopened containers @ 4-27 C

**AF 112** [Harcros]

*Chem. Descrip.:* Nonsilicone

*Uses:* Antifoam used in solvs., adhesives, latex paints, inks; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, cellophane

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200

*Properties:* Creamy yel. liq.; water-insol.; sp.gr. 0.92; dens. 7.7 lb/gal; pour pt. 40 F; flash pt. > 200 F (PMCC); 100% act.

**AF 585M** [Harcros]

*Chem. Descrip.:* Nonsilicone

*Uses:* Antifoam for adhesives, latex paints, inks, polyvinyl alcohol emulsions, food pkg. adhesives; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

*Properties:* Wh. milky liq.; water-insol.; sp.gr. 0.80; dens. 6.7 lb/gal; pour pt. 5 F; flash pt. (PMCC) 150 F; 100% act.

**AF 645:35** [Harcros]

*Chem. Descrip.:* Nonsilicone

*Uses:* Defoamer for food-contact coatings, paper coatings, and resinous/polymeric food-contact coatings

*Regulatory:* FDA 21CFR §175.300, 176.200

*Properties:* Translucent liq.; water-insol.; sp.gr. 0.83; dens. 7.1 lb/gal; pour pt. < 35 F; flash pt. (PMCC) > 300 F; 100% act.

**AF GN-11-P** [Harcros]

*Chem. Descrip.:* Nonsilicone antifoam

*Uses:* Antifoam for fermentation, drilling muds, effluent, adhesives, gas treating, food pkg. adhesives/cellophane; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200

*Properties:* Clear liq.; water-disp; sp.gr. 1.01; dens. 8.4 lb/gal; pour pt. -50 F; flash pt. > 200 F (PMCC); pH 5-7 (1% aq.); 100% act.; nonionic

**AF GN-23** [Harcros]

*Chem. Descrip.:* Nonsilicone antifoam

*Uses:* Antifoam for pulp/paper, effluent, wastewater treatment

*Properties:* Sp.gr. 0.94.

**AF HL-27** [Harcros]

*Chem. Descrip.:* Nonsilicone antifoam

*Uses:* Antifoam for urea and phenolic resins, latex paints, inks, food pkg. adhesives/cellophane; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200

*Properties:* Creamy yel. liq.; water-insol.; sp.gr. 0.95; dens. 7.9 lb/gal; pour pt. 32 F; flash pt. (PMCC) > 300 F; 100% act.

**AF HL-40** [Harcros]

*Chem. Descrip.:* Nonsilicone antifoam

*Uses:* Antifoam for latex paints, food pkg. adhesives/cellophane, inks, solvs., chemical processing, textiles, paper, paper coatings, electroplating; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.2800

*Properties:* Creamy yel. liq.; oil-sol.; sp.gr. 0.91; dens. 7.5 lb/gal; flash pt. (PMCC) > 200 F; 100% act.; nonionic

**AF HL-52** [Harcros]

*Chem. Descrip.:* Nonsilicone antifoam

*Uses:* Antifoam for solvs., latex paints, inks, chemical processing, food pkg. adhesives, paper coatings; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

*Properties:* Creamy yel. liq.; oil-sol.; sp.gr. 0.87; dens. 7.25 lb/gal; flash pt. (PMCC) > 200 F; 100% act.; nonionic

**Afranil® F** [BASF]

*Uses:* Defoamer, liq. stock deaerator for wet-end applic. for all fibrous materials, paper and board, and esp. for slow stocks; defoamer for prod. of groundwood and sulfite pulp

**Afranil® MG** [BASF]

*Uses:* Defoamer, deaerator for paper stock; prevents hydrophobic substances from collecting on surf. of stock due to flotation

*Use Level:* 0.02-0.1%

**Afranil® SLO** [BASF]

*Uses:* Defoamer, deaerator for paper stock and chemical pulp; high-temp. defoamer; most effective at 50-70 C

*Use Level:* 0.02-0.1% (deaerator)

*Properties:* Milky emulsion; readily dilutable with water

**Ageflex EGDMA** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Ethylene glycol dimethacrylate with 200 ppm MEHQ inhibitor

*Uses:* Crosslinker and modifier of ABS, acrylic and PVC, ion exchange resins, encapsulation of smokeless powd., glaze coatings, dental polymers, paper processing aids, rubber modifier, adhesives, optical polymers, leather finishing, moisture barrier films; fiberglass-reinforced polyesters, emulsion polymerization

*Properties:* APHA 50 color; m.w. 198.22; sp.gr. 1.055 (20/20 C); f.p. -40 C; flash pt. 68 C; 98% act.

**Ageflex FA-1** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Dimethylaminoethyl acrylate

CAS 2439-35-2; EINECS/ELINCS 219-460-0

*Uses:* Adhesion promoter in UV and EB cured coatings for metal, plastic, paper, and wood surfs.; catalyst for epoxy molding and extrusion resins; intermediate for water treatment chems., quat. monomers, silane coupling agents, conductive paper coatings; crosslinking agent for polyester-diisocyanate prepolymers in leather finishing; flotation agent for ester purification

*Properties:* APHA 100 clear liq.; m.w. 143.19; sp.gr. 0.940 (20/20 C); f.p. < -60 C; b.p. 94 C (50 mm); flash pt. 66 C; 99% act.

*Toxicology:* Cause severe irritation and possible damage on contact with eyes and skin; vapor irritating to eyes, skin, nasal membranes; harmful if

swallowed or inhaled

*Precaution:* Corrosive

**Ageflex FA-1Q80DMS** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Dimethylaminoethyl acrylate dimethyl sulfate quat. with 500 ppm MEHQ inhibitor

CAS 13106-44-0

*Uses:* Antistatic finish for polyester fibers; flocculant and coagulant for industrial process water treatment; flocculant for min. recovery, ion exchange resins, adhesives, acid dye receptivity, electrostatic coatings on wood; retention aid for paper; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170

*Properties:* APHA 100 color; water-sol.; m.w. 269.32; sp.gr. 1.180 (20/20 C); 80% act.; cationic

**Ageflex FA-1Q80MC** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Dimethylaminoethyl acrylate methyl chloride quat. with 600 ppm MEHQ inhibitor

CAS 44992-01-0

*Uses:* Antistatic finish for polyester fibers; flocculant and coagulant for industrial process water treatment; flocculant for min. recovery, ion exchange resins, adhesives, acid dye receptivity, electrostatic coatings on wood; retention aid for paper; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170

*Properties:* APHA 200 color; water-sol.; m.w. 193.68; sp.gr. 1.160 (20/20 C); 80% act.; cationic

**Ageflex FA-2** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Diethylaminoethyl acrylate

- CAS 2426-54-2  
*Uses:* Industrial and automotive coatings; electronic photo resists; dye additives; lube oil additives; intermediate for water treatment chems., silane coupling agents, conductive paper coatings; retention aid for paper mfg.; flocculant; coagulant; crosslinking agent for polyester-diisocyanate prepolymer in leather finishing; catalyst for epoxy molding, extrusion resins; in mfg. of copolymers for lipsticks; detergent for jet fuels  
*Properties:* Clear liq.; m.w. 171.24; sp.gr. 0.939 (20/20 C); f.p. < -60 C; b.p. 81 C (10 mm); flash pt. 90 C  
*Toxicology:* Cause severe irritation and possible damage on contact with eyes and skin; vapor irritating to eyes, skin, nasal membranes; harmful if swallowed or inhaled  
*Precaution:* Corrosive
- Ageflex FA-2Q50DMS** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Diethylaminoethyl acrylate dimethyl sulfate quat. with 35 ppm MEHQ inhibitor  
 CAS 21810-39-9  
*Uses:* Antistatic finish for polyester fibers; flocculant and coagulant for industrial process water treatment; flocculant for min. recovery, ion exchange resins, adhesives, acid dye receptivity, electrostatic coatings on wood; retention aid for paper; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* APHA 100 color; water-sol.; m.w. 297.37; sp.gr. 1.101 (20/20 C); 50% act.; cationic
- Ageflex FM-1** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Dimethylaminoethyl methacrylate  
 CAS 2867-47-2; EINECS/ELINCS 220-688-8  
*Uses:* Detergent and sludge dispersant in lubricants; visc. index improver; flocculant for wastewater treatment; retention aid for paper mfg.; acid scavenger in PU foams; corrosion inhibitor; resin and rubber modifier; used in acrylic polishes and paints, hair prep. copolymers, sugar clarification, adhesives, water clarification, acrylic plastics for food pkg.  
*Regulatory:* FDA 21CFR §177.1010  
*Properties:* APHA 50 clear liq.; very sol. in water; sol. in org. solvs.; m.w. 157.21; visc. 1.38 cst; vapor pressure 12 mm Hg (70 C); b.p. 68.5 C (10 mm); f.p. < -60 C; 99% assay  
*Toxicology:* Poison; harmful if swallowed; severe eye burns and skin irritation; irritating vapor  
*Storage:* Store in cool area, preferably 75 F or lower away from direct sunlight; exclude moisture
- Ageflex FM-1Q75MC** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Dimethylaminoethyl methacrylate methyl chloride quat. with 600 ppm MEHQ inhibitor  
 CAS 5039-78-1  
*Uses:* Antistatic finish for polyester fibers; flocculant and coagulant for industrial process water treatment; flocculant for min. recovery, ion exchange resins, adhesives, acid dye receptivity, electrostatic coatings on wood; retention aid for paper; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* APHA 100 color; water-sol.; m.w. 207.70; sp.gr. 1.105 (20/20 C); f.p. -6.7 C; 75% act.; cationic
- Ageflex FM-1Q80DMS** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Dimethylaminoethyl methacrylate dimethyl sulfate quat. with 900 ppm MEHQ inhibitor  
 CAS 6891-44-7  
*Uses:* Antistatic finish for polyester fibers; flocculant and coagulant for industrial process water treatment; flocculant for min. recovery, ion exchange resins, adhesives, acid dye receptivity, electrostatic coatings on wood; retention aid for paper; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* APHA 100 color; water-sol.; m.w. 283.35; sp.gr. 1.183 (20/20 C); 80% act.; cationic
- Ageflex FM-2** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Diethylaminoethyl methacrylate  
 CAS 105-16-8  
*Uses:* Monomer for industrial and automotive clear coatings, dye additives; intermediate for water treatment and oil field chems.; stabilizer for fuel oils; sweetening agent for various hydrocarbon oils; acrylic resin modifier for automotive industry; rubber modifier and stabilizer; retention aid for paper mfg.; water clarifier for o/w emulsions  
*Properties:* Clear liq.; m.w. 185.27; sp.gr. 0.922 (20/20 C); f.p. < -60 C; b.p. 114 C (30 mm); flash pt. 77 C

- Toxicology:* Severe irritant and possibly damaging to eyes and skin; vapor irritating to eyes, skin, and nasal membranes; harmful if swallowed  
*Precaution:* Combustible  
*Storage:* Store in cool, preferably below 75 F away from direct sunlight; exclude moisture
- Ageflex FM-10** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Isodecyl methacrylate with 150 ppm MEHQ inhibitor  
 CAS 29964-84-9; EINECS/ELINCS 249-978-2  
*Uses:* Pressure-sensitive adhesives; coatings for leather, textiles, paper, nonwovens; polymer modifier/stabilizer; visc. index improver; dispersion for plastics and rubber, floor waxes, potting compds., sealants, adhesives  
*Properties:* APHA 100 clear liq.; m.w. 226.36; sp.gr. 0.878 (20/20 C); b.p. 126 C (10 mm); flash pt. 121 C; 97.5% act.
- Ageflex FM-68** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Stearyl methacrylate (natural, C16-18 methacrylates) with 100 ppm HQ inhibitor  
 CAS 32360-05-7  
*Uses:* Monomer for lube oil additives, pour pt. depressants, paper coatings, textile finishes, paints, varnishes, pressure-sensitive adhesives  
*Properties:* APHA 200 color; m.w. 338.58; sp.gr. 0.864 (20/20 C); f.p. 18 C; flash pt. 93 C; 57% C18, 25% C16
- Agefloc A50HV-P** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Poly (2, hydroxypropyl-N,N-dimethyl ammonium chloride)  
 CAS 42751-79-1  
*Uses:* Flocculant, coagulant, dewatering aid in centrifugation, filtration, and flotation of industrial and municipal waste sludges, potable water treatment; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 176.180; ANSI/NSF Std. 60 approved  
*Properties:* M.w. high; sp.gr. 1.14; visc. 5000 cps; pH 4.5; 50% solids; cationic
- Agefloc A50LV-P** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Poly (2, hydroxypropyl-N,N-dimethyl ammonium chloride)  
 CAS 42751-79-1  
*Uses:* Flocculant, coagulant, dewatering aid in centrifugation, filtration, and flotation of industrial and municipal waste sludges, potable water treatment; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 176.180; ANSI/NSF Std. 60 approved  
*Properties:* M.w. low; sp.gr. 1.14; visc. 300 cps; pH 5.0; 50% solids; cationic
- Agefloc A50-P** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Poly (2, hydroxypropyl-N,N-dimethyl ammonium chloride)  
 CAS 42751-79-1  
*Uses:* Flocculant, coagulant, dewatering aid in centrifugation, filtration, and flotation of industrial and municipal waste sludges, potable water treatment; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 176.180; ANSI/NSF Std. 60 approved  
*Properties:* M.w. med.; sp.gr. 1.14; visc. 700 cps; pH 5.0; 50% solids; cationic
- Agefloc A4506** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Dimethylamine/epichlorohydrin copolymer  
 CAS 25988-97-0  
*Uses:* Drainage aid, retention aid, raw and in-process water decolorizer, low turbidity water clarifier, emulsion breaker, liq./solids separator and sludge dewatering agent for water treatment in paper industry; wire and felt cleaning compds.; for dye retention on cellulosic fibers; decolorizer for dye house effluent in textile industry; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR§ 173.60, 176.170, 176.180  
*Properties:* Sp.gr. 1.14; med. m.w.; visc. 700 cps; pH 5.0; 50% solids
- Agefloc A4510** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Dimethylamine/epichlorohydrin copolymer  
 CAS 25988-97-0  
*Uses:* Drainage aid, retention aid, raw and in-process water decolorizer, low turbidity water clarifier, emulsion breaker, liq./solids separator and sludge dewatering agent for water treatment in paper industry; wire and felt cleaning compds.; for dye retention on cellulosic fibers; decolorizer for dye house effluent in textile industry; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR§ 173.60, 176.170, 176.180  
*Properties:* Sp.gr. 1.14; high m.w.; visc. 5000 cps; pH 4.5; 50% solids
- Agefloc B50LV** [Ciba Spec. Chems./Water Treatment]  
*Chem. Descrip.:* Dimethylamine/epichlorohydrin copolymer  
 CAS 25988-97-0  
*Uses:* Decolorizer, low turbidity water clarifier for sugar cane/sugar beet

processing, latex coagulation, latex waste clarification, liq./solid separation, sludge dewatering, wire and felt cleaning compds. for paper mfg.; stabilizer; retention aid

*Properties:* M.w. very low; sp.gr. 1.14; visc. 25 cps; pH 8.0; 50% solids

**Agefloc B50-P** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly (2, hydroxypropyl-N,N-dimethyl ammonium chloride)  
CAS 42751-79-1

*Uses:* Flocculant, coagulant, dewatering aid in centrifugation, filtration, and flotation of industrial and municipal waste sludges, potable water treatment; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180; ANSI/NSF Std. 60 approved

*Properties:* M.w. very low; sp.gr. 1.14; visc. 120 cps; pH 7.5; 50% solids; cationic

**Agefloc B4508P** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Dimethylamine/epichlorohydrin copolymer  
CAS 25988-97-0

*Uses:* Coagulant, flocculant, drainage aid, retention aid, raw and in-process water decolorizer, low turbidity water clarifier, emulsion breaker, liq./solids separator and sludge dewatering agent for water treatment in paper industry; wire and felt cleaning compds.; for dye retention on cellulosic fibers; decolorizer for dye house effluent in textile industry

*Regulatory:* NSF approved for potable water

*Properties:* Sp.gr. 1.14; very low m.w.; visc. 60 cps; pH 7.5; 50% solids

**Agefloc PC20HV** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly(dimethyl diallyl ammonium chloride)  
CAS 26062-79-3

*Uses:* Retention aid, pigment dispersant, drainage aid, fiber dewatering agent, size stabilizer for paper industry; electroconductive polymers; recycling operations; raw and wastewater clarification; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* APHA 200 color; m.w. low; sp.gr. 1.04; visc. 350 cps; 20% solids

**Agefloc PC20VHV** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly(dimethyl diallyl ammonium chloride)  
CAS 26062-79-3

*Uses:* Pigment dispersant, pitch and wh. trash dispersant, fines retention aid, drainage aid, fiber dewatering agent, deinking agent in paper industry; wire and felt cleaners; stabilizer and retention aid for neutral and alkaline sizes, electroconductive polymer, recycling operations, raw and wastewater clarification; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* APHA 250; high m.w.; sp.gr. 1.04; visc. 700 cps; 20% solids

**Agefloc PC40** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly(dimethyl diallyl ammonium chloride)  
CAS 26062-79-3

*Uses:* Pigment dispersant, pitch and wh. trash dispersant, fines retention aid, drainage aid, fiber dewatering agent, deinking agent in paper industry; wire and felt cleaners; stabilizer and retention aid for neutral and alkaline sizes, electroconductive polymer, recycling operations, raw and wastewater clarification; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* APHA 200; low m.w.; sp.gr. 1.08; visc. 2000 cps; 40% solids

**Agefloc PC40HV** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly(dimethyl diallyl ammonium chloride)  
CAS 26062-79-3

*Uses:* Pigment dispersant, pitch and wh. trash dispersant, fines retention aid, drainage aid, fiber dewatering agent, deinking agent in paper industry; wire and felt cleaners; stabilizer and retention aid for neutral and alkaline sizes, electroconductive polymer, recycling operations, raw and wastewater clarification; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* APHA 200; med. m.w.; sp.gr. 1.08; visc. 10,000 cps; 40% solids

**Agefloc PC2206** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly(dimethyl diallyl ammonium chloride)  
CAS 26062-79-3

*Uses:* Pigment dispersant, pitch and wh. trash dispersant, fines retention aid, drainage aid, fiber dewatering agent, deinking agent in paper industry; wire and felt cleaners; stabilizer and retention aid for neutral and alkaline sizes, electroconductive polymer, recycling operations, raw and wastewater clarification; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* APHA 250; high m.w.; sp.gr. 1.04; visc. 1800 cps; 20% solids

**Agequat C505** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Polyquaternium-7

CAS 26590-05-6

*Uses:* Drainage aid, retention aid, sludge dewatering agent in papermaking; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

**Agequat C1405** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly dimethyldiallylammonium chloride

CAS 26062-79-3

*Uses:* Drainage aid, pitch and wh. trash dispersant, and fines retention aid for water treatment in paper industry, for specialized waste treatment, e.g. laundry, paint booth, emulsion breaking, sludge dewatering; decolorizer for process effluent

*Properties:* APHA 100 color; sp.gr. 1.08; low m.w.; visc. 2000 cps; 40% solids

**Agequat C3204** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly dimethyldiallylammonium chloride

CAS 26062-79-3

*Uses:* Drainage aid, pitch and wh. trash dispersant, and fines retention aid for water treatment in paper industry, for specialized waste treatment, e.g. laundry, paint booth, emulsion breaking, sludge dewatering; decolorizer for process effluent

*Properties:* APHA 50 color; sp.gr. 1.04; med. m.w.; visc. 3000 cps; 19% solids

**Agestat 41T** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Poly dimethyldiallyl ammonium chloride

CAS 26062-79-3

*Uses:* Drainage aid, pitch and wh. trash dispersant, and fines retention aid for water treatment in paper industry; food-contact paper/paperboard; high conductivity electroconductive polymers

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* APHA 100 color; low m.w.; sp.gr. 1.08; visc. 700 cps; 40% solids

**Agitan® 92-N** [Münzing Chemie GmbH]

*Chem. Descrip.:* Fatty derivs. disp.

*Uses:* Defoamer/deaerator for pulp, paper, and board prod., wastewater treatment, effluent treating plants; effective in wide pH range

*Use Level:* 0.05-0.2%

*Regulatory:* BGA, FDA compliance

*Properties:* Wh. free-flowing disp.; dens. 0.96 g/cc (20 C); visc. med.; pH 8; 31% act.; nonionic

*Storage:* 6 mos min. shelf life stored @ 15-25 C in closed pkgs.; sensitive to freezing; stir well before use

**Agitan® 94-N** [Münzing Chemie GmbH]

*Chem. Descrip.:* Fatty derivs. disp.

*Uses:* Defoamer/deaerator for pulp, paper, and board prod., and wastewater/effluent treatment

*Use Level:* 0.05-0.2%

*Regulatory:* BGA, FDA compliance

*Properties:* Wh. yls. disp.; dens. 0.96 g/cc (20 C); visc. med.; pH 7 (20 C); 30% act.; nonionic

*Storage:* 6 mos min. shelf life stored @ 15-25 C in closed pkgs.; sensitive to freezing; stir well before use

**Agitan® 217** [Münzing Chemie GmbH]

*Chem. Descrip.:* Blend of liq. hydrocarbons, nonionic emulsifiers, and silicone (< 5%)

*Uses:* Defoamer for emulsion paints, emulsion polymers, adhesives, coating colors in paper prod.

*Use Level:* 0.1-0.3%

*Regulatory:* FDA compliance

*Properties:* Lt. yel. dull oil; emulsifiable in water; dens. 0.91 g/ml (20 C); visc. med.; flash pt. > 140 C; pH 6 (2% in DW); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir before use

**Agitan® 218** [Münzing Chemie GmbH]

*Chem. Descrip.:* Oil defoamer contg. silicone (< 5%)

*Uses:* Defoamer for emulsion paints, aq. coatings, syn. renderings, adhesives, coating colors for paper prod., leather finishing

*Use Level:* 0.1-0.3%

*Regulatory:* FDA compliance

*Properties:* Pale yel. cloudy oil; emulsifiable in water @ 20-30 C; visc. med.;

pH 6.5 (2% DW); 100% act.; nonionic

*Storage:* Store @ R.T.; stir before use; becomes more visc. under cold conditions, but does not affect performance—warm to 40 C and stir to reverse

**Agitan® 232** [Münzing Chemie GmbH]

*Chem. Descrip.:* Blend of liq. hydrocarbons and nonionic emulsifiers

*Uses:* Defoamer for emulsion paints, syn. renderings, coating colors for paper prod., wastewater treatment; silicone-free

*Use Level:* 0.1-0.3%

*Properties:* Ylsh. dull oil; emulsifiable in water, ethylene glycol, IPA, xylol; dens. 0.90 g/cc (20 C); visc. med.; flash pt. > 120 C; pH 8 (2% in DW, 20 C); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing

**Agitan® 260** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Medical wh. oils, modified nonionic solids, and hydrophobic silica

*Uses:* Defoamer for emulsion paints, gloss emulsion paints, syn. renderings, adhesives, silicate paints, aq. epoxy resin systems, highly visc. coating colors for paper prod., wastewater treatment; silicone-free

*Use Level:* 0.05-0.3%

*Regulatory:* BGA compliance

*Properties:* Wh. opaque visc. liq.; dens. 0.84 g/ml (20 C); flash pt. > 150 C; pH ≈ 6.5 (2% in DI water); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir before use

**Agitan® 280** [Münzing Chemie GmbH]

*Chem. Descrip.:* Blend of liq. hydrocarbons, hydrophobic silica acid, syn. copolymers, and nonionic emulsifiers

*Uses:* Defoamer for emulsion paints, emulsion polymers, syn. renderings, adhesives, coating colors in paper prod.; silicone-free

*Use Level:* 0.1-0.5%

*Properties:* Brnsh. dull oil; emulsifiable in water; dens. 0.93 g/cc (20 C); visc. med.; flash pt. > 120 C; pH 6 (2% in DW); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir well before use

**Agitan® 281** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Blend of liq. hydrocarbons, hydrophobic silica, syn. copolymers, and nonionic emulsifiers

*Uses:* Defoamer for emulsion paints, emulsion polymers, food pkg. adhesives, aq. systems, silicate paints, coating colors; starch defoamer in food-contact paper prod.; silicone-free

*Use Level:* 0.05-0.50%

*Regulatory:* FDA 21CFR §175.105, 176.210

*Properties:* Lt. brn. turbid sl. visc. liq.; emulsifiable in water; dens. 0.96 g/ml (20 C); flash pt. > 140 C; pH ≈ 5.0 (2% in dist. water); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed containers; not sensitive to freezing; stir before use

**Agitan® 285** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Ester

*Uses:* Water-soluble defoamer for prod. of phosphoric acid and for special foam problems, i.e., defoaming of quaternary ammonium compds.; wetting/dispersing agent for emulsion paints; defoamer for coating colors for acid systems (paper prod.); defoamer in food-contact paper/paperboard; food pkg. adhesives, coatings; free of mineral oil

*Use Level:* 0.1-0.5% (on coating pigment)

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210

*Properties:* Water-wh. sl. dull liq.; emulsifiable in water; dens. 1.06 g/cc (20 C); visc. med.; 50% act.; anionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing

**Agitan® 290** [Münzing Chemie GmbH]

*Chem. Descrip.:* Alkoxyated blend

*Uses:* Defoamer for sol'ns. of polyvinyl alcohol, delimiting and cleaning agents, acid media, printing inks, coating colors and sizing preps. in paper prod.; silicone-free; ashless

*Use Level:* 0.1-1.0%

*Properties:* Water-wh. clear liq.; sol. in acetone, ethanol, IPA, xylol; emulsifiable in water, ethylene glycol, propylene glycol; dens. 1.02 g/cc (20 C); visc. med.; flash pt. > 180 C; pH 6 (2% in DW); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing

**Agitan® 295** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Blend of liq. hydrocarbons, hydrophobic silica, fatty and alkoxyated compds., and nonionic emulsifiers

*Uses:* Defoamer for emulsion paints, gloss emulsion paints, printing inks, emulsion polymers, food pkg. adhesives, aq. systems, polymerization processes, wood preservative stains; defoamer in food-contact paper/paperboard; silicone-free

*Use Level:* 0.05-0.50% on finished prod.

*Regulatory:* FDA 21CFR §175.105, 176.210

*Properties:* Lt. brn. turbid sl. visc. liq.; emulsifiable in water; dens. 0.95 g/ml (20 C); flash pt. > 140 C; pH ≈ 6.0 (2% in DI water); 100% act.

*Storage:* 12 mos shelf life stored @ 15-25 C in closed containers; stir before use

**Agitan® 301** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Blend of vegetable oils, modified solids, nonionic emulsifiers, and silicone

*Uses:* Defoamer for emulsion paints, emulsion polymers, syn. renderings, food pkg. adhesives/coatings/paper, coating colors (graphic papers), wastewater treatment; prevents and combats surf. foam

*Use Level:* 0.02-0.1%

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200, 176.210; BGA compliance

*Properties:* Ylsh. dull oil; emulsifiable in water; dens. 0.93 g/cc (20 C); visc. med.; flash pt. > 200 C; pH 6.5 (2% in DW, 20 C); 100% act.; nonionic

*Environmental:* Biodeg.

*Storage:* 12 mos shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir before use

**Agitan® 305** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Blend of modified nonionic fatty compds. and environmentally safe hydrocarbons

*Uses:* Defoamer for latex and emulsion architectural paints, general industrial, can coatings, emulsion polymers, syn. renderings, food pkg. adhesives/paper, dispersions, coating colors in paper prod. (self-copying paper, folding boxboard); silicone-free

*Use Level:* 0.05-0.50% on finished prod.

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210; BGA compliance

*Properties:* Wh. opaque sl. visc. liq.; emulsifiable in water; dens. 0.87 g/ml (20 C); flash pt. > 140 C; pH ≈ 8.0 (2% in DI water); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed containers; not sensitive to freezing; stir well before use

**Agitan® 315** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Blend of modified nonionic fatty compds., hydrophobic silica, and aromatic-free medical wh. oils

*Uses:* Silicone-free defoamer for odorless inner emulsion paints, maintenance coatings, primers, high-gloss emulsion paints, inks, syn. renderings, adhesives, aq. systems, coating colors in paper prod.; very low odor

*Use Level:* 0.05-0.50%

*Regulatory:* BGA compliance

*Properties:* Lt. yel. sl. opaque visc. liq., low odor; dens. 0.86 g/ml (20 C); flash pt. > 100 C; pH ≈ 8.0 (2% in DI water); 100% act.; nonionic

*Storage:* 12 mos shelf life stored @ 15-25 C in closed pkg.; stir before use; not sensitive to freezing

**Agitan® 380** [Münzing Chemie GmbH]

*Chem. Descrip.:* Medical wh. oils with hydrophobic silica, syn. copolymers, and nonionic emulsifiers

*Uses:* Defoamer for emulsion paints, esp. in low visc. and unpigmented systems; defoamer for coating colors in paper prod., wastewater treatment; silicone-free; high efficiency, good emulsifiability; combats and prevents foam

*Use Level:* 0.02-0.1% (water treatment)

*Regulatory:* BGA, FDA compliance

*Properties:* Ylsh. dull oil; emulsifiable in water, ethylene glycol, propylene glycol; dens. 0.95 g/cc; visc. med.; flash pt. > 100 C; pH 5.5 (2% in DW, 20 C); 100% act.; nonionic

*Storage:* 12 mos shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir before use

**Agitan® 620** [Münzing Chemie GmbH]

*Chem. Descrip.:* Blend of mainly aliphatic hydrocarbons with components having nonionic chars.

*Uses:* Defoamer for coating colors in paper prod. (folding boxboard), and nat. and syn. binders; silicone-free

*Use Level:* 0.02-0.08% (on coating pigment)

*Properties:* Ylsh. oil; emulsifiable in water; dens. 0.92 g/cc (20 C); visc. med.; flash pt. > 110 C; pH 6 (2% in DW); 100% act.; nonionic  
*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir well before use

**Agitan® 633** [Münzing Chemie GmbH]

*Chem. Descrip.:* Fatty acid derivs. and hydrocarbons

*Uses:* Defoamer, leveling agent for water paints, water-dilutable resin systems, impregnations, adhesives, printing inks, pulp, paper and board prod., effluent treating plants; silicone-free; easily emulsifiable

*Use Level:* 0.1-2.0%

*Properties:* Ylsh.-brn. clear oil; emulsifiable in water; dens. 0.92 g/ml (20 C); visc. low; flash pt. > 120 C; pH 6.5 (2% in DW); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ R.T. in closed containers; not sensitive to freezing

**Agitan® 634** [Münzing Chemie GmbH]

*Chem. Descrip.:* Fatty acid derivs. and hydrocarbons

*Uses:* Defoamer/deaerator for pulp, paper, and board prod., and for effluent treating plants

*Use Level:* 0.02-0.04%

*Properties:* Ylsh.-brn. clear oil; emulsifiable in water; dens. 0.92 g/cc (20 C); visc. low; flash pt. > 120 C; pH 5 (2% in DW); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing

**Agitan® 650** [Münzing Chemie GmbH]

*Chem. Descrip.:* Blend of hydrocarbons, waxes, and nonionic emulsifiers

*Uses:* Defoamer for emulsion polymers, water-dilutable systems, pigmented and unpigmented systems, coating colors for paper prod.; in resinous/polymeric food-contact coatings; food-contact paper/paperboard; silicone-free

*Use Level:* 0.1-0.5%

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; BGA compliance

*Properties:* Ylsh. dull oil; emulsifiable in water, ethylene glycol, IPA, propylene glycol, xylol; dens. 0.86 g/cc (20 C); visc. med.; flash pt. > 140 C; pH 6.5 (2% in DW); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir well before use

**Agitan® 655** [Münzing Chemie GmbH]

*Chem. Descrip.:* Blend of hydrocarbons, waxes, and nonionic emulsifiers

*Uses:* Defoamer for emulsion polymers, water-dilutable systems, pigmented and unpigmented systems, coating colors (self-copying paper); silicone-free; easily emulsifiable

*Use Level:* 0.3-0.5%

*Regulatory:* BGA, FDA compliance

*Properties:* Ylsh. dull oil; emulsifiable in water, ethylene glycol, IPA, propylene glycol, xylol; dens. 0.84 g/ml (20 C); flash pt. > 140 C; pH 6.5 (2% in DW); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ R.T. in closed containers; not sensitive to freezing; stir before use after long storage

**Agitan® 731** [Münzing Chemie GmbH; King Ind.]

*Chem. Descrip.:* Blend of modified organo polysiloxanes with nonionic alkoxyated compds.

*Uses:* Defoamer for water-reducible emulsion and latex systems, high gloss architectural paints, wood preservative stains, aq. flexographic inks, primers, acid catalyzed systems, automotive basecoats, coating colors (folding boxboard), wastewater treatment

*Use Level:* 0.05-0.20%

*Properties:* Lt. yel. sl. visc. translucent liq.; sol. in butanol, glycol ethers, ethoxypropanol, hexanol, isobutanol, IPA, methoxypropanol, MEK, min. spirits, xylene; partly sol. in acetone, ethanol; dens. 1.01 g/ml (20 C); flash pt. > 200 C; pH ≈ 7.0 (2% in DI water); 100% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed containers; not sensitive to freezing; stir before use

**Agitan® 760** [Münzing Chemie GmbH]

*Chem. Descrip.:* Blend of modified organo polysiloxanes and alkoxyated compds.

*Uses:* Defoamer for coating colors in paper prod. (folding boxboard), gloss emulsion paints, wood preservative stains, aq. flexographic inks; highly effective; very good long-term effect

*Use Level:* 0.05-0.2%

*Regulatory:* BGA compliance

*Properties:* Lt. yls. sl. dull oil; sol. in acetone, ethanol, IPA, xylol; emulsifiable in propylene glycol; hardly emulsifiable in water; dens. 1.01 g/cc (20

C); visc. med.; flash pt. > 100 C; pH 6 (2% in DW); 100% act.; nonionic  
*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; not sensitive to freezing; stir well before use

**Agitan® 960-R** [Münzing Chemie GmbH]

*Chem. Descrip.:* Fatty derivs. and modified fatty acid esters disp.

*Uses:* Defoamer/deaerator for paper and board prod. incl. food-contact paper, wastewater treatment, and for very strongly alkaline systems (up to pH 14); food pkg. adhesives

*Use Level:* 0.05-0.2%

*Regulatory:* FDA 21CFR §175.105, 176.210; BGA compliance

*Properties:* Wh. dull free-flowing disp.; dens. 0.97 g/cc (20 C); visc. med.; pH 7 (20 C); 39% act.; nonionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkgs.; sensitive to freezing; stir well before use

**Agitan® B 13** [Münzing Chemie GmbH]

*Chem. Descrip.:* Fatty derivs. in water

*Uses:* Defoamer for pulp/paper prod., food-contact paper/paperboard; in resinous/polymeric food-contact coatings

*Use Level:* 0.1-0.3%

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; BGA compliance

*Properties:* Sl. creamy paste; pH 9 (2% in DW); 48% act.

*Storage:* 12 mos shelf life stored @ 15-25 C in closed pkg.; sensitive to freezing

**Agitan® VP 4/180** [Münzing Chemie GmbH]

*Chem. Descrip.:* Oils, special waxes, and emulsifiers

*Uses:* Defoamer/deaerator for pulp prod.

*Properties:* Nonionic

**Airflex® 100 HS** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene copolymer latex

CAS 24937-78-8

*Uses:* Coating binder and saturant for paper and paperboard applics., size press, and wallpaper; very high dry pick str.; produces higher sheet and ink gloss than conventional VA-based latexes; develops high degree of smoothness and compressibility; high scrub resist. in wallpaper grouts

*Properties:* 0.17 nm particle size; dens. 8.8 lb/gal; visc. 550 cps; pH 5.5; 55% solids; sl. anionic

**Airflex® 105** [Air Prods./Polymers]

*Chem. Descrip.:* Self-crosslinking vinyl acetate-ethylene polymer

CAS 24937-78-8

*Uses:* Nonwoven binder for wipes, towels, lightweight cover stock

*Properties:* Visc. 400-1000 cps; pH 5-6; 52% solids; anionic/nonionic

**Airflex® 108** [Air Prods./Polymers]

*Chem. Descrip.:* Crosslinkable vinyl acetate ethylene copolymer

CAS 24937-78-8

*Uses:* Saturant for paper applics.; high performance, ultra-low formaldehyde; meets demanding applic. needs where high str., durability, and absorbency are required

*Properties:* 0.25 µm particle size; visc. 200 cps; pH 5.5; 55% solids; anionic

**Airflex® 110** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene copolymer latex

CAS 24937-78-8

*Uses:* Saturant for paper and paperboard applics., reprographic applics.; compat. with conductive polymers, most cationic additives; optimum solvent runnability

*Properties:* 0.30 nm particle size; dens. 8.9 lb/gal; visc. 575 cps; pH 5.2; 55% solids; nonionic

**Airflex® 124** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate ethylene copolymer

CAS 24937-78-8

*Uses:* Saturant for wallpaper and specialty paper applics.; soft polymer with high wet str., soft hand, low formaldehyde

*Properties:* 0.25 µm particle size; visc. 175 cps; pH 5.5; 52% solids; anionic

**Airflex® 144** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene copolymer latex

CAS 24937-78-8

*Uses:* Saturant in paper and specialty paper applics.; heat-sealable; adhesion to wide variety of surfaces; compat. with silicone emulsions; polyvinyl alcohol protected; < 0.1% total volatile organics

*Properties:* 0.80 µm particle size; visc. 2250 cps; pH 4.5; 55% solids; nonionic

**Airflex® 300** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion

CAS 24937-78-8

*Uses:* Adhesive base offering rapid set speed, good adhesion to coated paper surfs., clarity, and flexibility, high thickening response, good wet tack and water resist.; suited for paper, cellulose acetate film substrates; PVAL protection

*Properties:* Visc. 1800-2700 cps; pH 4-5; 55% solids

**Airflex® 320** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion

CAS 24937-78-8

*Uses:* Base for compounding water resist. pkg. adhesives with exc. adhesion to difficult-to-adhere coated paper surfs.; suited for paper and cellulose acetate film substrates; offers flexibility, good wet tack, rapid set speed; good water resist.; PVAL protection

*Properties:* Visc. 1800-2700 cps; pH 4-5; 55% solids

**Airflex® 323** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion polymer

CAS 24937-78-8

*Uses:* Base for high-speed paper pkg. adhesives; nonwoven binder for wipes, towels, cover stock; self-crosslinking; formaldehyde-free

*Regulatory:* SARA §313 reportable

*Properties:* Wh. mobile liq.; sweet odor; completely sol. in water; sp.gr. 1.07; visc. 50-500 cps; vapor pressure 18.52 mm Hg (21 C); b.p. > 100 C; pH 5.5; 40-60% solids; anionic

*Toxicology:* Mild respiratory tract irritant; repeated/prolonged exposure to low concs. of vapor may cause transient sore throat; nonirritating to eyes and skin of rabbit; TSCA listed

*Precaution:* When dried polymer burns, water, CO<sub>2</sub>, CO, and smoke are produced; keep away from oxidizers

*Hazardous Decomp. Prods.:* Level of acetaldehyde may inc. as a result of hydrolysis of residual vinyl acetate monomer; CO, CO<sub>2</sub> in fire; acetic acid; aldehydes

*Storage:* Avoid freezing temps.; minimize contact with atmospheric air to prevent inoculation with microorganisms; do not store in reactive metal containers

**Airflex® 400** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion

CAS 24937-78-8

*Uses:* Adhesive for many substrates incl. PVC film, coated paper, cloth; high wet tack, good water resist.; PVAL protection

*Properties:* Visc. 1800-2700 cps; pH 4-5; 55% solids

**Airflex® 426** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion, carboxylated

CAS 24937-78-8

*Uses:* Base for adhesives; rec. for foil laminating, PVC laminating, film laminating, bottle labeling, bookbinding, metal-to-paper, metal-to-wood, envelope window adhesives, high-speed pkg.; food pkg. adhesives, paper/paperboard; PVAL/cellulosic protection; exc. adhesion to metal, polyester, other plastic films; sprayable, exc. water resist., high wet tack, heat sealable

*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* Emulsion; visc. 100-1800 cps; pH 4.5-5.5; 60-64% solids

**Airflex® 430** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate/ethylene/vinyl chloride terpolymer

*Uses:* Fire retardant adhesive base for kraft and coated paper substrates; forms clear, tough films with outstanding water and alkali resist.; strong adhesion to metals, plastic films and foams; surfactant protection

*Properties:* Visc. 100-500 cps; pH 5.0-6.5; 52% min. solids

**Airflex® 440** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion

CAS 24937-78-8

*Uses:* Adhesive base suitable on kraft/coated paper, cotton and polyester fabrics, mylar, cellulose acetate, and PVC film substrates; low VOC version of Airflex 400; high wet tack, good water resist.

*Regulatory:* SARA §312/313 nonreportable

*Properties:* Wh. mobile liq.; sweet odor; completely sol. in water; sp.gr. 1.07; visc. 1800-2700 cps; vapor pressure 18.62 mm Hg (21 C); b.p. > 100 C; pH 4.5; 40-60% solids; < 0.1% total volatiles

*Toxicology:* No known health hazards; TSCA listed

*Precaution:* When dried polymer burns, water, CO<sub>2</sub>, CO, and smoke are produced; keep away from oxidizers

*Hazardous Decomp. Prods.:* Level of acetaldehyde may inc. as a result of hydrolysis of residual vinyl acetate monomer; CO, CO<sub>2</sub> in fire; acetic acid;

aldehydes

*Storage:* Avoid freezing temps.; minimize contact with atmospheric air to prevent inoculation with microorganisms; do not store in reactive metal containers

**Airflex® 440H** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion

CAS 24937-78-8

*Uses:* Adhesive base suitable on kraft/coated paper, cotton and polyester fabrics, mylar, cellulose acetate, and PVC film substrates; low VOC version of Airflex 400H; high wet tack, good water resist.

*Properties:* Visc. 3100-4400 cps; pH 4-5; 55% min. solids; < 0.1% total volatiles

**Airflex® 456** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene-vinyl chloride terpolymer latex

*Uses:* Nonwoven binder for flame retardant fabrics where clay fillers are incorporated; coating binder and saturant for paper and paperboard applics.; good water resist., abrasion resist., and flame retardancy

*Properties:* 0.17 nm particle size; dens. 8.8 lb/gal; visc. 100-500 cps; pH 5-6.5; 52% solids; sl. anionic

**Airflex® 465** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion

CAS 24937-78-8

*Uses:* Adhesive base for high-speed pkg., bookbinding, and film overlay laminating, suitable for wood, paper, mylar, cellulose acetate, and PVC film substrates; exc. water resist.; PVAL protection

*Properties:* Visc. 800-1300 cps; pH 4.5-5.5; 66% solids

**Airflex® 4500** [Air Prods./Polymers]

*Chem. Descrip.:* Ethylene-vinyl chloride copolymer latex

*Uses:* Coating binder for size press and saturant for paper and wallpaper applics.; useful in heat seal adhesive applics. or where a moisture barrier is required; nonwoven binder for fiberfill and high loft stock requiring flame retardancy; imparts flexibility and water resist. to caulks, mastics, barrier coats in building applics., high build flexible coatings, low MVTR coatings; crosslinkable; flexible; exc. water, alcohol, and grease resist.; inherently flame retardant

*Properties:* Emulsion; 0.12 nm particle size; dens. 9.17 lb/gal; visc. 25-150 cps; pH 8.0; 50% solids; anionic

**Airflex® 4514** [Air Prods./Polymers]

*Chem. Descrip.:* Ethylene-vinyl chloride copolymer latex

*Uses:* Coating binder and saturant for paper and paperboard applics.; binder for flame retardant fabrics, heat sealable nonwovens; useful in heat seal adhesive applics. or where a moisture barrier is required; imparts flexibility and water resist. to caulks, mastics, barrier coats in building applics., low MTVR coatings; inherently flame retardant

*Properties:* Emulsion; 0.12 nm particle size; dens. 9.22 lb/gal; visc. 25-150 cps; pH 8.0; 50% solids; anionic

**Airflex® 4530** [Air Prods./Polymers]

*Chem. Descrip.:* Ethylene-vinyl chloride copolymer latex

*Uses:* Coating binder and saturant for paper and paperboard applics.; useful in heat seal adhesive applics. or where a moisture barrier is required; binder for filters, stiff flame retardant nonwovens; imparts flexibility and water resist. to caulks, mastics, barrier coats in building applics., baked industrial coatings, high PVC ceiling tile coatings; exc. water, alcohol, and grease resist.; highest stiffness, tens. str., and flame retardancy in series; crosslinkable with UF and MF

*Properties:* Emulsion; 0.11 nm particle size; dens. 9.37 lb/gal; visc. 25-150 cps; pH 8.0; 50% solids; anionic

**Airflex® 7200** [Air Prods./Polymers]

*Chem. Descrip.:* Vinyl acetate-ethylene emulsion

CAS 24937-78-8

*Uses:* Adhesive base suitable on kraft and coated paper, cotton, polyester, mylar, cellulose acetate, and PVC film substrates; ideal for solv.-based adhesive replacement; ultra high-solids; PVAL protection; superior wet tack and very rapid speed of set

*Properties:* Visc. 1500-3000 cps; pH 4-5.5; 72% min. solids

**Airflex® CE35** [Air Prods. Polymers Europe]

*Chem. Descrip.:* Vinyl chloride/vinyl acetate/ethylene terpolymer disp.

*Uses:* Binder for fabrics, glass fiber; textile auxiliary and coating; paper coatings

*Properties:* Disp.; 0.15 µm particle size; visc. 50 ± 30 mPa·s; pH 6; 50 ± 1% solids

**Airflex® CF50** [Air Prods. Polymers Europe]

- Chem. Descrip.:* Vinyl chloride/vinyl acetate copolymer disp.  
CAS 9003-22-9  
*Uses:* Binder for fabrics, glass fiber; textile auxiliary and coating; paper coatings  
*Properties:* Disp.; 0.15 µm particle size; visc. 80 ± 60 mPa·s; pH 5; 50 ± 1% solids
- Airvol® 103** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, fully hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Imparts high water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; offers high tens. str. and ease of film formation, exc. adhesive chars; sol'ns. are nongelling providing long shelf life at low temps.  
*Properties:* Visc. 3.2-4.2 cps; pH 5.0-7.0; 98.0-98.8% hydrolysis
- Airvol® 107** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, fully hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Imparts high water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; offers high tens. str. and ease of film formation, exc. adhesive chars; sol'ns. are nongelling providing long shelf life at low temps.  
*Properties:* Visc. 5.5-6.6 cps; pH 5.0-7.0; 98.0-98.8% hydrolysis
- Airvol® 125** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, super hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* For adhesives, paper, molded prods.; imparts highest degree of water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; forms thermally reversible gels @ high concs.; suitable for tube winding, bag seams, solid fiber laminations  
*Properties:* Visc. 28-32 cps; pH 5.5-7.5; 99.3+% hydrolysis
- Airvol® 165** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, super hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Imparts highest degree of water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; forms thermally reversible gels @ high concs.; rec. for tube winding, bag seams, and solid fiber lamination  
*Properties:* Visc. 62-72 cps; pH 5.5-7.5; 99.3+% hydrolysis
- Airvol® 165SF** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, partially hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Noncook additive in paper coating color formulations; super fine particle size  
*Properties:* > 99% thru 100 mesh
- Airvol® 203** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, partially hydrolyzed  
CAS 25213-24-5  
*Uses:* Useful for remoistenable adhesives and adhesives requiring easy cleanup, rec. for wood adhesives, envelope, label, bookbinding, padding, carton sealing applics.; paper applics.; imparts highest water sensitivity  
*Properties:* Visc. 3.5-4.5 cps; pH 4.5-6.5; 87-89% hydrolysis
- Airvol® 203S** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Protein replacement and optical brightener carrier in paper industry, joint cements, plaster additives, stucco finishes; finer particle size  
*Properties:* > 99% thru 80 mesh
- Airvol® 205** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, partially hydrolyzed  
CAS 25213-24-5  
*Uses:* Binder, carrier, compounding agent, dispersant, stabilizer, protective colloid in polymerizations for textiles, paper, cement/plaster, peelable caulks, ceramics, strippable coatings, mold release, nonwovens; useful for remoistenable adhesives, wood adhesives, envelope, label, bookbinding, padding, carton sealing applics.  
*Properties:* Wh. to cream gran. powd.; sp.gr. 1.27-1.31; bulk dens. 40 lb/ft<sup>3</sup>; visc. 5.2-6.2 cps (4% aq., 20 C); pH 4.5-6.5 (4% aq.); ref. index 1.55 (20 C); 87-89% hydrolysis
- Airvol® 205S** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, partially hydrolyzed  
CAS 25213-24-5  
*Uses:* Imparts high water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; offers high tens. str. and ease of film formation, exc. adhesive chars; sol'ns. are nongelling providing long shelf life at low temps.; finer particle size  
*Properties:* Fine particle grade; fineness 99+% thru 80 mesh; visc. 5.2-6.2 cps; pH 4.5-6.5; 87-90% hydrolysis
- Airvol® 305** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, fully hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Imparts high water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; offers high tens. str. and ease of film formation, exc. adhesive chars; sol'ns. are nongelling providing long shelf life at low temps.  
*Properties:* Visc. 4.5-5.5 cps; pH 5.0-7.0; 98.0-98.8% hydrolysis
- Airvol® 321** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, fully hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Imparts high water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; offers high tens. str. and ease of film formation, exc. adhesive chars; sol'ns. are nongelling providing long shelf life at low temps.  
*Properties:* Visc. 16.5-20.5 cps; pH 5.0-7.0; 98.0-98.8% hydrolysis
- Airvol® 325** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, fully hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Imparts high water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; offers high tens. str. and ease of film formation, exc. adhesive chars; sol'ns. are nongelling providing long shelf life at low temps.  
*Properties:* Visc. 28.5-32.5 cps; pH 5.0-7.0; 98.0-98.8% hydrolysis
- Airvol® 350** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, fully hydrolyzed  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Imparts high water resist.; good adhesion to hydrophilic surfs. such as paper, cotton cloth; offers high tens. str. and ease of film formation, exc. adhesive chars; sol'ns. are nongelling providing long shelf life at low temps.  
*Properties:* Visc. 62-72 cps; pH 5.0-7.0; 98.0-98.8% hydrolysis
- Airvol® 425** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, intermediate hydrolyzed  
CAS 25213-24-5  
*Uses:* Polymer for adhesive prods., esp. for envelope, tube winding, book-binding, padding, bag seam, cup, cigarette filter, case/carton sealing applics.; paper applics.; exc. machining props  
*Properties:* Visc. 27-31 cps; pH 4.5-6.5; 95.5-96.5% hydrolysis
- Airvol® 502** [Celanese GmbH]  
*Chem. Descrip.:* Partially hydrolyzed polyvinyl alcohol  
CAS 25213-24-5  
*Uses:* For remoistenable adhesives and wood adhesive formulations; paper applics.; imparts high degree of water sensitivity  
*Properties:* Visc. 3.0-3.7 cps (4% aq., 20 C); pH 4.5-6.5; 5% max. volatiles
- Airvol® 523** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, partially hydrolyzed  
CAS 25213-24-5  
*Uses:* Binder, carrier, compounding agent, dispersant, stabilizer, protective colloid in polymerizations for textiles, paper, cement/plaster additive, films, ceramics, molded prods., mold release; useful for remoistenable adhesives, wood adhesives, envelope, label, bookbinding, padding, carton sealing applics.  
*Properties:* Visc. 23-27 cps (4% aq., 20 C); pH 4-6 (4% aq.); 87-89% hydrolysis
- Airvol® 540** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, partially hydrolyzed  
CAS 25213-24-5  
*Uses:* Binder, carrier, compounding agent, dispersant, stabilizer, protective colloid in polymerizations for textiles, paper, cement/plaster additive, films, molded prods., nonwovens; useful for remoistenable adhesives, wood adhesives, envelope, label, bookbinding, padding, carton sealing applics.  
*Properties:* Visc. 45-55 cps (4% aq., 20 C); pH 4-6 (4% aq.); 87-89% hydrolysis
- Airvol® 805** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol  
CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Emulsion polymerization applics.; food pkg. adhesives, coatings, paper/paperboard; improved grade providing processing advantages, superior water sol., lower foaming, and reduced gel content  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180; BGA compliances  
*Properties:* Wh. to cream gran. powd.; sp.gr. 1.27-1.31; bulk dens. 40 lb/ft<sup>3</sup>; visc. 5.2-6.2 cps (4% aq., 20 C); pH 4.5-6.5 (4% aq.); ref. index 1.55 (20

- C); 87-89% hydrolysis
- Airvol® 823** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Emulsion polymerization applics.; food pkg. adhesives, coatings, paper/paperboard; improved grade providing processing advantages, superior water sol., lower foaming, and reduced gel content  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180; BGA compliances  
*Properties:* Wh. to cream gran. powd.; sp.gr. 1.27-1.31; bulk dens. 40 lb/ft<sup>3</sup>; visc. 23-27 cps (4% aq., 20 C); pH 4-6 (4% aq.); ref. index 1.55 (20 C); 87-89% hydrolysis
- Airvol® 840** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Emulsion polymerization applics.; food pkg. adhesives, coatings, paper/paperboard; improved grade providing processing advantages, superior water sol., lower foaming, and reduced gel content  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180; BGA compliances  
*Properties:* Wh. to cream gran. powd.; sp.gr. 1.27-1.31; bulk dens. 40 lb/ft<sup>3</sup>; visc. 45-55 cps (4% aq., 20 C); pH 4-6 (4% aq.); ref. index 1.55 (20 C); 87-89% hydrolysis
- Airvol® MH-82** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, tackified  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Tackified grades yield visc. aq. sol'ns. which possess tack when applied onto surfaces such as paper, reducing penetration; derived from fully hydrolyzed grades  
*Properties:* Visc. 4200-5900 cps; pH 4.4-4.9
- Airvol® MM-14** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, tackified  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Tackified grades yield visc. aq. sol'ns. which possess tack when applied onto surfaces such as paper, reducing penetration; derived from fully hydrolyzed grades  
*Properties:* Visc. 245-485 cps; pH 4.4-4.9
- Airvol® MM-51** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, tackified  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Tackified grades yield visc. aq. sol'ns. which possess tack when applied onto surfaces such as paper, reducing penetration; derived from fully hydrolyzed grades  
*Properties:* Visc. 1100-1500 cps; pH 4.4-4.9
- Airvol® MM-81** [Celanese GmbH]  
*Chem. Descrip.:* Polyvinyl alcohol, tackified  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Tackified grades yield visc. aq. sol'ns. which possess tack when applied onto surfaces such as paper, reducing penetration; derived from fully hydrolyzed grades  
*Properties:* Visc. 1300-1700 cps; pH 4.4-4.9
- Ajidew A-100** [Ajinomoto]  
*Chem. Descrip.:* PCA  
 CAS 98-79-3; EINECS/ELINCS 202-700-3  
*Uses:* Nat. humectant used in cosmetics, soaps, dentifrices, medicinal supplies, tobacco, cellulose film, paper prods., fiber prods., paints; dyeing agent; softener; finishing agent; intermediate for synthesis; antistat for hair care prods.  
*Properties:* Wh. cryst. powd., odorless, sl. acidic taste, nonhygroscopic; m.w. 129.11; m.p. 181 C; pH 1.8-2.2
- Ajidew N-50** [Ajinomoto]  
*Chem. Descrip.:* Sodium PCA aq. sol'n.  
 CAS 28874-51-3; EINECS/ELINCS 249-277-1  
*Uses:* Nat. humectant used in cosmetics, soaps, dentifrices, medicinal supplies, tobacco, cellulose film, paper prods., fiber prods., paints; dyeing agent; softener; finishing agent; antistat; intermediate for synthesis; thickener for shampoos  
*Properties:* Liq.; pH 6.8-7.4; 50% act.
- Ajidew SP-100** [Ajinomoto]  
*Chem. Descrip.:* Sodium PCA and PCA  
*Uses:* Nat. humectant used in cosmetics, soaps, dentifrices, medicinal supplies, tobacco, cellulose film, paper prods., fiber prods., paints; dyeing

agent; softener; finishing agent; antistat; intermediate for synthesis

*Properties:* Wh. cryst.

**AL 1701** [Mace Adhesives & Coatings]

*Chem. Descrip.:* Aliphatic polyether PU laminating adhesive

*Uses:* Laminating adhesive for paper, foam, cotton, polyester, stainless steel, mylar, nylon, aluminum, and PE film; waterborne; good grn. str. and adhesion to most substrates

*Properties:* Visc. 2000 ± 1000 cps; low m.p.; pH 7.5-8.5; VOC 137 g/l; 60 ± 1% solids

**AL 4190** [Mace Adhesives & Coatings]

*Chem. Descrip.:* Aliphatic polyether PU laminating adhesive

*Uses:* Laminating adhesive for wet or dry laminations of paper, film, vinyl, foil, or fabric constructions; high performance; waterborne; low VOC; rapid bond str.; designed to exhibit high degree of specific adhesion to various substrates, incl. low energy surfaces

*Use Level:* 0.3-1.5 oz/yd<sup>2</sup> (dry coat wt.)

*Properties:* Milky liq.; mild alcoholic odor; dens. 8.1 lb/gal; visc. 1500 ± 500 cps (70 F); pH 7.5-8.5; VOC 250 g/l; 36 ± 1% solids; anionic

*Storage:* Store @ 40-100 F; keep away from all sources of ignition

**AL 4781** [Mace Adhesives & Coatings]

*Chem. Descrip.:* Hybrid PU laminating adhesive

*Uses:* Laminating adhesive for paper, foam, cotton, mylar, PVC film, nylon, polyester, stainless steel, and aluminum; waterborne; exc. for bonding foam/vinyl constructions @ R.T.

*Properties:* Visc. 1000 ± 500 cps; pH 7.5-8.5; VOC 343 g/l; 52 ± 1% solids

**AL 6919** [Mace Adhesives & Coatings]

*Chem. Descrip.:* Hybrid PU laminating adhesive

*Uses:* Laminating adhesive for wet or dry laminations of paper, film, vinyl, foil, or fabric constructions, foam/vinyl laminations at R.T.; hybrid; low VOC; rapid bond str.; designed to exhibit high degree of specific adhesion to various substrates, incl. low energy surfaces

*Use Level:* 0.3-1.5 oz/yd<sup>2</sup> (dry coat wt.)

*Properties:* Milky liq.; mild alcoholic odor; dens. 8.37 lb/gal; visc. 1000 ± 500 cps (70 F); pH 7.5-8.5; VOC 225 g/l; 52 ± 1% solids; anionic

*Storage:* Store @ 40-100 F; keep away from all sources of ignition

**Alathon® L 5845** [Equistar]

*Chem. Descrip.:* HDPE blown film resin

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Blown film resin for paper replacement, coextrusions, laminations, food pkg.

*Regulatory:* FDA 21CFR §177.1520

*Properties:* Sp.gr. 0.958; melt index 0.45 g/10 min; tens. str. 3800 psi (yield); elong. 750% (break, MD); tear str. (Elmendorf) 15-30 g (MD)

**Alathon® L 5845-1** [Equistar]

*Chem. Descrip.:* HDPE

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Blown film resin for paper replacement, coextrusions, laminations, food pkg.

*Regulatory:* FDA 21CFR §177.1520 compliant

*Properties:* Sp.gr. 0.958; melt index 0.45 g/10 min; tens. str. 3800 psi (yield, MD); elong. 750% (break, MD); Elmendorf tear str. 15-30 g (MD)

**Albacar® 5970** [Specialty Mins.]

*Chem. Descrip.:* Precipitated calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (98%), MgCO<sub>3</sub> (1%), moisture (0.2%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Functional pigment, reinforcing filler for NR, SR, resins, plastics, plastisols, paints, adhesives, sealants, caulks, paper, footwear, hose, belting, extruded and molded goods, sundries; nonabrasive; unique rosette particle shape makes it useful in applics. where high oil absorp. and high visc. are desired; improves tens., tear, abrasion resist.

*Properties:* Powd.; 1.9 μ median particle size; 0.03% on 325 mesh; sp.gr. 2.7; dens. 31 lb/ft<sup>3</sup> (tapped); bulk dens. 14 lb/ft<sup>3</sup>; oil absorp. 50 g/100 g; brightness 98

*Toxicology:* Nontoxic

**Albacar® PCC** [Specialty Mins.]

*Chem. Descrip.:* Precipitated calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler, opacifier, brightener for uncoated fine papers and coating base stocks

**Albafil® PCC** [Specialty Mins.]

*Chem. Descrip.:* Precipitated calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for alkaline papers; high brightness and whiteness; low surf. area; minimal interference with fiber-to-fiber bonding

*Properties:* Prismatic shaped

**Albaglos® PCC** [Specialty Mins.]

*Chem. Descrip.:* Precipitated calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Pigment, opacifier, brightener for paper coatings; controlled particle size distribution; exc. shear rheology; good ink holdout; maintains sheet gloss

**Albone® 35** [Atofina SA]

*Chem. Descrip.:* Hydrogen peroxide, stabilized

CAS 7722-84-1; EINECS/ELINCS 231-765-0

*Uses:* Oxidizing agent, bleaching agent for org. synthesis, paper/pulp, textiles, chem. mfg., minerals industry, etc.

*Properties:* Colorless clear liq.; sl. pungent irritating odor; m.w. 34.02; dens. 1.133 g/ml; visc. 1.11 cP; vapor pressure 23 mm Hg (30 C); b.p. 108 C; m.p. -33 C; pH 2.5; 35% conc., 16.5% act. oxygen

*Toxicology:* ACGIH TLV 1 ppm, 1.4 mg/m<sup>3</sup>, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation; TSCA listed

*Environmental:* Aquatic LC50 (catfish, 96 h) 37.4 mg/l

*Precaution:* Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures

*Storage:* Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

**Albone® 50** [Atofina SA]

*Chem. Descrip.:* Hydrogen peroxide, stabilized

CAS 7722-84-1; EINECS/ELINCS 231-765-0

*Uses:* Oxidizing agent, bleaching agent for org. synthesis, paper/pulp, textiles, chem. mfg., minerals industry, etc.

*Properties:* Colorless clear liq.; sl. pungent irritating odor; m.w. 34.02; dens. 1.196 g/ml; visc. 1.17 cP; vapor pressure 18 mm Hg (30 C); b.p. 114 C; f.p. -52 C; pH 1.8; 50% conc., 23.5% act. oxygen

*Toxicology:* ACGIH TLV 1 ppm, 1.4 mg/m<sup>3</sup>, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation; TSCA listed

*Environmental:* Aquatic LC50 (catfish, 96 h) 37.4 mg/l

*Precaution:* Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures

*Storage:* Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

**Albone® 70** [Atofina SA]

*Chem. Descrip.:* Hydrogen peroxide, lightly stabilized

CAS 7722-84-1; EINECS/ELINCS 231-765-0

*Uses:* Oxidizing agent, bleaching agent for org. synthesis, paper/pulp, textiles, chem. mfg., minerals industry, metal surf. treatment, etc.

*Properties:* Colorless clear liq.; sl. pungent irritating odor; m.w. 34.02; dens. 1.288 g/ml; visc. 1.93 cP; vapor pressure 11 mm Hg (30 C); b.p. 126 C; f.p. -40 C; pH 0.5; 70% conc., 32.9% act. oxygen

*Toxicology:* ACGIH TLV 1 ppm, 1.4 mg/m<sup>3</sup>, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation; TSCA listed

*Environmental:* Aquatic LC50 (catfish, 96 h) 37.4 mg/l

*Precaution:* Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures

*Storage:* Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

**Albone® 70 DG** [Atofina SA]

*Chem. Descrip.:* Hydrogen peroxide, highly stabilized

CAS 7722-84-1; EINECS/ELINCS 231-765-0

*Uses:* Oxidizing agent, bleaching agent for org. synthesis, paper/pulp, tex-

tiles, chem. mfg., minerals industry, etc.; diluted to 35-50% for storage in user's tank

*Properties:* Colorless clear liq.; sl. pungent irritating odor; m.w. 34.02; dens. 1.288 g/ml; visc. 1.93 cP; vapor pressure 11 mm Hg (30 C); b.p. 126 C; f.p. -40 C; pH 0.5; 70% conc., 32.9% act. oxygen

*Toxicology:* ACGIH TLV 1 ppm, 1.4 mg/m<sup>3</sup>, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation; TSCA listed

*Environmental:* Aquatic LC50 (catfish, 96 h) 37.4 mg/l

*Precaution:* Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures

*Storage:* Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

**Albrite® N-Butyl Acid Phosphate** [Albright & Wilson Am.]

*Chem. Descrip.:* Butyl acid phosphate

CAS 12788-93-1

*Uses:* Catalyst used in coatings and inks, for appliance, automotive, floor, furniture, paper, and other finishes; also for corrosion inhibitors, solder fluxes, lubricants, and tanning chems.; raw material for mfg. of textile auxs., wetting agents, dispersants, antistats, foams; provides high reactivity while offering improved storage stability; compat. with alkyds, cellulosics, epoxies, melamine, urethane, B/S

*Properties:* Pale yel. liq.; sol. in ethanol, acetone, benzene; partly sol. in water; insol. in toluene, hexane; sp.gr. 1.13; visc. 75 cs (40 C); decomp. pt. gradual above 180 C; flash pt. (CC) 90 C; fire pt. (OC) 202 C; ref. index 1.428; VOC 0.2 lb/gal

*Toxicology:* Corrosive; avoid prolonged/repeated skin and eye contact

**Albrite® Isooctyl Acid Phosphate** [Albright & Wilson Am.]

*Chem. Descrip.:* Isooctyl acid phosphate

CAS 12645-53-3

*Uses:* Catalyst used in solder fluxes (eliminates noxious fumes, spattering, corrosive residues); in coatings and inks (high reactivity, improves storage stability); for appliance, automotive, floor, furniture, paper, and other coatings; for anti-static agents, corrosion inhibitors, lubricants, tanning chems.; compat. with alkyds, cellulosics, epoxies, melamines, urethane, B/S

*Properties:* Pale yel. liq.; sol. in ethanol, acetone, benzene, toluene, hexane; insol. in water; sp.gr. 1.02; visc. 75 cs (40 C); decomp. pt. gradual above 180 C; flash pt. (CC) 115 C; fire pt. (OC) 207 C; ref. index 1.446; VOC 0.3 lb/gal

*Toxicology:* Corrosive; avoid prolonged/repeated skin and eye contact

**Albrite® PA-75** [Albright & Wilson Am.]

*Chem. Descrip.:* 75% Phenyl acid phosphate in butyl alcohol

*Uses:* Acid catalyst in resin curing; chemical intermediate in formulation of rust preventatives, antistats, textile lubricants, oil additives, heavy metal extractants; in coatings and inks provides high reactivity and improved storage (appliance, automotive, floor, furniture, paper, and other coatings); compat. with alkyds, cellulosics, epoxies, melamine, urethane, B/S

*Properties:* Pale yel. liq.; sol. in ethanol, acetone, benzene, toluene, hexane; partly sol. in water; sp.gr. 1.14 (20/4 C); visc. 49 cps; decomp. pt. gradual above 200 C; acid no. 270 min.; flash pt. (OC) 40 C; fire pt. (OC) 52 C; ref. index 1.483; VOC 3.1 lb/gal

*Toxicology:* Corrosive; avoid prolonged/repeated eye or skin contact

*Precaution:* Flamm. liq.

**Alcaid 10** [Texaco]

*Chem. Descrip.:* Naphthenic mineral oil

*Uses:* Lubricant, process or extender oil in rubber and plastics for use in mfg. of ink oils, carbon paper, floor oils, and component or carrier of upper cylinder lubricants, motor tune-up oils, and crankcase additives; general purpose; rec. in applics. requiring straight min. naphthenic oils

*Properties:* Very lt. pale liq.; visc. 9.56 cSt (40 C), 2.44 cSt (100 C); pour pt. -30 F; aniline pt. 175 F; flash pt. (COC) 320 F; 0.03% carbon residue

**Alcaid 13** [Texaco]

*Chem. Descrip.:* Naphthenic mineral oil

*Uses:* Lubricant, process or extender oil in rubber and plastics for use in mfg. of ink oils, carbon paper, floor oils, and component or carrier of upper cylinder lubricants, motor tune-up oils, and crankcase additives; general purpose; rec. in applics. requiring straight min. naphthenic oils

*Properties:* Lt. pale liq.; visc. 12.5 cSt (40 C), 2.8 cSt (100 C); pour pt. -30

F; aniline pt. 170 F; flash pt. (COC) 305 F

**Alcaid 19** [Texaco]

*Chem. Descrip.:* Naphthenic mineral oil

*Uses:* Lubricant, process or extender oil in rubber and plastics for use in mfg. of ink oils, carbon paper, floor oils, and component or carrier of upper cylinder lubricants, motor tune-up oils, and crankcase additives; general purpose; rec. in applics. requiring straight min. naphthenic oils

*Properties:* Lt. pale liq.; visc. 19.7 cSt (40 C), 3.5 cSt (100 C); pour pt. -20 F; aniline pt. 165 F; flash pt. (COC) 315 F; 0.03% carbon residue

**Alcaid 32** [Texaco]

*Chem. Descrip.:* Naphthenic mineral oil

*Uses:* Lubricant, process or extender oil in rubber and plastics for use in mfg. of ink oils, carbon paper, floor oils, and component or carrier of upper cylinder lubricants, motor tune-up oils, and crankcase additives; general purpose; rec. in applics. requiring straight min. naphthenic oils

*Properties:* Lt. pale liq.; visc. 29.5 cSt (40 C), 4.4 cSt (100 C); pour pt. -15 F; aniline pt. 176 F; flash pt. (COC) 325 F; 0.03% carbon residue

**Alcaid 46** [Texaco]

*Chem. Descrip.:* Naphthenic mineral oil

*Uses:* Lubricant, process or extender oil in rubber and plastics for use in mfg. of ink oils, carbon paper, floor oils, and component or carrier of upper cylinder lubricants, motor tune-up oils, and crankcase additives; general purpose; rec. in applics. requiring straight min. naphthenic oils

*Properties:* Lt. pale liq.; visc. 44.0 cSt (40 C), 5.3 cSt (100 C); pour pt. -10 F; aniline pt. 185 F; flash pt. (COC) 350 F; 0.03% carbon residue

**Alcaid 60** [Texaco]

*Chem. Descrip.:* Naphthenic mineral oil

*Uses:* Lubricant, process or extender oil in rubber and plastics for use in mfg. of ink oils, carbon paper, floor oils, and component or carrier of upper cylinder lubricants, motor tune-up oils, and crankcase additives; general purpose; rec. in applics. requiring straight min. naphthenic oils

*Properties:* Lt. pale liq.; visc. 59.8 cSt (40 C), 6.5 cSt (100 C); pour pt. 5 F; aniline pt. 192 F; flash pt. (COC) 370 F; 0.04% carbon residue

**Alcaid 100** [Texaco]

*Chem. Descrip.:* Naphthenic mineral oil

*Uses:* Lubricant, process or extender oil in rubber and plastics for use in mfg. of ink oils, carbon paper, floor oils, and component or carrier of upper cylinder lubricants, motor tune-up oils, and crankcase additives; general purpose; rec. in applics. requiring straight min. naphthenic oils

*Properties:* Lt. pale liq.; visc. 105 cSt (40 C), 8.8 cSt (100 C); pour pt. 0 F; aniline pt. 202 F; flash pt. (COC) 400 F; 0.05% carbon residue

**Alcan Aluminum Sulphate Sol'n.** [Alcan]

*Chem. Descrip.:* Aluminum sulfate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (8%)

CAS 10043-01-3; EINECS/ELINCS 233-135-0

*Uses:* Coagulant, flocculant in pulp/paper mills, water treatment; paper sizing (with rosin)

*Properties:* Colorless liq.; odorless; dens. 1320 kg/m<sup>3</sup>; b.p. > 100 C; pH 1.9-2.5

*Toxicology:* Low acute toxicity; eye and skin irritant

*Environmental:* Will dissolve rapidly in water

**Alcan Aluminum Sulphate Solid** [Alcan]

*Chem. Descrip.:* Aluminum sulfate

CAS 10043-01-3; EINECS/ELINCS 233-135-0

*Uses:* Paper sizing (with rosin); coagulant/flocculant in pulp/paper mills, water treatment; leather; textiles; wallboard gypsum treatment; component in fire retardants

*Properties:* Wh. cryst., flakes, gran., powd.; odorless; completely sol. in water; dens. 1760 kg/m<sup>3</sup>; m.p. 110-115 C; b.p. dec. before boiling; pH 1.5 (10% aq.); 100% act.

*Toxicology:* Risk of serious eye damage; dust will cause conjunctival irritation, possible corneal damage; dust may cause skin irritation and drying; may cause nose/throat/respiratory tract irritation; low acute toxicity

*Environmental:* Will dissolve rapidly in water

*Hazardous Decomp. Prods.:* Combustion will generate SO<sub>2</sub>

**Alcan Superfine SF 2** [Alcan]

*Chem. Descrip.:* Alumina trihydroxide

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%), water (34.9%), Na<sub>2</sub>O (0.2%), SiO<sub>2</sub> (0.015%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Fire retardant/smoke suppressant filler for plastics, PVC, rubber tech. goods, cable compds., conveyor belting, flooring compds., thermoplastic

molding/extrusion/sheet, thermosetting molding compds., polyester and acrylic pultrusion, fabric coatings, paper filling and coating, printing inks, paints, adhesives, adhesive tapes and in toothpaste, cosmetics, polishes and waxes

*Properties:* Wh. cryst. powd.; 0.1% max. on 45 µm; 1.6 µm median particle size; sp.gr. 2.42; bulk dens. 0.3 g/cc (untamped); surf. area 2 m<sup>2</sup>/g; oil absorp. 30; brightness 96; ref. index 1.57; pH 9.5 (5% w/v slurry); hardness (Mohs) 2.5-3.5

*Toxicology:* ACGIH airborne particulate 10 mg/m<sup>3</sup> (total), 4 mg/m<sup>3</sup> (respirable)

**Alcan Superfine SF 4** [Alcan]

*Chem. Descrip.:* Alumina trihydroxide

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%), water (34.9%), SiO<sub>2</sub> (0.015%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Fire retardant/smoke suppressant filler for plastics, PVC, rubber tech. goods, cable compds., conveyor belting, flooring compds., thermoplastic molding/extrusion/sheet, thermosetting molding compds., polyester and acrylic pultrusion, fabric coatings, paper filling and coating, printing inks, paints, adhesives, adhesive tapes and in toothpaste, cosmetics, polishes and waxes; whitener and brightener in paper coatings

*Properties:* Wh. cryst. powd.; 0.1% max. on 325 mesh; 1.4 µm median particle size; sp.gr. 2.42; bulk dens. 0.25 g/cc (untamped); surf. area 4 m<sup>2</sup>/g; oil absorp. 36; brightness 97; ref. index 1.57; pH 10 (5% w/v slurry); hardness (Mohs) 2.5-3.5

**Alcan Superfine SF 7** [Alcan]

*Chem. Descrip.:* Alumina trihydroxide

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%), water (34.9%), SiO<sub>2</sub> (0.015%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Fire retardant/smoke suppressant filler for plastics, PVC, rubber tech. goods, cable compds., conveyor belting, flooring compds., thermoplastic molding/extrusion/sheet, thermosetting molding compds., polyester and acrylic pultrusion, fabric coatings, paper filling and coating, printing inks, paints, adhesives, adhesive tapes and in toothpaste, cosmetics, polishes and waxes; whitener and brightener in paper coatings

*Properties:* Wh. cryst. powd.; 0.1% max. on 325 mesh, 1.0 µm median particle size; sp.gr. 2.42; bulk dens. 0.2 g/cc (untamped); surf. area 7 m<sup>2</sup>/g; oil absorp. 42; brightness 98; ref. index 1.57; pH 10 (5% w/v slurry); hardness (Mohs) 2.5-3.5

**Alcan Superfine SF 9** [Alcan]

*Chem. Descrip.:* Alumina trihydroxide

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%), water (34.9%), Na<sub>2</sub>O (0.45%), SiO<sub>2</sub> (0.015%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Fire retardant/smoke suppressant filler for plastics, PVC, rubber tech. goods, cable compds., conveyor belting, flooring compds., thermoplastic molding/extrusion/sheet, thermosetting molding compds., polyester and acrylic pultrusion, fabric coatings, paper filling and coating, printing inks, paints, adhesives, adhesive tapes and in toothpaste, cosmetics, polishes and waxes

*Properties:* Wh. cryst. powd.; 0.1% max. on 45 µm; 0.6 µm median particle size; sp.gr. 2.42; bulk dens. 0.2 g/cc (untamped); surf. area 8-10 m<sup>2</sup>/g; oil absorp. 45; brightness 98; ref. index 1.57; pH 10.5 (5% w/v slurry); hardness (Mohs) 2.5-3.5

*Toxicology:* ACGIH airborne particulate 10 mg/m<sup>3</sup> (total), 4 mg/m<sup>3</sup> (respirable)

**Alcan Superfine SF 11** [Alcan]

*Chem. Descrip.:* Alumina trihydroxide

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%), water (34.9%), SiO<sub>2</sub> (0.015%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Fire retardant/smoke suppressant filler for plastics, PVC, rubber tech. goods, cable compds., conveyor belting, flooring compds., thermoplastic molding/extrusion/sheet, thermosetting molding compds., polyester and acrylic pultrusion, fabric coatings, paper filling and coating, printing inks, paints, adhesives, adhesive tapes and in toothpaste, cosmetics, polishes and waxes; whitener and brightener in paper coatings

*Properties:* Wh. cryst. powd.; 0.1% max. on 325 mesh, 0.7 µm median particle size; sp.gr. 2.42; bulk dens. 0.2 g/cc (untamped); surf. area 11 m<sup>2</sup>/g; oil absorp. 44; brightness 98; ref. index 1.57; pH 10.5 (5% w/v slurry); hardness (Mohs) 2.5-3.5

**Alcan Ultrafine UF15** [Alcan]

*Chem. Descrip.:* Alumina trihydroxide

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65.1%), water (34.5%), Na<sub>2</sub>O (0.12-0.21%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant/smoke suppressant filler for plastics (PVC, PP, PE)

and rubbers, cable, conveyor belting, thermoplastic moldings, paper coatings, toothpaste, paint (titania extender), adhesives, cosmetics, flooring compds., coated fabrics, furniture foams

*Properties:* Wh. ultrafine cryst. powd.: 0.8 µm median particle size; sp.gr. 2.42; bulk dens. 0.50 g/cc (untamped); surf. area 15 m<sup>2</sup>/g; oil absorp. 37 g/100 g; ref. index 1.57; pH 10 (5% slurry)

**Alcan Ultrafine UF25** [Alcan]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65.1%), water (34.5%), Na<sub>2</sub>O (0.12-0.21%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant/smoke suppressant filler for plastics (PVC, PP, PE) and rubbers, cable, conveyor belting, thermoplastic moldings, paper coatings, toothpaste, paint (titania extender), adhesives, cosmetics, flooring compds., coated fabrics, furniture foams

*Properties:* Wh. ultrafine cryst. powd.: 0.7 µm median particle size; sp.gr. 2.42; bulk dens. 0.55 g/cc (untamped); surf. area 25 m<sup>2</sup>/g; oil absorp. 43 g/100 g; ref. index 1.57; pH 10.5 (5% slurry)

**Alcan Ultrafine UF35** [Alcan]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65.1%), water (34.5%), Na<sub>2</sub>O (0.12-0.21%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant/smoke suppressant filler for plastics (PVC, PP, PE) and rubbers, cable, conveyor belting, thermoplastic moldings, paper coatings, toothpaste, paint (titania extender), adhesives, cosmetics, flooring compds., coated fabrics, furniture foams

*Properties:* Wh. ultrafine cryst. powd.: 0.5 µm median particle size; sp.gr. 2.42; bulk dens. 0.60 g/cc (untamped); surf. area 35 m<sup>2</sup>/g; oil absorp. 50 g/100 g; ref. index 1.57; pH 11 (5% slurry)

**Alcoa® Grade C-231** [Alcoa]

*Chem. Descrip.:* Hydrated alumina

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Reinforcing agent, smoke suppressant, flame retardant used in mfg. of glass, chems., catalysts, vitreous enamels, ceramic whitewares; pigment; filler in polymer systems (elec. wire insulation, cultured marble, countertop surfs.); filler for toothpastes, adhesives, coatings, paper, cosmetics, waxes, and polishes

*Properties:* Wh. ground powd.: 14 µ median particle size; 75-85% thru 325 mesh; sp.gr. 2.42; bulk dens. 0.8 g/cc (loose); surf. area 2.5 m<sup>2</sup>/g; ref. index 1.57; hardness (Mohs) 2.5-3.5

**Alcoa® Grade C-333** [Alcoa]

*Chem. Descrip.:* Hydrated alumina

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Reinforcing agent, smoke suppressant, flame retardant used in mfg. of glass, chems., catalysts, vitreous enamels, ceramic whitewares; pigment; filler in polymer systems (elec. wire insulation, cultured marble, countertop surfs.); filler for toothpastes, adhesives, coatings, paper, cosmetics, waxes, and polishes

*Properties:* Wh. ground powd.: 7 µ median particle size; 98% thru 325 mesh; sp.gr. 2.42; bulk dens. 0.6 g/cc (loose); surf. area 3.6 m<sup>2</sup>/g; ref. index 1.57; hardness (Mohs) 2.5-3.5

**Alcoa® KB30** [Alcoa; Alcoa of Australia]

*Chem. Descrip.:* Hydrated alumina

*Chem. Analysis:* Al(OH)<sub>3</sub> (99.6%); Al<sub>2</sub>O<sub>3</sub> (65.1%); Na<sub>2</sub>O (0.28%); CaO (0.013%); Fe<sub>2</sub>O<sub>3</sub> (0.008%); sol. Na<sub>2</sub>O (0.005%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant filler for polymers, zeolite prod. (for detergents, adsorbents, catalysts); water treatment; paper sizing; titanium dioxide production

*Properties:* Dry free-flowing powd. or wet (5% moisture); 86% on 325 mesh (45 µ); 65 µ median particle size; good sol. in acid and caustic; bulk den. 1150 kg/m<sup>3</sup> (loose), 1430 kg/m<sup>3</sup> (packed); brightness 90%

**Alcodet® 218** [Rhodia HPCII; Rhodia HPCII France; Costec]

*Chem. Descrip.:* PEG-10 isolauryl thioether

CAS 9004-83-5

*Uses:* Emulsifier, wetting agent, detergent for metal cleaning specialties, steel processing, textile scouring, insecticide emulsions, cosmetics, wood pulp/paper industries; carbon soil and grease cleaners

*Properties:* Gardner 6 max. liq.; sol. in water and alkaline detergent builders; sp.gr. 1.05; dens. 8.6 lb/gal; HLB 13.9; cloud pt. 52 C (1% aq.); surf. tens. 28 dynes/cm (0.05%); 95% act.; nonionic

**Alcodet® 260** [Rhodia HPCII; Costec]

*Chem. Descrip.:* PEG-6 isolauryl thioether

CAS 9004-83-5

*Uses:* Emulsifier, wetting agent, detergent for metal cleaning specialties, steel processing, textile scouring, insecticide emulsions, cosmetics, wood pulp/paper industries; carbon soil and grease cleaners

*Properties:* Gardner 6 max. liq.; sol. in org. solvs.; sp.gr. 1.01; dens. 8.4 lb/gal; HLB 11.0; surf. tens. 29 dynes/cm (0.05%); 100% conc.; nonionic

**Alcodet® SK** [Rhodia HPCII; Costec]

*Chem. Descrip.:* PEG-8 isolauryl thioether

CAS 9004-83-5

*Uses:* Emulsifier, wetting agent, detergent for metal cleaning specialties, textile scouring, insecticide emulsions, paints, hair prods., wood and paper industries; emulsifier for petrol oils, chlorinated solvs., silicones; carbon soil and grease cleaners

*Properties:* Gardner 6 max. liq.; sol. in water; sp.gr. 1.03; dens. 8.5 lb/gal; HLB 12.7; cloud pt. 28 C (1% aq.); surf. tens. 31 dynes/cm (0.05%); 100% conc.; nonionic

**Alcofix®** [Ciba Spec. Chems./Paper]

*Uses:* Pitch fixative, antiredeposition aid for pulp, paper, and paperboard

*Properties:* Cationic

**Alcogum® L-15** [Alco]

*Chem. Descrip.:* Polyacrylic acid

CAS 9003-01-4

*Uses:* Thickener for adhesives, paints, paper coatings, natural and syn. latexes, textiles; alkali-swellable

*Regulatory:* FDA approved

*Properties:* Milky wh. liq.; sp.gr. 1.05; visc. 15 cps; pH 3.0; 30% solids; anionic

**Alcoproof®** [Ciba Spec. Chems./Paper]

*Uses:* Sizing agent for paper and paperboard

**Alcoseal®** [Ciba Spec. Chems./Paper]

*Uses:* Tail seal adhesive for tissue industry

**Alcosperse® 149** [Alco]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* General purpose min. dispersant, sequestrant, antiredeposition agent used in pigments, paints, coatings, mining, pigment slurries, adhesives, textiles, and water softeners; pigment dispersant, stabilizer in NR and SR latexes; food pkg. adhesives, coatings, paper/paperboard; low foaming; high efficiency

*Regulatory:* FDA 21CFR §175.105, 175.320, 176.170, 176.180

*Properties:* Dry and liq. forms; m.w. 2500; pH 8; 40% solids; anionic

*Toxicology:* Very low toxicity

**Alcosperse® 404** [Alco]

*Chem. Descrip.:* Polyacrylic acid aq. sol'n.

CAS 9003-01-4

*Uses:* Dispersant, suspending agent, stabilizer, thickener for hard. surf. detergents, textile scours and rinse aids, pigment slurries, paper coatings, paints, mining, and ceramic applics.; dispersant for NR and SR latexes

*Properties:* Liq.; water-sol.; m.w. 250,000; visc. 270 cps; 25% act.; anionic

**Alcosperse® 602-N** [Alco]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* Dispersant, sequestrant, antiredeposition agent, process aid for powd. or liq. laundry, hard surf., auto dish liqs. and powd. detergents, pigments, high solids slurries, paper coatings, paints, textile scours, rinses, dye baths, water softeners, mining, ceramics

*Properties:* Dry, liq., and acid; water-sol.; anionic

**Alcostat®** [Ciba Spec. Chems./Paper]

*Chem. Descrip.:* Conductive resins and antistats

*Uses:* Antistat for computer tapes, electroreprographic printing, and offset litho masters

**Alcotech® RCS** [Ciba Spec. Chems./Paper]

*Uses:* Closed-loop retention control system for paper and paperboard

**Aldo® MS LG FG** [Lonza]

*Chem. Descrip.:* Glyceryl stearate, low glycerin

CAS 31566-31-1

*Uses:* Food emulsifier and emulsion stabilizer for baked goods, dairy prods., edible oils/shortenings, confectionery, pet foods; slip and antitack agent in hot-melt adhesives, solv. or solventless coatings; emulsifier for paper defoamers; emulsifier for cosmetic creams, lotions, pastes, and gels

*Use Level:* 4-6% on shortening (cake), 0.1-0.2% (frozen desserts), 0.5% (margarine), 0.05-1% (dry potatoes)

*Regulatory:* FDA 21CFR §184.1505, GRAS

*Properties:* Wh. beads, bland odor and taste; m.p. 58-62 C; HLB 3; acid no. 2 max.; sapon. no. 162; 40-45% alpha monoglycerides; nonionic

*Storage:* Store in cool, dry area

#### Alfol® 20+ [Condea Vista]

*Chem. Descrip.:* Blend of C20 and higher even-carbon-number primary linear alcohols

*Uses:* Lubricant for plastics, textiles, and metals; defoamer for paper, aq. slurries; water evaporation control agent; intermediate for emulsifiers, biodeg. surfactants, plastic lubricants, syn. waxes and binders

*Regulatory:* FDA approved

*Properties:* Off-wh. solid; sol. in alcohol, acetone, ether; water-insol.; m.w. 431; sp.gr. 0.817 (140/140 F); dens. 6.80; m.p. 113-129 F; b.p. > 650 F; iodine no. 8.7; sapon. no. 5.7; hyd. no. 157; flash pt. (PM) 390 F; 88.5% act.

#### Alfol® 22+ [Condea Vista]

*Chem. Descrip.:* C22 and higher linear alcohols

*Uses:* Detergent intermediate; lubricant; defoamer; emollient; in fuel oil; waxes and polishes; in paper pulp defoamers

*Properties:* Wh. solid; sol. in alcohol, acetone, ether; water-insol.; 100% conc.

*Environmental:* Biodeg.

#### Alfonic® 1012-5.5 [Condea Vista]

*Chem. Descrip.:* C10-12 parath-5.6

CAS 66455-15-0

*Uses:* Emulsifier, foaming agent, detergent for household cleaners, heavy duty cleaners, laundry detergents, textile/leather processing, pulp/paper processing, metal cleaners, carwash, agric. sprays, circuit board cleaners

*Properties:* APHA 5 clear liq.; sol. in polar solvs. e.g., water, ethanol, IPA, glycol ethers; m.w. 410; sp.gr. 0.972; visc. 21 cSt (100 F); m.p. 37-40 F; HLB 12; hyd. no. 145; pour pt. 39 F; cloud pt. 99 F (1% aq.); flash pt. (PM) 290 F; pH 7.0 (1% aq.); nonionic

*Environmental:* Biodeg.

*Storage:* Nitrogen blanketing during storage and transfer is rec.

#### Alfonic® 1412-9 [Condea Vista]

*Chem. Descrip.:* C14-12 parath-9

CAS 68439-50-9

*Uses:* Emulsifier, foaming agent, cleaner for household cleaning prods., heavy-duty liq. and powd. laundry detergents, all-purpose cleaners, industrial applics. for textile and leather processing, pulp/paper processing, metal cleaners, car wash, agric. sprays, circuit board cleaners; dispersant; wetting agent; soil carrying and homogenizing ability

*Properties:* APHA 30 max. solid; sol. in polar solvs., e.g., water, ethanol, IPA, glycol ethers; m.w. 601; sp.gr. 0.995 (122/122 F); visc. 43.1 cSt (100 F); m.p. 68-77 F; HLB 13.2; hyd. no. 94; pour pt. 72 F; cloud pt. 175 F (1% aq.); flash pt. (PM) > 450 F; pH 7; 100% act.; nonionic

#### Alkafoam™ 20 [BASF]

*Uses:* General purpose cleaning chem. for paper processing

#### Alkamide® STEDA [Rhodia HPCII]

*Chem. Descrip.:* Ethylene bisstearamide

CAS 110-30-5; EINECS/ELINCS 203-755-6

*Uses:* Additive in pulp/paper defoamer formulations; lubricant, mold release agent, antiblocking agent in calendaring, extrusion, and inj. molding of PVC and other plastics; plasticizer, antistat, pigment dispersant for resins and plastics

*Properties:* Flakes; 95% amide; nonionic

#### Alkamuls® EL-620 [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* PEG-30 castor oil

CAS 61791-12-6

*Uses:* Detergent, emulsifier, wetting agent, pigment dispersant, antistat, lubricant, solubilizer for industrial/household cleaners, cosmetics, pharmaceuticals, metalworking fluids, leather, pesticides, herbicides, paper industries, magnetic coupling fluids; stabilizer for PVAc emulsion paints; emulsifier for oleoresinous binders; coemulsifier for fabric softeners and dye carriers; food-contact surfactant; food pkg. adhesives, paper/paperboard, animal glue

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210, 178.3120; exempt from tolerance under EPA 40CFR §180.1001(c)

*Properties:* Lt. brn. clear visc. liq., mild oily odor; sol. in water, acetone, CCl<sub>4</sub>, alcohols, veg. oil, ethers, toluene, xylene; sp.gr. 1.04-1.05; dens. 8.705 lb/gal; visc. 600-1000 cps; HLB 12.0; cloud pt. 42 C (1% aq.); flash

pt. 291-295 C; surf. tens. 41 dynes/cm; 100% act.; nonionic

*Toxicology:* LD50 (oral, rat) 40 g/kg; low oral toxicity; not primary skin or eye irritants

#### Alkamuls® EL-719 [Rhodia HPCII; Rhodia HPCII France; Costec]

*Chem. Descrip.:* PEG-40 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, wetting agent for industrial/household cleaners, pesticides, paper, leather, plastics, paints, textiles, and cosmetics; dispersant for pigments; emulsifier for vitamins and drugs; indirect food additive; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210, 178.3120; exempt from tolerance under EPA 40CFR §180.1001(c)(e)

*Properties:* Yel. clear liq., oily odor; sol. in water, acetone, CCl<sub>4</sub>, alcohols, veg. oil, ether, toluene, xylene; sp.gr. 1.06-1.07; dens. 8.9-9.0 lb/gal; visc. 500-800 cps; HLB 13.6; cloud pt. 80 C (1% aq.); flash pt. 275-279 C; surf. tens. 38 dynes/cm (0.1%); 96% min. act.; nonionic

*Toxicology:* LD50 (oral, rat) 70 g/kg; low oral toxicity; not primary skin or eye irritants

#### Alkamuls® PSMS-20 [Rhodia HPCII]

*Chem. Descrip.:* Polysorbate 60

CAS 9005-67-8

*Uses:* Wetting agent, emulsifier for cosmetics, food, textiles, paper coatings; fiber-to-metal lubricant for fibers and yarns

*Properties:* Yel. visc. liq., gel on standing; typ. odor; water disp.; dens. 1.1 g/ml; HLB 14.9; sapon. no. 45-55; 97% act.; nonionic

#### Alkamuls® S-8 [Rhodia HPCII]

*Chem. Descrip.:* PEG-8 stearate

CAS 9004-99-3

*Uses:* Emulsifier, self-emulsifying lubricant and softener for syn. fibers, textiles, leather; thickener, stabilizer for starch-based paper coatings; internal antistat for PS

*Regulatory:* FDA approved

*Properties:* Off-wh. solid, bland char. odor; disp. in water, aromatic and aliphatic solvs.; insol. in min. oil; m.p. 28 C; HLB 11.2; acid no. 1 max.; sapon. no. 87-97; hyd. no. 87-102; pH 7-9 (5% in DI water); 100% conc.; nonionic

#### Alkanol® 189-S [DuPont; DuPont Canada]

*Chem. Descrip.:* Sodium alkyl sulfonate

*Uses:* Wetting agent, detergent, penetrant, foaming agent for textiles, elastomers, plastics, film, metal cleaning and pickling, hard surf. cleaning, and chemical mfg.; wetting agent for paper industry; dyeing assistant; leveling agent for acid dyes on nylon; dispersant, wetting agent, penetrant for agric. chems.; effective in acid and alkali media

*Properties:* Reddish-br. liq., alcoholic odor; sol. in water; sp.gr. 1.06 g/mL; dens. 8.8 lb/gal; visc. 30 cps; cloud pt. < 0 C; flash pt. (PMCC) 21 C; pH 7.5-9.0 (1%); surf. tens. 38 dynes/cm (0.1%); 31.5% act.; contains IPA; anionic

*Precaution:* Flamm.

#### Alkanol® 1009C [DuPont]

*Uses:* Detergent for hard surf. cleaners; metal cleaning and pickling; wetting agent, rewetting agent for textiles, paper; dyeing assistant; leveling agent for acid dyes on nylon; dispersant, wetting agent, penetrant for agric. chems.; adhesives; aerospace and aircraft; chem. processing; coatings; sealants; military; mining; petrol. refining/distribution

#### Alkanol® 6112 [DuPont; DuPont Canada]

*Chem. Descrip.:* Fatty alcohol ethoxylate

*Uses:* Wetting agent for textile processing, paper industry; dyeing assistant; leveling agent for acid dyes on nylon; detergent for hard surf. cleaners; metal cleaning and pickling; dispersant, wetting agent, penetrant for agric. chems.; nonrewetting; stable to acids, bases

*Properties:* Milky wh. emulsion, mild soapy odor; misc. with water; sp.gr. 0.91 g/mL; dens. 7.6 lb/gal; flash pt. (PMCC) 113 C; pH 6.6; surf. tens. 26 dynes/cm (0.1%); 100% act.; nonionic

#### Alkanol® A-CN [DuPont; DuPont Canada]

*Chem. Descrip.:* Amine ethoxylate

*Uses:* Surfactant, antiprecipitant, dyeing assistant, dye solubilizer, leveling agent, contrast agent for textile dyeing; wetting agent for paper industry; detergent for hard surf. cleaners; metal cleaning and pickling; dispersant, wetting agent, penetrant for agric. chems.

*Properties:* Lt. amber liq., alcoholic odor; 50% sol. in water; sol. in polar solvs.; sp.gr. 0.98 g/mL; dens. 8.2 lb/gal; HLB 14.4; cloud pt. > 100 C (upper, 1%); flash pt. (PMCC) 45 C; pH 7-9; surf. tens. 39 dynes/cm

(0.1%); 60% act.; nonionic

*Precaution:* Combustible

**Alkanol® ND** [DuPont; DuPont Canada]

*Chem. Descrip.:* Sodium alkyl diaryl sulfonate

*Uses:* Foaming agent, wetting agent, dyeing assistant, surfactant for textiles, chemical mfg.; leveling agent for acid dyes on nylon; detergent for hard surf. cleaners; metal cleaning and pickling; wetting agent for paper industry; dispersant, wetting agent, penetrant for agric. chems.

*Properties:* Clear yel. liq.; terpene odor; misc. with water; sp. gr. 1.15 g/mL; dens. 9.6 lb/gal; visc. 118 cP; cloud pt. < 0 C; flash pt. extinguishes flame; surf. tens. 34 dynes/cm (0.1% aq.); 45% act.; anionic

**Alkanol® SB** [DuPont]

*Uses:* Detergent for hard surf. cleaners; metal cleaning and pickling; wetting agent, rewetting agent for textiles, paper; dyeing assistant; leveling agent for acid dyes on nylon; dispersant, wetting agent, penetrant for agric. chems.; adhesives; aerospace and aircraft; chem. processing; coatings; sealants; military; mining; petrol. refining/distribution

**Alkanol® XC** [DuPont; DuPont Canada]

*Chem. Descrip.:* Sodium alkylnaphthalene sulfonate

*Uses:* Wetting agent, dispersant, penetrant for bleaching and dyeing of textiles, leather, paper, agric., chemical mfg., photography; reduces shrinkage in ceramics mfg.; dry colors mfg.; detergent in hard surf. cleaners; metal cleaning and pickling; low foaming

*Properties:* Lt. buff powd., naphthenic odor; sol. in ethyl alcohol, acetone, benzene; 8-10% in water; sp. gr. 0.41 g/mL; dens. 3.4 lb/gal; pH 9.5-10.0 (1% aq.); surf. tens. 41 dynes/cm (0.1% aq.); 90% act.; anionic

**Alkanox® P-24** [Great Lakes]

*Chem. Descrip.:* Bis (2,4-di-t-butylphenyl) pentaerythritol diphosphate  
CAS 26741-53-7; EINECS/ELINCS 247-952-5

*Uses:* Antioxidant for stabilization of polyolefins, ABS, PVC, PC; color stabilizer; food pkg. adhesives, paper/paperboard, polymers; synergistic with UV stabilizers

*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1520(c), 177.1580, 177.1950, 177.1960, 177.1970, 177.1980, 178.2010; BGA approval

*Properties:* Wh. powd., odorless; sol. (g/100 ml): 41 g toluene, 35.7 g THF, 34.2 g dichloromethane, 10.7 g acetone, 7.3 g hexane; insol. in water; m.w. 604; dens. 0.43 g/ml (20 C); m.p. 160-175 C; acid no. 2.5 max.; 10.0-10.9% P

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; moderate eye irritant

*Storage:* Sensitive to humidity; store in dry place

**Alkopen™ 50** [BASF]

*Uses:* Alkaline boilout cleaning chem. for paper processing

**Alkaquat® DMB-451-50, DMB-451-80** [Rhodia Canada; Rhodia HPCII France]

*Chem. Descrip.:* Benzalkonium chloride

CAS 8001-54-5

*Uses:* Wetting agent, emulsifier, biocide, disinfectant for use in beverage industry, dairy industry, food processing, water treatment, paper industry, pest control, preservatives, antiodandruff rinses, general disinfection and sanitization for hospitals, laundries

*Properties:* Pale-yel. liq.; sol. in water, ethanol, acetone, aliphatic solv.; sp. gr. 0.96; surf. tens. 33 dynes/cm (1%); 50 and 80% act.; cationic

**Alkasan™ Dyestrip X** [BASF]

*Chem. Descrip.:* Surfactant, chelating agents, and caustic

*Uses:* Alkaline cleaning agent for printing inks and dyes, boiling out dye systems and size presses, or as boilout on machines making colored grades of paper; felt cleaner on machines where dye carryover on fabric is concern; effective on all dyes, incl. cationic dyes

**Alkasan™ GNF** [BASF]

*Uses:* General purpose cleaning chem. for paper processing

**Alkasolv™ BP** [BASF]

*Uses:* Alkaline boilout cleaning chem. for paper processing

**Alkasolv™ BQ** [BASF]

*Uses:* Coating kitchen boilout cleaning chem. for paper processing

**Alkasurf® CA-520** [Rhodia Canada]

*Chem. Descrip.:* Octoxynol-5

CAS 9002-93-1

*Uses:* Emulsifier for nonpolar solvs. in solv. emulsion cleaners, pesticides, dry cleaning detergents, floor polishes, paints; anti-icing additive for gasoline; solubilizer/dispersant for hair colorants; aq. textile processing; aq. pulp/paper processing; metal cleaners, floor cleaners, sanitizers

*Properties:* HLB 10.0; cloud pt. < 20 C (1% aq.); nonionic

**Alkasurf® CA-620** [Rhodia Canada]

*Chem. Descrip.:* Octoxynol-7 (7-8 EO)

CAS 9002-93-1

*Uses:* Emulsifier for solvs. such as xylene, emulsion polymerization, detergents, paints, aq. textile and pulp/paper processing, industrial metal cleaners, floor cleaners, sanitizers; controlled foam

*Properties:* HLB 12.0; cloud pt. < 20 C (1% aq.); nonionic

**Alkasurf® CO-630** [Rhodia Canada]

*Chem. Descrip.:* Nonoxynol 9

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier for detergent compounding, textiles, leather, pulp/paper processing, acid cleaners, corrosion inhibitors, emulsion and soak tank cleaners, agric. inerts

*Properties:* HLB 13; cloud pt. 52-56 C (1% aq.); nonionic

**Alkasurf® CO-710** [Rhodia Canada]

*Chem. Descrip.:* Nonoxynol 10.5-11

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier for detergent compounding, textiles, leather, pulp/paper processing, acid cleaners, corrosion inhibitors, emulsion and soak tank cleaners, agric. inerts

*Properties:* HLB 13.6; cloud pt. 70-74 C (1% aq.); nonionic

**Alkasurf® CO-720** [Rhodia Canada]

*Chem. Descrip.:* Nonoxynol-12

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier for detergent compounding, textiles, leather, pulp/paper processing, acid cleaners, corrosion inhibitors, emulsion and soak tank cleaners, agric. inerts

*Properties:* HLB 14.2; cloud pt. 50-54 C (1% in 10% NaCl); nonionic

**Alkaterge®-E** [ANGUS]

*Chem. Descrip.:* Ethyl hydroxymethyl oleyl oxazoline

CAS 68140-98-7; EINECS/ELINCS 268-820-3

*Uses:* Detergent, emulsifier, wetting agent, antifoam, antioxidant for salts, soaps, paper, textiles, and metal cleaners; emulsion stabilizer; acid acceptor; cosmetic and personal care raw material; pigment grinding aid and dispersant for coatings, nonaq. systems

*Properties:* Gardner 15 max. clear liq.; sol. in most org. liq., slight sol. in water; sp. gr. 0.9; dens. 7.74 lb/gal; visc. 155 cp; f.p. -31 C; HLB 4.0-5.0; flash pt. > 200 F; surf. tens. 40 dynes/cm; 70% conc.; amphoteric

**Alkenyl Succinic Anhydride C1618 (ASA)** [Albemarle]

*Chem. Descrip.:* Alkenyl succinic anhydride C1618

CAS 70983-55-0

*Uses:* Sizing agent in paper production; surfactant intermediate; lubricant additive; plasticizer; corrosion inhibitor

**Alpha-Cel** [Int'l. Fiber]

*Uses:* Thickener and binder in latex paints, inks, dyes, drilling muds, workover fluids; visc. builder improving prod. finish for syn. leather goods (shoes, belts, purses); filter aid medium for wine/beer/juice filtration; lightweight filler, absorbent, bulking agent for spray coatings for steel/pipe, adhesives, sealing compds., textured paints; deflocculant preventing streaking and ink blotting in carbonless copy paper; artificial snow; welding electronics; nonsiliceous; nonabrasive

*Environmental:* Environmentally safe

*Storage:* Indefinite shelf life

**Alphatex HP** [IMERYS]

*Chem. Descrip.:* Calcined kaolin clay

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Pigment, opacifier in paper coatings and filling applics.; titanium dioxide extender; imparts high brightness and opacity with minimal abrasion

*Properties:* Pulverized, slurry; 0.01% 325-mesh residue; 85% finer than 2 µ particle size; sp. gr. 2.72; visc. 500 cps (50% solids); brightness (GE) 92.5-93.5; ref. index 1.56; pH 4-7 (20% aq.); hardness (Mohs) 2; 0.5-1.0% moisture (pulverized), 47-51% moisture (slurry)

**Altriform®** [BK Giulini Chemie]

*Chem. Descrip.:* Aluminum triformate

CAS 7360-53-4; EINECS/ELINCS 230-898-1

*Uses:* Precipitant, fixing agent for mfg. of acid-free papers

**Aluminasol 100** [Nissan Chem. Ind.]

*Chem. Descrip.:* Alumina colloidal aq. sol'n

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (10%); EINECS/ELINCS 215-691-6

*Uses:* Binder, caking agent in glass fiber, asbestos, ceramic fiber in inorg. textiles; caking agent, film-former with heat resist. and adhesion for mfg. of porcelain, refractories; antistat, hand improver in textiles; catalyst carrier;

polymer film-former; fiber finishing agent; fixing agent for resin treatments; abrasion resist. aid in fishing nets/ropes; filler improving smoothness, whiteness, and moisture resist. in paper; binder in paper surf. treatments; coagulant; emulsifier; dispersant; strong thixotropy; heat resist.; bond str.; adhesion; corrosion resist.; weatherproof

*Properties:* Opal colored amorphous cryst.; sp.gr. 1.11 (20 C); pH 3.6 (20 C)

*Storage:* Store @ normal temps. in original sealed containers

#### Aluminasol 200 [Nissan Chem. Ind.]

*Chem. Descrip.:* Alumina colloidal aq. sol'n.

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (10%); EINECS/ELINCS 215-691-6

*Uses:* Binder, caking agent in glass fiber, asbestos, ceramic fiber in inorg. textiles; caking agent, film-former with heat resist. and adhesion for mfg. of porcelain, refractories; antistat, hand improver in textiles; catalyst carrier; polymer film-former; fiber finishing agent; fixing agent for resin treatments; abrasion resist. aid in fishing nets/ropes; filler improving smoothness, whiteness, and moisture resist. in paper; binder in paper surf. treatments; coagulant; emulsifier; dispersant; strong thixotropy; heat resist.; bond str.; adhesion; corrosion resist.; weatherproof

*Properties:* Opal colored amorphous cryst.; sp.gr. 1.10 (20 C); pH 4.8 (20 C)

*Storage:* Store @ normal temps. in original sealed containers

#### AMA® [Vinings Ind.]

*Uses:* Biocide for pulp/paper, mineral, and starch slurries

#### Ambond® 1505 [Georgia-Pacific Resins]

*Chem. Descrip.:* Polyacrylamide

CAS 9003-05-8

*Uses:* Dry str. resin for thin or thick paper stock systems; boosts cationic starch efficiency and wet str. efficiency in the sheet; can be applied to balance wet end system charge

*Properties:* Clear to pale yel. liq.; visc. 5000 cps; pH 5.0; 22% NV; anionic

#### Ambond® 1590 [Georgia-Pacific Resins]

*Chem. Descrip.:* Polyacrylamide resin

CAS 9003-05-8

*Uses:* Dry str. resin for thin or thick paper stock systems; charge promoter resin; manages cationic demand in stock systems whenever interfering anionics are present

*Properties:* Clear to straw amber liq.; visc. 300 cps; pH 5.0; 50% NV; cationic

#### Amerfloc® 275 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Acrylamide-acrylic acid resin

*Uses:* Flocculant and coagulant for potable water clarification, water plant sludge dewatering applics., paper/paperboard applics.; flocculant for beet/cane sugar clarification; thickener in aq. animal feeds; food-contact paper/paperboard

*Use Level:* 0.1-1.0 ppm (flocculant, coagulant aid), 0.5-10 lb/ton dry solids (sludge conditioning), 1 ppm (potable water)

*Regulatory:* FDA 21CFR § 173.5, 176.110, 176.170, 176.180, 573.120; EPA approved for potable water @ 1 ppm max.

*Properties:* Wh. free-flowing powd.; pH 7.0 (0.5%); anionic

*Storage:* Store in cool, dry place

#### Amerfloc® 285 [Ashland/Drew Ind. Div.]

*Uses:* Flocculant; dewatering agent for industrial slurries and water and wastewater clarification applics.; food-contact paper/paperboard

*Use Level:* 0.1-1.0 ppm (flocculant or clarification); 0.5-10 lb/ton (sludge conditioning)

*Regulatory:* FDA 21CFR § 173.5, 176.110, 176.170, 176.180, 573.120

*Properties:* Wh. free-flowing powd.; high m.w.; pH 7.5 (0.5%); anionic

*Storage:* Store in cool, dry place in plastic, glass, epoxy lined, or stainless steel equip.

#### Amerfloc® 485 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Polyamine

*Uses:* Coagulant for water and wastewater clarification, oily wastewater demulsification, save-all clarification; as paper retention or drainage aid; solid/liq. separation agent for paints and coatings; food-contact paper/paperboard; can be used in place of conventional inorg. coagulants to produce low turbidity waters in influent water and effluent wastewater applics.

*Use Level:* 1-10 ppm (raw water clarification), 5-1000 ppm (industrial wastewater), 0.5-5 lbs/ton (retention and drainage aids)

*Regulatory:* FDA 21CFR § 173.60, 176.170, 176.180; EPA approved for potable water treatment up to 20 ppm

*Properties:* Lt. amber liq.; sp.gr. 1.16; visc. 750 cps; f.p. -7 C; flash pt. none; pH 6; cationic

*Storage:* 1 yr. shelf life in glass, plastic, epoxy or rubber lined or stainless

steel equip.

#### Amergel® 100 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Organics, surfactants, water blend

*Uses:* Antifoam for aq. process systems, e.g., pulp/paper, nonwovens, effluent systems; defoamer in food-contact paper/paperboard; rec. where oils, solvs., waxes, silicas are undesirable

*Regulatory:* FDA 21CFR § 176.210

*Properties:* Wh. creamy liq.; disp. in water; sp.gr. 0.97; visc. 600-1800 cps; thixotropic

*Storage:* Store indoors in winter; subject to freezing below 0 C; if prod. freezes, gradually thaw @ R.T. with mild agitation to restore

#### Amergel® 200 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Organics, surfactants, water blend

*Uses:* Antifoam for aq. process systems, e.g., pulp/paper, nonwovens, effluent systems, aeration lagoons; defoamer in food-contact paper/paperboard; rec. where oils, solvs., waxes, silicas are undesirable

*Regulatory:* FDA 21CFR § 176.210

*Properties:* Wh. free-flowing creamy liq.; disp. in water; sp.gr. 0.97; visc. 400 cps; f.p. < -3 C; flash pt. (PMCC) > 93 C

*Storage:* Store indoors in winter; subject to freezing below 0 C; if prod. freezes, gradually thaw @ R.T. with mild agitation to restore

#### Amergel® 500 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Organics, surfactants, water blend

*Uses:* Antifoam for aq. process systems, e.g., pulp/paper, nonwovens, effluent systems, aeration lagoons; defoamer in food-contact paper/paperboard; patented; rec. where oils, solvs., waxes, silicas are undesirable

*Regulatory:* FDA 21CFR § 176.210

*Properties:* Wh. free-flowing creamy liq.; disp. in water; sp.gr. 0.97; visc. 400 cps; f.p. < 32 F; flash pt. (PMCC) > 200 F

*Storage:* Store indoors in winter; subject to freezing below 0 C; if prod. freezes, gradually thaw @ R.T. with mild agitation to restore

#### Ameripol Synpol 1013 [Ameripol Synpol]

*Chem. Descrip.:* Hot polymerized non-crosslinked SBR

CAS 9003-55-8

*Uses:* Used for paper saturation, as barrier coat prior to applic. of pressure-sensitive adhesive; useful in blends with other elastomer to increase cohesive str., green str.

*Properties:* Bale, crumb

#### Amerstat® 233 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* 3,5-Dimethyl tetra-hydro-2-H,1,3,5-thiadiazole-2-thione

CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Antimicrobial in industrial water systems; preservative in aq. systems, paint, food pkg. adhesives/paper/animal glue, latex, mineral slurries, inks, and metalworking; effective pH 6-8; 60 C max. temp.

*Use Level:* 0.1-0.5%

*Regulatory:* FDA 21CFR § 175.105, 176.230, 176.320, 178.3120; EPA registered

*Properties:* Clear pale yel. to amber liq.; water-misc.; sp.gr. 1.16-1.20; dens. 9.85 lb/gal; flash pt. (PMCC) 68 C; 24% act.

#### Amerstat® 251 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* 1.15% 5-Chloro-2-methyl-4-isothiazolin-3-one and 0.35% 2-methyl-4-isothiazolin-3-one

*Uses:* Antimicrobial, preservative in latex, food pkg. adhesives/paper, mineral slurries, inks, metal working; effective pH 6-9.5; 50 C max. temp.

*Use Level:* 0.01-0.1%

*Regulatory:* FDA 21CFR § 175.105, 176.170, 176.180; EPA reg. no. 1757-79

*Properties:* Pale green to yel. liq.; water-sol.; sp.gr. 1.02; dens. 8.6 lb/gal; pH 2.0-5.0 (neat)

*Storage:* Storage stability of at least 6 months at 50 C and one year at ambient temp.

#### Amerstat® 272 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Sodium dimethyl dithiocarbamate and disodium ethylene bisdithiocarbamate

*Uses:* Microbicide, slimicide for paper and sugar mills, industrial recirculating water cooling towers and evaporative condensers, air washers

*Regulatory:* FDA 21CFR § 173.320; EPA reg. no. 9386-11-1757

*Properties:* Pale yel. to amber liq.; water-misc.; dens. 9.6 lb/gal; f.p. -12 C; flash pt. > 93 C; pH 11.5

#### Amerstat® 282 [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Methylene bis (thiocyanate) and dispersants

CAS 6317-18-6

*Uses:* Antimicrobial in industrial water systems; preservative in water-con-

taining systems, paint, adhesives, latex, mineral slurries, inks, metalworking, drilling muds, and paper coatings

*Regulatory:* EPA reg. no. 1757-40

*Properties:* Clear yel.-amber liq.; water-disp.; sp.gr. 1.00-1.02; dens. 9.01 lb/gal; flash pt. (PMCC) 39 C

**Amerstat® 300** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* 2,2-Dibromo-3-nitrilo propionamide

CAS 10222-01-2

*Uses:* Paper mill slimicide; antimicrobial for enhanced oil recovery systems; preservative for metalworking fluids containing water; antimicrobial in paints, latex, adhesives, mineral slurries, inks

*Regulatory:* EPA reg. no. 1757-72

*Properties:* Clear to amber liq.; little/no odor; water-misc.; sp.gr. 1.25; dens. 10.4 lb/gal; pH 1.2-2.4 (neat)

*Toxicology:* LD50 (oral, rat) 177 mg/kg; ingestion of small amts. may cause serious illness; serious eye hazard

*Precaution:* Biologically active; aq., alkaline sol'n. (pH 9) cause it to lose biological act., also elevated temp. and/or UV light

*Storage:* Acidic sol'ns. (pH 3-4) kept at room temp. out of UV light stable for at least 7 days

**Amgard® TBEP** [Albright & Wilson Am.]

*Chem. Descrip.:* Tributyoxyethyl phosphate

CAS 78-51-3; EINECS/ELINCS 201-122-9

*Uses:* Flame retardant, plasticizer for plastics; leveling agent, gloss aid, and coalescing agent for emulsion polymers, acrylic and styrenic floor polishes, acrylic gloss paints; wetting agent and rheology control agent for pigments; defoamer for paints, textiles, and paper

*Properties:* Clear mobile liq., mild char. odor; misc. with most org. solvs.; sol. 0.11% in water; sp.gr. 1.1020 ± 0.005; visc. 10.7 cps; vapor pressure < 1 mm Hg (100 C); b.p. 210-220 (4 mm); decomp. pt. gradual above 200 C; pour pt. -70 C; flash pt. (COC) > 180 C; ref. index 1.435; 7.8% P; 0.1% max. water

**Amical® 48** [ANGUS]

*Chem. Descrip.:* Diiodomethyl p-tolyl sulfone

CAS 20018-09-1; EINECS/ELINCS 243-468-3

*Uses:* Mildewcide, fungicide for latex paints, paper coatings, tanned leather, metalworking fluids, emulsions, caulks, adhesives and sealants, and in lumber, construction, home improvement, textile, and automotive industries; fungicide in cosmetic preservation; food pkg. adhesives, coatings, can sealants, rubber articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 177.2600; EPA reg. no. 48301-19

*Properties:* Tan finely divided powd.; sol. in dimethyl formamide, acetone, n-propyl acetate, tributyl phosphate; insol. in water; sp.gr. 2.20 g/cc; dens. 18.3 lb/gal; m.p. 157 C; pH 5.0-7.0 (1% aq. disp.); 90% min. act.

*Toxicology:* LD50 (oral, rat) 9400 mg/kg; nonirritating to skin; may cause temporary eye irritation, toxic to fish

**Amine 2HBG** [Akzo Nobel Surf. Chem. AB]

*Chem. Descrip.:* Di (hydrogenated tallow) amine

CAS 61789-79-5; EINECS/ELINCS 263-089-7

*Uses:* Surfactant intermediate for pour pt. depressant formulations for diesel fuel, paper chem. aux., personal care prods.

*Properties:* Off-wh. solid; sol. in alcohols, chloroform, other hydrocarbons; m.w. 509; dens. 810 kg/m<sup>3</sup>; visc. 11 cP (70 C); set pt. 60-67 C; iodine no. 3 max.; flash pt. 220 C; 88% conc.; cationic

*Toxicology:* Skin and severe eye irritant

**Amine 2 VT** [Akzo Nobel Surf. Chem. AB]

*Chem. Descrip.:* Dihydrogenated tallowamine

CAS 61789-79-5; EINECS/ELINCS 263-089-7

*Uses:* Intermediate for pour pt. depressant formulations for diesel fuel, paper chem. aux.

*Properties:* Cationic

**Amine D®** [Hercules]

*Chem. Descrip.:* 92% Dehydro-abietylamine derived from rosin

CAS 1446-61-3; EINECS/ELINCS 215-899-7

*Uses:* Chem. intermediate; used in asphalt additives; in corrosion inhibitors, flotation reagents, preservatives for latex paints and wood treating compds. in cordage, felt, fabric, and paper; prod. of algicides; reactive; heat-stable to < 100 C

*Properties:* Gardner 7.5 color; sol. in common org. solvs. incl. alcohols, ethers, hydrocarbons, chlorinated solvs.; essentially insol. in water; dens. 8.3 lb/gal; visc. 87 poises; flash pt. (COC) 192 C; ref. index 1.545 (20 C)

*Storage:* Store at ambient temps.; visc. decreases sharply with temp.; maintain strict inventory control

**Amizyme DTX-11** [PMP Fermentation Prods.]

*Chem. Descrip.:* Alpha-amylase (bacterial)

CAS 9000-92-4; EINECS/ELINCS 232-567-7

*Uses:* Starch liquefying enzyme for prep. of paper coatings and sizes; heat stability props.

*Properties:* Tablets; dissolves in water

**Amizyme TX-8** [PMP Fermentation Prods.]

*Chem. Descrip.:* Alpha-amylase (bacterial)

CAS 9000-92-4; EINECS/ELINCS 232-567-7

*Uses:* Starch liquefying enzyme for prep. of paper coatings and sizes; heat stability props.

*Properties:* Liq.; dissolves in water

**Amoco® H-15** [BP Amoco]

*Chem. Descrip.:* Polybutene (isobutylene butene copolymer)

CAS 9003-29-6

*Uses:* Tackifier, strengthener, and extender in adhesives; plasticizer for rubber; vehicle and fugitive binder for coatings; cling additive for LLDPE stretch wrap films; reactive intermediate for specialty chemicals; leather impregnant; vehicle or modifier for caulks, sealants, and glazing compds.; in lubricants, paper treatments, elec. compds.; food-contact polymers; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §177.1430, 178.3570, 178.3910

*Properties:* Visc. liq.; sp.gr. 0.860-0.871 (15.5 C); visc. 2441 SUS (38 C); pour pt. -35 C; flash pt. (PMCC) 138 C; acid no. 0.29; ref. index 1.4847

**Amoco® L-14** [BP Amoco]

*Chem. Descrip.:* Polybutene

CAS 9003-29-6

*Uses:* Tackifier, strengthener, and extender in adhesives; plasticizer for rubber; vehicle and fugitive binder for coatings; cling additive for LLDPE stretch wrap films; reactive intermediate for specialty chemicals; as leather impregnant, as vehicle or modifier for caulks, sealants, and glazing compds., and in lubricants, paper treatments, elec. compds.; food-contact polymers; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §177.1430, 178.3570, 178.3910

*Properties:* Visc. liq.; sp.gr. 0.830-0.845 (15.5 C); visc. 139 SUS (38 C); pour pt. -51 C; flash pt. (PMCC) 121 C; acid no. 0.18; ref. index 1.4680

**Amoco® L-50** [BP Amoco]

*Chem. Descrip.:* Polybutene (isobutylene butene copolymer)

CAS 9003-29-6

*Uses:* Tackifier, strengthener, and extender in adhesives; plasticizer for rubber; vehicle and fugitive binder for coatings; cling additive for LLDPE stretch wrap films; reactive intermediate for specialty chemicals; leather impregnant; vehicle or modifier for caulks, sealants, and glazing compds.; in lubricants, paper treatments, elec. compds.; food-contact polymers; in lubricants for incidental food contact

*Regulatory:* FDA 21CFR §177.1430, 178.3570, 178.3910

*Properties:* Sp.gr. 0.845-0.860 (15.5 C); visc. 504 SUS (38 C); pour pt. -40 C; flash pt. (PMCC) 135 C; acid no. 0.23; ref. index 1.4758

**AMPS® 2401 Monomer** [Lubrizol]

*Chem. Descrip.:* 90-100% 2-Acrylamido-2-methylpropanesulfonic acid

CAS 15214-89-8; EINECS/ELINCS 239-268-0

*Uses:* Protective colloid and/or copolymerizable surfactant in acrylic/modified acrylic latexes for use in paints, adhesives, and sealants; acrylic/modified acrylic water-reducible resins for use in paints and inks; acrylic/modified acrylic printing ink binders; improves latex stability and film scrub resist.; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170

*Properties:* APHA 100 max.; gray/wh., free-flowing, crystalline powd.; mild odor; sol. in water; m.w. 207; bulk dens. 4.0 lb/gal; m.p. 185 C (dec.); acid no. 272-282; 99% min. NV

*Toxicology:* LD50 (oral, rat) 500-2000 mg/kg, (skin, rabbit) > 2000 mg/kg; mod. toxic; causes severe eye irritation; risk of irreversible eye damage; may cause heritable genetic damage; components may cause cancer; TSCA listed

*Environmental:* LC50 (acute) > 100 ppm (freshwater fish); limited biodegradation

*Precaution:* Forms explosive dust-air mixt.; incompat. with oxidizing agents; material may polymerize when heated

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: smoke, CO, aldehydes; combustion may produce NO<sub>x</sub>, SO<sub>x</sub>

- Storage:* 1 yr storage life in original unopened containers; store in dry areas, at 0-100 F
- AMPS® 2404 Monomer** [Lubrizol]  
*Chem. Descrip.:* 90-100% 2-Acrylamido-2-methylpropanesulfonic acid  
 CAS 15214-89-8; EINECS/ELINCS 239-268-0  
*Uses:* Protective colloid and/or copolymerizable surfactant in acrylic/modified acrylic latexes for use in paints, adhesives, and sealants; acrylic/modified acrylic water-reducible resins for use in paints and inks; acrylic/modified acrylic printing ink binders; improves latex stability, film scrub resist.; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170  
*Properties:* APHA 100 max.; gray/wh., free-flowing, crystalline powd.; mild odor; sol. in water; m.w. 207; bulk dens. 4.0 lb/gal; m.p. 185 C (dec.); acid no. 280 max.; 99% min. NV  
*Toxicology:* LD50 (oral, rat) 500-2000 mg/kg, (skin, rabbit) > 2000 mg/kg; mod. toxic; causes severe eye irritation; risk of irreversible eye damage; components may cause cancer; TSCA listed  
*Environmental:* LC50 (acute) > 100 ppm (freshwater fish); limited biodegradation  
*Precaution:* Forms explosive dust-air mixt.; incompat. with oxidizing agents; may polymerize when heated  
*Hazardous Decomp. Prods.:* Thermal decomp. prods.: smoke, CO, aldehydes; combustion may produce NO<sub>x</sub>, SO<sub>x</sub>  
*Storage:* 1 yr storage life in original unopened containers; store in dry areas, at 0-100 F
- Amres® 2747** [Georgia-Pacific Resins]  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; repulpable; rec. where enhanced fiber recovery is desired  
*Properties:* Burgundy liq.; visc. 75 cps; pH 5.5; 12.5% NV; cationic
- Amres® 8855** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; general purpose; high efficiency  
*Properties:* Pale amber liq.; visc. 70 cps; pH 3.7; 12.5% NV; cationic
- Amres® 8870** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; reduces freight costs; inc. storage capacity  
*Properties:* Pale amber liq.; infinite water sol.; sp. gr. 1.074-1.082; dens. 8.95-9.02 lb/gal; visc. 135 cps; f.p. -3.3 C; b.p. 100 C; flash pt. none to boiling; pH 3.8; 25% solids in water; cationic
- Amres® C12** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; general purpose; high efficiency  
*Properties:* Pale amber liq.; visc. 45 cps; pH 3.9; 12.5% NV; cationic
- Amres® C20** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; general purpose; high efficiency  
*Properties:* Pale amber liq.; visc. 90 cps; pH 4.0; 20% NV; cationic
- Amres® C25** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; general purpose; high solids; high efficiency  
*Properties:* Pale amber liq.; visc. 100 cps; pH 3.6; 25% NV; cationic
- Amres® C28** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; general purpose; high solids; high efficiency  
*Properties:* Pale amber liq.; visc. 90 cps; pH 3.6; 28% NV; cationic
- Amres® C382** [Georgia-Pacific Resins]

- Chem. Descrip.:* Urea-formaldehyde resin  
 CAS 9011-05-6  
*Uses:* Wet str. resin for papermaking incl. kraft paper, linerboard, carrierboard; general purpose; high efficiency  
*Properties:* Amber clear liq.; visc. 45 cps; pH 6.8; 27% NV; cationic
- Amres® HP-25** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; advanced technology; high performance; exc. with highly filled furnishes  
*Properties:* Pale amber liq.; visc. 100 cps; pH 3.5; 25% NV; cationic
- Amres® HS-30** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; high solids; reduces freight costs and inc. storage capacity  
*Properties:* Pale amber liq.; visc. 225 cps; pH 3.4; 30% NV; cationic
- Amres® LA-12-2** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; low-AOX  
*Properties:* Pale amber liq.; visc. 100 cps; pH 3.8; 12.75% NV; cationic
- Amres® LOPR** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Urea-formaldehyde resin  
 CAS 9011-05-6  
*Uses:* Wet str. resin for papermaking incl. kraft paper, linerboard, carrierboard; rec. where very low free formaldehyde residuals are required  
*Properties:* Amber clear liq.; visc. 50 cps; pH 7.0; 28% NV; cationic
- Amres® MOC-3066** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; low-AOX  
*Properties:* Pale amber liq.; visc. 60 cps; pH 3.7; 12.5% NV; cationic
- Amres® PR-247 HV** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Urea-formaldehyde resin  
 CAS 9011-05-6  
*Uses:* Wet str. resin for papermaking incl. kraft paper, linerboard, carrierboard; rec. where low free formaldehyde residuals are required  
*Properties:* Amber clear liq.; visc. 48 cps; pH 6.7; 25% NV; cationic
- Amres® PR-335 CU** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Urea-formaldehyde resin  
 CAS 9011-05-6  
*Uses:* Wet str. resin for papermaking incl. kraft paper, linerboard, carrierboard; high solids; reduces freight costs and inc. storage capacity; low free formaldehyde  
*Properties:* Amber clear liq.; visc. 35 cps; pH 6.8; 35% NV; cationic
- Amres® X-184** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* Wet str. resin for papermaking incl. towel, napkins, linerboard, medium, carrierboard, bag, liq. pkg., and specialties; low AOX; exc. with highly filled furnishes  
*Properties:* Pale amber liq.; visc. 45 cps; pH 3.7; 12.75% NV; cationic
- AMV 100** [BF Goodrich]  
*Chem. Descrip.:* Alkoxy fatty diamide chloride-based compd.  
*Uses:* Debonder, softener for pulp for facial tissue, toweling, disposable diapers, personal care prods.; reduces tens. or burst str. of pulp; reduces energy needed to defiber pulp; good release props.; reduces picking/linting on Yankee dryers  
*Use Level:* 0.1-0.3% by wt. of pulp  
*Properties:* Cationic
- Ancamide® 220** [Air Prods./Perf. Chems.]  
*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4  
*Uses:* R.T. epoxy curing agent for solv.-based maintenance coatings, primers, sealers, coatings for concrete floorings; food pkg. adhesives, coatings, paper/paperboard; provides high flexibility, long pot life; cure can be accelerated with up to 5 phr Ancamine K54

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.970; visc. 330,000 cps; amine no. 245; equiv. wt. 185

**Ancamide® 220-IPA-73** [Air Prods./Perf. Chems.]

*Chem. Descr.:* 73% Polyamide sol'n. in isopropanol

*Uses:* R.T. epoxy curing agent for solv.-based maintenance coatings, primers, sealers, coatings for concrete floorings; food pkg. adhesives, coatings, paper/paperboard; provides high flexibility, long pot life

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.940; visc. 2100 cps; amine no. 180; equiv. wt. 253

**Ancamide® 220-X-70** [Air Prods./Perf. Chems.]

*Chem. Descr.:* 70% Polyamide sol'n. in xylene

*Uses:* R.T. epoxy curing agent for solv.-based maintenance coatings, primers, sealers, coatings for concrete floorings; food pkg. adhesives, coatings, paper/paperboard; provides high flexibility, long pot life

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.940; visc. 1100 cps; amine no. 170; equiv. wt. 264

**Ancamide® 260A** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Amide/imidazoline

*Uses:* R.T. epoxy curing agent for coatings, concrete repairs, sealants, cable-jointing compds., consumer adhesives; food pkg. adhesives, coatings, paper/paperboard; 1:1 vol. ratios with std. liq. epoxy resin possible; improved reactivity, chem. resist., or visc. reduction in blends

*Use Level:* 65 phr

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.960; visc. 40,000 cps; amine no. 350; equiv. wt. 120

**Ancamide® 260TN** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Amide/imidazoline

*Uses:* R.T. epoxy curing agent for coatings, concrete repairs, sealants, cable-jointing compds., consumer adhesives, coal tar-extended coatings; food pkg. adhesives, coatings, paper/paperboard; higher imidazoline version of Ancamide 260A for improved compatibility

*Use Level:* 65 phr

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.960; visc. 35,000 cps; amine no. 350; equiv. wt. 120

**Ancamide® 350A** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Imidazoline/amide

*Uses:* R.T. epoxy curing agent for high-solids coatings, adhesives, sealants, putties, flexible cable-jointing compds.; food pkg. adhesives, coatings, paper/paperboard; improved chem. solv. resist.

*Use Level:* 55 phr

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.970; visc. 11,000 cps; amine no. 380; equiv. wt. 100

**Ancamide® 375A** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Imidazoline/amide

*Uses:* R.T. epoxy curing agent for low VOC coatings, adhesives, sealants, putties, flexible cable-jointing compds.; food pkg. adhesives, coatings, paper/paperboard

*Use Level:* 50 phr

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.960; visc. 150 cps; amine no. 379; equiv. wt. 100

**Ancamide® 500** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Amide/imidazoline

*Uses:* R.T. epoxy curing agent for concrete coatings, tile grouts, crack injection, floorings, riverstone mortars, elec. encapsulation, tooling, general-purpose adhesives; food pkg. coatings, paper/paperboard; provides low visc., moderate pot life, good adhesion to concrete; used alone or with other curing agents; noncritical mixing ratio

*Use Level:* 50 phr

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.950; visc. 250 cps; amine no. 445; equiv. wt. 90; heat distort. temp. 113 F (264 psi)

**Ancamide® 501** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Modified amide/imidazoline; accelerated version of Ancamide 500

*Uses:* R.T. epoxy curing agent for matte floorings, concrete coatings, patching

compds., old-to-new concrete adhesives; food pkg. coatings, paper/paperboard; provides cures under humid conditions, very good adhesion, exc. adhesion to concrete, good chem. resist.

*Use Level:* 35 phr

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.980; visc. 600 cps; amine no. 550; equiv. wt. 68; heat distort. temp. 116 F (264 psi)

**Ancamide® 502** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Amide/imidazoline; short pot life version of Ancamide 500

*Uses:* R.T. epoxy curing agent for matte floorings, concrete coatings, patching compds., old-to-new concrete adhesives; food pkg. coatings, paper/paperboard; provides short pot life

*Use Level:* 50 phr

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.950; visc. 300 cps; amine no. 450; equiv. wt. 90; heat distort. temp. 113 F (264 psi)

**Ancamide® 503** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Amide

*Uses:* R.T. epoxy curing agent for concrete coatings, floorings, old-to-new concrete adhesives, tile grouts; food pkg. coatings, paper/paperboard; provides faster pot life and thin film cure time than Ancamide 500 or 502

*Use Level:* 50 phr

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Gardner 6 liq.; sp.gr. 0.950; visc. 350 cps; amine no. 500; equiv. wt. 90; heat distort. temp. 119 F (264 psi)

**Ancamide® 506** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Imidazoline/amide

*Uses:* R.T. epoxy curing agent for civil engineering, building and construction, wet lay-up laminates, elec. encapsulation, high-solids coatings (often with Ancamine 1618 or 1693); pot life extender for cycloaliphatic amine; food pkg. coatings, paper/paperboard; provides highest imidazoline content of amidoamine range giving lowest reactivity/visc., good thru-cure with very little exotherm

*Use Level:* 55 phr

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Gardner 7 liq.; sp.gr. 0.940; visc. 300 cps; amine no. 420; equiv. wt. 105; heat distort. temp. 113 F (264 psi)

**Ancamide® 507** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Amidoamine adduct

*Uses:* R.T. epoxy curing agent for high-solids, anticorrosive marine coatings, concrete patching and flooring mortars, adhesives and patch kits; food pkg. coatings, paper/paperboard; provides fast cure, improved water resist.; for use alone or with polyamide adducts

*Use Level:* 35 phr

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Gardner 6 liq.; sp.gr. 0.990; visc. 950 cps; amine no. 600; equiv. wt. 65; heat distort. temp. 127 F (264 psi)

**Ancamide® 700-B-75** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Polyamide adduct, 75% solids in butanol

*Uses:* R.T. epoxy curing agent for high-solids anticorrosive coatings for marine/industrial use; food pkg. adhesives, coatings, paper/paperboard; provides exc. adhesion and cure under adverse conditions; no induction period required

*Use Level:* 90 phr

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170; meets US Navy MIL-P-24441

*Properties:* Gardner 7 liq.; sp.gr. 0.960; visc. 5000 cps; amine no. 240; equiv. wt. 170

**Ancamine® 1916** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Modified aliphatic amine; phenol-free version of Ancamine 1483

*Uses:* R.T. epoxy curing agent for heat-resist., solv.-free and sol'n. coatings, food pkg. coatings, paper/paperboard

*Use Level:* 25 phr

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Gardner 4 liq.; sp.gr. 1.09; visc. 6000 cps; amine no. 840; equiv. wt. 43; heat distort. temp. 136 F (264 psi)

**Ancamine® DETA** [Air Prods./Perf. Chems.]

*Chem. Descr.:* Diethylenetriamine

CAS 111-40-0; EINECS/ELINCS 203-865-4

*Uses:* Ambient temp. epoxy curing agent for flooring, sol'n. coatings, and encapsulation; for intermediates for amidoamines, imidazolines, epoxy ad-

ducts, and other addition compds.; food pkg. coatings, paper/paperboard; provides low equiv. wt., high nitrogen content

*Use Level:* 11 phr

*Regulatory:* FDA 21CFR §175.300, 176.170 compliant

*Properties:* Gardner 1 liq.; sp.gr. 0.948; visc. < 10 cps; amine no. 1640; equiv. wt. 21; heat distort. temp. 127 F (264 psi); gel time 25 min. (150 g mix)

**Ancamine® TEPA** [Air Prods./Perf. Chems.]

*Chem. Descrip.:* Tetraethylenepentamine

CAS 112-57-2; EINECS/ELINCS 203-986-2

*Uses:* R.T. epoxy curing agent for flooring, sol'n. coatings, and encapsulation; intermediates for amidoamines, imidazolines, epoxy adducts, and other addition compds.; food pkg. adhesives, coatings, paper/paperboard

*Use Level:* 18 phr

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170 compliant

*Properties:* Gardner 2 liq.; sp.gr. 0.996; visc. 80 cps; amine no. 1340; equiv. wt. 34; heat distort. temp. 127 F (264 psi); gel time 35 min. (150 g mix)

**Ancamine® TETA** [Air Prods./Perf. Chems.]

*Chem. Descrip.:* Triethylenetetraamine

CAS 112-24-3; EINECS/ELINCS 203-950-6

*Uses:* R.T. epoxy curing agent for flooring, sol'n. coatings, and encapsulation; intermediates for amidoamines, imidazolines, epoxy adducts, and other addition compds.; food pkg. coatings, paper/paperboard

*Use Level:* 14 phr

*Regulatory:* FDA 21CFR §175.300, 176.170 compliant

*Properties:* Gardner 1 liq.; sp.gr. 0.984; visc. 20 cps; amine no. 1435; equiv. wt. 27; heat distort. temp. 126 F (264 psi); gel time 30 min. (150 g mix)

**Ancowet A-70** [Venchem]

*Chem. Descrip.:* Ammonium salt of dinonyl sulfosuccinate in 10% industrial alcohol (95/5 ethanol, methanol) and water

*Uses:* Emulsifier, pigment wetting agent/dispersant for agric. pesticides, paper pulp mfg., water treatment, oil recovery and pollution control, textile auxiliaries, cleaning materials, antimist compds., emulsion polymerization

*Properties:* Amber liq.; sl. char. odor; water-sol.: gels form @ > 1%, fully sol. @ < 1%; sp.gr. 1.08; flash pt. < 55 C; pH 7 (1% sol'n.); 70% act. solids; anionic

*Toxicology:* Skin and eye irritant

*Precaution:* Flamm.

*Storage:* 6 mos. shelf life @ 8-25 C

**Ancowet S-60** [Venchem]

*Chem. Descrip.:* Sodium salt of dioctyl sulfosuccinate in 15% industrial alcohol (95/5 ethanol/methanol) and water

*Uses:* Emulsifier, pigment wetting agent/dispersant for agric. pesticides, paper pulp mfg., water treatment, oil recovery and pollution control, textile auxiliaries, cleaning materials and antimist compds., emulsion polymerization

*Properties:* Sl. amber liq.; sl. char. odor; water-sol.: gels form @ > 2%, fully sol. @ < 2%; sp.gr. 1.05; flash pt. < 55 C; pH 7 (1%); 60% act. solids; anionic

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; not harmful by ingestion; mildly toxic by inhalation; eye irritant; sl. irritating to skin; can be harmful if swallowed; danger of choking on foam

*Environmental:* 90% biodeg.; prevent entry into drains, sewers, and water courses

*Precaution:* Flamm.; keep away from ignition sources; burning may evolve toxic fumes of SO<sub>2</sub> and Na<sub>2</sub>O

*Storage:* 1 yr. shelf life @ 8-25 C; store away from heat and ignition sources; avoid low temps. below 4 C which will lead to inc. in visc. and may cause salt deposition

**Ancowet S-70PG** [Venchem]

*Chem. Descrip.:* Sodium salt of dioctyl sulfosuccinate in 15% monopropylene glycol and water

*Uses:* Emulsifier, pigment wetting agent/dispersant for agric. pesticides, paper pulp mfg., water treatment, oil recovery and pollution control, textile auxiliaries, cleaning materials and antimist compds., emulsion polymerization

*Properties:* Very sl. amber liq.; very sl. char. odor; water-sol.: gels form @ > 2%, fully sol. @ < 2%; sp.gr. 1.09; flash pt. > 100 C; pH 7 (1% sol'n.); 70% solids; anionic

*Toxicology:* Skin and eye irritant

*Storage:* 1 yr. shelf life @ 8-25 C

**Anox® PP18** [Great Lakes]

*Chem. Descrip.:* Octadecyl-3-(3',5'-di-*t*-butyl-4'-hydroxyphenyl) propionate

CAS 2082-79-3; EINECS/ELINCS 218-216-0

*Uses:* Antioxidant/stabilizer for polyolefins, impact styrenics, blocked copoly-

mers, PVC, PU, elastomers, adhesives; food pkg. adhesives, paper/paperboard, polymers; retards oxidative degradation during polymerization, processing and in end-use applics.

*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1350, 177.1420, 177.1480, 177.1520, 177.1580, 177.1640, 177.1810, 178.3790; BGA, France, Italy approvals

*Properties:* Wh. powd., gran. or flakes, odorless; sol. (g/100 ml): 140 g in chloroform, 104 g in xylene, 95 g in ethyl acetate, 52 g in hexane, 50 g in acetone; insol. in water; m.w. 531; sp.gr. 1.07 g/cc (20 C); m.p. 49-53 C; flash pt. 273 C; 98% min. purity

*Toxicology:* LD50 (oral, rat) > 10 g/kg, (dermal, rabbit) > 2 g/kg; sl. skin irritation; nonirritating to eyes

**Ansilex®** [Engelhard]

*Chem. Descrip.:* Calcined kaolin

*Uses:* Pigment for papermaking; high brightness, opacity, and print-through resist.

**Antarox® 17-R-2** [Rhodia HPCII]

*Chem. Descrip.:* Merxapal 172

CAS 9003-11-6

*Uses:* Defoamer, dispersant, wetting agent, emulsifier, demulsifier, binder, stabilizer, gellant, leveling agent, detergent for industrial/household cleaners, fermentation, paper processing, rinse aids, automatic dishwashing, metal cleaning, cosmetics, textiles, paints, pharmaceuticals; chemical intermediate

*Properties:* Liq.; sol. in aliphatic solvs.; HLB 8.0; pour pt. -25 C; cloud pt. 39 C (1% aq.); 100% conc.; nonionic

**Antarox® 25-R-2** [Rhodia HPCII]

*Chem. Descrip.:* Merxapal 252

CAS 9003-11-6

*Uses:* Defoamer, dispersant, wetting agent, emulsifier, demulsifier, binder, stabilizer, gellant, leveling agent, detergent for industrial/household cleaners rinse aids, automatic dishwashing, paper processing, metal cleaning, fermentation, cosmetics, paper, textiles, paints, pharmaceuticals; chemical intermediate

*Properties:* Liq.; HLB 6.0; pour pt. -5 C; cloud pt. 33 C (1% aq.); 100% conc.; nonionic

**Antarox® 31-R-1** [Rhodia HPCII]

*Chem. Descrip.:* Merxapal 311

CAS 9003-11-6

*Uses:* Defoamer, dispersant, wetting agent, emulsifier, demulsifier, binder, stabilizer, gellant, leveling agent, detergent for industrial/household cleaners rinse aids, automatic dishwashing, paper processing, metal cleaning, fermentation, cosmetics, paper, textiles, paints, pharmaceuticals; chemical intermediate

*Properties:* Liq.; HLB 4.0; pour pt. 25 C; cloud pt. 25 C (1% aq.); 100% conc.; nonionic

**Antarox® EGE 25-2** [Rhodia Canada]

*Chem. Descrip.:* Merxapal 252

CAS 9003-11-6

*Uses:* Surfactant, defoamer/foam control agent for pulp/paper industry; dye leveling agent and wetting agent for textile processing

*Properties:* Liq.; 100% conc.; nonionic

**Antarox® L-64** [Rhodia HPCII]

*Chem. Descrip.:* Poloxamer 184

CAS 9003-11-6

*Uses:* Defoamer, dispersant, wetting agent, emulsifier, oil demulsifier, leveling agent, detergent for industrial/household cleaners, hard surf. cleaning, metal-working fluids, laundry, skin care, emulsion polymerization; plasticizer for resin compositions; defoamer in paper coatings

*Properties:* Liq.; HLB 15.0; pour pt. 16 C; cloud pt. 59 C (1% aq.); 100% conc.; nonionic

**Antarox® PGP 18-2LF** [Rhodia Canada]

*Chem. Descrip.:* Ethoxylated propoxylated glycol

*Uses:* Surfactant, detergent, emulsifier for sulfate pulp washing, rinse aids, dishwash, hard surf. cleaners, laundry compds., cosmetics, shampoos, emulsion polymers

*Properties:* Liq.; HLB 7.0; cloud pt. 26-30 C; 100% conc.; nonionic

**Antarox® PGP 23-7** [Rhodia Canada]

*Chem. Descrip.:* Poloxamer 237

CAS 9003-11-6

*Uses:* Coemulsifier for cosmetics, toiletries, pulp/paper defoamers; dispersant; visc. control agent

*Properties:* Wh. flake; sol. in water, aromatic and chlorinated solvs.; insol. in min. oil and aliphatic solvs.; m.w. 6700-8373; dens. 1.04 g/ml; HLB 24.0; cloud pt. > 100 C (1% aq.); pH 5.0-7.5 (2.5% aq.); foam height 44 mm (0.1%); 99% min. act.; nonionic

**Anthosin®** [BASF; BASF AG]

*Uses:* Acid dyes for calender or size press dyeing in papermaking

**Antiblaze® 100** [Albright & Wilson Am.]

*Chem. Descrip.:* Chlorinated diphosphate ester

CAS 38051-10-4

*Uses:* Flame retardant for virgin and bonded flexible urethane foam, in textiles, paper, adhesives, and epoxy and phenolic-based laminates; low volatility; cost-effective means to comply with Cal. 117 and other flamm. tests

*Properties:* Liq.; 10.6% P, 36% Cl

**Antiblaze® CL** [Albright & Wilson Am.]

*Chem. Descrip.:* Ammonium polyphosphate aq. sol'n.

CAS 14728-39-3

*Uses:* Flame retardant for cellulose fabrics, paper, particleboard, and timber; nondurable

*Properties:* 13.1% P

**Antiblaze® TR** [Albright & Wilson Am.]

*Chem. Descrip.:* Water-based ammonium polyphosphate

CAS 14728-39-3

*Uses:* Flame retardant for cellulose textiles, paper, and particleboard; nondurable

*Properties:* 10.3% P

**Antiblaze® V6** [Albright & Wilson UK]

*Chem. Descrip.:* Chlorinated diphosphate ester

*Uses:* Flame retardant for virgin and bonded flexible urethane foam, and in textiles, paper, adhesives, and epoxy and phenolic-based laminates; low volatility; cost-effective means to comply with Cal. 117 and other flamm. tests

*Properties:* Liq.; 10.6% P, 36% Cl

**Antifoam 20WB** [Stockhausen]

*Chem. Descrip.:* Water-based

*Uses:* Antifoam for screen room, paper machine, bleaching applics., wastewater treatment, chem. processing industry, latex, coatings, metal treating and electroplating

*Regulatory:* FDA compliance

*Properties:* Creamy wh. emulsion, mild petrol. odor; disp. in water; sp.gr. 0.93; dens. 7.8 lb/gal; visc. 800 ± 200 cps; f.p. 0 C; b.p. 212 F; flash pt. (PMCC) 330 F

*Toxicology:* Very low toxicity; mild skin or eye irritant on prolonged contact

**Antifoam 7800 New** [Bayer/Fiber, Addits., Rubber]

*Chem. Descrip.:* Higher hydrocarbons and their sulfonic acid derivs.

*Uses:* Antifoam for aq. systems in sugar, fertilizer, phosphoric acid, dyestuffs, paper, leather, plastics, and chemical industries; resistant to acid and weak alkalis

*Properties:* Faint yel. liq., sl. turbid @ R.T.; sp.gr. 0.87; b.p. 80 C; flash pt. > 100 C

**Antifoam F-1** [Lambent Tech.]

*Chem. Descrip.:* Simethicone

CAS 8050-81-5

*Uses:* Antifoam for aq. and nonaq. systems for fermentation, chem. processing, food, cosmetics, pharmaceuticals, paints, adhesives, paper coatings, metalworking, lubricants, textile processing, petroleum, pulp/paper, cleaning compds.

*Regulatory:* FDA approved, to 10 ppm max. in final prod.

*Properties:* Translucent syrup-like compd.; sol. in amyl acetate, aromatic solvs., 2-ethylhexanol, kerosene; insol. in water, paraffin oil, glycols, ethanol, methanol, glycerin; sp.gr. 0.990; dens. 8.3 lb/gal; 100% act.; nonionic

**Antifoam FD-62** [Lambent Tech.]

*Chem. Descrip.:* Polydimethylsiloxane emulsion

CAS 63148-62-9

*Uses:* Antifoam for aq. systems for fermentation, chemical processing, food, pharmaceuticals, paints, adhesives, paper coatings, metalworking, lubricants, textiles, petroleum, pulp/paper applics.

*Regulatory:* FDA approved, 100 ppm max. in final prod.

*Properties:* Wh. creamy emulsion; disp. in water; 1.000; dens. 8.4 lb/gal; 10% act.

**Antifoam FD-82** [Lambent Tech.]

*Chem. Descrip.:* Polydimethylsiloxane emulsion

CAS 63148-62-9

*Uses:* Antifoam for aq. systems for fermentation, chem. processing, food, pharmaceuticals, paints, adhesives, paper coatings, metalworking, lubricants, textile processing, petroleum, pulp/paper, cleaning compds.

*Regulatory:* FDA approved, 30 ppm max. in final prod.

*Properties:* Wh. creamy emulsion; disp. in water; sp.gr. 0.970; dens. 8.1 lb/gal; 30% act.

**Antispumin®** [Stockhausen]

*Uses:* Defoamer, deaerating agent for pulp, paper coatings, wastewater clarification

**Apollo® 4200 Cationic Starches** [Penford Prods.]

*Chem. Descrip.:* Hydroxyethylated corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Strengthener, retention aid for paper and paperboard, incl. alkaline papermaking; filming props.; effective over entire pH range; reduces BOD

*Properties:* Cationic

**Apollo® Cationic Starches** [Penford Prods.]

*Chem. Descrip.:* Corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Wet str. agent, retention aid for paper and paperboard; for use with alkaline sizing agents; designed for batch cooking systems

*Properties:* Cationic

**Aquacid-105 EX** [Aquapharm]

*Chem. Descrip.:* Hydroxy ethylidene diphosphonic acid aq. sol'n.

CAS 2809-21-4; EINECS/ELINCS 220-552-8

*Uses:* Sequestrant, deflocculant, threshold inhibitor for scale prevention/corrosion inhibition in water treatment, oil field treatment, pulp/paper chems., leather treatment chems., textile additives; hydrolytic stability

*Properties:* Colorless to pale yel. liq.; sol. in water, phosphoric acid, ethylene acids and bases; m.w. 206; sp.gr. 1.44 ± 0.02; cryst. pt. < 0 C; 60 ± 1% act.

*Toxicology:* Sl. toxic by ing.; pract. nontoxic by skin contact; mod. irritating to skin; corrosive to eyes

**Aquacid-106 EX** [Aquapharm]

*Chem. Descrip.:* Diethylene triamine penta (methylene phosphonic acid) aq. sol'n.

CAS 15827-60-8

*Uses:* Sequestrant, deflocculant, threshold inhibitor for water treatment, oil field treatment, pulp/paper chems., leather treatment chems., textile additives; dispersant for solid particles; hydrolytic stability

*Properties:* Amber liq.; sol. in water; m.w. 573; sp.gr. 1.34 ± 0.04; pH < 2 (1%); 45% min. act.

*Toxicology:* Sl. toxic by ing.; pract. nontoxic by skin contact; mod. irritating to skin; corrosive to eyes

**Aquacid-108 EX** [Aquapharm]

*Chem. Descrip.:* Aminotrimethylene phosphonic acid aq. sol'n.

CAS 6419-19-8; EINECS/ELINCS 229-146-5

*Uses:* Sequestrant, deflocculant, threshold inhibitor for water treatment, oil field treatment, pulp/paper chems., leather treatment chems., textile additives; hydrolytic stability

*Properties:* Lt. to pale yel. liq.; sol. in water, phosphoric acid, ethylene glycol, most aq. acids and bases; m.w. 299; sp.gr. 1.33 ± 0.02; cryst. pt. < 0 C; pH < 2 (1%); 49 ± 1% act.

**Aquacid-109 EX** [Aquapharm]

*Chem. Descrip.:* Ethylenediaminetetra (methylene phosphonic acid)

CAS 1429-50-1

*Uses:* Sequestrant, deflocculant, threshold inhibitor for water treatment, oil field treatment, pulp/paper chems., leather treatment chems., textile additives; hydrolytic stability

*Properties:* Wh. solid; m.w. 436 (anhyd.); pH < 2 (1%); 91% min. act.

*Toxicology:* Pract. nontoxic by ing. and skin contact; sl. irritating to skin; mod. irritating to eyes

**Aquacoll 30 CC** [EPC Papierchemie GmbH]

*Chem. Descrip.:* Rosin disp. with fixing agents and stabilizers

*Uses:* Sizing agent, fixing agent for paper and cardboard, esp. paper containing calcium carbonate or mfg. with recycled paper base, food pkg. (Germany); rec. for high pH range

*Use Level:* 0.5-5%

*Regulatory:* BgVV XXXVI compliant

*Properties:* Milky wh.; sp.gr. 1.12 g/cc; visc. < 500 mPa·s; pH 2.5-3.5; 29 ± 1% act.; cationic

*Environmental:* Harmful to fish; do not allow prod. to reach public sewers; may be precipitated and removed in wastewater treatment plants

*Storage:* 12 wks storage stability; store at 5-35 C in upright sealed SS tanks

**Aquadoll 30 PA** [EPC Papierchemie GmbH]

*Chem. Descrip.:* Rosin disp. with polyaluminum chloride and stabilizers  
*Uses:* Sizing agent, fixing agent for paper and cardboard, esp. paper containing calcium carbonate or mfg. with recycled paper base, food pkg. (Germany); rec. for high pH range

*Use Level:* 0.5-5%

*Regulatory:* BgVV XXXVI compliant

*Properties:* Milky wh.; sp.gr. 1.12 g/cc; visc. < 500 mPa·s; pH 2.5-3.5; 29 ± 1% act.; cationic

*Environmental:* Harmful to fish; do not allow prod. to reach public sewers; may be precipitated and removed in wastewater treatment plants

*Storage:* 12 wks storage stability; store at 5-35 C in upright sealed SS tanks

**Aquadoll 300** [EPC Papierchemie GmbH]

*Chem. Descrip.:* Highly fortified disp. of modified rosins

*Uses:* Sizing agent for paper and cardboard, food pkg. (Germany); rec. to pH of 6.7

*Regulatory:* BgVV XXXVI compliant

*Properties:* Milky wh.; sp.gr. 1.0 g/cc; visc. < 100 mPa·s; 30 ± 1% act.; anionic

*Environmental:* Harmful to fish; do not allow prod. to reach public sewers

*Storage:* Very stable during storage; store at 10-35 C in upright sealed SS tanks

**Aquadoll 400** [EPC Papierchemie GmbH]

*Chem. Descrip.:* Highly fortified disp. of aq. modified rosins

*Uses:* Sizing agent for paper and cardboard, food pkg. (Germany); rec. for use in acid to moderately acid pH range

*Regulatory:* BgVV XXXVI compliant

*Properties:* Milky wh.; misc. with water; sp.gr. 1.03 g/cc; visc. < 100 mPa·s; 40 ± 1% act.

*Environmental:* Harmful to fish; do not allow prod. to reach public sewers

*Storage:* Good storage stability; store at 10-35 C in upright sealed SS tanks

**Aquadoll 433 S** [EPC Papierchemie GmbH]

*Chem. Descrip.:* Highly fortified disp. of modified rosins

*Uses:* Sizing agent for paper and cardboard, esp. coating base papers, recycled paper, food pkg. (Germany); rec. where calcium carbonate is present in the pulp system; effective in higher pH range

*Regulatory:* BgVV XXXVI compliant

*Properties:* Milky wh.; sp.gr. 1.02 g/cc; visc. < 100 mPa·s; 30 ± 1% act.

*Environmental:* Harmful to fish; do not allow prod. to reach public sewers; may be precipitated and removed in wastewater treatment plants

*Storage:* 2-3 mos storage stability when stored at 10-35 C in upright sealed SS tanks

**Aquadoll P 231** [EPC Papierchemie GmbH]

*Chem. Descrip.:* Highly fortified disp. of modified rosins with protective colloid

*Uses:* Sizing agent for paper and cardboard, esp. coating base papers, recycled paper, food pkg. (Germany); rec. where calcium carbonate is present in the pulp system; effective in higher pH range

*Regulatory:* BgVV XXXVI compliant

*Properties:* Milky wh.; sp.gr. 1.02 g/cc; visc. < 100 mPa·s; 30 ± 1% act.

*Environmental:* Harmful to fish; do not allow prod. to reach public sewers; may be precipitated and removed in wastewater treatment plants

*Storage:* 2-3 mos storage stability when stored at 10-35 C in upright sealed SS tanks

**Aquafilm** [CNC Int'l.]

*Chem. Descrip.:* Fluorocarbon

*Uses:* Waterproofing agent, greaseproofing agent for specialty papers and nonwovens

**Aquagel Gold Seal™ 200** [Cimbar Perf. Mins.]

*Chem. Descrip.:* Premium untreated bentonite

*Chem. Analysis:* SiO<sub>2</sub> (63.4%); Al<sub>2</sub>O<sub>3</sub> (21.4%); Fe<sub>2</sub>O<sub>3</sub> (3.8%); Na<sub>2</sub>O (2.5%); MgO (2.3%); CaO (0.6%) K<sub>2</sub>O (0.3%)

CAS 1302-78-9; EINECS/ELINCS 215-108-5

*Uses:* Rheological control agent for inks, coatings, pesticides, fungicides, adhesives, caulks, and sealants; filtrate and sealant in water/wastewater treatment; retention aid and deinking agent for paper industry; for foundry, refractory, and ceramic uses; consumer and industrial care prods.

*Regulatory:* EPA compliant

*Properties:* 80% thru 200 mesh (dry), 98% thru 200 mesh (wet); sp.gr. 2.5; bulk dens. 50 lb/ft<sup>3</sup> (level), 72 lb/ft<sup>3</sup> (packed); pH 9.0 (6%); free water (8%); bound water (5.7%)

*Toxicology:* Nontoxic

*Environmental:* Nonpolluting

**Aquagel Gold Seal™ 325** [Cimbar Perf. Mins.]

*Chem. Descrip.:* Premium untreated bentonite

*Chem. Analysis:* SiO<sub>2</sub> (63.4%); Al<sub>2</sub>O<sub>3</sub> (21.4%); Fe<sub>2</sub>O<sub>3</sub> (3.8%); Na<sub>2</sub>O (2.5%); MgO (2.3%); CaO (0.6%) K<sub>2</sub>O (0.3%)

CAS 1302-78-9; EINECS/ELINCS 215-108-5

*Uses:* Rheological control agent for inks, coatings, pesticides, fungicides, adhesives, caulks, and sealants; filtrate and sealant in water/wastewater treatment; retention aid and deinking agent for paper industry; for foundry, refractory, and ceramic uses; consumer and industrial care prods.

*Regulatory:* EPA compliant

*Properties:* 98% thru 325 mesh (dry), 99% thru 325 mesh (wet); sp.gr. 2.5; bulk dens. 50 lb/ft<sup>3</sup> (level), 72 lb/ft<sup>3</sup> (packed); pH 9.0 (6%); free water (8%); bound water (5.7%)

*Toxicology:* Nontoxic

*Environmental:* Nonpolluting

**Aqualon® CMC-T** [Hercules/Aqualon]

*Chem. Descrip.:* Sodium CMC, tech. grades

CAS 9004-32-4; EINECS/ELINCS 265-995-8

*Uses:* Binder, thickener, stabilizer, suspending agent, film-former, rheology control agent, water retention aid for adhesives, aerial-drop fluids, ceramics, coatings, detergents, lithography, paper, textiles, tobacco, food pkg.; surf. treatment to reduce porosity, improve grease/oil holdout, control curl in paper at size press or calender; thickener, suspending agent, adhesive prods. for paper converting operations; talc depressant in frothing/flotation (mining)

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 182.70

*Properties:* Water sol.; sp.gr. 1.0068 (2%); bulk dens. 0.75 g/ml; visc. 15-30 cps (CMC-7L3T, 2%), 25-50 (CMC-7LT, 2%, CMC-7L1T, 4%), 80-200 cps (CMC-7L2T, 4%), 300-600 cps (CMC-7MT, 2%), 1600-3100 cps (CMC-7M31T, 2%); surf. tens. 71 dynes/cm (1%); ref. index 1.3355 (2%); pH 6.5-8.5 (1%)

**Aquapac™** [Alltivia]

*Chem. Descrip.:* Polyaluminum chloride

CAS 1327-41-9; EINECS/ELINCS 215-477-2

*Uses:* For use in pulp/paper industry as sizing and retention aid; also for wastewater treatment as primary coagulant aid; low alkalinity and low turbidity

*Regulatory:* SARA reportable

*Properties:* Amber clear liq.; completely sol. in water; sp.gr. 1.2-1.4; m.p. -10 C to -20 C; b.p. 100-110 C; pH 0.5-4.5

*Toxicology:* Can cause nose and throat irritation on inh., corrosive damage to GI tract, nausea, and/or diarrhea on ing., skin irritation or burns, eye burns; TSCA listed

*Precaution:* Corrosive; avoid high temps., fire conditions; prod. will slowly corrode iron, brass, copper, and aluminum metals

*Hazardous Decomp. Prods.:* Thermal decomp. may release toxic aluminum and hydrogen chloride compds.

*Storage:* Store in stainless steel or fiberglass tanks away from heat and direct sunlight

**Aquapel® Reactive Size** [Hercules]

*Uses:* Sizing agent for papermaking, industrial processes; reactive; for use against a wide variety of penetrants

**Aquaprox® MFC 1490** [Synthron SA]

*Uses:* Trash fixing agent for pitch and stickies control in wet-end paper mfg.

*Properties:* Cationic

**Aquaprox® MFC 3320** [Synthron SA]

*Uses:* Trash fixing agent for pitch and stickies control in wet-end paper mfg.

*Properties:* Cationic

**Aquaprox® TD 1100** [Synthron SA]

*Uses:* Scale inhibitor, dispersant for chem. pulp mfg.; works according to threshold effect

**Aquaprox® TD 2000** [Synthron SA]

*Uses:* Scale inhibitor for chem. pulp mfg.; works according to threshold effect

**Aquaprox® TM** [Synthron SA]

*Uses:* Biocide, slimeicide for wet-end paper mfg.

**Aquaquest 2130** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* Dispersant for pigmented paper coatings, esp. with structured pigments; food pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; reduces problems associated with pigment agglomeration; exc. thermal stability; resist. to acid hydrolysis; stable at pH range in

typ. coating applics.; compat. with all commonly used paper coating ingreds.

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Pale yel. liq.; sp.gr. 1.2-1.3; dens. 10.7 lb/gal; visc. 600-800 cps; pH 8.4; 45% solids

*Storage:* 6 mos shelf life at ambient temps.; keep containers tightly closed when not in use to avoid loss due to evaporation; freezing does not damage prod., but if frozen, warm to R.T. and mix well before use

#### Aqua Superslip 6550 [Micro Powders]

*Chem. Descrip.:* Modified polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Coating additive, lubricant, blocking resist. agent, scuff/mar resist. agent, slip agent in aq. paints/coatings, waterborne furniture coatings; food-contact coatings, paper/paperboard

*Use Level:* 0.5-3.0%

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180

*Properties:* 22 µ max. particle size; 6-7.5 µ mean particle size; fineness (Hegman) 6.0-6.5; sp.gr. 0.94; m.p. 126-130 C

*Toxicology:* TSCA listed

#### Aquatac® 6025 [Arizona; Arizona Chem. AB]

*Chem. Descrip.:* Aq. resin dispersion

*Uses:* Tackifier for adhesives incl. food pkg. adhesives, carboxylated SBR, 2-ethylhexyl acrylate, butyl acrylic, SBR, NR, neoprene, VAE, urethane systems; defoamer in food-contact paper/paperboard; waterborne for environmentally friendly adhesives; provides improved aging props., enhanced adhesive props.

*Regulatory:* FDA 21CFR §175.105, 176.210

*Properties:* Visc. 5350 cps; soften. pt. (R&B) 25 C; pH 7.0; 60% solids

#### Aquatac® 6085 [Arizona; Arizona Chem. AB]

*Chem. Descrip.:* Glyceryl rosinate aq. disp.

CAS 8050-31-5; EINECS/ELINCS 232-482-5

*Uses:* Waterborne tackifier for pressure-sensitive adhesives incl. food pkg. adhesives, waterborne labels, decals, shelf liners, construction adhesives, tapes; for carboxylated SBR, 2-ethylhexyl acrylate, butyl acrylic, SBR, NR, neoprene, VAE, urethanes; defoamer in food-contact paper/paperboard; waterborne for environmentally friendly adhesives; produces formulations with aggressive tack and peel, exc. shear props. after aging

*Regulatory:* FDA 21CFR §175.105, 176.210

*Properties:* Milky beige disp.; 2.5 µ particle size; dens. 8.8 lb/gal; visc. 7500 cps; soften. pt. (R&B) 82 C (of base resin); pH 7.0; 60% solids

*Storage:* Prevent freezing, mold and bacteria contamination

#### Aquatac® 6085B-1 [Arizona; Arizona Chem. AB]

*Chem. Descrip.:* Aq. resin dispersion

*Uses:* Tackifier for adhesives incl. food pkg. adhesives, carboxylated SBR, 2-ethylhexyl acrylate, butyl acrylic, SBR, NR, neoprene, VAE, urethane systems; defoamer in food-contact paper/paperboard; waterborne for environmentally friendly adhesives; provides improved aging props., enhanced adhesive props.

*Regulatory:* FDA 21CFR §175.105, 176.210

*Properties:* Visc. 1000 cps; soften. pt. (R&B) 85 C; pH 7.0; 59% solids

#### Aquatac® 6085B-7 [Arizona; Arizona Chem. AB]

*Chem. Descrip.:* Aq. resin dispersion

*Uses:* Tackifier for adhesives incl. food pkg. adhesives, carboxylated SBR, 2-ethylhexyl acrylate, butyl acrylic, SBR, NR, neoprene, VAE, urethane systems; defoamer in food-contact paper/paperboard; waterborne for environmentally friendly adhesives; provides improved aging props., enhanced adhesive props.

*Regulatory:* FDA 21CFR §175.105, 176.210

*Properties:* Visc. 7000 cps; soften. pt. (R&B) 85 C; pH 7.0; 60% solids

#### Aquatreat® DNM-9 [Alco]

*Chem. Descrip.:* 4.5% Nabam, 4.5% dibam with 45% freeze pt. depressant and 30% water

*Uses:* Short-stop in emulsion polymerization of rubber; biocide, fungicide, and algicide used in water treatment, paper, sugar, and petrol. applics.; winterized blend

*Properties:* Straw-colored; sp.gr. 1.14; dens. 9.5 lb/gal; pH 11.5; 9% act. in water

#### Aquatreat® DNM-30 [Alco]

*Chem. Descrip.:* Sodium dimethyldithiocarbamate (15-16.6%), nabam (15-16.6%) with freeze pt. depressant

*Uses:* Short-stop in emulsion polymerization of rubber; fungicide and bactericide for use in pulp/paper mills, sugar mills, drilling fluids, petrol. recovery; algicide for use in industrial recirculating water cooling towers, etc.; winter-

ized blend

*Regulatory:* EPA reg. no. 31910-2; SARA reportable

*Properties:* Yel.-grn. liq.; char. sulfur odor; completely sol. in water; sp.gr. 1.176; dens. 9.6 lb/gal; f.p. 0 C; b.p. > 100 C; flash pt. none; pH 10.5-12.4; nonflamm.; 30-33.2% act.

*Toxicology:* LD50 (oral, male rat) 1400 mg/kg, (dermal, rabbit) > 2 g/kg; eye and skin irritant; harmful if swallowed; may cause nausea and vomiting

*Environmental:* Biodeg.; aquatic LC50 (bluegill sunfish, 96 h) 0.18 ppm, (rainbow trout, 96 h) 0.10 ppm; toxic to fish and aquatic organisms; BOD (5 day) 20,000 ppm; COD 330,000 ppm; susceptible to biological oxidation

*Precaution:* Incompat. with quat. compds., strong oxidizing agents, min. acids (sulfuric, nitric, hydrochloric)

*Hazardous Decomp. Prods.:* Thermal decomp. may release gases (amines, CS<sub>2</sub>); combustion of dry film may release CO<sub>x</sub>, NO<sub>x</sub>, SO<sub>x</sub>; degradation prods. from acidification are flamm.

NFPA: Health 2; Flammability 0; Reactivity 0

*Storage:* Avoid temp. extremes

#### Aquatreat® DNM-360 [Alco]

*Chem. Descrip.:* 18% Disodium ethylenebisdithiocarbamate, 18% sodium dimethyldithiocarbamate

*Uses:* Microbicide for use in cooling towers, air washers, pulp/paper mills, cane and beet sugar mills, drilling fluids, petroleum recovery

*Properties:* Straw color; sp.gr. 1.18; dens. 9.8 lb/gal; pH 11.5; 36% act.

#### Aquatreat® KM [Alco]

*Chem. Descrip.:* Potassium dimethyldithiocarbamate

CAS 128-03-0

UN No. 1760

*Uses:* Short-stop in emulsion polymerization of rubber, butadiene, styrene, and neoprene; biocide, fungicide, and algicide used in water treatment, industrial recirculating water cooling towers, evaporative condensers, paper mills, sugar mills, sec. and tert. oil recovery, drilling fluids

*Regulatory:* EPA reg. no. 31910-5; SARA reportable

*Properties:* Pale amber liq.; char. amine odor; completely sol. in water; sp.gr. 1.21; dens. 10.4 lb/gal; f.p. 0 C; b.p. > 100 C; pH 11.3-14.0; nonflamm.; 50% act. in water

*Toxicology:* LD50 (oral, female rat) 1.86 g/kg; sl. skin and eye irritant; may cause nausea and vomiting; vapors may be irritating to nose, throat, respiratory tract

*Environmental:* Toxic to fish

*Precaution:* Corrosive; acidification releases flamm. gases; incompat. with min. acids (sulfuric, nitric, hydrochloric)

*Hazardous Decomp. Prods.:* Thermal decomp. may release gases such as amines, CS<sub>2</sub>; combustion of dry film may release CO<sub>x</sub>, NO<sub>x</sub>, SO<sub>x</sub>

NFPA: Health 2; Flammability 0; Reactivity 0

*Storage:* Exc. storage stability

#### Aquatreat® SDM [Alco]

*Chem. Descrip.:* Sodium dimethyldithiocarbamate

CAS 128-04-1; EINECS/ELINCS 204-876-7

UN No. 1760

*Uses:* Short-stop in emulsion polymerization of rubber; biocide, fungicide, and algicide used in water treatment, industrial recirculating water cooling towers, evaporative condensers, paper mills, sugar mills, drilling fluids, sec. and tert. oil recovery

*Regulatory:* EPA reg. no. 31910-6; SARA reportable

*Properties:* Yel.-grn. liq.; char. amine odor; completely sol. in water; sp.gr. 1.18; dens. 9.8 lb/gal; f.p. 0 C; b.p. > 100 C; pH 12-13.3; nonflamm.; 40% act. in water

*Toxicology:* LD50 (oral, female rat) 2.5 g/kg, (dermal, rabbit) > 1.15 g/kg; LC50 (inh. rat) > 3.93 mg/l; sl. skin and eye irritant; inh. of vapors may be irritating to nose, throat, respiratory tract; may cause nausea and vomiting

*Environmental:* Toxic to fish

*Precaution:* Corrosive liq.; acidification releases flamm. gases; incompat. with min. acids (sulfuric, nitric, hydrochloric), nitrosating agents

*Hazardous Decomp. Prods.:* Thermal dec. may release gases (amines, CS<sub>2</sub>); combustion of dry film may release CO<sub>x</sub>, NO<sub>x</sub>, SO<sub>x</sub>

NFPA: Health 2; Flammability 0; Reactivity 0

#### Aquis® [Heucotech Ltd]

*Chem. Descrip.:* Surfactant/pigment aq. disp.

*Uses:* Colorant for aq. paints and coatings, textiles, latexes, inks, paper

#### Araldite® 93-100 [Vantico AG]

*Chem. Descrip.:* Araldite GY 281, bisphenol F resin base

*Uses:* Hardener used in adhesives, fiber-sizing, textiles, paper treatment, and

abrasives; water-based; exc. stability, good adhesion, chem. adhesion  
*Properties:* Liq.; < 2 µ particle size; visc. pourable; epoxide wt. 160-180; 70% solids

**Araldite® 94-105** [Vantico AG]

*Chem. Descrip.:* Epoxy cresol novolac (Araldite® ECN 1280 base)  
 CAS 29690-82-2

*Uses:* Hardener used in adhesives, fiber-sizing, textiles, paper treatment, and abrasives; water-based; exc. stability, good temp. and chem. adhesion; very high functionality

*Properties:* 2 µ particle size; visc. 10,000-30,000 cps; epoxide wt. 230-251; 55% solids; nonionic

**Araldite® 95-101** [Vantico AG]

*Uses:* Hardener used in adhesives, paper treatment, and abrasives; water-based; exc. stability, low temp., fast curing for use with resins

*Properties:* 3 µ particle size; visc. 135,000-145,000 cps; 40% solids

**Araldite® ECN 1400** [Vantico AG]

*Chem. Descrip.:* Epoxy cresol novolac (Araldite® ECN 1299 base)  
 CAS 29690-82-2

*Uses:* For use in adhesives, fiber-sizing, textiles, abrasives, paper treatment; better adhesion, improved temp. and chem. resist. than bis A-based epoxies; very high functionality

*Properties:* 4 µ particle size; visc. 900-1500 cps; epoxide wt. 220-250; 40% solids

**Araldite® HZ 340** [Vantico AG]

*Chem. Descrip.:* Polyamide  
 CAS 25038-54-4

*Uses:* Hardener used in adhesives, fiber-sizing, textiles, paper treatment, abrasives, and coatings (plaster, concrete, masonry, asbestos, cement, nuclear facilities); water-based; solv.-free; good adhesion

*Properties:* Visc. 18,000-23,000 cps; epoxide wt. 113; 50% solids

**Araldite® PY 302-2** [Vantico AG]

*Chem. Descrip.:* Epoxy resin, bisphenol A/F-based  
 CAS 25928-94-3

*Uses:* Noncrystallizing, low visc. epoxy resin for high solids and solventless high performance coatings, food-contact coatings; rec. for coatings for storage tanks, chem. mfg. plants, food/beverage processing plants, water reservoirs, pipes, sewage treatment plants, ships, elec., pollution control equip., pulp/paper mills, petrol. refineries, offshore drilling rigs, adhesives; superior chem. resist.

*Regulatory:* FDA 21CFR §175.300

*Properties:* Gardner 3 max. clear liq.; visc. 6500-8000 cP; epoxide wt. 170-177

*Toxicology:* Causes irritation; may cause allergic skin reaction

*Storage:* 5 yrs min. shelf life when stored away from excessive heat and humidity in sealed original container

**Araldite® PY 323** [Vantico AG]

*Chem. Descrip.:* Epoxy cresol novolac (Araldite® PY 307-1 base)  
 CAS 29690-82-2

*Uses:* For use in adhesives, fiber-sizing, textiles, abrasives, paper treatment; good abrasion resist., toughness, and chem. resist.

*Properties:* Liq.; < 1 µ particle size; visc. pourable; epoxide wt. 178-191; 75% solids

**Araldite® PZ 3901** [Vantico AG]

*Chem. Descrip.:* Epoxy cresol novolac (Araldite® GT 7097 base) in water (78%) and 2-propoxyethanol (22%)

*Uses:* For 2-component ambient temp. curing epoxy systems for concrete coatings, floor coatings, high performance architectural coatings, and lt. duty industrial maintenance coatings; adhesives, fiber-sizing, textiles, abrasives, paper treatment, and can/coil; highly dilutable, exc. adhesion and chem. resist.

*Properties:* Milky disp.; low odor; 1 µ particle size; dens. 9.1 ± 0.2 lb/gal; visc. 8000-25,000 cps; flash pt. > 200 F; pH 6-9; epoxide wt. 505-565; 55 ± 1.5% solids; nonionic

*Toxicology:* Can cause irritation and possible allergic reaction; harmful if absorbed thru skin; may have effects on blood

*Storage:* 1 yr shelf life stored @ R.T. in sealed orig. container

**Araldite® PZ 3917** [Vantico AG]

*Chem. Descrip.:* Epoxy cresol novolac (Araldite® GT 7097 base)  
 CAS 29690-82-2

*Uses:* For use in adhesives, fiber-sizing, textiles, abrasives, and paper treatment; exc. stability, adhesion and chem. resist.

*Properties:* < 2 µ particle size; visc. 10,000-20,000 cps; epoxide wt. 2100-

2600; 55% solids

**Araldite® XU 3900** [Vantico AG]

*Chem. Descrip.:* Epoxy cresol novolac (Araldite® PY 307-1 base)  
 CAS 29690-82-2

*Uses:* For use in adhesives, fiber-sizing, textiles, abrasives, and paper treatment; exc. adhesion and chem. resist.; highly dilutable

*Properties:* < 0.4 µ particle size; visc. 10,000-20,000 cps; epoxide wt. 306-322; 30% solids

**Araldite® XU 3903** [Vantico AG]

*Chem. Descrip.:* Epoxy cresol novolac (Araldite® GT 7013 base)  
 CAS 29690-82-2

*Uses:* For use in adhesives, fiber-sizing, textiles, abrasives, and paper treatment; exc. stability, adhesion and chem. resist.

*Properties:* < 2 µ particle size; visc. 10,000-20,000 cps; epoxide wt. 720-800; 60% solids

**Arcol® 11-34** [Lyondell]

*Chem. Descrip.:* Polyalkylene polyol  
 CAS 9082-00-2

*Uses:* Used in sealants, caulks, deck coatings, elastomers, tire fill and RIM, food pkg. adhesives/cellophane; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.180, 176.200, 176.210, 177.1200, 177.1400

*Properties:* Pt-Co 50 max. color; m.w. ≈ 4800; sp.gr. 1.026 (20/20 C); dens. 8.56; acid no. 0.015 max. mg KOH/g; flash pt. (PMCC) 376 F; 0.07% max. water

**Arcol® PPG-425** [Lyondell]

*Chem. Descrip.:* Polypropylene glycol  
 CAS 25322-69-4

*Uses:* Used in solvent and water-based coatings, high modulus adhesives, cast elastomers, thermal break, electrical potting, RIM, inks, lubrication, metalworking, antistatic agents, crude oil de-emulsification and plasticizers; food pkg. adhesives, coatings, cellophane, animal glues; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.1200, 177.1400, 177.1680, 178.3120

*Properties:* Pt-Co 75 max. color; m.w. 425; sp.gr. 1.008 (20/20 C); 8.42 lb/gal (60 F); visc. 110 cp (20 C); acid no. 0.05 max.; flash pt. (PMCC) 351 F; pH 5.0-6.0 (in 10/6 IPA/water); 0.05% max. water

*Storage:* Store in carbon steel tanks, recommend a heated tank if stored outside, temp. of stored material should not exceed 120 F

**Arcol® PPG-725** [Lyondell]

*Chem. Descrip.:* Polypropylene glycol  
 CAS 25322-69-4

*Uses:* Used in coatings, solv.-based adhesives, castable elastomers, defoamers, humectants, potting compds., tire fill, inks, lubrication, metalworking, antistatic agents, crude oil de-emulsification and plasticizers; food pkg. adhesives, coatings, cellophane, animal glues; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.1200, 177.1400, 177.1680, 178.3120

*Properties:* Pt-Co 50 max. color; m.w. 760; sp.gr. 1.007 (20/20 C); dens. 8.41 lb/gal (60 F); visc. 160 cp (20 C); acid no. 0.05 max.; flash pt. (PMCC) 346 F; pH 5.0-6.0 (in 10/6 IPA/water); 0.05% max. water

*Storage:* Store in carbon steel tanks, recommend a heated tank if stored outside, temp. of stored material should not exceed 120 F

**Arcol® PPG-1025** [Lyondell]

*Chem. Descrip.:* Polypropylene glycol  
 CAS 25322-69-4

*Uses:* Used in coatings, adhesives, caulks, sealants elastomers, potting compds., tire fill, humectants, defoamers, inks, lubrication, metalworking, antistatic agents, crude oil de-emulsification and plasticizers; food pkg. adhesives, coatings, cellophane, animal glues; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §173.310, 175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1400, 177.1680, 178.3120

*Properties:* Pt-Co 75 max. color; m.w. 1000; sp.gr. 1.005 (20/20 C); dens. 8.39 lb/gal (60 F); visc. 220 cp (20 C); acid no. 0/05 max.; flash pt. (PMCC) 356 F; pH 5.0-6.0 (in 10/6 IPA/water); 0.05% max. water

*Storage:* Store in carbon steel tanks, recommend a heated tank if stored outside, temp. of stored material should not exceed 120 F

**Arcol® PPG-2025** [Lyondell]

*Chem. Descrip.:* Polypropylene glycol

CAS 25322-69-4

*Uses:* Used in deck coatings, adhesives, plywood patch, flooring, elastomers, clay pipe sealants, tire fill, humectants, defoamers, inks, lubrication, metalworking, antistatic agents, crude oil de-emulsification and plasticizers; food pkg. adhesives, coatings, cellophane, animal glues; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §173.310, 173.340, 175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1400, 177.1680, 178.3120, 178.3740

*Properties:* Pt-Co 30 color (50 C); m.w. 2000; sp.gr. 1.005 (20/20 C); dens. 8.39 lb/gal (60 F); visc. 520 cps (20 C); acid no. 0.05 max.; hyd. no. 56; flash pt. (PMCC) 341 F; pH 5.0-6.0 (in 10/6 IPA/water); 0.05% max. water

*Storage:* Store in carbon steel tanks, recommend a heated tank if stored outside, temp. of stored material should not exceed 120 F

#### Arcol® PPG-3025 [Lyondell]

*Chem. Descrip.:* Polypropylene glycol

CAS 25322-69-4

*Uses:* Used in caulks, sealants, deck and sports coatings, deck and sports flooring, inks, lubrication, metalworking, antistatic agents, crude oil de-emulsification; in adhesives for food pkg.; food pkg. adhesives, paper/paperboard, cellophane; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §173.310, 175.105, 176.170, 176.180, 176.200, 177.1200, 177.1400, 177.1680, 178.3740

*Properties:* Pt-Co 50 max. color; m.w. approx. 3000; sp.gr. 1.004 (20/20 C); dens. 8.38 lb/gal (60 F); visc. 1720 cp (20 C); acid no. 0.05 max.; flash pt. (PMCC) 346 F; pH 5.0-6.0 (in 10/6 IPA/water); 0.05% max. water

*Storage:* Store in carbon steel tanks, recommend a heated tank if stored outside, temp. of stored material should not exceed 120 F

#### Arizona DR-22 [Arizona]

*Chem. Descrip.:* Disproportionated rosin

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Emulsifier, detergent, wetting agent; used to prepare emulsifiers for SBR polymerization; as short-stop for solv. polymerizations of rubber; as plasticizer/softener/tackifier for IIR, SBR, CR; food pkg. adhesives, coatings, paper/paperboard, cellophane, rubber articles; defoamer in food-contact paper/paperboard; used to make Arizona disproportionated tall oil rosin soaps (DRS-40, 42, 43, 44)

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.210, 177.1200, 177.1210, 177.2600, 178.3120, 178.3800, 178.3850, 178.3870

*Properties:* Gardner 6+ color; sp.gr. 1.06; dens. 8.2 lb/gal (150 C); soften. pt. (R&B) 59 C; acid no. 161; sapon. no. 165; flash pt. (OC) > 204 C; 100% solids; anionic

#### Arizona DRS-40 [Arizona]

*Chem. Descrip.:* Potassium soap of disproportionated tall oil rosin

CAS 61790-51-0; EINECS/ELINCS 263-144-5

*Uses:* Emulsifier, detergent, wetting agent for ABS, SBR, other syn. elastomers; food pkg. adhesives, paper/paperboard, cellophane, rubber articles, wood preservatives; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 176.170, 176.180, 176.210, 177.1200, 177.2600, 178.3120, 178.3800, 1787.3850, 178.3870

*Properties:* Tan paste; bland odor; water disp.; sp.gr. 1.1; dens. 9.08 lb/gal (80 C); visc. 1800 cps (65 C); acid no. 16; flash pt. (OC) > 204 C; 79.5% solids; anionic

#### Arizona DRS-42 [Arizona]

*Chem. Descrip.:* Potassium soap of disproportionated tall oil rosin

CAS 61790-51-0; EINECS/ELINCS 263-144-5

*Uses:* Emulsifier, detergent, wetting agent for ABS, SBR, other syn. elastomers; food pkg. adhesives, paper/paperboard, cellophane, rubber articles, wood preservatives; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 176.170, 176.180, 176.210, 177.1200, 177.2600, 178.3120, 178.3800, 1787.3850, 178.3870

*Properties:* Tan paste, bland odor; water disp.; dens. 9.08 lb/gal (80 C); visc. 1500 cps (65 C); acid no. 12.5; flash pt. (OC) > 204 C; 80% solids; anionic

#### Arizona DRS-43 [Arizona]

*Chem. Descrip.:* Sodium salt of disproportionated tall oil rosin

CAS 14351-66-7

*Uses:* Detergent, wetting agent, emulsifier for ABS, SBR, syn. elastomers; food pkg. adhesives, paper/paperboard, cellophane, rubber articles, wood preservatives; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 176.170, 176.180, 176.210, 177.1200, 177.2600, 178.3120, 178.3800, 1787.3850, 178.3870

*Properties:* Tan paste; bland odor; water disp.; sp.gr. 1.1; dens. 8.92 lb/gal (80 C); visc. 2500 cps (65 C); acid no. 11.5; flash pt. (OC) > 204 C; 71% solids; anionic

#### Arizona DRS-44 [Arizona]

*Chem. Descrip.:* Sodium soap of disproportionated tall oil rosin

CAS 14351-66-7

*Uses:* Emulsifier for prod. of ABS, SBR and other syn. elastomers; food pkg. adhesives, paper/paperboard, cellophane, rubber articles, wood preservatives; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.125, 176.170, 176.180, 176.210, 177.1200, 177.2600, 178.3120, 178.3800, 1787.3850, 178.3870

*Properties:* Paste; 70% conc.; anionic

#### Arkon M-90 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C, hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 630; sp.gr. 0.993; acid no. 0; soften. pt. (R & B) 90 ± 5 C; flash pt. (OC) 356 F

*Toxicology:* TSCA listed

*Precaution:* Resin may remass during hot weather and/or prolonged storage

#### Arkon M-100 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C, hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 700; sp.gr. 0.995; acid no. 0; soften. pt. (R & B) 100 ± 5 C; flash pt. (OC) 383 F

*Toxicology:* TSCA listed

#### Arkon M-115 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C, hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 800; sp.gr. 0.998; acid no. 0; soften. pt. (R & B) 115 ± 5 C; flash pt. (OC) 410 F

*Toxicology:* TSCA listed

#### Arkon M-135 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C, hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 850; sp.gr. 0.999; acid no. 0; soften. pt. (R & B) 135 ± 5 C; flash pt. (OC) 430 F

*Toxicology:* TSCA listed

#### Arkon P-70 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C, hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 600; sp.gr. 0.983; acid no. 0; soften. pt. (R & B) 70 ± 5 C; flash pt. (OC) 324 F

*Toxicology:* TSCA listed

*Precaution:* Resin may remass during hot weather and/or prolonged storage

#### Arkon P-90 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C, hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 630; sp.gr. 0.991; acid no. 0; soften. pt. (R & B) 90 ± 5 C; flash pt. (OC) 347 F

*Toxicology:* TSCA listed

*Precaution:* Resin may remass during hot weather and/or prolonged storage

#### Arkon P-100 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C<sub>9</sub> hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 700; sp.gr. 0.995; acid no. 0; soften. pt. (R & B) 100 ± 5 C; flash pt. (OC) 383 F

*Toxicology:* TSCA listed

#### Arkon P-115 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C<sub>9</sub> hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 770; sp.gr. 0.998; acid no. 0; soften. pt. (R & B) 115 ± 5 C; flash pt. (OC) 410 F

*Toxicology:* TSCA listed

#### Arkon P-125 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C<sub>9</sub> hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 820; sp.gr. 0.999; acid no. 0; soften. pt. (R & B) 125 ± 5 C; flash pt. (OC) 437 F

*Toxicology:* TSCA listed

#### Arkon P-140 [Arakawa USA]

*Chem. Descrip.:* Hydrogenated aromatic C<sub>9</sub> hydrocarbon resin

*Uses:* Tackifying resin for elastomers; food pkg. adhesives, paper/paperboard, rubber articles; heat and water resist.

*Regulatory:* FDA 21CFR 175.105, 176.180, 177.2600

*Properties:* Water-wh. color; odorless; sol. in min. spirits, toluol; insol. in ethyl acetate, acetone, ethyl alcohol; m.w. 860; sp.gr. 0.999; acid no. 0; soften. pt. (R & B) 140 ± 5 C; flash pt. (OC) 440 F

*Toxicology:* TSCA listed

#### Armeen® 2C [Akzo Nobel]

*Chem. Descrip.:* Dicocamine (sec. amine)

CAS 61789-76-2; EINECS/ELINCS 263-086-0

*Uses:* Emulsifier; flotation agent; corrosion inhibitor; cosmetics; chem. intermediate; food pkg. adhesives; defoamer in food-contact paper/paperboard; in food-contact rubber articles, animal glue

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600, 178.3120

*Properties:* Gardner 2 max. solid; sol. in chloroform, slightly sol. in IPA, toluene, CCl<sub>4</sub>, kerosene; sp.gr. 0.793 (60/40 C); dens. 790 kg/m<sup>3</sup> (20 C); visc. 49.1 SSU (60 C); vapor pressure < 1 mm Hg (20 C); m.p. 46 C; i.b.p. 180 C; pour pt. 46 C; HLB 4.2; iodine no. 3; amine no. 144; flash pt. (PMCC) > 149 C; 90% act.; 93% min. sec. amine; cationic

#### Armid® 18 [Akzo Nobel]

*Chem. Descrip.:* Stearamide, antblock agent

CAS 124-26-5; EINECS/ELINCS 204-693-2

*Uses:* Internal lubricant and slip agent for processed plastics, coatings, and films; builder, visc. stabilizer, and foam booster/stabilizer in syn. detergents, cosmetics; water repellent for textiles; improves dye solubility in printing inks, dyes, carbon paper coatings, and fusible coatings for glassware and ceramics; intermediate for syn. waxes; pigment dispersant; thickener for paint

*Properties:* Gardner 7 flake; water-insol.; sp.gr. 0.52 (100 C); m.p. 99-109 C; iodine no. 3; flash pt. 225 C; 90% act.

#### Armid® O [Akzo Nobel]

*Chem. Descrip.:* Oleamide

CAS 301-02-0; EINECS/ELINCS 206-103-9

*Uses:* Internal lubricant and slip agent for processed plastics, coatings, and films; builder, visc. stabilizer, and foam booster/stabilizer in syn. detergents; water repellent for textiles; release agent in cosmetics; penetrant in paper manufacture

*Properties:* Gardner 7 flake, solid; bland odor; m.w. 279; sol (g/100 ml solv. with heating) 59 g in 95% IPA; 30 g in 95% ethanol; 15 g in acetone and trichloroethylene; 11 g in ethyl acetate and MIBK; insol. in water; sp.gr. 0.830 (100 C); visc. 25 cps; m.p. 68 C; iodine no. 92; flash pt. 207 C; 90% act.

#### Armul™ 910 [Crompton/Witco]

*Chem. Descrip.:* Alkylphenol PEG ether

*Uses:* Wetting agent for wettable powds., clays; dust control modifier; lime soap dispersant; detergents; visc. builders; for pulp/paper and textile industries

*Properties:* Liq.; HLB 12.9; 100% conc.; nonionic

#### Aromox® C/12 [Akzo Nobel]

*Chem. Descrip.:* Dihydroxyethyl cocamine oxide, IPA

*Uses:* Wetting agent, emulsifier, stabilizer, antistat, foaming agent for detergents, shampoos, cosmetics, textiles, metal plating, petrol. additives, paper, plastics, rubber; hair conditioner

*Properties:* Gardner 2 clear liq.; sol. in water; sp.gr. 0.949; visc. 52 cp; cloud pt. 18 F; flash pt. (PMCC) 22 C; pour pt. 0 F; surf. tens. 33 dynes/cm (0.1%); 50% act. in aq. IPA; cationic

*Toxicology:* Prolonged contact may cause severe burns to eyes and severe skin irritation

*Environmental:* Biodeg.

*Precaution:* Flamm.

#### Aromox® C/12-W [Akzo Nobel; Akzo Nobel bv]

*Chem. Descrip.:* Dihydroxyethyl cocamine oxide

CAS 61791-47-7; EINECS/ELINCS 263-180-1

*Uses:* Surfactant, wetting agent, emulsifier, stabilizer, antistat, foaming agent for detergents, shampoos, cosmetics, textiles, metal plating, petrol. additives, paper, plastics, rubber; gel sensitizer for latex foam; hair conditioner

*Properties:* Gardner 4 max. clear liq.; sol. in water; sp.gr. 0.997; visc. 2097 cp; HLB 18.4; pour pt. 35 F; flash pt. nonflamm.; surf. tens. 30.8 dynes/cm (0.1%); 40% act. in water; cationic

*Toxicology:* Prolonged contact may cause severe burns to eyes and severe skin irritation

*Environmental:* Biodeg.

#### Arquad® 2C-70 Nitrite [Akzo Nobel]

*Chem. Descrip.:* Dicoco nitrite, methanol/isopropanol

*Uses:* Surfactant, dispersant for protective coatings, pigments, inks, textiles, agric., acid pickling baths, marine applics, metalworking, electroplating, fuel treatment, emulsion/plastic mfg., wastewater treatment, min. processing, paper

*Properties:* Gardner 14 max. liq.; sol. in alcohols, benzene, chloroform, CCl<sub>4</sub>; disp. in water; pH 6-8.5; flash pt. (PMCC) 20 C; 68-72% quat. in methanol/IPA

*Environmental:* Biodeg.

*Precaution:* Flamm.

#### Arquad® 2C-75 [Akzo Nobel; Akzo Nobel bv]

*Chem. Descrip.:* Dicocodimonium chloride, aq. IPA

*Uses:* Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, softener, dyeing aid, antistat for textiles, paper, cosmetics, industrial, agric., plastics, petrol., acid pickling baths; bactericide; algicide; hair conditioner

*Properties:* Gardner 7 semiliq.; sol. in alcohols, propylene glycol, benzene, chloroform, CCl<sub>4</sub>; disp. in min. oil, IPM; insol. in water; m.w. 447; sp.gr. 0.89; HLB 11.4; pour pt. 10 F; flash pt. (PMCC) 26 C; pH 6-9; surf. tens. 30 dynes/cm (0.1%); 75% act. in aq. IPA; cationic

*Environmental:* Biodeg.

*Precaution:* Flamm.

#### Arquad® 2HT-75 [Akzo Nobel; Akzo Nobel bv]

*Chem. Descrip.:* Quaternium-18, aq. IPA

*Uses:* Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, antistat, bacteriostat for paper softening, household laundry, hair conditioning

*Properties:* Soft wh. paste; sol. in IPA, propylene glycol, benzene, chloroform, CCl<sub>4</sub>; disp. in water; insol. in min. oil, IPM; m.w. 573; sp.gr. 0.87; dens. 7.22 lb/gal; visc. 47.5 cps (120 F); f.p. 95 F; HLB 9.7; pour pt. 90-100 F; flash pt. (Seta) 44 C; pH 6-9; surf. tens. 37 dynes/cm (0.1%); 75% act. in aq. IPA; cationic

*Toxicology:* LD50 (acute oral) 7000 mg/kg; nontoxic by ingestion

*Environmental:* Biodeg.

*Precaution:* Flamm.

#### Arquad® 2HT-75PG [Akzo Nobel]

*Chem. Descrip.:* Quaternium-18 (70-80%), propylene glycol (15-20%)

*Uses:* Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, antistat, bacteriostat for paper softening, household laundry, hair conditioning

*Regulatory:* DOT nonregulated; SARA reportable

*Properties:* Wh. solid; bland odor; disp. in water; sp.gr. 0.874 (50 C); vapor pressure 0.2 mm Hg (20 C); m.p. 32 C; flash pt. (PMCC) 102 C; pH 6-9; cationic

*Toxicology:* May cause skin, eye, and respiratory tract irritation

*Environmental:* Biodeg.

**Precaution:** Incompat. with strong oxidizers; not flamm. or combustible; under fire conditions, may support combustion and dec. to emit toxic materials

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>, hydrogen chloride

HMIS: Health 3; Flammability 1; Reactivity 0

**Storage:** Store in cool, dry, well-ventilated area away from oxidizing materials and foodstuffs; tightly reseal containers after opening

**Arquad® 12-50** [Akzo Nobel]

**Chem. Descrip.:** Laurtrimonium chloride, IPA

**Uses:** Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, softener, dyeing aid, antistat for textiles, paper, cosmetics, industrial, agric., plastics, petrol., acid pickling baths; bactericide, algicide; gel sensitizer for latex foam; hair conditioner improving wet combing

**Properties:** Gardner 1 max. liq.; sol. in water, IPA, propylene glycol, chloroform, CCl<sub>4</sub>; insol. in min. oil, IPM; m.w. (act.) 263; sp.gr. 0.89; f.p. 13 F; HLB 17.1; flash pt. (PMCC) 19 C; pH 5-8 (10% aq.); surf. tens. 33 dynes/cm (0.1%); 50% act. in aq. IPA; cationic

**Environmental:** Biodeg.

**Precaution:** Flamm.

**Arquad® 16-50** [Akzo Nobel; Akzo Nobel bv]

**Chem. Descrip.:** Cetrimonium chloride, IPA

**Uses:** Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, softener, dyeing aid, antistat for textiles, paper, cosmetics, industrial, agric., plastics, petrol., acid pickling baths; bactericide, algicide; rubber to textile bonding agent; hair conditioner

**Properties:** Gardner 3 max. liq.; sol. in water, IPA, propylene glycol, chloroform, CCl<sub>4</sub>; insol. in min. oil, IPM; m.w. (act.) 319; sp.gr. 0.88; f.p. 61 F; HLB 15.8; flash pt. (PMCC) 17 C; pH 5-8 (10% aq.); surf. tens. 34 dynes/cm (0.1%); 49-52% quat. in aq. IPA; cationic

**Environmental:** Biodeg.

**Precaution:** Flamm.

**Arquad® 18-50** [Akzo Nobel; Akzo Nobel bv]

**Chem. Descrip.:** Steartrimonium chloride, IPA

**Uses:** Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, softener, dyeing aid, antistat for textiles, paper, cosmetics, industrial, agric., plastics, petrol., acid pickling baths; bactericide, algicide; dye leveling agent; visc. stabilizer; in lubricant compding.; hair conditioner

**Properties:** Gardner 3 max. liq.; sol. in IPA, propylene glycol, chloroform, CCl<sub>4</sub>; disp. in water; insol. in min. oil, IPM; m.w. (act.) 347; sp.gr. 0.88; HLB 15.7; flash pt. (Seta) 18 C; pH 5-8 (10% aq.); surf. tens. 34 dynes/cm (0.1%); 50% act. in aq. IPA; cationic

**Environmental:** Biodeg.

**Precaution:** Flamm.

**Arquad® 210-50** [Akzo Nobel; Akzo Nobel bv]

**Chem. Descrip.:** Didecyl dimonium chloride, aq. ethanol

**Uses:** Surfactant, dispersant for protective coatings, pigments, inks, textiles, agric., acid pickling baths, marine applics, metalworking, electroplating, fuel treatment, emulsion/plastic mfg., wastewater treatment, min. processing, paper

**Properties:** APHA 180 max. liq.; sol. in alcohols, benzene, chloroform, CCl<sub>4</sub>; disp. in water; pH 7-9; flash pt. (PMCC) 57 C; 50% quat. in aq. ethanol; cationic

**Environmental:** Biodeg.

**Precaution:** Flamm.

**Arquad® 218-75** [Akzo Nobel]

**Chem. Descrip.:** Dioctadecyl dimethyl ammonium chloride, aq. IPA

**Uses:** Surfactant, dispersant for protective coatings, pigments, inks, textiles, agric., acid pickling baths, marine applics, metalworking, electroplating, fuel treatment, emulsion/plastic mfg., wastewater treatment, min. processing, paper; hair conditioner

**Properties:** Gardner 3 max. paste; sol. in alcohols, benzene, chloroform, CCl<sub>4</sub>; disp. in water; pH 6-9; flash pt. (Seta) 44 C; 74-77% quat. in aq. IPA

**Environmental:** Biodeg.

**Precaution:** Flamm.

**Arquad® C-50** [Akzo Nobel; Akzo Nobel bv]

**Chem. Descrip.:** Cocotrimonium chloride, IPA

**Uses:** Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, softener, dyeing aid, antistat for textiles, paper, cosmetics, industrial, agric., plastics, petrol., acid pickling baths; bactericide, algicide; gel sensitizer for latex foam; hair conditioner improving wet combing

**Properties:** Gardner 4 max. liq.; sol. in water, alcohols, chloroform, CCl<sub>4</sub>;

m.w. (act.) 278; sp.gr. 0.89; f.p. 5 F; HLB 16.5; flash pt. (PMCC) 20 C; pH 5-8 (10% aq.); surf. tens. 31 dynes/cm (0.1%); 50% act. in aq. IPA; cationic

**Environmental:** Biodeg.

**Precaution:** Flamm.

**Arquad® HTL8(W) MS-85** [Akzo Nobel]

**Chem. Descrip.:** 2-Ethylhexyl hydrogenated tallowalkyl methosulfate

**Uses:** Surfactant, dispersant for protective coatings, pigments, inks, textiles, agric., acid pickling baths, marine applics, metalworking, electroplating, fuel treatment, emulsion/plastic mfg., wastewater treatment, min. processing, paper

**Regulatory:** EPA listed

**Properties:** Gardner 5 max. liq.; sol. in alcohols, benzene, chloroform, CCl<sub>4</sub>; disp. in water; flash pt. nonflamm.; pH 4.5-6; 81.5-84.5% quat. in water; cationic

**Environmental:** Biodeg.

**Arquad® T-27W** [Akzo Nobel]

**Chem. Descrip.:** Tallow trimonium chloride

CAS 8030-78-2; EINECS/ELINCS 232-447-4

**Uses:** Emulsifier, foaming agent, wetting agent, dispersant, corrosion inhibitor, softener, dyeing aid, antistat for textiles, paper, cosmetics, industrial, agric., plastics, petrol., acid pickling baths; bactericide, algicide; hair conditioner/antistat; imparts mod. improvement in combing props.

**Properties:** Gardner 3 max. liq.; sol. in water, alcohols, chloroform, CCl<sub>4</sub>; m.w. 343; HLB 14.2; flash pt. nonflamm.; pH 5-8 (10% aq.); 26-29% act. in water; cationic

**Environmental:** Biodeg.

**ASA 100** [Dixie]

**Chem. Descrip.:** Alkenylsuccinic anhydride

CAS 70983-55-0

**Uses:** Sizing agent for alkaline paper; corrosion inhibitor for metalworking fluids; ease of handling; suitable in both cationic starch and polymer emulsion systems

**Properties:** Amber clear liq.; visc. 270 cps max.; neutralization no. 330-355; 1.5% max. residual olefin

**Toxicology:** Mild primary skin irritant; avoid contact with skin, eyes, clothing

**Storage:** Store out of contact with moisture to avoid hydrolysis of the anhydride to acid

**A-Series Glass Beads** [Potters Ind.]

**Chem. Descrip.:** Soda-lime silica glass beads

CAS 65997-17-3

**Uses:** Grinding media, particle size reducer for CaCO<sub>3</sub> and TiO<sub>2</sub> in paper mfg.; grinding aid, dispersant, deagglomerant for magnetic tape oxides, paint and ink pigments, cosmetics, fine chems., pharmaceuticals, agric. prods., dyestuffs, mech. plating, polishing, chromatography, fluidized beds, heat transfer, filtration; virtually chemically inert; low abrasive wear; low liq. absorp.; high crush resist.; large size range selection

**Properties:** Glass beads (various sizes); sp.gr. 250 g/cm<sup>3</sup>; dens. 3.70 lg/l; ref. index 1.51-1.52; hardness (Mohs) 5-6

**ASP® 072** [Engelhard]

**Chem. Descrip.:** Hydrous aluminum silicate

**Chem. Analysis:** SiO<sub>2</sub> (45.2%), Al<sub>2</sub>O<sub>3</sub> (38.8%), free moisture (1.0%)

CAS 1332-58-7; EINECS/ELINCS 296-473-8

**Uses:** Extender pigment in paints (improves suspension of other pigments); in adhesives for corrugated board, laminated fiber board, paper bag seams, paper tubes, cores; filler, opacifier in plastics; extender in printing inks; reinforcing extender for EPDM, SBR, nitrile, most other polymers; useful in mastics, putties, caulking chemicals, textile and chemical conditioning; pretreated to form a deflocculated suspension of high fluidity in water vehicles

**Properties:** Wh. free-flowing spray-dried beads, particle size 0.3 μ; 0.01% max. residue +325 mesh; sp.gr. 2.58; dens. 42-46 lb/ft<sup>3</sup>; oil absorp. 37-41; brightness (GE) 90-92; ref. index 1.56; pH 6-8

**Toxicology:** Nontoxic

**ASP® 100** [Engelhard]

**Chem. Descrip.:** Hydrous aluminum silicate

**Chem. Analysis:** SiO<sub>2</sub> (45.2%), Al<sub>2</sub>O<sub>3</sub> (38.8%), free moisture (1.0%)

CAS 1332-58-7; EINECS/ELINCS 296-473-8

**Uses:** Extender pigment in paints (improves suspension of other pigments), in adhesives for corrugated board, laminated fiber board, paper bag seams, paper tubes, cores; filler, opacifier in plastics; extender in printing inks; in rubber industry, in mastics, putties, caulking chemicals, textile and chemical conditioning; unmodified

*Uses:* Dispersant and emulsifier for acrylates, styrene acrylic, vinyl chloride, vinylidene chloride and vinyl acetate copolymers; foaming agent for mech. latex foaming, carpet and upholstery cleaners; air entraining agent for mortars; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 178.3400; SARA §311/312 reportable  
*Properties:* Colorless clear liq.; mild odor; completely sol. in water; sp.gr. 1.05; dens. 8.75 lb/gal; visc. 200 cP; flash pt. (PMCC) > 93 C; pH 8 (10%); 30-32% solids; anionic

*Toxicology:* LD50 (oral, rat) 1288 mg/kg; severe eye, skin, and respiratory tract irritant; TSCA listed

*Environmental:* BOD5 593,340 ppm; COD 957,000 ppm; 62% biodeg.

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

NFPA: Health 3; Flammability 0; Reactivity 0

*Storage:* Protect from freezing; do not store @ < 10 C

**Avirol® SL 2020 G** [Cognis/Chems. Group]

*Chem. Descrip.:* Sodium lauryl sulfate

CAS 68585-47-7; EINECS/ELINCS 205-788-1

*Uses:* Emulsifier for emulsion polymerization; additive for mech. latex foaming; foaming agent for acrylate disps., carpet and upholstery cleaners; air entraining agent for mortars; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 178.3400; DOT nonregulated; SARA §311/312 reportable

*Properties:* Colorless clear liq.; misc. with water; sp.gr. 1.050; b.p. 100 C; 30-32% solids; anionic

*Toxicology:* LD50 (oral, rat) < 5 ml/kg; causes skin and eye irritation; TSCA listed

*Precaution:* Avoid contact with strong acids, bases, and oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

HMS: Health 3; Flammability 0; Reactivity 0

**Avitex® 6311** [DuPont]

*Chem. Descrip.:* Sodium salt of sulfated oleyl acetate

*Uses:* Softener and antistat for textiles; lubricant for fibers and fabrics; penetrant, leveling agent for textile dyeing; dyeing assistant for acid and direct dyes on paper; prep. of hair grooming aids; stabilizer for aq. applic. baths

*Properties:* Cationic

**Avitex® DN-100** [DuPont]

*Chem. Descrip.:* Sodium salt of sulfated oleyl acetate

*Uses:* Softener and antistat for textiles; lubricant for fibers and fabrics; penetrant, leveling agent for textile dyeing; dyeing assistant for acid and direct dyes on paper; prep. of hair grooming aids; stabilizer for aq. applic. baths

*Properties:* Cationic

**Avitex® E** [DuPont]

*Chem. Descrip.:* Sodium salt of sulfated oleyl acetate

*Uses:* Softener and antistat for textiles; lubricant for fibers and fabrics; penetrant, leveling agent for textile dyeing; dyeing assistant for acid and direct dyes on paper; prep. of hair grooming aids; stabilizer for aq. applic. baths

*Properties:* Cationic

**Avitex® R** [DuPont; DuPont Canada]

*Chem. Descrip.:* Sodium salt of sulfated oleyl acetate

*Uses:* Softener and antistat for textiles; modifier with hand builders and resins; lubricant for fibers and fabrics; penetrant, leveling agent for textile dyeing; dyeing assistant for acid and direct dyes on paper; prep. of hair grooming aids; stabilizer for aq. applic. baths

*Properties:* Lt. tan soft, homogenous paste; mild odor; water-disp. @ 160-180 F; sp.gr. 0.98; dens. 8.18 lb/gal; pH 6.5-7.5 (1% aq.); cationic

**Avitone® A** [DuPont; DuPont Canada]

*Chem. Descrip.:* Sodium alkyl sulfonate

*Uses:* Finishing agent, softener, lubricant for improving texture and hand of textiles, leather, and paper, and for elastomers; highly stable to chemicals and oxidation

*Properties:* Lt. tan paste, bland odor; disp. in water; sp.gr. 1.02 g/mL; dens. 8.4 lb/gal; cloud pt. none; flash pt. none; pH 7.5-9.0 (10% aq.); 75% act.; anionic

# B

## B20F [Grain Processing]

*Chem. Descrip.:* Unmodified corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Specially treated to improve functionality in applics. such as AP conversions for paper and board surf. sizing and coating; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. fine powd., flash-dried form; bulk dens. 31 lb/ft<sup>3</sup> (loose), 39 lb/ft<sup>3</sup> (packed); pH 6; 11% moisture

## B200 [Grain Processing]

*Chem. Descrip.:* Unmodified corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Specially treated to improve functionality in applics. such as AP conversions for paper and board surf. sizing and coating; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. gran. powd.; bulk dens. 39 lb/ft<sup>3</sup> (loose), 48 lb/ft<sup>3</sup> (packed); pH 6; 11% moisture

## Bacote™ 20 [Magnesium Elektron; Nikkei-MEL]

*Chem. Descrip.:* Stabilized ammonium zirconium carbonate aq. sol'n.

CAS 68309-95-5

*Uses:* Binder insolubilizer for paper and board coatings, nonwoven fabrics; deposit control agent in wet-end paper processes; str. additive for alkaline-sized paper; component of waterborne inks, overprint varnishes, adhesives; textile, leather, and paper water-repellent formulations; antimicrobial treatment for textiles and timber; coagulant in mfg. of syn. leather cloth; metal pretreatment coatings; precursor to zirconia in catalyst systems

*Properties:* Clear sol'n.; sp.gr. 1.37; pH 9.1; 20% ZrO<sub>2</sub>

*Storage:* Store in cool areas; protect sol'ns. from extremely high temps. and freezing; containers must remain sealed until use due to volatile nature

## Bafixan® Dyes [BASF]

*Uses:* Disperse dyes for transfer paper printing on textile printing machines

## Bag White 9 [Michelman]

*Uses:* Wh. coating for multiwall paper bags; rod-applicable; glueable; repulpable

## Barquat® 1552 [Lonza]

*Chem. Descrip.:* 42% Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chloride and 8% dialkyl methyl benzyl ammonium chloride

*Uses:* Algicide for swimming pools and recirculating cooling towers; slimicide in pulp/paper waters

*Regulatory:* EPA reg. no. 6836-59; FDA approved slime control in pulp/paper waters

*Properties:* Gardner < 2 clear liq.; m.w. 399; sp.gr. 0.955; dens. 7.96 lb/gal; flash pt. (Seta) 100 F; pH 6.5-8.3 (10%); 50% act.

*Toxicology:* Corrosive; causes severe eye and skin damage; harmful or fatal if swallowed

*Environmental:* Toxic to fish

## Barquat® MB-50 [Lonza]

*Chem. Descrip.:* Alkyl (50% C14, 40% C12, 10% C16) dimethylbenzyl ammonium chloride

CAS 68424-85-1

*Uses:* Germicide, disinfectant, sanitizer, deodorant, fungicide, algicide for household, institutional and industrial applics.; slimicide in pulp/paper waters; fungicide for wood protection; effective against bacteria in hard water; rec. where a min. of water is desirable in formulations

*Use Level:* 800 ppm (hospital disinfection), 400 ppm (general disinfection), 200 ppm (general sanitization)

*Regulatory:* EPA reg. no. 6836-2; FDA approved slime control in pulp/paper waters

*Properties:* Pale yel. clear liq.; mild odor; freely sol. in water, lower alcohols, ketones, glycols; sp.gr. 0.962; dens. 8.03 lb/gal; pH 6.5-8.3 (10%); 50% act.; cationic

*Toxicology:* Corrosive; causes severe eye and skin damage; harmful or fatal if swallowed

*Environmental:* Toxic to fish

*Storage:* Congealing may occur during prolonged storage at low temps.; warm to R.T. and mix to restore homogeneity

## Barquat® OJ-50 [Lonza]

*Chem. Descrip.:* Alkyl (60% C14, 25% C12, 15% C16) dimethyl benzyl ammonium chloride

CAS 139-08-2; EINECS/ELINCS 205-352-0

*Uses:* Algicide in swimming pools and cooling tower water treatment, sec. oil recovery; slimicide in pulp/paper waters

*Regulatory:* EPA reg. no. 6836-11; FDA approved slime control in pulp/paper waters

*Properties:* APHA 125 max. liq.; sp.gr. 0.960; dens. 8.01 lb/gal; flash pt. (Seta) 107 F; pH 6.5-9.0 (10%); 50% act.

*Toxicology:* Corrosive; causes severe eye and skin damage; harmful or fatal if swallowed

## Barquat® OJ-80 [Lonza]

*Chem. Descrip.:* Alkyl (60% C14, 25% C12, 15% C16) dimethyl benzyl ammonium chloride

CAS 139-08-2; EINECS/ELINCS 205-352-0

*Uses:* Algicide for swimming pools, water treatment, sec. oil recovery; sanitizer; slimicide in pulp/paper waters

*Regulatory:* EPA reg. no. 6836-82; FDA approved slime control in pulp/paper waters

*Properties:* APHA 20 max. liq.; sp.gr. 0.940; dens. 7.84 lb/gal; flash pt. (Seta) 113 F; pH 6.5-9.0 (10%); 80% act.

*Toxicology:* Corrosive; causes severe eye and skin damage; harmful or fatal if swallowed

## Basazol® [BASF; BASF AG]

*Uses:* Basic dyes for coloring paper, for unbleached and wood-containing or used paper-containing papers

## Basazol® C [BASF AG]

*Uses:* Basic dyes for unbleached and wood-containing or used paper-containing papers; high color intensity, high resist. to bleeding

## Basocoll® OV [BASF; BASF AG]

*Chem. Descrip.:* Aliphatic epoxy resin

*Uses:* Curing agent for coating mixts. in paper finishing; improves water resist.

## Basonyl® Dyes [BASF AG]

*Uses:* Cationic dyes for prod. of inks, carbon paper coatings, for dyeing natural fibers such as jute, sisal, wool; paint and varnish industry for prod. of daylight fluorescent pigments and gloss paints; coloring seeds and crop protection agents

*Properties:* Sol. in alcohols, glycol ethers, and water

## Basophob® [BASF AG]

*Chem. Descrip.:* Aq. paraffin or polyethylene wax dispersions, sol'ns. of fatty acid derivs.

- Uses:* Hydrophobing agent for internal or surface treatment of paints, mortar, concrete and paper
- Basoplast® 250 D** [BASF]  
*Chem. Descrip.:* Acrylic copolymer  
 CAS 25133-97-5  
*Uses:* Wet-end and surf. sizing agent for improved ink holdout, linting, and dusting in gravure and offset printing on paper; fully cured during drying  
*Use Level:* 2-4% (wet end sizing), 10-15 g/l (surf. sizing, hard-sized paper)  
*Properties:* Anionic/weak cationic
- Basoplast® 265 D** [BASF]  
*Chem. Descrip.:* Acrylic copolymer  
 CAS 25133-97-5  
*Uses:* Wet-end and surf. sizing agent for paper; versatile; for sizing paper in neutral or acid media; fully cured during drying; produces paper with resist. to acids and alkalis  
*Properties:* Cationic
- Basoplast® 335 D** [BASF]  
*Chem. Descrip.:* Acrylic copolymer  
 CAS 25133-97-5  
*Uses:* Wet-end and surf. sizing agent for paper, esp. filled with calcium carbonate; plasticizer for starch films; improves resist. of paper surf. to mech. action; extremely low foaming; fully cured during drying  
*Properties:* Amphoteric
- Basoplast® 400 DS** [BASF]  
*Chem. Descrip.:* Styrene acrylic copolymer  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent for improved toner adhesion and ink jet printing for paper; extremely low foaming; fully cured during drying  
*Use Level:* 10-20 g/l (hard-sized paper)  
*Properties:* Anionic
- Batch Defoamer 111** [Process Chems. LLC]  
*Uses:* Brownstock defoamer for kraft, sulfite, and semi-chem. pulp washing, for brownstock washing, screenroom, and bleach plant applics.; oil-based; does not contribute to deposit formation; suitable whether batch or continuous generated pulp is employed  
*Properties:* Opaque tan liq.; dens. 7-8 lb/gal; visc. 600-1000 cps  
*Toxicology:* TSCA listed  
*Storage:* Store in dry area
- Bayer SBR Latex 310 C** [Bayer AG]  
*Chem. Descrip.:* S/B latex  
 CAS 9003-55-8  
*Uses:* Binder for paper and needle felt reinforcement; nonstaining; hard  
*Properties:* Dens. 1.03 g/cc; pH 8.5 ± 0.5; 50 ± 0.5% solids; 65% styrene content
- Bayferrox® 56-AC** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® 3950** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Black 318** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Black 318M** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Black 330** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Brown 686** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 110M** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 115M** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 120M** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 130M** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 180M** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 320** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 330** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Red 610** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Yellow 1410** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Yellow 1420M** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Yellow 3420** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Bayferrox® Yellow 3910** [Bayer]  
*Chem. Descrip.:* Inorg. pigment  
*Uses:* Pigment for dyeing laminate-based papers and specialty papers
- Baymicron® 2107** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baymicron® 2109** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baymicron® Black C 200** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baymicron® Black R 200** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baymicron® Blue R 200** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baymicron® Defoamer 50** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baymicron® OXA WM 22** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baymicron® OXA WM 33** [Bayer]  
*Uses:* Prod. of microcapsules for carbonless copying paper
- Baypren Latex 4 R** [Bayer AG; Bayer/Fiber, Addits., Rubber]  
*Chem. Descrip.:* CR latex, 4% methacrylic acid  
*Uses:* Used in dipped goods, proofings, coatings, lamination of fabrics and paper; binder for fibers; road construction; waterproofing; corrosion inhibitor; adhesives; sealing compositions; mine safety applics.  
*Properties:* Dens. 1.11 g/cc; pH 6.5; 50 ± 0.5% solids
- Baypren Latex B** [Bayer AG; Bayer/Fiber, Addits., Rubber]  
*Chem. Descrip.:* CR latex  
 CAS 9010-98-4  
*Uses:* Used in dipped goods, proofings, coatings, lamination of fabrics and paper; binder for fibers; road construction; waterproofing; corrosion inhibitor; adhesives; sealing compositions; mine safety applics.  
*Properties:* Dens. 1.13 g/cc; pH 12.5-13.0; 58 ± 0.5% solids
- Baypren Latex GK** [Bayer AG; Bayer/Fiber, Addits., Rubber]  
*Chem. Descrip.:* CR latex  
 CAS 9010-98-4  
*Uses:* Used in dipped goods, proofings, coatings, lamination of fabrics and paper; binder for fibers; road construction; waterproofing; corrosion inhibitor; adhesives; sealing compositions; mine safety applics.  
*Properties:* Dens. 1.08 g/cc; pH 12.5-13.0; 32 ± 1.0% solids
- Baypren Latex L 200A** [Bayer/Fiber, Addits., Rubber]  
*Chem. Descrip.:* Polychloroprene aq. colloidal disp.  
 CAS 9010-98-4  
*Uses:* Used in dipped goods, paper and fabric saturants, and coatings  
*Properties:* Off-wh. color; char. smell; dens. 1.11 g/cc; visc. 21 mPa·s; pH 12.5; surf. tens. 35-45 dynes/cm; 50% solids; anionic
- Baypren Latex L 300** [Bayer AG; Bayer/Fiber, Addits., Rubber]  
*Chem. Descrip.:* Chloroprene homopolymer latex  
 CAS 9010-98-4  
*Uses:* Binder for paper prods., dipped goods, and adhesives; offers high

cohesive str.; cured films have high modulus and med. tens. str.; vulcanized with ZnO, conventional polychloroprene accelerators, and sulfur, if desired  
*Properties:* Sp.gr. 1.13; visc. 55 cps; surf. tens. 40 dynes/cm; pH 12.5; 60% solids

**Baypren Latex L 345** [Bayer/Fiber, Addits., Rubber]

*Chem. Descrip.:* Polychloroprene aq. colloidal disp.  
 CAS 9010-98-4

*Uses:* Used in paper saturation, fabric coating, and dipped goods

*Properties:* Off-wh.; 180 nm particle size; char. smell; dens. 1.13 g/cc; visc. 73 mPa·s; pH 12.0; surf. tens. 40-50 dynes/cm; 58.5% solids; anionic

**Baypren Latex MKB** [Bayer AG]

*Chem. Descrip.:* CR latex  
 CAS 9010-98-4

*Uses:* Used in dipped goods, proofings, coatings, lamination of fabrics and paper; binder for fibers; road construction; waterproofing; corrosion inhibitor; adhesives; sealing compositions; mine safety applics.

*Properties:* Dens. 1.13 g/cc; pH 12.5-13.0; 58 ± 0.5% solids

**Baypren Latex SK** [Bayer AG]

*Chem. Descrip.:* CR latex  
 CAS 9010-98-4

*Uses:* Used in dipped goods, proofings, coatings, lamination of fabrics and paper; binder for fibers; road construction; waterproofing; corrosion inhibitor; adhesives; sealing compositions; mine safety applics.; for toe caps and counters for footwear

*Properties:* Dens. 1.12 g/cc; pH 12.5-13.0; 55 ± 0.5% solids

**Baypren Latex T** [Bayer AG]

*Chem. Descrip.:* CR latex  
 CAS 9010-98-4

*Uses:* Used in dipped goods, proofings, coatings, lamination of fabrics and paper; binder for fibers; road construction; waterproofing; corrosion inhibitor; adhesives; sealing compositions; mine safety applics.

*Properties:* Dens. 1.13 g/cc; pH 12.5-13.0; 58 ± 0.5% solids

**Bayprint™ Binder E-1030** [Bayer]

*Uses:* Binder for paper prod.

**Bayprint™ Blue Tint Base E-1031** [Bayer]

*Uses:* Prod. of water-based flexographic inks for printing tissues, napkins, paper towels

**Bayprint™ Red Tint Base E-1032** [Bayer]

*Uses:* Prod. of water-based flexographic inks for printing tissues, napkins, paper towels

**Bayprint™ Yellow Tint Base E-1033** [Bayer]

*Uses:* Prod. of water-based flexographic inks for printing tissues, napkins, paper towels

**Baysynthol® AGP** [Bayer]

*Uses:* Processing chem. for paper

**Baysynthol® BMP** [Bayer]

*Uses:* Processing chem. for paper

**Beetle® 216-8** [Cytec Ind.]

*Chem. Descrip.:* Highly alkylated urea-formaldehyde resin; n-butanol (87.5%), xylene (12.5%)

*Uses:* Crosslinking agent; leveling agent in cold curing, amine catalyzed, epoxy resin coatings, metal primers, cellulosic lacquers, electrostatic sprays, and dipping enamels; food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.02; dens. 10.2 lb/gal (solids); visc. 5-9 poises; acid no. 2 max.; flash pt. (Seta) 34 C; 59 ± 2% NV by wt.; free formaldehyde (2.5% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

**Beetle® 227-8** [Cytec Ind.]

*Chem. Descrip.:* Urea-formaldehyde resin; n-butanol (50%), xylene (50%)

*Uses:* Crosslinking agent for use in epoxy/urea metal primers; as pigment grinding vehicle; food-contact coatings, paper/paperboard; fast curing speed; exc. enamel stability in pigmented systems

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.0; dens. 9.9 lb/gal (solids); visc. 13-27 poises; acid no. 4 max.; flash pt. (Seta) 22 C; 52 ± 2% NV by wt.; free formaldehyde (2.0% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

**Beetle® 1032-10** [Cytec Ind.]

*Chem. Descrip.:* Isobutylated urea-formaldehyde resin; isobutanol (100%)

*Uses:* Crosslinking agent for pigmented enamels; food-contact coatings, paper/paperboard; offers high gloss and film hardness on marginal curing schedules; compat. with short and med. oil alkyd resins; fast cure

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.01; dens. 10.2 lb/gal (solids); visc. 23-38 poises; acid no. 6 max.; flash pt. (Seta) 38 C; 60 ± 2% NV by wt.; free formaldehyde (2.5% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

**Beetle® 1047** [Cytec Ind.]

*Chem. Descrip.:* Isobutylated urea-formaldehyde resin; isobutanol (70%), xylene (30%)

*Uses:* Crosslinking agent for low temp. curing conversion varnishes; for paper coatings and electrostatic sprays; food-contact coatings, paper/paperboard; compat. with short and med. oil alkyd resins, low and med. m.w. epoxy resins, epoxy ester resins, and with cellulosics

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.01; dens. 10.2 lb/gal (solids); visc. 6-13 poises; acid no. 2 max.; flash pt. (Seta) 22 C; 58 ± 2% NV by wt.; free formaldehyde (2.0% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

**Beetle® 1050** [Cytec Ind.]

*Chem. Descrip.:* Butylated urea-formaldehyde resin; n-butanol (50%), xylene (50%)

*Uses:* Crosslinking agent; general purpose resin used in conversion varnishes for furniture and prefinished paneling; food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.0; dens. 9.9 lb/gal (solids); visc. 13-27 poises; acid no. 4 max.; flash pt. (Seta) 20 C; 52 ± 2% NV by wt.; free formaldehyde (2.0% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

**Bekaflex 2000 V** [BK Giulini Chemie]

*Chem. Descrip.:* Aldehydic carbohydrates

*Uses:* Peroxide stabilizer in deinking and bleaching process

*Properties:* Ylsh. clear liq.; misc. with water; sp.gr. 1.07; pH 4.5 (20 C)

*Storage:* 4 yr. shelf life @ 2-40 C; protect from frost

**Bekaperg 67** [BK Giulini Chemie]

*Chem. Descrip.:* Phosphates and hydroxide

*Uses:* Defibering agent for wet-strengthened paper

*Use Level:* 0.5-1.5%

*Regulatory:* BgVV compliant

*Properties:* Wh. powd.; sol. 70 g/l in water; sp.gr. 1.0; pH 12.5 (1%; 20 C)

*Storage:* 1 yr. shelf life; keep dry

**Bekaperg 203** [BK Giulini Chemie]

*Chem. Descrip.:* Phosphoric acid and polyglycol ether

*Uses:* Defibering agent for wet-strengthened waste paper

*Use Level:* 0.5-1.5%

*Regulatory:* BgVV compliant

*Properties:* Ylsh. or colorless liq.; misc. with water; sp.gr. 1.6 (20 C); pH 1.3-2.1 (1%; 20 C)

*Storage:* 1 yr. shelf life @ 20 C

**Bekaperg 825** [BK Giulini Chemie]

*Chem. Descrip.:* Alkaline phosphates and surfactants

*Uses:* Defibering agent for wet-strengthened waste paper

*Use Level:* 0.5-1.5%

*Regulatory:* BgVV compliant

*Properties:* Ylsh. or colorless opaque liq.; misc. with water; sp.gr. 1.5 (20 C); pH 12 (1%; 20 C)

*Storage:* 1 yr. shelf life @ 20 C; protect from frost

**Bekaperg 830** [BK Giulini Chemie]*Chem. Descrip.:* Alkaline phosphates and surfactants*Uses:* Defibering agent for wet-strengthened waste paper*Use Level:* 0.1-1.5%*Properties:* Wh. powd.; sol. 80 g/l in water (20 C), 350 g/l in water (60 C);

sp.gr. 0.8 (20 C); pH 12 (1%; 20 C)

*Storage:* 1 yr. shelf life @ 20 C; keep dry**Bekaperg 834** [BK Giulini Chemie]*Chem. Descrip.:* Phosphonic acid and phosphate*Uses:* Liq. pitch control agent for pulp/paper prod.*Use Level:* 0.2-0.5% (paper machine); 0.1-0.3% (pulp production)*Properties:* Yel. brn. liq.; misc. with water (20 C); sp.gr. 1.35 (20 C); pH 8.8 (20 C)*Storage:* 1 yr. shelf life @ 20 C; protect from frost**Belclene® 283** [BioLab Water Addit.]*Chem. Descrip.:* Polymaleic acid terpolymer

UN No. 3265

*Uses:* Antiscalant and corrosion inhibitor in industrial water, cooling water, for calcium carbonate control in kraft pulp paper mills; component of paper/paperboard in contact with aq./fatty/dry foods; used in combination with phosphates; keeps surfaces cleaner than polyacrylate/phosphonate blends; can be used in wide range of formulations; superior performance at pH 14; zinc stabilization; stable to 200 C*Regulatory:* FDA 21CFR §176.170, 176.180*Properties:* Amber clear to sl. turbid liq.; sl. odor; misc. with water, ethylene glycol, methanol; readily neutralized with 50% caustic soda with evolution of heat; sp.gr. 1.165-1.195; visc. 12-30 cps; f.p. -6 to -4 C; b.p. 100-102 C; pH 2 max.; 45-50% act.*Toxicology:* LD50 (oral, rat) 3874 mg/kg; irritating to eyes; nonirritating to skin  
*Environmental:* LC50 (zebra fish, 96 h) > 1000 mg/l, (brown shrimp, 96 h) 2160 mg/l; biodeg. 29% in 35 days*Precaution:* Corrosive**Belsperse® 164** [BioLab Water Addit.]*Chem. Descrip.:* Phosphinocarboxylic polymer*Uses:* Sludge dispersant in boilers incl. food prod. boilers; dispersant in deinking (pulp/paper applics.); barium sulfate inhibitor for paper machines; calcium oxalate control; thermally and hydrolytically stable; exc. performance under pulp/paper conditions; outperforms polyacrylates in pulp/paper applics.*Regulatory:* FDA cleared*Properties:* Clear to sl. turbid liq.; sp.gr. 1.20-1.24; visc. 75-200 mm<sup>2</sup>/sec; pH 3.5-4.5; 37.5-42.5% solids**Benaqua® 1000** [Rheox]*Chem. Descrip.:* Polysaccharide deriv.*Uses:* Rheological additive for emulsion paints, waterborne adhesives and sealants, household cleaners and polishes, crop protection agents, paper coatings, construction prods., and waterborne inks; improves sag and slump resist.; flow/leveling agent; good water retention props., does not interfere with color development*Use Level:* 0.3-3.0%*Properties:* Pale yel. free-flowing powd.; 90% thru 120 mesh particle size; water-sol.; sp.gr. 1.51; visc. 20,000 cps (2% water gel)*Storage:* Store in dry place; absorbs moisture when stored under high humidity conditions**Benzoflex® 2-45** [Velsicol]*Chem. Descrip.:* Diethylene glycol dibenzoate

CAS 120-55-8; EINECS/ELINCS 204-407-6

*Uses:* Plasticizer producing adhesives with quick grab and set times; solvator and compatible with PVC; also in latex coatings; food pkg. adhesives, paper/paperboard; compatible with PVAc homopolymer and copolymer emulsions*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180*Properties:* APHA 100 max., mild ester odor; sol. in aliphatic and aromatic hydrocarbons; sol. < 0.01% in water; m.w. 314.3; sp.gr. 1.178; dens. 9.8 lb/gal; f.p. 16 and 28 C (two cryst. forms); b.p. 240 C; flash pt. (COC) 199 C; ref. index 1.5424; dielec. const. 7.16 (10,000 Hz); 98.0% min. assay*Toxicology:* LD50 (oral, rat) 2562 mg/kg, (dermal, rabbit) > 200 mg/l; not an eye or primary skin irritant; repeated exposure may cause defatting of skin and mild irritation to eyes and nose**Benzoflex® 9-88** [Velsicol]*Chem. Descrip.:* Dipropylene glycol dibenzoate

CAS 27138-31-4; EINECS/ELINCS 202-340-7

*Uses:* Plasticizer for elastomers, PVAc emulsion adhesives, plastisols, caulks, vinyl floor coverings, latex and lacquer coating applics.; food pkg. adhesives, paper/paperboard; high solvating; enhances film formation and surf. wetting in PVAc homopolymer emulsion adhesives*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180*Properties:* APHA 100 max. clear oily liq., mild ester odor; sol. in aliphatic and aromatic hydrocarbons; sol. < 0.01% in water; m.w. 342.3; sp.gr. 1.120; dens. 9.346 lb/gal; vapor pressure 2.29 x 10<sup>-7</sup> mm Hg; f.p. -40 C; b.p. 232 C; pour pt. -19 C; flash pt. (COC) 199 C; ref. index 1.5282; dielec. const. 7.5 (1000 Hz); 98% min. assay*Toxicology:* LD50 (oral, rat) 4673 mg/kg, (dermal, rabbit) > 2000 mg/kg; not an eye or primary skin irritant; repeated exposure may cause defatting of skin and mild irritation to eyes and nose**Benzoflex® 50** [Velsicol]*Chem. Descrip.:* Diethylene glycol dibenzoate, dipropylene glycol dibenzoate (1:1)*Uses:* Plasticizer used in PVAc adhesives, acrylic latex caulk formulations, latex coatings, plastisols, and dry-blended vinyl formulations; food pkg. adhesives, paper/paperboard; monomeric*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180*Properties:* APHA 100 max. liq., mild ester odor; sol. in aliphatic and aromatic hydrocarbons; sol. < 0.01% in water; m.w. 328.3; sp.gr. 1.154; dens. 9.6 lb/gal; vapor pressure 2.29 x 10<sup>-7</sup> mm Hg; f.p. < 0 C; b.p. 240 C (5 mm); hyd. no. 15; pour pt. -21 C; flash pt. (COC) 199 C min.; ref. index 1.535; 98.0% min. assay*Toxicology:* LD50 (oral, rat) 2500 mg/kg, (dermal, rabbit) > 2500 mg/l, (inh., rabbit, 4 h) > 200 mg/l; not an eye or primary skin irritant; repeated exposure may cause defatting of skin, mild irritation to eyes and nose*Precaution:* Avoid high temps., open flame; incompat. with strong oxidizing agents; on combustion, may decomp. to produce CO*Storage:* Store in cool, ventilated area away from sources of ignition**Berbond® 8032** [Bercen]*Uses:* Water repellent for paperboard; compat. with fluorochemicals and other size press and calender stack chems.; gives high water and oil resist.**Berbond® 8200** [Bercen]*Chem. Descrip.:* Strippable latex*Uses:* Saturant, str. agent for papermaking; features wet and dry tens. str., edge tear, burst str., internal delamination resist., and strippability; easily applied on any conventional size press; mech. stability; antisticking props.**Berbond® 8980** [Bercen]*Chem. Descrip.:* Thermoplastic*Uses:* Binder, gloss aid for pigmented paper coatings; provides exc. sheet gloss and print gloss with minimal machine finishing; outstanding wet rub resist.; does not require use of a coating insolubilizer**Berocell® 25** [Eka Chems.]*Chem. Descrip.:* Surfactant*Uses:* Surfactant for pitch control in paper processing*Properties:* Nonionic**Berocel® 283** [Eka Chems.]*Uses:* Dispersant for deinking processes; used by itself or blended with fatty acids**Berocell® 286** [Eka Chems.]*Uses:* Dispersant for deinking processes; environmentally friendly components*Properties:* Nonionic**Berocell 451** [Eka Chems.]*Uses:* Deresinator for papermaking; phosphate-free**Berocell® 509** [Eka Chems.]*Chem. Descrip.:* Quaternary ammonium compd. formulated surfactant*Uses:* Surfactant, debonder in fluff pulp mfg.*Properties:* Cationic**Berocell® 509HA** [Eka Chems.]*Chem. Descrip.:* Quaternary ammonium compd. surfactant*Uses:* Surfactant, debonder in fluff pulp mfg.*Properties:* Cationic**Berocell® 535** [Eka Chems.]*Chem. Descrip.:* Surfactant*Uses:* Surfactant for pitch control in paper processing; helps maintain throughput during ultrafiltration processes*Properties:* Nonionic**Berocell® 537** [Eka Chems.]*Chem. Descrip.:* Surfactant

- Uses:* Surfactant for pitch control in paper processing; helps maintain throughput during ultrafiltration processes  
*Properties:* Nonionic
- Berocell® 564** [Eka Chems.]  
*Chem. Descr.:* Surfactant  
*Uses:* Paper tissue softener; surfactant used to inc. wettability and counteract self-sizing during aging of cellulose prods. such as soft paper and cellulose fluff  
*Properties:* Cationic
- Berocell® 569** [Eka Chems.]  
*Chem. Descr.:* Surfactant formulation  
*Uses:* Used for quick interruption of debonding effect of cationic debonders in production of fluff pulp
- Berocell® 582** [Eka Chems.]  
*Chem. Descr.:* Surfactant formulation  
*Uses:* Debonder in fluff pulp mfg.  
*Properties:* Cationic
- Berocell® 584** [Eka Chems.]  
*Chem. Descr.:* Quaternary ammonium surfactant  
*Uses:* Surfactant, debonder in fluff pulp mfg.  
*Properties:* Cationic
- Berocell® 587K** [Eka Chems.]  
*Chem. Descr.:* Quaternary ammonium surfactant  
*Uses:* Surfactant, debonder in fluff pulp mfg.  
*Properties:* Cationic
- Berocell® 596** [Eka Chems.]  
*Chem. Descr.:* Quaternary ammonium compd.-based  
*Uses:* Softener enhancing bulk softness and surf. softness of tissue paper without affecting sheet str.
- Berocell® 614** [Eka Chems.]  
*Chem. Descr.:* Polyamine  
*Uses:* Debonder in fluff pulp mfg.  
*Properties:* Liq.
- Berocell® 1025** [Eka Chems.]  
*Chem. Descr.:* Surfactant  
*Uses:* Surfactant for pitch control in paper processing  
*Properties:* Nonionic
- Berocell® 1431** [Eka Chems.]  
*Chem. Descr.:* Polymer  
*Uses:* Improves adhesion of tissue paper to Yankee dryer  
*Properties:* Cationic
- Berocell® 8000 Series** [Eka Chems.]  
*Uses:* Pulper additives for flotation of wood-containing and wood-free fibers giving high yield and improved cleanliness and deinked stock; effective in both high and low hardness systems; more tolerant to higher levels of flexographic newsprint than conventional fatty acids and collector soaps
- Berocell Displector 204** [Eka Chems.]  
*Chem. Descr.:* Nonionic surfactant mixt.  
*Uses:* Additive used in flotation deinking of wood-free waste paper; particularly effective for combination deinking (wash/flotation); works well when hardness is low  
*Properties:* Nonionic
- Berocell Displector 210, 213, 5025** [Eka Chems.]  
*Uses:* Deinking agent esp. effective for de-specking office waste
- Berocell Displector 5024** [Eka Chems.]  
*Chem. Descr.:* Nonionic surfactant mixt.  
*Uses:* Additive used in flotation deinking of wood-free waste paper; particularly effective for combination deinking (wash/flotation); works well when hardness is low; produces less foam than Berocell 204  
*Properties:* Nonionic
- Bersize® 6103** [Bercen]  
*Uses:* Sizing agent for paper and paperboard; provides good size values so that starch does not stick or pick
- Bersize® 6155** [Bercen]  
*Uses:* Sizing agent, water repellent for paper and paperboard, nonwoven fabrics, and various surgical grades; develops high spray ratings and good hydrostatic head  
*Properties:* Anionic
- Bersize® 6200** [Bercen]  
*Uses:* Sizing agent, lubricant for paper and paperboard; provides good sizing values; results in lower coeff. of friction
- Bersize® 6205** [Bercen]  
*Chem. Descr.:* Monomeric  
*Uses:* Sizing agent for paper and paperboard; compat. with most papermaking additives  
*Properties:* Nonionic
- Bersize® 6385** [Bercen]  
*Uses:* Surf. sizing agent for paper and paperboard incl. fine paper; for use alone or in combination with other surf. treatments to give good printing surf. to fine papers; higher alkalinity; improved compat.  
*Properties:* Nonionic
- Bersize® 6400** [Bercen]  
*Uses:* Sizing agent, water repellent, release agent for paper and paperboard; effective where temp. stability and performance are required
- Bersize® 6409** [Bercen]  
*Chem. Descr.:* Complex, fiber-reactive, alkali-substituted syn. nitrogen deriv.  
*Uses:* Internal sizing agent for paper and paperboard; used with fluorochemicals to obtain grease/oil/water-resist. papers; effective over wide pH range; replacement for rosin alum or rosin alum wax combinations
- Bersize® 6482** [Bercen]  
*Uses:* Internal sizing agent for paper and paperboard; provides high level of water and lactic acid resist.; improves sheet printing props.
- Bersize® 6500** [Bercen]  
*Chem. Descr.:* Polymeric  
*Uses:* Surf. sizing agent for paper and paperboard; develops high contact angles; when used in reduced amts., provides good printing props.
- Bersize® 6900** [Bercen]  
*Chem. Descr.:* Alkenyl succinic anhydride  
CAS 70983-55-0  
*Uses:* Sizing agent for paper and paperboard, alkaline or neutral papermaking; effective over wide pH range
- Bersize® 6918** [Bercen]  
*Chem. Descr.:* Alkenyl succinic anhydride  
CAS 70983-55-0  
*Uses:* Sizing agent for paper and paperboard, alkaline or neutral papermaking; provides exc. sizing value to fibers
- Bersoft® 4600** [Bercen]  
*Uses:* Plasticizer for papermaking; compat. with most papermaking additives; plasticizing effect on paper is immediately noticeable off the machine and is enhanced with supercalendering
- Bevaloid 581B** [Rhodia HPCII]  
*Chem. Descr.:* Proprietary  
*Uses:* Defoamer for suspension PVC; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard, paper coatings  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210  
*Properties:* Liq.; 100% solids
- Bevaloid 2512** [Rhodia HPCII]  
*Chem. Descr.:* Proprietary  
*Uses:* Defoamer for latex, emulsion PVC; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard, paper coatings; exc. dispersibility  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210; BGA XIV compliance  
*Properties:* Liq.; 100% solids
- Bevaloid 2514** [Rhodia HPCII]  
*Chem. Descr.:* Proprietary  
*Uses:* Defoamer for latex, emulsion and suspension PVC; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard, paper coatings; low fogging  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210; BGA XIV compliance  
*Properties:* Liq.; 100% solids
- Bevaloid 6624** [Rhodia HPCII]  
*Chem. Descr.:* Proprietary  
*Uses:* Defoamer for latex, emulsion and suspension PVC; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard, paper coatings; effective in strong stripping conditions; no fish eyes; silicone free  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210; BGA XIV compliance  
*Properties:* Liq.; water-disp.; 100% solids
- Bevaloid 6683** [Rhodia HPCII]  
*Chem. Descr.:* Proprietary  
*Uses:* Defoamer for suspension PVC; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard, paper coatings  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

- Properties:* Liq.; 25% solids in water
- BHMT Amine** [DuPont Nylon]  
*Chem. Descrip.:* 25-75% Bis-hexamethylene triamine with 5-70% oligo-  
 meric amines  
 CAS 68411-90-5  
*Uses:* Asphalt antistripping agent; cationic emulsifier; ore flotation collector;  
 chelating agent; corrosion/scale inhibitor; curing agent for epoxy resins and  
 urethanes; flocculant; wet str. paper resins  
*Properties:* Liq.; sp.gr. 0.93-0.97; f.p. 33 C; b.p. 249 C (100 mm); amine no.  
 525-700; flash pt. (OC) 121 C  
*Precaution:* Corrosive liq.  
*Hazardous Decomp. Prods.:* Partial decomp. @ 200 C evolves ammonia
- BHMT-HP** [DuPont Nylon]  
*Chem. Descrip.:* Bis-hexamethylene triamine, high purity  
 CAS 143-23-7  
 UN No. 2922  
*Uses:* Chain modifier/branching agent in polyamides (adhesives, films, inks,  
 plastics); flexibilizer in adhesives, wet str. paper applics.; in cationic emul-  
 sifiers; in cationic collectors for ore flocculation; chelating agents; scale and  
 corrosion inhibitor; epoxy curing agent; flocculating agent; PU extender or  
 catalyst  
*Properties:* Solid; sol. 33% in water; m.w. 215; sp.gr. 0.88; m.p. 32-34 C;  
 b.p. 164 C (4 mm); flash pt. (OC) 121 C; pH 12.6 (5% aq.); 98% act.  
*Toxicology:* Toxic; TSCA listed  
*Precaution:* Corrosive liq.
- Biit-Plates® 145** [R.T. Vanderbilt]  
*Chem. Descrip.:* Kaolin  
 CAS 1332-58-7; EINECS/ELINCS 296-473-8  
*Uses:* Pitch control agent and filler for unbleached kraft liner board; pitch  
 control agent for unbleached pulps in papermaking; lower brightness  
*Properties:* Cream to buff powd.; fineness 0.1% max. on 325 mesh; bright-  
 ness 66-70
- Biit-Plates® 156** [R.T. Vanderbilt]  
*Chem. Descrip.:* Kaolin clay  
*Chem. Analysis:* SiO<sub>2</sub> (44.4%), Al<sub>2</sub>O<sub>3</sub> (38.9%), TiO<sub>2</sub> (1.9%)  
 CAS 1332-58-7; EINECS/ELINCS 296-473-8  
*Uses:* Reinforcing filler and extender for elastomers and latexes; pigment for  
 coatings, primers, alkyd flats, latex paints, crack fillers, and caulking compds.;  
 TiO<sub>2</sub> extender in coatings; pitch control agent for bleached chem. pulps or  
 groundwood pulps in papermaking; grit-free; provides max. reinforcement;  
 rec. where high brightness is not required; no ozone-depleting substances  
*Properties:* Wh. to cream fine powd.; 0.2 µm median particle size; 99.95%  
 thru 325 mesh; fineness (Hegman) 4.0; dens. 2.62 mg/m<sup>3</sup>; bulk dens. 43 lb/  
 ft<sup>3</sup> (compact); oil absorp. 41; GE brightness 76  
*Toxicology:* TSCA listed
- Bindzil® 15/500** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 6 nm particle size; dens. 1.1 g/cm<sup>3</sup>; visc. < 5 mPa·s; surf. area  
 500 m<sup>2</sup>/g; pH 10; 15% SiO<sub>2</sub>
- Bindzil® 30/80** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 40 nm particle size; dens. 1.2 g/cm<sup>3</sup>; visc. < 6 mPa·s; surf. area  
 80 m<sup>2</sup>/g; pH 9.6; 30% SiO<sub>2</sub>
- Bindzil® 30/220** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 15 nm particle size; dens. 1.2 g/cm<sup>3</sup>; visc. < 7 mPa·s; surf. area  
 220 m<sup>2</sup>/g; pH 9.7; 30% SiO<sub>2</sub>
- Bindzil® 30/360** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 9 nm particle size; dens. 1.2 g/cm<sup>3</sup>; visc. < 8 mPa·s; surf. area  
 360 m<sup>2</sup>/g; pH 10; 30% SiO<sub>2</sub>
- Bindzil® 30NH<sub>2</sub>/220** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 15 nm particle size; dens. 1.2 g/cm<sup>3</sup>; visc. < 10 mPa·s; surf. area  
 220 m<sup>2</sup>/g; pH 9; 30% SiO<sub>2</sub>
- Bindzil® 40/130** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 25 nm particle size; dens. 1.3 g/cm<sup>3</sup>; visc. < 10 mPa·s; surf. area  
 130 m<sup>2</sup>/g; pH 9; 40% SiO<sub>2</sub>
- Bindzil® 40/220** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 15 nm particle size; dens. 1.3 g/cm<sup>3</sup>; visc. < 25 mPa·s; surf. area  
 220 m<sup>2</sup>/g; pH 9.7; 40% SiO<sub>2</sub>
- Bindzil® 50/80** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers; frictionizer for textile or plastic films;  
 high-temp. binder for inorg. fibers, refractories, ceramics, or catalysts; abra-  
 sive for polishing silicon wafers  
*Properties:* Wh. milky liq.; odorless; tasteless; 40 nm particle size; dens. 1.4  
 g/cm<sup>3</sup>; visc. < 15 mPa·s; surf. area 80 m<sup>2</sup>/g; pH 9.3; 50% SiO<sub>2</sub>
- Bindzil® 305** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 15 nm particle size; dens. 1.2 g/cm<sup>3</sup>; visc. < 10 mPa·s; surf. area  
 220 m<sup>2</sup>/g; pH 9.5; 30% SiO<sub>2</sub>
- Bindzil® CAT80** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 40 nm particle size; dens. 1.32 g/cm<sup>3</sup>; visc. < 15 mPa·s; pH 4;  
 40% SiO<sub>2</sub>
- Bindzil® F45** [Eka Chems.]  
*Chem. Descrip.:* Colloidal silica disp.  
 EINECS/ELINCS 231-545-4  
*Uses:* Surf. sizing agent, antiskid agent used to frictionize linerboard, esp.  
 linerboard made from recycled fibers  
*Properties:* 40 nm particle size; dens. 1.36 g/cm<sup>3</sup>; visc. < 15 mPa·s; surf.  
 area 80 m<sup>2</sup>/g; pH 9.5; 45% SiO<sub>2</sub>
- Biobrom C-103L** [Dead Sea Bromine]  
*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide  
 CAS 10222-01-2  
*Uses:* Biocide for industrial water systems, incl. cooling towers, pulp/paper  
 mill effluents, oil-recovery systems, metal-cutting coolants, air conditioning  
 systems  
*Properties:* Clear to amber liq., mild antiseptic odor; misc. with water; sp.gr.  
 1.18-1.22 (20/4 C); f.p. -20 to -25 C; flash pt. 159-163 C; 20% min. act.
- Biobrom C-103 Tech.** [Dead Sea Bromine]  
*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide  
 CAS 10222-01-2  
*Uses:* Biocide for industrial water systems, incl. cooling towers, pulp/paper  
 mill effluents, oil-recovery systems, metal-cutting coolants, air conditioning  
 systems  
*Properties:* Wh. to off-wh. powd. or gran., mild antiseptic odor; m.w. 241.84;  
 sol. (g/100 g): 120 g DMF, 35 g acetone, 25 g ethanol, 1.5 g water; sp.gr.  
 2.375; m.p. 124-126 C; 98% min. act., 66% Br
- Biochek® 410** [Nalco]  
*Chem. Descrip.:* 19% 1,2-Dibromo-2,4-dicyanobutane, 6% 1,2-benzisothia-  
 zolin-3-one

*Uses:* Industrial in-can preservative which inhibits growth of bacteria, fungi, and yeasts in aq. systems incl. paints, adhesives, latex emulsions, metalworking fluids, pigment slurries, joint cements, and household prods.; food pkg. adhesives; slimicide in food-contact paper/paperboard; protects prods. during storage

*Use Level:* 0.05-0.2% (pigment slurries), 0.05-0.4% (metalworking fluids, household prods.), aq. paints, 0.05-0.8% (adhesives, latex emulsions), 0.20-0.8% (joint cements)

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA reg. no. 10445-90

*Properties:* Tan to lt. brn. aq. disp.; sp.gr. 1.1 (20 C); visc. 1800-2400 cps; f.p. 0 C

*Toxicology:* Hazardous to humans and domestic animals; corrosive to eyes; causes eye damage and skin irritation; harmful if swallowed

*Storage:* Store @ 0-42 C; keep from freezing; store away from heat; keep container closed when not in use

#### Biochek® 430 [Nalco]

*Chem. Descrip.:* Disp. of 1,2-dibromo-2,4-dicyanobutane, 5-chloro-2-methyl-4-isothiazolin-3-one, and 2-methyl-4-isothiazolin-3-one

*Uses:* Preservative which inhibits growth of microorganisms in latex emulsions, metalworking fluids, adhesives, waxes, polishes, inks, cooling water, paper mfg., paints, coatings, and pigment slurries; food pkg. adhesives; slimicide in food-contact paper/paperboard

*Use Level:* 0.04-0.9% (pigment slurries), 0.05-0.4% (metalworking fluids, waxes, polishes, inks), 0.05-0.8% (adhesives, latex emulsions, cooling water, pulp/paper mills), 0.08-0.3% (aq. paints and coatings)

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA reg. no. 10445-89

*Properties:* Wh. to off-wh. liq.; sp.gr. 1.1 (30 C); visc. 1800-2400 cps; f.p. 0 C; 23.8% min. act.

*Toxicology:* Corrosive; causes eye damage and skin irritation; harmful if swallowed

*Storage:* Store @ 0-42 C; keep from freezing; store away from heat; keep container closed when not in use

#### bioMeT TBTO [Atofina; Atofina SA]

*Chem. Descrip.:* Bis (tributyltin) oxide

CAS 56-35-9; EINECS/ELINCS 200-268-0

*Uses:* Antimicrobial for paper mill slime control, industrial cooling water, sec. oil recovery, hospital use, textiles, plastics, urethane foam, paper preservation; antifoulant for shipbottom paints; wood preservative

*Properties:* Straw-colored clear liq.; sol. in org. solvs.; relatively insol. in water; m.w. 596; sp.gr. 1.17; dens. 9.7 lb/gal; f.p. < -45 C; b.p. 180 C (2 mm); flash pt. (TCC) > 100 C; 96% assay, 38.8% tin

*Toxicology:* Extremely irritating to eyes and skin; can cause eye damage; prolonged/repeated skin contact can cause chemical burns

#### BIO-SOFT® S-120 [Stepan]

*Chem. Descrip.:* Dodecyl benzene sulfonic acid

CAS 27176-87-0; EINECS/ELINCS 248-289-4

*Uses:* Surfactant intermediate; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210, 178.3400; USDA authorized

*Properties:* Dk. visc. liq.; sp.gr. 1.06; dens. 8.81 lb/gal; visc. 960 cps; f.p. -18 C; pour pt. -15 C; flash pt. (PMCC) >94 C; pH < 1; 96.5% act.; anionic

*Toxicology:* Handle with extreme care; avoid contact with eyes and skin

*Environmental:* Biodeg.

*Storage:* Store in closed containers in cool, dry place

#### Bisomer EGDMA [Laporte Perf. Chems.]

*Chem. Descrip.:* Ethyleneglycol dimethacrylate with MEHQ (300-500 ppm)

CAS 97-90-5; EINECS/ELINCS 202-617-2

*Uses:* Crosslinking monomer for surf. coatings, adhesives, sealants, leather treatment, paper processing, and in optical lenses

*Properties:* Pt-Co 100 max. clear color; sol. 0.18% in water; m.w. 198; visc. 4 mPa·s; flash pt. (PMCC) 98 C; 0.1% max. water

*Toxicology:* Irritant; TSCA listed

#### Bisomer PEG 200DMA [Laporte Perf. Chems.]

*Chem. Descrip.:* PEG 200 dimethacrylate with MEHQ (300-500 ppm)

CAS 25852-47-5

*Uses:* Crosslinking agent for anaerobic adhesives, castings, plastisols, coatings, and fibers; in dental industry for preparation of dental composites containing ceramic filler; modifier for radiation-curable coatings for imaging processes, textile treatments, paper processing, anaerobic adhesives; resin modifier

*Properties:* Pt-Co 100 max. color; m.w. 330; flash pt. (PMCC) > 160 C; 0.2% max. water

*Toxicology:* TSCA listed

*Storage:* Store in cool place @ < 20 C protected from direct sunlight

#### Black Pearls® 430 [Cabot/Special Blacks]

*Chem. Descrip.:* Carbon black

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Colorant for coatings, gravure inks, carbon paper inks, etc.; blue toned black with good dispersion

*Properties:* Pellets; 27 nm particle size; dens. 29 lb/ft<sup>3</sup>; surf. area 80 m<sup>2</sup>/g; pH 6-8; 1.0% volatile

#### Black Pearls® 450 [Cabot/Special Blacks]

*Chem. Descrip.:* Carbon black

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Colorant for inks, coatings, plastics, paper; provides sl. less jetness and str. but easier dispersion than Regal 330

*Properties:* Pellets; 27 nm particle size; dens. 29 lb/ft<sup>3</sup>; surf. area 80 m<sup>2</sup>/g; pH 6-8; 1.0% volatile

#### Black Pearls® L [Cabot/Special Blacks]

*Chem. Descrip.:* Carbon black

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Colorant, UV stabilizer for elec. resistivity in plastics, optimum flow in offset inks, carbon paper, and ribbons, in dry toners, coatings; very good disp. and stability

*Properties:* Pellets; 24 nm particle size; dens. 32 lb/ft<sup>3</sup>; surf. area 138 m<sup>2</sup>/g; pH 6-8; 5.0% volatile

#### Blankit® [BASF AG]

*Chem. Descrip.:* Sodium dithionite

CAS 7775-14-6; EINECS/ELINCS 231-890-0

*Uses:* Bleaching agent for textile, leather, fur, pulp/paper industries; stabilized

#### Blankophor® ASP [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., and pigment coating

#### Blankophor® AWP [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., and pigment coating

#### Blankophor® P01 [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., pigment coating, food pkg. papers

*Regulatory:* FDA approved

#### Blankophor® P150 Liq. [Bayer]

*Uses:* Fluorescent whitening agent for paper, food-contact paper; gives bluish-wh. shade; for use internally and at size press; high acid stability; compat. with starch; 50% stronger than Blankophor P Liq.

*Regulatory:* FDA approved

*Properties:* Anionic

#### Blankophor® P167 [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., pigment coating, food pkg. papers

*Regulatory:* FDA approved

#### Blankophor® P Liq. [Bayer]

*Uses:* Fluorescent whitening agent for paper, food-contact paper; gives bluish-wh. shade; for use internally and at size press; high acid stability; compat. with starch

*Regulatory:* FDA approved

*Properties:* Anionic

#### Blankophor® PSK [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., and pigment coating

#### Blankophor® SOL [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., and pigment coating

#### Blankophor® TX [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., and pigment coating

#### Blankophor® UW [Bayer]

*Uses:* Fluorescent whitening agent for paper, stock addition, surf. applic., and pigment coating

#### Blemmer BMA [NOF]

*Chem. Descrip.:* Butyl methacrylate

CAS 97-88-1; EINECS/ELINCS 202-615-1

*Uses:* Materials for paint; syn. resin and latex; ink; adhesive; dispersant;

additive for lubricating oil; modifier for fibers; coating agent for paper

**Blemmer CMA** [NOF]

*Chem. Descrip.:* Cetyl methacrylate

CAS 2495-27-4

*Uses:* Additive for lubricating oils, paints, adhesives; modifier for fibers; coating agent for paper

**Blemmer E** [NOF]

*Chem. Descrip.:* 2-Hydroxyethyl methacrylate

CAS 868-77-9; EINECS/ELINCS 212-782-2

*Uses:* Heat curing paint; modifier for polymer, fiber paper, adhesive; photosensitive resin

**Blemmer EHMA** [NOF]

*Chem. Descrip.:* 2-Ethylhexyl methacrylate

CAS 688-84-6; EINECS/ELINCS 211-708-6

*Uses:* For paints, inks, adhesives; dispersant; additive for lubricating oil; modifier for fibers; coating agent for paper

**Blemmer GLM** [NOF]

*Chem. Descrip.:* Glycerol mono methacrylate

CAS 5919-74-4

*Uses:* Acrylic resin for paint, adhesive, and soft contact lens; heat cure paint, adhesive; photosensitive resin; medical polymer; modifier for fiber and paper

*Properties:* Water sol.

**Blemmer IBMA** [NOF]

*Chem. Descrip.:* Isobutyl methacrylate

CAS 97-86-9; EINECS/ELINCS 202-613-0

*Uses:* For paints, inks, adhesives; dispersant; additive for lubricating oil; modifier for fibers; coating agent for paper

**Blemmer IDMA** [NOF]

*Chem. Descrip.:* Isodecyl methacrylate

CAS 29964-84-9; EINECS/ELINCS 249-978-2

*Uses:* Additive for lubricating oil, paint, adhesive; modifier for fibers; coating agent for paper; internal plasticizer; modifier for deodorant

**Blemmer P** [NOF]

*Chem. Descrip.:* 2-Hydroxypropyl methacrylate

CAS 923-26-2; EINECS/ELINCS 213-090-3

*Uses:* Modifier for paint, polymer, fiber paper, and adhesive; syn. resin and latex; heat curing paint

**Blemmer PMA** [NOF]

*Chem. Descrip.:* Pentadecyl methacrylate

CAS 6140-74-5

*Uses:* Additive for lubricating oil, paint, adhesive; modifier for fibers; coating agent for paper

**Blemmer QA** [NOF]

*Chem. Descrip.:* 2-Hydroxy 3-methacryl oxypropyl trimethyl ammonium chloride

*Uses:* Antistat; electroconductive paper coatings; polyelectrolyte dispersant; flocculant acid dye receptive fibers; electrodeposition acrylic coatings; water-sol. polymers

*Properties:* Cationic

**Blemmer SLMA** [NOF]

*Chem. Descrip.:* Lauryl methacrylate (syn.)

CAS 142-90-5; EINECS/ELINCS 205-570-6

*Uses:* Additive for lubricating oil, paint, adhesive; modifier for fibers; coating agent for paper; internal plasticizer; modifier for deodorant

**Blemmer SMA** [NOF]

*Chem. Descrip.:* Stearyl methacrylate

CAS 32360-05-7

*Uses:* Additive for paint; adhesive, lubricating oil; syn. resin and latex; modifier for fibers; coating agent for paper

**Blemmer VMA** [NOF]

*Chem. Descrip.:* Behenyl methacrylate

*Uses:* For paints, inks, adhesives; dispersant; additive for lubricating oil; modifier for fibers; coating agent for paper

**BNX® 1010** [Mayzo]

*Chem. Descrip.:* Tetrakis [methylene-3(3',5'-di-*t*-butyl-4-hydroxyphenyl) propionate] methane

CAS 6683-19-8; EINECS/ELINCS 229-722-6

*Uses:* Antioxidant for PE, PS, PP, polyacetal, AS resin, methacrylic resin, PC, polyester, polymethylpentene, butadiene resin, polybutene-1, EPM, EPD, PVC; stabilizer for org. and polymeric materials; antioxidant/stabilizer for petrol. prods., syn. rubbers, latex, varnish, adhesives, wire and cable

insulation, syn. diester fluids, oils, fats, waxes; food-pkg. adhesives, coatings, paper, polymers, rubber, wood preservatives; nonstaining, nondiscoloring; good extract resist.

*Use Level:* 0.02-0.5%

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.210, 177.1210, 177.1310, 177.1330, 177.1350, 177.1420, 177.1520, 177.1570, 177.1630, 177.1640, 177.2470, 177.2480, 177.2600, 178.2010, 178.3800, 178.3850, 179.45

*Properties:* Wh. cryst. powd., odorless, tasteless; sol. 71% in chloroform, 56% in benzene, 47% acetone, 46% ethyl acetate, 1% methanol, 0.01% water; m.w. 1177.7; sp.gr. 1.15; vapor pressure  $10^{12}$  mm Hg (20 C); m.p. 110-125 C; dec. pt. > 220 C; flash pt. (Marcusson) 567 F

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 3160 mg/kg; low oral and dermal toxicity; nonsensitizing; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents; thermal decomp. may produce CO, CO<sub>2</sub>

*Storage:* 1 yr storage in sealed containers kept in cool, dry areas

**Borax** [U.S. Borax]

*Chem. Descrip.:* Sodium tetraborate decahydrate

CAS 1303-96-4; EINECS/ELINCS 215-540-4

*Uses:* Dispersant, wetting agent for NR, SR latexes; mold lubricant for dry rubber molding; pH buffer, gentle abrasive, oil emulsifier in soaps/detergents; enzyme stabilizer; flame retardant for cellulose; food pkg. adhesives/paper; crosslinking agent to emulsify waxes; base for cosmetic/pharmaceutical preps.; metallurgical flux; corrosion inhibitor; peptizing agent in adhesive mfg.; stabilizer and bonding agent in refractories; buffer/catalyst for org. dyes; herbicide carrier

*Regulatory:* FDA 21CFR §175.105, 176.180, 181.30; SARA nonreportable, DOT nonregulated

*Properties:* Wh. cryst. powd., odorless; sol. in water, glycerin; m.w. 381.37; sp.gr. 1.71; vapor pressure negligible; m.p. 62 C; pH 6.1 (0.1%); nonflamm.; > 99% act.

*Toxicology:* OSHA PEL 10 mg/m<sup>3</sup> total dust; LD50 (oral, rat) 4500-5000 mg/kg, (dermal, rabbit) > 10,000 mg/kg; low acute oral and dermal toxicity; inh. at levels > 10 mg/m<sup>3</sup> may cause mild irritation to nose and throat; ing. of lg. amts. may cause GI symptoms; TSCA listed

*Environmental:* EC50 (daphnia magna, 24 h) 242 mg; lg. amts. can be harmful to plants and other species

*Precaution:* Reacts as weak acid which may cause corrosion of base metals; incompat. with strong reducing agents which generates hydrogen gas

NFPA: Health 0; Flammability 0; Reactivity 0

*Storage:* Store indoors in dry area; avoid wide fluctuations in temp. and humidity

**Borino®** [Finnish Chems. Oy]

*Chem. Descrip.:* Sodium borohydride sol'n.

CAS 16940-66-2; EINECS/ELINCS 241-004-4

*Uses:* Generates sodium dithionite for bleaching of mech. pulp; papermaker's grade

**Bovlon** [Nippon Gohsei; British Traders & Shippers]

*Chem. Descrip.:* Polyvinyl alcohol film

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Film for paper and pkg.; biaxially oriented

**BPO** [Sartomer]

*Chem. Descrip.:* Benzophenone

CAS 119-61-9; EINECS/ELINCS 204-337-6

*Uses:* Free radical initiator for UV curing used in adhesives, chem. intermediates, coatings (metal, paper, wood), electronics (conformal, encapsulants, photoresists, solder masks), inks (flexo and gravure, litho, offset, screen); intermediate for mfg. of antihistamines, hypnotics, insecticides; good sol.

*Properties:* Wh. to off-wh. crystals or flakes; sol. in chlroform, ethyl alcohol, ether; insol. in water; m.w. 182.21; m.p. 48-49 C; 99% min. purity

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**BPS-24** [Nicca Chem. Co Ltd]

*Chem. Descrip.:* 2,4'-Dihydroxy diphenyl sulfone

*Uses:* Developer for heat sensitive papers; exc. sensitivity; good preservability, strong resist. to plasticizers and solvs.

*Properties:* Wh. powd.; m.p. > 180 C

**BPS-P** [Nicca Chem. Co Ltd]

*Chem. Descrip.:* 4,4'-Dihydroxy diphenyl sulfone

*Uses:* Developer for heat sensitive papers; good preservability, strong resist.

to plasticizers

*Properties:* Wh. powd.; m.p. > 245 C

**BRD 2340** [Buckman Labs]

*Chem. Descrip.:* Surfactant-based

*Uses:* Deinking agent for repulping process, esp. for removing laser and xerographic inks during flotation; enhances removal of printing inks associated with wood-free sec. fiber grades; may improve final brightness

**Briquest® 543-33S** [Albright & Wilson Am.]

*Chem. Descrip.:* Sodium diethylenetriamine-penta (methylene phosphonate) aq. sol'n.

CAS 22042-96-2

*Uses:* Sequestrant for cooling water treatment, textile bleach stabilization, oil fields, pulp bleaching; desalination antiscalant

*Properties:* M.w. 727; sp.gr. 1.39 (20/4 C); visc. 150 cP (20 C); pH 7.0 (1%); 33% act.

**Briquest® 543-45AS** [Albright & Wilson Am.; Albright & Wilson UK]

*Chem. Descrip.:* Diethylene triamine pentamethylene phosphonic acid aq. sol'n.

CAS 15827-60-8

*Uses:* Sequestrant, scale inhibitor, corrosion inhibitor, detergent for water treatment, detergents, pulp/paper processing, textile processing, bleach stabilization, sec. oil recovery and desalination; crystal growth modifier; hydrolytic stability

*Properties:* Amber clear liq.; faint amine odor; m.w. 573; sp.gr. 1.42 (20/4 C); visc. 500 cps (2 C); pH 2.4 (1%); 45% act.

*Environmental:* Biodeg.

*Storage:* Store in tightly closed containers in cool, dry, well-ventilated area away from oxidizers and strong alkalis

**Briquest® ADPA-60AW** [Albright & Wilson Am.; Albright & Wilson UK]

*Chem. Descrip.:* Acetodiphosphonic acid aq. sol'n.

CAS 2809-21-4; EINECS/ELINCS 220-552-8

*Uses:* Sequestrant used in the water treatment industry for scale and corrosion inhibition, detergent action, and metal ion control; crystal growth modifier; stain removal and control in swimming pools; cooling and boiler waters; oil fields; peroxide stabilization; photographic chems., desalination antiscalant, I&I compding.; cosmetics (metal ion control in bar soaps); pulp/paper; metal plating and finishing; textiles; radioactive pharmaceuticals

*Regulatory:* Avail. kosher certified

*Properties:* Colorless clear liq.; sl. odor; m.w. 206; sp.gr. 1.46 (20 C); visc. 100 cps (20 C); pH < 1.8 (1%); 60% act.

*Environmental:* Biodeg.

*Precaution:* Corrosive

*Storage:* Store in tightly closed containers in cool, dry, well-ventilated area away from oxidizers and strong alkalis

**Britol® 6NF** [Crompton/Witco]

*Chem. Descrip.:* White mineral oil NF

CAS 8020-83-5; EINECS/ELINCS 232-384-2

*Uses:* Binder, carrier, conditioner, defoamer, dispersant, extender, heat transfer agent, lubricant, moisture barrier, plasticizer, protective agent, release agent, and/or softener in cosmetics, pharmaceuticals, food, plastics, agric., and paper making applics.

*Properties:* Sp.gr. 0.830-0.858; visc. 8.5-10.8 cst (40 C); pour pt. -24 C max.; flash pt. 166 C min.

**Britol® 7NF** [Crompton/Witco]

*Chem. Descrip.:* White mineral oil NF

CAS 8020-83-5; EINECS/ELINCS 232-384-2

*Uses:* Binder, carrier, conditioner, defoamer, dispersant, extender, heat transfer agent, lubricant, moisture barrier, plasticizer, protective agent, release agent, and/or softener in cosmetics, pharmaceuticals, food, plastics, agric., and paper making applics.

*Properties:* Sp.gr. 0.840-0.858; visc. 10.8-13.6 cst (40 C); pour pt. -18 C max.; flash pt. 171 C min.

**Britol® 9NF** [Crompton/Witco]

*Chem. Descrip.:* White mineral oil NF

CAS 8020-83-5; EINECS/ELINCS 232-384-2

*Uses:* Binder, carrier, conditioner, defoamer, dispersant, extender, heat transfer agent, lubricant, moisture barrier, plasticizer, protective agent, release agent, and/or softener in cosmetics, pharmaceuticals, food, plastics, agric., and paper making applics.

*Properties:* Sp.gr. 0.845-0.860; visc. 14.4-16.9 cst (40 C); pour pt. -18 C max.; flash pt. 171 C min.

**Britol® 20USP** [Crompton/Witco]

*Chem. Descrip.:* White mineral oil USP

CAS 8020-83-5; EINECS/ELINCS 232-384-2

*Uses:* Binder, carrier, conditioner, defoamer, dispersant, extender, heat transfer agent, lubricant, moisture barrier, plasticizer, protective agent, release agent, and/or softener in cosmetics, pharmaceuticals, food, plastics, agric., and paper making applics.

*Properties:* Sp.gr. 0.858-0.870; visc. 37.9-40.1 cst (40 C); pour pt. -18 C max.; flash pt. 193 C min.

**Britol® 35USP** [Crompton/Witco]

*Chem. Descrip.:* White mineral oil USP

CAS 8020-83-5; EINECS/ELINCS 232-384-2

*Uses:* Binder, carrier, conditioner, defoamer, dispersant, extender, heat transfer agent, lubricant, moisture barrier, plasticizer, protective agent, release agent, and/or softener in cosmetics, pharmaceuticals, food, plastics, agric., and paper making applics.

*Properties:* Sp.gr. 0.862-0.880; visc. 65.8-71.0 cst (40 C); pour pt. -15 C max.; flash pt. 216 C min.

**Britol® 50USP** [Crompton/Witco]

*Chem. Descrip.:* White mineral oil USP

CAS 8020-83-5; EINECS/ELINCS 232-384-2

*Uses:* Binder, carrier, conditioner, defoamer, dispersant, extender, heat transfer agent, lubricant, moisture barrier, plasticizer, protective agent, release agent, and/or softener in cosmetics, pharmaceuticals, food, plastics, agric., and paper making applics.

*Properties:* Sp.gr. 0.870-0.890; visc. 91-102.4 cst (40 C); pour pt. -12 C max.; flash pt. 249 C min.

**Bubble Breaker® 259, 260, 613-M, 622, 730, 737, 746, 748, 900, 913, 917** [Crompton/Witco]

*Chem. Descrip.:* Blend of org., nonsilicone compds.

*Uses:* Defoamer for water-based paper coatings, textile processing formulations, agric. chemical prods., paints, adhesives, inks, and personal care formulations

**Bubreak® 401D** [Buckman Labs]

*Chem. Descrip.:* Proprietary polymer

*Uses:* Flocculant or coagulant in effluent treatment and in waste minimization programs for water-based paints, adhesives, or other aq. systems; food-contact paper/paperboard

*Use Level:* 0.01-2%

*Regulatory:* FDA 21CFR §176.170; SARA 312 listed (immediate acute)

*Properties:* Pale yel. clear liq., odorless; completely sol. in water; sp.gr. 1.01 g/ml; flash pt. > 212 F; pH 6-7 (100 ppm in water); cationic

*Toxicology:* Mild eye irritant; nonirritating to skin; inh. may cause irritation of mucous membranes and lungs; monitor exposed individuals for respiratory distress, bronchitis, pneumonia; TSCA listed

*Precaution:* Incompat. with anionic polymers

*Hazardous Decomp. Prods.:* None known

HMIS: Health 1; Flammability 1; Reactivity 1

**Bubreak® 403** [Buckman Labs]

*Chem. Descrip.:* Proprietary polymer

*Uses:* Flocculant or coagulant in effluent treatment and in waste minimization programs for water-based paints, adhesives, or other aq. systems; EPA allowed as flocculant in potable water; food-contact paper/paperboard

*Use Level:* 0.01-2%

*Regulatory:* FDA 21CFR §176.170; SARA listed (immediate acute); EPA allowed for potable water

*Properties:* Pale amber clear liq., sl. odor; completely misc. with water; sp.gr. 1.09 g/ml; b.p. > 100 C; flash pt. > 100 C; pH 4-6 (100 ppm in water); cationic

*Toxicology:* LD50 (oral) > 5000 mg/kg, (dermal) > 2000 mg/kg; mildly irritating to eyes; nonirritating to skin; inh. may cause irritation of mucous membranes and lungs; monitor exposed individuals for respiratory distress, bronchitis, pneumonia; TSCA listed

*Environmental:* LC50 (bluegill sunfish, 96 h) 1.75 mg/l, (rainbow trout, 96 h) 0.33 mg/l

*Hazardous Decomp. Prods.:* Exposure to fire or flame can generate oxides of carbon and nitrogen

HMIS: Health 1; Flammability 1; Reactivity 1

**Bubreak® 448** [Buckman Labs]

*Chem. Descrip.:* Colloidal suspension

*Uses:* Antifoam and defoamer for water-thinned paints, coatings, adhesives, glues; air release agent in polyester spray and gel coating operations; deaerator in gluing operations with nat. and syn. adhesives; food pkg.

- adhesives, coatings; defoamer in food-contact paper coatings; effective with acrylic, PVAc, S/B resins  
*Use Level:* 0.2% based on total wt. of paint; 0.3-1% (gluing operations, polyester gel coating operations)  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200  
*Properties:* Liq.; sp.gr. 0.81 g/ml; dens. 6.7 lb/gal; flash pt. (TCC) 87 C  
*Storage:* May stratify on prolonged storage; store drums upside down to ensure some mixing prior to use
- Bubreak® 453** [Buckman Labs]  
*Chem. Descrip.:* Colloidal suspension  
*Uses:* Foam control agent for water-thinned paints, coatings; air release agent for polyester-resin spray and gel-coating operations; deaerator in gluing operations; food pkg. adhesives, coatings; defoamer in food-contact paper coatings; effective with acrylic, PVAc, S/B resins  
*Use Level:* 0.1% (paints), 0.3-1% (resins, adhesives)  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200  
*Properties:* Liq.; sp.gr. 0.86 g/ml; dens. 7.2 lb/gal; flash pt. (TCC) > 104 C
- Bubreak® 454C** [Buckman Labs]  
*Uses:* Antifoam/defoamer for use in water-based coatings, adhesives, wide range of resins incl. acrylics, vinyl acrylics, PVAc, water-reducible alkyds; defoamer in food-contact coatings, paper/paperboard  
*Use Level:* 0.2%  
*Regulatory:* FDA 21CFR §176.200, 176.210  
*Properties:* Brn. visc. liq., sl. fatty odor; sp.gr. 0.96 g/ml; dens. 8.0 lb/gal
- Bubreak® 4400** [Buckman Labs]  
*Uses:* Antifoam/defoamer for use in water-based coatings, adhesives, emulsion-based systems, wide range of resins incl. acrylics, vinyl acrylics, PVAc, water-reducible alkyds; defoamer in food-contact paper/paperboard  
*Use Level:* 0.2%  
*Regulatory:* FDA 21CFR §176.210  
*Properties:* Milky wh. disp., sl. odor; sp.gr. 0.92 g/ml; dens. 7.7 lb/gal; pH 6-7 (100 ppm in water)
- Bubreak® 4419** [Buckman Labs]  
*Uses:* Antifoam/defoamer for use in water-based coatings, adhesives, emulsion-based systems, wide range of resins incl. acrylics, vinyl acrylics, PVAc, water-reducible alkyds; defoamer in food-contact coatings and paper/paperboard; effective over wide pH range  
*Use Level:* 0.2%  
*Regulatory:* FDA 21CFR §176.200, 176.210  
*Properties:* Clear liq., mild odor; sp.gr. 0.98 g/ml; dens. 8.2 lb/gal; pH 6.5-7.5 (100 ppm in water)
- Bufloc® 5551** [Buckman Labs]  
*Chem. Descrip.:* Quaternary polyamine  
*Uses:* Coagulant for process and wastewater treatment; sludge dewatering agent; raw water clarifier; effective for solids and color removal in influent and effluent waters; food-contact paper/paperboard; coagulant for charge neutralization or in combination with other cationic or anionic flocculants  
*Regulatory:* FDA 21CFR §176.170, 176.180; SARA nonreportable  
*Properties:* Amber liq.; sl. amine odor; completely sol. in water; dens. 1.14 g/ml; visc. 80-125 cps; bulk dens. 9.5 lb/gal; flash pt. > 93 C; pH 5-7; cationic  
*Toxicology:* TSCA listed  
*Precaution:* Incompat. with strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, ammonia, hydrogen chloride vapor, NO<sub>x</sub>  
 HMIS: Health 0; Flammability 1; Reactivity 0  
*Storage:* If prod. should freeze, thaw and mix thoroughly before use
- Bufloc® 5554** [Buckman Labs]  
*Chem. Descrip.:* Quaternary polyamine  
*Uses:* Coagulant for process and wastewater treatment; sludge dewatering agent; raw water clarifier; effective for solids and color removal in influent and effluent waters; approved for potable water; food-contact paper/paperboard; coagulant for charge neutralization or in combination with other cationic or anionic flocculants  
*Regulatory:* FDA 21CFR §176.170, 176.180; EPA approved for potable water; SARA nonreportable  
*Properties:* Pale yel. liq.; ammoniacal odor; completely sol. in water; dens. 1.14 g/ml; visc. 750 cps; bulk dens. 9.5 lb/gal; vapor pressure 58 mm Hg (100 F); b.p. > 100 C; flash pt. > 100 C; pH 5-7; cationic  
*Toxicology:* Expected to be irritating to eyes; TSCA listed  
*Environmental:* Aquatic LC50 (daphnia magna, 48 h) 0.29 mg/l, (fathead minnow, 96 h) 0.3 mg/l  
*Precaution:* Incompat. with strong oxidizing agents  
*Hazardous Decomp. Prods.:* Thermal decomp. or combustion may produce NO<sub>x</sub>, CO<sub>2</sub>, hydrogen chloride gas, hydrogen cyanide, phosgene  
 HMIS: Health 1; Flammability 1; Reactivity 1  
*Storage:* If prod. should freeze, thaw and mix thoroughly before use
- Burco® Imidazoline O** [Burlington Chem.]  
*Chem. Descrip.:* Oleyl imidazoline  
 CAS 95-38-5  
*Uses:* Surfactant; detergent additive; thickening promoter; antistat; substantive to most surfs. incl. fabrics, glass, paper, and metals; flotation agent for removal of impurities from clay and ores; adhesion promoter in asphalt; emulsifier in solvent cleaners; in acid cleaners; visc. builder for attapulgite clay in paints/coatings; corrosion inhibitor in primers, paints; lubricant, corrosion inhibitor in metals  
*Properties:* Gardner 10 max. clear liq.; oil-sol.; sp.gr. 0.90 g/l; amine value 160; 90% min. imidazoline; cationic
- Burco® Imidazoline T** [Burlington Chem.]  
*Chem. Descrip.:* Tall oil imidazoline  
 CAS 61791-39-7; EINECS/ELINCS 263-171-2  
*Uses:* Surfactant; detergent additive; thickening promoter; antistat; substantive to most surfs. incl. fabrics, glass, paper, and metals; flotation agent for removal of impurities from clay and ores; adhesion promoter in asphalt; emulsifier in solvent cleaners; in acid cleaners; visc. builder for attapulgite clay in paints/coatings; corrosion inhibitor in primers, paints; lubricant, corrosion inhibitor in metals  
*Properties:* Gardner 12 max. clear liq.; oil-sol.; sp.gr. 0.90 g/l; amine value 155; 90% min. imidazoline; cationic
- Burcomul DFE-45** [Burlington Chem.]  
*Chem. Descrip.:* Polyol ester  
*Uses:* Defoamer, emulsifier for paper, textiles, water treatment, coatings, and metalworking, and other low-foaming emulsions; provides formulations with improved emulsion stability; compat. with all common org. defoamer components  
*Properties:* Clear to sl. hazy liq.; sol. in oils and solvs.; water-disp.; sp.gr. 0.94; dens. 7.84 lb/gal; pH 5 (5% disp.); 100% act.
- Burcosoft LEQ** [Burlington Chem.]  
*Chem. Descrip.:* Ester quat. softener conc. (90%) in propylene glycol (10%)  
*Uses:* Softener for textiles, commercial laundry softeners, tissue paper, I&I applics.; enhances water absorbency of fabrics; easy to dilute; disperses readily; pumpable and pourable @ 45 F; no flamm. solvs.; nonyellowing  
*Properties:* Gardner 7 max. clear to sl. hazy liq.; sp.gr. 1.007; visc. 300-500 cps (100 F); pour pt. < 45 F; flash pt. (CC) > 200 F; 90% act.; < 1% moisture  
*Environmental:* Environmentally friendly; derived from sustainable resources; known to biodegrade more readily than other cationics
- Busan® 11-M2** [Buckman Labs]  
*Chem. Descrip.:* Modified barium metaborate monohydrate  
 CAS 13701-59-2  
*Uses:* Pigment, corrosion inhibitor, tannin stain blocker, flame retardant, and UV light stabilizer for use in water- and solv.-based coatings; stabilizer for metals and metal salts, esp. zinc, for formulation in zinc-rich coatings; food-contact paper/paperboard; multifunctional  
*Use Level:* 2-30% (corrosion inhibition), 3-10% (tannin stain blocking), 2-9% (flame retardant), 2% (uv stabilization)  
*Regulatory:* FDA 21CFR §176.180  
*Properties:* Wh. amorphous cryst. solid, odorless; sol. 0.3-0.4% in water; mod. sol. in dil. aq. acids; insol. in org. solvs.; sp.gr. 3.35 g/cc; dens. 27.9 lb/gal; pH 9.85 (100 ppm in water); 90+% act.
- Busan® 90** [Buckman Labs]  
*Chem. Descrip.:* 2-Bromo-4'-hydroxyacetophenone  
 CAS 2491-38-5  
*Uses:* Bactericide for use in water-based paints, adhesives, waxes, and polishes; defoamer in food-contact coatings; slimicide in food-contact paper; provides protection against bacterial degradation in the container  
*Use Level:* 0.1-0.5%  
*Regulatory:* FDA 21CFR §176.200, 176.300  
*Properties:* Dk. brn. liq., mildly acrid odor; sp.gr. 1.18 g/ml; pH 5-6 (100 ppm in water); 30% act.
- Busan® 1058** [Buckman Labs]  
*Chem. Descrip.:* Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione  
 CAS 533-74-4; EINECS/ELINCS 208-576-7  
*Uses:* Preservative for pigment slurries incl. those based on aluminum silicate, calcium carbonate, and titanium dioxide; for use in coated/uncoated paper/paperboard for food contact applics.; food-contact slimicide

*Regulatory:* FDA 21CFR §176.230, 176.300

*Properties:* Yel. clear liq., pungent odor; sp.gr. 1.15 g/ml; dens. 9.5 lb/gal; pH > 12; 24% act.

**Busan® 1059** [Buckman Labs]

*Chem. Descrip.:* Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione  
CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Broad-spectrum bactericide for use in coatings, adhesives, emulsions, and clay slurries; food-contact paper/paperboard; food-contact slimicide; protects against bacterial attack during shipping and storage

*Use Level:* 0.01-0.03%

*Regulatory:* FDA 21CFR §176.230, 176.300

*Properties:* Wh. cryst. powd., sl. odor; sl. sol. in water; sp.gr. 0.53 g/ml; pH 6-7 (100 ppm in water); 98% act.

**Busan® 1059-WS** [Buckman Labs]

*Chem. Descrip.:* Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione  
CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Broad-spectrum bactericide for use in coatings, adhesives, emulsions, and clay slurries; food-contact paper/paperboard; food-contact slimicide; protects against bacterial attack during shipping and storage;

*Use Level:* 0.01-0.03%

*Regulatory:* FDA 21CFR §176.230, 176.300

*Properties:* Wh. cryst. powd., sl. odor; sl. sol. in water; sp.gr. 0.53 g/ml; pH 6-7 (100 ppm in water); 98% act.

**Busan® 1105** [Buckman Labs]

*Chem. Descrip.:* 10% 2-(Thiocyanomethylthio) benzothiazole, 10% methyl-enebis (thiocyanate) in inert ingreds.

*Uses:* Broad-spectrum fungicide for use in solv.-based stains, clear finishes, and wood preservatives; slimicide in food-contact paper; improved solvency in solv.-based systems; may react with certain driers to produce an off-color in wet paint

*Use Level:* 0.5-9%

*Regulatory:* FDA 21CFR §176.300

*Properties:* Amber clear liq., sl. odor; insol. in aliphatic solvs. (e.g., min. spirits) without a cosolv.; sp.gr. 1.08 g/ml; dens. 9.0 lb/gal; pH 5-7 (100 ppm in water); 20% act.

**Busan® 1118** [Buckman Labs]

*Chem. Descrip.:* 2-(Thiocyanomethylthio) benzothiazole in inert ingreds.  
CAS 21564-17-0

*Uses:* Broad-spectrum fungicide for use in water- and solv.-based coatings, caulks, sealants, and wallcovering adhesives; slimicide in food-contact paper; formulated for improved emulsification in water

*Use Level:* 0.5-5% (coatings), 0.1-0.5% (caulks, sealants, wallcovering adhesives)

*Regulatory:* FDA 21CFR §176.300

*Properties:* Amber clear liq., very sl. odor; sp.gr. 1.07 g/ml; dens. 8.9 lb/gal; flash pt. (TCC) 131 F; pH 6-7 (100 ppm in water); 30% act.

**Busan® 1130** [Buckman Labs]

*Chem. Descrip.:* 2-Bromo-4'-hydroxyacetophenone in inert ingreds.

*Uses:* Bactericide for water-based paints, adhesives, waxes, and polishes; food-contact paper/paperboard; food-contact slimicide

*Use Level:* 0.3-1.5%

*Regulatory:* FDA 21CFR §176.170, 176.300

*Properties:* Reddish-brn. opaque liq., mild vanilla odor; sp.gr. 1.03 g/ml; dens. 8.6 lb/gal; pH 5-6 (100 ppm in water); 10% act.

**Busan® 1210** [Buckman Labs]

*Uses:* Microbicide, bactericide, slimicide, fungicide for papermaking; slimicide for food-contact paper; broke and stock preservative; additive preservative; broad spectrum; fast-acting; effective at alkaline pH; hydrolyzes to nontoxic and biodeg. components; environmentally safe

*Regulatory:* FDA 21CFR §176.300; EPA reg. no. 1448-353; SARA §313 nonreportable

**Busan® 1223** [Buckman Labs]

*Chem. Descrip.:* Combination of two biocides

*Uses:* Microbicide, bactericide, slimicide for pulp/paper mfg. on wet end of paper machines and for additive preservation; fungicide for water- and solv.-based coatings, stains, and clear finishes; inc. prod. and paper quality; effective in controlling sulfate-reducing bacteria and filamentous bacteria

*Use Level:* 0.5-5% (coatings), 0.5-9% (stains, clear finishes)

*Regulatory:* FDA approved; EPA registered; SARA §313 nonreportable

*Properties:* Amber clear liq.; sp.gr. 1.10 g/ml; dens. 9.2 lb/gal; flash pt. 80 C; pH 6-7 (100 ppm in water)

**Busperse® 39** [Buckman Labs]

*Chem. Descrip.:* Polyelectrolyte

*Uses:* Dispersant for use in water-based paints and pigment slurries, corrosion-resist. latex paints, exterior paints, and in gloss latex paints; food-contact paper/paperboard; provides exc. visc. stability with reactive pigments; good color acceptance; low foaming; effective at low concs.; noncorrosive to ferrous metals; glycol compat.

*Use Level:* 0.3-0.7%

*Regulatory:* FDA 21CFR §173.310, 176.170

*Properties:* Water-sol.; 39% solids; anionic

**Busperse® 203** [Buckman Labs]

*Chem. Descrip.:* Polyelectrolytes

*Uses:* Pigment dispersant for water-thinned emulsion paints and pigment slurries; effective in paints containing TiO<sub>2</sub> or reactive pigments and in semigloss emulsion paints; food pkg. adhesives, coatings, paper/paperboard; provides long-term visc. stability

*Use Level:* 0.4-0.6% (paints with nonreactive pigments), 0.5-1.3% (paints with reactive pigments), 0.2-1.5% (pigment slurries)

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170

*Properties:* Liq.; sp.gr. 1.16 g/ml; dens. 9.7 lb/gal; flash pt. > 100 C; pH 9-10 (100 ppm in dist. water); anionic

**Busperse® 229** [Buckman Labs]

*Chem. Descrip.:* Organic

*Uses:* Pigment dispersant and wetting agent for water-reducible paints such as alkyls; defoamer in food-contact paper/paperboard; designed to minimize problems of blistering and adhesion loss

*Use Level:* 0.3-0.75%

*Regulatory:* FDA 21CFR §176.210

*Properties:* Liq.; sp.gr. 1.12 g/ml; dens. 9.3 lb/gal; flash pt. > 100 C; pH 4-5 (100 ppm in water)

**Busperse® 275** [Buckman Labs]

*Uses:* Dispersant for water-based systems such as emulsion and water-reducible coatings, pigment slurries, and adhesives; food-contact paper/paperboard

*Use Level:* 0.3-1% (coatings), 0.3-1.5% (pigment slurries), 0.2-0.5% (adhesives)

*Regulatory:* FDA 21CFR §173.310, 176.170

*Properties:* Colorless clear to sl. hazy liq., sl. odor; sp.gr. 1.18 g/ml; dens. 9.8 lb/gal; pH 3; anionic

**Busperse® 282** [Buckman Labs]

*Uses:* Dispersant for water-based systems such as emulsion and water-reducible coatings, pigment slurries, and adhesives; food-contact paper/paperboard

*Use Level:* 0.3-1% (coatings), 0.3-1.4% (pigment slurries), 0.2-0.6% (adhesives)

*Regulatory:* FDA 21CFR §173.310, 176.170

*Properties:* Yel.-orange liq., sl. odor; sp.gr. 1.35 g/ml; dens. 11.2 lb/gal; pH > 12; anionic

**Busperse® 288** [Buckman Labs]

*Uses:* Dispersant for repulping and deinking of troublesome sec. fiber in papermaking, e.g., heavily coated magazine stock, laser printed office waste; defoamer in mfg. of food-contact paper/paperboard; stable in presence of alkalis and bleaches used during repulping

*Regulatory:* FDA 21CFR §176.210

**Busperse® 379** [Buckman Labs]

*Uses:* Chelating agent for metal ions such as iron, manganese, copper, aluminum, zinc, barium, magnesium, and calcium that interfere with pulp/paper mill bleaching; brightener, visc. builder for pulps; performs well at lower temps.; improves recycled fiber bleaching efficiencies

*Toxicology:* Nontoxic

**Butofan®** [BASF AG]

*Chem. Descrip.:* Butadiene polymer dispersions

*Uses:* Paper impregnation and coating; binder for paper, adhesives, and textile coatings; binder for prod. of materials based on leather fibers

**BYK®-045** [BYK-Chemie USA]

*Chem. Descrip.:* Emulsion of hydrophobic solids, emulsifying agents and foam destroying polysiloxanes

*Uses:* Defoamer for emulsion paints, paper coatings, foil coatings, stains, plasters and bonding agents

*Properties:* Colorless to yellowish liq.; mild hydrocarbon odor; sp.gr. 1.00; dens. 8.32 lb/gal; vapor pressure 18 mm Hg; flash pt. (Seta) >100 C; 8.5% NV in water

*Toxicology:* TSCA listed

---

**Bynel® CXA** [DuPont; DuPont Canada]

*Chem. Descrip.:* Coextrudable adhesive polymers

*Uses:* Tie layer in multilayer flexible pkg.; in flexible and rigid pkg. for foods, agric., pharmaceutical pkg.; in nonpkg. applics. to bond metal, wood, vinyl,

and plastic substrates; in industrial prods. and building materials such as nylon, PE, PP, PS, EVOH, aluminum, paper; 35 grades divided into 11 chemically different series designed to adhere to a wide variety of substrates

# C

**C2® Sodium Chlorite** [Arch Chems./Water Chems.]

*Chem. Descrip.:* Sodium chlorite  
 CAS 7758-19-2; EINECS/ELINCS 231-836-6  
*Uses:* Bacterial slimicide for wh. water systems in paper mills  
*Properties:* Wh. flake; dens. 53 lb/ft<sup>3</sup> (loose); 69 lb/ft<sup>3</sup> (packed); 79% min. sodium chlorite

**C110** [Grain Processing]

*Chem. Descrip.:* Acid-modified corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Component of uncoated or coated food-contact surf. of paper and paperboard  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Wh. gran. powd.; bulk dens. 38 lb/ft<sup>3</sup> (loose), 50 lb/ft<sup>3</sup> (packed); pH 6; 11% moisture

**CA** [Creanova]

*Chem. Descrip.:* Ketone-aldehyde resin  
*Uses:* Gloss, hardness, and adhesion enhancement in wood lacquers, paper varnishes, printing ink, adhesives, and industrial paints  
*Properties:* Wh. powd.; sp.gr. 1.13-1.14 g/cm<sup>3</sup>; m.p. 92-108 C; acid no. ≤ 0.3; 100% solids

**CA-394-60S** [Eastman]

*Chem. Descrip.:* Cellulose acetate  
 CAS 9004-35-7  
*Uses:* In food-contact coatings, paper/paperboard, closures with sealing gaskets for food containers; used where high strength and good resistance to heat, UV light, oils, and greases are required  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 177.1210  
*Properties:* Wh. fine powd.; low odor; m.w. 60,000; dens. 1.32 kg/l; visc. 228 poise; m.p. 240-260 C; Tukon hardness 27; 39.5% acetyl content

**CA-398-3** [Eastman]

*Chem. Descrip.:* Cellulose acetate  
 CAS 9004-35-7  
*Uses:* Used to formulate coatings for paper, glass, plastic, wire screen, and elec. wiring, and in adhesives, wood sealers, paint removers; as barrier and release coatings for pressure-sensitive tapes; in food-contact coatings, paper/paperboard, closures with sealing gaskets for food containers; used where high strength and good resistance to heat, UV light, oils, and greases are required  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 177.1210  
*Properties:* Wh. fine powd.; low odor; m.w. 30,000; sp.gr. 1.31; dens. 10.9 lb/gal; visc. 11.4 poise; m.p. 230-250 C; ref. index 1.475; Tukon hardness 26; 39.8% acetyl content

**CA-398-6** [Eastman]

*Chem. Descrip.:* Cellulose acetate  
 CAS 9004-35-7  
*Uses:* Used to formulate coatings for paper, glass, plastic, wire screen, and elec. wiring, and in adhesives, wood sealers, paint removers; as barrier and release coatings for pressure-sensitive tapes; in food-contact coatings, paper/paperboard, closures with sealing gaskets for food containers; used where high strength and good resistance to heat, UV light, oils, and greases are required  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 177.1210  
*Properties:* Wh. fine powd.; low odor; m.w. 35,000; sp.gr. 1.31; dens. 10.9 lb/gal; visc. 22.80 poise; m.p. 230-250 C; ref. index 1.475; Tukon hardness 26; 39.8% acetyl content

**CA-398-10** [Eastman]

*Chem. Descrip.:* Cellulose acetate  
 CAS 9004-35-7  
*Uses:* Used to formulate coatings for paper, glass, plastic, wire screen, and elec. wiring, and in adhesives, wood sealers, paint removers; as barrier and release coatings for pressure-sensitive tapes; in food-contact coatings, paper/paperboard, closures with sealing gaskets for food containers; used where high strength and good resistance to heat, UV light, oils, and greases are required  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 177.1210; DOT nonregulated; SARA nonreportable  
*Properties:* Wh. fine powd.; odorless; negligible sol. in water; m.w. 40,000; sp.gr. 1.31; dens. 10.9 lb/gal; visc. 38.00 poise; vapor pressure negligible; m.p. 230-250 C; ref. index 1.475; Tukon hardness 26; 100% act.; 39.8% acetyl content  
*Toxicology:* Expected to be low ing. hazard; TSCA listed  
*Environmental:* Expected to be nonbiodeg., have low biochem. oxygen demand, and low potential to affect aquatic organisms, sec. waste treatment organisms, germination/early growth of plants  
*Precaution:* Combustible solid; powd. material may form explosive dust-air mixts.; incompat. with oxidizing materials; can dec. above 304 C; mixing in a nonpolar hydrocarbon may cause static buildup which can cause a flash fire  
*Hazardous Decom. Prods.:* Combustion prods.: CO<sub>2</sub>, CO  
 HMIS: Health 0; Flammability 1; Reactivity 0  
*Storage:* Keep container closed

**CA-398-30** [Eastman]

*Chem. Descrip.:* Cellulose acetate sol'n.  
 CAS 9004-35-7  
*Uses:* Used in food-contact coatings, paper/paperboard, closures with sealing gaskets for food containers; used where high strength and good resistance to heat, UV light, oils, and greases are required  
*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 177.1210  
*Properties:* Wh. fine powd.; low odor; m.w. 50,000; dens. 1.31 kg/l; visc. 114 poise; m.p. 230-250 C; Tukon hardness 26

**CA 1124B** [Process Chems. LLC]

*Uses:* Defoamer, drainage aid for kraft pulp/paper applics. in brownstock washing, screenroom, bleach plant, paper machine, and effluent; water-based; does not contain EBS, min. oil, or dioxin precursors; does not contribute to deposit formation; suitable where batch or continuous pulp is employed  
*Properties:* Opaque liq.; sp.gr. 1.05; visc. 1200 ± 300 cps  
*Toxicology:* TSCA listed  
*Storage:* Store in dry area

**CA 1124XD** [Process Chems. LLC]

*Uses:* Defoamer, drainage aid for kraft pulp/paper applics., for use in brownstock washing, screen room, and bleach plant operations, on the paper machine, and in the effluent; water-based; does not contain EBS, min. oil, or dioxin precursors; does not contribute to deposit formation; suitable whether batch or continuous pulp is employed  
*Properties:* Opaque wh. liq.; sp.gr. 1.005-1.030; dens. 8.38-8.58 lb/gal; visc. 750-1250 cps; pH 5.5-6.5  
*Toxicology:* TSCA listed  
*Storage:* Store in dry area

**CAB-171-15** [Eastman]

*Chem. Descrip.:* Cellulose acetate butyrate

CAS 9004-36-8

*Uses:* Useful in coatings for wire, leather, plastic, and cloth, esp. wire coatings, airplane lacquers; food pkg. adhesives, coatings, paper/paperboard, cellophane, film; produces films with superior toughness and hardness and exc. resist. to chems., oils, and greases

*Regulatory:* FDA 21CFR §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400

*Properties:* Flakes; m.w. 65,000; sp.gr. 1.26; dens. 10.5 lb/gal; visc. 57 poise; m.p. 230-240 C; ref. index 1.475; Tukon hardness 27; dielec. str. 2.0-2.5 kV/mil; 29.5% acetyl, 17% butyryl

**CAB-321-0.1 [Eastman]**

*Chem. Descrip.:* Cellulose acetate butyrate

CAS 9004-36-8

*Uses:* Designed for use in automotive basecoats; food pkg. adhesives, coatings, paper/paperboard, cellophane, film; resist. to attack and redissolve by solvs. in typ. clearcoats

*Regulatory:* FDA 21CFR §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400

*Properties:* Wh. fine, dry, powd.; m.w. 12,000; dens. 1.2 kg/l; visc. 0.38 poise; m.p. 165-175 C; Tukon hardness 21; 17.5% acetyl, 32.5% butyryl

**CAB-381-0.1 [Eastman]**

*Chem. Descrip.:* Cellulose acetate butyrate

CAS 9004-36-8

*Uses:* Improves pigment control and intercoat adhesion, reduces cratering in lacquers, nail polishes, coatings for wood, metal, plastics, paper, leather, and cloth, printing inks; food pkg. adhesives, coatings, paper/paperboard, cellophane, film

*Regulatory:* FDA 21CFR §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400

*Properties:* Wh. fine powd.; sol. in diethylene glycol diacrylate; sol. with haze in styrene/methyl methacrylate (80/20), butyl acrylate; m.w. 20,000; sp.gr. 1.20; dens. 10 lb/gal; visc. 0.38 poises; m.p. 155-165 C; ref. index 1.48; Tukon hardness 18; dielec. str. 2.0-2.5 kV/mil; 13.5% acetyl, 38% butyryl

**CAB-381-0.5 [Eastman]**

*Chem. Descrip.:* Cellulose acetate butyrate

CAS 9004-36-8

*Uses:* Improves pigment control and intercoat adhesion, reduces cratering in lacquers, nail polishes, coatings for wood, metal, plastics, paper, leather, and cloth, printing inks; food pkg. adhesives, coatings, paper/paperboard, cellophane, film

*Regulatory:* FDA 21CFR §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400

*Properties:* Wh. fine powd.; sol. in 1,3 butylene diacrylate; m.w. 30,000; sp.gr. 1.2; dens. 10 lb/gal; visc. 1.90 poise; m.p. 155-165; ref. index 1.48; Tukon hardness 18; dielec. str. 2.0-2.5 kV/mil; 13.5% acetyl, 38% butyryl

**CAB-381-2 [Eastman]**

*Chem. Descrip.:* Cellulose acetate butyrate

CAS 9004-36-8

*Uses:* Used in automotive lacquers, lacquers for plastics and paper, wood finishes, nail polishes, coatings for fabrics and leather, peelable plastic coatings, heat-seal adhesives; food pkg. adhesives, coatings, paper/paperboard, cellophane, film

*Regulatory:* FDA 21CFR §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400

*Properties:* Wh. fine powd.; sol. in glycidyl methacrylate; m.w. 40,000; sp.gr. 1.2; dens. 10 lb/gal; visc. 7.60 poise; m.p. 171-184 C; ref. index 1.475; Tukon hardness 18; dielec. str. 2.0-2.5 kV/mil; 13.5% acetyl, 38% butyryl

*Chem. Descrip.:* Untreated fumed silica, undensified

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Rheology control agent and reinforcing agent for adhesives, coatings, cosmetics, defoamers, elastomers, foods, inks, insecticides, lubricants, pharmaceuticals, plastisols, liq. resins, sealants, silicones, thermal insulation; food pkg. adhesives, coatings, paper/paperboard, cellophane, film, rubber articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90

*Properties:* 0.02% 325 mesh residue; bulk dens. 2.5 lb/ft<sup>3</sup>; surf. area 325 ± 25 m<sup>2</sup>/g; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay

*Toxicology:* LD50 (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes

*Storage:* Store in dry environment away from chemical vapors

**Cab-O-Sil® L-90 [Cabot/Cab-O-Sil]**

*Chem. Descrip.:* Untreated fumed silica, undensified

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Dispersant, anticaking agent, rheology control agent, reinforcing agent for adhesives, elastomers, sealants, silicones, cosmetics, pharmaceuticals, coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, film, rubber articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90

*Properties:* Wh. powd., odorless; 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 3 lb/ft<sup>3</sup>; surf. area 100 ± 15 m<sup>2</sup>/g; ref. index 1.46; pH 3.7-4.3 (4% aq.

slurry); > 99.8% assay

*Toxicology:* LD50 (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes

*Storage:* Store in dry environment away from chemical vapors

**Cab-O-Sil® LM-130 [Cabot/Cab-O-Sil]**

*Chem. Descrip.:* Untreated fumed silica, undensified

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Dispersant, anticaking agent, rheology control agent, reinforcing agent for adhesives, elastomers, sealants, silicones, coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, film, rubber articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90

*Properties:* 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 3 lb/ft<sup>3</sup>; surf. area 130 ± 15 m<sup>2</sup>/g; ref. index 1.46; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay

*Toxicology:* LD50 (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes

*Storage:* Store in dry environment away from chemical vapors

**Cab-O-Sil® LM-150 [Cabot/Cab-O-Sil]**

*Chem. Descrip.:* Untreated fumed silica, undensified

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Dispersant, anticaking agent, rheology control agent, reinforcing agent for adhesives, elastomers, sealants, silicones, cosmetics, pharmaceuticals, coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, film, rubber articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90

*Properties:* Wh. powd., odorless; 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 2.5 lb/ft<sup>3</sup>; surf. area 160 ± 15 m<sup>2</sup>/g; ref. index 1.46; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay

*Toxicology:* LD50 (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes

*Storage:* Store in dry environment away from chemical vapors

**Cab-O-Sil® LM-150D [Cabot/Cab-O-Sil]**

*Chem. Descrip.:* Untreated fumed silica, densified

CAS 112945-52-5; EINECS/ELINCS 231-545-4

*Uses:* Rheology control agent and reinforcing agent for adhesives, elastomers, sealants, silicones; food pkg. adhesives, coatings, paper/paperboard, cellophane, film, rubber articles; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90

*Properties:* 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 5 lb/ft<sup>3</sup>; surf. area 160 ± 15 m<sup>2</sup>/g; ref. index 1.46; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay

*Properties:* 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 2.5 lb/ft<sup>3</sup>; surf. area 200 ± 25 m<sup>2</sup>/g; ref. index 1.46; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay  
*Toxicology:* LD50 (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes  
*Storage:* Store in dry environment away from chemical vapors
- Calcitem S** [Microfill K. Zafranias]  
*Chem. Descrip.:* Calcium carbonate (99.3%)  
 CAS 471-34-1; EINECS/ELINCS 207-439-9  
*Uses:* Filler for high quality emulsion paints, paper coatings, PVC dry blend or compounding, and rubber works  
*Properties:* Amorphous crystals; 65% < 2 µ; sp.gr. 2.7; bulk dens. 0.9 g/ml (packed); oil absorb. 29/100 g; dry brightness 94%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture
- Calgon PTH** [BK Giulini Chemie]  
*Chem. Descrip.:* Sodium carbonate and phosphates  
*Uses:* Inorg. pigment dispersant used in paper finishing  
*Use Level:* 0.2-0.4% (avg.); 0.5-0.7% (improves adhesive str. of coating colors); 1-2% (casein based colors)  
*Regulatory:* BgVV compliant  
*Properties:* Wh. powd.; highly sol. in water; sp.gr. 1.0; pH 8.5 (10 g/l; 20 C)
- Storage:* 1 yr. shelf life @ 20 C
- Calimulse EM-22** [Pilot]  
*Chem. Descrip.:* Sodium branched dodecylbenzene sulfonate  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Surfactant for emulsion polymerization of wide range of polymers incl. SBR, vinyl acetate, vinyl chloride, styrene and acrylic latexes; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600  
*Properties:* Clear liq.; visc. 1500 cps; pH 7-8.5 (10% sol'n.); 22-24% act.; anionic  
 Custom prod.
- Calimulse EM-30** [Pilot]  
*Chem. Descrip.:* Sodium branched dodecylbenzene sulfonate (hard)  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Emulsifier for emulsion polymerization; food pkg. adhesives, rubber articles; defoamer in food-contact paper/paperboard; rec. for prods. which do not enter sewage streams  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600  
*Properties:* Liq.; 30% conc.; anionic
- Calimulse EM-96F** [Pilot]  
*Chem. Descrip.:* Sodium branched dodecylbenzene sulfonate  
*Chem. Analysis:* sodium sulfate (0.5%); sodium chloride (0.1%)  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Surfactant for emulsion polymerization incl. styrene and acrylic systems, styrene butadiene rubber, polyvinyl acetate, and polyvinyl chloride; defoamer in food-contact paper/paperboard; high purity  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.2600  
*Properties:* Flake; pH 7.0-9.5 (10% sol'n.); 96% act.; 1.5% max. water; anionic  
 Custom prod.
- Calimulse EM-99** [Pilot]  
*Chem. Descrip.:* Branched dodecylbenzene sulfonic acid  
 CAS 27176-87-0; EINECS/ELINCS 248-289-4  
*Uses:* Neutralized as emulsifiers for agric., emulsion polymers; defoamer in food-contact paper/paperboard; for prods. which do not enter sewage streams  
*Regulatory:* FDA 21CFR §176.210  
*Properties:* Thick liq.; 97% conc.; anionic
- Calimulse L-22** [Pilot]  
*Chem. Descrip.:* Sodium linear alkylbenzene sulfonate (22% sol'n.)  
*Uses:* Surfactant for emulsion polymerization of range of polymers incl. SBR, vinyl acetate, vinyl chloride, styrene and acrylic latexes; defoamer in food-contact paper/paperboard; in food-contact textiles  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.365, 175.380, 176.170, 176.180, 176.210, 177.1010, 177.1200, 177.1210, 177.1630, 177.2600, 177.2800, 178.3120, 178.3400  
*Properties:* Clear liq.; visc. 1500 (LVT #2 @ 30 rpm); pH 7-8.5; 22-24% act.
- Calimulse L-30** [Pilot]  
*Chem. Descrip.:* Sodium linear alkylbenzene sulfonate (30% sol'n.)  
*Uses:* Surfactant for emulsion polymerization of range of polymers incl. SBR, vinyl acetate, vinyl chloride, styrene and acrylic latexes; defoamer in food-contact paper/paperboard; in food-contact textiles  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.365, 175.380, 176.170, 176.180, 176.210, 177.1010, 177.1200, 177.1210, 177.1630, 177.2600, 177.2800, 178.3120, 178.3400  
*Properties:* Liq.; visc. 350 cps; pH 7-8.5; 30-33% solids
- Calimulse L-50** [Pilot]  
*Chem. Descrip.:* Sodium linear alkylbenzene sulfonate  
*Chem. Analysis:* sodium sulfate (1.5%); unsulfonated matter (1.5%)  
*Uses:* Surfactant for emulsion polymerization of range of polymers incl. SBR, vinyl acetate, vinyl chloride, styrene and acrylic latexes; defoamer in food-contact paper/paperboard; in food-contact textiles  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.365, 175.380, 176.170, 176.180, 176.210, 177.1010, 177.1200, 177.1210, 177.1630, 177.2600, 177.2800, 178.3120, 178.3400  
*Properties:* Slurry; pH 7-8 (5% sol'n.); 50-53% act.
- Calimulse PR** [Pilot]  
*Chem. Descrip.:* Isopropylamine branched dodecylbenzene sulfonate  
 CAS 26264-05-1; EINECS/ELINCS 247-556-2  
*Uses:* Surfactant for emulsion polymerization; emulsifier for latexes; pigment dispersant and spreading agent in latex paints; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210

*Properties:* Pale amber clear visc. liq.; visc. 10,000 cps; pH 4-5 (50% IPA/water); 92-95% act.; anionic  
Custom prod.

**Calimulse PRS** [Pilot]

*Chem. Descrip.:* Isopropylamine dodecylbenzene sulfonate  
CAS 26264-05-1; EINECS/ELINCS 247-556-2

*Uses:* Surfactant for emulsion polymerization; emulsifier; solubilizer; dry cleaning; degreasers; latex emulsifier; pigment dispersant; agric. sprays, oil slick emulsifier; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210

*Properties:* Clear amber liq.; dens. 8.5 lb/gal; pH 4.8; 90% conc.; anionic  
*Environmental:* Biodeg.

**Calimulse SLS** [Pilot]

*Chem. Descrip.:* Sodium lauryl sulfate, emulsion polymerization grade (30% sol'n.)

*Chem. Analysis:* sodium bicarbonate (0.15-0.25%); sodium sulfate (0.10-0.50%); sodium chloride (0.10%)

CAS 151-21-3; EINECS/ELINCS 205-788-1

*Uses:* Surfactant, emulsifier for emulsion polymerization, styrene acrylics, acrylics, vinyl chloride and styrene-butadiene emulsions; defoamer in food-contact paper/paperboard; in food-contact textiles; no formaldehyde present  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1210, 177.2600, 177.2800, 178.3400

*Properties:* Liq.; visc. 150 cps; pH 7.5-8.5 (10% sol'n.); 29.5-30.5% act.; anionic

**Calnox® 214** [Aquaness]

*Chem. Descrip.:* Acrylic acid polymer, 70% sodium neutralized aq. sol'n.  
CAS 9003-04-7

*Uses:* Threshold effect scale inhibitor; dispersant; sequestrant; low m.w.; neutralized to sodium salt form to enhance sol. and freeze pt.

*Properties:* Dens. 9.88 lb/gal (60 F); visc. (Hoeppler) 16-24 cps; f.p. 25-30 F; pH 4.7-5.3; 32 ± 1% act.

**Calnox® 214 DN** [Aquaness]

*Chem. Descrip.:* Sodium polyacrylate aq. sol'n.

CAS 9003-04-7

*Uses:* Threshold effect scale inhibitor; dispersant; sequestrant; specially treated to minimize odor; low m.w.

*Properties:* Dens. 10.0 lb/gal (60 F); visc. 20-30 (Hoeppler); f.p. 18-20 F; pH 6.8-7.5; 33 ± 1% act.

**Calsan™ 50** [BASF]

*Chem. Descrip.:* Calcium stearate disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant for paper coatings; low residue; low visc.; low entrained air; high whiteness; low sedimentation; rapid disp. in coating formulation

*Use Level:* 0.5-2.0% solids on dry pigment solids

*Properties:* Liq.; 50% solids

**Calsan™ 55** [BASF]

*Chem. Descrip.:* Calcium stearate disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant for paper coatings improving flow and leveling; permits inc. steam usage during supercalendering operations to achieve desired gloss levels while holding dusting to a min.; compat. with starch, protein or latex-type binder systems (such as S/B, acrylics, or polyvinyl acetates)

*Use Level:* 0.5-2.0% solids on dry pigment solids

*Properties:* Liq.; 55% solids

**Calsan™ 65** [BASF]

*Chem. Descrip.:* Calcium stearate disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant for paper coatings improving flow and leveling; permits inc. steam usage during supercalendering operations to achieve desired gloss levels while holding dusting to a min.; compat. with starch, protein or latex-type binder systems (such as S/B, acrylics, or polyvinyl acetates)

*Use Level:* 0.5-2.0% solids on dry pigment solids

*Properties:* Liq.; 65% solids

**Calsoft® LAS-99** [Pilot]

*Chem. Descrip.:* Dodecylbenzene sulfonic acid, linear

CAS 27176-87-0; EINECS/ELINCS 248-289-4

*Uses:* Detergent, emulsifier, intermediate for liq. and dry detergents, hard surf. cleaners, stripping, wetting, foaming; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §176.210, 178.3400

*Properties:* Klett 50 syrupy liq.; water-sol.; sp.gr. 1.06; dens. 8.83 lb/gal;

visc. 1100 cps; 97.5% act.; anionic

*Environmental:* Biodeg.

**Calwhite®** [Georgia Marble]

*Chem. Descrip.:* Ground calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (95% min.)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Reinforcing filler for exterior/interior paints and coatings where flat and med. gloss surfs. are required, paper coatings, adhesives, caulks and sealants based on acrylic, polyolefin, silicone, and PU, plastics (polyolefin, PU, compr. and inj. molded, plastisols), rubber (NR, SR, latex), thermosets (BMC/SMC, pultrusion); extender for wh. and colored pigments; not for use in o-rings and oil seals

*Properties:* Powd.; 6.0 μ median particle size; 0.008% on 325 mesh; fineness (Hegman) 5; oil absorp. 10; brightness 94; pH 9.0-9.5

**Camel-CAL®** [IMERYS]

*Chem. Descrip.:* Calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for water-based coatings and inks, paper, paper coatings, thermosets (glass-reinforced polyester), thermoplastics (PP, ABS), PVC pipe, siding, profiles, extrusion, film, sheeting, color concs., paint (gloss, semi-gloss, flat latex); improves impact str.

*Properties:* Wh. powd.; 0.7 μ avg. particle diam.; 100% finer than 7 μ; 65% finer than 1 μ; 0.14% sol. in water; sp.gr. 2.70-2.71; dens. 22.57 lb/gal solid; bulk dens. 35 lb/ft<sup>3</sup> (loose); oil absorp. 28 cc/100 g; brightness (Hunter) 96; ref. index 1.6; pH 9.5 (sat. sol'n.)

*Toxicology:* Nontoxic

**Camel-CAL® ST** [IMERYS]

*Chem. Descrip.:* Stearate-coated calcium carbonate

*Uses:* Filler for water-based coatings and inks, paper, paper coatings, thermosets (glass-reinforced polyester), thermoplastics (PP, ABS), PVC pipe, siding, profiles, extrusion, film, sheeting, color concs., paint (gloss, semi-gloss, flat latex); improves impact str.; easy disp.; hydrophobic

*Properties:* Wh. powd.; 0.7 μ avg. particle diam.; 100% finer than 7 μ; 65% finer than 1 μ; 0.14% sol. in water; sp.gr. 2.70-2.71; dens. 22.57 lb/gal solid; bulk dens. 25 lb/ft<sup>3</sup> (loose); oil absorp. 28 cc/100 g; brightness (Hunter) 96; ref. index 1.6; pH 9.5 (sat. sol'n.); hardness (Moh) 3.0; 1% surface treatment

*Toxicology:* Nontoxic

**Camel-CAL® Slurry** [IMERYS]

*Chem. Descrip.:* Calcium carbonate slurry

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for aq. coatings and inks, paper, paper coatings, thermosets (glass-reinforced polyester), thermoplastics (PP, ABS), PVC pipe, siding, profiles, extrusion, film, sheeting, color concs., paints (gloss, semigloss, flat latex)

*Properties:* Slurry; 0.7 μ avg. particle diam.; 100% finer than 7 μ; 90% finer than 2 μ; 0.14% sol. in water; sp.gr. 2.70-2.71; dens. 15.87 lb/gal; visc. 90-150 cps; brightness (Hunter) 96; ref. index 1.6; pH 9.5 (sat. sol'n.); hardness (Moh) 3.0; 75 ± 0.5% solids

**Camel-FINE** [IMERYS]

*Chem. Descrip.:* Calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for plastics, PVC, polyolefins, polyesters, BMC/SMC, paint, caulks, sealants, adhesives, paper, foam urethane, modified acrylics, filled thermosets/thermoplastics, and rubber; improves impact str., dimensional stability

*Regulatory:* NSF approved for potable water materials

*Properties:* Wh. powd.; 2 μ avg. particle diam.; 99.9% finer than 8 μ; 0.15% sol. in water; sp.gr. 2.70-2.71; dens. 22.57 lb/gal; bulk dens. 38 lb/ft<sup>3</sup> (loose); oil absorp. 23 ± 1 cc/100 g; brightness (Hunter) 95; ref. index 1.6; pH 9.5 (sat.); hardness (Moh) 3.0

*Toxicology:* Nontoxic

**Camel-WITE®** [IMERYS]

*Chem. Descrip.:* Calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for paints, paper, paper coating, PVC, rubber (automotive goods, footwear, medical supplies), thermoplastics (PP, nylon, urethanes, HDPE, LDPE, ABS, PS), thermosets (SMC, BMC, TMC glass reinforced polyesters, epoxy, alkaline phenolics), caulks, glazing compds., ceramics, adhesives, food processing

*Properties:* Very wh. dry powd.; 3.0 μ avg. particle diam.; 99.9% finer than 12 μ; 50% finer than 3 μ; 0.08% sol. in water; sp.gr. 2.70-2.71; dens. 22.57

lb/gal solid; bulk dens. 40 lb/ft<sup>3</sup> (loose); oil absorp. 15 cc/100 g; brightness (Hunter) 95; ref. index 1.6; pH 9.5 (sat. sol'n.); hardness (Moh) 3.0

*Toxicology:* Nontoxic

**Camel-WITE® Slurry** [IMERYS]

*Chem. Descrip.:* Calcium carbonate aq. slurry

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for paints, paper, paper coating, PVC, rubber (automotive goods, footwear, medical supplies), thermoplastics (PP, nylon, urethanes, HDPE, LDPE, ABS, PS), thermosets (SMC, BMC, TMC glass reinforced polyesters, epoxy, alkaline phenolics), caulks, glazing compds., ceramics, adhesives, food processing

*Properties:* Very wh. slurry; 3.0 μ avg. particle diam.; 99.9% finer than 12 μ; 50% finer than 3 μ; 0.08% sol. in water; sp.gr. 2.70-2.71; dens. 15.3 lb/gal; bulk dens. 40 lb/ft<sup>3</sup> (loose); visc. 100-200; brightness (Hunter) 95; ref. index 1.6; pH 9.5 (sat. sol'n.); hardness (Moh) 3.0; 72.0 ± 0.5% solids

**Camel-WITE® ST** [IMERYS]

*Chem. Descrip.:* Surface-treated calcium carbonate

*Uses:* Filler for paints, paper, paper coating, PVC, rubber (automotive goods, footwear, medical supplies), thermoplastics (PP, nylon, urethanes, HDPE, LDPE, ABS, PS), thermosets (SMC, BMC, TMC glass reinforced polyesters, epoxy, alkaline phenolics), caulks, glazing compds., ceramics, adhesives, food processing

*Properties:* Very wh. dry powd.; 3.0 μ avg. particle diam.; 99% finer than 12 μ; 50% finer than 3 μ; 0.08% sol. in water; sp.gr. 2.70-2.71; dens. 22.57 lb/gal solid; bulk dens. 35 lb/ft<sup>3</sup> (loose); oil absorp. 15 cc/100 g; brightness (Hunter) 95; ref. index 1.6; pH 9.5 (sat. sol'n.); hardness (Moh) 3.0; 1% surface treatment

*Toxicology:* Nontoxic

**Candelilla Wax SP 24A** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax substitute

CAS 136097-95-5

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Amber crude lumps, refined lumps, flakes, or powd.; m.p. (R & B) 165-175 F; acid no. 2-10; sapon. no. 50-65; 45% max. paraffinic hydrocarbons

**Candelilla Wax SP 50** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Candelilla Wax SP 75** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Candelilla Wax SP 76** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5

C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Candelilla Wax SP 78 Prime Quality Crude** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Tan crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Candelilla Wax SP 99** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Candelilla Wax SP 350** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Candelilla Wax SP 803** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax substitute

CAS 136097-95-5

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Tan crude lumps, refined lumps, flakes, or powd.; m.p. 174-180 F; acid no. 8-15; sapon. no. 30-40; 45% max. paraffinic hydrocarbons

**Candelilla Wax Fine** [Strahl & Pitsch]

*Chem. Descrip.:* Candelilla wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Wax used in cosmetics, pharmaceuticals, precision casting, polishes, lubricants, adhesives, paper coatings and sizing, chewing gum base, elec. insulators, candle compositions; food pkg. adhesives, coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed

*Properties:* Powd.; 98% min. thru 60 mesh, 70% min. thru 120 mesh, 30% min. thru 200 mesh, 10% min. thru 325 mesh; 45% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**CAP-482-0.5** [Eastman]

*Chem. Descrip.:* Cellulose acetate propionate ester

CAS 9004-39-1

*Uses:* Film-former used in printing inks, paper coatings, cloth coatings; carrier for metallic and fluorescent pigments and dyes; food pkg. adhesives, coatings, paper/paperboard, cellophane, films; wide solubility, high m.p., exc. grease barrier properties; forms films with fast solv. release, exc. antiblocking props.

*Regulatory:* FDA §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400; DOT nonregulated; SARA nonreportable

*Properties:* Wh. fine powd.; low odor; sol. in 1,6-hexanediol diacrylate, trimethylolpropane triacrylate, tetraethylene glycol diacrylate; negligible sol. in water; m.w. 25,000; sp.gr. 1.23; visc. 1.52 poise; vapor pressure negligible; m.p. 188-210 C; ref. index 1.475; Tukon hardness 23; 100% solids; 2.5% acetyl, 45% propionyl

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, guinea pig) > 5000 mg/kg; sl. skin irritant or sensitizer; expected to be low ing. hazard; TSCA listed

*Precaution:* Combustible solid; powd. material may form explosive dust-air mixts.; incompat. with strong oxidizers; mixing in a nonpolar hydrocarbon can cause static buildup which can cause flash fire

*Hazardous Decomp. Prods.:* Combustion prods.: CO<sub>2</sub>, CO

HMIS: Health 0; Flammability 1; Reactivity 0

*Storage:* Keep container closed

#### CAP-482-20 [Eastman]

*Chem. Descrip.:* Cellulose acetate propionate

CAS 9004-39-1

*Uses:* Film-former used in printing inks, paper coatings, cloth coatings, nail polishes; food pkg. adhesives, coatings, paper/paperboard, cellophane, films; exc. grease barrier properties

*Regulatory:* FDA §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400; DOT nonregulated; SARA nonreportable

*Properties:* Wh. fine powd.; low odor; negligible sol. in water; m.w. 75,000; sp.gr. 1.23; dens. 10.2 lb/gal; visc. 76 poise; vapor pressure negligible; m.p. 188-210 C; ref. index 1.475; Tukon hardness 23; 100% act.; 2.5% max. acetyl, 45-49% propionyl

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, guinea pig) > 5000 mg/kg; sl. skin irritant or sensitizer; expected to be a low ing. hazard; TSCA listed

*Precaution:* Combustible solid; powd. material may form explosive dust-air mixts.; can react with strong oxidizing materials; minimize dust generation and accumulation; mixing in a nonpolar hydrocarbon can cause static buildup which can cause flash fire

*Hazardous Decomp. Prods.:* Combustion prods.: CO<sub>2</sub>, CO

HMIS: Health 0; Flammability 1; Reactivity 0

*Storage:* Keep container closed

#### CAP-504-0.2 [Eastman]

*Chem. Descrip.:* Cellulose acetate propionate ester

CAS 9004-39-1

*Uses:* Used in printing inks, nail polishes; forms stable one-pkg. thermoset systems; food pkg. adhesives, coatings, paper/paperboard, cellophane, films; exc. grease barrier properties

*Regulatory:* FDA §175.105, 175.230, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1200, 177.1210, 177.1400

*Properties:* Wh. fine powd.; low odor; sol. in alcohol/water blends; m.w. 15,000; dens. 1.26 kg/l; visc. 0.76 poise; m.p. 188-210 C; Tukon hardness 20; 0.6% acetyl, 42.5% propionyl

#### Carbital® 35 [IMERYS]

*Chem. Descrip.:* Calcium carbonate (limestone)

CAS 1317-65-3

*Uses:* Filler, pigment, reinforcing agent for paper, paints, polymers, food, caulks, matte or dull coatings; med.-fine; wet-ground

*Properties:* Wh. powd. or 72% solids slurry; odorless; 0.005% max. 325 mesh; fineness 35% 2 μ; negligible sol. in water; sp.gr. 2.71; dens 15.32 lb/gal (72% solids); visc. 500 cps (72%); surf. area 3.5 m<sup>2</sup>/g; pH 9-10; nonflamm.; TLV/TWA 10 mg/m<sup>3</sup>

*Precaution:* Considered nuisance dust; incompat. with acids

#### Carbital® 75 [IMERYS]

*Chem. Descrip.:* Calcium carbonate (limestone)

CAS 1317-65-3

*Uses:* Filler, pigment, reinforcing agent for paper, paint, polymers, food, caulks, etc.; ultrafine; exc. optical properties; low visc., low adhesive demand in coatings, good retention as filler

*Properties:* Wh. powd. or 75% solids slurry; odorless; 0.005% max. 325 mesh; fineness 75% 2 μ; negligible sol. in water; sp.gr. 2.71; dens 15.87 lb/gal (72% solids); visc. 250 cps (72%); surf. area 8 m<sup>2</sup>/g; pH 9-10; nonflamm.; TLV/TWA 10 mg/m<sup>3</sup>

*Precaution:* Considered nuisance dust; incompat. with acids

#### Carbital® 90 [IMERYS]

*Chem. Descrip.:* Calcium carbonate (limestone)

CAS 1317-65-3

*Uses:* Pigment, filler, reinforcing agent for paper, paint, polymers, food, caulks,

etc.; high brightness pigment for coating high quality papers; ultrafine; offers low visc., low abrasion

*Properties:* Wh. powd. or 75% solids slurry; odorless; 0.005% max. 325 mesh; fineness 90% 2 μ; negligible sol. in water; sp.gr. 2.71; dens 15.87 lb/gal (72% solids); visc. 250 cps (72%); surf. area 12 m<sup>2</sup>/g; pH 9-10; nonflamm.; TLV/TWA 10 mg/m<sup>3</sup>

*Precaution:* Considered nuisance dust; incompat. with acids

#### Carbodash 103 [NOF]

*Chem. Descrip.:* Mixt. of special nonions

*Uses:* Deinking agent for paper industry; low foaming

*Properties:* Lt. yellowish liq.

#### Carbopol® 907 [BFGoodrich]

*Chem. Descrip.:* Polyacrylic acid

CAS 9003-01-4

*Uses:* Emulsifier, thickener, stabilizer, suspending agent, lubricant used for drilling muds, photosensitive emulsions, water treatment, cosmetic and personal care applics., topical pharmaceuticals; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; JSPI compliance

*Properties:* Wh. fluffy powd.; sol. in water, polar solvs., many nonpolar solvs. blends; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 0-3000 cps (4%); pH 2.5-3.0 (1% aq. disp.); 100% conc.; anionic

*Environmental:* Low aquatic toxicity; BOD=0, nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® 910 [BFGoodrich]

*Chem. Descrip.:* Carbomer 910

CAS 9003-01-4

*Uses:* Emulsifier; thickener; stabilizer; suspending agent; used for flocking, dip coating, textile back coating; cosmetic and personal care applics.; topical pharmaceuticals; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, BP, JSPI compliance

*Properties:* Wh. fluffy powd.; sol. in water, polar solvs., many nonpolar solvs. blends; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 3000-7000 cps (1%); pH 2.5-3.0 (1% aq. disp.); 100% conc.; anionic

*Toxicology:* LD50 (oral, rat) 10.25 g/kg, (dermal, rabbit) > 3 g/kg, (inh., rat) 1.71 mg/l; eye irritant; sl. skin irritant

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® 934 [BFGoodrich]

*Chem. Descrip.:* Carbomer 934

CAS 9003-01-4

*Uses:* Rheology agent, emulsifier, thickener, stabilizer, suspending agent for lubricating, quenching and silicone emulsions, graphite, polyethylene, fiber and paper suspensions, stable pharmaceutical emulsions and suspensions, aq. and solv.-based gels; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, BP, JSPI compliance; EPA hazardous waste; SARA §312 chronic health hazard, §313 reportable (benzene)

*Properties:* Wh. fluffy powd.; sl. acetic odor; sol. in water, polar solvs., many nonpolar solvs. blends; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 30,500-39,400 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); 100% conc.; < 2% moisture; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause eye irritation, pain; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; low aquatic toxicity; BOD=0, nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 934P** [BFGoodrich]

*Chem. Descrip.:* Carbomer 934P

CAS 9003-01-4

*Uses:* For pharmaceutical industry; thickener; suspending agent; emulsifier for topical lotions and sustained release tablets, oral pharmaceuticals; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; high purity grade

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, BP, IP, JSPI compliance

*Properties:* Wh. fluffy powd., sl. acetic odor; m.w. ≈ 3,000,000; sol. in water, polar solvs., many nonpolar solvs. blends; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 2050-5450 cps (0.2%), 29,400-39,400 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); anionic

*Toxicology:* LD50 (oral) 2.5-40 g/kg, low acute toxicity; mild eye irritant; minimal skin irritant

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 940** [BFGoodrich]

*Chem. Descrip.:* Carbomer 940

CAS 9003-01-4

*Uses:* Emulsifier, thickener, stabilizer, suspending agent used in cosmetics, topical pharmaceuticals, for die-casting and forging lubricants, thixotropic paints; solvent thickening with or without neutralizing; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, BP, JSPI compliance; EPA hazardous waste; SARA §312 chronic health hazard, §313 reportable (benzene)

*Properties:* Wh. fluffy powd., sl. acetic odor; sol. in water, polar solvs., many nonpolar solvs. blends; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 40,000-60,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); 100% conc., < 2% moisture; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause eye irritation, pain; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; low aquatic toxicity; BOD=0; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 941** [BFGoodrich]

*Chem. Descrip.:* Carbomer 941

CAS 9003-01-4

*Uses:* Emulsifier, thickener for cosmetics and topical pharmaceuticals; emulsion stabilizer for shampoos, lotions, and thin gels with good clarity; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, JSPI compliance; EPA hazardous waste; SARA §312 chronic health hazard, §313 reportable (benzene)

*Properties:* Wh. fluffy powd., sl. acetic odor; sol. in water, polar solvs., many nonpolar solvs. blends; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 4000-11,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); 100% conc.; < 2% moisture; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause eye irritation, pain; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide,

potassium hydroxide, or strongly basic amines

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 971P** [BFGoodrich]

*Chem. Descrip.:* Carbomer 941 (polymerized in ethyl acetate)

CAS 9003-01-4

*Uses:* Emulsifier, thickener, stabilizer, suspending agent for pharmaceuticals, esp. oral and mucoadhesive applics., controlled-release tablets, oral suspensions, transdermals, low-visc. clear topical lotions and gels; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; USP/NF, BP, JSPI compliance

*Properties:* Wh. fluffy powd., sl. acetic odor; 2-6 μ particle size; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 4000-11,000 cps (0.5%); acid no. 700-750; pH 2.5-3.0 (1% aq. disp.); anionic

*Toxicology:* LD50 (dermal, rabbit) > 2.0 g/kg; nonirritating to eyes; nonsensitizing to human skin

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 974P** [BFGoodrich]

*Chem. Descrip.:* Carbomer 934P (polymerized in ethyl acetate)

CAS 9003-01-4

*Uses:* Emulsifier, thickener, stabilizer, suspending agent for pharmaceuticals, esp. oral and mucoadhesive applics., controlled-release tablets, oral suspensions, transdermals, topicals; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, BP, JSPI compliance

*Properties:* Wh. fluffy powd.; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 29,400-39,400 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); anionic

*Toxicology:* LD50 (dermal, rabbit) > 2.0 g/kg; nonirritating to eyes; nonsensitizing to human skin

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 980** [BFGoodrich]

*Chem. Descrip.:* Carbomer 940

CAS 9003-01-4

*Uses:* Solvent thickener for cosmetics, topical pharmaceuticals, sparkling clear water or hydroalcoholic topical gels, aq. or solv. systems; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; for use with or without neutralizing

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, DAB, JSPI compliance; SARA §312 chronic health hazard

*Properties:* Wh. fluffy powd., sl. acetic odor; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 13,000-30,000 cps (0.2%), 40,000-60,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; sl. irritating to skin; minimal eye irritant; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 981** [BFGoodrich]

*Chem. Descrip.:* Carbomer 941

CAS 9003-01-4

*Uses:* Emulsifier, thickener for low visc. sparkling clear pharmaceutical topical gels, emulsion stabilization of topical lotions; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; effective in mod. ionic systems

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, JSPI compliance; SARA §312 chronic health hazard

*Properties:* Wh. fluffy powd.; sl. acetic odor; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 4000-10,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; sl. irritating to skin; minimal eye irritant; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decom. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® 1342 [BFGoodrich]

*Chem. Descrip.:* Acrylates/C10-30 alkyl acrylate crosspolymer

*Uses:* Rheology agent, emulsifier, stabilizer, moisturizer, thickener, gellant for cosmetic emulsions, skin care prods., topical pharmaceuticals; emulsion stabilizer; light gellant for water or hydroalcoholic systems; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; for pourable prods. contg. suspended incompat. ingreds.

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, JSPI compliance; EPA hazardous waste; SARA §312 chronic health hazard, §313 reportable (benzene)

*Properties:* Wh. fluffy powd., sl. acetic odor; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 9500-26,500 cps (1%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; nonirritating to skin; mod. eye irritant in conc. form, nonirritating @ 1%; dust inh. may cause coughing, mucous prod., shortness of breath; may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decom. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® 1382 [BFGoodrich]

*Chem. Descrip.:* Acrylates/C10-30 alkyl acrylate crosspolymer

*Uses:* Rheology agent, thickener, emulsion stabilizer for cosmetics, topical pharmaceuticals; light gellant for water or hydroalcoholic systems; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; formulation of pourable prods. contg. suspended incompat. ingreds.

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; JSPI compliance

*Properties:* Wh. fluffy powd.; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 25,000-45,000 (1%); pH 2.5-3.0 (1% aq. disp.); anionic

*Toxicology:* Sl. skin irritant; borderline eye irritant

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® 2984 [BFGoodrich]

*Chem. Descrip.:* Carbomer

CAS 9003-01-4

*Uses:* Rheology agent, emulsifier, thickener, stabilizer, suspending agent used in cosmetics, topical pharmaceutical stable emulsions and suspensions, aq. and solv.-based gels; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; BP, JSPI compliance; SARA §312 chronic health hazard

*Properties:* Wh. fluffy powd.; sl. acetic odor; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 45,000-80,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause pain, eye irritation; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decom. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® 5984 [BFGoodrich]

*Chem. Descrip.:* Carbomer

CAS 9003-01-4

*Uses:* Rheology agent, emulsifier, thickener, stabilizer, suspending agent used in cosmetics, topical pharmaceutical stable emulsions and suspensions, aq. and solv. based gels; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; BP, JSPI compliance; SARA §312 chronic health hazard

*Properties:* Wh. fluffy powd.; sl. acetic odor; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 25,000-45,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause pain, eye irritation; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decom. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® ETD 2001 [BFGoodrich]

*Chem. Descrip.:* Crosslinked acrylic acid polymer with processing aid

*Uses:* Rheology agent, thickener, stabilizer, suspending agent for topical pharmaceutical aq. or solv. systems, sparking clear water or hydroalcoholic topical gels; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; easier to disperse and mix

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; SARA §312 chronic health hazard

*Properties:* Wh. fluffy powd.; sl. acetic odor; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 45,000-65,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture

*Toxicology:* Sl. skin irritant in conc. form, non to very sl. irritant @ 1%; sl. to mod. eye irritant (undiluted); dust inh. may cause coughing, mucous prod., shortness of breath; TSCA listed

*Environmental:* LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

*Precaution:* Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

*Hazardous Decom. Prods.:* CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® ETD 2020 [BFGoodrich]

*Chem. Descrip.:* Crosslinked acrylic acid polymer with processing aid

*Uses:* Thickener, emulsion stabilizer for cosmetics, topical pharmaceuticals; light gellant for water or hydroalcoholic systems; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; formulation of pourable prods. contg. suspended incompat. ingreds.; easier to disperse and mix

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; SARA §312 chronic

health hazard

**Properties:** Wh. fluffy powd.; sl. acetic odor; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 32,000-77,000 cps (1%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture

**Toxicology:** Sl. skin irritant in conc. form, non to very sl. irritant @ 1%; sl. to mod. eye irritant (undiluted); dust inh. may cause coughing, mucous prod., shortness of breath; TSCA listed

**Environmental:** LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

**Precaution:** Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

**NFPA:** Health 2; Flammability 1; Reactivity 0

**Storage:** 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbopol® ETD 2050 [BFGoodrich]

**Chem. Descrip.:** Crosslinked acrylic acid polymer with processing aid

**Uses:** Emulsifier, thickener for low visc. sparkling clear pharmaceutical topical gels, emulsion stabilization of topical lotions; food pkg. adhesives, coatings, paper/paperboard, polymers; defoamer in food-contact coatings; effective in mod. ionic systems; easier to disperse and mix

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; SARA §312 chronic health hazard

**Properties:** Wh. fluffy powd.; sl. acetic odor; sp.gr. 1.41; bulk dens. 208 kg/m<sup>3</sup>; visc. 8000-16,500 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture

**Toxicology:** Sl. skin irritant in conc. form, non to very sl. irritant @ 1%; sl. to mod. eye irritant (undiluted); dust inh. may cause coughing, mucous prod., shortness of breath; TSCA listed

**Environmental:** Nonbiodeg.; removed with the biomass in typ. wastewater treatment

**Precaution:** Take precautions against dust explosion; heat may be generated in contact with strong basic materials such as ammonia, sodium hydroxide, potassium hydroxide, or strongly basic amines

**Hazardous Decomp. Prods.:** CO, CO<sub>2</sub>, hydrocarbons, irritating vapors

**NFPA:** Health 2; Flammability 1; Reactivity 0

**Storage:** 2 yr min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

#### Carbaset® 514A [BFGoodrich]

**Chem. Descrip.:** Acrylic sol'n. polymer in IPA

**Uses:** Thermoplastic film-forming resin used in protective metal coatings, paints, ceramics, adhesives, textiles, paper, leather, cosmetics, floor polishes, chemical specialties; exc. dispersant, leveling, and binding char.; rec. for solv. and solv./water formulations

**Properties:** Colorless to sl. yls. clear sol'n.; m.w. 30,000; water-sol.; dens. 8.6 lb/gal; visc. 25,000 MPa·s; acid no. 65; tens. str. 11.0 MPa; tens. elong. 50%; hardness (Sward) 24; 70% NV

#### Carbaset® 514H [BFGoodrich]

**Chem. Descrip.:** Acrylic colloidal disp. in ammonia water

**Uses:** Thermoplastic film-forming resin used in protective metal coatings, latex paints, inks, ceramics, adhesives, textiles, paper, leather, cosmetics, floor polishes, chemical specialties; exc. dispersant, leveling, and binding chars.; provides exc. pigment wetting and gloss to coating systems; rec. for clear lacquers, fastener coatings, temporary alkali strippable coating systems

**Properties:** Milky wh. disp.; m.w. 30,000; dens. 8.8 lb/gal; visc. 3500 MPa·s; acid no. 65; pH 7; film props.: clear, glossy; tens. str. 11.0 MPa; tens. elong. 50%; hardness (Sward) 24; 40% act. in ammonia water

#### Carbaset® 515 [BFGoodrich]

**Chem. Descrip.:** Acrylates copolymer

CAS 25133-97-5

**Uses:** Thermoplastic film-forming resin used in protective metal coatings, latex paints, ceramics, adhesives, textiles, cosmetics, paper, leather, floor polishes, chemical specialties; exc. dispersant, leveling, and binding chars.; plasticizer for solv. or waterborne systems; provides exc. pigment wetting

**Properties:** Colorless clear visc. liq.; m.w. 7000; dens. 9.2 lb/gal; visc. 2 x 10<sup>6</sup> MPa·s; acid no. 60-65; 100% NV

#### Carbaset® 525 [BFGoodrich]

**Chem. Descrip.:** Acrylic resin

**Uses:** Thermoplastic film-forming resin used in protective metal coatings,

paints, ceramics, printing inks, adhesives, textiles, paper, leather, cosmetics, floor polishes, chemical specialties; binder for photoresists; primer for films; exc. dispersant, leveling, and binding chars.; rec. for solv. lacquers and to modify solv. systems; produces hard, high gloss, tough films

**Properties:** Wh. gran. solid; sol. in alkaline water or solvs.; m.w. 210,000; sp.gr. 1.2; dens. 10 lb/gal; visc. 9000 cps (15% in ammonia water); acid no. 76-85; tens. str. 26.2 MPa; tens. elong. 165%; hardness (Sward) 24; 99% NV

#### Carbaset® 531 [BFGoodrich]

**Chem. Descrip.:** Acrylic colloidal disp. in ammonia water

**Uses:** Thermoset film-forming resin used in protective metal coatings, paints, printing inks, ceramics, adhesives, textile print pastes, paper, leather, cosmetics, floor polishes, chemical specialties; exc. dispersant, leveling, and binding chars.; binder for nonwoven fabrics; rec. for bake finishes; produces extremely hard, tough, stain resist. finishes with exc. water, humidity, and corrosion resist.

**Properties:** Wh. translucent sol'n.; m.w. 106 (cured); sp.gr. 1.046; dens. 8.6 lb/gal; visc. 20,000 cps; acid no. 32; pH 8.0; hardness (Sward) 24; 25% act.

#### Carbaset® GA1086 [BFGoodrich]

**Chem. Descrip.:** Acrylic copolymer emulsion

CAS 25133-97-5

**Uses:** High gloss vehicle for overprint varnishes on paper, paperboard, and foil, for use in industrial and plastic coatings; exc. clarity and adhesion to treated polyolefins

**Properties:** Dens. 8.6 lb/gal; visc. 200 cps; pH 7.8; hardness (Konig) 35; 48% NV by wt.

#### Carbaset® GA1604 [BFGoodrich]

**Chem. Descrip.:** Acrylic copolymer emulsion

CAS 25133-97-5

**Uses:** Vehicle for clear coatings on paper, paperboard, and other board coating applics.; inks and overprint varnishes; heat resist.; good block resist. and heat resist. to 450 F

**Properties:** Dens. 8.9 lb/gal; visc. 600 cps; pH 8.7; hardness (Konig) 38; 42% NV by wt.

#### Carbowax® PEG 300 [Union Carbide]

**Chem. Descrip.:** PEG-6

CAS 25322-68-3; EINECS/ELINCS 220-045-1

**Uses:** Coupling agent, solvent, vehicle, humectant, lubricant, binder, base used in adhesives, agric., ceramics, cosmetics/toiletries, electroplating/electropolishing, food processing, household prods., lubricants, metal fabrication, paints, paper, pharmaceuticals, printing, rubber and elastomers, textiles, wood processing; chem. intermediate; food pkg. adhesives and food-contact articles

**Regulatory:** FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated  
**Properties:** Water-wh. visc. liq.; sol. in water, alcohols, glycerin, glycols; m.w. 285-315; sp.gr. 1.1250; dens. 9.38 lb/gal; visc. 5.8 cSt (99 C); f.p. -15 to -8 C; hyd. no. 356-394; flash pt. (PMCC) > 180 C; ref. index 1.463; pH 4.5-7.5 (5% aq.); surf. tens. 44.5 dynes/cm; nonionic

#### Carbowax® PEG 540 Blend [Union Carbide]

**Chem. Descrip.:** PEG-6 and PEG-32 (41:59)

**Uses:** Base for ointments and suppositories; also for adhesives, agric., ceramics, chem. intermediates, electroplating, household prods., lubricants, metal fabrication, paints, paper, printing, rubber, textiles, wood processing; food pkg. adhesives and food-contact articles

**Regulatory:** FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated  
**Properties:** Soft solid; sol. in methylene chloride, 73% in water, 50% in trichloroethylene, 48% in methanol; m.w. 500-600; sp.gr. 1.0930 (60 C); dens. 9.17 lb/gal (55 C); visc. 15.1 cSt (210 F); f.p. 38-41; flash pt. (CCC) > 350 F; pH 4.5-7.5 (5% aq.)

#### Cardipol® LP 0-25 [Baker Petrolite]

**Chem. Descrip.:** Oxidized polyethylene

CAS 68441-17-8; EINECS/ELINCS 200-815-3

**Uses:** For formulating hot-melt adhesives; food pkg. adhesives and textiles; defoamer in food-contact paper coatings, food-contact paper/paperboard

**Regulatory:** FDA 21CFR §175.105, 176.200, 176.210, 177.2800

**Properties:** Color 1.5 (D1500) wax; m.p. 104.4 C; acid no. 32; sapon. no. 72

#### Carnauba Wax SP 8 [Strahl & Pitsch]

**Chem. Descrip.:** Carnauba (Copernicia cerifera) wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

**Uses:** Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks,

paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Toxicology:* TSCA listed

**Carnauba Wax SP 59-2** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax substitute

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Lt. brn. flakes, lumps, or powd.; m.p. 175-187 F; acid no. 8-15; sapon. no. 80-95

**Carnauba Wax SP 63** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Yel. flakes, lumps, or powd.; m.p. 83 C min.; acid no. 2-6; sapon. no. 78-88; flash pt. 310 C min.; 2% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Carnauba Wax SP 63 NF** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Yel. flakes, lumps, or powd.; m.p. 80-86 C min.; acid no. 2-7; sapon. no. 78-95; 0.004% max. heavy metals

*Toxicology:* TSCA listed

**Carnauba Wax SP 64 (Extra Light)** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax substitute

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Yel. flakes, lumps, or powd.; m.p. 75-80 C; acid no. 8-12; sapon. no. 46-54

*Toxicology:* TSCA listed

**Carnauba Wax SP 135** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax substitute

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Tan flakes, lumps, or powd.; m.p. 169-175 F; acid no. 5 max.; sapon. no. 15-21

**Carnauba Wax SP 142** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Brn. flakes, lumps, or powd.; m.p. 82.5 C min.; acid no. 4-10; sapon. no. 78-88; flash pt. 299 C min.; 2% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Carnauba Wax SP 200** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Tan flakes, lumps, or powd.; m.p. 82.5 C min.; acid no. 4-10; sapon. no. 78-88; flash pt. 299 C min.; 2% max. paraffinic hydrocarbons

*Toxicology:* TSCA listed

**Carnauba Wax Coarse** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Powd.; 80% min. thru 60 mesh, 60% min. thru 120 mesh, 20% min. thru 200 mesh, 10% min. thru 325 mesh

*Toxicology:* TSCA listed

**Carnauba Wax Fine** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Powd.; 98% min. thru 60 mesh, 75% min. thru 120 mesh, 50% min. thru 200 mesh, 20% min. thru 325 mesh

*Toxicology:* TSCA listed

**Carnauba Wax Hard** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Yel. confectioner's powd.; 75% min. thru 120 mesh; m.p. 81 C min.; acid no. 4-10; sapon. no. 78-98

*Toxicology:* TSCA listed

**Carnauba Wax Soft** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Yel. confectioner's powd.; 75% min. thru 120 mesh; m.p. 81 C min.; acid no. 6-12; sapon. no. 80-100

*Toxicology:* TSCA listed

**Carnauba Wax Superfine** [Strahl & Pitsch]

*Chem. Descrip.:* Carnauba wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Wax for cosmetics, pharmaceuticals, ointments, tablet coatings, candles, confections, investment casting, auto/floor/shoe polishes, carbon paper, inks, paper coatings, fruit coatings

*Regulatory:* FDA 21CFR §182.1978; CTFA listed

*Properties:* Powd.; 99% min. thru 60 mesh, 98% min. thru 120 mesh, 65% min. thru 200 mesh, 40% min. thru 325 mesh

*Toxicology:* TSCA listed

**Carsonon® TD-10** [Lonza]

*Chem. Descrip.:* Trideceth-10

CAS 24938-91-8

*Uses:* Emulsifier, detergent, wetting agent, foaming agent, solubilizer used for household/industrial cleaners, textile processing, paper industry

*Properties:* Gardner 1 liq.; water sol.; dens. 8.5 lb/gal; HLB 13.7; cloud pt. 162-166 F (1% aq.); flash pt. > 300 F (COC); pour pt. 67 F; pH 5.0-7.0 (3% aq.); 100% act.; nonionic

**Carsoquat® SDQ-25** [Lonza]

*Chem. Descrip.:* Stearalkonium chloride (21%), stearyl alcohol (4%), IPA (5%), water (70%)

*Uses:* Surfactant, conditioner, softener for cosmetics (cream hair rinses, skin creams and lotions, aerosol hair sprays, hair color rinses), textiles, paper; antistat for natural and syn. fibers; dispersant for pigments and dyestuffs

*Properties:* Wh. thick creamy paste; mild, sweet odor; sol. in lower alcohols and glycols; readily disp. in water; dens. 7.9 lb/gal; pour pt. 110-120 F; clear pt. 140 F; pH 3.0-4.0 (1% disp.); 21% act.; cationic

**Cartabond® TSI Liq.** [Clariant UK]

*Chem. Descrip.:* Reactive polyhydroxylated aq. resin

*Uses:* Surf. str. improver for printed paper and board, esp. offset printing papers, carbonless papers, pkg. paper/board, food pkg., coated board, silicon release papers (self adhesives, labels); crosslinking agent for nat. and syn. binders (starch, PVAL, casein, CMC, acrylic, S/B) for paper

mfg.; insolubilizer of binders in coatings, size press, and film press for upgrading surf. props. of paper and board; good freeze-thaw stability; compat. with anionics, cationics, nonionics; formaldehyde-free

**Regulatory:** FDA 21CFR §176.180

**Properties:** Clear liq.; sol. in water in all proportions; dens. 1.24 kg/l; visc. 70 mPa·s (20 C); flash pt. nonflamm.; pH 4.0; 42% solids

**Storage:** 1 yr storage stability if stored in closed containers at 5-35 C

**Cartacol® ASN Liq.** [Clariant UK]

**Chem. Descrip.:** Styrene maleic anhydride copolymer  
CAS 9011-13-6

**Uses:** Surf. treatment for paper for use at size press or film press to improve sizing and printability of paper and board, esp. office stationery, coating base, offset printing paper, food-contact paper (dry food); improves holdout of aq. coatings and inks; low foaming; compat. with anionics, nonionics

**Regulatory:** FDA 21CFR §176.180; BgVV compliant

**Properties:** Turbid sol'n.; sl. aromatic odor; misc. with water in all proportions; visc. 350 mPa·s; pH 8.5; 28% act.; anionic

**Storage:** 1 yr storage stability; freezes below 0 C, but is fully effective after thawing

**Cartacol® NP Liq.** [Clariant UK]

**Chem. Descrip.:** Styrene maleic anhydride copolymer  
CAS 9011-13-6

**Uses:** Surf. treatment for paper for use at size press or film press to improve sizing and printability of paper and board, esp. office stationery, coating base, offset printing paper, specialty papers, food-contact paper (dry food); improves holdout of aq. coatings and inks; compat. with anionics, nonionics

**Regulatory:** FDA 21CFR §176.180; BgVV compliant

**Properties:** Colorless, sl. turbid sol'n.; sl. ammonia odor; misc. with water in all proportions; visc. 100 mPa·s; pH 9.0; 14% act.; anionic

**Storage:** 6 mos storage stability; freezes below 0 C, but is fully effective after thawing

**Cartacol® SI Liq.** [Clariant UK]

**Chem. Descrip.:** Styrene/acrylic ester copolymer  
CAS 9010-92-8

**Uses:** Surf. treatment for neutral or alkaline sized paper for use at size press or film press to improve sizing and printability of paper and board, esp. office stationery, coating base, ink jet printing paper, specialty food wrap (dry food contact); sizing agent for recycled fiber; improves holdout of aq. coatings and inks; compat. with anionics, nonionics

**Regulatory:** FDA 21CFR §176.180; BgVV compliant

**Properties:** Off-wh. disp.; sl. aromatic odor; misc. with water in all proportions; visc. < 100 mPa·s (20 C); pH 7 (10%); 25% act.; anionic

**Storage:** 6 mos storage stability at 5-25 C; not freeze-thaw stable

**Cartacol® XP Liq.** [Clariant UK]

**Chem. Descrip.:** Styrene/acrylic ester copolymer  
CAS 9010-92-8

**Uses:** Surf. treatment for use at size press or film press to improve sizing and printability of paper and board, esp. office stationery, coating base, ink jet printing paper, specialty papers not sized at wet-end; sizing agent for recycled fiber; improves holdout of aq. coatings and inks; compat. with anionics, nonionics; good mech. stability; low foaming tendency

**Properties:** Off-wh. disp.; sl. aromatic odor; misc. with water in all proportions; visc. 100 mPa·s; pH 9 (10%); 23% act.; anionic

**Storage:** 6 mos storage stability at 25 C; do not freeze

**Cartafen ZFN Liq.** [Clariant UK]

**Chem. Descrip.:** Aromatic resin

**Uses:** Retention aid for paper and board mfg. where pulps are highly contaminated with sol. and colloidal impurities; incl. newsprint, paper/board from recycled waste; for use with Cartaretin E powd. as part of Cartafen Technology, a dual component system; substantive to mech. pulp; interacts strongly with Cartaretin E powd.

**Use Level:** 0.03-0.08%

**Properties:** Brn. sl. visc. liq.; dens. 1.1 kg/l; visc. 56 mPa·s (20 C); pH 9.0; weakly anionic

**Storage:** 12 mos storage stability at 25 C; solidifies below 0 C but regains full effectiveness after thawing

**Cartafix® CB Liq.** [Clariant UK]

**Chem. Descrip.:** Crosslinked polyalkylamine

**Uses:** Pitch and anionic trash control agent for paper, coated paper/board, food-contact paper; reduced COD/BOD in backwater and waste streams; improved runnability; improved dyestuff yield and fixation; reduced usage/ increased efficiency of other additives

**Regulatory:** FDA 21CFR §176.170, GbVV XXXVI

**Properties:** Pale yel. visc. liq.; dens. 1.147 kg/l; visc. 435 mPa·s (20 C), 910 mPa·s (0 C); pH 3.8; 44% dry solids; cationic

**Storage:** 12 mos min. storage stability @ 20 C; solidifies below -12 C but regains full effectiveness after thawing

**Cartafix® DPR Liq.** [Clariant UK]

**Chem. Descrip.:** Polyamine

**Uses:** Anionic trash control agent for paper; lower backwater COD levels; increased efficiency of other additives; reduced sticking problems; formaldehyde-free; effective @ pH 4-8; stable to salts, acids, water hardness; nonfoaming

**Properties:** Colorless to pale yel. clear liq.; dilutable in water in all proportions; dens. 1.06 kg/l; visc. 100 mPa·s (20 C); pH 4.5; cationic

**Storage:** 12 mos min. storage stability @ 20 C; solidifies below -12 C but regains full effectiveness after thawing

**Cartafix® F Liq.** [Clariant UK]

**Chem. Descrip.:** Quat. polyhydroxylalkylene polyamine

**Uses:** Fixing agent for anionic direct dyes and aux. for dyeing with cationic direct dyes (paper industry); economical; formaldehyde-free; maintains its high charge under both acid and alkaline conditions; good stability to salts, acids, hard water; precipitates in alkali at high concs.

**Use Level:** 0.4-3% (fixative for anionic direct dyes, to improve bleedfastness), 0.2-2% (to control/prevent colored two-sidedness), 0.05-0.5% (dyeing with cationic direct dyes)

**Properties:** Colorless clear low-visc. liq.; dilutable with water in all proportions; dens. 1.06 kg/l; pH 7-8; strongly cationic

**Storage:** Good storage stability

**Cartaflex® K Liq.** [Clariant UK]

**Chem. Descrip.:** Fatty acid condensation prod.

**Uses:** Detackifier, adhesion control aux. on the cylinder in prod. of creped tissue and paper grades and very lightweight paper grades such as one-way carbon paper, flower wrapping tissue, etc.; softener for tissue and handtowel crepe; reduces dusting, electrostatic charging; stable to acids, alkali (to pH 9), hard water; insensitive to salts; compat. with cationics, nonionics; low foaming

**Properties:** Wh. pumpable liq.; dilutable with water in all proportions; visc. ≈ 2000 mPa·s (20 C); pH ≈ 4; 25% act.; cationic

**Storage:** Good storage stability; solidifies below 0 C but still effective

**Cartaflex® RW Liq.** [Clariant UK]

**Chem. Descrip.:** Fatty acid condensation prod.

**Uses:** Softener, creping additive for tissue and handtowel crepe; detackifier on the cylinder in paper mfg.; substantive; stable to acids, alkali, salt, hard water; compat. with cationics, nonionics; low foaming

**Use Level:** 0.1-2.0% (dry stock basis), 0.1-0.4% (antisticking on drying cylinder)

**Properties:** Ylsh. clear liq.; disp. with cold water in all proportions; dens. 1 kg/l; pH 5.5; 25% act.; cationic

**Storage:** Good storage stability at -10 to 40 C; solidifies below 0 C but still effective

**Cartaretin® 5CP Powd.** [Clariant UK]

**Chem. Descrip.:** Polyacrylamide

CAS 9003-05-8

**Uses:** Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

**Properties:** Wh. free-flowing powd.; dens. 0.68 kg/l; visc. 100 mPa·s (0.5% sol'n., 20 C); f.p. -15 C; pH 3.8 (0.5%); cationic

**Storage:** 8 mos storage stability @ 25 C

**Cartaretin® 10AE Liq.** [Clariant UK]

**Chem. Descrip.:** Polyacrylamide

CAS 9003-05-8

**Uses:** Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

**Properties:** Off-wh. opaque w/o emulsion; dens. 1.02 kg/l; visc. 440 mPa·s (20 C); f.p. -18 C; pH 4.9 (0.5%); anionic

**Storage:** 6 mos storage stability @ 20 C; prevent water from getting into opened containers

**Cartaretin® 10AP Powd.** [Clariant UK]

**Chem. Descrip.:** Polyacrylamide

CAS 9003-05-8

**Uses:** Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

**Properties:** Wh. free-flowing powd.; dens. 0.74 kg/l; visc. 830 mPa·s (0.5%

**Cartaretin® 10CE Liq.**

sol'n., 20 C); pH 6.7 (0.5%); anionic  
*Storage:* 10 mos storage stability @ 25 C

**Cartaretin® 10CE Liq.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Off-wh. opaque w/o emulsion; dens. 1.04 kg/l; visc. 1120 mPa·s (20 C); f.p. -15 C; pH 4.2 (0.5%); cationic

*Storage:* 6 mos storage stability @ 25 C; prevent water from getting into opened containers

**Cartaretin® 10CP Powd.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Wh. free-flowing powd.; dens. 0.68 kg/l; visc. 410 mPa·s (0.5% sol'n., 20 C); f.p. -15 C; pH 3.7 (0.5%); cationic

*Storage:* 8 mos storage stability @ 25 C

**Cartaretin® 20AE Liq.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Off-wh. opaque w/o emulsion; dens. 1.05 kg/l; visc. 640 mPa·s (20 C); f.p. -18 C; pH 5.2 (0.5%); anionic

*Storage:* 6 mos storage stability @ 20 C; prevent water from getting into opened containers

**Cartaretin® 20AP Powd.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Wh. free-flowing powd.; dens. 0.74 kg/l; visc. 1260 mPa·s (0.5% sol'n., 20 C); pH 7.0 (0.5%); anionic

*Storage:* 10 mos storage stability @ 25 C

**Cartaretin® 20CE Liq.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Off-wh. opaque w/o emulsion; dens. 1.02 kg/l; visc. 790 mPa·s (20 C); f.p. -15 C; pH 3.9 (0.5%); cationic

*Storage:* 6 mos storage stability @ 25 C; prevent water from getting into opened containers

**Cartaretin® 30AE Liq.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Off-wh. opaque w/o emulsion; dens. 1.08 kg/l; visc. 700 mPa·s (20 C); f.p. -18 C; pH 6.3 (0.5%); anionic

*Storage:* 6 mos storage stability @ 20 C; prevent water from getting into opened containers

**Cartaretin® 30AP Powd.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Wh. free-flowing powd.; dens. 0.74 kg/l; visc. 1390 mPa·s (0.5% sol'n., 20 C); pH 7.5 (0.5%); anionic

*Storage:* 10 mos storage stability @ 25 C

**Cartaretin® 30CP Powd.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide  
CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Wh. free-flowing powd.; dens. 0.68 kg/l; visc. 420 mPa·s (0.5% sol'n., 20 C); f.p. -15 C; pH 3.7 (0.5%); cationic

*Storage:* 8 mos storage stability @ 25 C

**Cartaretin® 40CE Liq.** [Clariant UK]

*Chem. Descrip.:* Polyacrylamide

CAS 9003-05-8

*Uses:* Retention aid, drainage aid for paper and board mfg. and fiber recovery operations

*Properties:* Off-wh. opaque w/o emulsion; dens. 1.02 kg/l; visc. 780 mPa·s (20 C); f.p. -15 C; pH 3.7 (0.5%); cationic

*Storage:* 6 mos storage stability @ 25 C; prevent water from getting into opened containers

**Cartaretin® DS Liq.** [Clariant UK]

*Chem. Descrip.:* Polyamine

*Uses:* Retention aid, drainage aid for paper and board mfg.; for use in combination with a high m.w. polyacrylamide; good stability to acids, salts, water hardness; nonfoaming

*Properties:* Colorless or straw-colored, clear to sl. hazy liq.; dilutable with water in all proportions; dens. 1.05-1.07 kg/l; visc. < 100 mPa·s (20 C); pH 4-5; cationic

*Storage:* 12 mos storage stability @ 25 C; solidifies below 0 C but regains full effectiveness after thawing

**Cartaretin® Dual System** [Clariant UK]

*Chem. Descrip.:* Two-component system consisting of a low m.w. cationic polymer and a high m.w. cationic polyacrylamide

*Uses:* Retention aid, drainage aid for paper and board mfg.

*Properties:* Cationic

**Cartaretin® E Powd.** [Clariant UK]

*Chem. Descrip.:* High m.w. polyethylene oxide  
CAS 25322-68-3; EINECS/ELINCS 203-473-3

*Uses:* Retention aid for paper and board mfg. where pulps are highly contaminated with sol. and colloidal impurities, incl. newsprint, paper/board from recycled waste; for use with Cartafen ZFN Liq. as part of Cartafen Technology, a dual component system

*Use Level:* 0.03-0.08%

*Properties:* Wh. free-flowing powd.; bulk dens. 0.5 g/l; visc. 350 mPa·s (0.5% sol'n., 20 C); pH 7.2 (0.5%); nonionic

*Storage:* 12 mos storage stability at 25 C

**Cartaretin® F Liq.** [Clariant UK]

*Chem. Descrip.:* Polyamidamine aq. sol'n.

*Uses:* Retention aid, drainage aid for paper and board mfg., fiber recovery, backwater clarification, and food-contact papers (Germany); used alone or in combination with a high m.w. polyacrylamide

*Regulatory:* BgVV approved for food-contact papers

*Properties:* Ylsh. clear liq.; dilutable with water in all proportions; dens. 1.06 kg/l; visc. 450-1000 mPa·s (20 C); pH 6.5-7.5; cationic

*Storage:* 12 mos storage stability @ 25 C; solidifies below -2 C but regains full effectiveness after thawing

**Cartaretin® K Liq.** [Clariant UK]

*Chem. Descrip.:* Polyether amine aq. sol'n.

*Uses:* Retention aid, drainage aid for paper and board mfg., fiber recovery, backwater clarification, and food-contact papers (Germany); used alone or in combination with a high m.w. polyacrylamide

*Regulatory:* BgVV approved for food-contact papers

*Properties:* Yel.-brn. clear liq.; dilutable with water in all proportions; dens. ≈ 1.1 kg/l; visc. 100-450 mPa·s (20 C); pH 6.5-7.5; cationic

*Storage:* 12 mos storage stability @ 25 C; solidifies below -8 C but regains full effectiveness after thawing

**Cartaretin® U Liq.** [Clariant UK]

*Chem. Descrip.:* Polyfunctional amine

*Uses:* Drainage aid for paper and board mfg.

*Properties:* Colorless clear liq.; dilutable with water in all proportions; dens. 1.1 kg/l; visc. 1700 mPa·s (20 C); pH 3; cationic

*Storage:* 10 mos storage stability @ 25 C

**Cartarex® 2L Liq.** [Clariant UK]

*Chem. Descrip.:* Condensation prod. of a polyamine with a dicarboxylic acid  
*Uses:* Fluorescence quenching agent for optical brighteners in the water circulation and stock prep. equipment for paper mfg.; fluorescence quenching agent for waste paper, recycled fiber, and deinked pulps; good stability to hard water, acids; compat. with nonionics, cationics

*Properties:* Yel.-brn. clear liq.; dilutable with water in any proportion; dens. 1.15 kg/l; visc. 50-100 mPa·s (20 C), 100-200 mPa·s (0 C); solid. pt. -11 C; pH 4-6; 27% solids; cationic

*Storage:* 6 mos min. storage stability

**Cartarex® NT Liq.** [Clariant UK]

*Chem. Descrip.:* Polyimidazoline salt

*Uses:* Fluorescence quenching agent for optical brighteners in the water

- circulation and stock prep. equipment for paper mfg.; fluorescence quenching agent for waste paper, recycled fiber, and deinked pulps; good stability to hard water, acids; compat. with nonionics, cationics
- Properties:* Orange-brn. clear liq.; dilutable with water in any proportion; dens. 1.1 kg/l; visc. 56 mPa·s (20 C), 92 mPa·s (0 C); solid. pt. -6 C; pH 5.5; 26% solids; cationic
- Storage:* 6 mos min. storage stability
- Cartasol® Blue 3RF Liq.** [Clariant UK]  
*Uses:* Dye for wood-free paper and board, esp. for tinting high wh. grades; substantive; urea-free; high lightfastness; largely colorless backwater; good bleedfastness props.; true sol'n. with low visc.; applicable at pH 4-9
- Properties:* Reddish-blue; anionic
- Cartasol® Blue 3RFN Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content, and for tinting high wh. grades; substantive; dianisidine-free; low copper and urea content; largely colorless backwater; good bleedfastness props.; mod. lightfastness rating; true sol'n. with low visc.; applicable at pH 4-9
- Properties:* Reddish-blue; anionic
- Cartasol® Blue K-5R Liq.** [Clariant UK]  
*Chem. Descrip.:* Direct dye  
*Uses:* Dye for paper and board made with predominantly wood-free pulp; highly substantive; dianisidine-free; copper-free; urea-free; colorless backwater; good bleedfastness props.; good bleachability; true sol'n. with low visc.; applicable at pH 4-10
- Properties:* Reddish-blue shade; cationic
- Cartasol® Brilliant Blue 3GF Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content; substantive; dianisidine-free; very good waterfastness; largely colorless backwater; good bleedfastness props.; lightfastness rating 2-3; true sol'n. with low visc.; applicable at pH 4-8
- Properties:* Bright sl. greenish-blue; anionic
- Cartasol® Brilliant Orange 2RFN Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content, esp. fine paper and tissue; substantive; urea-free; good bleedfastness props.; true sol'n. with low visc.; applicable at pH 4-9
- Properties:* Bright reddish-orange; anionic
- Cartasol® Brilliant Violet 5BFN Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content, esp. high wh. papers and for prod. of deep navy, plum, and violet shades; highly substantive; contains no urea, dianisidine, copper, or glycols; largely colorless backwater; good bleedfastness; very good fixability; good oxidative/reductive bleachability; true sol'n. with low visc.; applic. at pH 4-9
- Properties:* Bright bluish-violet; anionic
- Cartasol K** [Clariant; Clariant AG/PPP]  
*Uses:* Dyes for coloration of cationic aq. coating systems, paper and board with little or no wood content in the stock and at the size press; highly substantive
- Cartasol® Red 2GFN Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content, esp. fine paper and tissue; highly substantive; urea-free; good bleedfastness props.; true sol'n. with low visc.; applicable at pH 4-9
- Properties:* Bright red; anionic
- Cartasol® Red 3BFN Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content; highly substantive; urea-free; largely colorless backwaters; good lightfastness; true sol'n. with low visc.; applicable at pH 3-10
- Properties:* Bluish-red shade; pH ≈ 7.6; anionic
- Cartasol® Turquoise K-ZL Liq.** [Clariant UK]  
*Uses:* Dye for predominantly wood-free paper and board, nonwovens, and inks for tissue printing; highly substantive; colorless backwater; exc. bleedfastness props.; good lightfastness; true sol'n. with low visc.; applicable at pH 3-10
- Properties:* Bright, sl. reddish turquoise; pH ≈ 3.4; cationic
- Cartasol® Turquoise RF Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content; substantive; largely colorless backwater; good bleedfastness props.; good lightfastness (rating 3); true sol'n. with low visc.; applicable at pH 4-8
- Properties:* Bright sl. reddish-turquoise; pH ≈ 11.5; anionic
- Cartasol® Yellow 3GF Liq.** [Clariant UK]  
*Uses:* Dye for paper and board with little or no wood content; substantive; negatively charged chromophore; generally good bleedfastness props.; good lightfastness rating; true sol'n. with low visc.; applicable at pH 4-9
- Properties:* Bright greenish-yel. shade; anionic
- Cartasol® Yellow 3GSFN Liq.** [Clariant UK]  
*Chem. Descrip.:* Direct dye  
*Uses:* Direct dye for dyeing wood-free paper and board; highly substantive; good shade stability; little or no fixative required; better bleedfastness ratings
- Properties:* Greenish-yel.
- Cartax® DP Liq.** [Clariant UK]  
*Chem. Descrip.:* Disp. of water-insol. oxazinone  
*Uses:* Fluorescent pigment/marketing agent for stamp and security papers for applic. in the stock, size press, or coating slips; luminesces grnsh.-yel. in UV light; exhibits no phosphorescence; good frost stability
- Properties:* Wh. disp.; readily dilutable with cold water; act. substance is insol. in water and alcohols, only sl. sol. in aromatic hydrocarbons, esters, ketones; dens. 1.02 kg/l; visc. 22.7 mPa·s (20 C); 10.3 mPa·s (0 C); pH 7; ≈ 12% pigment; anionic
- Storage:* Stable > 1 yr below 40 C; solidifies below -5 C but is fully effective on thawing; do not store < -5 C for prolonged period
- Caster Wax A** [NOF]  
*Chem. Descrip.:* Hydrogenated castor oil  
 CAS 8001-78-3; EINECS/ELINCS 232-292-2
- Uses:* Grease; surfactant; cosmetics; coating agent for paper and textiles; polishing agent for leather, etc.
- Properties:* Bead; m.p. 84 C min.; acid no. 2 max.; iodine no. 5 max.; sapon. no. 176-187; hyd. no. 150-160
- Cat-Floc® 8151** [Nalco]  
*Chem. Descrip.:* Polyelectrolyte  
*Uses:* Coagulant for clarification of drinking water; applics. incl. industrial and municipal raw water/wastewater clarifiers, wet scrubber thickeners, min. processing thickeners, lime/soda softeners; food-contact paper/paperboard; highly effective for coagulating fine colloidal turbidity and color; chlorine resist., effective over broad pH range
- Use Level:* 1% dilution  
*Regulatory:* EPA approved for drinking water; FDA approved for paper mfg. for indirect food contact
- Properties:* Water-wh. to pale yel. sl. visc. clear liq.; completely sol. in water; dens. 10.4 lb/gal; visc. 100-200 cps; f.p. 0 F; flash pt. noncombustible; pH < 1.0; cationic
- Toxicology:* May cause skin and eye irritation  
*Precaution:* Corrosive to iron and copper, incl. their alloys; incompat. with other inorganics
- Storage:* Store in heated buildings or tanks to prevent freezing; store @ > 40 F to prevent crystallization
- Cat-Floc® 8959** [Nalco]  
*Chem. Descrip.:* Polyelectrolyte  
*Uses:* Primary coagulant for water clarification; applics. incl. industrial and municipal raw water and wastewater clarifiers, wet scrubber thickeners, min. processing thickeners, lime/soda softeners; food-contact paper/paperboard; chlorine resist.; produces fast-forming floc
- Use Level:* 1% dilution  
*Regulatory:* EPA approved for drinking water; FDA approved for paper mfg. for indirect food contact
- Properties:* Water-wh. to pale yel. sl. visc. clear liq.; completely sol. in water; dens. 10.5 lb/gal; visc. 100-200 cps; f.p. 0 F; flash pt. noncombustible; pH < 1.0; cationic
- Toxicology:* May cause skin and eye irritation  
*Precaution:* Corrosive to iron and copper, incl. their alloys; incompat. with other inorganics
- Storage:* Store in heated buildings or tanks to prevent freezing; store @ > 40 F to prevent crystallization
- Cat-Floc® DL** [Nalco]  
*Chem. Descrip.:* Polyelectrolyte  
*Uses:* Primary coagulant in water clarification, mfg. of food-contact paper/paperboard; replacement for, or in conjunction with, inorg. coagulants such as ferric salts or alum; chlorine resist. and effective over broad pH range
- Use Level:* Dilution to 1%  
*Regulatory:* FDA §176.170; EPA approved
- Properties:* Clear to pale yel. liq.; completely sol. in water; dens. 8.5 lb/gal; pH 6-8; cationic
- Precaution:* Mod. corrosive to iron and copper, incl. their alloys  
*Storage:* Store @ temps. above freezing, as prod. appearance may be affected; stratification may occur upon freezing, but will homogenize again with gentle warming and agitation

**Cat-Floc® L** [Nalco]*Chem. Descrip.:* Polyelectrolyte*Uses:* Primary coagulant in raw water and wastewater clarification, mfg. of food-contact paper/paperboard; can replace or be used with inorg. coagulants such as ferric salts or alum*Use Level:* Dilution to 1%*Regulatory:* FDA §176.170; EPA approved*Properties:* Clear to pale yel. liq.; completely sol. in water; dens. 8.6 lb/gal; f.p. 27 F; flash pt. noncombustible; pH 7.0 ± 1.0; cationic*Precaution:* Corrosive to iron and copper, incl. their alloys*Storage:* Protect from freezing; stratification may occur, but will homogenize again with gentle warming and agitation**Cat-Floc® LS** [Nalco]*Chem. Descrip.:* Polyelectrolyte*Uses:* Primary coagulant in raw water and wastewater clarification, mfg. of food-contact paper/paperboard; can replace or be used with inorg. coagulants such as ferric salts or alum*Use Level:* Dilution to 1%*Regulatory:* FDA §176.170; EPA approved*Properties:* Visc. yel. liq.; completely sol. in water; dens. 8.5 lb/gal; visc. 2000-4000 cps; f.p. 30 F; flash pt. noncombustible; pH 6.0-8.0; cationic*Precaution:* Moderately corrosive to iron and copper, incl. their alloys*Storage:* Protect from freezing; stratification may occur, but will homogenize again with gentle warming and agitation**Cat-Floc® TL** [Nalco]*Chem. Descrip.:* Polyelectrolyte*Uses:* Primary coagulant in raw water and wastewater clarification, mfg. of food-contact paper/paperboard; can replace or be used with inorg. coagulants such as ferric salts or alum*Use Level:* Dilution to 1%*Regulatory:* FDA §176.170; EPA approved*Properties:* Clear to pale yel. liq.; completely sol. in water; dens. 8.6 lb/gal; f.p. 27 F; flash pt. noncombustible; pH 3.5 ± 0.2; cationic*Precaution:* Moderately corrosive to iron and copper, incl. their alloys*Storage:* Protect from freezing otherwise stratification may occur; will become homogeneous upon agitation**Catofast® GM** [BASF]*Chem. Descrip.:* Substituted polyethylenimine aq. sol'n.

CAS 9002-98-6

*Uses:* Neutralizer and fixing agent for pitch and stickies in papermaking; binds fines, fillers, slimy colloids and other org. substances that are dissolved or dispersed in the stock; fixing agent for anionic additives; reclaims fibers from excess white water; inc. drainage rates; shortens drying times*Properties:* Cationic**Catofast® NB-DF** [BASF]*Chem. Descrip.:* Polyethylenimine deriv. aq. sol'n.

CAS 9002-98-6

*Uses:* Dye fixative for wet-end papermaking; improves bleedfastness of substantive dyes; effective in acid and alkaline systems*Use Level:* 25-50% of dyestuff*Properties:* Cationic**Catofast® NB-PD** [BASF]*Chem. Descrip.:* Polyethylenimine aq. sol'n.

CAS 9002-98-6

*Uses:* Fixing agent for fillers, fines, pitch, anionic and nonionic colloids, pigment dyes, and direct dyes in papermaking; promotes performance of alkaline sizes; accelerates sizing development; synergist for anionic polyacrylamides; rec. for highly contaminated systems; enhances runnability and efficiency of savealls and waste treatment; enhances performance of cationic agents such as starch and wet str. resins; high charge dens.*Properties:* Water-sol.**Catofast® PL** [BASF]*Chem. Descrip.:* Polyethylenimine aq. sol'n.

CAS 9002-98-6

*Uses:* Fixing agent, promoter in highly contaminated, high hardness environments for papermaking; binds fines, fillers, slimy colloids and other org. substances that are dissolved or dispersed in the stock; fixing agent for anionic substances; pitch control agent; reclaims fibers from excess white water; inc. drainage rates; shortens drying time; for wet str. papers; may impair the fluorescent activity of optical brighteners in very white grades of paper*Properties:* Cationic**CC™-103** [IMERYS]*Chem. Descrip.:* Calcium carbonate

CAS 1317-65-3

*Uses:* Pigment, filler, reinforcing agent for paper, paint, polymers, food, esp. polyolefins, carpet backing, caulks, sealants, putties; mild abrasives in cleaners; coarse ground*Properties:* Wh. powd., odorless; 80% thru 325 mesh; negligible sol. in water; sp.gr. 2.71; dens. 22.57 lb/gal; bulk dens. 72 lb/ft<sup>3</sup> (loose); bulking value 0.044; ref. index 1.59; pH 9.5; nonflamm.*Toxicology:* TLV/TWA 10 mg/m<sup>3</sup>, considered nuisance dust*Precaution:* Incompat. with acids**CD-401** [Sartomer]*Chem. Descrip.:* Cyclohexane dimethanol dimethacrylate*Uses:* Produces hard, durable coatings with good clarity and adhesion to diverse substrates for window films, polycarbonate coatings, solder masks, wood, plastic and paper coatings, dry film photo imaging, metalized surf. coating; monomer that offers fast cures; resist. to yellowing; chem. resistant; steel wool scratch resist.*Properties:* Solid; sol. in butyl cellosolve acetate, 2-phenoxyethyl methacrylate, tetrahydrofurfuryl acrylate, ethoxylated<sub>2</sub> bisphenol A diacrylate, propoxylated allyl methacrylate, tetrahydrofurfuryl methacrylate; epoxy acrylate oligomer blended with 1,6 hexanediol diacrylate; m.p. 78 C; ref. index 1.475; 0.01% acid**CD-406** [Sartomer]*Chem. Descrip.:* Cyclohexane dimethanol diacrylate*Uses:* Produces hard, durable coatings with good clarity and adhesion to diverse substrates for window films, polycarbonate coatings, solder masks, wood, plastic and paper coatings, dry film photo imaging, metalized surf. coating; monomer that offers fast cures; resist. to yellowing; chem. resistant; steel wool scratch resist.*Properties:* Solid; sol. in butyl cellosolve acetate, 2-phenoxyethyl methacrylate, tetrahydrofurfuryl acrylate, ethoxylated<sub>2</sub> bisphenol A diacrylate, propoxylated allyl methacrylate, tetrahydrofurfuryl methacrylate; 1-methoxy 2-propanol; 2(2-ethoxyethoxy)ethyl acetate, dipropylene glycol monomethyl ether, epoxy acrylate oligomer blended with 1,6 hexanediol diacrylate; m.p. 78 C; 0.04% acid**CD 501** [Sartomer]*Chem. Descrip.:* PPG-6 trimethylolpropane triacrylate with 95 ppm MEHQ inhibitor*Uses:* Used in acrylics, adhesives (pressure sensitive, structural), coatings (glass, metal, optical, paper, PVC floor, release, textile, wood), electronics, inks, paints, and photopolymers; low shrinkage and fast cure*Properties:* APHA 85 clear liq.; sp.gr. 1.168; visc. 140 cps; 99% reactive esters*Toxicology:* Low skin irritation*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F**Cecamid® Resins** [Ceca SA]*Chem. Descrip.:* Polyamidoamine epichlorohydrin, urea-formaldehyde, or melamine-formaldehyde resins*Uses:* Wet str. resin for papermaking (food paper, decoration, label, tissue, and specialties); renders papers mechanically resist. to humidity, enabling them to be printed and recycled*Regulatory:* BgVV XXXVI and XXXVI.I compliance**Cecavon® CA 31** [Ceca SA]*Chem. Descrip.:* Calcium stearate

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Anticaking agent for powds. and fertilizers; water repellent for concrete, coatings; release agent, lubricant for foundry, ceramics, molding powds., composites; gellant*Use Level:* 2-4% (foundry release, composites lubricant), 1-2% (ceramics lubricant, anticaking agent), 0.5-2% (water repellent)*Properties:* Wh. powd.; sol. hot in aromatic solvs. (benzene, toluene, xylene), min. and veg. oils, waxes; insol. in water, alcohols, ketones, esters; dens. ≈ 200 kg/m<sup>3</sup>; m.p. 160-170 C; flash pt. none*Toxicology:* LD50 (oral, rat) > 10,000 mg/kg; nonhazardous in normal condition of use; avoid formation of dust*Environmental:* Biodeg.; no specific risk for environment in normal state; do not release into natural water courses or the environment*Precaution:* Dusts can form explosive mixts. with air; avoid static discharges; strong acids may dec. prod. into nondangerous prods.*Storage:* 1 yr shelf life stored in closed original pkg. @ ambient temps.; keep

away from ignition sources; protect from moisture

**Cecavon® CA 350 P** [Ceca SA]

*Chem. Descrip.:* Calcium stearate aq. susp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Waterproofing agent, dispersant in paper coating or size press; plasticizer, flexibilizer, gloss aid for paper coatings; eliminates orange peel esp. in high speed coating; reduces picking; improves printability; compat. with all binders

*Use Level:* 0.8-1.5% on dry wt. of coating

*Properties:* Wh. milky visc. liq.; disp. in water; dens. 1 g/cc; visc. 100-400

mPa·s; flash pt. none; pH ≥ 8.5 (23 C); 49-51% dry extract

*Toxicology:* Highly alkaline; sl. irritating to eyes and skin; do not ingest

*Environmental:* Do not release into natural water courses or the environment

*Precaution:* Strong acids dec. prod. into nondangerous prods.

*Hazardous Decomp. Prods.:* Possible formation of CO<sub>x</sub> and hazardous org. compds. in a fire, though not readily combustible under normal conditions

*Storage:* 2 mos shelf life @ 5-23 C; store away from cold, heat, sun, and extreme weather conditions; protect from freezing; keep containers tightly sealed

**Cecavon® NA 61** [Ceca SA]

*Chem. Descrip.:* Sodium stearate

CAS 822-16-2; EINECS/ELINCS 212-490-5

*Uses:* Waterproofing agent, lubricant, gellant, opacifier for paper and cosmetics

*Properties:* Powd.; dens. 0.30 max.; m.p. > 200 C; 8.8-9.8% Na.

**Cecavon® ZN 70** [Ceca SA]

*Chem. Descrip.:* Zinc stearate

CAS 557-05-1; EINECS/ELINCS 209-151-9

*Uses:* Waterproofing agent, lubricant, gellant, opacifier for rubber, concrete, composites, paints, varnish, cosmetics, pharmaceuticals, molding, and paper applics.

*Properties:* Powd.; dens. 0.20 max.; m.p. 125-130 C; 10.2-11% Zn.

**Cecavon® ZN 735** [Ceca SA]

*Chem. Descrip.:* Zinc stearate

CAS 557-05-1; EINECS/ELINCS 209-151-9

*Uses:* Waterproofing agent, lubricant, gellant, opacifier for rubber, concrete, composites, paints, varnish, cosmetics, pharmaceuticals, molding, and paper applics.

*Properties:* Liq.; sp.gr. 1 ± 0.10; visc. 50-200 mPa·s; 35 ± 2% dry content

**Celite® 263** [Celite]

*Chem. Descrip.:* Diatomaceous silica, flux calcined

*Chem. Analysis:* SiO<sub>2</sub> (89.6%), Al<sub>2</sub>O<sub>3</sub> (4%), Na<sub>2</sub>O + K<sub>2</sub>O (3.3%), Fe<sub>2</sub>O<sub>3</sub> (1.3%), water (0.5%)

CAS 7631-86-9; EINECS/ELINCS 231-545-4

*Uses:* Functional filler used in prod. of various specialty papers and wet laid prods.; lt. wt. bulking agent, drainage aid for slow draining stock; opacity builder, friction material in clutch papers; aids in uniform disp. and suspension of fibers; high porosity, low loose wt. dens., high brightness, lg. surf. area, and inertness

*Properties:* Wh. powd.; 1-4 μ particle size; 0.3% 325-mesh residue; sp.gr. 2.30; dens. 8.7 lb/ft<sup>3</sup> (loose); surf. area 1-3.5 m<sup>2</sup>/g; oil absorp. 120%; ref. index 1.48; pH 10.0

**Celite® 321** [Celite]

*Chem. Descrip.:* Diatomaceous silica

*Chem. Analysis:* SiO<sub>2</sub> (85.8%), Al<sub>2</sub>O<sub>3</sub> (3.8%), Fe<sub>2</sub>O<sub>3</sub> (1.2%), Na<sub>2</sub>O + K<sub>2</sub>O (1.1%), water (4%)

CAS 7631-86-9; EINECS/ELINCS 231-545-4

*Uses:* Functional filler used in prod. of various specialty papers and wet laid prods.; lt. wt. bulking agent, drainage aid for slow draining stock; opacity builder, friction material in clutch papers; aids in uniform disp. and suspension of fibers; high porosity, low loose wt. dens., high brightness, lg. surf. area, and inertness

*Properties:* Lt. gray particulate; 1-8 μ particle size, 8.0% 325-mesh residue; sp.gr. 2.10; dens. 8.0 lb/ft<sup>3</sup> (loose); bulking value 17.5 lb/gal; surf. area 10-20 m<sup>2</sup>/g; oil absorp. 210; ref. index 1.40-1.46

**Celite® 388** [Celite]

*Chem. Descrip.:* Diatomaceous silica, flux calcined

*Chem. Analysis:* SiO<sub>2</sub> (89.6%), Al<sub>2</sub>O<sub>3</sub> (4%), Na<sub>2</sub>O + K<sub>2</sub>O (3.3%), Fe<sub>2</sub>O<sub>3</sub> (1.3%), water (0.5%)

CAS 7631-86-9; EINECS/ELINCS 231-545-4

*Uses:* Functional filler used in prod. of various specialty papers and wet laid prods.; lt. wt. bulking agent, drainage aid for slow draining stock; opacity

builder, friction material in clutch papers; aids in uniform disp. and suspension of fibers; high porosity, low loose wt. dens., high brightness, lg. surf. area, and inertness

*Properties:* Wh. particulate; particle size 2-10 μ, 1.5% 325-mesh residue; sp.gr. 2.30; dens. 8.5 lb/ft<sup>3</sup> (loose); surf. area 1-3.5 m<sup>2</sup>/g; oil absorp. 140%; ref. index 1.50; pH 10.0

**Celkate® T-21** [Celite]

*Chem. Descrip.:* Synthetic hydrous magnesium silicate

*Chem. Analysis:* SiO<sub>2</sub> (65%), MgO (14.9%), Al<sub>2</sub>O<sub>3</sub> (4%), moisture (4%), Fe<sub>2</sub>O<sub>3</sub> (1.1%), Na<sub>2</sub>O + K<sub>2</sub>O (1%)

CAS 14807-96-6; EINECS/ELINCS 238-877-9

*Uses:* Functional filler for chem., food, paper, agric., paint, and other industries; carrier, diluent, conditioner, grinding aid in pesticides

*Properties:* Lt. gray powd.; 6.6 μ median particle size; 3% on 325 mesh; sp.gr. 2.4; bulk dens. 12.8 lb/ft<sup>3</sup>; surf. area (BET) 190 m<sup>2</sup>/g; water absorp. 220%; oil absorp. 170%; brightness (Photovolt) 54; ref. index 1.54; pH 7.6 (10% aq. slurry)

**Celnax® CX-Z210 IP** [Nissan Chem. Ind.]

*Chem. Descrip.:* Antimony double oxide sol'n. in isopropanol

*Uses:* Antistat for various films, plastics, fibers, glass, paper, paint, ink, sensors; blocks infrared rays and UV rays; good elec. conductivity; good light and heat resist.; highly dispersive; good compatibility with resins; forms transparent antistatic coating when mixed with transparent liq. resins or inorg. binder

*Properties:* Bluish green clear disp.; 20 nm particle size; sp.gr. 0.96; visc. 14 cps; pH 4.6 (mixed 1:1 with water); vol. resist. 300 ohm-cm; 20% oxide

*Storage:* Keep container closed when not in use to prevent formation of gel by drying; keep away from open flame

**Celnax® CX-Z300H** [Nissan Chem. Ind.]

*Chem. Descrip.:* Antimony double oxide hydrosol

*Uses:* Antistat for various films, plastics, fibers, glass, paper, paint, ink, sensors; blocks infrared rays and UV rays; good elec. conductivity; good light and heat resist.; highly dispersive; good compatibility with resins; forms transparent antistatic coating when mixed with transparent liq. resins or inorg. binder

*Properties:* Bluish green clear aq. disp.; 20 nm particle size; sp.gr. 1.35; visc. 3.4 cps; pH 6.9; vol. resist. 280 ohm-cm; 30% oxide

*Storage:* Keep container closed when not in use to prevent formation of gel by drying; protect from freezing

**Celnax® CX-Z401M** [Nissan Chem. Ind.]

*Chem. Descrip.:* Antimony double oxide sol'n. in methanol

*Uses:* Antistat for various films, plastics, fibers, glass, paper, paint, ink, sensors; blocks infrared rays and UV rays; good elec. conductivity; good light and heat resist.; highly dispersive; good compatibility with resins; forms transparent antistatic coating when mixed with transparent liq. resins or inorg. binder

*Properties:* Bluish green clear disp.; 20 nm particle size; sp.gr. 1.23; visc. 1.6 cps; pH 8.2 (mixed 1:1 with water); vol. resist. 250 ohm-cm; 40% oxide

*Storage:* Keep container closed when not in use to prevent formation of gel by drying; keep away from open flame

**Cerol® M Liq.** [Clariant UK]

*Chem. Descrip.:* Fatty acid chromium (III) complex in water/IPA/acetone sol'n.

*Uses:* Water repellent, release agent, sizing agent for surf. finishing of a wide variety of paper and board incl. food-contact paper (dry food); stable to acids, chlorides, hard water, aluminum; not stable to alkali; compat. with cationics, nonionics; may precipitate with anionics

*Regulatory:* FDA 21CFR §176.180; BgVV XXXVI compliant

*Properties:* Dk. grn. clear liq.; misc. with water and aliphatic alcohol in any proportion; dens. 1.0 kg/l; visc. 75 mPa·s (20 C); flash pt. (PMCC) 1 C; pH 3 (2%); 41% chromium complex; cationic

*Precaution:* Flamm.

*Storage:* Good storage stability; a sl. sediment may form on standing in the cold, but does not affect prod. performance; heating over extended period causes gelation; gelled sol'ns. are unfit for use

**Cerol® MN Liq.** [Clariant UK]

*Chem. Descrip.:* Fatty acid chromium (III) complex

*Uses:* Water repellent, release agent, sizing agent for surf. finishing of a wide variety of paper and board; stable to acids, chlorides, hard water, aluminum; not stable to alkali; compat. with cationics, nonionics; may precipitate with anionics

*Properties:* Dk. grn. clear liq.; misc. with water and aliphatic alcohol in any

proportion; dens. 1.15 kg/l; visc. 1300 mPa·s; flash pt. nonflamm.; pH 3 (2%); 39% chromium complex; cationic

*Storage:* Good storage stability; a sl. sediment may form on standing in the cold, but does not affect prod. performance; heating over extended period causes gelation; gelled sol'ns. are unfit for use

**Chargemaster® R415** [Grain Processing]

*Chem. Descrip.:* Cationic corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Dry str. agent in paper; retention aid, drainage aid improving runnability in papermaking; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. gran. powd.; bulk dens. 39 lb/ft<sup>3</sup> (loose), 48 lb/ft<sup>3</sup> (packed); pH 6.5; 11% moisture; cationic

**Chargemaster® R462** [Grain Processing]

*Chem. Descrip.:* Cationic corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Size-press starch; food-contact paper/paperboard; provides good film formation even at lower solids; its chem. attraction to the fiber means less size-press starch will reach the wastewater treatment plant

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. gran. powd.; bulk dens. 39 lb/ft<sup>3</sup> (loose), 48 lb/ft<sup>3</sup> (packed); pH 6.5; 11% moisture; cationic

**Chargemaster® R515** [Grain Processing]

*Chem. Descrip.:* Cationic/amphoteric corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Dry str. agent in paper; retention aid, drainage aid improving runnability in papermaking; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. gran. powd.; bulk dens. 39 lb/ft<sup>3</sup> (loose), 48 lb/ft<sup>3</sup> (packed); pH 6.5; 11% moisture; cationic/amphoteric

**Chargemaster® R615** [Grain Processing]

*Chem. Descrip.:* Cationic/amphoteric corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Dry str. agent in paper; retention aid, drainage aid, water release aid improving runnability in papermaking; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. gran. powd.; bulk dens. 39 lb/ft<sup>3</sup> (loose), 48 lb/ft<sup>3</sup> (packed); pH 6.5; 11% moisture; cationic/amphoteric

**Chargepac® 8** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Org. and inorg. polymers

*Uses:* Primary coagulant for water and wastewater clarification, in oily wastewater demulsification, and greasy tower treatment; food-contact paper/paperboard; can be used in place of conventional inorg. coagulants to produce low turbidity waters in influent water and effluent wastewater clarification applics.

*Use Level:* 2-20 ppm (raw water clarification); 5-100 ppm (industrial wastewater treatment)

*Regulatory:* FDA 21CFR § 176.170, 176.180; EPA approval for potable water @ 200 ppm max. dosage

*Properties:* Colorless clear liq.; sp.gr. 1.22; visc. 130 cps; f.p. -7 C; flash pt. none; pH 2.5; cationic

*Storage:* 9 mos. shelf life in glass, plastic, and epoxy or rubber lined stainless steel equip. @ 40-95 F

**Charlab™ CHT Rapidoprint MS 30** [Catawba-Charlab]

*Chem. Descrip.:* Polymer sol'n.

*Uses:* Special auxiliary for printing of transfer paper with aq. pastes; improves abrasion resist., storability, stability

*Use Level:* 40-80 g (rotary screen printing); 30-60 g (roller printing)

*Properties:* Clear visc. liq.; sol. can be mixed with water in all ratios; pH neutral; nonionic

**Check Dye AS Liq.** [BASF]

*Uses:* Dye for security papers

**Chemal BP 235** [Chemax]

*Chem. Descrip.:* Alkoxyated block polymer

*Uses:* Defoamer in metalworking, cosmetics, paper, and textiles; defoamer in mechanical dishwashing detergents and rinse aids; lubricant base in formulating syn. metalworking lubricants

*Properties:* Liq.; m.w. 1900; HLB 18.5; cloud pt. 77 C (1% aq.); 100% act.; nonionic

**Chemal BP 261** [Chemax]

*Chem. Descrip.:* Poloxamer 181

CAS 9003-11-6

*Uses:* Defoamer, emulsifier, demulsifier, dispersant, binder, stabilizer, wetting agent for metalworking, cosmetics, paper, textiles, dishwashing detergents, rinse aids; lubricant base; chemical intermediate

*Properties:* Liq.; m.w. 2000; HLB 3.0; cloud pt. 24 C (1% aq.); 100% act.; nonionic

**Chemal BP 261PO** [Chemax]

*Chem. Descrip.:* Alkoxyated block polymer

*Uses:* Defoamer in metalworking, cosmetics, paper, and textiles; defoamer in mechanical dishwashing detergents and rinse aids; lubricant base in formulating syn. metalworking lubricants

*Properties:* Liq.; m.w. 2000; HLB 3.0; cloud pt. 24 C (1% aq.); 100% act.; nonionic

**Chemal BP-262** [Chemax]

*Chem. Descrip.:* Poloxamer 182

CAS 9003-11-6

*Uses:* Defoamer, emulsifier, demulsifier, dispersant, binder, stabilizer, wetting agent for metalworking, cosmetics, paper, textiles, dishwashing detergents, rinse aids; lubricant base; chemical intermediate

*Properties:* Liq.; m.w. 2500; HLB 7.0; cloud pt. 30 C (1% aq.); 100% act.; nonionic

**Chemal BP 268** [Chemax]

*Chem. Descrip.:* Alkoxyated block polymer

*Uses:* Defoamer in metalworking, cosmetics, paper, and textiles; defoamer in mechanical dishwashing detergents and rinse aids; lubricant base in formulating syn. metalworking lubricants

*Properties:* Solid; m.w. 8350; HLB 29.0; cloud pt. > 100 C (1% aq.); 100% act.; nonionic

**Chemal BP-2101** [Chemax]

*Chem. Descrip.:* Poloxamer 331

CAS 9003-11-6

*Uses:* Defoamer, emulsifier, demulsifier, dispersant, binder, stabilizer, wetting agent for metalworking, cosmetics, paper, textiles, dishwashing detergents, rinse aids; lubricant base; chemical intermediate

*Properties:* Liq.; m.w. 3800; HLB 1.0; cloud pt. 16 C (1% aq.); 100% act.; nonionic

**Chemal BP 3172P** [Chemax]

*Chem. Descrip.:* Polyalkylene glycol

*Uses:* Defoamer in metalworking, cosmetics, paper, and textiles; defoamer in mechanical dishwashing detergents and rinse aids; lubricant base in formulating syn. metalworking lubricants

*Properties:* Liq.; m.w. 2100; HLB 8.0; cloud pt. 39 C (1% aq.); 100% act.

**Chemal BP 3174** [Chemax]

*Chem. Descrip.:* Reversed block polymers

*Uses:* Defoamer in metalworking, cosmetics, paper, and textiles; defoamer in mechanical dishwashing detergents and rinse aids; lubricant base in formulating syn. metalworking lubricants

*Properties:* Liq.; m.w. 2700; HLB 16.0; cloud pt. 47 C (1% aq.); 100% act.

**Chemal BP 3252** [Chemax]

*Chem. Descrip.:* Reversed block polymers

*Uses:* Defoamer in metalworking, cosmetics, paper, and textiles; defoamer in mechanical dishwashing detergents and rinse aids; lubricant base in formulating syn. metalworking lubricants

*Properties:* Liq.; m.w. 3120; HLB 6.3; cloud pt. 33 C (1% aq.); 100% act.

**Chemax CO-5** [Chemax]

*Chem. Descrip.:* PEG-5 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, lubricant for textiles, cosmetics; pigment dispersant in latex paints, paper; essential oils solubilizer

*Properties:* Liq.; oil-sol.; HLB 3.8; sapon. no. 145; 100% conc.; nonionic

**Chemax CO-16** [Chemax]

*Chem. Descrip.:* PEG-16 castor oil

CAS 61791-12-6

*Uses:* Emulsifier for fiber lubricants, cutting oils, hydraulic fluids; clay and pigment dispersant, rewetting agent, softener, dyeing assistant for paint, paper, textile, and leather industries; cosmetics

*Properties:* Liq.; water-sol.; HLB 8.6; sapon. no. 100; 100% conc.; nonionic

**Chemax CO-30** [Chemax]

*Chem. Descrip.:* PEG-30 castor oil

CAS 61791-12-6

*Uses:* Emulsifier for lubricants for plastics, metals, and textiles; clay and pigment dispersant, rewetting agent, softener, dyeing assistant in textiles, paint, paper, leather

- Properties:* Liq.; HLB 11.7; sapon. no. 73; 100% conc.; nonionic
- Chemax CO-40** [Chemax]  
*Chem. Descr.:* PEG-40 castor oil  
 CAS 61791-12-6  
*Uses:* Emulsifier for lubricants for plastics, metals, and textiles; clay and pigment dispersant, rewetting agent, softener, dyeing assistant in textiles, paint, paper, leather  
*Properties:* Liq.; HLB 12.9; sapon. no. 61; 100% conc.; nonionic
- Chemax DF-10** [Chemax]  
*Chem. Descr.:* Silicone defoamer emulsion  
*Uses:* Defoamer/antifoam for detergents, inks, floor polishes, pulp/paper, textiles, paints, effluent treatment, commercial cleaning processes, adhesives, metalworking; functions well in hot and cold applics.  
*Use Level:* 10-150 ppm  
*Properties:* Off-wh. emulsion; sp.gr. 1.01; pH 7-9 (5% aq.); 10% act.  
*Storage:* Protect from freezing; use within 6 mos for max. efficiency
- Chemax DF-10A** [Chemax]  
*Chem. Descr.:* Silicone defoamer emulsion  
*Uses:* Defoamer/antifoam for pulp/paper, textiles, paints, effluent treatment, commercial cleaning processes, adhesives, metalworking; can be used to prepare dilutions contg. as little as 2% silicone solids  
*Properties:* Wh. emulsion; sp.gr. 1.0; visc. 2100-4100 cps; pH 8.5 (5% aq.); 10-15% solids  
*Storage:* 6 mos shelf life
- Chemax DF-30** [Chemax]  
*Chem. Descr.:* Silicone defoamer emulsion with preservatives  
*Uses:* Defoamer/antifoam for pulp/paper, textiles, paints, effluent treatment, commercial cleaning processes, adhesives, metalworking  
*Use Level:* 10 ppm silicone solids rec.  
*Properties:* Creamy wh. emulsion; sp.gr. 1.0; 30% silicone solids  
*Storage:* Protect from freezing; susceptible to degradation by bacterial growth; 6 mos shelf life
- Chemax DF-100** [Chemax]  
*Chem. Descr.:* Silicone defoamer compd.  
*Uses:* Defoamer/antifoam for pulp/paper, textiles, paints, effluent treatment, commercial cleaning processes, adhesives, metalworking; used to formulate defoamer emulsions; suitable where water emulsifiability is not required  
*Use Level:* 10 ppm  
*Properties:* Opaque liq.; sp.gr. 1.01; 100% act.  
*Storage:* 3 mos stability, then disp. may show some settling; stir before use
- Chemax DFO-155** [Chemax]  
*Chem. Descr.:* POE/POP dioleate  
*Chem. Analysis:* water (0.4%)  
 CAS 67167-17-3  
*Uses:* Defoamer; emulsifier for min. oils and other defoamer components; extender for silicone defoamers; defoamer for paper/paperboard mfg., textiles, paints, effluent treatment, commercial cleaning processes, adhesives, metalworking; SE; high m.w.; org.  
*Regulatory:* FDA approvals  
*Properties:* Gardner 4 max. clear pourable liq.; sol. in naphthenic and paraffinic oils; sp.gr. 0.98; sapon. no. 40-50
- Chemax DFO-199M** [Chemax]  
*Chem. Descr.:* SE high m.w. ester  
*Uses:* Defoamer; emulsifier for min. oils and other defoamer components; extender for silicone defoamers; defoamer for paper/paperboard mfg.; org.  
*Regulatory:* FDA approvals  
*Properties:* Low color; pourable liq.; sol. in naphthenic and paraffinic oils
- Chemax DNP-8** [Chemax]  
*Chem. Descr.:* Nonyl nonoxynol-8  
 CAS 9014-93-1  
*Uses:* Emulsifier for nonpolar solv. and oils; detergent for cellulosic and syn. fibers; dispersant for hard surface cleaners and laundry compds.; solubilizer for paints, paper, agric., textiles, etc.  
*Properties:* Liq.; HLB 10.4; pour pt. 32 F; cloud pt. < 25 C (1% aq.); 100% conc.; nonionic
- Chemax DNP-15** [Chemax]  
*Chem. Descr.:* Nonyl nonoxynol-15  
 CAS 9014-93-1  
*Uses:* Emulsifier for nonpolar solv. and oils; detergent for cellulosic and syn. fibers; dispersant for hard surface cleaners and laundry compds.; solubilizer for paints, paper, agric., textiles, etc.  
*Properties:* Liq.; pour pt. 64 F; nonionic
- Chemax DNP-18** [Chemax]  
*Chem. Descr.:* Nonyl nonoxynol-18  
 CAS 9014-93-1  
*Uses:* Emulsifier, detergent, solubilizer, wetting agent, dispersant, coupling agent for textiles, metalworking, household, industrial, agric., paper, paint, and other industries  
*Properties:* Paste; HLB 13.9; cloud pt. 75 C (1% aq.); 100% conc.; nonionic
- Chemax DNP-150** [Chemax]  
*Chem. Descr.:* Nonyl nonoxynol-150  
 CAS 9014-93-1  
*Uses:* Emulsifier for nonpolar solv. and oils; detergent for cellulosic and syn. fibers; dispersant for hard surface cleaners and laundry compds.; solubilizer for paints, paper, agric., textiles, etc.  
*Properties:* Flake; HLB 19.0; cloud pt. > 100 C (1% aq.); nonionic
- Chemax DNP-150/50** [Chemax]  
*Chem. Descr.:* Nonyl nonoxynol-150  
 CAS 9014-93-1  
*Uses:* Emulsifier, dispersant, detergent, wetting agent, solubilizer, coupling agent for textiles, metalworking, household, industrial, agric., paper, paint, and other industries  
*Properties:* Liq.; HLB 19.0; cloud pt. > 100 C (1% aq.); 50% conc.; nonionic
- Chemax HCO-5** [Chemax]  
*Chem. Descr.:* PEG-5 hydrogenated castor oil  
 CAS 61788-85-0  
*Uses:* Emulsifier, lubricant, softener, dispersant for cosmetics, plastics, metals, textiles, leather, paint, and paper industries; coemulsifier for syn. esters  
*Properties:* Liq.; oil-sol.; HLB 3.8; sapon. no. 142; 100% conc.; nonionic
- Chemax HCO-16** [Chemax]  
*Chem. Descr.:* PEG-16 hydrogenated castor oil  
 CAS 61788-85-0  
*Uses:* Emulsifier, lubricant, dispersant, softener for cosmetics, textiles, plastics, metalworking, paint, paper, leather  
*Properties:* Liq.; HLB 8.6; sapon. no. 100; 100% conc.; nonionic
- Chemax HCO-25** [Chemax]  
*Chem. Descr.:* PEG-25 hydrogenated castor oil  
 CAS 61788-85-0  
*Uses:* Emulsifier, lubricant, and softener for cosmetics, plastics, metals, textiles, leather, paint, and paper industries  
*Properties:* Liq.; HLB 10.8; sapon. no. 80; 100% conc.; nonionic
- Chemax HCO-200/50** [Chemax]  
*Chem. Descr.:* PEG-200 hydrogenated castor oil  
 CAS 61788-85-0  
*Uses:* Emulsifier and lubricant for cosmetics, plastics, metals, textiles, paint, paper, leather industries  
*Properties:* Liq.; water-sol.; HLB 18.1; sapon. no. 17; 50% act.; nonionic
- Chemax NP-1.5** [Chemax]  
*Chem. Descr.:* Nonoxynol-1.5  
 CAS 9016-45-9; EINECS/ELINCS 248-291-5  
*Uses:* Emulsifier, dispersant, detergent, wetting agent, solubilizer, coupling agent for cosmetics, textiles, metalworking, household, industrial, agric., paper, paint, and other industries  
*Properties:* Liq.; HLB 4.6; pour pt. -3 F; cloud pt. < 25 C (1% aq.); nonionic
- Chemax NP-4** [Chemax]  
*Chem. Descr.:* Nonoxynol-4  
 CAS 9016-45-9; EINECS/ELINCS 230-770-5  
*Uses:* Emulsifier, dispersant, detergent, wetting agent, solubilizer, coupling agent for cosmetics, textiles, metalworking, household, industrial, agric., paper, paint, and other industries  
*Properties:* Liq.; water/oil-sol.; HLB 8.9; pour pt. -15 F; cloud pt. < 25 C (1% aq.); 100% conc.; nonionic
- Chemax NP-6** [Chemax]  
*Chem. Descr.:* Nonoxynol-6  
 CAS 9016-45-9  
*Uses:* Emulsifier, dispersant, detergent, wetting agent, solubilizer, coupling agent for cosmetics, textiles, metalworking, household, industrial, agric., paper, paint, and other industries  
*Properties:* Liq.; HLB 10.9; pour pt. -26 F; cloud pt. < 25 C (1% aq.); 100% conc.; nonionic
- Chemax NP-9** [Chemax]  
*Chem. Descr.:* Nonoxynol-9  
 CAS 9016-45-9  
*Uses:* Emulsifier, dispersant, detergent, wetting agent, solubilizer, coupling

agent for cosmetics, textiles, metalworking, household, industrial, agric., paper, paint, and other industries

*Properties:* Liq.; HLB 13.0; pour pt. 31 F; cloud pt. 54 C (1% aq.); 100% conc.; nonionic

**Chemax NP-10** [Chemax]

*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* Emulsifier, dispersant, detergent, wetting agent, solubilizer, coupling agent for cosmetics, textiles, metalworking, household, industrial, agric., paper, paint, and other industries

*Properties:* Liq.; HLB 13.5; pour pt. 49 F; cloud pt. 72 C (1% aq.); 100% conc.; nonionic

**Chemax NP-15** [Chemax]

*Chem. Descrip.:* Nonoxynol-15

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, rewetting agent, emulsifier in cosmetics, textiles, leather, paper, paints, and metal processing

*Properties:* Paste; HLB 15.0; pour pt. 71 F; cloud pt. 96 C (1% aq.); 100% conc.; nonionic

**Chemax NP-20** [Chemax]

*Chem. Descrip.:* Nonoxynol-20

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, rewetting agent, emulsifier in cosmetics, textiles, leather, paper, paints, and metal processing

*Properties:* Solid; HLB 16.0; pour pt. 91 F; cloud pt. > 100 C (1% aq.); nonionic

**Chemax NP-30** [Chemax]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, rewetting agent, emulsifier in cosmetics, textiles, leather, paper, paints, and metal processing

*Properties:* Solid; HLB 17.1; pour pt. 109 F; cloud pt. > 100 C (1% aq.); 100% conc.; nonionic

**Chemax NP-30/70** [Chemax]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* Surfactant, detergent, wetting agent, rewetting agent, emulsifier in cosmetics, textiles, leather, paper, paints, and metal processing

*Properties:* Liq.; HLB 17.1; pour pt. 34 F; cloud pt. > 100 C (1% aq.); 70% act.; nonionic

**Chemax OP-10** [Chemax]

*Chem. Descrip.:* POE (10) octyl phenol

CAS 9002-93-1

*Uses:* Emulsifier, detergent, wetting agent, dispersant, solubilizer, and coupling agent in textiles, metalworking, household, industrial, agric., paper, paint, and other industries; primary emulsifier for vinyl acetate and acrylate polymerization

*Properties:* Liq.; sol. in oil and water; HLB 13.6; cloud pt. 62-68 C (1%); 100% conc.; nonionic

**Chemax OP-30/70** [Chemax]

*Chem. Descrip.:* Octoxynol-30

CAS 9002-93-1

*Uses:* Emulsifier, dispersant, detergent, wetting agent, solubilizer, coupling agent for cosmetics, textiles, metalworking, household, industrial, agric., paper, paint, and other industries

*Properties:* Liq.; HLB 17.3; cloud pt. > 100 C (1% aq.); 70% conc.; nonionic

**Chemistat 6300 H** [Sanyo Chem. Ind.]

*Chem. Descrip.:* Quat. ammonium polymer

*Uses:* Antistat, electroconductive agent for dielec. paper of facsimile and electrofax paper

*Properties:* Yel. liq.; pH 6.5; visc. 150 cps; 33% act.; cationic

**Chempol 13-1905** [Cook Composites & Polymers]

*Chem. Descrip.:* Vinyltoluene-modified alkyd copolymer

*Uses:* Produces high gloss coatings with high pigment loads, used in coatings for PS, toy enamels, paper coatings, finishes for trailer interiors, aerosol coatings

*Properties:* Liq.; sol. 16-18% in min. spirits, 22-24% in butanol, < 5% in xylol; dens. 7.25-7.45 lb/gal; visc. W-Z; acid no. 2-6; flash pt.(TCC) 35 F; 50 ± 1% solids in VM&P naphtha.

**Chemquat 12/33** [Chemax]

*Chem. Descrip.:* Laurtrimonium chloride

CAS 112-00-5; EINECS/ELINCS 203-927-0

*Uses:* Surfactant, corrosion inhibitor, antistat for plastics; textile dyeing aid; gel sensitizer in latex foam prod.; visc. depressant in paper and textile softener formulations

*Properties:* 33% act.; cationic

**Chemquat 12/50** [Chemax]

*Chem. Descrip.:* Laurtrimonium chloride

CAS 112-00-5; EINECS/ELINCS 203-927-0

*Uses:* Surfactant, corrosion inhibitor, antistat for plastics; textile dyeing aid; gel sensitizer in latex foam prod.; visc. depressant in paper and textile softener formulations

*Properties:* Liq.; 50% act.; cationic

**Chemquat 16/50** [Chemax]

*Chem. Descrip.:* Cetrimonium chloride

CAS 112-02-7; EINECS/ELINCS 203-928-6

*Uses:* Surfactant, corrosion inhibitor, antistat for plastics; textile dyeing aid; gel sensitizer in latex foam prod.; visc. depressant in paper and textile softener formulations

*Properties:* Liq.; 50% act.; cationic

**Chevron Clarity® Paper Machine Oils ISO 100** [Chevron Prods.]

*Chem. Descrip.:* Severely refined petrol. distillate with rust/oxidation/foam inhibitors

*Uses:* Lubricant, circulating oil for pulp/paper machines incl. wet-end systems, dryer bearings, and calender stacks; high temp. and oxidation stability; long lubricant life; exc. wear protection, water separability, foam inhibition

*Regulatory:* DOT nonregulated; SARA §311 nonreportable

*Properties:* Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.88-0.90 (15.6/15.6 C); visc. 95 cSt (40 C); pour pt. -15 C; flash pt. (COC) 276 C; VOC 1.2%

*Toxicology:* ACGIH TLV 5 mg/m<sup>3</sup>; may cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause prolonged/significant eye or skin irritation; not expected to be harmful by ing., skin absorp.; TSCA listed

*Environmental:* Inherently biodeg.; ashless formulation facilitates reclaiming/recycling; nontoxic to aquatic species

*Precaution:* Will burn, but not easily ignited; may react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

*Hazardous Decomp. Prods.:* Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

*Storage:* Do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

**Chevron Clarity® Paper Machine Oils ISO 150** [Chevron Prods.]

*Chem. Descrip.:* Severely refined petrol. distillate with rust/oxidation/foam inhibitors

*Uses:* Lubricant, circulating oil for pulp/paper machines incl. wet-end systems, dryer bearings, and calender stacks; high temp. and oxidation stability; long lubricant life; exc. wear protection, water separability, foam inhibition

*Regulatory:* DOT nonregulated; SARA §311 nonreportable

*Properties:* Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.88-0.90 (15.6/15.6 C); visc. 143 cSt (40 C); pour pt. -15 C; flash pt. (COC) 246 C; VOC 1.2%

*Toxicology:* ACGIH TLV 5 mg/m<sup>3</sup>; may cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause prolonged/significant eye or skin irritation; not expected to be harmful by ing., skin absorp.; TSCA listed

*Environmental:* Inherently biodeg.; ashless formulation facilitates reclaiming/recycling; nontoxic to aquatic species

*Precaution:* Will burn, but not easily ignited; may react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

*Hazardous Decomp. Prods.:* Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

*Storage:* Do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

**Chevron Clarity® Paper Machine Oils ISO 220** [Chevron Prods.]

*Chem. Descrip.:* Severely refined petrol. distillate with rust/oxidation/foam inhibitors

*Uses:* Lubricant, circulating oil for pulp/paper machines incl. wet-end systems, dryer bearings, and calender stacks; high temp. and oxidation stability; long lubricant life; exc. wear protection, water separability, foam inhibi-

tion

**Regulatory:** DOT nonregulated; SARA §311 nonreportable

**Properties:** Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.88-0.90 (15.6/15.6 C); visc. 209 cSt (40 C); pour pt. -15 C; flash pt. (COC) 249 C; VOC 1.2%

**Toxicology:** ACGIH TLV 5 mg/m<sup>3</sup>; may cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause prolonged/significant eye or skin irritation; not expected to be harmful by ing., skin absorp.; TSCA listed

**Environmental:** Inherently biodeg.; ashless formulation facilitates reclaiming/recycling; nontoxic to aquatic species

**Precaution:** Will burn, but not easily ignited; may react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

**Hazardous Decomp. Prods.:** Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

**Storage:** Do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

#### Chevron Clarity® Paper Machine Oils ISO 320 [Chevron Prods.]

**Chem. Descrip.:** Severely refined petrol. distillate with rust/oxidation/foam inhibitors

**Uses:** Lubricant, circulating oil for pulp/paper machines incl. wet-end systems, dryer bearings, and calender stacks; high temp. and oxidation stability; long lubricant life; exc. wear protection, water separability, foam inhibition

**Regulatory:** DOT nonregulated; SARA §311 nonreportable

**Properties:** Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.88-0.90 (15.6/15.6 C); visc. 304 cSt (40 C); pour pt. -15 C; flash pt. (COC) 248 C; VOC 1.2%

**Toxicology:** ACGIH TLV 5 mg/m<sup>3</sup>; may cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause prolonged/significant eye or skin irritation; not expected to be harmful by ing., skin absorp.; TSCA listed

**Environmental:** Inherently biodeg.; ashless formulation facilitates reclaiming/recycling; nontoxic to aquatic species

**Precaution:** Will burn, but not easily ignited; may react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

**Hazardous Decomp. Prods.:** Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

**Storage:** Do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

#### Chevron Clarity® Paper Machine Oils ISO 460 [Chevron Prods.]

**Chem. Descrip.:** Severely refined petrol. distillate with rust/oxidation/foam inhibitors

**Uses:** Lubricant, circulating oil for pulp/paper machines incl. wet-end systems, dryer bearings, and calender stacks; high temp. and oxidation stability; long lubricant life; exc. wear protection, water separability, foam inhibition

**Regulatory:** DOT nonregulated; SARA §311 nonreportable

**Properties:** Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.88-0.90 (15.6/15.6 C); visc. 437 cSt (40 C); pour pt. -18 C; flash pt. (COC) 278 C; VOC 1.2%

**Toxicology:** ACGIH TLV 5 mg/m<sup>3</sup>; may cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause prolonged/significant eye or skin irritation; not expected to be harmful by ing., skin absorp.; TSCA listed

**Environmental:** Inherently biodeg.; ashless formulation facilitates reclaiming/recycling; nontoxic to aquatic species

**Precaution:** Will burn, but not easily ignited; may react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

**Hazardous Decomp. Prods.:** Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

**Storage:** Do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

#### Chevron Clarity® Synthetic Paper Machine Oil ISO 100 [Chevron Prods.]

**Chem. Descrip.:** 1-Decene, homopolymer, hydrogenated (< 60%), C8, C12 olefin polymer, hydrogenated (> 38%), additives (< 2%)

**Uses:** Lubricant for pulp/paper machines, extreme temp. bearing and circulating oil systems, gear boxes, dryer section accessories, calender rolls, high temp. air compressors, high pressure hydraulic pumps; better EP props.;

high temp. and oxidation stability; long lubricant life; superior wear protection; exc. water separability, foam inhibition

**Regulatory:** DOT nonhazardous; SARA §313 nonreportable

**Properties:** Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.84 (15.6/15.6 C); visc. 95 cSt (40 C); pour pt. -48 C; flash pt. (COC) 264 C

**Toxicology:** May cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause significant eye/skin irritation or be harmful by ing., skin absorp.; accidental inj. under skin may cause serious injury; TSCA listed

**Environmental:** Not expected to be readily biodeg.; ashless formulation facilitates reclaiming/recycling; pass LC-50 aquatic toxicity test

**Precaution:** May react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

**Hazardous Decomp. Prods.:** Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

**Storage:** Keep container closed; do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

#### Chevron Clarity® Synthetic Paper Machine Oil ISO 150 [Chevron Prods.]

**Chem. Descrip.:** 1-Decene, homopolymer, hydrogenated (< 60%), C8, C12 olefin polymer, hydrogenated (> 38%), additives (< 2%)

**Uses:** Lubricant for pulp/paper machines, extreme temp. bearing and circulating oil systems, gear boxes, dryer section accessories, calender rolls, high temp. air compressors, high pressure hydraulic pumps; better EP props.; high temp. and oxidation stability; long lubricant life; superior wear protection; exc. water separability, foam inhibition

**Regulatory:** DOT nonhazardous; SARA §313 nonreportable

**Properties:** Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.84 (15.6/15.6 C); visc. 143 cSt (40 C); pour pt. -48 C; flash pt. (COC) 258 C

**Toxicology:** May cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause significant eye/skin irritation or be harmful by ing., skin absorp.; accidental inj. under skin may cause serious injury; TSCA listed

**Environmental:** Not expected to be readily biodeg.; ashless formulation facilitates reclaiming/recycling; pass LC-50 aquatic toxicity test

**Precaution:** May react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

**Hazardous Decomp. Prods.:** Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

**Storage:** Keep container closed; do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

#### Chevron Clarity® Synthetic Paper Machine Oil ISO 220 [Chevron Prods.]

**Chem. Descrip.:** 1-Decene, homopolymer, hydrogenated (< 60%), C8, C12 olefin polymer, hydrogenated (> 38%), additives (< 2%)

**Uses:** Lubricant for pulp/paper machines, extreme temp. bearing and circulating oil systems, gear boxes, dryer section accessories, calender rolls, high temp. air compressors, high pressure hydraulic pumps; better EP props.; high temp. and oxidation stability; long lubricant life; superior wear protection; exc. water separability, foam inhibition

**Regulatory:** DOT nonhazardous; SARA §313 nonreportable

**Properties:** Lt. amber clear liq.; sol. in hydrocarbon solvs.; insol. in water; sp.gr. 0.84 (15.6/15.6 C); visc. 209 cSt (40 C); pour pt. -45 C; flash pt. (COC) 236 C

**Toxicology:** May cause respiratory irritation or pulmonary effects on prolonged/repeated inh. above REL; not expected to cause significant eye/skin irritation or be harmful by ing., skin absorp.; accidental inj. under skin may cause serious injury; TSCA listed

**Environmental:** Not expected to be readily biodeg.; ashless formulation facilitates reclaiming/recycling; pass LC-50 aquatic toxicity test

**Precaution:** May react with strong oxidizing agents (e.g., chlorates, nitrates, peroxides)

**Hazardous Decomp. Prods.:** Combustion prods.: CO<sub>2</sub>, water vapor; incomplete combustion prods.: CO

NFPA: Health 0; Flammability 1; Reactivity 0

**Storage:** Keep container closed; do not pressurize, cut, or weld containers or expose to heat, flame, sparks, static electricity, or ignition sources; containers may explode

**Chevron Clarity® Synthetic Paper Machine Oil ISO 320** [Chevron Prods.]

*Chem. Descrip.:* 1-Decene, homopolymer, hydrogenated (< 60%), C8, C12 olefin polymer, hydrogenated (> 38%), additives (< 2%)

*Uses:* Lubricant for pulp/paper machines, extreme temp. bearing and circulating oil systems, gear boxes, dryer section accessories, calender rolls, high temp. air compressors, high pressure hydraulic pumps; better EP props.; high temp. and oxidation stability; long lubricant life; superior wear protection; exc. water separability, foam inhibition

**Chevron HiD 9660** [Chevron]

*Chem. Descrip.:* HDPE homopolymer resin

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Film resin for coextrusions, cereal box liners, bakery films, barrier pkg., tissue paper replacement; grease barrier properties

*Properties:* Melt flow 0.7 g/10 min; dens. 0.962 g/cc; tens. str. 4400 psi (break); tens. elong. 350%; Elmendorf tear str. 13 g/mil (MD); Dart impact 30 g/mil.

**Chevron PE 4517** [Chevron]

*Chem. Descrip.:* LDPE homopolymer resin

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Coating and laminating resin for carton stock coating and photographic paper

*Properties:* Melt flow 5 g/10 min; dens. 0.923 g/cc.

**Chimin P40** [Cesalpinia]

*Chem. Descrip.:* Sodium alkylpolyglycol ether phosphate

CAS 68071-35-2

*Uses:* Detergent, wetting agent for low foaming prods. in textiles, paper, cleaners, machine washing; alkali-stable

*Properties:* Liq.; 75% conc.; anionic

**Chimin P45** [Cesalpinia]

*Chem. Descrip.:* Sodium alkylpolyglycol ether phosphate

CAS 68071-35-2

*Uses:* Detergent, antistat, wetting agent for textiles, paper, cleaners, machine washing, and personal care prods.

*Properties:* Liq.; 30% conc.; anionic

**Chlorez® 700** [Dover]

*Chem. Descrip.:* Resinous chlorinated paraffin

CAS 63449-39-8

*Uses:* Flame retardant for LDPE, NR, SR, neoprene, SBR, acrylonitrile, ABS, in coatings (traffic paints), inks, plastics, foams, adhesives, paper, and fabric coatings; tackifier in rubber; tens. str. improver in neoprene

*Properties:* Wh. powd., odorless, tasteless; 90% thru 50 mesh; sp.gr. 1.6; bulk dens. 13.5 lb/gal; soften. pt. (B&R) 95-110 C; 70% Cl

**Chlorez® 700-DF** [Dover]

*Chem. Descrip.:* Resinous chlorinated paraffin

CAS 63449-39-8

*Uses:* Flame retardant for paints, printing inks, plastics, foams, adhesives, paper and fabric coatings

*Properties:* Wh. flakes; sp.gr. 1.6; soften. pt. (B&R) 95-110 C; ref. index 1.54-1.55 (105 C); 70% Cl

**Chlorez® 700-S** [Dover]

*Chem. Descrip.:* Resinous chlorinated paraffin

CAS 63449-39-8

*Uses:* Flame retardant in coatings, inks, plastics, foams, adhesives, paper, and fabrics

*Properties:* Wh. powd.; 90% thru 50 mesh; sp.gr. 1.6; bulk dens. 13.5 lb/gal; soften. pt. (B&R) 95-110 C; 70% Cl

**Chlorez® 700-SS** [Dover]

*Chem. Descrip.:* Resinous chlorinated paraffin

CAS 63449-39-8

*Uses:* Flame retardant with improved thermal stability for use in HIPS, PE, PP, PS and for coatings, inks, foams, adhesives, paper, fabrics

*Properties:* Wh. powd.; 90% thru 50 mesh; sp.gr. 1.6; bulk dens. 14 lb/gal; soften. pt. (B&R) 105-120 C; 71% Cl

**Chlorez® 700-SSNP** [Dover]

*Chem. Descrip.:* Resinous chlorinated paraffin

CAS 63449-39-8

*Uses:* Flame retardant for coatings, inks, plastics, foams, paper, and fabrics

*Properties:* Wh. powd.; odorless; 95% thru 50 mesh; sol. in aromatic and chlorinated solvs.; limited/no sol. in lower alcohols, glycols, glycerins, and water; sp.gr. 1.6; dens. 13.5 lb/gal; soften. pt. (R&B) 120 C; 71.5% chlorine

**Chlorez® 725-S** [Dover]

*Chem. Descrip.:* Resinous chlorinated paraffin

CAS 63449-39-8

*Uses:* Flame retardant for coatings, inks, plastics, foams, adhesives, paper, and fabrics; improved stability and higher soften. pt.

*Properties:* Wh. powd.; 90% thru 50 mesh; sp.gr. 1.6; bulk dens. 14 lb/gal; soften. pt. (B&R) 120-140 C; 71% Cl

**Chlorez® 760** [Dover]

*Chem. Descrip.:* Resinous chlorinated paraffin

CAS 63449-39-8

*Uses:* Flame retardant for LDPE, PP, olefins, styrenes, adhesives, wire and cable, coatings, inks, foams, paper, fabrics

*Properties:* Wh. powd.; 90% thru 50 mesh; sp.gr. 1.7; bulk dens. 14 lb/gal; soften. pt. (B&R) 160 C; 74% Cl

**Chlorostain BR** [Bayer/Industrial Chems.]

*Chem. Descrip.:* Guanidine deriv. coated extruded granules

*Uses:* Security reacting agent for use in security papers; develops a reddish-brn. stain when an ink eradicator is applied

*Properties:* Wh. to grayish min. foam; sol. in acidic conditions; sp.gr. 1.19; pH 1.5-2.0

*Storage:* 2 yr min. stability

**Chlorostain™ BR Liq.** [Bayer/Industrial Chems.]

*Uses:* Reacting agent for security papers; becomes brn. or orange when treated with commercial ink eradicators contg. a hypochlorite sol'n.

*Properties:* Liq.

**Chlorostain™ Blue RR Powd.** [Bayer/Industrial Chems.]

*Uses:* Reacting agent for security papers; becomes brn. or orange when treated with commercial ink eradicators contg. a hypochlorite sol'n.

**Chlorostain OR Liq.** [Bayer/Industrial Chems.]

*Chem. Descrip.:* Sulfonic acid deriv.

- Uses:* Security reacting agent for use in security papers; develops an orange-brn. stain when an ink eradicator is applied  
*Properties:* Dk. liq.; misc. in water in all proportions; dens. 9.5 lb/gal (20 C); visc. < 50 cps (20 C); pH 8; weakly anionic  
*Storage:* 1 yr min. stability
- CHT Prisulon SNP-113S** [Catawba-Charlab]  
*Uses:* Thickener for transfer paper printing; syn.
- CHT Rapidoprint M-4** [Catawba-Charlab]  
*Uses:* Leveling agent for transfer paper printing
- Cithrol A** [Croda Chem. Ltd; Croda Oleochems.]  
*Chem. Descrip.:* PEG-8 oleate  
 CAS 9004-96-0  
*Uses:* W/o emulsifier, dispersant, antistat for textiles, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants  
*Properties:* Amber liq.; slight agreeable odor; sol. in wh. spirit and liq. paraffin; completely sol. in xylol, ethyl acetate, methylated spirits, oleic acid; disp. in water; sp.gr. 1.013; HLB 11.4; flash pt. 215 C; sapon. no. 85-93; pH 6.5-7.5 (10%); 97% conc.; nonionic
- Cithrol DGML N/E** [Croda Chem. Ltd; Croda Oleochems.]  
*Chem. Descrip.:* Diethylene glycol laurate  
 CAS 9004-81-3; EINECS/ELINCS 205-468-1  
*Uses:* W/o emulsifier, dispersant, antistat for textiles, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants  
*Properties:* Paste; HLB 6.1; 100% conc.; nonionic
- Cithrol DGMS N/E** [Croda Chem. Ltd; Croda Oleochems.]  
*Chem. Descrip.:* PEG-2 stearate  
 CAS 9004-99-3; EINECS/ELINCS 203-363-5  
*Uses:* W/o emulsifier, dispersant, antistat for skin care prods., textiles, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants  
*Properties:* Solid; HLB 4.4; 100% conc.; nonionic
- Cithrol EGDS N/E** [Croda Chem. Ltd; Croda Oleochems.]  
*Chem. Descrip.:* Glycol distearate  
 CAS 627-83-8; EINECS/ELINCS 211-014-3  
*Uses:* W/o emulsifier, dispersant, antistat for textiles, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants; pearlescent  
*Properties:* Wh. to cream pastilles; HLB 1.5; 100% conc.; nonionic
- Cithrol EGMS N/E** [Croda Chem. Ltd; Croda Oleochems.]  
*Chem. Descrip.:* Glycol stearate  
 CAS 111-60-4; EINECS/ELINCS 203-886-9  
*Uses:* W/o emulsifier, dispersant, antistat for textiles, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants; pearlescent  
*Properties:* Wh. to cream pastilles; HLB 2.0; 100% conc.; nonionic
- Cithrol EGMS S/E** [Croda Chem. Ltd; Croda Oleochems.]  
*Chem. Descrip.:* Ethylene glycol stearate SE  
 CAS 86418-55-5  
*Uses:* W/o emulsifier, dispersant, antistat for textiles, paper processing, cutting oils, polishes, emulsion cleaners, rubber latex, wool lubricants  
*Properties:* Solid; HLB 2.9; 100% conc.; anionic
- Citroflex® 2** [Morflex]  
*Chem. Descrip.:* Triethyl citrate  
 CAS 77-93-0; EINECS/ELINCS 201-070-7  
*Uses:* Plasticizer for cellulose acetate, cellulose acetate butyrate, cellulose nitrate, chlorinated rubber, ethyl cellulose, PVAc, PVB, PVC, PVP, PVdC, PET, poly(acrylate/methacrylate), dammar, ester gums; lacquer formulations; fragrance carrier in perfumes, deodorants, shampoos, detergents; solvent in household, I&I cleaners; film-former, plasticizer, solvent for inks, adhesives, coatings; food-contact paper/paperboard; environmentally friendly; enhances grease resist.; lightfast  
*Regulatory:* FDA 21CFR §175.300, 175.320, 175.380, 175.390, 176.170, 177.1210, 181.27, 182.1911, 184.1911; kosher  
*Properties:* Clear liq., essentially odorless; sol. in toluene, 6.5 g/100 ml in water; insol. in heptane; m.w. 276.3; sp.gr. 1.135-1.139; visc. 35 cps; pour pt. -45 C; flash pt. (COC) 155 C; ref. index 1.440-1.442; 99% assay  
*Toxicology:* LD50 (oral, rat) 7 cc/kg, (IP, mice) 1750 mg/kg  
*Precaution:* Incompat. with oxidizing materials
- Citroflex® A-2** [Morflex]  
*Chem. Descrip.:* Acetyltriethyl citrate  
 CAS 77-89-4; EINECS/ELINCS 201-066-5  
*Uses:* Plasticizer for more polar resins such as cellulosics, polyacrylates, PVAc, polyvinyl butyral, PVC, PVP, PVdC, chlorinated rubber; lightfastness for lacquer formulations; solvent in household, I&I cleaners; solvent, film-former, plasticizer for inks, adhesives, coatings, food pkg. adhesives/coatings/paper/paperboard/polymers; environmentally friendly  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.380, 176.170, 177.1210, 178.3910; kosher  
*Properties:* Clear liq., essentially odorless; sol. in toluene, 0.72 g/100 ml water; m.w. 318.3; sp.gr. 1.135-1.139; visc. 54 cps; pour pt. -43 C; flash pt. (COC) 188 C; ref. index 1.432-1.441; 99% assay  
*Toxicology:* LD50 (oral, rat) 7 cc/kg, (IP, mice) 1150 mg/kg; sl. but transient eye irritant; nonirritating to skin
- Citroflex® A-4** [Morflex]  
*Chem. Descrip.:* Acetyl tri-n-butyl citrate  
 CAS 77-90-7; EINECS/ELINCS 201-067-0  
*Uses:* Plasticizer for PVC, PVdC, esp. food films, medical articles, cellulose nitrate, chlorinated rubber, ethyl cellulose, PVAc, PVB, PVP, PU, poly(acrylate/methacrylate); sol'n. coatings on paperboard and foil; vinyl toys; solvent in household, I&I cleaners; solvent, film-former, and plasticizer for inks, adhesives, coatings; food pkg. adhesives, coatings, paper, polymers; environmentally friendly  
*Regulatory:* FDA 21CFR §172.515, 175.105, 175.300, 175.320, 175.380, 175.390, 176.170, 177.1210, 178.3910, 181.27; kosher  
*Properties:* Clear liq., essentially odorless; sol. in toluene, heptane, < 0.1 g/100 ml water; m.w. 402.5; sp.gr. 1.045-1.055; visc. 33 cps; pour pt. -59 C; flash pt. (COC) 104 C; ref. index 1.441-1.4425; 99% min. assay  
*Toxicology:* LD50 (oral, rat) 30 cc/kg, (IP, mice) 4000 mg/kg; sl. but transient eye irritant; nonirritating to skin
- Citroflex® A-4 Special** [Morflex]  
*Chem. Descrip.:* Acetyl tri-n-butyl citrate  
 CAS 77-90-7; EINECS/ELINCS 201-067-0  
*Uses:* Plasticizer for vinyls, adhesives, coatings; rec. for medical articles and other sensitive applics.; food pkg. adhesives, coatings, paper, polymers; improved long-term stability  
*Regulatory:* FDA 21CFR §172.515, 175.105, 175.300, 175.320, 175.380, 175.390, 176.170, 177.1210, 178.3910, 181.27  
*Toxicology:* LD50 (oral, rat) 30 cc/kg, (IP, mice) 4000 mg/kg
- Clarcel®** [Ceca SA]  
*Chem. Descrip.:* Diatomites  
*Uses:* Filler for papers
- Clar+lon™ 603** [General Chem.]  
*Chem. Descrip.:* Aluminum sulfate (< 50%) and cationic polyelectrolyte UN No. 1760 (DOT)  
*Uses:* Coagulant and flocculant for use in municipal and industrial wastewater treatment, industrial applics. (paper mfg., oil recovery, emulsion breaking, lagoon treatment, coal cleaning); designed to replace inorg. coagulants such as aluminum sulfate, aluminum chloride, ferric sulfate, ferric chloride, and other inorg. salts, and org. coagulants and dual treatment programs; superior P removal, inc. suspended solids removal  
*Properties:* Lt. green or amber clear liq.; negligible odor; completely sol. in water; sp.gr. 1.26; dens. 10.5 lb/gal; f.p. 25 F; m.p. 0 to -5 C; b.p. 101 C; pH 2.2; cationic  
*Toxicology:* LD50 (oral, mouse) 980 mg(Al)/kg; may cause skin, eye, respiratory, and intestinal irritation; may burn eyes; ACGIH TLV 2 mg(Al)/m<sup>3</sup>; recorded human fatal dose 30 g  
*Environmental:* Aquatic toxicity: fatal (fundulus, 36 hr.) 14 ppm; (mosquito fish, 48 hr.) 240 ppm  
*Precaution:* Corrosive; incompat. with alkalis and water reactive materials which cause exothermic reactions; do not store in alloys containing aluminum, magnesium, zinc, and copper  
*Hazardous Decomp. Prods.:* SO<sub>x</sub>, CO, CO<sub>2</sub>, NO<sub>x</sub>  
*Storage:* Store in cool area; protect from freezing
- Clar+lon™ 605** [General Chem.]  
*Chem. Descrip.:* Aluminum sulfate (< 50%) and cationic polyelectrolyte UN No. 1760 (DOT)  
*Uses:* Coagulant and flocculant for use in municipal and industrial wastewater treatment, industrial applics. (paper mfg., oil recovery, emulsion breaking, lagoon treatment, coal cleaning); designed to replace inorg. coagulants such as aluminum sulfate, aluminum chloride, ferric sulfate, ferric chloride, and other inorg. salts, and org. coagulants and dual treatment programs; superior P removal, inc. suspended solids removal  
*Properties:* Lt. green or amber clear liq.; negligible odor; completely sol. in water; sp.gr. 1.24; dens. 10.3 lb/gal; f.p. 25 F; m.p. 0 to -5 C; b.p. 101 C;

pH 2.6; cationic

**Toxicology:** LD50 (oral, mouse) 980 mg(Al)/kg; may cause skin, eye, respiratory, and intestinal irritation; may burn eyes; ACGIH TLV 2 mg(Al)/m<sup>3</sup>; recorded human fatal dose 30 g

**Properties:** Lt. green or amber clear liq.; negligible odor; completely sol. in water; sp.gr. 1.1; dens. 9.2 lb/gal; f.p. 25 F; m.p. 0 to -5 C; b.p. 101 C; pH 2.7; cationic

**Toxicology:** LD50 (oral, mouse) 980 mg(Al)/kg; may cause skin, eye, respiratory, and intestinal irritation; may burn eyes; ACGIH TLV 2 mg(Al)/m<sup>3</sup>; recorded human fatal dose 30 g

**Environmental:** Aquatic toxicity: fatal (fundulus, 36 hr.) 14 ppm; (mosquito fish, 48 hr.) 240 ppm

**Precaution:** Corrosive; incompat. with alkalis and water reactive materials which cause exothermic reactions; do not store in alloys containing aluminum, magnesium, zinc, and copper

**Hazardous Decom. Prods.:** SO<sub>x</sub>, CO, CO<sub>2</sub>, NO<sub>x</sub>

**Storage:** Store in cool area; protect from freezing

**Clar+Ion™ 610M** [General Chem.]

**Chem. Descrip.:** Aluminum sulfate (< 50%) and cationic polyelectrolyte UN No. 1760 (DOT)

**Uses:** Coagulant and flocculant for use in municipal and industrial wastewater treatment, industrial applics. (paper mfg., oil recovery, emulsion breaking, lagoon treatment, coal cleaning); designed to replace inorg. coagulants such as aluminum sulfate, aluminum chloride, ferric sulfate, ferric chloride, and other inorg. salts, and org. coagulants and dual treatment programs; superior P removal, inc. suspended solids removal

**Properties:** Lt. green or amber clear liq.; negligible odor; completely sol. in water; sp.gr. 1.1; dens. 9.2 lb/gal; f.p. 32 F; m.p. 0 to -5 C; b.p. 101 C; pH 2.9; cationic

**Toxicology:** LD50 (oral, mouse) 980 mg(Al)/kg; may cause skin, eye, respiratory, and intestinal irritation; may burn eyes; ACGIH TLV 2 mg(Al)/m<sup>3</sup>; recorded human fatal dose 30 g

**Environmental:** Aquatic toxicity: fatal (fundulus, 36 hr.) 14 ppm; (mosquito fish, 48 hr.) 240 ppm

**Precaution:** Corrosive; incompat. with alkalis and water reactive materials which cause exothermic reactions; do not store in alloys containing aluminum, magnesium, zinc, and copper

**Hazardous Decom. Prods.:** SO<sub>x</sub>, CO, CO<sub>2</sub>, NO<sub>x</sub>

**Storage:** Store in cool area; protect from freezing

**Clar+Ion™ A405P** [General Chem.]

**Chem. Descrip.:** Aluminum sulfate (< 50%) and polyquat. amine (< 50%) UN No. 1760 (DOT)

**Uses:** Coagulant and flocculant for use in potable water treatment, municipal wastewater treatment, industrial water and wastewater treatment, industrial applics. (paper mfg., emulsion breaking, lagoon treatment, coal cleaning); designed to replace inorg. coagulants such as aluminum sulfate, aluminum chloride, ferric sulfate, ferric chloride, and other inorg. salts, and org. coagulants and dual treatment programs; superior P removal, inc. suspended solids removal

**Regulatory:** EPA approved

**Properties:** Lt. green or amber clear liq.; negligible odor; completely sol. in water; sp.gr. 1.31; dens. 10.9 lb/gal; f.p. 10 F; m.p. -14 C; b.p. 101 C; pH 1.7; cationic

**Toxicology:** LD50 (oral, mouse) 980 mg(Al)/kg; may irritate respiratory and GI tracts; conc. sol'ns. may cause burns to digestive tract; may cause skin irritation; may strongly irritate or burn eyes; ACGIH TLV 2 mg(Al)/m<sup>3</sup>;

recorded human fatal dose 30 g

**Environmental:** Aquatic toxicity: fatal (fundulus, 36 hr.) 14 ppm; (mosquito fish, 48 hr.) 240 ppm

**Precaution:** Corrosive; incompat. with alkalis and water reactive materials which cause exothermic reactions; do not store in alloys containing aluminum, magnesium, zinc, copper

**Hazardous Decom. Prods.:** SO<sub>x</sub>, CO, CO<sub>2</sub>

**Storage:** Store in cool area; protect from freezing

**Clar+Ion™ A410P** [General Chem.]

**Chem. Descrip.:** Aluminum sulfate and flocculating agent

CAS 10043-01-3; EINECS/ELINCS 233-135-0

UN No. 1760 (DOT)

**Uses:** Coagulant and flocculant for use in potable water treatment, municipal wastewater treatment, industrial water and wastewater treatment, industrial applics. (paper mfg., emulsion breaking, lagoon treatment, coal cleaning); emulsion breaker; rec. where rapid settling is desired; superior P removal, inc. suspended solids removal

**Regulatory:** EPA approved

**Properties:** Lt. green or amber clear liq.; negligible odor; completely sol. in water; sp.gr. 1.30; dens. 10.8 lb/gal; f.p. 14 F; m.p. -14 C; b.p. 101 C; pH 1.7

**Toxicology:** LD50 (oral, mouse) 980 mg(Al)/kg; may irritate respiratory and GI tracts; conc. sol'ns. may cause burns to digestive tract; may cause skin irritation; may strongly irritate or burn eyes; ACGIH TLV 2 mg(Al)/m<sup>3</sup>; recorded human fatal dose 30 g

**Environmental:** Aquatic toxicity: fatal (fundulus, 36 hr.) 14 ppm; (mosquito fish, 48 hr.) 240 ppm

**Toxicology:** LD50 (oral, mouse) 980 mg(Al)/kg; may irritate respiratory and

- GI tracts; conc. sol'ns. may cause burns to digestive tract; may cause skin irritation; may strongly irritate or burn eyes; ACGIH TLV 2 mg(Al)/m<sup>3</sup>; recorded human fatal dose 30 g  
*Environmental:* Aquatic toxicity: fatal (fundulus, 36 hr.) 14 ppm; (mosquito fish, 48 hr.) 240 ppm  
*Precaution:* Corrosive; incompat. with alkalis and water reactive materials which cause exothermic reactions; do not store in alloys containing aluminum, magnesium, zinc, copper  
*Hazardous Decomp. Prods.:* SO<sub>x</sub>, CO, CO<sub>2</sub>  
*Storage:* Store in cool area; protect from freezing
- Claytone® 2000** [Southern Clay Prods.]  
*Chem. Descrip.:* Organophilic smectite  
 CAS 53320-86-8; EINECS/ELINCS 258-476-2  
*Uses:* Clay for use in paints and coatings, adhesives, caulks, sealants, agriculture, inks, paper, cosmetics, personal care, refractory, foundry, rubber, waste treatment, greases, gelcoats, oil field, household care, laminates, unsat. polyesters; designed for use in a variety of solvs. incl. aliphatic, aromatic, and med. polarity systems  
*Properties:* Off-wh. powd.
- Claytone® LMW** [Southern Clay Prods.]  
*Chem. Descrip.:* Organophilic smectite  
 CAS 53320-86-8; EINECS/ELINCS 258-476-2  
*Uses:* Clay for use in toluene-free or low-toluene nail lacquers, paints and coatings, adhesives, caulks, sealants, agriculture, inks, paper, cosmetics, personal care, refractory, foundry, rubber, waste treatment, greases, gelcoats, oil field, household care, laminates, unsat. polyesters; thickener for low m.w. esters
- Claytone® SO** [Southern Clay Prods.]  
*Chem. Descrip.:* Organophilic smectite  
 CAS 53320-86-8; EINECS/ELINCS 258-476-2  
*Uses:* Visc. builder, suspension control agent for use in paints and coatings, adhesives, caulks, sealants, agriculture, inks, paper, cosmetics, personal care, refractory, foundry, rubber, waste treatment, greases, gelcoats, oil field, household care, laminates, unsat. polyesters; designed for use in silicone oil systems  
*Properties:* Off-wh. powd.
- Cleer-Cote® 625** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Visc. modified waxy corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Film-former providing water holding for papermaking size press, pigmented size press, and paper coatings; provides machine cleanliness and runnability
- CN 104** [Sartomer]  
*Chem. Descrip.:* Epoxy acrylate  
*Uses:* For adhesives, paper coatings, wood coatings, metal coatings, electronics, sealants and inks; high reactivity, chem. resist., film hardness, low color  
*Properties:* Gardner 1 clear liq.; sp.gr. 1.150; visc. 19,300 cps (49 C); 100% oligomer  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- CN 104 A80** [Sartomer]  
*Chem. Descrip.:* Epoxy acrylate oligomer/SR 306 (tripropylene glycol diacrylate) blend  
*Uses:* Used for adhesives, paper coatings, wood coatings, inks, electronics, sealants; exc. flow and gloss;  
*Properties:* Gardner 1 clear liq.; sp.gr. 1.160; visc. 35,600 cps; 80% oligomer, 20% TPGDA  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- CN 104 B80** [Sartomer]  
*Chem. Descrip.:* Epoxy acrylate oligomer/SR 238 (hexanediol diacrylate) blend  
*Uses:* Offers flexibility for paper coatings, wood coatings, metal coatings, inks, adhesives, electronics, and sealants; high reactivity, chem. resist.  
*Properties:* Gardner 1 clear liq.; sp.gr. 1.150; visc. 12,600 cps; 80% oligomer, 20% HDDA  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- CN 111** [Sartomer]  
*Chem. Descrip.:* Epoxidized soybean oil acrylate, with 3740 ppm MEHQ  
*Uses:* Offers flexibility, pigment wetting, high adhesion for paper coatings, wood coatings, metal coatings, concrete polymers, inks  
*Properties:* Gardner 4 lt. yel. liq.; sp.gr. 1.040; visc. 23,000 cps; 99% reactive esters  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- CN 112 C60** [Sartomer]  
*Chem. Descrip.:* Epoxy novolak acrylate/SR 351 (trimethylol propane triacrylate) blend  
*Uses:* Used for inks, solder resists and coatings (metal, paper, wood); offers high heat resist.  
*Properties:* Gardner < 2 clear liq.; sp.gr. 1.190; visc. 23,000 cps; 60% oligomer, 40% TMPTA  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- CN 117** [Sartomer]  
*Chem. Descrip.:* Modified epoxy acrylate  
*Uses:* For use in screen and lithographic inks, paper/plastic/wood coatings, laminating adhesives; fast cure oligomer; tough, high gloss; good flexibility; chem. and abrasion resist.  
*Properties:* APHA 200 color; dens. 9.9 lb/gal; visc. 2500 cps (65 C); tens. str. 5400 psi; modulus 127,000 psi; elong. 6%  
*Toxicology:* Possible skin and eye irritant  
*Storage:* 6 mos shelf life @ 50-90 F, away from direct sunlight, oxidizing agents, and materials that may generate free radicals
- CN 118** [Sartomer]  
*Chem. Descrip.:* Acid modified epoxy acrylate  
*Uses:* For use in screen and lithographic inks, paper/plastic/wood coatings, overprint varnishes; oligomer; exc. pigment wetting; high gloss; water and chem. resist.  
*Properties:* Amber color; visc. 4400 cps (60 C); acid no. 2  
*Toxicology:* Possible skin and eye irritant  
*Storage:* 6 mos. shelf life @ 50-90 F, away from direct sunlight, oxidizing agents, and materials that may generate free radicals
- CN 120** [Sartomer]  
*Chem. Descrip.:* Epoxy acrylate, with 3800 ppm MEHQ  
*Uses:* Used for adhesives (anaerobic, binder, pressure sensitive, structural), coatings (glass, metal, optical, paper, plastic, wood, PVC floor), electronics, inks (flexo and gravure, litho, offset, screen), and sealants; high reactivity, chem. resist.  
*Properties:* Gardner < 2 clear liq.; sp.gr. 1.150; visc. 26,200 cps (65 C); 100% oligomer  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- CN 120 A75** [Sartomer]  
*Chem. Descrip.:* Epoxy acrylate blended with SR 306 (tripropylene glycol diacrylate), 3800 ppm MEHQ  
*Uses:* Used for adhesives (anaerobic, binder, pressure sensitive, structural), coatings (glass, metal, optical, paper, plastic, wood, PVC floor), electronics, inks (flexo and gravure, litho, offset, screen), and sealants; high reactivity, chem. resist.  
*Properties:* Gardner < 2 clear liq.; sp.gr. 1.128; visc. 8700 cps (49 C); 75% oligomer, 25% TPGDA  
*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F
- CN 120 B60** [Sartomer]  
*Chem. Descrip.:* Epoxy acrylate/SR 238 (1,6 hexanediol diacrylate) blend, 1200 ppm MEHQ  
*Uses:* Used for hard coatings (glass, metal, optical, plastic, PVC floor, paper, wood), electronics, and inks (flexo, gravure, litho, offset, screen), sealants, adhesives (anaerobic, binder, pressure sensitive, structural); offers adhesion; chem., abrasion, and water resist.; high reactivity  
*Properties:* Gardner 1 clear liq.; visc. 520 cps
- CN 120 B80** [Sartomer]  
*Chem. Descrip.:* Epoxy acrylate blended with SR 238 (hexanediol diacrylate), 3800 ppm MEHQ  
*Uses:* Used for adhesives (anaerobic, binder, pressure sensitive, structural), coatings (glass, metal, optical, paper, plastic, wood, PVC floor), electronics, inks (flexo and gravure, litho, offset, screen), and sealants; high reactivity, chem. resist.  
*Properties:* Gardner < 2 clear liq.; sp.gr. 1.124; visc. 7200 cps (49 C); 80% oligomer, 20% HDDA  
*Storage:* Store away from direct sunlight, oxidizing agents and materials

which may generate free radicals; storage temps. should not be > 90 F

**CN 120 C60 [Sartomer]**

*Chem. Descrip.:* Epoxy acrylate blended with 40% SR 351 (trimethylolpropane triacrylate), 3800 ppm MEHQ

*Uses:* Used for adhesives (anaerobic, binder, pressure sensitive, structural), coatings (glass, metal, optical, paper, plastic, wood, PVC floor), electronics, inks (flexo and gravure, litho, offset, screen), and sealants; fast cure response, film hardness, water and abrasion resist.

*Properties:* Gardner < 2 clear liq.; sp.gr. 1.146; visc. 8200 cps (49 C); 60% oligomer, 40% TMPTA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 120 C80 [Sartomer]**

*Chem. Descrip.:* Epoxy acrylate blended with SR 351 (trimethylolpropane triacrylate), 3800 ppm MEHQ

*Uses:* Used for adhesives (anaerobic, binder, pressure sensitive, structural), coatings (glass, metal, optical, paper, plastic, wood, PVC floor), electronics, inks (flexo and gravure, litho, offset, screen), and sealants; high reactivity, chem. resist.

*Properties:* Gardner < 2 clear liq.; sp.gr. 1.142; visc. 27,500 cps (49 C); 80% oligomer, 20% TMPTA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 120 D80 [Sartomer]**

*Chem. Descrip.:* Epoxy acrylate blended with SR 9020 (glycerylpropoxy triacrylate), 3800 ppm MEHQ

*Uses:* Used for adhesives (anaerobic, binder, pressure sensitive, structural), coatings (glass, metal, optical, paper, plastic, wood, PVC floor), electronics, inks (flexo and gravure, litho, offset, screen), and sealants; high reactivity, chem. resist.

*Properties:* Gardner < 2 clear liq.; sp.gr. 1.138; visc. 39,300 cps (49 C); 80% oligomer, 20% GPTA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 120 E50 [Sartomer]**

*Chem. Descrip.:* Epoxy acrylate blended with SR 454 (ethoxylated TMPTA), 3800 ppm MEHQ

*Uses:* Used for adhesives (anaerobic, binder, pressure sensitive, structural), coatings (glass, metal, optical, paper, plastic, wood, PVC floor), electronics, inks (flexo and gravure, litho, offset, screen), and sealants; high reactivity, chem. resist.

*Properties:* Gardner < 2 clear liq.; sp.gr. 1.101; visc. 2600 cps (49 C); 50% oligomer, 50% EOTMPTA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 120 M50 [Sartomer]**

*Chem. Descrip.:* Epoxy acrylate/SR 339 (2-phenoxyethyl acrylate) blend with 3800 ppm MEHQ

*Uses:* Used for hard coatings (glass, metal, optical, plastic, PVC floor, paper, wood), electronics, and inks (flexo, gravure, litho, offset, screen), sealants, adhesives (anaerobic, binder, pressure sensitive, structural), polymer concrete; offers adhesion; chem., abrasion, and water resist.; high reactivity

*Properties:* Clear liq.; visc. 450 cps

**CN 124 [Sartomer]**

*Chem. Descrip.:* Epoxy acrylate with inhibitor

*Uses:* Used for hard coatings (glass, metal, optical, plastic, PVC floor, paper, wood), electronics, and inks (flexo, gravure, litho, offset, screen), sealants, adhesives (anaerobic, binder, pressure sensitive, structural); offers adhesion; chem., abrasion, and water resist.; high reactivity

*Properties:* Gardner 1 clear liq.; visc. 870,000,000 cps

**CN 292 [Sartomer]**

*Chem. Descrip.:* Polyester acrylate with 140 MEHQ

*Uses:* Used for coatings (paper, wood, plastics), and flexo inks; low visc. oligomer; offers chem., abrasion, and water resist.; impact str.; flexibility; weatherability

*Properties:* APHA 65 clear; sp.gr. 1.102 visc. 515 cps; ref. index 1.4653

**CN 381 [Sartomer]**

*Chem. Descrip.:* Reactive amine coinitor

*Uses:* Photoinitiator synergists for coatings (metal, paper, plastics) and inks (litho, offset, silk screen); fast cure

*Properties:* Gardner 6 clear liq.; sp.gr. 1.01 (20 C); visc. 95 cps; flash pt. > 100 C

**CN 383 [Sartomer]**

*Chem. Descrip.:* Monofunctional reactive amine with 875 ppm MEHQ

*Uses:* Coinitiator; synergist used with a photosensitizer such as benzophenone to promote rapid cure under UV light for dry offset lithographic inks and coatings, silk screen inks and varnishes, and overprint varnishes for paper, board, plastics, and metals

*Properties:* APHA 225 sl. hazy liq.; sp.gr. 0.9903; visc. 18 cps; amine no. 135; 99% reactive esters

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 384 [Sartomer]**

*Chem. Descrip.:* Difunctional amine with 920 ppm MEHQ

*Uses:* Coinitiator; synergist used with a photosensitizer to promote rapid cure under UV light for dry offset lithographic inks and coatings, silk screen inks and varnishes, and overprint varnishes for paper, board, plastics, and metals

*Properties:* APHA 100 clear liq.; sp.gr. 1.0534; visc. 115 cps; amine no. 103; 99% reactive esters

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 953 B70 [Sartomer]**

*Chem. Descrip.:* Urethane acrylate/SR 238 (1,6-hexanediol diacrylate) blend

*Uses:* Oligomer for radiation and peroxide curing; uses incl. anaerobic adhesives, optical/paper/plastic/PVC floor/wood coatings, and inks; chem, water, and heat resist.; nonyellowing

*Properties:* APHA 25 clear liq.; dens. 9.262 lb/gal; visc. 590 cps

**CN 963 A80 [Sartomer]**

*Chem. Descrip.:* Aliphatic urethane acrylate resin/SR 306 (tripropylene glycol diacrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Used for adhesives, coatings (metal, paper, PVC floor, wood), electronics, inks, photoresists; high performance difunctional oligomer; hard, nonyellowing

*Properties:* APHA 100 clear liq.; sp.gr. 1.093; visc. 2100 cps; tens. str. 6000 psi; tens. elong. 16%; 99% reactive esters; 80% oligomer, 20% TPGDA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 963 B80 [Sartomer]**

*Chem. Descrip.:* Urethane acrylate blended with SR 238 (hexanediol diacrylate) and < 400 ppm MEHQ inhibitor

*Uses:* Used for adhesives, coatings (metal, paper, PVC floor, wood), electronics, inks, photoresists; high performance difunctional oligomer; hard, nonyellowing

*Properties:* APHA 100 clear liq.; sp.gr. 1.098; visc. 1600 cps; 99% reactive esters; 80% oligomer, 20% HDDA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 963 E75 [Sartomer]**

*Chem. Descrip.:* Aliphatic urethane acrylate resin/SR 454 (ethoxylated trimethylolpropane triacrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Used for adhesives, coatings (metal, paper, PVC floor, wood), electronics, inks, photopolymers; high performance difunctional oligomer; hard, nonyellowing

*Properties:* APHA 100 clear liq.; sp.gr. 1.104; visc. 2300 cps; tens. str. 9000 psi; tens. elong. 31%; 99% reactive esters; 75% oligomer, 25% EOTMPTA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 963 E80 [Sartomer]**

*Chem. Descrip.:* Urethane acrylate/SR 454 (PEG-3 trimethylolpropane triacrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Used for radiation and peroxide cured adhesives, coatings (metal, paper, PVC floor, wood), electronics (photoresists), inks, photopolymers; hard; non-yellowing; offers weatherability; chem., abrasion, and water resist.; low shrinkage; hardness, impact str.

*Properties:* APHA 35 clear liq.; dens. 9.205 lb/gal; visc. 3300 cps

**CN 963 J85 [Sartomer]**

*Chem. Descrip.:* Urethane acrylate/SR 506 (isobornyl acrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Used for radiation and peroxide cured adhesives, coatings (metal, paper, PVC floor, wood), electronics (photoresists), inks, photopolymers; hard; non-yellowing; offers weatherability; chem., abrasion, and water resist.; low shrinkage; hardness, impact str.

*Properties:* APHA 30 clear liq.; dens. 9.069 lb/gal; visc. 4675 cps

**CN 964 A85** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 306 (tripropylene glycol diacrylate) blend, < 400 ppm MEHQ

*Uses:* Used for radiation and peroxide cured structural adhesives, coatings (paper, PVC floor, wood), elastomers, electronics, screen inks; resilient; non-yellowing; offers weatherability; chem., abrasion, and water resist.; low shrinkage; hardness, impact str.

*Properties:* APHA 45 clear liq.; dens. 9.074 lb/gal; visc. 3470 cps

**CN 970 A60** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate resin/SR 306 (tripropylene glycol diacrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Produces hard, fast curing, solv. resist. UV/EB cured prods., e.g., coatings (metal, paper, wood) and inks (flexo and gravure)

*Properties:* APHA 100 clear liq.; sp.gr. 1.118; visc. 845 cps; tens. str. 10,000 psi; tens. elong. 8%; 60% oligomer, 40% TPGDA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 970 E60** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate resin/SR 454 (PEG-3 trimethylolpropane triacrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Used for coatings (metal, paper, wood) and inks

*Properties:* APHA 100 clear liq.; sp.gr. 1.142; visc. 2200 cps; tens. str. 9000 psi; tens. elong. 13%; 60% oligomer, 40% EOTMPTA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 970 H75** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate resin/SR 256 (2-(2-ethoxyethoxy)-ethyl acrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Used for adhesives, coatings (metal, paper, wood), and inks (flexo and gravure)

*Properties:* APHA 100 clear liq.; sp.gr. 1.145; visc. 1600 cps; tens. str. 7600 psi; tens. elong. 12%; 75% oligomer, 25% EOEEOA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 971 A80** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate resin/SR 306 (tripropylene glycol diacrylate) blend, < 400 ppm MEHQ inhibitor

*Uses:* Produces resilient, fast curing, solv. resist. UV/EB cured prods. for use in paper, wood, and metal coatings, inks, adhesives, solder masks, and encapsulants

*Properties:* APHA 100 clear liq.; sp.gr. 1.088; visc. 2400 cps; tens. str. 3000 psi; tens. elong. 40%; 80% oligomer, 20% TPGDA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 972** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate, < 400 ppm MEHQ inhibitor

*Uses:* Produces flexible, fast curing, solv. resist., UV/EB cured prods. for adhesives, coatings (metal, paper, wood), elastomers, electronics (encapsulants, photoresists), inks, photopolymers

*Properties:* APHA 100 clear liq.; sp.gr. 1.054; dens. 8.8 lb/gal; visc. 3700 cps; 99% reactive esters

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 973 A80** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate blended with SR 306 (tripropylene glycol diacrylate), < 400 ppm MEHQ inhibitor

*Uses:* Produces highly flexible, fast curing, UV/EB curable films used for adhesives, coatings (metal, paper, wood), elastomers, electronics, inks, photoresists; highly flexible, hydrophobic

*Properties:* APHA 100 clear liq.; sp.gr. 1.013; visc. 10,100 cps; 99% reactive esters; 80% oligomer, 20% TPGDA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 973 H85** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate blended with SR 256 (2-(2-ethoxyethoxy)-ethyl acrylate), < 400 ppm MEHQ inhibitor

*Uses:* Produces highly flexible, fast curing, UV/EB films used for adhesives, coatings (metal, paper, wood), elastomers, electronics, inks, photoresists, photopolymers; hydrophobic

*Properties:* APHA 100 clear liq.; sp.gr. 1.089; visc. 6300 cps; 99% reactive esters; 85% oligomer, 15% EOEEOA

*Storage:* Store away from direct sunlight, oxidizing agents and materials

which may generate free radicals; storage temps. should not be > 90 F

**CN 973 J75** [Sartomer]

*Chem. Descrip.:* Aromatic urethane acrylate blended with SR 506 (isobornyl acrylate), < 400 ppm MEHQ inhibitor

*Uses:* Produces highly flexible, fast curing, UV/EB films for adhesives, coatings (metal, paper, wood), elastomers, electronics, inks, photoresists, photopolymers; hydrophobic

*Properties:* APHA 100 clear liq.; sp.gr. 1.080; visc. 5500 cps; 99% reactive esters; 75% oligomer, 25% IBOA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 978** [Sartomer]

*Chem. Descrip.:* Urethane acrylate, aromatic

*Uses:* Oligomer for adhesives, coatings (metal, paper, wood), elastomers, elec. (photoresists), inks, photopolymers; water resist., low shrinkage, flexible; hydrophobic

*Properties:* APHA 45 clear liq.; dens. 9.007 lb/gal; visc. 3210 cps

**CN 980** [Sartomer]

*Chem. Descrip.:* Urethane acrylate with < 400 ppm MEHQ inhibitor

*Uses:* Produces fast curing, nonyel., hydrolytically stable UV/EB curable prods. used for coatings (metal, paper, PVC floor), inks

*Properties:* APHA 100 clear liq.; sp.gr. 1.078; visc. 19,600 cps; 99% reactive esters

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 980 M50** [Sartomer]

*Chem. Descrip.:* Urethane acrylate blended with 50% SR 339 (2-phenoxyethyl acrylate), < 400 ppm MEHQ inhibitor

*Uses:* Used for coatings (metal, paper, PVC floor), inks; fast cure, hydrolytically stable

*Properties:* APHA 100 clear liq.; sp.gr. 1.051; visc. 183 cps; 99% reactive esters; 50% oligomer, 50% PEA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 981** [Sartomer]

*Chem. Descrip.:* Aliphatic urethane acrylate with < 400 ppm MEHQ inhibitor

*Uses:* Used for UV/EB curable coatings (metal, paper, PVC floor), inks; highly flexible, exc. pigment wetting characteristics

*Properties:* APHA 100 clear liq.; sp.gr. 1.119; visc. 6300 cps; 99% reactive esters

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 981 A75** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 306 (tripropylene glycol diacrylate) blend, < 400 ppm MEHQ

*Uses:* Used for coatings (metal, paper, PVC floor) and inks; highly flexible; non-yellowing; exc. pigment wetting; offers weatherability; chem., abrasion, and water resist.; hardness

*Properties:* APHA 65 clear liq.; dens. 9.154 lb/gal; visc. 710 cps

**CN 981 B88** [Sartomer]

*Chem. Descrip.:* Urethane acrylate blended with 12% SR 238 (1,6-hexanediol diacrylate), < 400 ppm MEHQ inhibitor

*Uses:* Used for UV/EB curable coatings (metal, paper, PVC floor), inks; highly flexible, exc. pigment wetting characteristics

*Properties:* APHA 100 clear liq.; sp.gr. 1.103; visc. 1500 cps; 99% reactive esters; 88% oligomer, 12% HDDA

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

**CN 982 A75** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 306 (tripropylene glycol diacrylate) blend, < 400 ppm MEHQ

*Uses:* Used for coatings (metal, paper, PVC floor), and inks; highly flexible; non-yellowing; exc. pigment wetting; offers weatherability; chem., abrasion, and water resist.; hardness; low shrinkage; impact str.

*Properties:* APHA 30 clear liq.; dens. 9.360 lb/gal; visc. 1115 cps

**CN 982 B88** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 238 (1,6 hexanediol diacrylate), < 400 ppm MEHQ

*Uses:* Used for coatings (metal, paper, PVC floor), and inks; highly flexible; non-yellowing; exc. pigment wetting; offers weatherability; chem., abrasion, and water resist.; hardness

*Properties:* APHA 60 clear liq.; dens. 9.189 lb/gal; visc. 2175 cps

**CN 982 E75** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 454 (PEG-3 trimethylolpropane triacrylate) blend, < 400 ppm MEHQ

*Uses:* Used for coatings (metal, paper, PVC floor), and inks; highly flexible; non-yellowing; exc. pigment wetting; offers weatherability; chem., abrasion, and water resist.; hardness; low shrinkage; impact str.

*Properties:* APHA 30 clear liq.; dens. 9.612 lb/gal; visc. 2175 cps

**CN 982 P90** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 268 (tetraethylene glycol diacrylate) blend, < 400 ppm MEHQ

*Uses:* Used for coatings (metal, paper, PVC floor), and inks; highly flexible; non-yellowing; exc. pigment wetting; offers weatherability; chem., abrasion, and water resist.; hardness; low shrinkage; impact str.

*Properties:* APHA 30 clear liq.; dens. 9.241 lb/gal; visc. 3650 cps

**CN 983** [Sartomer]

*Chem. Descrip.:* Urethane acrylate, < 400 ppm MEHQ

*Uses:* Used for coatings (plastic, wood, paper, floor), inks, and flexible packaging; hard; scratch-resist.; non-yellowing; offers weatherability; optical resist.; water resist.

*Properties:* APHA 50 clear liq.; dens. 9.420 lb/gal; visc. 5150 cps

**CN 983 B88** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 238 (1,6 hexanediol diacrylate), < 400 ppm MEHQ

*Uses:* Used for coatings (plastic, wood, paper, floor), inks, and flexible packaging; hard; scratch-resist.; non-yellowing; offers weatherability; optical resist.; water resist.

*Properties:* APHA 50 clear liq.; dens. 9.282 lb/gal; visc. 750 cps

**CN 985 B88** [Sartomer]

*Chem. Descrip.:* Urethane acrylate/SR 238 (1,6 hexanediol diacrylate), < 400 ppm MEHQ

*Uses:* Used for coatings (flooring, paper, plastics, wood), inks, and flexible packaging; scratch-resist.; non-yellowing; offers weatherability; optical resist.; water resist.

*Properties:* APHA 20 clear liq.; dens. 9.625 lb/gal; visc. 205 cps

**CNC Antifoam 10-FG** [CNC Int'l.]

*Chem. Descrip.:* Silicone aq. emulsion

*Uses:* Antifoam/defoamer for food processing applics., industrial applics. such as paper, textiles, water-phase paints, etc.; defoamer in food-contact paper/paperboard; in resin-bonded filters for food contact

*Regulatory:* FDA 21CFR §176.170, 176.200, 176.210, 177.2260

*Properties:* Wh. visc. emulsion; pH 4-5; 10% act.; nonionic

*Storage:* 4 mos storage stability

**CNC Antifoam 30-FG** [CNC Int'l.]

*Chem. Descrip.:* Silicone aq. emulsion

*Uses:* Antifoam/defoam for paper, textiles, water-phase paints and other industrial uses; defoamer in food-contact paper/paperboard; in resin-bonded filters for food contact

*Regulatory:* FDA 21CFR §176.170, 176.200, 176.210, 177.2260

*Properties:* Wh. visc. emulsion; easily disp. with water; dens. 8.3 lb/gal; pH 4-5; 27-28% act. silicone; nonionic

*Storage:* 4 mos storage stability

**CNC Antifoam 495, 495-M** [CNC Int'l.]

*Chem. Descrip.:* Silicone emulsions

*Uses:* Foam control agent for aq. systems, textile dyeing, paper, water-phase paints, industrial municipal effluents

*Properties:* Wh. emulsion; visc. 1200 cps; pH 7.0; nonionic/anionic Custom prod.

**CNC Defoamer 9-W** [CNC Int'l.]

*Uses:* Defoamer for control of foam in pulp/paper mill effluent

*Properties:* Clear straw-colored liq.; sp.gr. 0.89; dens. 7.4 lb/gal; flash pt. (COC) 120 F; pH 5.5; cloud pt. 35-40 F; 100% act.

**CNC Defoamer 10B** [CNC Int'l.]

*Chem. Descrip.:* Oil-based

*Uses:* Defoamer for kraft screen room and bleach plant applic.

*Properties:* Liq.

**CNC Defoamer 12** [CNC Int'l.]

*Chem. Descrip.:* Nonsilicone oil-based

*Uses:* Defoamer for difficult, foamy high solids or high resin content coating systems, resin or latex mfg./monomer stripping, paper applics.

*Properties:* Liq.

**CNC Defoamer 28** [CNC Int'l.]

*Uses:* Liq. defoamer for sulfate or sulfite pulp systems, brown stock washing

and screening, paper machines, for heavy weight grades, liner board, roofing or flooring stock, corrugated or min.-filled grades; promotes drainage

**CNC Defoamer 30 Series** [CNC Int'l.]

*Uses:* Water-based pulp mill screen defoamer for sulfate or sulfite pulps

*Properties:* Paste or liqs.

**CNC Defoamer 34** [CNC Int'l.]

*Uses:* Liq. defoamer for difficult, foamy high solids or high resin content coating systems, paper applics.

**CNC Defoamer 44 Series** [CNC Int'l.]

*Uses:* Defoamer for coated or heavily surface sized sheet such as wallpaper

*Properties:* Liq.

**CNC Defoamer 59** [CNC Int'l.]

*Uses:* Water-based defoamer for municipal and industrial waste treatment systems, municipal water processing, boiler water, paper and textile mill waste treatment systems

*Properties:* Wh. opaque liq.; sp.gr. ≈ 0.90; dens. ≈ 7.5lb/gal; pH 7.8 (5%)

*Storage:* ≈ 3 mos storage stability; store near R.T.; prolonged storage below freezing will cause some settling or solidification; warm to 90 F with mixing to restore

**CNC Defoamer 67** [CNC Int'l.]

*Uses:* Water-based liq. defoamer for paper and paperboard.

**CNC Defoamer 69** [CNC Int'l.]

*Uses:* Water-based liq. defoamer for paper and paperboard, min. or pigment-filled paper coatings, food pkg. adhesives, coatings and liners for food containers

**CNC Defoamer 97** [CNC Int'l.]

*Chem. Descrip.:* Water-based nonsilicone

*Uses:* Defoamer for clay or pigment-filled paper coatings with protein or latex binders, print pastes for wallpaper; rec. for systems which cannot tolerate silicone or oils

**CNC Defoamer 127** [CNC Int'l.]

*Uses:* Liq. defoamer for paper machine and specialty coating applics.; low cloud pt.

**CNC Defoamer 141** [CNC Int'l.]

*Uses:* Water-based liq. defoamer for pulp/paper mill effluents

**CNC Defoamer 177** [CNC Int'l.]

*Uses:* Liq. defoamer for groundwood pulping

**CNC Defoamer 226** [CNC Int'l.]

*Uses:* Liq. defoamer for sulfate or sulfite pulp systems, brown stock washing and screening

**CNC Defoamer 297** [CNC Int'l.]

*Uses:* Liq. water-extended defoamer for paper machines, for furnishes with high percentages of ground wood or recycled fibers

**CNC Defoamer 309** [CNC Int'l.]

*Uses:* Liq. oil-base defoamer for kraft screen room and bleach plant applic.

**CNC Defoamer 403** [CNC Int'l.]

*Uses:* Conc. defoamer for paper machines, effective for filled, starch-sized, or resin-sized grades; intended for premixing with water

**CNC Defoamer 403A** [CNC Int'l.]

*Chem. Descrip.:* Conc. nonsilicone

*Uses:* Antifoam/defoamer for pulp/paper mill systems, water-based coatings and adhesives; defoamer for water treatment, industrial effluents, boiler and cooling water, and boil-out treatments; for applics. where waxes, fats, or petrol. oils are undesirable; penetrating and dispersing components aid corrosion resist. and in reducing org. deposits

*Regulatory:* FDA 21CFR §176.210

*Properties:* Amber clear liq.; sp.gr. 0.87; dens. 7.5 lb/gal; cloud pt. ≈ 35 F; flash pt. (TCC) > 200 F

*Storage:* 6 mos storage stability; store near R.T.; avoid temp. extremes; if frozen, warm to 90 F to restore to original clarity and effectiveness

**CNC Defoamer 407** [CNC Int'l.]

*Uses:* Defoamer for paper applics. for difficult, foamy high solids, or high resin content systems

*Properties:* Liq.

**CNC Defoamer 477** [CNC Int'l.]

*Uses:* Conc. defoamer for paper machines, effective for filled, starch-sized, or resin-sized grades; intended for premixing with water

**CNC Defoamer 505** [CNC Int'l.]

*Uses:* Liq. defoamer for paper machine and specialty coating applics.; low cloud pt.

**CNC Defoamer 546** [CNC Int'l.]

*Uses:* Liq. defoamer for paper machine and specialty coating applics.; low

- cloud pt.
- CNC Defoamer 1030** [CNC Int'l.]  
*Uses:* Conc. liq. defoamer for heavy weight paper grades, linear board requiring good drainage
- CNC Defoamer 1037** [CNC Int'l.]  
*Uses:* Liq. brownstock washer drainage defoamer for paper industry
- CNC Defoamer 1066** [CNC Int'l.]  
*Uses:* Liq. brownstock washer drainage defoamer for paper industry
- CNC Defoamer 1090** [CNC Int'l.]  
*Uses:* Liq. brownstock washer drainage defoamer for paper industry
- CNC Defoamer 1191** [CNC Int'l.]  
*Uses:* Liq. oil-based defoamer for aq. systems, paper machines, for heavy weight grades, liner board, roofing or flooring stock, corrugated or min.-filled grades, for glues, adhesive, or binder formulations; promotes drainage
- Coatmaster® K50F** [Grain Processing]  
*Chem. Descrip.:* Ethylated corn starch  
*Uses:* Used for size press and/or coating for paper or board; food-contact paper/paperboard; typically requires thinning in-house  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Wh. fine powd., flash-dried form; bulk dens. 31 lb/ft<sup>3</sup> (loose), 39 lb/ft<sup>3</sup> (packed); pH 6; 11% moisture
- Coatmaster® K61F** [Grain Processing]  
*Chem. Descrip.:* Ethylated corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Premium prod. for use at the size press; food-contact paper/paperboard; resist. to congealing on cooling; provides better holdout, reducing penetration and consumption of coatings, inks, varnishes, etc. which may be applied later  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Wh. fine powd.; bulk dens. 31 lb/ft<sup>3</sup> (loose), 39 lb/ft<sup>3</sup> (packed); pH 7.0; 10% moisture
- Coatmaster® K500** [Grain Processing]  
*Chem. Descrip.:* Ethylated corn starch  
*Uses:* Used for size press and/or coating for paper or paperboard; food-contact paper/paperboard; typically requires thinning in-house  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Wh. gran. powd.; bulk dens. 39 lb/ft<sup>3</sup> (loose), 48 lb/ft<sup>3</sup> (packed); pH 6; 11% moisture
- Cogum®** [Showa Highpolymer]  
*Chem. Descrip.:* Acrylic resin aq. sol'n.  
*Uses:* For dry paper reinforcement; adhesive for textile printing; textile finishing; remoistening adhesive
- Colloid™ 60** [Rhodia]  
*Uses:* Antifoam, defoamer for water-based systems employing resin latex binders, e.g., for pressure-sensitive adhesives, gravure inks, elastomeric coatings, clear finishes, saturants; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles; defoamer in food-contact coatings, paper/paperboard  
*Use Level:* 0.3-0.8% (high foam systems), 0.1% (general)  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210, 178.3400; EPA compliance  
*Properties:* Pale yel. cloudy liq.; readily disp.; sp.gr. 0.89; visc. 130 cps; pH 6 (5%); VOC 150 g/l; 100% act.  
*Toxicology:* TSCA listed
- Colloid™ 202** [Rhodia HPCII]  
*Chem. Descrip.:* Med. m.w. sodium polyacrylate sol'n.  
 CAS 9003-04-7  
*Uses:* Builder additive for detergents; antiredeposition aid for laundry applics.; dispersion aid for dishwasher formulations; process and anticaking aid for dry prods., spray applics. to improve bead str. and reduce fines; sequestrant for liq. or dry formula; suitable for dry laundry detergents, light-duty detergents, hand washing, dishwasher liqs.; food pkg. adhesives, coatings, paper/paperboard  
*Use Level:* 1-5% (phosphate replacement); 2% (antiredeposition aid, anticaking aid, process aid)  
*Regulatory:* FDA 21CFR §173.310, 175.105, 175.300, 175.320, 176.170, 176.180; EPA compliance  
*Properties:* Lt. straw-colored liq.; water-sol.; m.w. 60,000; sp.gr. 1.25; visc. 2000 cps; pH 8.0; 35% solids; anionic  
*Storage:* Not affected by freeze-thaw cycling; can be stored over wide temp. range; if prod. freezes, warm to 100 F and mix well before using
- Colloid 488T** [TIC Gums]

- Chem. Descrip.:* Sodium alginate  
 CAS 9005-38-3  
*Uses:* Gellant, film-former, emulsifier, suspending agent for foods (dairy prods., extruded foods, beverages, salad dressings, dessert gels, sauces, frozen desserts, bakery prods.), cosmetics/pharmaceuticals (lotions, vitamin suspension), industrial (paper coatings, adhesives, textile printing, dyeing, explosives); reactive with milk  
*Use Level:* 0.3-0.5% (pie fillings)  
*Properties:* Sol. in cold water
- Colloid™ 581B** [Rhodia]  
*Chem. Descrip.:* Silicone-free  
*Uses:* Defoamer providing quick foam knock-down in high-surfactant polymerizations for pressure-sensitive adhesives, gravure inks; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives; low carryover into compounding; exc. compat.  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210  
*Properties:* 100% act.
- Colloid 602** [TIC Gums]  
*Chem. Descrip.:* Propylene glycol alginate  
 CAS 9005-37-2  
*Uses:* Gellant, film-former, emulsifier, suspending agent for foods (dairy prods., extruded foods, beverages, salad dressings, dessert gels, sauces, frozen desserts, bakery prods.), cosmetics/pharmaceuticals (lotions, vitamin suspension), industrial (paper coatings, adhesives, textile printing, dyeing, explosives); reactive with milk  
*Properties:* Sol. in cold water
- Colloid™ 643** [Rhodia]  
*Uses:* Defoamer for paints and coatings; defoamer in food-contact coatings, paper/paperboard; quick bubble break  
*Use Level:* 2-6 lb/100 gal (paint)  
*Regulatory:* FDA 21CFR §176.180, 176.200, 176.210; EPA compliance  
*Properties:* Lt. tan opaque liq.; sp.gr. 0.85; visc. 800 cps; VOC 25 g/l; 100% act.  
*Toxicology:* TSCA listed  
*Storage:* Store @ 50-100 F; mix before use
- Colloid™ 646** [Rhodia]  
*Uses:* Defoamer for syn. latexes, general paints, board coatings, gravure inks, pressure-sensitive adhesives, clear coats, PVAc, vinyl acrylic, acrylic emulsion compds., food-contact coatings/paper; food pkg. adhesives; emulsifiable  
*Use Level:* 2.5-5.0 lb/100 gal (adhesives, paints)  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210; EPA compliance  
*Properties:* Lt. gray opaque liq.; sp.gr. 0.91; visc. 250 cps; pH 7.7 (5% disp.); 100% act.  
*Toxicology:* TSCA listed  
*Storage:* May be stored over wide temp. range; storage above 4 C rec.; if prod. solidifies due to cold, warm to R.T. and mix well before use
- Colloid™ 675** [Rhodia]  
*Uses:* Defoamer for stripping, foam knock-down, and latex handling for pressure-sensitive adhesives, gravure inks, paints; defoamer for food-contact coatings, paper/paperboard; food pkg. adhesives; easily dispersible; multi-component; very effective with ethylene copolymers and compds.  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210  
*Properties:* Liq.; 100% act.
- Colloid™ 677** [Rhodia]  
*Uses:* General purpose defoamer for industrial use, esp. resin emulsions, coatings, and adhesives; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives; exc. foam knockdown and prevention  
*Use Level:* 0.05-0.5%  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210; EPA compliance  
*Properties:* Pale yel. opaque liq.; sp.gr. 0.89; visc. 100 cps; pH 6 (5% disp.); VOC 165 g/l  
*Toxicology:* TSCA listed  
*Storage:* Store above 50 F; mix before use
- Colloid™ 679** [Rhodia HPCII]  
*Uses:* Silicone-free antifoam for industrial applics., esp. latex, traffic paints, decorative paints for asphalt, adhesives, inks, wallcoverings; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings; highly compat. in finished prod., no film defects  
*Use Level:* 0.1-0.5%  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180,

176.200, 176.210; EPA compliance

*Properties:* Off-wh. opaque liq.; sp.gr. 0.88; visc. 550 cps; pH 6.5 (5% disp.)

*Toxicology:* TSCA listed

*Storage:* Can be stored over wide temp. range; not affected by freeze-thaw cycling; if prod. freezes, warm to 120 F and mix well before using

**Colloid™ 680** [Rhodia HPCII]

*Uses:* Antifoam for water-based adhesive systems employing resin or latex binders and animal glues, and for paints, cementitious finishes, gravure inks; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings; good leveling

*Use Level:* 0.05-0.5% on total wt.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210; EPA compliance

*Properties:* Pale yel. opaque liq.; sp.gr. 0.90; visc. 200 cps; pH 6.4 (5% disp.)

*Toxicology:* TSCA listed

*Storage:* Can be stored over wide temp. range; storage above 40 F rec.; if prod. freezes, warm slowly to R.T. and mix well before using

**Colloid™ 681F** [Rhodia HPCII]

*Uses:* Easily dispersible antifoam for vinyl-acrylic polymerization; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, paper/paperboard; remains homogeneous

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210; kosher

*Properties:* 96% act.

**Colloid™ 685** [Rhodia]

*Uses:* Readily dispersible defoamer for stripping and processing carboxylated SBR and PVC emulsions; for adhesives, pressure-sensitive adhesives, food pkg. adhesives/paper; defoamer in food-contact coatings, paper/paperboard; more efficient than high-silica defoamers

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210

*Properties:* Liq.; 100% act.

**Colloid™ 796** [Rhodia]

*Uses:* Defoamer for aq. systems, adhesives, pressure-sensitive adhesives, paints, high-gloss paints, inks, paper coatings, effluent treatment; defoamer in food-contact coatings and paper/paperboard; food pkg. adhesives

*Use Level:* 0.05-0.5%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210; EPA compliance

*Properties:* Tan opaque liq.; readily disp. in water; sp.gr. 0.85; visc. 800 cps; pH 7.2 (5%); 100% act.; nonionic

*Toxicology:* TSCA listed

*Storage:* Store at R.T.; prolonged exposure below 20 F may cause settling of solids; warm slowly to 80 F with agitation; do not exceed 100 F when thawing

**Colloid™ 797** [Rhodia]

*Uses:* Defoamer for casein and protein-based coatings and adhesives, screen process inks, nonwoven saturating latex, and effluent applics.; defoamer in food-contact coatings and paper/paperboard; food pkg. adhesives

*Use Level:* 0.05-0.5%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210; EPA compliance

*Properties:* Wh. opaque liq.; readily disp. in water; sp.gr. 0.88; visc. 275 cps; pH 6.5 (5%); 100% act.

*Toxicology:* TSCA listed

*Storage:* Store at R.T.; prolonged exposure below 20 F may cause settling of solids; warm slowly to 80 F with agitation; do not exceed 100 F when thawing

**Colloid™ 929** [Rhodia]

*Chem. Descrip.:* Nonsilicone

*Uses:* Defoamer for gravure inks, aq. urethane coatings, casein and proteinaceous-based adhesives and coatings; defoamer in food-contact coatings and paper/paperboard; food pkg. adhesives; good foam knock-down; very compat.; low visc.; easily dispersible

*Use Level:* 0.05-0.35%

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 178.3120; EPA compliance

*Properties:* Amber opaque liq.; sp.gr. 0.92; visc. 200 cps; pH 7.0 (5%); VOC 15 g/l; 100% act.

*Toxicology:* TSCA listed

*Storage:* Store above 50 F for ease of handling; if prod. solidifies due to cold, warm to R.T. and mix well before using

**Colloid™ 962** [Rhodia]

*Chem. Descrip.:* Nonsilicone

*Uses:* Defoamer for adhesives, pressure-sensitive adhesives, gravure inks, aq. urethane coatings, paper coatings, paints, latex applics.; defoamer in food-contact coatings and paper/paperboard; food pkg. adhesives; general-purpose

*Use Level:* 0.05%

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210; EPA compliance

*Properties:* Lt. amber opaque liq.; readily disp. in water; sp.gr. 0.92; visc. 300 cps; VOC 115 g/l; 100% act.

*Toxicology:* TSCA listed

*Storage:* May be stored over wide temp. range; storage above 40 F rec.; if prod. solidifies, warm slowly to R.T. and mix well before use

**Colloid™ 985** [Rhodia]

*Chem. Descrip.:* Silicone-free

*Uses:* Defoamer for vinyl-acrylic latexes, gravure inks, sealants, adhesives, coatings; defoamer effective with starches, gums, and cellulose; defoamer in food-contact paper coatings; food pkg. adhesives; food-contact paper/paperboard; easily dispersible; nonsettling in drum

*Use Level:* 0.05-0.5%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200; EPA compliance

*Properties:* Lt. yel. liq.; sp.gr. 0.89; visc. 20 cps; pH 6 (5%); 100% act.

*Toxicology:* TSCA listed

*Storage:* Store above 50 F for ease of handling; temp. variations may cause hazing; if prod. solidifies, warm to R.T. and mix well before use

**Colloid™ 991** [Rhodia]

*Uses:* Defoamer used in coatings and in polymer synthesis and stripping; defoamer in food-contact adhesives, coatings, paper/paperboard; High-activity

*Use Level:* 0.05-0.10%

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210; EPA compliance

*Properties:* Lt. tan opaque liq.; sp.gr. 0.91; visc. 100 cps; pH 10 (5% aq.); VOC 200 g/l

*Toxicology:* TSCA listed

*Storage:* Store above 50 F for ease of handling; if prod. solidifies, warm to R.T. and mix well before use

**Colloid™ 999** [Rhodia]

*Chem. Descrip.:* Silicone-free, mineral oil-free

*Uses:* Defoamer for compounded systems contg. PVA, gelatin, protein, starch, and cellulose; defoamer for flexo inks, aq. systems, latex, elastomeric and clear coatings, gas scrubbers; defoamer in food-contact adhesives, coatings, paper/paperboard; easily dispersible

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210 with use level limitations

*Properties:* Liq.; 100% act.

**Colloid™ 1010** [Rhodia]

*Chem. Descrip.:* Silicone-based

*Uses:* Highly efficient and stable foam control agent for aq. systems incl. food-contact adhesives, coatings, paper/paperboard mfg.; imparts rapid foam knockdown

*Use Level:* 10-150 ppm

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210; EPA 40CFR §180.1001(c)

*Properties:* Wh. opaque liq.; sp.gr. 1.0; visc. 235 cps; pH 9 (5%); VOC 8 g/l; 15% solids

*Toxicology:* TSCA listed

*Storage:* Store above 50 F for optimum handling; protect from freezing; repeated freezing may damage container and thicken the emulsion; thaw slowly to R.T. with strong agitation if frozen

**ColorCoat White 2A™** [Michelman]

*Uses:* Wh. coating for paper; general-purpose; gluable; repulpable

*Regulatory:* FDA compliance

**Compozil™ BMA 0** [Eka Chems.]

*Chem. Descrip.:* Silica sol

*Uses:* Retention aid, drainage aid, and dry str. agent for most fine paper and board applics.; microparticle system based on anionic silica sol in combination with cationic starch; suitable for alkaline and neutral systems

*Properties:* Anionic

**Compozil™ BMA 9** [Eka Chems.]

*Chem. Descrip.:* Surface-modified silica sol

*Uses:* Retention aid, drainage aid, and dry str. agent for most fine paper and board applics.; microparticle system based on anionic silica sol in combination with cationic starch; suitable for all pH ranges

*Properties:* Anionic

**Compozil™ P BMA 780** [Eka Chems.]

*Chem. Descrip.:* Surface-modified structured silica sol with cationic polyacrylamides

*Uses:* Retention aid, drainage aid, and dry str. agent for wood-containing, board, and alkaline fine paper, and for systems with high conductivity and cationic demand; microparticle system; provides microparticle effects without necessity of starch; designed for true nanoparticle interactions with cationic polymers; for all pH ranges

**Compozil™ P BMB** [Eka Chems.]

*Chem. Descrip.:* Surface-modified structured silica sol with cationic polyacrylamides

*Uses:* Retention aid, drainage aid, dry str. agent for wood-containing, board, and alkaline fine paper, and for systems with high conductivity and cationic demand; microparticle system; provides microparticle effects without necessity of starch

*Properties:* Cationic

**Compozil™ S BMA 670** [Eka Chems.]

*Chem. Descrip.:* Surface-modified structured silica sol

*Uses:* Retention aid, drainage aid, and dry str. agent for fine paper and board applics. and for systems with high conductivity and cationic demand; based on newly developed sols in combination with cationic starch; for all pH ranges

*Properties:* Anionic

**Compozil™ S BMA 890** [Eka Chems.]

*Chem. Descrip.:* Surface-modified structured silica sol

*Uses:* Retention aid, drainage aid, and dry str. agent for fine paper and board applics.; based on newly developed sols in combination with cationic starch; for all pH ranges

*Properties:* Anionic

**Conductive Polymer 261® RV** [Nalco]

*Chem. Descrip.:* Quat. ammonium polymer

*Uses:* Conductive coating additive for sensitized papers used in nonimpact reproduction devices such as electrostatic copy machines, computer read-out printers, data retrieval systems, electrostatic communications systems, etc.; antistatic additive; papers treated with this polymer are free of odor and taste

*Use Level:* 0.5-1.5 lbs./3000 ft<sup>2</sup> ream of paper

*Properties:* Colorless to pale yel. visc. liq.; sol. in water, methanol, glacial acetic acid, and methyl cellulosolve; sp.gr. 1.085; dens. 9.05 lb/gal; visc. 8000-12,000 cps; f.p. -10 C; flash pt. nonflamm.; pH 6.5 ± 0.5; 40 ± 1% solids

*Storage:* Unlimited shelf life in unopened drums; freezing and thawing will not affect performance

**Consoplast NY** [Consols]

*Chem. Descrip.:* Self-emulsifiable sol'n. of plasticized nat. syn. resins

*Uses:* Gloss finish with adhesive props. for fabric, paper, leather, thread, or twine; will not yel. at high temps. when used alone or with other materials

**Continex® LH-10** [Continental Carbon]

*Chem. Descrip.:* Carbon black

*Chem. Analysis:* C (99%)

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Rubber reinforcement for truck and high performance tread black, plastics, paper, and printing ink industries; provides improved abrasion resist. props. with lower hysteresis

*Properties:* Blk. amorphous pellets, odorless; insol. in water; sp.gr. 1.7-1.9 (16 C); bulk dens. 20 lb/ft<sup>3</sup>; vapor pressure negligible; nitrogen surf. area 127 m<sup>2</sup>/g; fire pt. 500-700 F

*Toxicology:* OSHA and ACGIH PEL 3.5 mg/m<sup>3</sup>; nuisance dust; inh. of dust may cause temporary discomfort to nose and respiratory tract

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub> from burning

**Continex® N351** [Continental Carbon]

*Chem. Descrip.:* N351 Carbon black

*Chem. Analysis:* C (99%)

CAS 1333-86-4; EINECS/ELINCS 215-609-9

*Uses:* Rubber reinforcement for passenger tread, retread rubber, cable jackets, plastics, paper, and printing ink industries; provides high structure with low hysteresis; very good tens. str. and abrasion resist.; fast mixing compds.

*Properties:* Blk. amorphous pellets, odorless; insol. in water; sp.gr. 1.7-1.9 (16 C); bulk dens. 21.5 lb/ft<sup>3</sup>; vapor pressure negligible; nitrogen surf. area 72 m<sup>2</sup>/g; iodine no. 68; fire pt. 500-700 F

*Toxicology:* OSHA and ACGIH PEL 3.5 mg/m<sup>3</sup>; nuisance dust; inh. of dust may cause temporary discomfort to nose and respiratory tract

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub> from burning

**Contraspum 211/2** [BK Giulini Chemie]

*Chem. Descrip.:* Carbonic acid ester

*Uses:* Defoamer for pulp-deaeration and foam-prevention in production of sized and unsized paper and boards, food-contact paper and boards

*Use Level:* 0.05%

*Regulatory:* BgVV approved

*Properties:* Lt. brn. liq.; emulsifiable in water; sp.gr. 1.0; visc. 80 mPa·s (20 C); pH 9.5 (20 C); 100% act.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* Store indefinitely in closed containers; not susceptible to frost, but store @ < -5 C for handling purposes

**Contraspum 1105** [BK Giulini Chemie]

*Chem. Descrip.:* Alkyl polyalkylene glycol ether

*Uses:* Defoamer for pulp-deaeration and foam-prevention in production of sized and unsized paper and boards; min. oil-free

*Properties:* Ylsh. clear liq.; emulsifiable in water; sp.gr. 1.0; visc. 300 mPa·s (20 C); pH 4.0 (10%); 100% act.; nonionic

*Toxicology:* Nontoxic

*Environmental:* > 90% biodeg.

*Storage:* Unlimited storage in closed containers; not susceptible to frost, but store @ < 2 C for handling purposes

**Contraspum 1217** [BK Giulini Chemie]

*Chem. Descrip.:* Ethylene and propylene oxide condensation prod.

*Uses:* Defoamer for paper coating pigments; silicone-free

*Use Level:* 0.1-0.6%

*Properties:* Colorless clear liq.; emulsifiable in water; sp.gr. 0.9 (20 C); visc. 30 mPa·s (20 C); flash pt. 15 C; pH 5 (10%); 100% act.; nonionic

*Storage:* Unlimited storage @ < 30 C in sealed containers

**Contraspum E 509** [BK Giulini Chemie]

*Chem. Descrip.:* Higher aliphatic alcohols

*Uses:* Emulsion defoamer for stuff-deaeration and foam-prevention, food pkg. paper and boards; min. oil-free

*Use Level:* 0.3%

*Regulatory:* BgVV approved

*Properties:* Wh. disp.; sp.gr. 0.98 (20 C); visc. 300 mPa·s (20 C); pH 8 (20 C); 30% act.; nonionic

*Toxicology:* Nontoxic

*Environmental:* > 90% biodeg.

*Storage:* 3 mos. shelf life @ 2-30 C; away from frost and direct sunlight

**Contraspum E 640** [BK Giulini Chemie]

*Chem. Descrip.:* Higher aliphatic alcohols

*Uses:* Size-protective emulsion defoamer for deaerating matter and destroying foam in paper industry; environmentally friendly; min. oil-free

*Use Level:* 0.05-0.2%

*Properties:* Wh. disp.; misc. with water; sp.gr. 0.98 (20 C); visc. < 300 mPa·s (20 C); pH 10 (20 C); nonionic

*Toxicology:* Nontoxic

*Environmental:* Biodeg.

*Storage:* 3 mos. shelf life @ 2-20 C; sensitive to frost

**Contraspum LPE** [BK Giulini Chemie]

*Chem. Descrip.:* Mixt. of fatty acid derivs. and hydrocarbons

*Uses:* Emulsion defoamer for deaeration and foam-prevention in size press

*Properties:* Ylsh., sl. turbid liq.; emulsifiable in water; sp.gr. 0.9 (20 C); visc. 500 mPa·s (20 C); pH 6 (10%, 20 C); 100% act.; nonionic

*Storage:* Unlimited storage in closed containers

**Contraspum T 50** [BK Giulini Chemie]

*Chem. Descrip.:* Ethylene and propylene oxide condensation prod. with ethylenediamine

*Uses:* Antifoam for deaeration and foam-prevention in size press, food-contact paper/paperboard

*Use Level:* 5-20 g/m<sup>3</sup> size liquor

*Regulatory:* FDA 21CFR §176.120 compliant

*Properties:* Ylsh. clear liq.; emulsifiable in water; sp.gr. 1.0 (20 C); visc. 120 mPa·s (20 C); pH 5; 50% act.; nonionic

*Storage:* Unlimited storage in closed containers

**Copisil®** [Süd-Chemie AG]*Chem. Descrip.:* Bentonite

CAS 1302-78-9; EINECS/ELINCS 215-108-5

*Uses:* Color developer for production of carbonless copy papers, thermoreactive papers, and chem. test papers; fast color development, high color intensity, and good fading resist.**CorTrol™** [Hercules]*Uses:* Oxygen scavenger for pulp/paper mill utility boiler feedwater systems**Cosmic Black 8-S** [Ebonex]*Chem. Descrip.:* Bone black

CAS 8021-99-6

*Uses:* Pigment for paints, coatings, plastics, inks, mortar and cement colors, artists colors, artificial leather and vinyl, coated paper and board, linoleum*Regulatory:* FDA GRAS*Properties:* Blk. powd.; fineness 3-15 µ; readily disp. in aq. and oil-based vehicles; insol. in water; sp.gr. 2.61; oil absorp. 0.42-0.47; 10.3% C*Toxicology:* Prolonged inh. of high concs. may lead to a deposition of tricalcium phosphate crystals in the lung tissue; TSCA listed*Precaution:* Will not support combustion; smolders like charcoal; phosphate content is dissolved in acids*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>**Cosmic Black AP** [Ebonex]*Chem. Descrip.:* Bone black

CAS 8021-99-6

*Uses:* Pigment for paints, coatings, plastics, inks, mortar and cement colors, artificial leather and vinyl, coated paper and board*Regulatory:* FDA GRAS*Properties:* Blk. powd.; fineness 3-15 µ; readily disp. in aq. and oil-based vehicles; insol. in water; sp.gr. 2.52; oil absorp. 0.40-0.43; 10.2% C*Toxicology:* Prolonged inh. of high concs. may lead to a deposition of tricalcium phosphate crystals in the lung tissue; TSCA listed*Precaution:* Will not support combustion; smolders like charcoal; phosphate content is dissolved in acids*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>**Cosmic Black D-2** [Ebonex]*Chem. Descrip.:* Bone black

CAS 8021-99-6

*Uses:* Pigment for paints, plastics, hot stamping foils, artists colors, artificial leather and vinyl, coated paper and board, poster colors, pulp colors, inks, wallpaper printing, casein paint, water colors*Regulatory:* FDA GRAS*Properties:* Blk. finely ground solid; fineness 3-15 µ; readily disp. in aq. and oil-based vehicles; insol. in water; sp.gr. 2.52; oil absorp. 0.46-0.49; 9.6% C*Toxicology:* Prolonged inh. of high concs. may lead to a deposition of tricalcium phosphate crystals in the lung tissue; TSCA listed*Precaution:* Will not support combustion; smolders like charcoal; phosphate content is dissolved in acids*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>**Cosmopon BN** [Cesalpinia]*Chem. Descrip.:* Sodium oleyl sulfosuccinamate*Uses:* Emulsifier for emulsion polymerization; foaming agent for latex emulsions; antigelling and cleaning agents for paper mill felts*Properties:* Paste; 35% conc.; anionic**Covergloss™** [Huber Engineered Materials]*Uses:* High glossing clay for paper/paperboard; promotes exc. coverage and print gloss with premium brightness*Properties:* Spray-dried slurry; 96-99% finer than 2 µ; 0.005% max. 325 mesh residue; visc. 400 cps; brightness (TAPPI) 90-91; pH 6-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture**Crepetrol®** [Hercules]*Chem. Descrip.:* Polymer*Uses:* Creping aid and adhesion aid for tissue/towel*Properties:* Cationic**Crill 1** [Croda Food Services Ltd; Croda Oleochems.]*Chem. Descrip.:* Sorbitan laurate

CAS 1338-39-2; EINECS/ELINCS 215-663-3

*Uses:* Emulsifier; pigment dispersant; cosolvent; wetting agent; antifoam; visc. reducer; mold release; antiblock agent; corrosion inhibitor; lubricant; antistat; used for cosmetics, food and food pkg., insecticides and herbicides, leather treatment; metalworking fluids, oil slick dispersing, paints and inks, pharmaceuticals, plastics, polishes, textiles, paper, adhesives; antifoam for

syrups, calf starters; food pkg. adhesives, coatings, paper; emulsifier in mfg. of food-contact articles

*Use Level:* 0.1-0.2% (calf starters), 0.01-0.05% (syrups)*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.380, 175.390, 176.170, 176.210, 178.3120, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC, UK clearance*Properties:* Pale yel. clear visc. liq.; sol. in ethanol, oleyl alcohol, min. oil; HLB 8.6; acid no. 4-7; sapon. no. 160-175; hyd. no. 330-358; 98% conc.; nonionic*Storage:* Store under cool, dry conditions**Crill 2** [Croda Oleochems.]*Chem. Descrip.:* Sorbitan palmitate

CAS 26266-57-9; EINECS/ELINCS 247-568-8

*Uses:* Emulsifier; pigment dispersant; cosolvent; wetting agent; antifoam; visc. reducer; mold release; antiblock agent; corrosion inhibitor; lubricant; antistat; used for cosmetics, food and food pkg., polishes and cleaners, adhesives; antifoam for syrups, calf starters; food pkg. adhesives, coatings; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard*Regulatory:* FDA 21CFR §175.105, 175.320, 176.210, 178.3120, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC compliance*Properties:* Pale tan hard waxy solid; partially sol. in propylene glycol, ethyl and oleyl alcohols, olive oil, oleic acid; m.p. 46 C; HLB 6.7; sapon. no. 140-150; 98% conc.; nonionic**Crill 3** [Croda Inc; Croda Food Services Ltd; Croda Oleochems.]*Chem. Descrip.:* Sorbitan stearate

CAS 1338-41-6; EINECS/ELINCS 215-664-9

*Uses:* Emulsifier; lubricant; antistat; o/w emulsions; cosmetic and pharmaceutical creams/lotions; polishes; cleaners; insecticides; herbicides; metal cleaners; buffing compds.; textile lubricants; food/food pkg.; emulsifier in mfg. of food-contact articles; emulsifier for shortenings; controls crystallization and prevents fat bloom in chocolate and coatings; emulsion stabilizer in coffee whiteners, whipped desserts; food pkg. adhesives, coatings; defoamer in food-contact paper*Use Level:* 0.5% (chocolate), 0.1-0.2% (coffee whiteners), 0.2-0.4% (shortenings, whipped desserts); 0.5-5%*Regulatory:* FDA 21CFR §172.515, 172.836, 172.842, 173.340, 175.105, 175.320, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC, UK clearance*Properties:* Cream/yel. hard waxy solid; low odor; partially sol. in oleyl alcohol, olive oil, oleic acid; insol. in water; m.p. 54 C; HLB 4.7; acid no. 5-10; sapon. no. 146-157; hyd. no. 235-260; 98% conc.; nonionic*Toxicology:* LD50 (oral, rat) > 31 g/kg; nonirritating to eyes*Storage:* Store under cool, dry conditions**Crill 4** [Croda Inc; Croda Food Services Ltd; Croda Oleochems.]*Chem. Descrip.:* Sorbitan oleate

CAS 1338-43-8; EINECS/ELINCS 215-665-4

*Uses:* W/o emulsifier; wetting agent; pigment dispersant; coupler; antifoam; cosmetic and pharmaceutical applic.; aerosol polishes; insecticidal sprays; inks and surf. coatings; metalworking lubricants; cutting oils; textile lubricants; dry cleaning; oil slick dispersant; food process antifoam; food pkg. adhesives, coatings, paper; emulsifier in mfg. of food-contact articles; emulsion stabilizer for calf starters, syn. creams, whipped desserts; aids wetting/defeathering in poultry*Use Level:* 0.5-5%; 0.2-0.4% (calf starter, whipped dessert); 0.1-0.2% (cream), 175 ppm of scald water (poultry)*Regulatory:* FDA 21CFR §175.105, 175.320, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC compliance*Properties:* Amber visc. liq.; sol. in ethyl, isopropyl, and oleyl alcohols, min. oil, IPM, olive oil, oleic acid; HLB 4.3; acid no. 5.5-7.5; sapon. no. 147-160; hyd. no. 193-209; 98% conc.; nonionic*Toxicology:* LD50 (oral, rat) > 40 g/kg; nonirritating to eyes**Crill 41** [Croda Chem. Ltd; Croda Oleochems.]*Chem. Descrip.:* Sorbitan tristearate

CAS 26658-19-5; EINECS/ELINCS 247-891-4

*Uses:* Food emulsifier; controls crystallization and prevents fat bloom in chocolate and confectioners coatings; in cosmetics, food/food pkg., pesticides, metalworking fluids, pharmaceuticals, polishes and cleaners, textiles; food pkg. adhesives/coatings; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles*Use Level:* 1%*Regulatory:* FDA 21CFR §175.105, 175.320, 176.210, 178.3120, 178.3400;

- 40CFR §180.1001(c)(e) exempt; EEC compliance  
*Properties:* Cream/lyel. solid; m.p. 53 C; HLB 2.1; acid no. 7 max.; sapon. no. 172-185; hyd. no. 60-80; nonionic
- Crillet 43** [Croda Oleochems.]  
*Chem. Descr.:* Sorbitan sesquioleate  
 CAS 8007-43-0; EINECS/ELINCS 232-360-1  
*Uses:* W/o emulsifier, wetting agent, pigment dispersant for cosmetic, pharmaceutical, food, paints, inks, pesticides, metalworking fluids, polishes and cleaners, adhesives, and industrial applics.; food pkg. adhesives, coatings; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 175.320, 176.210, 178.3120; 40CFR §180.1001(c)(e) exempt  
*Properties:* Amber visc. liq.; sol. in oleyl alcohol, min. and olive oil, oleic acid; HLB 3.7; sapon. no. 149-160; 98% conc.; nonionic
- Crillet 45** [Croda Inc; Croda Oleochems.]  
*Chem. Descr.:* Sorbitan trioleate  
 CAS 26266-58-0; EINECS/ELINCS 247-569-3  
*Uses:* W/o emulsifier, wetting agent, pigment dispersant for cosmetic, pharmaceutical, food/food pkg., paints, inks, metalworking fluids, adhesives, and industrial applics.; food pkg. adhesives, coatings; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 175.320, 176.210, 178.3120, 178.3400; 40CFR §180.1001(c)(e) exempt  
*Properties:* Amber visc. liq.; sol. in oleyl alcohol, min. and olive oil, IPM, oleic acid; HLB 1.8; sapon. no. 172-186; 98% conc.; nonionic

*Uses:* Solubilizer; emulsifier; dispersant; wetting agent; used in cosmetics, food and food pkg., pharmaceuticals, adhesives; food pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; often combined with a member of the Crill range in emulsification systems  
*Regulatory:* FDA 21CFR §172.515, 175.105, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC compliance  
*Properties:* Yel. clear liq.; low odor; sol. in water, ethyl and oleyl alcohol, oleic acid; HLB 16.7; acid no. 2 max.; sapon. no. 40-51; hyd. no. 96-108; surf. tens. 38.5 dynes/cm (0.1%); 97% conc.; nonionic
- Crillet 1 NF** [Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 20 NF  
 CAS 9005-64-5  
*Uses:* Solubilizer; emulsifier; dispersant; wetting agent; used in cosmetics, food and food pkg., pharmaceuticals, adhesives; food pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; often combined with a member of the Crill range in emulsification systems  
*Regulatory:* FDA 21CFR §172.515, 175.105, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC compliance  
*Properties:* Yel. clear liq.; low odor; sol. in water, ethyl and oleyl alcohol, oleic acid; HLB 16.7; acid no. 2 max.; sapon. no. 40-51; hyd. no. 96-108; surf. tens. 38.5 dynes/cm (0.1%); 97% conc.; nonionic
- Crillet 2** [Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 40  
 CAS 9005-66-7  
*Uses:* Emulsifier, solubilizer, wetting agent for cosmetic, pharmaceutical, food/food pkg., pesticides, polishes and cleaners, textiles, adhesives, and industrial applics.; food pkg. adhesives; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC compliance  
*Properties:* Yel. pasty liq.; sol. in water, ethanol, oleyl alcohol, oleic acid; partly sol. in IPM, xylene, trichloroethylene; HLB 15.6; acid no. 2 max.; sapon. no. 43-49; hyd. no. 89-105; 97% conc.; nonionic
- Crillet 3** [Croda Inc; Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 60  
 CAS 9005-67-8  
*Uses:* O/w emulsifier for cosmetics/pharmaceuticals; dispersant for insecticides, herbicides, cattle dyes; penetrant; leveling agent; lubricant; antistat; food pkg.; plastics; polishes; cleaners; textiles; adhesives; food emulsifier for icings; starch/protein complexing and aeration agent in cakes; emulsion stabilizer in calf starters, coffee whiteners, margarine; controls crystallization; reduces palate cling in chocolate and coatings; defoamer in food-contact paper/paperboard  
*Use Level:* 0.2-0.4% (cake), 0.1-0.2% (calf starter), 0.5% (chocolate), 0.05-0.1% (coffee whitener); 0.5-5%  
*Regulatory:* FDA 21CFR §172.515, 172.836, 175.105, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC, UK clearance  
*Properties:* Yel. liq. gels to soft solid on cooling; sol. in ethyl, isopropyl, and oleyl alcohol, oleic acid; partly sol. in water; HLB 14.9; acid no. 2 max.; sapon. no. 45-55; hyd. no. 81-96; pH 5-7 (5%); surf. tens. 42.5 dynes/cm (0.1%); 97% conc.; nonionic  
*Toxicology:* LD50 (oral, rat) > 38 g/kg; nonirritating to eyes  
*Storage:* Store under cool, dry conditions
- Crillet 4** [Croda Inc; Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 80 NF  
 CAS 9005-65-6  
*Uses:* Emulsifier, dispersant, solubilizer, lubricant, detergent, antistat, wetting agent for cosmetics, pharmaceuticals, polishes and cleaners, insecticides, leather degreasing, veterinary prods., food pkg., paints, inks, metalworking fluids; adhesives, plastics, textiles, household prods., paper, oil slick dispersants; food emulsifier; controls fat agglomeration in ice cream; solubilizer producing stable vitamin and essential oil emulsions  
*Use Level:* 0.02-0.05% (ice cream), 5-15% of oil or vitamin; 0.5-5%  
*Regulatory:* FDA 21CFR §172.515, 172.623, 172.840, 172.846, 173.340, 175.105, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC, UK clearance  
*Properties:* Yel. amber clear liq.; faint char. odor; sol. in water, ethyl, isopropyl, and oleyl alcohols, oleic acid; HLB 15.0; acid no. 2 max.; sapon. no. 45-55; hyd. no. 65-80; pH 6-7 (5%); surf. tens. 42.5 dynes/cm (0.1%); 97% conc.; nonionic  
*Toxicology:* LD50 (oral, rat) > 38 g/kg; nonirritating to eyes  
*Storage:* Store under cool, dry conditions
- Crillet 11** [Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 21  
 CAS 9005-64-5  
*Uses:* Emulsifier, solubilizer, wetting agent for cosmetic, pharmaceutical, food/food pkg.; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210  
*Properties:* Yel. liq.; sol. in ethanol, oleyl alcohol, oleic acid, kerosene partly sol. in water, IPM, olive oil, xylene, trichloroethylene; HLB 13.3; acid no. 2 max.; sapon. no. 100-115; hyd. no. 225-265; 97% conc.; nonionic
- Crillet 31** [Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 61  
 CAS 9005-67-8  
*Uses:* Emulsifier, solubilizer, wetting agent for cosmetic, pharmaceutical, food, pesticides, polishes, cleaners, textiles, and industrial applics.; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210  
*Properties:* Yel./amber solid; sol. in oleyl alcohol, oleic acid; partly sol. in ethanol, IPM, olive oil, kerosene, xylene, trichloroethylene; partly sol. (gels) in water, min. oil; HLB 9.6; acid no. 2 max.; sapon. no. 98-113; hyd. no. 170-200; 97% conc.; nonionic
- Crillet 35** [Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 65  
 CAS 9005-71-4  
*Uses:* Emulsifier, solubilizer, wetting agent for cosmetic, pharmaceutical, food/food pkg., pesticides, polishes, cleaners, textiles, and industrial applics.; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §172.838, 176.210, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC compliance  
*Properties:* Cream/buff waxy solid; sol. in ethyl and oleyl alcohols, oleic acid, trichloroethylene, partly sol. in water; HLB 10.5; acid no. 2 max.; sapon. no. 88-98; hyd. no. 44-60; surf. tens. 42.5 dynes/cm (0.1%); 97% conc.; nonionic
- Crillet 41** [Croda Oleochems.]  
*Chem. Descr.:* Polysorbate 81  
 CAS 9005-65-6  
*Uses:* Emulsifier, solubilizer, wetting agent for cosmetic, pharmaceutical, food, paints, inks, pesticides, leather treatment, metalworking fluids, polishes and cleaners, textiles, household and industrial prods.; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.210; 40CFR §180.1001(c) exempt  
*Properties:* Amber liq.; sol. in ethanol, oleyl alcohol, IPM, oleic acid, kero-

sene, butyl stearate; partly sol. in water, olive oil, xylene, trichlorethylene; HLB 10.0; acid no. 2 max.; sapon no. 96-104; hyd. no. 134-150; 97% conc.; nonionic

**Crillet 45** [Croda Oleochems.]

*Chem. Descrip.:* Polysorbate 85

CAS 9005-70-3

*Uses:* Emulsifier, solubilizer, wetting agent for cosmetic, pharmaceutical, food/food pkg., paints, inks, pesticides, leather treatment, metalworking fluids, polishes and cleaners, textiles, household and industrial prods.; esp. useful in bath and massage oils and hot oil hair treatments; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §176.210, 178.3400; 40CFR §180.1001(c)(e) exempt

*Properties:* Amber clear visc. liq.; sol. in ethyl and oleyl alcohols, IPM, oleic acid, kerosene, trichlorethylene, butyl stearate; HLB 11.0; acid no. 2 max.; sapon. no. 82-95; hyd. no. 39-52; surf. tens. 41 dynes/cm (0.1%); 97% conc.; nonionic

**Crisanol FA-260** [Christianson SA de CV]

*Chem. Descrip.:* Linear polymer of equal parts oxyethylene and oxypropylene CAS 9003-11-6

*Uses:* Component of adhesives used in articles intended for food manipulation; component of defoaming agents used in mfg. of paper and paperboard; lubricant for textile machinery; for heat treating or processing of plastics, elastomers, thread, etc.; base fluid for elec. industry applics.; reactive intermediate in preparation of resins, plasticizers, modifiers, and surfactants

*Properties:* APHA 100 max. liq.; sol. in water @ < 65 C; sp.gr. 1.035; dens. 8.62 lb/gal; visc. ≈ 260 SUS (38 C); pour pt. -40 C; cloud pt. ≈ 65 C (1% aq.); flash pt. (PMCC) > 190 C; pH 6.5-8.0 (1% aq.); surf. tens. 34-40 dynes/cm (20 C); 0.2% max. water; nonionic

*Toxicology:* Does not irritate skin or mucous membranes

*Storage:* Heated storage tanks preferred if stored outside

**Crisanol FA-660** [Christianson SA de CV]

*Chem. Descrip.:* Linear polymer of equal parts oxyethylene and oxypropylene CAS 9003-11-6

*Uses:* Component of adhesives used in articles intended for food manipulation; component of defoaming agents used in mfg. of paper and paperboard; lubricant for textile machinery; for heat treating or processing of plastics, elastomers, thread, etc.; base fluid for elec. industry applics.; reactive intermediate in preparation of resins, plasticizers, modifiers, and surfactants

*Properties:* APHA 100 max. liq.; sol. in water @ < 50 C; sp.gr. 1.051; dens. 8.75 lb/gal; visc. ≈ 660 SUS (38 C); pour pt. -34 C; cloud pt. ≈ 56 C (1% aq.); flash pt. (PMCC) > 200 C; pH 6.5-8.0 (1% aq.); surf. tens. 35-40 dynes/cm (20 C); 0.2% max. water; nonionic

*Toxicology:* Does not irritate skin or mucous membranes

*Storage:* Heated storage tanks preferred if stored outside

**Crisanol FB-625** [Christianson SA de CV]

*Chem. Descrip.:* Linear polymer of all oxypropylene groups

*Uses:* Component of adhesives used in articles intended for food manipulation; component of defoaming agents used in mfg. of cellophane and coatings for paper and paperboard; component of surf. lubricants in mfg. of metallic articles in contact with food; rubber lubricant; coating for hydraulic brake parts and similar equip.; reactive intermediate in preparation of resins, plasticizers, modifiers, and surfactants; antifoam agent

*Properties:* APHA 100 max. liq.; insol. in water; sp.gr. 1.000; dens. 8.32 lb/gal; visc. ≈ 625 SUS (38 C); pour pt. -32 C; cloud pt. ≈ 10 C (1% aq.); flash pt. (PMCC) > 160 C; pH 6.5-8.0 (1% aq.); surf. tens. 33-38 dynes/cm (20 C); 0.2% max. water

*Toxicology:* Does not irritate skin or mucous membranes

*Storage:* Heated storage tanks preferred if stored outside

**Crisanol FB-1715** [Christianson SA de CV]

*Chem. Descrip.:* Linear polymer of all oxypropylene groups

*Uses:* Component of adhesives used in articles intended for food manipulation; component of defoaming agents used in mfg. of cellophane and coatings for paper and paperboard; component of surf. lubricants in mfg. of metallic articles in contact with food; rubber lubricant; coating for hydraulic brake parts and similar equip.; reactive intermediate in preparation of resins, plasticizers, modifiers, and surfactants; antifoam agent

*Properties:* APHA 100 max. liq.; insol. in water @ R.T.; sp.gr. 1.002; dens. 8.34 lb/gal; visc. ≈ 1715 SUS (38 C); pour pt. -23 C; cloud pt. ≈ 7 C (1% aq.); flash pt. (PMCC) > 180 C; pH 6.5-8.0 (1% aq.); surf. tens. 33-38 dynes/cm (20 C); 0.2% max. water

*Toxicology:* Does not irritate skin or mucous membranes

*Storage:* Heated storage tanks preferred if stored outside

**Crisanol FH-1400** [Christianson SA de CV]

*Chem. Descrip.:* Diol-started linear polymer, oxyethylene (75%), oxypropylene (25%)

*Uses:* Adhesive additive for pkg., transporting, or holding food; defoamer for mfg. of paper/paperboard; lubricant for use on machinery used for food manipulation; for heat treating/processing of plastics, elastomers, thread, etc.; base fluid for elec. industry; textile machinery lubricant; heat transfer fluid; solv.; softener; plasticizer; antiemulsifier; for textile and paper coatings, gravure type lacquer inks for foil coating, nitrocellulose coatings; nonvolatile *Properties:* APHA 100 max. liq.; char. polyol odor; sol. in water @ < 75 C; sp.gr. 1.099; dens. 9.12 lb/gal; visc. ≈ 1400 SUS (38 C); pour pt. 4 C; flash pt. (PMCC) > 210 C; pH 6.5-8.0 (1% aq.); 0.2% max. water

*Toxicology:* Nontoxic

*Storage:* Heated storage tanks rec. if stored outside

**Crisotan NN** [Christianson SA de CV]

*Chem. Descrip.:* Sulfonated naphthalene condensate, sodium salt (75-80%) and sodium sulfates (20-25%)

*Uses:* Used in paper industry to minimize coagulation of pitch in mills using sulfite, semi-chem., or ground-wood pulps; used in pitch dispersion, slime control, size stabilizing, coating fluidizing, and dyeing; tanning aid for leather industry; dye leveler or mordant; dispersant and suspension agent for pigments in emulsion paints; visc. reducer for pigment slurries; may be used in floor cement compositions

*Properties:* Brn. powd.; sol. 10% in water; sp.gr. 0.6; pH 8.0-8.5 (10% aq.); 8% max. moisture

*Toxicology:* Transient skin and eye irritant; dust may irritate respiratory tract; sl. toxic by ing.

*Precaution:* Avoid strong oxidants

*Hazardous Decom. Prods.:* Carbon monoxide, carbon dioxide, sulfur oxides

*Storage:* Hygroscopic; store in closed containers in dry place

**Crisotan NR** [Christianson SA de CV]

*Chem. Descrip.:* Sulfonated naphthalene condensate, sodium salt (94-99%) and sodium sulfates (1-6%)

*Uses:* Used in paper industry to minimize coagulation of pitch in mills using sulfite, semi-chem., or ground-wood pulps; used in pitch dispersion, slime control, size stabilizing, coating fluidizing, and dyeing; tanning aid for leather industry; dye leveler or mordant; dispersant and suspension agent for pigments in emulsion paints; visc. reducer for pigment slurries; may be used in floor cement compositions

*Properties:* Brn. powd.; sol. 10% in water; sp.gr. 0.6; pH 8.0-8.5 (10% aq.); 8% max. moisture

*Toxicology:* Transient skin and eye irritant; dust may irritate respiratory tract; sl. toxic by ing.

*Precaution:* Avoid strong oxidants

*Hazardous Decom. Prods.:* Carbon monoxide, carbon dioxide, sulfur oxides

*Storage:* Hygroscopic; store in closed containers in dry place

**Crisotan R-5** [Christianson SA de CV]

*Chem. Descrip.:* Sulfonated naphthalene condensate, sodium salt (95%) and sodium sulfates (5%)

*Uses:* Dispersant for carbon blk. pigments in latex systems; plasticizer in concrete; mfg. of ceramic bathroom articles; in styrene-butadiene rubber reducing emulsion visc. and coagulation; also used for indirect food additive applics. such as adhesive, resinous and polymeric coatings, component of paper and paperboard in contact with aq., fatty, and dry food, cellophane, sealing gaskets for food containers, perfluorocarbon resins

*Properties:* Lt. tan powd.; sol. 10% in water; sp.gr. 0.68; pH 8.5-9.5 (10% aq.); 5% max. moisture

*Toxicology:* Transient skin and eye irritant; dust may irritate respiratory tract; sl. toxic by ing.

*Precaution:* Avoid strong oxidants

*Hazardous Decom. Prods.:* Carbon monoxide, carbon dioxide, sulfur oxides

*Storage:* Hygroscopic; store in closed containers in dry place

**Crisotan R-5M** [Christianson; Christianson SA de CV]

*Chem. Descrip.:* Condensed naphthalene sulfonate sodium salt (95%) CAS 9084-06-4

*Uses:* Dispersant for carbon blk. pigments in latex systems; plasticizer in concrete; mfg. of ceramic bathroom articles; in styrene-butadiene rubber reducing emulsion visc. and coagulation; also used for indirect food additive

applics. such as adhesive, resinous and polymeric coatings, component of paper and paperboard in contact with aq., fatty, and dry food, cellophane, sealing gaskets for food containers, perfluorocarbon resins

*Properties:* Lt. tan powd.; sol. 10% in water; sp.gr. 0.68; pH 8.5-9.5 (10% aq.); 5% max. moisture; anionic

#### Crystal™ 78 [Crosfield]

*Chem. Descrip.:* Sodium silicate sol'n.

CAS 1344-09-8; EINECS/ELINCS 215-687-4

*Uses:* Pulp/paper; detergents; adhesives; water treatment; soil consolidation; concrete treatments; ceramics; minerals; peroxide bleaching

*Regulatory:* DOT nonregulated; SARA immediate (acute) health hazard

*Properties:* Colorless, translucent, sl. visc. liq.; odorless; completely sol. in water; sp.gr. 1.38-1.40 (20 C); visc. 125-300 cps (20 C); vapor pressure negligible; b.p. 214-216 F; pH 11.2; 37-38.5% solids

*Toxicology:* LD50 (oral, male rat) 2000-3000 mg/kg; alkaline; severely irritating to skin; tissue destruction to eyes if not treated; irritating to respiratory and digestive tract; ing. may cause GI irritation, nausea, vomiting, cramps, diarrhea; TSCA listed

*Precaution:* May react to form deadly CO on contact with certain prods. or their residues; contact with acid can cause gelling and evolution of heat

*Hazardous Decomp. Prods.:* None

HMS: Health 2; Flammability 0; Reactivity 1

*Storage:* Do not store over 50 C for extended periods; keep from freezing; keep container closed; do not store in aluminum containers

#### Crystal™ 82 [Crosfield]

*Chem. Descrip.:* Sodium silicate sol'n.

CAS 1344-09-8; EINECS/ELINCS 215-687-4

*Uses:* Pulp/paper; detergents; adhesives; water treatment; soil consolidation; concrete treatments; ceramics; minerals; peroxide bleaching

*Regulatory:* DOT nonregulated; SARA immediate (acute) health hazard

*Properties:* Colorless, translucent, visc. liq.; odorless; completely sol. in water; sp.gr. 1.40-1.42 (20 C); visc. 300-700 cps (20 C); vapor pressure negligible; b.p. 214-216 F; pH 11.2; 37.45-40.20% solids

*Toxicology:* LD50 (oral, male rat) 2000-3000 mg/kg; alkaline; severely irritating to skin; tissue destruction to eyes if not treated; irritating to respiratory and digestive tract; ing. may cause GI irritation, nausea, vomiting, cramps, diarrhea

*Precaution:* May react to form deadly CO on contact with certain prods. or their residues; contact with acid can cause gelling and evolution of heat

*Hazardous Decomp. Prods.:* None

HMS: Health 2; Flammability 0; Reactivity 1

*Storage:* Do not store over 50 C for extended periods; keep from freezing; keep container closed; do not store in aluminum containers

#### CS-10 [Ducey Chem.]

*Chem. Descrip.:* Silicone aq. emulsion

*Uses:* Antifoam for chems., surfactants, EO, resins, distillation, scrubbers, gas-oil separation, solvs. and lt. oil processing, coatings and paints, inks, cosmetics, toiletries, household uses, indirect food uses (lubricant, pkg. additives, hog scalding), metalworking, paper and printing, textile and fibers, transportation (auto or engine radiators), wastewater treatment, effluent treatment, cooling tower reformulations; long term dilution stability

*Regulatory:* DOT nonhazardous; SARA §313 nonreportable

*Properties:* Wh. thick liq.; very little odor; disp. in water; sp.gr. 0.99; b.p. 212 F; flash pt. (PMCC) none; pH 7-8 (1%); 87% volatiles

*Toxicology:* Prolonged/repeated contact may cause mod. skin irritation; can cause eye irritation; no evidence of adverse effects by inh., ing.

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SiO<sub>x</sub>

*Storage:* 9 mos shelf life; protect from freezing

#### CS-10A [Ducey Chem.]

*Chem. Descrip.:* Silicone aq. emulsion

*Uses:* Antifoam for chems., surfactants, EO, resins, distillation, scrubbers, gas-oil separation, solvs. and lt. oil processing, coatings and paints, inks, cosmetics, toiletries, household uses, indirect food uses (lubricant, pkg. additives, hog scalding), metalworking, paper and printing, textile and fibers, transportation (auto or engine radiators), wastewater treatment, effluent treatment, cooling tower reformulations; long term dilution stability

*Regulatory:* DOT nonhazardous; SARA §313 nonreportable

*Properties:* Wh. thick liq.; very little odor; disp. in water; sp.gr. 0.99; b.p. 212 F; flash pt. (PMCC) none; pH 7-8 (1%); 86% volatiles

*Toxicology:* Prolonged/repeated contact may cause sl. skin irritation; can cause eye irritation; no evidence of adverse effects by inh., ing.

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SiO<sub>x</sub>

*Storage:* 9 mos shelf life; protect from freezing

#### CS-20 [Ducey Chem.]

*Chem. Descrip.:* Silicone aq. emulsion

*Uses:* Antifoam for chems., surfactants, EO, resins, distillation, scrubbers, gas-oil separation, solvs. and lt. oil processing, coatings and paints, inks, cosmetics, toiletries, household uses, indirect food uses (lubricant, pkg. additives, hog scalding), metalworking, paper and printing, textile and fibers, transportation (auto or engine radiators), wastewater treatment, effluent treatment, cooling tower reformulations; long term dilution stability

*Regulatory:* DOT nonhazardous; SARA §313 nonreportable

*Properties:* Wh. thick liq.; very little odor; disp. in water; sp.gr. 0.99 ± 0.01; b.p. 212 F; flash pt. (PMCC) none; pH 7-8 (1%); 76 ± 1% volatiles

*Toxicology:* Prolonged/repeated contact may cause mod. skin irritation; can cause eye irritation; no evidence of adverse effects by inh., ing.

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SiO<sub>x</sub>

*Storage:* 9 mos shelf life; protect from freezing

#### CS-30 [Ducey Chem.]

*Chem. Descrip.:* Silicone aq. emulsion

*Uses:* Antifoam for chems., surfactants, EO, resins, distillation, scrubbers, gas-oil separation, solvs. and lt. oil processing, coatings and paints, inks, cosmetics, toiletries, household uses, indirect food uses (lubricant, pkg. additives, hog scalding), metalworking, paper and printing, textile and fibers, transportation (auto or engine radiators), wastewater treatment, effluent treatment, cooling tower reformulations; long term dilution stability

*Regulatory:* DOT nonhazardous; SARA §313 nonreportable

*Properties:* Wh. thick liq.; very little odor; disp. in water; sp.gr. 0.99; b.p. 212 F; flash pt. (PMCC) none; pH 7-8 (1%); 65% volatiles

*Toxicology:* Prolonged/repeated contact may cause mod. skin irritation; can cause eye irritation; no evidence of adverse effects by inh., ing.

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SiO<sub>x</sub>

*Storage:* 9 mos shelf life; protect from freezing

#### CS-100 [Ducey Chem.]

*Chem. Descrip.:* Filled dimethyl polysiloxane compd.

CAS 9006-65-9

*Uses:* Antifoam for chems., surfactants, EO, resins, distillation, scrubbers, gas-oil separation, solvs. and lt. oil processing, coatings and paints, inks, cosmetics, toiletries, household uses, indirect food uses (lubricant, pkg. additives, hog scalding), metalworking, paper and printing, textile and fibers, transportation (auto or engine radiators), wastewater treatment, effluent treatment, cooling tower reformulations

*Regulatory:* DOT nonhazardous; SARA §313 nonreportable

*Properties:* Thick, opaque liq.; very little odor; insol. in water; sp.gr. 0.97; vapor pressure < 1 mm Hg (68 F); b.p. > 200 C; flash pt. (PMCC) 400 F; < 1% volatiles

*Toxicology:* Can cause eye and minor skin irritation; no evidence of adverse effects by skin absorp. inh., ing.

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SiO<sub>x</sub>

*Storage:* 9 mos shelf life

#### CS 116 [Process Chems. LLC]

*Uses:* Brownstock defoamer for kraft, sulfite, and semi-chem. pulp washing, for brownstock washing, screenroom, and bleach plant applics.; water-extended; suitable whether batch or continuous generated pulp is employed

*Properties:* Opaque tan liq.; dens. 7.3 ± 0.3 lb/gal; visc. 500-1800 cps

*Toxicology:* TSCA listed

*Storage:* Store in dry area

#### CS-420 [Ducey Chem.]

*Chem. Descrip.:* Silicone emulsion

*Uses:* Antifoam for solvs. and lt. oil processing, metalworking, paper and printing, textile and fibers; high or low pH applics.; compds. and reseller applics.

*Regulatory:* DOT nonhazardous; SARA §313 nonreportable

*Properties:* Opaque liq.; very little odor; disp. in water; sp.gr. 1.00 ± 0.02; b.p. 212 F; flash pt. (PMCC) none; pH 7.5-9.5; 94 ± 0.5% volatiles

*Toxicology:* Prolonged/repeated contact may cause skin irritation; may cause eye irritation; avoid inh. of fumes in fire

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SiO<sub>x</sub>

*Storage:* 9 mos shelf life; protect from freezing

#### Cuirol® RZ 80 [Münzing Chemie GmbH]

*Chem. Descrip.:* Sulfated castor oil

CAS 8002-33-3; EINECS/ELINCS 232-306-7

*Uses:* Emulsifier, stabilizer for aq. systems, esp. emulsion paints; coating agent in paper prod.; exc. wetting agent for alkaline range

*Regulatory:* BGA, FDA compliance

*Properties:* Yel. clear liq.; sol. in water in all proportions; dens. 1.03 g/cc (20 C); visc. med.; pH 7 (10% in DW); 67% act.; anionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; sensitive to freezing; solidifies @ 0 C—warm to R.T. and stir well before use

**Cumar® LX®-509** [Neville]

*Chem. Descrip.:* Coumarone-indene resin

CAS 35343-70-5

*Uses:* Used in adhesives, coatings (emulsion, citrus fruit, epoxy, industrial, marine, paper, traffic, wire and cable), rubber (cements, mech. goods, molded goods, tires), and caulking compds.; food pkg. adhesives, coatings, paper, polymers, rubber articles; exc. resist. to alkalis, dil. acids, and moisture

*Regulatory:* FDA 21CFR §172.215, 175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 8 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene HC; m.w. 1090; sp.gr. 1.14; R&B soften. pt. 155 C; iodine no. (Wijs) 35; flash pt. (COC) 560 F

**Cumar® R-3** [Neville]

*Chem. Descrip.:* Coumarone-indene resin

CAS 35343-70-5

*Uses:* Used in adhesives, aluminum paints, varnishes, rotogravure inks, rubber compds.; food pkg. adhesives, coatings, paper, rubber articles; exc. resist. to alkalis, dilute acids and moisture

*Regulatory:* FDA 21CFR §172.215, 175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 9 (50% in toluene) flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene HC; m.w. 735; sp.gr. 1.13; R&B soften. pt. 126 C; iodine no. (Wijs) 45; flash pt. (COC) 500 F

**Cumar® R-11** [Neville]

*Chem. Descrip.:* Coumarone-indene resin

CAS 35343-70-5

*Uses:* Used in adhesives, aluminum paints, varnishes, rotogravure inks, rubber compds.; food pkg. adhesives, coatings, paper, rubber articles; exc. resist. to alkalis, dilute acids and moisture

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene HC; m.w. 700; sp.gr. 1.09; R&B soften. pt. 112 C; iodine no. (Wijs) 100; flash pt. (COC) 460 F

**Cumar® R-12 (V-2, V-2½)** [Neville]

*Chem. Descrip.:* Coumarone-indene resin

CAS 35343-70-5

*Uses:* Plasticizer, softener, reinforcer, tackifier for NR, SR (except IIR); processing aid; inc. tack in solv. cements; for use in adhesives, aluminum paints, varnishes, rotogravure inks, rubber compds.; food pkg. adhesives, coatings, paper, rubber articles; exc. resist. to alkalis, dilute acids and moisture

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene HC; m.w. 580; sp.gr. 1.09; R&B soften. pt. 112 C; iodine no. (Wijs) 100; flash pt. (COC) 515 F

**Cumar® R-13** [Neville]

*Chem. Descrip.:* Coumarone-indene resin

CAS 35343-70-5

*Uses:* Plasticizer, softener for NR, SR (except IIR); reinforcer for phys. props. esp. in nonblack rubber stocks; tackifier in solv. cements; process aid; used in adhesives, aluminum paints, varnishes, rotogravure inks, rubber compds.; food pkg. adhesives, coatings, paper, rubber articles; exc. resist. to alkalis, dilute acids and moisture

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 8 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene HC; m.w. 734; sp.gr. 1.12; R&B soften. pt. 100 C; iodine no. (Wijs) 39; flash pt. (COC) 495 F

**Cumar® R-17** [Neville]

*Chem. Descrip.:* Coumarone-indene resin

CAS 35343-70-5

*Uses:* Plasticizer, softener, reinforcer, tackifier for NR, SR (except IIR); processing aid; tackifier in solv. cements; in adhesives, aluminum paints, varnishes, rotogravure inks, rubber compds.; food pkg. adhesives, coatings, paper, rubber articles; exc. resist. to alkalis, dilute acids and moisture

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 13 (50% in toluene) solid; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene HC; m.w. 500; sp.gr. 1.10; R&B soften. pt. 76 C; iodine no. (Wijs) 65; flash pt. (COC) 390 F

**Cunilate® 2419-75** [Morton Int'l./Plastics Addit.]

*Uses:* Antimicrobial for textile applics., pulp slurries, paperboard, concrete safes

**Curesan™ 199** [BASF]

*Chem. Descrip.:* Blocked glyoxal-based

*Uses:* Insolubilizer for high solids, pigmented paper coatings and size press applics.; crosslinking agent for hydroxyl-contng. polymers and for compds. contng. anhydroglucose units; improves printability, esp. in grades contng. high syn. binder content; non-formaldehyde

*Use Level:* 2-4%

**Curesan™ 200** [BASF]

*Chem. Descrip.:* Blocked glyoxal-based

*Uses:* Insolubilizer for high solids, pigmented paper/paperboard coatings and size press applics.; crosslinking agent for hydroxyl-contng. polymers and for compds. contng. anhydroglucose units; improves printability; inc. wet and dry pick str. with rapid off-machine cure; non-formaldehyde

*Use Level:* 1-2%

**Cyasarb® UV-3529** [Cytec Ind./Polymer Addit.]

*Chem. Descrip.:* 1,6-Hexanediamine, N,N'-bis(2,2,6,6-tetramethyl-4-piperidyl)-, polymers with morpholine-2,4,6-trichloro-1,3,5-triazine

CAS 193098-40-7

*Uses:* Lt. stabilizer for polymers, food contact applics.; food-contact paper/paperboard; low volatility; selective reactivity; min. color contribution; exc. compat. with other HALS and UVAs

*Regulatory:* FDA 21CFR §176.170 approved

*Properties:* Wh. to off-wh. pastille; m.w. 1700 ± 10%

*Toxicology:* LD50 (oral, rat) 500-2000 mg/kg; LC50 (inh., rat, 4 h) 2.8 mg/l; mod. eye irritation; nonirritating to skin

**Cyastat® SN** [Cytec Ind.]

*Chem. Descrip.:* Stearamidopropyl dimethyl-2-hydroxyethyl ammonium nitrate, IPA/water (1:1)

*Uses:* Antistat for polymers; used for plastics, surface coatings, paper, glass, and other materials; dispersant in coatings

*Properties:* Lt. yel. to amber liq., sl. IPA odor; sol. in water, acetone, alcohol, and other polar solvents of low m.w.; m.w. 476; sp.gr. 0.95; dens. 7.9 lb/gal; b.p. 83 C; flash pt. (CC) 12.2 C; pH 4-6; 50% solids

*Toxicology:* LD50 (oral, rat) 3300 mg/kg, (dermal, rabbit) > 5 ml/kg; direct contact may cause mod. eye and skin irritation; overexposure to vapor may cause respiratory tract irritation and CNS depression; TSCA listed

*Precaution:* Flamm. liq. and vapor; incompat. with strong oxidizing agents and min. acids

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, ammonia, NO<sub>x</sub>

*Storage:* Keep away from heat, sparks, and flame; keep container closed

**Cycat® 4040** [Cytec Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid

CAS 104-15-4; EINECS/ELINCS 203-180-0

*Uses:* Catalyst for accelerating cure of fully alkylated melamine-formaldehyde, benzoguanamine, glycoluril, and urea-formaldehyde resins, for air atomized spray applics., dipping enamels, water reducible systems, wood finishes, paper coatings

*Properties:* Gardner 1 max. color; sol. in alcohols, water; partially sol. in ketones, glycol ethers, and esters; insol. in aromatic and aliphatic hydrocarbons; sp.gr. 0.96; dens. 8.0 lb/gal; acid no. 130-140; flash pt. (Seta) 69 F; 40% NV

**Cydrain® 145 Drainage Aid** [Cytec Ind.]

*Chem. Descrip.:* Polyacrylamide

CAS 9003-05-8

*Uses:* Drainage aid for paperboard and heavier papers; reduces energy costs; inc. prod.

*Regulatory:* DOT nonregulated

*Properties:* Wh. opaque visc. liq.; very sl. hydrocarbon odor; disp. in water; sp.gr.  $\approx$  1.1; flash pt. (Seta CC) > 100 C; pH 9.3-9.7; 93% volatiles; cationic

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; LC50 (inh., rat, 4 h) > 2500 ppm; direct contact may cause minimal eye and skin irritation; not expected to be harmful by inh.

*Precaution:* Incompat. with strong oxidizing agents; spills are very slippery  
*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, ammonia, NO<sub>x</sub>

NFPA: Health 0; Flammability 1; Reactivity 0

*Storage:* Avoid iron, copper, or aluminum containers/equip. for handling/storage

#### Cymel® 245-8 [Cytec Ind.]

*Chem. Descrip.:* Butylated melamine-formaldehyde resin in 60% n-butanol and 40% xylene

*Uses:* Crosslinking agent for general metal finishes; food-contact coatings, paper/paperboard; provides good exterior durability and chem. resist. props.

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.0; dens. 10.2 lb/gal (solids); visc. 3-3.7 poises; acid no. 1 max.; flash pt. (Seta) 28 C; 52  $\pm$  2% NV by wt.; free formaldehyde (3.0% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

#### Cymel® 247-10 [Cytec Ind.]

*Chem. Descrip.:* Highly butylated melamine-formaldehyde resin in 100% n-butanol

*Uses:* Crosslinking agent; flow control additive for oil-free polyester resin systems; also rec. for TS acrylic and alkyd automotive topcoat finishes; food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.01; dens. 9.7 lb/gal (solids); visc. 5.5-10.7 poises; acid no. 1 max.; flash pt. (Seta) 43 C; 64  $\pm$  2% NV by wt.; free formaldehyde (3.0% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

#### Cymel® 248-8 [Cytec Ind.]

*Chem. Descrip.:* Butylated melamine-formaldehyde resin in 60% n-butanol and 40% xylene

*Uses:* Crosslinking agent for general metal finishes (e.g. appliance finishes); food-contact coatings, paper/paperboard; provides good exterior durability  
*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.01; dens. 10.2 lb/gal (solids); visc. 3.4-4.3 poises; acid no. 1 max.; flash pt. (Seta) 34 C; 55  $\pm$  2% NV by wt.; free formaldehyde (3.0% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

#### Cymel® 255-10 [Cytec Ind.]

*Chem. Descrip.:* Isobutylated melamine-formaldehyde resin in 100% isobutanol

*Uses:* Crosslinking agent for fast curing finishes with good exterior durability; food-contact coatings, paper/paperboard; offers high gloss and chem. resist.  
*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.0; dens. 10.9 lb/gal (solids); visc. 5-10.7 poises; acid no. 14 max.; flash pt. (Seta) 36 C; 50  $\pm$  2% NV by wt.; free formaldehyde (4.0% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

#### Cymel® 300 [Cytec Ind.]

*Chem. Descrip.:* Highly methylated melamine-formaldehyde resin  
CAS 68002-20-0

*Uses:* Crosslinking agent for use in paper coatings and catalyzed wood finishes; good stability in waterborne systems that are pH buffered on alkaline side

*Properties:* Waxy solid; sp.gr. 1.20; dens. 10 lb/gal; m.p. 30-35 C; 98% min. NV; free formaldehyde (0.3% max.)

#### Cymel® 1158 [Cytec Ind.]

*Chem. Descrip.:* Highly butylated melamine-formaldehyde resin in n-butanol  
*Uses:* Crosslinking agent rec. for higher solids general metal finishes, providing good exterior durability and resist. props.; also in alkyd or acrylic automotive finishes providing higher build with a single coat; food-contact coatings, paper/paperboard; low blistering tendency, low formaldehyde release, fast low temp. cure response, improved hydrocarbon tolerance and compat. with other resins, inc. hydrophobicity, improved wetting; responds to weak acid catalysts

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.06; dens. 9.5 lb/gal (solids); visc. 24-49 poises; acid no. 1 max.; flash pt. (Seta) 47 C; 80  $\pm$  2% NV by wt.; free formaldehyde (1.2% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

#### Cynol® 760 Softener [Cytec Ind.]

*Chem. Descrip.:* Emulsifiable mineral oil (petrol. distillate light)

CAS 64742-56-9; EINECS/ELINCS 232-298-5

*Uses:* Softener for tissue and absorbent paper grades; aids Yankee dryer release props.

*Regulatory:* DOT nonregulated

*Properties:* Pale straw oily liq.; bland hydrocarbon odor; negligible sol. in water; sp.gr. 0.86; vapor pressure < 0.01 mm Hg (20 C); b.p. 354-438 C; flash pt. (OC) 185 C; 90% act.

*Toxicology:* LD50 (oral, rat) > 4.5 ml/kg, (dermal, rabbit) > 2000 mg/kg; LC50 (inh., rat, 4 h) > 15,000 ppm; may cause skin irritation; acute overexposure may cause eye and throat irritation; prolonged/repeated exposure may cause CNS damage

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Avoid iron, copper, or aluminum containers/equip. for handling/storage

#### Cypres® 310 Surface Size [Cytec Ind.]

*Chem. Descrip.:* Styrene-acrylic

CAS 9010-92-8

*Uses:* Surf. sizing agent for papermaking; provides better printability

*Regulatory:* DOT nonregulated

*Properties:* Lt. straw to clear liq.; sl. ammonia odor; completely sol. in water; sp.gr. 1.05; b.p. 98-100 C; flash pt. (PMCC) > 93 C; pH > 9.5

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 2000 mg/kg; LC50 (inh., rat, 4 h) > 20 mg/l; direct contact may cause minimal eye and skin irritation

*Environmental:* BOD (5 day) 4520 mg/l oxygen; COD 260,000 ppm

*Precaution:* Spills are very slippery; avoid adding cationic additives to conc. material

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>

NFPA: Health 0; Flammability 1; Reactivity 0

#### Cypro® 514 Promoter [Cytec Ind.]

*Chem. Descrip.:* Polyamine

*Uses:* Promoter improving performance of other aids, resins, and additives in papermaking

*Regulatory:* DOT nonregulated

*Properties:* Amber liq.; sl. amine odor; completely sol. in water; sp.gr. 1.14-1.20; m.p. -18 C; b.p. 100 C; flash pt. (CC) > 93 C; pH 5-7; cationic

*Toxicology:* LD50 (oral, rat) 4.67 g/kg, (dermal, rabbit) > 10 g/kg; LC50 (inh., rat, 4 h) > 15,000 ppm; may cause skin irritation; not expected to be harmful by ing.; TSCA listed

*Environmental:* BOD (5 day) < 600 mg/l oxygen; COD 480,000 ppm; LC50 (bluegill, 96 h) 0.39 mg/l, (daphnia, 48 h) 0.6 mg/l

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, ammonia, dimethyl amine, NO<sub>x</sub>, hydrogen chloride

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Avoid iron, copper, or aluminum containers/equip. for handling/storage

# D

## D12F [Grain Processing]

*Chem. Descrip.:* Oxidized corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Component of uncoated or coated food-contact surf. of paper and paperboard  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Wh. fine powd., flash-dried form; bulk dens. 31 lb/ft<sup>3</sup> (loose), 39 lb/ft<sup>3</sup> (packed); pH 7.5; 11% moisture

## D120 [Grain Processing]

*Chem. Descrip.:* Oxidized corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Component of uncoated or coated food-contact surf. of paper and paperboard  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Wh. gran. powd.; bulk dens. 39 lb/ft<sup>3</sup> (loose), 48 lb/ft<sup>3</sup> (packed); pH 7.5; 11% moisture

## DA-4 [Songkang Ind. Co.]

*Chem. Descrip.:* Modified polyamine  
*Uses:* Drainage aid for board, liner; retention aid for fibers and fillers; coagulant for control of anionic trash; exc. performance at neutral pH  
*Use Level:* 0.1-0.6% of dry stock  
*Properties:* Visc. 300-1000 cps; pH 8 ± 1; 25 ± 1% solids

## Dantobrom® PG Briquette [Lonza]

*Chem. Descrip.:* Halogenated hydantoin  
*Uses:* Slimicide for pulp/paper  
*Regulatory:* EPA reg. no. 6836-282; FDA approved  
*Properties:* Briquette; 62% avail. halogen (as Cl<sub>2</sub>)

## Dantobrom® PG Granular [Lonza]

*Chem. Descrip.:* Halogenated hydantoin  
*Uses:* Slimicide for pulp/paper  
*Regulatory:* EPA reg. no. 6836-281; FDA approved  
*Properties:* Granular; 62% avail. halogen (as Cl<sub>2</sub>)

## Dantobrom® RW Briquette [Lonza]

*Chem. Descrip.:* 1-Bromo-3-chloro-5,5-dimethylhydantoin, 1,3-dichloro-5,5-dimethylhydantoin, and 1,3-dichloro-5-ethyl-5-methylhydantoin  
*Uses:* Biocide, algicide, fungicide, bactericide, and slimicide for recirculating water systems, pulp/paper mfg., enhanced oil recovery, evaporative condensers, cooling tower systems, influent systems, industrial wet scrubber systems, brewery pasteurizers; approved for once-thru use  
*Regulatory:* EPA reg. no. 6836-115  
*Properties:* Off-wh. briquette; sl. odor; sol. 0.54 g/100 g in water; dens. 1.6 g/cc; bulk dens. 65 lb/ft<sup>3</sup>; m.p. 120-148 C (powd.); decomp. pt. 180 C; pH 3.6 (1% slurry); 62% avail. halogen (as Cl), 43% avail. Cl, 43% avail. Br  
*Toxicology:* LD50 (oral, male rat) 500 mg/kg; corrosive to eyes; severe irritant to skin  
*Environmental:* Degrades in municipal waste treatment plants  
*Precaution:* Dec. if mixed with reactive oxidizers; avoid mixing with lubricating oils, strong acids, strong alkalis, reducing agents, hydrated salts  
*Storage:* Store in cool, dry area

## Dantochlor® PG Briquette [Lonza]

*Chem. Descrip.:* Halogenated hydantoin  
*Uses:* Slimicide for pulp/paper  
*Regulatory:* EPA reg. no. pending; FDA approved  
*Properties:* Briquette; 68% avail. halogen (as Cl<sub>2</sub>)

## Dantochlor® PG Granular [Lonza]

*Chem. Descrip.:* Halogenated hydantoin  
*Uses:* Slimicide for pulp/paper  
*Regulatory:* EPA reg. no. pending; FDA approved  
*Properties:* Granular; 68% avail. halogen (as Cl<sub>2</sub>)

## Dapro® DF 1161 [Elementis Spec. Colorants/Addit.]

*Chem. Descrip.:* Silicone-modified disp. of olefinic solids  
*Uses:* Foam suppresser for aq. gravure, flexographic, and metallic inks, high gloss coatings, wood lacquers and stains, clear overprint varnishes; defoamer in food-contact coatings; food-contact paper/paperboard  
*Use Level:* 0.1-0.25 w/w  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.200  
*Properties:* Sp.gr. 1.04; dens. 8.7 lb/gal; flash pt. 204 C

## Dapro® DF 2162 [Elementis Spec. Colorants/Addit.]

*Chem. Descrip.:* Hydrophobic silica/hydrocarbon  
*Uses:* Foam suppresser for waterborne industrial coatings, architectural with associative thickeners, clear overprint varnishes, wood lacquers, adhesives, flexographic and gravure inks; food pkg. adhesives; defoamer in food-contact coatings, paper/paperboard  
*Use Level:* 0.2-0.7 w/w  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210  
*Properties:* Sp.gr. 0.85; dens. 7.1 lb/gal; flash pt. 196 C

## Dapro® DF 3163 [Elementis Spec. Colorants/Addit.]

*Chem. Descrip.:* Modified polyol  
*Uses:* Foam suppresser for waterborne adhesives and coatings, all types; high gloss coatings, overprint varnishes, and flexographic and gravure inks; food pkg. adhesives, coatings, paper/paperboard; defoamer in food-contact coatings  
*Use Level:* 0.1-0.5 w/w  
*Regulatory:* FDA 21CFR §175.105, 176.300, 176.170, 176.180, 176.200  
*Properties:* Sp.gr. 0.95; dens. 7.9 lb/gal; flash pt. 182 C

## Dapro® DF 4164 [Elementis Spec. Colorants/Addit.]

*Chem. Descrip.:* Metallic salt of fatty acid disp.  
*Uses:* Foam suppresser for waterborne industrial coatings, architectural with associative thickeners, clear overprint varnishes, wood lacquers, adhesives, flexographic and gravure inks; food pkg. adhesives; defoamer in food-contact coatings, paper/paperboard  
*Use Level:* 0.1-0.5 w/w  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210  
*Properties:* Sp.gr. 0.87; dens. 7.3 lb/gal; flash pt. 174 C

## Dapro® DF 5165 [Elementis Spec. Colorants/Addit.]

*Chem. Descrip.:* Hydrophobic silica/hydrocarbon  
*Uses:* Foam suppresser for waterborne industrial and architectural with associative thickeners, latex and laminating adhesives, cement modifiers; food pkg. adhesives; defoamer in food-contact coatings, paper/paperboard  
*Use Level:* 0.2-0.7 w/w  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210  
*Properties:* Sp.gr. 0.85; dens. 7.1 lb/gal; flash pt. 196 C

## Daratak® 56L [W.R. Grace]

*Chem. Descrip.:* PVAc emulsion  
 CAS 9003-20-7  
*Uses:* Adhesive emulsion for primer sealers, textile finishes, and paper saturation; very high m.w., low visc, fast drying; water wh., slightly hazy, low gloss odorless films with water resistance

- Properties:* Wh. emulsion, sl. char. odor; 1.0 µ particle size; dens. 9.93 lb/gal; visc. 300-600 cps; pH 5.5-7.0; 54-56% solids
- Daratak® 61L** [W.R. Grace]  
*Chem. Descrip.:* PVAc homopolymer emulsion  
 CAS 9003-20-7  
*Uses:* Adhesive emulsion used in heat sealing, paper and foil adhesives, and fire-retardant mastics; high visc., borax-tolerant; water wh., clear, med. gloss films with exc. water resistance  
*Properties:* Wh. emulsion, sl. char. odor; 1.0 µ particle size; dens. 9.93lb/gal; visc. 2000-4000 cps; pH 4.5-5.5; 54-56% solids
- Daratak® 65L** [W.R. Grace]  
*Chem. Descrip.:* PVAc homopolymer emulsion  
 CAS 9003-20-7  
*Uses:* Adhesive emulsion (strong wet tack) for paper packaging applics.; med. m.w. and visc.; water wh., slightly hazy, med. gloss films with good water resistance; compatible with fully hydrolyzed PVAL  
*Properties:* Emulsion; particle size 1.5 µ; wh.; slight, char. odor; dens. 9.93 lb/gal; visc. 1400-2000 cps; pH 4.5-5.5; 54-56% solids
- Daratak® 89L** [W.R. Grace]  
*Uses:* Adhesive emulsion for formulation of remoistenable adhesives for envelopes, labels, stamps, tapes, and for textile warp sizing and adhesives for arts and crafts; food pkg. adhesives and paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.170
- Daratak® RP2000** [W.R. Grace]  
*Chem. Descrip.:* Carboxylated polyvinyl acetate emulsion  
 CAS 9003-20-7  
*Uses:* Adhesive base for paper/paper, paper/foil laminations, bottle labels, coated paperboard  
*Regulatory:* FDA approved
- Daratak® SP1012** [W.R. Grace]  
*Chem. Descrip.:* Vinyl acetate homopolymer emulsion  
 CAS 9003-20-7  
*Uses:* Emulsion for pkg. applics. requiring quick tack development and fast setting speeds; suitable for food pkg. adhesives, coatings, paper/paperboard; nonborax compat.  
*Regulatory:* FDA 21CFR §175.105, 176.170  
*Properties:* Emulsion; 1.2 µ avg. particle size; dens. 9.1 lb/gal; visc. 800-1400 cps; pH 5-7; Film props.: dens. 1.19; 54-56% total solids
- Darex® 110L** [W.R. Grace]  
*Chem. Descrip.:* Nitrile latex  
 CAS 9003-18-3  
*Uses:* For paper and felt saturation, in tape and sandpaper bases; copolymer latex; high delamination resist. and edge tear; heat curable  
*Properties:* Particle size 0.2; dens. 8.4 lb/gal; visc. 30 cps; surf. tens. 40 dynes/cm; pH 7.0; 47% solids
- Darex® 550L** [W.R. Grace]  
*Chem. Descrip.:* Vinylidene chloride emulsion  
*Uses:* For use in flame retardant adhesives; designed for adhesion to nonporous substrates (e.g., film-to-paper, foil-to-paper applics.)
- Darex® 620L** [W.R. Grace]  
*Chem. Descrip.:* SBR 2000 type latex  
 CAS 9003-55-8  
*Uses:* Used for beater addition, paper saturation, adhesives, fabric backings, and binders (foam scrap, leather, and curled hair)  
*Properties:* Particle size 0.15 µ; dens. 8.3 lb/gal; visc. 40 cps; surf. tens. 50 dynes/cm; pH 10.5; 42% total solids; 47% styrene, 53% butadiene
- Darvan® 1** [R.T. Vanderbilt]  
*Chem. Descrip.:* Sodium polynaphthalene sulfonate  
 CAS 9084-06-4  
*Uses:* Dispersant for NR and SR latexes, paints, coatings; latex stabilizer @ 10% aq. sol'n.; wetting agent for carbon black; pigment dispersant and pitch control agent in papermaking; in coatings, inc. paste flow allowing a higher percentage of pigment to be mixed in a given amt. of vehicle; < 1% VOC; no ozone-depleting substances  
*Use Level:* 1 phr (SBR latex), 0.5-1.5 phr (NR latex), 4-8 phr (CR latex paper applics.)  
*Properties:* Amber gran.; water-sol.; dens. 1.54 mg/m<sup>3</sup>; pH 8.0-10.5 (1%); 87% min. act.; 5% max. moisture  
*Toxicology:* TSCA listed
- Darvan® 7** [R.T. Vanderbilt]  
*Chem. Descrip.:* Sodium polymethacrylate  
 CAS 25086-62-8  
*Uses:* Dispersant for NR, SR latexes, paints and coatings; post-emulsion stabilizer; surf. act. agent for preparing high solids disps.; dispersant for clay or TiO<sub>2</sub> slurries in papermaking; nondiscoloring; min. foaming; stable over wide pH range; no ozone-depleting substances  
*Properties:* Water-wh. clear to sl. opalescent liq.; very sol. in aq. systems; dens. 1.13-1.17 mg/m<sup>3</sup>; visc. 75 cps max.; pH 10.0-11.5; 25.0 ± 1% total solids  
*Toxicology:* TSCA listed
- Darvan® 811** [R.T. Vanderbilt]  
*Chem. Descrip.:* Sodium polyacrylate  
 CAS 9003-04-7  
*Uses:* Dispersant for prep. of slurries (clay, TiO<sub>2</sub>, CaCO<sub>3</sub>, other minerals) for papermaking; deflocculant for clay water systems  
*Properties:* Lt. amber liq.; dens. 1.315 mg/m<sup>3</sup>; visc. 100-300 cps; pH 7-8; 42.8-43.3% solids
- Daxad® 11G** [Hampshire]  
*Chem. Descrip.:* Low m.w. naphthalene sulfonate formaldehyde condensate, sodium salt  
 CAS 9084-06-4  
*Uses:* Dispersant for pigments in aq. media for use in agric. chemicals, mastics, caulks, sealants, pigment slurries and disps., inks, syn. polymers, paper coating disps., paper mill slime control, pitch control, pulp digestion, and tall oil separation  
*Properties:* Buff fine gran.; dens. 42 lb/ft<sup>3</sup>; pH 8.0-10.5 (1%); surf. tens. 70-71 dynes/cm (1%); 87% min. act.; anionic
- Daxad® 13** [Hampshire]  
*Chem. Descrip.:* Polymerized alkyl naphthalene sulfonic acid sodium salt  
 CAS 9084-06-4  
*Uses:* Dispersant for use in papermaking operations, pigment slurries and disp., paper coating disp., paper mill slime control, pitch control, pulp digestion, tall oil separation  
*Properties:* Amber powd.; dens. 47 lb/ft<sup>3</sup>; pH 9.5 (1%)
- Daxad® 15** [Hampshire]  
*Chem. Descrip.:* Low m.w. naphthalene sulfonate formaldehyde condensate, sodium salt  
 CAS 9084-06-4  
*Uses:* Dispersant for emulsion polymerization, agric., pigments, clay disps., dyestuffs, tanning, herbicides, pesticides, pitch, deinking, carbon blk., iron oxides, battery extenders; grinding aid; water reducer for metal oxides; industrial grade, general purpose  
*Properties:* Amber powd.; sol. in water; dens. 37-43 lb/ft<sup>3</sup> (tapped); pH 9-10 (1%); surf. tens. 70-72 dynes/cm (1%); 88% act.; anionic
- Daxad® 16** [Hampshire]  
*Chem. Descrip.:* Low m.w. naphthalene sulfonate formaldehyde condensate, sodium salt  
 CAS 9084-06-4  
*Uses:* Dispersant for low color applics., wet grinding of pigments and dyes, emulsion polymerization, agric., concrete, tanning, herbicides, pesticides, pitch, clay disps., deinking, coal water slurries, carbon blk., iron oxides, battery extenders; water reducer for metal oxides  
*Properties:* Dk. brn. transparent liq.; misc. in water; dens. 10.5 lb/gal; visc. < 60 cps (42% solids); pH 8-10 (1%); surf. tens. 70-72 dynes/cm (1%); 46.5-48.5% total solids; anionic
- Daxad® 17** [Hampshire]  
*Chem. Descrip.:* Low m.w. naphthalene sulfonate formaldehyde condensate, sodium salt  
 CAS 9084-06-4  
*Uses:* Dispersant for low-dusting applics., emulsion polymerization, pigments and dyestuffs, clays, deinking, tanning, herbicides, pesticides, pitch, coal water slurries, carbon blk., iron oxides, battery extenders; grinding aid; water reducer for metal oxides; industrial grade  
*Properties:* Amber gran.; ≤ 3% passes thru 100 mesh; sol. in water; dens. 37-43 lb/ft<sup>3</sup> (tapped); pH 9-10.5 (1%); surf. tens. 70-72 dynes/cm (1%); 88% act.; anionic  
*Storage:* Store in cool, dry environment
- Daxad® 34N10** [Hampshire]  
*Chem. Descrip.:* Sodium polymethacrylate sol'n.  
*Uses:* Dispersant for latex polymerization, industrial cleaners, and for clay in paper coating colors  
*Properties:* Pale amber clear liq.; sol. in water systems; sp.gr. 1.21; dens. 10.0 lb/gal; visc. 400 cps max.; pH 10.0; surf. tens. 70 dynes/cm (1%); 30% total solids

**Daxad® 37LN7** [Hampshire]*Chem. Descrip.:* Sodium polyacrylate sol'n.

CAS 9003-04-7

*Uses:* Dispersant, esp. for clays; deflocculant and dispersant for clay slurries used in paper coatings, in flat latex paints; fluidifier in the formulation of oil well drilling muds; antiredeposition agent in cleaning formulas*Properties:* Pale amber clear, slightly hazy liq.; infinite sol. in water; sp.gr. 1.30; dens. 10.9 lb/gal; visc. 500 cps; pH 7.0; surf. tens. 75 dynes/cm (1%); 45% total solids**Daxad® 37LN10-35** [Hampshire]*Chem. Descrip.:* Sodium polyacrylate sol'n.

CAS 9003-04-7

*Uses:* Dispersant for rapid dispersion of solid materials (esp. clays) in aq. systems; dispersant, deflocculant for pigment mfg., paper coatings, latex paints, trade sales flat paints, oil well drilling muds; antiredeposition agent in cleaning formulas; stable over wide pH range*Properties:* Pale amber sl. hazy liq.; sol. in water; sp.gr. 1.25; dens. 10.4 lb/gal; visc. 50 cps; pH 10; surf. tens. 65 dynes/cm (1%); 35% sol'n.**DBE** [DuPont Nylon]*Chem. Descrip.:* Dibasic ester mixt. (60% dimethyl glutarate, 15% dimethyl adipate, 24% dimethyl succinate)*Uses:* Solvent for coatings, cleaners, inks, textile lubricants, urethane prod.; plasticizer for flexible thermoset polyester; polymer intermediate for polyester polyols for urethanes, wet-str. paper resins, polyester resins; specialty chemical intermediate*Regulatory:* DOT nonregulated; SARA nonreportable*Properties:* Clear colorless liq., mild sweet odor; sol. in alcohols, ketones, ethers, most hydrocarbons; sl. sol. in water and higher paraffinic hydrocarbons; m.w. 159; sp.gr. 1.092 (20 C); dens. 9.09 lb/gal; visc. 2.4 cSt; vapor pressure 0.2 mm Hg (20 C); f.p. -20 C; b.p. 196-225 C; acid no. 0.3 max.; flash pt. (TCC) 100 C; surf. tens. 35.6 dynes/cm; 99% min. esters*Toxicology:* LD50 (oral, rat) 8191 mg/kg, (dermal, rabbit) > 2250 mg/kg; mild to severe skin irritant, moderate eye irritant; may cause nose and throat irritation and blurry vision; TSCA listed*Environmental:* Aquatic toxicity: LC50 (fathead minnows, 96 h) 18-24 mg/l (mod. toxic), (daphnia magna, 48 h) 112-150 mg/l*Precaution:* Incompat. with strong oxidants, acids, or alkalis; dec. with heat  
HMIS: Health 1; Flammability 1; Reactivity 0*Storage:* Store in well ventilated place in tightly closed container**DBE-2, -2SPG** [DuPont Nylon]*Chem. Descrip.:* Dibasic ester mixt. (76% dimethyl glutarate, 24% dimethyl adipate, 0.3% dimethyl succinate)*Uses:* Solvent for coatings, cleaners, inks, textile lubricants, urethane prod.; plasticizer for flexible thermoset polyester; polymer intermediate for polyester polyols for urethanes, wet-str. paper resins, polyester resins; specialty chemical intermediate*Properties:* Clear colorless liq., mild odor; m.w. 163; sol. in alcohols, ketones, ethers, most hydrocarbons; sl. sol. in water and higher paraffinic hydrocarbons; sp.gr. 1.081; dens. 9.00 lb/gal; visc. 2.5 cSt; f.p. -13 C; b.p. 210-225 C; acid no. 1 max.; flash pt. (TCC) 104 C; 99% min. esters*Toxicology:* Low health risk; may cause eye irritation*Environmental:* Low environmental risk**DBE-3** [DuPont Nylon]*Chem. Descrip.:* Dibasic ester mixt. CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Clay for paper coatings for high gloss development and outstanding ink holdout*Properties:* Spray-dried, slurry; 0.002% 325-mesh residue, 97% finer than 2  $\mu$  particle size; sp.gr. 2.72; visc. 250 cps (70% solids); brightness (GE) 86-87; ref. index 1.56; pH 6.2-7.5 (20% aq.); hardness (Mohs) 2; 0.3-1.0% moisture (spray-dried), 29-31% moisture (slurry)**DB-Kote-2** [IMERYS]*Chem. Descrip.:* Kaolin clay

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Filler clay for paper coatings, high solids formulations for publication grade papers and medium finish enamels, low cost basecoats, and pigmented size press applics.*Properties:* Spray-dried, slurry; 0.015% 325-mesh residue, 65% finer than 2  $\mu$  particle size; sp.gr. 2.72; visc. 300 cps (70% solids); brightness (GE) 85-86; ref. index 1.56; pH 6.2-7.5 (20% aq.); hardness (Mohs) 2; 0.3-1.0% moisture (spray-dried), 29-31% moisture (slurry)**DB-SHEEN™** [IMERYS]*Chem. Descrip.:* Delaminated kaolin clay

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Easy glossing filler, pigment for paper coatings, esp. merchant grade papers, label and glossy cover stock*Properties:* Spray-dried, slurry; 0.002% 325-mesh residue; sp.gr. 2.72; visc. 500 cps (70% solids); brightness (GE) 87-89; ref. index 1.56; pH 6.2-7.5 (20% aq.); hardness (Mohs) 2; 0.3-1.0% moisture (spray-dried), 29-30% moisture (slurry)

- De-Airex®** [Hercules]  
*Uses:* Defoamer for pulp/paper machine applics. (brownstock washers, starch systems, wastewater treatment, coating systems)
- Deatron WB** [Nicca Chem. Co Ltd]  
*Chem. Descr.:* Special activator  
*Uses:* Foaming agent for pulp making process; provides foaming effect when applied with fatty acid type deinking agent  
*Use Level:* 0.05-0.1% to pulp  
*Properties:* Sl. yellowish limpid liq.; anionic
- Defoamer™ 230** [Huntsman]  
*Uses:* Pulp/paper processing aid, defoamer; defoamer for mill effluent applics.; intermediate foam kill with exc. hold  
*Properties:* Liq.; nonionic
- Defoamer™ 1418** [Huntsman]  
*Uses:* Pulp/paper processing aid, defoamer; offers exc. performance with low air entrainment; add to save all wh. water pans  
*Properties:* Liq.; 100% act.; nonionic
- Defoamer™ C5B** [Huntsman]  
*Chem. Descr.:* Nonsilicone mineral oil-based  
*Uses:* Defoamer for effluents in pulp/paper industry; effective over wide pH range  
*Properties:* Lt. brn. liq.; 100% act.
- Defoamer CK-35** [Crompton & Knowles]  
*Chem. Descr.:* Ethoxylated fatty acids in petrol. hydrocarbon  
*Uses:* Defoamer eliminating entrained gas and improving drainage on paper machines  
*Properties:* Disp.
- Defoamer CK-55** [Crompton & Knowles]  
*Chem. Descr.:* Fatty amide derivs., hydrophobic silica, and nonionic surfactants in petrol. oil  
*Uses:* Defoamer for standard paper machines and hydropulpers  
*Properties:* Disp.
- Defoamer CK-75** [Crompton & Knowles]  
*Chem. Descr.:* Ethoxylated fatty acids and petrol. oil  
*Uses:* Defoamer for paper machines and hydropulpers  
*Properties:* Disp.
- Defoamer™ KCE/S** [Huntsman]  
*Chem. Descr.:* Proprietary blend, water-based  
*Uses:* Pulp/paper processing aid; defoamer for screen room, bleaching, and effluent applics. in pulp/paper industry  
*Properties:* Liq.; 5% act.; nonionic
- Defoamer™ PM** [Huntsman]  
*Chem. Descr.:* Proprietary blend  
*Uses:* Paper machine defoamer for tissues and towels  
*Properties:* Liq.
- Defoamer™ WL500** [Huntsman]  
*Uses:* Pulp/paper processing aid; defoamer for boiler feed water and condensate  
*Properties:* Liq.; nonionic
- Defoamer/Drainage Aid CK-25** [Crompton & Knowles]  
*Chem. Descr.:* Fatty acids, fatty acid derivs., and surfactants in petrol. blending oil  
*Uses:* Defoamer and drainage aid for paper industry  
*Properties:* Disp.
- Degal BP** [3V/Paper]  
*Chem. Descr.:* Sodium hydroxide and trisodium phosphate  
 UN No. 1823  
*Uses:* Wet str. breaker for repulping of wet str. papers treated with polyamide resins or glyoxal, which can be hydrolyzed under alkaline conditions; high conc.  
*Use Level:* 0.2-1%  
*Regulatory:* DOT corrosive; SARA §304/313 nonreportable  
*Properties:* Wh. coarse powd.; no odor; sol. 7% in water (1%); bulk dens. 1.3 g/ml; m.p. > 300 C; pH 11-12 (1%); 80% act.  
*Toxicology:* Strongly corrosive to eyes, skin, and mucous membranes; ing. can seriously damage tissues and cause stomach perforation; inh. may cause irritation, lung edema, and pneumonia; TSCA listed  
*Environmental:* Do not discharge into storm drains or waterways  
*Precaution:* Incompat. with water, oxidizers, acids, halogenated substances; exothermic reaction with acids, halogenated substances, and water; reacts with ammonium salts evolving ammonia vapors; attacks light metals  
*Hazardous Decomp. Prods.:* Heated to decomp., toxic fumes of Na<sub>2</sub>O may evolve  
 NFPA: Health 3; Flammability 1; Reactivity 1  
*Storage:* Keep tightly closed in cool place; protect from humid environment
- Degal S** [3V/Paper]  
*Chem. Descr.:* Phosphoric acid (97%)  
 CAS 7664-38-2; EINECS/ELINCS 231-633-2  
*Uses:* Wet str. breaker for repulping of wet str. papers treated with urea or melamine resins, which can be hydrolyzed under acid conditions; highly conc.  
*Use Level:* 0.5-2%  
*Regulatory:* DOT regulated; SARA §313 reportable  
*Properties:* Pale yel. clear liq.; char. odor; misc. with water; sp.gr. 1.51-1.57; visc. 50 cps (20 C); vapor pressure 3 mm Hg (20 C); m.p. > 10 C; b.p. > 100 C; pH 2  
*Toxicology:* TLV 1 mg/m<sup>3</sup>; strongly corrosive to eyes, skin, and mucous membranes; TSCA listed  
*Environmental:* Do not discharge into storm drains or waterways  
*Precaution:* Incompat. with water, oxidizers, strong bases; attacks some metals (titanium, nickel, aluminum); mixts. with nitromethane are explosive; other potentially explosive or violent reactions possible  
*Hazardous Decomp. Prods.:* Heated to decomp., toxic fumes of carbon oxide may evolve  
 NFPA: Health 3; Flammability 1; Reactivity 0  
*Storage:* Keep tightly closed; assure adequate ventilation
- Degalan® LP 70/01** [Degussa-Hüls AG]  
*Chem. Descr.:* i-Butylmethacrylate  
 CAS 97-86-9; EINECS/ELINCS 202-613-0  
*Uses:* Binder for roughcast solidifiers, plastic renderings, and final coatings for paper; med. hard; solv.-based  
*Properties:* Sol. in alcohols, esters, ketones, aromatics, chlorinated hydrocarbons, and aliphatic hydrocarbons; very low m.w.; visc. ≈ 60 mPa·s (in 30% MEK); acid no. < 1
- Dehydran® 1293** [Cognis/Chems. Group; Cognis/Coatings & Inks; Cognis KGaA/Coatings]  
*Chem. Descr.:* Modified polydimethylsiloxane (10%) in 2-butoxyethanol (90%)  
 UN No. 2369  
*Uses:* Defoamer/air release agent for water-based industrial coatings, high-solids coatings, acrylic urethanes, alkyds, epoxies, printing inks, wood lacquers, adhesives, latex; defoamer in food-contact paper/paperboard; food pkg. adhesives  
*Use Level:* 0.5-3.0% on total wt. (coatings)  
*Regulatory:* FDA 21CFR §175.105, 176.210; BGA approved; DOT regulated; SARA §311/312/313 reportable  
*Properties:* Water-wh. clear liq.; faint odor; disp. in water; sp.gr. 0.90; dens. 7.6 lb/gal; visc. 15 cps; flash pt. (PMCC) 65 C; VOC 90.7% (EPA Method 24); 10% act., 3.6% solids; nonionic  
*Toxicology:* Causes skin, eye, and respiratory irritation; possible central nervous system depression, blood disorder, kidney and liver damage, breathing difficulties; 2-butoxyethanol: LD50 (oral, rat) 1480 mg/kg; TSCA listed  
*Precaution:* Combustible; avoid sources of ignition; incompat. with strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO  
 NFPA: Health 2; Flammability 2; Reactivity 0  
*Storage:* Store away from heat and open flame in cool, dry place; mix well before using
- DeIONIC 100-VLF** [DeForest Enterprises]  
*Chem. Descr.:* Modified alkoxyated primary alcohol  
*Uses:* Wetting agent, detergent, pigment and dye dispersant for pigment grinding, fountain sol'ns., paints and coatings, inks, high pressure spray cleaners, low foam detergents, pulp/paper production, adhesives, emulsion polymerization, electroplating, agric. sprays; nonfoaming  
*Regulatory:* DOT nonregulated; SARA §313 compliant  
*Properties:* Gardner 1 max. clear to sl. hazy liq.; sol. 10% in alcohols and glycols; disp. in water, solvs., and oils; sp.gr. 0.96; b.p. > 200 F; cloud pt. 58-70 C (1% in 15% butyl Carbitol); flash pt. (COC) > 200 F; pH 5.0-8.0 (10% in DW); surf. tens. 24.5 dynes/cm (1%); Draves wetting instant (1%); foam height 9 ml (0.1%, initial), 10 ml (1%, initial); 99% act.; nonionic  
*Toxicology:* Can cause skin and eye irritation; may contain sm. amts. of ethylene oxide, a cancer and reproductive hazard; TSCA listed

*Environmental:* Biodeg.

*Precaution:* Avoid strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. produces CO<sub>2</sub>

HMIS: Health 2; Flammability 1; Reactivity 0

**DeIONIC LF-EP-20** [DeForest Enterprises]

*Chem. Descrip.:* Alkoxyolated linear alcohol

CAS 37251-67-5

*Uses:* Used in low-foaming, alkaline, acid, and high pressure spray cleaners, mech. dishwashing, metal cleaning, bottle washing, textile wetting and scouring, agric. sprays, and laundry detergents; rewetting agent in paper prods.; rinse aid for mech. dishwashing; detergent and wetting agent when applied at temps. near its cloud pt.

*Regulatory:* DOT nonregulated

*Properties:* Nearly colorless clear to hazy liq.; sol. in water < 17-23 C, alcohol, solvents, and glycols; disp. in water above 23 C; insol. in min. oil; sp.gr. 0.98 g/ml; b.p. > 200 F; HLB 6.4; cloud pt. 17-23 C (1% in DW); flash pt. (COC) > 300 F; pH 5.0-8.0 (5% in DW); surf. tens. 30 dynes/cm; Ross-Miles foam 20 mm (0.25% initial); 100% conc.; nonionic

*Toxicology:* LD50 (rat) 3800 mg/kg; nontoxic; may cause eye and skin irritation; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Environmental:* Biodeg.; aquatic toxicity (rainbow trout, 96 h) 8.7 mg/l at < 4.1 mg/l, no effect

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 2; Flammability 1; Reactivity 0

**DeIONIC LF-EP-30** [DeForest Enterprises]

*Chem. Descrip.:* Alkoxyolated linear alcohol

CAS 37251-67-5

*Regulatory:* DOT nonregulated

*Properties:* Nearly colorless clear to hazy liq.; sol. in water at RT, alcohol, solvents, and glycols; insol. in min. oil; sp.gr. 1.00 g/ml; b.p. > 200 F; HLB 8.0; cloud pt. 28-32 C (1% in DW); flash pt. (COC) > 300 F; pH 5.0-8.0 (5% in DW); surf. tens. 30 dynes/cm; Ross-Miles foam 25 mm (0.25% initial); 100% conc.; nonionic

*Toxicology:* LD50 (rat) 3800 mg/kg; nontoxic; may cause eye and skin irritation; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Environmental:* Biodeg.; aquatic toxicity (rainbow trout, 96 h) 8.7 mg/l at < 4.1 mg/l, no effect

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 2; Flammability 1; Reactivity 0

**DeIONIC OPE-5** [DeForest Enterprises]

*Chem. Descrip.:* Octoxynol-5

CAS 9002-93-1

*Uses:* Detergent, wetting agent, and emulsifier used in emulsion cleaners, dry cleaning detergents, floor finishing and agric. emulsions; emulsifier for o/w creams and lotions; emulsion stabilizer; gasoline anti-icing additive; solubilizer for hair dyes; food pkg. adhesives, paper, polymers; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.180, 176.210, 178.3120, 178.3400; DOT nonregulated

*Properties:* Nearly colorless liq.; char. odor; sol. in most solvs.; insol. in water; sp.gr. 1.05 g/ml; b.p. > 300 F; HLB 10.4; cloud pt. 64.0-68.0 C (10% in 25% BC); flash pt. (COC) > 300 F; pH 4.5-7.5 (5% in DW); 100% conc.; nonionic

*Toxicology:* Severe eye irritant, may cause corneal damage; mildly irritating to skin; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>, CO

HMIS: Health 2; Flammability 1; Reactivity 0

**DeIONIC OPE-7.5** [DeForest Enterprises]

*Chem. Descrip.:* Octoxynol-7 (7-8 EO)

CAS 9002-93-1

*Uses:* Used in alkaline, low foam powdered laundry, and all purpose deter-

gents; metal cleaners and brighteners; detergent sanitizers; hard surface, floor, waterless hand, and acid tile cleaners; xylene emulsifier; emulsion polymerization; pesticide emulsifier; food pkg. adhesives, paper, polymers; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.180, 176.210, 178.3120, 178.3400; DOT nonregulated

*Properties:* Nearly colorless liq.; char. odor; sol. in water and most solvs.; insol. in oils and aliphatic solvs.; sp.gr. 1.05 g/ml; b.p. > 300 F; HLB 12.4; cloud pt. 22-28 C (1% in DW); flash pt. (COC) > 300 F; pH 4.5-7.5 (5% in DW); 100% conc.; nonionic

*Toxicology:* Severe eye irritant, may cause corneal damage; mildly irritating to skin; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>, CO

HMIS: Health 2; Flammability 1; Reactivity 0

**DeIONIC OPE-10** [DeForest Enterprises]

*Chem. Descrip.:* Octoxynol-10 (9-10 EO)

CAS 9002-93-1

*Uses:* Used in alkaline, low foam powdered laundry, and all purpose detergents; metal cleaners and brighteners; detergent sanitizers; hard surface, floor, waterless hand, and acid tile cleaners; xylene emulsifier; emulsion polymerization; pesticide emulsifier; dedusting agent; food pkg. adhesives, paper, polymers; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.180, 176.210, 178.3120, 178.3400; DOT nonregulated

*Properties:* Nearly colorless liq.; char. odor; sol. in water and most solvs.; insol. in oils and aliphatic solvs.; sp.gr. 1.07 g/ml; b.p. > 300 F; HLB 13.5; cloud pt. 63-69 C (1% in DW); flash pt. (COC) > 300 F; pH 4.5-7.5 (5% in DW); 100% conc.; nonionic

*Toxicology:* Severe eye irritant, may cause corneal damage; mildly irritating to skin; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>, CO

HMIS: Health 2; Flammability 1; Reactivity 0

**DeIONIC OPE-12** [DeForest Enterprises]

*Chem. Descrip.:* Octoxynol-13 (12-13 EO)

CAS 9002-93-1

*Uses:* In alkaline powd. laundry/all purpose detergents; metal cleaners/brighteners; detergent sanitizers; hard surface, floor, waterless hand, and acid tile cleaners; xylene emulsifier; food pkg. adhesives, paper, polymers; emulsion polymerization; pesticide emulsifier; dedusting agent; solubilizer for other surfactants; coupling agent and hydrotrope for high caustic and mineral acid systems; lye peeling; foam stabilizer; food-contact defoamer, emulsifier

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.180, 176.210, 178.3120, 178.3400; DOT nonregulated

*Properties:* Nearly colorless liq.; char. odor; sol. in water and most solvs.; insol. in oils and aliphatic solvs.; sp.gr. 1.07 g/ml; b.p. > 300 F; HLB 14.6; cloud pt. 85-92 C (1% in DW); flash pt. (COC) > 300 F; pH 4.5-7.5 (5% in DW); 100% conc.; nonionic

*Toxicology:* Severe eye irritant, may cause corneal damage; mildly irritating to skin; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>, CO

HMIS: Health 2; Flammability 1; Reactivity 0

**DeIONIC OPE-30** [DeForest Enterprises]

*Chem. Descrip.:* Octoxynol-30

CAS 9002-93-1

*Uses:* Used in general purpose, dairy, bottle, and steam cleaners; emulsifier for VA and acrylate polymerization; emulsifier for fats and waxes; emulsion stabilizer for syn. latexes; used in high temp. and high foam detergents; wetting agent and stabilizer; food pkg. adhesives, paper, polymers; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.180, 176.210, 178.3120, 178.3400; DOT nonregulated

*Properties:* Nearly colorless liq.; very sol. in water; insol. in oils and solvs.;

sp.gr. 1.09 g/ml; b.p. 212 F; HLB 17.5; cloud pt. 75 C (1% in 10% NaCl); flash pt. (COC) > 200 F; pH 4.5-7.5 (5% in DW); 69-71% conc.; nonionic  
*Toxicology:* LD50 (oral, rat) 1800 mg/kg; severe eye irritant, may cause corneal damage; mildly irritating to skin; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMS: Health 2; Flammability 1; Reactivity 0

#### DeIONIC OPE-40 [DeForest Enterprises]

*Chem. Descrip.:* Octoxynol-40

CAS 9002-93-1

*Uses:* Used in general purpose, dairy, bottle, and steam cleaners; emulsifier for VA and acrylate polymerization; emulsifier for fats and waxes; emulsion stabilizer for syn. latexes; used in high temp. and high foam detergents; wetting agent and stabilizer; food pkg. adhesives, paper, polymers; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.180, 176.210, 178.3120, 178.3400; DOT nonregulated

*Properties:* Nearly colorless liq.; very sol. in water; insol. in oils and solvs.; sp.gr. 1.1 g/ml; b.p. 212 F; HLB 18.7; cloud pt. 76 C (1% in 10% SC); flash pt. (COC) > 200 F; pH 4.5-7.5 (5% in DW); 69-71% conc.; nonionic

*Toxicology:* LD50 (oral, rat) 1800 mg/kg; severe eye irritant, may cause corneal damage; mildly irritating to skin; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMS: Health 2; Flammability 1; Reactivity 0

#### Delfloc® 763 [Hercules]

*Chem. Descrip.:* Modified polyamide-epichlorohydrin resin aq. sol'n.

*Uses:* Flocculant, settling aid, and clarifier for industrial processing and wastewaters, in paper industry, for separating titanium dioxide and latexes

*Properties:* Liq.; sp.gr. 1.12; dens. 9.3 lb/gal; visc. 230 cps; f.p. -6.7 C; pH 4.2; 35% total solids; 14.8% N; cationic

#### DeMIDE LA-100 [DeForest Enterprises]

*Chem. Descrip.:* Lauramide DEA (1:1)

CAS 120-40-1; EINECS/ELINCS 204-393-1

*Uses:* Foam stabilizer, thickener used in shampoos, bubble baths, hand soaps, rug shampoos, dish detergents, and mild all-purpose cleaners; food pkg. adhesives, paper

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3130; DOT nonregulated

*Properties:* Straw-colored visc. semiliq. or waxy solid; sol. in alcohols, chlorinated aromatic solvs. and glycols, and min. spirits; disp. in kerosene, oils and fats; insol. in water; sp.gr. 0.98-1.01 g/ml; m.p. 34 C; b.p. > 400 F; flash pt. (COC) > 300 F; pH 9.0-11.0 (10% in IPA and DW); 100% conc.; nonionic

*Toxicology:* LD50 (rat) 2.7 g/kg; severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may irritate respiratory tract, esp. upon heating; contains DEA: LD50 (oral, rat) 710 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMIDE LLA-100 [DeForest Enterprises]

*Chem. Descrip.:* Lauramide DEA (1:1)

CAS 120-40-1; EINECS/ELINCS 204-393-1

*Uses:* Foam booster/stabilizer, visc. builder, surfactant in shampoos, bath gels, dish detergents, liq. hand soaps, etc.; solubilizer for perfumes; food pkg. adhesives, paper; can replace solid lauric amides to produce high flash foam

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3130; DOT nonregulated

*Properties:* Lt. amber clear visc. liq.; insol. in water, oils, and aliphatic solvs.; sol. in most other solvs.; sp.gr. 0.98 g/ml; b.p. > 300 F; acid no. 3 max.; cloud pt. > 1.0 C; flash pt. (COC) > 300 F; pH 8.0-11.0 (1% in DW); 100% conc.; nonionic

*Toxicology:* LD50 (rat) 2.7 g/kg; severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause coughing, headache, and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMS: Health 1; Flammability 1; Reactivity 0

*Storage:* Material will cloud upon extended exposure to freezing temps., gently warm to 80-85 F and agitate to restore

#### DeMIDE MFM-200 [DeForest Enterprises]

*Chem. Descrip.:* Modified coconut DEA amide (2:1)

CAS 61791-31-9; EINECS/ELINCS 263-163-9

*Uses:* Detergent, lubricant, emulsifier used in hard surface, steam, pine oil, and all-purpose cleaners, degreasers, alkaline and rolling oil detergents; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §172.710, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

*Properties:* Amber clear visc. liq.; sol. in water, alcohol, glycols, aromatic and chlorinated solvs.; insol. in oils and aliphatic solvs.; sp.gr. 1.02 g/ml; b.p. > 200 F; acid no. 50.0-70.0; flash pt. (PMCC) > 200 F; pH 8.0-10.0 (1% in DW); 100% conc.; anionic/nonionic

*Toxicology:* Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause coughing, headache, and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMIDE MFS-200 [DeForest Enterprises]

*Chem. Descrip.:* Cocamide DEA (2:1)

CAS 61791-31-9; EINECS/ELINCS 263-163-9

*Uses:* Detergent, lubricant, emulsifier used in hard surface, emulsion, and all-purpose cleaners, degreasers, pine and rolling oil detergents, fuel oil sludge dispersants, buffing compounds, and waterless hand cleaners; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §172.710, 173.322, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

*Properties:* Amber clear visc. liq.; sol. in water, alcohol, glycols, aromatic and chlorinated solvs.; insol. in oils and aliphatic solvs.; sp.gr. 1.0 g/ml; b.p. > 300 F; acid no. 40.0-60.0; flash pt. (PMCC) > 212 F; pH 8.5-10.5 (1% in DW); 100% conc.; anionic/nonionic

*Toxicology:* Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause coughing, headache, and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, NO<sub>x</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMIDE ML-100 [DeForest Enterprises]

*Chem. Descrip.:* Lauramide DEA (1:1)

CAS 120-40-1; EINECS/ELINCS 204-393-1

*Uses:* Foam booster, stabilizer and visc. building surfactant used in shampoo, bubble baths, liq. hand soaps, dish detergents, body wash, bath gels, and mild all-purpose cleaners; solubilizer in perfumes; emollient; food pkg. adhesives, paper; replacement for solid lauric amides

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3130; DOT nonregulated

*Properties:* Lt. amber visc. liq.; sol. or disp. in most solvs.; insol. or disp. in water, oils, and fats; sp.gr. 1.0 g/ml; b.p. > 300 F; flash pt. (COC) > 300 F; pH 9.0-10.5 (5% in DW); 100% conc.; nonionic

*Toxicology:* LD50 (rat) 2.7 g/kg; severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause coughing, headache, and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMIDE MLY-100 [DeForest Enterprises]

*Chem. Descrip.:* Lauramide DEA (1:1)

CAS 120-40-1; EINECS/ELINCS 204-393-1

*Uses:* Foam booster/stabilizer, visc. builder, surfactant, conditioner in shampoos, bubble baths, liq. hand soaps, dishwashing and high foam detergents; food pkg. adhesives, paper

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3130; DOT nonregulated

*Properties:* Lt. amber clear oily liq.; sol. in lower alcohols, glycols, and most solvs.; insol. or disp. in water, oils, and fats; sp.gr. 1.00 g/ml; b.p. > 300 F; flash pt. (COC) > 300 F; pH 9.0-11.0 (1% in DW); 100% conc.; nonionic

*Toxicology:* LD50 (rat) 2.7 g/kg; severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause coughing, headache, and nausea; contains DEA: LD50

(oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO, CO<sub>2</sub>, NO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeMIDE RCN-100** [DeForest Enterprises]

**Chem. Descrip.:** Cocamide DEA (1:1)

CAS 68603-42-9; EINECS/ELINCS 263-163-9

**Uses:** Foam booster, stabilizer, and visc. builder for use in low cost shampoos and bubble baths, shampoo concentrates, hand dish detergents, lubricants, and emulsion cleaners; emollient; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard; economical

**Regulatory:** FDA 21CFR §172.710, 173.322, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

**Properties:** Lt. amber visc. liq.; sol. in alcohols, glycols, chlorinated, and some aliphatic and aromatic solvs.; disp. in water, oils, and some aliphatic and aromatic solvs.; sp.gr. 1.0 g/ml; b.p. > 300 F; acid no. 1.0 max.; flash pt. (COC) > 300 F; pH 8.0-11.0 (1% in DW); 100% conc.; nonionic

**Toxicology:** Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and abdominal pain; inh. may cause coughing, headache, and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeMIDE RCN-100HV** [DeForest Enterprises]

**Chem. Descrip.:** Modified cocamide DEA (1:1)

CAS 61791-31-9; EINECS/ELINCS 263-163-9

**Uses:** Foam booster, stabilizer, and visc. builder for use in shampoos, bubble baths, dishwashing detergents, liq. hand soaps, bath prods., emulsion cleaners, lubricants, low irritation skin prods. aerosol high foam prods.; solubilizer for perfumes; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §172.710, 173.322, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

**Properties:** Amber clear liq.; sol. in most solvs.; insol. or disp. in water, oils, and aliphatic solvs.; sp.gr. 1.0 g/ml; b.p. > 300 F; acid no. 3 max.; cloud pt. > 1.0 C; flash pt. (COC) > 300 F; pH 8.0-10.0 (1% in DW); 100% conc.; nonionic

**Toxicology:** Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause headache and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeMIDE RCN-200** [DeForest Enterprises]

**Chem. Descrip.:** Cocamide DEA (2:1)

CAS 68603-42-9; EINECS/ELINCS 263-163-9

**Uses:** Detergent, foam booster/stabilizer, visc. builder, emulsifier, and lubricant used in hard surface, dishwashing, and laundry detergents, shampoo and bath prods., chain lubricants, and car wash; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §172.710, 173.322, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

**Properties:** Visc. straw-colored liq.; sol. in water, alcohol, chlorinated solvs. and aromatic solvs.; insol. or disp. in aliphatic solvs., oils, and fats; sp.gr. 1.0 g/ml; b.p. > 300 F; acid no. 2.0-6.0; flash pt. (COC) > 200 F; pH 9.0-11.0 (10% in DW); 100% conc.; anionic/nonionic

**Toxicology:** Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and abdominal pain; inh. may cause headache and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeMIDE RCN-276** [DeForest Enterprises]

**Chem. Descrip.:** Modified cocamide DEA (2:1)

CAS 68603-42-9; EINECS/ELINCS 263-163-9

**Uses:** Detergent for use in hard surf. cleaners, degreasers, all-purpose cleaners, pine and rolling oil cleaners, and emulsion cleaners; lubricant; emulsifier; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard; moderate foam; alkaline-stable

**Regulatory:** FDA 21CFR §172.710, 173.322, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

**Properties:** Amber clear visc. liq.; sol. in water, alcohol, glycols, chlorinated solvs. and aromatic solvs.; insol. in oils and aliphatic solvs.; sp.gr. 1.00 g/ml; b.p. > 300 F; acid no. 45.0-55.0; flash pt. (COC) > 300 F; pH 8.5-9.5 (10% in DW); 100% conc.; anionic/nonionic

**Toxicology:** Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and abdominal pain; inh. may cause headache and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeMIDE RCN-MCY-100** [DeForest Enterprises]

**Chem. Descrip.:** Cocamide DEA (1:1)

CAS 61791-31-9; EINECS/ELINCS 263-163-9

**Uses:** Foam booster, stabilizer, and visc. builder for use in personal care prods. such as shampoos, bubble baths, and bath gels, liq. hand soaps, mild all-purpose cleaners, and dish detergents; solubilizer for perfumes; emollient, lubricant; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard; useful as replacement for solid amines

**Regulatory:** FDA 21CFR §172.710, 173.322, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

**Properties:** Lt. amber visc. liq.; sol. or disp. in most solvs.; insol. or disp. in water, oils, and fats; sp.gr. 1.00 g/ml; b.p. > 300 F; flash pt. (COC) > 300 F; pH 9.0-11.0 (1% in DW); 100% conc.; nonionic

**Toxicology:** Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause coughing, headache, and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Uses:** Foam booster, stabilizer, and visc. builder for use in personal care prods. such as shampoos, bubble baths, and bath gels, liq. hand soaps, mild all-purpose cleaners, and dish detergents; solubilizer for perfumes; emollient, lubricant; food pkg. adhesives, paper, cellophane, textiles; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §172.710, 173.322, 175.105, 176.180, 176.210, 177.1200, 177.2260, 177.2800, 178.3120; DOT nonregulated

**Properties:** Lt. amber visc. liq.; sol. or disp. in most solvs.; insol. or disp. in water, oils, and fats; sp.gr. 1.0 g/ml; b.p. > 300 F; flash pt. (COC) > 300 F; pH 8.0-11.0 (10% in DW); 100% conc.; nonionic

**Toxicology:** LD50 (rat) 2.7 g/kg; severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and diarrhea; inh. may cause coughing, headache, and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeMIDE SBA-100** [DeForest Enterprises]

**Chem. Descrip.:** Linoleamide DEA (1:1)

CAS 56863-02-6; EINECS/ELINCS 260-410-2

**Uses:** Visc. builder, emulsifier (invert), lubricant, corrosion inhibitor for use in sol. oils, cutting fluids, textile and chain lubricants; visc. builder and conditioner in shampoos, bubble baths, etc.; invert emulsifier for min. oil in creams and lotions; food pkg. adhesives, coatings, textiles; defoamer in food-contact paper/paperboard

**Regulatory:** FDA 21CFR §172.710, 175.105, 175.300, 176.210, 177.2260, 177.2800, 178.3120; DOT nonregulated

**Properties:** Lt. amber visc. liq.; sol. or disp. in most solvs. and oils; disp. in water; sp.gr. 0.99 g/ml; b.p. > 300 F; acid no. 1.0 max.; flash pt. (COC) > 300 F; pH 8.0-11.0 (1% in DW); 100% conc.; nonionic

**Toxicology:** Severe eye irritant; skin irritant, prolonged contact may cause burns; ing. may cause nausea, vomiting, and abdominal pain; inh. may cause headache and nausea; contains DEA: LD50 (oral, rat) 710 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>, NO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeMOX CAPO** [DeForest Enterprises]

**Chem. Descrip.:** Cocamidopropylamine oxide

CAS 68155-09-9; EINECS/ELINCS 268-938-5

*Uses:* Detergent in shampoos and bath prods., chlorine, bleach, and acid cleaners, fabric, dishwashing, and laundry detergents, shaving creams, acid pickling, emulsion polymerization, pigment dispersants, electroplating, liq. toiletry preps.; antistat for textiles; foam stabilizer in foam paper coatings; emollient; stabilizer; visc. builder; foam booster; wetting agent; lime soap dispersant; conditioner

*Regulatory:* DOT nonregulated

*Properties:* Lt. yel. clear liq.; sol. in water, alcohols, and glycols; disp. in oil; insol. in most solvs.; sp.gr. 1.02 g/ml; b.p. 212 F; flash pt. > 200 F; pH 6.0-8.0; 30% act.; nonionic/cationic

*Toxicology:* LD50 (oral, rat) > 2.46 g/kg; may cause eye and skin irritation, prolonged contact may cause burns; ing. may cause nausea, vomiting, and abdominal pain; inh. at high conc. may cause headache, coughing

*Environmental:* Biodeg.

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, NO<sub>2</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMOX LAO [DeForest Enterprises]

*Chem. Descr.:* Lauramine oxide

CAS 1643-20-5; EINECS/ELINCS 216-700-6

*Uses:* Detergent in shampoos and bath prods., chlorine, bleach, and acid cleaners, fabric, dishwashing, and laundry detergents, shaving creams, acid pickling, emulsion polymerization, pigment dispersants, electroplating, liq. toiletry preps.; antistat for textiles; foam stabilizer in foam paper coatings; wetting agent; emollient; stabilizer; visc. builder; foam booster; pour pt. depressant; lime soap dispersant

*Regulatory:* DOT nonregulated

*Properties:* Clear to colorless lt. yel. liq.; sol. in water, alcohols, and glycols; disp. in oil; insol. in most solvs.; sp.gr. 1.0 g/ml; b.p. 212 F; pH 6.0-8.0; 30% conc.; nonionic/cationic

*Toxicology:* LD50 (acute oral) 1.0-5.0 g/kg; may cause eye and skin irritation, prolonged contact may cause burns; ing. may cause nausea, vomiting, and abdominal pain; inh. at high conc. may cause headache, coughing

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, NO<sub>2</sub>

HMS: Health 2; Flammability 1; Reactivity 0

#### DeMULS PSML-20 [DeForest Enterprises]

*Chem. Descr.:* Polysorbate 20

CAS 9005-64-5

*Uses:* Solubilizer for perfumes in personal care prods., vitamin oils and flavors in food industry; reduces irritation in baby shampoos; rinse aid in rayon finishing; antistat and lubricant in textiles; coemulsifier in dye carrier textile formulations; emulsifier for petrol. oils, fats, solvs., and waxes in household prods.; spinning aid for nylon; visc. modifier; food pkg. adhesives, coatings, paper, polymers, textiles; food-contact defoamer and emulsifier

*Regulatory:* FDA 21CFR §172.515, 175.105, 175.300, 176.180, 176.210, 177.1210, 177.2260, 177.2800, 178.3400; DOT nonregulated

*Properties:* Pale yel. oily liq.; sol. in water, aromatic solvs.; insol. in aliphatic, chlorinated, solvs. and oils; sp.gr. 1.10 g/ml; b.p. > 212 F; HLB 16.7; sapon no. 40.0-50.0; hyd. no. 96.0-108.0; flash no. (COC) > 300 F; 97% conc.; nonionic

*Toxicology:* LD50 (oral, rat) > 20 ml/kg; nontoxic; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMULS PSMO-80 [DeForest Enterprises]

*Chem. Descr.:* Polysorbate 80

CAS 9005-65-6

*Uses:* Emulsifier; solubilizer in edible oils, cosmetics, perfumes, and pharmaceutical prods.; solubilizer for flavors in food applics.; emulsifier for aliphatic alcohols in tobacco sucker control concs.; lubricant; antistat; antifogging agent for PVC film; coemulsifier and invert emulsifier in cosmetic creams and lotions; food pkg. adhesives, coatings, paper; food-contact defoamer and emulsifier

*Regulatory:* FDA 21CFR §172.515, 172.840, 173.340, 175.105, 175.300, 176.180, 176.200, 176.210, 178.3400; DOT nonregulated

*Properties:* Yel. liq.; sol. in water; disp. or insol. in most solvs. and oils; sp.gr. 1.10 g/ml; b.p. > 300 F; HLB 15.0; sapon no. 45.0-55.0; hyd. no. 65.0-80.0; flash no. (COC) > 300 F; 97% conc.; nonionic

*Toxicology:* LD50 (oral, rat) > 20 ml/kg; nontoxic; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMULS PSMS-60 [DeForest Enterprises]

*Chem. Descr.:* Polysorbate 60

CAS 9005-67-8

*Uses:* Emulsifier, antistat; solubilizer for vitamin oils, essential oils, balsam, and tar preps. in cosmetics and pharmaceuticals; emulsifier for petrol. oils, fats, solvs., and household waxes; solubilizer for flavors in food applics.; emulsifier for paraffin type waxes for use in textile and paper coatings; lubricant; antistat; food pkg. adhesives, paper; food-contact defoamer and emulsifier

*Regulatory:* FDA 21CFR §172.515, 172.836, 173.340, 175.105, 176.180, 176.210, 178.3400; DOT nonregulated

*Properties:* Yel. visc. liq./paste; disp. or sol. in most solvs. and oils; disp. in water; b.p. > 300 F; HLB 15.0; sapon no. 45.0-55.0; hyd. no. 81.0-96.0; flash pt. (COC) 300 F; 97% conc.; nonionic

*Toxicology:* LD50 (oral, rat) > 20 ml/kg; nontoxic; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMULS PSTS-65 [DeForest Enterprises]

*Chem. Descr.:* Polysorbate 65

CAS 9005-71-4

*Uses:* Emulsifier; softener; antistat; lubricant for textile processing; softener for compounding textile finishes; emulsifier for petrol. and veg. oils; lubricant in oil-based cutting fluids and drawing compds.; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.838, 173.340, 176.180, 176.210, 178.3400; DOT nonregulated

*Properties:* Tan waxy solid; disp. in water; disp. or sol. in most solvs. and oils; b.p. > 300 F; HLB 10.5; sapon no. 88-98; hyd. no. 44-60; flash pt. (COC) > 300 F; 96% conc.; nonionic

*Toxicology:* LD50 (oral, rat) > 20 ml/kg; nontoxic; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMULS SML [DeForest Enterprises]

*Chem. Descr.:* Sorbitan laurate

CAS 1338-39-2; EINECS/ELINCS 215-663-3

*Uses:* Emulsifier; lubricant; coupling agent; softener; antistat; dispersant; emollient; water-disp. emulsifier for oils and fats; emulsifier in creams and lotions; intermediate; may be used to retard starch crystallization in jellies; lubricant antistat process aid in PVC resin mfg.; food-contact coatings; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.300, 175.320, 175.380, 176.210, 178.3400; DOT nonregulated

*Properties:* Amber liq.; sol. in solvs. and oils; disp. in water; sp.gr. 1.0 g/ml; b.p. > 212 F; HLB 8.0; acid no. 7.0 max.; sapon no. 158-170; hyd. no. 330-358; flash pt. (COC) > 300 F; 100% conc.; nonionic

*Toxicology:* LD50 (oral, rat) > 20 ml/kg; nontoxic

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMS: Health 1; Flammability 1; Reactivity 0

#### DeMULS SMO [DeForest Enterprises]

*Chem. Descr.:* Sorbitan oleate

CAS 1338-43-8; EINECS/ELINCS 215-665-4

*Uses:* Emulsifier and coupling agent for petrol. oils, fats, and waxes; lubricant/softener for textiles and leather; pigment dispersant in cosmetics; w/o emulsifier; corrosion inhibitor in petrol. oils; emollient; food pkg. adhesives, coatings; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §173.75, 175.105, 175.300, 175.320, 175.380, 176.210, 178.3400; DOT nonregulated

*Properties:* Amber liq.; sol. in fats and oils, alcohols, min. oil, aromatic and aliphatic solvs.; insol. in water; sp.gr. 1.0 g/ml; b.p. > 300 F; HLB 4.3; acid no. 8.0 max.; sapon no. 145-160; hyd. no. 193-210; flash pt. (COC) > 300 F; 100% conc.; nonionic

*Toxicology:* LD50 (oral, rat) > 20 ml/kg; nontoxic, nonirritating

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMIS: Health 0; Flammability 1; Reactivity 0

#### DeMULS SMS [DeForest Enterprises]

*Chem. Descrip.:* Sorbitan stearate

CAS 1338-41-6; EINECS/ELINCS 215-664-9

*Uses:* Emulsifier component for silicone defoamer, wax and oil emulsions; emulsifier for food and cosmetic articles; lubricant for textiles and PVC film; pigment dispersant in thermoplastics and paper wax coatings; intermediate; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings, paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §172.515, 172.842, 173.340, 175.105, 175.300, 175.320, 175.380, 176.180, 176.200, 176.210, 177.1210, 178.3400; DOT nonregulated

*Properties:* Cream flakes; sol. most solvs.; insol. in water, aliphatic solvs., and oils; m.p. 127 F; b.p. > 300 F; no. 5-10; sapon no. 147-157; hyd. no. 235-260; flash pt. (COC) > 300 F; 100% conc.; nonionic

*Toxicology:* Nontoxic, nonirritating

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO,

HMIS: Health 0; Flammability 1; Reactivity 0

#### Densefloc 30 [Graden]

*Chem. Descrip.:* Polymeric

*Uses:* Coagulant, flocculant for wastewater treatment in paper mills and municipalities, calcium carbonate-starch fine paper furnishes, treating makeup water in papermaking

*Properties:* Colorless sl. opaque liq.; sl. odor; sp.gr. 1.28; m.w. 1400; visc. 11 cps; pH 3.5-3.8; 28% total solids; cationic

*Precaution:* Corrosive liq.

*Storage:* Rec. storage < 25 C; do not store above 35 C

#### Densol P-82 [Graden]

*Chem. Descrip.:* Sulfated oleic ester

*Uses:* Wetting agent, rewetting agent, emulsifier for paper towels, latex impregnation and dipping, textile dyeing

*Properties:* Amber liq.; dens. 8.57 lb/gal; sp.gr. 1.0288; pH 5.5 (2%); 65% act.; anionic

#### DePEG 30-CO [DeForest Enterprises]

*Chem. Descrip.:* PEG-30 castor oil

CAS 61791-12-6

*Uses:* Emulsifier for oils, solvs., waxes, polyester resins; emulsifier, dispersant for PU foams; coemulsifier/lubricant for textiles; degreaser in leather processing; pigment dispersant; rewetting and softening agent for wet-str. papers; visc. stabilizer for emulsion paints; emulsifier/emollient for cosmetics; solubilizer for perfumes; food pkg. adhesives, coatings, textiles, animal glue; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.210, 177.2800, 178.3120; DOT nonregulated

*Properties:* Yel. clear liq.; sol. in water and most aromatic solvs.; disp. in min. oil; insol. in most aliphatic solvs.; sp.gr. 1.04 g/ml; b.p. > 300 F; HLB 11.7; sapon no. 73-78; cloud pt. 48-61 C (1% in 5% NaCl); flash pt. (COC) > 300 F; pH 7.0-8.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* May cause severe eye and skin irritation; ing. or inh. in high conc. may cause nausea, coughing, headache, and abdominal pain; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

#### DePEG 40-CO [DeForest Enterprises]

*Chem. Descrip.:* PEG-40 castor oil

CAS 61791-12-6

*Uses:* Water-soluble emulsifier for oils, solvs. and waxes; coemulsifier and lubricant for textile prods.; degreaser in leather processing; pigment dispersant; rewetting and softening agent for wet-str. papers; food pkg. adhesives, coatings, paper, textiles; emulsifier for polyester resins; visc. stabilizer for emulsion paints; emulsifier/emollient for cosmetics; solubilizer for perfumes; emulsifier, dispersant for PU foams; emulsion stabilizer in PVA emulsion

paints

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 177.2800; DOT nonregulated

*Properties:* Yel. liq.; sol. in water, chlorinated and aromatic solvs.; disp. in oils; insol. in most aliphatic solvs.; sp.gr. 1.04 g/ml; b.p. > 300 F; HLB 13.0; sapon no. 58-70; pour pt. 25 C (approx.); flash pt. (COC) > 300 F; pH 7.0-8.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* May cause severe eye and skin irritation; ing. or inh. in high conc. may cause nausea, coughing, headache, and abdominal pain; ethylene oxide (carcinogenic and reproductive hazard) can accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

#### DePEG 200 [DeForest Enterprises]

*Chem. Descrip.:* PEG-4

CAS 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Surfactant; intermediate for mfg. of PEG-fatty acid esters; humectant in certain printing ink formulations; plasticizer for starch pastes; solv. for personal care prods.; binder and lubricant for compressed tablets; plasticizer in PE sheet; lubricant for rubber molds; humectant and solv. for ink pad dyes; water softener and additive in paper processing; solubilizer; coupling agent; food pkg. adhesives and food-contact articles

*Regulatory:* FDA 21CFR §172.820, 173.310, 173.340, 175.105, 178.3750; DOT nonregulated

*Properties:* Water-wh. clear liq.; sol. in water; insol. in most solvs. and oils; m.w. 190-210; sp.gr. 1.13 g/ml; f.p. < -5 C; flash pt. (COC) 385 F; pH 5.0-8.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* Nontoxic; LD50 (oral, mouse) 29,500 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO,

HMIS: Health 0; Flammability 1; Reactivity 0

#### DePEG 300 [DeForest Enterprises]

*Chem. Descrip.:* PEG-6

CAS 25322-68-3; EINECS/ELINCS 220-045-1

*Uses:* Surfactant; intermediate for mfg. of PEG-fatty acid esters; humectant in certain printing ink formulations; plasticizer for starch pastes; solv. for personal care prods.; binder and lubricant for compressed tablets; plasticizer in PE sheet; lubricant for rubber molds; humectant and solv. for ink pad dyes; water softener and additive in paper processing; solubilizer; coupling agent; food pkg. adhesives and food-contact articles

*Regulatory:* FDA 21CFR §172.820, 173.310, 173.340, 175.105, 178.3750; DOT nonregulated

*Properties:* Water-wh. clear liq.; sol. in water; insol. in most solvs. and oils; m.w. 285-315; sp.gr. 1.13 g/ml; f.p. < 0 C; flash pt. (COC) 385 F; pH 5.0-8.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* Nontoxic; LD50 (oral, mouse) 29,500 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO,

HMIS: Health 0; Flammability 1; Reactivity 0

#### DePEG 400 [DeForest Enterprises]

*Chem. Descrip.:* PEG-8

CAS 25322-68-3; EINECS/ELINCS 225-856-4

*Uses:* Surfactant; intermediate for mfg. of PEG-fatty acid esters; humectant in certain printing ink formulations; plasticizer for starch pastes; solv. for personal care prods.; binder and lubricant for compressed tablets; plasticizer in PE sheet; lubricant for rubber molds; humectant and solv. for ink pad dyes; water softener and additive in paper processing; coupling agent in creams and lotions; food pkg. adhesives and food-contact articles

*Regulatory:* FDA 21CFR §172.820, 173.310, 173.340, 175.105, 178.3750, 181.30; DOT nonregulated

*Properties:* Water wh. clear liq.; sol. in water; insol. in most solvs. and oils; m.w. 380-420; sp.gr. 1.13 g/ml; f.p. < 4-8 C; flash pt. (PMCC) 350 F; pH 5.0-8.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* Nontoxic; LD50 (oral, mouse) 29,500 mg/kg

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO,

HMIS: Health 0; Flammability 1; Reactivity 0

#### DePEG 600 [DeForest Enterprises]

*Chem. Descrip.:* PEG-12

CAS 25322-68-3; EINECS/ELINCS 229-859-1

*Uses:* Surfactant; intermediate for PEG-fatty acid esters; humectant in printing

inks; plasticizer for starch pastes; solv. for personal care prods.; binder/lubricant for compressed tablets; plasticizer in PE sheet; food pkg. adhesives; lubricant for rubber molds; humectant and solv. for ink pad dyes; water softener and additive in paper processing; coupling agent in creams and lotions; color stabilizer for fuel oils; leveling agent in electropolishing formulas

**Regulatory:** FDA 21CFR §172.820, 173.310, 173.340, 175.105, 178.3750, 178.3910; DOT nonregulated

**Properties:** Water wh. clear liq.; sol. in water; insol. in most solvs. and oils; m.w. 570-630; sp.gr. 1.13 g/ml; f.p. < 20-25 C; flash pt. (COC) 475 F; pH 5.0-8.0 (5% in DW); 100% conc.; nonionic

**Toxicology:** Nontoxic; LD50 (oral, mouse) 29,500 mg/kg

**Precaution:** Incompat. with strong oxidizers

**Hazardous Decom. Prods.:** Thermal decomp. prods.: CO<sub>x</sub>

HMIS: Health 0; Flammability 1; Reactivity 0

**Storage:** Will become hazy just below 25 C and will solidify at lower temps.

#### DePHOS HP-739 [DeForest Enterprises]

**Chem. Descrip.:** Complex phosphate ester in acid form

CAS 12645-31-7

UN No. 1760 (DOT)

**Uses:** Lubricant, EP additive, emulsifier, wetting agent, detergent for use in sol. oils, syn. coolants, cutting fluids, rolling oils, hydraulic fluids, emulsion and alkaline cleaners, chain lubricants, bottle lubricants; paper deinking; emulsion polymerization and degreasing applics.; corrosion inhibitor; low- to moderate-foaming

**Properties:** Amber clear visc. liq.; sol. in oils and aliphatic solvs.; disp. in water and other solvs.; sol. in water when neutralized to pH >= 7.5; sp.gr. 1.03 g/ml; b.p. > 200 F; flash pt. (TOC) 300 F; pH < 2.5 (1% in DW); 99% conc.; anionic

**Toxicology:** Overexposure to eyes may cause burns, to skin may damage tissue; severe irritant by inh.; ing. may cause salivation, abdominal cramps, and thirst; contains phosphoric acid: LD50 (oral, rat) 1530 mg/kg

**Precaution:** DOT: corrosive liq.; incompat. with strong oxidizers

**Hazardous Decom. Prods.:** Thermal decomp. prods.: CO, CO<sub>2</sub>, PO<sub>x</sub>

HMIS: Health 3; Flammability 1; Reactivity 1

#### DePHOS RA-40 [DeForest Enterprises]

**Chem. Descrip.:** Polyoxyethylene decyl ether phosphate

CAS 108818-88-8

UN No. 1760 (DOT)

**Uses:** Detergent, emulsifier, hydrotrope, wetting agent used in floor, steam, oven, metal, toilet bowl, soak tank, and high alkaline cleaners, car washes, wax strippers, and textile wetting agents; solubilizer for nonionic surfactants; defoamer in food-contact paper/paperboard; food pkg. animal glues; mod. foam

**Regulatory:** FDA 21CFR §176.210, 178.3120

**Properties:** Gardner 7 max. clear visc. liq.; sol. in water, alcohols, and glycols; disp. or insol. in oils and solvs.; sp.gr. 1.19 g/ml; flash pt. (COC) > 200 F; pH < 2.5 (10% in DW); 99% conc.; anionic

**Toxicology:** Overexposure to eyes may cause burns, to skin may damage tissue; severe irritant by inh.; ing. may cause burning, inflammation, blisters, and tissue damage; contains phosphoric acid: LD50 (oral, rat) 1530 mg/kg

**Precaution:** DOT: corrosive liq.; incompat. with strong oxidizers and reducing agents

HMIS: Health 3; Flammability 1; Reactivity 1

**Storage:** Darkens upon aging

#### Dequest® 2000 [Solutia]

**Chem. Descrip.:** Aminotrimethylene phosphonic acid aq. sol'n.

CAS 6419-19-8; EINECS/ELINCS 229-146-5

UN No. 1760; 3265

**Uses:** Deflocculant, sequestrant, aq. process additive for paper, textiles, metals, general purpose ion control, oil field applics.; industrial and commercial formulations for cleaning various substrates; scale and corrosion inhibitor in aq. systems for cooling water treatment, boiler treatment, I&I cleaners

**Regulatory:** SARA reportable

**Properties:** Water-wh. to pale yel. clear liq.; sl. aromatic odor; misc. with water; m.w. 299; sp.gr. 1.3 (20/15 C); visc. 11 cstk (20 C); f.p. -12 C; pH < 2 (1%); 50% act.

**Toxicology:** LD50 (oral, rat) 2910 mg/kg (sl. toxic), (dermal, rabbit) > 6310 mg/kg (pract. nontoxic); mod. irritating to eyes and skin

**Environmental:** EC50 (algae, 96 h) 20 mg/l, (daphnia magna, 48 h) 297 mg/l; LC50 (rainbow trout, 96 h) > 330 mg/l; pract. nontoxic to invertebrates,

fish, birds; slow to resist. biodegradation

**Precaution:** Corrosive to mild steel; incompat. with conc. caustic (evolves heat), strong oxidizers

**Hazardous Decom. Prods.:** CO, CO<sub>2</sub>, NO<sub>x</sub>; phosphines may form after all water is removed

#### Dequest® 2000LC [Solutia]

**Chem. Descrip.:** Amino tri (methylenephosphonic acid) (48-52%)

CAS 6419-19-8; EINECS/ELINCS 229-146-5

UN No. 3265

**Uses:** Deflocculant, sequestrant, dispersant, scale inhibitor for I&I cleaning, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

**Regulatory:** RCRA hazardous waste; DOT corrosive liq., acidic, org., n.o.s.; SARA immediate hazard (40CFR §370); CERCLA not applicable

**Properties:** Pale yel. liq.; aromatic odor; completely misc. with water; m.w. 299; sp.gr. 1.33; dens. 11.3 lb/gal; visc. 36.5 cps (20 C), 15 cps (60 C); f.p. 12 C; b.p. > 105 C; flash pt. nonflamm.; pH < 2 (1%); 50% act.

**Toxicology:** LD50 (oral, rat) 2910 mg/kg, (skin, rabbit) > 6310 mg/kg; mod. irritating to skin and eyes; no more than sl. toxic by skin absorp. and ing.; TSCA listed

**Environmental:** EC50 (daphnia magna, 48 h) 297 mg/l; LC50 (rainbow trout, 96 h) > 330 mg/l; not expected to bioaccumulate; keep out of drains and water courses

**Precaution:** Corrosive to mild steel and aluminum; incompat. with strong oxidizing agents

**Hazardous Decom. Prods.:** (combustion): CO, CO<sub>2</sub>, NO<sub>x</sub>, PO<sub>x</sub>

HMIS: Health 1; Flammability 0; Reactivity 1

**Storage:** 24 mos shelf life; store > -10 C in cool, dry, well-ventilated area

#### Dequest® 2006 [Solutia]

**Chem. Descrip.:** Pentasodium aminotrimethylene phosphonate

CAS 2235-43-0; EINECS/ELINCS 218-791-8

UN No. 3265

**Uses:** Deflocculant; sequestrant; dispersant; aq. process additive for paper, textiles, and metals; industrial and commercial formulations for cleaning various substrates; retards concrete setting times; scale and corrosion inhibitor in aq. systems for cooling water treatment, boiler treatment, I&I cleaners, general purpose ion control, oil field applics.; stabilizer for peroxide bleaching sol'ns. in textiles, paper pulp; temp. and pH stability

**Regulatory:** SARA nonreportable

**Properties:** Water-wh. to pale yel. clear liq.; ammoniacal odor; misc. with water; m.w. 409; sp.gr. 1.4 (20/15 C); visc. 57.51 cstk (20 C); f.p. -16 C; pH 10-11 (1%); 40% act.

**Toxicology:** LD50 (oral, rat) > 17,800 mg/kg, (dermal, rabbit) > 15,800 mg/kg; pract. nontoxic by oral and dermal routes; pract. nonirritating to eyes; nonirritating to skin; TSCA listed

**Environmental:** EC50 (algae, 96 h) 20 mg/l, (daphnia magna, 48 h) 297 mg/l; LC50 (rainbow trout, 96 h) > 330 mg/l; pract. nontoxic to invertebrates, fish, birds; slow to resist. biodegradation

**Precaution:** Incompat. with strong oxidizing agents and acids

**Hazardous Decom. Prods.:** CO, CO<sub>2</sub>, NO<sub>x</sub>; phosphines may form after all water has been removed

#### Dequest® 2010 [Solutia]

**Chem. Descrip.:** Hydroxy-ethylidene diphosphonic acid aq. sol'n.

CAS 2809-21-4; EINECS/ELINCS 220-552-8

UN No. 1760 (DOT)

**Uses:** Deflocculant, sequestrant, aq. process additive for paper, textiles, and metals; industrial and commercial formulations for cleaning various substrates; scale and corrosion inhibitor in aq. systems; for cooling water, boilers, I&I cleaners, swimming pool stain prevention, personal care prods., metal ion control; exc. chlorine stability

**Regulatory:** SARA reportable; USA approvals for food contact

**Properties:** Water wh. to pale yel. clear liq.; char. odor; misc. with water; m.w. 206; sp.gr. 1.45 (20/15 C); visc. 46 cstk (20 C); f.p. 0 C; pH < 2 (1%); 60% act.

**Toxicology:** LD50 (oral, rat) 2400 mg/kg (sl. toxic), (dermal, rabbit) > 7940 mg/kg (pract. nontoxic); causes eye burns; nonirritating to skin

**Environmental:** EC50 (algae, 96 h) 3 mg/l, (daphnia magna, 48 h) 527 mg/l, (rainbow trout, 96 h) 368 mg/l; pract. nontoxic to invertebrates, fish, birds; slow to intermediate biodegradation

**Precaution:** Corrosive to mild steel; incompat. with conc. caustic (evolves heat), strong oxidizers

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, PO<sub>x</sub>; phosphines may form after all water removed

**Dequest® 2016 D Powder** [Solutia]

*Chem. Descr.:* 1-Hydroxyethylidene-1,1-diphosphonic acid, tetrasodium salt

CAS 3794-83-0; EINECS/ELINCS 223-267-7

*Uses:* Sequestrant, corrosion inhibitor, scale inhibitor, pigment dispersant for industrial cooling and boiler water treatment, metal pretreatment for coatings, drilling muds and kaolin clay slurries, metal finishing; protects against rancidification in cosmetics, personal care prods.; stabilizer for peroxide bleaching sol'ns. in textiles, paper pulp

*Properties:* Wh. crystalline powd.; 4.0% max. on 16 mesh; 10% max. thru 325 mesh; 100 min.  $\mu$  mean particle size; m.w. 294; bulk dens. 0.65-0.95 g/cc; pH 11-12 (1%); 57-62% total act. acid; 7-11% moisture

**Dequest® 2041** [Solutia]

*Chem. Descr.:* Ethylene diamine tetra (methylene phosphonic acid)

CAS 1429-50-1

*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Properties:* Wh. crystalline solid; m.w. 436; pH < 2 (1%); 92% act. acid

*Toxicology:* Irritating to eyes

**Dequest® 2046** [Solutia]

*Chem. Descr.:* Ethylene diamine tetra (methylene phosphonic acid), pentasodium salt

CAS 7651-99-2

*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Properties:* Wh. to pale yel. clear liq.; m.w. 546; sp.gr. 1.30; f.p. -14 C; pH 6-8 (1%); 25% act. acid; 31% act. salt

**Dequest® 2054** [Solutia]

*Chem. Descr.:* Hexapotassium hexamethylene diamine tetra (methylene phosphonate) aq. sol'n.

CAS 38820-59-6

*Uses:* Deflocculant, sequestrant, aq. process additive for paper, textiles, and metals; industrial and commercial formulations for cleaning various substrates; scale and corrosion inhibitor in aq. systems; rec. for boiler treatments, reverse osmosis, desalination

*Regulatory:* SARA nonreportable

*Properties:* Water-wh. to yel. clear liq.; char. odor; m.w. 721; sp.gr. 1.26; f.p. -15 C; pH 6-8 (1%); 33% act.

*Toxicology:* LD50 (oral, rat) > 12,800 mg/kg, (dermal, rabbit) > 7940 mg/kg; pract. nontoxic orally and dermally; pract. nonirritating to eyes; nonirritating to skin

*Environmental:* LC50 (midge larvae, 48 h) 4660 mg/l, (sheepshead minnow, 96 h) > 954 mg/l; LD50 (oral, mallard duck) > 2510 mg/kg; pract. nontoxic to invertebrates, fish, birds

*Precaution:* Incompat. with strong oxidizers and acids

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, NO<sub>x</sub>; phosphines may form after all water is removed

**Dequest® 2060** [Solutia]

*Chem. Descr.:* Diethylene triamine penta (methylene phosphonic acid) aq. sol'n.

CAS 15827-60-8

*Uses:* Process additive for paper, textiles, and metals; industrial and commercial formulations for cleaning various substrates; scale and corrosion inhibitor in aq. systems; sequestrant; for cooling water treatment, detergents, peroxide bleach stabilization, I&I cleaners, geothermal, oil field applics.

*Properties:* Dk. amber clear liq.; m.w. 573; sp.gr. 1.4; pH < 2 (1%); 50% act.

**Dequest® 2066** [Solutia]

*Chem. Descr.:* Hexasodium diethylene triamine penta (methylene phosphonate) aq. sol'n.

*Uses:* Deflocculant, sequestrant, process additive for paper, textiles, and metals; industrial and commercial formulations for cleaning various substrates; cement modifier (retards concrete setting times); scale and corrosion inhibitor in aq. systems for cooling water treatment, detergents, I&I cleaners, geothermal, oil field applics.; stabilizer for peroxide bleaching sol'ns. in textiles, paper pulp; deinking/bleaching of recycled paper pulp

*Regulatory:* SARA nonreportable

*Properties:* Amber clear liq.; m.w. 705; sp.gr. 1.3; f.p. -13 C; pH 6-8 (1%); 25% act.

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg, (dermal, rabbit) > 5000 mg/kg; pract. nontoxic orally, dermally; pract. nonirritating to eyes; nonirritating to skin

*Environmental:* EC50 (algae, 96 h) 2 mg/l, (daphnia magna, 48 h) 242 mg/l; LC50 (rainbow trout, 96 h) > 180 and < 252 mg/l; pract. nontoxic to invertebrates, fish, birds

*Precaution:* Incompat. with strong antiperspirants or acids

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, NO<sub>x</sub>; phosphines may form after all water is removed

**Dequest® 2066A** [Solutia]

*Chem. Descr.:* Diethylenetriamine penta (methylenephosphonic acid), trisodium salt

CAS 22042-96-2

UN No. 3265

*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Properties:* Amber liq.; m.w. 640; sp.gr. 1.41; dens. 11.1 lb/gal; f.p. -20 C; pH 2-3 (1%); 45-49% act. acid; 51% act. salt

*Toxicology:* Irritating to eyes and skin

*Precaution:* Corrosive

**Dequest® 2066C2** [Solutia]

*Chem. Descr.:* Diethylenetriamine penta (methylenephosphonic acid), pentasodium salt

*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Properties:* Amber liq.; m.w. 727; sp.gr. 1.38-1.4; dens. 11.7 lb/gal; f.p. -13 C; pH 6-8 (1%); 31-32% act. acid; 40-43% act. salt

**Dequest® 2086** [Solutia]

*Chem. Descr.:* Phosphonate

*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Properties:* Amber clear liq.; m.w. 570; sp.gr. 1.342 (20 C); f.p. < -10 C; pH 5.5-6.0; 30% act. acid

**Dequest® 3000S** [Solutia]

*Chem. Descr.:* Phosphonate

UN No. 3265

*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Properties:* Amber liq.; sol. 1% in 45-47% NaOH; sp.gr. 1.3; dens. 11.3 lb/gal; f.p. < -15 C; pH < 2 (1%); 36-44% act. acid

*Toxicology:* Irritating respiratory system and skin; risk of serious damage to eyes

*Precaution:* Corrosive

**Dequest® 7000** [Solutia]

*Chem. Descr.:* 2-Phosphonobutane-1,2,4-tricarboxylic acid

CAS 37971-36-1

UN No. 3265

*Uses:* Sequestrant, dispersant, scale inhibitor for I&I cleaning, detergent, metal cleaning, pulp/paper bleaching, dairy cleaners, bottle washing, electroplating, oil field water treatment, peroxide stabilization, textile applics., flash desalination

*Properties:* Pale yel. clear liq.; m.w. 270; sp.gr. 1.30; dens. 11.3 lb/gal; f.p. -15 C; pH < 2 (1%); 50% act. acid

*Toxicology:* Irritating to eyes

*Precaution:* Corrosive

**Derakane® 411-35** [Dow]

*Chem. Descr.:* Epoxy-based vinyl ester resin

*Uses:* Used in chem. processing industry, pulp/paper mills; thermoset; provides superior toughness and corrosion resist.

*Regulatory:* FDA compliance

*Properties:* Liq.; sp.gr. 1.073; visc. 2000 cps.

**Derakane® 411-350** [Dow]*Chem. Descrip.:* Epoxy vinyl ester resin*Uses:* Used in fabricating fiber-reinforced plastic structures and equipment incl. absorp. towers, process vessels, piping, and exhaust stacks; for chem. processing, pulp/paper, contact molding and filament winding; thermosetting resin with chem. corrosion resist., impact resist., and good elec. and thermal insulation props.*Regulatory:* Can be FDA compliant*Properties:* Sp.gr. 1.045; visc. 350 cps; tens. str. 83.4 MPa; tens. elong. 8% (break); flex. str. 147.6 MPa; distort. temp. 99-104 C (1.8 MPa, unannealed)**Desmocap®** [Bayer AG]*Chem. Descrip.:* Polyurethane coating raw material*Uses:* For automotive engineering, mech. and plant engineering, industrial coatings, building, wood and furniture finishing, coatings for plastics and paper**Desmocol® 526** [Bayer AG; Bayer/Fiber, Addits., Rubber]*Chem. Descrip.:* Linear polyester PU based on MDI*Uses:* Bonding agent for adhesives for bonding plastics, rubber, leather, wood, textiles, paper; elastomeric PU; suitable for contact bonding at R.T.*Properties:* Tan pellets, lightly talced; sp.gr. 1.2 g/cc; sol. in org. solvs. (acetone, MEK, THF); visc. 600 ± 200 mPa·s (15% in MEK)**Desmolac®** [Bayer AG]*Chem. Descrip.:* Polyurethane coating raw material*Uses:* For automotive engineering, mech. and plant engineering, industrial coatings, building, wood and furniture finishing, coatings for plastics and paper**Desmotherm®** [Bayer AG]*Chem. Descrip.:* Polyurethane coating system*Uses:* For automotive engineering, mech. and plant engineering, industrial coatings, building, wood and furniture finishing, coatings for plastics and paper**DeSonic™ 4N** [Crompton/Witco]*Chem. Descrip.:* Nonoxynol-4

CAS 9016-45-9; EINECS/ELINCS 230-770-5

*Uses:* Detergent, emulsifier, defoamer for pesticide, paint, paper, and textile industries, and personal care formulations*Properties:* Liq.; oil-sol.; HLB 8.8; 100% act.; nonionic**DeSonic™ 6C** [Crompton/Witco]*Chem. Descrip.:* PEG-6 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, lubricant, dye leveling agent, antistat, and dispersant for textile applics.; mfg. of PU foams; softener and rewetting agent for paper*Properties:* Liq.; HLB 4.4; 100% conc.; nonionic**DeSonic™ 6T** [Crompton/Witco]*Chem. Descrip.:* Trideceth-6

CAS 24938-91-8

*Uses:* Wetting agent, detergent, foaming agent for mechanical and spray cleaning, pulp, paper, textile industries, personal care formulations; low-foam*Properties:* Liq.; HLB 11.4; 100% act.; nonionic**DeSonic™ 9N** [Crompton/Witco]*Chem. Descrip.:* Nonoxynol-9

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier for textiles, paper, metal cleaning, personal care formulations*Properties:* Liq.; HLB 12.8; cloud pt. 127-133 F; 100% act.; nonionic**DeSonic™ 10N** [Crompton/Witco]*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* Detergent, wetting agent, emulsifier for textiles, paper, metal cleaning*Properties:* Liq.; cloud pt. 140-149 F; 100% act.; nonionic**DeSonic™ 11N** [Crompton/Witco]*Chem. Descrip.:* Nonoxynol-11

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier for textiles, paper, metal cleaning, personal care formulations*Properties:* Liq.; HLB 13.6; cloud pt. 158-162 F; 100% act.; nonionic**DeSonic™ 13N** [Crompton/Witco]*Chem. Descrip.:* Nonoxynol-13

CAS 9016-45-9

*Uses:* Detergent, emulsifier, defoamer for pesticides, paints, paper, and textiles*Properties:* Liq.; HLB 14.3; 100% conc.; nonionic**DeSonic™ 30C** [Crompton/Witco]*Chem. Descrip.:* PEG-30 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, lubricant, dye leveling agent, antistat, dispersant for textiles; emulsifier for rigid PU foams; softener/rewetter for wet-strength paper; personal care formulations*Properties:* Liq.; HLB 11.7; 100% act.; nonionic**DeSonic™ 36C** [Crompton/Witco]*Chem. Descrip.:* PEG-36 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, lubricant, dye leveling agent, antistat, dispersant for textiles; emulsifier for rigid PU foams; softener/rewetter for wet-strength paper; personal care formulations*Properties:* Liq.; HLB 12.6; cloud pt. 122-140 F; 100% act.; nonionic**DeSonic™ 40C** [Crompton/Witco]*Chem. Descrip.:* PEG-40 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, lubricant, dye leveling agent, antistat, dispersant for textiles; emulsifier for rigid PU foams; softener/rewetter for wet-strength paper; personal care formulations*Properties:* Liq.; HLB 13.1; cloud pt. 173-179 F; 100% act.; nonionic**DeSonic™ 54C** [Crompton/Witco]*Chem. Descrip.:* PEG-54 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, lubricant, dye leveling agent, antistat, dispersant for textiles; emulsifier for rigid PU foams; softener/rewetter for wet-strength paper; personal care formulations*Properties:* Liq.; HLB 14.4; cloud pt. 136-142 F (10% NaCl); 100% act.; nonionic**DeSULF SEH-40** [DeForest Enterprises]*Chem. Descrip.:* Sodium 2-ethylhexyl sulfate

CAS 126-92-1; EINECS/ELINCS 204-812-8

*Uses:* Moderate-foaming wetting agent; rec. for use in high caustic cleaners, hard surface electrolyte cleaners, metal cleaning, rinse aid for auto. dishwashing, and in alkaline and mild acid cleaners contg. chlorine or peroxide; in washing of fruits and veg. and caustic peeling of food; post-stabilizer for latex paints, nickel brightening, aluminum cleaners, textile mercerizing, electroplating baths; visc. control in adhesives; food pkg. adhesives, paper; caustic stability*Regulatory:* FDA 21CFR §173.315, 175.105, 176.170; DOT nonregulated*Properties:* Clear liq.; typ. odor; sol. in water, alcohols, and glycols; insol in oils and solvs.; sp.gr. 0.99-1.01 g/ml; b.p. 100 C; visc. 50 cps.; cloud pt. < 10 C; pH 9.5-10.5 (10% in DW); 40% conc.; anionic*Toxicology:* LD50 (oral, rat) 3.7 g/kg; sl. toxic by ing.; inh. of aerosol may be irritating*Environmental:* Biodeg.*Precaution:* Avoid excessive heat*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>

HMIS: Health 2; Flammability 1; Reactivity 0

*Storage:* Pressure may build in closed containers when exposed to heat creating risk of rupture**DeSULF SLS-30LC** [DeForest Enterprises]*Chem. Descrip.:* Sodium lauryl sulfate

CAS 151-21-3; EINECS/ELINCS 205-788-1

*Uses:* Surfactant, detergent for use in shampoos, bubble baths, liq. hand dish detergents, and mild industrial cleaners; surfactant in emulsion polymerization, esp. for styrene, butadiene, vinyl chloride, vinylidene chloride, and acrylic ester monomers; food pkg. adhesives, paper, cellophane, rubber articles, textiles; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; high foam*Regulatory:* FDA 21CFR §172.822, 175.105, 175.300, 176.170, 176.210, 177.1200, 177.1210, 177.1630, 177.2600, 177.2800, 178.3120, 178.3400; DOT nonregulated*Properties:* Lt. straw clear liq.; sol. in water, alcohols, and glycols; insol. in oils and most solvs.; sp.gr. 1.00 g/ml; visc. 500 cps max.; cloud pt. 1 C (approx.); pH 7.5-8.5 (10% in DW); 29-30% conc.; anionic*Toxicology:* LD50 (oral, rat) 4.7 g/kg; sl. toxic; mod. irritating to eyes and skin; aerosol may be irritating by inh.*Precaution:* Incompat. with strong oxidizers; avoid excessive heat*Hazardous Decomp. Prods.:* SO<sub>2</sub>, HS<sub>2</sub>, CO

HMIS: Health 2; Flammability 1; Reactivity 0

**DeSULF SLS-30LS** [DeForest Enterprises]*Chem. Descrip.:* Sodium lauryl sulfate

CAS 151-21-3; EINECS/ELINCS 205-788-1

*Uses:* Foaming agent for shampoos, bubble baths, in liq. hand dish detergents, mild industrial detergents, rug shampoos, and formulations where salt additions are req. for visc. flexibility; food pkg. adhesives, coatings, paper, cellophane, textiles; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles*Regulatory:* FDA 21CFR §172.822, 175.105, 175.300, 176.170, 176.210, 177.1200, 177.1210, 177.1630, 177.2800, 178.3120, 178.3400; DOT non-regulated*Properties:* Off-wh. clear liq.; sol. in water, alcohols, and glycols; insol in oils and most solvs.; sp.gr. 1.03 g/ml; visc. 500 cps max.; b.p. 212 F; cloud pt. 7.0-13.0 C; pH 7.0-9.0 (10% in DW); 28.5-30.5% conc.; anionic*Toxicology:* Eye and skin contact may cause severe irritation or burns*Precaution:* Incompat. with strong oxidizers*Hazardous Decom. Prods.:* SO<sub>2</sub>, H<sub>2</sub>S

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTac™** [Hercules]*Uses:* Deposit control tech. for pitch and stickies control in papermaking**DeTHOX ACID L-9** [DeForest Enterprises]*Chem. Descrip.:* PEG-8 laurate (8-9 EO)

CAS 9004-81-3; EINECS/ELINCS 253-458-0

*Uses:* Lubricant in textile fiber processing; emulsifier and solubilizer for oils and solvs.; dispersant for pigment and dye systems; defoamer and leveling agent in latex paints; emulsifier and coemulsifier in personal care prods.; food-contact paper, cellophane; in surf. lubricants for mfg. of food-contact metallic articles*Regulatory:* FDA 21CFR §176.170, 177.1200, 178.3520, 178.3760, 178.3910; DOT nonregulated*Properties:* Yel. liq. to paste; bland char. odor; disp. in water, oils, and aliphatic solvs.; sol. or disp. in most other solvs.; sp.gr. 1.03 g/ml; b.p. > 200 F; HLB 12.8; acid no. 5.0 max.; sapon. no. 91-101 max.; flash pt. (COC) > 200 F; pH 7.0-9.0 (5% in DW); 100% conc.; nonionic*Toxicology:* Overexposure may cause skin and eye irritation; inh. of high conc. vapors may be irritating to respiratory tract; ing. may cause nausea; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels*Precaution:* Incompat. with strong oxidizers*Hazardous Decom. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX ACID O-14** [DeForest Enterprises]*Chem. Descrip.:* PEG-14 oleate

CAS 9004-96-0

*Uses:* Detergent used in mild alkaline and acid cleaners, metal cleaners; o/w emulsifier for creams, lotions, and hair grooming prods.; lubricant in syn. cutting fluids; defoamer and leveling agent in latex paints; defoamer for pulp/paper; water-sol. emulsifier and coemulsifier in specialty lubricants, pesticides; food-contact coatings, paper, cellophane; defoamer in food-contact coatings*Regulatory:* FDA 21CFR §175.300, 176.170, 176.200, 177.1200; DOT non-regulated*Properties:* Amber liq.; bland char. odor; sol. in water, aromatic, and chlorinated solvs.; disp. or sol. in most oils and solvs.; sp.gr. 1.04 g/ml; b.p. > 300 F; HLB 13.0; acid no. 5.0 max.; sapon. no. 57-67; pH 7.0-9.0 (5% in DW); 99% conc. min.; nonionic*Toxicology:* Overexposure may cause skin and eye irritation; inh. of high conc. vapors may be irritating to respiratory tract; ing. may cause nausea; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels*Precaution:* Incompat. with strong oxidizers*Hazardous Decom. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX ACID O-16** [DeForest Enterprises]*Chem. Descrip.:* PEG-16 oleate

CAS 9004-96-0

*Uses:* O/w emulsifier for creams, lotions, and hair grooming prods.; emulsifier and coemulsifier in specialty lubricants, pesticides; leveling agent in dyes and latex paints; lubricant in syn. cutting fluids; detergent for mild alkaline and acid systems, metal cleaners; dispersant; food-contact coatings, paper, cellophane; defoamer in food-contact coatings; mod. foaming*Regulatory:* FDA 21CFR §175.300, 176.200, 177.1200; DOT nonregulated*Properties:* Off wh. solid; sol. in water, alcohols, and aromatic solvs.; insol. or disp. in glycols, oils, and aliphatic solvs.; b.p. > 300 F; HLB 14.0; acid no. 5.0 max.; sapon. no. 53-63; pH 7.0-9.0 (5% in DW); 99% conc. min.; nonionic*Toxicology:* Overexposure may cause skin and eye irritation; inh. of high conc. vapors may be irritating to respiratory tract; ing. may cause nausea; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels*Precaution:* Incompat. with strong oxidizers*Hazardous Decom. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX ACID S-8** [DeForest Enterprises]*Chem. Descrip.:* PEG-8 stearate

CAS 9004-99-3

*Uses:* Emulsifier, dispersant in cosmetics; fiber softener/lubricant; leather conditioner; stabilizer for starch coatings of paper; thickener in aq. and solv. systems, emulsion cleaners, and mild acid/alkaline systems; mold release agent and defoamer in emulsion-type detergents; food pkg. adhesives, paper, cellophane; defoamer in food-contact coatings*Regulatory:* FDA 21CFR §175.105, 176.170, 176.200, 177.1200, 178.3910; DOT nonregulated*Properties:* Off-wh. solid; bland, char. odor; disp. in water, oils, and aliphatic solvs.; sol. in most other solvs.; m.p. 28 C; HLB 11.2; acid no. 5.0 max.; sapon. no. 80-90; flash pt. (COC) 200 F; pH 7.0-9.0 (5% in DW); 99% conc. min.; nonionic*Toxicology:* May cause eye and skin irritation; ing. may cause nausea and abdominal pain; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels*Precaution:* Incompat. with strong oxidizers*Hazardous Decom. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX ACID TO-8.5** [DeForest Enterprises]*Chem. Descrip.:* PEG-8 tallate

CAS 61791-00-2

*Uses:* Dispersant and emulsifier used in mild alkaline and acid detergents; lubricant in skin preps. and syn. coolants; emulsifier in lubricants, textile scouring; coemulsifier in creams and lotions; food pkg. adhesives, coatings, paper, textiles, animal glue; defoamer in food-contact paper/paperboard; low to mod. foam*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1210, 177.2800, 178.3120; DOT nonregulated*Properties:* Amber liq.; disp. in water, min. oil, and aliphatic and aromatic solvs.; sp.gr. 1.02 g/ml; HLB 11; sapon. no. 80-90; flash pt. (COC) > 300 F; pH 4.5-7.5 (5% in DW); 100% conc.; nonionic*Toxicology:* Prolonged contact may cause eye and skin irritation; ing. may cause nausea; inh. of vapors at high conc. may be irritating; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels*Precaution:* Incompat. with strong oxidizers*Hazardous Decom. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX ACID TO-14** [DeForest Enterprises]

*Chem. Descrip.:* PEG-14 tallate

CAS 61791-00-2

*Uses:* Dispersant and emulsifier used in mild alkaline and acid detergents; lubricant in skin preps. and syn. coolants; emulsifier in lubricants, textile scouring; coemulsifier in creams and lotions; food pkg. adhesives, coatings, paper, textiles, animal glue; defoamer in food-contact paper/paperboard; low to mod. foam

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 177.2800, 178.3120; DOT nonregulated

*Properties:* Amber yel. liq.; sol. in water and aromatic solvs.; disp in min. oil and aliphatic solvs.; sp.gr. 1.04 g/ml; HLB 13.0; sapon no. 57-67; flash pt. (COC) > 300 F; pH 6.0-8.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* Prolonged contact may cause eye and skin irritation; ing. may cause nausea; inh. of vapors at high conc. may be irritating; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX ACID TO-16.5** [DeForest Enterprises]

*Chem. Descrip.:* PEG-16 tallate

CAS 61791-00-2

*Uses:* Dispersant and emulsifier used in mild alkaline and acid detergents; lubricant in skin preps. and syn. coolants; emulsifier in lubricants, textile scouring; coemulsifier in creams and lotions; food pkg. adhesives, coatings, paper, textiles, animal glue; defoamer in food-contact paper/paperboard; low to mod. foam

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 177.2800, 178.3120; DOT nonregulated

*Properties:* Cream solid; sol. in water and aromatic solvs.; disp in glycols, oils, and aliphatic solvs.; HLB 14.0; acid no. 5.0 max.; sapon no. 55-65; flash pt. (COC) > 300 F; pH 6.0-8.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* Prolonged contact may cause eye irritation; ing. may cause nausea, vomiting; inh. of vapors at high conc. may be irritating; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX LA-4** [DeForest Enterprises]

*Chem. Descrip.:* Laureth-4

CAS 5274-68-0; EINECS/ELINCS 226-097-1

*Uses:* Wetting agent; o/w emulsifier in creams and lotions; lubricant in textile emulsions; dye dispersant; intermediate to produce alkyl ether sulfates; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210, 178.3520, 181.30; DOT nonregulated

*Properties:* Colorless to lt. yel. hazy liq.; insol. in water; sol. in alcohols, oils, and glycol; disp. or sol. in solvs.; sp.gr. 0.95 g/ml; b.p. > 212 F; HLB 9.5 (approx.); acid no. 2.0 max.; hyd. no. 145-165; flash pt. (COC) > 200 F; 100% conc.; nonionic

*Toxicology:* May cause eye and skin irritation; ing. may cause nausea, vomiting, and diarrhea; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX LA-23** [DeForest Enterprises]

*Chem. Descrip.:* Laureth-23

CAS 9002-92-0

*Uses:* Emulsifier and solubilizer in creams and lotions; solv. emulsifier for textile dye carriers; post-stabilizer for syn. latexes; in combination with anionics for emulsion polymerization; wetting agent; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.210, 181.30; DOT nonregulated

*Properties:* Wh. waxy flakes; sol. in water, alcohols, and glycols; insol. in oil; insol. or disp. in solvs.; m.p. 40 C; HLB 16.4-16.9; acid no. 0.5 max.; hyd. no. 42-52; flash pt. (COC) > 300 F; pH 5.0-7.0 (5% in DW); 100% conc.; nonionic

*Toxicology:* May cause eye and skin irritation; ing. may cause nausea, vomiting, and diarrhea; inh. may irritate upper respiratory tract; ethylene

oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX TDA-6** [DeForest Enterprises]

*Chem. Descrip.:* Trideceth-6

CAS 24938-91-8

*Uses:* Detergent used in low foam alkaline and acid industrial and high-pressure spray cleaners, laundry detergents, cutting fluids, mech. dish-washing; dispersant for essential oils; emulsifier for silicones in petrol. oils and o/w cosmetic preps.; intermediate for sulfation and phosphation to form specialty surfactants; coupling agent; lubricant; antistat; leveling agent; food pkg. adhesives, cellophane, animal glue; defoamer in food-contact coatings and paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120; DOT nonregulated

*Properties:* Almost colorless opaque liq.; typ. mild odor; sol in most aromatic and aliphatic solvs.; disp. in water and min. oil; sp.gr. 0.97 g/ml; b.p. > 212 F; HLB 11.4; cloud pt. 69-73 (10% in 25% butyl Carbitol); flash pt. (COC) > 300 F; pH 5-8 (5% in DW); 100% conc.; nonionic

*Toxicology:* May cause eye and skin irritation; ing. may cause nausea, vomiting, and diarrhea inh. may irritate upper respiratory tract; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels; TSCA listed

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX TDA-8.5** [DeForest Enterprises]

*Chem. Descrip.:* Trideceth-9

CAS 24938-91-8

*Uses:* Detergent, foam stabilizer in lt. and heavy-duty, high-foam alkaline and acid detergents; wetting agent in highly acidic systems, emulsion paint strippers, oven, dairy, acid bowl, and acid tile cleaners, agric. sprays, wool scouring; wetting agent for corrosion inhibitors, acid pickling baths; rewetting agent in paper towel mfg.; solubilizer/emulsifier for essential oils, aromatic solvs., fats, waxes; emulsifier in topical cosmetics; food pkg. adhesives, cellophane, defoaming

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120; DOT nonregulated

*Properties:* Almost colorless opaque liq.; typ. mild odor; sol in water and most solvs.; sol. or disp. in oils; sp.gr. 0.98 g/ml; b.p. > 212 F; HLB 12.5; cloud pt. 42-46 (5% in DW); flash pt. (COC) > 300 F; pH 5-8 (5% in DW); 100% conc.; nonionic

*Toxicology:* Overexposure may cause eye and skin irritation; ing. may cause nausea; inh. in high conc. may be irritating; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels; TSCA listed

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeTHOX TDA-15** [DeForest Enterprises]

*Chem. Descrip.:* Trideceth-15

CAS 24938-91-8

*Uses:* Detergent, foam builder in detergents; solubilizer for alkylaryl sulfonates; emulsifier and stabilizer for synthetic latexes; for control of dissolution rate of solid or block type cleaners such as block bowl cleaners; in steam cleaners, dairy cleaners, acid pickling; in cosmetic creams and stick preps.; food pkg. adhesives, cellophane, animal glue; defoamer in food-contact coatings and paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120; DOT nonregulated

*Properties:* Wh. solid; typ. mild odor; completely sol. in water; disp. or insol. in most solvs. and oils; m.p. 30 C (approx.); HLB 15.4; cloud pt. 65-69 (1% in 5% NaCl); flash pt. (COC) > 200 F; pH 5-8 (5% in DW); 100% conc.; nonionic

*Toxicology:* Overexposure may cause eye and skin irritation; ing. may cause nausea, vomiting; inh. in high conc. may be irritating to upper respiratory tract; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels; TSCA listed

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeWET SDO-70PG** [DeForest Enterprises]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate in propylene glycol

*Uses:* Wetting agent, dispersant for dyestuffs, fire-fighting, leak detection; filtration aid; pigment dispersant in paints and ink; glass cleaner and defogging agent; dust settling agent; rinse aid and detergent in food plants; increases wetting and spreading props. of pesticides, insecticides, fungicides, and fertilizers; in dry cleaning detergents; surf. tens. reducer; solubilizer; food pkg. adhesives, coatings, paper, cellophane, textiles; food-grade emulsifier, defoamer

*Regulatory:* FDA 21CFR §172.810, 175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3120, 178.3400; USDA approved; DOT nonregulated

*Properties:* Colorless to sl. yel. clear liq.; sl. sol. in water, sol. in most other solvs.; sp.gr. 1.1 g/ml; b.p. 200 F; acid no. 2.5 max.; flash pt. (TCC) 200 F; pH 5.0-8.0; 67% conc.; anionic

*Toxicology:* May cause eye and skin irritation; ing. may cause nausea, vomiting, and abdominal pain; inh. at high conc. may be irritating

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SO<sub>2</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

**DeWET SDO-75E** [DeForest Enterprises]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate in ethanol

*Uses:* In emulsion polymerization; wetting agent, dispersant for dyestuffs; pigment dispersant in paints and inks; filtration aid; glass cleaning and defogging agent; dust settling agent; dry cleaning detergents; leak detection; cutting fluids; rinse aid and cleaning agent in food plants; increases wetting and spreading properties of pesticides, insecticides, fungicides, and fertilizers; surf. tens. reducer; solubilizer; food pkg. adhesives, coatings, paper, textiles; food-grade emulsifier

*Regulatory:* FDA 21CFR §172.810, 175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3120, 178.3400

*Properties:* Colorless clear liq.; sl. sol. in water and oils; sol. in most solvs.; sp.gr. 1.09 g/ml (approx.); acid no. 2.5 max.; cloud pt. < 5.0 C; pH 5.0-7.0 (1% in DW); anionic

*Toxicology:* LD50 (oral, mouse) 1 g/kg; eye and skin irritant upon prolonged exposure; ing. may cause nausea, vomiting, and abdominal pain; inh. in high conc. may be irritating causing coughing, headache and nausea

*Precaution:* DOT: combustible liq.; incompat. with strong oxidizers and cationic materials

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SO<sub>x</sub>

HMIS: Health 1; Flammability 2; Reactivity 0

**DeWET SDTD-70** [DeForest Enterprises]

*Chem. Descrip.:* Ditridecyl sodium sulfosuccinate

CAS 2673-22-5; EINECS/ELINCS 220-219-7

*Uses:* Wetting agent, emulsifier, dispersant, solubilizer, penetrant used in emulsion and suspension polymerization, pigment dispersion, o/w and w/o emulsions, oil-based lubricants, adhesives, penetrating oils, and agric. pesticides; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400

*Properties:* Lt. straw-colored clear to sl. hazy liq.; sol. in polar and nonpolar solvs.; sol. in water at 0.24% by wt. and may be increased by adding alcohols, glycols, and butyl Cellosolve; sp.gr. 0.97 g/ml; b.p. > 200 F; acid no. 2.5 max.; flash pt. (PMCC) 120 F; pH 5-7 (1% in 75:25/IPA-DW); 69-71% conc.; anionic

*Toxicology:* LD50 (oral, mouse) 1 g/kg; eye and skin irritant upon prolonged exposure; irritant when inh. at high conc., causing headache, coughing, and nausea; ing. may cause nausea, vomiting, and abdominal pain; TSCA listed

*Precaution:* DOT: combustible liq.; incompat. with strong oxidizers and cationic materials

*Hazardous Decomp. Prods.:* Thermal decomp. prods.: CO, CO<sub>2</sub>, SO<sub>x</sub>

HMIS: Health 2; Flammability 2; Reactivity 0

*Storage:* Keep containers closed

**DeWET SMA-80** [DeForest Enterprises]

*Chem. Descrip.:* Dihexyl sodium sulfosuccinate

CAS 3006-15-3; EINECS/ELINCS 221-109-1

*Uses:* Emulsion or suspending agent for pesticidal sprays; solubilizer for other surfactants; rinse aid for mech. dishwashing; emulsifier in latex paints; wetting agent in electroplating baths; in emulsion or suspension polymerization; glass cleaner formulations; pigment dispersants; food pkg. adhesives,

paper; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.210, 177.1210, 178.3400

*Properties:* Nearly colorless clear liq.; sol. in water, glycols, and alcohols; insol. or disp. in oils and most solvs.; sp.gr. 1.1 g/ml; vapor pressure 17.5 mm Hg; b.p. 212 F; acid no. 2.5 max.; flash pt. 140-155 F; pH 5-7 (5% in DW); 80% conc.; anionic

*Toxicology:* Eye irritant in liq. and vapor form; may irritate skin; inh. may cause irritation of respiratory tract; ing. can cause gastrointestinal irritation, nausea, vomiting, diarrhea; TSCA listed

*Precaution:* DOT: combustible liq.; incompat. with strong oxidizers

HMIS: Health 2; Flammability 2; Reactivity 0

**DF-40** [Sam Shin]

*Uses:* Fluorescence quenching agent for nonbrightened paper stock, wastewater; cleaner for paper machines

*Properties:* Brn. liq.; readily misc. with water; sp.gr. 1.07; visc. < 50 cps; pH 5-6; ≈ 27% solids; cationic

*Storage:* 6 mos shelf life

**DiaFil® 110** [CR Mins.]

*Chem. Descrip.:* Amorphous diatomite

*Chem. Analysis:* SiO<sub>2</sub> (93%), Al<sub>2</sub>O<sub>3</sub> (3%), Fe<sub>2</sub>O<sub>3</sub> (1.3%), CaO (1.1%), cryst. silica (< 1%)

CAS 61790-53-2

*Uses:* Functional filler for asphalt compositions and roof coatings; antiblock agent in plastic film; filler in plastics, molding compds., agric., paints, cement, paper, caulks, adhesives, sealants, encapsulants, food applics.; catalyst carrier/support; inert mild abrasive in polishes/cleaners; contributes visc. control, reduced settling, reduced VOC requirement

*Regulatory:* FDA GRAS; FCC compliance; EPA reg. no. 59910-1

*Properties:* Sl. off-wh. fine powd.; odorless; 15 μ median particle size; sp.gr. 2.2; dens. 19-22 lb/ft<sup>3</sup> (wet); surf. area 26-28 m<sup>2</sup>/g; oil absorp. 112-116; pH 7.5-8.5

**DiaFil® 190** [CR Mins.]

*Chem. Descrip.:* Amorphous diatomite

*Properties:* Sl. off-wh. fine powd.; odorless; 12 µ median particle size; < 2% +325 mesh; sol. in HF; negligible sol. in water; sp.gr. 2.2; water absorp. 150%; brightness 82; pH 8  
*Toxicology:* Exposure to dust may cause irritation of upper respiratory tract and lungs, coughing, wheezing, shortness of breath, tightness in chest; inh. may cause lung damage; may aggravate pre-existing asthma, bronchitis, emphysema, etc.  
*Precaution:* Reacts with hydrofluoric acid  
HMIS: Health 0; Flammability 0; Reactivity 0
- DiaFil® 520** [CR Mins.]  
*Chem. Descrip.:* Amorphous diatomite  
*Chem. Analysis:* SiO<sub>2</sub> (93%), Al<sub>2</sub>O<sub>3</sub> (3%), Fe<sub>2</sub>O<sub>3</sub> (1.3%), CaO (1.1%), cryst. silica (< 1%)  
CAS 61790-53-2  
*Uses:* Filler, flattening agent which controls gloss, sheen, rheology, and surf. texture in paints and coatings; enhances intercoat adhesion; antiblock agent in plastic film; filler in molding compds.; catalyst carrier/support; inert mild abrasive in toothpastes, polishes/cleaners; filler for agric., asphalt, roof coatings, cement, paper, caulks, adhesives, sealants, encapsulants  
*Regulatory:* FDA GRAS; FCC compliance; EPA reg. no. 59910-1  
*Properties:* Sl. off-wh. fine powd.; odorless; 16 µ median particle size; fineness (Hegman) 0; sp.gr. 2.2; dens. 18.28 lb/solid gal; bulking value 0.055 gal/lb; surf. area 26-28 m<sup>2</sup>/g; oil absorp. 112-116; ref. index 1.43; pH

- 7.5-8.5
- DiaFil® 525** [CR Mins.]  
*Chem. Descrip.:* Amorphous diatomite  
*Chem. Analysis:* SiO<sub>2</sub> (93%), Al<sub>2</sub>O<sub>3</sub> (3%), Fe<sub>2</sub>O<sub>3</sub> (1.3%), CaO (1.1%), cryst. silica (< 1%)  
CAS 61790-53-2

- Diaq 60** [Vinings Ind.]  
*Chem. Descrip.:* Anthraquinone disp.  
CAS 84-65-1; EINECS/ELINCS 201-549-0  
*Uses:* Digester additive for improving pulp yield and reducing alkali consumption
- Digitex™** [Engelhard]  
*Chem. Descrip.:* Kaolin-based  
*Uses:* Pigment for color inkjet printing applics. (paper market)
- Dilurit 189 E** [BK Giulini Chemie]  
*Chem. Descrip.:* Org. bromine compd.  
*Uses:* Slicicide for paper and chem. pulp production, food-contact paper;

biocide for treatment of water systems in papermaking  
*Use Level:* 50-100 g/ton bone dry stock (shock dose)  
*Regulatory:* FDA 21CFR §176.300; BgVV compliant  
*Properties:* Ylsh. clear liq.; misc. with water; sp.gr. 1.25  
*Storage:* 6 mos. shelf life @ < 40 C; avoid direct sunlight

**Dilurit 464 C** [BK Giulini Chemie]

*Chem. Descrip.:* Org. sulfur-nitrogen compd.  
*Uses:* Preservative for antimicrobial finishing of paper/paperboard, food-contact paper/paperboard; BfVV compliant  
*Use Level:* 0.4-0.5% (packaging papers, labels, and soap boxes); 0.2-1.0% (hospital bed pads from wastepaper); 0.1-0.3% (craped cellulose towels); 10-50 ppm (for odor control)  
*Properties:* Wh. fluid paste; disp. in water; sp.gr. 1.23; pH 7  
*Storage:* Keep cool and dry

**Dilurit 850** [BK Giulini Chemie]

*Chem. Descrip.:* Isothiazolinones  
*Uses:* Slimicide and preservative for paper and chem. pulp production, food-contact paper  
*Use Level:* 100-200 g/ton bone dry stock (shock dose)  
*Regulatory:* FDA 21CFR §176.300; BgVV compliant  
*Properties:* Ylsh. liq.; misc. with water; sp.gr. 1.14; pH 3.5 (20 C)  
*Storage:* Store @ R.T. in closed containers

**Dilurit 853 T** [BK Giulini Chemie]

*Chem. Descrip.:* Isothiazolinone and fatty alcohol polyglycol ether  
*Uses:* Slimicide and dispersant for paper and chem. pulp production  
*Use Level:* 100-200 g/ton bone dry stock (shock dose)  
*Regulatory:* BfVV compliant  
*Properties:* Ylsh. liq.; misc. with water; sp.gr. 1.13; pH 4.4 (20 C)  
*Storage:* Keep containers closed in cool, ventilated place

**Dilurit 876** [BK Giulini Chemie]

*Chem. Descrip.:* Isothiazolinone  
*Uses:* Fungistat for treatment of paper  
*Use Level:* 0.2-0.5 g/m<sup>2</sup> paper or cardboard  
*Properties:* Lt. yel. liq.; misc. with water; sp.gr. 1.04; pH 3.7 (20 C)  
*Storage:* Keep containers closed in cool, ventilated place

**Dilurit 946** [BK Giulini Chemie]

*Chem. Descrip.:* Aldehydic carbohydrates  
*Uses:* Slimicide and preservative for paper and chem. pulp production  
*Use Level:* 100-200 g/ton bone dry stock (shock dose)  
*Regulatory:* FDA 221CFR §176.110; BgVV compliant  
*Properties:* Ylsh. clear liq.; misc. with water; sp.gr. 1.12; pH 3.8 (20 C)  
*Storage:* Store in closed containers @ < 40 C

**Dilurit 953** [BK Giulini Chemie]

*Chem. Descrip.:* Org. sulfur nitrogen compd.  
*Uses:* Slimicide for paper and chem. pulp production, food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.170, 176.180, 176.300; BgVV compliant as slimicide  
*Properties:* Orange to yel. liq.; misc. with water; sp.gr. 1.05; pH 5 (20 C)  
*Storage:* Store cool in closed containers in ventilated area

**Dilurit 974** [BK Giulini Chemie]

*Chem. Descrip.:* Quaternary ammonium compds.  
*Uses:* Slimicide and preservative for paper and chem. pulp production; effective against bacteria, fungi, and algae  
*Use Level:* 50-200 g/ton bone dry stock (shock dose); 100-500 ppm (preservative)  
*Regulatory:* BgVV compliant for slime control  
*Properties:* Ylsh. clear liq.; misc. with water; sp.gr. 0.96; pH 6.5 (1%; 20 C)  
*Storage:* Store in closed containers in ventilated area

**Disfoam BF-75** [NOF]

*Chem. Descrip.:* Polyalkylene glycol  
*Uses:* Effective in foaming of water washing step after digestion of pulp and in step prior to sheet machine; easy dispersion; no thermal aggregation to polyester dyes and good dyeing prop.

**Disfoam C Series** [NOF]

*Chem. Descrip.:* Polyalkylene glycol derivs.  
*Uses:* Defoamer for fermentation field, pulp, synthetics, etc.  
*Properties:* Liq.

**Dispel®** [Vinings Ind.]

*Uses:* Scale inhibitor for papermaking

**Dispercel-A** [Runnymede Dispersions Ltd; Kane Int'l.]

*Chem. Descrip.:* Nitrocellulose prep., phthalate plasticized

CAS 9004-70-0; EINECS/ELINCS 239-069-9

*Uses:* Pigmented chip disp. used in mfg. of flexographic and gravure printing inks for paper, polymer films, foil, and board; used in combination with maleic, polyamide, or acrylic resins; exc. scratch and rub resist.

*Properties:* Sol. in alcohol

**Dispercel-AS** [Runnymede Dispersions Ltd; Kane Int'l.]

*Chem. Descrip.:* Nitrocellulose prep., nonphthalate plasticized  
 CAS 9004-70-0; EINECS/ELINCS 239-069-9

*Uses:* Pigmented chip disp. used in mfg. of flexographic and gravure printing inks for paper, polymer films, foil, and board; used in combination with maleic, polyamide, or acrylic resins; exc. scratch and rub resist.

*Properties:* Sol. in alcohol

**Dispersant 1084** [Huntsman]

*Chem. Descrip.:* Proprietary blend

*Uses:* Pitch dispersant for pulp/paper industry; prevents deposition; effective as continuous hardwood digester additive; rapid spreading

*Properties:* Liq.; disp. in water

**Dispersant 3000E** [Huntsman]

*Uses:* Pitch dispersant for pulp/paper industry; formulated for spreadability in lower temp. brownstock and screen room applics.

*Properties:* Liq.; nonionic

**Dispersant LF-88** [Huntsman]

*Uses:* Pulp machine pitch dispersant; low foaming

*Properties:* Liq.; nonionic

**Dispersant LF-89** [Huntsman]

*Uses:* Screen room pitch dispersant for pulp/paper industry; low foaming

*Properties:* Liq.; nonionic

**Dispex®** [Ciba Spec. Chems./Paper]

*Chem. Descrip.:* Polymeric

*Uses:* Pigment dispersant for paper coatings

**Disponil® AAP 43** [Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Alkylpolyglycoether aq. sol'n.

*Uses:* Surfactant; costabilizer to inc. mech. or salt stability of polymer disp.; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400; BGA approved

*Properties:* Colorless liq.; little intrinsic odor; unlimited sol. in water; sp.gr. 1.1 (20 C); HLB 17.9; flash pt. > 100 C; pH 6-7; 69-71% act.

*Environmental:* LC50 (zebra fish) 1-10 mg/l

*Hazardous Decomp. Prods.:* None

*Storage:* Store tightly closed in frost-free place

**Disponil® AAP 307** [Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Octyl phenol ethoxylate

CAS 9002-93-1; EINECS/ELINCS 232-658-1

*Uses:* Coemulsifier for polyacrylates, acrylate-vinyl acetate copolymers, other applics.; costabilizer to inc. mech. or salt stability of polymer disp.; dispersant for emulsion paints; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400, BGA approved

*Properties:* Liq.; HLB 17.3; 70% act.; nonionic

**Disponil® AAP 436** [Cognis/Chems. Group; Cognis/Coatings & Inks; Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Octyl phenol ethoxylate (40 EO)

CAS 9002-93-1

*Uses:* Coemulsifier for polyacrylates, acrylate vinyl acetate copolymers; costabilizer to inc. mech. or salt stability of polymer disp.; dispersant for emulsion paints; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400, BGA approved

*Properties:* Colorless liq.; little intrinsic odor; unlimited sol. in water; sp.gr. 1.1; HLB 17.9; flash pt. > 100 C; pH 6-7; 60% act.; nonionic

*Environmental:* LC50 (zebra fish) 1-10 mg/l

*Hazardous Decomp. Prods.:* None

*Storage:* Store tightly closed in frost-free place

**Disponil® AES 21 IS** [Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Sodium alkylphenol ether sulfate aq. sol'n.; contains preservatives

*Uses:* Emulsifier for vinyl acetate homo and copolymers, acrylate homo and copolymers, styrene-acrylate, S/B latexes, vinyl propionate copolymers, PVdC, vinyl chloride homo and copolymer latexes; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.180, BGA approved

- Properties:* Yellowish liq.; odorless; unlimited sol. in water; sp.gr. 1.06; pH 7-8.5 (100 g/l water); 30-35% solids; anionic  
*Toxicology:* Eye irritant  
*Environmental:* LC50 (fish) > 100 mg/l; EC50 (bacteria) > 100 mg/l; poorly biodeg.  
*Hazardous Decomp. Prods.:* None  
*Storage:* Store in cool, frost-free place
- Disponil® AES 60 IS** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium alkylphenol ether sulfate aq. sol'n., preserved grade  
*Uses:* Emulsifier for vinyl acetate homo and copolymers, acrylate homo and copolymers, styrene-acrylate, S/B latexes, vinyl propionate copolymers, PVdC, vinyl chloride homo and copolymer latexes; food pkg. adhesives, paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.180, BGA approved; SARA §311/312 reportable  
*Properties:* Colorless to lt. yel. liq.; odorless; sol. 400 g/l in water; sp.gr. 1.075; dens. 8.95 lb/gal; vapor pressure 15 mbar (20 C); flash pt. (PMCC) > 93 C; pH 7.5 (10%); 34-36% solids; 73% volatiles; anionic  
*Toxicology:* LD50 (oral, rat) > 5 g/kg; may cause skin and eye irritation; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>  
 NFPA: Health 1; Flammability 1; Reactivity 0  
*Storage:* May congeal or stratify if cold; warm to R.T., mix well
- Disponil® AES 72 IS** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium alkylphenol ether sulfate aq. sol'n., preserved grade  
*Uses:* Low foaming emulsifier for vinyl acetate homo and copolymers, acrylate homo and copolymers, styrene-acrylate, S/B latexes, vinyl propionate copolymers, PVdC, vinyl chloride homo and copolymer latexes; food pkg. adhesives, paper/paperboard  
*Use Level:* 1-5%  
*Regulatory:* FDA 21CFR §175.105, 176.180, BGA approved  
*Properties:* Lt. yel. liq.; little intrinsic odor; misc. with water; sp.gr. 1.07; pour pt. < 8 C; pH 8; 32.5-34.5% act.; anionic  
*Toxicology:* Eye irritant  
*Environmental:* Nontoxic to fish  
*Hazardous Decomp. Prods.:* None  
*Storage:* 2 yr shelf life stored in tightly closed containers in frost-free place
- Disponil® MGS 65 IS** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Surfactant blend, preserved grade  
*Uses:* Emulsifier for vinyl acetate homopolymers, vinyl acetate-dibutyl maleate copolymers, esp. suitable for highly filled PVAc and PC emulsions; food pkg. adhesives, paper/paperboard  
*Use Level:* 2-6%  
*Regulatory:* FDA 21CFR §175.105, 176.180, BGA approved  
*Properties:* Colorless to sl. yel. clear liq.; odorless; misc. with water; sp.gr. 1.1; pH 7-8.5 (10%); 42.5-45.5% act. in water; anionic/nonionic  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; low toxicity; eye irritant  
*Environmental:* LC50 (zebra fish) 1-10 mg/l  
*Hazardous Decomp. Prods.:* None  
*Storage:* 1 yr shelf life @ R.T. in closed containers; protect from frost
- Disponil® NP 4** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Nonylphenol polyglycoether, aq. sol'n.  
 CAS 9016-45-9  
*Uses:* Surfactant; costabilizer to inc. mech. or salt stability of polymer disp.; emulsifier for mfg. of o/w emulsions; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400; BGA approved  
*Properties:* HLB 8.8; 99-100% act.; nonionic
- Disponil® NP 6** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Nonylphenol polyglycoether, aq. sol'n.  
 CAS 9016-45-9  
*Uses:* Surfactant; costabilizer to inc. mech. or salt stability of polymer disp.; emulsifier for mfg. of o/w emulsions; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400; BGA approved  
*Properties:* HLB 10.9; 99-100% act.; nonionic
- Disponil® NP 10** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Nonylphenol polyglycoether, aq. sol'n.  
 CAS 9016-45-9  
*Uses:* Surfactant; costabilizer to inc. mech. or salt stability of polymer disp.; emulsifier for mfg. of o/w emulsions; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400; BGA approved  
*Properties:* HLB 13.3; 99-100% act.; nonionic

*Regulatory:* FDA 21CFR §175.105, 176.180; BGA approved  
*Properties:* HLB 16.0; 99-100% act.; nonionic
- Disponil® NP 208** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Nonyl phenol ethoxylate (20 EO)  
 CAS 9016-45-9  
*Uses:* Surfactant; costabilizer to inc. mech. or salt stability of polymer disp.; emulsifier for mfg. of o/w emulsions; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400; BGA approved; SARA §311/312 reportable  
*Properties:* Colorless liq.; little intrinsic odor; sol. in water; sp.gr. 1.05; dens. 8.7 lb/gal; visc. 500 mPa·s; HLB 16.0; flash pt. (PMCC) > 93 C; pH 7 (1%); 79-81% act. in water; nonionic  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; can cause skin, eye, and respiratory irritation  
*Environmental:* LC50 (fish) > 100 mg/l; EC50 (bacteria) > 100 mg/l  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* Protect from frost
- Disponil® NP 307** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Nonylphenol polyglycoether, aq. sol'n.  
 CAS 9016-45-9  
*Uses:* Surfactant; costabilizer to inc. mech. or salt stability of polymer disp.; emulsifier for mfg. of o/w emulsions; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400; BGA approved  
*Properties:* HLB 17.2; 69-71% act.; nonionic
- Disponil® O 250** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Cetoeth-25  
 CAS 8065-81-4  
*Uses:* Emulsifier for emulsion polymerization, o/w emulsions; costabilizer to inc. mech. and salt stability of polymer disp.; solubilizer; dispersant; latex stabilizer; food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §176.180  
*Properties:* Flakes; HLB 16.5; 100% act.; nonionic
- Disponil® SUS IC 865** [Cognis; Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium di-2-ethyl hexyl sulfosuccinate (65%), ethanol (18%), water (17%)  
 UN No. 1170  
*Uses:* Wetting agent in aq. coatings, printing inks, related systems; wetting agent for difficult-to-wet substrates, e.g., plastics, metal surfs., cellulose film, aluminum/plastic foils, silicone-treated papers or glass; emulsifier for emulsion polymerization of pract. all types of monomers, mfg. of food-contact articles; food pkg. adhesives; resinous/polymeric food-contact coatings; defoamer in food-contact paper/paperboard; in cellophane for food pkg.  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 177.1200, 178.3400; DOT regulated; SARA §311/323 reportable

*Properties:* Yel. clear low-visc. liq.; alcohol odor; sl. water-sol.; sp.gr. 0.94; dens. 7.8 lb/gal; visc. 100 cps; flash pt. (PMCC) 45 C; pH 6.5; 65% solids; 35% volatiles; anionic

*Toxicology:* Harmful if swallowed or inhaled; causes skin, eye, and respiratory irritation; possible CNS depressant; TSCA listed

*Precaution:* Flamm.; avoid open flames and strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>, NO<sub>x</sub>

NFPA: Health 2; Flammability 2; Reactivity 0

*Storage:* 2 yrs shelf life in original sealed containers; store @ > 10 C in warm, dry place; protect from freezing; mix well before using

**Disponil® SUS IC 875** [Cognis; Cognis KGaA/Coatings; Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Sodium di-2-ethylhexyl sulfosuccinate (75%), ethanol (3-6%), water (19-22%)

UN No. 1170

*Uses:* Wetting agent in aq. coatings, printing inks; suitable for difficult-to-wet substrates such as plastics and metal surfaces, cellulose film, aluminum and plastic foils, silicone-treated papers or glass; emulsifier for emulsion polymerization; food pkg. adhesives, coatings, paper, cellophane; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; med. tendency to foam; ideal surf. act. agent due to low critical micelle conc. and strong reduction in surf. tens. of aq. sol'n.s., even when using low concs.

*Use Level:* 0.1-1.0% (on finished coating)

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.210, 177.1200, 178.3400; BGA approved; DOT regulated; SARA §311/312 reportable

*Properties:* Yel. clear low-visc. liq.; sl. odor; sol. 15-18 g/l in water; sp.gr. 1.05; dens. 8.7 lb/gal; visc. 350 mPa·s; flash pt. (PMCC) 45 C; pH 6-7 (1.5%); 75% act.; anionic

*Toxicology:* Harmful if inhaled or swallowed; causes skin, eye, and respiratory tract irritation; possible CNS depressant; TSCA listed

*Precaution:* Flamm.; avoid sources of ignition, strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

NFPA: Health 2; Flammability 2; Reactivity 0

*Storage:* 2 yr shelf life in original containers @ R.T.; protect from heat and frost

**DK-100 Nonsilicone Defoamer** [Genesee Polymers]

*Chem. Descrip.:* Aliphatic hydrocarbon

*Uses:* Defoamer for aq. systems, paints, coatings, paper/paperboard, metal-working lubricants, wastewater treatment, cleaner formulations, textiles, food-contact coatings

*Regulatory:* FDA 21CFR §176.200; SARA nonreportable

*Properties:* Tan liq., petrol. odor; disp. in water; sp.gr. 0.85; dens. 7.0 lb/gal; b.p. 480 F; flash pt. (COC) 265 F; 0.2% moisture

*Toxicology:* Mod. hazardous by inh.; vapors may cause respiratory tract irritation; high concs. may cause CNS depression; mod. irritating to eyes and skin; sl. toxic by ingestion; may cause GI upset; TSCA listed

*Precaution:* Incompat. with strong acids or bases, oxidizing agents, selected amines

*Hazardous Decomp. Prods.:* Hydrocarbon decomp. prods.

HMS: Health 1; Flammability 1; Reactivity 0

*Storage:* Keep container closed; store in well-ventilated area; do not store over 100 F; mix before use

**DK-230 Nonsilicone Defoamer** [Genesee Polymers]

*Chem. Descrip.:* Nonsilicone

*Uses:* Defoamer for aq. systems, paints, coatings, paper/paperboard, metal-working lubricants, cutting oils, coolants, adhesives, water treatment, food-contact coatings; rec. where air entrapment is a problem; alkaline resistant

*Regulatory:* FDA 21CFR §176.200; SARA nonreportable

*Properties:* Straw-colored liq., mild solv. odor; disp. in water; sp.gr. 0.82; dens. 7.0 lb/gal; b.p. 350 F; flash pt. (PMCC) 158 F; 100% act.

*Toxicology:* Prolonged/repeated inh. exposure can cause adverse kidney effects; severe eye irritant; prolonged/repeated contact may cause skin irritation; low acute oral and dermal toxicity, but minute amts. in lungs may cause mild-severe pulmonary injury; TSCA listed

*Precaution:* Flamm. liq.; incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Hydrocarbon decomp. prods.

HMS: Health 2; Flammability 2; Reactivity 0

*Storage:* Keep container closed; store in well-ventilated area; do not store above 100 F; mix before use

**DM-1735-D** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Brownstock defoamer effective on hardwood and softwood; reduces potential for pitch deposits; amide-free; fast spreading and exc. drainage

**DM-2146** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Proprietary blend of active ingreds. in a water-based formulation

*Uses:* Defoamer, drainage aid for paper machine operations; rec. where high temps. are not present

**DM-2184** [Hi-Mar Spec.; Thornley]

*Uses:* Brownstock defoamer effective on hardwood and softwood; esp. suited for defoaming in dirty screen room operations; fast spreading

**DM-25100-C** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Blend of nonyl phenol-free surfactants and detergent builders

*Uses:* Textile brightener; for deinking in tissue applics.; low foaming

**Donlar C-20C** [Donlar]

*Chem. Descrip.:* Polyaspartic acid homopolymer, sodium salt

*Uses:* Antiscalant in hard water environ.; inorg. scale remover; dispersant for min. slurries; controls redeposition of soil in laundry and hard surf. cleaners; used for textile sizing in paper industry

*Properties:* Amber liq.; water-sol.; m.w. 20,000; sp.gr. 1.26-1.28; visc. 180-230 cps; pH 8-9.5; 39-41% solids

*Toxicology:* Nontoxic

*Environmental:* Biodeg.

**Donlar C-30D** [Donlar]

*Chem. Descrip.:* Polyaspartic acid homopolymer, sodium salt

*Uses:* Antiscalant in hard water environ.; inorg. scale remover; dispersant for min. slurries; controls redeposition of soil in laundry and hard surf. cleaners; used for textile sizing in paper industry

*Properties:* Amber liq.; water-sol.; m.w. 30,000; sp.gr. 1.26-1.28; visc. 250-325 cps; pH 8-9.5; 39-41% solids

*Toxicology:* Nontoxic

*Environmental:* Biodeg.

**Donlar C-50D** [Donlar]

*Chem. Descrip.:* Polyaspartic acid homopolymer, sodium salt

*Uses:* Used for textile sizing in paper industry

*Properties:* Amber liq.; water-sol.; m.w. 50,000; sp.gr. 1.26-1.28; visc. 450-550 cps; pH 8-9.5; 39-41% solids

*Toxicology:* Nontoxic

*Environmental:* Biodeg.

**Douglas® Starches** [Penford Prods.]

*Chem. Descrip.:* Corn starch, lightly oxidized

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Paper additive improving surf. props.; high shear cooked starch; used at the size press in low to mod. solids; strong films; stable visc.

**Doversperse 3** [Dover]

*Chem. Descrip.:* Aq. emulsion of Paroil 170HV (chlorinated flame retardant)

*Uses:* Flame retardant, plasticizer, tackifier for water-based coatings and adhesives, rubber coatings, inks, carpetbackings, paper and fabric coatings; improves adhesion; imparts chem. and water resist.

*Properties:* Cream wh. liq.; sp.gr. 1.54; dens. 11.3 lb/gal; visc. 150-300 poise; pH 7; 66.5% solids, 45% Cl

**Doversperse A-1** [Dover]

*Chem. Descrip.:* Aq. disp. of Chlorez 700

*Uses:* Flame retardant, plasticizer, tackifier for water-based coatings and adhesives, rubber coatings, inks, carpetbackings, paper and fabric coatings; improves adhesion; imparts chem. and water resist.; rec. where increased hardness is required

*Properties:* Cream wh. liq.; sp.gr. 1.60; dens. 11 lb/gal; visc. 48 poise; pH 7.5; 65% solids, 45% Cl; nonionic

**Dow EP530** [Dow]

*Chem. Descrip.:* Poloxamer-181

CAS 53637-25-5

*Uses:* Provides solvency, low odor, low irritation, and low toxicity to personal care prods. and cosmetics; defoamer in scald baths for poultry defeathering and hog dehairing machines; defoamer for food-grade papers and coatings and sanitizing sol'n.s. for food processing equip.

*Regulatory:* 21CFR §172.808, 176.200, 176.210, 178.1010

*Properties:* Liq.; m.w. 2000; sp.gr. 1.017; dens. 8.46 lb/gal; visc. 321 cSt; pour pt. -32 C; flash pt. (PMCC) > 420 F; ref. index 1.452; surf. tens. 42.6 dynes/cm (100 ppm); nonionic

**Dow P1000TB** [Dow]

*Chem. Descrip.:* PPG-17

CAS 25322-69-4

- Uses:* Provides solvency, low odor, low irritation, and low toxicity to personal care prods. and cosmetics; defoamer for food-grade coatings and paper prods.
- Regulatory:* 21CFR §176.200, 176.210
- Properties:* Liq.; m.w. 1000; sp.gr. 1.005; dens. 8.38 lb/gal; visc. 162 cSt; pour pt. -25 C; flash pt. (PMCC) > 360 F; ref. index 1.448; surf. tens. 40.7 dynes/cm (100 ppm); sp. heat 0.461 cal/g/°C; nonionic
- Dow P1200** [Dow]
- Chem. Descrip.:* PPG-20  
CAS 25322-69-4
- Uses:* Provides solvency, low odor, low irritation, and low toxicity to personal care prods. and cosmetics; boiler water additive for prep. of steam that will contact food; defoamer for beet sugar and yeast processing; defoamer for food-grade coatings and paper prods.
- Regulatory:* 21CFR 173.310, 173.340(a)(3), 176.200, 176.210
- Properties:* Liq.; m.w. 1200; sp.gr. 1.007; dens. 8.38 lb/gal; visc. 175 cSt; pour pt. -40 C; flash pt. (PMCC) 345 F; ref. index 1.448; surf. tens. 43.3 dynes/cm (100 ppm); sp. heat 0.459 cal/g/°C; nonionic
- Dow P2000** [Dow]
- Chem. Descrip.:* PPG-26  
CAS 25322-69-4
- Uses:* Provides solvency, low odor, low irritation, and low toxicity to personal care prods. and cosmetics; boiler water additive for prep. of steam that will contact food; defoamer for beet sugar and yeast processing; defoamer for food-grade coatings and paper prods.
- Regulatory:* 21CFR 173.310, 173.340(a)(3), 176.200, 176.210
- Properties:* Liq.; sol. in ethanol, IPM, cyclomethicone, sunscreens, lactic acid; partly sol. in water, lt. min. oil; m.w. 2000; sp.gr. 1.002; dens. 8.34 lb/gal; visc. 300 cSt; pour pt. -30 C; flash pt. (PMCC) 390 F; ref. index 1.449; surf. tens. 39.6 dynes/cm (100 ppm); sp. heat 0.452 cal/g/°C; nonionic
- Dow P4000** [Dow]
- Chem. Descrip.:* PPG-30  
CAS 25322-69-4
- Uses:* Provides solvency, low odor, low irritation, and low toxicity to personal care prods. and cosmetics; boiler water additive for prep. of steam that will contact food; defoamer for food-grade paper coatings
- Regulatory:* 21CFR §173.310, 176.200
- Properties:* Liq.; m.w. 4000; sp.gr. 1.005; dens. 8.36 lb/gal; visc. 800 cSt; pour pt. -26 C; flash pt. (PMCC) 365 F; ref. index 1.450; surf. tens. 39.6 dynes/cm (100 ppm); nonionic
- Dow Corning® 26 Additive** [Dow Corning]
- Chem. Descrip.:* Silicone fluid
- Uses:* Leveling agent, wetting agent, anticratering agent, mar resist. agent in solv.-based coatings and inks; defoamer in food-contact paper/paperboard; reduces orange peel; also helps prevent pigment floating
- Use Level:* 0.01-0.1% on total formulation wt.
- Regulatory:* FDA 21CFR §175.105, 176.200, 176.210
- Properties:* Colorless clear, low-visc. liq.; sp.gr. 0.958; visc. 7 cSt; flash pt. (CC) 55 C; 100% solids
- Storage:* 12 mos shelf life under normal laboratory conditions in tightly sealed bottles
- Dow Corning® 163 Additive** [Dow Corning]
- Chem. Descrip.:* Silicone antifoam compd.
- Uses:* Defoamer in inks and coatings, solventless, solv., waterborne, and energy-curable systems, food-contact inks and coatings; defoamer in food-contact paper coatings, paper/paperboard; food pkg. adhesives
- Use Level:* 0.001% (FDA use); 0.05-0.5% (non-FDA use)
- Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210
- Properties:* Opaque low-visc. liq.; sp.gr. 0.984; visc. 1000 cSt; flash pt. (CC) 101 C; 100% act.
- Storage:* 18 mos shelf life under normal laboratory conditions in tightly sealed bottles
- Dow Corning® 1430 Emulsion** [Dow Corning]
- Chem. Descrip.:* Silicone aq. emulsion
- Uses:* Foam control agent for distillation, glycol scrubbing, detergents, oil refining, gas-oil separation, wastewater treatment, heating/cooling water treatment, adhesives, glues, coatings, latexes, metal cleaning/degreasing, metal etching, paper coatings, textile latex backing, sizing, and starching; effective above 49 C
- Use Level:* 150 ppm
- Properties:* Med. wh. cream; 30% act.; nonionic
- Storage:* 6 mos shelf life
- Dow Corning® Antifoam 1520-US** [Dow Corning]
- Chem. Descrip.:* Silicone emulsion
- Uses:* Foam control agent for food, fermentation, beverage mfg., meat/poultry/seafood processing, pharmaceuticals, resin mfg., wastewater treatment, heating/cooling water treatment, adhesives/coatings, metalworking, and textile industries; food-contact paper/paperboard; effective for hot and cold systems
- Use Level:* 10 ppm (foods)
- Regulatory:* FDA 21CFR §173.340, 176.170, 176.180, EPA 40CFR §180.1001, USDA, kosher approved
- Properties:* Milky-wh. thin cream; water-dilutable; sp.gr. 1.0; visc. 6000 cp; pH 4.0; 20% act.; nonionic
- Toxicology:* May cause temporary eye discomfort
- Storage:* 12 mo shelf life when store @ 20-40 C
- Dow Corning® Antifoam A Compd.** [Dow Corning]
- Chem. Descrip.:* Simethicone  
CAS 8050-81-5
- Uses:* Foam control agent for distillation, resin sizes, textile latex backing, paper, asphalt, lubricants, detergents, pesticides, edible oils, soaps, shampoos; also avail. in food grade
- Properties:* Med. off-wh. to gray liq.; 100% act.; nonionic
- Dow Corning® Antifoam C Emulsion** [Dow Corning]
- Chem. Descrip.:* Aq. simethicone emulsion  
CAS 8050-81-5
- Uses:* Foam control agent for food industry, paper coatings, pesticides, herbicides, fertilizers, industrial detergents, cosmetic cleansers; food grade
- Use Level:* 30 ppm
- Regulatory:* FDA, EPA, kosher, USDA approved
- Properties:* Med. wh. cream; water dilutable; 30% act.; nonionic
- Dow Corning® Antifoam FG-10** [Dow Corning]
- Chem. Descrip.:* Aq. silicone emulsion
- Uses:* Foam control agent for food industry, fermentation, high sugar-content processes, paper coatings, wastewater treatment, heating/cooling water treatment
- Use Level:* 100 ppm
- Regulatory:* FDA, EPA, USDA, kosher approved
- Properties:* Thin wh. cream; 10% act.; nonionic
- Dow Corning® Antifoam H-10** [Dow Corning]
- Chem. Descrip.:* Silicone emulsion
- Uses:* Foam control agent for distillation, glycol scrubbing, detergents, wastewater treatment, adhesives/coatings, resin and textile sizes, metalworking, and paper/printing industries
- Properties:* Thin wh. cream; 10% act.; nonionic
- Dow Corning® Antifoam Y-30** [Dow Corning]
- Chem. Descrip.:* Silicone emulsion
- Uses:* Foam control agent for paper/printing industry for resin sizes and inks, textiles, antifreeze, ceramic mfg., dyes
- Properties:* Med. wh. cream; 30% act.; nonionic
- Dowicide® A** [Dow]
- Chem. Descrip.:* Sodium o-phenylphenate  
CAS 132-27-4; EINECS/ELINCS 205-055-6
- Uses:* Antimicrobial for use in adhesives, ceramics, chem. toilets, construction, disinfectants, household prods. (cleaners, detergents, floor care, etc.), inks, metalworking fluids, paper coatings, and textile spinning; effective against bacteria and fungi; not readily deactivated by soil load, effective against wide range of disease-causing organisms
- Use Level:* 0.05-0.5%
- Properties:* Wh. flakes and fines or powd.; readily sol. in water; 97% act.; 3% inert
- Dowicil® 75** [Dow; Dow Europe]
- Chem. Descrip.:* 1-(3-Chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride (act. ingred.) and sodium bicarbonate (stabilizer)
- Uses:* Antimicrobial; preservative for aq. end prods. such as adhesives, latex emulsions, paints, metal-cutting fluids, drilling muds, biodeg. detergents, paper coatings, PU resins, agric., textile and construction materials, inks, starch, polishes, waxes; indirect food additive; food pkg. adhesives, paper/paperboard, PU resins
- Use Level:* 0.07-0.66% (adhesives), 0.07-0.30% (construction materials), 0.05-0.3% (latexes), 0.015-0.25% (metalworking fluids), up to 0.2% (agric. prods.), 0.0025-0.05% (petrol.), 0.04-0.13% (biodeg. surfactants), 0.13-0.27% (paper, textiles)
- Regulatory:* FDA 21 CFR §175.105, 176.170, 176.180, 177.1680

*Properties:* Off-wh. powd., 100% thru #5 US sieve; sol. (act. ingred. g/100 g) in water (222.0 g), anhyd. IPA (39.5 g), propylene glycol USP (20.6 g); m.w. 251.2; sp.gr. 1.54 g/cc; dens. 43 lb/ft<sup>3</sup>; b.p. dec. > 60 C; 67.5% act.  
*Toxicology:* LD50 (oral, rat) 1190 mg/kg, (dermal, rabbit) 2000 mg/kg; sl. eye and skin irritant

**Dowicil® 150** [Dow]

*Uses:* Antimicrobial for use in adhesives, cosmetics, aq. agric. prods., construction, household prods. (cleaners, detergents, floor care, etc.), inks, latexes, metalworking fluids, oil drilling fluids, paints, paper coatings, and textile spinning emulsions; particularly effective against *Pseudomonas*; not inactivated by nonionic, anionic, or cationic formulation ingred., for prod. formulations where prolonged skin contact occurs

*Regulatory:* EPA compliant

*Properties:* Wh. powd.; sol. in water; low sol. in oil; 94% act.; 6% inert

**DPG** [Monsanto]

*Chem. Descrip.:* Diphenylguanidine

CAS 102-06-7; EINECS/ELINCS 203-002-1

*Uses:* Sec. accelerator for rubber industry; in differential ore flotation of copper/nickel deposits, security paper, and thermal print paper developing

*Properties:* 2 mm pellets or dust-suppressed powd.

**Drainaid GL-73** [Huntsman]

*Uses:* Drainage aid for acidified pulp in paper industry

*Properties:* Liq.; 40% act.; nonionic

**Drainaid PM-85** [Huntsman]

*Uses:* Pulp machine drainage aid

*Properties:* Liq.; 40% act.; anionic

**Drakeol® 9** [Penreco]

*Chem. Descrip.:* Lt. mineral oil NF

CAS 8042-47-5; EINECS/ELINCS 232-384-2

*Uses:* Base material, carrier for cosmetics; emulsified lubricant for laxatives, topical ointments; pigment dispersant, lubricant for plastics; plasticizer for PS; textile and paper lubricant; divider oil, mold release lubricant for food industry; coating for fruits and vegetables; food pkg. materials

*Regulatory:* FDA 21CFR §172.878, 178.3620, 573.680; DOT and OSHA nonhazardous

*Properties:* Sp.gr. 0.838-0.854; dens. 7.03-7.16 lb/gal; visc. 14.2-17.0 cSt (40 C); pour pt. 09 C; flash pt. 179 C; ref. index 1.4665

*Toxicology:* TSCA listed

**Drakeol® 19** [Penreco]

*Chem. Descrip.:* Wh. mineral oil USP

CAS 8042-47-5; EINECS/ELINCS 232-384-2

*Uses:* Primary plasticizer for ethyl cellulose; lubricant for textile/paper; ingred. in cosmetics (creams, lotions, sunscreens), pharmaceuticals (laxatives, topical ointments), foods (lubes/greases, food pkg., divider oils), plastics (catalyst carriers)

*Regulatory:* FDA 21CFR §172.878, 178.3620, 573.680; DOT and OSHA nonhazardous

*Properties:* Water-wh. transparent liq., odorless; sol. in hydrocarbons; sp.gr. 0.88 (60/60 F); dens. 7.14-7.31 lb/gal; visc. 34.9-37.3 cSt (40 C); vapor pressure < 1 mm Hg (70 F); b.p. 590 F; pour pt. -12 C; flash pt. 188 C; ref. index 1.4725

*Toxicology:* Relatively nontoxic by ingestion unless aspiration occurs; laxative props. may result in abdominal cramps, diarrhea; minimally irritating to eyes on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

*Precaution:* Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

*Storage:* Store in closed containers away from heat, sparks, open flame, oxidizers

**Drakeol® 35** [Penreco]

*Chem. Descrip.:* Wh. mineral oil USP

CAS 8042-47-5; EINECS/ELINCS 232-384-2

*Uses:* Ingred. in laxatives, cosmetic creams, lotions, sunscreens, foods (bakery pan oils, lubes/greases, food pkg.); plasticizer/lubricant for PS, ethyl cellulose, PVC, annealing, catalyst carriers, thermoplastic rubber; water repellent for paper; adhesives, household cleaners and polishes

*Regulatory:* FDA 21CFR §172.878, 178.3620, 573.680; DOT and OSHA nonhazardous

*Properties:* Water-wh. transparent liq., odorless; sol. in hydrocarbons; sp.gr. 0.882 (60/60 F); dens. 7.25-7.35 lb/gal; visc. 65.8-71.0 cSt (40 C); vapor pressure < 1 mm Hg (70 F); i.b.p. 650 f; pour pt. -15 C; flash pt. 216 C; ref. index 1.4785

*Toxicology:* Relatively nontoxic by ingestion unless aspiration occurs; laxa-

tive props. may result in abdominal cramps, diarrhea; minimally irritating to eyes on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

*Precaution:* Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

*Storage:* Store in closed containers away from heat, sparks, open flame, oxidizers

**Drew™ 6123** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Aq. sol'n. of sulfur-based reducing agents

*Uses:* Dechlorinating agent for pulp mills; destroys chlorine and chlorine dioxide in air, water, and pulp streams at lower cost than caustic soda or wh. liquor

*Properties:* PH near neutral

**Drew™ KPA 300** [Ashland/Drew Ind. Div.]

*Uses:* Pulping aid for paper incl. kraft, brown, bleached; inc. prod. rate and yield, improves washing, reduces alkali charge and recovery loading

**Drewchlor®** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Sodium chlorite sol'n.

CAS 7758-19-2; EINECS/ELINCS 231-836-6

*Uses:* Algicide and precursor for generation of chlorine dioxide for treating industrial recirculating cooling water systems incl. cooling towers, air washers, evaporator condensers, potable water disinfection and removal of sulfide; biocontrol in food processing flumes, recycled waters; disinfection of sewage and plant wastes; destruction of phenolics, simple cyanides and sulfides; bacterial slime control in paper mills; bacterial control in oil well and petrol. systems

*Properties:* Sl. yel. clear liq.; dens. 10.4lb/gal; f.p. -22 C; cryst. pt. -7 C; pH > 11

*Storage:* Avoid extreme heat and freezing

**Drewfax® 0007** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Sodium dioctyl sulfosuccinate

CAS 577-11-7; EINECS/ELINCS 209-406-4

*Uses:* Wetting agent, penetrant, surf. tens. reducer, dispersant for industrial coatings, adhesives, inks, pigments, textiles, cosmetics, paper, metal, paints, rubber, plastics, petrol. and agric. industries; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §178.3400

*Properties:* Colorless clear visc. liq.; sol. 6.8 g/100g water (30 C); sp.gr. 1.08; dens. 9.0 lb/gal; visc. 400 cps; pH 5-6 (1%); 75% solids; anionic

**Drewfax® 342** [Ashland/Drew Ind. Div.]

*Uses:* Deposit control agent, antiscalant for kraft digesters; inc. operating time between digester shutdown for scale removal; improves liquor circulation and pulp uniformity; reduces digester corrosion (due to acid cleaning)

**Drewfloc® 2270** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* High m.w. emulsion polymer

*Uses:* Flocculant and coagulant for dewatering industrial slurries, water clarification, and sludge conditioning, for enhancement of phosphorus and heavy metals removal, min. beneficiation, paper mill/air scrubber water clarification, inorg. sludge filtration, food processing industry, nonpotable water clarification, oily waste treatment

*Use Level:* 0.2-5.0 ppm (flocculant, coagulant), 1-20 lb/ton dry solids (sludge conditioning)

*Properties:* Pale gray opaque liq.; sp.gr. 1.00 ± 0.02; visc. 500-2500 cps; f.p. -18 C; flash pt. (CC) > 200 F; anionic

*Precaution:* Polymer spills are very slippery

*Storage:* Store @ 40-95 F; avoid freezing and direct sunlight; 6 mos max. storage life

**Drewplus® L-108** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of mineral oils, emulsifiers, silica derivs.

*Uses:* Defoamer for latex/rubber applics. esp. monomer stripping, acrylic, PVAc, NBR, SBR, PVC, adhesives, coatings, paper mfg.; food pkg. adhesives, paper, animal glue, cellophane

*Use Level:* 0.01-0.03% total wt. basis

*Regulatory:* FDA 21CFR §175.105, 176.210, 176.200, 177.1200, 178.3120

*Properties:* Straw-colored opaque liq.; emulsifiable in water; sp.gr. 0.89; dens. 7.58 lb/gal; visc. 800 cps; pour pt. 9 C; flash pt. (PMCC) 93 C; 100% act.

**Drewplus® L-131** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Proprietary blend of mineral oil, silica derivs. and surfactants

*Uses:* Defoamer for latex/rubber applics. (SBR, PVAc, PVA, NBR, acrylic), esp. for paper coating and carpet backing; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives

*Use Level:* 0.01-0.1% total wt. basis

- Regulatory:* FDA 21CFR §175.105, 176.200, 176.210  
*Properties:* Yel. opaque liq.; disp. in water; sp.gr. 0.92; visc. 600 cps; pour pt. -4 C; flash pt. (PMCC) > 93 C
- Drewplus® L-139** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of mineral oil, silica deriv., surfactants  
*Uses:* Defoamer for latexes (SBR, NBR, PVC, PVAc, PVA, SAN, polybutadiene, vinyl acrylic), monomer stripping, degassing, adhesives, paper coatings; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, cellophane, animal glue  
*Use Level:* 100-1000 ppm dry wt. resin  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120  
*Properties:* Off-wh. translucent liq.; emulsifiable in water; sp.gr. 0.89; dens. 7.43 lb/gal; visc. 400 cps; pour pt. 8 C; flash pt. (PMCC) 94 C  
*Storage:* 1 yr storage stability @ R.T.; stir prior to use; freezing does not affect prod. performance
- Drewplus® L-140** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of minerals, silica derivs., and surfactants  
*Uses:* Defoamer for latex emulsions (SBR, NBR, PVC, PVA, vinyl-acrylic), adhesives, inks, paint and industrial coatings, paper coatings; food pkg. adhesives, coatings, paper, cellophane, animal glue; defoamer in food-contact coatings, paper/paperboard  
*Use Level:* 2-5 lb/100 gal paint; 0.01-0.1% (latex adhesives, water-based printing inks); 0.01-0.1% (industrial processes)  
*Regulatory:* FDA 21CFR §173.340, 175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 178.3120; EPA 40CFR §180.1001  
*Properties:* Gray-wh. liq.; disp. in water; sp.gr. 0.88; dens. 7.34 lb/gal; visc. 1150 cps; flash pt. 150 F  
*Storage:* 1 yr storage stability @ R.T.; stir prior to use; freezing does not affect prod. performance
- Drewplus® L-175** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of mineral oils and silica derivs.  
*Uses:* Defoamer for paints/coatings, latexes (acrylic, PVAc, styrene acrylic, PVdC), food-contact adhesives/coatings/paper  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210  
*Properties:* Off-wh. opaque liq.; disp. in surfactant systems; insol. in water; sp.gr. 0.91; dens. 7.59 lb/gal; visc. 950 cps; nonionic  
*Storage:* 1-2 mos storage stability under normal conditions; if settling occurs, use mild agitation before use; stored at or below freezing, visc. will increase and some phase separation may occur
- Drewplus® L-191** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of mineral oils, surfactants, silica derivs.  
*Uses:* Defoamer for latexes (SBR, NBR, acrylic, vinyl acrylic), food-contact adhesives/coatings/paper; food pkg. cellophane, animal glue  
*Use Level:* 0.01-0.1% total wt. basis  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120  
*Properties:* Straw-colored opaque liq.; disp. in water; sp.gr. 0.92; dens. 7.68 lb/gal; visc. 800 cps; pour pt. 0 C; flash pt. > 300 F  
*Storage:* Mix before using
- Drewplus® L-198** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of mineral oils, silica derivs., and esters  
*Uses:* Defoamer for polymerization, latex stripping (SBR, PVC, EPDM, PVdC), paper coatings, food-contact adhesives/coatings/paper/paperboard; food pkg. cellophane, animal glues  
*Use Level:* 0.01-0.1% total wt. basis  
*Regulatory:* FDA 21CFR §175.105, 176.120, 176.180, 176.200, 176.210, 177.1200, 178.3120  
*Properties:* Straw-colored opaque liq.; emulsifiable in water; sp.gr. 0.95; dens. 7.93 lb/gal; visc. 800 cps; pour pt. 10 C; flash pt. (PMCC) 148 C  
*Storage:* Store in warm place; stir prior to use; freezing does not affect prod. performance
- Drewplus® L-407** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Modified polysiloxane copolymer emulsion  
*Uses:* Foam control agent for architectural and maintenance paints and coatings (interior/exterior gloss and semigloss paints, waterborne industrial coatings, polymer emulsions, water-thinnable gravure and flexographic inks); defoamer in food-contact paper/paperboard; food pkg. adhesives, paper  
*Use Level:* 0.1-0.5% by total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210  
*Properties:* Milky wh. liq., mild odor; misc. with water; sp.gr. 1.0; dens. 8.32 lb/gal; visc. 200 cps; flash pt. > 300 F
- Drewplus® L-418** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of silica derivs., hydrocarbons, and silicones  
*Uses:* Defoamer for inks, adhesives, paints/coatings, aq. interior semigloss, eggshell or aq. exterior semigloss trade sales paints, food-contact adhesives/paper/animal glue/cellophane  
*Use Level:* 0.1-0.3% by total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120  
*Properties:* Off-wh. opaque liq.; disp. in water; sp.gr. 0.98; dens. 8.18 lb/gal; visc. 1250 cps; pour pt. 6 C
- Drewplus® L-419** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of silica derivs., hydrocarbons, and silicones  
*Uses:* Defoamer for latex paints, water-reducible coatings, inks, adhesives, aq. systems, food-contact adhesives/coatings/paper  
*Use Level:* 0.5-2 lb/100 gal paint; 0.2-0.5% (other aq. systems)  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210  
*Properties:* Off-wh. opaque liq.; disp. in water; sp.gr. 0.96; dens. 8.01 lb/gal
- Drewplus® L-424** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of silica derivs., mineral oils, glycols, and esters  
*Uses:* Foam control agent for interior and exterior gloss and semigloss low-VOC enamels; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, cellophane, animal glue  
*Use Level:* 4-7 lb/100 gal  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.1200, 178.3120  
*Properties:* Off-wh. opaque liq.; readily emulsifiable in water; sp.gr. 0.921; visc. 230 cps; flash pt. > 200 F; ref. index 1.4601; nonionic
- Drewplus® L-435** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of silica derivs., mineral oils, glycols, and esters  
*Uses:* Foam control agent for interior and exterior gloss and semigloss low-VOC enamels; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210  
*Properties:* Off-wh. opaque liq.; readily emulsifiable in water; sp.gr. 0.921; visc. 230 cps; flash pt. > 200 F; ref. index 1.4601
- Drewplus® L-466** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Proprietary blend of fatty acid derivatives, surfactants, and hydrocarbons  
*Uses:* Defoamer in aq. industrial coatings (aq. interior semigloss, eggshell, and flat wall paint, aq. exterior semigloss or flat trade sales paint), inks, food-contact adhesives/coatings/paper; used in the grind or letdown phase of paint production  
*Use Level:* 0.2-0.6% by total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210  
*Properties:* Opaque off-wh. liq.; nondisp. in water; disp. in surfactant systems; sp.gr. 0.87-0.88; dens. 7.24-7.39 lb/gal; flash pt. (PMCC) > 300 F
- Drewplus® L-474** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of alcohols, silica derivs., surfactants  
*Uses:* Defoamer for latexes (PVC, PVAc, styrene acrylic, NR), adhesives, dyestuffs, paper coatings, paints, food-contact adhesives/paper/animal glues  
*Use Level:* 0.1-0.2% total wt. basis (latex stripping); 2-3 lb/100 gal paint; 0.1-0.5% (paper coatings)  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3120  
*Properties:* Yel. opaque liq.; disp. in water; sp.gr. 0.94; dens. 7.84 lb/gal; visc. 320 cps; pour pt. 0 C; flash pt. 200 F
- Drewplus® L-475** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of mineral oils and silica derivs.  
*Uses:* Defoamer for paints/coatings (aq. interior or exterior gloss, semigloss, or flat trade sales paints), latexes (acrylic, PVAc, styrene acrylic, PVdC), adhesives, paper coatings  
*Use Level:* 2-5 lb/100 gal latex paint; 0.01% on wet basis (polymer stripping), 0.01-1% vol. basis (water-reducible and resin emulsion coatings)  
*Properties:* Off-wh. opaque liq.; disp. in surfactant systems; insol. in water; sp.gr. 0.91; dens. 7.59 lb/gal; visc. 950 cps; flash pt. > 300 F; ref. index 1.4; nonionic  
*Storage:* 1-2 mos storage stability under normal conditions; if settling occurs, use mild agitation before use; stored at or below freezing, visc. will increase and some phase separation may occur
- Drewplus® L-477** [Ashland/Drew Ind. Div.]  
*Chem. Descrip.:* Blend of mineral oils and silica derivs.  
*Uses:* Defoamer for interior and exterior paints incl. gloss, semigloss, and flat paints; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives; all-purpose  
*Use Level:* 1-3 lb/100 gal latex paint  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.200, 176.210

*Properties:* Lt. amber liq.; insol. in water; disp. in surfactant systems; sp.gr. 0.90; visc. 1100 cps; pour pt. 0 C

**Drewplus® L-493** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of mineral oils, silica derivs., emulsifiers

*Uses:* Defoamer for latex paints, water-reducible industrial coatings, inks, adhesives, for acrylic, vinyl acrylic, and PVAc emulsions; food pkg. adhesives, coatings, paper, cellophane, animal glues; defoamer in food-contact coatings, paper/board

*Use Level:* 1-3 lb/100 gal

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.1200, 178.3120

*Properties:* Off-wh. opaque liq.; emulsifiable in water; sp.gr. 0.90; dens. 7.51 lb/gal; visc. 1400 cps; pour pt. 0 C; flash pt. 149 C; ref. index 1.431

**Drewplus® L-496** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of mineral oil, silica derivs., and surfactants

*Uses:* Foam control agent for latex paints, emulsion and water-reducible coatings, aq. inks, for acrylic, vinyl acrylic and styrene acrylic emulsions; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, cellophane, animal glues

*Use Level:* 1-3 lb/100 gal

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120

*Properties:* Off-wh. opaque liq.; emulsifiable in water; sp.gr. 0.90; dens. 7.4-7.6 lb/gal; flash pt. > 300 F; ref. index 1.419

**Drewplus® L-523** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of fatty oils, surfactants, and silica derivs.

*Uses:* Defoamer for latexes (SBR, EVA), food/fermentation applics. incl. chewing gum and potato processing; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives

*Use Level:* 200-800 ppm (chewing gum), 0.1-1% (potato processing)

*Regulatory:* FDA 21CFR §173.340, 175.105, 176.200, 176.210

*Properties:* Off-wh. opaque liq.; disp. in water; sp.gr. 0.99; dens. 8.26 lb/gal; visc. 800 cps; pour pt. 10 C

**Drewplus® L-768** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of silicone fluid, silica derivs. and surfactants

*Uses:* Defoamer for industrial/chemical processes, food/fermentation and agric. applics., pesticides, aq. and some nonaq. systems, adhesives, coatings; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, paper

*Use Level:* 10-100 ppm

*Regulatory:* FDA 21CFR §173.340, 175.105, 176.170, 176.200, 176.210, and EPA compliance

*Properties:* Off-wh. opaque liq.; disp. in water; sp.gr. 1.02; dens. 8.51 lb/gal; visc. 1100 cps; pour pt. 5 C; flash pt. (COC) 93 C

**Drewplus® T-4202** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Foam control agent

*Uses:* Foam control agent for coatings, lacquers, emulsion polymerization, monomer stripping operations, adhesives, and inks; food pkg. adhesives; defoamer in food-contact coatings, paper/paperboard; industrial grade

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

*Properties:* Opaque, yel.-grayish liq.; emulsifiable in water; sp.gr. 0.88-0.92; flash pt. (PMCC) > 300 F; nonionic

*Storage:* Good stability under normal conditions; agitation may be necessary if sl. separation occurs on extended storage

**Drewplus® Y-125** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of mineral oils and fatty acid derivs.

*Uses:* Defoamer for controlling entrained air during latex stripping, paints/coatings mfg., for SBR, PVAc, PCA emulsions, ACN resin systems; food pkg. adhesives, cellophane, animal glue; defoamer in food-contact coatings, paper/paperboard

*Use Level:* 0.01-0.1% total wt. basis

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120

*Properties:* Tan opaque liq.; emulsifiable in water; sp.gr. 0.93; dens. 7.76 lb/gal; visc. 2200 cps; pour pt. 0 C; flash pt. (PMCC) 93 C

**Drewplus® Y-250** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of mineral oils, silica derivs., and esters

*Uses:* Defoamer for aq. industrial systems, paints/coatings (traffic, primers, enamels, gloss), latexes (SBR, acrylic, PVAc, PVA, styrene acrylic, PVdC, vinyl acrylic), inks, adhesives, cutting oils, food/fermentation applics.; food pkg. adhesives, paper; defoamer in food-contact coatings, paper/paperboard; rec. for aq. systems requiring quick foam knockdown, long lasting foam prevention

*Use Level:* 0.1-0.5% total wt. basis

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210

*Properties:* Off-wh. opaque liq.; disp. in water; sp.gr. 0.91; dens. 7.59 lb/gal; visc. 1800 cps; flash pt. 240 F; ref. index 1.420

**Drewplus® Y-281** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of mineral oils, silica derivs., and surfactants

*Uses:* Defoamer for paints, latex/rubber, industrial coatings, adhesives; food pkg. adhesives, cellophane, animal glue; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 178.3120

*Properties:* Off-wh. liq.; disp. in water; sp.gr. 0.93; dens. 7.76 lb/gal; visc. 1000 cps; pour pt. 0 C

**Drewplus® Y-601** [Ashland/Drew Ind. Div.]

*Chem. Descrip.:* Blend of mineral oils, org. solids, surfactants

*Uses:* Defoamer for latexes (SBR, PVC, B/S, PVAc), paints/coatings, adhesives, water-borne flexographic or gravure inks, paper coatings

*Use Level:* 0.01% total wt. basis; 0.1-0.3% (water-borne inks)

*Properties:* Off-wh. opaque liq.; disp. in water; sp.gr. 0.83; dens. 6.93 lb/gal; visc. 400 cps; pour pt. 0 C

*Storage:* Mild agitation may be necessary if sl. separation occurs

**Drymet® 59** [Crosfield]

*Chem. Descrip.:* Sodium metasilicate anhyd.

*Chem. Analysis:* Na<sub>2</sub>O (50.4-51.9%); silica (45.5%); CO<sub>2</sub> (2.0% max.); Al (0.03% max.); Fe (0.017% max.)

CAS 6834-92-0; EINECS/ELINCS 229-912-9

UN No. 3262

*Uses:* Buffer, corrosion inhibitor for formulating specialty detergents and cleaners (engine cleansers, brewery piping, dairy, food grill cleaners, concrete cleaners, ferrous metal/degreaser, paint stripper, oil, paper reclamation, pulp bleaching); soap builder and detergent ingred. in I&I cleaners; flocculant and dispersant in metallurgy, ore treatment; washing of clays (mining)

*Regulatory:* SARA immediate (acute) health hazard

*Properties:* Wh. free-flowing gran.; 3% on 18 mesh, 55% on 40 mesh; odorless; sol. 27 g/100g (30 C); m.w. 122.06; sp.gr. 2.4; bulk dens. 1.0 g/cm<sup>3</sup> (loose), 1.2 g/cm<sup>3</sup> (packed); vapor pressure negligible; m.p. 1088 C; pH 12.6 (1% aq.)

*Toxicology:* LD50 (oral, rat) 847 mg/kg; causes severe burns to skin, eyes, respiratory and digestive tract; ing. may cause GI irritation, nausea, vomiting, cramps, diarrhea; avoid breathing dust; TSCA listed

*Precaution:* Corrosive; mod. to strongly alkaline; may react to form deadly CO on contact with certain prods. or their residues

*Hazardous Decomp. Prods.:* None

HMIS: Health 3; Flammability 0; Reactivity 1

*Storage:* Hygroscopic; 2 yr shelf life when stored in cool, dry, well-ventilated area; keep containers closed when not in use

**Drymet® Fines** [Crosfield]

*Chem. Descrip.:* Sodium metasilicate anhyd.

*Chem. Analysis:* Na<sub>2</sub>O (50.4-51.9%); silica (45.5%); CO<sub>2</sub> (2.0% max.); Al (0.03% max.); Fe (0.017% max.)

CAS 6834-92-0; EINECS/ELINCS 229-912-9

UN No. 3262

*Uses:* Buffer, corrosion inhibitor for formulating specialty detergents and cleaners (engine cleansers, brewery piping, dairy, food grill cleaners, concrete cleaners, ferrous metal/degreaser, paint stripper, oil, paper reclamation, pulp bleaching); soap builder and detergent ingred. in I&I cleaners; flocculant and dispersant in metallurgy, ore treatment; washing of clays (mining)

*Regulatory:* SARA immediate (acute) health hazard

*Properties:* Wh. free-flowing powd.; 1% on 20 mesh; odorless; sol. 27 g/100g (30 C); m.w. 122.06; sp.gr. 2.4; bulk dens. 0.89 g/cm<sup>3</sup> (loose), 1.13 g/cm<sup>3</sup> (packed); vapor pressure negligible; m.p. 1088 C; pH 12.6 (1% aq.)

*Toxicology:* LD50 (oral, rat) 847 mg/kg; causes severe burns to skin, eyes, respiratory and digestive tract; ing. may cause GI irritation, nausea, vomiting, cramps, diarrhea; avoid breathing dust; TSCA listed

HMIS: Health 3; Flammability 0; Reactivity 1

*Storage:* Hygroscopic; store in cool, dry, well-ventilated area; keep containers closed when not in use

**D® Sodium Silicate** [PQ]

*Chem. Descrip.:* Sodium silicate

CAS 1344-09-8; EINECS/ELINCS 215-687-4

*Uses:* Corrosion inhibitor for aq. systems, petrol., water treatment; cement

slurry thinner; detergents and cleaning compds.; ore flotation; slime control in mining; detergent, defloculant, bleaching enhancer, alkalinity agent in deinking paper stock; peroxide stabilizer in repulping and postbleaching

*Regulatory:* SARA nonreportable

*Properties:* Clear to opalescent visc. liq.; odorless; completely sol. in water; sp.gr. 1.3-1.5; dens. 12.8 lb/gal; visc. 400 cps (20 C); pH 11-12.5; noncombustible; 44.1% solids, 29.4% SiO<sub>2</sub>, 14.7% Na<sub>2</sub>O

*Toxicology:* CEL 5 mg/m<sup>3</sup>; skin and eye irritant; causes irritation to respiratory tract on inhalation, irritation to esophagus and stomach on ingestion

*Environmental:* High alkalinity of undiluted or unneutralized material is harmful to aquatic life

*Precaution:* Incompat. with gels when mixed with acid, metals, e.g., aluminum, tin, lead, and zinc (may produce flamm. hydrogen gas on prolonged contact); spills are very slippery; dries to glassy film which can cut skin, etch glass

*Hazardous Decomp. Prods.:* Hydrogen

#### DSP 15 [Dow]

*Chem. Descrip.:* Styrene acrylic copolymer aq. sol'n.

CAS 9010-92-8

*Uses:* Surf. sizing agent for acid, alkaline, neutral, or unsized paper; improves ink-jet printability, toner adhesion, and optical brightness; exc. flexibility; very high mech. stability

*Properties:* Ylsh.-wh. sl. turbid sol'n.; visc. 200 mPa·s; pH 9; 15% solids; anionic

#### DSP 70 [Dow]

*Chem. Descrip.:* Styrene acrylic copolymer aq. sol'n.

CAS 9010-92-8

*Uses:* Surf. sizing agent for acid, alkaline, neutral, or unsized paper; improves ink-jet printability, toner adhesion, and optical brightness; exc. flexibility; very high mech. stability

*Properties:* Sl. opaque sol'n.; visc. 200 mPa·s; pH 9; 15% solids; anionic

#### DSP 80 [Dow]

*Chem. Descrip.:* Styrene acrylic copolymer aq. sol'n.

CAS 9010-92-8

*Uses:* Surf. sizing agent for acid, alkaline, neutral, or unsized paper; improves ink-jet printability, toner adhesion, and optical brightness; exc. flexibility; very high mech. stability

*Properties:* Sl. opaque sol'n.; visc. 200 mPa·s; pH 9; 15% solids; anionic

#### DS-S1 [Songkang Ind. Co.]

*Chem. Descrip.:* Bromic mixt.

*Uses:* Biocide, slimeicide for papermaking; long-term efficiency in water circuit; good anaerobic bactericidal props.

*Use Level:* 10-30 ppm/m<sup>3</sup> of white water

*Properties:* Sp.gr. 1.1; visc. < 10 cps; pH 4 ± 1

#### Dualite® M6050AE [Pierce & Stevens]

*Chem. Descrip.:* Hollow composite microspheres (shell: acrylonitrile copolymer; coating: calcium carbonate)

*Chem. Analysis:* moisture (< 2%)

*Uses:* Extender for plastics, coatings, adhesives, sealants, patching compds., automotive underbody coatings, modeling clays, building materials, explosives, foams, textile printing inks, paper mfg., carpets, syn. wood, roof coatings, polymer concrete, wire and cable, cosmetics, pharmaceuticals; can reduce weight and lower volume costs; chem. resist. to most aliphatic and high esters; good resist. to aromatics and low esters; lowers VOC emissions

*Properties:* Sp.gr. 0.130 ± 0.02; dens. 1.08 lb/gal

#### Dualite® MS7000 [Pierce & Stevens]

*Chem. Descrip.:* Hollow composite microspheres (shell: acrylonitrile copolymer; coating: calcium carbonate)

*Chem. Analysis:* moisture (< 2%)

*Uses:* Extender for plastics, coatings, adhesives, sealants, patching compds., automotive underbody coatings, modeling clays, building materials, explosives, foams, textile printing inks, paper mfg., carpets, syn. wood, roof coatings, polymer concrete, wire and cable, cosmetics, pharmaceuticals; can reduce weight and lower volume costs; chem. resist. to most aliphatic and high esters; good resist. to aromatics and low esters; lowers VOC emissions

*Properties:* Sp.gr. 0.065 ± 0.005; dens. 0.54 lb/gal

#### Dualite® MS7020 [Pierce & Stevens]

*Chem. Descrip.:* Hollow composite microspheres (shell: acrylonitrile copolymer; coating: calcium carbonate)

*Chem. Analysis:* moisture (< 2%)

*Uses:* Extender for plastics, coatings, adhesives, sealants, patching compds., automotive underbody coatings, modeling clays, building materials, explosives, foams, textile printing inks, paper mfg., carpets, syn. wood, roof coatings, polymer concrete, wire and cable, cosmetics, pharmaceuticals; can reduce prod. weight and lower volume costs; chem. resist. to most aliphatic and high esters; very good resist. to aromatics and low esters; fair resist. to ketones; heat resist. to 150 C; lowers VOC emissions

#### Dumasperse 540 [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Sodium salts of polyacrylic acid

CAS 9003-04-7

*Uses:* Pigment dispersant for clays, paints, adhesives, paper, and latexes; replaces phosphates in detergents

*Properties:* Low m.w.; anionic

#### Dumasperse 543 [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Ammonium salt of polyacrylic acid

CAS 9003-03-6

*Uses:* Dispersant for elec. ceramics and specialized paper coatings; rec. where potassium salts are objectionable

*Properties:* Anionic

#### Duponol® LS Paste [Crompton/Witco]

*Chem. Descrip.:* Sodium oleyl sulfate tech.

CAS 1847-55-8; EINECS/ELINCS 217-430-1

*Uses:* Emulsifier, scouring agent in textile and leather industries; rewetting agent for paper

*Properties:* Lt. tan paste; m.w. 355; surf. tens. 37.8 dynes/cm (0.1%); 26% act.; anionic

#### Durad® 110B [Great Lakes]

*Chem. Descrip.:* t-Butylphenyl phosphate

*Uses:* Antiwear agent and mild EP agent for lubricants and functional fluids incl. engine oils, tractor fluids, roll oils, bearing lubricants, pump oils, paper machine oils, transmission fluids, greases, power steering fluids, refrigeration compressor oils; ashless; reduces wear and friction

*Use Level:* 0.5-3.0%

*Properties:* Clear liq.; odorless; sol. in min. oil and syn. base fluids; sp.gr. 1.180 (20 C); visc. 60 cSt (20 C); acid no. < 0.1; pour pt. -26 C; flash pt. (COC) 255 C; 8.5% P

*Toxicology:* Low skin irritant

#### Durad® 150B [Great Lakes]

*Chem. Descrip.:* t-Butylphenyl phosphate

*Uses:* Antiwear agent and mild EP agent for lubricants and functional fluids incl. engine oils, tractor fluids, roll oils, bearing lubricants, pump oils, paper machine oils, transmission fluids, greases, power steering fluids, refrigeration compressor oils; ashless; reduces wear and friction

*Use Level:* 0.5-3.0%

*Properties:* Clear liq.; odorless; sol. in min. oil and syn. base fluids; sp.gr. 1.165 (20 C); visc. 90 cSt (20 C); acid no. < 0.1; pour pt. -26 C; flash pt. (COC) 255 C; 8.1% P

*Toxicology:* Low skin irritant

#### Durad® 220B [Great Lakes]

*Chem. Descrip.:* Triaryl phosphate

*Uses:* Antiwear agent and mild EP agent for lubricants and functional fluids incl. engine oils, tractor fluids, roll oils, bearing lubricants, pump oils, paper machine oils, transmission fluids, greases; ashless; reduces wear and friction

*Properties:* Clear liq.; odorless; sol. in min. oil and syn. base fluids; sp.gr. 1.155 (20/20 C); visc. 160 cSt (20 C); acid no. < 0.1; pour pt. -21 C; flash pt. (COC) 255 C; 7.9% P

#### Durad® 620B [Great Lakes]

*Chem. Descrip.:* t-Butylphenyl phosphate

*Uses:* Antiwear and mild EP agent for lubricants and functional fluids incl. engine oils, tractor fluids, roll oils, bearing lubricants, pump oils, paper machine oils, transmission fluids, greases, power steering fluids, refrigeration compressor oils; ashless; reduces wear and friction

*Use Level:* 0.5-3.0%

*Properties:* Clear liq.; odorless; sol. in min. oil and syn. base fluids; sp.gr. 1.125 (20 C); visc. 700 cSt (20 C); acid no. < 0.1; pour pt. -4 C; flash pt. (COC) 255 C; 7.1% P

*Toxicology:* Low skin irritant

#### Dur-O-Set® E-623 [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking ethylene-vinyl acetate emulsion

CAS 24937-78-8

*Uses:* Dry and wet str. agent for paper saturation (filtration, tag and label

stock); component of paper/paperboard in contact with aq./fatty/dry foods; in resin-bonded filters for food contact; features toughness, flexibility, exc. formulation, size press, and spray stability; exc. adhesion to wide variety of substrates; high str., durability, solv. resist.; requires acid catalyst to optimize crosslinking and performance

*Regulatory:* FDA 21CFR §176.170, 176.180, 177.2260

*Properties:* 0.4 µ particle size; dens. 8.8 lb/gal; visc. 200 cps; pH 5.5; 52% solids; anionic

#### Dur-O-Set® E-646 [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking ethylene-vinyl acetate emulsion  
CAS 24937-78-8

*Uses:* Dry and wet str. agent for paper saturation (wallcovering, tag and label stock); component of paper/paperboard in contact with aq./fatty/dry foods; in resin-bonded filters for food contact; exc. adhesion to wide variety of substrates; delamination resist.; features softness and toughness, exc. formulation stability, exc. size press and spray stability; requires acid catalyst to optimize crosslinking and performance

*Regulatory:* FDA 21CFR §176.170, 176.180, 177.2260

*Properties:* 0.4 µ particle size; dens. 8.8 lb/gal; visc. 100 cps; pH 5.5; 52% solids; anionic

#### Dur-O-Set® Elite 22 [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking ethylene-vinyl acetate emulsion  
CAS 24937-78-8

*Uses:* Dry and wet str. agent for paper saturation (wallcovering, filtration, tag and label stock); imparts soft hand with toughness, flexibility, and abrasion resist.; exc. dry, wet and solv. str.; exc. adhesion to wide variety of fibers; exc. size press and spray stability; ultra low formaldehyde; alkyl phenol ethoxylate-free

*Properties:* 0.4 µ particle size; low odor; dens. 8.8 lb/gal; visc. 300 cps; pH 5; 52% solids; anionic

#### Dur-O-Set® Elite 33 [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking ethylene-vinyl acetate emulsion  
CAS 24937-78-8

*Uses:* Dry and wet str. agent for paper saturation (wallcovering, filtration, tag and label stock); imparts toughness, flexibility, and abrasion resist.; yields highly absorbent fabrics; exc. dry, wet and solv. str.; exc. adhesion to wide variety of fibers; exc. size press and spray stability; ultra low formaldehyde; alkyl phenol ethoxylate-free

*Properties:* 0.4 µ particle size; low odor; dens. 8.8 lb/gal; visc. 300 cps; pH 5; 52% solids; anionic

#### Dykor® 204 [Whitford]

*Chem. Descrip.:* Polyvinylidene fluoride  
CAS 24937-79-9

*Uses:* Primer coating containing mica to enhance adhesion at metal/coating interface; protective coating for lining chem. processing vessels, acid etching in mfg. of electronic components, bleaching operations in pulp/paper mills, corrosion protection

#### DymSol® 2031 [Cognis/Chems. Group; Cognis/Coatings & Inks; Sidobre-Sinnova SA]

*Chem. Descrip.:* Sulfated oleic acid, sodium salt  
CAS 68331-91-9

*Uses:* Primary or sec. emulsifier for emulsion polymerization, SBR, PVC; latex stabilizer; food pkg. adhesives; defoamer in food-contact coatings; defoamer in food-contact paper coatings; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200; SARA non-reportable

*Properties:* Dk. amber liq.; mild odor; 10% sol. in water; sp.gr. 1.09; dens. 9.1 lb/gal; flash pt. (PMCC) 93 C; pH 5.3 (2%); 60% act. in water; anionic

*Toxicology:* May cause skin and eye irritation; ing. may cause nausea, vomiting, and diarrhea; TSCA listed

*Environmental:* Biodeg.

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if cold; warm to 50 C, mix well

#### DymSol® B [Cognis/Chems. Group]

*Chem. Descrip.:* Zinc stearate/zinc palmitate aq. disp.

*Uses:* Lubricant; stabilizer in elastomeric polymers; rubber strip stock antitackifier; food pkg. adhesives, paper, closures with sealing gaskets for food containers; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210, 177.1210; SARA §311/312/313 reportable

*Properties:* Wh. visc. liq.; fatty odor; disp. in water; sp.gr. 0.98; dens. 8.2 lb/gal; visc. 3000 cP; flash pt. (PMCC) > 93 C; pH 10 (10%); VOC 54%; 45% act.

*Toxicology:* May cause sl. skin and possibly severe eye irritation; ing. may cause GI irritation, nausea, vomiting, diarrhea; zinc stearate may cause pulmonary fibrosis; TSCA listed

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* Carbon dioxide, carbon monoxide, and oxides of zinc

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* Store above 10 C; protect from freezing; mix well before using

#### DynaCoat™ XA [Plasmine Tech.]

*Chem. Descrip.:* Modified rosin-based aq. emulsion

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Surf. sizing agent imparting exc. hydrophobicity and surf. str. to paper grades at the size press; component of paper/paperboard in contact with aq./fatty/dry foods; compat. with size press formulations contg. clay, CaCO<sub>3</sub>, or other pigments; nonfoaming; exc. size press runnability; imparts exc. ink jet printability and toner adhesion to base sheet; exc. stability

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Milky wh. emulsion; odorless; disp. in water; sp.gr. 1.05; dens. 8.7 lb/gal; visc. < 100 cps; b.p. 212 F; flash pt. nonflamm.; pH 6-7; 40% total solids; anionic

*Toxicology:* No health hazards known; avoid skin and eye contact

*Precaution:* Keep away from heat, strong alkali, and strong acid

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 6 mos shelf life; store @ 40-90 F; avoid freeze/thaw storage conditions

#### DynaCoat™ XC [Plasmine Tech.]

*Chem. Descrip.:* Modified rosin-based emulsion

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Surf. sizing agent improving ink jet printability and surf. str. of highly filled alkaline papers at the size press; component of paper/paperboard in contact with aq./fatty/dry foods; compat. with size press formulations contg. optical brighteners and other additives; nonfoaming; exc. size press runnability; imparts exc. toner adhesion to base sheet; exc. stability

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Milky wh. emulsion; sl. odor; disp. in water; sp.gr. 1.04; dens. 8.67 lb/gal; visc. 295 cps; m.p. 32 F; b.p. 212 F; flash pt. nonflamm.; pH 3.3; 35% total solids; cationic

*Toxicology:* May cause eye irritation, reddening, itching, inflamm. of skin/eyes; inh. may cause respiratory tract irritation, coughing; ing. may cause digestive tract irritation; prolonged skin contact may cause irritation and dermatitis

*Precaution:* Avoid contact with strong oxidizers

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 6 mos shelf life; store @ ambient temps.; keep from freezing; if accidentally frozen, mix thoroughly

#### DynaCoat XL [Plasmine Tech.]

*Chem. Descrip.:* Styrene-acrylic aq. emulsion

CAS 9010-92-8

*Uses:* Surf. sizing agent imparting exc. hydrophobicity and surf. str. to variety of paper grades; improves printing chars. and toner adhesion; exc. stability; low foaming

*Properties:* Milky translucent disp.; sl. odor; disp. in water; sp.gr. 1.06; dens. 8.8 lb/gal; visc. 1700 cps; b.p. 100 C; flash pt. nonflamm.; pH 8.6; 50% total solids

*Toxicology:* May cause eye irritation, reddening, itching, inflamm. of skin/eyes; inh. may cause respiratory tract irritation, coughing; ing. may cause digestive tract irritation; prolonged skin contact may cause irritation and dermatitis

*Precaution:* Avoid contact with strong oxidizers; spilled liq. may be slippery

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 1+ yr shelf life; store @ ambient temps. in closed containers; keep from freezing

#### Dynakoll [Akzo Nobel]

*Chem. Descrip.:* Rosin size

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Water repellent for paper prods.

*Properties:* Liq.

#### Dynol™ 604 [Air Prods./Perf. Chems.]

*Chem. Descrip.:* Acetylenic glycol-based surfactant

*Uses:* Surfactant, wetting agent for high-performance aq. systems, e.g., metal and wood coatings, paper coatings, flexographic and gravure inks, adhesives, concrete sealers, floor polishes, leather coatings, architectural paints, etc.; exc. for difficult-to-wet substrates requiring good flow and leveling; reduces equilibrium and dynamic surf. tensions; ideal for low-VOC, low-foam applics.

*Use Level:* 0.2-1% (metal coatings), 0.5-1% (wood coatings)

*Properties:* Amber liq.; sp.gr. 0.974; flash pt. 327 F; surf. tens. 25.8 dynes/cm (equilibrium, 0.1% aq.), 28.4 dynes/cm (dynamic, 0.1% aq.); < 1.5% VOC; 100% act.; nonionic

**Dyqex®** [Georgia-Pacific Resins]

*Chem. Descrip.:* Sodium lignosulfonate  
CAS 8061-51-6

*Uses:* Dye dispersant extender; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170

*Properties:* Brn. powd., no appreciable odor; sol. in water; sp.gr. ≈ 0.5; m.p. dec.; pH ≈ 7; anionic

*Toxicology:* Nontoxic orally; nonirritating to eyes, skin; prolonged exposure to dust may cause sneezing, coughing, or other nuisance symptoms

*Environmental:* Biodeg.

*Precaution:* Finely divided particles mixed with air in presence of an ignition source may present an explosion hazard; incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* SO<sub>2</sub>

*Storage:* Store in dry place and keep sealed until ready to use to prevent caking from moisture pickup

# E

## Eastacoat 808P [Eastman]

*Chem. Descrip.:* LDPE

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Used for inj. molding, extrusion coating, and laminating foil to paper-board (e.g., soft-drink syrup packages), heat seal coating for boil-in-bag food pouches

*Properties:* Sp.gr. 0.917; melt index 7.0 g/10 min; tens. str. 10 MPa (yield, 500 mm/min), 10 MPa (break, 500 mm/min); elong. 400% (break, 500 mm/min); Vicat soften. pt. 88 C

## Eastek 1200 [Eastman]

*Chem. Descrip.:* Sulfopolyester polymer

*Uses:* Preprint primer for aluminum foil, metalized paper, and other types of film; gravure slipcoat or processing aid for cigarette inner liner pkg. applic.; water and alcohol resist., fast drying

*Properties:* Low odor; visc. 100 cps; pH 5-7; 30% solids

## Eastek 2140 [Eastman]

*Chem. Descrip.:* Sulfopolyester hybrid

*Uses:* Gravure ink vehicle for printing on paper and board applics.; low foaming

*Properties:* Emulsion; low odor; visc. 18 cps; pH 5-7; 2% n-propanol; 40% solids

## Eastman® TXIB [Eastman]

*Chem. Descrip.:* 2,2,4-Trimethyl-1,3-pentanediol diisobutyrate

CAS 6846-50-0; EINECS/ELINCS 229-934-9

*Uses:* Primary plasticizer in surf. coatings, vinyl floorings, floor polishes, moldings, and vinyl prods.; compatible with film-forming vehicles used in lacquers for wood, paper, and metals; primary plasticizer for PVC plastisols for rotocasting and slush molding; used in PVC organosols processed by extrusion and inj. molding; also for adhesives, cosmetics and personal care prods.

*Properties:* Colorless clear liq.; sl. fruity odor; sol. 1.5 mg/l in water; m.w. 286.4; sp.gr. 0.945 (20 C); dens. 7.86 lb/gal (20 C); visc. 9 cP; vapor pressure 0.0007 mm Hg (20 C); f.p. -70 C; b.p. 280 C; ref. index 1.4300; flash pt. (PMCC) 128 C; fire pt. 152 C (COC); ref. index 1.4300; dissip. factor  $0.13 \times 10^{-2}$  (1 MHz); dielec. const. 4.5 (1 MHz); vol. resist.  $1.5 \times 10^{11}$  ohm-cm; 98% min. assay

*Toxicology:* LD50 (oral, rat) > 3.2 g/kg, (dermal, guinea pig) > 20 ml/kg; low hazard by inh., ingestion, eye or skin contact; TSCA listed

*Environmental:* Low BOD; little potential to cause oxygen depletion in aq. systems; low potential to affect aquatic organisms or sec. waste treatment microbial respiration; expected to biodegrade

*Precaution:* Incompat. with strong oxidizing materials; explosive limits 0.48% vol. (172 C) to 3.1% vol. (230 C)

*Hazardous Decomp. Prods.:* Hazardous combustion prods.: CO, CO<sub>2</sub>

*Storage:* Store in closed containers

## Eastone™ 147 Wax [Eastman]

*Chem. Descrip.:* Polypropylene homopolymer wax

CAS 9003-07-0

*Uses:* Processing aid for rubber and plastic; softening pt. improver for hot-melt adhesives; additive in paper coatings and printing inks

*Regulatory:* DOT nonregulated; SARA nonreportable

*Properties:* Gardner 1 pastilles or powd.; odorless; negligible sol. in water; m.w. 8300; sp.gr. 0.86; visc. 125 mPa·s (190 C); vapor pressure negligible; soften. pt. (R&B) 150 C; flash pt. (COC) 277 C; 100% act.

*Toxicology:* TSCA listed

*Precaution:* Powd. material may form explosive dust-air mixts.; molten material will produce thermal burns; incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Combustion produces CO<sub>2</sub>, CO

HMIS: Health 1; Flammability 1; Reactivity 0

*Storage:* Keep container closed

## Ebecryl® 350 [UCB Radcure]

*Chem. Descrip.:* Acrylated silicone

*Uses:* Slip agent for overprint varnishes and coatings on wood, paper, and plastics; good substrate wetting and slip with no migration

*Properties:* Gardner 8 color; visc. 400 cps; acid no. 5

## Ebecryl® 585 [UCB Radcure]

*Chem. Descrip.:* Chlorinated polyester diluted 40% with tripropylene glycol diacrylate

*Uses:* Used in UV cured lithographic and screen inks for metals, plastics, and paper, laminating adhesives, clear coatings; fast UV cure, good adhesion

*Properties:* Gardner 3 color; visc. 4700 cps; acid no. 15; tens. str. 1300; tens. elong. 45%

## Ebecryl® 586 [UCB Radcure]

*Chem. Descrip.:* Chlorinated polyester diluted 40% with trimethylolpropane triacrylate

*Uses:* Used in UV cured dry lithographic inks for metals, plastics, and paper, laminating adhesives, clear coatings; fast UV cure, good adhesion

*Properties:* Gardner 3 color; visc. 45,000 cps; acid no. 15; tens. str. 7000; tens. elong. 1%

## Ebecryl® 588 [UCB Radcure]

*Chem. Descrip.:* Chlorinated polyester diluted 40% with OTA-480

*Uses:* Used in UV cured dry lithographic inks for metals, plastics, and paper, laminating adhesives, clear coatings; fast UV cure, good adhesion to plastics

*Properties:* Gardner 3 color; visc. 40,000 cps; acid no. 15; tens. str. 3700; tens. elong. 22%

## Ebecryl® 600 [UCB Radcure]

*Chem. Descrip.:* Bisphenol A epoxy diacrylate

*Uses:* For overprint varnishes, lithographic and screen inks, coatings for paper, paperboard, wood chipboard, and rigid plastics, laminating adhesives, paper upgrading; low color grade featuring very fast cure, high gloss, exc. solv. resist.

*Properties:* Gardner 1 color; m.w. 525; visc. 3600 cps (60 C); acid no. 2; tens. str. 13,900 psi; tens. elong. 7%

## Ebecryl® 1360 [UCB Radcure]

*Chem. Descrip.:* Silicone hexaacrylate

*Uses:* Slip agent, substrate wetting agent, and flow control agent in overprint varnishes, clear coatings on paper, plastics and metals

*Properties:* Gardner 7 color; visc. 2000 cps; acid no. 14

*Toxicology:* TSCA listed

## Ebecryl® 2047 [UCB Radcure]

*Chem. Descrip.:* Trifunctional polyester acrylate oligomer

*Uses:* Diluent for UV/EB-cured prods., flexographic and screen inks, coatings (paper, wood, plastics), paper upgrading, high visc. systems, EB-cured paper-foil laminating adhesives, solventless spray and flow coater applics.; high surf. hardness, solv. resist., toughness

*Properties:* Gardner 3 max. color; low odor; dens. 9.1 lb/gal; visc. 400 cps; acid no. 15 max.; 100% solids

*Storage:* 6 mos shelf life in stainless steel tanks, amber glass, amber polyethylene, or baked phenolic lined containers; do not expose to temps. > 100 F

- for prolonged periods, or to direct sunlight
- Ebecryl® 3500** [UCB Radcure]  
*Chem. Descr.:* Bisphenol A epoxy acrylate  
*Uses:* For use in screen ink vehicles, clear coatings for paper, wood and metal decorating, and laminating adhesives; improved flexibility, good chem. resist., toughness, high gloss  
*Properties:* Gardner 4 color; m.w. 750; visc. 60,000 cps; acid no. 4; tens. str. 6500 psi; tens. elong. 43%
- Ebecryl® 3502** [UCB Radcure]  
*Chem. Descr.:* Bisphenol A epoxy diacrylate diluted with 20% OTA-480  
*Uses:* For use in clear coatings for paper, laminates, adhesives, metal decorating, and screen inks; fast cure response, hardness, chem. resist. and high gloss  
*Properties:* Gardner 2 color; m.w. 525; visc. 70,000 cps; acid no. 1; tens. str. 9000 psi; tens. elong. 4%
- Ebecryl® 3701** [UCB Radcure]  
*Chem. Descr.:* Bisphenol A epoxy acrylate  
*Uses:* For use in overprint varnishes, clear coatings for paper, wood, metal decorating, laminating adhesives; offers abrasion and chem. resist., high gloss, flexibility and toughness  
*Properties:* Gardner 4 color; m.w. 820; visc. 4100 cps (65 C); acid no. 2.5; tens. str. 11,400 psi; tens. elong. 7%
- Ebecryl® 3701-20T** [UCB Radcure]  
*Chem. Descr.:* Bisphenol A epoxy acrylate diluted 20% with trimethylolpropane triacrylate  
*Uses:* For use in clear coatings for paper, wood, metal decorating, laminating adhesives; offers good cure response  
*Properties:* Gardner 4 color; low odor; m.w. 820; visc. 78,000 cps; acid no. 2.5; tens. str. 14,200 psi; tens. elong. 7%
- Ebecryl® 3702** [UCB Radcure]  
*Chem. Descr.:* Fatty acid-modified epoxy acrylate  
*Uses:* Wetting agent, flow control agent, and leveling agent for use in clear coatings for paper, wood, metal decorating, laminating adhesives  
*Properties:* Gardner 4 color; low odor; m.w. 600; visc. 2300 cps (65 C); acid no. 2; tens. str. 9500 psi; tens. elong. 10%
- Ebecryl® 3720-HD20** [UCB Radcure]  
*Chem. Descr.:* Bisphenol A epoxy diacrylate diluted 20% with hexanediol diacrylate  
*Uses:* For use in adhesives, screen ink vehicles, paper coatings, and wood fillers  
*Properties:* Gardner 2 color; low odor; m.w. 525; visc. 11,200 cps; acid no. 1; tens. str. 17,700 psi; tens. elong. 3%
- Ebecryl® 3720-TH20** [UCB Radcure]  
*Chem. Descr.:* Bisphenol A epoxy diacrylate diluted 20% with trimethylolpropane triacrylate  
*Uses:* For use in clear coatings for paper, laminates, adhesives, metal decorating, screen inks; fast cure response, hardness, chem. resist., and high gloss  
*Properties:* Gardner 2 color; low odor; m.w. 525; visc. 70,000 cps; acid no. 1; tens. str. 14,900 psi; tens. elong. 4%
- Ebecryl® 4830** [UCB Radcure]  
*Chem. Descr.:* Aliphatic urethane acrylate diluted 10% with tetraethylene glycol diacrylate  
*Uses:* For use in silkscreen inks for plastics, laminating adhesives, clear coating for paper, plastics, and wood; good exterior durability, flexibility, toughness and adhesion, particularly on plastic  
*Properties:* Gardner 1 color; m.w. 1200; visc. 3500 cps (60 C); tens. str. 5200 psi; tens. elong. 83%
- Ebecryl® 4849** [UCB Radcure]  
*Chem. Descr.:* Aromatic urethane diacrylate diluted 15% with hexanediol diacrylate  
*Uses:* Used in clear coatings for paper and wood laminates, adhesives, metal decorating, plastics; exc. flexibility, toughness, abrasion resist.  
*Properties:* Gardner 1 color; m.w. 1600; visc. 2800 cps (60 C); tens. str. 2700 psi; tens. elong. 51%
- Ebecryl® 6700** [UCB Radcure]  
*Chem. Descr.:* Aromatic urethane acrylate  
*Uses:* Used for screen ink vehicles, clear coatings for paper, rigid and flexible plastics and wood, metal decorating, laminating adhesives  
*Properties:* Gardner 1 color; m.w. 1600; visc. 6000 cps (65 C); tens. str. 2000 psi; tens. elong. 62%
- Ebonex SC-5** [Ebonex]  
*Chem. Descr.:* Bone black  
CAS 8021-99-6  
*Uses:* Pigment for coated paper and board, linoleum, printing ink dye stamping, pulp colors, silk-screen process inks, stains, concrete and cement  
*Properties:* Blk. powd.; readily disp. in aq. and oil-based vehicles; insol. in water; sp.gr. 2.60; oil absorp. 0.055 g linseed oil/g pigment  
*Toxicology:* TSCA listed
- Ecco Aluminum Formate** [Eastern Color & Chem.]  
*Chem. Descr.:* Dibasic/aluminum formate sol'n.  
CAS 7360-53-4; EINECS/ELINCS 230-898-1  
*Uses:* Prep. of water repellents; waterproofing textiles; mordant in dyeing; temporary nondurable dye fixative; water repellent and wet str. agent for paper; component of antiperspirant deodorants; in tanning operations to set tanning sol'ns. prior to dyeing; to improve water shedding props. of some suedes  
*Properties:* Clear, colorless water liq.; dens. 9.6 lb/gal; pH 4.3 ± 0.2 (undiluted); 7.6% Al<sub>2</sub>O<sub>3</sub>  
*Storage:* 6 mos. shelf life @ R.T.; prod. will freeze to solid; on thawing, separation will occur
- Eccobond Adhesive 201 (Joyco Adhesive M1616)** [Eastern Color & Chem.]  
*Chem. Descr.:* Syn. resin  
*Uses:* Adhesive for use in attaching paper labels to metal cans, spools; emulsion with high degree of green tack; provides durability to scuffing and moisture
- Eccobond Adhesive Special #2** [Eastern Color & Chem.]  
*Chem. Descr.:* Resin/solv. adhesive  
*Uses:* Adhesive for textiles and paperboard industries; compounded to supply satisfactory initial tack; solv. system has been carefully selected for somewhat rapid evap., thereby requiring min. temp. and ventilation
- Eccopuff** [Eastern Color & Chem.]  
*Uses:* Printing system providing a raised, three-dimensional type of print for novelty printing applicable to paper, textiles, nonwoven, and decorative tiles in building applics.
- Ecco Rez U-8** [Eastern Color & Chem.]  
*Chem. Descr.:* Waterborne aliphatic urethane polymer disp.  
*Uses:* Produces exc. chem., water, and abrasion resist. in pad dyeing of nylon, polyester, rayon, cotton, and blends; binder for pigment printing; low crock finish; vehicle for clear and pigmented coatings for leather, paper, metals, and wood where tough flexible coating is desired; low VOC; cures @ R.T., but 250-300 F will accelerate cured hardness  
*Properties:* Wh. low-visc. disp.; dens. 8.75 lb/gal; pH 8.0; 35% solids
- Ecco Rez U-21** [Eastern Color & Chem.]  
*Chem. Descr.:* Waterborne polyurethane emulsion  
*Uses:* Softener, hand modifier providing high flexibility in pad dyeing of nylon, polyester, rayon, cotton, and blends; provides shrinkage control to wool, rayon, silks, dry-clean-only fabric; flexible binder for pigment printing, plastics, paper, leather, films; clear coat for leather, metals, and wood; modifier for other polymers; thermosetting resin; retains softness after multiple launderings/dry cleanings; low crock finish; isocyanate-free  
*Regulatory:* DOT nonregulated; SARA §312/313 nonreportable  
*Properties:* Wh. low-visc. emulsion; mild amine odor; reducible in water; sp.gr. 1.05; dens. 8.4 lb/gal; visc. 100 cps; b.p. 212 F; flash pt. none; pH 8.0; VOC 5 g/l; 50% solids  
*Toxicology:* Causes eye irritation and possible tearing; may cause mild skin irritation on repeated contact; may be harmful if swallowed; excessive inh. of vapors may cause nasal/respiratory irritations, headache, nausea  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* Combustion prods.: CO, CO<sub>2</sub>, possibly NO<sub>x</sub>  
*Storage:* Store indoors away from high temps. and flames; emptied containers may retain hazards; do not cut, puncture, or weld near containers
- Eco-Brite™** [Vinings Ind.]  
*Uses:* Brightener to improve pulp bleaching efficiency, primarily in hydrogen peroxide and hydrosulfite bleaching stages; cost-effective replacement for traditional chelants
- EkaZeolite BMH** [Eka Chems.]  
*Uses:* Neutralizer, taste improver in cardboard and pulp; adsorbs substances producing unwanted taste in prepacked provisions and other sensitive prods.
- Ekoflock™** [Eka Chems.]  
*Chem. Descr.:* Polyaluminum hydroxychloride  
CAS 1327-41-9; EINECS/ELINCS 215-477-2  
*Uses:* Sizing agent used to set and retain rosin-based size, particularly in neutral pH range; trash catcher controlling barium sulfate deposition in paper-

making

**Eldorado ALK-6000** [Eldorado]*Chem. Descrip.:* Highly alkaline water-based cleaner*Uses:* Cleaner for rapid cleaning of plastic wires, dandy rolls, suction, rolls, paper machine systems, wet felts, and dryer felts; contains caustic; phosphate-free; dissolves soils such as hard water salts, clays, dyes, pigments, resins, most org. soils found in paper mills*Use Level:* 3-5% (batch cleaning), 5-20% (general-purpose cleaner)*Properties:* Dk. brn. clear liq.; mild odor; flash pt. none; pH 13+ (1%)*Toxicology:* Highly alkaline; contains caustic; avoid contact with skin and eyes*Environmental:* Biodeg.**Eldorado ALK-6031** [Eldorado]*Chem. Descrip.:* Highly alkaline water-based cleaner*Uses:* Cleaner for rapid cleaning of plastic wires, dandy rolls, suction, rolls, paper machine systems, wet felts, and dryer felts; contains caustic; phosphate-free; dissolves soils such as hard water salts, clays, dyes, pigments, resins, most org. soils found in paper mills*Use Level:* 3-5% (batch cleaning), 5-20% (general-purpose cleaner)*Properties:* Dk. brn. clear liq.; mild odor; flash pt. none; pH 13+ (1%)*Toxicology:* Highly alkaline; contains caustic; avoid contact with skin and eyes*Environmental:* Biodeg.**Eldorado ALK-6100** [Eldorado]*Chem. Descrip.:* Highly alkaline water-based cleaner*Uses:* Cleaner, sequestrant, buffer, penetrant for steam cleaning and felt cleaning in paper machines; boilout or purge chem. giving max. tank life where high soil loads are encountered; rec. for use where small nozzles can easily become plugged; outstanding soil-carrying capacity; good rinsing; contains no phenols, cresols, or cresyls; not safe on aluminum, zinc, or wh. metals*Use Level:* 3-5% (batch cleaning)*Properties:* Dk. brn. liq.; mild odor; flash pt. none; pH 13+ (1%)*Toxicology:* Highly alkaline; contains caustic; avoid contact with skin, eyes, clothing**Eldorado ALK-6156** [Eldorado]*Chem. Descrip.:* Highly alkaline water-based cleaner*Uses:* Cleaner, sequestrant, buffer, penetrant for steam cleaning and felt cleaning in paper machines; boilout or purge chem. giving max. tank life where high soil loads are encountered; rec. for use where small nozzles can easily become plugged; outstanding soil-carrying capacity; good rinsing; contains no phenols, cresols, or cresyls; not safe on aluminum, zinc, or wh. metals*Use Level:* 3-5% (batch cleaning)*Properties:* Dk. brn. liq.; mild odor; flash pt. none; pH 13+ (1%)*Toxicology:* Highly alkaline; contains caustic; avoid contact with skin, eyes, clothing**Eldorado Boilout No. 1** [Eldorado]*Uses:* Cleaner for paper mill stock systems; readily attacks calcium/barium sulfates, calcium oxalate, TiO<sub>2</sub>, starch, alum, rosin, sizes, pitch, latex, etc.; for use with mill caustic; high soil-suspending capacity; no noxious fumes*Properties:* Dk. brn. liq.; mild odor; dens. ≈ 9.5 lb/gal; VOC 0%*Toxicology:* Avoid contact with skin, eyes, clothing**Eldorado DEF-710** [Eldorado]*Chem. Descrip.:* Conc. surfactant blend*Uses:* Rewetting agent for papermaking; effective over broad pH range; compensates for sheets that exhibit self-sizing tendencies*Properties:* Clear visc. sol'n.; sol. in water; dens. 8.6 lb/gal; nonionic/anionic*Toxicology:* Severe eye irritant*Environmental:* Low aquatic toxicity*Storage:* Avoid freezing; if frozen, thaw slowly and agitate before use**Eldorado DEF-731** [Eldorado]*Uses:* Defoamer for deaeration applics. on paper machines, suitable for food-pkg. paper; does not contain silicones or petrol. distillates*Regulatory:* FDA compliant*Properties:* Amber translucent liq.; mild odor; neutral pH*Environmental:* Biodeg.; LD50 > 500 ppm—nontoxic to fish**Eldorado DEF-741** [Eldorado]*Uses:* Defoamer, rewetting agent for toweling and tissue machines and for other types of paper incl. food-contact papers; water-based*Regulatory:* FDA compliant*Properties:* Colorless translucent liq.; mild odor; flash pt. none; neutral pH*Environmental:* Biodeg.; LD50 > 1000 ppm—nontoxic to fish**Eldorado DEF-795** [Eldorado]*Uses:* Defoamer, deaerator, drainage aid for paper stocks, incl. alkaline papermaking and food-contact paper; rec. for all types of paper stocks and pH ranges; water-based; low VOC; efficient drainage of forming wires; improved web formation; does not modify sizing; freely pourable in wide temp. range*Regulatory:* FDA compliant*Properties:* Aq. emulsion; misc. with water**Eldorado DIC-100** [Eldorado]*Chem. Descrip.:* Solventized deinking compd.*Uses:* Deinking agent, emulsifier for papermaking; penetrates and accelerates defibering of stock, dissolves inks, varnishes, and coatings, and emulsifies them into the pulping liquor; effective at 120-190 F, but developed for optimum pulping temps. of 150-160 F; no chlorinated solvs.*Use Level:* 0.5-1 gal/ton of dry furnish*Properties:* Colorless clear liq.; mild odor; dens. ≈ 7.5 lb/gal; flash pt. > 150 F; nonionic*Toxicology:* May burn skin and eyes; harmful if swallowed*Environmental:* Biodeg.*Precaution:* Combustible; avoid ignition sources**Eldorado DIC-107** [Eldorado]*Uses:* Deinking agent, stickies control agent, dispersant for paper stock; prevents stickies from agglomerating; reduces picking and one-sidedness of paper; controlled foam*Use Level:* 0.5 gal/ton of dry furnish*Properties:* Dk. brn. liq.; mild pleasant odor; neutral pH; anionic*Environmental:* Biodeg.**Eldorado ED-550** [Eldorado]*Uses:* Solventized, caustic hard surf. cleaner, dye solubilizer for deinking pulp/paper, cleaning dried metallic pigments and oil-sol. dyes from metal surfs.; degreaser; high alkalinity; contains no phenols, chlorinated solvs., or other EPA hazardous materials; low foaming*Properties:* Amber liq.; mild odor; nonflamm.; pH > 13*Toxicology:* Strong caustic; avoid contact with eyes and skin**Eldorado FCA-810** [Eldorado]*Chem. Descrip.:* Conc. citric acid

CAS 77-92-9; EINECS/ELINCS 201-069-1

*Uses:* Paper stock system cleaner for two-step boilout; acidic; inhibited*Properties:* Liq.; mild odor; nonflamm.*Toxicology:* No toxic vapors; no noxious fumes; avoid skin contact*Environmental:* Biodeg.**Eldorado FCD-141** [Eldorado]*Chem. Descrip.:* Alkaline, solventized low-foaming detergent*Uses:* Detergent for cleaning forming fabrics and press felts of pitch, stickies, fines, and other paper contaminants*Use Level:* 200-500 ppm (continuous applic.), 5-10% (on dryer fabrics)*Properties:* Clear liq.; mild solvent odor; completely rinsable with water; flash pt. 210 F; pH 12.0-12.5*Environmental:* Biodeg.**Eldorado FCD-142** [Eldorado]*Chem. Descrip.:* Alkaline, solventized cleaner*Uses:* Felt cleaner for removal of pitch, resins, and org. materials in papermaking; emulsifier; solubilizer; esp. effective when alum is used in papermaking; contains strong corrosion inhibitors for metal safety*Use Level:* 3-5 gal/10,000 gal shower water (continuous cleaning)*Properties:* Amber clear liq.; pH 11 (1%)*Toxicology:* Avoid eye contact and prolonged skin contact**Eldorado FCD-5050** [Eldorado]*Uses:* Boilout and wire cleaner for rapid cleaning of plastic wires, dandy rolls, suction rolls, paper machine systems, wet felts, and dryer felts, incl. food-contact paper prod.; carbonate scale remover in paper stock systems; stain remover for syn. fabrics; dissolves soils such as hard water salts, clays, dyes, pigments, resins, and most org. soils found in paper mills; water-based*Regulatory:* FDA compliant*Properties:* Amber clear liq.; mild odor; flash pt. none; pH neutral*Toxicology:* Contains peroxides; avoid skin contact*Environmental:* Biodeg.**Eldorado PA-300** [Eldorado]*Chem. Descrip.:* Polyethylene-based*Uses:* Coating lubricant enhancing printability and calendered sheet gloss and

providing superior high-shear stability in high-speed papermaking machines; eliminates calcinization and scratches; calcium stearate replacement  
*Use Level:* 0.85-1.6% (on dry pigment)

*Properties:* Creamy smooth emulsion; sol. in water in all proportions; dens. 8.73 lb/gal; visc. 150 cps; pH  $9.6 \pm 0.3$ ;  $60 \pm 1\%$  solids

*Storage:* 6 mos shelf life; store @ 38-95 F; freezing or prolonged storage over 100 F will destroy the prod.

#### Eldorado PA-500 [Eldorado]

*Chem. Descrip.:* Modified buffered glyoxal-based sol'n.

*Uses:* Crosslinking agent, insolubilizer, visc. stabilizer for paper and paperboard coating systems esp. high-solids pigmented coatings, and in pigmented size press applics. and specialty calender stack water box treatments; formaldehyde-free; highly reactive; compat. with soy polymers, casein, latex, starch, gums, etc.; replacement for melamine formaldehyde and urea formaldehyde

*Use Level:* 3-10% (wet basis on wt. of binder)

*Properties:* Clear to sl. amber sol'n.; completely sol. in water in all proportions; sp.gr.  $1.3 \pm 0.05$ ; visc. 19-20 cps; pH  $6.8 \pm 0.3$ ;  $50 \pm 0.5\%$  solids

*Storage:* 6 mos shelf life; store @ 34-95 F; freezing or prolonged storage over 100 F will destroy the prod.

#### Eldorado PA-650 [Eldorado]

*Chem. Descrip.:* Polymer/surfactant blend

*Uses:* Dry str. agent, stiffener for paper and paperboard, esp. for short fiber, recycled furnishes; does not adversely affect plybond or smoothness; no hazardous materials or toxic fumes in formulation

*Use Level:* 15-25 lb/ton

*Properties:* Yel. opaque sl. visc. liq.; sol. in water; sp.gr. 1.16; f.p. 32 F; pH 11

*Storage:* 6 mos min. shelf life; store @ 50-90 F; if frozen, gradually warm to 80-100 F and agitate before use

#### Eldorado PA-700 [Eldorado]

*Chem. Descrip.:* Sol'n. polymer blend

*Uses:* Deposit control agent for contaminants on wet felts in papermaking; efficient at broad pH range; readily mixes and pumps easily; no hazardous materials; no vapor toxicity

*Use Level:* 0.5-5.0 ml/ft of felt width

*Properties:* Hazy low visc. liq.; sp.gr. 1.05-1.1; visc. 10-50 cps; 24% solids; cationic

*Storage:* Store at 40-100 F; avoid freezing; if material appears frozen, thaw slowly and thoroughly mix before use

#### Eldorado PA-742 [Eldorado]

*Chem. Descrip.:* Polymer sol'n. with wetting agents

*Uses:* Fabric passivator, deposit control agent for contaminants on forming fabrics and wet felts in acid and alkaline papermaking

*Use Level:* 0.5-5.0 ml/ft of felt width

*Regulatory:* Nonregulated, nonhazardous material

*Properties:* Clear to sl. hazy liq.; visc. 10-50 cps; 20% polymer conc.; cationic

*Storage:* Store at 40-100 F; avoid freezing; if material appears frozen, thaw slowly and thoroughly mix before use

#### Eldorado PA-755 [Eldorado]

*Chem. Descrip.:* Low m.w. polyacrylamide

CAS 9003-05-8

*Uses:* Anionic trash collector in thermomechanical pulps and coated broke for improved save-all operation; with an anionic polymer, aids board drainage and formation; as cationic donor, enhances performance of internal sizes; enhances cationic starch fixation

*Regulatory:* Nonhazardous

*Properties:* Straw-colored liq.; infinitely sol. in water; pH 4-5; VOC 0%; 40% solids; cationic

*Precaution:* Spills are slippery and absorbent should be used

*Storage:* 2 yrs shelf life; avoid freezing

#### Eldorado PA-780 [Eldorado]

*Chem. Descrip.:* Polymeric

*Uses:* Stickies control agent, neutralizer of anionic surfs., fabric conditioner, film-former on stock and clothing fiber surfs., and deposit control agent for org. soils on fabrics in papermaking; defoamer for stock

*Use Level:*  $\frac{1}{4}$  -  $\frac{1}{2}$  gal/1000 gal of water in thin stock

*Properties:* Clear liq.; pH neutral (1%); cationic

*Toxicology:* Avoid eye contact and prolonged skin contact

*Environmental:* Biodeg.

#### Eldorado Peroxide Stabilizer [Eldorado]

*Uses:* Stabilizer for peroxide bleaching of pulps, increasing brightness and tear str.; stable at pH and temps. used in peroxide bleaching; reduces problems of silicate scale residues

*Use Level:* 6-10 lb/ton of pulp

*Properties:* Dk. amber clear sol'n.; completely sol. in water; dens.  $\approx 11.7$  lb/gal; pH < 2 (1%)

*Toxicology:* Acidic; avoid skin and eye contact; harmful if swallowed

*Environmental:* Pract. nontoxic to fish

#### Eldorado WT-30 [Eldorado]

*Uses:* Threshold scale inhibitor, crystal growth modifier, deflocculant, dispersant, corrosion inhibitor for scale control in papermaking; food-contact paper/paperboard (dry and aq./fatty foods); effective for control of barium sulfate, calcium carbonate, calcium sulfate, magnesium and iron salts deposits; good hydrolytic and thermal stability which allows use in aq. systems over prolonged periods at elevated temps. and wide pH range

*Use Level:* 5-20 ppm (threshold treatment or deposit control)

*Regulatory:* FDA 21CFR §176.170, 176.180, 121.2520, 121.2526, 121.2571, 212.2519

*Properties:* Amber clear sol'n.; mild odor; VOC nil

*Toxicology:* Nontoxic; avoid skin and eye contact

*Environmental:* BOC<sub>s</sub> nil; COD - 0.10 mg O<sub>2</sub>/mg

#### Eldorado WT-50 [Eldorado]

*Chem. Descrip.:* High m.w. cationic polymer in min. oil disp.

*Uses:* Flocculant for municipal and industrial dewatering applics., incl. primary water clarification, in pulp and waste treatment

*Properties:* Milky disp.; completely sol. in water; visc. 1000-1500 cps; 50% NV; cationic

*Toxicology:* Avoid contact with eyes and skin

*Precaution:* Spills present slip hazard

#### Eldorado Lube-20 [Eldorado]

*Chem. Descrip.:* Polymeric

*Uses:* Stickies control agent, neutralizer of anionic surfs., fabric conditioner, film-former on stock and clothing fiber surfs., and deposit control agent for org. soils on fabrics in papermaking; defoamer for stock

*Use Level:*  $\frac{1}{4}$  -  $\frac{1}{2}$  gal/1000 gal of water in thin stock

*Properties:* Clear liq.; pH neutral (1%); cationic

*Toxicology:* Avoid eye contact and prolonged skin contact

*Environmental:* Biodeg.

#### Electra® 7458 [Tate & Lyle N. Am.]

*Chem. Descrip.:* Visc. modified waxy corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Retention aid for papermaking size press; designed where inc. starch retention during repulping is required to improve BOD and COD levels in mill effluents

*Properties:* Cationic

#### Elfugin® AKT Liq. [Clariant UK]

*Chem. Descrip.:* Phosphate ester

*Uses:* Antistat, corrosion inhibitor for surf. treatment of highly technical specialized papers such as punch tape paper, high speed copier paper, paper for noncontact printing, etc.; very good stability to hard water, acids, alkalis; compat. with anionics, nonionics

*Use Level:* 1-8% (size press starch basis), 0.05-0.5% (dry paper basis)

*Properties:* Colorless clear liq.; alcoholic odor; unlimited dilutability with cold water; dens. 1.063 kg/l; pH  $\approx 7$  (1%); anionic

*Storage:* Good storage stability @ 0-50 C; freezes below -5 C, but is fully effective on thawing

#### Elvace® 731 [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* VAE copolymer emulsion

CAS 24937-78-8

*Uses:* Adhesive base for uncoated paper, corrugated board, and cotton cloth substrates; multipurpose; for adhesives requiring a low VOC content; low residual vinyl acetate monomer (< 0.1%)

*Properties:* 0.2-2.0  $\mu$  particle size; dens. 8.8-9.1 lb/gal; visc. 2000-3000 cps; surf. tens. 52-55 dynes/cm; pH 4.0-5.5; 54.5% min. solids

*Storage:* > 180 day shelf life @ 72 F; protect from freezing

#### Elvace® 733 [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* VAE copolymer

CAS 24937-78-8

*Uses:* Adhesive base for coated and uncoated paper, corrugated board, syn. and cotton cloth, mylar film, PVC, and steel substrates; multipurpose; for adhesives requiring a low VOC content; low residual vinyl acetate monomer (< 0.1%)

*Properties:* 0.2-2.0 µ particle size; dens. 8.8-9.0 lb/gal; visc. 700-1300 cps; surf. tens. 48-51 dynes/cm; pH 4.0-5.5; 54.5% min. solids

*Storage:* > 180 day shelf life @ 72 F; protect from freezing

**Elvace® 734** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE copolymer emulsion

CAS 24937-78-8

*Uses:* Adhesive base for uncoated paper, corrugated board, cotton cloth, and PVC, decorative paper to particle board lamination, heat-sealable coatings, microwavable pkg., urethane foam lamination; multipurpose; fast speed of set; inc. water resist.; for adhesives requiring low VOC content; low residual vinyl acetate monomer (< 0.1%)

*Regulatory:* FDA approved

*Properties:* 0.2-2.0 µ particle size; dens. 8.8-9.2 lb/gal; visc. 1500-2500 cps; surf. tens. 52-55 dynes/cm; pH 4.5-5.5; 54.5% min. solids

**Elvace® 735** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE copolymer

CAS 24937-78-8

*Uses:* Adhesive base for uncoated paper, corrugated board, syn. and cotton cloth, mylar film, cellulose acetate, steel, mastic, and PVC, for vinyl lamination, microwave pkg.; multipurpose; for adhesives requiring a low VOC content; low residual vinyl acetate monomer (< 0.1%)

*Properties:* 0.2-2.0 µ particle size; dens. 8.7-9.0 lb/gal; visc. 1900-2800 cps; surf. tens. 52-55 dynes/cm; pH 4.0-5.5; 54.5% min. solids

*Storage:* > 180 day shelf life @ 72 F; protect from freezing

**Elvace® 736** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE copolymer emulsion

CAS 24937-78-8

*Uses:* Adhesive base for uncoated paper, corrugated board, syn. and cotton cloth, mylar film, cellulose acetate, steel, mastic, and PVC, for microwave pkg. adhesives; multipurpose; for adhesives requiring a low VOC content; low residual vinyl acetate monomer (< 0.1%)

*Properties:* 0.2-2.0 µ particle size; dens. 8.7-9.0 lb/gal; visc. 3000-4200 cps; surf. tens. 52-55 dynes/cm; pH 4.0-5.5; 54% min. solids

*Storage:* > 180 day shelf life @ 72 F; protect from freezing

**Elvace® 739** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE copolymer emulsion

CAS 24937-78-8

*Uses:* Adhesive base for uncoated paper, corrugated board, syn. and cotton cloth, mylar film, steel, and PVC; multipurpose; for adhesives requiring a low VOC content; low residual vinyl acetate monomer (< 0.1%); improved water resist.; compat. with fully hydrolyzed PVOH

*Properties:* 0.2-2.0 µ particle size; dens. 8.6-9.0 lb/gal; visc. 2700-3700 cps; surf. tens. 52-55 dynes/cm; pH 4.0-5.5; 54-56% min. solids

*Storage:* > 180 day shelf life @ 72 F; protect from freezing

**Elvace® 40713-00** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE emulsion copolymer

CAS 24937-78-8

*Uses:* Adhesive base for vinyl laminating, coated and uncoated paper, corrugated board, cotton and syn. cloth, Mylar film, and steel substrates; multipurpose; good adhesion to difficult substrates

*Properties:* 1.1 µ particle size; dens. 8.9 lb/gal; visc. 1100 cps; surf. tens. 49.5 dynes/cm; pH 5.0; 54% solids; nonionic

**Elvace® 40722-00** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE emulsion copolymer

CAS 24937-78-8

*Uses:* Multipurpose adhesive base for vinyl film lamination, foil and urethane foam lamination, microwavable pkg., heat sealable coatings, high speed case and carton mfg., film lamination, and bottle labeling; food pkg. adhesives, paper, crosslinkable; fast speed of set; improved formulating latitude; good adhesion to metals; self-thickening; very low VOC, free of formaldehyde-containing or generating compds.

*Regulatory:* FDA 21CFR §175.105, 176.180 compliant

*Properties:* Wh. milky liq.; 1.2 µ particle size; dens. 8.8 lb/gal; visc. 1100 cps; surf. tens. 48.5 dynes/cm; pH 4.75; 56% solids

**Elvace® 40724-00** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE emulsion copolymer

CAS 24937-78-8

*Uses:* Adhesive base for uncoated paper, corrugated board, cotton cloth, and PVC substrates; multipurpose; fast speed of set; increased water resist.

*Properties:* 1.2 µ particle size; dens. 8.8 lb/gal; visc. 2100 cps; surf. tens. 55 dynes/cm; pH 4.75; 54.5% solids; nonionic

**Elvace® 97955-00** [Reichhold/Emulsion Polymers]

*Chem. Descr.:* VAE copolymer emulsion

CAS 24937-78-8

*Uses:* Adhesive base for uncoated paper, corrugated board, cotton cloth, syn. cloth, mylar film, cellulose acetate, PVC, steel, and mastic, remoistenable films; multipurpose; easy clean-up

*Properties:* 0.2-2.0 µ particle size; dens. 8.8-9.0 lb/gal; visc. 1500-2500 cps; surf. tens. 52-55 dynes/cm; pH 4-6; 55-60% solids

*Storage:* > 3 mos shelf life @ 72 F; protect from freezing

**Elvacite® 2008, 2009, 2010, 2021, 2041, 6010** [Ineos Acrylics]

*Chem. Descr.:* Acrylic resin with high methyl methacrylate content

*Uses:* Used for solv.-applied coatings for wood, metal, and plastics, aerosol paints, inks/toners, adhesives, specialty coatings for masonry, and reproduction papers and films, temporary binders

**Elvacite® 2013, 2014, 2016, 2028, 2614, 2550, 2552, 6016** [Ineos Acrylics]

*Chem. Descr.:* Methacrylate copolymer

CAS 25133-97-5

*Uses:* Used for solv.-applied coatings for wood, metal, and plastics, aerosol paints, inks/toners, adhesives, specialty coatings for masonry, and reproduction papers and films, temporary binders

**Elvacite® 2042, 2043** [Ineos Acrylics]

*Chem. Descr.:* Ethyl methacrylate-based resin

*Uses:* Used for solv.-applied coatings for wood, metal, and plastics, aerosol paints, inks/toners, adhesives, specialty coatings for masonry, and reproduction papers and films, temporary binders

**Elvacite® 2044, 2045, 2046** [Ineos Acrylics]

*Chem. Descr.:* Butyl methacrylate-based resin

*Uses:* Used for solv.-applied coatings for wood, metal, and plastics, aerosol paints, inks/toners, adhesives, specialty coatings for masonry, and reproduction papers and films, temporary binders

**Elvanol® 50-42** [DuPont; DuPont Canada]

*Chem. Descr.:* Partially hydrolyzed PVAL, 87-89% hydrolysis

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Stabilizer for vinyl acetate and PS emulsions, PVC resins; paper adhesives; cold-water-sol. films; binder for ceramics, joint compds., texture coatings, particleboard, pigmented paper coatings, nonwoven fabrics; photosensitive coatings; carrier for optical brighteners; carrier, extender for fluorochemicals; protective colloid; temporary protective coatings; soil anti-redeposition agent; food pkg. adhesives, coatings, paper, textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1200, 177.1670, 177.2260, 177.2800

*Properties:* Visc. 44-50 cP (4% aq., 20 C); pH 5-7 (sol'n.); 5% max. volatiles

*Toxicology:* Nontoxic; under certain conditions of use, nuisance dust may be formed

**Elvanol® 51-05** [DuPont; DuPont Canada]

*Chem. Descr.:* Partially hydrolyzed PVAL, 87-89% hydrolysis

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Stabilizer for vinyl acetate and PS emulsions, PVC resins; paper adhesives; cold-water-sol. films; binder for ceramics, joint compds., texture coatings, particleboard, pigmented paper coatings, nonwoven fabrics; photosensitive coatings; carrier for optical brighteners; carrier, extender for fluorochemicals; protective colloid; temporary protective coatings; soil anti-redeposition agent; food pkg. adhesives, coatings, paper, textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1200, 177.1670, 177.2260, 177.2800

*Properties:* Visc. 5-6 cP (4% aq., 20 C); pH 5-7 (sol'n.); 5% max. volatiles

*Toxicology:* Nontoxic; under certain conditions of use, nuisance dust may be formed

**Elvanol® 52-22** [DuPont; DuPont Canada]

*Chem. Descr.:* Partially hydrolyzed PVAL, 87-89% hydrolysis

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Stabilizer for vinyl acetate and PS emulsions, PVC resins; paper adhesives; cold-water-sol. films; binder for ceramics, joint compds., texture coatings, particleboard, pigmented paper coatings, nonwoven fabrics; photosensitive coatings; carrier for optical brighteners; carrier, extender for fluorochemicals; protective colloid; temporary protective coatings; soil anti-redeposition agent; food pkg. adhesives, coatings, paper, textiles; oil/grease resist.

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1200, 177.1670, 177.2260, 177.2800

*Properties:* Visc. 21-26 cP (4% aq., 20 C); pH 5-7 (sol'n.); 5% max. volatiles

*Toxicology:* Nontoxic; under certain conditions of use, nuisance dust may be formed

**Elvanol® 70-06** [DuPont]

*Chem. Descrip.:* Fully hydrolyzed PVAL, 98.5-99.2% hydrolysis  
CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Binder providing film str. in paper sizing, paper coatings, adhesives for porous substrates incl. paper/paperboard, hot-water-sol. film, and specialty applics.; binder for pigments; carrier for fluorochems. and optical brighteners; food pkg. adhesives, coatings, paper, textiles; oil/grease/solv. resist.; compat. with starch and CMC

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1200, 177.1670, 177.2260, 177.2800

*Properties:* Resist. to cold water but dissolves readily on heating to 90 C with good agitation; visc. 6-7 cP (4% aq., 20 C); pH 5-7 (sol'n.); 5% max. volatiles

*Toxicology:* Nontoxic; under certain conditions of use, nuisance dust may be formed

**Elvanol® 71-30** [DuPont; DuPont Canada]

*Chem. Descrip.:* Fully hydrolyzed PVAL, 99-99.8% hydrolysis  
CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Film-forming binder used in adhesives, paper, paperboard sizing and coatings, textiles, films, building prods.; strength additive for concrete, cement; binder for pigments, ceramics, cements, plastics, particleboard; oil/solv. barrier props. in hoses, gaskets, pipes; carrier for optical brighteners; cosmetic and personal care incl. face masks; emulsifier in emulsions and latexes; compat. with starch and CMC

*Properties:* Wh. gran.; sol. in hot water, ethanol; insol. in cold water; sp.gr. 1.30; dens. 400-432 kg/m<sup>3</sup>; visc. 28-32 cps (4% aq.); sapon. no. 3-12; ref. index 1.54; pH 5.0-7.0; tens. str. 117 MPa; tens. elong. 10% (break) to 400%; hardness > 100

*Toxicology:* Nontoxic; under certain conditions of use, nuisance dust may be formed

*Environmental:* Biodeg.

**Elvanol® 75-15** [DuPont; DuPont Canada]

*Chem. Descrip.:* Fully hydrolyzed PVAL  
CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Visc. stabilizer imparting gel resist. to aq. sol'ns., cosmetic and personal care incl. face masks, adhesives, films, paper; binder in cement and ceramic powd.; emulsifier; food pkg. adhesives

*Properties:* Wh. gran.; slurries easily in cold water; visc. 13-15 cps (4% aq.); pH 5.0-7.0; tens. str. 55.2-138 MPa

*Environmental:* Biodeg.

**Elvanol® 85-30** [DuPont; DuPont Canada]

*Chem. Descrip.:* PVAL  
CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Film-former; binder for building prods., ceramics, ceiling tiles, floor coatings, particleboard, pigmented paper coatings, nonwoven fabrics; adhesive for paper, wood, textiles, leather; emulsifier and protective colloid in emulsion polymerization; sizing agent in paper/paperboard mfg.; as water-sol. films for pkg. and release applics.; as photosensitive coatings; in specialty molded prods.; in textile sizing and finishing; oil/grease/solv. resist.; high oxygen barrier

**Elvanol® 85-82** [DuPont; DuPont Canada]

*Chem. Descrip.:* Fully hydrolyzed PVAL  
CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Film-former; binder for building prods., ceramics, ceiling tiles, floor coatings, particleboard, pigmented paper coatings, nonwoven fabrics; adhesive for paper, wood, textiles, leather; emulsifier and protective colloid in emulsion polymerization; sizing agent in paper/paperboard mfg.; as water-sol. films for pkg. and release applics.; as photosensitive coatings; in specialty molded prods.; in textile sizing and finishing; oil/grease/solv. resist.; high oxygen barrier

*Properties:* Visc. 25-31 cps (4% aq.); pH 5.0-7.0

**Elvanol® 90-50** [DuPont; DuPont Canada]

*Chem. Descrip.:* Fully hydrolyzed PVAL, 99-99.8% hydrolysis  
CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Binder providing high film strength in paper and paperboard coating and sizing, adhesive for porous substances incl. paper/paperboard, hot-water-sol. films; binder for pigments, esp. for ceiling tile primers; carrier for optical brighteners; cosmetic and personal care incl. face masks; food pkg. adhesives, coatings, paper, textiles; water/oil/grease/solv. resist.; exc. high shear rheology; compat. with modified starches

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1200, 177.1670, 177.2260, 177.2800

*Properties:* Resist. to cold water, but dissolves readily on heating to 90 C with good agitation; visc. 12-15 cps (4% aq.); pH 5.0-7.0 (sol'n.); 5% max. volatiles

*Toxicology:* Nontoxic; under certain conditions of use, nuisance dust may be formed

**Elvanol® HV** [DuPont; DuPont Canada]

*Chem. Descrip.:* Fully hydrolyzed PVAL  
CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Used in adhesive, textile, and paper applics.; cosmetic and personal care incl. face masks; high-visc. grade, high tensile and adhesive strength, strong resistance to grease and hydrocarbons

*Properties:* Wh. gran.; sol. in hot water; Hoeppler falling ball visc. 55-65 cps (4% aq.); pH 5-7 (sol'n.)

**Elvax® 310** [DuPont; DuPont Canada]

*Chem. Descrip.:* EVA copolymer resin  
CAS 24937-78-8

*Uses:* Used in heat-sealable barrier coatings and hot melt adhesives; blending agent for waxes; resin modifier for formulations; gives fiber- or film-tearing bonds between paper substrates and nonporous pkg. materials (e.g., aluminum foil, PP and Mylar polyester films, K cellophane); wax-compatible resin; enhances properties of hot melt blends containing microcryst. waxes

*Properties:* Translucent pellets; slight odor; melt index 400 g/10 min; dens. 0.948 g/cm<sup>3</sup>; inherent visc. 0.54 (30 C); soften. pt. (R&B) 88 C; ref. index 1.486; tens. str. 3.3 MPa; tens. elong. 800-1000% (break); Shore hardness A-2 70; 25% VA

**Elvax® 350** [DuPont; DuPont Canada]

*Chem. Descrip.:* EVA copolymer resins  
CAS 24937-78-8

*Uses:* Used in heat-sealable barrier coatings and hot melt adhesives; blending agent for waxes; resin modifier for formulations; gives fiber- or film-tearing bonds between paper substrates and nonporous pkg. materials (e.g., aluminum foil, PP and Mylar polyester films, K cellophane); footwear applics.; wax-compatible resin; enhances properties of hot melt blends containing microcryst. waxes

*Properties:* Translucent pellets; slight odor; melt index 19 g/10 min; dens. 0.948 g/cm<sup>3</sup>; inherent visc. 0.84; soften. pt. (R&B) 132 C; ref. index 1.489; tens. str. 14 MPa; tens. elong. 800-1000% (break); Shore hardness A83; 25% VA

**Elvax® 360** [DuPont; DuPont Canada]

*Chem. Descrip.:* EVA copolymer resins  
CAS 24937-78-8

*Uses:* Used in heat-sealable barrier coatings and hot melt adhesives; blending agent for waxes; resin modifier for formulations; gives fiber- or film-tearing bonds between paper substrates and nonporous pkg. materials (e.g., aluminum foil, PP and Mylar polyester films, K cellophane); footwear applics.; wax-compatible resin; enhances properties of hot melt blends containing microcryst. waxes

*Properties:* Translucent pellets; slight odor; melt index 2 g/10 min; dens. 0.950 g/cm<sup>3</sup>; inherent visc. 1.05; soften. pt. (R&B) 188 C; ref. index 1.491; tens. str. 26 MPa; tens. elong. 800-1000% (break); Shore hardness A87; 25% VA

**Elvax® 550, 560** [DuPont; DuPont Canada]

*Chem. Descrip.:* EVA copolymer resin  
CAS 24937-78-8

*Uses:* Used in paper roll wrap and carpet seaming tape; high m.w. and high melt visc. grades

*Properties:* Pellets; melt index 8.0 and 2.5 dg/min resp.; dens. 935 kg/m<sup>3</sup>; tens. str. 14 and 20 MPa resp.; tens. elong. 700% and 750% resp.; Shore hardness D 41 and 43 resp.; 15% VA

**Emerest® 2640** [Cognis/Chems. Group; Cognis/Textiles]

*Chem. Descrip.:* PEG-8 stearate  
CAS 9004-99-3

*Uses:* Emulsifier for oils and fats in mfg. of industrial lubricants, agric., consumer prods., textile lubricants and softeners; thickener and stabilizer for starch coatings on paper; paper size; lubricant for channeling wire through conduit; lipophilic

*Regulatory:* EPA exempt

*Properties:* Gardner 1 soft, waxy solid; sol. 5% in xylene; water-disp.; dens. 8.5 lb/gal; visc. 57 cSt (100 F); HLB 12.0; m.p. 32 C; flash pt. 425 F;

cloud pt. < 25 C; 100% act.; nonionic

**Emersol® 869** [Cognis]

*Chem. Descrip.:* Isostearic acid

*Uses:* For applics. incl. coatings, inks, greases, lubricants, paper coatings, rubber and plastic, textile chems., cosmetics, cleaners, and detergents; used where color and odor are not critical

*Properties:* M.w. 284; visc. 48 cps; acid no. 191-194; iodine no. 10 max.

*Toxicology:* LD50 (oral, rat) > 32.0 cc/kg; low toxicity, irritation, and sensitization potential

**Emersol® 872** [Cognis]

*Chem. Descrip.:* Vegetable-derived isostearic acid

*Uses:* For applics. incl. coatings, inks, greases, lubricants, paper coatings, rubber and plastic, textile chems., cosmetics, cleaners, and detergents; industrial grade

*Properties:* M.w. 284; visc. 48 cps; acid no. 175-205; iodine no. 12 max.

*Toxicology:* LD50 (oral, rat) > 32.0 cc/kg; low toxicity, irritation, and sensitization potential

**Emery® Methyl Oleate** [Cognis/Chems. Group]

*Chem. Descrip.:* Methyl oleate

CAS 112-62-9; EINECS/ELINCS 203-992-5

*Uses:* Solvent-carrier for agric. spray prods.; defoaming component in metalworking, paper deinking, pharmaceutical fermentation; prep. of lubricants for automotive, textile, metal rolling operations.

*Properties:* Acid no. 4 max.; iodine no. 85-91; sapon. no. 190-200

**Emka® Defoam BC** [Emkay]

*Chem. Descrip.:* Nonsilicone defoamer

*Uses:* Defoamer for foam and froth control for industrial wastes, textile and paper processing, dyeing and printing; not affected by acid or alkali

*Properties:* Lt. amber liq.; negligible odor; disp. in water; sp.gr. 0.8; dens. 6.8 lb/gal; pH 6.0 (1%); nonionic

*Toxicology:* Extremely low toxicity

*Storage:* Indefinite storage stability

**Empilan® KA3** [Albright & Wilson UK]

*Chem. Descrip.:* C10-12 alcohol ethoxylate

*Uses:* Scouring agent and wetting agent for textiles; emulsifier; dye leveling agent and dispersant; detergent; in metal processing, cutting oils, paper industry, paints, insecticides and pesticides; mortar plasticizer

*Properties:* Pale straw clear liq.; sol. in min. oils and other org. solvs.; HLB 8.9; 100% act.; nonionic

*Environmental:* Biodeg.

**Empilan® KA5** [Albright & Wilson UK]

*Chem. Descrip.:* C10-12 alcohol ethoxylate

*Uses:* Scouring agent and wetting agent for textiles; emulsifier; dye leveling agent and dispersant; detergent; in metal processing, cutting oils, paper industry, paints, insecticides and pesticides

*Properties:* Pale straw clear liq.; HLB 11.5; cloud pt. 37 C; 100% act.; nonionic

*Environmental:* Biodeg.

**Empilan® KA5/90** [Albright & Wilson UK]

*Chem. Descrip.:* C10-12 alcohol ethoxylate

CAS 68439-45-2

*Uses:* Scouring agent and wetting agent for textiles; emulsifier; dye leveling agent and dispersant; detergent; in metal processing, cutting oils, paper industry, paints, insecticides and pesticides

*Properties:* Water wh. clear liq.; dens. 9.8 lb/gal; HLB 11.4; pour pt. 12 F; cloud pt. 95 F; 90% act.; nonionic

*Environmental:* Biodeg.

**Empilan® KA8/80** [Albright & Wilson UK]

*Chem. Descrip.:* C10-12 alcohol ethoxylate

CAS 68439-45-2

*Uses:* Scouring agent and wetting agent for textiles; emulsifier; dye leveling agent and dispersant; detergent; in metal processing, cutting oils, paper industry, paints, insecticides and pesticides

*Properties:* Liq.; HLB 13.6; cloud pt. 81 C; 80% act.; nonionic

*Environmental:* Biodeg.

**Empilan® KA10/80** [Albright & Wilson UK]

*Chem. Descrip.:* C10-12 alcohol ethoxylate

CAS 68439-45-2

*Uses:* Scouring agent and wetting agent for textiles; emulsifier; dye leveling agent and dispersant; detergent; in metal processing, cutting oils, paper industry, paints, insecticides and pesticides

*Properties:* Liq.; HLB 14.6; cloud pt. 95 C; 80% act.; nonionic

*Environmental:* Biodeg.

**Empiphos STP** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, tech. anhyd.

CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwash, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing powd.; 93% thru 100 mesh; poured dens. 0.85 g/ml; pH 9.8 (1%); 95% act.

*Toxicology:* TSCA listed

**Empiphos STP/1L** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, tech. hydrated

CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwash, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing gran.; 40% thru 16 on 60 mesh; poured dens. 0.7 g/ml; pH 9.6 (1%); 95% act.

**Empiphos STP/1P** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, heavy dens. gran.

CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwash, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. heavy-dens. gran.; 60% max. > 0.71 mm; poured dens. 1.05 g/ml; pH 9.8 (1%)

**Empiphos STP/2P** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, heavy dens. gran.

CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwash, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. heavy-dens. gran.; 50% min. > 0.5 mm; poured dens. 1.0 g/ml; pH 9.8 (1%)

**Empiphos STP/D** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate anhyd.

CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwash, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing powd.; 93% thru 100 mesh; poured dens. 0.85 g/ml; pH 9.8 (1%); 95% act.

**Empiphos STP/D16** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate anhyd.

CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwash, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing powd.; poured dens. 0.85 g/ml; pH 9.8 (1%); 95% act.

**Empiphos STP/DMST** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, tech. moisturized

CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay

and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwasher, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing powd.; 90% thru 100 mesh; poured dens. 0.85 g/ml; pH 9.8 (1%); 94% act.

**Empiphos STP/E** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, tech. moisturized  
CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwasher, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing powd.; 85% thru 100 mesh; poured dens. 0.85 g/ml; pH 9.8 (1%); 94% act.

**Empiphos STP/L16** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, tech. hydrated  
CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwasher, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing gran.; 35% thru 16 on 60 mesh; poured dens. 0.55 g/ml; pH 9.8 (1%); 95% act.

**Empiphos STP/M** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate  
CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwasher, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing gran.; 50% thru 16 on 60 mesh; poured dens. 0.60 g/ml; pH 9.8 (1%); 95% act.

**Empiphos STP/MST** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, tech. moisturized  
CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwasher, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing powd.; 90% thru 100 mesh; poured dens. 0.85 g/ml; pH 9.8 (1%); 94% act.

**Empiphos STP/N** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, tech. anhyd.  
CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwasher, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. free-flowing gran.; 60% thru 16 on 60 mesh; poured dens. 0.80 g/ml; pH 9.8 (1%); 95% act.

**Empiphos STP/P** [Albright & Wilson UK]

*Chem. Descrip.:* Pentasodium triphosphate, heavy dens. gran.  
CAS 7758-29-4; EINECS/ELINCS 213-837-7

*Uses:* Water softener; sequestrant; peptizer; deflocculant; dispersant for clay and other mins. and insol. salts; scale inhibitor for CaCO<sub>3</sub> and other scales; corrosion inhibitor of ferrous metal corrosion; used in laundry, dishwasher, and industrial detergents, tile mfg., textile processing, paper mfg., cement mfg.; pigment dispersant in paints; scale/corrosion inhibitor, sequestrant for water treatment

*Properties:* Wh. heavy-dens. gran.; 50% min. > 0.5 mm; poured dens. 1.1

g/ml; pH 9.8 (1%); 95% act.

**Empol® 1004** [Cognis]

*Chem. Descrip.:* Dimer acid, hydrogenated  
CAS 68783-41-5

*Uses:* Surfactant for industrial applics., thermographic resins, hot-melt adhesives, lt.-colored epoxy curing agents and ester derivs. for lubricant applics.; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 2 max. color; sp.gr. 0.940 (25/20 C); visc. 50 poise; acid no. 190 min.; iodine no. 10 max.; sapon. no. 195; pour pt. 5 F; flash pt. 555 F; fire pt. 650 F; 79% dibasic, 5% monobasic, 16% polybasic

**Empol® 1007** [Cognis]

*Chem. Descrip.:* Dilinoleic acid  
CAS 6144-28-1

*Uses:* Surfactant for industrial applics., lubricants; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 5 max. color; acid no. 190 min.

**Empol® 1008** [Cognis/Chems. Group]

*Chem. Descrip.:* Dilinoleic acid  
CAS 6144-28-1

*Uses:* Reactant in high polymers of the polyamide, polyester, and urethane types; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers; polymer grade; exc. oxidation stability, color stability

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 1 max. color; sp.gr. 0.940 (25/20 C); visc. 47 poise; acid no. 194; iodine no. 7; sapon. no. 197; pour pt. 5 F; flash pt. 575 F; fire pt. 630 F; 94% dibasic, 3% polybasic, 3% monobasic

**Empol® 1016** [Cognis/Chems. Group]

*Chem. Descrip.:* Dilinoleic acid  
CAS 6144-28-1

*Uses:* Surfactant for industrial applics., lubricants; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers; offers good control of reactions and little chain-stopping effect in polymer systems

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 6 max. color; sp.gr. 0.945 (25/20 C); visc. 50 poise; acid no. 194; sapon. no. 200; pour pt. 5 F; flash pt. 530 F; fire pt. 600 F; 80% dibasic, 16% polybasic, 4% monobasic

**Empol® 1018** [Cognis/Chems. Group]

*Chem. Descrip.:* Dilinoleic acid  
CAS 6144-28-1

*Uses:* Surfactant for industrial applics., lubricants; in prod. of solid and liq. reactive polyamide resin compositions; for crosslinking polyesters to enhance toughness and flexibility; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 8 max. color; sp.gr. 0.956 (25/20 C); visc. 92 poise; acid no. 192; sapon. no. 200; pour pt. 15 F; flash pt. 530 F; fire pt. 600 F; 79% dibasic, 17% polybasic, 4% monobasic

**Empol® 1020** [Cognis]

*Chem. Descrip.:* Dilinoleic acid  
CAS 6144-28-1

*Uses:* Surfactant for industrial applics., lubricants; used in liq. and solid polyamides and polymers for chain termination; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 7 max. color; sp.gr. 0.949 (25/20 C); visc. 45 poise; acid no. 190; sapon. no. 194; pour pt. 15 F; flash pt. 500 F; fire pt. 545 F; 77% dibasic, 12% monobasic, 11% polybasic

**Empol® 1022** [Cognis/Chems. Group]

*Chem. Descrip.:* Dilinoleic acid

CAS 6144-28-1

*Uses:* Surfactant for industrial applics., lubricants; used for liq. and solid polyamide applics.; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 8 max. color; sp.gr. 0.953 (25/20 C); visc. 75 poise; acid no. 192; sapon. no. 195; pour pt. 15 F; flash pt. 530 F; fire pt. 600 F; 78% dibasic, 15% polybasic, 7% monobasic

**Empol® 1024** [Cognis/Chems. Group]

*Chem. Descrip.:* Dilinoleic acid

CAS 6144-28-1

*Uses:* Defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

**Empol® 1026** [Cognis]

*Chem. Descrip.:* Dilinoleic acid

CAS 6144-28-1

*Uses:* Surfactant for industrial applics., lubricants; used in resin applics. where lt. color is not necessary; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings, paper, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.1210, 177.2420, 178.3910

*Properties:* Gardner 8 max. color; sp.gr. 0.951 (25/20 C); visc. 65 poise; acid no. 191; sapon. no. 195; pour pt. 25 F; flash pt. 555 F; fire pt. 605 F; 82% dibasic, 11% polybasic, 7% monobasic

**Emsorb® 2505** [Cognis/Chems. Group]

*Chem. Descrip.:* Sorbitan stearate

CAS 1338-41-6; EINECS/ELINCS 215-664-9

*Uses:* Coupling agent, emulsifier; coemulsifier for industrial oils, household prods., agric., and cosmetics; textile lubricant; paper and textile processing; hydrophobic

*Regulatory:* EPA exempt

*Properties:* Gardner 4 solid; disp. in butyl stearate, perchloroethylene; insol. in water; HLB 5.2; m.p. 50 C; flash pt. 480 F; 100% conc.; nonionic

**Emulgator E 30** [Rhodia HPCII]

*Chem. Descrip.:* Alkane sulfonate

*Uses:* Surfactant, emulsifier in latex, emulsion PVC, vinyl acetate, acrylic, and S/B systems; surfactant in PVC alone or with primary emulsifiers; antifogging agent; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; APE-free

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400; BGA XIV compliance

*Properties:* Flake; surf. tens. 31.2 dynes/cm; 100% solids

**Emulsan™ LV** [BASF]

*Uses:* Acid boilout cleaning chem. for paper processing

**Emulsan™ MP-24** [BASF]

*Uses:* Acid cleaning agent for colorants in papermaking

**Emulsan™ MR** [BASF]

*Uses:* Felt cleaning chem. for batch and continuous press paper processing

**Emulsifier K 30 40%** [Bayer AG; Bayer/Fiber, Addits., Rubber]

*Chem. Descrip.:* Sodium alkane sulfonates based on n-paraffin

*Uses:* Emulsifier for emulsion polymerization, esp. acrylic acid esters, VC, VA, vinylidene chloride, butadiene, styrene, processing natural and syn. latexes, plastic dispersions; antistat; food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; effective over wide pH range

*Regulatory:* FDA 21CFR §176.170, 176.180, 178.3400

*Properties:* Clear sol'n., virtually odorless; sol. in water; low sol. in alcohols; m.w. 330; visc. 5 mPa·s (25%); HLB 11-12; cloud pt. < 20 C (40%); pH alkaline; surf. tens. 34.9 dynes/cm (0.1%); 40% act.; anionic

*Toxicology:* LD50 (oral, rats) 2 g/kg

*Environmental:* Up to 99% biodeg.

*Storage:* To prevent cloudiness and separation of sol'n. at temps. below 20 C, it should be warmed and homogenized

**Emulsifier K 30 68%** [Bayer/Fiber, Addits., Rubber]

*Chem. Descrip.:* Sodium alkane sulfonates based on n-paraffin

*Uses:* Emulsifier for emulsion polymerization, esp. acrylic acid esters, VC, VA, vinylidene chloride, butadiene, styrene, processing natural and syn. latexes, plastic dispersions; antistat; food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; effective over wide pH range

*Regulatory:* FDA 21CFR §176.170, 176.180, 178.3400

*Properties:* Colorless to ysh. pumpable paste, virtually odorless; sol. in water; low sol. in alcohols; m.w. 330; visc. 5 mPa·s (25%); HLB 11-12; cloud pt. < 20 C (40%); pH alkaline; surf. tens. 34.9 dynes/cm (0.1%); 68% act.; anionic

*Toxicology:* LD50 (oral, rats) 2 g/kg

*Environmental:* Up to 99% biodeg.

*Storage:* Separates on storage; stir before use to homogenize

**Emulsifier K 30 76%** [Bayer/Fiber, Addits., Rubber]

*Chem. Descrip.:* Sodium alkane sulfonates based on n-paraffin

*Uses:* Emulsifier for emulsion polymerization, esp. acrylic acid esters, VC, VA, vinylidene chloride, butadiene, styrene, processing natural and syn. latexes, plastic dispersions; antistat; food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; effective over wide pH range

*Regulatory:* FDA 21CFR §176.170, 176.180, 178.3400

*Properties:* Wh.-ylsh. stiff paste, virtually odorless; sol. in water; low sol. in alcohols; m.w. 330; visc. 5 mPa·s (25%); HLB 11-12; cloud pt. < 20 C (40%); pH alkaline; surf. tens. 34.9 dynes/cm (0.1%); 76% act.; anionic

*Toxicology:* LD50 (oral, rats) 2 g/kg

*Environmental:* Up to 99% biodeg.

**Emulsifier K 30 95%** [Bayer/Fiber, Addits., Rubber]

*Chem. Descrip.:* Sodium alkane sulfonates based on n-paraffin

*Uses:* Emulsifier for emulsion polymerization, esp. acrylic acid esters, VC, VA, vinylidene chloride, butadiene, styrene, processing natural and syn. latexes, plastic dispersions; antistat; food-contact paper/paperboard; emulsifier in mfg. of food-contact articles; effective over wide pH range

*Regulatory:* FDA 21CFR §176.170, 176.180, 178.3400

*Properties:* Wh.-ylsh. flakes, virtually odorless; sol. in water; low sol. in alcohols; m.w. 330; visc. 5 mPa·s (25%); HLB 11-12; cloud pt. < 20 C (40%); pH alkaline; surf. tens. 34.9 dynes/cm (0.1%); 95% act.; anionic

*Toxicology:* LD50 (oral, rats) 2 g/kg

*Environmental:* Up to 99% biodeg.

*Storage:* Hygroscopic; use up completely when opened

**Enathene® EA 720-009** [Equistar]

*Chem. Descrip.:* Ethylene n-butyl acrylate copolymer

CAS 25750-84-9

*Uses:* Resin for extrusion coatings and laminations with oriented PP, PET, papers, clay-coated board and nylon substrates for specialty pkg.; food pkg. adhesives; exc. heat seal response at low temps.; good thermal stability at high processing temps.

*Regulatory:* FDA 21CFR §175.105

*Properties:* Pellets; melt index 6 g/10 min; dens. 0.925 g/cc; m.p. 500-620 F; tens. str. 1300 psi; elong. 900%; soften. pt. (Vicat) 62 C; hardness (Shore D) 34

**Epiol NPG-100** [NOF]

*Chem. Descrip.:* Neopentyl glycol diglycidyl ether

CAS 17557-23-2; EINECS/ELINCS 241-536-7

*Uses:* Reactive diluent for epoxy resin; modifier for fiber, paper, powd.; crosslinking agent; adhesives; paints

**Epiol TMP-100** [NOF]

*Chem. Descrip.:* Trimethylolpropane triglycidyl ether

CAS 30499-70-8

*Uses:* Reactive diluent for epoxy resin; modifier for fiber, paper, powd.; crosslinking agent; adhesives; paints

**Epolene® C-10** [Eastman]

*Chem. Descrip.:* Highly branched, med. m.w. polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax used in hot-melt adhesives and coatings for papers and pkg. materials; paraffin modifiers in slush and cast molding, candles, inks; processing aid for rubber compounding; dispersant for color concs.; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard; nonemulsifiable; low density

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850

*Properties:* Gardner 1 pellet, sl. odor; negligible sol. in water; m.w. 35,000; dens. 0.906 g/cc; visc. 7800 cps (150 C); soften. pt. (R&B) 104 C; acid no. < 0.05; cloud pt. 77 C (2% in 130 F paraffin); flash pt. (COC) 316 C

*Toxicology:* Molten material may produce thermal burns

*Precaution:* Incompat. with oxidizers

**Epolene® C-13** [Eastman]

*Chem. Descrip.:* Highly branched, med. m.w. polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Paraffin wax modifier, e.g., for paper coatings; additive for inks, hot-melt adhesives; base polymer for color concs.; processing aid, mold release agent, dispersant, coupling agent for plastics; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard; designed for use with Epolene waxes or blends containing lower m.w. materials

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850

*Properties:* Gardner 1 pellet; m.w. 76,000; melt index 200 (190 C); dens. 0.913 g/cc; soften. pt. (R&B) 110 C; acid no. < 0.05; cloud pt. 81 C (2%)

*Toxicology:* Molten material may produce thermal burns

#### Epolene® C-14 [Eastman]

*Chem. Descrip.:* Highly branched, med. m.w. polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Paraffin wax modifier, e.g., for paper coatings; additive for inks, hot-melt adhesives; base polymer for color concs.; processing aid, mold release agent, dispersant, coupling agent for plastics; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard; designed for use with Epolene waxes or blends containing lower m.w. materials

*Regulatory:* FDA 21CFR §172.615, 173.20, 175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850, 179.45

*Properties:* Gardner 1 pellet; melt index 1.6 (190 C); m.w. 143,000; dens. 0.918 g/cc; acid no. < 0.05; cloud pt. 84 C

*Toxicology:* Molten material may produce thermal burns

#### Epolene® C-15 [Eastman]

*Chem. Descrip.:* Highly branched, med. m.w. polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax used in hot-melt adhesives and coatings for papers and packaging materials; paraffin modifier in slush and cast molding, candles, inks; processing aid for rubber compounding; dispersant for color concs.; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard; nonemulsifiable; low density

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850

*Properties:* Gardner 1 pellet; m.w. 17,000; dens. 0.906 g/cc; visc. 3900 cps (150 C); soften. pt. (R&B) 102 C; acid no. < 0.05; cloud pt. 75 C

*Toxicology:* Molten material may produce thermal burns

#### Epolene® C-15P [Eastman]

*Chem. Descrip.:* Highly branched, med. m.w. polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax used in hot-melt adhesives and coatings for papers and packaging materials, as paraffin modifiers in slush and cast molding, candles, inks; processing aid for rubber compounding; dispersant for color concs.; nonemulsifiable; low density

*Properties:* Powd.

*Precaution:* Incompat. with oxidizers; powd. material may form explosive dust-air mixts.

#### Epolene® C-16 [Eastman]

*Chem. Descrip.:* Maleated polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* As hot melt coatings for paper (glossy barrier coatings, readily heat sealable to paper prods., metal foils, and plastic films); in paraffin wax coatings and in paraffin-copolymer coatings; compatibilizer; coupling agent for filled polyolefins; wetting/dispersing props. for highly filled compositions; dispersant and processing aid for plastics; food pkg. adhesives, paper/paperboard; nonemulsifiable wax

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Gardner 1 pellet; m.w. 26,000; dens. 0.908 g/cc; visc. 8500 cps (150 C); soften. pt. (R&B) 106 C; sapon. no. 5; cloud pt. 78 C (2% in 130 F paraffin)

#### Epolene® C-17 [Eastman]

*Chem. Descrip.:* Highly branched, med. m.w. polyethylene wax  
CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Paraffin wax modifier, e.g., for paper coatings; additive for inks, hot-melt adhesives; base polymer for color concs.; processing aid, mold release agent, dispersant, coupling agent for plastics; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard; designed for use with Epolene waxes or blends containing

lower m.w. materials

*Regulatory:* FDA 21CFR §172.615, 173.20, 175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850, 179.45

*Properties:* Gardner 1 pellet; m.w. 100,000; melt index 20 (190 C); dens. 0.917 g/cc; acid no. < 0.05; cloud pt. 81 C (2% in 130 F paraffin)

*Toxicology:* Molten material may produce thermal burns

#### Epolene® C-18 [Eastman]

*Chem. Descrip.:* Maleated polyethylene

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* As hot melt coatings for paper (glossy barrier coatings, readily heat sealable to paper prods., metal foils, and plastic films); in paraffin wax coatings and in paraffin-copolymer coatings; adhesion promoter; coupling agent for filled polyolefins; compatibilizer; good wetting and dispersing props. for highly filled compositions; dispersing and processing aid for plastics; food pkg. adhesives, paper; nonemulsifiable; tolerates high levels of inorganic fillers without drastic increases in melt visc.

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Gardner 1 pellet; m.w. 15,000; dens. 0.905 g/cc; visc.: 4000 cps (150 C); sapon. no. 5; soften. pt. (R&B) 102 C

#### Epolene® E-10 [Eastman]

*Chem. Descrip.:* Oxidized low m.w. polyethylene homopolymer resin

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Wax for water-emulsion for floor polishes, imparting excellent slip resistance, toughness, and durability to polish films; finishing agent for cotton and rayon fabrics; textile softener; processing aid, mold release agent, dispersant, coupling agent for plastics; lubricant in clay coatings for paper to reduce dusting during calendaring; emulsifiable

*Properties:* Gardner 2 pellet, odorless; negligible sol. in water; m.w. 3000; sp.gr. 0.942; visc. 800 cps (125 C); soften. pt. (R&B) 106 C; acid no. 15; flash pt. (COC) > 204 C

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg; sl. skin irritant; molten material may produce thermal burns

*Precaution:* Incompat. with oxidizers

#### Epolene® E-15 [Eastman]

*Chem. Descrip.:* Low m.w. oxidized polyethylene homopolymer resin

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Imparts slip resistance to floor polish films; processing aid, mold release agent, dispersant, coupling agent for plastics; lubricant in clay coatings for paper to reduce dusting during calendaring; low density; low soften. pt.; emulsifiable

*Properties:* Gardner 2 pellet; m.w. 4200; dens. 0.925 g/cc; visc. 350 cps (125 C); soften. pt. (R&B) 100 C; acid no. 16

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg; sl. skin irritant; molten material may produce thermal burns

*Precaution:* Incompat. with oxidizers

#### Epolene® E-20 [Eastman]

*Chem. Descrip.:* Low m.w. oxidized polyethylene wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Emulsifier; in high-speed, buffable floor polish; textile lubricant/softener; fruit coating applics.; processing aid, mold release agent, dispersant, coupling agent for plastics; lubricant in clay coatings for paper to reduce dusting during calendaring; offers emulsification props. of a med.-dens. wax

*Properties:* Gardner 2 pellet; m.w. 7500; dens. 0.960 g/cc; visc. 1500 cP (125 C); soften. pt. (R&B) 111 C; acid no. 17

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg; sl. skin irritant; molten material may produce thermal burns

*Precaution:* Incompat. with oxidizers

#### Epolene® N-10 [Eastman]

*Chem. Descrip.:* Low m.w. polyethylene homopolymer resin

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* For paper-coating applics., printing inks; processing aid and pigment dispersant for polyolefin color concs.; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard; nonemulsifiable; easily blended with waxes to improve tens. str., abrasion resistance, and adhesion to fibrous substrates

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850, 179.45

*Properties:* Gardner 1 pellet, odorless; negligible sol. in water; m.w. 10,000; dens. 0.925 g/cc; visc. 1500 cps (125 C); soften. pt. (R&B) 111 C; acid no. < 0.05; cloud pt. 85 C (2% in 130 F paraffin)

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg; molten material will produce thermal burns

*Precaution:* Incompat. with oxidizers

**Epolene® N-10P [Eastman]**

*Chem. Descrip.:* Low m.w. polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* For paper-coating applics., printing inks; processing aid and pigment dispersant for polyolefin color concs.; nonemulsifiable wax; easily blended with waxes to improve tens. str., abrasion resistance, and adhesion to fibrous substrates; powd. version of Epolene N-10

*Properties:* Powd.

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg

*Precaution:* Incompat. with oxidizers; powd. material may form explosive dust-air mixts.

**Epolene® N-11 [Eastman]**

*Chem. Descrip.:* Low m.w. polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Processing aid, mold release agent, lubricant, antiblocking agent for rubber; extrusion and calendaring aid for vinyl; helps mold flow; antitackifier in grn. rubber; solid lubricant in corrugated board mfg.; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850, 179.45

*Properties:* Gardner 1 pellet, odorless; negligbl sol. in water; m.w. 6000; dens. 0.921 g/cc; visc. 350 cps (125 C); soften. pt. (R&B) 108 C; acid no. < 0.05; cloud pt. 79 C (2% in 130 F paraffin)

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg; molten material will produce thermal burns

*Precaution:* Incompat. with oxidizers

**Epolene® N-14 [Eastman]**

*Chem. Descrip.:* Low m.w. polyethylene wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Processing aid, mold release agent, lubricant, antiblocking agent for rubber; extrusion and calendaring aid for vinyl; helps mold flow; antitackifier in grn. rubber; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850, 179.45

*Properties:* Gardner 1 pellets, odorless; negligible sol. in water; m.w. 4000; dens. 0.920 g/cc; visc. 150 cps (125 C); soften. pt. (R&B) 106 C; acid no. < 0.05; cloud pt. 77 C (2% in 130 F paraffin)

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg; molten material will produce thermal burns

*Precaution:* Incompat. with oxidizers

**Epolene® N-20 [Eastman]**

*Chem. Descrip.:* Low m.w. polyethylene homopolymer wax

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax used in cosmetics, hot-melt adhesives; dispersant for color concs., cable filling compositions; slip agent for printing inks; modifier for hot-melt highway marking; processing aid, mold release agent, dispersant for plastics; food pkg. adhesives, coatings, paper, cellophane, rubber; defoamer in food-contact coatings, paper/paperboard; nonemulsifiable; improved resist. to solvs. and oils, and good hardness

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1320, 177.2600, 178.3570, 178.3850, 179.45

*Properties:* Gardner 1 pellets, odorless; negligible sol. in water; m.w. 15,000; dens. 0.930 g/cc; visc. 3725 cps (150 C); soften. pt. (R&B) 119 C; acid no. < 0.05; cloud pt. 86 C

*Toxicology:* LD50 (oral, rat) > 6400 mg/kg, (dermal, rabbit) > 2000 mg/kg; molten material will produce thermal burns

*Precaution:* Incompat. with oxidizers

**EPON® Resin 825 [Shell]**

*Chem. Descrip.:* Bisphenol A-epichlorohydrin epoxy resin

*Uses:* Resin for elec. castings and encapsulation, low-VOC coatings, aerospace and specialty adhesives, specialized tooling; also in blends with high performance multifunctional epoxy resins to reduce visc.; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; produces systems with greater clarity, chem. resist., higher heat distort. temp., and lower elec. conduct.

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2280

*Properties:* Gardner 1 max. liq.; dens. 9.7-9.8 lb/gal (20 C); visc. 50-65 poise; EEW 175-180

*Storage:* May crystallize on standing or in storage; reliquefy by heating to 45-50 C

**EPON® Resin 826 [Shell]**

*Chem. Descrip.:* Epoxy resin (diglycidyl ether of bisphenol A)

*Uses:* Used for laminating binders, castings, encapsulations, functional and decorative flooring, filament winding, patching compds., high-build coatings, fiber-reinforced composites and pipe, tooling and molding compds., construction/elec./aerospace adhesives, grouting compds.; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; for applics. requiring low visc. without visc. reducing modifiers or reactive diluents

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2280

*Properties:* Gardner 2 max. liq.; dens. 9.7 lb/gal; visc. 8500 cps; flash pt. (COC) 243 C; EEW 178-186

**EPON® Resin 828 [Shell]**

*Chem. Descrip.:* Bisphenol A-epichlorohydrin-based epoxy resin without visc. reducing modifiers or reactive diluents

*Uses:* Used in construction/elec./aerospace adhesives, laminating binders, castings, encapsulations, functional and decorative flooring, filament winding, potting compds., grouts, solv.-borne, high-build, or low-VOC maintenance and marine coatings; base resin for epoxy fusion tech.; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; used as sole resin where visc. is not a critical factor

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2280

*Properties:* Gardner 1 max. clear liq.; dens. 9.7 lb/gal; visc. 12,000 cps; vapor pressure 0.03 mm Hg (77 C); flash pt. no flash @ 249 C; ref. index 1.573; EEW 185-192; sp. heat 0.5 cal/gC

*Storage:* Can be stored at 49-60 C for ease of handling

**EPON® Resin 1001F [Shell]**

*Chem. Descrip.:* Bisphenol A-based epoxy resin

*Uses:* Used as the base resin in structural applics. (laminates, filament

winding, transfer molding compds.), surf. coatings (maintenance, marine, wire, powd. coatings), adhesives, and prepreg formulations, elec. encapsulation; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; upgrades thermosetting acrylic resins into coatings with greatly improved adhesion, toughness, and detergent resist.

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2280

**Properties:** Gardner 2 max. flake; negligible sol. in water; dens. 10.2 lb/gal; bulk dens. 36-40 lb/ft<sup>3</sup>; visc. 7-9.6 cps (40% in MEK); vapor pressure negligible; m.p. 73 C; flash pt. (Seta) > 200 F; EEW 525-550

**Storage:** Store below 60 F to avoid or minimize handling problems; sl. prone to blocking or sintering

#### EPON® Resin 1004F [Shell]

**Chem. Descr.:** Bisphenol A-epichlorohydrin-based epoxy resin

**Uses:** Used in adhesives, molding compds., prepreg laminates, wire coatings, powd. coatings, R.T. cure or force-dried chemically resist. coatings, and to prepare epoxy esters used as vehicles in appliance or automotive primers, maintenance coatings; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2280

**Properties:** Gardner 3 max. flakes; negligible sol. in water; dens. 10.2 lb/gal; bulk dens. 36-40 lb/ft<sup>3</sup>; visc. 15-25 cps (40% in MEK); vapor pressure negligible; m.p. 100 C; flash pt. (Seta) > 200 F; EEW 800-950

**Storage:** Store in covered area protected against moisture

#### EPON® Resin 1007F [Shell]

**Chem. Descr.:** Bisphenol A-based epoxy resin

**Uses:** Used in adhesives, molding compds., prepreg laminations, wire coatings, powd. coatings, prod. finishes, baking primers where adhesion, flexibility, and corrosion resist. are required, and to prepare epoxy esters; vehicle in high-performance industrial baking finishes, appliance primers, metal furniture finishes; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2280

**Properties:** Gardner 3 max. flakes; negligible sol. in water; dens. 10.3 lb/gal (20 C); bulk dens. 36-40 lb/ft<sup>3</sup>; visc. 50-100 cps (40% in MEK); vapor pressure negligible; flash pt. (Seta) > 200 F; EEW 1700-2300

**Storage:** Store in covered area protected against moisture

#### EPON® Resin 1009F [Shell]

**Chem. Descr.:** Bisphenol A-based epoxy resin

**Uses:** Vehicle or binder in high-performance industrial baking surf. coatings, appliance primers, metal furniture finishes, wire coatings, powd. coatings; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; produces coatings with high flexibility, adhesion, and resist. to chems. and solvs.

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2280

**Properties:** Pt-Co 200 max. flakes; negligible sol. in water; dens. 1.19 g/ml; bulk dens. 36-40 lb/ft<sup>3</sup>; melt visc. > 500 poise (150 C); vapor pressure negligible; m.p. 130-140 C; flash pt. (Seta) > 200 F; EEW 2300-3800

**Storage:** Store in covered area protected against moisture

#### EPON® Resin 2002-FC-10 [Shell]

**Chem. Descr.:** Bisphenol A-based epoxy resin contg. 10% Modaflow® (flow control, anticratering agent)

**Uses:** Used for powd. coatings and molding; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2280

**Properties:** Flake; dens. 1.19 g/cc; bulk dens. 36.42 lb/ft<sup>3</sup>; EEW 760-875

#### Epotaf® 181 D [BASF AG]

**Chem. Descr.:** Ethylene polymer dispersion

**Uses:** Additive for other dispersions; increases blocking resist. of adhesives; improves slip in paper finishing

#### Epotuf® 3000 [Reichhold]

**Chem. Descr.:** Acrylate ester of bisphenol-A epoxy resin

**Uses:** For lt. industrial/architectural coatings, adhesives for metal, plastic, wood, paper, and paperboard prods.; binder for glass and nonwoven fabrics; dispersion vehicle for pigments in inks; UV/EB curable

**Properties:** Gardner 1 color; sp.gr. 1.16; dens. 9.7 lb/gal; visc. 2500 cps; acid no. 1; 100% solids

#### Epotuf® 3020-20 HDDA [Reichhold]

**Chem. Descr.:** Acrylate ester of bisphenol-A epoxy resin

**Uses:** For lt. industrial/architectural coatings, adhesives for metal, plastic, wood, paper, and paperboard prods.; binder for glass and nonwoven fabrics; disp. vehicle for pigments in inks; UV/EB curable; improved flow and wetting; high gloss; rapid cure

**Properties:** Gardner 1 color; sp.gr. 1.15; dens. 9.6 lb/gal; visc. 12,000 cps (65 C); acid no. 1; 100% solids

#### Epotuf® 3020-25 TPGDA [Reichhold]

**Chem. Descr.:** Acrylate ester of bisphenol-A epoxy resin

**Uses:** For lt. industrial/architectural coatings, adhesives for metal, plastic, wood, paper, and paperboard prods.; binder for glass and nonwoven fabrics; disp. vehicle for pigments in inks; UV/EB-curable; good flow; high gloss; rapid cure

**Properties:** Gardner 1 color; sp.gr. 1.15; dens. 9.6 lb/gal; visc. 13,000 cps (65 C); acid no. 1; 100% solids

**Toxicology:** Low skin irritation

#### Epotuf® 3210 [Reichhold]

**Chem. Descr.:** Acrylate ester of bisphenol-A epoxy resin

**Uses:** For lt. industrial/architectural coatings requiring flexibility, adhesives for metal/plastic/wood/paper and paperboard prods., inks; binder for glass and nonwoven fabrics; UV/EB-curable

**Properties:** Gardner 1 color; sp.gr. 1.16; dens. 9.7 lb/gal; visc. 2500 cps; acid no. 1; 100% solids

#### Epotuf® 3230 [Reichhold]

**Chem. Descr.:** Acrylate ester of bisphenol-A epoxy resin

**Uses:** For lt. industrial/architectural coatings requiring flexibility, adhesives for metal/plastic/wood/paper and paperboard prods., inks; binder for glass and nonwoven fabrics; UV/EB-curable

**Properties:** Gardner 1 color; sp.gr. 1.16; dens. 9.7 lb/gal; visc. 2000 cps; acid no. 1; 100% solids

#### Esacure® EDB [Sartomer]

**Chem. Descr.:** Ethyl 4-(dimethylamino) benzoate

CAS 10287-53-3; EINECS/ELINCS 233-634-3

**Uses:** Free radical initiator for UV curing for use in adhesives, coatings (metal, paper, wood), electronics (solder masks), inks (flexo and gravure, litho, offset, screen); coinitiator; good sol.

**Properties:** Wh. crystals; odorless; m.w. 193; m.p. 63 C; 98% reactive esters

**Storage:** Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F; use within six months

#### Esacure® KB1 [Sartomer]

**Chem. Descr.:** Benzylidimethyl ketal with 100 ppm MEHQ

CAS 24650-42-8; EINECS/ELINCS 246-386-6

**Uses:** Photoinitiator for UV-cured adhesives (pressure sensitive, structural), coatings (metal, optical, paper, plastic, PVC floor, textile, wood), photopolymers, electronics (photoresists, conformal, encapsulants, solder masks), inks (flexo, gravure, litho, offset, screen); optimum absorp. 250-350 nm; fast cure response; good through-cure

**Properties:** Wh. cryst. powd.; faint, characteristic odor; insol. in water; sol. (g/100 ml): 116 g ethyl acetate, 115 g toluene, 113 g styrene, 80 g acetone; m.w. 256; sp.gr. 1.176 (20 C); m.p. 63-66 C

**Storage:** Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F; use within six months

#### Esacure® KIP100F [Sartomer]

**Chem. Descr.:**  $\alpha$ -Hydroxy ketone and 2-hydroxy-2-methyl-1-phenyl 1-propanone

**Uses:** Free radical initiator for photopolymerization of UV curable systems for adhesives, coatings (glass, metal, optical, paper, PVC floor, wood), electronics (conformal, solder masks), inks (flexo and gravure, litho, screen); high reactivity, nonyellowing (cured film), low odor (cured film)

**Properties:** Clear sl. yel. visc. liq.; faint, char. odor; insol. in water; sol. in most common org. solvs., monomers, prepolymers; sp.gr. 1.100 (20 C); visc. 15-30 MPa·s (20 C); flash pt. (PMCC) 110 C

**Storage:** Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F; use within six months

#### Esacure® KT37 [Sartomer]

**Chem. Descr.:** Blend of Esacure TZT (2,4,6-trimethylbenzophenone and 4-methylbenzophenone) and Esacure KIP 100F ( $\alpha$ -hydroxyketone)

**Uses:** Free radical initiator for UV curing for use in adhesives, coatings

(glass, metal, paper, optical, PVC floor, wood), electronics (conformal, solder masks), inks (flexo and gravure, litho, offset, screen); fast cure response

*Properties:* Clear lt. yel. liq.; faint, characteristic odor; insol. in water; sp.gr. 1.070 (20 C); visc. 1.5-3.5 MPa·s (20 C); b.p. 135 C; pour pt. - 5 C; flash pt. (PMCC) 140 C

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F; use within six months

**Esacure® TZT** [Sartomer]

*Chem. Descrip.:* 2,4,6-Trimethylbenzophenone and 4-methylbenzophenone blend

*Uses:* Free radical initiator for UV curing for use in structural adhesives, coatings (glass, metal, paper, plastic, PVC floor, wood), electronics (conformal, encapsulants, photoresists, solder masks), inks (flexo and gravure, litho, offset, screen); high reactivity, highly soluble, low odor and color (cured film), good surf. cure

*Properties:* Colorless to lt. straw clear liq.; very faint, char. odor; pract. insol. in water; completely sol. in most org. solvs., monomers, oligomers, and resins; sp.gr. 1.053 (20 C); visc. 55 MPa·s (20 C); b.p. 310-330 C; pour pt. - 7 C; flash pt. (PMCC) 140 C; ref. index 1.5822

*Storage:* Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F; use within six months

**Escor® AT-310** [Exxon]

*Chem. Descrip.:* Ethylene-methyl acrylate-acrylic acid terpolymer  
CAS 41525-41-1

*Uses:* Impact modifier for engineering thermoplastics; compatibilizer for polar and nonpolar polymers; adhesive film for industrial laminations or bonding elastomers to fabrics and metals; for extrusion coating/laminating; in heat-activated adhesive sealant; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* Melt index 6.0 g/10 min; dens. 0.941 g/cc; m.p. 89 C; acid no. 45; tens. str. 3.3 MPa (yield, 14 MPa (break); tens. elong. > 800% (break); flex. mod. 66 MPa; tens. impact 530 kJ/m<sup>2</sup>; hardness (Shore A) 90; soften. pt. (Vicat) 86 C

**Escor® AT-320** [Exxon]

*Chem. Descrip.:* Ethylene-methyl acrylate-acrylic acid terpolymer  
CAS 41525-41-1

*Uses:* Adhesion modifier for rubber compds., TPOs, adhesive sealants; improves adhesion to metals, syn. yarns, paints; impact modifier for engineering thermoplastics; compatibilizer for dissimilar polymers; extrusion laminates; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* Melt index 5.0 g/10 min; dens. 0.950 g/cc; m.p. 69 C; acid no. 45; tens. str. 12 MPa (yield, 12 MPa (break); tens. elong. > 800% (break); flex. mod. 25 MPa; tens. impact 760 kJ/m<sup>2</sup>; hardness (Shore A) 83; soften. pt. (Vicat) 66 C

**Escor® AT-325** [Exxon]

*Chem. Descrip.:* Ethylene-methyl acrylate-acrylic acid terpolymer  
CAS 41525-41-1

*Uses:* Impact modifier for engineering thermoplastics; compatibilizer for dissimilar polymers; adhesion promoter for molded polyolefin parts; food pkg. adhesives, paper/paperboard; improves toughness, flexibility, adhesion chars.

*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* Melt index 20 g/10 min; dens. 0.950 g/cc; m.p. 67 C; acid no. 45; tens. str. 7.8 MPa (yield, 7.8 MPa (break); tens. elong. > 800% (break); flex. mod. 21 MPa; tens. impact 590 kJ/m<sup>2</sup>; hardness (Shore A) 80; soften. pt. (Vicat) 60 C

**Esi-Cryl™ 316N** [Cook Composites & Polymers]

*Chem. Descrip.:* Wax emulsion based on A-C® 316 (oxidized HDPE homopolymer)

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Used in floor finishes, general coatings, inks, lubricants, textiles, graphic arts, and adhesives; food-contact paper/paperboard; improves slip and abrasion resist. in inks and overprint varnishes

*Regulatory:* FDA 21CFR §176.180

*Properties:* Dens. 8.30 lb/gal; acid no. 16 (of base PE); pH 9-10; hardness < 0.5; 29.5-30.5% solids; nonionic

**Esi-Cryl™ 847** [Cook Composites & Polymers]

*Chem. Descrip.:* Hydrosol emulsion polymer

*Uses:* Grinding and extending vehicle, thickener for flexographic/gravure

inks and coatings for corrugated, paper, board, and newsprint; exc. transfer  
*Use Level:* 2-3% (ink thickeners)

*Properties:* Opaque emulsion; m.w. 97,500; dens. 8.8 lb/gal; visc. < 100 cps; acid no. 123; pH 4.0; 35% solids

**Esi-Cryl™ 865** [Cook Composites & Polymers]

*Chem. Descrip.:* Hydrosol emulsion polymer

*Uses:* Grinding and extending vehicle, thickener for flexographic/gravure inks and coatings for corrugated, paper, board, and newsprint; exc. transfer  
*Use Level:* 2-3% (ink thickeners)

*Properties:* Opaque emulsion; m.w. 70,000; dens. 8.8 lb/gal; visc. < 50 cps; acid no. 115; pH 6.0; 40% solids

**Esi-Cryl™ 1047** [Cook Composites & Polymers]

*Uses:* Thickener for formulation of flexographic inks and coatings for corrugated, paper, board, and newsprint

*Use Level:* 2-3% (ink thickeners)

*Properties:* Liq.; dens. 8.8 lb/gal; visc. 5000 cps; pH 8.8; 20% solids

**Esi-Cryl™ 1055** [Cook Composites & Polymers]

*Chem. Descrip.:* Colloidal sol'n. polymer

*Uses:* Grinding and letdown vehicle, thickener for flexographic/gravure inks and coatings for corrugated, paper, board, and newsprint; exc. adhesion to PE/PP film and foil; nonpinholing; surfactant-free

*Use Level:* 2-3% (ink thickeners)

*Properties:* Translucent liq.; m.w. 32,000; dens. 8.8 lb/gal; visc. 100 cps; acid no. 67; pH 8.3; 30% solids

**Esi-Cryl™ 1056** [Cook Composites & Polymers]

*Chem. Descrip.:* Colloidal sol'n. polymer

*Uses:* Letdown vehicle, TiO<sub>2</sub>/clay/CaCO<sub>3</sub>, dispersant, thickener for flexographic inks and coatings for corrugated, paper, board, and newsprint; exc. adhesion to PE/PP film and foil; nonpinholing; surfactant- and ammonia-free

*Use Level:* 2-3% (ink thickeners)

*Properties:* Translucent liq.; m.w. 32,000; dens. 8.6 lb/gal; visc. 150 cps; acid no. 67; pH 8.3; 30% solids

**Esi-Cryl™ 1065** [Cook Composites & Polymers]

*Uses:* Thickener for formulation of flexographic inks and coatings for corrugated, paper, board, and newsprint

*Use Level:* 2-3% (ink thickeners)

*Properties:* Liq.; dens. 8.6 lb/gal; visc. 2200 cps; pH 9.0; 20.5% solids

**Esi-Cryl™ 1066** [Cook Composites & Polymers]

*Uses:* Thickener for formulation of flexographic inks and coatings for corrugated, paper, board, and newsprint

*Use Level:* 2-3% (ink thickeners)

*Properties:* Liq.; dens. 8.8 lb/gal; visc. 5500 cps; pH 8.7; 20.5% solids

**Esi-Cryl™ 1099** [Cook Composites & Polymers]

*Uses:* Thickener for formulation of flexographic inks and coatings for corrugated, paper, board, and newsprint

*Use Level:* 2-3% (ink thickeners)

*Properties:* Liq.; dens. 8.6 lb/gal; visc. 2000 cps; pH 9.0; 35% solids

**Esi-Rez™ 50** [Cook Composites & Polymers]

*Chem. Descrip.:* Solid acrylic resin

*Uses:* High gloss pigment dispersant, extending resin for water, alcohol, or glycol-based flexo/gravure inks, coatings, and overprint varnishes; grinding of org. pigments; resinous/polymeric food-contact coatings; component of paper/paperboard in contact with aq./fatty/dry foods; high holdout and transfer; exc. printability and resolubility; easy solubilization; high m.w.

*Regulatory:* FDA 21CFR §175.300, 175.320, 176.170, 176.180

*Properties:* Colorless clear bead; m.w. 9500; sp.gr. 1.05; soften. pt. (B&R) 130 C; acid no. 200; > 97% solids, < 3% cosolv.

**Esi-Rez™ 53** [Cognis/Coatings & Inks]

*Chem. Descrip.:* Solid acrylic resin

*Uses:* High gloss extending resin for waterborne flexo/gravure inks, coatings, overprint varnishes; resinous/polymeric food-contact coatings; component of paper/paperboard in contact with aq./fatty/dry foods; exc. pigment wetting, transfer, printability, resolubility; high holdout; easy solubilization

*Regulatory:* FDA 21CFR §175.300, 175.320, 176.170, 176.180

*Properties:* Colorless clear bead; m.w. 5900; sp.gr. 1.05; soften. pt. (B&R) 125 C; acid no. 215; > 97% solids, < 3% cosolv.

**Esi-Rez™ 60** [Cook Composites & Polymers]

*Chem. Descrip.:* Solid acrylic resin

*Uses:* High gloss pigment grinding/extending resin for flexo/gravure inks, coatings, overprint varnishes; food pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; high holdout and transfer; easy solubilization; exc. printability; ultra low VOC

- Regulatory:* FDA 21CFR §175.105, 176.170, 176.180  
*Properties:* Colorless clear bead; m.w. 7800; soften. pt. 162 C; acid no. 245; 100% solids
- Esi-Rez™ 65** [Cook Composites & Polymers]  
*Chem. Descrip.:* Solid acrylic resin  
*Uses:* High gloss extending resin for flexo/gravure inks, coatings, overprint varnishes; food pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; high holdout and transfer; easy solubilization; exc. printability; ultra low VOC  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180  
*Properties:* Colorless clear bead; m.w. 2300; soften. pt. 142 C; acid no. 300; 100% solids
- Estalol®** [Aceto]  
*Chem. Descrip.:* Dibasic ester  
*Uses:* For paper, foundry, electronics, textile industries
- Estane® 5715** [BFGoodrich]  
*Chem. Descrip.:* Polyester-urethane polymer, calcium stearate-dusted  
*Uses:* Used in binders, leather dressing, commercial, paper and foil coatings; thermoplastic polymer; produces hard, flexible, abrasion-resistant coating  
*Properties:* Pale amber granular; readily sol. in MEK; visc. 100-200 cps (20% in MEK); Shore hardness 63D.
- Etadurin 31** [Akzo Nobel]  
*Chem. Descrip.:* Amine copolymer aq. sol'n.  
*Uses:* Wet str. resin for paper mfg.; thermosetting  
*Properties:* 35% solids in water; cationic
- Ethoduomeen® T/20** [Akzo Nobel; Akzo Nobel bv]  
*Chem. Descrip.:* PEG-10 tallow aminopropylamine  
 CAS 61790-85-0  
*Uses:* Emulsifier, dispersant, wetting agent used in coating preparation on paperboard; corrosion inhibitor; also for cosmetics  
*Properties:* Gardner 18 max. liq.; sp.gr. 0.99; f.p. < 25 C; b.p. 150 C; amine no. 144; flash pt. (PMCC) 90 C; surf. tens. 38.2 dynes/cm (0.1%); 95% min. act.; cationic  
*Toxicology:* Severe eye irritant
- Ethylex® 2005, 2015, 2020, 2025, 2035, 2040, 2065, 2075, 2095** [Tate & Lyle N. Am.]  
*Chem. Descrip.:* Hydroxyethylated dent corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Viscosifier, penetrant, film-former for papermaking size press and paper coatings, adhesives, textile warp sizing; improves printing and surf. str. of paper
- Etingal® A** [BASF AG]  
*Chem. Descrip.:* Phosphoric acid ester  
*Uses:* Antifoam for papermaking and paper finishing; defoamer for coating colors; effective in aq. media
- Etingal® L** [BASF AG]  
*Chem. Descrip.:* Ethyl ether deriv. of fatty acid  
*Uses:* Defoamer, deaerator for pigment slurries, coating colors, and surf. sizing preps.; defoamer, stock deaerator in papermaking; long-acting; easy to emulsify; contains no diluent; does not release any volatile components of flammable vapors (below 100 C)  
*Properties:* Liq.; 100% act.
- Etingal® S** [BASF AG]  
*Chem. Descrip.:* Phosphoric acid ester  
*Uses:* Defoamer for papermaking, leather, furs, coating colors; emulsifiable version of Etingal® A
- Etopol 31-L** [Christianson SA de CV]  
*Chem. Descrip.:* Polyoxypropylene (90%), polyoxyethylene (10%) block copolymer  
 CAS 9003-11-6  
*Uses:* Hydrophobic agent for stabilization of w/o emulsions; wetting agent for agric. wettable powds. and in paper applics.; defoamer for antifreeze, gas-treating units, drilling muds, glue, cutting/grinding fluids, and in pulp/paper industry  
*Properties:* APHA 100 max. liq.; polyol char. odor; sol. > 10 g/100 ml of water; m.w. 1100; sp.gr. 1.02; dens. 8.5 lb/gal; visc. 165 cps; vapor pressure < 0.01 mm Hg; m.p. ≈ -30 C; b.p. > 250 C; HLB 4.5; pour pt. -32 C; cloud pt. 37 C (1% aq.); flash pt. > 220 C; surf. tens. 50.4 dynes/cm (0.01% conc.); 0.3% water; nonionic  
*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness  
*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids
- Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide
- Etopol 61-L** [Christianson SA de CV]  
*Chem. Descrip.:* Polyoxypropylene (90%), polyoxyethylene (10%) block copolymer  
 CAS 9003-11-6  
*Uses:* Hydrophobic agent for stabilization of w/o emulsions; defoamer for spray-on bandages and submerged aerobic fermentation processes; defoamer, additive for latex coating colors, sulfite pulp bleaching; pulp drainage agent in paper industry; also used in water treatment, for canning industry during peeling and washing of vegetables and fruits in dilute lye sol'ns., and in food processing, baking, brewing, and bottle washing  
*Properties:* APHA 100 max. liq.; polyol char. odor; sol. < 1 g/100 ml of water; m.w. 2000; sp.gr. 1.01; dens. 8.4 lb/gal; visc. 285 cps; vapor pressure < 0.01 mm Hg; m.p. ≈ -30 C; b.p. > 250 C; HLB 3; pour pt. -29 C; cloud pt. ≈ 24 C (1% aq.); flash pt. (COC) > 230 C; surf. tens. 43.5 dynes/cm (0.01% conc.); 0.3% water; nonionic  
*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness  
*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids
- Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide
- Etopol 62DX-L** [Christianson SA de CV]  
*Chem. Descrip.:* Polyoxypropylene, polyoxyethylene block copolymer  
*Uses:* Visc. control agent in cosmetics (hair bleaches, dyes and tints, hair sets, liq. ointments, emollients or soaps), water treatment; good detergency for textile industry  
*Properties:* APHA 100 max. liq.; sol. > 1 g/100 ml of water; m.w. 2350; sp.gr. 1.04; dens. 8.7 lb/gal; visc. 385 cps; pour pt. -1 C; cloud pt. ≈ 35 C (1% aq.); surf. tens. 46.6 dynes/cm (0.01% conc.); 0.3% water; nonionic  
*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness  
*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids
- Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide
- Etopol 62-L** [Christianson SA de CV]  
*Chem. Descrip.:* Polyoxypropylene (80%), polyoxyethylene (20%) block copolymer  
 CAS 9003-11-6  
*Uses:* Solubilizer for fluorescein, tyrothricin, perfume, iodine, DDT, hexachlorophene, etc.; used in printing industry; as component of crude oil demulsifiers; additive for machine dishwashing detergents, preventing spotting; also for latex coating colors, special paper coating, and for cooking rag stocks in paper industry  
*Properties:* APHA 100 max. liq.; polyol char. odor; sol. > 10 g/100 ml of water; m.w. 2500; sp.gr. 1.03; dens. 8.6 lb/gal; visc. 400 cps; vapor pressure < 0.01 mm Hg; m.p. ≈ -5 C; b.p. > 250 C; HLB 7; pour pt. -4 C; cloud pt. ≈ 32 C (1% aq.); flash pt. (COC) > 240 C; surf. tens. 45.3 dynes/cm (0.01% conc.); 0.3% water; nonionic  
*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness  
*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids
- Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide
- Etopol 62LF-L** [Christianson SA de CV]  
*Chem. Descrip.:* Polyoxypropylene, polyoxyethylene block copolymer  
 CAS 9003-11-6  
*Uses:* Visc. control agent in cosmetics (hair bleaches, dyes and tints, hair sets, liq. ointments, emollients or soaps), water treatment; good detergency for textile industry  
*Properties:* APHA 100 max. liq.; polyol char. odor; sol. > 10 g/100 ml of water; m.w. 2450; sp.gr. 1.03; dens. 8.6 lb/gal; visc. 400 cps; vapor pressure < 0.01 mm Hg; m.p. ≈ -10 C; b.p. > 250 C; pour pt. -10 C; cloud pt. ≈ 28 C (1% aq.); surf. tens. 41.9 dynes/cm (0.01% conc.); 0.3% water; nonionic  
*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness  
*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids

acids

*Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide

**Etopol 63-L** [Christianson SA de CV]

*Chem. Descrip.:* Polyoxypropylene (70%), polyoxyethylene (30%) block copolymer

CAS 9003-11-6

*Uses:* Solubilizer for fluorescein, tyrothricin, perfume, iodine, DDT, hexachlorophene, etc.; used in printing industry; as component of crude oil demulsifiers; additive for machine dishwashing detergents, preventing spotting; also for latex coating colors, special paper coating, and for cooking rag stocks in paper industry

*Properties:* APHA 100 max. liq.; polyol char. odor; sol. > 10 g/100 ml of water; m.w. 2650; sp.gr. 1.04; dens. 8.7 lb/gal; visc. 490 cps; vapor pressure < 0.01 mm Hg; m.p. ≈ 10 C; b.p. > 250 C; HLB 11; pour pt. 10 C; cloud pt. ≈ 34 C (1% aq.); flash pt. (COC) > 200 C; surf. tens. 45.9 dynes/cm (0.01% conc.); 0.3% water; nonionic

*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness

*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids

*Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide

**Etopol 81-L** [Christianson SA de CV]

*Chem. Descrip.:* Polyoxypropylene (90%), polyoxyethylene (10%) block copolymer

CAS 9003-11-6

*Uses:* As component of crude oil demulsifiers; wetting agent and rewetting agent for agric. wettable powds. and in paper applics.; defoamer for spray-on bandages and submerged aerobic fermentation processes

*Properties:* APHA 100 max. liq.; polyol char. odor; sol. < 1 g/100 ml of water; m.w. 2750; sp.gr. 1.02; dens. 8.5 lb/gal; visc. 475 cps; vapor pressure < 0.01 mm Hg; m.p. ≈ -35 C; b.p. > 250 C; HLB 2; pour pt. -37 C; cloud pt. ≈ 20 C (1% aq.); flash pt. (COC) > 200 C; surf. tens. 43.7 dynes/cm (0.01% conc.); 0.3% water; nonionic

*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness

*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids

*Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide

**Etopol 101-L** [Christianson SA de CV]

*Chem. Descrip.:* Polyoxypropylene (90%), polyoxyethylene (10%) block copolymer

CAS 9003-11-6

*Uses:* Hydrophobic agent for stabilization of w/o emulsions; wetting agent for paints, starch, paper, agric., and petroleum processes; defoamer for anti-freeze, gas-treating units, drilling muds, glue, cutting/grinding fluids, and pulp/paper industry; for food canning industry for washing and peeling of vegetables and fruits in dilute lye sol'ns.; also used in food processing, baking, brewing, and bottle washing; safe processing agent for fumaric acid

*Properties:* APHA 100 max. liq.; polyol char. odor; insol. in water; m.w. 3800; sp.gr. 1.02; dens. 8.5 lb/gal; visc. 800 cps; vapor pressure < 0.01 mm Hg (20 C); m.p. ≈ -25 C; HLB 1; hyd. no. 69-73; pour pt. -23 C; cloud pt. 15 C (1% aq.); flash pt. (COC) > 200 C; surf. tens. 34.9 dynes/cm (0.01% conc.); 0.3% water; nonionic

*Toxicology:* Repeated contact with skin can cause dermatitis; eye irritant; ing. of lg. amts. will result in diarrhea and weakness

*Precaution:* Avoid strong oxidants, strong alkali @ high temps., and strong acids

*Hazardous Decomp. Prods.:* Combustion produces carbon monoxide and carbon dioxide

**Everflex® GT** [W.R. Grace]

*Chem. Descrip.:* Polyvinyl acetate latex

CAS 9003-20-7

*Uses:* Emulsion for high solids mastics, caulks, sealants, joint cements, fire-retardant coatings, paper and felt saturation; chemical and mechanical stability; produces highly loaded formulations with rheological chars.; produces films that are clear, transparent, and odorless

*Properties:* Wh. emulsion, sl. char. odor; 1.0 μ particle size; dens. 9.76 lb/gal; visc. 1500-3000 cps; pH 4.0-6.5; 54-56% total solids

**Everflex® MA** [W.R. Grace]

*Chem. Descrip.:* Vinyl acrylic copolymer emulsion

*Uses:* Vehicle for trade sales paints, factory finishes (wood, composition board), and in coatings and impregnation of paper and textiles; colloid-free microparticle size emulsion; chemical and mechanical stability; produces films that are clear, transparent, and odorless

*Properties:* Wh. emulsion, sl. char. odor; 0.1 μ particle size; dens. 9.76 lb/gal; visc. 200-800 cps; pH 4.0-6.5; 50-52% total solids

**EW-POL 7902 NaC 12** [Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* Sodium laurate

CAS 629-25-4; EINECS/ELINCS 211-082-4

*Uses:* Emulsifier for E-PVC mfg.; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170; BGA approved

*Properties:* Liq.; 9.5-10.5% act.

**EW-POL 9110** [Cognis KGaA/Plastics Tech.]

*Chem. Descrip.:* NH<sub>4</sub> oleate

CAS 544-60-5; EINECS/ELINCS 208-873-1

*Uses:* Emulsifier for SB/SBR mfg.; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170

*Properties:* Liq.; 49-50% act.

**EXP-24-LS Silicone Wax Emulsion** [Genesee Polymers]

*Chem. Descrip.:* Silicone wax copolymer aq. emulsion

*Uses:* Release, lubricant, detackifier for rubber industry; release, internal lubricant for plastics; antiblocking for paper, carbon paper, typewriter ribbons; release, water repellent, thread/fiber lubricant for textiles; release, water repellent, antiblocking for printing inks; also for candles, glass bottle molding, aluminum prod., machine shop use; dries to continuous wax film, acts as rust protective coating

*Properties:* Wh. to tan opaque liq., mild odor; disp. in water; sp.gr. 0.98; dens. 8.0 lb/gal; b.p. 212 F; pH 6.0; 13.5% silicone wax, 15% total solids; nonionic

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, silica

*Storage:* Protect from freezing; store below 100 F

**EXP-58 Silicone Wax** [Genesee Polymers]

*Chem. Descrip.:* Silicone wax copolymer

*Uses:* Paintable lubricant, mold release agent and internal lubricant for plastics; release, lubricant, detackifier for rubber; forms dry, colorless film on substrates, providing rust protection; antiblocking agent for paper, printing inks; release, water repellent, thread/fiber lubricant for textiles; also for aluminum prod., glass bottle molding, candles, machine shop use

*Properties:* Wh. hard wax, odorless; sol. in aliphatic hydrocarbons; insol. in water; m.w. 12,000; sp.gr. 0.85; dens. 7.1 lb/gal; m.p. 43 C; b.p. > 200 C; flash pt. (PMCC) > 200 F; 100% act.

*Hazardous Decomp. Prods.:* Hydrocarbon decomp. prods., silica

*Storage:* Indefinite storage stability

**EXP-61 Amine Functional Silicone Wax** [Genesee Polymers]

*Chem. Descrip.:* Stearyl/aminopropyl methicone copolymer

CAS 110720-64-4

*Uses:* Lubricant, water repellent, antiblocking agent, internal processing aid; forms dry, colorless film on substrates providing rust protection, good bonding; lubricant, detackifier for rubber; plastics release; antiblocking for paper; fiber/thread lubricant for textiles; also for printing inks, candles, glass bottle molding, aluminum prod., machine shop use

*Properties:* Wh. waxy solid; m.w. 12,000; sp.gr. 0.88; dens. 7.4 lb/gal; m.p. 44 C; flash pt. > 300 F; 100% act.

**EXP-77 Mercapto Functional Silicone Wax** [Genesee Polymers]

*Chem. Descrip.:* Mercapto functional silicone wax

*Uses:* Lubricant and release agent for molded metal, plastic, and rubber parts; release, lubricant, detackifier, internal processing aid for rubber; water repellent, release, thread/fiber lubricant for textiles; antiblocking for printing inks, paper; also for candles, glass bottle molding, machine shop use, aluminum prod.; good high temp. stability

*Properties:* Wh. waxy soli, sulfur odor; sol. in aliphatic and aromatic hydrocarbons; m.w. 12,000; sp.gr. 0.88; dens. 7.4 lb/gal; m.p. 44 C; flash pt. > 300 F; 100% act.

**Expancel® 091 DE** [Expance]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Unexpanded microspheres as blowing agent in printing inks, PU, PVC plastisols, fabrics, paper; expanded microspheres as ultra-low density fillers for use in engineered prods. in which other fillers would not be suitable, e.g., syn. marble and wood, coatings, sealants, explosives, auto, marine fillers, molding compds., composites, paint and crack fillers, cable

fillings, elastomers

**Expancel® 091 DE 80** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Unexpanded microspheres as blowing agent in printing inks, PU, PVC plastisols, fabrics, paper; expanded microspheres as ultra-low density fillers for use in engineered prods. in which other fillers would not be suitable, e.g., syn. marble and wood, coatings, sealants, explosives, auto, marine fillers, molding compds., composites, paint and crack fillers, cable fillings, elastomers

**Expancel® 091 WU** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Wet, unexpanded microspheres used as blowing agents in PU (footwear, sporting goods), PVC plastisols (automotive undercoatings), printing ink, fabrics, paper and board, nonwovens; exc. solv. resist.

*Properties:* Wh.; 8-11 µm avg. particle size; dens. < 17 kg/m<sup>3</sup>; 65% solids

**Expancel® 461 DE** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Unexpanded microspheres as blowing agent in printing inks, PU, PVC plastisols, fabrics, paper; expanded microspheres as ultra-low density fillers for use in engineered prods. in which other fillers would not be suitable, e.g., syn. marble and wood, coatings, sealants, explosives, auto, marine fillers, molding compds., composites, paint and crack fillers, cable fillings, elastomers

**Expancel® 461 DE 20** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Unexpanded microspheres as blowing agent in printing inks, PU, PVC plastisols, fabrics, paper; expanded microspheres as ultra-low density fillers for use in engineered prods. in which other fillers would not be suitable, e.g., syn. marble and wood, coatings, sealants, explosives, auto, marine fillers, molding compds., composites, paint and crack fillers, cable fillings, elastomers

**Expancel® 551 DE 20** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Unexpanded microspheres as blowing agent in printing inks, PU, PVC plastisols, fabrics, paper; expanded microspheres as ultra-low density fillers for use in engineered prods. in which other fillers would not be suitable, e.g., syn. marble and wood, coatings, sealants, explosives, auto, marine fillers, molding compds., composites, paint and crack fillers, cable fillings, elastomers

**Expancel® 551 WE 20** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Unexpanded microspheres as blowing agent in printing inks, PU, PVC plastisols, fabrics, paper; expanded microspheres as ultra-low density fillers for use in engineered prods. in which other fillers would not be suitable, e.g., syn. marble and wood, coatings, sealants, explosives, auto, marine fillers, molding compds., composites, paint and crack fillers, cable fillings, elastomers

**Expancel® 551 WU** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Wet, unexpanded microspheres used as blowing agents in PU (footwear, sporting goods), PVC plastisols (automotive undercoatings), printing ink, fabrics, paper and board, nonwovens; good solv. resist.

*Properties:* Wh.; 5-8 µm avg. particle size; dens. < 17 kg/m<sup>3</sup>; 65% solids

**Expancel® 642 WU** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Wet, unexpanded microspheres used as blowing agents in PU (footwear, sporting goods), PVC plastisols (automotive undercoatings), printing ink, fabrics, paper and board, nonwovens; good solv. resist.

*Properties:* Wh.; 5-8 µm avg. particle size; dens. < 25 kg/m<sup>3</sup>; 65% solids

**Expancel® 820 DU** [Expancel]

*Chem. Descrip.:* Spherically formed particles with a thermoplastic shell encapsulating a gas

*Uses:* Dry, unexpanded microspheres used as blowing agents in PU (footwear, sporting goods), PVC plastisols (automotive undercoatings), printing

ink, fabrics, paper and board, nonwovens

*Properties:* Wh.; 5-8 µm avg. particle size; dens. < 17 kg/m<sup>3</sup>; > 99% solids  
Custom prod.

**Exxsol® D 40** [Exxon]

*Chem. Descrip.:* Dearomatized aliphatic hydrocarbon

CAS 64742-47-8; EINECS/ELINCS 232-298-5

*Uses:* Solvent for coatings, printing inks, cleaning and degreasing formulations; diluent; food-contact paper/paperboard, rubber articles; cost-effective; no SARA reportables; < 100 ppm HAPs; improved solvency

*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2600, 178.3570, 178.3620(b); SARA nonreportable

*Properties:* Mild pleasant odor; sp.gr. 0.78 (15.6/15.6 C); dens. 6.49 lb/gal (60 F); visc. 1.0 cP; vapor pressure 1.8 mm Hg (20 C); b.p. 159-204 C; flash pt. 38 C; surf. tens. 26 dynes/cm; KB value 34; 42% paraffin, 57% cycloparaffin, 0.4% aromatics

*Toxicology:* OEL 300 ppm

**Exxsol® D 60** [Exxon]

*Chem. Descrip.:* Dearomatized aliphatic hydrocarbon

CAS 64742-47-8; EINECS/ELINCS 232-298-5

*Uses:* Solvent for coatings, printing inks, agrochems., cleaning and degreasing formulations; diluent; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; cost-effective; < 100 ppm HAPs; improved solvency

*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2600, 178.3570, 178.3620(b), 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Mild pleasant odor; sp.gr. 0.79 (15.6 C); dens. 6.59 lb/gal (60 F); visc. 1.2 cP; vapor pressure 1.1 mm Hg (20 C); b.p. 187-210 C; flash pt. 146 F; surf. tens. 27.3 dynes/cm; KB value 32; 49% paraffin, 51% cycloparaffin, 0.4% aromatics

*Toxicology:* OEL 300 ppm

**Exxsol® D 80** [Exxon]

*Chem. Descrip.:* Dearomatized aliphatic hydrocarbon

CAS 64742-47-8; EINECS/ELINCS 232-298-5

*Uses:* Solvent for coatings, cleaners, engine degreasers, agrochems., car dewaxing; diluent; food pkg. paper, rubber articles; defoamer in food-contact paper/paperboard; cost-effective; 50% compliance with criteria for LVP solvent; < 100 ppm HAPs; improved solvency; good solvency for greases

*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2600, 178.3570, 178.3620(b), 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Mild pleasant odor; sp.gr. 0.79 (15.6/15.6 C); dens. 6.65 lb/gal (60 F); visc. 1.7 cP; vapor pressure 0.2 mm Hg (20 C); b.p. 207-234 C; flash pt. 180 F; surf. tens. 27.6 dynes/cm; KB value 28; 53% paraffin, 47% cycloparaffin

*Toxicology:* OEL 300 ppm

**Exxsol® D 110** [Exxon]

*Chem. Descrip.:* Dearomatized aliphatic hydrocarbon

CAS 64742-47-8; EINECS/ELINCS 232-298-5

*Uses:* Solvent for coatings, carburetor cleaners, brake cleaners, degreasers, insecticides; diluent; food pkg. paper, rubber articles; defoamer in food-contact paper/paperboard; cost-effective; complies with criteria for LVP solvent; < 100 ppm HAPs; improved solvency

*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2600, 178.3570, 178.3620(b), 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Mild pleasant odor; m.w. 195; sp.gr. 0.81 (15.6/15.6 C); dens. 6.77 lb/gal (60 F); visc. 2.8 cP; vapor pressure < 0.1 mm Hg (20 C); b.p. 251-269 C; flash pt. 105 C; surf. tens. 28.6 dynes/cm; KB value 26; 59% paraffin, 41% cycloparaffin

*Toxicology:* OEL 300 ppm

**Exxsol® D 130** [Exxon]

*Chem. Descrip.:* Dearomatized aliphatic hydrocarbon

CAS 64742-47-8; EINECS/ELINCS 232-298-5

*Uses:* Solvent for agric. pesticides, architectural coatings, OEM and auto refinish coatings, industrial metal and wood coatings, maintenance and marine coatings, cleaning and degreasing formulations; food pkg. paper, rubber articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2600, 178.3570, 178.3620(b), 40CFR §180.1001(c)(e)

*Properties:* M.w. 200; sp.gr. 0.84 (15.6/15.6 C); dens. 6.97 lb/gal (60 F); vapor pressure < 0.1 mm Hg (20 C); b.p. 276-316 C; flash pt. 129 C; surf. tens. 29.7 dynes/cm; KB value 24

*Toxicology:* OEL 300 ppm

**EZA®** [Albemarle]

*Chem. Descrip.:* Zeolite A, a hydrated sodium aluminosilicate  
CAS 1344-00-9; EINECS/ELINCS 215-684-8

*Uses:* Cryst. molecular sieve which selectively adsorbs molecules and exchange ions; detergent builder; solvent; anticaking agent for detergents

and desiccants; gas separation; wh. pigment in paper, paint, and plastics; also in carpet cleaners, dentifrices, flame retardants

*Properties:* Wh. cryst. powd.; 3  $\mu$  mean particle size; pH 10-12 (1% slurry); 100% act., 18.5% moisture

# F

**Fabrisan™ 1596** [BASF]

*Uses:* Felt cleaning chem. for dryer fabric cleaners in paper processing

**Fabrisan™ LW** [BASF]

*Uses:* Felt cleaning chem. for batch and continuous press paper processing

**Fascat® 9100** [Atofina; Atofina SA]

*Uses:* Esterification, transesterification, and polycondensation catalyst for prep. of polyesters, unsat. polyesters, alkyds; suitable for food and pharmaceutical contact applics., such as coatings, epoxies, hybrid resins; food pkg. adhesives, closures with sealing gaskets for food containers; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 177.1210, 177.2420

*Properties:* Amorphous wh. powd.; insol. in water and org. solvs.; dissolves in acids with reaction; sp.gr. 1.46; bulk dens. 0.84 g/cc; m.p. 300 C (dec.); 57% tin

*Toxicology:* Minimally irritating to eyes and skin

**Fascat® 9102** [Atofina; Atofina SA]

*Uses:* Esterification, transesterification, and polycondensation catalyst for prep. of polyesters, unsat. polyesters, alkyds; suitable for food and pharmaceutical contact applics., such as coatings, epoxies, hybrid resins; food pkg. adhesives, closures with sealing gaskets for food containers; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 177.1210, 177.2420

*Properties:* Pale yel. liq.; sol. in toluene, hydrocarbons, halocarbons, esters, etc.; insol. in water; sp.gr. 1.13; m.p. -18 C; 20% tin

*Toxicology:* May cause eye and skin irritation

**Fascat® 9201** [Atofina; Atofina SA]

*Chem. Descrip.:* Organotin compd.

*Uses:* Esterification, transesterification, and polycondensation catalyst for prep. of polyesters, unsat. polyesters, alkyds; suitable for food and pharmaceutical contact applics., such as coatings, epoxies, hybrid resins; food pkg. adhesives, closures with sealing gaskets for food containers; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 177.1210, 177.2420

*Properties:* Wh. powd.; insol. in water, org. solvs.; will dissolve in acids, alcohols, esters with reaction; sp.gr. 1.62; bulk dens. 0.70 g/cc; m.p. >290 C (dec.); 48% tin

*Toxicology:* Moderately toxic; may cause eye and skin burns on contact

**Fastusol®** [BASF; BASF AG]

*Uses:* Direct dyes for coloring wood-free papers (printing and writing papers, pkg. papers, tissue, specialty papers)

*Properties:* Anionic

**Fastusol® C** [BASF; BASF AG]

*Uses:* Direct dyes for coloring wood-free papers (printing and writing papers, pkg. papers, tissue, specialty papers)

*Properties:* Cationic

**Fastusol® P** [BASF AG]

*Uses:* Pigment disp. for colorations which must meet stringent requirements as to color fastness and for toning of bleached wood pulp

**FC-520** [3M/Perf. Materials]

*Chem. Descrip.:* Trifluoromethanesulfonic acid amine salt and diethylene glycol monoethyl ether

*Uses:* Catalyst for condensation and ring-opening polymerizations; coatings utilizing such resins as epoxides, aminoplasts, phenolics, and acrylics; coatings for wood, paper, and plastic

*Properties:* Lemon-yel. clear liq.; f.p. cryst. at 40 F; misc. in water; sp.gr. 1.2;

dens. 10.0 lb/gal; visc. 13 cps; pH 4.5-6.0; flash pt. (PMCC) > 230 F; 60% sol'n.

**Felt Cleaner P-70155** [Huntsman]

*Chem. Descrip.:* Proprietary (65-80%), sodium hydroxide (3-9.99%)

UN No. 3266

*Uses:* Alkaline felt cleaner and conditioner; fed through shower pipe at 1-2 lb/ton for maintenance cleaning or to clean felt during down time

*Regulatory:* OSHA hazardous; SARA §302/304 extremely hazardous, §311 acute hazard; CERCLA 102(A) reportable

*Properties:* Lt. amber liq.; mild odor; sol. > 10% in water; sp.gr. 1.06; visc. < 20 cSt (40 C); b.p. 100 C; pH 13

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 2 g/kg; corrosive; causes eye and skin burns; severe eye damage may cause blindness; harmful or fatal if swallowed; aspiration hazard if swallowed; can enter lungs and cause damage; TSCA listed

*Precaution:* DOT corrosive liq., basic, inorg., N.O.S.; reacts violently with acids

*Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones

NFPA: Health 3; Flammability 1; Reactivity 0

**FeltECCel™ 905** [IMERYS]

*Uses:* Felt conditioner and cleaner; prevents filling of paper mill felts caused by additives or contaminants; may also be used for off-machine batch washing; removes pitch and sizing, and inorg. deposits (iron, aluminum, calcium, and magnesium compds.)

*Use Level:* 3-5% (batch wash)

*Regulatory:* FDA approved

*Properties:* Clear liq.; dens. 9.7 lbs/gal; flash pt. (TCC) > 200 F; pH 2 (1% sol'n.)

**Feltsan™ Batch HF** [BASF]

*Uses:* Felt cleaning chem. for batch and continuous press paper processing

**Feltsan™ JW** [BASF]

*Uses:* Felt cleaning chem. for dryer fabric cleaners in paper processing

**Fiberex®** [Huber Engineered Materials]

*Uses:* Fiber extender for linerboard; economical

*Properties:* Slurry; 0.05-0.08% 325 mesh residue; sp.gr. 2.60; brightness (TAPPI) 68-73%; ref. index 1.57; pH 9.5-10.8 (28% solids); 36-52% slurry solids

**Fiberfloc™** [Alluvia]

*Chem. Descrip.:* Polymers

*Uses:* Flocculant for water treatment for pulp/paper industry, mining operations, oil field water clarification, drilling fluids, and refinery waste treatment; avail. as oil external emulsions or dry powds.

*Use Level:* 0.5-1.0%

*Regulatory:* FDA compliance

*Properties:* Emulsions: creamy wh. to translucent opaque liq.; sl. hydrocarbon odor; sol. in water; very high m.w.; sp.gr. 1.01-1.12; dens. 8.4-9.3 lb/gal; visc. 750-1500 cps (emulsion, 1% aq. sol'n.); f.p. < 20 F; flash pt. > 200 F; 25-35% act. (emulsions), 95-100% act. (powds.); anionic, cationic, nonionic

*Environmental:* Biodeg.

*Precaution:* Avoid aluminum, brass, galvanized metals, and nat. or syn. rubbers

*Storage:* 6 mos shelf life @ 40-120 F; avoid freezing since reduced temps. inc. prod. visc.

**Fibrox 030-E** [Industrial Fibers]

*Chem. Descrip.:* Shot free mineral wool fiber

*Chem. Analysis:* SiO<sub>2</sub> (38-46%), CaO (20-40%), Al<sub>2</sub>O<sub>3</sub> (6-14%), MgO (5-10%)

*Uses:* Filler, reinforcing agent for bitumen, paper, gaskets, paints, friction prods., plastics, nylon 6.6, PP, phenolics, PBT, BMC, SMC, rubber, coatings, caulks and other applics., incl. high temp. thermal barriers

*Properties:* Off-wh. fibers, low odor; 5-6 μ avg. diam., 6 mm avg. length; negligible sol. in water; dens. 2.7-2.9 g/cc; m.p. ≈ 2200 F; ref. index 1.62-1.64; hardness (Moh) 6.0

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup>; nuisance particulate, may cause transitory skin irritation, possible irritation of eyes, upper respiratory tract

**Fibrox 030-ES** [Industrial Fibers]

*Chem. Descrip.:* Mineral wool fiber, silane coated

*Chem. Analysis:* SiO<sub>2</sub> (38-46%), CaO (20-40%), Al<sub>2</sub>O<sub>3</sub> (6-14%), MgO (5-10%)

*Uses:* Filler, reinforcing agent for bitumen, paper, gaskets, paints, friction prods., plastics, rubber, coatings, caulks and other applics.

*Properties:* Off-wh. fibers, low odor; 5-6 μ avg. diam., 6 mm avg. length; negligible sol. in water; dens. 2.7-2.9 g/cc; m.p. ≈ 2200 F; ref. index 1.62-1.64; hardness (Moh) 6.0

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup>; nuisance particulate, may cause transitory skin irritation, possible irritation of eyes, upper respiratory tract

**Fibrox 300** [Industrial Fibers]

*Chem. Descrip.:* Mineral wool fiber

*Chem. Analysis:* SiO<sub>2</sub> (38-46%), CaO (20-40%), Al<sub>2</sub>O<sub>3</sub> (6-14%), MgO (5-10%)

*Uses:* Filler, reinforcing agent for bitumen, paper, gaskets, paints, friction prods., plastics, rubber, coatings, caulks and other applics. incl. high temp. thermal barriers

*Properties:* Off-wh. fibers, low odor; 5-6 μ avg. diam., 16-19 mm avg. length; negligible sol. in water; dens. 2.7-2.9 g/cc; m.p. ≈ 2200 F; ref. index 1.62-1.64; hardness (Moh) 6.0

*Toxicology:* ACGIH TLV/TWA 10 mg/m<sup>3</sup>; nuisance particulate, may cause transitory skin irritation, possible irritation of eyes, upper respiratory tract

**FireShield® H** [Laurel Ind.]

*Chem. Descrip.:* Antimony trioxide

CAS 1309-64-4; EINECS/ELINCS 215-175-0

*Uses:* Flame-retardant synergist for plastics, rubber, paper and paint; polymerization catalyst for PET resins and fibers; also for electronics, glass, ceramics, petrol. refining, and chem. mfg.; general purpose

*Properties:* Wh. fine cryst. powd., odorless; 1.0-1.8 μ avg. particle size; very sl. sol. in water; dissolves in conc. HCl, sulfuric acid, strong alkalis; m.w. 291.52; sp.gr. 5.3; bulk dens. 60 lb/ft<sup>3</sup>; m.p. 656 C; b.p. 1425 C; ref. index 2.1; pH 3-7 (10% aq.); 99.3-99.9% Sb<sub>2</sub>O<sub>3</sub>

*Toxicology:* LD50 (skin, rabbits) > 2g/kg, (ingestion, rats) > 34.6 g/kg; ACGIH TLV 0.5 mg/m<sup>3</sup> as Sb; moderately irritating to skin and eyes; not significantly toxic by ingestion; TSCA listed

*Storage:* Store in dry, well-ventilated area

**FireShield® HPM** [Laurel Ind.]

*Chem. Descrip.:* Antimony trioxide

CAS 1309-64-4; EINECS/ELINCS 215-175-0

*Uses:* Polymerization catalyst for PET resins and fibers, chem. intermediate, flame retardant synergist for plastics, rubber, paint, paper; suitable for sensitive electronic applics.

*Properties:* Wh. fine cryst. powd., odorless; very sl. sol. in water; dissolves in conc. HCl, sulfuric acid, strong alkalis; m.w. 291.52; sp.gr. 5.3; bulk dens. 60 lb/ft<sup>3</sup>; surf. area 2.5 m<sup>2</sup>/g; m.p. 656 C; b.p. 1425 C; ref. index 2.1; 99.3-99.9% Sb<sub>2</sub>O<sub>3</sub>

*Toxicology:* LD50 (skin, rabbits) > 2g/kg, (ingestion, rats) > 34.6 g/kg; avoid skin or eye contact, inhalation; use only with adequate ventilation

*Storage:* Store in dry, well-ventilated area

**FireShield® L** [Laurel Ind.]

*Chem. Descrip.:* Antimony trioxide

CAS 1309-64-4; EINECS/ELINCS 215-175-0

*Uses:* Flame-retardant synergist for plastics, rubber, paper and paint; polymerization catalyst for PET resins and fibers; also for electronics, glass, ceramics, petrol. refining, and chem. mfg.; general purpose

*Properties:* Wh. fine cryst. powd., odorless; 2.5-3.5 μ avg. particle size; very sl. sol. in water; dissolves in conc. HCl, sulfuric acid, strong alkalis; m.w. 291.52; sp.gr. 5.3; bulk dens. 90 lb/ft<sup>3</sup>; m.p. 656 C; b.p. 1425 C; ref. index 2.1; pH 3-7 (10% aq.); 99.3-99.9% Sb<sub>2</sub>O<sub>3</sub>

*Toxicology:* LD50 (skin, rabbits) > 2g/kg, (ingestion, rats) > 34.6 g/kg; ACGIH TLV 0.5 mg/m<sup>3</sup> as Sb; moderately irritating to skin and eyes; not significantly toxic by ingestion

*Storage:* Store in dry, well-ventilated area

**Firet Q** [NOF]

*Chem. Descrip.:* Coco-alkyl isoquinolinium bromide

*Uses:* Germicide (duckweed killer) for water treatment; germicide for textiles and pulp/paper industries; cosmetics hair rinse; germicide, insecticide in agric.

*Properties:* Brn. liq.; 73-77% act.

**FL 112A** [Process Chems. LLC]

*Uses:* Brownstock defoamer for kraft, sulfite, and semi-chem. pulp washing, for brownstock washing, screenroom, and bleach plant applics.; water-extended; does not contribute to deposit formation; suitable whether batch or continuous generated pulp is employed

*Properties:* Cream-colored visc. liq.; visc. 1050-1950 cps; Hegman 4-6

*Toxicology:* TSCA listed

*Storage:* Store in dry area

**FL 413** [Process Chems. LLC]

*Uses:* Defoamer for kraft mills for use in screenroom, bleach plant applics., waste treatment, and paper machine applics.; water-based; does not contribute to deposit formation

*Properties:* Off-wh. liq.; disp. in water; dens. 8-9 lb/gal; visc. 200-1000 cps

*Toxicology:* TSCA listed

*Storage:* Store in dry area

**FL 1124DD** [Process Chems. LLC]

*Uses:* Defoamer, drainage aid for kraft pulp/paper applics., for brownstock washing, screenroom, bleach plant applics., on the paper machine, and in the effluent; water-based; does not contain EBS, min. oil, or dioxin precursors; does not contribute to deposit formation; suitable whether batch or continuous generated pulp is employed

*Properties:* Opaque wh. liq.; sp.gr. 1.005-1.030; dens. 8.38-8.58 lb/gal; visc. 750-1250 cps; pH 5.5-6.5

*Toxicology:* TSCA listed

*Storage:* Store in dry area

**FL 1124XD** [Process Chems. LLC]

*Uses:* Defoamer, drainage aid for kraft pulp/paper applics., for brownstock washing, screenroom, bleach plant applics., on the paper machine, and in the effluent; water-based; does not contain EBS, min. oil, or dioxin precursors; does not contribute to deposit formation; suitable whether batch or continuous generated pulp is employed

*Properties:* Opaque wh. liq.; sp.gr. 1.005-1.030; dens. 8.38-8.58 lb/gal; visc. 750-1250 cps; pH 5.5-6.5

*Toxicology:* TSCA listed

*Storage:* Store in dry area

**Fleetcol** [Vinings Ind.]

*Uses:* Defoamer for pulp/paper

**Fleetquest 8009** [Vinings Ind.]

*Uses:* Digester additive, chip penetrant promoting improved utilization of pulping chems.; inc. pulp uniformity; reduces the H-factor, K number, alkali charge, and rejects

**Fleetquest 8800** [Vinings Ind.]

*Chem. Descrip.:* Anthraquinone disp.

CAS 84-65-1; EINECS/ELINCS 201-549-0

*Uses:* Digester additive for improving pulp yield and reducing alkali consumption

**Fleetquest QH-37** [Vinings Ind.]

*Chem. Descrip.:* Blend of surfactants and anthraquinone

*Uses:* Digester additive, surfactant catalyst for papermaking; improves pulp yield, str., and uniformity; reduces the K number, the rejects, and the usage rate of pulping chems.

**Flexbond® 149** [Air Prods./Polymers]

*Chem. Descrip.:* Polyvinyl acetate copolymer emulsions

CAS 9003-20-7

*Uses:* Pressure-sensitive emulsion for adhesive prods. suitable for paper, mylar, cellulose acetate, and PVC film substrates

*Properties:* Visc. 200-900 cps; pH 4.5-6.0; 55% min. solids

**Flexbond® 150** [Air Prods./Polymers]

*Chem. Descrip.:* Polyvinyl acetate copolymer emulsions

CAS 9003-20-7

*Uses:* Pressure-sensitive emulsion for adhesive prods. suitable for paper, mylar, cellulose acetate, and PVC film substrates

- Properties:* Visc. 350-850 cps; pH 4.5-6.0; 55% min. solids
- Flexbond® 153** [Air Prods./Polymers]  
*Chem. Descr.:* Polyvinyl acetate copolymer emulsions  
 CAS 9003-20-7  
*Uses:* Pressure-sensitive emulsion for adhesive prods. suitable for paper, mylar, cellulose acetate, PVC film, aluminum, and SS substrates  
*Properties:* Visc. 2000-3000 cps; pH 4.5-5.0; 55% min. solids
- Flexbond® 165** [Air Prods./Polymers]  
*Chem. Descr.:* Polyvinyl acetate copolymer emulsion  
 CAS 9003-20-7  
*Uses:* Pressure-sensitive adhesive emulsion suitable for paper, cloth, film, and metal substrates; high-solids; very high tack, good shear performance chars., exc. water resist.; surfactant protection  
*Properties:* Visc. 4000-9000 cps; pH 3.5-4.0; 68% min. solids
- Flexbond® 185** [Air Prods./Polymers]  
*Uses:* Pressure-sensitive emulsion for adhesive prods. suitable for paper, cloth, film (mylar, cellulose acetate), and metal (Al, SS) substrates; very high shear and exc. heat and aging resist.; surfactant protection  
*Properties:* Visc. 100-600 cps; pH 2.5-3.5; 55% solids
- Flexcryl® 1625** [Air Prods.]  
*Chem. Descr.:* Acrylic emulsion  
*Uses:* Pressure-sensitive emulsion for adhesive applics. suitable for wood, paper, cloth, mylar, cellulose acetate, and PVC film, aluminum, and SS substrates; high-solids; very high tack; good shear performance; exc. water resist.  
*Properties:* Visc. 4000-9000 cps; pH 4-5; 69% solids; anionic
- Flexcryl® 1685** [Air Prods.]  
*Chem. Descr.:* Acrylic emulsion  
*Uses:* Pressure-sensitive emulsion for adhesive applics. suitable for wood, paper, cloth, mylar, cellulose acetate, and PVC film, aluminum, and SS substrates; very high shear; exc. heat and water resist.  
*Properties:* Visc. 100-600 cps; pH 2-3; 55% solids
- Floatsan™ 209** [BASF]  
*Uses:* Flotation deinking surfactant for wood-free and newsprint paper; dispersant-collector for flotation deinking of waste paper  
*Properties:* Nonionic
- Floatsan™ 210** [BASF]  
*Uses:* Flotation deinking surfactant for paper; rec. for systems requiring a reduced level of foam generation
- Floclair® DA-7** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, sludge draining and static conc. of inorg. sludges and process water treatment; combination with low molecular polymers  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lt. dull emulsion; sp.gr. 1.05; visc. med.; pH 6.0 (0.5%); anionic  
*Storage:* 6 mos shelf life in closed package @ 15-20 C; not sensitive to freezing until -10 C
- Floclair® DA-15** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, sludge draining and static conc. of inorg. sludges and process water treatment; combination with low molecular polymers  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lt. dull emulsion; sp.gr. 1.06; visc. med.; pH 6.5 (0.5%); anionic  
*Storage:* 6 mos shelf life in closed package @ 15-20 C; not sensitive to freezing until -10 C
- Floclair® DA-30** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, sludge draining and static conc. of inorg. sludges and process water treatment; combination with low molecular polymers  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lt. dull emulsion; sp.gr. 1.08; visc. med.; pH 7.5 (0.5%); anionic  
*Storage:* 6 mos shelf life in closed package @ 15-20 C; not sensitive to freezing until -10 C
- Floclair® DK-20** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, sludge draining, esp. of static sludge conc.  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Wh. milky emulsion; sp.gr. 1.05 (20 C); visc. med.; pH 4.5 (0.5%); cationic  
*Storage:* 6 mos shelf life in closed package @ 15-20 C
- Floclair® DK-40** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, for dewatering of sludges with high amt. of inorg. contents on centrifuges, belt presses, and chamber filter presses  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Wh. milky emulsion; sp.gr. 1.06 (20 C); visc. med.; pH 4.5 (0.5%); cationic  
*Storage:* 6 mos shelf life in closed package @ 15-20 C
- Floclair® DK-65** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, for dewatering of sludges with high amt. of inorg. contents on centrifuges, belt presses, and chamber filter presses  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lightly dull emulsion; sp.gr. 1.04 (20 C); visc. med.; pH 5 (0.5%); cationic  
*Storage:* 6 mos shelf life in closed package @ 15-20 C; not sensitive to freezing until -10 C
- Floclair® DK-65 H** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, for dewatering of sludges with high amt. of inorg. contents on centrifuges, belt presses, and chamber filter presses  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lightly dull emulsion; sp.gr. 1.05 (20 C); visc. 1000 mPa·s; pH 3 (0.5%); cationic  
*Storage:* 6 mos shelf life in closed package @ 15 C; not sensitive to freezing until -10 C
- Floclair® DK-65 L** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, for dewatering of sludges with high amt. of inorg. contents on centrifuges, belt presses, and chamber filter presses  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lightly dull emulsion; sp.gr. 1.05 (20 C); visc. 1500 mPa·s; pH 3 (0.5%); cationic  
*Storage:* 6 mos shelf life in closed package @ 15 C; not sensitive to freezing until -10 C
- Floclair® DK-65 S** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, for dewatering of sludges with high amt. of inorg. contents on centrifuges, belt presses, and chamber filter presses  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lightly dull emulsion; sp.gr. 1.05 (20 C); visc. 1500 mPa·s; pH 3 (0.5%); cationic  
*Storage:* 6 mos shelf life in closed package @ 15 C; not sensitive to freezing until -10 C
- Floclair® DK-90** [Münzing Chemie GmbH]  
*Chem. Descr.:* High molecular polyacrylamide  
 CAS 9003-05-8  
*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, esp. for flotation and dewatering of sludges with high amt. of inorg. contents on centrifuges, belt presses, and chamber filter presses  
*Use Level:* 0.1-0.5% sol'n.  
*Properties:* Lightly dull emulsion; sp.gr. 1.04 (20 C); visc. med.; pH 4.5 (0.5%); cationic  
*Storage:* 6 mos shelf life in closed package @ 15 C; not sensitive to freezing until -10 C

**Floclair® DMR** [Münzing Chemie GmbH]

*Chem. Descrip.:* Copolymer methacrylate

*Uses:* Flocculant, retention agent, dehydration accelerator, and agent for recovery of fibrous material

*Use Level:* 0.1-0.3%

*Properties:* Brn. clear liq.; very sol. in water; sp.gr. 1.05 (20 C); visc. med.; pH 12; amphoteric

*Storage:* 1 yr shelf life @ 15-20 C; sensitive to freezing

**Floclair® HKL** [Münzing Chemie GmbH]

*Chem. Descrip.:* Dicyandiamide condensation

*Uses:* Flocculant for water processing and industrial wastewater treatment as well as for emulsion splitting and decolorizing; sludge conditioning; flocculation of anionic stable suspensions

*Properties:* Lt. opaque liq.; sp.gr. 1.19 (20 C); visc. low; pH 4.0; cationic

*Storage:* 6 mos shelf life @ 15 C min.; sensitive to freezing

**Floclair® LP 15** [Münzing Chemie GmbH]

*Chem. Descrip.:* Polyquat. amine in water

*Uses:* Flocculant for solid/liq. separation in wastewater field as well as for emulsion splitting; sludge conditioner; flocculant for anionic stable suspensions

*Properties:* Lt. yel. liq.; sp.gr. 1.15 (20 C); visc. 35 mPa·s; pH 8.0 (0.5%); cationic

*Storage:* 6 mos shelf life @ 15 C min.; sensitive to freezing

**Floclair® LP 25** [Münzing Chemie GmbH]

*Chem. Descrip.:* Dicyandiamide condensation

*Uses:* Flocculant for solid/liq. separation in wastewater field as well as for emulsion splitting and decolorizing; sludge conditioner; flocculant for anionic stable suspensions

*Properties:* Lt. opaque liq.; sp.gr. 1.19 (20 C); visc. low; pH 4.0 (0.5%); cationic

*Storage:* 6 mos shelf life @ 15 C min.; sensitive to freezing

**Floclair® PAR** [Münzing Chemie GmbH]

*Chem. Descrip.:* Polyetheramine aq. sol'n.

*Uses:* Flocculant, retention agent, dehydration accelerator, and agent for recovery of fibrous material

*Use Level:* 0.5-0.6%

*Properties:* Yel.-brn. liq.; very good sol. in water; sp.gr. 1.08 (20 C); visc. low; pH 7; cationic

*Storage:* 6 mos shelf life @ 15-20 C min.; sensitive to freezing

**Floclair® VP 3678** [Münzing Chemie GmbH]

*Chem. Descrip.:* High molecular polyacrylamide

CAS 9003-05-8

*Uses:* Flocculant for separation of suspended materials in all fields of water and wastewater treatment, for dewatering of sludges with high amt. of inorg. contents on centrifuges, belt presses, and chamber filter presses

*Use Level:* 0.1-0.5% sol'n.

*Properties:* Lightly dull emulsion; sp.gr. 1.05 (20 C); visc. 1500 mPa·s; pH 4.5 (0.5%); cationic

*Storage:* 6 mos shelf life in closed package @ 15 C; not sensitive to freezing until -10 C

**Fluorad® FX-8** [3M/Perf. Materials]

*Chem. Descrip.:* Perfluorooctanesulfonyl fluoride

CAS 307-35-7; EINECS/ELINCS 206-200-6

*Uses:* Intermediate for prep. of monomers and surfactants for textile treatment, paper sizes, inert fluids

*Properties:* Colorless clear liq.; sol. in 1,1,2-trichlorotrifluoroethane, benzotrifluoride; m.w. 502; dens. 1.81 g/cc; visc. 6 cps; b.p. 154 C; f.p. -18 to -30 C; flash pt. (Seta) > 200 F; ref. index 1.299

**Fluorad® FX-13** [3M/Perf. Materials]

*Chem. Descrip.:* 2-(N-Ethylperfluorooctanesulfonamido) ethyl acrylate

*Uses:* Monomer for polymerization reactions to provide oil and water repellency, lubricity and release to polymers in mfg. textile treating resins, paper sizes, surfactants, and inert fluids

**Foamaster® 111** [Cognis/Chems. Group; Cognis/Coatings & Inks; Cognis KGaA/Coatings]

*Chem. Descrip.:* Petrol. derivs. and other additives

*Uses:* Defoamer for waterborne architectural and industrial coatings (PVAc, acrylics, S/B, PU), monomer stripping/degassing, printing inks, adhesives, latex, food-contact coatings, paper/paperboard; food pkg. adhesives; totally silicone-free, non-phase separating, good persistency; for low surfactant-contg. systems

*Use Level:* 0.2-1.0% on total wt.

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210; SARA §311/312 reportable

*Properties:* Yel. opaque liq.; hydrocarbon odor; readily disp. in aq. systems; sp.gr. 0.90; dens. 7.5 lb/gal; visc. 700 cps; flash pt. (PMCC) > 93 C; pH 6.4 (2%); VOC 5.6% (EPA Method 24); 100% act.

*Toxicology:* May cause mild eye and skin irritation; vapors or mist may cause respiratory irritation; harmful if swallowed or inhaled; ing. may cause GI irritation, nausea, vomiting (aspiration hazard), diarrhea; TSCA listed

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decom. Prods.:* CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if cold; warm to 50 C, mix well

**Foamaster® 333** [Cognis/Coatings & Inks]

*Chem. Descrip.:* Proprietary hydrophobe blend

*Uses:* Defoamer for waterborne architectural coatings, adhesives, food-pkg. adhesives, food-contact paper coatings; totally silicone-free, non-phase separating, high persistency

*Use Level:* 0.2-1.0% on total wt.

*Regulatory:* FDA 21CFR §175.105, 176.200

*Properties:* Yel. opaque liq.; insol. in water; disp. in aq. systems containing surfactants; sp.gr. 0.90; dens. 7.4 lb/gal; visc. 200 cps; VOC 11.1% (EPA Method 24); 100% act.

**Foamaster® 1320** [Cognis]

*Chem. Descrip.:* Petrol. deriv. and other additives

*Uses:* Defoamer for use in monomer stripping and degassing operations, food-contact coatings/paper, SBR, EVAC, and EVCI; food pkg. adhesives, cellophane

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200; SARA §311/312 reportable; BGA approved

*Properties:* Opaque yel. liq.; hydrocarbon odor; disp. in water; sp.gr. 0.95; dens. 7.95 lb/gal; visc. 650 cP; flash pt. (PMCC) > 93 C; pH 6.5 (10%); 100% act.

*Toxicology:* LD50 (oral, rat) 3800 mg/kg; may cause mild skin and eye irritation; vapors or mist may cause respiratory irritation; harmful if swallowed or inhaled; ing. may cause GI irritation, nausea, vomiting (aspiration hazard), diarrhea; TSCA listed

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decom. Prods.:* CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if subject to freezing temps.; store in dry place @ 4-27 C away from direct heat

**Foamaster® A-7** [Cognis/Coatings & Inks]

*Chem. Descrip.:* Proprietary organic

*Uses:* Defoamer for printing inks, waterborne architectural coatings, food-contact paper coatings; food pkg. adhesives; non-plate swelling

*Use Level:* 0.2-1.0% on total wt.

*Regulatory:* FDA 21CFR §175.105, 176.200

*Properties:* Dens. 8.2 lb/gal; visc. 300 cps; VOC 6.0% (EPA Method 24); 100% act.

**Foamaster® AP** [Cognis/Chems. Group; Cognis/Coatings & Inks]

*Chem. Descrip.:* Proprietary blend of oil and silica derivs.

*Uses:* Defoamer for high gloss, waterborne architectural and industrial paints without detracting from gloss; defoamer for adhesives, latex applics., printing inks, food-contact coatings/paper, PVAc, S/B, styrene-acrylics, PVC/PVdC; food pkg. adhesives, cellophane

*Use Level:* 0.2-1.0% on total wt.

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200; SARA §311/312 reportable

*Properties:* Pale yel. opaque liq.; hydrocarbon odor; insol. in water; sp.gr. 0.92; dens. 7.7 lb/gal; visc. 400 cps; flash pt. (PMCC) > 93 C; VOC 2.9% (EPA Method 24); 100% act.

*Toxicology:* May cause mild skin and eye irritation; vapors or mist may cause respiratory irritation; harmful if swallowed or inhaled; ing. may cause GI irritation, nausea, vomiting (aspiration hazard); TSCA listed

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decom. Prods.:* CO<sub>2</sub>, CO, NO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Stratifies @ ambient temps.; mix well

**Foamaster® DS** [Cognis/Coatings & Inks]

*Chem. Descrip.:* Proprietary blend of dimethylpolysiloxane, organics, and silica derivs.

*Uses:* Defoamer for waterborne architectural coatings, printing inks, latex

- applics., food-contact paper coatings; food pkg. adhesives; high silicone, high potency, and improved compatibility  
*Use Level:* 0.1-0.5% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Yel. opaque liq.; water-disp.; sp.gr. 0.91; dens. 7.6 lb/gal; visc. 350 cps; VOC 30.7% (EPA Method 24); 100% act.
- Foamaster® G** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary blend of oils and silica derivs.  
*Uses:* Disp. latex stripping defoamer for waterborne architectural paints, semigloss formulations, food-contact paper coatings; food pkg. adhesives; for low surfactant-contg. systems  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Liq.; insol. in water; sp.gr. 0.91; dens. 7.5 lb/gal; visc. 1200 cps; VOC 4.3% (EPA Method 24); 100% act.
- Foamaster® JMY** [Cognis/Chems. Group; Cognis/Coatings & Inks]  
*Chem. Descrip.:* Petrol. derivs. and other additives  
*Uses:* Defoamer for PVAc, acrylic paint, latex, and adhesive systems, food-contact coatings/paper; food pkg. adhesives, cellophane; effective in animal glues; nonsilicone, oil-based, high compatibility  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200; SARA §311/312 reportable  
*Properties:* Lt. amber liq.; hydrocarbon odor; very water-disp.; forms milky emulsion in water; sp.gr. 0.88; dens. 7.3 lb/gal; visc. 25 cps; f.p. -3.3 C; pH 6.5 (2%); flash pt. (PMCC) > 93 C; VOC 56.5% (EPA Method 24); 100% act.; nonionic  
*Toxicology:* Harmful if swallowed; may cause skin and eye irritation; vapors or mist may cause respiratory irritation; ing. may cause GI irritation, nausea, vomiting (aspiration hazard), diarrhea; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO  
 NFPA: Health 1; Flammability 1; Reactivity 0  
*Storage:* May congeal or stratify if cold; warm to 50 C, mix well
- Foamaster® NS-1** [Cognis/Chems. Group; Cognis/Coatings & Inks; Cognis KGaA/Coatings]  
*Chem. Descrip.:* Petrol. derivs. and other additives  
*Uses:* Defoamer for waterborne architectural paints, printing inks, adhesives, latex applics., monomer stripping and degassing, food-contact coatings/paper; food pkg. adhesives, cellophane, closures with sealing gaskets for food containers; min. oil-based, silicone-free  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200, 177.1210; SARA §311/312 reportable  
*Properties:* Amber liq.; hydrocarbon odor; disp. in water; sp.gr. 0.91; dens. 7.6 lb/gal; visc. 1100 cps; flash pt. (PMCC) > 93 C; pH 7.0 (2%); VOC 29.9% (EPA Method 24); 100% act.  
*Toxicology:* May cause mild skin and eye irritation; vapor or mist may cause respiratory tract irritation; harmful if swallowed or inhaled; ing. may cause GI irritation, nausea, vomiting (aspiration hazard), diarrhea; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO  
 NFPA: Health 1; Flammability 1; Reactivity 0  
*Storage:* Stratifies @ ambient temps., mix well
- Foamaster® O** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary multi-hydrophobe blend  
*Uses:* Defoamer for adhesives, latex, waterborne architectural coatings, printing inks, food-contact paper coatings; food pkg. adhesives  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Disp. in water; sp.gr. 0.90; dens. 7.4 lb/gal; visc. 500 cps; VOC 11.3% (EPA Method 24); 100% act.
- Foamaster® PD-1 Powd.** [Cognis/Coatings & Inks; Cognis KGaA/Coatings]  
*Chem. Descrip.:* Silicone-free org./inorg.  
*Uses:* Defoamer for dry mixes, coatings, adhesives and cement screeds, joint cements, spackles, food-contact paper coatings; food pkg. adhesives  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Powd.; wettable in water; dens. 3.10 lb/gal; 65% act.; nonionic
- Foamaster® PL** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary multi-hydrophobe blend  
*Uses:* Defoamer for coatings which use synthetic rheology modifiers; de-
- foamer for waterborne architectural paints, printing inks, food-contact paper coatings; food pkg. adhesives; broad spectrum  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Dens. 7.1 lb/gal; visc. 1000 cps; VOC 7.4% (EPA Method 24); 100% act.
- Foamaster® R** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary blend of oils and silica derivs.  
*Uses:* Defoamer for grind and letdown used in waterborne architectural paints, semigloss formulations, printing inks, food-contact paper coatings; for food pkg. adhesives; high persistency  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Off-wh. opaque liq.; insol. in water; sp.gr. 0.91; dens. 7.5 lb/gal; VOC 5.1% (EPA Method 24); 100% act.
- Foamaster® RD** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary blend of oils and silica derivs.  
*Uses:* Defoamer for grind and letdown used in waterborne architectural and industrial paints, acrylics, printing inks, food-contact paper coatings; food pkg. adhesives; high persistency  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Off-wh. opaque liq.; dens. 7.5 lb/gal; visc. 700 cps; VOC 5.1% (EPA Method 24); 100% act.
- Foamaster® S** [Cognis/Chems. Group; Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary blend of oil and silica derivs.  
*Uses:* Defoamer for latex, adhesives, waterborne architectural coatings, printing inks, monomer stripping and degassing, food-contact coatings/paper; food pkg. adhesives, cellophane; high compatibility  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210, 177.1200; SARA §311/312 reportable  
*Properties:* Opaque yel. liq.; hydrocarbon odor; disp. in water; sp.gr. 0.91; dens. 7.6 lb/gal; visc. 500 cps; flash pt. (PMCC) > 93 C; VOC 2.8% (EPA Method 24); 100% act.  
*Toxicology:* May cause mild skin and eye irritation; vapors or mist may cause respiratory irritation; harmful if swallowed or inhaled; ing. may cause GI irritation, nausea, vomiting (aspiration hazard), diarrhea; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, NO<sub>x</sub>  
 NFPA: Health 1; Flammability 1; Reactivity 0  
*Storage:* Stratifies @ ambient temps., mix well
- Foamaster® SA-5** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary multi-hydrophobe  
*Uses:* Defoamer for adhesives, latex, waterborne architectural coatings, printing inks, food-contact paper coatings; food pkg. adhesives; high compatibility, cost effective  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Dens. 7.5 lb/gal; visc. 1000 cps; VOC 26.2% (EPA Method 24); 100% act.
- Foamaster® V** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Proprietary blend of oils and silica derivs.  
*Uses:* Defoamer esp. effective in printing inks and PVAL; defoamer for disp. latex stripping, waterborne architectural coatings, adhesives, latex applics., food-contact paper coatings; food pkg. adhesives  
*Use Level:* 0.2-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Liq.; dens. 7.8 lb/gal; visc. 150 cps; VOC 1.5% (EPA Method 24); 100% act.; nonionic
- Foamaster® VC** [Cognis/Chems. Group]  
*Chem. Descrip.:* Low silicone hydrophobic silica  
*Uses:* Defoamer for use in degassing and monomer stripping operations involving syn. latexes, food-contact coatings/paper; food pkg. adhesives  
*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210; SARA §311/312 reportable  
*Properties:* Yel. liq.; hydrocarbon odor; disp. in water; sp.gr. 0.92; dens. 7.7 lb/gal; visc. 550 cps; flash pt. (PMCC) > 93 C; pH 8 (2%); 100% act.  
*Toxicology:* May cause mild skin and eye irritation; vapor or mist may cause respiratory irritation; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 1; Reactivity 0

Storage: May congeal or stratify if cold; warm to 50 C, mix well

**Foamaster® VF** [Cognis/Chems. Group; Cognis/Coatings & Inks]

*Chem. Descrip.:* Proprietary blend of esters, oils, and silica derivs.

*Uses:* Defoamer for waterborne architectural coatings, industrial coatings, latex, adhesives, printing inks, food-contact paper coatings, SBR, EVAC, PVAc, acrylics, S/B, styrene-acrylics, PVC/PVdC; food pkg. adhesives; high compatibility, potency, and color acceptance; good as post-add defoamer

*Use Level:* 0.2-1.0% on total wt.

*Regulatory:* FDA 21CFR §175.105, 176.200; SARA §311/312 reportable

*Properties:* Opaque yel. liq.; hydrocarbon odor; disp. in water; sp.gr. 0.94; dens. 7.7 lb/gal; visc. 300 cps; flash pt. (PMCC) 171 C; pH 6.5 (10%); VOC 10% (EPA Method 24); 100% act.

*Toxicology:* LD50 (oral, rat) > 5.0 g/kg; may cause skin and eye irritation; vapors or mist may cause respiratory tract irritation; TSCA listed

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 1; Reactivity 0

Storage: May congeal or stratify if cold; store in dry place @ 4-27 C away from direct heat

**Foamaster® WBA** [Cognis/Coatings & Inks]

*Chem. Descrip.:* Proprietary multi-hydrophobe blend

*Uses:* Defoamer for adhesives, waterborne industrial coatings, epoxy coatings, latex, acrylics, food-contact paper coatings; food pkg. adhesives

*Use Level:* 0.2-1.0% on total wt.

*Regulatory:* FDA 21CFR §175.105, 176.200

*Properties:* Dens. 7.4 lb/gal; visc. 500 cps; VOC 11.3% (EPA method 24); 100% act., 88.7% solids

**Foam Blast 102** [ROSS Chem]

*Chem. Descrip.:* Polydimethylsiloxane emulsion

CAS 9016-00-6

*Uses:* Defoamer for starch and proteinaceous systems requiring an acid or alkaline tolerant defoamer; defoamer for hot and cold processes, yeast fermentations, sugar beet processing, caustic potato peeling, starch, protein, adhesives, coatings, animal feeds, cutting oils, paper coatings, monomer stripping, aq. inks, latex paints, nonwoven binders, soaps and detergents; food-grade

*Use Level:* 0.01-0.1% based on foaming system; 10-100 ppm (foods)

*Regulatory:* FDA 21CFR §173.340, 100 ppm max.

*Properties:* Wh. emulsion; dens. 8.35 lb/gal; visc. 1500-2500 cps; flash pt. (PMCC) none; pH 7.2; 10% silicone; nonionic

**Foam Blast 106** [ROSS Chem]

*Chem. Descrip.:* Polydimethylsiloxane emulsion

CAS 9016-00-6

*Uses:* Antifoam for water-sol. lubricants and inks, starch coatings, heavy-duty detergents, paper coatings, antifreeze, machine carpet cleaning, drug fermentations, textile scouring/desizing/finishing, waste treatment, adhesives, food-contact coatings/paper; food pkg. adhesives, coatings, paper; effective in hot and cold systems, in wide pH range

*Use Level:* 0.1-0.5%

*Regulatory:* FDA 21CFR §175.105, 175.210, 175.300, 176.170, 176.180, 176.200, 176.210, 178.3120; SARA nonreportable

*Properties:* Milky wh. liq.; mild odor; disp. in water; sp.gr. 1.005-1.015; visc. 3200 cps; m.p. 32 F; b.p. 212 F; flash pt. (PMCC) none; pH 7.6; 10% act.; nonionic

*Toxicology:* May cause mild skin irritation, mild transient eye irritation associated with excess blinking and tearing; not expected to be acutely toxic by ing.; may cause GI discomfort; TSCA listed

*Precaution:* Spills may be slippery

HMS: Health 1; Flammability 0; Reactivity 0

Storage: Store at 60-90 F; exc. freeze/thaw stability; > 1 yr shelf life; prevent freezing

**Foam Blast 240** [ROSS Chem]

*Chem. Descrip.:* Silicone-based

*Uses:* Defoamer for water and waste treatment systems, aeration basins, cooling towers, herbicides/pesticides, mining, cutting oils and drawing compds., starch coatings, plastic recovery, textile prep., dyeing, finishing, water-based inks, coatings, and coolants, soaps and detergents; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, paper

*Use Level:* 0.002-0.20%; 2-20 ppm (treated water); 0.1-0.25% (inks, coatings); 0.25% (soaps, detergents)

*Regulatory:* FDA 21CFR §175.105, 175.210, 176.170, 176.180, 176.200, 176.210

*Properties:* Off-wh. emulsion; dens. 8.20 lb/gal; visc. 1250 cps; flash pt. none; pH 6.9; 18% solids, 10% act.; nonionic

Storage: 1 yr shelf life; store in heated area to prevent freezing; if frozen, thaw and stir to insure uniformity

**Foam Blast 433C** [ROSS Chem]

*Chem. Descrip.:* Blend of petrol. derivs., fatty esters, and proprietary additives

*Uses:* Effluent system defoamer for foam control in textile, paper, and municipal effluent systems in aeration ponds, flumes, and at river outfall; paper machine defoamer esp. for recycled fiber furnish; foam control agent for coatings based on starch, casein, and waxes; general purpose; exc. dispersing props.

*Use Level:* 2-20 ppm

*Regulatory:* SARA nonreportable

*Properties:* Amber opaque liq.; mild odor; readily disp. in water; sp.gr. 0.892; dens. 7.4 lb/gal; visc. 975 cps; vapor pressure < 20 mm Hg (20 C); pour pt. 38 F; b.p. 450-600 F; flash pt. (PMCC) 85 F; pH 5 (1% aq.); VOC 200 g/l; 100% org.; nonionic

*Toxicology:* May cause mild skin irritation, mild transient eye irritation; not expected to be acutely toxic by ingestion; TSCA listed

HMS: Health 2; Flammability 3; Reactivity 1

Storage: Good shelf life; can be stored outside; if prod. freezes, thaw and mix; may stratify during prolonged storage; mix before using

**Foam Blast 433FW** [ROSS Chem]

*Uses:* Effluent system defoamer for foam control in textile, paper, and municipal effluent systems in aeration ponds, flumes, and at river outfall; paper machine defoamer esp. for recycled fiber furnish; foam control agent in coatings based on starch, casein, and waxes; defoamer in food-contact coatings/paper; general purpose; exc. dispersing props.

*Use Level:* 2-20 ppm

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200

*Properties:* Lt. tan liq.; readily disp. in water; sp.gr. 0.845; dens. 7.0 lb/gal; visc. 750 cps; pour pt. 38 F; flash pt. (PMCC) 245 F; 100% org.; nonionic

Storage: Good shelf life; can be stored outside; if prod. freezes, thaw and mix; may stratify during prolonged storage; mix before using

**Foam Blast 441** [ROSS Chem]

*Chem. Descrip.:* Organic

*Uses:* Defoamer/antifoam; effective syn. paper machine defoamer; defoamer in food-contact coatings, paper/paperboard; food pkg. adhesives, coatings; contains no min. oils; high act. and low contamination potential where chem. deposits are a problem

*Use Level:* 0.5-2.0 lb/ton of air dried paper

*Regulatory:* FDA 21CFR §175.105, 175.210, 175.300, 176.170, 176.180, 176.200, 176.210; SARA nonreportable

*Properties:* Med. to dk. amber clear to hazy liq.; mild odor; disp. in water; sp.gr. 0.943; dens. 7.86 lb/gal; visc. 80 cps; pour pt. 35 F; f.p. 31 F; i.b.p. 500 F; flash pt. (PMCC) > 350 F; pH 6.5 (2%); 100% org.; nonionic

*Toxicology:* LD50 (oral) > 30 g/kg; not expected to be toxic by ingestion; may cause mild skin irritation, mild transient eye irritation; TSCA listed

*Precaution:* Will ignite if exposed to ignition source at or above its flash pt.; avoid strong oxidizing agents; spills may be slippery

HMS: Health 0; Flammability 1; Reactivity 0

Storage: 1 yr shelf life; can be stored inside or outside; if prod. freezes, thaw and mix before use; mixing rec. after prolonged storage

**Foam Blast 443** [ROSS Chem]

*Uses:* Defoamer for effluent systems and systems with high levels of protein, starch, polysaccharides, syn. sol. polymers; defoamer for textile, paper, and municipal effluent systems in aeration ponds, flumes, and at river outfall; defoamer for food-contact adhesives, coatings, paperboard; good cold props.

*Use Level:* 2-20 ppm

*Regulatory:* FDA 21CFR §175.105, 175.210, 176.170, 176.180, 176.200, 176.210

*Properties:* Amber opaque liq.; emulsifiable; sp.gr. 0.970; dens. 8.08 lb/gal; visc. 200 cps; pour pt. -15 F; flash pt. (PMCC) 320 F; 100% org.; nonionic

Storage: Good shelf life; can be stored outside; may stratify on prolonged storage; mix before use

**Foam Blast 445** [ROSS Chem]

*Uses:* Paper machine defoamer; defoamer for food-contact adhesives, coatings, paper; syn.

*Regulatory:* FDA 21CFR §175.105, 175.210, 175.300, 176.170, 176.200,

178.3120

*Properties:* Amber opaque liq.; disp. in water; sp.gr. 0.950; dens. 7.92 lb/gal; visc. 1500 cps; pour pt. 35 F; flash pt. (PMCC) > 350 F; pH 6.5 (2%); 100% act.; nonionic

*Toxicology:* Nontoxic; does not normally cause skin irritation; may cause transient eye irritation

*Storage:* Good shelf life; can be stored inside or outside; if prod. freezes, thaw and mix before use; mixing rec. after prolonged storage

**Foam Blast 448** [ROSS Chem]

*Chem. Descrip.:* Blend of org. derivs. and proprietary additives

*Uses:* Paper machine or effluent defoamer; defoamer for food-contact adhesives, coatings, paper; high act. and low contamination potential where chem. deposits are a problem; no liq. hydrocarbons; incapable of forming a rainbow on surf. of water

*Use Level:* 0.5-4.0 lb/ton (paper); 3-15 ppm (effluent)

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 178.3120; SARA nonreportable

*Properties:* Wh. opaque liq.; mild odor; disp. in water; sp.gr. 0.998; dens. 8.32 lb/gal; visc. 500 cps; vapor pressure 24 mm Hg (20 C); f.p. 31 F; b.p. 212 F; flash pt. none; pH 6.0-6.5; VOC 4 g/l; 86-88% volatiles; nonionic

*Toxicology:* OSHA PEL 5 mg/m<sup>3</sup> (mist); may cause mild skin irritation, mild transient eye irritation; not expected to be toxic by ingestion; TSCA listed

*Precaution:* Spills may be slippery

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Protect from freezing; if prod. freezes, thaw and mix before use

**Foam Blast 469** [ROSS Chem]

*Chem. Descrip.:* Blend of petroleum derivs. and proprietary additives

*Uses:* Paper machine or effluent defoamer; esp. effective in systems contg. cooked or modified starches; defoamer for food-contact adhesives, coatings, paper; high act. with low contamination potential (low total BOD)

*Use Level:* 0.5-4.0 lb/ton (paper)

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.200, 178.3120; SARA nonreportable

*Properties:* Wh. opaque liq.; mild odor; disp. in water; sp.gr. 0.996; dens. 8.30 lb/gal; visc. 50 cps; vapor pressure 18 mm Hg (20 C); f.p. 31 F; i.b.p. 212 F; flash pt. none; pH 6.5-7.5 (1% aq.); VOC < 20 g/l; 74-76% volatiles; nonionic

*Toxicology:* OSHA PEL 5 mg/m<sup>3</sup> (mist); LD50 (oral) > 30 g/kg; not expected to be toxic by ingestion; may cause mild skin irritation, mild transient eye irritation; TSCA listed

*Precaution:* Spills may be slippery

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Protect from freezing; if prod. should freeze, thaw and mix before use

**Foam Blast 476** [ROSS Chem]

*Chem. Descrip.:* Alkoxyate of fatty esters

*Uses:* Effluent system defoamer for foam control in industrial and municipal effluent systems in aeration ponds, flumes, and at river outfall; defoamer for adhesives, food-contact coatings/paper; general purpose; exc. dispersing props.

*Use Level:* 2-20 ppm

*Regulatory:* FDA 21CFR §176.170, 176.180, 176.200, 176.210; SARA non-reportable

*Properties:* Lt. amber clear liq.; mild fatty odor; disp. in water; sp.gr. 0.965; dens. 8.0 lb/gal; visc. 150 cps; vapor pressure < 1 mm Hg (20 C); pour pt. < -5 F; flash pt. (PMCC) > 350 F; VOC 1 g/l; 100% org., < 1% volatiles by vol.; nonionic

*Toxicology:* May cause mild skin irritation, mild transient eye irritation; not expected to be toxic by ingestion; may cause transient vomiting and/or diarrhea; TSCA listed

*Precaution:* Will ignite if exposed to ignition source while at or above its flash pt.; spills may be slippery

HMIS: Health 1; Flammability 1; Reactivity 0

*Storage:* Good shelf life; no separation on prolonged storage; can be stored outside in unheated areas; remains fluid and pumpable down to -10 F; sl. haze may develop below 0 F

**FoamBrake™ 1697** [BASF]

*Chem. Descrip.:* Conc. polymeric surfactant

*Uses:* Defoamer for wet-end, size press, coating applics., alkaline paper machine systems; provides foam control at significantly lower dose rates than many conventional water-based defoamers, without the negative impact of oil

**FoamBrake™ JF-2** [BASF]

*Chem. Descrip.:* Aq. emulsion

*Uses:* Defoamer for wet-end applics., pulp mill screen rooms, and waste treatment plants; stable; functions at broad pH and temp. range

*Properties:* Liq.

*Storage:* Protect from freezing

**FoamBrake™ SW-54 M 50** [BASF]

*Chem. Descrip.:* Water-based

*Uses:* Defoamer for deinking, effluent treatment, pulp mill screen rooms, wastewater treatment; stable; functions over broad pH and temp. range

*Properties:* Liq.

*Storage:* Protect from freezing

**FoamBrake™ WB-40** [BASF]

*Chem. Descrip.:* Aq. emulsion

*Uses:* Defoamer for wet-end applics., sec. fiber processing, pulp mill screen rooms, and waste treatment plants; easy to use; functions at broad pH and temp. range

*Storage:* Protect from freezing

**Foambreaker** [United-Guardian]

*Chem. Descrip.:* Dimethicone, 2-ethyl-1-hexanol, octoxynol-9, and carbomer

*Uses:* Antifoam for use in cleaning metals prior to coating or plating; defoamer for latex, papermaking, textile processing, detergent mfg., and in sol. cutting oils

*Regulatory:* DOT nonregulated

*Properties:* Wh. to off-wh. pourable cream; sl. odor; somewhat sol. in ethyl alcohol; very sl. sol. in aromatic and aliphatic solvs., petroleum oils, and vegetable oils; disp. in water; sp.gr. 0.989; visc. 4150 cps; flash pt. (OC) > 400 F; pH 7.0; 98.5% solids

*Toxicology:* May irritate respiratory tract, eyes and skin; harmful if ing.

*Precaution:* Incompat. with strong oxidizers

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, NO<sub>x</sub>

HMIS: Health 2; Flammability 0; Reactivity 0

*Storage:* Avoid freezing temps.

**Foamgard® 1332** [Rhodia]

*Chem. Descrip.:* Nonionic surfactants-based

*Uses:* Foam suppressant and defoamer for aq. and semiaq. systems, for laundry detergents, industrial cleaners, paper/pulp systems, metalworking fluids, resin emulsification, wastewater treatment, circuit board cleaning; solv. and silicone-free for lower VOC

*Properties:* Gardner < 1 clear to hazy liq.; insol. in water; sp.gr. 0.95; neutral. no. 0.4 mg KOH/g; flash pt. 315 F; pH ≈ 7 (5%); 100% act.

**Foamkill® 400A** [Crucible]

*Chem. Descrip.:* Organo-silicone emulsion

*Uses:* Defoamer for pulp/paper applics. incl. adhesives backings, latex paints and coatings, water-reducible inks, floor and ceiling coatings

**Foamkill® 608** [Crucible]

*Chem. Descrip.:* Nonsilicone

*Uses:* Defoamer for paper coatings and adhesives and formulations sensitive to fish-eyeing, janitorial supply houses; readily emulsifiable

*Use Level:* 0.5-1.0%

**Foamkill® 618** [Crucible]

*Chem. Descrip.:* Org. and organo-silicone conc.

*Uses:* Defoamer for food/pharmaceutical applics. incl. paper coatings and adhesives in contact with food

*Regulatory:* FDA §175.105, 176.210, 178.3120

*Properties:* Pale yel.; hydrocarbon odor; disp. in water; sp.gr. 0.930; visc. 1000 cps; flash pt. (TOC) 250 F; 100% act.; nonionic

*Storage:* 1 yr min. shelf stability

**Foamkill® 639** [Crucible]

*Chem. Descrip.:* Nonsilicone

*Uses:* Defoamer for aq. systems, pulp/paper applics., acrylic, PVC, PVA, PVPC, and other coatings, paints, inks, antifoam formulating

*Use Level:* 0.5-1.0%

**Foamkill® 639J-F** [Crucible]

*Chem. Descrip.:* Organo-silicone

*Uses:* Defoamer for latex monomer stripping formulations, food and cosmetic applics., warm starch and protein systems, soya slurries, sugar beet refining, caustic potato peeling, yeast fermentations, canning, paper coatings; alkaline and acid-stable

*Use Level:* 333 ppm max.

*Regulatory:* FDA §172.340, 172.315

*Properties:* Wh. semitransparent liq., bland odor; disp. in water; sp.gr. 0.895;

- dens. 7.45 lb/gal; b.p. 390 F; flash pt. (TOC) 160 F; pH 6.6 (2%); 100% act.; nonionic  
*Toxicology:* Skin and eye irritant; may cause harmful effects on ingestion
- Foamkill® 649** [Crucible]  
*Chem. Descrip.:* Nonsilicone  
*Uses:* Defoamer for aq. systems, adhesives, coatings, esp. acrylic systems, paints, inks, drawing and cutting fluids, paper applics.; highly compat.; very little tendency to cause fish-eyeing  
*Use Level:* 0.5-1.0%
- Foamkill® 660F** [Crucible]  
*Chem. Descrip.:* Org.  
*Uses:* Defoamer for pulp/paper applics., water cooling towers, evaporators
- Foamkill® 679** [Crucible]  
*Chem. Descrip.:* Organo-silicone emulsion  
*Uses:* Defoamer for pulp/paper applics. incl. adhesives backings, latex paints and coatings, water-reducible inks, floor and ceiling coatings
- Foamkill® 810F** [Crucible]  
*Chem. Descrip.:* Dimethicone emulsion  
 CAS 9006-65-9  
*Uses:* Defoamer for food/pharmaceutical/cosmetic applics. incl. general aq. systems, paper coatings and adhesives in contact with food, egg washing, cleaning/sanitizing sol'ns., pulp/paper applics., soft drink and wine making, vegetable processing, yeast processing, jam/jellies, starch sol'ns., protein processing, water-based inks, detergents  
*Use Level:* 100 ppm max.  
*Regulatory:* FDA §173.340, 175.105, 175.320, 176.200, 176.210  
*Properties:* Wh. pourable visc. liq., bland odor; disp. in water; sp.gr. 1.000; dens. 8.3 lb/gal; visc. 300 cps; b.p. 212 F; flash pt. (TOC) > 212 F; pH 7.0; 10% act.; nonionic  
*Toxicology:* May cause eye irritation, mild skin irritation on prolonged/repeated contact
- Foamkill® 830** [Crucible]  
*Chem. Descrip.:* Organo-silicone emulsion  
*Uses:* Defoamer for food/pharmaceutical applics. incl. paper coatings and adhesives in contact with food, cosmetics, pulp/paper applics.  
*Use Level:* 0.1-0.4%  
*Properties:* Emulsion; very small particle size
- Foamkill® 830F** [Crucible]  
*Chem. Descrip.:* Dimethicone  
 CAS 9006-65-9  
*Uses:* Defoamer for food/pharmaceutical/cosmetic applics. incl. general aq. systems, paper coatings and adhesives in contact with food, soft drink mfg., cleaning/sanitizing sol'ns., cosmetics, fermentation, bottle filling operations, vegetable washing, sugar beet processing, jams/jellies, coatings, starch and protein processing  
*Use Level:* To 33 ppm  
*Regulatory:* FDA §172.340, 173.340, 175.105, 175.300, 176.200, 176.210  
*Properties:* Wh. pourable visc. liq., bland odor; disp. in water; sp.gr. 0.993; dens. 8.3 lb/gal; visc. 3500 cps; b.p. 212 F; flash pt. (TOC) > 212 F; pH 7.0; 30% act.; nonionic  
*Toxicology:* May cause eye irritation, mild skin irritation on prolonged/repeated contact  
*Hazardous Decomp. Prods.:* Produces SiO<sub>2</sub> upon burning  
*Storage:* Avoid freezing
- Foamkill® 836A** [Crucible]  
*Chem. Descrip.:* Silicone emulsions  
*Uses:* Defoamer for food/pharmaceutical applics. incl. paper coatings and adhesives in contact with food, cosmetics, antifreeze, water-based inks, leather finishing, industrial detergents, cutting oils  
*Regulatory:* FDA §175.105, 175.300, 176.200, 176.210  
*Properties:* Wh. pourable viscous liq.; sp.gr. 1.00; visc. 3000 cps; pH 8.0; nonionic
- Foamkill® 836B** [Crucible]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Defoamer for chemical compounding, syn. or water-based metalworking lubricants, aq. systems, inks, janitorial applics., paints, coatings, paper industry, waste treatment, severe foaming applics.; highly compat.; dilutable with water
- Foamkill® 852** [Crucible]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Defoamer for pulp/paper applics., inks, and other applics.; rec. where foaming is a serious problem

- Foamkill® CMP** [Crucible]  
*Chem. Descrip.:* Bis-stearamide  
*Uses:* Defoamer for paper reclaiming, caustic treatment, waste treatment, textile jet or atmospheric dyeing  
*Use Level:* 0.1-1.0%  
*Properties:* Nonionic
- Foamkill® D-1** [Crucible]  
*Chem. Descrip.:* Org. nonsilicone conc.  
*Uses:* Defoamer for textiles or pulp  
*Properties:* Dilutable with min. oil
- Foamkill® MS-1** [Crucible]  
*Chem. Descrip.:* Organo-silicone emulsion  
*Uses:* Defoamer for pulp/paper applics. incl. adhesives backings, latex paints and coatings, water-reducible inks, floor and ceiling coatings; flow control agent
- Foamkill® MSF Conc.** [Crucible]  
*Chem. Descrip.:* Organo-silicone  
*Uses:* Conc. for formulating defoamers for wide variety of high and low temp. applics., esp. food applics. (fruit and veg. washing, egg washing, soft drinks, wine making, yeast processing, jam/jellies, sugar refining), water-based inks and coatings, detergents, rendering of oils and fats, cosmetics, starch sol'ns., adhesives; defoamer in food-contact coatings, paper/paper-board; food pkg. adhesives, coatings  
*Use Level:* 66 ppm max.  
*Regulatory:* FDA §173.340, 175.105, 175.300, 176.200, 176.210  
*Properties:* Wh. visc. liq., mild pleasant odor; readily disp. in water; sp.gr. 1.084; dens. 9.02 lb/gal; visc. 20,000 cps; b.p. 212 F; flash pt. > 212 F; pH 9.02 (1%); 15% dimethylpolysiloxane; nonionic  
*Toxicology:* May cause eye irritation, mild skin irritation on prolonged/repeated skin contact
- Foamkill® NSP-1, NSP-3, NSP-4, NSP-5** [Crucible]  
*Chem. Descrip.:* Org.  
*Uses:* Defoamer for pulp/paper applics.
- Foamlex 372** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Higher alcohol derivatives  
*Uses:* Defoamer for papermaking, when applied to pulp, wood free papers, liner, or Japanese paper  
*Properties:* Milky wh. emulsion; pH 7.5; nonionic
- Foamlex 400** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Fatty acid ester  
*Uses:* Defoamer for papermaking, esp. wood free papers and thin papers  
*Properties:* Milky wh. emulsion; pH 6.0 (5%); nonionic
- Foamlex 711** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Defoamer for papermaking and wastewaters; dispersive type; demonstrates stable defoaming effects under wide range of pH and at mid and low temps.  
*Properties:* Colorless transparent liq.; pH 5.5 (5%); nonionic
- Foamlex 747** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Defoamer for papermaking; self-emulsifying type; superior defoaming and foam-suppressing effects obtained at low add-on levels  
*Properties:* Straw-colored limpid visc. liq.; pH 4.0 (5%); nonionic
- Foamlex 760** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Defoamer for papermaking, esp. for use in thin papers such as tissues and toilet rolls; self-emulsifying type; exc. defoaming and foam-suppressing effects obtained at low add-on levels  
*Properties:* Straw-colored transparent liq.; pH 7.0 (5%); nonionic
- Foamlex 770** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Defoamer for papermaking, esp. for use in thin papers such as tissues and toilet rolls; self-emulsifying type; exc. defoaming and foam-suppressing effects obtained at low add-on levels, while effects on sizing remain low  
*Properties:* Straw-colored opaque liq.; pH 7.5 (5%); nonionic
- Foamlex 797** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Defoamer for papermaking; self-emulsifying type; superior defoaming and foam-suppressing effects are obtained at low add-on levels  
*Properties:* Straw-colored transparent liq.; pH 4.0 (5%); nonionic
- Foamlex E-585K** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Silicone compd., refined oil, activator, and water mixt.

- Uses:* Defoamer for papermaking; outstanding performance in high temps., strong alkali environments at low add-on levels; does not contain substances which may generate pitch or hazardous materials like dioxins  
*Properties:* Wh. emulsion; pH 7.0
- Foamlex W-315** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Amide compd., silica, dispersing agent, water and mineral oil mixt.  
*Uses:* Defoamer for papermaking; outstanding performance in high temps., strong alkali environments at low add-on levels  
*Properties:* Lt. yellowish wh. opaque liq.; insol. in water
- Foamlex W-320** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Amide compd., dispersing agent, water and mineral oil mixt.  
*Uses:* Defoamer for papermaking; outstanding performance in high temps., strong alkali environments at low add-on levels  
*Properties:* Lt. yellowish wh. opaque liq.; insol. in water
- FoamTrol™** [Hercules]  
*Uses:* Antifoam in cooling and wastewater systems in the pulp/paper industry
- Foraperle® 225** [Atofina]  
*Uses:* Protective agent/surfactant for building applics. such as concrete, interlocking paving blocks, terra cotta pavement, and sandstone terra cotta pavement; water repellent treatment for paper and paperboard, leather  
*Properties:* Amber clear liq.; sp.gr. 0.97; f.p. < - 18 C; flash pt. (CC) 26 C; 25% act.
- Foraperle® 321** [Atofina]  
*Chem. Descrip.:* Fluorinated acrylic copolymer  
*Uses:* Protective agent/surfactant for building applics. such as concrete, interlocking paving blocks, terra cotta pavement, and sandstone terra cotta pavement; water and oil repellent treatment for paper and paperboard used for food pkg.  
*Regulatory:* BgVV compliant  
*Properties:* Amber liq.; water-sol.; sp.gr. 1.1-1.2; flash pt. none; pH 4-5; 25% act.; cationic
- Foraperle® 325** [Atofina]  
*Uses:* Protective agent/surfactant for water repellent treatment for paper and paperboard used for food pkg. (fast food, pkg. for butter/margarine/meat/poultry/coffee/frozen prods.) and pet food pkg.  
*Regulatory:* BgVV compliant  
*Properties:* Amber liq.; water-sol.; sp.gr. 1.1-1.2; flash pt. none; pH 4-5; 25% act.; cationic
- Formasil® 45** [Crompton/Witco]  
*Chem. Descrip.:* Dimethylsiloxane emulsion  
CAS 63148-62-9  
*Uses:* Release agent in mfg. of medical devices and appliances, food pkg. materials; in resinous/polymeric food-contact coatings; in food-contact paper/paperboard; in food-contact textiles  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 177.2800  
*Properties:* Water-disp.
- Formula 37** [Garratt Callahan]  
*Chem. Descrip.:* Organo-sulfur compds.  
*Uses:* Biocide, slimicide in industrial water systems, cooling towers, evaporative condensers, air washers, spray ponds, paper mills, beet and cane sugar mills, and other circulating systems; mild corrosion inhibiting prop., particularly against copper or brass system components; nonfoaming and nonoxidizing; not for potable water systems  
*Use Level:* 3-13 fl oz/1000 gal  
*Regulatory:* EPA reg. no. 31910-2-8540  
*Properties:* Yel.-grn. to amber clear liq.; water-sol.; sp.gr. 1.12-1.22; dens. 9.3-10.2 lb/gal; pH 10.5-12.5  
*Toxicology:* Toxicant; may cause skin/eye irritation  
*Storage:* 1 yr shelf life; store @ 10-40 C; avoid freezing or high temps.
- Formula 44** [Garratt Callahan]  
*Chem. Descrip.:* Neutralizing amines  
*Uses:* Condensate corrosion inhibitor for steam pressure systems used in lg. industrial plants, commercial bldgs., paper mills, schools, food processing; rec. where difficult corrosion problems have been experienced in differential steam pressure systems; effective in lower pressure areas of steam system and also in ends of condensate system laterals  
*Regulatory:* FDA and USDA approved for use in boilers where steam contacts food  
*Properties:* Water wh. to lt. yel. clear liq.; sp.gr. 0.92-1.02; dens. 7.6-8.5 lb/gal; pH 11.5-13.5  
*Storage:* 6 mos shelf life
- Formula 315** [Garratt Callahan]  
*Chem. Descrip.:* Isothiazolone compds.  
*Uses:* Biocide for industrial water systems, cooling towers, evaporative condensers, spray ponds, paper mills, and air washers; nonfoaming and nonoxidizing; unaffected by hardness; compat. with most other water treatment chems. at use levels; suggest system be manually cleaned prior to treatment; not for potable water  
*Use Level:* 4.5-113 fl.oz./1000 gal  
*Regulatory:* EPA reg. no. 8540-23  
*Properties:* Lt. green to yel.-grn. clear liq.; odorless; sp.gr. 0.95-1.1; dens. 7.9-9.2 lb/gal; pH 3.0-6.5  
*Toxicology:* Toxicant; may cause skin/eye irritation  
*Storage:* 6 mos shelf life; store @ 10-40 C; avoid freezing or high temps.
- Formula 435** [Garratt Callahan]  
*Uses:* Corrosion inhibitor in steam condensate systems for use in lg. industrial plants, commercial bldgs., paper mills, hospitals, and schools; rec. where difficult corrosion problems exist in differential steam pressure systems, high vapor to liq. distribution ratio for low pressure systems and complex and extensive condensate systems  
*Regulatory:* FDA and USDA approved  
*Properties:* Clear liq.; sp.gr. 1.0; dens. 8.3 lb/gal  
*Storage:* 6 mos shelf life
- FR-11** [AmeriBrom; Dead Sea Bromine]  
*Chem. Descrip.:* Ammonium bromide  
CAS 12124-97-9; EINECS/ELINCS 235-183-8  
*Uses:* Flame retardant for paper, chipboard and nonwashable textiles  
*Properties:* Wh. cryst. solid; sol. 97 g/100 g water; m.w. 97.94; sp.gr. 2.43; m.p. 452 C (subl.); nonflamm., nonexplosive; 98.5% act.; 81.6% Br  
*Toxicology:* LD50 (oral, rat) 2714 mg/kg; irritating to eyes, mucous membranes, and upper respiratory tract; nonirritating to intact skin; active poisoning affects CNS  
*Storage:* Store in cool, dry, well ventilated area
- FRCROS 334** [Budenheim Ibérica]  
*Chem. Descrip.:* Treated sol'n. of ammonium pyrophosphate  
*Chem. Analysis:* P<sub>2</sub>O<sub>5</sub> (16%); N (5%)  
*Uses:* Flame retardant for cellulosic materials, wood/boards, paper, textiles, and carpets; halogen-free; noncorrosive  
*Use Level:* 30-40%  
*Properties:* Sl. grn. transparent liq.; odorless; sp.gr. 1.20; pH 6-6.5  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; nontoxic  
*Environmental:* LC50 (zebra fish, 96 h) > 500 mg/l; can be considered as a fertilizer  
*Hazardous Decomp. Prods.:* When heated may produce ammonia, phosphoric acid, and steam water  
*Storage:* Reseal opened drums
- FRCROS 349** [Budenheim Ibérica]  
*Chem. Descrip.:* Treated sol'n. of ammonium pyrophosphate and bromide  
*Chem. Analysis:* P<sub>2</sub>O<sub>5</sub> (15%); N (6%)  
*Uses:* Flame retardant for cellulosic materials, plywood, paper, wood/boards, and textiles  
*Use Level:* 25-35%  
*Properties:* Sl. grn. opalescent liq.; odorless; sp.gr. 1.25; visc. 40-50 cps; pH 5-6  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; nontoxic  
*Environmental:* LC50 (96 h, zebra fish) > 500 mg/l  
*Hazardous Decomp. Prods.:* When heated may produce ammonia, phosphoric acid, and steam water  
*Storage:* Reseal opened drums
- FRCROS 481** [Budenheim Ibérica]  
*Chem. Descrip.:* Long chain ammonium polyphosphate  
*Chem. Analysis:* P<sub>2</sub>O<sub>5</sub> (63%); N (15.5%)  
CAS 68333-79-9  
*Uses:* Flame retardant for epoxies, elastomers, textiles, cellulose, intumescent, paper, wood/boards; catalyst in solv.-based intumescent coatings; afterglow suppressant in elastomers; halogen-free; noncorrosive  
*Use Level:* 20-30% (automotive textiles); 15-25% (coatings); 2-5% (afterglow suppressant)  
*Properties:* Wh. fine, crystalline powd.; odorless; sol. 4.5 max. g/100 cm<sup>3</sup> in water; insol. in org. solvs.; sp.gr. 1.70-1.80; bulk dens. 700 g/l; pH 5.5 (10%)  
*Toxicology:* TLV > 10 mg/m<sup>3</sup> (nuisance dust); LD50 (oral, rat) > 5000 mg/kg; nontoxic

- Environmental:* LC50 (zebra fish, 96 h) > 500 mg/l; can be considered as slow-release fertilizer
- Hazardous Decomp. Prods.:* When heated above 275 C, may produce ammonia and phosphoric acid
- Storage:* Reseal opened drums; keep dry
- FRCROS 484** [Budenheim Ibérica]
- Chem. Descrip.:* Long chain ammonium polyphosphate
- Chem. Analysis:* P<sub>2</sub>O<sub>5</sub> (71%); N (14-15%)
- CAS 68333-79-9
- Uses:* Flame retardant for plastics (polyolefins, polyester, epoxies, PU), pigmented coatings, intumescent, adhesives, carpets, paper and chip-board, textiles; catalyst for water-based intumescent coatings; halogen-free
- Properties:* Wh. fine, crystalline powd.; odorless; nearly insol. in org. solvs. and water; sp.gr. 1.9; bulk dens. 700 g/l; pH 5.5 (10%); 0.05% moisture
- Toxicology:* TLV > 10 mg/m<sup>3</sup> (nuisance dust); LD50 (oral, rat) > 5000 mg/kg; nontoxic
- Environmental:* LC50 (zebra fish, 96 h) > 500 mg/l; can be considered as slow-release fertilizer
- Hazardous Decomp. Prods.:* When heated above 275 C, may produce ammonia and phosphoric acid
- Storage:* Reseal opened drums; keep dry
- Freedom SBO-65** [BFGoodrich/Textile]
- Chem. Descrip.:* Sulfated butyl oleate, sodium salt
- Uses:* Textile dye assistant; lubricant, wetter/rewetter, penetrant in textile dyeing, leather dyeing, fat liquors, metal cutting oils, paper mfg.; leveling agent for acid dyes; paper rewetter
- Properties:* 65% act.; anionic
- Environmental:* Biodeg.
- Freedom SBT-65** [BFGoodrich/Textile]
- Chem. Descrip.:* Sulfated butyl tallate, sodium salt
- Uses:* Textile dye assistant; lubricant, wetter/rewetter, penetrant in textile dyeing, leather dyeing, fat liquors, metal cutting oils, paper mfg.; leveling agent for acid dyes; paper rewetter
- Properties:* 65% act.
- Environmental:* Biodeg.
- Freedom SCO-50** [BFGoodrich/Textile]
- Chem. Descrip.:* Sulfated castor oil
- CAS 8002-33-3; EINECS/ELINCS 232-306-7
- Uses:* Kier boiling agent, emulsifier, bleaching assistant, dispersant in dyeing and bleaching; cloth lubricant in dyebath; finishing oil; milling assistant, dispersant for paper formulations; milling aid, leveling agent, wetting agent for paints and stains; stable in acidic and alkaline formulations
- Properties:* Amber clear liq.; pH 8-9; 50% act.; 18-26% free fatty acid; anionic
- Environmental:* Biodeg.
- Freedom SCO-70** [BFGoodrich/Textile]
- Chem. Descrip.:* Sulfated castor oil
- CAS 8002-33-3; EINECS/ELINCS 232-306-7
- Uses:* Kier boiling agent, emulsifier, bleaching assistant, dispersant in dyeing and bleaching; cloth lubricant in dyebath; finishing oil; milling assistant, dispersant for paper formulations; milling aid, leveling agent, wetting agent for paints and stains; stable in acidic and alkaline formulations
- Properties:* Amber clear liq.; pH 7-8 (5%); 70% act.; 10-20% free fatty acid; anionic
- Environmental:* Biodeg.
- Freedom SCO-75** [BFGoodrich/Textile]
- Chem. Descrip.:* Sulfated castor oil
- CAS 8002-33-3; EINECS/ELINCS 232-306-7
- Uses:* Lubricant, surfactant, dispersant for personal care prods.; kier boiling agent, emulsifier, bleaching assistant, dispersant in dyeing and bleaching; cloth lubricant in dyebath; finishing oil; milling assistant, dispersant for paper formulations; milling aid, leveling agent, wetting agent for paints and stains; very high foaming; stable in acidic and alkaline formulations
- Properties:* Amber clear liq.; pH 7-8 (5%); 75% act.; 10-20% free fatty acid; anionic
- Environmental:* Biodeg.
- Freedom SCO-75K** [BFGoodrich/Textile]
- Chem. Descrip.:* Sulfated castor oil, potassium salt
- Uses:* Lubricant, surfactant, dispersant for personal care prods.; kier boiling agent, emulsifier, bleaching assistant, dispersant in dyeing and bleaching; cloth lubricant in dyebath; finishing oil; milling assistant, dispersant for paper formulations; milling aid, leveling agent, wetting agent for paints and stains; very high foaming; stable in acidic and alkaline formulations
- Properties:* Amber clear liq.; pH 7-8 (5%); 75% act.; 10-20% free fatty acid; anionic
- Environmental:* Biodeg.
- FX-704** [Songkang Ind. Co.]
- Chem. Descrip.:* Polquaternary amine
- Uses:* Fixing agent for rosin size in wet end of papermaking; white pitch control agent for fixing anionic substances; stickies control agent in the wet-end; wastewater treatment; reduces dosage of alum; interacts with all anionic charged particles and contaminants
- Properties:* Visc. < 2000 cps; pH 5.5± 1.5
- FX-706** [Songkang Ind. Co.]
- Chem. Descrip.:* Polquaternary amine
- Uses:* Fixing agent for rosin size in wet end of papermaking; white pitch control agent for fixing anionic substances; stickies control agent in the wet-end; wastewater treatment; reduces dosage of alum; interacts with all anionic charged particles and contaminants
- Properties:* Sp.gr. 1.25; visc. < 1500 cps; pH 4.0 ± 1
- Fyrol® 51** [Akzo Nobel]
- Chem. Descrip.:* Oligomeric phosphate
- CAS 70715-06-9
- Uses:* Flame retardant for aq. systems that are used as binders for cellulosic prods., e.g., automotive and industrial air filters, upholstery fabrics, thermo-set papers, particle and chip boards
- Properties:* Lt. straw liq.; misc. with water; sp.gr. 1.37; dens. 11.4 lb/gal; visc. 5600 cps; vapor pressure 2.5 torr (65 C); acid no. 1.8; 20.5% P, 0% Cl

# G

**Gamaco®** [Georgia Marble]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (95% min.)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler/extender pigment for paints, enamels, epoxy-based coatings, paper coatings, adhesives, caulks, sealants, plastics (polyolefin, PU, epoxy, plastisols, compr. and inj. molded compds), foam and rubber compds., glass fiber-reinforced polyester (BMC/SMC/TMC where paintable parts are required), pultrusion

*Properties:* Powd.; 3.8 μ median particle size; 0.006% on 325 mesh; fineness (Hegman) 6; oil absorp. 16; brightness (Hunter) 94

**Gama-Sperse® 80** [Georgia Marble]

*Chem. Descrip.:* Calcium carbonate, natural ground

*Chem. Analysis:* CaCO<sub>3</sub> (95% min.)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for paints, enamels, plastisols esp. slush molded parts requiring high gloss, polyolefin compds. for sheet stock, thin films, paper coatings, rubber prods., upholstery fabrics, credit card stock, pigment extenders, caulks, sealants, and adhesives; general purpose

*Properties:* Powd.; 2.5 μ median particle size; 0.006% on 325 mesh; fineness (Hegman) 7; sp.gr. 2.71; bulking value 0.443 gal/lb; oil absorp. 19 lb oil/100 lb pigment; brightness 94; pH 9.0-9.5; hardness (Moh) 3

**Gama-Sperse® 255** [Georgia Marble]

*Chem. Descrip.:* Calcium carbonate, natural ground

*Chem. Analysis:* total carbonates (95% min.)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for paints, plastics, paper coatings, and rubber prods.; general-use

*Properties:* 12.0 μ median particle size; 0.02% on 325 mesh; fineness (Hegman) 4; sp.gr. 2.71; bulking value 0.443 gal/lb; oil absorp. 9 lb oil/100 lb pigment; brightness 94; pH 9.0-9.5; hardness (Moh) 3

**Genapol® 26-L-5** [Clariant/Surf.]

*Chem. Descrip.:* C12-16 pareth-5

CAS 68551-12-2

*Uses:* Detergent intermediate for phosphation or sulfation for use in cosmetics, shampoos, lt. duty detergents, household and I&I cleaners, textile wet processing, paper processing, emulsions and dispersions, agric. adjuvants

*Regulatory:* FDA compliance

*Properties:* APHA 10 liq.; oil-sol.; m.w. 419; sp.gr. 0.97; visc. 29 cst; HLB 10.6; hyd. no. 134; pour pt. 8 C; flash pt. (COC) 160 C; pH 6.6 (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Genapol® 26-L-23** [Clariant/Surf.]

*Chem. Descrip.:* Laureth-23

CAS 9002-92-0

*Uses:* Detergent intermediate for carboxylation or phosphation for use in household and I&I cleaners, textile wet processing, emulsions and dispersions, paper processing, agric. adjuvants

*Properties:* Solid; HLB 16.9; 100% act.; nonionic

*Environmental:* Biodeg.

**Genapol® 26-L-45** [Clariant/Surf.]

*Chem. Descrip.:* C12-16 pareth-6

CAS 68551-12-2

*Uses:* Detergent intermediate for phosphation or sulfation for use in cosmetics, shampoos, lt. duty detergents, household and I&I cleaners, textile wet

processing, paper processing, emulsions and dispersions, agric. adjuvants  
*Properties:* APHA 20 liq.; oil-sol.; m.w. 479; sp.gr. 0.96; visc. 49.5 cst; HLB 11.6; hyd. no. 117; pour pt. 6 C; cloud pt. 45 C (1% aq.); flash pt. (COC) 216 C; pH 7.0 (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Genapol® 26-L-50** [Clariant/Surf.]

*Chem. Descrip.:* C12-16 pareth-7

CAS 68551-12-2

*Uses:* Detergent intermediate for phosphation or sulfation for use in cosmetics, shampoos, lt. duty detergents, household and I&I cleaners, textile wet processing, paper processing, emulsions and dispersions, agric. adjuvants

*Properties:* APHA 20 color; m.w. 505; sp.gr. 0.96; visc. 48.1 cst; HLB 12.2; hyd. no. 111; pour pt. 5 C; cloud pt. 50 C (1% aq.); flash pt. (COC) 216 C; pH 6.1 (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Genapol® 26-L-60** [Clariant/Surf.]

*Chem. Descrip.:* C12-16 pareth-7.3

CAS 68551-12-2

*Uses:* Detergent intermediate for phosphation or carboxylation for use in household and I&I cleaners, textile wet processing, paper processing, emulsions and dispersions, agric. adjuvants

*Properties:* APHA 20 liq.; m.w. 519; sp.gr. 0.98; visc. 53 cst; HLB 12.4; hyd. no. 108; pour pt. 18 C; cloud pt. 60 C (1% aq.); flash pt. (COC) 171 C; pH 6.2 (1% aq.); 100% act.; nonionic

*Environmental:* Biodeg.

**Genapol® 26-L-80** [Clariant/Surf.]

*Chem. Descrip.:* C12-16 pareth-9

CAS 68551-12-2

*Uses:* Detergent intermediate for carboxylation or phosphation for use in household and I&I cleaners, textile wet processing, emulsions and dispersions, paper processing, agric. adjuvants

*Properties:* Hazy liq.; HLB 13.4; 100% act.; nonionic

*Environmental:* Biodeg.

**Genapol® C-050** [Clariant/Surf.]

*Chem. Descrip.:* Coceth-5

CAS 61791-13-7

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.

*Properties:* Turbid liq.; sol. in min. oil, benzene, turbid in water; sp. gr. 0.952 (50 C); visc. 17.6 cps (50 C); flash pt. 201 C (Marcusson); surf. tens. 32 dynes/cm; 100% act.; nonionic

**Genapol® C-080** [Clariant/Surf.]

*Chem. Descrip.:* Coceth-8

CAS 61791-13-7

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.

*Properties:* Paste; sol. in water, benzene, turbid in min. oil; sp. gr. 0.979 (50 C); visc. 25.4 cps (50 C); flash pt. 246 C (Marcusson); surf. tens. 36 dynes/cm; 100% act.; nonionic

**Genapol® C-100** [Clariant/Surf.]

*Chem. Descrip.:* Coceth-10

CAS 61791-13-7

*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.

*Properties:* Paste; sol. in water, benzene, turbid in min. oil; sp. gr. 0.990 (50

- C); visc. 30.4 cps (50 C); flash pt. 251 C (Marcusson); surf. tens. 38 dynes/cm; 100% act.; nonionic
- Genapol® C-150** [Clariant/Surf.]  
*Chem. Descrip.:* Coceth-15  
 CAS 61791-13-7  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Wax; sol. in water, benzene; sp. gr. 1.027 (50 C); visc. 45.8 cps (50 C); flash pt. 260 C (Marcusson); surf. tens. 43 dynes/cm; 100% act.; nonionic
- Genapol® C-200** [Clariant/Surf.]  
*Chem. Descrip.:* Coceth-20  
 CAS 61791-13-7  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Wax; sol. in water, benzene; sp. gr. 1.032 (50 C); visc. 61.5 cps (50 C); flash pt. 264 C (Marcusson); surf. tens. 44 dynes/cm; 100% act.; nonionic
- Genapol® O-020** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-2  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Clear liq.; sol. in min. oil, benzene, turbid in water; sp. gr. 0.894 (50 C); visc. 12.4 cps (50 C); flash pt. 186 C (Marcusson); 100% act.; nonionic
- Genapol® O-050** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-5  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Turbid liq.; sol. in benzene, turbid in water, min. oil; sp. gr. 0.936 (50 C); visc. 18.4 cps (50 C); flash pt. 225 C (Marcusson); surf. tens. 54 dynes/cm; 100% act.; nonionic
- Genapol® O-080** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-8  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Turbid liq.; sol. in water, benzene, turbid in min. oil; sp. gr. 0.960 (50 C); visc. 25.1 cps (50 C); flash pt. 246 C (Marcusson); surf. tens. 44 dynes/cm; 100% act.; nonionic
- Genapol® O-090** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-9  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Yel. liq.; visc. 45 cps; hyd. no. 90; pH 7 (1% aq.); 99% conc.; nonionic
- Genapol® O-100** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-10  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Paste; sol. in water, benzene, turbid in min. oil; sp. gr. 0.989 (50 C); visc. 33 cps (50 C); flash pt. 260 C (Marcusson); surf. tens. 41 dynes/cm; 100% act.; nonionic
- Genapol® O-120** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-12  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Paste; sol. in water, benzene, turbid in min. oil; sp. gr. 1.0 (50 C); visc. 42.5 cps (50 C); flash pt. 265 C (Marcusson); surf. tens. 42 dynes/cm; 100% act.; nonionic
- Genapol® O-150** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-15  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Wax; sol. in water, benzene, turbid in min. oil; sp. gr. 1.02 (50 C); visc. 49.1 cps (50 C); flash pt. 271 C (Marcusson); surf. tens. 45 dynes/cm; 100% act.; nonionic
- Genapol® O-200** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-20  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Wh. waxy solid; sol. in water, benzene, turbid in min. oil; sp. gr. 1.037 (50 C); visc. 65.9 cps (50 C); hyd. no. 50; flash pt. 278 C (Marcusson); pH 7 (1% aq.); surf. tens. 47 dynes/cm; 100% act.; nonionic
- Genapol® O-230** [Clariant/Surf.]  
*Chem. Descrip.:* Oleth-23  
 CAS 9004-98-2  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics, agric.  
*Properties:* Wh. waxy solid; sol. in water, benzene, turbid in min. oil; sp. gr. 1.042 (50 C); visc. 79.5 cps (50 C); hyd. no. 44; flash pt. 279 C (Marcusson); pH 7 (1% aq.); surf. tens. 47 dynes/cm; 100% act.; nonionic
- Genapol® S-020** [Clariant/Surf.]  
*Chem. Descrip.:* Stearyl alcohol polyglycol ether  
 CAS 9005-00-9  
*Uses:* Raw material for mfg. of textile, leather, paper auxs., detergents, emulsifiers, cosmetics  
*Properties:* Wax; sol. in min. oil, benzene, turbid in water; sp. gr. 0.890 (50 C); visc. 15.2 cps (50 C); flash pt. 198 C (Marcusson); surf. tens. 50 dynes/cm; 100% act.; nonionic
- Genapol® UD-070** [Clariant/Surf.]  
*Chem. Descrip.:* C11 oxo alcohol ethoxylate (7 EO)  
 CAS 127036-24-2  
*Uses:* Surfactant for household cleaners, textile wet processing, paper processing, metal cleaning, detergent formulation, metalworking fluids and lubricants; alternative to nonylphenol ethoxylates  
*Properties:* Hazy liq.; HLB 13.0; 100% act.; nonionic  
*Environmental:* > 80% biodeg.
- Genapol® UD-079** [Clariant/Surf.]  
*Chem. Descrip.:* C11 oxo alcohol ethoxylate (7 EO)  
 CAS 127036-24-2  
*Uses:* Surfactant for household cleaners, textile wet processing, paper processing, metal cleaning, detergent formulation, hand dishwash, all-purpose household cleaners, hard-surf. cleaners, metalworking fluids and lubricants; alternative to nonylphenol ethoxylates  
*Properties:* Almost colorless liq.; sp. gr. 0.97; HLB 13.0; iodine no. 1; pour pt. 0 C; cloud pt. 52-55 C; flash pt. 180 C; 90% act. in water; nonionic  
*Environmental:* > 80% biodeg.
- Genapol® UD-080** [Clariant/Surf.]  
*Chem. Descrip.:* C11 oxo alcohol ethoxylate (8 EO)  
 CAS 127036-24-2  
*Uses:* Surfactant for household cleaners, textile wet processing, paper processing, metal cleaning, detergent formulation, hand dishwash, all-purpose household cleaners, hard-surf. cleaners, metalworking fluids and lubricants; alternative to nonylphenol ethoxylates  
*Properties:* Wh. hazy liq.; sp. gr. 0.96; HLB 14.0; iodine no. 1; pour pt. 25 C; cloud pt. 62-65 C; flash pt. 190 C; 90% act.; nonionic  
*Environmental:* > 80% biodeg.
- Genapol® UD-110** [Clariant/Surf.]  
*Chem. Descrip.:* C11 oxo alcohol ethoxylate (11 EO)  
 CAS 127036-24-2  
*Uses:* Surfactant for household cleaners, textile wet processing, paper processing, metal cleaning, detergent formulation, all-purpose household cleaners, hard-surf. cleaners, metalworking fluids and lubricants; alternative to nonylphenol ethoxylates  
*Properties:* Wh. soft paste; sp. gr. 0.99; HLB 15.0; iodine no. 1; pour pt. 30 C; cloud pt. 62-65 C; flash pt. 210 C; 100% act.; nonionic  
*Environmental:* > 80% biodeg.
- Genapol® X Grades** [Clariant/Surf.]  
*Chem. Descrip.:* Isotridecanol polyglycol ether (3-15 EO)  
*Uses:* Basic material for mfg. of detergents, cleaning and rinsing agents; mfg. of leather and paper auxs., agric. formulations  
*Properties:* 100% conc.; nonionic
- GenCryl® 9705** [OMNOVA Sol'ns./Paper]  
*Chem. Descrip.:* Carboxylated styrene-butadiene acrylonitrile latex  
*Uses:* Binder for offset and rotogravure printing papers; provides controlled offset ink interaction; inc. coating str.; improves ink holdout and print mottle

*Properties:* Lg. particle size; visc. 150 cps; pH 7.0; 50% total solids  
**GenCryl® 9715** [OMNOVA Sol'ns./Paper]

*Chem. Descrip.:* Carboxylated styrene-butadiene acrylonitrile latex  
*Uses:* Binder for offset and rotogravure printing papers; provides controlled offset ink interaction; inc. coating str.; improves ink holdout; low mottle tendency for high print quality

*Properties:* Med. particle size; visc. 150 cps; pH 7.0; 50% total solids

**GenFlo® 557** [OMNOVA Sol'ns./Paper]

*Chem. Descrip.:* Carboxylated styrene-butadiene latex  
*Uses:* Gloss aid, binder for publication papers, coated paperboard; component of paper/paperboard in contact with aq./fatty/dry foods; inc. ink holdout and str.; contributes to glueability, print mottle, folding chars. and offset water/ink absorp. balance

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Lg. particle size; visc. 118 cps; pH 6.3; 50.3% total solids

**GenFlo® 559** [OMNOVA Sol'ns./Paper]

*Chem. Descrip.:* Carboxylated styrene-butadiene latex  
*Uses:* Binder for coated paperboard; component of paper/paperboard in contact with aq./fatty/dry foods; exc. glueability; protein compat.; inc. ink hold-out and str.; contributes to print mottle, folding chars. and offset water/ink absorp. balance

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Lg. particle size; visc. 150 cps; pH 8.7; 50% total solids

**GenFlo® 576** [OMNOVA Sol'ns./Paper]

*Chem. Descrip.:* Carboxylated styrene-butadiene latex  
*Uses:* Binder for sheet and web offset, publication paper, and coated paperboard; exc. glossing

*Properties:* Lg. particle size; visc. 100 cps; pH 5.7; 50.4% total solids

**Geo FM® 1220** [Geo Spec. Chems./Paper]

*Uses:* Antifoam for pigmented paper coatings and size press sol'ns., esp. for applics. contg. high foaming syn. binders such as acrylic polymers; defoamer in food-contact paper coatings, paper/paperboard; min. oil-free; silical/silicone-free; alkyl phenol ethoxylate-free; remains stable in conc. form or as dil. aq. emulsion

*Use Level:* 0.05-0.15% (pigmented coating colors), 0.05-0.1% (size press)

*Regulatory:* FDA 21CFR §176.200, 176.210

*Properties:* Clear liq.; water-disp.; dens. 8.3 lb/gal; visc. 400-1000 cps; pH 5-7 (10% aq.); 100% act.

*Storage:* Store @ 4-27 C away from direct heat; freezing has no effect; if prod. solidifies due to cold, warm to R.T. and mix well before use

**Geo FM® 1224** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Silica/silicone-contg.  
*Uses:* Antifoam for pigmented paper coatings and size press sol'ns., esp. for applics. contg. high foaming syn. binders such as acrylic polymers; defoamer in food-contact paper coatings, paper/paperboard; min. oil-free; alkyl phenol ethoxylate-free; remains stable in conc. form or as dil. aq. emulsion

*Use Level:* 0.05-0.15% (pigmented coating colors), 0.05-0.1% (size press)

*Regulatory:* FDA 21CFR §176.200, 176.210

*Properties:* Clear liq.; water-disp.; dens. 8.3 lb/gal; visc. 400-1000 cps; pH 5-7 (10% aq.); 100% act.

*Storage:* Store @ 4-27 C away from direct heat; freezing has no effect; if prod. solidifies due to cold, warm to 50 C and mix well before use

**Geo FM® 1425** [Geo Spec. Chems./Paper]

*Uses:* Defoamer for pigmented paper coatings and size press sol'ns., esp. for applics. contg. high foaming syn. binders such as acrylic polymers; defoamer in food-contact paper/paperboard; water-based; suitable for use in surf. sizing at operating temps. above 140 F; can be applied as received or as a 5-10% emulsion; not affected by water hardness; effective @ pH 4-10

*Regulatory:* FDA 21CFR §176.210

*Properties:* Wh. emulsion; dens. 8.2 lb/gal; visc. 1200-2000 cps; pH 8.5-9.5; 22.5-24.5% solids

*Storage:* Store @ 4-27 C away from direct heat; if prod. freezes, warm to R.T. and mix well before use

**Geo FM® DF-122** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Oil-based, silica-containing  
*Uses:* Antifoam, defoamer for pigmented paper coatings and size press sol'ns., esp. for applics. contg. high foaming syn. binders such as acrylic and polyvinyl acetate latexes; food pkg. adhesives; defoamer in food-contact paper coatings, paper/paperboard

*Use Level:* 0.1-0.3% (antifoam for pigmented coating colors), 5-10% (defoamer for pigmented coating colors), 0.05-0.1% (size press)

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

*Properties:* Amber hazy liq.; water-disp.; dens. 7.6 lb/gal; visc. 600-1600 cps; pH 6-8 (2% aq.); 100% act.

*Storage:* Store @ 4-27 C away from direct heat; freezing has no effect; if prod. solidifies due to cold, warm to R.T. and mix well before use

**Geo FM® DF-122-NS** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Oil-based, non-silica/silicone-containing  
*Uses:* Antifoam, defoamer for pigmented paper coatings and size press sol'ns., esp. for applics. contg. high foaming syn. binders such as acrylic and polyvinyl acetate latexes; food pkg. adhesives; defoamer in food-contact paper coatings, paper/paperboard

*Use Level:* 0.1-0.3% (antifoam for pigmented coating colors), 5-10% (defoamer for pigmented coating colors), 0.05-0.1% (size press)

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

*Properties:* Amber hazy liq.; water-disp.; dens. 7.6 lb/gal; visc. 600-1600 cps; pH 6-8 (2% aq.); 100% act.

*Storage:* Store @ 4-27 C away from direct heat; freezing has no effect; if prod. solidifies due to cold, warm to R.T. and mix well before use

**Geo FM® VF** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Oil-based  
*Uses:* Antifoam, defoamer for aq. paper coating colors and size press sol'ns., esp. for applics. contg. high foaming syn. binders such as acrylic polymers; food pkg. adhesives; defoamer in food-contact paper coatings, paper/paperboard

*Use Level:* 0.05-0.15% (antifoam for pigmented coating colors), 5-10% (defoamer for pigmented coating colors), 0.05-0.1% (size press)

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

*Properties:* Yel. opaque liq.; water-disp.; dens. 7.95 lb/gal; visc. 500-800 cps; pH 6-7 (10% aq.); 100% act.; nonionic

*Storage:* Store @ 4-27 C away from direct heat; freezing has no effect; if prod. solidifies due to cold, warm to R.T. and mix well before use

**Geo FM® VFS** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Oil-based  
*Uses:* Antifoam, defoamer for pigmented paper coatings, and nonpigmented surf. applics. such as size presses and calender boxes, esp. for applics. contg. high foaming syn. binders such as acrylic polymers; food pkg. adhesives; defoamer in food-contact paper coatings, paper/paperboard; low oil; minimal hydrocarbon content

*Use Level:* 0.05-0.15% (antifoam for pigmented coating colors), 5-10% (defoamer for pigmented coating colors), 0.05-0.1% (size press)

*Regulatory:* FDA 21CFR §175.105, 176.200, 176.210

*Properties:* Yel. opaque liq.; water-disp.; dens. 7.95 lb/gal; visc. 500-800 cps; pH 6-7 (10% aq.); 100% act.; nonionic

*Storage:* Store @ 4-27 C away from direct heat; freezing has no effect; if prod. solidifies due to cold, warm to R.T. and mix well before use

**Geropon® 99** [Rhodia HPCII]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate and propylene glycol  
*Uses:* Detergent; textile scouring agent and dye dispersant; paper rewetting and felt washing surfactant; wetting agent in cosmetics; detergent additive in dry cleaning fluids; dishwashing compds.; wallpaper removers; agric. sprays; emulsion polymerization; water-based paint formulations; antifog

*Regulatory:* EPA compliance

*Properties:* Clear liq.; water-sol.; sp.gr. 1.08-1.13 (70 F); visc. 500-1000 cps (70 F); pour pt. 40 F; 75% act.; anionic

**Geropon® BIS/SODICO-2** [Rhodia HPCII]

*Chem. Descrip.:* Sodium bistridecyl sulfosuccinate  
 CAS 2673-22-5; EINECS/ELINCS 220-219-7  
*Uses:* Emulsifier and visc. depressant for emulsion polymerization of PVC; latex surf. tension stabilizer; dispersant for resins, pigments into plastics and organic media; base for rust inhibitors; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400; BGA XIV compliance

*Properties:* Liq.; oil-sol., water-disp.; surf. tens. 26 dynes/cm; 60% conc.; anionic

**Geropon® CYA/DEP** [Rhodia HPCII]

*Chem. Descrip.:* Sodium diisooctyl sulfosuccinate  
 CAS 127-39-9; EINECS/ELINCS 204-839-5  
*Uses:* Wetting agent for textiles, pesticides, emulsion polymerization, printing inks, water paints; visc. depressant in emulsion PVC; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; stable in acid media

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 178.3400; BGA XIV compliance

- Properties:* Liq.; sol. in org. solvs.: 75% conc.; anionic
- Geropon® DOS** [Rhodia HPCII; Rhodia HPCII France]  
*Chem. Descip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, emulsifier, demulsifier for textile wet processing, specially cleaners; dewatering agent for flotation concs., oil spill clean-up blends; visc. depressant in emulsion PVC; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; limited stability in alkaline or acidic media  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 178.3400; BGA XIV compliance  
*Properties:* Liq.; limited water sol.; 65% conc.; anionic
- Geropon® SDS** [Rhodia HPCII]  
*Chem. Descip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Emulsifier; dispersant and wetting agent for pigments and dyes in plastics, paints, pesticide wettable powds.; wetting agent, penetrant for textile processing; dewatering agent for min. processing; used in dry cleaning, emulsion polymerization; wallpaper; battery separators; rewetting for paper towels and papermaking  
*Regulatory:* Exempt from tolerance under EPA 40CFR §180.1001(c)  
*Properties:* Spray-dried powd.; dissolves in water, partly sol. in org. solvs.; 85% act.; anionic
- Geropon® SS-O-70PG** [Rhodia HPCII]  
*Chem. Descip.:* Sodium dioctyl sulfosuccinate in propylene glycol  
*Uses:* Emulsifier, wetting agent for industrial applics., textile processing, dry cleaning, emulsion polymerization, wallpaper, battery separators, papermaking, paints and coatings; dewatering agent for min. processing; high flash  
*Properties:* Liq.; 70% act.; anionic
- Geropon® T-33** [Rhodia HPCII; Rhodia HPCII France]  
*Chem. Descip.:* Sodium N-methyl-N-oleoyl taurate  
 CAS 137-20-2; EINECS/ELINCS 205-285-7  
*Uses:* Detergent, dispersant, wetting agent for textile and general-purpose applics.; dye assistant; for kier boiling, bleaching, wetting, finishing of textiles; in industrial detergents, rug shampoos, bottle washing compds., metal cleaners, paper industry; suspending agent and wetting agent for crop protection formulations  
*Regulatory:* Exempt from tolerance under EPA 40CFR §180.1001(c)  
*Properties:* Pale yel. nearly clear liq., perfumed alcoholic odor; water-sol.; m.w. 425; pH 6.5-8.0 (10%); 32% act.; anionic
- Geropon® T/36DF** [Rhodia HPCII]  
*Chem. Descip.:* Sodium polycarboxylate  
 CAS 37199-81-8  
*Uses:* Dispersant for elastomers, suspension polymerization for use in solvent stripping phase; component of paper/paperboard in contact with dry food  
*Use Level:* 0.25% on wt. of polymer  
*Regulatory:* FDA 21CFR §175.105, 176.180  
*Properties:* Liq.; 25% solids in water
- Geropon® T-43** [Rhodia HPCII]  
*Chem. Descip.:* Sodium N-methyl-N-oleoyl taurate  
 CAS 137-20-2; EINECS/ELINCS 205-285-7  
*Uses:* Detergent, wetting agent, dispersant for textile and general-purpose applics.; dye assistant; for kier boiling, bleaching, wetting, finishing of textiles; in industrial detergents, rug shampoos, bottle washing compds., metal cleaners, paper industry  
*Properties:* Wh. visc. liq. slurry, fatty odor; m.w. 425; water sol.; pH 6.5-8.0 (5%); 33% act.; anionic
- Geropon® T-51** [Rhodia HPCII]  
*Chem. Descip.:* Sodium N-methyl-N-oleoyl taurate  
 CAS 137-20-2; EINECS/ELINCS 205-285-7  
*Uses:* Detergent, wetting agent, dispersant for textile and general-purpose applics.; dye assistant; for kier boiling, bleaching, wetting, finishing of textiles; in industrial detergents, rug shampoos, bottle washing compds., metal cleaners, paper industry; latex stabilizer  
*Properties:* Lt. amber gel, perfumed odor; m.w. 425; water sol.; pH 6.5-8.0 (10%); 13.9% act.; anionic
- Geropon® T-77** [Rhodia HPCII; Rhodia HPCII France]  
*Chem. Descip.:* Sodium N-methyl-N-oleoyl taurate  
 CAS 137-20-2; EINECS/ELINCS 205-285-7  
*Uses:* Foaming agent, wetting agent, emulsifier, dispersant for textile and general-purpose applics.; dye assistant; kier boiling; in industrial detergents,

- rug shampoos, bottle washing compds., metal cleaners, paper industry; foaming agent, conditioner, detergent, emulsifier, foam booster/stabilizer, visc. builder for shampoos, liq. soaps, facial cleansers, bath gels, and bubble baths; crop protection formulations  
*Regulatory:* Exempt from tolerance under EPA 40CFR §180.1001(c)(e) @ 1% max.  
*Properties:* Cream flakes, fatty odor; m.w. 425; water sol.; pH 6.5-8.0 (5%); 67% act.; anionic
- Geropon® TA/72/S** [Rhodia HPCII]  
*Chem. Descip.:* Sodium salt of polycarboxylic acid  
 CAS 37199-81-8  
*Uses:* Dispersant/suspending agent for pesticides and general purpose applics.; dispersant in elastomers, suspension polymerization for use in solvent stripping phase; component of paper/paperboard in contact with dry food  
*Use Level:* 0.25% on wt. of polymer  
*Regulatory:* FDA 21CFR §175.105, 176.180  
*Properties:* Powd.; water-sol.; 90% solids; anionic
- Geropon® WT-27** [Rhodia HPCII; Costec]  
*Chem. Descip.:* Sodium dioctyl sulfosuccinate in ethanol-water vehicle  
*Uses:* Wetting agent, rewetting agent, emulsifier, dispersant, penetrant used in dry cleaning detergents, emulsion polymerization, glass cleaners, wallpaper removers, battery separators, textiles, paper, metalworking, dyeing, firefighting; high foaming  
*Regulatory:* FDA compliance  
*Properties:* Water-wh. clear liq.; water sol. up to 1.2% solids and 5.5% @ 70 C; sol. in some polar and nonpolar solvs.; flash pt. > 200 C; pH 5-6 (1%); surf. tens. 28 dynes/cm (@ CMC); 70% act.; anionic
- Gilufloc®** [BK Giulini Chemie]  
*Chem. Descip.:* Modified polyaluminum chlorides of varying composition  
*Uses:* Flocculant, fixing agent for paper applics.; inorg.
- Giluton 1100/28 N** [BK Giulini Chemie]  
*Chem. Descip.:* Polyamideamine-epichlorohydrin resin  
*Uses:* Wet str. agent for neutrally mfg. paper and board  
*Use Level:* 0.5-6.0%; 0.2-0.6% (as retention or creping agent)  
*Regulatory:* BgVV compliant  
*Properties:* Ylsh. clear liq.; misc. with water; sp.gr. 1.03 (20 C); visc. < 100 mPa·s (20 C); pH 3; 14% act.; cationic  
*Storage:* 3 mos. shelf life @ 20 C
- Giluton HP** [BK Giulini Chemie]  
*Chem. Descip.:* Polyamideamine-epichlorohydrin resin  
*Uses:* Wet str. agent for neutrally mfg. paper and board  
*Use Level:* 1-8%; 0.2-0.6% (as retention or creping agent)  
*Regulatory:* BgVV compliant  
*Properties:* Ylsh. clear liq.; misc. with water; sp.gr. 1.03 (20 C); visc. < 100 mPa·s (20 C); pH 3; 14% act.; cationic  
*Storage:* 3 mos. shelf life @ 20 C
- Giluton NL 15** [BK Giulini Chemie]  
*Chem. Descip.:* Polyamideamine-epichlorohydrin resin  
*Uses:* Wet str. agent for neutrally mfg. paper and board  
*Regulatory:* BgVV compliant  
*Properties:* Ylsh. clear liq.; misc. with water; sp.gr. 1.03 (20 C); visc. < 100 mPa·s (20 C); pH 3; 14.5% act.; cationic  
*Storage:* 3 mos. shelf life @ 20 C
- Glo-Sperse™ EPX Fine Grind Disps.** [Day-Glo Color]  
*Chem. Descip.:* Fluorescent pigment aq. disp.  
*Uses:* Fluorescent pigment disps. for use in water-based coatings and inks incl. textile inks, latex paints, tempera paint, flexo ink, gravure ink, paper coatings, seed coatings  
*Properties:* Avail. in various colors; disp.; 0.25-0.50 μ particle size; sp.gr. 1.0-1.1; pH 6.5-8.0; 42-46% solids  
*Storage:* Protect from freezing
- Gluconal® GA-50** [Glucona Am.]  
*Uses:* Retarder and water reducer for concrete; sequestrant for metal ion and hardness control in textiles, leather, lithographic plate cleaning; stabilizer for sodium aluminate sol'ns. used in water treatment as precipitant/flocculant, paper industry as sizing improver, chem. industry as zeolite raw material
- Gluconal® NG-C** [Glucona Am.]  
*Chem. Descip.:* Sodium gluconate  
 CAS 527-07-1; EINECS/ELINCS 208-407-7  
*Uses:* Retarder and water reducer for concrete; sequestrant for metal ion and hardness control in metal treatment, textiles, leather, bottle washing, lithographic plate cleaning; stabilizer for sodium aluminate sol'ns. used in water

- treatment as precipitant/flocculant, paper industry as sizing improver, chem. industry as zeolite raw material; forms water-sol. chelates with polyvalent metal ions in highly alkaline media  
*Properties:* Wh. to off-wh. cryst.; ≈ 250 mm avg. particle size; sol. 600 g/l in water (20 C); bulk dens. 800-1000 kg/m<sup>3</sup>; pH 6.5-8.0 (30%); 99% assay  
*Environmental:* Completely biodeg.; COD = 760 mg/g  
*Storage:* Store in dry place in closed bags
- Glycowax® 765** [Lonza]  
*Chem. Descrip.:* N,N'-Ethylene bisstearamide  
 CAS 110-30-5; EINECS/ELINCS 203-755-6  
*Uses:* Defoamer for kraft brownstock pulp/paper, plastics processing, powd. metal lubrication, water treatment, textiles, other industrial applics.  
*Properties:* Gardner 4 powd.; 87% min. on 325 mesh; m.p. 143 C; acid no. 2; flash pt. 285 C
- Glypax 200** [Pax Group]  
*Chem. Descrip.:* PEG, m.w. 200  
*Uses:* Solubilizer, lubricant, humectant, defoamer, binder, coupling agent, dyeing assistant, plasticizer in paper/pulp, other applics.  
*Properties:* Liq.; 99% act.
- Glypax 400** [Pax Group]  
*Chem. Descrip.:* PEG, m.w. 400  
*Uses:* Solubilizer, lubricant, humectant, defoamer, binder, coupling agent, dyeing assistant, plasticizer in paper/pulp, other applics.  
*Properties:* Liq.; 99% act.
- Glypax 600** [Pax Group]  
*Chem. Descrip.:* PEG, m.w. 600  
*Uses:* Solubilizer, lubricant, humectant, defoamer, binder, coupling agent, dyeing assistant, plasticizer in paper/pulp, other applics.  
*Properties:* Liq.; 99% act.
- Glypax 1000** [Pax Group]  
*Chem. Descrip.:* PEG, m.w. 1000  
*Uses:* Solubilizer, lubricant, humectant, defoamer, binder, coupling agent, dyeing assistant, plasticizer in paper/pulp, other applics.  
*Properties:* Solid; 99% act.
- Glypax 3000** [Pax Group]  
*Chem. Descrip.:* PEG, m.w. 3000  
*Uses:* Solubilizer, lubricant, humectant, defoamer, binder, coupling agent, dyeing assistant, plasticizer in paper/pulp, other applics.  
*Properties:* Solid; 99% act.
- Glypax 4000** [Pax Group]  
*Chem. Descrip.:* PEG, m.w. 4000  
*Uses:* Solubilizer, lubricant, humectant, defoamer, binder, coupling agent, dyeing assistant, plasticizer in paper/pulp, other applics.  
*Properties:* Solid; 99% act.
- Glypax 6000** [Pax Group]  
*Chem. Descrip.:* PEG, m.w. 6000  
*Uses:* Solubilizer, lubricant, humectant, defoamer, binder, coupling agent, dyeing assistant, plasticizer in paper/pulp, other applics.  
*Properties:* Solid; 99% act.
- GMF-B** [Sam Shin]  
*Chem. Descrip.:* Melamine-formaldehyde resin  
 CAS 9003-08-1  
*Uses:* Water resist. aid, abrasion resist. aid for neutral and sl. alkaline paper coatings; improves printability; low formaldehyde  
*Properties:* Colorless transparent liq.; sol. in water; visc. < 20 cps; pH 10 ± 1; 44 ± 1% solids  
*Toxicology:* Avoid skin contact  
*Storage:* 3 mos shelf life below 25 C
- GOD-119** [Hansol]  
*Chem. Descrip.:* Fatty alcohol  
*Uses:* Deinking agent for newsprint; enhances collecting power of ink particles at flotation cell  
*Properties:* Opaque/transparent liq.; easily disp. in water; 90% min. conc.; nonionic  
*Storage:* Store in tightly closed container in cool, dry place away from incompat. substances, heat, flames
- Gohsenal** [Nippon Gohsei; British Traders & Shippers]  
*Chem. Descrip.:* Polyvinyl alcohol  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Paper sizing, coating, thermal paper, and release paper
- Gohsenol** [Nippon Gohsei; British Traders & Shippers]  
*Chem. Descrip.:* Polyvinyl alcohol  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Adhesive and sealant; protective colloid for PVC, PS, emulsions; binder emulsion stabilizer and binder for water-based inks, ceramic powds., pottery ware; textile and paper sizing agent; for thermal paper; additive for paints, caulks, tile adhesives, floor screeds, wood glues, gypsum wall boards; soil stabilizer; agric. seed coating; sticker or spreader
- Gohseran** [Nippon Gohsei; British Traders & Shippers]  
*Chem. Descrip.:* Polyvinyl alcohol  
 CAS 9002-89-5; EINECS/ELINCS 209-183-3  
*Uses:* Paper sizing, coating, thermal paper, and release paper; also for protective colloids; PVC, PS, emulsions; textile applics.
- Golden Isles® EF-100** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Slash pine fiber base  
*Uses:* Fluff pulp for disposable baby diapers, feminine hygiene prods., adult incontinence prods., air laid nonwovens, meat/poultry pkg.; gives prod. superior absorbency; coarse, bulky, long fiber with low percentage of fines
- Good-Rite® 2570X59** [BFGoodrich]  
*Chem. Descrip.:* Carboxy-modified S/B latex  
 CAS 9003-55-8  
*Uses:* Used for general purpose coatings, paper saturation, tie coats for tape, rug backing  
*Properties:* Sp.gr. 1.00; visc. 75 cps; pH 7.5; 51% solids
- Good-Rite® K-702 Polymer** [BFGoodrich]  
*Chem. Descrip.:* Polyacrylic acid aq. sol'n.  
 CAS 9003-01-4  
*Uses:* Detergent assistant; soap builder; particulate soil dispersant; scale inhibitor/deposit control agent in water treatment, soil removal, antiredeposition aids in detergents and cleaners; sequestrant for calcium, magnesium, iron for textile use; for laundry, dishwash, consumer/institutional cleaning prods.; food pkg. adhesives, coatings, paper  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.390, 176.180; USDA approval; SARA nonreportable  
*Properties:* Amber clear to hazy sol'n., odorless; water-sol.; m.w. 240,000; sp.gr. 1.09; visc. 400-1200 cP; b.p. 100 C; pH 3.0 (1% aq.); 25% total solids; anionic  
*Toxicology:* May cause eye irritation, skin irritation on prolonged/repeated contact; inh. of mist may cause eye and respiratory tract irritation, nausea, headache  
*Environmental:* LC50 (rainbow trout, 96 h) 2716 mg/l; (daphnia, 48 h) 3467 mg/l; relatively nontoxic  
*Precaution:* Incompat. with strong bases, strong oxidizers, materials not compat. with water  
*Hazardous Decomp. Prods.:* Decomp. or combustion of the dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons  
*Storage:* Store @ 5-50 C in closed containers
- Good-Rite® K-732 Polymer** [BFGoodrich]  
*Chem. Descrip.:* Polyacrylic acid aq. sol'n.  
 CAS 9003-01-4  
*Uses:* Dispersant for pigments, fillers, clay, silt, other suspended matter in water; detergent assistant; soap builder; particulate soil dispersant; sequestrant for calcium, magnesium, iron for textile use; scale inhibitor, deposit control agent for water treatment, soil removal; for laundry, dishwash, consumer/institutional cleaning prods.; food pkg. adhesives, coatings, paper  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.390, 176.180; USDA approval; SARA nonreportable  
*Properties:* Colorless to amber clear to hazy sol'n., odorless; water-sol.; m.w. 5100; sp.gr. 1.18 g/cc; visc. 250-500 cP; pH 3.0 (1% aq.); 50% solids; anionic  
*Toxicology:* LD50 (oral, rat) > 15,380 mg/kg; may cause eye irritation, skin irritation on prolonged/repeated contact; inh. vapors may cause eye and respiratory tract irritation, nausea, headache  
*Environmental:* LC50 (rainbow trout, 96 h) 1295 mg/l; (daphnia, 48 h) 1660 mg/l; relatively nontoxic  
*Precaution:* Incompat. with strong bases, strong oxidizers, materials not compat. with water  
*Hazardous Decomp. Prods.:* Decomp. or combustion of the dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons  
 HMIS: Health 1; Flammability 0; Reactivity 0  
*Storage:* Store @ 5-50 C in closed containers
- Good-Rite® K-739 Polymer** [BFGoodrich]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* Soap builder; particulate soil dispersant; scale inhibitor/deposit control agent for water treatment, soil removal, antiredeposition aids and water conditioners in detergents and cleaners for laundry, dishwasher, consumer/institutional cleaning prods.; sequestrant for calcium, magnesium, iron; defoamer in food-contact coatings; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §173.310, 173.340, 175.105, 176.170, 176.180, 176.200, 177.1210; USDA approval; SARA nonreportable

*Properties:* Wh. to cream free-flowing powd.; water-sol.; m.w. 5100; apparent gr. 0.55 g/cc; bulk dens. 37.6 lb/ft<sup>3</sup>; pH 6-9 (1% aq.); ≈ 89% conc., 11% moisture; anionic

*Toxicology:* Dust may cause eye irritation, coughing, mucous prod., shortness of breath; prolonged/repeated skin contact may cause dryness, irritation; processing fumes may cause eye, respiratory tract irritation, nausea, headache; TSCA listed

*Environmental:* LC50 (rainbow trout, 96 h) 901 mg/l; (daphnia, 48 h) 1156 mg/l; relatively nontoxic

*Precaution:* Fine dust may be explosion hazard; incompat. with strong oxidizers; contact with water may produce slippery film

*Hazardous Decomp. Prods.:* Decomp. or combustion may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMIS: Health 1; Flammability 1; Reactivity 0

*Storage:* Hygroscopic; store in dry place in tightly closed container

#### Good-Rite® K-752 Polymer [BFGoodrich]

*Chem. Descrip.:* Polyacrylic acid aq. sol'n.

CAS 9003-01-4

*Uses:* Detergent assistant; soap builder; particulate soil dispersant; scale inhibitor/deposit control agent in water treatment, soil removal, antiredeposition aids in detergents and cleaners for laundry, dishwasher, consumer/institutional cleaning prods.; sequestrant for calcium, magnesium, iron; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.390, 176.180; USDA approval; SARA nonreportable

*Properties:* Colorless to amber clear to hazy sol'n., odorless; water-sol.; m.w. 2100; sp.gr. 1.23 g/cc; visc. 400-1400 cP; pH 3.0 (1% aq.); 63% solids; anionic

*Toxicology:* May cause eye irritation, skin irritation on prolonged/repeated contact; inh. vapors may cause eye and respiratory tract irritation, nausea, headache

*Environmental:* LC50 (rainbow trout, 96 h) 1030 mg/l; (daphnia, 48 h) 1321 mg/l; relatively nontoxic

*Precaution:* Incompat. with strong bases, strong oxidizers, materials not compat. with water

*Hazardous Decomp. Prods.:* Decomp. or combustion of the dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Store @ 5-50 C in closed containers

#### Good-Rite® K-759 Polymer [BFGoodrich]

*Chem. Descrip.:* Sodium polyacrylate

CAS 9003-04-7

*Uses:* Detergent assistant; soap builder; scale inhibitor/deposit control agent in water treatment, soil removal, antiredeposition aids, water conditioners in detergents, cleaners for laundry, dishwasher, consumer/institutional cleaning prods.; particulate soil dispersant; sequestrant for calcium, magnesium, iron; defoamer in food-contact coatings; food pkg. adhesives, paper

*Regulatory:* FDA 21CFR §173.310, 173.340, 175.105, 176.170, 176.180, 176.200, 177.1210; USDA approval; SARA nonreportable

*Properties:* Wh. free-flowing powd., odorless; water-sol.; m.w. 2100; apparent gr. 0.55 g/cc; bulk dens. 38.2 lb/ft<sup>3</sup>; pH 6-9 (1% aq.); 89% conc., 11% moisture; anionic

*Toxicology:* Dust may cause eye irritation, coughing, mucous prod., shortness of breath; prolonged/repeated skin contact may cause dryness, irritation; processing fumes may cause eye, respiratory tract irritation, nausea, headache

*Environmental:* LC50 (rainbow trout, 96 h) 884 mg/l; (daphnia, 48 h) 1133 mg/l; relatively nontoxic

*Precaution:* Fine dust may be explosion hazard; incompat. with strong oxidizers; contact with water may produce slippery film

*Hazardous Decomp. Prods.:* Decomp. or combustion may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMIS: Health 1; Flammability 1; Reactivity 0

*Storage:* Hygroscopic; store in dry place in tightly closed container

#### Good-Rite® K-765 Polymer [BFGoodrich]

*Chem. Descrip.:* Sodium polymethacrylate aq. sol'n.

CAS 156559-16-9

*Uses:* Scale/deposit control agent used in water treatment applics.; USDA approved as ingredient in boiler water treatment formulations for federally inspected meat and poultry processing; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §173.310, 175.105, 175.300, 176.170, 176.180; USDA approval; SARA nonreportable

*Properties:* Water wh. to amber sl. hazy liq.; sl. odor; water-sol.; m.w. 30,000; sp.gr. 1.25; visc. 225 cps; vapor pressure 17 mm Hg; b.p. 100 C; pH 9.9; 30% total solids; anionic

*Toxicology:* May cause eye and skin irritation on prolonged/repeated contact; inh. of vapors may cause eye and respiratory tract irritation, nausea, headache; TSCA listed

*Precaution:* Incompat. with strong bases, strong oxidizing agents, materials not compat. with water; spilled liq. and dried films are slippery

*Hazardous Decomp. Prods.:* Decomp. or combustion of the dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Store @ 5-50 C in closed containers

#### Good-Rite® K-766 Polymer [BFGoodrich]

*Chem. Descrip.:* Sodium polymethacrylate aq. sol'n.

CAS 156559-16-9

*Uses:* Used in water treatment applics.; USDA approved as ingredient in boiler water treatment formulations for federally inspected meat and poultry processing; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §173.310, 175.105, 175.300, 176.170, 176.180; USDA approval; SARA nonreportable

*Properties:* Water wh. to amber sl. hazy liq.; sl. odor; water-sol.; m.w. 5000; sp.gr. 1.25; visc. 550 cps; vapor pressure 17 mm Hg; b.p. 100 C; pH 8.5; 40% total solids; anionic

*Toxicology:* May cause eye and skin irritation on prolonged/repeated contact; inh. of vapors may cause eye and respiratory tract irritation, nausea, headache; TSCA listed

*Precaution:* Incompat. with strong bases, strong oxidizing agents, materials not compat. with water; spilled liq. and dried films are slippery

*Hazardous Decomp. Prods.:* Decomp. or combustion of dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Store @ 5-50 C in closed containers

#### Good-Rite® K-776 Polymer [BFGoodrich]

*Chem. Descrip.:* Acrylic acid/sulfonic acid copolymer

CAS 97953-25-8

*Uses:* Dispersant and scale inhibitor for use in water treatment, food-contact paper/paperboard mfg.; USDA approved for boiler water treatments for use in federally inspected meat and poultry plants

*Regulatory:* FDA 21CFR §173.310, 176.170, 176.180; USDA approval; SARA nonreportable

*Properties:* Water wh. to amber sl. hazy liq.; water-dilutable; sp.gr. 1.2; visc. 130 cps; vapor pressure 17 mm Hg; b.p. 100 C; acid no. 240; pH 4.8; 37% total solids; anionic

*Toxicology:* May cause eye and skin irritation on prolonged/repeated contact; inh. of vapors may cause eye and respiratory tract irritation, nausea, headache; TSCA listed

*Environmental:* LC50 (rainbow trout, 96 h) 1060 mg/l; (daphnia, 48 h) 1501 mg/l; (algae, 96 h) > 1060 and < 2120 mg/l; relatively nontoxic

*Precaution:* Incompat. with strong bases, strong oxidizing agents, materials not compat. with water; spilled liq. and dried films are slippery

*Hazardous Decomp. Prods.:* Decomp. or combustion of dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* Store in orig. container @ 5-50 C

#### Good-Rite® K-7028 Polymer [BFGoodrich]

*Chem. Descrip.:* Sodium polyacrylate and polyacrylic acid in water

*Uses:* Scale/deposit control agent in water treatment applics.; soil removal and antiredeposition aid in detergents and cleaners; USDA approved as ingredient in boiler water treatment formulations for use in federally inspected meat and poultry processing establishments; food pkg. adhesives, coatings,

paper

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 175.390, 176.180; USDA approval; SARA nonreportable

**Properties:** Water wh. to amber hazy liq.; sl. acidic odor; water sol.; m.w. 2800; sp.gr. 1.2; visc. 450 cps; vapor pressure 17 mm Hg; b.p. 100 C; pH 3.7; 51.7% act. solids; anionic

**Toxicology:** May cause eye irritation, skin irritation on prolonged/repeated contact; inh. of mist may cause eye and respiratory tract irritation, nausea, headache; TSCA listed

**Environmental:** LC50 (rainbow trout, 96 h) 1182 mg/l; (daphnia, 48 h) 1509 mg/l; relatively nontoxic

**Precaution:** Incompat. with strong bases and strong oxidizers and materials not compat. with water

**Hazardous Decomp. Prods.:** Decomp. or combustion of the dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

**Storage:** Store @ 5-50 C in closed containers

**Good-Rite® K-7028N Polymer** [BFGoodrich]

**Chem. Descrip.:** Sodium polyacrylate, polyacrylic acid in water

**Uses:** Scale/deposit control agent in water treatment applics.; soil removal and antiredeposition aid in detergents and cleaners; USDA approved as ingredient in boiler water treatment formulations for use in federally inspected meat and poultry processing establishments; defoamer in food-contact coatings; food pkg. adhesives, paper

**Regulatory:** FDA 21CFR §173.310, 173.340, 175.105, 176.170, 176.180, 176.200, 177.1210; USDA approval; SARA nonreportable

**Properties:** Water wh. to amber sl. hazy liq.; sl. acidic odor; water-dilutable.; m.w. 2800; sp.gr. 1.1-1.3; visc. 330 cps; vapor pressure 17 mm Hg; b.p. 100 C; pH 7.5; 39.7% act. solids; anionic

**Toxicology:** May cause eye irritation, skin irritation on prolonged/repeated contact; inh. of mist may cause eye and respiratory tract irritation, nausea, headache; TSCA listed

**Environmental:** LC50 (rainbow trout, 96 h) 1539 mg/l; (daphnia, 48 h) 1965 mg/l; relatively nontoxic

**Precaution:** Incompat. with strong bases, strong oxidizers, materials not compat. with water; spilled liq. and dried films are slippery

**Hazardous Decomp. Prods.:** Decomp. or combustion of dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMS: Health 1; Flammability 0; Reactivity 0

**Storage:** Store @ 5-50 C in closed containers

**Good-Rite® K-7058 Polymer** [BFGoodrich]

**Chem. Descrip.:** Sodium polyacrylate, polyacrylic acid

**Uses:** Cobuilder in laundry, auto-dish, and misc. cleaners, providing detergency boosting, antisoil redeposition, antiscaling, antifilming/spotting; process and granulating aid in spray-dried detergents; chelating agent; water treatment polymer; food pkg. adhesives, coatings, paper

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 175.390, 176.180; USDA approval; SARA nonreportable

**Properties:** Wh./amber sl. hazy sol'n., odorless; water-sol.; m.w. 5800; sp.gr. 1.23 g/cc; visc. 300-700 cP; pH 2.2-3.0; 50% solids; anionic

**Toxicology:** May cause eye irritation, skin irritation on prolonged/repeated contact; inh. of mist may cause eye and respiratory tract irritation, nausea, headache

**Environmental:** LC50 (rainbow trout, 96 h) 1242 mg/l; (daphnia, 48 h) 1585 mg/l; relatively nontoxic

**Precaution:** Incompat. with strong bases and strong oxidizers and materials not compat. with water

**Hazardous Decomp. Prods.:** Decomp. or combustion of the dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

**Storage:** Store @ 5-50 C in closed containers

**Good-Rite® K-7058D Polymer** [BFGoodrich]

**Chem. Descrip.:** Sodium polyacrylate

CAS 9003-04-7

**Uses:** Detergent assistant; soap builder; scale inhibitor/deposit control agent in water treatment, soil removal, antiredeposition aids and water conditioners in detergents, cleaners for laundry, dishwasher, consumer/institutional cleaning prods.; particulate soil dispersant; sequestant for calcium, magnesium, iron; defoamer in food-contact coatings; food pkg. adhesives, paper

**Regulatory:** FDA 21CFR §173.310, 173.340, 175.105, 176.170, 176.180, 176.200, 177.1210; USDA approval; SARA nonreportable

**Properties:** Wh. to cream free-flowing powd., odorless; water-sol.; m.w.

5800; apparent gr. 0.6 g/cc; bulk dens. 32.8 lb/ft<sup>3</sup>; pH 6-9 (1% aq.); 89% conc., 11% moisture; anionic

**Toxicology:** Dust may cause eye irritation, coughing, mucous prod., shortness of breath; skin contact may cause drying; fumes may cause eye and respiratory tract irritation, nausea, headache; TSCA listed

**Environmental:** LC50 (rainbow trout, 96 h) 873 mg/l; (daphnia, 48 h) 1114 mg/l; relatively nontoxic

**Precaution:** Dust may present explosion hazard; incompat. with strong oxidizers; contact with water produces slippery films

**Hazardous Decomp. Prods.:** Decomp. or combustion may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMS: Health 1; Flammability 1; Reactivity 0

**Storage:** Hygroscopic; store in tightly closed containers in dry place

**Good-Rite® K-7058N Polymer** [BFGoodrich]

**Chem. Descrip.:** Sodium polyacrylate and polyacrylic acid aq. sol'n.

**Uses:** Detergent assistant; soap builder; scale inhibitor/deposit control agent in water treatment, soil removal, antiredeposition aids in detergents and cleaners for laundry, dishwasher, consumer/institutional cleaning prods.; particulate soil dispersant; sequestant for calcium, magnesium, iron; defoamer in food-contact coatings; food pkg. adhesives, paper

**Regulatory:** FDA 21CFR §173.310, 173.340, 175.105, 176.170, 176.180, 176.200, 177.1210; USDA approval; SARA nonreportable

**Properties:** Water-wh. to amber sl. hazy liq., odorless; water-sol.; m.w. 5800; sp.gr. 1.3; visc. 500-750 cP; pH 7.0; 45% total solids

**Toxicology:** May cause eye irritation, skin irritation on prolonged/repeated contact; inh. of mist may cause eye and respiratory tract irritation, nausea, headache

**Environmental:** LC50 (rainbow trout, 96 h) 1712 mg/l; (daphnia, 48 h) 2185 mg/l; relatively nontoxic

**Precaution:** Incompat. with strong bases, strong oxidizers, materials not compat. with water; spilled liq. and dried films are slippery

**Hazardous Decomp. Prods.:** Decomp. or combustion of dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMS: Health 1; Flammability 0; Reactivity 0

**Good-Rite® K-7600N Polymer** [BFGoodrich]

**Chem. Descrip.:** Sodium polyacrylate and polyacrylic acid in water

**Uses:** Cobuilder in laundry, auto-dish and misc. cleaners, providing detergency boosting, antisoil redeposition, antiscaling, antifilming/spotting; anticaking agent; process and granulating aid in spray-dried detergents; water treatment polymer; defoamer in food-contact coatings; food pkg. adhesives, paper

**Regulatory:** FDA 21CFR §173.310, 173.340, 175.105, 176.170, 176.180, 176.200, 177.1210; USDA approval; SARA nonreportable

**Properties:** Amber clear liq., odorless; water-sol.; m.w. 60,000; sp.gr. 1.24; visc. 920-2000 cP; pH 7.5-9.0; 33% total solids; anionic

**Toxicology:** May cause eye irritation, skin irritation on prolonged/repeated contact; inh. of mist may cause eye and respiratory tract irritation, nausea, headache

**Environmental:** LC50 (rainbow trout, 96 h) 2378 mg/l; (daphnia, 48 h) 3035 mg/l; relatively nontoxic

**Precaution:** Incompat. with strong bases, strong oxidizers, materials not compat. with water; spilled liq. and dried films are slippery

**Hazardous Decomp. Prods.:** Decomp. or combustion of dry polymer may generate irritating vapors, CO, CO<sub>2</sub>, acrylate monomers, hydrocarbons

HMS: Health 1; Flammability 0; Reactivity 0

**GP-210 Silicone Antifoam Emulsion** [Genesee Polymers]

**Chem. Descrip.:** Silicone emulsion in 10% odorless mineral spirits

**Uses:** Defoamer for hot and cold foaming systems, industrial applics., commercial cleaning compds., latex stripping, adhesives, cutting oils, leather treating, sewage treatment, chemical processing, paints/coatings, paper processing; effective over wide pH range

**Properties:** Wh. liq., mild odor; disp. in water; sp.gr. 0.99; dens. 8.0 lb/gal; b.p. 212 F; flash pt. (PMCC) > 93 C; 10% act.; nonionic

**Toxicology:** Prolonged/repeated contact with skin or eyes can cause irritation; excessive inh. may cause nasal/respiratory irritation, CNS effects, possible unconsciousness, death, reproductive damage; ing. of lg. amts. may cause serious injury; TSCA listed

**Precaution:** Incompat. with materials which react with water

**Hazardous Decomp. Prods.:** Hydrocarbon decomp. prods., silica

HMS: Health 1; Flammability 1; Reactivity 0

**Storage:** Store below 100 F; do not freeze; mix well before use

**GP-223** [Genesee Polymers]

*Chem. Descrip.:* Methyl silicone resin in water

CAS 9016-00-6

*Uses:* Waterproofing agent in leather, textile, paper, and masonry treatments; car polish ingredient; mold release agent; cures to soft, pliable film

*Properties:* Wh. opaque liq.; sp.gr. 1.04; dens. 8.7 lb/gal; pH 7; 50% act.; nonionic

*Storage:* Do not store above 100 F; do not freeze

**GP-262 Defoamer** [Genesee Polymers]

*Chem. Descrip.:* Organo-modified silicone defoamer in 85% aliphatic hydrocarbon (CAS 64742-46-7)

*Uses:* Defoamer for aq. systems, metalworking fluids, cleaner formulations, paints, coatings, paper/paperboard, wastewater treatment, textiles; alkali resistant

*Properties:* Tan liq., mild odor; sol. in aliphatic hydrocarbon solvs.; insol. in water; sp.gr. 0.85; dens. 7.0 lb/gal; low vapor pressure; b.p. 480 F; flash pt. (PMCC) > 93 C; 100% act.

*Toxicology:* May cause burning, redness, and tearing of eyes on direct contact; may cause skin irritation, dermatitis; overexposure to hot vapors may cause nausea, respiratory tract irritation, pneumonitis, pulmonary edema; mod. toxic by ing.; may cause GI upset; TSCA listed

*Precaution:* Avoid contact with open flame or sparks

*Hazardous Decomp. Prods.:* Hydrocarbon decomp. prods., silica

HMS: Health 1; Flammability 1; Reactivity 0

*Storage:* Keep container tightly sealed; do not store above 100 F; mix before use

**GP-295 Defoamer** [Genesee Polymers]

*Chem. Descrip.:* Nonsilicone

*Uses:* Defoamer for aq. systems, metalworking fluids, cleaner formulations, paints, coatings, paper/paperboard, wastewater treatment, food-contact coatings; alkali resistant

*Regulatory:* FDA 21CFR §176.200; SARA nonreportable

*Properties:* Lt. tan liq., mild petrol. odor; disp. in water; sp.gr. 0.85; dens. 7.0 lb/gal; b.p. > 450 F; flash pt. (PMCC) > 149 C; 100% act.

*Toxicology:* May cause skin irritation, eye burning, redness, tearing on direct contact, defatting of skin and dermatitis on prolonged/repeated contact; vapors may irritate nose/throat/respiratory tract; high concs. may cause CNS depression; sl. toxic by ing.; TSCA listed

*Precaution:* Avoid open flame, sparks; incompat. with alkali and acidic materials, oxidizing agents

*Hazardous Decomp. Prods.:* Hydrocarbon decomp. prods., silica

HMS: Health 1; Flammability 2; Reactivity 0

*Storage:* Keep container tightly sealed; do not store above 100 F; use adequate ventilation; mix before use

**GP-300-I Antifoam Compd.** [Genesee Polymers]

*Chem. Descrip.:* Silicone compd.

*Uses:* Defoamer for hot and cold foaming systems, industrial applics., commercial cleaning, latex stripping, cutting oils, paper processing, paints/coatings, solv.-based coatings, metalworking fluids; not suitable for food applics.

*Properties:* Tan to brn. thick liq., mild odor; sol. in aliphatic, aromatic, and ester solvs.; insol. in water; sp.gr. 1.0; dens. 8.3 lb/gal; b.p. > 600 F; flash pt. (PMCC) > 149 C; 100% act.

*Toxicology:* May cause temporary eye discomfort, mild redness, dryness on direct contact; no injury likely from relatively short exposures by inh.; swallowing lg. amts. may cause digestive discomfort; TSCA listed

*Hazardous Decomp. Prods.:* Burning can produce CO<sub>2</sub>, CO, silica

HMS: Health 1; Flammability 1; Reactivity 0

*Storage:* Store below 100 F in tightly sealed containers; mix before use

**GP-310-I Antifoam Emulsion** [Genesee Polymers]

*Chem. Descrip.:* Silicone aq. emulsion

*Uses:* Antifoam for industrial processing, chemical processing, cleaning prods., paints, paper and latex processing, textiles; dilutable; for use in hot, cold, alkaline or aq. systems

*Properties:* Wh. thixotropic liq., mild odor; disp. in water; sp.gr. 1.0; dens. 8.3 lb/gal; b.p. 212 F; 10% silicone; nonionic

*Toxicology:* May cause temporary eye discomfort, mild redness, dryness on direct contact; no injury likely from relatively short exposures by inh.; swallowing lg. amts. may cause digestive discomfort; TSCA listed

*Precaution:* Incompat. with materials which react with water

*Hazardous Decomp. Prods.:* Hydrocarbon decomp. prods., silica

HMS: Health 1; Flammability 1; Reactivity 0

*Storage:* Store at 40-100 F; keep from freezing; mix well before use

**GPRI™ 4000** [Georgia-Pacific Resins]

*Chem. Descrip.:* Phenolic resin in water/n-butanol/ethanol

*Uses:* Highly chemical resistant coatings for rigid surfaces; latex modifier to improve chemical resistance and adhesion; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; water-based resin; heat reactive; rec. for coatings exposed to severe operating environments; intended to replace current solvent-based phenolic resins where low VOCs required; good corrosion resist.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Disp.; sp.gr. 1.004-1.010; visc. 2000-9000 cps; 43-46% solids

*Storage:* Limited storage life, protect from high temps. and from freezing

**GPRI™ 7550** [Georgia-Pacific Resins]

*Chem. Descrip.:* Phenolic resin in n-butanol

*Uses:* High solids, butylated thermosetting resin sol'n. useful in coatings requiring low VOC emissions, food pkg. applics.; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; exhibits low color and has low flavor characteristics; can be emulsified into typ. water-based epoxy resins to produce baked films with outstanding chem. resist.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Sol'n.; sp.gr. 1.08; visc. 2000-4000 cps; 68-72% solids

**GPRI™ 7590** [Georgia-Pacific Resins]

*Chem. Descrip.:* Phenolic resin in n-butanol

*Uses:* Crosslinker for coil coating applics.; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; butylated thermosetting resin sol'n.; extremely fast cure; can significantly improve performance props. of epoxies, vinyls, or most other hydroxyl functional polymers without high baking temps. or long cycles required for typ. phenolic resins

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Sol'n.; sp.gr. 1.03; visc. 400-1200 cps; 58-62% solids

**GPRI™ 7597** [Georgia-Pacific Resins]

*Chem. Descrip.:* Phenolic resin in n-butanol

*Uses:* Butylated thermosetting resin sol'n. used in food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; can significantly improve performance props. of epoxies, vinyls, or most other hydroxyl functional polymers without high baking temps. or long cycles required for typ. phenolic resins; high solids for low VOC applics.; sl. reduced storage stability due to lower solv. content

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Sol'n.; sp.gr. 1.06; visc. 2500-5500 cps; 68-72% solids

**GPRI™ BKS-2600** [Georgia-Pacific Resins]

*Chem. Descrip.:* Phenolic resin in ethanol

*Uses:* Thermosetting resin sol'n. used in baked coatings, pipe coatings, drum and pail linings, and tank car linings; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; inc. chem. and solv. resist.

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 7 max. sol'n.; sp.gr. 1.06; visc. 700-1000 cps; 52-56% solids

**GPRI™ BKS-2900** [Georgia-Pacific Resins]

*Chem. Descrip.:* Phenolic resin in ethanol

*Uses:* Thermosetting resin sol'n. used for coatings that require low VOC emissions; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; exhibits exc. pigment wetting characteristics; applics. incl. interior drum and pail linings, coatings for chem. processing equip.; rail and tank car linings; general metal protection, coil coatings; high-solids version of GPRI BKS-2600

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Sol'n.; sp.gr. 1.14; visc. 900-2300 cps; 68-72% solids

*Storage:* Limited storage stability

**GPRI™ BKS-2901** [Georgia-Pacific Resins]

*Chem. Descrip.:* Phenolic resin in ethanol

*Uses:* Used for coatings that require low VOC emissions; applics. incl. interior drum and pail linings, coatings for chem. processing equip., rail and tank car linings; general metal protection, coil coatings; food pkg. adhesives, coatings, paper, closures with sealing gaskets for food containers; modified thermosetting version of GPRI™ BKS-2900 but with lower pH

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Sol'n.; sp.gr. 1.14; visc. 900-3500 cps; 68-72% solids

**Gradol 400** [Graden]

*Chem. Descrip.:* Sodium polyacrylate aq. sol'n.

CAS 9003-04-7

- Uses:* Dispersant for latex systems, clays, pigments, fillers, other insol. particles in water, in paper coating formulations, high solids oil well drilling muds; deflocculant, dispersant for high-solids, low-visc. clay slurries in pigment mfg.; antiredeposition agent in cleaning formulations; very low foaming
- Properties:* Lt.-colored liq.; misc. in water; sp.gr. 1.32; pH 10; 35% solids; anionic
- Storage:* Store above 40 F; protect from freezing
- Gradonic LFA Series** [Graden]  
*Chem. Descrip.:* Linear alcohol alkoxylates  
*Uses:* Surfactant for mech. dishwashing, metal cleaning, pulp/paper, textiles, etc.; low foaming  
*Properties:* Liq.; 100% conc.; nonionic
- Granular Gum Ghatti #1** [Fruitarom Meer]  
*Chem. Descrip.:* Gum ghatti  
 CAS 9000-28-6  
*Uses:* Stabilizer, binder, emulsifier forming o/w emulsions; emulsifier in beverage emulsions where it forms orange oil emulsions, in table syrup emulsions; tablet binder and thick mucilage coatings in pharmaceuticals; binder in paper industry; emulsifier for petroleum and nonpetroleum waxes used in coating and barrier applics.  
*Properties:* Water-sol.
- Graphsize®** [Vinings Ind.]  
*Chem. Descrip.:* PU disp.  
*Uses:* Surf. sizing agent for papers; provides improved ink jet and offset printability
- GT 122** [Process Chems. LLC]  
*Uses:* Brownstock defoamer for kraft, sulfite, and semi-chem. pulp washing, for brownstock washing, screenroom, and bleach plant applics.; non-amide; water-extended; does not contribute to deposit formation; suitable whether batch or continuous generated pulp is employed  
*Properties:* Opaque liq.; dens. 0.90 lb/gal; visc. 1200 ± 300 cps  
*Toxicology:* TSCA listed  
*Storage:* Store in dry area
- Gulftene® 4** [Chevron]  
*Chem. Descrip.:* 1-Butene (C4 alpha olefins)  
 CAS 106-98-9; EINECS/ELINCS 203-449-2  
 UN No. 1012  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Gas; sp.gr. 0.602 (60/60 F); dens. 5.01 lb/gal (60 F); 100% conc.  
*Precaution:* Flamm. gas
- Gulftene® 6** [Chevron]  
*Chem. Descrip.:* 1-Hexene (C6 alpha olefins)  
 CAS 592-41-6; EINECS/ELINCS 209-753-1  
 UN No. 2370  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Water-wh. bright, clear liq., char. olefinic odor; m.w. 84; sp.gr. 0.677 (60/60 F); dens. 5.64 lb/gal (60 F); b.p. 147 F; flash pt. (TOC) < 20 F  
*Toxicology:* LD50 (oral, rat) > 10 g/kg, (dermal, rat) > 10 g/kg (nontoxic); minimal skin and eye irritation  
*Environmental:* EC50 (daphnia magna, 48 h) 230 mg/l  
*Precaution:* Flamm. liq.
- Gulftene® 8** [Chevron]  
*Chem. Descrip.:* 1-Octene (C8 alpha olefins)  
 CAS 111-66-0; EINECS/ELINCS 203-893-7  
 UN No. 1993  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Water-wh. bright, clear liq., char. olefinic odor; sp.gr. 0.719 (60/60 F); dens. 6.00 lb/gal (60 F); b.p. 240 F; flash pt. (TCC) 55 F  
*Toxicology:* LD50 (oral, rat) > 10 g/kg, (dermal, rat) > 10 g/kg; minimal skin and eye irritation  
*Precaution:* Flamm. liq.
- Gulftene® 10** [Chevron]  
*Chem. Descrip.:* 1-Decene (C10 alpha olefins)  
 CAS 872-05-9; EINECS/ELINCS 212-819-2  
 UN No. 1993  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)
- specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)*  
*Properties:* Water-wh. bright, clear liq., char. olefinic odor; m.w. 140; sp.gr. 0.745 (60/60 F); dens. 6.21 lb/gal (60 F); b.p. 338 F; flash pt. (TOC) 128 F  
*Toxicology:* LD50 (oral, rat) > 10 g/kg, (dermal, rat) > 10 g/kg (nontoxic); minimal skin and eye irritation  
*Precaution:* Flamm. liq.
- Gulftene® 12** [Chevron]  
*Chem. Descrip.:* 1-Dodecene (C12 alpha olefins)  
 CAS 112-41-4; EINECS/ELINCS 203-968-4  
 UN No. 1993  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Water-wh. bright, clear liq., char. olefinic odor; sp.gr. 0.762 (60/60 F); dens. 6.36 lb/gal (60 F); f.p. -31 F; b.p. 400 F; pour pt. -33 F; flash pt. (TCC) 171 F  
*Toxicology:* LD50 (oral, rat) > 10 g/kg, (dermal, rat) > 10 g/kg; minimal skin and eye irritation  
*Precaution:* Combustible liq.
- Gulftene® 14** [Chevron]  
*Chem. Descrip.:* 1-Tetradecene (C14 alpha olefins)  
 CAS 1120-36-1; EINECS/ELINCS 272-493-2  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Water-wh. bright, clear liq., char. olefinic odor; sp.gr. 0.775 (60/60 F); dens. 6.46 lb/gal (60 F); f.p. 9 F; b.p. 440 F; pour pt. 10 F; flash pt. (PM) 225 F  
*Toxicology:* Minimal skin and eye irritation  
*Precaution:* Combustible liq.
- Gulftene® 16** [Chevron]  
*Chem. Descrip.:* 1-Hexadecene (C16 alpha olefins)  
 CAS 629-73-2; EINECS/ELINCS 211-105-8  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Water-wh. bright, clear liq., char. olefinic odor; m.w. 224; sp.gr. 0.785 (60/60 F); dens. 6.54 lb/gal (60 F); f.p. 39 F; b.p. 539 F; pour pt. 45 F; flash pt. (TOC) > 200 F  
*Toxicology:* LD50 (oral, rat) > 10 g/kg, (dermal, rat) > 10 g/kg (nontoxic); minimal skin and eye irritation  
*Environmental:* LC50 (rainbow trout, 96 h) > 1000 mg/l; EC50 (daphnia magna, 48 h) 530 mg/l  
*Precaution:* Combustible liq.
- Gulftene® 18** [Chevron]  
*Chem. Descrip.:* 1-Octadecene (C18 alpha olefins)  
 CAS 112-88-9; EINECS/ELINCS 204-012-9  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Water-wh. bright, clear liq., char. olefinic odor; sp.gr. 0.793 (60/60 F); dens. 6.60 lb/gal (60 F); f.p. 64 F; b.p. 165 F; pour pt. 65 F; flash pt. (PM) 310 F
- Gulftene® 20-24** [Chevron]  
*Chem. Descrip.:* C20-24 alpha olefins  
 CAS 64743-02-8  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)  
*Properties:* Wh. bright, clear waxy solid; sp.gr. 0.856 (60/60 F); dens. 6.67 lb/gal (60 F); visc. 2.1 cSt (99 C); m.p. 96 F; b.p. 146 F; flash pt. (PM) 362 F  
*Toxicology:* LD50 (oral, rat) > 5 g/kg  
*Environmental:* LC50 (rainbow trout, 96 h) > 1000 mg/l (water accommodated fraction); EC50 (daphnia magna, 48 h) 140 mg/l (water accommodated fraction)
- Gulftene® 24-28** [Chevron]  
*Chem. Descrip.:* C24-28 alpha olefins  
*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)

**Gulftene® 30+**

---

*Properties:* Wh. bright, clear waxy solid; sp.gr. 0.891 (60/60 F); dens. 6.83 lb/gal (60 F); visc. 2.5 cSt (99 C); m.p. 143 F; congeal pt. 126 F; b.p. 190 F; flash pt. (PM) 425 F

**Gulftene® 30+** [Chevron]

*Chem. Descrip.:* C30 alpha olefin

*Uses:* Intermediate for biodeg. surfactants for personal care and laundry, and specialty industrial chemicals (polyethylene and other polymers; plasticizers; syn. lubricants; gasoline additives; paper sizing; PVC lubricants)

*Properties:* Wh. bright, clear waxy solid; sp.gr. 0.919 (60/60 F); dens. 6.95 lb/gal (60 F); visc. 8.0 cSt (99 C); drop m.p. 163 F; congeal pt. 155 F; b.p. 204 F; flash pt. (PM) 485 F

*Toxicology:* LD50 (oral, rat) > 2 g/kg

**G-White** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (97.7%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Functional filler extender used in coatings, plastic and rubber fillers, building prods., ceramics flux, paper fillers, adhesives, cleaning compds., and polishing agents; easy disp. and low binder demand

*Properties:* Wh. irreg., uniaxial particles; particle size 5.5 μ, 99% thru 500 mesh; water-sol.; sp.gr. 2.71; dens. 22.6 lb/solid gal, 55 lb/ft<sup>3</sup>; oil absorp. 13.5 lb oil/100 lb; ref. index 1.6; hardness (Mohs) 3

# H

## Halocarbon Grease 19 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with silica  
*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives; hardest grease

*Properties:* Sol. in most org. liqs.; service temp. -25 to 175 C

## Halocarbon Grease 25-5S [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with silica  
*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives; lowest vapor pressure

*Properties:* Sol. in most org. liqs.; service temp. -20 to 175 C

## Halocarbon Grease 25-10M [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with PCTFE polymer  
 CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives; softest grease

*Properties:* Sol. in most org. liqs.; service temp. 0-135 C; m.p. 150 C

## Halocarbon Grease 25-20M [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with PCTFE polymer  
 CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives; hardest grease

*Properties:* Sol. in most org. liqs.; service temp. -5 to 150 C; m.p. 160 C

## Halocarbon Grease 28 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with silica  
*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; service temp. -25 to 175 C

## Halocarbon Grease 28LT [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with silica  
*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated

plastics; component of specialty greases and engine oil additives; for low-temp. use

*Properties:* Sol. in most org. liqs.; service temp. -45 to 95 C

## Halocarbon Grease 32 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with silica  
*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives; softest grease

*Properties:* Sol. in most org. liqs.; service temp. -25 to 175 C

## Halocarbon Grease X90-10M [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene grease thickened with PCTFE polymer  
 CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives; for low temp. use

*Properties:* Sol. in most org. liqs.; service temp. -40 to 95 C; m.p. 150 C

## Halocarbon Oil 0.8 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
 CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.71 g/ml (37.8 C); visc. 1.3 cps (37.8 C); pour pt. -129 C; cloud pt. < -129 C; flash pt. none; ref. index 1.383

## Halocarbon Oil 1.8 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
 CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.82 g/ml (37.8 C); visc. 3.5 cps (37.8 C); pour pt. -93 C; cloud pt. < -93 C; flash pt. none; ref. index 1.395

## Halocarbon Oil 4.2 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
 CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.85 g/ml (37.8 C); visc. 7.8 cps (37.8 C); pour pt. -73 C; cloud pt. < -87 C; flash pt. none; ref. index 1.401

## Halocarbon Oil 6.3 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.87 g/ml (37.8 C); visc. 12 cps (37.8 C); pour pt. -71 C; cloud pt. < -87 C; flash pt. none; ref. index 1.403

#### Halocarbon Oil 27 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.90g/ml (37.8 C); visc. 51 cps (37.8 C); pour pt. -40 C; cloud pt. < -71 C; flash pt. none; ref. index 1.407

#### Halocarbon Oil 56 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.92 g/ml (37.8 C); visc. 108 cps (37.8 C); pour pt. -34 C; cloud pt. -34 C; flash pt. none; ref. index 1.409

#### Halocarbon Oil 95 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.92 g/ml (37.8 C); visc. 182 cps (37.8 C); pour pt. -26 C; cloud pt. -21 C; flash pt. none; ref. index 1.411

#### Halocarbon Oil 200 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.95 g/ml (37.8 C); visc. 390 cps (37.8 C); pour pt. -12 C; cloud pt. 2 C; flash pt. none; ref. index 1.412

#### Halocarbon Oil 400 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.95 g/ml (37.8 C); visc. 780 cps (37.8 C); pour pt. -9 C; cloud pt. 10 C; flash pt. none; ref. index 1.412

#### Halocarbon Oil 700 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.95 g/ml (37.8 C); visc. 1365 cps (37.8 C); pour pt. 5 C; cloud pt. 13 C; flash pt. none; ref. index 1.414

#### Halocarbon Oil 1000N [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene oil  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; dens. 1.95 g/ml (37.8 C); visc. 1950 cps (37.8 C); pour pt. 10 C; cloud pt. 18 C; flash pt. none; ref. index 1.415

#### Halocarbon Wax 40 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene wax  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; visc. 190 cst (71.1 C)

#### Halocarbon Wax 600 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene wax  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; visc. 1000 cst (71.1 C); m.p. 57 C

#### Halocarbon Wax 1200 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene wax  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; m.p. 110 C

#### Halocarbon Wax 1500 [Halocarbon Prods.]

*Chem. Descrip.:* Polychlorotrifluoroethylene wax  
CAS 9002-83-9

*Uses:* Inert lubricant for chemical industry, aerospace, cryogenic gases, elec., hydraulic fluids, life support systems, low-temp. bath fluids, mech. seals, metalworking, nuclear, pulp/paper, spill control, steel, vacuum pump fluids; mold release agent for plastics and rubber; plasticizer for fluorinated plastics; component of specialty greases and engine oil additives

*Properties:* Sol. in most org. liqs.; m.p. 132 C

#### Halopont™ Blue RNM Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant red-shade blue pigment for tinting wh. papers to offset the sl. natural yellowness of bleached chem. pulps, rec. for sized, acid, alkaline papers; partially bleachable in hypochlorite; fair lightfastness; very good affinity for clay fillers; good affinity for TiO<sub>2</sub> and CaCO<sub>3</sub>

*Properties:* Liq.; dens. 9.7 lb/gal; visc. < 100 cps; pH 4.5

#### Halopont™ Pink 2BM Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Red pigment for tinting and prod. of deeper shades for sized, acid, alkaline papers; high level of brilliance; partially bleachable in hypochlorite; fair lightfastness; very good affinity for clay fillers; good affinity for TiO<sub>2</sub> and CaCO<sub>3</sub>

*Properties:* Liq.; dens. 10.0 lb/gal; visc. < 100 cps; pH 4.6

#### Halopont™ Tinting Blue RND Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Brilliant red-shade blue pigment for tinting wh. papers to offset the sl. natural yellowness of bleached chem. pulps, rec. for sized, acid, alkaline papers; partially bleachable in hypochlorite; fair lightfastness; very good affinity for clay fillers; good affinity for TiO<sub>2</sub> and CaCO<sub>3</sub>

*Properties:* Liq.; dens. 9.0 lb/gal; visc. < 100 cps; pH 4.5

#### Halopont™ Violet NM Liq. [Bayer/Industrial Chems.]

*Chem. Descrip.:* Org. pigment disp.

*Uses:* Blue-shade violet pigment for tinting and prod. of deeper shades, rec. for sized, acid, alkaline papers; partially bleachable in hypochlorite; good lightfastness; very good affinity for clay fillers; good affinity for TiO<sub>2</sub> and CaCO<sub>3</sub>

*Properties:* Liq.; dens. 9.7 lb/gal; visc. < 100 cps; pH 4.5

#### Hampshire® NTA 150 [Akzo Nobel]

- Chem. Descrip.:* Trisodium NTA  
CAS 5064-31-3; EINECS/ELINCS 225-768-6  
*Uses:* Chelating agent used in laundry detergents and specialty cleaning prods., water treatment, textiles, metal finishing, pulp/paper processing, and petrol. industry; nonphosphate detergent builder  
*Properties:* Pale straw clear liq.; m.w. 257.1; water-misc.; sp.gr. 1.30-1.33; dens. 11.0 lb/gal; chel. value 156 mg CaCO<sub>3</sub>/g min.; pH 11-12 (1%); 40.0% min. act.
- Hancap MC-40** [Hansol]  
*Uses:* Microcapsule for pressure-sensitive paper applics., bill paper, carbonless paper; works by emitting dyes within the capsule under pressure  
*Properties:* Milky liq., round particles; visc. 150 cps max.; pH 9.5-10.5 (0.5%); 40% min. total solids  
*Storage:* 6 mos min. storage at normal temps.
- Han-Floc 45®** [Handy Chems.]  
*Chem. Descrip.:* Stabilized sodium aluminate aq. sol'n., 45%  
CAS 1302-42-7; EINECS/ELINCS 215-100-1  
UN No. 1819  
*Uses:* Flocculant for water treatment, wastewater treatment for removal of phosphates, sludge conditioning, papermaking (newsprint, fine paper, and kraft paper); used to activate silica in potable water, to help in pin-floc formation or to raise pH while providing aluminum species  
*Regulatory:* FDA approved; SARA nonreportable  
*Properties:* Straw yel. clear liq.; char. odor; completely sol. in water; sp.gr. 1.52; visc. 135 cps (30 C); f.p. -32 C; b.p. 115 C; pH 12 (1%)  
*Toxicology:* Causes severe skin/eye burns; may cause damage to upper respiratory tract and lungs if inh.; ing. can cause severe burns to mucous membranes and digestive tract  
*Precaution:* Corrosive; strong alkaline liq.; do not mix with strong acids without preliminary dilution; can react explosively with aldehydes and many other org. chems.; hydrolyzes in water  
*Hazardous Decomp. Prods.:* Thermal decomp. produces toxic fumes of oxides of sodium  
*Storage:* Store in steel or plastic containers @ -20 to 35 C; keep closed; do not store in copper, zinc, aluminum, and their alloys
- Hanwet CA-1** [Hansol]  
*Chem. Descrip.:* Org. polyelectrolyte  
*Uses:* Chelating agent for paper deinking process; prevents loss of H<sub>2</sub>O<sub>2</sub> in pulp bleaching; scale inhibitor; noncombustible  
*Regulatory:* Not classified and restricted by shipping and storage regs.  
*Properties:* Colorless transparent liq.; completely sol. in water; sp.gr. 1.12 ± 0.01; visc. 3-5 cps; f.p. < -10 C; pH 7.5-9.5; 20 ± 1.5% total solids  
*Toxicology:* Avoid skin contact  
*Storage:* Store below 30 C; avoid freezing; if frozen, thaw gradually
- Hanwet HCD-31** [Hansol]  
*Uses:* Retention aid, drainage aid, dewatering aid for acidic or alkaline papermaking; effective over wide pH range and conditions of temp., filler, and recycled pulp; compat. with anionic, low m.w., org. or inorg. compds.  
*Properties:* Wh. opaque liq.; sol. 10% in water; sp.gr. 1.01 ± 0.01; bulk visc. 1000-1600 cps; visc. 700-1100 cps (1%); f.p. -10 C; pH 3-4.5 (0.5%); 37-39% solids; cationic  
*Toxicology:* Mild acidic prod.; can irritate skin and eyes  
*Storage:* 6 mos shelf life in unopened drums; if frozen, thaw gradually in heated area and stir well before use; keep away from fire, flamm. materials
- Hanwet HF-59** [Hansol]  
*Uses:* Fixing agent for sizes, starches, dyes, fillers, str. agents in acidic and neutral papermaking  
*Regulatory:* Not classified and restricted by shipping and storage regs.  
*Properties:* Yel. liq.; completely sol. in water; sp.gr. 1.15 ± 0.01; visc. 500 ± 200 cps; pH 6 ± 0.5; 50 ± 1% total solids; cationic  
*Toxicology:* Avoid skin contact  
*Storage:* 6 mos min. storage @ normal temps.; store below 30 C; if frozen, thaw gradually before use; SS, PP, and FRP storage rec.
- Hanwet HW-96E** [Hansol]  
*Uses:* Wet str. agent, dry str. agent, sizing promoter for papermaking, starch mfg.; useful @ pH 5-9  
*Regulatory:* Not classified and restricted by shipping and storage regs.  
*Properties:* Yel. liq.; completely sol. in water; sp.gr. 1.03 ± 0.01; visc. 20-80 cps; pH 3-5; 12.5 ± 0.5% total solids; cationic  
*Storage:* 3 mos min. storage @ normal temps.; store @ 4-32 C in PE or SS; if frozen, thaw gradually and dilute with water before use
- Hardener HY 3100** [Vantico AG]

- Chem. Descrip.:* MDA-exempt aromatic amine  
*Uses:* Hardener for ultra high solids coatings and floorings made with liq. bisphenol A, bisphenol F, novolac Araldite® resins, or their blends, for tank repair and lining, concrete structure finishes, marine and splash zone coatings, concrete pulp tanks in paper mills, concrete and metal fittings in sewers, repair of glass-lined vessels, condensers and oil coolers; rec. for applics. where hard films are required for aggressive environments  
*Use Level:* 30 pbw  
*Properties:* Lt. brn. color; dens. 8.7 lb/gal; visc. 700 cps; amine no. 640; flash pt. > 200 F; gel time 45 min. (with Araldite® GY 6010, 100 g); amino nitrogen (16%)  
*Toxicology:* Corrosive to eyes and skin; harmful if swallowed, inhaled, or absorbed thru skin; can cause sensitization and irritation  
*Storage:* 1 yr. min. shelf life in tightly closed containers in dry place @ R.T.
- Haricoat** [Harima Chems.]  
*Uses:* Paper coating agent
- Harifloc** [Harima Chems.]  
*Chem. Descrip.:* Fatty acid derivs.  
*Uses:* Flocculant for treatment of paper mill wastewater; minimizes polluting effects of wastewater
- Haritop** [Harima Chems.]  
*Chem. Descrip.:* Fatty acid derivs.  
*Uses:* Surfactant, deinking agent for papermaking, removing printing ink from recycled paper and enhance pulp brightness
- Harmide** [Harima Chems.]  
*Uses:* Dry str. agent for papermaking
- Haro® Chem ZPR-2** [Akcros bv]  
*Chem. Descrip.:* Zinc stearate  
CAS 557-05-1; EINECS/ELINCS 209-151-9  
*Uses:* Heat stabilizer for PVC, LDPE, MHDPE, PS, rubbers, thermosets, cosmetics, paper, pharmaceuticals, paint  
*Properties:* Solid
- Harol D** [Graden]  
*Chem. Descrip.:* Highly polymerized naphthalene sulfonate  
*Uses:* Stabilizer, visc. depressant; dispersant for carbon blk., clay disps., CaCO<sub>3</sub> disps.; paper coating compds.  
*Properties:* Powd.; dens. 47 lb/ft<sup>3</sup>; surf. tens. 71 dynes/cm (1%); pH 9 (1%); 83-85% act.; anionic
- Harol RG-71L** [Graden]  
*Chem. Descrip.:* Sodium polynaphthalene sulfonate  
CAS 9084-06-4  
*Uses:* Dye retardant, leveling agent; pitch dispersant for pulp/paper  
*Properties:* Liq.; 47.5% conc.; anionic
- Harsize** [Harima Chems.]  
*Uses:* Sizing agent for papermaking
- Hartafлот™ FA-5164** [Huntsman]  
*Chem. Descrip.:* Mainly C<sub>18</sub> acids  
*Uses:* Flotation deinking agent; pulp/paper surfactant; flotation collector at low water hardness; exc. runnability, enhanced coefficient of friction  
*Use Level:* 0.4-0.8%  
*Properties:* Solid
- Hartafлот™ FA-7451** [Huntsman]  
*Chem. Descrip.:* Tallow-based fatty acids  
*Uses:* Flotation deinking agent; pulp/paper surfactant; collector optimized for typ. fatty acid flotation conditions  
*Use Level:* 0.4-0.8%  
*Properties:* Liq. (40 C)
- Hartafлот™ G-5000** [Huntsman]  
*Uses:* Flotation deinking agent; pulp/paper surfactant, esp. for combination wash/flotation; works well over wide range of furnish types, pH, dosages, and temps.  
*Use Level:* 0.1-0.3%  
*Properties:* Liq.; nonionic
- Hartafлот™ P-621** [Huntsman]  
*Uses:* Flotation deinking agent esp. effective on flexographic ink; pulp/paper surfactant; post flotation collector for acid loops  
*Use Level:* 0.001-0.05%  
*Properties:* Liq.; water-sol.
- Hartafлот™ SE-6250** [Huntsman]  
*Chem. Descrip.:* Fatty acid nonionic blend  
*Uses:* Flotation deinking agent; pulp/paper surfactant; wash-flotation collector  
*Use Level:* 0.3-0.6%

- Properties:* Liq.; low visc.; nonionic
- Hartaflo™ SE-6400-1** [Huntsman]  
*Uses:* Flotation deinking agent; pulp/paper surfactant; effective for wash-flotation systems; performance benefits with ONP finish  
*Use Level:* 0.1-0.3%  
*Properties:* Liq.; nonionic
- Hartaflo™ SE-6405** [Huntsman]  
*Chem. Descrip.:* Fatty acid nonionic blend  
*Uses:* Flotation deinking agent; pulp/paper surfactant; enhanced particle collection; reduced collector carry-forward  
*Use Level:* 0.3-0.6%  
*Properties:* Liq. (40 C); nonionic
- Hartaflo™ SE-6500** [Huntsman]  
*Uses:* Flotation deinking agent; pulp/paper surfactant; removes ink during flotation even at high consistency  
*Use Level:* 0.1-0.3%  
*Properties:* Liq.; nonionic
- Hartaflo™ SE-6600** [Huntsman]  
*Uses:* Flotation deinking agent; pulp/paper surfactant; flotation collector; high brightness, low fiber loss; provides optimum ink removal at flotation stage  
*Use Level:* 0.1-0.3%  
*Properties:* Liq.; nonionic
- Hartaflo™ SE-6620** [Huntsman]  
*Chem. Descrip.:* Fatty acids, C-14-18, ethoxylated, propoxylated  
 CAS 68154-31-4  
*Uses:* Flotation deinking agent; pulp/paper surfactant; flotation collector; high brightness; low fiber loss; provides optimum ink removal at flotation stage  
*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §311 acute hazard  
*Properties:* Liq.; sol. < 10% in water; sp.gr. 1.05; visc. > 20 cSt (40 C); b.p. > 150 C; flash pt. (PMCC) > 150 C; pH 7; 100% act.  
*Toxicology:* May cause eye irritation, injury to cornea; may cause sl. skin irritation on brief contact, severe irritation on prolonged contact; may cause nose/throat irritation, headache, nausea, drowsiness on inh.; ing. may cause nausea, diarrhea; TSCA listed  
*Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones  
 HMIS: Health 2; Flammability 1; Reactivity 0
- Hartasperse™ DI-6** [Huntsman]  
*Uses:* Pulp/paper surfactant; deinking agent  
*Properties:* Liq.; 100% act.; nonionic
- Hartasperse™ DI-2609** [Huntsman]  
*Uses:* Pulp/paper surfactant; wash deinking agent; optimizes ink removal during initial wash stages  
*Use Level:* 0.4-0.8%  
*Properties:* Liq.; nonionic
- Hartasperse™ DI-2710** [Huntsman]  
*Uses:* Pulp/paper surfactant; wash deinking agent for ledger and wh. grades; low foam  
*Use Level:* 0.1-0.5%  
*Properties:* Liq.; nonionic
- Hartasperse™ DI-2805** [Huntsman]  
*Uses:* Pulp/paper surfactant; wash deinking agent; prevents ink deposition; low foam and low toxicity  
*Use Level:* 0.4-0.8%  
*Properties:* Liq.; nonionic
- Hartasperse™ DI-2915** [Huntsman]  
*Uses:* Pulp/paper surfactant; wash deinking agent; superior brightness; low foam; reduced residual surfactant carry-forward  
*Use Level:* 0.4-0.8%  
*Properties:* Liq.; nonionic
- Hartasperse™ DI-2920** [Huntsman]  
*Chem. Descrip.:* Ethoxylated C12-18 alcohols (60-74.99%), ethoxylated tall oil fatty acids (20-34.99%), water (10-19.99%)  
*Uses:* Pulp/paper surfactant; wash deinking agent; superior brightness; low foam; reduced residual surfactant carry-forward  
*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (0.001% residual EO), §311 acute hazard; CERCLA 102(a) hazard (EO)  
*Properties:* Liq.; sol. > 10% in water; sp.gr. 1.05; flash pt. (PMCC) > 100 C; pH 7  
*Toxicology:* May cause skin/eye irritation, possible injury to cornea; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause

- abdominal discomfort, nausea, diarrhea; may contain < 100 ppm EO; TSCA listed
- Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones  
 HMIS: Health 2; Flammability 1; Reactivity 0  
*Storage:* Avoid storage temps. below freezing (32 F)
- Hartasperse™ DI-2940** [Huntsman]  
*Chem. Descrip.:* Ethoxylated propoxylated C16-18 alcohols (35-49.99%), ethoxylated tall oil fatty acids (35-49.99%), EO/PO copolymer (3-9.99%), water (3-9.99%)  
*Uses:* Pulp/paper surfactant; wash deinking agent; superior brightness; low foam; reduced residual surfactant carry-forward  
*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (residual EO 0.001%, residual PO 0.001%), §311 acute hazard; CERCLA 102(a) hazard  
*Properties:* Liq.; sol. > 10% in water; sp.gr. 1.03; flash pt. (PMCC) > 100 C; pH 7  
*Toxicology:* May cause skin/eye irritation, possible injury to cornea; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause abdominal discomfort, nausea, diarrhea; may contain < 100 ppm EO; TSCA listed
- Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones  
 HMIS: Health 2; Flammability 1; Reactivity 0  
*Storage:* Avoid storage temps. below freezing (32 F)
- Hartasperse™ DI-3670** [Huntsman]  
*Chem. Descrip.:* Proprietary  
*Uses:* Pulp/paper surfactant; wash deinking agent; superior brightness; low foam; reduced residual surfactant carry-forward  
*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (residual EO 0.001%), §311 acute hazard; CERCLA 102(a) hazard (residual EO 0.001%)  
*Properties:* Yel.-lt. brn. liq.; fatty acid odor; sol. 0.1-1% in water; sp.gr. 0.993-1.00; visc. 46 cSt (40 C); flash pt. (PMCC) > 106 C; pH 4-6  
*Toxicology:* May cause skin/eye irritation, possible injury to cornea; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause abdominal discomfort, nausea, diarrhea; may contain < 100 ppm EO; TSCA listed
- Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones  
 HMIS: Health 2; Flammability 1; Reactivity 0
- Hartasperse™ DI-4670** [Huntsman]  
*Chem. Descrip.:* Proprietary  
 UN No. 3082  
*Uses:* Pulp/paper surfactant; wash deinking agent; superior brightness; low foam; reduced residual surfactant carry-forward  
*Regulatory:* OSHA hazardous; DOT environmentally hazardous; SARA §302/304 extreme hazard (residual EO 0.001%), §311 acute hazard; CERCLA 102(a) hazard (residual EO 0.001%)  
*Properties:* Clear to hazy liq.; ethoxylated alcohol odor; sol. > 10% in water; sp.gr. 0.988-1.00; visc. 50 cSt (40 C); b.p. > 100 C; flash pt. (PMCC) > 106 C; pH 4-6; VOC < 1%  
*Toxicology:* Causes eye irritation, cornea injury; may cause respiratory tract irritation, skin irritation; inh. may cause nose/throat discomfort, nasal discharge, coughing; ing. may cause abdominal discomfort, nausea, diarrhea; may contain < 100 ppm EO; TSCA listed
- Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones  
 HMIS: Health 3; Flammability 1; Reactivity 0  
*Storage:* Minimize periods of exposure to high temps.; avoid water contamination
- Hartasperse™ DI-4900 Series** [Huntsman]  
*Uses:* Pulp/paper surfactant; wash deinking agent; increases pulp brightness  
*Properties:* Liq.; 100% act.; nonionic
- Hartasperse™ DI-6660** [Huntsman]  
*Chem. Descrip.:* Proprietary  
*Uses:* Pulp/paper surfactant; wash deinking agent; superior brightness; low foam; reduced residual surfactant carry-forward

- Regulatory:** OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (residual EO 0.001%), §311 acute hazard; CERCLA 102(a) hazard (residual EO 0.001%, glycol ethers 3-9.99%)
- Properties:** Wh. waxy solid; mild odor; sol. > 10% in water; sp.gr. 1.001-1.004 (65.5/25 C); visc. 75 cSt (37.8 C); m.p. 34 C; flash pt. (PMCC) 221 C; pH 5.5-8
- Toxicology:** Causes eye irritation, cornea injury; may cause respiratory tract irritation, skin irritation; inh. may cause nose/throat discomfort, nasal discharge, coughing; ing. may cause abdominal discomfort, nausea, diarrhea; may contain < 100 ppm EO; TSCA listed
- Hazardous Decomp. Prods.:** Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones
- HMIS:** Health 3; Flammability 1; Reactivity 0
- Storage:** Minimize periods of exposure to high temps.; avoid water contamination
- Hartasperse™ SE 6412 [Huntsman]**  
**Uses:** Pulp/paper surfactant; deinking agent for flotation and combination systems  
**Properties:** Liq.; 100% act.; nonionic
- Hartasperse™ SE 6440 [Huntsman]**  
**Uses:** Pulp/paper surfactant; deinking agent  
**Properties:** Liq.; 100% act.; nonionic
- Hartasperse™ SE 7311 [Huntsman]**  
**Uses:** Pulp/paper surfactant; deinking agent for flotation and combination systems  
**Properties:** Liq.; 100% act.; nonionic
- Hartasperse™ T-502 [Huntsman]**  
**Chem. Descrip.:** Proprietary  
**Uses:** Wash deinking agent for making tissue from recycled mixed office waste  
**Regulatory:** OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (residual EO 0.001%, PO 0.001%), §311 acute hazard; CERCLA 102(a) hazard (glycol ethers 3-9.99%, EO 0.001%, PO 0.001%)  
**Properties:** Clear to hazy liq.; mild odor; sol. > 10% in water; sp.gr. 1.018; visc. 88 cSt (37.7 C); flash pt. (PMCC) 235 C; pH 6-8; nonionic  
**Toxicology:** May cause eye/skin irritation, possible injury to cornea; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause abdominal discomfort, nausea, diarrhea; may contain < 100 ppm EO and/or PO; TSCA listed  
**Hazardous Decomp. Prods.:** Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones  
**HMIS:** Health 2; Flammability 1; Reactivity 0  
**Storage:** Minimize periods of exposure to high temps.; avoid water contamination
- Hartasperse™ T-503 [Huntsman]**  
**Chem. Descrip.:** Proprietary  
**Uses:** Wash deinking agent for making tissue from recycled mixed office waste  
**Regulatory:** OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (residual EO 0.001%, PO 0.001%), §311 acute hazard; CERCLA 102(a) hazard (glycol ethers 3-9.99%, EO 0.001%, PO 0.001%)  
**Properties:** Clear to hazy liq.; mild odor; sol. > 10% in water; sp.gr. 1.018; visc. 88 cSt (37.7 C); flash pt. (PMCC) 235 C; pH 6-8; nonionic

**Hazardous Decomp. Prods.:** Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones  
**HMIS:** Health 2; Flammability 1; Reactivity 0  
**Storage:** Minimize periods of exposure to high temps.; avoid water contamination
- Hartfloc® 207 [Huntsman]**  
**Uses:** Pulp/paper surfactant; coagulant for pulp/paper mill water treatment; strong coagulant for DAF clarifiers requiring 25% less than typ. coagulants  
**Use Level:** 40-80 ppm  
**Properties:** Liq.; water-sol.; high m.w.; cationic
- Hartfloc® 210 [Huntsman]**  
**Uses:** Pulp/paper surfactant; flocculant for pulp/paper mill water treatment; strong flocculant for DAF clarifiers, effective at third of dosage required by typ. flocculants; forms lg. flocs that rise quickly  
**Use Level:** 30-70 ppm  
**Properties:** Liq.; fully water-sol.; high m.w.; cationic
- Hartfloc® 401 [Huntsman]**  
**Chem. Descrip.:** Polydimethyldiallylammonium chloride (35-49.99%) in water CAS 26062-79-3  
**Uses:** Charge control agent used in wet end of stock feeding paper machine; high charge  
**Regulatory:** OSHA hazardous; DOT nonregulated; SARA §302/304/311/313 nonreportable; CERCLA 102(a) nonreportable  
**Properties:** Yel. liq.; sl. odor; sol. > 10% in water; sp.gr. 1.085; visc. 2765 cSt (40 C); flash pt. > 100 C; pH 6.5; cationic  
**Toxicology:** May cause eye/skin irritation, possible injury to cornea; inh. may cause nose/throat discomfort, nasal discharge, coughing, difficulty breathing; ing. may cause abdominal discomfort, nausea, diarrhea; may contain particulates, residual acrylamide; TSCA listed  
**Precaution:** Incompat. with strong oxidizing agents; aq. sol'ns. or powds. that become wet render surfs. extremely slippery  
**Hazardous Decomp. Prods.:** Hydrogen chloride, NO<sub>x</sub>, CO<sub>x</sub>  
**HMIS:** Health 0; Flammability 1; Reactivity 0  
**Storage:** Minimize periods of exposure to high temps.; avoid storage temps. below freezing (32 F)
- Hartfloc® 409 [Huntsman]**  
**Uses:** Pulp/paper surfactant; separates ink from fiber in pulp/paper mill water streams; act. froth flotation equip. is preferred  
**Use Level:** 80-120 ppm  
**Properties:** Liq.; high m.w.
- Hartfloc® 425 [Huntsman]**  
**Chem. Descrip.:** Poly (2-hydroxypropyl-N,N-dimethyl ammonium chloride) (40-59.99%) in water CAS 42751-79-1  
**Uses:** High charge polymer used in water clarification; retention aid; low m.w.  
**Regulatory:** OSHA nonhazardous; DOT nonregulated; SARA §302/304/311/313 nonreportable; CERCLA 102(a) nonreportable  
**Properties:** Yel. visc. liq.; mild odor; sol. > 10% in water; sp.gr. 1.16; visc. 300 cSt (40 C); b.p. 100 C; flash pt. (PMCC) > 100 C; pH 6; cationic  
**Toxicology:** Causes eye irritation; prolonged skin contact may cause defatting or irritation; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause abdominal discomfort, nausea, diarrhea; TSCA listed  
**Precaution:** Incompat. with strong oxidizing agents  
**Hazardous Decomp. Prods.:** Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones on burning; heating in air may produce irritating aldehydes, acids, ketones  
**HMIS:** Health 1; Flammability 1; Reactivity 0  
**Storage:** Minimize periods of exposure to high temps.; avoid water contamination; do not use copper and alloys for storage/shipping containers
- Hartfloc® A-40 [Huntsman]**  
**Chem. Descrip.:** Acrylic polymer aq. sol'n.  
**Uses:** Prevents decomp. of hydrogen peroxide due to presence of metals, esp. iron and chromium; scale inhibitor in deink plant, caustic makeup systems, at paper machine and cooling water  
**Use Level:** 0.25 lb/ton  
**Regulatory:** OSHA hazardous; DOT nonregulated; SARA §302/304/ nonreportable, §311 acute hazard; CERCLA 102(a) nonreportable  
**Properties:** Amber liq.; mild odor; sol. > 10% in water; sp.gr. 1.1-1.2; visc. 3-5 cSt; b.p. 100 C; flash pt. > 100 C; pH 7-9  
**Toxicology:** May cause eye/skin irritation, possibly injury to cornea; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause abdominal discomfort, nausea, diarrhea; aspiration may cause lung damage; TSCA listed  
**Hazardous Decomp. Prods.:** Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones  
**HMIS:** Health 2; Flammability 1; Reactivity 0  
**Storage:** Minimize periods of exposure to high temps.
- Hartfloc® A-414 [Huntsman]**  
**Chem. Descrip.:** 2-Propenoic acid, polymer with 2-propenamide (CAS 9003-06-9, 20-35%), hydrotreated lt. petrol. distillate (CAS 64742-47-8, 3-10%), water  
**Uses:** In water clarification in dissolved air flotation clarifiers; high m.w.  
**Regulatory:** OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (acrylamide 0-0.0999%), §311/313 nonreportable; CERCLA 102(a)

hazard (acrylamide 0-0.0999%)

*Properties:* Opaque visc. liq.; sol. > 10% in water; sp.gr. 1.06; visc. 1130 cSt (40 C); flash pt. > 100 C; pH 7.5; anionic

*Toxicology:* May cause eye/skin irritation, possible injury to cornea; inh. may cause nose/throat discomfort, nasal discharge, coughing, difficulty breathing; ing. may cause abdominal discomfort, nausea, diarrhea; may contain particulates, < 1000 ppm acrylamide; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents; aq. sol'n.s. or powds. that become wet render surfs. extremely slippery

*Hazardous Decomp. Prods.:* Hydrogen chloride, NO<sub>x</sub>, CO<sub>x</sub>

HMIS: Health 0; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.

#### Hartfloc® C-470 [Huntsman]

*Chem. Descrip.:* Polyquaternium-5 (90-96.99%), adipic acid (3-9.99%)

*Uses:* Drainage aid in belt press operation; nonvolatile

*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (acrylamide 0-0.0999%), §311/313 nonreportable; CERCLA 102(a) hazard (adipic acid 3-9.99%, acrylamide 0-0.0999%)

*Properties:* Wh. powd.; sol. 1-10% in water; sp.gr. 0.75; flash pt. > 93.3 C; pH 4 (1% aq.); cationic

*Toxicology:* May cause eye/skin/nose/throat irritation; ing. may cause abdominal discomfort, nausea, diarrhea; overexposure to dust may cause respiratory irritation; chronic exposure may damage lungs; may contain particulates, < 1000 ppm acrylamide; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* Hydrogen chloride, NO<sub>x</sub>, CO<sub>x</sub>

HMIS: Health 1; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.; avoid water contamination

#### Hartfloc® C-475 [Huntsman]

*Chem. Descrip.:* Ethanaminium, N,N,N-trimethyl-2-[(1-oxo-2-propenyl) oxy]-chloride, polymer with 2-propenamamide

CAS 69418-26-4

*Uses:* Low charge polymer used in dissolved air flotation clarifiers; high m.w.; nonvolatile

*Use Level:* 2 lb/ton

*Regulatory:* OSHA nonhazardous; DOT nonregulated; SARA §302/34 extreme hazard (acrylamide 0-0.0999%), §311/313 nonreportable; CERCLA 102(a) hazard (acrylamide 0-0.0999%)

*Properties:* Wh. powd.; sol. 1-10% in water; sp.gr. 0.85; flash pt. > 93.3 C; pH 3.5 (0.5% aq.); 100% act.; cationic

*Toxicology:* May cause eye/skin/nose/throat irritation; overexposure to dust may cause respiratory irritation; chronic exposure may damage lungs; ing. may cause abdominal discomfort, nausea, diarrhea; may contain particulates, < 1000 ppm acrylamide; TSCA listed

*Precaution:* Incompat. with strong oxidizing agents; aq. sol'n.s. or powds. that become wet render surfs. extremely slippery

*Hazardous Decomp. Prods.:* Hydrogen chloride, NO<sub>x</sub>, CO<sub>x</sub>

HMIS: Health 0; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.; avoid water contamination

#### Hartfloc® Anionic Series [Huntsman]

*Uses:* Pulp/paper surfactant; flocculant for pulp/paper mill water treatment

*Use Level:* 15-40 ppm

*Properties:* Emulsion; m.w. over 20,000,000; anionic

#### Hartfloc® Cationic Series [Huntsman]

*Uses:* Pulp/paper surfactant; coagulant for pulp/paper mill water treatment; effective in high turbidity water across wide pH range

*Use Level:* 80-150 ppm

*Properties:* Liq.; m.w. up to 250,000; cationic

#### Hartomer™ N40V [Huntsman]

*Chem. Descrip.:* Acrylic polymer aq. sol'n.

*Uses:* Sludge drainage aid

*Use Level:* 2-4 lb/ton

*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304/313 nonreportable, §311 acute hazard; CERCLA 102(a) nonreportable

*Properties:* Liq.; sol. > 10% in water; sp.gr. 1.0-1.4; visc. 10-30 cSt; b.p. 100 C; flash pt. > 100 C; pH 6-8

*Toxicology:* May cause eye/skin irritation, possible injury to cornea; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause abdominal discomfort, nausea, diarrhea; aspiration may damage lungs; TSCA listed

*Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones

HMIS: Health 2; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.

#### Hartomer™ RB-25 [Huntsman]

*Chem. Descrip.:* Proprietary

*Uses:* Rebonder, dry str. resin for tissue paper; added at wet end of debonder

*Use Level:* 40 lb/ton

*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304/313 nonreportable, §311 acute hazard; CERCLA 102(a) nonreportable

*Properties:* Liq.; starch-like odor; sol. > 10% in water; sp.gr. 1.08; visc. 900 cSt; f.p. 5 C; b.p. 100 C; pH 7; VOC 65-80%; 22% act.

*Toxicology:* May cause eye/skin irritation; inh. of high concs. may cause minimal irritation; ing. may cause abdominal discomfort, nausea, diarrhea; TSCA listed

HMIS: Health 1; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.

#### Hartosoft™ 85S [Huntsman]

*Chem. Descrip.:* Quaternary salt

UN No. 2810

*Uses:* Debonder for paper applics.; provides debonding without undue loss in absorbency

*Use Level:* 8-14 lb/ton

*Regulatory:* OSHA hazardous; DOT toxic liq., org., N.O.S.; SARA §302/304 extreme hazard (residual EO 0.001%), §311 acute hazard, §313 nonreportable; CERCLA 102(a) hazard (residual EO 0.001%)

*Properties:* Dk. amber liq.; mild odor; sol. < 0.1% in water; sp.gr. 1.0; visc. 550-750 cSt; flash pt. > 107 C; pH 5.5-7.0

*Toxicology:* Toxic by ing.; causes abdominal discomfort, nausea, vomiting, diarrhea, collapse, possibly death; causes eye/skin irritation, possibly blindness; inh. may cause nose/throat irritation, nasal discharge, coughing; may contain < 10 ppm EO; TSCA listed

*Hazardous Decomp. Prods.:* Toxic levels of ammonia, combustion prods. of N, CO, CO<sub>2</sub>, irritating aldehydes and ketones may be formed on burning in limited air supply

HMIS: Health 3; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.

#### Hartosoft™ 333CP [Huntsman]

*Chem. Descrip.:* Imidazolium compds.

*Uses:* Softener, debonder for tissue paper; added in wet end

*Use Level:* 9-24 lb/ton

*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304/313 nonreportable, §311 acute hazard; CERCLA 102(a) nonreportable

*Properties:* Amber brn. liq.; amine odor; sol. < 0.1% in water; sp.gr. 1.01; visc. 103 cSt (40 C); flash pt. (PMCC) > 107 C; pH 5.5-9

*Toxicology:* Causes eye/skin irritation, cornea injury; inh. may cause nose/throat irritation, nasal discharge, coughing; mod. toxic by ing.; may cause abdominal discomfort, nausea, vomiting, diarrhea; TSCA listed

*Hazardous Decomp. Prods.:* Toxic levels of ammonia, combustion prods. of N, CO, CO<sub>2</sub>, irritating aldehydes and ketones may be formed on burning in limited air supply

HMIS: Health 3; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.

#### Hartosoft™ 1500-78 [Huntsman]

*Chem. Descrip.:* Imidazolium compds.

UN No. 2810

*Uses:* Softener, lubricant for paper applics.; added at dry end during winding or in converting operations

*Use Level:* 10-12 lb/ton

*Regulatory:* OSHA hazardous; DOT toxic liq., org., N.O.S.; SARA §302/304/313 nonreportable, §311 acute hazard; CERCLA 102(a) nonreportable

*Properties:* Amber liq.; mild odor; sol. < 0.1% in water; sp.gr. 1.029; visc. 100 cSt (40 C); flash pt. (PMCC) 102.8 C; pH 6-9

*Toxicology:* Toxic by ing.; causes abdominal discomfort, nausea, vomiting, diarrhea, possibly death; causes eye/severe skin irritation; may cause blindness; inh. may cause nose/throat irritation, nasal discharge, coughing, difficulty breathing; TSCA R&D material

*Hazardous Decomp. Prods.:* Toxic levels of ammonia, combustion prods. of N, CO, CO<sub>2</sub>, irritating aldehydes and ketones may be formed on burning in limited air supply

HMIS: Health 3; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.

**Hartosoft™ 1540B1** [Huntsman]*Chem. Descrip.:* Imidazolium compds.*Uses:* Softener, lubricant for paper applics.; added in wet end*Use Level:* 12 lb/ton*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304/313 nonreportable, §311 acute hazard; CERCLA 102(a) nonreportable*Properties:* Amber clear liq.; mild odor; sol. 1-10% in water; sp.gr. 1.01; visc. 125 cSt (40 C); f.p. 5 C; flash pt. (PMCC) > 93.3 C; pH 6-9*Toxicology:* Causes eye/skin irritation, cornea injury; mod. toxic by ing.; may cause abdominal discomfort, nausea, vomiting, diarrhea; inh. may cause nose/throat irritation, nasal discharge, coughing, difficulty breathing; TSCA R&D material*Hazardous Decomp. Prods.:* Toxic levels of ammonia, combustion prods. of N, CO, CO<sub>2</sub>, irritating aldehydes and ketones may be formed on burning in limited air supply

HMIS: Health 3; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.**Hartosoft™ ABS-6000** [Huntsman]*Chem. Descrip.:* Fatty acid ethoxylate*Uses:* Absorbency aid in mfg. of tissue paper; counteracts dec. in absorbency due to use of debonder*Use Level:* 1-2 lb/ton*Regulatory:* OSHA hazardous; DOT nonregulated; SARA §302/304 extreme hazard (residual EO 0.001%), §311 acute hazard, §313 nonreportable; CERCLA 102(a) hazard (residual EO 0.001%)*Properties:* Yel. clear liq.; odorless; sol. > 10% in water; sp.gr. 1.04; visc. > 20 cSt (40 C); flash pt. (PMCC) > 100 C; pH 5-7*Toxicology:* May cause eye/skin irritation, possibly cornea injury; inh. may cause nose/throat irritation, headache, nausea, drowsiness; ing. may cause abdominal discomfort, nausea, diarrhea; may contain < 100 ppm EO; TSCA listed*Hazardous Decomp. Prods.:* Toxic levels of CO, CO<sub>2</sub>, irritating aldehydes and ketones may be formed on burning; heating in air may produce irritating aldehydes, acids, and ketones

HMIS: Health 2; Flammability 1; Reactivity 0

*Storage:* Minimize periods of exposure to high temps.; avoid water contamination**Hartosoft™ DBS-1527** [Huntsman]*Chem. Descrip.:* Quaternary salt

UN No. 1760

*Uses:* Surfactant for fiber debonding in mfg. of tissue paper; added in wet end*Use Level:* 5-15 lb/ton*Regulatory:* OSHA hazardous; DOT corrosive liqs., N.O.S.; SARA §302/304/313 nonreportable, §311 acute hazard; CERCLA 102(a) hazard (diethyl sulfate 0-0.0999%)*Properties:* Orange to brn. visc. liq.; mild odor; sol. < 0.1% in water; sp.gr. 0.997-1.00; visc. 140-280 cSt (40 C); flash pt. 113 C; pH 5-7.5 (1% aq.); cationic*Toxicology:* Causes eye/skin irritation, possible blindness; inh. may cause nose/throat irritation, nasal discharge, coughing, difficulty breathing; ing. may cause abdominal discomfort, nausea, diarrhea; TSCA R&D material*Hazardous Decomp. CAS 8050-13-3; EINECS/ELINCS 232-476-2

*Uses:* Plasticizer, tackifier in finished prods. such as lacquers, inks, cements, adhesives, floor tiles, vinyl plastisols, artificial leather, and antifouling paints; fixative and carrier in perfumes and cosmetic preps.; plasticizer, softener, tackifier for CR, NR, SBR, reclaim rubber, latexes; processing aid and pigment dispersant in rubber; tackifier in cement; food pkg. adhesives, coatings, paper, polymers*Regulatory:* FDA 21CFR §73.1(b), 172.515, 172.615, 175.105, 175.125, 175.300, 175.320, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.2600, 178.3120, 178.3800, 178.3850, 178.3870*Properties:* Lt. amber visc. liq.; low resinous odor; sol. in ester, ketones, alcohols, ethers, coal tar, petrol. hydrocarbons, and veg. and min. oils; insol. in water; dens. 1.02 kg/l; visc. (G-H) Z2-Z3; vapor pressure < 0.1 mm Hg (20 C); b.p. 360-364 C; acid no. 7; sapon. no. 155; flash pt. (Seta CC) 198 C; ref. index 1.52

*Toxicology:* May cause skin sensitization; TSCA listed  
*Hazardous Decomp. Prods.:* Combustion prods.: CO, CO<sub>2</sub>, smoke  
 HMIS: Health 0; Flammability 1; Reactivity 0

**Hercules® 4 Defoamer** [Hercules]

*Uses:* Defoamer for acid and alkaline papermaking systems, deinking systems; high-efficiency

*Regulatory:* FDA compliance

*Properties:* Brick, soapy odor; sp.gr. 0.96; m.p. 54 C; 100% conc.

**Hercules® 37M6-8** [Hercules]

*Chem. Descrip.:* Formaldehyde sol'n.

CAS 50-00-0; EINECS/ELINCS 200-001-8

*Uses:* For mfg. of syn. resins by reaction with phenols, urea, melamines for molded goods, elec. insulation, binders, plywood adhesives, varnishes, wet-str. resins for paper and textiles; chem. intermediate

**Hercules® 2043** [Hercules]

*Chem. Descrip.:* Polyamide/epichlorohydrin aq. sol'n.

*Uses:* Vehicle for water-based flexographic inks, dye- and pigment-based inks; provides bleedfastness and rub resist. to tissue and towel inks; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Liq.; water-sol.; sp.gr. 1.080; visc. 75-95 cps; f.p. 28 F; pH 2.5-3.0; 27% total solids, 12.8% N; cationic

*Precaution:* Incompat. with anionic resins, e.g., shellac

*Storage:* Undergoes some hydrolysis and self-crosslinking during storage; 3 mos shelf life when stored below 90 F

**Heucospere™ I** [Heucotech Ltd]

*Chem. Descrip.:* Organic pigment disps. in aq. acrylic resin sol'n.

*Uses:* Pigments for cost-effective coloring of kraft paper and corrugated board; some designed for improved adhesion

**Heveatex NR** [Heveatex]

*Chem. Descrip.:* Natural rubber latexes and compds.

CAS 9006-04-6

*Uses:* Used for adhesive dipping compds., foam compds., coatings for textiles, paper, etc.; pre vulcanized

**Hi-Mar DFC-21** [Hi-Mar Spec.; Thornley]

*Uses:* Defoamer for paper coatings, adhesives, and high gloss latex paints; promotes defect-free surf. films; compat. with most paper coatings containing latex, polyvinyl alcohol, starch, and clay

*Properties:* Water disp.; 100% act.; nonionic

**Hi-Mar DFC-26** [Hi-Mar Spec.; Thornley]

*Uses:* Defoamer for use in paper coatings; exc. clean-up props.

*Properties:* 100% act.

**Hi-Mar DFI-51** [Hi-Mar Spec.; Thornley]

*Uses:* Defoamer for paper coatings, adhesives, latex paints, flexo inks; rescue agent for wastewater systems; controls foam in latex stripping, incl. carboxylated SB latex; oil-free; promotes films free from surf. defects; environmentally safe; good color acceptance

*Properties:* 100% act.

**Hi-Mar DFI-51-S** [Hi-Mar Spec.; Thornley]

*Uses:* Defoamer for use in paper coatings; rescue agent for wastewater systems; controls foam in latex stripping, incl. carboxylated SB latex; stabilized version of Hi-Mar DFI-51; oil-free; promotes films free from surf. defects; environmentally safe

*Properties:* 100% act.

**Hi-Mar DFP-31** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil-based

*Uses:* Defoamer for pulp mill effluent systems; rescue agent for microbiological foam; silica-free

*Properties:* 100% act.

**Hi-Mar DFP-101** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Proprietary blend of fatty alcohols and surfactants

*Uses:* Effluent defoamer for kraft and sulfite screen room operations; reduces entrained air at surf. and potential for downstream deposits

**Hi-Mar DFP-153** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Defoamer, drainage aid for kraft mill screen room applics.; rapid bubblebreak

**Hi-Mar DFP-201** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Amide/silica brownstock defoamer for paper machine applics. with high temp. linerboard; defoamer in power and recovery systems; effective on hardwood and softwood

**Hi-Mar DFP-203** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Proprietary blend of surfactants, silicones in water

*Uses:* Defoamer, drainage aid for pulp mill effluent, kraft and sulfite screen room operations; brownstock defoamer; rapid knockdown of foam

**Hi-Mar DFP-205** [Hi-Mar Spec.; Thornley]

*Uses:* Defoamer, drainage aid for pulp mill effluent; provides drainage in kraft mill brownstock washer operations; fast knockdown with min. carryover to downstream operations; fast spreading; persistent

*Properties:* Nonionic

**Hi-Mar DFP-213** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Proprietary blend of surfactants in water-based formulation

*Uses:* Defoamer for pulp mill effluent and paper machine, screening, and bleaching operations; rec. where high temps. are not present; amide- and oil-free; fast spreading

**Hi-Mar DFP-301** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Proprietary

*Uses:* Defoamer, drainage aid for kraft mills; enhances drainage in softwood and hardwood; reduces amt. of downstream defoamer needed; oil-free; does not interfere with oxygen delignification processes; reduces salt cake losses and potential for pitch

*Properties:* 100% act.

**Hi-Mar DFP-401** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Brownstock defoamer effective on hardwood and softwood; defoamer on systems with oxygen delignification; low wax and silica

*Properties:* 100% act.; nonionic

**Hi-Mar DFP-403** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Brownstock defoamer effective on hardwood and softwood; low wax and amide content; rapid spreader

**Hi-Mar DFP-405** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Amide/silica brownstock defoamer effective on hardwood and softwood; exc. carry through to second and third stage washers

**Hi-Mar DFP-411** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Brownstock defoamer effective on hardwood and softwood, and deckers; amide-free; fast spreading; reduces pitch deposition and exc. carry through

**Hi-Mar DFP-413** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Oil base

*Uses:* Brownstock defoamer effective on hardwood and softwood; amide-free; rapid foam control and exc. carry through; reduces potential for pitch deposits

**Hi-Mar DFP-503** [Hi-Mar Spec.; Thornley]

*Chem. Descrip.:* Organo-metallic oil-based defoamer

*Uses:* Defoamer for pulp mill effluent; rescue agent; fast spreading; persistent

**Hi Selon** [Nippon Gohsei; British Traders & Shippers]

*Chem. Descrip.:* Polyvinyl alcohol film

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* For paper and pkg.

*Properties:* Hot and cold water sol.

**Hitex-S103** [Hansol]

*Chem. Descrip.:* Carboxylated styrene-butadiene copolymer latex

*Uses:* Binder for web offset printing coated paper and lightweight sheet-offset printing coated paper; high blistering resist.; exc. coater runnability; good chem./mech. stability; good high and low shear visc.; low screen residues

*Regulatory:* Nonhazardous by Int'l. transport regs.

*Properties:* Wh. opaque liq.; visc. 200 cps max.; pH 7.5-8.5; surf. tens. 48-68 dynes/cm; 49-51% solids

*Storage:* Store @ 5-35 C; protect from frost and direct sunlight; if frozen, thaw gradually and stir before use; avoid aluminum, copper and alloy storage vessels or pipework

**Hitex-S107** [Hansol]

*Chem. Descrip.:* Carboxylated styrene-butadiene copolymer latex

*Uses:* Binder for coated paper and board; exc. smoothness, gloss and ink transferability for offset printing, esp. rotogravure printing; high shear stability; exc. runnability

*Regulatory:* Nonhazardous by Int'l. transport regs.

*Properties:* Wh. opaque liq.; visc. 300 cps max.; pH 7-8; surf. tens. 48-68 dynes/cm; 49-51% solids

*Storage:* Store @ 5-35 C; protect from frost and direct sunlight; if frozen, thaw

gradually and stir before use; avoid aluminum, copper and alloy storage vessels or pipework

**Hitex-S108** [Hansol]

*Chem. Descrip.:* Carboxylated styrene-butadiene copolymer latex

*Uses:* Binder for coated paper and board; exc. smoothness, gloss and ink transferability for offset printing; exc. water resist.; high shear stability; exc. runnability; high dry and wet pick str.; exc. coating coverage; represses dust in coating and calendaring processes

*Regulatory:* Nonhazardous by Int'l. transport regs.

*Properties:* Wh. opaque liq.; visc. 400 cps max.; pH 7-8; surf. tens. 45-65 dynes/cm; 49-51% solids

*Storage:* Store @ 5-35 C; protect from frost and direct sunlight; if frozen, thaw gradually and stir before use; avoid aluminum, copper and alloy storage vessels or pipework

**Hitex-S301** [Hansol]

*Chem. Descrip.:* Carboxylated styrene-butadiene copolymer latex

*Uses:* Binder for coated paper and board; sm. particle size; high speed runnability; exc. fiber coverage; very high pick str.; good ink gloss

*Regulatory:* Nonhazardous by Int'l. transport regs.

*Properties:* Wh. opaque liq.; visc. 400 cps max.; pH 7-8; surf. tens. 48-68 dynes/cm; 49-51% solids

*Storage:* Store @ 5-35 C; protect from frost and direct sunlight; if frozen, thaw gradually and stir before use; avoid aluminum, copper and alloy storage vessels or pipework

**Hitox®** [TOR Mins.]

*Chem. Descrip.:* Rutile titanium dioxide

*Chem. Analysis:* TiO<sub>2</sub> (95%), Fe<sub>2</sub>O<sub>3</sub> (< 2%), SiO<sub>2</sub> (< 1%), moisture (< 0.5% @ 110 C)

CAS 1317-80-2; EINECS/ELINCS 236-675-5

*Uses:* Pigment used in coatings (alkyds, acrylic urethanes, high solids systems, water reducibles, water bases, powd. coatings), inks, adhesives, paper, foundry prods., building prods., caulks, sealants, floor tiles, in plastics for PVC pipe and conduit, color concs., vinyl siding; buff-colored, developed as alternative to wh. titanium dioxide

*Properties:* Beige fine powd., odorless; 1.5 µ avg. particle size; < 0.01% on 325 mesh; fineness (Hegman) 7; insol. in water; sp. gr. 4.1; dens. 34.22 lb/gal; bulk dens. 39.3 lb/ft<sup>3</sup> (pour), 65.5 lb/ft<sup>3</sup> (tapped); surf. area 1.124 m<sup>2</sup>/g; oil absorp. 24-25; m.p. ≈ 1840 C; b.p. 2500-3000 C; pH 6.5-7.5

*Toxicology:* ACGIH TLV 10 mg/m<sup>3</sup> (respirable); dust can cause lung irritation

*Precaution:* Nonflamm.

HMS: Health 0; Flammability 0; Reactivity 0

**HM-0814** [H.B. Fuller]

*Chem. Descrip.:* Polyamide hot-melt adhesive

*Uses:* Adhesive for fiber/foil tube winding operations with exc. adhesion to metals, foils, coated paper and other dense surfaces

**Hoechst Wax E** [Clariant]

*Chem. Descrip.:* Glycol/butylene glycol montanate

CAS 73138-45-1

*Uses:* Internal/external lubricant and release agent for PVC, polyolefins, polyamide, PS, linear polyester, TPU, thermosets; for sheet, film and bottle applics., esp. for tin stabilized systems; also for emulsion polishes, solv.-based paste polishes, carbon paper; binder for cosmetic powds.

*Regulatory:* Worldwide food approvals in plastics

*Properties:* Pale y/lsh. powd. (< 500 µm), fine powd. (< 125 µm), or flakes; insol. in water; dens. 1.01-1.03 g/cc (20 C); visc. ≈ 30 mm<sup>2</sup>/s (100 C); drop pt. 79-85 C; acid no. 15-20; sapon. no. 130-160

*Toxicology:* LD50 (oral, mouse) > 20,000 mg/kg

*Storage:* Store dry @ R.T.

**Hoechst Wax KSL** [Clariant]

*Chem. Descrip.:* Glycol/butylene glycol montanate

CAS 73138-45-1

*Uses:* Wax for polishes, esp. dry-bright emulsions, paper and film coating, emulsions for citrus fruit coating

**Hoechst Wax LP** [Clariant]

*Chem. Descrip.:* Montan acid wax

CAS 68476-03-9; EINECS/ELINCS 270-664-6

*Uses:* Lubricant for plastics; water repellent for textiles; emulsifier for paraffins in corrosion inhibitors; also for emulsion polishes, color bases, scouring waxes, industrial wax emulsions for textiles, paper, wood, etc.

*Properties:* Y/lsh. flakes; insol. in water; dens. 1.00-1.02 g/cc (20 C); visc. ≈ 30 mm<sup>2</sup>/s (100 C); drop pt. 82-89 C; acid no. 113-130; sapon. no. 140-160

**Hoechst Wax OP** [Clariant]

*Chem. Descrip.:* Butylene glycol montanate, calcium montanate

*Uses:* Internal/external lubricant and release agent for PVC, polyolefins, polyamide, PS, linear polyester, TPU, thermosets, etc.; protective, corrosion-inhibiting wax for metalworking; solv.-based polishes esp. pastes, carbon paper; maintains clarity of finished prod.; thickener for skin and hair creams

*Regulatory:* Worldwide food approvals for plastics

*Properties:* Y/lsh. flakes, powd. (< 500 µm) or fine powd. (< 125 µm); insol. in water; dens. 1.01-1.03 g/cc (20 C); visc. ≈ 300 mPa·s (120 C); drop pt. 98-104 C; acid no. 10-15; sapon. no. 100-120

*Toxicology:* LD50 (oral, mouse) > 20,000 mg/kg

*Storage:* Store dry @ R.T.

**Hoechst Wax PE 890** [Clariant]

*Chem. Descrip.:* Ethylene/VA copolymer

CAS 24937-78-8

*Uses:* Wax for paints and paper coatings; carrier for additive and pigment concentrates; modifier for hot-melt adhesives and coatings; food-contact adhesives/resinous/polymeric coatings

*Regulatory:* EC, FDA §175.105, 175.300, 177.1350 compliant

*Properties:* Almost wh. fine grain; insol. in water; sp. gr. 0.93-0.95; visc. ≈ 320 mPa·s; drop pt. 94-99 C

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg

*Environmental:* Nontoxic to fish

*Storage:* Keep in dry storage @ R.T.

**Hoechst Wax PED 121** [Clariant]

*Chem. Descrip.:* Oxidized polyethylene wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Wax for emulsions for citrus fruit coating and textiles; food-contact polymer; in resinous/polymeric food-contact coatings; in paper/paperboard in contact with aq./fatty foods

*Regulatory:* FDA 21CFR §172.260, 175.300, 176.170, 177.1620, etc.; BgVV approved

*Properties:* Almost wh. flakes; dens. 0.97-0.99 g/cm<sup>3</sup> (20 C); visc. ≈ 200 mPa·s; drop pt. 113-118 C; acid no. 16-19

*Storage:* Store dry @ R.T.

**Hoechst Wax PED 153** [Clariant]

*Chem. Descrip.:* Oxidized PE wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* For textile, leather, paper, and polish dispersions; modifier for hot-melts; release agent for various applics.

*Regulatory:* EC, BgVV compliant

*Properties:* Almost wh. flakes; sp. gr. 0.97-0.99; visc. ≈ 1500 mPa·s; acid no. 22-27; drop pt. 117-122 C

*Toxicology:* LD50 (oral, mouse) > 2000 mg/kg

*Environmental:* LC50 > 500 mg/l (golden orfe)

*Storage:* Keep in dry storage @ R.T.

**Hoechst Wax PED 521** [Clariant]

*Chem. Descrip.:* Polyethylene wax, polar

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* External lubricant for plasticized and unplasticized PVC, PA, TPU, other thermoplastics; reduces sticking of tin-stabilized PVC melts to hot machine parts; emulsions for textiles, leather, paper, and polishes

*Regulatory:* BGA approval

*Properties:* Flakes, fine grains

**Hoechst Wax PED 522** [Clariant]

*Chem. Descrip.:* Oxidized polyethylene

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Wax for emulsions for textiles, leather, paper, and polishes

*Properties:* Flakes, gran.

**Hoechst Wax PED 821** [Clariant]

*Chem. Descrip.:* Oxidized PE wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* For textile, leather, paper, glass industry, and polish dispersions; rheology control agent for paints and coatings; modifier for hot-melts and coatings; release agent for various applics.

*Regulatory:* EC, BgVV compliant; FDA §172.260, 175.105, 177.1620 compliant

*Properties:* Almost wh. fine grain; sp. gr. 0.94-0.96; visc. ≈ 180 mPa·s; acid no. 14-18; drop pt. 102-108 C

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg

*Environmental:* Nontoxic to fish and bacteria

*Storage:* Keep in dry storage @ R.T.

**Hoechst Wax PED 822** [Clariant]*Chem. Descrip.:* Oxidized PE wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* For textile, leather, paper, glass industry, and polish dispersions; rheology control agent for paints and coatings; modifier for hot-melts and coatings; release agent for various applics.*Regulatory:* EC, BgVV compliant; FDA §175.105 compliant*Properties:* Almost wh. fine grain; sp.gr. 0.94-0.96; visc.  $\approx$  120 mPa·s; acid no. 25-29; drop pt. 100-104 C*Toxicology:* LD50 (oral, rat) > 2000 mg/kg*Environmental:* Nontoxic to fish and bacteria*Storage:* Keep in dry storage @ R.T.**Hoechst Wax S** [Clariant]*Chem. Descrip.:* Montan acid wax

CAS 68476-03-9; EINECS/ELINCS 270-664-6

*Uses:* Lubricant and internal release agent for PVC, polyolefins, polyamide, PS, linear polyesters, TPU, thermosets, etc.; also for emulsion polishes, color bases, scouring waxes, industrial wax emulsions for textiles, paper, wood, etc.*Regulatory:* Worldwide food approvals for use in plastics*Properties:* Pale y/wh. powd. (< 500  $\mu$ m), fine powd. (< 125  $\mu$ m), or flakes; insol. in water; dens. 1.00-1.02 g/cc; visc.  $\approx$  30 mm<sup>2</sup>/s (100 C); drop pt. 81-87 C; acid no. 130-150; sapon. no. 155-175*Toxicology:* LD50 (oral, rat) > 15,000 mg/kg*Storage:* Store dry @ R.T.**Hoechst Wax UL** [Clariant]*Chem. CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler/extender for plastics, caulks/sealants, rubber, adhesives, glass, ceramics, paper, cleansers, paints/coatings, pesticides, asphalt, drilling mud, rice polishing, environmental cleanup

*Properties:* Med. fine powd.; 19 μ median particle size; 99.9% thru 60 mesh, 99% thru 100 mesh; bulk dens. 55 lb/ft<sup>3</sup> (loose); oil absorp. 12; brightness 84

**Hubercarb® Q 200T** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate, surface modified with 1% stearates

*Chem. Analysis:* CaCO<sub>3</sub> (96.5%), MgCO<sub>3</sub> (2%), SiO<sub>2</sub> (1.2%)

*Uses:* Filler/extender for plastics, caulks/sealants, rubber, adhesives, glass, ceramics, paper, cleansers, paints/coatings, pesticides, asphalt, drilling mud, rice polishing, environmental cleanup; dusting agent, mold release agent for rubber; surf. modification provides more rapid and complete dispersion in polymers, higher potential filler loadings, reduced abrasion to equip., less sensitivity to moisture

*Properties:* Oil absorp. 12

**Hubercarb® Q 325** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (96.5%), MgCO<sub>3</sub> (2%), SiO<sub>2</sub> (1.2%), moisture (0.1%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler/extender for plastics, caulks/sealants, rubber (NR, SR, latex), plastics, adhesives, glass, ceramics, paper, cleansers, paints/coatings, pesticides, asphalt, drilling mud, rice polishing, environmental cleanup; dusting agent; mold release; inorg. color extender; hardens or stiffens rubber stocks; disperses readily

*Properties:* Wh. med. fine powd.; 13 μ median particle size; 99.7% thru 200 mesh, 99.5% thru 325 mesh; bulk dens. 50 lb/ft<sup>3</sup> (loose); oil absorp. 14; brightness 86

**Hubercarb® W 2** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (99.3%), moisture (0.07%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler and extender for moisture-sensitive applics. such as SMC, BMC, TMC, polyethylene film and single-component urethane caulks, and for paints and coatings, rubber, adhesives, ceramics, paper, nonabrasive cleaners; low moisture pickup

*Properties:* Powd.; 2 μ median particle size; 100% finer than 10 μ; 89% finer than 5 μ; fineness (Hegman) 6.5; bulk dens. 50 lb/ft<sup>3</sup> (loose); oil absorp. 17; brightness 93

**Hubercarb® W 2T** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate, surface modified with 1% stearates

*Chem. Analysis:* CaCO<sub>3</sub> (99.3%), moisture (0.07%)

*Uses:* Filler and extender for moisture-sensitive applics. such as SMC, BMC, TMC, polyethylene film and single-component urethane caulks, and for paints and coatings, rubber, adhesives, ceramics, paper, nonabrasive cleaners; low moisture pickup; surface modification provides better dispersion in polymers, higher potential filler loadings, reduced abrasion to equip., less sensitivity to moisture

*Properties:* Powd.; 2 μ median particle size; 100% finer than 10 μ, 89% finer than 5 μ; fineness (Hegman) 6.5; bulk dens. 50 lb/ft<sup>3</sup> (loose); oil absorp. 16; brightness 93

**Hubercarb® W 3** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (99.3%), MgCO<sub>3</sub> (0.3%), cryst. silica (0.02%), moisture (0.07%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler and extender for moisture-sensitive applics. such as SMC, BMC, TMC, polyethylene film and single-component urethane caulks, and for paints and coatings, rubber, adhesives, ceramics, paper, nonabrasive cleaners; low moisture pickup

*Properties:* Powd.; 3 µ median particle size; 99.9% finer than 20 µ; 94% finer than 8 µ; fineness (Hegman) 6; bulk dens. 50 lb/ft<sup>3</sup> (loose); oil absorp. 15; brightness 93

**Hubercarb® W 3N** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (99.3%), MgCO<sub>3</sub> (0.3%), cryst. silica (0.02%), moisture (0.07%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler/extender for plastics, caulks/sealants, rubber, adhesives, ceramics, paper, cleansers, paints/coatings

*Properties:* Powd.; 3 µ median particle size; 99% finer than 20 µ, 50% finer than 3 µ; fineness (Hegman) 6; dens. 22.6 lb/solid gal; bulk dens. 50 lb/ft<sup>3</sup> (loose); oil absorp. 15; brightness 92

**Hubercarb® W 3T** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate, surface modified with 1% stearates

*Chem. Analysis:* CaCO<sub>3</sub> (99.3%), moisture (0.07%)

*Uses:* Filler and extender for moisture-sensitive applics. such as SMC, BMC, TMC, polyethylene film and single-component urethane caulks, and for paints and coatings, rubber, adhesives, ceramics, paper, nonabrasive cleaners; low moisture pickup; surface modification provides better dispersion in polymers, higher potential filler loadings, reduced abrasion to equip., less sensitivity to moisture

*Properties:* Powd.; 3 µ median particle size; 99.9% finer than 20 µ, 94% finer than 8 µ; fineness (Hegman) 6; bulk dens. 50 lb/ft<sup>3</sup> (loose); oil absorp. 15; brightness 93

**Hubercarb® W 4** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (99.3%), MgCO<sub>3</sub> (0.3%), cryst. silica (0.02%), moisture (0.05%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler and extender for moisture-sensitive applics. such as SMC, BMC, TMC, polyethylene film and single-component urethane caulks, and for paints and coatings, rubber, adhesives, ceramics, paper, nonabrasive cleaners; low moisture pickup

*Properties:* Powd.; 4 µ median particle size; 99.5% fthr4u 325 mesh; 92% finer than 20 µ; fineness (Hegman) 6; bulk dens. 55 lb/ft<sup>3</sup> (loose); oil absorp. 13; brightness 92

**Huberfil® 96** [J.M. Huber/Chems.]

*Chem. Descrip.:* Silicate

*Uses:* Paper filler

*Properties:* 4 µm avg. particle size; surf. area 60 m<sup>2</sup>/g; oil absorp. 120 cc/100 g; pH 10.5(20%)

**H-White** [Huber Engineered Materials]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (97.7%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Functional filler extender used in coatings, plastic and rubber fillers, building prods., ceramics flux, paper fillers, adhesives, cleaning compds., polishes

*Properties:* Wh. irreg., uniaxial particles; particle size 3.0 µ 99.99% thru 500 mesh; water-sol.; sp.gr. 2.71; dens. 22.6 lb/solid gal, 45 lb/ft<sup>3</sup>; oil absorp. 16 lb oil/100 lb; ref. index 1.6; hardness (Mohs) 3

**Hyamine® 3500 50%** [Lonza]

*Chem. Descrip.:* Benzalkonium chloride [n-Alkyl = 50% C14, 40% C12, 10% C16]

CAS 68424-85-1

*Uses:* Bactericide, disinfectant in restaurant and pharmaceutical uses, sanitizers for homes, farms, hospitals, dairies, food processing; antistat, bacteriostat on fabrics, sanitized paper; deodorant; preservative; germicide; algicide and slmicide for swimming pools, industrial water treatment, cooling towers; sanitizer for food processing equip.

*Regulatory:* EPA reg. no. 6836-94; FDA approved: sanitizer for food processing equip.

*Properties:* Pale yel. clear liq., mild odor; misc. with water, lower alcohols, ketones; m.w. 359.6; sp.gr. 0.96; dens. 8.0 lb/gal; visc. 42 cps; pour pt. 15 F; flash pt. (PM) 105 F; pH 7-9 (5%); surf. tens. 34 dynes/cm (0.1%); 50% act.; cationic

*Toxicology:* LD50 (oral, rat) 894 mg/kg; toxic to fish

*Precaution:* Do not mix with oxidizing/reducing agents

**Hycal®** [Huber Engineered Materials]

*Chem. Descrip.:* Calcined clay

*Uses:* Structured clay for filler, paper/paperboard, paper coating applics.

*Properties:* Dry; 86-96% finer than 2 µ; 0.01% max. 325 mesh residue; sp.gr. 2.60; brightness (TAPPI) 92-94%; ref. index 1.57; pH 5-7 (28% solids); 0.5% max. moisture

**Hycar® 1552** [BFGoodrich]

*Chem. Descrip.:* Nitrile latex

CAS 9003-18-3

*Uses:* Used for adhesives, carpet backcoating, paper coatings and saturation, pigment binding, textile coatings; exhibits fast penetration

*Properties:* Sp.gr. 0.99; visc. 35 cps; pH 10.8; med. ACN; 53% solids

**Hycar® 1561** [BFGoodrich]

*Chem. Descrip.:* Acrylonitrile copolymer latex with nonstaining antioxidant

CAS 9003-18-3

*Uses:* Latex with good binding for adhesives, abrasion-resist. coatings, leather and textile finishes, nonwoven fabric and pigment bindings, resin modification, paper coatings, saturation; exhibits fast penetration

*Properties:* Sp.gr. 1.0041; dens. 8.35 lb/gal; visc. 27 cps; pH 10.8; surf. tens. 50 dynes/cm; high ACN; 41% solids; anionic

**Hycar® 1562** [BFGoodrich]

*Chem. Descrip.:* Nitrile latex

CAS 9003-18-3

*Uses:* Used for adhesives, leather and textile finishes, paper coatings and saturation, pigment binding, resin modification; exhibits fast penetration

*Properties:* Sp.gr. 0.99; visc. 30 cps; pH 10.8; med. ACN; 41% solids

**Hycar® 1571** [BFGoodrich]

*Chem. Descrip.:* Carboxylic nitrile latex

CAS 9003-18-3

*Uses:* Used for adhesives, grease- and oil-resist. coatings, leather and textile finishes, pigment and nonwoven fabric bindings, paper saturation, resin modification

*Properties:* Sp.gr. 1.00; visc. 28 cps; pH 8.0; high ACN; 41% solids

**Hycar® 1572** [BFGoodrich]

*Chem. Descrip.:* Carboxylic nitrile latex, heat-reactive

CAS 9003-18-3

*Uses:* Used for adhesives, leather and textile finishes, nonwoven fabric and pigment bindings, paper coatings and saturation, resin modification, oil- and grease-resist. prods.

*Properties:* Sp.gr. 1.00; visc. 32 cps; pH 7.0; med. ACN; 50% solids

**Hycar® 1572X64** [BFGoodrich]

*Chem. Descrip.:* Nitrile latex, heat-reactive

CAS 9003-18-3

*Uses:* Used for adhesives, nonwoven fabric and pigment binding, leather finishes, paper coatings, oil- and grease-resist. materials

*Properties:* Sp.gr. 0.99; visc. 85 cps; pH 6.5; med. ACN; 47% solids

**Hycar® 1577** [BFGoodrich]

*Chem. Descrip.:* Butadiene-acrylonitrile-styrene terpolymer latex

CAS 9003-56-9

*Uses:* Used for waterproof and greaseproof coatings, leather finishes, paints, paper coatings, and nonwoven binders and saturation; food pkg. adhesives; in resin-bonded filters for food contact

*Regulatory:* FDA 21CFR §175.105, 177.2260

*Properties:* Sp.gr. 1.01; visc. 28 cps; pH 10.3-11.0; surf. tens. 48 dynes/cm (29 C); 39-42% solids

**Hycar® 1578X1** [BFGoodrich]

*Chem. Descrip.:* ABS latex, heat-reactive

CAS 9003-56-9

*Uses:* Used for water and grease-resist. coatings, leather and textile finishing, nonwoven binders, paper coatings

*Properties:* Sp.gr. 1.01; visc. 80 cps; pH 8.0; surf. tens. 42 dynes/cm; 50% solids

**Hycar® 2671** [BFGoodrich]

*Chem. Descrip.:* Acrylic latex, heat-reactive

*Uses:* Used for adhesives, flock adhesives, textile backcoatings, nonwoven fabric binding, paper saturation, leather finishes, coatings; produces med. films

*Properties:* Sp.gr. 1.07; visc. 170 cps; pH 5.1; 53% solids

**Hycar® 2679** [BFGoodrich]

*Chem. Descrip.:* Acrylic latex, heat-reactive

*Uses:* Used for laminating adhesives, flock adhesives, textile finishes, non-

- woven binding, paper saturation, and foam backcoatings for textiles; produces med. films  
*Properties:* Sp.gr. 1.06; visc. 100 cps; pH 3.7; 49% solids
- Hycar® 26084** [BF Goodrich]  
*Chem. Descrip.:* Acrylic latex, heat-reactive  
*Uses:* Used for paper coatings, textile backcoatings, nonwoven saturation, leather finishes, paper saturation, adhesives; produces firm films  
*Properties:* Sp.gr. 1.07; visc. 110 cps; pH 6.1; 48% solids
- Hycar® 26092** [BF Goodrich]  
*Chem. Descrip.:* Acrylic latex, heat-reactive  
*Uses:* Used for adhesives, nonwoven fabric binding, textile finishes, pigmented coatings, paper saturation, foam backcoatings for textiles; produces med. films  
*Properties:* Sp.gr. 1.07; visc. 170 cps; pH 5.1; 53% solids
- Hycar® 26106** [BF Goodrich]  
*Chem. Descrip.:* Acrylic latex, heat-reactive  
*Uses:* Used for protective coatings, paper saturation, adhesives, nonwoven fabric bindings; produces stiff films  
*Properties:* Sp.gr. 1.05; visc. 80 cps; pH 5.0; 50% solids
- Hycar® 26138** [BF Goodrich]  
*Chem. Descrip.:* Acrylic latex, heat-reactive  
*Uses:* Self-crosslinking latex used for textile laminating adhesives, abrasion-resist. textile and paper coatings, textile sizing, paper saturation, nonwoven binders, metal coatings, textile finishing; food pkg. adhesives, coatings, paper, polymers, rubber articles; produces stiff films  
*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 177.1010, 177.1200, 177.1210, 177.2260, 177.2600, 178.3790  
*Properties:* Sp.gr. 1.07; dens. 8.9 lb/gal; visc. 60 cps; pH 5.5; surf. tens. 43 dynes/cm; 50% solids; anionic
- Hycar® 26322** [BF Goodrich]  
*Chem. Descrip.:* Acrylic latex, heat-reactive  
*Uses:* Used for paper saturation, leather finishing, nonwoven binders; produces soft films  
*Properties:* Sp.gr. 1.06; visc. 40 cps; pH 6.0; 50% solids
- Hydrad™ 10** [Huber Engineered Materials]  
*Chem. Descrip.:* Hydrated alumina, 99.5%  
*Chem. Analysis:* Al(OH)<sub>3</sub> (99.5%), free moisture (0.5-0.6%)  
CAS 21645-51-2; EINECS/ELINCS 244-492-7  
*Uses:* Wh. pigment for use in paper filling and coating applics.; flame retardant for paper and composites; offers high brightness, low abrasion; low binder demand  
*Properties:* Wh. dry pigment (or slurry); 85-95% < 2 μ particle size; 0.9-1.3 μ median particle size; 0.01% max. on 325 mesh; slurry sp.gr. 1.7; absolute dens. 2.42 g/cc; slurry visc. 100-200 cps; surf. area 10-14; TAPPI brightness 96-98; ref. index 1.57; pH 7-9 (20% solids); hardness (Moh) 2.5-3.5; slurry 70% solids
- Hydrad™ 10W** [Huber Engineered Materials]  
*Chem. Descrip.:* Hydrated alumina, 99.5%  
*Chem. Analysis:* Al(OH)<sub>3</sub> (99.5%), free moisture (0.5-0.6%)  
CAS 21645-51-2; EINECS/ELINCS 244-492-7  
*Uses:* Wh. pigment for use in paper filling and coating applics.; flame retardant for paper and composites; offers high brightness, low abrasion; low binder demand  
*Properties:* Wh. dry pigment (or slurry); 85-95% < 2 μ particle size; 0.9-1.3 μ median particle size; 0.01% max. on 325 mesh; slurry sp.gr. 1.7; absolute dens. 2.42 g/cc; slurry visc. 50-150 cps; surf. area 10-14; TAPPI brightness 97-99; ref. index 1.57; pH 7-9 (20% solids); hardness (Moh) 2.5-3.5; slurry 70% solids
- Hydrad™ 15** [Huber Engineered Materials]  
*Chem. Descrip.:* Hydrated alumina, 99.5%  
*Chem. Analysis:* Al(OH)<sub>3</sub> (99.5%), free moisture (0.5-0.6%)  
CAS 21645-51-2; EINECS/ELINCS 244-492-7  
*Uses:* Wh. pigment for use in paper filling and coating applics.; flame retardant for paper and composites; offers high brightness, low abrasion; low binder demand  
*Properties:* Slurry; 70-80% < 2 μ particle size; 1.5 μ median particle size; 0.01% max. on 325 mesh; sp.gr. 2.42; visc. 50-150 cps; surf. area 10-14; brightness (TAPPI) 94-96%; ref. index 1.57; pH 7-9 (28% solids); hardness (Moh) 2.5-3.5; slurry 70% solids; 1% max. moisture

*Properties:* Wh. pigment; 29% < 2 μ particle size; 25% < 5 μ; 13% < 1 μ; 6% > 0.5 μ; 5% > 10 μ; 0.01% 325 mesh residue; sp.gr. 2.42; visc. 75 cps (70% solids); brightness (TAPPI) 97%; ref. index 1.57; pH 9-10 (20%)
- Hydrafil®** [Huber Engineered Materials]  
*Chem. Descrip.:* Partially delaminated clay  
*Uses:* Filler for paper and paperboard  
*Properties:* Spray-dried slurry; 0.005% max. 325 mesh residue; sp.gr. 2.60; visc. 400 cps; brightness (TAPPI) 86.5-88%; ref. index 1.57; pH 6-8 (28% solids); 68.5-70% slurry solids; 1% max. moisture
- Hydrafil® 90** [Huber Engineered Materials]  
*Chem. Descrip.:* Partially delaminated clay  
*Uses:* Filler for paper and paperboard; high brightness  
*Properties:* Spray-dried slurry; 0.005% max. 325 mesh residue; sp.gr. 2.60; visc. 400 cps; brightness (TAPPI) 89-90%; ref. index 1.57; pH 6-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture
- Hydrafine®** [Huber Engineered Materials]  
*Chem. Descrip.:* Partially delaminated clay  
*Uses:* Pigment for paper and paperboard; multipurpose  
*Properties:* Spray-dried slurry; 90-96% finer than 2 μ; 0.005% max. 325

mesh residue; sp.gr. 2.60; visc. 450 cps; brightness (TAPPI) 87-88.5%; ref. index 1.57; pH 6-8 (28% solids); 68.5-70% slurry solids; 1% max. moisture

**Hydrifine® 90** [Huber Engineered Materials]

*Uses:* High glossing clay for paper/paperboard; provides balance of print gloss, sheet gloss, and brightness

*Properties:* Spray-dried slurry; 90-96% finer than 2 µ; 0.005% max. 325 mesh residue; visc. 450 cps; brightness (TAPPI) 90.0-91.5; pH 6-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture

**Hydragloss** [Omya Croxton+Garry]

*Chem. Descrip.:* Clay (Al<sub>2</sub>O<sub>3</sub> · 2SiO<sub>2</sub> · 2H<sub>2</sub>O)

*Chem. Analysis:* moisture (1%)

CAS 1327-36-2; EINECS/ELINCS 215-475-1

*Uses:* Coating clay for high quality paper and board; high gloss, high surf. area

*Properties:* Spray dried powd.; 0.01% on 325 mesh screen; 94-97% < 2 µm particle size; visc. 350 cps; surf. area 22 m<sup>2</sup>/g; pH 6-7.5 (28% solids); TAPPI brightness 86.5-88%

**Hydragloss®** [Huber Engineered Materials]

*Uses:* High glossing clay for paper/paperboard; std. brightness, easy finishing

*Properties:* Spray-dried slurry; 92-98% finer than 2 µ; 0.005% max. 325 mesh residue; visc. 400 cps; brightness (TAPPI) 87-88; pH 6-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture

**Hydragloss® 90** [Huber Engineered Materials]

*Uses:* High glossing clay for paper/paperboard, premium sheet; high brightness

*Properties:* Spray-dried slurry; 96-100% finer than 2 µ; 0.005% max. 325 mesh residue; visc. 400 cps; brightness (TAPPI) 90.0-91.5; pH 6-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture

**Hydragloss® 92** [Huber Engineered Materials]

*Uses:* High glossing clay for paper/paperboard; unmatched brightness; blue-wh. shade

*Properties:* Spray-dried slurry; 98-100% finer than 2 µ; 0.005% max. 325 mesh residue; visc. 700 cps; brightness (TAPPI) 92.0-92.5; pH 6-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture

**Hydraid® 2010** [Nalco]

*Chem. Descrip.:* Polyelectrolyte

*Uses:* Retention and drainage aid, mill water clarification, and save-all operation for pulp/paper industry

*Regulatory:* FDA and EPA approved

*Properties:* Clear to pale yel. liq.; sol. in water; dens. 8.6 lb/gal; visc. 4000 cps max.; f.p. 27 F; flash pt. noncombustible; pH 7.0 ± 0.5; cationic

*Precaution:* Mod. corrosive to iron and copper, incl. their alloys

*Storage:* Store in heated area to prevent freezing; stratification may occur upon freezing, but prod. will homogenize upon agitation

**Hydraid® 7607** [Nalco]

*Chem. Descrip.:* Polyelectrolyte

*Uses:* Controls anionic trash and fines from primary and secondary fiber from wide variety of pulp used in papermaking; binds anionic fines to paper fibers before sheet formation; promoter in alkaline papermaking systems; food-contact paper/paperboard; chlorine resist.

*Regulatory:* FDA 21CFR §176.170

*Properties:* Cationic

**Hydraid® 7736 EZ** [Nalco]

*Chem. Descrip.:* Polyelectrolyte

*Uses:* Retention and drainage aid for pulp/paper industry; food-contact paper/paperboard

*Use Level:* 0.25-2.0% sol'n.

*Regulatory:* FDA 21CFR §176.170

*Properties:* Opaque wh. liq.; dens. 8.8 lbs/gal; visc. 1800-3200 cps; f.p. 23 F; flash pt. 275 F; pH 6.7 (1% sol'n.); anionic

*Storage:* Store in heated area; freezing will cause prod. instability

**Hydraid® 7871** [Nalco]

*Chem. Descrip.:* Polyelectrolyte

*Uses:* Retention and drainage aid for pulp/paper industry; food-contact paper/paperboard; effective in retaining fines and fillers without affecting sheet props.

*Use Level:* 0.25-2% sol'n.

*Regulatory:* FDA 21CFR §176.170

*Properties:* Opaque wh. liq.; dens. 8.8 lbs/gal; visc. 1100-1900 cps; f.p. 23 F; flash pt. 275 F; pH 4.6 (1% sol'n.); nonionic

*Storage:* 6 mos. shelf life; store in heated area as freezing will cause prod. instability

**Hydraid® 8105** [Nalco]

*Chem. Descrip.:* Polyelectrolyte

*Uses:* Retention and drainage aid for mill water clarification, save-all operation for pulp/paper industry; effective coagulant aid; food-contact paper/paperboard; chlorine resist.; effective over wide pH range

*Regulatory:* FDA 21CFR §176.170

*Properties:* Cationic

**Hydraid® 8182 EZ** [Nalco]

*Chem. Descrip.:* Polyelectrolyte

*Uses:* Retention and drainage aid for pulp/paper industry; food-contact paper/paperboard

*Use Level:* 0.25-2.0% sol'n.

*Regulatory:* FDA 21CFR §176.110

*Properties:* Opaque wh. liq.; dens. 8.8 lbs/gal; visc. 1200-1800 cps; f.p. 23 F; flash pt. 275 F; pH 5.7 (1% sol'n.); anionic

*Storage:* Store in heated area; freezing will cause prod. instability

**Hydral® 710** [Alcoa]

*Chem. Descrip.:* Aluminum trihydroxide

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65.1%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Fire retardant, smoke suppressant improving arc track resist. in thermosets, thermoplastics, elastomers; filler and coating pigment, opacifier in fine printing papers (inc. brightness, smoothness); for vinyl compding.; reinforcing pigment in adhesives and tapes; abrasive in waxes and polishes; filler for cosmetic powds., lotions; polishing agent in dentifrices

*Regulatory:* DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

*Properties:* Wh. cryst. powd.; 0.003% on 325 mesh; odorless; insol. in water; dens. 2.42 g/cm<sup>3</sup>; bulk dens. 0.22 g/cm<sup>3</sup> (loose), 0.37 g/cm<sup>3</sup> (packed); surf. area 5.0 m<sup>2</sup>/g; brightness 99+; m.p. 2040 C; pH 8.5-10.2 (20 C, 20% aq.); ref. index 1.57; hardness (Mohs) 2.5-3.5; 99% solids

*Toxicology:* Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease, skin rashes; TSCA listed

*Environmental:* Generally not hazardous for water

*Precaution:* Prevent formation of dust

*Hazardous Decomp. Prods.:* Exposed to fire or heat, aluminum trihydroxide decomposes forming aluminum oxide and water vapor beginning at 200 C

*Storage:* Keep material dry

**Hydral® 716** [Alcoa]

*Chem. Descrip.:* Hydrated alumina

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant, smoke suppressant for thermosets, thermoplastics, and elastomers; filler and coating pigment, opacifier for fine printing papers (inc. brightness, smoothness); reinforcing pigment in adhesives and tapes; abrasive in waxes and polishes; filler for cosmetic powds., lotions; polishing agent in dentifrices

*Regulatory:* DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

*Properties:* Wh. cryst. powd.; 0.008% on 325 mesh; odorless; insol. in water; dens. 2.42 g/cm<sup>3</sup>; bulk dens. 0.37 g/cm<sup>3</sup> (loose); surf. area 3.6 m<sup>2</sup>/g; brightness 99+; m.p. 2040 C; pH 8.5-10.2 (20 C, 20% aq.); ref. index 1.57; hardness (Mohs) 2.5-3.5; 99% solids

*Toxicology:* Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease, skin rashes; TSCA listed

*Environmental:* Generally not hazardous for water

*Precaution:* Prevent formation of dust

*Hazardous Decomp. Prods.:* Exposed to fire or heat, aluminum trihydroxide decomposes forming aluminum oxide and water vapor beginning at 200 C

*Storage:* Keep material dry

**Hydral® PGA** [Alcoa]

*Chem. Descrip.:* Spray-dried alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Extender/filler/pigment in paper coatings imparting brightness and gloss; filler, flame retardant, smoke suppressant for natural and syn. rubbers, plastics, thermosets, thermoplastics, elec. cable jacketing, PU foam insulation; reinforcing pigment in adhesives and tapes; polishing agent in waxes;

filler in cosmetic powds. and lotions; flame retardant pigment; arc-track resist. applics.; polish for dentifrices

**Regulatory:** DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

**Properties:** Wh. cryst. powd.; 0.002% on 325 mesh; odorless; insol. in water; dens. 2.42 g/cm<sup>3</sup>; bulk dens. 0.35 g/cm<sup>3</sup> (loose), 0.61 g/cm<sup>3</sup> (packed); surf. area 5.2 m<sup>2</sup>/g; brightness 99+; m.p. 2040 C; pH 8.5-10.2 (20 C, 20% aq.); ref. index 1.57; hardness (Mohs) 2.5-3.5; 99% solids

**Toxicology:** Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease, skin rashes; TSCA listed

**Environmental:** Generally not hazardous for water

**Precaution:** Prevent formation of dust

**Hazardous Decomp. Prods.:** Exposed to fire or heat, aluminum trihydroxide decomposes forming aluminum oxide and water vapor beginning at 200 C

**Storage:** Keep material dry

#### Hydral® Brite 100 Slurry [Alcoa]

**Chem. Descrip.:** Hydrated alumina

**Chem. Analysis:** Al(OH)<sub>3</sub> (99.5%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

**Uses:** Filler pigment for paper coatings; improved brightness; maintains opacity; rec. where gloss and high whiteness are desired; TiO<sub>2</sub> replacement

**Regulatory:** DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

**Properties:** Wh. slurry; 1.0 mm median particle size; 0.02% on 325 mesh; abs. dens. 2.42; dens. 14.14 lb/gal (70% solids slurry); visc. 800 cps (70% solids slurry); surf. area 5 m<sup>2</sup>/g; brightness (TAPPI) 100%; ref. index 1.57; pH 8.0-9.5; 65% solids min.

**Toxicology:** Can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease, skin rashes; TSCA listed

**Environmental:** Generally not hazardous for water

**Precaution:** Prevent formation of dust

**Hazardous Decomp. Prods.:** Exposed to fire or heat, aluminum trihydroxide decomposes forming aluminum oxide and water vapor beginning at 200 C

#### Hydral® Coat 2 [Alcoa]

**Chem. Descrip.:** Hydrated alumina

**Chem. Analysis:** Al<sub>2</sub>O<sub>3</sub> (65%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

**Uses:** Pigment for paper coatings; features whiteness, opacity, improved smoothness and gloss; good printability; less binder required; stable under high shear coating conditions

**Regulatory:** DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

**Properties:** Dry or slurry; 0.2 μm median particle size; 0.02% on 325 mesh; odorless; insol. in water; abs. dens. 2.42; bulk dens. 30 lb/ft<sup>3</sup> (dry, loose); slurry dens. 92 lb/ft<sup>3</sup>; slurry visc. 2000 cps; surf. area 18.7 m<sup>2</sup>/g; brightness (TAPPI) 100; ref. index 1.57; pH 9.0 (slurry); hardness (Mohs) 2.5-3.5; 55% solids (slurry)

**Toxicology:** Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease, skin rashes; TSCA listed

**Environmental:** Generally not hazardous for water

**Precaution:** Prevent formation of dust

**Hazardous Decomp. Prods.:** Exposed to fire or heat, aluminum trihydroxide decomposes forming aluminum oxide and water vapor beginning at 200 C

**Storage:** Keep material dry; 30 days slurry stability

#### Hydral® Coat 5 [Alcoa]

**Chem. Descrip.:** Hydrated alumina

**Chem. Analysis:** Al<sub>2</sub>O<sub>3</sub> (65%), water (33%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

**Uses:** Pigment for paper coatings; features whiteness, opacity, improved smoothness and gloss; good printability; less binder required; stable under high shear coating conditions

**Regulatory:** DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

**Properties:** Slurry; 0.5 μm median particle size; 0.02% on 325 mesh; odorless; insol. in water; abs. dens. 2.42; dens. 103 lb/ft<sup>3</sup>; visc. 800 cps; surf. area 14 m<sup>2</sup>/g; brightness (TAPPI) 100; ref. index 1.57; pH 9.0; hardness (Mohs) 2.5-3.5; 67% solids

**Toxicology:** Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease,

skin rashes; TSCA listed

**Environmental:** Generally not hazardous for water

**Precaution:** Prevent formation of dust

**Hazardous Decomp. Prods.:** Exposed to fire or heat, aluminum trihydroxide decomposes forming aluminum oxide and water vapor beginning at 200 C

**Storage:** 30 days slurry stability

#### Hydral® Coat 7 [Alcoa]

**Chem. Descrip.:** Hydrated alumina

**Chem. Analysis:** Al<sub>2</sub>O<sub>3</sub> (65%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

**Uses:** Pigment for paper coatings; features whiteness, opacity, improved smoothness and gloss; good printability; less binder required; stable under high shear coating conditions

**Regulatory:** DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable

**Properties:** Dry; 0.7 μm median particle size; 0.02% on 325 mesh; odorless; insol. in water; abs. dens. 2.42; bulk dens. 30 lb/ft<sup>3</sup> (loose); surf. area 10.5 m<sup>2</sup>/g; brightness (TAPPI) 100; ref. index 1.57; hardness (Mohs) 2.5-3.5

**Toxicology:** Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease, skin rashes; TSCA listed

**Environmental:** Generally not hazardous for water

**Precaution:** Prevent formation of dust

**Hazardous Decomp. Prods.:** Exposed to fire or heat, aluminum trihydroxide decomposes forming aluminum oxide and water vapor beginning at 200 C

**Storage:** Keep material dry; 30 days slurry stability

#### Hydramatte® [Huber Engineered Materials]

**Uses:** Clay for matte paper grades; coarse, delaminated; rec. where print smoothness and coverage are of primary importance

**Properties:** Spray-dried slurry; 0.005% 325 mesh residue; sp.gr. 2.60; visc. 400-800 cps; brightness (TAPPI) 87.5-89%; ref. index 1.57; pH 6.5-8.0 (28% solids); 66-68% slurry solids; 1% max. moisture

#### Hydraprint® [Huber Engineered Materials]

**Chem. Descrip.:** Delaminated coating clay

**Uses:** Clay for paper and paperboard, esp. LWC and merchant grades; std. particle size distribution; rec. where print smoothness and coverage are important

**Properties:** Spray-dried slurry; 0.005% max. 325 mesh residue; sp.gr. 2.60; visc. 450 cps; brightness (TAPPI) 87.5-89%; ref. index 1.57; pH 6.5-8 (28% solids); 67-69% slurry solids; 1% max. moisture

#### Hydrasperse® [Huber Engineered Materials]

**Uses:** Clay for paper and paperboard, esp. high vol. grades of coated paper and board; std. brightness

**Properties:** Spray-dried slurry; 80-86% finer than 2 μ; 0.005% max. 325 mesh residue; sp.gr. 2.60; visc. 450 cps; brightness (TAPPI) 86-87.5%; ref. index 1.57; pH 6.5-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture

#### Hydrasperse® 90 [Huber Engineered Materials]

**Uses:** Clay for paper and paperboard, esp. high vol. grades of coated paper and board; high brightness

**Properties:** Spray-dried slurry; 80-86% finer than 2 μ; 0.005% max. 325 mesh residue; sp.gr. 2.60; visc. 450 cps; brightness (TAPPI) 89.5-91%; ref. index 1.57; pH 6.5-8 (28% solids); 69.5-71% slurry solids; 1% max. moisture

#### Hydrax™ H-312 [R.J. Marshall]

**Chem. Descrip.:** Alumina trihydrate

**Chem. Analysis:** 65% (Al<sub>2</sub>O<sub>3</sub>); 0.29% (total Na<sub>2</sub>O); 0.02% (sol. Na<sub>2</sub>O); 0.01% (SiO<sub>2</sub>); 0.01% (Fe<sub>2</sub>O<sub>3</sub>)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

**Uses:** Flame retardant and smoke suppressant for plastics, rubber, paper, adhesives, coatings, nitrile rubbers, neoprene, polyolefins, EPDM, SBR, EPR, latexes, urethanes, EVA copolymers, unsat. polyesters, epoxies, phenolics, etc.

**Properties:** Off-wh. coarse free-flowing powd.; 12 μ median particle size; 99% < 55 μ; sp.gr. 2.42; bulk dens. (loose) 45 lb/ft<sup>3</sup>; oil absorp. 32; TAPPI brightness 88+; ref. index 1.57; hardness (Mohs) 3; 0.3% free moisture

#### Hydrax™ H-470 [R.J. Marshall]

**Chem. Descrip.:** Alumina trihydrate

**Chem. Analysis:** 64.8% (Al<sub>2</sub>O<sub>3</sub>); 0.29% (total Na<sub>2</sub>O); 0.02% (sol. Na<sub>2</sub>O); 0.01% (SiO<sub>2</sub>); 0.01% (Fe<sub>2</sub>O<sub>3</sub>)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

**Uses:** Flame retardant and smoke suppressant for plastics, rubber, paper,

adhesives, coatings, flexible and rigid PVC, nitrile rubbers, neoprene, polyolefins, EPDM, SBR, EPR, latexes, urethanes, EVA copolymers, unsat. polyesters, etc.

*Properties:* Wh. free-flowing powder; 7.0 μ median particle size; 99% < 44 μ; sp.gr. 2.42; bulk dens. (loose) 0.64 g/cm<sup>3</sup>; surf. area 2 m<sup>2</sup>/g; oil absorp. 16; TAPPI brightness 88+; ref. index 1.57; hardness (Mohs) 3; 0.4% free moisture

**Hydrax™ H-490** [R.J. Marshall]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* 64.8% (Al<sub>2</sub>O<sub>3</sub>); 0.29% (total Na<sub>2</sub>O); 0.02% (sol. Na<sub>2</sub>O); 0.01% (SiO<sub>2</sub>); 0.01% (Fe<sub>2</sub>O<sub>3</sub>)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant and smoke suppressant for plastics, rubber, paper, adhesives, coatings, flexible and rigid PVC, nitrile rubbers, neoprene, polyolefins, EPDM, SBR, EPR, latexes, urethanes, EVA copolymers, unsat. polyesters, etc.

*Properties:* Wh. free-flowing powder; 9.0 μ median particle size; 99% < 44 μ; sp.gr. 2.42; bulk dens. (loose) 0.76 g/cm<sup>3</sup>; surf. area 2 m<sup>2</sup>/g; oil absorp. 16; TAPPI brightness 88+; ref. index 1.57; hardness (Mohs) 3; 0.4% free moisture

**Hydrax™ H-550** [R.J. Marshall]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* 64.8% (Al<sub>2</sub>O<sub>3</sub>); 0.29% (total Na<sub>2</sub>O); 0.03% (sol. Na<sub>2</sub>O); 0.01% (SiO<sub>2</sub>); 0.01% (Fe<sub>2</sub>O<sub>3</sub>)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant and smoke suppressant for plastics, rubber, paper, adhesives, coatings, flexible and rigid PVC, nitrile rubbers, neoprene, polyolefins, EPDM, SBR, EPR, latexes, urethanes, EVA copolymers, unsat. polyesters, etc.; approved for dentifrice and internal use

*Properties:* Wh. free-flowing powder; 5.0 μ median particle size; 99% < 16 μ; sp.gr. 2.42; bulk dens. (loose) 0.6 g/cm<sup>3</sup>; surf. area 5 m<sup>2</sup>/g; oil absorp. 24; TAPPI brightness 89+; ref. index 1.57; hardness (Mohs) 3; 0.4% free moisture

**Hydrax™ H-636** [R.J. Marshall]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* 64.8% (Al<sub>2</sub>O<sub>3</sub>); 0.29% (total Na<sub>2</sub>O); 0.04% (sol. Na<sub>2</sub>O); 0.01% (SiO<sub>2</sub>); 0.01% (Fe<sub>2</sub>O<sub>3</sub>)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant and smoke suppressant for plastics, rubber, paper, adhesives, coatings, flexible and rigid PVC, nitrile rubbers, neoprene, polyolefins, EPDM, SBR, EPR, latexes, urethanes, EVA copolymers, unsat. polyesters, etc.; approved for dentifrice and internal use

*Properties:* Wh. free-flowing powder; 3.6 μ median particle size; 99% < 11 μ; sp.gr. 2.42; bulk dens. (loose) 0.56 g/cm<sup>3</sup>; surf. area 6 m<sup>2</sup>/g; oil absorp. 27; TAPPI brightness 90+; ref. index 1.57; hardness (Mohs) 3; 0.4% free moisture

**Hydrax™ H-910** [R.J. Marshall]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* 65.0% (Al<sub>2</sub>O<sub>3</sub>); 0.39% (total Na<sub>2</sub>O); 0.10% (sol. Na<sub>2</sub>O); 0.02% (SiO<sub>2</sub>); 0.02% (Fe<sub>2</sub>O<sub>3</sub>)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant and smoke suppressant for plastics, rubber, paper, adhesives, coatings, flexible and rigid PVC, nitrile rubbers, neoprene, polyolefins, EPDM, SBR, EPR, latexes, urethanes, EVA copolymers, unsat. polyesters, etc.; approved for dentifrice and internal use

*Properties:* Wh. free-flowing powder; 1.2 μ median particle size; 99% < 6 μ; sp.gr. 2.42; bulk dens. (loose) 0.2 g/cm<sup>3</sup>; surf. area 4-8 m<sup>2</sup>/g; oil absorp. 30; TAPPI brightness 92+; ref. index 1.57; hardness (Mohs) 3; 0.3% free moisture

**Hydrocarb 60-ME 78%** [Omya Croxton+Garry]

*Chem. Descrip.:* Calcium carbonate slurry

*Chem. Analysis:* CaCO<sub>3</sub> (> 98.5%), MgCO<sub>3</sub> (< 1.0%), SiO<sub>2</sub> (< 0.2%), Al<sub>2</sub>O<sub>3</sub> (< 0.05%), Fe<sub>2</sub>O<sub>3</sub> (< 0.02%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Coating pigment for paper and board prod.

*Properties:* Fine slurry; < 0.005% on 45 μ sieve; 60% < 2 μ; sp.gr. 1.97; visc. 200 mPa·s; surf. area 7 m<sup>2</sup>/g; TAPPI brightness 94.5; 78% solids

**Hydrocarb 75-ME 78%** [Omya Croxton+Garry]

*Chem. Descrip.:* Calcium carbonate slurry

*Chem. Analysis:* CaCO<sub>3</sub> (> 98.5%); MgCO<sub>3</sub> (< 1.0%); Al<sub>2</sub>O<sub>3</sub> (< 0.05%); SiO<sub>2</sub> (< 0.02%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Coating pigment for paper and board prod.

*Properties:* < 0.005% on 45 μ sieve; sp.gr. 1.97; visc. 200 mPa·s; surf. area 10 m<sup>2</sup>/g; TAPPI brightness 94.5; 78% solids

**Hydrocarb 90-ME 78%** [Omya Croxton+Garry]

*Chem. Descrip.:* Calcium carbonate slurry

*Chem. Analysis:* CaCO<sub>3</sub> (> 98.5%), MgCO<sub>3</sub> (< 1.0%), SiO<sub>2</sub> (< 0.2%), Al<sub>2</sub>O<sub>3</sub> (< 0.05%), Fe<sub>2</sub>O<sub>3</sub> (< 0.02%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Coating pigment for paper and board prod.

*Properties:* Very fine slurry; < 0.005% on 45 μ sieve; 90% < 2 μ; sp.gr. 1.97; visc. 250 mPa·s; surf. area 12 m<sup>2</sup>/g; TAPPI brightness 94.5; 78% solids

**Hydrocol®** [Ciba Spec. Chems./Paper]

*Uses:* Microparticle retention aid/drainage aid for pulp, paper, and paperboard

**Hydrofix®** [Ciba Spec. Chems./Paper]

*Uses:* Runnability aid for papermaking

**Hydrolin** [Olin/Chlor Alkali]

*Chem. Descrip.:* Sodium hydrosulfite sol'n.

CAS 7775-14-6; EINECS/ELINCS 231-890-0

*Uses:* Bleaching agent for clay, groundwood, and thermomech. pulp

**Hydrosulfite® AWC** [Cognis/Chems. Group; Cognis/Textiles]

*Chem. Descrip.:* Sodium formaldehyde sulfoxylate

CAS 149-44-0; EINECS/ELINCS 295-739-4

*Uses:* Reducing agent, cocatalyst for redox-catalyzed polymerization, in discharge printing; stripping agent for acid dyed nylon and wool; food pkg. adhesives, paper, closures with sealing gaskets for food containers; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.170, 177.1210, 177.2600, 178.3400; SARA §311/312 reportable

*Properties:* Wh. powder; garlic-like odor; sp.gr. 0.60; dens. 5.0 lb/gal; pH 10.1 (10%); VOC 0% (EPA Method 24); 100% solids

*Toxicology:* LD50 (oral, rat) > 1 g/kg; may cause skin, eye, and respiratory tract irritation; TSCA listed

*Environmental:* BOD5 126,490 ppm; COD 622,720 ppm; 20.3% biodeg.

*Precaution:* May generate heat when wet; avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, SO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 1

*Storage:* Store in cool, dry place away from direct heat and low flash point material; will decompose slowly in moist, warm air

**Hydrosulfite of Soda, 70%** [Cognis/Chems. Group]

*Chem. Descrip.:* Sodium hydrosulfite

CAS 7775-14-6; EINECS/ELINCS 231-890-0

*Uses:* Reducing agent in redox polymerization; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 178.3400

*Properties:* Liq.; 70% act.

**Hydrosulfite of Soda Conc.** [Cognis/Chems. Group]

*Chem. Descrip.:* Sodium hydrosulfite

CAS 7775-14-6; EINECS/ELINCS 231-890-0

*Uses:* Reducing agent in redox polymerization; emulsifier in mfg. of food-contact articles; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 178.3400; DOT regulated; SARA §311/312 reportable

*Properties:* Wh. to off-wh. powder; odorless; 18% sol. in water (20 C); sp.gr. 0.88; dens. 55 lb/ft<sup>3</sup> (loose), 65 lb/ft<sup>3</sup> (packed); pH 4.2

*Toxicology:* Causes skin, respiratory tract, and severe eye irritation; may cause respiratory allergic reaction; ing. may cause GI irritation, nausea, vomiting; mod. toxic by ing.; TSCA listed

*Precaution:* Flamm.; heats spontaneously when in contact with moisture; avoid contact with strong oxidizing agents and acids

*Hazardous Decomp. Prods.:* Decomposes in water to sulfur dioxide and other sulfur oxides, sodium sulfite, and sodium thiosulfite; hydrogen sulfide and mercaptans may also be present; NFPA: Health 3; Flammability 2; Reactivity 1

*Storage:* Store tightly closed in cool, dry place away from low flash point materials; avoid exposure to atmosphere; storage for > 90 days must meet EPA requirements

**Hydrosulphite®** [BASF AG]

*Chem. Descrip.:* Sodium dithionite

CAS 7775-14-6; EINECS/ELINCS 231-890-0

*Uses:* Reducing agents for textiles; reducing bleaching agents for wood pulps

and wood-based old paper

**Hyonic® NP-90** [Cognis/Chems. Group; Cognis Canada]

*Chem. Descrip.:* Nonoxynol-9

CAS 9016-45-9

*Uses:* Detergent and penetrant for household and industrial cleaning compds., textile processing; degreasing compds.; wetting agent for paper toweling or tissue; emulsifier in agric. applics.

*Properties:* Clear liq.; sol. in water; dens. 1.06 g/ml; HLB 13; pour pt. 2 C; cloud pt. 54 C (1% aq.); pH 7.0 (1% aq.); surf. tens. 31 dynes/cm (0.01%); > 99% act.; nonionic

**Hyonic® OP-100** [Cognis/Chems. Group]

*Chem. Descrip.:* Octoxynol-9

CAS 9002-93-1

*Uses:* Wetting agent; coemulsifier; detergent for household and industrial cleaning compds. and textile processing; penetrant; degreasing compds.; wetting agent for paper toweling/tissue; agric. applics.

*Properties:* Clear liq.; sol. in water; dens. 1.07 g/ml; HLB 13; pour pt. 10 C; cloud pt. 65 C (1% aq.); pH 7.0 (1% aq.); surf. tens. 30 dynes/cm (0.01%); > 99% act.; nonionic

**Hyonic® PE-90** [Cognis/Chems. Group]

*Chem. Descrip.:* Nonyl phenol ethoxylate

CAS 9016-45-9

*Uses:* Detergent, wetting agent, emulsifier, stabilizer for household and industrial cleaning, textile, paper processing; stabilizer for NR and SR latex adhesives; stabilizes latex against coagulation by high-speed stirring, pumping

*Properties:* Water-wh. clear liq.; sp.gr. 1.06; dens. 8.8 lb/gal; cloud pt. 54 C (1% aq.); pour pt. 2 C; surf. tens. 31 dynes/cm (0.01%); pH 7.0 (1% aq.); > 99% act.; nonionic

**Hyonic® PE-100** [Cognis/Chems. Group]

*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* Detergent, wetting agent, emulsifier, base, penetrant for household and industrial cleaners, paper toweling; latex stabilizer for NR, SBR, CR, NBR, acrylics

*Properties:* Water-wh. clear liq.; sp.gr. 1.068; dens. 8.9 lb/gal; cloud pt. 68 C (1% aq.); pour pt. 4 C; surf. tens. 32 dynes/cm (0.01%); pH 7.0 (1% aq.); > 99% act.; nonionic

**Hyper+Ion™ 1050** [General Chem.]

*Chem. Descrip.:* Polyaluminum hydroxychloride

CAS 1327-41-9; EINECS/ELINCS 215-477-2

UN No. 1760 (DOT)

*Uses:* Coagulant and flocculant for potable water treatment, municipal wastewater treatment, industrial water and wastewater treatment, industrial applics., paper mfg., emulsion breaking, lagoon treatment, coal cleaning

*Regulatory:* EPA approved

*Properties:* Amber clear liq.; negligible odor; completely sol. in water; sp.gr. 1.22; dens. 10.2 lb/gal; f.p. 10 F; m.p. -10 C; b.p. 112.5 C; pH 2.3; 80% volatiles; cationic

*Toxicology:* Inh. of mist will irritate mucous membranes, respiratory tract; ing. may irritate mouth and GI tract; skin contact may cause severe reddening and swelling; may strongly irritate or burn eyes; ACGIH TLV 2 mg(AI)/m<sup>3</sup>

*Precaution:* Corrosive; incompat. with iron or steel

*Hazardous Decom. Prods.:* HCl vapor generated at high temps.

*Storage:* Store in cool, dry place; protect from freezing

**Hyper+Ion™ 1050A** [General Chem.]

*Chem. Descrip.:* Polyaluminum hydroxychloride (< 35%) and proprietary polyamine flocculating agents

*Uses:* Coagulant and flocculant for potable water treatment, municipal wastewater treatment, industrial water and wastewater treatment, industrial applics., paper mfg., emulsion breaking, lagoon treatment, coal cleaning; designed to replace inorg. coagulants such as aluminum sulfate, aluminum chloride, ferric sulfate, ferric chloride, and other inorg. salts, and org. coagulants and dual treatment programs; superior P removal, inc. suspended solids removal

*Regulatory:* EPA approved

*Properties:* Clear to pale amber liq.; negligible odor; complete sol. in water; sp.gr. 1.17; dens. 9.8 lb/gal; f.p. 10 F; m.p. -10 C; b.p. 112.5 C; pH 2.3; 80% volatiles; cationic

*Toxicology:* Inh. of mist will irritate mucous membranes, respiratory tract; ing. may irritate mouth and GI tract; skin contact may cause severe reddening and swelling; may strongly irritate or burn eyes; ACGIH TLV 2 mg(AI)/m<sup>3</sup>

*Precaution:* Corrosive; incompat. with iron or steel

*Hazardous Decom. Prods.:* HCl vapor generated at high temps.

*Storage:* Store in FRP, HDPE, or other suitable acid and corrosion resist. plastic containers; prod. will freeze at 10 F

**Hyper+Ion™ 2050A** [General Chem.]

*Uses:* Coagulant and flocculant for potable water treatment, municipal wastewater treatment, industrial water and wastewater treatment, industrial applics., paper mfg., emulsion breaking, lagoon treatment, coal cleaning

*Properties:* Clear to pale amber liq.; sp.gr. 1.22; dens. 10.2 lb/gal; f.p. 10 F; pH 2.7; cationic

**ICB® 3000, 3100, 3200** [Tate & Lyle N. Am.]

*Chem. Descrip.:* Visc. modified waxy corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Binder in paper coatings, adhesives; provides low visc. at high solids on prep. in cold water  
*Properties:* Sol. in cold water

**ICB® 3000D** [Tate & Lyle N. Am.]

*Chem. Descrip.:* Visc. modified dent corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Binder in paper coatings, adhesives; provides low visc. at high solids on prep. in cold water  
*Properties:* Sol. in cold water

**Iceberg®** [Burgess Pigment]

*Chem. Descrip.:* Aluminum silicate, anhyd., calcined  
*Chem. Analysis:* SiO<sub>2</sub> (51.0-52.4%), Al<sub>2</sub>O<sub>3</sub> (42.1-44.3%), moisture (0.5% max.)  
 CAS 1327-36-2; EINECS/ELINCS 215-475-1  
*Uses:* Extender pigment used in paints, paper, board, rubber and plastics; reinforcing filler for NR, SR, resins, flooring, molded and extruded goods, heels, soles, wire and cable, sundries, footwear  
*Properties:* Thin flat plate; 0.15% on 325 mesh; sp.gr. 2.63; oil absorp. 55; ref. index 1.62; pH 5.0-6.0

**Icecap® K** [Burgess Pigment]

*Chem. Descrip.:* Aluminum silicate, anhyd., calcined  
*Chem. Analysis:* SiO<sub>2</sub> (51.0-52.4%), Al<sub>2</sub>O<sub>3</sub> (42.1-44.3%), moisture (0.5% max.)  
 CAS 1327-36-2; EINECS/ELINCS 215-475-1  
*Uses:* Extender for TiO<sub>2</sub> in coatings where high Hegman grind is required, paper coatings, paints; reinforcing filler for NR, SR, resins, flooring, heels, soles, wire and cable, molded and extruded rubber and plastic prods., sundries; good electricals, low compr. set, low water absorp.  
*Properties:* Thin flat plate; 0.009-0.03% on 325 mesh; sp.gr. 2.63; oil absorp. 55; ref. index 1.62pH 5.0-6.0

**Iconol NP-6** [BASF]

*Chem. Descrip.:* Nonoxynol-6  
 CAS 9016-45-9  
*Uses:* Detergent, wetting agent, emulsifier, and dispersant used in cleaners, detergents, leather, fur, paper, paint and dye industries  
*Properties:* APHA 100 max. liq.; sol. in min. oil, alcohols, ketones, aromatic and chlorinated hydrocarbons; disp. in water; m.w. 479; sp.gr. 1.04; visc. 300 cps; HLB 10.8; pour pt. -28 C; pH 6.0-7.5 (5% aq.); surf. tens. 29 dynes/cm (0.1% aq.); 1.0% max. water; nonionic

**Iconol NP-8** [BASF AG]

*Chem. Descrip.:* Nonoxynol-8  
 CAS 9016-45-9  
*Uses:* Detergent, wetting agent, emulsifier, and dispersant used in cleaners, detergents, leather, fur, paper, paint and dye industries  
*Properties:* Clear liq.; sol. in water, 5% HCl, alcohols, ketones, aromatic and chlorinated hydrocarbons; sp.gr. 1.05; visc. 350 cps; surf. tens. 31 dynes/cm; 100% act.; nonionic

**Iconol NP-9** [BASF; BASF AG]

*Chem. Descrip.:* Nonoxynol-9  
 CAS 9016-45-9  
*Uses:* Detergent, wetting agent, emulsifier, and dispersant used in cleaners, detergents, leather, fur, paper, paint and dye industries

*Properties:* APHA 70 max. liq.; sol. in water, 5% HCl, alcohols, ketones, aromatic and chlorinated hydrocarbons; m.w. 611; sp.gr. 1.06; visc. 300 cps; HLB 13.0; pour pt. 4 C; cloud pt. 52-56 C (1.0% aq.); pH 6.0-7.5 (5% aq.); surf. tens. 32 dynes/cm (0.1% aq.); 100% act., 1.0% max. water; nonionic

**Iconol NP-10** [BASF; BASF AG]

*Chem. Descrip.:* Nonoxynol-10  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* Detergent, wetting agent, emulsifier, and dispersant used in cleaners, detergents, leather, fur, paper, paint and dye industries  
*Properties:* APHA 70 max. liq.; sol. in water, 5% HCl, alcohols, ketones, aromatic and chlorinated hydrocarbons; m.w. 655; sp.gr. 1.06; visc. 300 cps; HLB 13.5; pour pt. 9 C; cloud pt. 60-65 C (1.0 aq.); pH 6.0-7.5 (5% aq.); surf. tens. 34 dynes/cm (0.1% aq.); 100% act., 1.0% max. water; nonionic

**Iconol NP 14** [BASF AG]

*Chem. Descrip.:* Nonoxynol-14  
 CAS 9016-45-9  
*Uses:* Detergent, wetting agent, emulsifier, and dispersant used in cleaners, detergents, leather, fur, paper, paint and dye industries  
*Properties:* Clear liq.; sol. in water, 5% HCl, alcohols, ketones, aromatic and chlorinated hydrocarbons; sp.gr. 1.05 (50 C); visc. 250 cps (30 C); surf. tens. 37 dynes/cm; 100% act.; nonionic

**Igepal® CA-520** [Rhodia HPCII]

*Chem. Descrip.:* Octoxynol-5  
 CAS 9002-93-1  
*Uses:* Emulsifier, dispersant, detergent, wetting agent for wax polishes, cleaners, agric., emulsion cleaner formulations, dry cleaning, paints, paper/pulp formulations, industrial metal cleaners; automotive fuel additive, deicing fluid; solubilizer for hair dye formulations; intermediate to anionic surfactants; rust inhibitor in oil storage tanks  
*Regulatory:* FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
*Properties:* APHA 160 max. clear to sl. hazy liq.; aromatic odor; sol. in Stod., xylene, butyl Cellosolve, perchloroethylene, ethanol; disp. in water; m.w. 426; sp.gr. 1.04; visc. 250-280 cps; HLB 10.0; hyd. no. 126-136; neutral. no. 0.5 max.; pour pt. -15 ± 2 F; flash pt. (PMCC) > 200 F; surf. tens. 30 dynes/cm (0.01%); 100% act.; nonionic

**Igepal® CA-620** [Rhodia HPCII]

*Chem. Descrip.:* Octoxynol-7  
 CAS 9002-93-1  
*Uses:* Detergent, wetting agent, emulsifier for household and industrial detergents, textile, paper, metal and acid cleaning compds., fine fabric detergents, agric. formulations, paints, personal care prods.  
*Regulatory:* FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
*Properties:* Pale yel. liq.; aromatic odor; sol. in xylene, butyl Cellosolve, perchloroethylene, ethanol, water; sp.gr. 1.05; visc. 240-260 cps; HLB 12.0; cloud pt. 70-75 F (1%); flash pt. > 200 F (PMCC); pour pt. 15 ± 2 F; surf. tens. 30 dynes/cm (0.01%); 100% act.; nonionic

**Igepal® CA-630** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Octoxynol-9  
 CAS 9002-93-1  
*Uses:* Detergent, wetting agent, emulsifier for personal care prods., metal processing, emulsion cleaners, agric. formulations, paints; wetting agent

- with min. acids and corrosion inhibitors; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e); BGA XIV compliance  
**Properties:** Pale yel. liq.; aromatic odor; sol. in xylene, butyl Cellosolve, perchloroethylene, ethanol, water; sp.gr. 1.06; visc. 230-260 cps; HLB 13.0; cloud pt. 63-67 C (1% aq.); flash pt. > 200 F (PMCC); pour pt. 45 ± 2 F; surf. tens. 31 dynes/cm (0.01%); 100% act.; nonionic
- Igepal® CA-880** [Rhodia HPCII]  
**Chem. Descr.:** Octoxynol-30  
 CAS 9002-93-1  
**Uses:** Emulsifier for fats and oils, vinyl acetate and acrylate polymerization, personal care prods.; post-stabilizer for syn. latexes; dyeing assistant; food pkg. adhesives, paper/paperboard  
**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180  
**Properties:** Solid; HLB 17.4; surf. tens. 38 dynes/cm (at CMC); 100% conc.; nonionic
- Igepal® CA-887** [Rhodia HPCII]  
**Chem. Descr.:** Octoxynol-30 aq. sol'n.  
 CAS 9002-93-1  
**Uses:** Primary emulsifier for vinyl acrylate polymerizations; post-stabilizer for syn. latexes; dyeing assistant; emulsifier for fats and waxes; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles  
**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400  
**Properties:** Pale yel. liq.; aromatic odor; sp.gr. 1.10; HLB 17.4; cloud pt. > 100 C (1% aq.); flash pt. (PMCC) > 200 F; pour pt. 36 ± 2 F; surf. tens. 39 dynes/cm (0.01%); 70% act.; nonionic
- Igepal® CA-890** [Rhodia HPCII]  
**Chem. Descr.:** Octoxynol-40  
 CAS 9002-93-1  
**Uses:** Emulsifier for emulsion polymerization, personal care prods.; stabilizer for plastics; dyeing assistant; paints surfactant; food pkg. adhesives, paper/paperboard  
**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180  
**Properties:** Off-wh. wax; aromatic odor; sol. in butyl Cellosolve, ethanol, water; sp.gr. 1.08 (50 C); HLB 18.0; cloud pt. > 212 F (1% aq.); flash pt. > 200 F (PMCC); pour pt. 115 ± 2 F; surf. tens. 42 dynes/cm (0.01%); 100% act.; nonionic
- Igepal® CA-897** [Rhodia HPCII; Rhodia HPCII France]  
**Chem. Descr.:** Octoxynol-40  
 CAS 9002-93-1  
**Uses:** Primary emulsifier for vinyl acrylate polymerizations; post-stabilizer for syn. latexes; dyeing assistant; emulsifier for fats and waxes, crop protection applics.; food pkg. adhesives, paper/paperboard; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles  
**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
**Properties:** Pale yel. liq.; aromatic odor; sp.gr. 1.10; HLB 18.0; cloud pt. > 100 C (1% aq.); flash pt. (PMCC) > 200 F; pour pt. 25 ± 2 F; surf. tens. 48 dynes/cm (0.01%); 70% act.; nonionic
- Igepal® CO-530** [Rhodia HPCII; Rhodia HPCII France]  
**Chem. Descr.:** Nonoxynol-6  
 CAS 9016-45-9  
**Uses:** Emulsifier for silicones, detergent, dispersant for agric., petrol., paper, plastics, metalworking industries, paints, personal care prods.; de-icing fluid for jet aircraft fuels and automotive gasoline  
**Regulatory:** FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
**Properties:** Pale yel. liq., aromatic odor; sol. in Stod., naphtha, xylene, butyl Cellosolve, perchloroethylene, ethanol; sp.gr. 1.04; visc. 230-300 cps; HLB 10.8; flash pt. > 200 F (PMCC); pour pt. -26 ± 2 F; surf. tens. 28 dynes/cm (0.01%); Ross-Miles foam 15 mm (0.1% aq., initial); 100% act.; nonionic  
**Toxicology:** Severe eye irritant; LD50 (oral, rat) 1.98 g/kg  
**Environmental:** Biodeg.
- Igepal® CO-610** [Rhodia HPCII; Rhodia HPCII France]  
**Chem. Descr.:** Nonoxynol-8 (7.7 EO)  
 CAS 9016-45-9  
**Uses:** Surf. modifying surfactant, detergent, wetting agent, emulsifier, lubricant for household and industrial formulations, aq. pulp/paper formulations, deinking of paper, textile processing/finishing, metalworking, paints, industrial metal cleaning, personal care prods.; low foaming  
**Regulatory:** FDA compliance  
**Properties:** Gardner 1 max. liq., aromatic odor; sol. in naphtha, xylene, butyl Cellosolve, perchloroethylene, ethanol, water; m.w. 570; sp.gr. 1.05; visc. 230-290 cps; HLB 12.0; neutral. no. 0.5 max.; cloud pt. 72-82 F (1%); pour pt. 37 ± 2 F; flash pt. (PMCC) > 200 F; surf. tens. 30 dynes/cm (0.01%); Ross-Miles foam 55 mm (0.1% aq., initial); 100% act.; nonionic  
**Environmental:** Biodeg.
- Igepal® CO-630** [Rhodia HPCII; Rhodia HPCII France]  
**Chem. Descr.:** Nonoxynol-9  
 CAS 9016-45-9  
**Uses:** Detergent, wetting agent, rewetting agent, corrosion inhibitor, penetrant, emulsifier, dispersant for textiles, paper, leather, household/industrial cleaners, agric., paints, metal processing, emulsion cleaning, emulsion polymerization, personal care prods.; food pkg. adhesives, paper/paperboard; emulsifier in mfg. of food-contact articles  
**Regulatory:** FDA 21CFR §175.105, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
**Properties:** Almost colorless liq., aromatic odor; sol. in naphtha, xylene, butyl Cellosolve, perchloroethylene, ethanol, water; sp.gr. 1.06; visc. 225-300 cps; HLB 13.0; cloud pt. 126-133 F (1%); flash pt. > 200 F (PMCC); pour pt. 31 ± 2 F; surf. tens. 31 dynes/cm (0.01%); Ross-Miles foam 80 mm (0.1% aq., initial); 100% act.; nonionic  
**Toxicology:** LD50 (oral, rat) 3 g/kg; severe eye irritant  
**Environmental:** Biodeg.
- Igepal® CO-630/EP** [Rhodia HPCII]  
**Chem. Descr.:** Nonylphenol plus 9 EO (polymerization grade)  
 CAS 9016-45-9  
**Uses:** Surfactant, detergent, wetting agent, and emulsifier in textiles, paper, leather, compounding, paints, and pesticides; wetting agent with min. acids and corrosion inhibitors in metal processing; emulsifier in emulsion cleaning  
**Properties:** Liq.; HLB 13.0; water sol.; 100% conc.; nonionic
- Igepal® CO-660** [Rhodia HPCII]  
**Chem. Descr.:** Nonoxynol-10  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
**Uses:** Detergent, wetting agent, rewetting agent, corrosion inhibitor, penetrant, emulsifier for textiles, paper, leather, household/industrial cleaners, agric., paints, metal processing, emulsion cleaning, personal care prods.  
**Regulatory:** FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
**Properties:** Pale yel. liq., aromatic odor; sol. in naphtha, xylene, butyl Cellosolve, perchloroethylene, ethanol, water; sp.gr. 1.06; visc. 225-275 cps; HLB 13.2; cloud pt. 140-149 F (1%); flash pt. > 200 F (PMCC); pour pt. 46 ± 2 F; surf. tens. 31 dynes/cm (0.01%); Ross-Miles foam 82 mm (0.1% aq., initial); 100% act.; nonionic  
**Environmental:** Biodeg.
- Igepal® CO-710** [Rhodia HPCII; Rhodia HPCII France]  
**Chem. Descr.:** Nonoxynol-11  
 CAS 9016-45-9  
**Uses:** Detergent, wetting agent, rewetting agent, corrosion inhibitor, penetrant, emulsifier for textiles, paper, leather, household/industrial cleaners, agric., paints, metal processing, emulsion cleaning, emulsion polymerization  
**Regulatory:** FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
**Properties:** Pale yel. liq., aromatic odor; sol. in naphtha, xylene, butyl Cellosolve, perchloroethylene, ethanol, water; sp.gr. 1.06; visc. 240-300 cps; HLB 13.6; cloud pt. 158-165 F (1%); flash pt. > 200 F (PMCC); pour pt. 49 ± 2 F; surf. tens. 32 dynes/cm (0.01%); Ross-Miles foam 110 mm (0.1% aq., initial); 100% act.; nonionic  
**Environmental:** Biodeg.
- Igepal® CO-720** [Rhodia HPCII; Rhodia HPCII France]  
**Chem. Descr.:** Nonoxynol-12  
 CAS 9016-45-9  
**Uses:** Detergent, wetting agent, rewetting agent, corrosion inhibitor, penetrant, emulsifier, dispersant for textiles, paper, leather, household/industrial cleaners, agric., paints, metal processing, emulsion cleaning, personal care prods.  
**Regulatory:** FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)  
**Properties:** Opaque liq., aromatic odor; sol. in naphtha, xylene, butyl Cello-

solve, perchloroethylene, ethanol, water; sp.gr. 1.06; visc. 260-340 cps; HLB 14.2; flash pt. > 200 F (PMCC); pour pt. 62 ± 2 F; surf. tens. 34 dynes/cm (0.01%); Ross-Miles foam 110 mm (0.1% aq., initial); 100% act.; nonionic

*Toxicology:* Severe eye irritant; LD50 (oral, rat) > 1.5 g/kg

*Environmental:* Biodeg.

**Igepal® CO-850** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonoxynol-20

CAS 64812-54-4

*Uses:* Detergent, wetting agent, dispersant, emulsifier for household/industrial cleaners, metalworking fluids, emulsion polymerization, polyester resins, paints, textile scouring, processing, and finishing; latex post-stabilizer; demulsifier for crude petrol.; glass mold release agent; in silicone emulsions; solubilizer for pesticides; emulsifier for essential oils and fragrances; personal care prods.; food pkg. adhesives, paper; emulsifier for food contact

*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3400

*Properties:* APHA 100 max. soft wax; aromatic odor; sol. in naphtha, xylene, butyl Cellosolve, perchloroethylene, ethanol, water; sp.gr. 1.13; visc. 80-120 cSt (50 C); HLB 16.0; hyd. no. 47-53; neutral. no. 0.5 max.; pour pt. 91 ± 2 F; cloud pt. 68-72 C (1% in 10% NaCl); flash pt. (PMCC) > 200 F; surf. tens. 39 dynes/cm (0.01%); Ross-Miles foam 120 mm (0.1% aq., initial); 100% act.; nonionic

**Igepal® CO-880** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* Detergent, wetting agent, dispersant, emulsifier for industrial cleaners, polyester resins, emulsion polymerization, agric., paints; latex post-stabilizer; demulsifier for crude petrol. oil emulsions; textile scouring; solubilizer for chlordane, toxaphene, kerosene, and essential oils; personal care prods.; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.180, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e)

*Properties:* Pale yel. wax; aromatic odor; sol. in naphtha, xylene, butyl Cellosolve, perchloroethylene, ethanol, water; sp.gr. 1.08 (50 C); HLB 17.2; cloud pt. 74-78 C (1% in 10% NaCl); flash pt. (PMCC) > 200 F; pour pt. 109 ± 2 F; surf. tens. 43 dynes/cm (0.01%); Ross-Miles foam 120 mm (0.1% aq., initial); 100% act.; nonionic

*Toxicology:* Minimal eye irritant; LD50 (oral, rat) > 16 g/kg

**Igepal® CO-887** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonoxynol-30

CAS 9016-45-9

*Uses:* Detergent, wetting agent, dispersant, emulsifier for industrial cleaners, polyester resins, paints, emulsion polymerization; latex post-stabilizer; demulsifier for crude petrol. oil emulsions; textile scouring; solubilizer for chlordane, toxaphene, kerosene, essential oils; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400, EPA compliance; BGA XIV compliance

*Properties:* Pale yel. liq.; aromatic odor; sp.gr. 1.09; solid. pt. 28 F; HLB 17.2; cloud pt. 74-78 C (1% in 10% NaCl); flash pt. (PMCC) > 200 F; pour pt. 34 ± 2 F; 70% act.; nonionic

**Igepal® CO-897** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonoxynol-40

CAS 9016-45-9

*Uses:* Emulsifier, stabilizer, wetting agent, dyeing assistant for plastics, latexes, floor polishes, paints, etc.; emulsion polymerization surfactant; latex post-stabilizer; textile scouring; solubilizer for chlordane, toxaphene, kerosene, essential oils; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; exempt from tolerance under EPA 40CFR §180.1001(c)(e); BGA XIV compliance

*Properties:* Pale yel. liq.; aromatic odor; sp.gr. 1.10; solid. pt. 40 F; HLB 17.8; cloud pt. > 100 C (1% aq.); flash pt. (PMCC) > 200 F; pour pt. 46 ± 2 F; 70% act.; nonionic

**Igepal® CO-977** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonoxynol-50

CAS 9016-45-9

*Uses:* Emulsifier, stabilizer, wetting agent for floor polishes, waxes, paints; polymerization surfactant for vinyl acetate and acrylic emulsions; latex stabilizer; dyeing assistant for acid and azo dyes; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard; emulsifier in mfg. of food-

contact articles; effective at elevated temps. or in conc. electrolytes

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 178.3400; EPA compliance; BGA XIV compliance

*Properties:* Pale yel. liq.; aromatic odor; sol. in ethanol, water; sp.gr. 1.0 (50 C); HLB 18.2; pour pt. 52 ± 2 F; cloud pt. > 100 C (1% aq.); flash pt. (PMCC) > 200 F; surf. tens. 44 dynes/cm (@ CMC); 70% conc.; nonionic

**Igepal® DM-710** [Rhodia HPCII]

*Chem. Descrip.:* Nonyl nonoxynol-15

CAS 9014-93-1

*Uses:* Detergent, emulsifier, dispersant, wetting agent, antistat for industrial cleaners, textiles, leather, metal cleaners, paper, latexes, pesticides; co-emulsifier for syn. latexes

*Regulatory:* Exempt from tolerance under EPA 40CFR §180.1001(c)(e)

*Properties:* Pale yel. opaque liq.; aromatic odor; sol. in naphtha, xylene, perchloroethylene, ethanol, water; sp.gr. 1.045; dens. 8.72 lb/gal; visc. 19 cps (100 C); HLB 13.0; pour pt. 18 C; cloud pt. 48-52 C (1% aq.); flash pt. (COC) 500-520 F; surf. tens. 29 dynes/cm (0.01%); 100% act.; nonionic

**Igepal® DM-730** [Rhodia HPCII]

*Chem. Descrip.:* Nonyl nonoxynol-24

CAS 9014-93-1

*Uses:* Detergent, emulsifier for textiles, leather, metal cleaners, paper, latexes, pesticides, emulsion polymerization, latex stabilization

*Properties:* Pale yel. paste; aromatic odor; sol. in xylene, ethanol, water; sp.gr. 1.049; dens. 8.75 lb/gal; visc. 25 cps (100 C); HLB 15.0; pour pt. 25 C; cloud pt. > 100 C (1% aq.); flash pt. (COC) 500-520 F; surf. tens. 33 dynes/cm (0.01%); 100% act.; nonionic

**Igepal® DM-970 FLK** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonyl nonoxynol-150

CAS 9014-93-1

*Uses:* Detergent, dispersant, wetting agent, stabilizer for laundry, household, textile, hard-surface detergents, cosmetics, insecticides, paper, petrol., paints

*Regulatory:* EPA compliance

*Properties:* Wh. flakes; sol. in water, aromatic solv., methanol, ethanol; sp.gr. 1.05 (80 C); HLB 19; cloud pt. > 100 C (1%); 100% act.; nonionic

**Igepal® NP-9** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Nonoxynol-9

CAS 9016-45-9

*Uses:* Emulsifier, wetting agent, dispersant for textile scouring, dyeing and finishing, household/industrial cleaners, alkaline degreasers, acid pickling in metalworking; emulsifier/stabilizer for emulsion polymerization; pitch dispersant in pulp prod.; detergent, emulsifier, and solubilizer for cosmetic prods.

*Properties:* Liq.; HLB 13.0; 100% conc.; nonionic

**Igepal® RC-520** [Rhodia HPCII; Rhodia HPCII France]

*Chem. Descrip.:* Dodoxynol-6

CAS 9014-92-0

*Uses:* Rewetting agent, emulsifier for industrial cleaners, paper towels, tissues, semichemical corrugated media, textiles, agric., aerosols, dry cleaning soaps, etc.

*Regulatory:* FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)

*Properties:* VCS 2 max., slightly visc. liq.; sol. in most hydrocarbon and polar solv.; sp.gr. 1.03; visc. 360 cps (Ostwald-Fenske); HLB 9.6; pour pt. -10 C; cloud pt. < 20 C (1% aq.); 100% act.; nonionic

**Imbentin-AG/124/020 I** [Dr. W. Kolb AG]

*Chem. Descrip.:* Linear C-12/14 fatty alcohol polyethylene glycol ether, 2 EO  
CAS 68439-50-9

*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textile and leather applics., agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing

*Properties:* Liq.; HLB 6.1; cloud pt. 39 C (5 gin 25 g BDG 25%); nonionic

**Imbentin-AG/124/030 B** [Dr. W. Kolb AG]

*Chem. Descrip.:* Linear C-12/14 fatty alcohol polyethylene glycol ether, 3 EO  
CAS 68439-50-9

*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textile and leather applics., agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing

*Properties:* Liq.; HLB 8; cloud pt. 53 C (5 gin 25 g BDG 25%); nonionic

**Imbentin-AG/124/040 I** [Dr. W. Kolb AG]

*Chem. Descrip.:* Linear C-12/14 fatty alcohol polyethylene glycol ether, 4 EO

- Uses:* For household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Liq.; cloud pt. 72 C (10% in BDG 25%); nonionic
- Imbentin-AGM 90%** [Dr. W. Kolb AG]  
*Chem. Descr.:* Mixt. of fatty alcohol polyethylene glycol ethers  
*Uses:* For household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Liq.; cloud pt. 60 C (1% in DI water); nonionic
- Imbentin-AGM/050** [Dr. W. Kolb AG]  
*Chem. Descr.:* Mixt. of fatty alcohol polyethylene glycol ethers  
*Uses:* For household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Liq.; cloud pt. 72 C (5 g in 25 g BDG 25%); nonionic
- Imbentin-AGM/128** [Dr. W. Kolb AG]  
*Chem. Descr.:* Mixt. of fatty alcohol polyethylene glycol ethers  
*Uses:* For household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Solid; cloud pt. 52 C (1%); nonionic
- Imbentin-AGM/136 G** [Dr. W. Kolb AG]  
*Chem. Descr.:* Mixt. of fatty alcohol polyethylene glycol ethers  
*Uses:* For household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Pellets; nonionic
- Imbentin-C/91/025** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 2.5 EO  
 CAS 68439-46-3  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 8.1; cloud pt. 44 C (5 g in 25 g BDG 25%); nonionic
- Imbentin-C/91/35** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 5 EO  
 CAS 68439-46-3  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 11.6; cloud pt. 36 C (1% in DI water); nonionic
- Imbentin-C/91/040** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 4 EO  
 CAS 68439-46-3  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 10.5; cloud pt. 62 C (5 g in 25 g BDG 25%); nonionic
- Imbentin-C/91/060** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 6 EO  
 CAS 68439-46-3  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 12.5; cloud pt. 54 C (1% in DI water); nonionic
- Imbentin-C/91/080 I** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 8 EO  
 CAS 68439-46-3  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 13.8; cloud pt. 80 C (1% in DI water); nonionic
- Imbentin-C/91/080 OFA** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 8 EO  
 CAS 68439-46-3
- Uses:* Solubilizer and cleaning agent for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; low odor; HLB 13.8; cloud pt. 84 C (1% in DI water); nonionic
- Imbentin-C/91/85** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 9 EO  
 CAS 68439-46-3  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 14.2; cloud pt. 85 C (1% in DI water); nonionic
- Imbentin-C/91/120** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-9/11 fatty alcohol polyethylene glycol ether, 12 EO  
 CAS 68439-46-3  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pasty solid; HLB 15.3; cloud pt. 68 C (1% in NaCl 10%); nonionic
- Imbentin-C/123/065** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-12/13 fatty alcohol polyethylene glycol ether, 6.5 EO  
 CAS 66455-14-9  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 11.9; cloud pt. 43 C (5% in DI water); nonionic
- Imbentin-C/125/030** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-12/15 fatty alcohol polyethylene glycol ether, 3 EO  
 CAS 68131-39-5  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 7.8; cloud pt. 42 C (5 g in 25 g BDG 25%); nonionic
- Imbentin-C/125/050** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-12/15 fatty alcohol polyethylene glycol ether, 5 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 10.5; cloud pt. 67 C (5 g in 25 g BDG 25%); nonionic
- Imbentin-C/125/55 90%** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-12/15 fatty alcohol polyethylene glycol ether, 8 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 12.6; cloud pt. 55 C (1% in DI water); nonionic
- Imbentin-C/125/070** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-12/15 fatty alcohol polyethylene glycol ether, 7 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 12; cloud pt. 49 C (1% in DI water); nonionic
- Imbentin-C/125/85** [Dr. W. Kolb AG]  
*Chem. Descr.:* Branched C-12/15 fatty alcohol polyethylene glycol ether,

10 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pasty solid; HLB 13.6; cloud pt. 82 C (1% in DI water); nonionic

**Imbentin-C/125/090** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-12/15 fatty alcohol polyethylene glycol ether, 9 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pasty solid; HLB 13.1; cloud pt. 78 C (1% in DI water); nonionic

**Imbentin-C/125/130 80%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-12/15 fatty alcohol polyethylene glycol ether, 13 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 14.7; cloud pt. 88 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-C/135/030** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13/15 fatty alcohol polyethylene glycol ether, 3 EO  
 CAS 68131-39-5  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 7.7; cloud pt. 57 C (10% in BDG 25%); nonionic

**Imbentin-C/135/040** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13/15 fatty alcohol polyethylene glycol ether, 4 EO  
 CAS 68131-39-5  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 9.1; cloud pt. 60 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-C/135/070** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13/15 fatty alcohol polyethylene glycol ether, 7 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 11.9; cloud pt. 47 C (1% in DI water); nonionic

**Imbentin-C/135/090** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13/15 fatty alcohol polyethylene glycol ether, 9 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pasty solid; HLB 13.1; cloud pt. 65 C (1% in DI water); nonionic

**Imbentin-C/135/110 85%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13/15 fatty alcohol polyethylene glycol ether, 11 EO  
 CAS 68131-39-5  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 14; cloud pt. 87 C (1% in DI water); nonionic

**Imbentin-C/135/200** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13/15 fatty alcohol polyethylene glycol ether,

20 EO  
 CAS 68131-39-5  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Solid; HLB 16.2; nonionic

**Imbentin-C/145/030** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-14/15 fatty alcohol polyethylene glycol ether, 3 EO  
 CAS 68951-67-7  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 7.5; cloud pt. 51 C (5g in 25 g BDG 25%); nonionic

**Imbentin-C/145/070** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-14/15 fatty alcohol polyethylene glycol ether, 7 EO  
 CAS 68951-67-7  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 11.7; cloud pt. 46 C (1% in DI water); nonionic

**Imbentin-C/145/110** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-14/15 fatty alcohol polyethylene glycol ether, 11 EO  
 CAS 68951-67-7  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 13.8; cloud pt. 58 C (1% in NaCl 10%); nonionic

**Imbentin-CAM/020** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Cocosamine, 2 EO  
 CAS 61791-14-8  
*Uses:* Wetting agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 6-10; amine no. 200; nonionic

**Imbentin-CM/125** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Mixt. of fatty alcohol polyethylene glycol ethers  
*Uses:* Surfactant for household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Liq.; cloud pt. 70 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-CM/145** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Mixt. of fatty alcohol polyethylene glycol ethers  
*Uses:* Surfactant for household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Liq.; cloud pt. 65 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-CM/935** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Mixt. of fatty alcohol polyethylene glycol ethers  
*Uses:* Surfactant for household/industrial detergents and cleaning agents, and paper processing  
*Properties:* Liq.; cloud pt. 48 C (1% in DI water); nonionic

**Imbentin-CMEA/100** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Cocosmonoethanolamide, 10 EO  
*Uses:* Surfactant for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; cloud pt. 60 C (10% in NaCl 10%); nonionic

**Imbentin-DE/300** [Dr. W. Kolb AG]  
*Chem. Descrip.:* C20/22 propylene diamine, 30 EO  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Pasty; HLB > 15; amine no. 66; nonionic

**Imbentin-DT/250** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Tallow propylenediamine, 25 EO  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal

treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Pasty solid; HLB > 15; amine no. 77; nonionic

**Imbentin-EAM/300** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Fatty amine, 30 EO  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Solid; HLB > 15; amine no. 34; nonionic

**Imbentin-L/145/040** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-14/15 fatty alcohol polyethylene glycol ether, 4 EO  
 CAS 68951-67-7  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textile and leather applics., agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 8.9; cloud pt. 62 C (5g in 25 g BDG 25%); nonionic

**Imbentin-L/145/080** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-14/15 fatty alcohol polyethylene glycol ether, 8 EO  
 CAS 68951-67-7  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textile and leather applics., agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pasty solid; HLB 12.3; cloud pt. 78 C (5g in 25 g BDG 25%); nonionic

**Imbentin-N/7 A** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 1.5 EO  
 CAS 9016-45-9; EINECS/ELINCS 248-291-5  
*Uses:* W/o emulsifier, coemulsifier for industrial detergents and cleaners, textile and leather applics., agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 4.6; cloud pt. 70 C (2% in BDG 25%); nonionic

**Imbentin-N/020 I** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 2 EO  
 CAS 9016-45-9; EINECS/ELINCS 248-291-5  
*Uses:* W/o emulsifier, coemulsifier for industrial detergents and cleaners, textile and leather applics., agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 5.7; cloud pt. 70 C (10% in BDG 50%); nonionic

**Imbentin-N/30** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 7.5 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 12; cloud pt. 31 C (1% in DI water); nonionic

**Imbentin-N/35** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 8 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 12.3; cloud pt. 34 C (1% in DI water); nonionic

**Imbentin-N/040** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 4 EO  
 CAS 9016-45-9; EINECS/ELINCS 230-770-5  
*Uses:* Wetting agent for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 8.9; cloud pt. 55 C (10% in BDG 25%); nonionic

**Imbentin-N/40 A** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 6.5 EO  
 CAS 9016-45-9; EINECS/ELINCS 248-292-0  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 11.3; cloud pt. 40 C (3 g prod. in 10 ml alcohol, 30 C); nonionic

**Imbentin-N/44** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 8.5 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 12.6; cloud pt. 42 C (1% in DI water); nonionic

**Imbentin-N/050** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 5 EO  
 CAS 9016-45-9; EINECS/ELINCS 247-555-7  
*Uses:* Wetting agent for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 10; cloud pt. 60 C (10% in BDG 25%); nonionic

**Imbentin-N/52** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 9.5 EO  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 13.1; cloud pt. 50 C (1% in DI water); nonionic

**Imbentin-N/55** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 9 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 12.9; cloud pt. 54 C (1% in DI water); nonionic

**Imbentin-N/060** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 6 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 10.9; cloud pt. 67 C (10% in BDG 25%); nonionic

**Imbentin-N/63** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 10 EO  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 13.3; cloud pt. 63 C (1% in DI water); nonionic

**Imbentin-N/82** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 12 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Pasty solid; HLB 14.1; cloud pt. 81 C (1% in DI water); nonionic

**Imbentin-N/85** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 12.5 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Pasty solid; HLB 14.3; cloud pt. 91 C (1% in DI water); nonionic

**Imbentin-N/91** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 14 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Pasty solid; HLB 14.7; cloud pt. 91 C (1% in DI water); nonionic

**Imbentin-N/98** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 15 EO  
 CAS 9016-45-9  
*Uses:* O/w emulsifier for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Pasty solid; HLB 15; cloud pt. 96 C (1% in DI water); nonionic

**Imbentin-N/200 80%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 20 EO

- CAS 9016-45-9  
*Uses:* Solubilizer and cleaning agent for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 16; cloud pt. 72 C (10% in DI water); nonionic
- Imbentin-N/300 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 30 EO  
 CAS 9016-45-9  
*Uses:* Solubilizer and cleaning agent for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Pellets; HLB 17.1; nonionic
- Imbentin-N/400 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 40 EO  
 CAS 9016-45-9  
*Uses:* Solubilizer and cleaning agent for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Pellets; HLB 17.8; nonionic
- Imbentin-N/600 G 50%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Nonylphenol polyethylene glycol ether, 60 EO  
 CAS 9016-45-9  
*Uses:* Solubilizer and cleaning agent for industrial detergents and cleaners, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 18; nonionic
- Imbentin-OA/020** [Dr. W. Kolb AG]  
*Chem. Descrip.:* 2-Ethylhexanol polyethylene glycol ether, 2 EO  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing  
*Properties:* Liq.; HLB 6-10; cloud pt. 50 C (5% in 25% BDG); nonionic
- Imbentin-OA/030** [Dr. W. Kolb AG]  
*Chem. Descrip.:* 2-Ethylhexanol polyethylene glycol ether, 3 EO  
*Uses:* O/w emulsifier, laundry and cleaning detergents for cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing  
*Properties:* Liq.; HLB 10-15; cloud pt. 22 C (10% in DI water); nonionic
- Imbentin-OA/050** [Dr. W. Kolb AG]  
*Chem. Descrip.:* 2-Ethylhexanol polyethylene glycol ether, 5 EO  
*Uses:* O/w emulsifier, laundry and cleaning detergents for cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing  
*Properties:* Liq.; HLB 10-15; cloud pt. 64 C (5 g in 25 g BDG 25%); nonionic
- Imbentin-OA/080** [Dr. W. Kolb AG]  
*Chem. Descrip.:* 2-Ethylhexanol polyethylene glycol ether, 8 EO  
*Uses:* O/w emulsifier, laundry and cleaning detergents for cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, plastics, paper processing  
*Properties:* Liq.; HLB 10-15; cloud pt. 79 C (5 g in 25 g BDG 25%); nonionic
- Imbentin-OAD/500 70%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Oleylmonoethanolamide, 50 EO  
*Uses:* Surfactant for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; cloud pt. 74 C (10% in NaCl 10%); nonionic
- Imbentin-OAM/020** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Oleylamine, 2 EO  
 CAS 26635-93-8  
*Uses:* W/o emulsifier, coemulsifier for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 3-6; amine no. 163; nonionic
- Imbentin-OAM/200** [Dr. W. Kolb AG]

- Chem. Descrip.:* Oleylamine, 20 EO  
 CAS 71786-60-2  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB > 15; amine no. 45; nonionic
- Imbentin-PAP/6100** [Dr. W. Kolb AG]  
*Chem. Descrip.:* EO/PO block copolymers  
 CAS 9003-11-6  
*Uses:* Surfactant for industrial detergents and cleaners, textiles, leather, emulsion polymerization, metal treatment, petroleum/mining industries, and paper processing  
*Properties:* Liq.; cloud pt. 25 C (1% in DI water); 10% PO in molecule; nonionic
- Imbentin-PAP/6200** [Dr. W. Kolb AG]  
*Chem. Descrip.:* EO/PO block copolymers  
 CAS 9003-11-6  
*Uses:* Surfactant for industrial detergents and cleaners, textiles, leather, emulsion polymerization, metal treatment, petroleum/mining industries, and paper processing  
*Properties:* Liq.; cloud pt. 35 C (1% in DI water); 20% PO in molecule; nonionic
- Imbentin-PAP/10200** [Dr. W. Kolb AG]  
*Chem. Descrip.:* EO/PO block copolymers  
 CAS 9003-11-6  
*Uses:* Surfactant for industrial detergents and cleaners, textiles, leather, emulsion polymerization, metal treatment, petroleum/mining industries, and paper processing  
*Properties:* Liq.; cloud pt. 17 C (3 g prod. in 10 ml alcohol, 30 C); 20% PO in molecule; nonionic
- Imbentin-PEG/300** [Dr. W. Kolb AG]  
*Chem. Descrip.:* PEG-6  
 CAS 25322-68-3; EINECS/ELINCS 220-045-1  
*Uses:* Surfactant for household/industrial detergents and cleaners, cosmetic and toiletries, agric., pharmaceuticals, textiles, leather, paints and coatings, metal treatment, plastics, and paper processing  
*Properties:* Liq.; hyd. no. 375; nonionic
- Imbentin-PEG/400** [Dr. W. Kolb AG]  
*Chem. Descrip.:* PEG-8  
 CAS 25322-68-3; EINECS/ELINCS 225-856-4  
*Uses:* Surfactant for household/industrial detergents and cleaners, cosmetic and toiletries, agric., pharmaceuticals, textiles, leather, paints and coatings, metal treatment, plastics, and paper processing  
*Properties:* Liq.; hyd. no. 280; nonionic
- Imbentin-PEG/600** [Dr. W. Kolb AG]  
*Chem. Descrip.:* PEG-12  
 CAS 25322-68-3; EINECS/ELINCS 229-859-1  
*Uses:* Surfactant for household/industrial detergents and cleaners, cosmetic and toiletries, agric., pharmaceuticals, textiles, leather, paints and coatings, metal treatment, plastics, and paper processing  
*Properties:* Liq.; hyd. no. 185; nonionic
- Imbentin-PEG/1500 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* PEG-32  
 CAS 25322-68-3; EINECS/ELINCS 203-989-9  
*Uses:* Surfactant for household/industrial detergents and cleaners, cosmetic and toiletries, agric., pharmaceuticals, textiles, leather, paints and coatings, metal treatment, plastics, and paper processing  
*Properties:* Pellets; hyd. no. 75; nonionic
- Imbentin-POA/020 5055** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 2 EO  
*Uses:* W/o emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 5; cloud pt. 32 C (5g in 25 g BDG 25%); nonionic
- Imbentin-POA/024 5055** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 2.4 EO  
*Uses:* W/o emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment,

paper processing  
*Properties:* Liq.; HLB 5.7; cloud pt. 39 C (5g in 25 g BDG 25%); nonionic  
**Imbentin-POA/050 7075** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 5 EO  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 9.1; cloud pt. 65 C (5g in 25 g BDG 25%); nonionic  
**Imbentin-POA/060** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 6 EO  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pasty solid; HLB 10; cloud pt. 72 C (5g in 25 g BDG 25%); nonionic  
**Imbentin-POA/080 90%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 8 EO  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 11.4; cloud pt. 83 C (5g in 25 g BDG 25%); nonionic  
**Imbentin-POA/180** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 18 EO  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 15; cloud pt. 73 C (1% in NaCl 10%); nonionic  
**Imbenti-POA/220 6065 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 25 EO  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pellets; HLB 16.1; nonionic  
**Imbentin-POA/220 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 18 EO  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pellets; HLB 15.7; nonionic  
**Imbentin-POA/310 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 31 EO  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pellets; HLB 16.8; nonionic  
**Imbenti-POA/800 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Linear C-16/18' fatty alcohol polyethylene glycol ether, 80 EO  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pellets; HLB 18.6; nonionic  
**Imbentin-SAM/050** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Stearylamine, 5 EO  
CAS 9003-93-4  
*Uses:* Wetting agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plas-

tics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 6-10; amine no. 115; nonionic  
**Imbentin-SAM/250** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Stearylamine, 25 EO  
CAS 9003-93-4  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Pasty solid; HLB > 15; amine no. 29; nonionic  
**Imbentin-SAM/400** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Stearylamine, 40 EO  
CAS 26635-92-7  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Solid; HLB > 15; amine no. 29; nonionic  
**Imbentin-T/030** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 3 EO  
CAS 24938-91-8; EINECS/ELINCS 224-540-3  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 8.1; cloud pt. 36 C (5g in 25 g BDG 25%); nonionic  
**Imbentin-T/040** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 4 EO  
CAS 24938-91-8  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 9.5; cloud pt. 68 C (5% in 25% BDG); nonionic  
**Imbentin-T/050 I** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 5 EO  
CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 10.6; cloud pt. 66 C (10% in BDG 25%); nonionic  
**Imbentin-T/060** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 6 EO  
CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 11.5; cloud pt. 77 C (5% in 25% BDG); nonionic  
**Imbentin-T/65 100%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 9.5 EO  
CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pasty solid; HLB 13.6; cloud pt. 63C (1% in DI water); nonionic  
**Imbentin-T/070** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 7 EO  
CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 12.2; cloud pt. 71 C (5g in 25 g BDG 25%); nonionic  
**Imbentin-T/080** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 8

EO  
 CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 12.9; cloud pt. 47 C (1% in DI water); nonionic

**Imbentin-T/090** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 9 EO  
 CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 13.4; cloud pt. 79 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-T/100 90%** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 10 EO  
 CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 13.9; cloud pt. 75 C (2% in DI water); nonionic

**Imbentin-T/120** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 12 EO  
 CAS 24938-91-8  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Solid; HLB 14.6; cloud pt. 86 C (1% in DI water); nonionic

**Imbentin-T/150** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 15 EO  
 CAS 24938-91-8  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Solid; HLB 15.4; cloud pt. 68 C (1% in NaCl 10%); nonionic

**Imbentin-T/400 G** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-13 fatty alcohol polyethylene glycol ether, 40 EO  
 CAS 24938-91-8  
*Uses:* Solubilizer for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Pellets; HLB 18; nonionic

**Imbentin-TAM/020** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Tallowamine, 2 EO  
 CAS 61791-44-4  
*Uses:* W/o emulsifier, coemulsifier for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 3-6; amine no. 165; nonionic

**Imbentin-TAM/050** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Tallowamine, 5 EO  
 CAS 61791-44-4  
*Uses:* Wetting agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Liq.; HLB 6-10; amine no. 115; nonionic

**Imbentin-TAM/200 N** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Tallowamine, 20 EO  
 CAS 61791-44-4  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing

*Properties:* Liq.; HLB > 15; amine no. 50; nonionic

**Imbentin-TAM/350** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Tallowamine, 35 EO  
 CAS 61791-44-4  
*Uses:* Solubilizer, cleaning agent for industrial detergents and cleaners, cosmetics and toiletries, textiles, leather, agric., paints and coatings, metal treatment, plastics, petroleum/mining industries, and paper processing  
*Properties:* Solid; HLB > 15; amine no. 31; nonionic

**Imbentin-U/030** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-11 fatty alcohol polyethylene glycol ether, 3 EO  
 CAS 127036-24-2  
*Uses:* Wetting agent for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 8.7; cloud pt. 45 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-U/050** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-11 fatty alcohol polyethylene glycol ether, 5 EO  
 CAS 127036-24-2  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 11.2; cloud pt. 62 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-U/060** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-11 fatty alcohol polyethylene glycol ether, 6 EO  
 CAS 127036-24-2  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 12.1; cloud pt. 69 C (5 g in 25 g BDG 25%); nonionic

**Imbentin-U/070** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-11 fatty alcohol polyethylene glycol ether, 7 EO  
 CAS 127036-24-2  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 12.8; cloud pt. 53 C (1% in DI water); nonionic

**Imbentin-U/080** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-11 fatty alcohol polyethylene glycol ether, 8 EO  
 CAS 127036-24-2  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 13.4; cloud pt. 63 C (1% in DI water); nonionic

**Imbentin-U/100** [Dr. W. Kolb AG]  
*Chem. Descrip.:* Branched C-11 fatty alcohol polyethylene glycol ether, 10 EO  
 CAS 127036-24-2  
*Uses:* O/w emulsifier for household/industrial detergents and cleaning agents, cosmetics and toiletries, textiles, leather, agric., paints and coatings, emulsion polymerization, lubricants, silicon and wax emulsions, metal treatment, paper processing  
*Properties:* Liq.; HLB 14.4; cloud pt. 85 C (1% in DI water); nonionic

**Imidazoline 18 DA** [Lakeland Labs Ltd]  
*Chem. Descrip.:* Oleic amidoethylimidazoline  
 CAS 63441-26-9  
 UN No. 1760 NOS  
*Uses:* For oil fields, metalworking, paper, lubricants, road making, paints, inks, agric.; corrosion inhibition, dispersants, dewatering, emulsification; bitumen emulsification; thermally stable; acid stable; substantive to metal, glass and paint  
*Properties:* Dk. amber clear liq.; oil sol.; sp.gr. 0.93; 100% act.; cationic  
*Precaution:* Corrosive

**Imidazoline 18OH** [Lakeland Labs Ltd]  
*Chem. Descrip.:* Oleic hydroxyethylimidazoline  
 CAS 95-38-5  
 UN No. 1760 NOS  
*Uses:* For oil fields, metal finishing, textiles, paper, lubricants, road making,

paints, inks, maintenance chems., agric., anticorrosives, acid cleaning; corrosion inhibition; dispersant; dewatering; emulsification; rheology modifiers; adhesion promoters, flocculation, softening, bitumen emulsification; thermally stable; acid stable; substantive to metal, glass and paint

*Properties:* Dk. amber clear liq.; oil-sol.; sp.gr. 0.94; 100% act.; cationic

*Precaution:* Corrosive

**Imidazoline SOH** [Lakeland Labs Ltd]

*Chem. Descrip.:* Stearic hydroxyethylimidazoline

CAS 68937-01-9; EINECS/ELINCS 202-397-8

UN No. 1760 NOS

*Uses:* For oil fields, metalworking, textiles, paper, lubricants, paints, inks, agric., maintenance chems.; dispersants, dewatering, emulsification; flocculation, softening (as quat); bitumen emulsification; thermally stable; acid stable; substantive to metal, glass and paint

*Properties:* Cream-colored waxy solid; oil sol.; sp.gr. 0.97; 100% act.; cationic

*Precaution:* Corrosive

**Imprint®** [Ciba Spec. Chems./Paper]

*Uses:* Antilinting aid for newsprint and paperboard

**Incroquat SDQ-25** [Croda Inc; Croda Chem. Ltd; Croda Oleochems.]

*Chem. Descrip.:* Stearalkonium chloride and water

CAS 122-19-0; EINECS/ELINCS 204-527-9

*Uses:* Surfactant in personal care prods., textiles, and paper; dispersant for pigments and dyestuffs; antistat for fibers and synthetics; hair conditioner; softener; emollient

*Use Level:* 2-10%

*Properties:* Wh. paste; m.p. 140 F; pH 3.0-4.0 (1%); 25% conc.; cationic

**Indopol® H-100** [BP Amoco]

*Chem. Descrip.:* Polybutene

CAS 9003-29-6

UN No. 3257

*Uses:* Lubricant for food-contact applics.; plasticizer for food-grade PE and PS; mfg. of caulks, sealants, and adhesives; component of food-contact adhesives/coatings/paper/textiles

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.210, 177.1430, 177.2260(d)(2), 178.3570, 178.3910, 177.2800, 177.1520, 177.1640, 178.3740; SARA §302/311/312/313 nonreportable

*Properties:* Clear liq.; sol. < 0.1% in water; sp.gr. 0.89; visc. 196-233 cSt (99 C); pour pt. -6.7 C; flash pt. (PMCC) 155 C; 100% act.

*Toxicology:* LD50 (oral, rat) > 34,600 mg/kg, (skin, rabbit) > 10,250 mg/kg; LC50 (inh., rat) > 17,000 mg/m<sup>3</sup>; heated material can cause thermal burns to eyes and skin; negligible eye and skin irritant

*Environmental:* LC50 (rainbow trout, 96 h) > 10,000 mg/l, (fathead minnows, 96 h) > 1000 mg/l; nontoxic; only very sl. biodegradation; non-water endangering

*Hazardous Decomp. Prods.:* Incomplete burning can produce CO, CO<sub>2</sub>, other harmful prods.

NFPA: Health 0; Flammability 1; Reactivity 0

*Storage:* Keep away from ignition sources

**Indopol® H-1500** [BP Amoco]

*Chem. Descrip.:* Polybutene

CAS 9003-29-6

UN No. 3257

*Uses:* Lubricant for food-contact applics.; plasticizer for food-grade PE and PS; mfg. of caulks, sealants, and adhesives; component of food-contact adhesives/coatings/paper/textiles

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.210, 177.1430, 177.2260(d)(2), 178.3570, 178.3910, 177.2800, 177.1520, 177.1640, 178.3740; SARA §302/311/312/313 nonreportable

*Properties:* Clear liq.; sol. < 0.1% in water; sp.gr. 0.9; visc. 3026-3381 cSt (99 C); pour pt. 18 C; flash pt. (PMCC) 170 C; 100% act.

*Toxicology:* LD50 (oral, rat) > 34,600 mg/kg, (skin, rabbit) > 10,250 mg/kg; LC50 (inh., rat) > 17,300 mg/m<sup>3</sup>; heated material can cause thermal burns to eyes and skin; negligible skin irritant; sl. eye irritant; TSCA listed

*Hazardous Decomp. Prods.:* Incomplete burning can produce CO, CO<sub>2</sub>, other harmful prods.

NFPA: Health 0; Flammability 1; Reactivity 0

*Storage:* Keep away from ignition sources

**Indopol® L-10** [BP Amoco]

*Chem. Descrip.:* Polybutene

CAS 9003-29-6

*Uses:* Lubricant for food-contact applics.; plasticizer for food-grade PE and

PS; mfg. of caulks, sealants, and adhesives; component of food-contact adhesives/coatings/paper/textiles

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 176.210, 177.1430, 177.2260(d)(2), 178.3570, 178.3910, 177.2800, 177.1520, 177.1640, 178.3740; DOT nonregulated; SARA §302/311/312/313 nonreportable

*Properties:* Clear liq.; sol. < 0.1% in water; sp.gr. 0.84; visc. 18-24 cSt (100 F); b.p. 35 C min.; pour pt. -46 C; flash pt. 110 C; 100% act.

*Toxicology:* LD50 (oral, rat) > 34,600 mg/kg, (skin, rabbit) > 10,250 mg/kg; pract. nontoxic; LC50 (inh., rat) > 850 mg/m<sup>3</sup>; negligible eye irritant; sl. skin irritant; TSCA listed

*Hazardous Decomp. Prods.:* Incomplete burning can produce CO, CO<sub>2</sub>, other harmful prods.

NFPA: Health 0; Flammability 1; Reactivity 0

*Storage:* Keep away from ignition sources

**Induclor®** [PPG Ind.]

*Chem. Descrip.:* Calcium hypochlorite

CAS 7778-54-3; EINECS/ELINCS 231-908-7

*Uses:* Algicide, slimicide in municipal and industrial water treatment, municipal water treatment, sewage treatment, in textile and paper mills, tanneries, wastewater effluent treatment in petrochem. industry; chlorinating agent for swimming pools; disinfectant for cleaning pool parts, locker room floors, etc.; highly effective against bacteria, algae, slime, fungi, and other harmful and objectionable microorganisms; delivers slow release of chlorine

*Properties:* Tablets; sol. in water; bulk dens. 64 lb/ft<sup>3</sup>; 65% available chlorine

*Toxicology:* Avoid inhalation or contact with eyes, skin; harmful or fatal if swallowed

*Precaution:* Strong oxidant

*Storage:* Store tightly closed in cool, dry, well-ventilated place; keep away from lighted tobacco prods.

**Intacol S-22** [Omya Croxton+Garry]

*Chem. Descrip.:* Styrene and maleic anhydride copolymer aq. sol'n

CAS 9011-13-6

*Uses:* Surf. sizing agent for paper and cardboard applics. (printing and writing papers, particularly laser and ink jet papers); imparts hydrophobic props.

*Use Level:* 0.2-0.6%

*Properties:* Visc. 20-500 mPa·s; pH 8-9.5; 37-39% act.; anionic

*Toxicology:* Low toxicity; nonirritating to skin

**Intacol S-24** [Omya Croxton+Garry]

*Chem. Descrip.:* Styrene and maleic anhydride copolymer aq. sol'n

CAS 9011-13-6

*Uses:* Surf. sizing agent for paper and cardboard applics. (printing and writing papers, particularly laser and ink jet papers); imparts hydrophobic props.

*Use Level:* 0.2-0.6%

*Properties:* Visc. 20-500 mPa·s; pH 8-9.5; 20% act.; anionic

*Toxicology:* Low toxicity; nonirritating to skin

**Intacol S-26** [Omya Croxton+Garry]

*Chem. Descrip.:* Styrene and maleic anhydride copolymer aq. sol'n

CAS 9011-13-6

*Uses:* Surf. sizing agent for paper and cardboard applics. (printing and writing papers, particularly laser and ink jet papers); imparts hydrophobic props.

*Use Level:* 0.2-0.6%

*Properties:* Visc. 20-500 mPa·s; pH 8-9.5; 15% act.; anionic

*Toxicology:* Low toxicity; nonirritating to skin

**Intacol S-28** [Omya Croxton+Garry]

*Chem. Descrip.:* Styrene and maleic anhydride copolymer aq. sol'n

CAS 9011-13-6

*Uses:* Surf. sizing agent for paper and cardboard applics. (printing and writing papers, particularly laser and ink jet papers); imparts hydrophobic props.

*Use Level:* 0.2-0.6%

*Properties:* Visc. 50-600 mPa·s; pH 8-9.5; 15% act.; anionic

*Toxicology:* Low toxicity; nonirritating to skin

**Intacol S-2240** [Omya Croxton+Garry]

*Chem. Descrip.:* Styrene and maleic anhydride copolymer aq. sol'n

CAS 9011-13-6

*Uses:* Surf. sizing agent for paper and cardboard applics. (printing and writing papers, particularly laser and ink jet papers); imparts hydrophobic props.

*Use Level:* 0.2-0.6%

*Properties:* Visc. < 500 mPa·s; pH 8.5-9.5; 20% act.; anionic

*Toxicology:* Low toxicity; nonirritating to skin

**Intacol S-2252** [Omya Croxton+Garry]

*Chem. Descrip.:* Styrene and maleic anhydride copolymer aq. sol'n

CAS 9011-13-6

*Uses:* Surf. sizing agent for paper and cardboard applics. (printing and writing papers, particularly laser and ink jet papers); imparts hydrophobic props.

*Use Level:* 0.2-0.6%

*Properties:* Visc. < 500 mPa·s; pH 8.5-9.5; 20% act.; anionic

*Toxicology:* Low toxicity; nonirritating to skin

**Intacol S-2425** [Omya Croxton+Garry]

*Chem. Descrip.:* Styrene and maleic anhydride copolymer aq. sol'n.

CAS 9011-13-6

*Uses:* Surf. sizing agent for paper and cardboard applics. (printing and writing papers, particularly laser and ink jet papers); imparts hydrophobic props.

*Use Level:* 0.2-0.6%

*Properties:* Visc. < 500 mPa·s; pH 8.5-9.5; 20% act.; anionic

*Toxicology:* Low toxicity; nonirritating to skin

**Integral®** [Hercules]

*Uses:* Sizing agent for surf. and internal sizing of pulp, paper, and paperboard

**Interbond® C** [Tate & Lyle N. Am.]

*Chem. Descrip.:* Dent corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Drainage aid, retention aid, and dry str. agent for papermaking wet end, recycled board; ideal for paper systems requiring little cationic charge in the wet end

*Properties:* Cationic

**Intrabond®** [Crompton & Knowles]

*Uses:* Direct dyes for fine papers, tissue grades, toweling, paperboard, and cover stocks

**Intracid®** [Crompton & Knowles]

*Uses:* Acid dyes for specialty papers, leather; high wet and lightfastness

**Intrafix®** [Crompton & Knowles]

*Uses:* Fixing agent, retention aid for paper

**Intralan® Liq.** [Crompton & Knowles]

*Uses:* Metalized dye for leather spray dyeing applics.; provides high lightfastness

*Properties:* Solv.-sol.

**Intralite®** [Crompton & Knowles]

*Uses:* Direct dyes for fine papers, tissue grades, toweling, paperboard, and cover stocks

**Intrawite®** [Crompton & Knowles]

*Uses:* Fluorescent whitening agent for paper

**Ionac Corcat® P-12** [Sybron]

*Chem. Descrip.:* Polyethylenimine polymer

CAS 26913-06-4

*Uses:* Dispersant for printing inks, and to inc. adhesion of some pigments to cellulose fibers; offers high thermal and electrolyte stability for oil field applics.; for clarification of municipal drinking water; enzyme catalyst; used for flocculation of clay and silica in mining operations; in metal treatment, textile industry, personal care; food pkg. adhesives, coatings, paper/paperboard, cellophane; improves adhesion to surfaces

*Regulatory:* FDA 21CFR §173.357, 175.105, 175.320, 176.170, 176.180, 177.1200; DOT nonregulated; SARA nonreportable

*Properties:* APHA 400 max. liq.; faint amine odor; sol. in water, lower alcohols, glycols (propylene, ethylene, triethylene), benzene; insol. in n-hexane; m.w. 1200; sp.gr. 1.01-1.05; visc. 3000-8000 cP; b.p. 100 C; flash pt. (TCC) 93.3 C; pH 10-11 (5% aq.); 99% solids; cationic

*Toxicology:* LD50 (oral, rat) 2286 mg/kg, (skin, rabbit) 3000 mg/kg; sl. toxic by ing.; ing. may cause gastric disturbances; may cause mild skin irritation; may cause eye injury

*Precaution:* Reacts with oxidizing materials; reacts slowly with methylene chloride; reacts violently with CCl<sub>4</sub>

*Hazardous Decomp. Prods.:* Combustion generates NO<sub>x</sub> and CO

HMIS: Health 2; Flammability 1; Reactivity 0

**Ionac Corcat® P-600** [Sybron]

*Chem. Descrip.:* Polyethylenimine polymer

CAS 26913-06-4

*Uses:* Dispersant for printing inks, and to inc. adhesion of some pigments to cellulose fibers; offers high thermal and electrolyte stability for oil field applics.; for clarification of municipal drinking water; enzyme catalyst; used for flocculation of clay and silica in mining operations; in metal treatment, textile industry, personal care; food pkg. adhesives, coatings, paper/paperboard, cellophane; improves adhesion to surfaces;

*Regulatory:* FDA 21CFR §173.357, 175.105, 175.320, 176.170, 176.180, 177.1200; DOT nonregulated; SARA nonreportable

*Properties:* APHA 200 max. liq.; faint amine odor; sol. in water, lower alcohols, glycols (propylene, ethylene, triethylene); m.w. 60,000; sp.gr. 1.04-1.06; visc. > 5000 cP; vapor pressure 18 mm Hg (20 C); f.p. -20 C; b.p. 100 C; pH 10-11 (5% aq.); 33% solids; cationic

*Toxicology:* LD50 (oral, rat) 7550 mg/kg, (skin, rabbit) > 3000 mg/kg; sl. toxic by ing.; ing. may cause gastric disturbances; may cause eye irritation; nonirritating to skin; prolonged/repeated skin contact may cause irritation

*Precaution:* Reacts with oxidizing materials; reacts slowly with methylene chloride; reacts violently with CCl<sub>4</sub>

*Hazardous Decomp. Prods.:* Combustion generates NO<sub>x</sub> and CO

HMIS: Health 2; Flammability 1; Reactivity 0

**Ipex™-400** [Ipex]

*Chem. Descrip.:* 40% 3-Iodo-2-propynyl butyl carbamate in inert ingreds.

*Uses:* Fungicide for aq. and solv. systems such as oleoresinous and latex paints, wood prods., cutting oils, textiles, paper coatings, inks, plastics, adhesives, canvas, and cordage; broad-spectrum; industrial grade

*Use Level:* 0.5-2.5% (plastics), 4-12 lb/100 gal (paint), 1-4 lb/100 gal (interior paints), 0.05-0.5% (cutting oils), 0.5-2.0% (wood treatment), 0.01-1.0% (textiles), 0.05-0.3% (paper coatings), 0.5-2% (canvas), 0.05-3% (inks), 0.05-0.2% (adhesives)

*Properties:* Amber liq., char. odor; sol. in aromatics and alcohols; sp.gr. 1.13-1.16; dens. 9.4-9.7 lb/gal; 40% min. act.

*Storage:* Store above 32 F; do not use or store near heat or open flame

**Ipex™-1000** [Ipex]

*Chem. Descrip.:* 97% 3-Iodo-2-propynyl butyl carbamate in inert ingreds.

*Uses:* Fungicide for aq. and solv. systems such as oleoresinous and latex paints, wood prods., cutting oils, textiles, paper coatings, inks, plastics, adhesives, canvas, and cordage; broad-spectrum; industrial grade

*Use Level:* 0.05-0.6% (PVC), 0.3-0.5% (paints and stains), 0.1-0.32% (interior paints), 0.03-0.3% (cutting oils), 0.3-0.5% (wood treatments), 0.05-0.5% (textiles, inks), 0.1-0.5% (paper coatings), 0.025-0.1% (adhesives)

*Properties:* Off-wh. cryst. solid; sol. in most aromatic solvs. and alcohols; sp.gr. 1.74-1.77 (20 C); m.p. 65-68 C; 97% min. active, 1% max. moisture

*Storage:* Store @ 0-32 C; do not use or store near heat or open flame

**Irgalite®** [Ciba Spec. Chems./Paper]

*Chem. Descrip.:* Org. pigment

*Uses:* Pigment for paper coloration, decorative laminate papers, cover papers and boards, laundry tags, poster papers, tinting of wh. papers; rec. where higher levels of fastness are required

*Properties:* Paste

**Irganox® 259** [Ciba Spec. Chems./Addit.]

*Chem. Descrip.:* 1,6-Hexamethylene bis-(3,5-di-tert-butyl-4-hydroxyhydrocinnamate)

CAS 35074-77-2

*Uses:* Antioxidant/stabilizer for polyolefin, elastomer, styrenic, polyacetal, petrol. prods., and org. substrates; food pkg. adhesives, coatings, paper, polymers; nondiscoloring, nonstaining

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300(b), 175.320(b), 176.170(a)(b), 177.2470, 178.2480, 178.2010 etc.

*Properties:* Off-wh. cryst. powd.; odorless; sol. in benzene, acetone, chloroform, min. oil, hexane, and water; m.w. 639; m.p. 103-108 C

**Irganox® 1010** [Ciba Spec. Chems./Addit.]

*Chem. Descrip.:* Tetrakis [methylene (3,5-di-tert-butyl-4-hydroxyhydrocinnamate)] methane

CAS 6683-19-8; EINECS/ELINCS 229-722-6

*Uses:* Nondiscoloring, nonstaining antioxidant and thermal stabilizer for org. and polymeric materials, polyolefin, elastomer, acetal, acrylic, PET, PU, PMMA, PVC, food-contact adhesives/coatings/paper/polymers, petrol. prods., coatings; U.S. patents 3,285,855 and 3,644,482

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300(b), 175.320(b), 176.170(a), 177.2470, 178.2010 etc.

*Properties:* Wh. free-flowing cryst. powd.; odorless; sol. (g/100 g): 163 g methylene chloride, 144 g chloroform, 122 g benzene, 89 g acetone; m.w. 1178; sp.gr. 1.15; m.p. 110-125 C

**Irganox® 1035** [Ciba Spec. Chems./Addit.]

*Chem. Descrip.:* Thiodiethylene bis-(3,5-di-t-butyl-4-hydroxy) hydrocinnamate

CAS 41484-35-9

*Uses:* Stabilizer and antioxidant for polymers, org. substrates, polyolefins, crosslinked PE systems esp. wire and cable, BR, SBR, NBR, SEBS, elastomer, petrol. prods., powd. and high-bake coatings, food pkg.; food pkg. adhesives, paper, polymers, rubber; nondiscoloring, nonstaining

*Regulatory:* FDA 21CFR §175.105, 175.125, 176.170, 176.180, 177.1210, 177.2600, 178.2010

*Properties:* Wh. cryst. powd.; odorless; sol. in toluene, acetone, ethyl acetate, methanol, min. oil; sol. < 0.01% in water; m.w. 643; sp.gr. 1.10 (20 C); m.p. 63-68 C

**Irganox® 1520 D/L** [Ciba Spec. Chems./Addit.]

*Chem. Descrip.:* 2,4-Bis [(octylthio) methyl]-o-cresol  
CAS 110553-27-0

*Uses:* Antioxidant for polymers for base stabilization of elastomers and the compd. stabilization of adhesives; food pkg. adhesives, coatings, paper, polymers, rubber; effective during elastomer dynamic processing without the use of phosphites

*Regulatory:* FDA 21CFR §175.105, 175.300(b), 175.125, 176.170, 176.180, 177.1210, 177.2600, 178.2010

*Properties:* Pale yel. low-visc. liq.; sol. in methanol, ethanol, acetone, ethyl acetate, methylene chloride, chloroform, toluene, n-hexane; sol. < 0.01 g/100 g water; m.w. 424.7; dens. 0.9787 g/ml; flash pt. > 200 C

**Isopar® G** [Exxon]

*Chem. Descrip.:* C10-11 isoparaffin

*Chem. Analysis:* paraffin (95%), cycloparaffin (5%)

CAS 64742-48-9

*Uses:* Solvent, diluent, carrier for personal care sprays; solvent for coatings, thinners, cleaners, degreasers; extremely low surf. tens. to improve flow and wetting; suitable for odorless alkyd/acrylic paints; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; minimizes VOC; virtually HAPs-free

*Regulatory:* FDA 21CFR §172.882, 172.884, 176.180, 176.210, 177.2600, 178.3530, 178.3570, 178.3620(b), 178.3650; 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Odorless; m.w. 149; sp.gr. 0.75 (15.6 C); dens. 6.23 lb/gal (60 F); visc. 1.0 cP; vapor pressure 2.3 mm Hg (20 C); b.p. 160-176 C; flash pt. 106 F; surf. tens. 23.8 dynes/cm; KB value 28

*Toxicology:* OEL 300 ppm; low toxicity

**Isopar® H** [Exxon]

*Chem. Descrip.:* C11-12 isoparaffin

*Chem. Analysis:* paraffin (95%), cycloparaffin (5%)

CAS 64742-48-9

*Uses:* Solvent, diluent, carrier for personal care sprays; solvent for coatings, thinners, cleaners, degreasers; extremely low surf. tens. to improve flow and wetting; suitable for odorless alkyd/acrylic paints; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; minimizes VOC; virtually HAPs-free

*Regulatory:* FDA 21CFR §172.882, 172.884, 176.180, 176.210, 177.2600, 178.3530, 178.3570, 178.3620(b), 178.3650; 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Odorless; m.w. 160; sp.gr. 0.76 (15.6 C); dens. 6.32 lb/gal (60 F); visc. 1.3 cP; vapor pressure 1.0 mm Hg (20 C); b.p. 178-188 C; flash pt. 129 F; surf. tens. 24.1 dynes/cm; KB value 27

*Toxicology:* OEL 300 ppm; low toxicity

**Isopar® K** [Exxon]

*Chem. Descrip.:* C11-12 isoparaffin

*Chem. Analysis:* paraffin (94%), cycloparaffin (6%)

CAS 64742-48-9

*Uses:* Solvent, diluent, carrier for personal care sprays; solvent for coatings, thinners, cleaners, degreasers; extremely low surf. tens. to improve flow and wetting; suitable for odorless alkyd/acrylic paints; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; minimizes VOC; virtually HAPs-free

*Regulatory:* FDA 21CFR §172.882, 172.884, 176.180, 176.210, 177.2600, 178.3530, 178.3570, 178.3620(b), 178.3650; 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Odorless; m.w. 164; sp.gr. 0.76 (15.6 C); dens. 6.34 lb/gal (60 F); visc. 1.4 cP; vapor pressure 0.9 mm Hg (20 C); b.p. 177-197 C; flash pt. 135 F; surf. tens. 24.2 dynes/cm; KB value 27

*Toxicology:* OEL 300 ppm; low toxicity

**Isopar® L** [Exxon]

*Chem. Descrip.:* C11-13 isoparaffin

CAS 64742-48-9

*Uses:* Solvent for skin care formulations, coatings, agrochems., thinners, cleaners, and degreasers; extremely low surf. tens. to improve flow and wetting; suitable for odorless alkyd/acrylic paints; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; minimizes VOC; virtually HAPs-free

*Regulatory:* FDA 21CFR §172.882, 172.884, 176.180, 176.210, 177.2600, 178.3530, 178.3570, 178.3620(b), 178.3650, 573.680; 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Odorless; m.w. 171; sp.gr. 0.77 (15.6 C); dens. 6.40 lb/gal (60 F); visc. 1.6 cP; vapor pressure 0.8 mm Hg (20 C); b.p. 189-207 C; flash pt. 147 F; surf. tens. 25.1 dynes/cm; KB value 27; 89% paraffin, 11% cycloparaffin

*Toxicology:* OEL 300 ppm; low toxicity

**Isopar® M** [Exxon]

*Chem. Descrip.:* C13-14 isoparaffin

CAS 64742-48-9

*Uses:* Solvent for hair spray, coatings, antiperspirants, laundry prewash, furniture/floor polish, waterless hand cleaner, agrochems, thinners, cleaners, degreasers; suitable for odorless alkyd/acrylic paints; carrier for insecticide actives; good dispersing props.; extremely low surf. tens. to improve flow and wetting; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; complies with criteria for LVP solvent; minimizes VOC; virtually HAPs-free

*Regulatory:* FDA 21CFR §172.882, 172.884, 176.180, 176.210, 177.2600, 178.3530, 178.3570, 178.3620(b), 573.680; 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Nearly odorless; m.w. 191; sp.gr. 0.79 (15.6 C); dens. 6.57 lb/gal (60 F); visc. 2.7 cP; vapor pressure < 0.1 mm Hg (20 C); b.p. 223-254 C; flash pt. 199 F; surf. tens. 26.4 dynes/cm; KB value 27; 80% paraffin, 21% cycloparaffin

*Toxicology:* OEL 300 ppm; low acute toxicity

**Isopar® V** [Exxon]

*Chem. Descrip.:* Isoparaffin hydrocarbon solv.

CAS 64742-46-7

*Uses:* Solvent for household applics. (polishes, cleaning compds., degreasers, waterless hand cleaners, stain removers, air fresheners, insecticides), inks, and elastomer-based adhesives; food-contact paper and applics.; defoamer in food-contact paper/paperboard; complies with criteria for LVP solvent

*Regulatory:* FDA 21CFR §172.884, 176.180, 176.210, 178.3620(b), 178.3650, 573.220, 573.680; 40CFR §180.1001(c)(e); SARA nonreportable

*Properties:* Saybolt +30 color; low odor; misc. with other hydrocarbons; m.w. 197; sp.gr. 0.82 (15.6 C); dens. 6.82 lb/gal (60 F); visc. 7.5 cps; vapor pressure 0.3 mm Hg (38 C); b.p. 273-311; flash pt. (ATSM D 93) 129 C; surf. tens. 26.9 dynes/cm; KB value 25

*Toxicology:* OEL 300 ppm

*Precaution:* Volatile; vapors can be ignited causing explosions or flash fires

*Storage:* Keep away from heat, sparks, and open flame

**Istemul 710** [Canamex]

*Chem. Descrip.:* Surfactant blend

*Uses:* Surfactant for paper; hydrophilic

*Properties:* Amber liq.

**Istemul 770** [Canamex]

*Chem. Descrip.:* Surfactant blend

*Uses:* Surfactant for paper; hydrophilic

*Properties:* Liq.

**Istemul 775** [Canamex]

*Chem. Descrip.:* Surfactant blend

*Uses:* Surfactant for paper; hydrophilic

*Properties:* Amber liq.

# J

## Jaguar® 418 [Vinings Ind.]

*Chem. Descrip.:* Carboxymethyl hydroxypropyl guar  
 CAS 68130-15-4

*Uses:* Viscosifier; formation aid, str. agent in syn., glass, and specialty fiber sheets, papermaking; improves runnability of fiber web; crosslinkable; hydrates rapidly to yield a smooth, visc., almost clear sol'n. at acidic pH

*Use Level:* 10-40 lb/ton

*Properties:* Pale yel. free-flowing powd.; 95% min. thru 150 mesh; disp. in water; bulk dens.  $40 \pm 5$  lb/ft<sup>3</sup>; visc. 3400 cps min. (1%); pH 8-10 (1%); 6-12% moisture; 5-7% ash

*Toxicology:* Dust may be irritating; avoid breathing dust, contact with eyes, or repeated contact with skin

*Environmental:* Can be broken down with enzymes or oxidants

*Precaution:* Wet material will become very slippery

*Storage:* Store in dry location; keep container closed when not in use to prevent moisture pickup

## Jaguar® 2100® [Vinings Ind.]

*Chem. Descrip.:* Purified guar gum  
 CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Viscosifier; dry str. agent, formation agent for fine paperboard and specialty papers; component of paper/paperboard in contact with aq./fatty/dry foods; improved smoothness; reduced press sticking; rec. where controlled visc. development is required

*Use Level:* 4-6 lb/ton (added to paper machine)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Yel. free-flowing powd.; 80% -200 mesh, 100% -20 mesh; nondispersible; visc. 3000 cps (1%); pH 5-6 (1%); 6-13% moisture

*Precaution:* Wet material will become very slippery

*Storage:* Store in dry location; keep container closed when not in use to prevent moisture pickup

## Jaguar® 8707 [Vinings Ind.]

*Chem. Descrip.:* Carboxymethyl guar gum

*Uses:* Viscosifier; retention aid, drainage aid, drying aid for papermaking; retention aid for removal of fiber fines and trash from papermaking systems; promotes fiber to fiber bonding; component of paper/paperboard in contact with aq./fatty/dry foods; improved runnability, str., printability; better sheet formation and fiber distribution; med. visc. gum with low charge dens.

*Use Level:* 2-8 lb/ton (added to paper machine)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Yel. free-flowing powd.; exc. disp. in water; visc. 2800 cps (1%); 6-13% moisture; anionic

*Toxicology:* Dust may be irritating; avoid breathing dust, contact with eyes, or repeated contact with skin

*Precaution:* Wet material will become very slippery

*Storage:* Store in dry location; keep container closed when not in use to prevent moisture pickup

## Jaguar® CB-11 [Vinings Ind.]

*Chem. Descrip.:* Guar gum  
 CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Formation and dry str. agent for paper; component of paper/paperboard in contact with aq./fatty/dry foods; improves formation in fiber grades, low consistency papermaking systems, and syn. fibers

*Use Level:* 2-25 lb/ton

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Yel. free-flowing powd.; exc. dispersability in water; visc. 3200-

3800 cps (1%); 6-13% moisture

*Toxicology:* Dust may be irritating; avoid breathing dust, contact with eyes, repeated contact with skin

*Precaution:* Wet material will become very slippery

*Storage:* Store in dry location; keep container closed when not in use to prevent moisture pickup

## Jaguar® CB-123 [Vinings Ind.]

*Chem. Descrip.:* Guar gum  
 CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Retention aid, drainage aid, drying aid, str. agent for fine paper, linerboard, and tissue mfg.; component of paper/paperboard in contact with aq./fatty/dry foods; improves wet end cleanliness due to retention of fines and anionic trash removal; provides good pigment and fines retention without overflocculation

*Use Level:* 3-10 lb/ton (added to paper machine)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Exc. dispersability in water; visc. 750-1000 cps; 6-12% moisture; amphoteric

*Toxicology:* Dust may be irritating; avoid breathing dust, contact with eyes, repeated contact with skin

*Precaution:* Wet material will become very slippery

*Storage:* Store in dry location; keep container closed when not in use to prevent moisture pickup

## Jaguar® CP-4 [Vinings Ind.]

*Chem. Descrip.:* Guar gum deriv.

*Uses:* Retention aid, drainage aid, drying aid for paper and board mfg.; component of paper/paperboard in contact with aq./fatty/dry foods; improves wet end cleanliness due to retention of fines and anionic trash removal; natural affinity for cellulose fiber; allows for good overall retention without overflocculation, while still giving good dry str. chars.

*Use Level:* 1-20 lb/ton (added to paper machine)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Yel. free-flowing powd.; exc. dispersability in water; visc. 3300 cps (1%); 6-12% moisture; cationic

*Toxicology:* Dust may be irritating; avoid breathing dust, contact with eyes, repeated contact with skin

*Precaution:* Wet material will become very slippery

*Storage:* Store in dry location; keep container closed when not in use to prevent moisture pickup

## Jaguar® CP-13 [Vinings Ind.]

*Chem. Descrip.:* Guar gum  
 CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Retention aid, drainage aid, drying aid for paper and board mfg.; str. agent in sec. fiber systems; component of paper/paperboard in contact with aq./fatty/dry foods; improves wet end cleanliness due to retention of fines and anionic trash removal; natural affinity for cellulose fiber; allows for good overall retention without overflocculation; improved optical efficiency of pigments; inc. production

*Use Level:* 0.2-1.5 lb/ton (added to paper machine)

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Yel. free-flowing powd.; exc. dispersability in water; visc. 3200 cps (1%); pH 5-7; 6-13% moisture; cationic

*Toxicology:* Dust may be irritating; avoid breathing dust, contact with eyes, repeated contact with skin

*Precaution:* Wet material will become very slippery

- Storage:* Store in dry location; keep container closed when not in use to prevent moisture pickup
- Jarcol™ I-12** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Butyl-octanol (95% min.)  
 CAS 3913-02-8; EINECS/ELINCS 223-470-0  
*Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 20 max. liq.; m.w. 186; sp.gr. 0.833; visc. 23 mPa·s; m.p. < -30 C; b.p. 145-149 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 286-305; flash pt. 120 C; ref. index 1.443; 0.1% max. water
- Jarcol™ I-14T** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Alkyl alkanol mixt., 2-butyl decanol/2-hexyl octanol 45/55  
*Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 20 max. liq.; m.w. 212-223; sp.gr. 0.835; visc. 32 mPa·s; m.p. < -25 C; b.p. 160-195 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 252-265; flash pt. 139 C; ref. index 1.447; 0.1% max. water
- Jarcol™ I-16** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Hexyl-decanol (97% min.)  
 CAS 2425-77-6; EINECS/ELINCS 219-370-1  
*Uses:* Extender, solvent for use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 20 max. liq.; m.w. ≈ 242; sp.gr. 0.836; visc. 38 mPa·s; m.p. -21 to -15 C; b.p. 193-197 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 225-235; flash pt. 156 C; ref. index 1.450; 0.1% max. water
- Jarcol™ I-18E** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Octyl decanol, 2-hexyl dodecanol (46/54)  
*Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 20 max. liq.; m.w. 269-279; sp.gr. 0.837; visc. 50 mPa·s; m.p. -10 to -6 C; b.p. 211-218 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 201-210; flash pt. 170 C; ref. index 1.452; 0.1% max. water
- Jarcol™ I-18T** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Octyl decanol/2-hexyl dodecanol 46/54  
*Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 20 max. liq.; m.w. 267-285; sp.gr. 0.837; visc. 50 mPa·s; m.p. -10 to -6 C; b.p. 207-236 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 197-210; flash pt. 170 C; ref. index 1.452; 0.1% max. water
- Jarcol™ I-20** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Octyl-dodecanol (97%min.)  
 CAS 5333-42-6; EINECS/ELINCS 226-242-9  
*Uses:* Carrier, lubricant, solubilizer for use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 20 max. liq.; m.w. 298; sp.gr. 0.838; visc. 60 mPa·s; m.p. -1 to 1 C; b.p. 234-238 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 184-190; flash pt. 180 C; ref. index 1.455; 0.1% max. water
- Jarcol™ I-24** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Decyl-tetradecanol (97% min.)  
 CAS 58670-89-6; EINECS/ELINCS 216-385-0  
*Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 20 max. liq.; m.w. 354; sp.gr. 0.842; visc. 86 mPa·s; m.p. 17-20 C; b.p. 271-275 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 154-190; flash pt. 230 C; ref. index 1.457; 0.1% max. water
- Jarcol™ I-28** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Dodecyl-1-hexadecanol (85% min.)  
 CAS 72388-18-2; EINECS/ELINCS 276-627-0
- Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles  
*Properties:* APHA 400 max. liq.; m.w. 415; sp.gr. 0.830; m.p. 29-31 C; b.p. > 300 C; acid no. 0.2 max.; hyd. no. 130-140; flash pt. 230 C; 0.2% max. water

*Properties:* APHA 30 max. clear liq.; m.w. 369-313; sp.gr. 0.871; visc. 59 mPa·s; m.p. 9 to 13 C; acid no. 175-185 max.; iodine no. 2 max.; flash pt. 192 C; ref. index 1.4498; 0.1% max. water
- Jaric I-20** [Jarchem Ind.]  
*Chem. Descrip.:* 2-Octyl dodecanoic acid  
 CAS 40596-46-1; EINECS/ELINCS 254-992-7  
*Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing,

paper coating, and textiles

*Properties:* Wh. waxy substance; m.w. 327-331; sp.gr. 0.846 (60 C); visc. 17 mPa·s (60 C); m.p. 20 to 25 C; acid no. 173-183 max.; iodine no. 2 max.; flash pt. 210 C; ref. index 1.4444 (60 C); 0.1% max. water

**Jaric I-24** [Jarchem Ind.]

*Chem. Descrip.:* 2-Decyl tetradecanoic acid  
CAS 93778-52-0

*Uses:* For use in industries such as cosmetics, pharmaceuticals, detergents, lubricants, emulsifiers, solvs., rubber, plastics, polymers, metal processing, paper coating, and textiles

*Properties:* Wh. waxy substance; m.w. 374-378; sp.gr. 0.897 (60 C); visc. 21 mPa·s (60 C); m.p. 46 to 50 C; acid no. 144-154 max.; iodine no. 2 max.; flash pt. 234 C; ref. index 1.4428 (60 C); 0.1% max. water

**Jayflex® DHP** [Exxon]

*Chem. Descrip.:* Dihexyl phthalate  
CAS 68515-50-4; EINECS/ELINCS 201-559-5

*Uses:* Plasticizer; food pkg. adhesives, coatings, paper, rubber articles, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 177.1210, 177.2600, 178.3740

*Properties:* Pt-Co < 25 color; sp.gr. 1.008 (20/20 C); dens. 8.39 lb/gal (20 C); visc. 37 cSt (20 C); vapor pressure 3 mm Hg (200 C); b.p. 210 C (5 mm); pour pt. -33 C; flash pt. (TCC) 380 F; surf. tens. 26 dynes/cm (20 C); 99.6% purity

**Jayflex® DINA** [Exxon]

*Chem. Descrip.:* Diisononyl adipate  
CAS 33703-08-1; EINECS/ELINCS 251-646-7

*Uses:* Plasticizer; food-contact coatings, paper, rubber articles, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 176.170, 177.1210, 177.2600, 178.3740

*Properties:* Pt-Co < 25 color; sp.gr. 0.924 (20/20 C); dens. 7.68 lb/gal (20 C); visc. 19.6 cSt; vapor pressure 0.9 mm Hg (200 C); b.p. 233 C (5 mm); pour pt. -59 C; flash pt. (TCC) 390 F; surf. tens. 32 dynes/cm (20 C); 99% purity

**Jayflex® DINP** [Exxon]

*Chem. Descrip.:* Diisononyl phthalate  
CAS 68515-48-0; EINECS/ELINCS 249-079-5

*Uses:* Plasticizer used in coatings; food-contact coatings, paper, rubber articles, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.300, 176.170, 177.1210, 177.2600, 178.3740

*Properties:* Pt-Co < 25 color; sp.gr. 0.973 (20/20 C); dens. 8.10 lb/gal (20 C); visc. 102 cSt (20 C); vapor pressure 0.5 mm Hg (200 C); b.p. 252 C (5 mm); pour pt. -48 C; flash pt. (TCC) 415 F; surf. tens. 33 dynes/cm (20 C); 99.6% purity

**Jayflex® DIOP** [Exxon]

*Chem. Descrip.:* Diisooctyl phthalate  
CAS 27554-26-3; EINECS/ELINCS 248-523-5

*Uses:* Plasticizer; food-contact adhesives, coatings, paper, cellophane, rubber articles, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 177.1200, 177.1210, 177.2600, 178.3740

*Properties:* Pt-Co < 25 color; sp.gr. 0.985 (20/20 C); dens. 8.20 lb/gal (20 C); visc. 85 cSt (20 C); vapor pressure 1 mm Hg (200 C); b.p. 230 C (5 mm); pour pt. -46 C; flash pt. (TCC) 400 F; surf. tens. 30 dynes/cm (20 C); 99.6% purity

**Jeffamine® EDR-148** [Huntsman]

*Chem. Descrip.:* Polyoxyalkylene diamine

*Uses:* Epoxy curing agent with flexibilizing and toughening props.; also in polyamide, polyurea, modified urethane resins, in adhesives, elastomers, foam formulas; intermediate for textile and paper treatment chemicals

*Use Level:* 20 phr

*Properties:* Nearly colorless liq.; m.w. 148; sp.gr. 1.0154 (25/4 C); visc. 8 cSt; flash pt. (PMCC) 265 F; distort. temp. 44-47 C (264 psi)

**Jeffamine® T-3000** [Huntsman]

*Chem. Descrip.:* Polyoxypropylenetriamine (50 PO)

*Uses:* Epoxy curing agent; also in polyamide, polyurea, modified urethane resins, in adhesives, elastomers, foam formulas; intermediate for textile and paper treatment chemicals

*Properties:* Colorless to lt. yel. hazy liq.; m.w. 3000; sp.gr. 1.1203; visc. 467 cSt; flash pt. (PMCC) 455 F

**Jeffamine® T-5000** [Huntsman]

*Chem. Descrip.:* Polyoxypropylenetriamine (85 PO)

*Uses:* Epoxy curing agent; also in polyamide, polyurea, modified urethane resins, in adhesives, elastomers, foam formulas; intermediate for textile and paper treatment chemicals; promotes adhesion and thermal shock resist.

*Properties:* Colorless to lt. yel. hazy liq.; m.w. 5000; sp.gr. 0.9967 (25/4 C); visc. 829 cSt; flash pt. (PMCC) 410 F; 0.10% water

**Jetcoat™ PCC** [Specialty Mins.]

*Chem. Descrip.:* Precipitated calcium carbonate  
CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for coating ink jet and other non-impact printing papers

**Jetsize® Colloidal Disp.** [Eka Chems.]

*Chem. Descrip.:* Polyurethane

*Uses:* Surf. treatment for paper with superior inkjet and offset printing chars.; highest hydrophobicity chars.

**Jetsize® Emulsion** [Eka Chems.]

*Chem. Descrip.:* Aq. disp. of styrene-acrylic ester copolymers  
CAS 9010-92-8

*Uses:* Surf. sizing agent for paper and board enhancing non-impact printing, such as ink jet or bubble jet, while maintaining good toner adhesion and friction chars.; surfactant-free; may be used alone or combined with starch; reduced foaming and pH sensitivity offer wider operating window at size press

**Jetsize® Sol'n.** [Eka Chems.]

*Chem. Descrip.:* Styrene/MA and styrene acryl acid copolymers

*Uses:* Surf. treatment for paper; offers porosity control, toner adhesion, and fair printing chars.

**Jetslide** [Vinings Ind.]

*Uses:* Corrugator lubricant; allows corrugators to run at elevated line speeds by reducing drag thru the hotplate section when running high friction grades such as clay-coated white liners

**Jungbunzlauer Xanthan Gum, Technical Grade** [Jungbunzlauer Int'l. AG]

*Chem. Descrip.:* Polysaccharide

*Uses:* Thickener and stabilizer for agrochem. industry, cleaners, polishes, paints, textile printing pastes, adhesives, paper process, mining, printing inks, ceramic glazes, oil well drilling

*Use Level:* 0.05-0.1% (inks); 0.1-0.2% (paper); 0.1-0.3% (agric.); 0.1-0.3% (paints, adhesives); 0.1-0.4% (drilling); 0.2-0.3% (mining); 0.2-0.5% (textile); 0.2-0.7% (cleaners); 0.3-0.5% (ceramic glazes)

*Properties:* Wh. to cream-colored free-flowing powd., 100% < 250 µm (60 US mesh), 95% ≤ 180 µm (80 US mesh); readily sol. in water; insol. in most org. solvs.; visc. 1300-1700 mPa·s; pH 7 ± 1.5 (1%); < 15% moisture; > 1.5% pyruvic acid; anionic

*Storage:* Store in cool, dry place; preservative rec. if stored > 24 h

# K

**Kalipol™ 4KP** [Albright & Wilson UK/Phosphorus Spec.]

*Chem. Descrip.:* Tetrapotassium pyrophosphate  
 CAS 7320-34-5; EINECS/ELINCS 230-785-7

*Uses:* Sequestrant for use in detergents, paints, paper, water treatment, and metal finishing; binds metal ions into sol. complex so they no longer show normal reactions, e.g., sequesters calcium and magnesium so that these ions no longer interfere with washing action of detergents

*Properties:* Clear, pale straw liq.; sp.gr. 1.54-1.59; dens. 1.56 g/ml; visc. 6 cSt; pH 10 (5 g/l sol'n.); 50% solids

**Kalipol™ 20** [Albright & Wilson UK/Phosphorus Spec.]

*Chem. Descrip.:* Sodium hexametaphosphate  
 CAS 10124-56-8; EINECS/ELINCS 233-343-1

*Uses:* Sequestrant for use in detergents, paints, paper, cement, ceramics, refractories, and potable water treatment; binds metal ions into sol. complex so they no longer show normal reactions, e.g., sequesters calcium and magnesium so that these ions no longer interfere with washing action of detergents

*Properties:* Clear colorless liq., sp.gr. 1.29 min.; dens. 1.32 g/ml; visc. 6 cSt; pH 7 (5 g/l sol'n.); 32% solids; anionic

**Kalipol™ KTP** [Albright & Wilson UK/Phosphorus Spec.]

*Chem. Descrip.:* Potassium tripolyphosphate  
 CAS 13845-36-8; EINECS/ELINCS 237-574-9

*Uses:* Sequestrant for use in detergents, paints, paper, and cement; binds metal ions into sol. complex so they no longer show normal reactions, e.g., sequesters calcium and magnesium so that these ions no longer interfere with washing action of detergents

*Properties:* Clear, pale straw liq.; sp.gr. 1.56-1.60 min.; dens. 1.57 g/ml; visc. 13 cSt; pH 9.8 (5 g/l sol'n.); 50% solids

**Kamyr Defoamer 121** [Process Chems. LLC]

*Uses:* Brownstock defoamer for kraft, sulfite, and semi-chem. pulp washing, for use in brownstock washing, screen room, and bleach plant operations; oil-based; does not contribute to deposit formation; suitable whether batch or continuous pulp is employed

*Properties:* Opaque tan liq.; dens. 6.95-7.45 lb/gal; visc. 400-850 cps

*Toxicology:* TSCA listed

*Storage:* Store in dry area

**Karaya Gum #1 FCC** [Frutarom Meer]

*Chem. Descrip.:* Karaya gum  
 CAS 9000-36-6; EINECS/ELINCS 232-539-4

*Uses:* Stabilizer, water binder, emulsifier for water ices, sherbets, cheese spreads, meringue powds., meat processing; in pharmaceuticals (bulk laxatives, denture adhesives); binder in paper industry; thickener for textile dyes

**Kathon® WT** [Rohm & Haas; Rohm & Haas France]

*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one  
 CAS 26172-55-4; EINECS/ELINCS 247-500-7

*Uses:* Antimicrobial for cooling tower water; slimicide for paper mills

*Properties:* Water-sol.

**Kauramin®** [BASF AG]

*Chem. Descrip.:* Melamine-formaldehyde condensate

*Uses:* Glues for prod. of weather-resist. chipboard and plywood; impregnating resin for decorative and overlay papers

**Kaurit®** [BASF AG]

*Chem. Descrip.:* Urea-formaldehyde based  
 CAS 9011-05-6

*Uses:* Glues for prod. of veneered board, furniture; impregnating resins for decorative papers

**KC-350** [Georgia Marble]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%), Na<sub>2</sub>O (0.40%), SiO<sub>2</sub> (0.01%), Fe<sub>2</sub>O<sub>3</sub> (0.01%), free moisture (0.5% max., 110 C)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant, smoke suppressant filler in polymeric materials incl. PVC, thermosets, elastomeric copolymers, rubber, latex, paints, wire and cable, coatings, paper, and adhesives

*Properties:* Dry, free-flowing powd.; 3-4 μ median particle size; 0.05% on 325 mesh; sp.gr. 2.42; bulk dens. 35 lb/ft<sup>3</sup> (loose), 60 lb/ft<sup>3</sup> (packed); brightness (Hunter Y) 92-94; ref. index 1.57

**KC-500** [Georgia Marble]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%), Na<sub>2</sub>O (0.40%), SiO<sub>2</sub> (0.01%), Fe<sub>2</sub>O<sub>3</sub> (0.01%), free moisture (0.5% max., 110 C)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant, smoke suppressant filler in polymeric materials incl. PVC, thermosets, elastomeric copolymers, rubber, latex, paints, wire and cable, coatings, paper, and adhesives

*Properties:* Dry, free-flowing powd.; 4-6 μ median particle size; 0.1% on 325 mesh; sp.gr. 2.42; bulk dens. 40 lb/ft<sup>3</sup> (loose), 70 lb/ft<sup>3</sup> (packed); brightness (Hunter Y) 92-94; ref. index 1.57

**KC-750** [Georgia Marble]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%), Na<sub>2</sub>O (0.40%), SiO<sub>2</sub> (0.01%), Fe<sub>2</sub>O<sub>3</sub> (0.01%), free moisture (0.5% max., 110 C)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant, smoke suppressant filler in polymeric materials incl. PVC, thermosets, elastomeric copolymers, rubber, latex, paints, wire and cable, coatings, paper, and adhesives

*Properties:* Dry, free-flowing powd.; 6-8 μ median particle size; 0.1% on 325 mesh; sp.gr. 2.42; bulk dens. 45 lb/ft<sup>3</sup> (loose), 75 lb/ft<sup>3</sup> (packed); brightness (Hunter Y) 92-94; ref. index 1.57

**KC-900** [Georgia Marble]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (65%), Na<sub>2</sub>O (0.40%), SiO<sub>2</sub> (0.01%), Fe<sub>2</sub>O<sub>3</sub> (0.01%), free moisture (0.5% max., 110 C)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant, smoke suppressant filler in polymeric materials incl. PVC, thermosets, elastomeric copolymers, rubber, latex, paints, wire and cable, coatings, paper, and adhesives

*Properties:* Dry, free-flowing powd.; 8-10 μ median particle size; 1.0% on 325 mesh; sp.gr. 2.42; bulk dens. 50 lb/ft<sup>3</sup> (loose), 75 lb/ft<sup>3</sup> (packed); brightness (Hunter Y) 92-94; ref. index 1.57

**K-Corr® 100A2** [King Ind.]

*Chem. Descrip.:* Ester/amide/carboxylate with octadecyldimethyl amine

*Uses:* Rust inhibitor/demulsifier used in turbine oils, hydraulic fluids, gear oils, and paper machine oils; environmentally friendly; ashless

*Properties:* Sp.gr. 0.97; dens. 8.1 lb/gal; visc. 16 cSt (100 C); acid no. 80; flash pt. (COC) 165 C; 100% act.

*Environmental:* Biodeg.

**K-Corr® 181CA** [King Ind.]

*Chem. Descrip.:* Calcium salt of ester/amide/carboxylate in trimethylolpro-

pane ester

*Uses:* Rust inhibitor/demulsifier in turbine oils, hydraulic fluids, gear oils, and paper machine oils; environmentally friendly

*Properties:* Sp.gr. 1.04; dens. 8.7 lb/gal; visc. 59 cSt (100 C); acid no. 10; flash pt. (COC) 165 C; 80% act.

*Environmental:* Biodeg.

**K-Corr® 182CA** [King Ind.]

*Chem. Descrip.:* Calcium salt of ester/amide/carboxylate in hydrotreated naphthenic oil

*Uses:* Rust inhibitor/demulsifier in turbine oils, hydraulic fluids, gear oils, and paper machine oils; environmentally friendly

*Properties:* Sp.gr. 1.01; dens. 8.4 lb/gal; visc. 39 cSt (100 C); acid no. 10; flash pt. (COC) 165 C; 80% act.

*Environmental:* Biodeg.

**K-Cure® 129B** [King Ind.]

*Chem. Descrip.:* Mixed acid catalyst (50%), methanol/n-butanol solv.

*Uses:* Catalyst used in paper, wood, and ink coatings; fast curing

*Properties:* Gardner 1 color; dens. 8.90 lb/gal; acid no. 200-210; 50% act.

**K-Cure® 1040** [King Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid, isopropanol

*Uses:* Used in coatings for appliances, automotive, can, coil, general industrial, paper, ink and wood; general purpose, high quality grade acid; high gloss, fast cure; for applics. where weathering and exterior durability are needed

*Properties:* Gardner 1 color; dens. 8.25 lb/gal; acid no. 130-140; 40% act.

**K-Cure® 1040W** [King Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid, water

CAS 104-15-4; EINECS/ELINCS 203-180-0

*Uses:* Used in coatings for appliances, automotive, can, coil, general industrial, paper, ink and wood; general purpose, high quality grade acid; high gloss, fast cure; nonflamm. for waterborne applics.; for applics. where weathering and exterior durability are needed

*Properties:* Gardner 2 color; dens. 9.40 lb/gal; acid no. 130-140; 40% act.

**KELACID®** [ISP Alginates]

*Chem. Descrip.:* Alginic acid

CAS 9005-32-7; EINECS/ELINCS 232-680-1

*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; tablet disintegrant; hemostatic agent; primary reagent; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §184.1011, GRAS; FCC/NF compliance; EU E400 compliance; Kosher approved

*Properties:* Wh. fibrous particles, sl. odor; 93% min. thru 80 mesh, 88% min. thru 100 mesh; sol. in alkaline sol'n.; swells in water; bulk dens. ≈ 50 lb/ft<sup>3</sup>; pH 2.6-3.2 (3% aq. slurry); surf. tens. 53 dynes/cm; 7% moisture

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation

*Precaution:* Not flamm., but powd. will burn if involved in fire; spills are slippery; incompat. with strong oxidizers

*Storage:* Store in cool, dry place @ 46-59 F

**KELCOLOID® DH** [ISP Alginates]

*Chem. Descrip.:* Propylene glycol alginate

CAS 9005-37-2

*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics., emulsions and low pH systems; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §172.858, EU E405 compliance

*Properties:* Cream agglomerated, sl. odor; 840 μ particle size; sol. in water; sp.gr. 1.46; dens. 33.71 lb/ft<sup>3</sup>; visc. 400 cps (1%), 7000 cps (2%); ref. index 1.3343; pH 3.7; surf. tens. 58 dynes/cm

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

*Precaution:* Incompat. with strong oxidizers

**KELCOLOID® HVF** [ISP Alginates]

*Chem. Descrip.:* Propylene glycol alginate

CAS 9005-37-2

*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §172.858, EU E405 compliance

*Properties:* Cream fibrous particles, sl. odor; 175 μ particle size; 80 mesh; sol. in water; sp.gr. 1.46; dens. 33.71 lb/ft<sup>3</sup>; visc. 400 cps (1%), 7000 cps (2%); ref. index 1.3343; pH 3.7; surf. tens. 58 dynes/cm

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye

irritation

*Precaution:* Incompat. with strong oxidizers

**KELCOLOID® LVF** [ISP Alginates]

*Chem. Descrip.:* Propylene glycol alginate

CAS 9005-37-2

*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §172.858, EU E405 compliance

*Properties:* Cream fibrous particles; 175 μ particle size; 80 mesh; sp.gr. 1.46; dens. 33.71 lb/ft<sup>3</sup>; visc. 120 cps (1%), 1200 cps (2%); ref. index 1.3343; pH 3.7; surf. tens. 58 dynes/cm

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

*Precaution:* Incompat. with strong oxidizers

**KELCOLOID® O** [ISP Alginates]

*Chem. Descrip.:* Propylene glycol alginate

CAS 9005-37-2

*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; beer foam stabilizer; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §172.858, EU E405 compliance

*Properties:* Cream fibrous particles; 175 μ particle size; sp.gr. 1.46; dens. 33.71 lb/ft<sup>3</sup>; visc. 25 cps (1%), 130 cps (2%); ref. index 1.3343; pH 4.0; surf. tens. 58 dynes/cm

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

*Precaution:* Incompat. with strong oxidizers

**KELCOLOID® S** [ISP Alginates]

*Chem. Descrip.:* Propylene glycol alginate

CAS 9005-37-2

*Uses:* Gellant, emulsifier, and stabilizer in foods, pharmaceutical, and industrial applics.; beer foam stabilizer; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §172.858, EU E405 compliance

*Properties:* Cream fibrous particles; 175 μ particle size; sp.gr. 1.46; dens. 33.71 lb/ft<sup>3</sup>; visc. 20 cps (1%), 120 cps (2%); ref. index 1.3343; pH 4.1; surf. tens. 58 dynes/cm

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

*Precaution:* Incompat. with strong oxidizers

**KELCOSOL®** [ISP Alginates]

*Chem. Descrip.:* Algin

CAS 9005-38-3

*Uses:* Gellant, suspending agent, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §184.1724, GRAS; EU E401 compliance

*Properties:* Cream fibrous particles, sl. odor; 80 mesh; water-sol.; sp.gr. 1.64; dens. 43.38 lb/ft<sup>3</sup>; visc. 1300 cps (1%), 15,000 cps (2%); pH 7; surf. tens. 70 dynes/cm; 9% moisture

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

*Precaution:* Incompat. with strong oxidizers

**KELGIN® F** [Monsanto]

*Chem. Descrip.:* Algin, refined

CAS 9005-38-3

*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §184.1724, GRAS; EU E401 compliance

*Properties:* Ivory gran., sl. odor; 80 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft<sup>3</sup>; visc. 300 cps (1%), 4000 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

*Precaution:* Incompat. with strong oxidizers

**KELGIN® HV** [Monsanto]

*Chem. Descrip.:* Algin

CAS 9005-38-3

*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry

*Regulatory:* FDA 21CFR §184.1724, GRAS; EU E401 compliance

*Properties:* Ivory gran., sl. odor; 30 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft<sup>3</sup>; visc. 800 cps (1%), 10,000 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye

- irritation  
*Precaution:* Incompat. with strong oxidizers
- KELGIN® LV** [Monsanto]  
*Chem. Descrip.:* Algin  
 CAS 9005-38-3  
*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry  
*Regulatory:* FDA 21CFR §184.1724, GRAS; EU E401 compliance  
*Properties:* Ivory gran., sl. odor; 42 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft<sup>3</sup>; visc. 60 cps (1%), 500 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation  
*Precaution:* Incompat. with strong oxidizers
- KELGIN® MV** [Monsanto]  
*Chem. Descrip.:* Algin  
 CAS 9005-38-3  
*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry  
*Regulatory:* FDA 21CFR §184.1724, GRAS; EU E401 compliance  
*Properties:* Ivory gran., sl. odor; 30 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft<sup>3</sup>; visc. 400 cps (1%), 6000 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation  
*Precaution:* Incompat. with strong oxidizers
- KELGIN® XL** [Monsanto]  
*Chem. Descrip.:* Refined sodium alginate  
 CAS 9005-38-3  
*Uses:* Gellant, emulsifier, and stabilizer in food, pharmaceutical, and industrial applics.; stabilizer in paper and textile industry  
*Regulatory:* FDA 21CFR §184.1724, GRAS; EU E401 compliance  
*Properties:* Ivory gran., sl. odor; 42 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft<sup>3</sup>; visc. 30 cps (1%), 160 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation  
*Precaution:* Incompat. with strong oxidizers
- KELSET®** [Monsanto]  
*Chem. Descrip.:* Sodium alginate  
 CAS 9005-38-3  
*Uses:* Gellant, emulsifier, and stabilizer in foods (bakery fillings, tomato sauces, glazes), pharmaceutical, and industrial applics.; stabilizer in paper and textile industry; self-gelling gum  
*Regulatory:* FDA 21CFR §184.1724, GRAS; EU E401 compliance  
*Properties:* Lt. ivory soft gel, sl. odor; 177 μ particle size; 80 mesh; water-sol.; bulk dens. ≈ 50 lb/ft<sup>3</sup>; pH 7.0  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation  
*Precaution:* Incompat. with strong oxidizers
- KELZAN®** [Monsanto]  
*Chem. Descrip.:* Industrial grade xanthan gum  
 CAS 11138-66-2; EINECS/ELINCS 234-394-2  
*Uses:* Foam stabilizer, flocculant suspending agent, gellant, rheology modifier, lubricant for industrial applics. incl. abrasives, adhesives, herbicides, fertilizers, ceramics, cleaners, emulsions, gels, mining, thixotropic paints, paper, petrol., pigments; viscosifier for drilling fluids; latex thickener; std. industrial grade  
*Properties:* Cream dry powd.; 40 mesh size; water-sol.; sp.gr. 1.6; bulk dens. 52.4 lb/ft<sup>3</sup>; visc. 850 cps; f.p. 0 C (1% aq.); surf. tens. 75 dynes/cm; pH 7.0
- KELZAN® XC Polymer** [Monsanto]  
*Chem. Descrip.:* Xanthan gum  
 CAS 11138-66-2; EINECS/ELINCS 234-394-2  
*Uses:* Foam stabilizer, flocculant suspending, gelling agent, rheology modifier, lubricant for industrial applics. incl. abrasives, adhesives, herbicides, fertilizers, ceramics, cleaners, emulsions, gels, mining, thixotropic paints, paper, petrol., pigments; additive to oil well drilling mud  
*Properties:* Cream dry powd.; 40 mesh size; water-sol.; sp.gr. 1.6; bulk dens. 52.4 lb/ft<sup>3</sup>; visc. 850 cps; f.p. 0 C (1% aq.); surf. tens. 75 dynes/cm; pH 7.0
- Kemamide® W-20** [Crompton/Witco]

- Chem. Descrip.:* Ethylene dioleamide  
 CAS 110-31-6; EINECS/ELINCS 203-756-1  
*Uses:* Lubricant, slip, antilock, and mold release agent for plastics, rubber, crayons, petrol. prods., asphalts, inks, metals, textiles; mold release agent for thermoplastic resins in inj. molding; defoamer/water repellent in industrial/household applic.; internal and external lubricants in ABS, PS, polyethylene, PP, PVC, nylon, cellulose acetate, PVAc, and phenolic resins; defoamer in paper industry blk. liquoring, fabric dyeing, latex systems; metal processing, asphalts  
*Regulatory:* FDA compliance  
*Properties:* Gardner 6 max. powd. and flake; sol. (g/100 g solv. @ 35 C) > 20 g in toluene, 12 g in IPA, 4 g in dichloroethane, 3 g in MEK; m.p. 120 C; acid no. 10 max.; flash pt. 296 C (COC); fire pt. 315 C (COC)
- Kemamide® W-39** [Crompton/Witco]  
*Chem. Descrip.:* Ethylene distearamide  
 CAS 110-30-5; EINECS/ELINCS 203-755-6  
*Uses:* Lubricant, slip, antilock, and mold release agent for plastics, crayons, petrol. prods., asphalts, inks, metals, textiles; mold release agent for thermoplastic resins in inj. molding; defoamer and water repellent in industrial/household applic.; release agent migrating from food pkg.; food pkg. adhesives, coatings, paper, cellophane  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.380, 175.390, 176.170, 177.1200, 177.2470, 177.2480, 181.28  
*Properties:* Gardner 18 max. flakes; sol. (g/100 g solv. @ 70 C) 2.0 g toluene, 1.6 g dichloroethane; 1.4 g IPA, 0.9 g MEK; m.p. 140 C; acid no. 10 max.; flash pt. 299 C (COC); fire pt. 315 C (COC); nonionic
- Kemamide® W-40** [Crompton/Witco]  
*Chem. Descrip.:* Ethylene distearamide  
 CAS 110-30-5; EINECS/ELINCS 203-755-6  
*Uses:* Lubricant, slip, antilock, and mold release agent for plastics, rubber, crayons, petrol. prods., asphalts, inks, metals, textiles; mold release agent for thermoplastic resins in inj. molding; defoamer/water repellent in industrial/household applic.; release agent migrating from food pkg.; food pkg. adhesives, coatings, paper, cellophane  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.380, 175.390, 176.170, 177.1200, 177.2470, 177.2480, 181.28  
*Properties:* Gardner 3 max. powd. and flake; sol. (g/100 g solv. @ 70 C) 2.0 g toluene, 1.6 g dichloroethane; 1.4 g IPA, 0.9 g MEK; m.p. 140 C; acid no. 10 max.; flash pt. 299 C (COC); fire pt. 315 C (COC); nonionic
- Kemamide® W-45** [Crompton/Witco]  
*Chem. Descrip.:* Ethylene distearamide  
 CAS 110-30-5; EINECS/ELINCS 203-755-6  
*Uses:* Lubricant, slip, antilock, and mold release agent for plastics, rubber, petrol. prods., asphalts, inks, metals, textiles; mold release agent for thermoplastic resins in inj. molding; defoamer and water repellent in industrial/household applic.; release agent migrating from food pkg.; food pkg. adhesives, coatings, paper, cellophane  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.380, 175.390, 176.170, 177.1200, 177.2470, 177.2480, 181.28  
*Properties:* Gardner 3 max. powd. and flake; sol. (g/100 g solv. @ 70 C) 2.0 g toluene, 1.6 g dichloroethane; 1.4 g IPA, 0.9 g MEK; m.p. 145 C; acid no. 10 max.; flash pt. 304 C (COC); fire pt. 322 C; nonionic
- Kemester® 5500** [Crompton/Witco]  
*Chem. Descrip.:* Glyceryl stearate  
 CAS 123-94-4  
*Uses:* Emollient, emulsifier; stabilizer, plasticizer, lubricant for cosmetics, paper, textiles, and industrial uses  
*Properties:* Gardner 3 max. bead, flake; m.p. 56-60 C; acid no. 3 max.; iodine no. 0.5 max.; sapon. no. 164-177; 100% conc.; nonionic
- Kemester® 6000SE** [Crompton/Witco]  
*Chem. Descrip.:* Glyceryl stearate SE  
 CAS 11099-07-3  
*Uses:* Emulsifier, emollient, lubricant, plasticizer for cosmetics, paper and textiles  
*Properties:* Gardner 3 max. beads; m.p. 56-61 C; acid no. 10 max.; iodine no. 3 max.; sapon. no. 140-156; 100% conc.; anionic
- Kenores® Series** [Eka Chems.]  
*Uses:* Wet sur. agent for papermaking; meets needs of low levels of chlorinated compds. while maintaining high efficiency
- Kessco® Cetyl Alcohol NF** [Stepan]  
*Chem. Descrip.:* Cetyl alcohol NF  
 CAS 36653-82-4; EINECS/ELINCS 253-149-0

*Uses:* Emulsifier, opacifier, and foaming agent in cleansing prods., hair conditioners, creams/lotions, lipsticks, makeup bases; emollient, emulsion stabilizer, thickener, and visc. stabilizer for skin and hair conditioners; defoamer in food-contact paper coatings; in food-contact textiles

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.200, 177.1010, 177.1200, 177.2800, 178.3910; listed in US, Europe, Canada, Australia, Korea, Japan

*Properties:* Wh. to off-wh. flakes; typ. mild waxy odor; sol. in IPA; sol. @ 50 C in min. oil, peanut oil; insol. in water; m.p. 47.5 C; acid no. 0.25; iodine no. 0.8; hyd. no. 227; flash pt. (COC) 198 C; 0% RVOC

*Toxicology:* Pract. nontoxic orally; causes sl. skin and pract. no eye irritation; TSCA listed

*Environmental:* Biodeg.

*Storage:* Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

#### **Kevlar® 29, 49** [DuPont; DuPont Canada]

*Chem. Descrip.:* Aramid fiber

*Uses:* Used for aircraft/aerospace, boat hulls, prosthetics, footwear, sporting goods, ropes and cables, fiber optics, bullet-resist. vests, fabrics, brakes and other friction prods., in radial tires; asbestos replacement; reinforcement for mech. rubber goods; high str., lightweight, flexible material; avail. as continuous filament yarn, staple, engineered short fiber, pulp, spun yarn, needlepunched felt, paper, woven fabrics, cord, narrow webbing

*Properties:* Kevlar 29, 49 yarn props.: dens. 1.44 g/cc; tens. str. 2930 MPa; tens. elong. 3.6 and 2.5% resp. (break); Kevlar 29, 49 fiber props.: dens. 1.44 g/cc; tens. str. 3620 MPa; tens. elong. 4.4 and 2.9% (break)

#### **Keydime® A Series** [Eka Chems.]

*Chem. Descrip.:* Alkyl ketene dimer

*Uses:* Internal sizing agent for paper; for improved efficiency in systems containing highly cationic additives, such as wet str.; compat. with anionic additives such as whiteners

*Properties:* Anionic

#### **Keydime® C Series** [Eka Chems.]

*Chem. Descrip.:* Alkyl ketene dimer

*Uses:* Internal sizing agent for paper; starch-stabilized dispersion for use with microparticle retention systems

*Properties:* Cationic

#### **Keydime® D Series** [Eka Chems.]

*Chem. Descrip.:* Alkyl ketene dimer

*Uses:* Internal sizing agent for sizing paper systems, esp. recycled fiber, or systems using dispersed fillers; polymer-stabilized dispersion

*Properties:* Cationic

#### **Keydime® E Series** [Eka Chems.]

*Chem. Descrip.:* Alkyl ketene dimer

*Uses:* Internal sizing agent for sizing paper systems, esp. fine paper systems containing precipitated calcium carbonate and systems which exhibit low cationic demand; polymer-stabilized dispersion

*Properties:* Cationic

#### **Keydime® NU** [Eka Chems.]

*Uses:* Dispersion for use in wood-containing paper grades, to provide improved sizing and converting/printing characteristics

#### **K-Flex® UD-320** [King Ind.]

*Chem. Descrip.:* Aliphatic urethane diol

*Uses:* Polyurethane polyol used in solv.-based systems; modifier for acrylic, polyester, and alkyd resins; high-solids coatings, machinery and equip. coatings, appliance coatings, automotive topcoats, paper and wood coatings, aerospace coatings; lower VOC

*Properties:* Gardner < 3 clear visc. liq.; sol. in water, alcohol, esters, ketones; insol. in xylene, min. spirits, glycols; low m.w.; sp.gr. 1.13; dens. 9.40 lb/gal; visc. 9000 cps; acid no. 0.5; hyd. no. 300; 82% act. in methoxy propyl acetate; 31% urethane; 0.02% moisture

#### **K-Flex® UD-320-100** [King Ind.]

*Chem. Descrip.:* Aliphatic urethane diol

*Uses:* Polyurethane polyol used as a modifier for high solids solv. borne coatings; polymer intermediate; preparation of polyester-urethanes; rec. for appliance coatings, automotive topcoats, paper and wood coatings, aerospace coatings; lower VOC

*Properties:* Gardner < 3 clear visc. liq.; sol. in water, alcohol, esters, ketones, glycols; insol. in xylene, min. spirits; low m.w.; sp.gr. 1.14; dens. 9.50 lb/gal; visc. 7000 cps (50 C); hyd. no. 350; 100% solids; 37% urethane; 0.02% moisture

#### **K-Flex® UD-320W** [King Ind.]

*Chem. Descrip.:* Aliphatic urethane diol

*Uses:* Polyurethane polyol used as a modifier for water-sol. resins and emulsions, coil coatings, paper and wood coatings, appliance coatings, automotive topcoats/primers, can coatings, ink and graphics systems; lower VOC

*Properties:* Gardner < 3 clear visc. liq.; sol. in water, alcohols, glycol-esters, glycols; insol. in ketones, xylene, min. spirits; low m.w.; sp.gr. 1.14; dens. 9.50 lb/gal; visc. 8000 cps; acid no. 0.5; hyd. no. 315; 88% act. in water; 10% moisture

#### **K-Flex® XM-2304** [King Ind.]

*Chem. Descrip.:* Aliphatic urethane diol resin modifier

*Uses:* Modifier for amino or isocyanate crosslinked coatings, elastomers, and adhesives, automotive, aerospace, wood/paper, and general industrial coatings, and inks; water-sol.; reduces VOCs

*Properties:* Gardner 3 viscous liq.; sol. in water, alcohols, esters, ketones, and glycol ethers; sp.gr. 1.188; visc. 26,000 cps; hyd. no. 383; flash pt. (CC) > 200 F; 95% act.

*Toxicology:* TSCA listed

#### **Klucel® E** [Hercules/Aqualon]

*Chem. Descrip.:* Hydroxypropylcellulose, standard grade

CAS 9004-64-2

*Uses:* Surface active thickener, stabilizer, film-former, suspending agent, protective colloid for coatings, adhesives, extrusions, moldings, paper, paint removers, encapsulations, inks

*Properties:* Off-wh. powd., tasteless; 99% thru 20 mesh; sol. in water and many polar org. solvs.; m.w. 80,000; visc. 150-700 cps (10% aq.); bulk dens. 0.5 g/ml; soften. pt. 100-150 C; nonionic

#### **Klucel® L** [Hercules/Aqualon]

*Chem. Descrip.:* Hydroxypropylcellulose, standard grade

CAS 9004-64-2

*Uses:* Surface active thickener, stabilizer, film-former, suspending agent, protective colloid for coatings, adhesives, extrusions, moldings, paper, paint removers, encapsulations, inks

*Properties:* Off-wh. powd., tasteless; 99% thru 20 mesh; sol. in water and many polar org. solvs.; m.w. 80,000; visc. 150-700 cps (10% aq.); bulk dens. 0.5 g/ml; soften. pt. 100-150 C; nonionic

#### **Koldex® 50, 60** [Tate & Lyle N. Am.]

*Chem. Descrip.:* Visc. modified dent corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Binder in paper coatings, adhesives; provides low visc. at med.-high solids on prep. in cold water; rec. where good tack at high solids is important

*Properties:* Sol. in cold water

#### **Korad Klear** [Polymer Extruded Prods.]

*Chem. Descrip.:* Acrylic film

*Uses:* Permanently bondable to substrates incl. metal, wood, plastics, paper, and foil; used in directional and warning signs, prod. coding; with wood grain decoration in large appliances; auto and boat interiors; metalized film for trim (appliance, automotive), name plates, watch housings; in laminates for outdoor prods., (automotive panels, moldings and bumpers, solar blocking film, lighting, housings); weatherable with optical clarity; easily decorated; clear film; tens. str. 4400 psi; tens. elong. 130%.

#### **Koster Keunen Beeswax** [Koster Keunen]

*Chem. Descrip.:* Beeswax, white and yel.

EINECS/ELINCS 232-383-7

*Uses:* Emulsifier, thickener, emollient, opacifier, oil gellant used in creams, lotions, lipstick, makeup, depilatories, ointments, salves, sustained release pharmaceuticals, furniture, wood, and leather polishes, leather, textile, wood, and paper finishes, candles, molding, lithography, non-cosmetic emulsions

*Regulatory:* FDA 21CFR §184.1973, 184.1975

*Properties:* Wax; sol. 24.2 g/100 ml in benzene; sp.gr. 0.950-0.960; m.p. 61-65 C; acid no. 17-24; iodine no. 8-11; cloud pt. < 65 C; flash pt. 242-250 C; ref. index 1.4398-1.4451; dielec. const. 3.1-3.3

#### **Koster Keunen Candelilla** [Koster Keunen]

*Chem. Descrip.:* Candelilla (Euphorbia cerifera) wax

CAS 8006-44-8; EINECS/ELINCS 232-347-0

*Uses:* Gellant, emollient used for lipsticks, creams, lotions, gel prods.; leather dressings; furniture and other polish; cements; varnishes; sealing wax; elec. insulating compositions; phonograph records; paper sizing; rubber; waterproofing and insectproofing; paint removers; soft wax stiffeners; lubricants; candy and gum; food pkg. adhesives, coatings, paper

*Regulatory:* FDA 21CFR §172.615, 175.105, 175.320, 176.180

*Properties:* Wax; sol. hot in alcohol, benzene, petroleum ether; sp.gr. 0.9820-0.9930; m.p. 68.5-72.5 C; acid no. 11-19; iodine no. 19-44; sapon. no. 44-

66; ref. index 1.4555; dielec. const. 2.50-2.63

**Koster Keunen Carnauba** [Koster Keunen]

*Chem. Descrip.:* Carnauba (Copernicia cerifera) wax

CAS 8015-86-9; EINECS/ELINCS 232-399-4

*Uses:* Used for lipsticks, salves, creams, ointments; pill coatings; shoe, furniture, and car polishes; lacquers, varnishes; phonograph records; hardener for candles; leather finishes; elec. insulating composition; waterproofing textiles, wood; inks; mold lubricant; candies; paper glazing

*Regulatory:* FDA 21CFR §182.1978

*Properties:* Wax; sol. (g/100 cc): 1.690 g chloroform, 0.610 g xylene, 0.518 g benzene, 0.440 g turpentine, 0.324 g acetone; sp.gr. 0.996-0.998; m.p. 82.5-86 C; acid no. 2-6; iodine no. 7-14; sapon. no. 78-88; flash pt. > 300 C; ref. index 1.463; dielec. const. 2.67-4.20

**Koster Keunen Ceresine** [Koster Keunen]

*Chem. Descrip.:* Ceresin

CAS 8001-75-0; EINECS/ELINCS 232-290-1

*Uses:* Cosmetics and pharmaceuticals (creams, lotions, ointments, salves); candles; shoe, floor, and leather polishes; antifouling paints; wood polishes/filler; incandescent gas mantles; paper sizing; waxed paper; lubricants; wax figures; elec. insulation; impregnating/preserving agent; crayons; perfume pastes; pomades; rubber mixtures; waterproofing textiles; food pkg. adhesives

*Regulatory:* FDA 21CFR §175.105

*Properties:* Wax; sp.gr. 0.88-0.92; m.p. various grades from 133-163 F; acid no. 0; sapon. no. < 1; ref. index 1.4416-1.4465; dielec. const. 2.15-2.33

**Koster Keunen Microcrystalline Waxes** [Koster Keunen]

*Chem. Descrip.:* Microcrystalline wax

CAS 64742-42-3; EINECS/ELINCS 264-038-1

*Uses:* Used for cosmetics, pharmaceuticals; laminating of paper, cloth; waterproofing paper, fiberboard, textiles, wood; potting compds. for condensers; polishes for floor, furniture, skis, leather; rust prevention compding. of rubber; pattern-making; printing inks; lubricants; records; food-contact applics.

*Regulatory:* FDA §172.886, 178.3710

*Properties:* Wh. to amber wax; sp.gr. 0.90-0.94; visc. 50-100 (210 F); m.p. 140-190 F; acid no. 0-0.2; iodine no. 0-1.5; sapon. no. 0-2; flash pt. > 425 F; fire pt. > 550 F

**Koster Keunen Oxidized Microcrystalline Wax** [Koster Keunen]

*Chem. Descrip.:* Oxidized microcrystalline wax

CAS 97017-52-9

*Uses:* Used for prep. of wax emulsions such as liq. softening, lubricating and polishing agents; carbon paper; crayons; as replacement for vegetable waxes

*Regulatory:* FDA 29CFR §1910.1200

*Properties:* M.p. 160-200 F; acid no. 10-35; sapon. no. 25-66

**Koster Keunen Ozokerite** [Koster Keunen]

*Chem. Descrip.:* Ozokerite

CAS 8021-55-4; EINECS/ELINCS 265-134-6

*Uses:* Used for cosmetics, creams, lotions, pomades; paints, varnishes; polishes for leather, automobile, floor; printing inks; pharmaceutical ointments; crayons; waxed paper; linen/cotton sizing; elec. insulating; lubricants and sealing wax compositions; process engraving, lithography; rubber filler

*Regulatory:* FDA approved

*Properties:* Wax; sol. (g/100 g): 12.99 carbon bisulfide, 11.83 g petrol. ether (75 C), 6.06 g turpentine (160 C), 3.95 g xylene (137 C), 2.83 g toluene (109 C), 2.42 g chloroform; sp.gr. 0.85-0.95; m.p. various grades from 149-190 F; acid no. 0; iodine no. 7-9; sapon. no. 0; ref. index 1.440 (60 C); dielec. const. 2.37-2.55

**Koster Keunen Paraffin Wax** [Koster Keunen]

*Chem. Descrip.:* Paraffin

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Wax used for cosmetics, pharmaceutical ointments and salves; candles; waterproofing, sealing; lubricating; protection of food, plants, fruits, cheese, and vegetables; paper; polishes; crayons; electronic insulation; hot-melt adhesives; food pkg. coatings and applics.

*Regulatory:* FDA 21CFR §172.615, 175.250, 175.300

*Properties:* Wax; sol. (g/100 cc): 40 g benzene, 9 g min. oil, 3 g dichloroethane, 0.4 g IPA; m.p. various grades from 118-165 F; ref. index 1.4219-1.4357

**Koster Keunen Synthetic Candelilla** [Koster Keunen]

*Chem. Descrip.:* Syn. candelilla wax

CAS 136097-95-5

*Uses:* Gellant, thickener, stabilizer, and moisturizer used for lipsticks, creams,

lotions, gel prods.; leather dressings; furniture and other polish; cements; varnishes; sealing wax; elec. insulating compositions; phonograph records; paper sizing; rubber; waterproofing and insectproofing; paint removers; soft wax stiffeners; lubricants; adhesives; candy and gum

*Properties:* Wax; sol. hot in alcohol, benzene, petroleum ether; m.p. 68.5-72.5 C; acid no. 11-20; sapon. no. 44-66

**Kotamite®** [IMERYS]

*Chem. Descrip.:* Calcium carbonate, coated with < 2% stearic acid

*Chem. Analysis:* CaCO<sub>3</sub> (97.6%), MgCO<sub>3</sub> (1.5%), moisture (0.2% max.)

*Uses:* Coated pigment, filler, reinforcement with easy dispersion in plastic compds., e.g., polyolefins, rigid and flexible PVC, nat. and syn. rubbers and latexes for wire and cable insulation compds., water sealant compds., improved impact props. in PP; hardens and stiffens stocks; filler, pigment, reinforcing agent in paper, paints, caulks; hydrophobic; disperses readily

*Regulatory:* NSF compliance

*Properties:* Wh. powd., odorless; 3 μ mean particle size; fineness (Hegman) 6.0; sp.gr. 2.71; dens. 50 lb/ft<sup>3</sup> (loose); surf. area 2.8 m<sup>2</sup>/g; oil absorp. 13; pH 9.5 (5% slurry); nonflamm.

*Toxicology:* TLV/TWA 10 mg/m<sup>3</sup>, considered nuisance dust

*Precaution:* Incompat. with acids

**KP-140®** [FMC]

*Chem. Descrip.:* Tributoxyethyl phosphate

CAS 78-51-3; EINECS/ELINCS 201-122-9

*Uses:* Plasticizer; leveling agent in floor polish formulations; flame retardant for plastics or syn. rubbers of lower flammability; imparts low temp. flexibility to plastics or acrylonitrile rubbers; reduces visc. in plastisols; defoamer for drilling muds, cements, fracturing fluids, plasters, paper coatings, pulp bleaching, aq. emulsion paints, adhesives, mercerizing liquors/dye baths, anti-freeze, fermentation, detergents

*Properties:* APHA 75 max. liq.; mild butyl odor; sol. in org. liqs. and gasoline; insol. in water; m.w. 398; sp.gr. 1.016-1.023 (20/20 C); dens. 8.5 lb/gal (20 C); visc. 12.2 cp (20 C); vapor pressure < 0.1 mm Hg (150 C); f.p. < -70 C; b.p. 215-228 C (4 mm); pour pt. < -70 C; flash pt. (PMCC) 224 C; fire pt. 252 C; ref. index 1.434 ± 0.002; surf. tens. 30 dynes/cm (20 C)

*Precaution:* Low degree of fire hazard

**Kronitex® TBP** [FMC]

*Chem. Descrip.:* Tributyl phosphate

CAS 126-73-8; EINECS/ELINCS 204-800-2

*Uses:* Primary plasticizer for NC, cellulose acetate, chlorinated rubber, vinyls; high boiling solvent for lithographic inks; antifoam for paints, paper coatings, aq. adhesives, inks, casein sol'ns., textile sizes, detergent sol'ns.; pigment dispersant; also for uranium extraction

*Properties:* APHA 50 max. color, char. odor; sol. in most org. liqs., min. oil, gasoline, 0.1% in water; m.w. 266; sp.gr. 0.977-0.983 (20/20 C); dens. 8.14 lb/gal (20 C); visc. 3.7 cp (20 C); vapor pressure 7.3 mm Hg (150 C); f.p. < -80 C; pour pt. < -80 C; b.p. 137-145 C; flash pt. (PMCC) 115 C; fire pt. 182 C; ref. index 1.423 ± 0.001; surf. tens. 29 dynes/cm (20 C)

*Toxicology:* Severe skin irritant

**Kronos® 1000** [Kronos]

*Chem. Descrip.:* Anatase titanium dioxide

CAS 13463-67-7; EINECS/ELINCS 236-675-5

*Uses:* Pigment for fibers, paper and coatings, elastomers, food-contact coatings/paper

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Properties:* Dens. 3.8 g/cc; oil absorp. 20; 98% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 1070** [Kronos]

*Chem. Descrip.:* Anatase titanium dioxide

CAS 13463-67-7; EINECS/ELINCS 236-675-5

*Uses:* Pigment for fibers, paper and coatings, food-contact coatings/paper

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 1072** [Kronos]

*Chem. Descrip.:* Anatase titanium dioxide

CAS 13463-67-7; EINECS/ELINCS 236-675-5

*Uses:* Pigment for fibers, paper and coatings, food-contact coatings/paper

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 1074** [Kronos]

*Chem. Descrip.:* Anatase titanium dioxide  
 CAS 13463-67-7; EINECS/ELINCS 236-675-5  
*Uses:* Pigment for fibers, paper and coatings, food-contact coatings/paper  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2020 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al  
*Uses:* Pigment for coatings (interior trade sales finishes, maintenance paints, industrial coatings, wh. exterior latex house paints, gel coats), plastisols, food-contact coatings/paper, PVC pipe for potable water  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; NSF approved; EC, German approvals

*Properties:* Dens. 4.1 g/cc; oil absorp. 17; 94% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2073 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al  
*Uses:* Pigment for plastics (PC, PE, LLDPE, PS, plasticized and rigid interior or exterior PVC, ABS, other engineering thermoplastics, elastomers, linoleum, masterbatches, PVC pipe for potable water, food-contact coatings/paper  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; NSF approved; EC, German approvals

*Properties:* Dens. 4.2 g/cc; oil absorp. 11; 97% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2081 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al, Si  
*Uses:* Pigment for paper laminates, urea-melamine resins, rigid PVC outdoor applics., food-contact coatings/paper; highest lightfastness  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Properties:* Dens. 4.0 g/cc; oil absorp. 20; 90% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2090 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide  
 CAS 13463-67-7; EINECS/ELINCS 236-675-5  
*Uses:* Pigment for coatings, food-contact coatings/paper  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2101 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al, Si  
*Uses:* Pigment for coatings (aq. and nonaq. exterior or interior trade sales finishes, weatherable maintenance and industrial coatings), roofing, pastel rigid PVC siding, PVC pipe for potable water, food-contact coatings/paper  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; NSF approved; EC, German approvals

*Properties:* Dens. 4.0 g/cc; oil absorp. 20; 92% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2131 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide  
 CAS 13463-67-7; EINECS/ELINCS 236-675-5  
*Uses:* Pigment for coatings, food-contact coatings/paper  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2160 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al, Si  
*Uses:* Pigment for coatings where max. gloss retention and chalk resist. are essential, powd. coatings, automotive finishes, plasticized and rigid exterior PVC, plastisols, epoxy and polyester resins, food-contact coatings/paper, PVC pipe for potable water  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; NSF approved; EC, German approvals

*Properties:* Dens. 3.9 g/cc; oil absorp. 18; 91% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2200 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al  
*Uses:* Pigment for plastics (PS and copolymers, polyolefins, plasticized PVC), elastomers, linoleum, masterbatches, food-contact coatings/paper; high str. blue-toned  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, Germany ap-

proved

*Properties:* Dens. 4.1 g/cc; oil absorp. 13; 96% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2210 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al  
*Uses:* Pigment primarily for plastics (plasticized and rigid interior PVC, PC, polyolefins, PS and copolymers, plastisols, rigid exterior PVC), masterbatches, food-contact coatings/paper; designed for ease of disp. and bluest tint tone; not rec. for very high temp. applics.

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Properties:* Dens. 4.1 g/cc; oil absorp. 13; 96% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2220 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al, Si  
*Uses:* Pigment primarily for plastics (PC, polyolefin fibers, PS and copolymers, plasticized and rigid PVC, plastisols, other engineering thermoplastics), masterbatches, liq. colors, powd. coatings, food-contact coatings/paper; moderate weather resist.

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Properties:* Dens. 4.0 g/cc; oil absorp. 17; 93% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2230 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al  
*Uses:* Pigment primarily for plastics (PC, PE, LLDPE, ABS, PS, plasticized and rigid PVC, other engineering thermoplastics), masterbatches, food-contact coatings/paper; max. ease of disp.

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Properties:* Dens. 4.1 g/cc; oil absorp. 11

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Kronos® 2310 [Kronos]**

*Chem. Descrip.:* Rutile titanium dioxide, stabilized with Al, Si, Zr  
*Uses:* Pigment for coatings, epoxy and thermoset polyester resins, food-contact coatings/paper  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180; EC, German approvals

*Properties:* Dens. 4.0 g/cc; oil absorp. 18; 93% TiO<sub>2</sub>

*Toxicology:* Inert dust; TLV 6 mg/m<sup>3</sup> air

**Krytox® DF [DuPont]**

*Chem. Descrip.:* PTFE in HCFC-141b

*Uses:* Dry film lubricant and mold release agent for rubbers and plastics, coating and mfg. of metal; promotes thickening and retards fouling; mfg. of machine parts, metalworking operations, in precision audiovisual equip., mfg. of glass and paper; additive for paints and finishes, paper and paper coatings, printing and writing inks, waxes and polishes for metals, cars, appliances, etc.; resist. to nitric acid, hydrochloric acid, sodium hydroxide, and alcoholic potassium hydroxide

*Properties:* Translucent fluid disp.; sl. ethereal odor; insol. in nonfluorinated solvs.; sp.gr. 1.32; dens. 11.0 lb/gal; m.p. 300 C; 15% solids; 85% volatiles

**Krytox® DF250/IPA [DuPont]**

*Chem. Descrip.:* PTFE in isopropyl alcohol

*Uses:* Dry film lubricant and mold release agent for rubbers and plastics, coating and mfg. of metal; promotes thickening and retards fouling; mfg. of machine parts, metalworking operations, in precision audiovisual equip., mfg. of glass and paper; additive for paints and finishes, paper and paper coatings, printing and writing inks, waxes and polishes for metals, cars, appliances, etc.; resist. to nitric acid, hydrochloric acid, sodium hydroxide, and alcoholic potassium hydroxide

*Properties:* Wh. translucent fluid disp.; alcohol odor; insol. in nonfluorinated solvs.; sp.gr. 0.94; dens. 7.8 lb/gal; m.p. 300 C; 25% solids; 75% volatiles

**Krytox® DF/IPA [DuPont]**

*Chem. Descrip.:* PTFE in isopropyl alcohol

*Uses:* Dry film lubricant and mold release agent for rubbers and plastics, coating and mfg. of metal; promotes thickening and retards fouling; mfg. of machine parts, metalworking operations, in precision audiovisual equip., mfg. of glass and paper; additive for paints and finishes, paper and paper coatings, printing and writing inks, waxes and polishes for metals, cars, appliances, etc.; resist. to nitric acid, hydrochloric acid, sodium hydroxide, and alcoholic potassium hydroxide

*Properties:* Translucent fluid disp.; alcohol odor; insol. in nonfluorinated solvs.; sp.gr. 0.9; dens. 7.5 lb/gal; m.p. 300 C; 15% solids; 80% volatiles

**Krytox® DF/W** [DuPont]

*Chem. Descrip.:* PTFE in water

CAS 9002-84-0; EINECS/ELINCS 204-126-9

*Uses:* Dry film lubricant and mold release agent for rubbers and plastics, coating and mfg. of metal; promotes thickening and retards fouling; mfg. of machine parts, metalworking operations, in precision audiovisual equip., mfg. of glass and paper; additive for paints and finishes, paper and paper coatings, printing and writing inks, waxes and polishes for metals, cars, appliances, etc.; resist. to nitric acid, hydrochloric acid, sodium hydroxide, and alcoholic potassium hydroxide

*Properties:* Creamy wh. fluid disp.; sl. sweet odor; insol. in nonfluorinated solvs.; sp.gr. 1.1; dens. 9.2 lb/gal; m.p. 300 C; 20% solids; 80% volatiles

**K® Sodium Silicate** [PQ]

*Chem. Descrip.:* Sodium silicate

*Chem. Analysis:* SiO<sub>2</sub> (31.7%), Na<sub>2</sub>O (11%)

CAS 1344-09-8; EINECS/ELINCS 215-687-4

*Uses:* Detergent, deflocculant, bleaching enhancer, alkalinity agent in deinking paper stock; peroxide stabilizer in repulping and postbleaching; clay refining, slurry thinner in ceramics; liq. soaps and detergents; sealant in metal castings; binder in metal pelletizing

*Properties:* Sticky heavy sol'n.; dens. 12.3 lb/gal (20 C); visc. 960 cps; pH 11.5

**Kybreak®** [Hercules]

*Uses:* Repulping aid to defiber and decolorize (dyed) paper and paperboard treated with wet str. resins

# L

## L-45 Series [Crompton/Witco]

*Chem. Descrip.:* Dimethicone

CAS 9006-65-9

*Uses:* Lubricant, emollient for creams and lotions; antifoam for nonaq. petrol. processing systems, hydraulic fluids, pigment flotation on paints; heat transfer fluid for drug mfg.; release agent; also for cosmetics, car polish; aerosol pkg., antiperspirants/deodorants; in resinous/polymeric food-contact coatings; in food-contact paper/paperboard; in resin-bonded filters for food contact; in food-contact textiles

*Regulatory:* 350 cSt grade: FDA 21CFR §173.340, 175.300, 175.390, 176.170, 176.180, 177.1210, 177.2260, 177.2800, 178.3570, 178.3910, 181.28

*Properties:* Clear liq.; sol. in most nonpolar solvs.; visc. 10-100,000 cstk grades

## Lamacit® AP 6 [Cognis]

*Chem. Descrip.:* Fatty acid and POE derivs.

*Uses:* Emulsifier for paraffins used in particle and fiber boards, paper mfg.

*Properties:* Solid; 100% conc.; anionic

## Lambent E-2140 [Lambent Tech./Norcross]

*Chem. Descrip.:* Polydimethylsiloxane emulsion

CAS 9006-65-9

*Uses:* Used in tire and vinyl dressings; mold release agent for plastic, rubber, iron, cement, and paper mfg.

*Properties:* Liq.; disp. in water; intermed. visc.; 60% solids

## Lambent E-2140 35% Food Grade [Lambent Tech./Norcross]

*Chem. Descrip.:* Polydimethylsiloxane emulsion

CAS 9006-65-9

*Uses:* Used in tire and vinyl dressings; mold release agent for plastic, rubber, iron, cement, and paper mfg.; for food contact

*Regulatory:* FDA 21CFR §21.340 compliant

*Properties:* Liq.; disp. in water; intermed. visc.; 35% solids

## LamChem C-100-L [Lambent Tech.]

*Chem. Descrip.:* 1-Hydroxyethyl-2-lauric imidazoline

CAS 136-99-2; EINECS/ELINCS 205-271-0

*Uses:* Intermediate for quat. ammonium compds.; strongly absorbed on textiles, paper and many metal surfs.; for agric., asphalt, cleaners, corrosion inhibitors, demulsifiers, flotation, metalworking, paints, pigment grinding, inks, textiles, wax emulsions

*Properties:* Tan paste; sol. in mineral/vegetable oils, dilute sol'ns. of mineral acids, org. solvs., sl. sol. in water; m.w. 276; sp.gr. 0.96; pH 10-11 (2% sol'n.); cationic

## LamChem C-100-O [Lambent Tech.]

*Chem. Descrip.:* 1-Hydroxyethyl-2-oleic imidazoline

CAS 21652-27-7

*Uses:* Intermediate for quat. ammonium compds.; strongly absorbed on textiles, paper and many metal surfs.; for agric., asphalt, cleaners, corrosion inhibitors, demulsifiers, flotation, metalworking, paints, pigment grinding, inks, textiles, wax emulsions

*Properties:* Brn. liq.; sol. in mineral/vegetable oils, dilute sol'ns. of mineral acids, org. solvs., sl. sol. in water; m.w. 350; sp.gr. 0.93; pH 10-11 (2% sol'n.); cationic

## LamChem C-100-S [Lambent Tech.]

*Chem. Descrip.:* 1-Hydroxyethyl-2-stearic imidazoline

CAS 95-19-2; EINECS/ELINCS 202-397-8

*Uses:* Intermediate for quat. ammonium compds.; strongly absorbed on textiles, paper and many metal surfs.; for agric., asphalt, cleaners, corrosion

inhibitors, demulsifiers, flotation, metalworking, paints, pigment grinding, inks, textiles, wax emulsions

*Properties:* Yel. solid; sol. in mineral/vegetable oils, dilute sol'ns. of mineral acids, org. solvs., sl. sol. in water; m.w. 352; sp.gr. 0.94; pH 10-11 (2% sol'n.); cationic

## LamChem C-100-T [Lambent Tech.]

*Chem. Descrip.:* 1-Hydroxyethyl-2-tall oil imidazoline

CAS 61791-39-7; EINECS/ELINCS 263-171-2

*Uses:* Intermediate for quat. ammonium compds.; strongly absorbed on textiles, paper and many metal surfs.; for agric., asphalt, cleaners, corrosion inhibitors, demulsifiers, flotation, metalworking, paints, pigment grinding, inks, textiles, wax emulsions

*Properties:* Amber liq.; sol. in mineral/vegetable oils, dilute sol'ns. of mineral acids, org. solvs., sl. sol. in water; m.w. 350; sp.gr. 0.945; pH 10-11 (2% sol'n.)

## Laminating Adhesive #5110 [Polymer Research Corp. of Am.]

*Chem. Descrip.:* Copolymer

*Uses:* Adhesive offering uniformity of particles and emulsion behavior, for textile backing, pigment and fiber binders, adhesive formulations, paper saturants, and wet-end additions

*Properties:* Milky wh. emulsion; dens. 8.3-8.4 lb/gal; visc. 200 cps; pH 9.0-9.5; 47.0 ± 1.0% solids (wet)

## Laponite® JS [Southern Clay Prods.]

*Chem. Descrip.:* Sodium magnesium fluorosilicate, tetrasodium pyrophosphate

*Chem. Analysis:* SiO<sub>2</sub> (50-52%), MgO (22-24%), Na<sub>2</sub>O (6-8%), P<sub>2</sub>O<sub>5</sub> (3.3-5.5%), Li<sub>2</sub>O (1.1-1.4%)

*Uses:* Thixotrope, gellant, suspending agent for aq. systems incl. paints and cleansers; may be coated onto paper or other surfaces to give elec. conductive films; imparts a shear sensitive structure to waterborne formulations

*Properties:* Wh. free-flowing powd.; odorless; insol. in water but forms a colloid gel on standing; dens. 0.7-1.3 kg/dm<sup>3</sup> (packed); m.p. fuses @ 900 C; pH 9.8 (2% aq. disp.)

*Toxicology:* LD50 (oral, rat) > 8 g/kg; LC50 (inh., rat) > 1.66 g/m<sup>3</sup>; OEL 5 mg/m<sup>3</sup> (respirable dust); nuisance dust; may cause degreasing of skin, dryness or cracking, eye irritation, nose/mouth irritation, gastric irritation, fibrosis of lung tissue

*Environmental:* Contains no heavy metals or other agents harmful to the environment; ecologically inert; pyrophosphate additive may affect aquatic life or cause algal blooms if released into rivers in lg. quantities

*Precaution:* Avoid contact with strong min. acids or substances liable to decomp. by dust, e.g., peroxides; avoid excessive moisture; humidity or direct contact with water results in caking

*Hazardous Decomp. Prods.:* Lithium salts if prod. dec. by min. acid

*Storage:* Store under dry conditions; seal container after use

## Larostat® 902 A [BASF]

*Chem. Descrip.:* Amide

*Uses:* Non-amine internal/topical antistat for PE and PP film, electronics pkg.; food pkg. adhesives, closures with sealing gaskets for food containers; defoamer in food-contact paper/paperboard; does not affect film quality or clarity; nonreactive with PC

*Regulatory:* FDA 21CFR §175.105, 176.210, 177.1210; meets MIL spec. B-81705C

*Properties:* Liq.; water-sol.; 99% act.

## Larostat® 902 AS [BASF]

- Chem. Descrip.:* Non-amide antistat on silica  
*Uses:* Internal antistat for polyolefins; food pkg. adhesives, closures with sealing gaskets for food containers; defoamer in food-contact paper/paper-board; stable to 230 C  
*Regulatory:* FDA 21CFR §175.105, 176.210, 177.1210; meets MIL spec. B-81705C  
*Properties:* Free-flowing powd.; water-disp.; 60% act.
- Larostat® FPE-S [BASF]**  
*Chem. Descrip.:* Amide antistat on silica  
*Uses:* Internal antistat for food-grade polyolefin films, food pkg. adhesives/paper/polymers/textiles  
*Regulatory:* FDA 21CFR §175.105, 176.180, 177.2260, 177.2800, 178.3130  
*Properties:* Free-flowing powd.; water-disp.; 60% act.
- LASAR™ [Eka Chems.]**  
*Chem. Descrip.:* Alkenyl succinic anhydride  
 CAS 70983-55-0  
*Uses:* Sizing agent providing cost effective sizing in alkaline fine papers containing precipitated calcium carbonate and in grades where full sizing cure is required at size press or at reel
- Laserbond [Vinings Ind.]**  
*Uses:* Surf. sizing agent for papers imparting improved adhesion of toner inks used in copiers and laser printers; improves water holdout on treated sheets
- Lastabil 923 [BK Giulini Chemie]**  
*Chem. Descrip.:* Phosphonate, aminocarboxylate, phosphate blend  
*Uses:* Stabilizer for peroxide bleaching liquors of mechanical pulp, cellulose, and secondary fibers  
*Properties:* Ylsh.-brn. liq.; misc. with water; sp.gr. 1.4; pH 11 (20 C)  
*Storage:* 1 yr. shelf life @ 5-30 C; protect from frost
- Lastabil 928 OE [BK Giulini Chemie]**  
*Chem. Descrip.:* Polycarboxylic acids and phosphorus-nitrogen compds.  
*Uses:* Stabilizer for peroxide in the deinking process; chelating agent for heavy metal ions such as iron, manganese, and copper  
*Use Level:* 0.4-0.8%  
*Properties:* Pale yel. liq.; misc. with water; sp.gr. 1.2; pH 13  
*Storage:* 1 yr. shelf life @ 5-30 C; protect from frost
- Lastaron 891 [BK Giulini Chemie]**  
*Chem. Descrip.:* Sodium salt of low-molecular polyacrylate  
 CAS 9003-04-7  
*Uses:* Dispersant for inorg. pigments and fillers used in paper coating  
*Use Level:* 0.1-0.5%  
*Regulatory:* BgVV compliant  
*Properties:* Ylsh. liq.; misc. with water; sp.gr. 1.3; pH 8-9 (20 C); anionic  
*Storage:* 6 mos. shelf life @ R.T.; protect from frost
- Leaf River 90 Hardwood [Georgia-Pacific Resins]**  
*Chem. Descrip.:* Southern bleached hardwood from sweet and blk. gum (40%), red oak (30%), and yel. poplar (30%)  
*Uses:* Short fiber pulp for printing and writing paper, coated paper, cast coated paper, computer paper, copy paper; high opacity, smooth surf. finish when blended with softwood; good brightness, str., and cleanliness; rec. where smooth surf. is desired  
*Properties:* 1.01 mm fiber length; 0.124 mg/m coarseness; brightness (ISO) 90
- Leaf River 90 Softwood [Georgia-Pacific Resins]**  
*Chem. Descrip.:* Southern bleached softwood from loblolly pine (90%) and longleaf and slash pine (10%)  
*Uses:* Long fiber pulp for fine writing papers, printing papers, coffee filters, postage stamps, calendars, etc.; high brightness, str., and cleanliness; avail. as furnish for uncoated free sheet, coated paper, filter paper, machine glazed paper, and tissue  
*Properties:* 2.47 mm fiber length; 0.293 mg/m coarseness; brightness (ISO) 90
- Leucophor® AP Liq. [Clariant UK]**  
*Chem. Descrip.:* Disulfonated stilbene  
*Uses:* Optical brightener for stock applic. in sized and unsized papers, esp. neutrally sized and calcium carbonate-filled papers and for use in coatings which contain casein as a sec. binder; highly substantive; exhibits very good buildup even at low concs.; very good stability to hard and soft water and alkaline conditions; for use continuously or batchwise; compat. with most anionic and nonionic prods.  
*Properties:* Yel.-brn. clear liq.; readily dilutable with water; dens. 1.211 kg/l; visc. < 150 mPa·s (20 C), < 600 mPa·s (0 C); solid. pt. -18 C; pH 8.5; anionic
- Storage:* Stable for 12 mos at < 40 C and protected from light
- Leucophor® BCF Ultra Powd. [Clariant UK]**  
*Chem. Descrip.:* Stilbene deriv.  
*Chem. Analysis:* NaCl (1.3%), Ca (210 ppm), Fe (6 ppm)  
*Uses:* Optical brightener for photographic paper; produces paper with exc. contrast and brilliance; added to baryte coating or gelatin emulsion or both; adsorbed by gelatin and not washed off into developing bath even at pH 10-11; good light stability  
*Properties:* Pale yel. powd.; sol. clear @ 5% dilution in water; anionic
- Leucophor® CN Liq. [Clariant UK]**  
*Chem. Descrip.:* Stilbene deriv.  
*Uses:* Optical brightener for high quality photographic papers for applic. in the stock, at the size press, or as part of a coating formulation; brilliant neutral shade; economical; good substantivity; good stability to acids, alkalis, water hardness; for use continuously or batchwise; compat. with anionics, nonionics  
*Properties:* Yel.-brn. clear liq.; readily diluted with water; dens. 1.12 kg/l; visc. < 100 mPa·s (20 C), < 200 mPa·s (0 C); pH 9.1; anionic  
*Storage:* Stable for 12 mos at < 40 C and protected from light
- Leucophor® NS Liq. [Clariant UK]**  
*Chem. Descrip.:* Stilbene deriv.  
*Uses:* Optical brightener for papers for surf. applic. at the size press or in coatings; brilliant, high-wh.; patent pending; very good stability to acids, alkalis, and hard water conditions; for use continuously or batchwise; compat. with anionics, nonionics  
*Properties:* Yel.-brn. clear liq., neutral blue hue; readily diluted with water; dens. 1.18 kg/l (20 C); visc. < 20 mPa·s (20 C), < 50 mPa·s (0 C); solid. pt. -9 C; pH 9.3; anionic  
*Storage:* Stable for 12 mos at < 40 C and protected from light
- Leucophor® SHR Liq. [Clariant UK]**  
*Chem. Descrip.:* Hexasulfonated stilbene deriv.  
*Uses:* Optical brightener for papers for surf. treatment at the size press or in coatings; brilliant, high-wh.; very good stability to acids, alkalis, and hard water conditions; for use continuously or batchwise; compat. with anionics, nonionics  
*Properties:* Yel.-brn. clear liq., sl. red hue; readily dilutable with water; dens. 1.23 kg/l (20 C); visc. < 50 mPa·s (20 C), < 200 mPa·s (0 C); solid. pt. -12 C; pH 8.9; anionic  
*Storage:* Stable for 12 mos at < 40 C and protected from light
- Leucophor® U Liq. [Clariant UK]**  
*Chem. Descrip.:* Benzenesulfonic acid, 2,2'-(1,2-ethenediyl) bis [5-[[4-[bis(2-hydroxyethyl) amino]-6-[(4-sulfohenyl) amino]-1,3,5-triazin-2-yl] amino]-, tetrasodium salt  
 CAS 16470-24-9  
*Uses:* Optical brightener for papers for applic. at the stock, at the size press, or in coatings; optical brightener in paper/paperboard in contact with dry or aq./fatty foods; brilliant, neutral shade; good substantivity to bleached pulps; good stability to acids, alkalis, salts; for use continuously or batchwise; compat. with commercial starches, anionics, nonionics  
*Regulatory:* FDA 21CFR §176.170, 176.180  
*Properties:* Yel.-brn. clear liq., readily dilutable with water; dens. 1.17 kg/l (20 C); visc. < 100 mPa·s (20 C), < 200 mPa·s (0 C); solid. pt. -7 C; pH 8.9; anionic  
*Storage:* Stable for 12 mos at < 40 C and protected from light
- Leucophor® UKO Liq. [Clariant UK]**  
*Chem. Descrip.:* Tetrasulfonated stilbene deriv.  
*Uses:* Optical brightener for papers for applic. at the stock, at the size press, or in coatings; brilliant, neutral shade; urea-free; good substantivity to bleached pulps; good stability to acids, alkalis, salts; for use continuously or batchwise; compat. with commercial starches, anionics, nonionics  
*Properties:* Yel.-brn. clear liq., readily dilutable with water; dens. 1.118 kg/l (20 C); visc. < 100 mPa·s (20 C), < 200 mPa·s (0 C); solid. pt. -3 C; pH 8.8; anionic  
*Storage:* Stable for 12 mos at 4-40 C and protected from light
- Leucophor® UO Liq. [Clariant UK]**  
*Chem. Descrip.:* Benzenesulfonic acid, 2,2'-(1,2-ethenediyl) bis [5-[[4-[bis(2-hydroxyethyl) amino]-6-[(4-sulfohenyl) amino]-1,3,5-triazin-2-yl] amino]-, tetrasodium salt  
 CAS 16470-24-9  
*Uses:* Optical brightener for papers for applic. at the stock, at the size press, or in coatings; brilliant, neutral shade; urea-free; good substantivity to bleached pulps; good stability to acids, alkalis, salts; for use continuously or batchwise; compat. with commercial starches, anionics, nonionics

*Properties:* Yel.-brn. clear liq., readily dilutable with water; dens. 1.13 kg/l (20 C); visc. < 100 mPa·s (20 C), < 200 mPa·s (0 C); solid. pt. -1 C; pH 8.8; anionic

*Storage:* Stable for 12 mos at 4-40 C and protected from light

**Leukoglanzöl® BPA 50** [Münzing Chemie GmbH]

*Chem. Descrip.:* Sulfated vegetable oils, sodium salt

*Uses:* Rheology modifier for paper coating, coating colors; improves yield of coating color and reduces fish eyes and streaks resulting from roll coaters; insensitive to alkali and shear demand, but must be protected against acid influences

*Use Level:* 0.2-1%

*Properties:* Yel. oil; good sol. in water; sp.gr. 1.04 (20 C); visc. low; pH 10; 43% act.; anionic

*Storage:* 1 yr shelf life in closed packing @ 15-25 C min.; not sensitive to freezing

**Leukonöl LBA-2** [Münzing Chemie GmbH]

*Chem. Descrip.:* Sulfated castor oil

CAS 8002-33-3; EINECS/ELINCS 232-306-7

*Uses:* Emulsifier for emulsion polymers, paints, aq. systems; coating agent in paper prod.; wetting agent for alkaline systems to pH 13; food-contact coatings, paper; defoamer in food-contact coatings

*Use Level:* 1-3%

*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 176.200; BGA compliance

*Properties:* Yel. clear liq.; sol. in water in all proportions; dens. 1.03 g/cc (20 C); visc. low; pH 7 (10%); surf. tens. 41 mN/m (1%); 36% act.; anionic

*Storage:* 12 mos min. shelf life stored @ 15-25 C in closed pkg.; sensitive to freezing; solidifies below 0 C—warm to R.T. and stir to reverse

**Levacell® Blue 6GLL Liq.** [Bayer/Industrial Chems.]

*Uses:* Bright green-shade blue dyestuff for papers (sized, acid, alkaline, tissue); highly substantive to common paper pulp furnishes; very good lightfastness and bleedfastness; partially bleachable in hypochlorite; good affinity for clay fillers

*Properties:* Liq.; misc. in acidified water; dens. 9.8 lb/gal; visc. < 100 cps; pH 3.0

**Levacell® Fast Yellow KS-R Liq.** [Bayer/Industrial Chems.]

*Uses:* Red-shade direct yellow dyestuff for papers (acid, alkaline-sized, tissue); highly substantive to common paper pulp furnishes; exc. lightfastness, very good bleedfastness; pract. bleachable in hypochlorite; very good affinity for clay fillers

*Properties:* Liq.; misc. in acidified water; dens. 8.8 lb/gal; visc. < 100 cps; pH 2.0; cationic

**Levacell® Red KS-4BE Conc.** [Bayer/Industrial Chems.]

*Uses:* Bluer-shade red dyestuff for papers (tissue); highly substantive to common paper pulp furnishes; good affinity for clay fillers; rapid exhaustion onto paper fibers; fair lightfastness; very good bleedfastness; pract. bleachable in hypochlorite

*Properties:* Liq.; misc. in acidified water; dens. 9.2 lb/gal; visc. < 100 cps; pH 2.0

**Levacell® Scarlet KS BP Liq.** [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, and specialty papers; direct affinity for cellulose fibers

*Properties:* Liq.

**Levacell® Yellow 2GNX** [Bayer/Industrial Chems.]

*Uses:* Colorant for fine papers, tissue papers, and specialty papers; direct affinity for cellulose fibers

*Properties:* Liq.

**Levogen® E-1062** [Bayer/Industrial Chems.]

*Uses:* Fixing agent for anionic direct dyestuffs for paper; improves fastness to bleeding, reduces staining of effluent, and improves color retention

**Levogen® E-1063** [Bayer/Industrial Chems.]

*Uses:* Fixing agent for anionic direct dyestuffs for paper; improves fastness to bleeding, reduces staining of effluent, and improves color retention

**Levogen® F** [Bayer/Industrial Chems.]

*Uses:* Fixing agent for anionic direct dyestuffs for paper; improves fastness to bleeding, reduces staining of effluent, and improves color retention

**Levogen® G** [Bayer/Industrial Chems.]

*Uses:* Fixing agent for anionic direct dyestuffs for paper; improves fastness to bleeding, reduces staining of effluent, and improves color retention

**Levogen® PM** [Bayer/Industrial Chems.]

*Chem. Descrip.:* Polyhydroxyamide resin

*Uses:* Fixing agent for direct and other anionic dyestuffs and pigments;

effective in acid or neutral systems; improves bleedfastness

*Properties:* Clear transparent liq.; misc. in water in all proportions; sp.gr. 1.20; visc. < 200 cps; pH 4.5; strongly cationic

*Storage:* 1 yr min. stability; protect from freezing; of prod. becomes frozen, thaw and mix thoroughly before use

**Levogen® PM-N** [Bayer/Industrial Chems.]

*Chem. Descrip.:* Amine condensate

*Uses:* Fixing agent for direct and other anionic dyestuffs and pigments; effective in acid or neutral systems; improves bleedfastness

*Properties:* Yel. liq.; misc. in water in all proportions; sp.gr. 1.21; visc. < 400 cps; pH 5.5; strongly cationic

*Storage:* 1 yr min. stability; protect from freezing

**Lightcoat** [Süd-Chemie AG]

*Chem. Descrip.:* Bentonite

CAS 1302-78-9; EINECS/ELINCS 215-108-5

*Uses:* For priming or precoating of paper and board where multicoating is required; reduces overall tension

**Lignosite® 260** [Georgia-Pacific Resins]

*Chem. Descrip.:* Sodium lignosulfonate, alkali-treated

CAS 8061-51-6

*Uses:* O/w emulsifier, dispersant for pigments, insecticides; food pkg. adhesives, paper; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.210, 573.600

*Properties:* Brn. powd., no appreciable odor; sol. in water; sp.gr. ≈ 0.5; m.p. dec.; pH ≈ 10; anionic

*Toxicology:* Nontoxic orally, nonirritating to skin and eyes; prolonged exposure to dust may cause sneezing, coughing, or other nuisance symptoms

*Environmental:* Biodeg.

*Precaution:* Finely divided particles mixed with air in presence of ignition source may present explosion hazard; incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* SO<sub>2</sub>

*Storage:* Store in a dry place and keep sealed until ready to use to prevent caking from moisture pickup

**Lignosite® 431** [Georgia-Pacific Resins]

*Chem. Descrip.:* Sodium lignosulfonate

CAS 8061-51-6

*Uses:* Dispersant for pigments, wettable powds., wax emulsions, industrial cleaners; food-contact adhesives, paper/paperboard; defoamer in food-contact paper/paperboard; animal feeds

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.210, 573.600

*Properties:* Brn. powd., no appreciable odor; sol. in water; sp.gr. ≈ 0.5; m.p. dec.; pH 3.8-4.2; anionic

*Toxicology:* Nontoxic orally, nonirritating to skin and eyes; prolonged exposure to dust may cause sneezing, coughing, or other nuisance symptoms

*Environmental:* Biodeg.

*Precaution:* Finely divided particles mixed with air in presence of ignition source may present explosion hazard; incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* SO<sub>2</sub>

*Storage:* Store in a dry place and keep sealed until ready to use to prevent caking from moisture pickup

**Lignosite® 458** [Georgia-Pacific Resins]

*Chem. Descrip.:* Sodium lignosulfonate

CAS 8061-51-6

*Uses:* Emulsifier, emulsion stabilizer, dispersant for pigments, mfg. of concrete admixtures, wax emulsions, wettable powds., industrial cleaners; food-contact adhesives, paper/paperboard; defoamer in food-contact paper/paperboard; animal feeds

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.210, 573.600

*Properties:* Brn. powd., no appreciable odor; sol. in hot or cold water; sp.gr. ≈ 0.5; dens. 23 lb/ft<sup>3</sup>; m.p. dec.; pH 6-8; anionic

*Toxicology:* Nontoxic orally, nonirritating to skin and eyes; prolonged exposure to dust may cause sneezing, coughing, or other nuisance symptoms

*Environmental:* Biodeg.

*Precaution:* Finely divided particles mixed with air in presence of ignition source may present explosion hazard; incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* SO<sub>2</sub>

*Storage:* Store in a dry place and keep sealed until ready to use to prevent caking from moisture pickup

**Lignosite® 823** [Georgia-Pacific Resins]

- Chem. Descrip.:* Sodium lignosulfonate  
CAS 8061-51-6  
*Uses:* Emulsifier, emulsion stabilizer, dispersant for dyestuffs and pigments, mfg. of wax emulsions, wettable powds.; food-contact adhesives, paper/paperboard; defoamer in food-contact paper/paperboard; animal feeds  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.210, 573.600  
*Properties:* Brn. powd., no appreciable odor; sol. in cold or hot water; sp.gr. ≈ 0.5; dens. 23 lb/ft<sup>3</sup>; m.p. dec.; pH 6-8; anionic  
*Toxicology:* Nontoxic orally, nonirritating to skin and eyes; prolonged exposure to dust may cause sneezing, coughing, or other nuisance symptoms  
*Environmental:* Biodeg.  
*Precaution:* Finely divided particles mixed with air in presence of ignition source may present explosion hazard; incompat. with strong oxidizing agents  
*Hazardous Decomp. Prods.:* SO<sub>2</sub>  
*Storage:* Store in a dry place and keep sealed until ready to use to prevent caking from moisture pickup
- Lignosite® AC** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Calcium lignosulfonate, alkali-treated  
*Uses:* Dispersant; emulsifier; emulsion stabilizer; food-contact adhesives, paper/paperboard; defoamer in food-contact paper/paperboard; animal feeds  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.210, 573.600  
*Properties:* Lt. tan powd., no appreciable odor; sol. in water; sp.gr. ≈ 0.5; m.p. dec.; pH 7-9; anionic  
*Toxicology:* Nontoxic orally, nonirritating to skin and eyes; prolonged exposure to dust may cause sneezing, coughing, or other nuisance symptoms  
*Environmental:* Biodeg.  
*Precaution:* Finely divided particles mixed with air in presence of ignition source may present explosion hazard; incompat. with strong oxidizing agents  
*Hazardous Decomp. Prods.:* SO<sub>2</sub>  
*Storage:* Store in a dry place and keep sealed until ready to use to prevent caking from moisture pickup
- Lionsurf®** [Vinings Ind.]  
*Uses:* Deinking agent for papermaking
- Liponic 70-NC** [Lipo]  
*Chem. Descrip.:* Sorbitol  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
*Uses:* Humectant, plasticizer, softener, and lubricant for personal care prods., adhesives, leather, and paper coatings; adds sweet taste and pleasant mouthfeel to oral hygiene prods. such as dentifrices and mouthwashes, oral dosage pharmaceuticals  
*Properties:* Clear colorless sol'n.; water-sol.; sp.gr. 1.29-1.32; ref. index 1.455-1.470; pH neutral
- Liponic 76-NC** [Lipo]  
*Chem. Descrip.:* Sorbitol  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
*Uses:* Humectant, plasticizer, softener, and lubricant for personal care prods., adhesives, leather, and paper coatings; adds sweet taste and pleasant mouthfeel to oral hygiene prods. such as dentifrices and mouthwashes, oral dosage pharmaceuticals  
*Properties:* Colorless to pale yel. clear syrup; odorless; sp.gr. 1.32-1.35; ref. index 1.468-1.475; 25% max. water
- Liporol SP** [Lucas Meyer]  
*Chem. Descrip.:* Standardized guar gum  
CAS 9000-30-0; EINECS/ELINCS 232-536-8  
*Uses:* Thickener and stabilizer for aq. systems in textiles, paper, varnishes, emulsion paints, cleaning and pickling systems; emulsion stabilizer; high freeze/thaw stability; acid and alkali resist.  
*Properties:* Lt. free-flowing powd.; 98% 200 mesh; disp. in hot and cold water; visc. 5500 mPa·s (after 24 h); 85% conc.; nonionic  
*Environmental:* Biodeg.  
*Storage:* Extended storage life when stored cool and dry
- Lipotin SB** [Lucas Meyer]  
*Chem. Descrip.:* Single-bleached, refined soy lecithin  
CAS 8002-43-5; EINECS/ELINCS 232-307-2  
*Uses:* W/o emulsifier, wetting agent, dispersant for wh. enamels, pigment-free flat varnishes, pigment pastes, coating of pigments and extenders; cleaning agent for offset plates and printing rollers; min. oil industry; paper additives; drilling and cutting oils  
*Regulatory:* EC permitted food additive, E 322  
*Properties:* Liq.; visc. 12 Pa·s; HLB 3-4; acid no. 30 max.; 60% conc.; amphoteric  
*Storage:* 12 mos storage life in original pkg. stored < 15 C; reclose immediately after opening; sensitive to light
- Lipotol FA** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special fatty acid  
*Uses:* Deinking agent, highly effective in collecting ink as applied to flotation process of waste newspapers  
*Use Level:* 0.1-0.3% to pulp  
*Properties:* Lt. yel. beads
- Lipotol LH-200** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Deinking agent, highly effective in collecting ink as applied to flotation process, permitting ink removal to be performed efficiently; also has high preventative power against restaining  
*Use Level:* 0.1-0.3% to pulp  
*Properties:* Colorless lt. cloudy visc. liq.; pH 6.5 (5%); nonionic
- Lipotol LH-900** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Fatty acid derivatives; special activator  
*Uses:* Deinking agent, highly effective in collecting ink as applied to needing flotation process of waste newspapers or wh. leisure papers  
*Use Level:* 0.1-0.3% to pulp  
*Properties:* Straw-colored transparent liq.; pH 7 (5%); nonionic
- Lipowax C** [Lipo]  
*Chem. Descrip.:* N,N'-Ethylenebisstearamide  
CAS 110-30-5; EINECS/ELINCS 203-755-6  
*Uses:* Internal lubricant in thermoplastic and thermosetting resins; defoamer for paper, textile processing; antitacking and antiblocking agent, antistat used in vinyls, PS, polyethylene, ABS; surf.-finishing agent in hard rubber; emulsifying wax in cosmetics; mold release agent, lubricant, antiblock, and detackifier in syn. rubbers; aids pigment suspension and salt spray resist. in paints and lacquers; in food pkg. materials  
*Properties:* Lt. cream prills; sol. in toluene, naphtha, kerosene, and turpentine; m.p. 140-145 C; acid no. 10 max.; flash pt. 285 C (COC); 100% act.; nonionic
- Liquazinc AQ-90** [Crompton/Witco]  
*Chem. Descrip.:* Zinc stearate aq. emulsion  
CAS 557-05-1; EINECS/ELINCS 209-151-9  
*Uses:* Partitioning agent, antitack agent, mold release, lubricant for rubber, liq. slab dips; release aid and lubricant for abrasive papers; special sub micron particle size prevents settling out; very low visc.  
*Properties:* Wh. disp.; fineness 99.9% thru 325 mesh; sp.gr. 1.02; visc. 1000 cps; 50% solids
- Liquid Water (WS) & Oil Soluble** [Odor Control]  
*Uses:* Odor neutralizers for wastewater facilities, composting, fertilizer plants, incinerators, landfills, tanneries, meat and food processing, oil and chem. spills, pulp/paper mills, rendering plants, waste containers, inks, adhesives  
*Use Level:* Dilution 1:100 to 1:300  
*Properties:* Clear liq.; water or oil sol.; typ. odor (natron, strawberry, floral, pine, evergreen, peach, mixed cherry, vanilla, cinnamon, citrus, citrus/floral, no scent); sp.gr. 0.98 (WS), 0.85 (OS); visc. < 400 cps; f.p. -12 C; flash pt. (CC) 75 C (WS), 49 C (OS); pH neutral  
*Storage:* Shelf life 1 yr. with no loss of act.
- Liquinat®** [Jungbunzlauer Int'l. AG]  
*Chem. Descrip.:* Citric acid  
CAS 77-92-9; EINECS/ELINCS 201-069-1  
*Uses:* Acidulant, pH control agent for foods, feeds, detergents, textile auxiliaries, paper auxiliaries, electroplating chems.  
*Properties:* Liq.
- Liquisize™ Emulsifier** [Penford Prods.]  
*Uses:* Emulsifier for ASA sizes in papermaking incl. food pkg.; results in high ASA sizing efficiency, emulsion stability, and clean wet end operation; stable; requires no cooking  
*Regulatory:* FDA approved  
*Properties:* Liq.
- Liquistrength™ Bonding Agent** [Penford Prods.]  
*Chem. Descrip.:* Starch  
CAS 9005-25-8; EINECS/ELINCS 232-686-4  
*Uses:* Bonding agent added at wet end to improve dry str. in paper and board, food pkg.; stable; requires no cooking  
*Regulatory:* FDA approved  
*Properties:* Liq.; cationic
- Lithoprint®** [Huber Engineered Materials]

*Uses:* Clay for paper and paperboard; high brightness; produces exc. coverage and print gloss

*Properties:* Spray-dried slurry; 88-92% finer than 2 µ; 0.005% 325 mesh residue; sp.gr. 2.60; visc. 200-400 cps; brightness (TAPPI) 89.5-91%; ref. index 1.57; pH 6.5-8.0 (28% solids); 68-70% slurry solids; 1% max. moisture

**Locust Bean Gum Speckless Type D-200 [Frutarom Meer]**

*Chem. Descrip.:* Locust bean gum

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, water binder, suspending agent, stabilizer for soft cheese and spreads, bread, cakes, biscuits, frozen pie fillings, sausages, stuffed meat prods., canned pet foods; freeze/thaw stabilizer in ice cream; wet-end additive in papermaking, sizing; textile sizing agent; thickener for textile print pastes; excipient for pharmaceutical tablets; thickener for toothpaste; thickener/stabilizer for cosmetic/pharmaceutical creams and lotions

*Properties:* Wh. to cream-wh. powd.; nearly odorless; 97% thru 100 mesh, ≥ 25% thru 200 mesh; visc. ≥ 2800 cps (1%); pH 5.0-6.4

**Locust Bean Gum Type A-100 [Gumix Int'l.]**

*Chem. Descrip.:* Locust bean gum

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, visc. modifier, water binder, suspending agent, stabilizer for foods (cheese, confections, bakery prods., pie fillings, meat binder, sauces, salad dressings), cosmetics, pharmaceuticals (creams, lotions, toothpaste, tablet excipient), industrial (papermaking, textiles, tobacco)

*Properties:* Off-wh. to lt. tan powd.; disp. in water; insol. in most org. liqs.

**Locust Bean Gum Type A-250 [Gumix Int'l.]**

*Chem. Descrip.:* Locust bean gum

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, visc. modifier, water binder, suspending agent, stabilizer for foods (cheese, confections, bakery prods., pie fillings, meat binder, sauces, salad dressings), cosmetics, pharmaceuticals (creams, lotions, toothpaste, tablet excipient), industrial (papermaking, textiles, tobacco)

*Properties:* Off-wh. to lt. tan powd.; disp. in water; insol. in most org. liqs.

**Locust Bean Gum Type A-270 [Gumix Int'l.]**

*Chem. Descrip.:* Locust bean gum

CAS 9000-40-2; EINECS/ELINCS 232-541-5

*Uses:* Thickener, visc. modifier, water binder, suspending agent, stabilizer for foods (cheese, confections, bakery prods., pie fillings, meat binder, sauces, salad dressings), cosmetics, pharmaceuticals (creams, lotions, toothpaste, tablet excipient), industrial (papermaking, textiles, tobacco)

*Properties:* Off-wh. to lt. tan powd.; disp. in water; insol. in most org. liqs.

**Lodyne® [Ciba Spec. Chems./Paper]**

*Chem. Descrip.:* Fluorochemicals

*Uses:* Oil/grease/water resist. aid for paper, paperboard, and molded prods. in food, fast food, and pet food pkg.; surf. tens. reducer and foam stabilizer in firefighting prods.; wetting agent, spreading agent, flow control agent in coatings; environmentally friendly

**Lok-Size® 30 [Tate & Lyle N. Am.]**

*Chem. Descrip.:* Visc. modified dent corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Retention aid for papermaking size press; designed where inc. starch retention during repulping is required to improve BOD and COD levels in mill effluents

*Properties:* Cationic

**Lomar® LS-1 [Cognis]**

*Chem. Descrip.:* Condensed sodium naphthalene sulfonate (91.5%), sodium sulfate (2%), water (6.5%)

*Uses:* Dispersant, emulsifier for emulsion polymerization, dyestuff mfg., agric. formulations; sec. stabilizer for SBR mfg.; dispersant for gypsum slurries; leveling agent for dyeing fibers; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles; low salt

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400, BGA approved; SARA §311/312 reportable

*Properties:* Tan powd.; bland odor; sol. @ 5% in water; sp.gr. 0.60; dens. 5.0 lb/gal; cloud pt. 2 C; flash pt. 92 F; pH 9.5 (10% aq.); 6.5% volatiles; 95% act.; anionic

*Toxicology:* LD50 (oral, rat) 3800 mg/kg; sl. toxic if ingested; may cause transient skin, eye, and respiratory tract irritation; TSCA listed

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Store in cool, dry place

**Lomar® LS Liq. [Cognis]**

*Chem. Descrip.:* Condensed sodium naphthalene sulfonate (45%), sodium sulfate (1%), water (54%)

*Uses:* Dispersant for gypsum slurries; primary emulsifier for emulsion polymerization; sec. stabilizer for SBR mfg.; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400, BGA approved; SARA nonreportable

*Properties:* Dk. amber liq.; bland odor; 20% clear sol'ns.; sp.gr. 1.2; dens. 10 lb/gal (20 C); visc. 100 cps; VOC 0% (EPA Method 54); 46% solids; anionic

*Toxicology:* LD50 (oral, rat) 3800 mg/kg; sl. toxic if ingested; may cause transient skin and eye irritation; TSCA listed

*Environmental:* BOD5 43,838 ppm; COD 846,867 ppm

*Precaution:* Incompat. with strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if cold; allow to warm to R.T., mix well

**Lomar® PL [Cognis]**

*Chem. Descrip.:* Condensed sodium naphthalene sulfonate (43%), sodium sulfate (3%), water (54%)

*Uses:* Dispersant for pigments, extenders, and fillers in aq. media; dyeing syn. and natural fibers; emulsifier in emulsion polymerization; ceramics; gypsum board; pigments; printing; rubber and wet milling; agric. prods.; food pkg. adhesives, paper, cellophane, rubber articles

*Regulatory:* EPA-exempt; FDA 21CFR §175.105, 176.170, 176.180, 177.1200, 177.1210, 177.2600; SARA nonreportable

*Properties:* Dk. amber liq.; bland odor; water-sol. @ 5%; sp.gr. 1.25; dens 10 lb/gal; visc. 11 cSt (100 F); pour pt. -1 C; cloud pt. 6 C; flash pt. (PMCC) > 93 C; pH 6.8; 0% VOC (EPA Method 24); 46% solids; anionic

*Toxicology:* LD50 (oral, rat) 3800 mg/kg; sl. toxic if ingested; may cause transient skin and eye irritation; TSCA listed

*Environmental:* BOD5 26,616 ppm; COD 699,508 ppm; 3.8% biodeg.

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* May congeal or stratify if cold; warm to 50 C, mix well

**Lomar® PW [Cognis]**

*Chem. Descrip.:* Condensed sodium naphthalene sulfonate (88.5%), sodium sulfate (5%), water (6.5%)

*Uses:* Dispersant for pigments, extenders, and fillers in aq. media; dyeing syn. and natural fibers; emulsifier in emulsion polymerization; ceramics; gypsum board; pigments; printing; rubber and wet milling; agric. prods.; suspending agent, stabilizer for paint and paper industries, latexes; food-contact rubber articles

*Regulatory:* FDA 21CFR §177.2600; EPA-exempt; SARA §311/312 reportable

*Properties:* Tan powd.; bland odor; water-sol. @ 5%; dens. 0.66 g/cc; cloud pt. 5 C; flash pt. 87 F; pH 9.5 (10%); 0% VOC (EPA Method 24); 87% act.; anionic

*Toxicology:* LD50 3800 mg/kg; sl. toxic if ingested; may cause transient skin, eye, and respiratory irritation; TSCA listed

*Environmental:* BOD5 94,962 ppm; COD 369,852 ppm

*Precaution:* Avoid strong oxidizing agents

*Hazardous Decomp. Prods.:* CO<sub>2</sub>, CO, SO<sub>x</sub>

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Store in cool, dry place

**Lomar® PWA [Cognis]**

*Chem. Descrip.:* Condensed ammonium naphthalene sulfonate

*Uses:* Visc. depressant; for molding and extruding operations in ceramics; dispersant for emulsion paints, agric., gypsum slurries; emulsifier for emulsion polymerization of syn. elastomers; visc. reducer for pigment slurries; sec. stabilizer for SBR mfg.; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400; EPA exempt; BGA approved

*Properties:* Lt. tan powd.; sol. in water; pH 3.5 (10%); 92% act.; anionic

**Lomar® PWA Liq. [Cognis]**

*Chem. Descrip.:* Ammonium naphthalene sulfonate (< 44%), ammonium sulfate (> 1%), water (55%)

*Uses:* Dispersant for carbon black in aq. systems, printing inks, waterborne architectural paints, gypsum slurries; sec. stabilizer for SBR mfg.; food pkg.

- adhesives, paper; emulsifier in mfg. of food-contact articles  
*Use Level:* 1-4% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400; BGA approved; SARA §311/312/313 reportable  
*Properties:* Dk. amber clear liq.; sl. ammonia odor; sp.gr. 1.16; dens. 9.7 lb/gal; visc. 15 cps; flash pt. (PMCC) > 93 C; pH 7.3; 55% volatiles; 45% act., 55% water; anionic  
*Toxicology:* LD50 (oral rat) 3800 mg/kg; sl. toxic if ingested; can cause skin, eye, and respiratory irritation; TSCA listed  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, NO<sub>x</sub>, SO<sub>x</sub>  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* May congeal or stratify if cold; warm to 50 C, mix well
- Loxiol® G 10** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Fatty acid ester of polyol  
*Uses:* Internal lubricant in clear or opaque applics., rigid and soft PVC, food applics.; pigment dispersing aux. in PVC paste processing; costabilizer in combination with tin; aids flow in pigmented and filled rigid PVC compds.; food-contact coatings, paper, closures with sealing gaskets for food containers  
*Use Level:* 1.0-1.5 (rigid PVC), 0.5-1.5 (soft PVC)  
*Regulatory:* FDA 21CFR §175.300, 175.320, 176.170, 177.1210, 181.27, 182.1323, 182.4505, GRAS; BGA, Japan approvals  
*Properties:* Pale yel. liq.; dens. 7.9 lb/gal; visc. 200-225 cps; f.p. -1 to -8 C; pour pt. < 4 C; acid no. 3.0 max.; ref. index 1.467 ± 0.005; flash pt. (CC) 435 F
- Loxiol® G 11** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Fatty acid ester of polyol  
*Uses:* Internal lubricant for rigid and soft PVC, rigid PVC film and sheeting; food pkg. adhesives, paper, textiles, animal glue; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210, 177.2800, 178.3120, 178.3130; BGA, Japan approvals  
*Properties:* Liq.; sp.gr. 0.970-0.985; visc. 500-610 mPa·s; pour pt. < -10 C; acid no. < 1; ref. index 1.473-1.478; flash pt. > 220 C
- Loxiol® G 13** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Fatty acid ester of polyol  
*Uses:* Lubricant for rigid PVC esp. in cable and inj. molding; food pkg. adhesives, paper, textiles, animal glue; defoamer in food-contact paper/paperboard  
*Use Level:* 1.0-1.5 phr  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210, 177.2800, 178.3120; Japan approvals  
*Properties:* Liq.; sp.gr. 0.905-0.915; visc. 35-40 mPa·s; pour pt. < -10 C; acid no. < 1; ref. index 1.460-1.466; flash pt. > 190 C
- Loxiol® G 15** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Fatty acid ester of polyol  
*Uses:* Internal lubricant for rigid PVC for use in inj. molding, extrusion, and calendaring; food-contact coatings, paper, cellophane, textiles  
*Regulatory:* FDA 21CFR §175.300, 176.170, 176.180, 177.1200, 177.1210, 177.1350, 177.1400, 177.2420, 177.2800, 178.3280; BGA, Japan approvals  
*Properties:* Pale tan flakes, off-wh. beads, 20 mesh particle size; dens. 20-30 lb/ft<sup>3</sup>; m.p. 83-87 C; acid no. 5 max.; ref. index 1.445 ± 0.005 (95 C); flash pt. (OC) > 300 C
- Loxiol® G 16** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Glycerol ester of unsat. fatty acid  
*Uses:* Internal lubricant for rigid PVC film, calendered and rigid sheet, clear, opaque inj. molding and profiles; costabilizer in tin-stabilized rigid, semirigid, or plasticized systems; printing and laminating properties to articles; food pkg. adhesives, coatings, animal glues; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3120, 182.90, 182.4505, GRAS; BGA, Japan approvals  
*Properties:* Pale yel. fluid; dens. 7.3 lb/gal; visc. 90-120 cP; f.p. < -5 C; pour pt. < 0 C; acid no. 1.0 max.; flash pt. (CC) 460 F; ref. index 1.468 ± 0.005
- Loxiol® G 20** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Stearic acid  
 CAS 57-11-4; EINECS/ELINCS 200-313-4  
*Uses:* External lubricant for rigid and soft PVC, esp. for cable extrusions; food pkg. adhesives, coatings, paper, polymers, cellophane, rubber articles, textiles, animal glue; defoamer in food-contact paper/paperboard
- Use Level:* 0.2-0.5 phr  
*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.210, 177.1010, 177.1200, 177.1210, 177.1350, 177.1400, 177.2260, 177.2420, 177.2600, 177.2800, 178.3120, 178.3570, 178.3910, 184.1090, GRAS; BGA, Japan approvals  
*Properties:* Fine beads; sp.gr. 0.840-0.850 (80 C); visc. 8-11 mPa·s (80 C); acid no. 207-210; flash pt. > 180 C; ref. index 1.436-1.437 (60 C)
- Loxiol® G 21** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Hydroxystearic acid  
 CAS 106-14-9; EINECS/ELINCS 203-366-1  
*Uses:* External lubricant for rigid and soft PVC, esp. for cable extrusions; food pkg. adhesives, paper, animal glue; lubricant for incidental food contact; most suitable for post-lubrication of existing formulations; antiplate-out effect  
*Use Level:* 0.2-1.0 phr  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.3120, 178.3570; BGA, Japan approvals  
*Properties:* Fine beads; sp.gr. 0.885-0.891 (80 C); visc. 30-35 mPa·s (80 C); acid no. 172-180; flash pt. > 210 C; ref. index 1.440-1.442 (80 C)
- Loxiol® G 23** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Hard paraffin  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Additive for PVC paste processing; food-contact coatings, paper, cellophane, polymers, rubber articles, textiles  
*Regulatory:* FDA 21CFR §175.320, 176.170, 176.180, 176.200, 177.1200, 177.1400, 177.2420, 177.2600, 177.2800, 178.3710, 179.45; BGA, Japan approvals
- Loxiol® G 53** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* C16-18 fatty alcohol  
 CAS 8005-44-5; EINECS/ELINCS 267-008-6  
*Uses:* Surfactant for polymerization; internal lubricant for rigid PVC, inj. molding; food pkg. adhesives, paper, textiles, polymers; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.210, 177.1010, 177.2800, 178.3120, 178.3910; BGA, Japan approvals  
*Properties:* Solid; sp.gr. 0.790-0.802 (80 C); visc. 4-6 mPa·s (80 C); m.p. 48-51 C; acid no. < 0.2; ref. index 1.427-1.430 (80 C); flash pt. > 160 C; 100% conc.
- Loxiol® HOB 7111** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Fatty acid ester of polyol  
*Uses:* Internal lubricant for rigid PVC extrusion, inj. molding, calenders, clear blow-molded bottles, sheet; food-contact coatings, paper, cellophane, polymers; highly compat.; produces high clarity articles  
*Regulatory:* FDA 21CFR §175.300, 176.170, 177.1200, 177.1210, 177.1350; BGA, Japan approvals  
*Properties:* Wh. flakes; dens. 15-20 lb/ft<sup>3</sup>; acid no. 5 max.; flash pt. > 285 F; ref. index 1.438 ± 0.005 (95 C)
- Loxiol® HOB 7121** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Fatty acid ester of polyol  
*Uses:* Internal lubricant/costabilizer for rigid PVC processing esp. clear rigid articles; superior flow in rigid PVC inj. molding and complicated profiles; extrusion films, calendered sheets, blow-molded bottles; highly costabilizing in CaZn stabilized and lead stabilized PVC systems; food pkg. adhesives, animal glue; stabilizer in food-grade polymers; defoamer in food-contact paper/paperboard; good thermal and lt. stability; effective in high calcium stearate compds.; resistant to plate-out  
*Regulatory:* FDA 21CFR §175.105, 176.210, 178.2010, 178.3120; BGA, Japan approvals  
*Properties:* Off-wh. beads or flakes, 20 mesh bead; dens. 30-35 lb/ft<sup>3</sup> (bead), 15-25 lb/ft<sup>3</sup> (flake); acid no. 2.0 max.; flash pt. 535 F; ref. index 1.450 ± 0.004 (70 C)
- Loxiol® HOB 7169** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Hard paraffin  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Processing aid for extruded rigid PVC; food-contact coatings, paper, cellophane, film, rubber articles, textiles; defoamer in food-contact coatings  
*Regulatory:* FDA 21CFR §175.320, 176.170, 176.180, 176.200, 177.1200, 177.1400, 177.2420, 177.2600, 177.2800, 178.3710, 179.45; BGA, Japan approvals  
*Properties:* Solid
- Lubracal® 48** [Crompton/Witco]  
*Chem. Descrip.:* Calcium stearate-based aq. disp.  
 CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant and plasticizer for paper coatings; improves flow and leveling of paper coatings enabling smooth finishes with enhanced gloss and printability; meets lubricity, stability, visc., and color requirements of the most sophisticated processes

*Properties:* Wh. powd., 99.9% thru 325 mesh sieve; sp.gr. 1.00; visc. 110 cps; 50.1% solids

**Lubracal® 53** [Crompton/Witco]

*Chem. Descrip.:* Calcium stearate-based aq. disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant and plasticizer for paper coatings; improves flow and leveling of paper coatings enabling smooth finishes with enhanced gloss and printability; meets lubricity, stability, visc., and color requirements of the most sophisticated processes

*Properties:* Wh. powd., 99.9% thru 325 mesh sieve; sp.gr. 1.00; visc. 700 cps; 56.0% solids

**Lubracal® 60** [Crompton/Witco]

*Chem. Descrip.:* Calcium stearate-based aq. disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant and plasticizer for paper coatings; improves flow and leveling of paper coatings enabling smooth finishes with enhanced gloss and printability; meets lubricity, stability, visc., and color requirements of the most sophisticated processes

*Properties:* Wh. powd., 99.9% thru 325 mesh sieve; sp.gr. 1.02; visc. 350 cps; 60.0% solids

**Lubrol 90** [CNC Int'l.]

*Chem. Descrip.:* Ester

*Uses:* Press release agent for rubber roll release problems in pulp/paper industry; surface lubricant for tabulator card stock and paperboard; nonoily

**Lucidene® 600** [Rohm & Haas]

*Uses:* Top lacquer designed for paper/paperboard, and preprint liner; food pkg. adhesives, paper/paperboard; high heat resist., gloss; prevents smearing or marring of ink

*Regulatory:* FDA 21CFR §175.105, 176.170, and 176.180

*Properties:* Tan emulsion; 0.2 µ particle size; dens. 9.3 lb/gal; visc. 200-400 cps; acid no. 132; flash pt. > 93 C; pH 9-10; 40.5-47% solids

**Lucidene® 602** [Rohm & Haas]

*Uses:* Very hard, high gloss, film-forming latex for clay-coated paper and SBS-type board; exc. flow and leveling props.; universal vehicle for pigment dispersions, letdowns, and metallic pigments; food pkg. adhesives, paper/paperboard; fast drying; good water and grease resist.

*Regulatory:* FDA 21CFR §175.105, 176.170, and 176.180

*Properties:* Off-wh. emulsion; 0.1 µ particle size; dens. 8.8 lb/gal; visc. 1000-2000 cps; acid no. 105; flash pt. > 93 C; pH 8.3-8.9; 42-45.5% NV

**Lucidene® 5010** [Rohm & Haas]

*Chem. Descrip.:* Latex polymer

*Uses:* Letdown vehicle, rewetting agent in ink systems where min. VOC is required, food pkg. adhesives/coatings/paper; high gloss, fast dry; solv.-free; no VOC

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* M.w. > 200,000; dens. 8.7 lb/gal; visc. 500 cps; acid no. 42; pH 8.3; 0% VOC; 52.5% solids

**Lucidene® 5011** [Rohm & Haas]

*Chem. Descrip.:* Latex polymer

*Uses:* Letdown vehicle in ink systems where min. VOC is required, food pkg. adhesives/coatings/paper; high gloss, fast dry; solv.-free; no VOC

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* M.w. > 200,000; dens. 8.7 lb/gal; visc. 1000 cps; acid no. 55; pH 8.2; 0% VOC; 48% solids

**Lucidene® 5020** [Rohm & Haas]

*Chem. Descrip.:* Latex polymer

*Uses:* Hard film-forming vehicle for use in flexographic/gravure inks and overprints where max. VOC reduction is required, food pkg. adhesives/coatings/paper; fast dry, good rewet; solv.-free; no VOC

*Use Level:* 57.5% (gravure ink); 87.9% (rub resist. overprint)

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* M.w. > 200,000; dens. 8.75 lb/gal; visc. 300 cps; acid no. 42; pH 8.0; 0% VOC; 51% solids

**Lucidene® 5021** [Rohm & Haas]

*Chem. Descrip.:* Latex polymer

*Uses:* Hard film-forming vehicle for use in flexographic/gravure inks and overprints where max. VOC reduction is required, food pkg. adhesives/coatings/paper; fast dry, good rewet, high gloss, grease resist.; solv.-free; no VOC

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* M.w. > 200,000; dens. 8.7 lb/gal; visc. 900 cps; acid no. 42; pH 8.0; 0% VOC; 52% solids

**Lucidene® 5030** [Rohm & Haas]

*Chem. Descrip.:* Latex polymer

*Uses:* Film-forming vehicle for flexographic/gravure inks and overprints where max. VOC reduction is required; food pkg. adhesives, coatings, paper; fast dry, good rewet, high gloss, grease resist.; solv.-free; no VOC

*Use Level:* 46% (gloss ink); 67% (wet offset overprint); 86% (high gloss overprint)

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* M.w. > 200,000; dens. 8.75 lb/gal; visc. 300 cps; acid no. 42; pH 8.0; 0% VOC; 51% solids

**Lucidene® 5040** [Rohm & Haas]

*Chem. Descrip.:* Latex polymer

*Uses:* Film-former for flexographic/gravure inks and overprints for max. VOC reduction; food pkg. adhesives, coatings, paper; offers adhesion to films, water resist.; solv.-free; no VOC

*Use Level:* 54% (flexible ink for film); 25% (no VOC OPV)

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* M.w. > 200,000; dens. 8.8 lb/gal; visc. 300 cps; acid no. 42; pH 8.2; 0% VOC; 52% solids

**Ludox® CL-X** [DuPont]

*Chem. Descrip.:* Aq. colloidal silica disp.

EINECS/ELINCS 231-545-4

*Uses:* Frictionizing agent for corrugated boxes and multiwall paper bags; cleanable; inert; heat-resist.; stabilized with sodium hydroxide

*Properties:* Sp.gr. 1.37; dens. 11.4 lb/gal; visc. 17 cps; surf. area 130 m<sup>2</sup>/g; pH 9.1; 46% SiO<sub>2</sub>

**Luminex™** [Engelhard]

*Chem. Descrip.:* Kaolin-based

*Uses:* Pigment, brightener for specialty printing, writing, and recycled grades of uncoated freesheet paper; cost effective; high performance

**Lumisorb™ PSML-80** [Lambent Tech.]

*Chem. Descrip.:* PEG-80 sorbitan laurate

CAS 9005-64-5

*Uses:* Food emulsifier for bakery, dairy, confectionery, and convenience foods; emulsifier for personal care, pharmaceuticals, agric., paints, pulp/paper, etc.

*Properties:* Yel. liq.; water-sol.; sp.gr. 1.1; HLB 19.4; acid no. 3 max.; sapon. no. 7-15; hyd. no. 25-40; 27-29% moisture; nonionic

**Lumisorb™ PSMO-5** [Lambent Tech.]

*Chem. Descrip.:* Polysorbate 81

CAS 9005-65-6

*Uses:* Food-grade emulsifier for bakery, dairy, confectionery, and convenience foods applics.; emulsifier for personal care, pulp/paper, paints, agric., metalworking, textiles, etc.

*Regulatory:* Also avail. in kosher grade

*Properties:* Yel. liq. (may gel on standing); disp. in water; sp.gr. 1.0; HLB 10.0; acid no. 2 max.; sapon. no. 95-105; hyd. no. 136-152; nonionic

**Lumisorb™ PSMO-20** [Lambent Tech.]

*Chem. Descrip.:* Polysorbate 80

CAS 9005-65-6

*Uses:* Emulsifier for food processing, personal care, and industrial applics. (paints, pulp/paper, agric., metalworking, textiles, etc.); dispersant for flavor oils; flavor/color enhancer in pickles; improves dryness and melt down in frozen desserts

*Use Level:* 0.05-0.2%

*Regulatory:* FDA 21CFR §172.836, 172.845, 172.854; also avail. in kosher grade

*Properties:* Yel. liq., bland odor; water-sol.; sp.gr. 1.1; b.p. > 350 F (760 mm); HLB 15.0; acid no. 2 max.; sapon. no. 45-55; hyd. no. 65-80; flash pt. (COC) > 150 C; 100% conc.; nonionic

*Toxicology:* May cause eye irritation

*Precaution:* Avoid strong oxidizing agents

- Storage:* Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources
- Lumisorb™ PSMP-20** [Lambent Tech.]  
*Chem. Descrip.:* Polysorbate 40  
 CAS 9005-66-7  
*Uses:* Emulsifier for food processing, personal care, and industrial applics., paints, pulp/paper, agric., metalworking, textiles, etc.  
*Properties:* Yel. liq. (may gel on standing); sol. in water; sp.gr. 1.1; HLB 15.6; acid no. 2 max.; sapon. no. 43-49; hyd. no. 89-105; 100% conc.; nonionic
- Lumisorb™ PSMS-20** [Lambent Tech.]  
*Chem. Descrip.:* Polysorbate 60  
 CAS 9005-67-8  
*Uses:* Emulsifier for food processing (chocolate, confectionery coatings, panned sugar), personal care, and industrial applics.; provides greater aeration in cakes, improves volume in icings and fillings, provides faster whip in whipped toppings; dispersant in dry coffee whiteners, vitamin drops; improves stability in salad dressings; foaming agent in beverage mixes; emulsifier for industrial applics., paints, pulp/paper, etc.  
*Use Level:* 0.05-1%  
*Regulatory:* FDA 21CFR §172.836, 172.854; also avail. kosher  
*Properties:* Yel. liq. (may gel on standing), mild odor; water-sol.; sp.gr. 1.1; b.p. > 200 C (760 mm); HLB 14.9; acid no. 2 max.; sapon. no. 45-55; hyd. no. 81-96; flash pt. (COC) > 175 C; 100% conc.; nonionic  
*Toxicology:* May cause eye irritation  
*Precaution:* Avoid oxidizing agents  
*Storage:* Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources
- Lumisorb™ PSTO-20** [Lambent Tech.]  
*Chem. Descrip.:* Polysorbate 85  
 CAS 9005-70-3  
*Uses:* Food-grade emulsifier for bakery, dairy, confectionery, and convenience foods applics.; emulsifier for personal care, paints, pulp/paper, metalworking, textiles, etc.  
*Properties:* Yel. liq. (may gel on standing); disp. in water; sp.gr. 1.0; HLB 11.0; acid no. 2 max.; sapon. no. 82-95; hyd. no. 39-52; nonionic
- Lumisorb™ PSTS-20** [Lambent Tech.]  
*Chem. Descrip.:* Polysorbate 65  
 CAS 9005-71-4  
*Uses:* Emulsifier for food processing, personal care, and industrial applics. (paints, pulp/paper, agric., metalworking, textiles, etc.); dispersant for dry coffee whiteners  
*Use Level:* 0.1-0.3%  
*Properties:* Yel. soft solid, bland odor; sol. in water; sp.gr. 1.0; b.p. > 200 C (760 mm); HLB 10.5; acid no. 2 max.; sapon. no. 88-98; hyd. no. 42-60; flash pt. (COC) > 175 C; 100% conc.; nonionic  
*Toxicology:* May cause eye irritation  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* Combustion produces CO<sub>2</sub>, CO, thick smoke  
*Storage:* Store in well-ventilated area @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources
- Lumisorb™ SML** [Lambent Tech.]  
*Chem. Descrip.:* Sorbitan laurate  
 CAS 1338-39-2; EINECS/ELINCS 215-663-3  
*Uses:* Emulsifier, oil additive, corrosion inhibitor for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives; food-grade emulsifier  
*Properties:* Yel. liq.; water-disp.; oil-sol.; sp.gr. 1.0; HLB 8.6; acid no. 7 max.; sapon. no. 158-170; hyd. no. 330-358; 100% conc.; nonionic
- Lumisorb™ SMO** [Lambent Tech.]  
*Chem. Descrip.:* Sorbitan oleate  
 CAS 1338-43-8; EINECS/ELINCS 215-665-4  
*Uses:* Emulsifier, oil additive, corrosion inhibitor for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives; food-grade emulsifier  
*Regulatory:* Also avail. kosher  
*Properties:* Amber liq.; oil-sol.; sp.gr. 1.0; HLB 4.3; acid no. 7.5; sapon. no. 149-160; hyd. no. 193-209; 100% conc.; nonionic
- Lumisorb™ SMP** [Lambent Tech.]  
*Chem. Descrip.:* Sorbitan palmitate  
 CAS 26266-57-9; EINECS/ELINCS 247-568-8  
*Uses:* Emulsifier, oil additive, corrosion inhibitor for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives; food-grade emulsifier  
*Properties:* Tan solid; oil-sol.; sp.gr. 1.0; HLB 6.7; acid no. 7.5 max.; sapon. no. 140-150; hyd. no. 275-305; 100% conc.; nonionic
- Lumisorb™ SMS** [Lambent Tech.]  
*Chem. Descrip.:* Sorbitan stearate  
 CAS 1338-41-6; EINECS/ELINCS 215-664-9  
*Uses:* Emulsifier for food processing (chocolate and confectionery coatings) and personal care prods.; improves volume in icings and fillings; dispersant in dry coffee whiteners, flavor oils; emulsifier for pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Regulatory:* FDA 21CFR §172.842, 172.845, 182.4504; also avail. kosher  
*Properties:* Cream flakes; insol. in water; sp.gr. 1.0; b.p. > 200 C (760 mm); HLB 4.7; acid no. 10 max.; sapon. no. 147-157; hyd. no. 235-260; flash pt. (COC) > 175 C; 100% conc.; nonionic  
*Toxicology:* May cause eye irritation  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* Combustion produces CO<sub>2</sub>, CO, thick smoke  
*Storage:* Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources
- Lumisorb™ STO** [Lambent Tech.]  
*Chem. Descrip.:* Sorbitan trioleate  
 CAS 26266-58-0; EINECS/ELINCS 247-569-3  
*Uses:* Oil additive; corrosion inhibitor; emulsifier for food, pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives; also avail. in tech. grade  
*Properties:* Amber liq.; oil-sol.; sp.gr. 1.0; HLB 1.8; acid no. 13.5 max.; sapon. no. 171-185; hyd. no. 58-69; 100% conc.; nonionic
- Lumisorb™ STS** [Lambent Tech.]  
*Chem. Descrip.:* Sorbitan tristearate  
 CAS 26658-19-5; EINECS/ELINCS 247-891-4  
*Uses:* Oil additive; corrosion inhibitor; emulsifier for food, pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Regulatory:* Also avail. kosher  
*Properties:* Cream solid; oil-sol.; sp.gr. 1.0; HLB 2.1; acid no. 15 max.; sapon. no. 175-190; hyd. no. 65-80; 100% conc.; nonionic
- Lumitac®** [Tosoh]  
*Chem. Descrip.:* VLDPE  
*Uses:* For blown film (general purpose pkg., heavy duty bags, agric. film, diaper backings, stretch film, shrink film), extrusion coating and laminating (kraft papers, milk carton stocks, polymeric film, box liners), blow molding (box liners); inj. molding (housewares, artificial flowers)
- Lumiten® P** [BASF AG]  
*Chem. Descrip.:* Polyether alcohol  
*Uses:* Visc. control agent and slip agent for paper coating
- Lumulse™ 8000** [Lambent Tech.]  
*Chem. Descrip.:* PEG-150  
 CAS 25322-68-3; EINECS/ELINCS 203-989-9  
*Uses:* Cosmetics; pharmaceuticals; resins; coatings; antistat for rubber conveyor belting; shoe polish; lubricant for paper size; printing inks; release agent for rubber; tablet binder/lubricant  
*Properties:* Wh. waxy solid; water-sol.; m.w. 7000-9000; visc. 470-900 cSt (210 F); f.p. 60-63 C; pH 4.5-7.5 (5%); nonionic
- Lumulse™ DGL** [Lambent Tech.]  
*Chem. Descrip.:* PEG-2 laurate  
 CAS 141-20-8; EINECS/ELINCS 205-468-1  
*Uses:* Emulsifier for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives; also avail. in tech. grade  
*Properties:* Yel. liq.; nondisp. in water; sp.gr. 0.95; HLB 6.5; pour pt. 1 C; 100% conc.; nonionic
- Lumulse™ DGO** [Lambent Tech.]  
*Chem. Descrip.:* PEG-2 oleate  
 CAS 106-12-7; EINECS/ELINCS 203-364-0  
*Uses:* Lubricant for cosmetics, pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Yel. liq.; nondisp. in water; sp.gr. 0.95; HLB 4.7; 100% conc.; nonionic
- Lumulse™ DGS** [Lambent Tech.]  
*Chem. Descrip.:* PEG-2 stearate  
 CAS 106-11-6; EINECS/ELINCS 203-363-5  
*Uses:* Emulsifier, opacifier, thickener for cosmetics, o/w emulsions; lubricant

for stamping and drawing; protective coating for hygroscopic materials (tablets); opacifier/lubricant for paper industry; antitack agent

*Properties:* Wh. flake; insol. in water; m.p. 44-48 C; HLB 4.7; acid no. 5 max.; sapon. no. 153-165; pour pt. 46 C; pH 4.5-6.5 (3% disp.); 100% conc.; nonionic

**Lumulse™ DGS-C** [Lambent Tech.]

*Chem. Descrip.:* PEG-2 stearate SE and stearic acid

*Uses:* Self-emulsifying emulsifier, opacifier, thickener for cosmetics, o/w emulsions; lubricant for stamping and drawing; protective coating for hygroscopic materials (tablets); opacifier/lubricant for paper industry; antitack agent

*Properties:* Wh. flake; disp. in water; m.p. 47-53 C; acid no. 95-105; sapon. no. 160-170; pH 6.5-7.5 (3% disp.)

**Lumulse™ DGS-N** [Lambent Tech.]

*Chem. Descrip.:* PEG-2 stearate and stearic acid

*Uses:* Emulsifier, opacifier, thickener for cosmetics, o/w emulsions; lubricant for stamping and drawing; protective coating for hygroscopic materials (tablets); opacifier/lubricant for paper industry; antitack agent

*Properties:* Wh. flake; insol. in water; m.p. 43-50 C; acid no. 95-105; sapon. no. 175-185; pH 4.5-6.5 (3% disp.)

**Lumulse™ EGDS** [Lambent Tech.]

*Chem. Descrip.:* Glycol distearate

CAS 627-83-8; EINECS/ELINCS 211-014-3

*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives

*Properties:* Cream solid; nondisp. in water; sp.gr. 0.95; HLB 1.5; pour pt. 56 C; nonionic

**Lumulse™ GMO** [Lambent Tech.]

*Chem. Descrip.:* Glyceryl oleate

CAS 25496-72-4; EINECS/ELINCS 203-827-7

*Uses:* Emulsifier, opacifier, stabilizer for food, drug, and cosmetic industries; improves stability in pet foods, margarine; dough conditioner for tacos and tortillas; lubricant for textiles; anti-icing fuel additive; solvent; mold release agent; clarifier and antiblocking agent in plastics (food pkg.); in food pkg. adhesives, coatings, paper/paperboard, textiles; defoamer in food-contact paper/paperboard; improves overrun in frozen desserts

*Use Level:* 0.1-0.5%

*Regulatory:* FDA 21CFR §175.105, 175.320, 176.210, 177.2800, 181.27, 182.4505, Part 166; also avail. in kosher grade

*Properties:* Yel. opaque liq., bland odor; insol. in water; sol. in ethanol, propylene glycol, org. solvs., veg. and min. oils; sp.gr. 0.95; dens. 8.0 lb/gal; visc. 90 cSt (40 C); b.p. > 200 C (760 mm); HLB 3.4; acid no. 2 max.; iodine no. 96; sapon. no. 160-170; pour pt. 0 C; flash pt. 215 C; 100% conc.; nonionic

*Toxicology:* May cause eye irritation

*Precaution:* Avoid strong oxidizing agents

*Storage:* Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources

**Lumulse™ PEG 540** [Lambent Tech.]

*Chem. Descrip.:* PEG-6, PEG-32 (50/50 mixt.)

*Uses:* Cosmetic, pharmaceutical, and suppository formulation; humectant, plasticizer in adhesives; base for metal polishes; lubricant for paper sizes; inks; in alkyd resins and coatings

*Properties:* Wh. waxy solid; water-sol.; m.w. 500-600; visc. 26-33 cSt (210 F); f.p. 38-41 C; pH 4.5-7.5 (5%)

**Lumulse™ PEG 1000** [Lambent Tech.]

*Chem. Descrip.:* PEG-20

CAS 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Cosmetic and pharmaceutical formulation; resins and coatings; imparts dimensional stability to paper wet str. resins, improves coatings gloss

*Properties:* Wh. waxy solid; water-sol.; m.w. 950-1050; visc. 16-19 cSt (210 F); f.p. 37-40 C; pH 4.5-7.5 (5%); nonionic

**Lumulse™ PEG 3350** [Lambent Tech.]

*Chem. Descrip.:* PEG-75

CAS 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Cosmetic and pharmaceutical formulation; resins and coatings; humectant, plasticizer for adhesives; antistat for rubber conveyor belt; in shoe polish; lubricant for paper sizing; printing inks; tablet binder, lubricant

*Properties:* Wh. waxy solid; water-sol.; m.w. 3015-3685; visc. 76-110 cSt (210 F); f.p. 53-56 C; pH 4.5-7.5 (5%); nonionic

**Lumulse™ PGML** [Lambent Tech.]

*Chem. Descrip.:* Propylene glycol laurate

CAS 27194-74-7; EINECS/ELINCS 205-542-3

*Uses:* Surfactant for food, industrial uses, cosmetics, pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives

*Properties:* Yel. liq.; disp. in water; sp.gr. 0.92; HLB 4.0; pour pt. -4 C; 100% conc.; nonionic

**Lumulse™ PGMP** [Lambent Tech.]

*Chem. Descrip.:* Propylene glycol palmitate

*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives

*Properties:* Wh. solid; nondisp. in water; sp.gr. 0.95; HLB 3.6; pour pt. 36 C; nonionic

**Lumulse™ PGMS** [Lambent Tech.]

*Chem. Descrip.:* Propylene glycol stearate

CAS 1323-39-3; EINECS/ELINCS 215-354-3

*Uses:* Surfactant for food, industrial, and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives

*Properties:* Wh. waxy solid; insol. in water; sp.gr. 0.95; HLB 3.4; pour pt. 38 C; 100% conc.; nonionic

**Luprintol® FBT** [BASF AG]

*Uses:* Auxiliary for transfer paper printing on textile machines

**Luredur® AS 10, 60%** [BASF; BASF AG]

*Chem. Descrip.:* Acrylic polymer aq. sol'n.

*Uses:* Dry str. agent for strengthening the structure of paper and board, esp. short-fibered and secondary stocks; reinforces the bond between the individual fibers; suitable in all cases where starch is used in surface treatment for reinforcing the structure

*Properties:* Water-sol.; anionic

**Luredur® JP 2** [BASF; BASF AG]

*Chem. Descrip.:* Acrylic polymer aq. sol'n.

*Uses:* Dry str. agent for strengthening the structure of paper and board, esp. short-fibered and secondary fiber-containing furnishes; applied at the size press; best in weakly acid to neutral applics.; forms strong hydrogen bonds with fibers; forms strong, tough film on fibers

*Properties:* Anionic

**Luredur® NB-25** [BASF; BASF AG]

*Chem. Descrip.:* Acrylic polymer aq. sol'n.

*Uses:* Dry str. agent for strengthening the structure of paper and board, esp. short-fibered and secondary stocks; reinforces the bond between the individual fibers; suitable in all cases where starch is used in surface treatment for reinforcing the structure

*Properties:* Water-sol.; anionic

**Luresin®** [BASF AG]

*Chem. Descrip.:* Based on aq. sol'ns. of formaldehyde-free cationic polyamido-amine-epichlorohydrin resins

*Uses:* Wet and dry str. agent for papers, esp. in the neutral pH range

**Lustrabrite® S** [Telechemische]

*Chem. Descrip.:* Toluene sulfonamide/epoxy resin

*Uses:* Nail enamel resin, gloss aid; plasticizer for nitrocellulose; food-contact paper/paperboard; patented; formaldehyde-free; provides superior clarity, brilliance, high gloss, adhesion

*Regulatory:* FDA 21CFR 175.105, 175.300, 176.170

**Lutensol® TO 3** [BASF AG]

*Chem. Descrip.:* PEG-3 C13 oxo-alcohol

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods.; intermediate in prod. of ether sulfates

*Properties:* Colorless clear or cloudy liq.; sol. @ 10% in alcohols, aromatic hydrocarbons; sp.gr. 0.93; visc. 50 mPa·s; drop pt. < 5 C; solid. pt. < 5 C; HLB 9; hyd. no. 165; cloud pt. 40 C (in BDG); flash pt. > 100 C; pH 7 (5% aq.); surf. tens. 30 mN/m (1 g/l in DW); 100% conc.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* May become cloudy if stored at low temps.; heat to 40 C to reverse

**Lutensol® TO 5** [BASF AG]

*Chem. Descrip.:* PEG-5 C13 oxo-alcohol

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods.

*Properties:* Colorless clear or cloudy liq.; sol. @ 10% in alcohols, aromatic hydrocarbons; sp.gr. 0.96; visc. 70 mPa·s; drop pt. 13 C; solid. pt. < 5 C; HLB 10.5; hyd. no. 130; cloud pt. 62 C (in BDG); flash pt. > 100 C; pH 7 (5% aq.); surf. tens. 30 mN/m (1 g/l in DW); 100% conc.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* May become cloudy if stored at low temps.; heat to 40 C to reverse

**Lutensol® TO 6** [BASF AG]

*Chem. Descrip.:* PEG-6 C13 oxo-alcohol

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods.

*Properties:* Nonionic

**Lutensol® TO 7** [BASF AG]

*Chem. Descrip.:* PEG-7 C13 oxo-alcohol

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods., emulsion polymerization (acrylic, vinyl, and styrene monomers)

*Properties:* Colorless clear or cloudy liq.; sol. @ 10% in alcohols, aromatic hydrocarbons; sp.gr. 0.98; visc. 90 mPa·s; drop pt. 18 C; solid. pt. < 5 C; HLB 12; hyd. no. 110; cloud pt. 70 C (in BDG); flash pt. > 100 C; pH 7 (5% aq.); surf. tens. 30 mN/m (1 g/l in DW); 100% conc.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* May become cloudy if stored at low temps.; heat to 40 C to reverse

**Lutensol® TO 8** [BASF AG]

*Chem. Descrip.:* PEG-8 C13 oxo-alcohol

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods., pickling baths, emulsion polymerization (acrylic, vinyl, and styrene monomers)

*Properties:* Colorless clear or cloudy liq.; sol. @ 10% in water, 5% caustic soda, 5% HCl, 5% NaCl, alcohols; sp.gr. 1.01; visc. 150 mPa·s; drop pt. 22 C; solid. pt. 10 C; HLB 13; hyd. no. 100; cloud pt. 60 C (in water); flash pt. > 100 C; pH 7 (5% aq.); surf. tens. 31 mN/m (1 g/l in DW); 100% conc.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* May become cloudy if stored at low temps.; heat to 40 C to reverse

**Lutensol® TO 12** [BASF AG]

*Chem. Descrip.:* PEG-12 C13 oxo-alcohol

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods., pickling baths, emulsion polymerization (acrylic, vinyl, and styrene monomers)

*Properties:* Wh. soft paste; sol. @ 10% in water, 5% caustic soda, 5% HCl, 5% NaCl, alcohols; sp.gr. 1.00 (60 C); visc. 60 mPa·s (60 C); drop pt. 30 C; solid. pt. 20 C; HLB 14.5; hyd. no. 75; cloud pt. 87 C (in BDG); flash pt. > 100 C; pH 7 (5% aq.); surf. tens. 34 mN/m (1 g/l in DW); 100% conc.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* May become cloudy if stored at low temps.; heat to 40 C to reverse

**Lutensol® TO 89** [BASF AG]

*Chem. Descrip.:* PEG-8 C13 oxo-alcohol (90% Lutensol TO 8 in water)

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods., pickling baths

*Properties:* Colorless clear liq.; sol. @ 10% in water, 5% caustic soda, 5% HCl, 5% NaCl, petrol. fractions, alcohols; sp.gr. 1.02; visc. 140 mPa·s; drop pt. < 5 C; solid. pt. < 5 C; HLB 13; hyd. no. 100; cloud pt. 60 C (in water); flash pt. > 100 C; pH 7 (5% aq.); surf. tens. 31 mN/m (1 g/l in DW); 90% conc.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* May become cloudy if stored at low temps.; heat to 40 C to reverse

**Lutensol® TO 389** [BASF AG]

*Chem. Descrip.:* Fatty alcohol ethoxylate (Lutensol TO 3 and TO 8 in water)

*Uses:* Detergent, emulsifier, dispersant, wetting agent for laundry detergents, household and industrial cleaners, emulsions, dispersions, surf. treatment, leather, pulp/paper, dyes and pigments, paints, building prods.

*Properties:* Colorless clear liq.; sol. @ 10% in alcohols, aromatic hydrocarbons; sp.gr. 0.99; visc. 100 mPa·s; drop pt. < 5 C; solid. pt. < 5 C; HLB 12; hyd. no. 110; cloud pt. 70 C (in BDG); flash pt. > 100 C; pH 7 (5% aq.); surf. tens. 30 mN/m (1 g/l in DW); 90% conc.; nonionic

*Environmental:* > 90% biodeg.

*Storage:* May become cloudy if stored at low temps.; heat to 40 C to reverse

**Luviskol® K12** [BASF AG]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, thickener, protective colloid, suspending agent, and dispersant for cosmetics, adhesives, paints, coatings, paper, detergents, glass fibers, inks, ceramics, nonpharmaceutical tableting, photographic films, crop protection agents; hair fixative

*Properties:* Powd. and liq.; sol. in alcohols, esters, ether alcohols, ketones, lactams, chlorinated hydrocarbons, nitroparaffins, acids, amines; pH 5-7 (10%); 50% solids in water (sol'n.)

**Luviskol® K17** [BASF; BASF AG]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, thickener, protective colloid, stabilizer, visc. modifier, suspending agent, and dispersant used for emulsion and suspension polymerizations, cosmetics, adhesives, sealants, paints, coatings, paper, detergents, glass fibers, inks, ceramics, nonpharmaceutical tableting, photographic films; hair fixative

*Properties:* Powd. or liq.; > 99% > 250 µm particle size (powd.); sol. in alcohols, esters, ether alcohols, ketones, lactams, chlorinated hydrocarbons, nitroparaffins, acids, amines; bulk dens. 0.4-0.5 g/cc (powd.); visc. 5.4 cps (5% in methanol); pH 3-7 (10%, powd.), 7-10 (10%, sol'n.); > 92% solids (powd.), 50% solids in water (sol'n.)

**Luviskol® K30** [BASF; BASF AG]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, thickener, protective colloid, stabilizer, visc. modifier, suspending agent, and dispersant used for emulsion and suspension polymerizations, cosmetics, adhesives, sealants, paints, coatings, paper, detergents, glass fibers, inks, ceramics, nonpharmaceutical tableting, photographic films; hair fixative

*Properties:* Powd. or liq.; particle size > 99% > 250 µm (powd.); sol. in alcohols, esters, ether alcohols, ketones, lactams, chlorinated hydrocarbons, nitroparaffins, acids, amines; bulk dens. 0.4-0.5 g/cc; visc. 7.0 cps (5% in methanol); pH 3-7 (10%, powd.), 7-10 (10%, sol'n.); > 95% solids (powd.), 30% solids in water (sol'n.)

**Luviskol® K60** [BASF; BASF AG]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, thickener, protective colloid, stabilizer, visc. modifier, suspending agent, and dispersant used for emulsion and suspension polymerizations, cosmetics, adhesives, sealants, paints, coatings, paper, detergents, glass fibers, inks, ceramics, nonpharmaceutical tableting, photographic films; hair fixative

*Properties:* Liq.; sol. in alcohols, esters, ether alcohols, ketones, lactams, chlorinated hydrocarbons, nitroparaffins, acids, amines; pH 7-10 (10%); 45% solids in water

**Luviskol® K80** [BASF; BASF AG]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, thickener, protective colloid, suspending agent, and dispersant for cosmetics, adhesives, paints, coatings, paper, detergents, glass fibers, inks, ceramics, nonpharmaceutical tableting, photographic films; hair fixative

*Properties:* Powd. or liq.; particle size > 99% > 250 µm (powd.); sol. in alcohols, esters, ether alcohols, ketones, lactams, chlorinated hydrocarbons, nitroparaffins, acids, amines; bulk dens. 0.3-0.4 g/cc (powd.); visc. 27 cps (5% in methanol); pH 5-8 (10%, powd.), 7-10.5 (10%, sol'n.); > 95% solids (powd.), 20% solids in water (sol'n.)

**Luviskol® K90** [BASF; BASF AG]

*Chem. Descrip.:* PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Film-former, thickener, protective colloid, stabilizer, visc. modifier, suspending agent, and dispersant used for emulsion and suspension polymerizations, cosmetics, adhesives, sealants, paints, coatings, paper, detergents, glass fibers, inks, ceramics, nonpharmaceutical tableting, photographic films; hair fixative

*Properties:* Powd. or liq.; particle size > 99% > 250 µm (powd.); sol. in alcohols, esters, ether alcohols, ketones, lactams, chlorinated hydrocarbons, nitroparaffins, acids, amines; bulk dens. 0.3-0.4 g/cc (powd.); visc. 30.8 cps (5% in methanol); pH 5-9 (10%, powd.), 7-10.5 (10%, sol'n.); > 95% solids (powd.), 15% or 20% solids in water (sol'n.)

**Luwax® E** [BASF AG]

*Chem. Descrip.:* Montan ester wax

CAS 8002-53-7; EINECS/ELINCS 232-313-5

*Uses:* Suitable for production of purely saponified, solv.-free or solv.-containing polishes; antiblocking agent for paper and cardboard, esp. for foodstuff pkgs.; lubricant for exterior and interior applic. for processing PVC with or without plasticizers

*Properties:* Flakes/powd.

**Luwax® LG** [BASF AG]

*Chem. Descrip.:* Montanic acid wax

CAS 8002-53-7; EINECS/ELINCS 232-313-5

*Uses:* For production of emulsions for polishes, paper and film finishing, impregnating agents for building, wood and metal industry, leather auxiliary; very easily emulsifiable, hard wax

*Properties:* Flakes

**Luwax® LGE** [BASF AG]

*Chem. Descrip.:* Montanic acid wax containing emulsifiers

CAS 8002-53-7; EINECS/ELINCS 232-313-5

*Uses:* Dry-bright wax for production of emulsions for floor polishes, leather finishes, paper and film finishing, wood and plastics processing, glass and ceramics; mold release agent for PUR

*Properties:* Flakes

**Luwax® OA** [BASF]

*Chem. Descrip.:* Oxidized polyethylene wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Improves rub resist. in printing inks; flattening and antisetting agent in paints/coatings; dispersant and color enhancer in color concs.; inc. hardness in wax compds.; improves blk. heel mark resist. in floor polishes; lubricant for plastics processing; in the production of emulsions for polishes, textile, paper and other industries

*Properties:* Pastilles; dens. 0.96 g/cm<sup>3</sup>; visc. 400 mm<sup>2</sup>/s; m.p. 94 C; drop pt. 101 C; 22 mg KOH/g

**Luwax® OA 3** [BASF]

*Chem. Descrip.:* Oxidized polyethylene wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Improves rub resist. in printing inks; flattening and antisetting agent in paints/coatings; dispersant and color enhancer in color concs.; inc. hardness in wax compds.; improves blk. heel mark resist. in floor polishes; lubricant for plastics processing; in the production of emulsions for polishes, textile, paper and other industries; very high hardness

*Properties:* Powd; dens. 0.99 g/cm<sup>3</sup>; visc. 4500 mm<sup>2</sup>/s (140 C); m.p. 130 C; drop pt. 130 C; 23 mg KOH/g

**Luwax® OA 5** [BASF]

*Chem. Descrip.:* Oxidized polyethylene wax

CAS 68441-17-8; EINECS/ELINCS 200-815-3

*Uses:* Improves rub resist. in printing inks; flattening and antisetting agent in paints/coatings; dispersant and color enhancer in color concs.; inc. hardness in wax compds.; improves blk. heel mark resist. in floor polishes; high hardness wax for coating of fruits, paper, cellophane, textiles, and floor polishes; lubricant for plastics processing

*Properties:* Gran. or powd.; dens. 0.97 g/cc; visc. 410 mm<sup>2</sup>/s (120 C); m.p. 104 C; drop pt. 110 C; acid no. 16; penetration hardness < 1 dmm

**LX-685®\_125** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Plasticizer, softener, processing aid in adhesives (hot melt pressure sensitive, mastic, pressure sensitive), coatings (alum., can & drum, emulsion, industrial, marine, traffic), inks (gelled varnishes, gravure, heat set, letterpress, lithographic), rubber (cements, mechanical goods, molded goods, tires), concrete-curing compds., and caulking compds.; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 12 solid, flakes (50% in toluene); sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 790; sp.gr. 1.095; R&B soften. pt. 103 C; iodine no. (Wijs) 130; flash pt. (COC) 350 F

**LX-685®\_135** [Neville]

*Chem. Descrip.:* Petrol. resin

*Uses:* Processing aid, extender in adhesives (hot melt pressure sensitive, mastic, pressure sensitive), coatings (alum., can & drum, emulsion, industrial, marine, traffic), inks (gelled varnishes, gravure, heat set, letterpress, lithographic), rubber (cements, mechanical goods, molded goods, tires), concrete-curing compds., and caulking compds.; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210,

177.2600, 178.3800

*Properties:* Gardner 12 solid, flakes (50% in toluene); sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 720; sp.gr. 1.090; R&B soften. pt. 115 C; iodine no. (Wijs) 140; flash pt. (COC) 425 F

**LX-782®** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Plasticizer, softener for NR, SR; reinforcing aid; also used for inks, adhesives, coatings, and concrete cures; food-contact adhesives, coatings, paper, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 14 solid, flakes (50% in toluene); m.w. 690; sp.gr. 1.09; R&B soften. pt. 102 C; iodine no. (Wijs) 140; flash pt. (COC) 460 F

**LX®-973** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Used for inks, adhesives, coatings, rubbers, and concrete cures; food-contact adhesives, coatings, paper, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 6 solid, flakes (50% in toluene); m.w. 630; sp.gr. 1.09; R&B soften. pt. 113 C; iodine no. (Wijs) 160; flash pt. (COC) 450 F

**LX®-1035** [Neville]

*Chem. Descrip.:* Petrol. resin, not filtered

*Uses:* Used in adhesives (hot melt pressure sensitive, mastic, pressure sensitive), coatings (alum., can & drum, emulsion, industrial, marine, traffic), inks (gelled varnishes, gravure, heat set, letterpress, lithographic); rubber (cements, mechanical goods, molded goods, tires), concrete-curing compds., and caulking compds.; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 15 solid, flakes (50% in toluene); sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 920; sp.gr. 1.090; R&B soften. pt. 170 C; iodine no. (Wijs) 160; flash pt. (COC) 425 F

**LX®-1082** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Used for inks, adhesives, coatings, rubbers, and concrete cures; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 12 solid, flakes (50% in toluene); m.w. 730; sp.gr. 1.09; R&B soften. pt. 102 C; iodine no. (Wijs) 130; flash pt. (COC) 480 F

**LX®-1082,280** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Used for inks, adhesives, coatings, rubbers, and concrete cures; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 13 solid, flakes (50% in toluene); m.w. 785; sp.gr. 1.12; R&B soften. pt. 140 C; iodine no. (Wijs) 155; flash pt. (COC) 505 F

**LXR-1122** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Used for inks, adhesives, coatings, rubbers, and concrete cures; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 12 solid, flakes (50% in toluene); m.w. 705; sp.gr. 1.07; R&B soften. pt. 100 C; iodine no. (Wijs) 120; flash pt. (COC) 450 F

**LX®-1127** [Neville]

*Chem. Descrip.:* Petrol. resin

*Uses:* Used in adhesives (hot melt pressure sensitive, mastic, pressure sensitive), coatings (alum., can & drum, emulsion, industrial, marine, traffic), inks (gelled varnishes, gravure, heat set, letterpress, lithographic); rubber (cements, mechanical goods, molded goods, tires), concrete-curing compds., and caulking compds.; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 10 solid, (50% in toluene); sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydro-

carbons; m.w. 800; sp.gr. 1.050; R&B soften. pt. 100 C; iodine no. (Wijs) 200; flash pt. (COC) 450 F

**LX®-1200** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Used for inks, adhesives, coatings, rubbers, and concrete cures; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 11 solid, flakes (50% in toluene); m.w. 715; sp.gr. 1.09; R&B soften. pt. 113 C; iodine no. (Wijs) 140; flash pt. (COC) 435 F

**LX®-1200,130** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Used for inks, adhesives, coatings, rubbers, and concrete cures; food-contact adhesives, coatings, paper, rubber, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 12 solid, flakes (50% in toluene); m.w. 770; sp.gr. 1.11; R&B soften. pt. 132 C; iodine no. (Wijs) 130; flash pt. (COC) 465 F

**Lycoid® 260** [Vinings Ind.]

*Chem. Descrip.:* Guar gum

CAS 9000-30-0; EINECS/ELINCS 232-536-8

*Uses:* Dry str. agent, formation aid in papermaking; component of paper/paperboard in contact with aq./fatty/dry foods; reduced press sticking; improves smoothness

*Use Level:* 4-6 lb/ton

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Off-wh. tan powd.; 100% thru Tyler 20 mesh sieve; easy disp. in cold water; visc. 3200 cps min. (1%); pH 5-6 (1% aq.); 6-13% moisture

*Toxicology:* Dust may be irritating; avoid breathing dust, contact with eyes, or repeated contact with skin

*Precaution:* Wet material will become very slippery

*Storage:* Store in a dry location; keep container closed when not in use to prevent moisture pickup

**Lytron® 2203** [OMNOVA Sol'ns./Paper]

*Chem. Descrip.:* Lightweight polystyrene polymer aq. disp.

CAS 9003-53-6; EINECS/ELINCS 202-851-5

*Uses:* Pigment for paper coatings; creates bulky coatings with exc. optical props., gloss, improved printability, brightness, and opacity

*Properties:* Visc. 500 cps max.; pH 9.0; 54% total solids

# M

## MA 115H [Process Chems. LLC]

*Uses:* Brownstock defoamer for kraft, sulfite, and semi-chem. pulp washing, for use in brownstock washing, screen room, and bleach plant operations; oil-based; does not contribute to deposit formation; suitable whether batch or continuous pulp is employed

*Properties:* Off-wh. liq.; dens. 6.27-8.29 lb/gal; visc. 1000-2500 cps

*Toxicology:* TSCA listed

*Storage:* Store in dry area

## MA 1124B [Process Chems. LLC]

*Uses:* Defoamer, drainage aid for kraft pulp/paper applics., for use in brownstock washing, screen room, and bleach plant operations; water-based; does not contain EBS, min. oil, or dioxin precursors; does not contribute to deposit formation; suitable whether batch or continuous pulp is employed

*Properties:* Opaque wh. liq.; sp.gr. 1.005-1.030; dens. 8.38-8.58 lb/gal; visc. 950-1550 cps; pH 5.5-6.5

*Toxicology:* TSCA listed

*Storage:* Store in dry area

## Mackester™ EGDS [McIntyre]

*Chem. Descrip.:* Glycol distearate

CAS 627-83-8; EINECS/ELINCS 211-014-3

*Uses:* Emulsifier, lubricant, antistat, defoamer for metalworking, textile lubricants, plastics, paper; emulsifier, pearlescent, emollient for cosmetics

*Properties:* Flake; 100% conc.; nonionic

## Mackester™ EGMS [McIntyre]

*Chem. Descrip.:* Glycol stearate

CAS 111-60-4; EINECS/ELINCS 203-886-9

*Uses:* Emulsifier, lubricant, antistat, defoamer for metalworking, textile lubricants, plastics, paper; emulsifier, pearlescent, emollient for cosmetics

*Properties:* Flake; 100% conc.; nonionic

## Mackester™ IP [McIntyre]

*Chem. Descrip.:* Glycol stearate, other ingreds.

*Uses:* Emulsifier, lubricant, antistat, defoamer for metalworking, textile lubricants, plastics, paper; emulsifier, pearlescent, emollient for cosmetics

*Properties:* Flake; 100% conc.

## Mackester™ SP [McIntyre]

*Chem. Descrip.:* Glycol stearate and stearamide MEA

*Uses:* Emulsifier, lubricant, antistat, defoamer for metalworking, textile lubricants, plastics, paper; emulsifier, pearlescent, emollient for cosmetics

*Properties:* Flake; 100% conc.

## Macol® OP-10 SP [BASF]

*Chem. Descrip.:* Octoxynol-10

CAS 9002-93-1

*Uses:* Emulsifier, detergent, wetting agent, dispersant, solubilizer, coupling agent for cosmetics, I&I cleaners, paints, textiles, paper processing, adhesives, metalworking; emulsifier for heavy petrol. oils and silicone fluids

*Properties:* APHA 100 max. clear liq., polyol odor; sol. in water, alcohol, ethylene glycol, chlorinated hydrocarbon and aromatic solvs.; insol. in most veg. and min. oils; sp.gr. 1.06; visc. 250 cps; vapor pressure < 0.1 mm Hg; b.p. > 300 F; HLB 13.4; cloud pt. 65 C (1% aq.); flash pt. (PMCC) > 300 F; nonionic

*Toxicology:* Contact with skin and eyes may cause temporary irritation

*Precaution:* Incompat. with strong oxidizing materials

*Hazardous Decomp. Prods.:* Thermal decomp. may produce CO<sub>x</sub>

*Storage:* Store in well-ventilated area below 120 F

## Magnabrite™ [PQ]

*Chem. Descrip.:* Magnesium sulfate aq. sol'n.

CAS 7487-88-9; EINECS/ELINCS 231-298-2

*Uses:* Descaling agent for bleaching and deinking processes in pulp/paper industry; metal deactivator in peroxide or oxygen bleaching of pulp; modifies the sol. domain of silica, forcing it into an area where it forms a soft, nonadherent, talc-like scale which has a low affinity for metal surfs. and is easily removed; stable

*Regulatory:* SARA §302/304/313 nonreportable; not a RCRA hazardous waste

*Properties:* Colorless transparent sol'n.; odorless; misc. with water; sp.gr. 1.31 (20 C); flash pt. noncombustible; pH 8.5; 27% solids

*Toxicology:* May cause irritation by eye contact (pain, redness, tearing) and inh. (sneezing and dryness of mucous membranes); ing. may cause nausea, vomiting, abdominal cramps, and diarrhea

*Environmental:* No adverse effects known or suspected

*Hazardous Decomp. Prods.:* Magnesium oxide, sulfur dioxide, and sulfur trioxide may be generated at very high temps.

## Magnafloc® [Ciba Spec. Chems./Paper]

*Uses:* Flocculant, coagulant for raw water, saveall, and effluent treatment in paper industry

## Magnum Gloss [Mississippi Lime]

*Chem. Descrip.:* Precipitated calcium carbonate slurry

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Coating pigment for glossy, high brightness coated paper and board applics.; provides increased opacity, brightness, ink receptivity; outstanding high shear rheology

*Properties:* Slurry; 0.38 μ mean particle size; 98.5% finer than 2 μ; sp.gr. 2.85; dens. 11.28 dry lb/gal; visc. 500 cps; surf. area 12 m<sup>2</sup>/g; oil absorp. 28; brightness 98; ref. index 1.68; pH 9.5; 72% slurry solids; 98.6% CaCO<sub>3</sub>

## MAKON® 4 [Stepan; Stepan Canada; Stepan Europe]

*Chem. Descrip.:* Nonoxynol-4

CAS 9016-45-9; EINECS/ELINCS 230-770-5

*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries

*Properties:* Lt. straw liq.; sol. in oils, xylene; dens. 8.5 lb/gal; visc. 260 cps; HLB 9.0; pour pt. -20 C; pH 7.7 (1%); 100% act.; nonionic

## MAKON® 6 [Stepan; Stepan Canada; Stepan Europe]

*Chem. Descrip.:* Nonoxynol-6

CAS 9016-45-9

*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries

*Properties:* Lt. straw liq.; sol. in xylene; disp. in water; dens. 8.67 lb/gal; visc. 255 cps; HLB 11; pour pt. -29 C; cloud pt. 78 C (1%); pH 7.9 (1%); 100% act.; nonionic

## MAKON® 8 [Stepan; Stepan Canada; Stepan Europe]

*Chem. Descrip.:* Nonoxynol-8

CAS 9016-45-9

*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries

*Properties:* Lt. straw liq.; sol. in water, xylene; dens. 8.76 lb/gal; visc. 205 cps; HLB 12; cloud pt. 24 C (1%); pour pt. -5 C; pH 7.0 (1%); 100% act.; nonionic

## MAKON® 10 [Stepan; Stepan Canada; Stepan Europe]

*Chem. Descrip.:* Nonoxynol-10

- CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries  
*Properties:* Lt. straw liq.; sol. in water, xylene; dens. 8.85 lb/gal; visc. 235 cps; HLB 13.0; cloud pt. 54 C (1%); pour pt. 2.8 C; pH 8.2 (1%); 100% act.; nonionic
- MAKON® 12** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-12  
 CAS 9016-45-9  
*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries  
*Properties:* Lt. straw liq.; sol. in water, xylene; dens. 8.9 lb/gal; visc. 300 cps; HLB 14; cloud pt. 81 C (1%); pour pt. 12.2 C; pH 7.2 (1%); 100% act.; nonionic
- MAKON® 14** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-14  
 CAS 9016-45-9  
*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries  
*Properties:* Lt. straw liq.; sol. in water, xylene; dens. 8.9 lb/gal; visc. 520 cps; HLB 15; cloud pt. 94 C (1%); pour pt. 18.9 C; pH 7.2 (1%); 100% act.; nonionic
- MAKON® 30** [Stepan; Stepan Canada; Stepan Europe]  
*Chem. Descrip.:* Nonoxynol-30  
 CAS 9016-45-9  
*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries  
*Properties:* Off-wh. waxy solid; sol. in water, xylene; dens. 9.0 lb/gal; HLB 17; pour pt. 40 C; pH 8.5 (1%); 100% act.; nonionic
- MAKON® NP-5570** [Stepan Canada]  
*Chem. Descrip.:* Nonylphenol ethoxylate  
 CAS 9016-45-9  
*Uses:* Detergent, emulsifier used in chemical specialties, cosmetics, agric., industrial and metal cleaners, textiles, paper and petrol. industries  
*Properties:* Nonionic
- Malros®** [Eka Chems.]  
*Chem. Descrip.:* Rosin soap  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Sizing agent for internal sizing of all kinds of paper and board at low pH  
*Properties:* Liq.
- Maracarb N-1** [LignoTech USA]  
*Chem. Descrip.:* Sodium lignosulfonate  
 CAS 8061-51-6  
*Uses:* Modifier, dispersant, and humectant in dyestuff pastes; industrial cleaners; plant foliar spray; chelating agent for metal ions; slime control agent for paper mill systems  
*Properties:* Dk. brn. powd.; bulk dens. 600 kg/m<sup>3</sup>; pH 8.2 (10%); 95% dry matter; anionic
- Maranil® A 25 IS** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium n-alkyl (C<sub>10</sub>-C<sub>13</sub>) benzene sulfonate  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* For mfg. of PVC and S/B dispersions; foaming agent for syn. foams; food pkg. paper, cellophane; emulsifier in mfg. of food-contact articles; stable against acidic and basic hydrolysis; preserved  
*Regulatory:* FDA 21CFR §176.170, 177.1200, 178.3400; BGA approved  
*Properties:* Liq.; 24.5-25.5% act.; anionic
- Maranil® Paste A 55** [Cognis KGaA/Plastics Tech.]  
*Chem. Descrip.:* Sodium dodecylbenzene sulfonate  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4  
*Uses:* Base for mfg. detergents, dishwashing, cleaning agents; wetting agent; surfactant for mfg. of PVC and S/B disp.; foaming agent for syn. foams; food pkg. paper, cellophane; emulsifier in mfg. of food-contact articles; stable against acidic and basic hydrolysis  
*Regulatory:* FDA 21CFR §176.170, 177.1200, 178.3400; BGA approval  
*Properties:* Paste; 55% conc.; anionic
- Marasperse 52 CP** [LignoTech USA]  
*Chem. Descrip.:* Polymerized sodium lignosulfonate  
 CAS 8061-51-6  
*Uses:* Dispersant for disperse dyestuffs; pitch dispersant in paper mills; dispersant for cements, ceramics, oil drilling muds, pesticides, leather tanning; binder for coal briquettes, fertilizers, feed pellets; sequestrant for micro-nutrient systems, cleaning compds., water treatments for boiling and cooling systems; emulsifier for asphalt emulsions, pigments and dyes, pesticides, wax emulsions; low stain, high heat stability  
*Properties:* Brn. powd.; bulk dens. 650 kg/m<sup>3</sup>; pH 9.9 (10%); 96% dry matter; anionic
- Marlican®** [Condea Vista]  
*Chem. Descrip.:* Straight-chain dodecylbenzene  
 CAS 67774-74-7  
*Uses:* Detergent intermediate; solubilizer; sec. plasticizer; visc. reducer for PVC pastes; solvent for carbonless copy papers  
*Properties:* Liq.; 100% act.; anionic  
*Environmental:* Biodeg.
- Martinal® OL-104** [Martinswerk GmbH]  
*Chem. Descrip.:* Aluminum hydroxide  
 CAS 21645-51-2; EINECS/ELINCS 244-492-7  
*Uses:* Filler, flame retardant for polyester resins (SMC, BMC, laminates), epoxy and acrylic resins, crosslinked elastomers (conveyor belts, cables, profiles, molded parts), latexes (wall paper, carpetbacking), thermoplastic and thermoplastic elastomers (PP, PE and copolymers, EVA), PVC (plasticized, rigid, foam), aq. disp., PU castings, lacquers, elastomers, flexible and rigid foam)  
*Properties:* Powd.; 1.3-2.6 µm median particle size; dens. 2.4 g/cc; bulk dens. ≈ 320 kg/m<sup>3</sup>; surf. area 3-5 m<sup>2</sup>/g; oil absorp. 27-35 cc/100 g; brightness (TAPPI) > 94; ref. index 1.58; pH 9 ± 1; conduct. < 100 µS/cm; 99.6% act.
- Masil® EM 501** [BASF]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Provides better coating coverage, improved wetting and dilution stability in printing industry when used in heat-set, offset lithographic printing processes as a topcoat on printed paper; provides antistatic props.; eliminates excessive ink buildup; usually diluted 40:1 with water; exc. dilution stability; good freeze-thaw stability  
*Properties:* Wh. milky emulsion, very little odor; 80% < 0.3 µ particle size; misc. with water; sp. gr. ≈ 1; vapor pressure 24 mm Hg; m.p. < 32 C; b.p. 212 F; flash pt. (PMCC) > 212 F; pH 7.0; 60% solids  
*Toxicology:* Contact with skin or eyes may cause temporary irritation  
*Precaution:* Incompat. with strong oxidizing materials; thermal decomp. on exposure to air in excess of 150 C may produce carbon and silicone oxides and formaldehyde  
*Storage:* Store in well-ventilated areas @ 32-120 F
- Masil® SF-MH** [BASF]  
*Chem. Descrip.:* Methicone  
 CAS 9004-73-3  
*Uses:* Modifier for polyester and methacrylic resins; waterproofing agent and impregnating agent for textiles, paper, leather; hydrophobizing agents for powds., silicas, and other fillers; reactive fluid
- Masil® SFR 70** [BASF]  
*Chem. Descrip.:* Dimethiconol  
 CAS 31692-79-2  
*Uses:* Spreading agent and emollient in antiperspirant formulations; offers humidity resist. to hair spray formulas; raw material in compding. silicone RTV systems, textile and paper coatings; plasticizer/processing aid for silicone elastomers; hydrophobizing agent for silica; in water repellent formulations; reactive fluid  
*Properties:* Water-wh. clear liq., odorless, tasteless; visc. 55-90 cst; 92.5% min. solids
- Masil® SFR 100** [BASF]  
*Chem. Descrip.:* Dimethiconol  
 CAS 31692-79-2  
*Uses:* Spreading agent and emollient in antiperspirant formulations; offers humidity resist. to hair spray formulas; plasticizer for silicone elastomers; hydrophobizing agent for silica; in water thermoplastics, textile and paper coatings; raw material for RTV silicone systems  
*Properties:* Water-wh. clear liq., odorless, tasteless; visc. 90-150 cst; acid no. 0.05 max.
- Masil® SFR 750** [BASF]  
*Chem. Descrip.:* Dimethiconol  
 CAS 31692-79-2  
*Uses:* Spreading agent, softener, and nongreasy emollient for skin and nail care prods.; plasticizer for silicone elastomers; hydrophobizing agent for silica; in water thermoplastics, textile and paper coatings; raw material for RTV silicone systems  
*Properties:* Water-wh. clear liq., odorless, tasteless; visc. 675-825 cps

**Masil® SFR 2000 [BASF]***Chem. Descrip.:* Dimethiconol

CAS 31692-79-2

*Uses:* Spreading agent, softener, and nongreasy emollient for skin and nail care prods.; plasticizer for silicone elastomers; hydrophobizing agent for silica; in water thermoplastics, textile and paper coatings; raw material for RTV silicone systems*Properties:* Water-wh. clear liq.; odorless, tasteless; visc. 1800-2200 cps**Masil® SFR 3500 [BASF]***Chem. Descrip.:* Dimethiconol

Descrip.:* Dimethiconol

CAS 31692-79-2

*Uses:* Substantivity agent, softener, and lubricant for hair, skin, and nail care prods.; plasticizer for silicone elastomers; hydrophobizing agent in treating silica; in thermoplastics, textile and paper coatings; raw material for RTV silicone systems; very high m.w. for highest substantivity*Properties:* Water-wh. clear liq.; odorless, tasteless; visc. 45,000-55,000 cSt**Masquol® DTPA Liq. [Synthron SA]***Chem. Descrip.:* DTPA

CAS 67-43-6; EINECS/ELINCS 200-652-8

*Uses:* Sequestrant for pretreatment of mech. pulp before bleaching**Max White 5R™ [Michelman]***Uses:* Wh. coating for paper; general-purpose; resists wax gray-out; glueable; repulpable*Regulatory:* FDA compliance**Mayzo RA-60R [Mayzo]***Chem. Descrip.:* Polyethyleneimine octadecyl carbamide*Uses:* Release coating for nat. rubber adhesive pressure-sensitive tapes and labels of PP, PE, polyester, cellophane, foil, and paper; prevents delamination and tearing of the substrate*Properties:* Lt. brn. dry powd.; sol. in toluene, heptane, hexane, and Shell Cypar™; m.p. 95 C; cloud pt. < 20 C (5% in toluene)**Mayzo RA-75 [Mayzo]***Chem. Descrip.:* Polyvinyl octadecyl carbamate

CAS 36671-85-9

*Uses:* Release coating for hot-melt, acrylic adhesive pressure-sensitive tapes and labels of PP, PE, polyester, cellophane, foil, and paper; prevents delamination and tearing of the tape*Properties:* Ylsh. sol'n.; sol. in toluene, heptane, hexane, Shell Cypar™; sp.gr. 0.865; m.p. > 92 C; 25% solids in xylene**Mayzo RA-95H [Mayzo]***Chem. Descrip.:* Polyvinyl octadecyl carbamate

CAS 36671-85-9

*Uses:* Release coating for hot-melt, acrylic adhesive pressure-sensitive tapes and labels of PP, PE, polyester, cellophane, foil, and paper; prevents delamination and tearing of the substrate*Properties:* Wh. dry powd.; sol. in toluene, heptane, hexane, Shell Cypar™; m.w. 135,000; m.p. 87-93 C; cloud pt. < 25 C (5% in toluene); 99.5% min. assay*Storage:* 2 yr storage in sealed containers stored in cool, dry area**Mayzo RA-95HS [Mayzo]***Chem. Descrip.:* Polyvinyl octadecyl carbamate

CAS 36671-85-9

*Uses:* Release coating for hot-melt, acrylic adhesive pressure-sensitive tapes and labels of PP, PE, polyester, cellophane, foil, and paper; aging resist.; prevents delamination and tearing of the substrate*Properties:* Wh. dry powd.; sol. in toluene, heptane, hexane, Shell Cypar™; m.w. 420,000; m.p. 102-120 C; cloud pt. < 25 C (5% in toluene); 99.5% min. assay*Storage:* 2 yr storage in sealed containers stored in cool, dry area**Mayzo RA-100W [Mayzo]***Chem. Descrip.:* Polyethyleneimine octadecyl carbamide*Uses:* Release coating for nat. rubber, hot-melt, acrylic pressure-sensitive tapes and labels of PP, PE, polyester, cellophane, foil, and paper; prevents delamination and tearing of the substrate*Properties:* Milky wh. aq. emulsion; sp.gr. 1.1; pH 7-9; 18% solids**Mayzo RA-120W [Mayzo]***Chem. Descrip.:* Perfluoroalkyl phosphate*Uses:* Release coating for pressure-sensitive film and paper tapes and labels of PP, PE, polyester, cellophane, foil, and paper; food-contact paper/paper-board; prevents delamination and tearing of the substrate*Regulatory:* FDA 21CFR §176.170*Properties:* Milky wh. aq. emulsion; water-disp.; sp.gr. 1.1; pH 8.5; 13% solids**Mayzo RA-150W [Mayzo]***Chem. Descrip.:* Polyvinyl octadecyl carbamate aq. emulsion

CAS 36671-85-9

*Uses:* Release coating for pressure-sensitive and hot-melt pressure-sensitive tapes and labels of PP, PE, polyester, cellophane, foil, and paper; prevents delamination and tearing of the substrate*Properties:* Hazy wh. emulsion; water-disp.; sp.gr. 1.1; pH 8.5-9.0; 25% solids**Mazawet® 77 [BASF]***Chem. Descrip.:* Alkyl polyoxyalkylene ether*Uses:* Wetting agent, surfactant used in metalworking, textile processing, spray-dried detergents, emulsion polymerization, dry cleaning systems, paints, inks, hard surface cleaners, deresination of sulfite pulp*Properties:* Gardner 1 liq.; m.w. 426 avg.; sol. @ 5% in toluene, perchloroethylene, Stod., propylene glycol, water; sp.gr. 0.965; pour pt. 11 C; cloud pt. 45 C (1% aq.); flash pt. (PMCC) 340 F; pH 6.5 (3% aq.); surf. tens. 28.1 dynes/cm (0.1%); Draves wetting 4 s (0.1% aq.); 100% act.; non-ionic**Mazu® DF 204 [BASF]***Uses:* Defoamer for metalworking concs.; enzyme, amino acid, and citric acid defoamer for fermentation applics.; pharmaceutical defoamer; wet end/coating defoamer in pulp/paper processing; modest wetting chars.*Properties:* Clear liq.; water-disp.; sp.gr. 1.010; visc. 400 cps; flash pt. (PMCC) > 350 F**Mazu® DF 210SX [BASF]***Chem. Descrip.:* Silicone emulsion*Uses:* Emulsifier; defoamer for dehydrating, evaporating, abrasive slurries, metalworking, adhesives, antifreeze, hot aq. systems, water-based inks and paints, vinyl latex binders and emulsions, petrol., textiles, paper, cutting oils, fermentation processing, commercial cleaning compds., insecticides/pesticides*Properties:* Creamy wh. liq., bland odor; water-disp.; sp.gr. 1.00; dens. 8.34 lb/gal; visc. 800-2500 cps; i.b.p. 212 F; flash pt. (PMCC) > 200 F; pH 7.0; 10% silicone; nonionic*Toxicology:* Contact with skin or eyes may cause temporary irritation*Storage:* Store in well-ventilated area at 32-120 F**Mazu® DF 230SX [BASF]***Chem. Descrip.:* Silicone emulsion*Uses:* Emulsifier; defoamer for adhesive, water-based paints; soap mfg., antifreeze, hot aq. systems, insecticides, textile, paper, petrol., vinyl latex binders and emulsions, boiler water defoaming, leather finishing, metalworking, and waste treatment*Properties:* Liq.; sp.gr. 1.00; dens. 8.3 lb/gal; visc. 3000 cSt; flash pt. (PMCC) none; pH 7.0; 30% silicone; nonionic**Mazu® DF 255 [BASF]***Chem. Descrip.:* Organic defoamer*Uses:* Defoamer for institutional cleaners, metalworking formulations, effluents from industrial processing, brownstock in paper/pulp processing, latex, adhesives*Properties:* Liq.; sp.gr. 0.91; visc. 500 cps; flash pt. (PMCC) 300 F**McLube 1829 [McLube]***Chem. Descrip.:* Fluorochemical/resin mixt. aq. disp.*Uses:* Mold release coating, lubricant for rubber and plastic molding processes; release coating for paper processing equip.; antistick/antitack coating for uncured rubber (replaces mica, talc, etc.); nondusting slab dip; improved release and lubricity*Properties:* Milk-wh. thin emulsion; dens. 8.3 lb/gal; nonionic**MEA Commercial Grade [Dow]***Chem. Descrip.:* Monoethanolamine

CAS 141-43-5; EINECS/ELINCS 205-483-3

*Uses:* Used in surfactants, cosmetics/toiletries, pharmaceuticals, metalworking fluids, textile chemicals, gas conditioning chemicals, agric. intermediates, adhesives, coatings, petroleum, rubber, wood pulping, and cement

grinding aids; polymerization chain terminator

*Properties:* Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

**MEA Low Freeze Grade** [Dow]

*Chem. Descrip.:* Monoethanolamine

CAS 141-43-5; EINECS/ELINCS 205-483-3

*Uses:* Used in surfactants, cosmetics/toiletries, pharmaceuticals, metalworking fluids, textile chemicals, gas conditioning chemicals, agric. intermediates, adhesives, coatings, petroleum, rubber, wood pulping, and cement grinding aids

*Properties:* Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

**MEA Low Iron Grade** [Dow]

*Chem. Descrip.:* Monoethanolamine

CAS 141-43-5; EINECS/ELINCS 205-483-3

*Uses:* Used in surfactants, cosmetics/toiletries, pharmaceuticals, metalworking fluids, textile chemicals, gas conditioning chemicals, agric. intermediates, adhesives, coatings, petroleum, rubber, wood pulping, and cement grinding aids

*Properties:* Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

**MEA Low Iron-Low Freeze Grade** [Dow]

*Chem. Descrip.:* Monoethanolamine

CAS 141-43-5; EINECS/ELINCS 205-483-3

*Uses:* Used in surfactants, cosmetics/toiletries, pharmaceuticals, metalworking fluids, textile chemicals, gas conditioning chemicals, agric. intermediates, adhesives, coatings, petroleum, rubber, wood pulping, and cement grinding aids

*Properties:* Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

**MEA NF Grade** [Dow]

*Chem. Descrip.:* Monoethanolamine NF

CAS 141-43-5; EINECS/ELINCS 205-483-3

*Uses:* Used in surfactants, cosmetics/toiletries, pharmaceuticals, metalworking fluids, textile chemicals, gas conditioning chemicals, agric. intermediates, adhesives, coatings, petroleum, rubber, wood pulping, and cement grinding aids

*Properties:* Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

**Mearlin® Supersparks** [Engelhard]

*Chem. Descrip.:* Mica coated with titanium dioxide and/or iron oxide

*Uses:* Luster pigment for plastics, surf. coatings, and printing inks; low proportions provide a high gloss 'wet look' finish; higher concs. produce a fine sandpaper texture

*Properties:* Wh. powd.; 10-150 μ particle size; sp.gr. ≈ 3.0; bulk dens. ≈ 10 lb/ft<sup>3</sup>

**Megafil® PCC** [Specialty Mins.]

*Chem. Descrip.:* Precipitated calcium carbonate

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler, functional additive, strengthener for paper; fiber substitute; offers balance of improved dry str. props. and internal sizing; creates a uniform structure which promotes greater paper stiffness and strength

*Properties:* Prismatic crystals

**Melapur® MPH** [DSM Chem. N. Am.]

*Uses:* Flame retardant for intumescent coatings, paper, and textiles

**Melapur® WP** [DSM Chem. N. Am.]

*Uses:* Flame retardant for paper and textile applics.

**Melmac® 243-3** [Cytec Ind.]

*Chem. Descrip.:* Highly butylated melamine-formaldehyde resin in 100% aromatic naphtha solv.

*Uses:* Crosslinking agent for TS acrylic and alkyd automotive top-coat finishes and metal decorating systems; high resistivity for electrostatic spray finishes; food-contact coatings, paper/paperboard

*Regulatory:* FDA 21CFR §175.300, 176.170

*Properties:* Sp.gr. 1.02; dens. 9.6 lb/gal (solids); visc. 9-18 poises; acid no. 1 max.; flash pt. (Seta) 52 C; 62 ± 2% NV by wt.; free formaldehyde (< 0.5% max.)

*Toxicology:* May irritate eyes, nose, throat, respiratory tract; inh. may cause dizziness and/or drowsiness

*Storage:* Store up to 1 yr @ < 49 C; excessive heat may partially self-condense resin so that gel particles may form

**Melthene®-M5001** [Tosoh]

*Chem. Descrip.:* Polyolefin

*Uses:* Adhesive polymer for extrusion coating and laminating, textile, lumber, plastic, rubber, metal, formed prods., paper, packing film, etc.; exc. adhesion with most substrates; easy peel seals for plastic containers

*Properties:* Melt flow 46 g/10 min.; sp.gr. 0.95; m.p. 83 C; tens. str. 90 kgf/cm<sup>2</sup>; elong. 790%; hardness (Shore A) 84; Vicat soften. pt. 48 C

**Melthene®-M5002D** [Tosoh]

*Chem. Descrip.:* Polyolefin

*Uses:* Adhesive polymer for extrusion coating and laminating, textile, lumber, plastic, rubber, metal, formed prods., paper, packing film, etc.; exc. adhesion with most substrates; easy peel seals for plastic containers

*Properties:* Melt flow 32 g/10 min.; sp.gr. 0.94; m.p. 83 C; tens. str. 95 kgf/cm<sup>2</sup>; elong. 780%; hardness (Shore A) 85; Vicat soften. pt. 49 C

**Melthene®-M5311** [Tosoh]

*Chem. Descrip.:* Polyolefin

*Uses:* Adhesive polymer for extrusion coating and laminating, textile, lumber, plastic, rubber, metal, formed prods., paper, packing film, etc.; exc. adhesion with most substrates; easy peel seals for plastic containers

*Properties:* Melt flow 15 g/10 min.; sp.gr. 0.94; m.p. 118 C; tens. str. 100 kgf/cm<sup>2</sup>; elong. 570%; hardness (Shore A) 96; Vicat soften. pt. 71 C

**Melthene®-M5321** [Tosoh]

*Chem. Descrip.:* Polyolefin

*Uses:* Adhesive polymer for extrusion coating and laminating, textile, lumber, plastic, rubber, metal, formed prods., paper, packing film, etc.; exc. adhesion with most substrates; easy peel seals for plastic containers

*Properties:* Melt flow 7.5 g/10 min.; sp.gr. 0.95; m.p. 127 C; tens. str. 130 kgf/cm<sup>2</sup>; elong. 790%; hardness (Shore A) 92; Vicat soften. pt. 55 C

**Mergal® K 7** [Troy]

*Chem. Descrip.:* Isothiazolinones

*Uses:* In-can preservative for emulsion paints, pigment pastes, syn. color concentrates, caulks, grouts, and adhesives; food pkg. adhesives; food-contact paper/paperboard; slimicide in food-contact paper/paperboard; stable to 60 C; act. against bacteria, molds, and yeasts

*Use Level:* 0.1-0.3%

*Regulatory:* FDA 21CFR § 175.105, 176.170, 176.300 and BgVV compliant

*Properties:* Colorless clear to yel. liq.

**Mergal® K 9N** [Troy]

*Chem. Descrip.:* Isothiazolinones

*Uses:* In-can preservative for emulsion paints, sealants, caulks, grouts, and adhesives; food pkg. adhesives; food-contact paper/paperboard; slimicide in food-contact paper/paperboard; stable to 60 C; act. against bacteria, molds, and yeasts

*Use Level:* 0.1-0.3%

*Regulatory:* FDA 21CFR § 175.105, 176.170, 176.300 and BgVV compliant

*Properties:* Colorless clear to yel. liq.

**Mergal® K 10N** [Troy]

*Chem. Descrip.:* Proprietary BIT

*Uses:* In-can preservative for indoor, emission-free paints and coatings; rec. for polymer emulsions, adhesives, caulks, sealants, cement coatings, and plasters; food pkg. adhesives; food-contact paper/paperboard; slimicide in food-contact paper/paperboard; stable to 100 C; act. against bacteria; free of solvs.

*Use Level:* 0.05-0.2%

*Regulatory:* FDA 21CFR § 175.105, 176.170, 176.300 and BgVV compliant

*Properties:* Lt. to dk. brn. clear liq.

**Merpol® A** [Stepan]

*Chem. Descrip.:* Ethoxylated phosphate

*Uses:* Wetting agent, surf. tens. reducer for chemical mfg., cosmetics, metal processing, paper, petrol., inks, plastics, soaps, syn. fibers, textiles; low foaming; stable to acids, bases, heat to 100 C, freezing

*Properties:* Colorless to pale yel. liq., mild odor; sol. in polar solvs., 0.1-1% in nonpolar solvs.; disp. in water to 1%; sp.gr. 1.07 g/mL; dens. 8.9 lb/gal; visc. 104 cP; HLB 6.7; cloud pt. < 25 C (upper, 1%); flash pt. (TCC) 138 C; pH 5-7 (1% emulsion); surf. tens. 26 dynes/cm (0.1%); 100% act.; nonionic

**Merpol® HCS** [Stepan]

*Chem. Descrip.:* Alcohol ethoxylate

*Uses:* Wetting agent, detergent, emulsifier, penetrant, antistat, leveling agent, dyeing assistant, stabilizer used in textiles, leather, paper, metal processing, rubber, emulsion polymerization, paints, inks, medicinal ointments, antiperspirants, cutting oils, polishes, cosmetics; pigment dispersant

*Properties:* Lt. yel. clear, visc. liq.; mild fatty odor; 40% sol. in water, sol. in org. solvs. that are misc. with water; sp.gr. 1.03 g/mL; dens. 8.63 lb/gal; HLB 15.3; cloud pt. > 100 C (upper, 1%); flash pt. > 235 F; pH 6-8 (10%); surf. tens. 42.9 dynes/cm (0.1%); 60% act.; nonionic

**Merpol® SE [Stepan]**

*Chem. Descrip.:* Long-chain fatty alcohol ethoxylate

*Uses:* Wetting agent, rewetting agent, emulsifier, dispersant for textiles, paper, o/w emulsions, asbestos; low foaming; stable to acids, bases, heat, freezing

*Properties:* Colorless to pale yel. clear liq., mild odor; 0.1% sol. in water, cloudy disp. at higher conc.; sol. in polar solvs.; sp.gr. 0.97 g/mL; dens. 8.1 lb/gal; visc. 60 cP; HLB 10.5; cloud pt. < 25 C (upper, 1%); flash pt. (PMCC) 93 C; pH 6-8 (1% emulsion); surf. tens. 27 dynes/cm (0.1%); 95% act.; nonionic

**Merpol® SH [Stepan]**

*Chem. Descrip.:* Long-chain alcohol ethoxylate

CAS 24938-91-8

*Uses:* Detergent, wetting agent for textiles, hard surf. cleaning, paper, metal processing; stable to acids, bases, heat, freezing to 5 C

*Properties:* Colorless clear liq.; alcoholic odor; misc. with water, sol. or disp. in alcohols, acetone, MEK, ethylene glycol, glycerin, oleic acid; sp.gr. 0.96 g/mL; dens. 8.0 lb/gal; visc. 24 cps; HLB 12.8; cloud pt. 50 C (1%); flash pt. (TCC) 41 C; surf. tens. 27.4 dynes/cm (0.1 g/100 ml); pH 6-8 (10% aq.); 50% act.; nonionic

*Environmental:* Biodeg.

**Mesitol® [Bayer/Industrial Chems.]**

*Uses:* Fixing agent for anionic direct dyestuffs for paper; improves fastness to bleeding, reduces staining of effluent, and improves color retention

**Mesitol® NBS [Bayer/Industrial Chems.]**

*Uses:* Fixing agent for anionic direct dyestuffs for paper; improves fastness to bleeding, reduces staining of effluent, and improves color retention

**Metalure® L-53520 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in toluene (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 840 cps

**Metalure® L-54893 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in normal propyl acetate (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 35 cps

**Metalure® L-54894 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in isopropyl acetate (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 160 cps

**Metalure® L-54949 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in isopropyl alcohol (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 540 cps

**Metalure® L-55350 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in ethyl acetate (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 20 cps

**Metalure® L-55700 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in Ektasolve PM acetate (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 320 cps

**Metalure® L-56161 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in glycol ether PM (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 1000 cps

**Metalure® L-56716 [Avery Dennison; Eckart-Werke]**

*Chem. Descrip.:* Aluminum platelets (10%) in NBAC (87%)

*Uses:* Ultra brilliant disp. which delivers metalized appearance in solv. paints, coatings, rotogravure/flexographic/screen inks for coated paper and board, and inj. molded plastics

*Properties:* Slurry; controlled particle size; visc. 600 cps

**Metasol® 300 [Nalco]**

*Chem. Descrip.:* Sodium dimethyldithiocarbamate (15%), disodium ethylenebis-dithiocarbamate (15%), and inert ingreds. (70%)

*Uses:* Paper mill biocide used to control slime growth at wet-end; food-contact slimicide; nonfoaming, noncorrosive to equip.

*Regulatory:* FDA 21CFR §176.300 approved

*Properties:* Straw color liq.; sp.gr. 1.18; dens. 9.8 lbs/gal; pH 11.5; anionic

*Precaution:* Incompat. with quat. ammonium microbicides, acids, or other cationic compds.

**Metasol® 350 [Nalco]**

*Chem. Descrip.:* Dodecylguanidine hydrochloride

CAS 13590-97-1

UN No. 3265

*Uses:* Biocide used to control slime growth in aq. industrial papermaking systems and min. slurries; effective in control of sulfate-reducing bacteria; food-contact paper/paperboard; food-contact slimicide; most effective at higher pH values (> 7.8); nonoxidizing

*Use Level:* 1-1.5 oz. (sewage disposal lagoons); 10-1,000 ppm (pulp and papermill processing, adhesives, coatings); 0.007-0.57 lb/ton pulp or paper produced (pulp and papermill)

*Regulatory:* FDA 21CFR §176.170, 176.300; EPA reg. no. 10445-103; DOT regulated

*Toxicology:* Causes irreversible eye damage and skin irritation

*Environmental:* Toxic to fish

*Precaution:* Corrosive

*Storage:* 6 mos shelf life @ 25 C away from heat or open flame; protect from temp. extremes

**Metasol® 550 [Nalco]**

*Chem. Descrip.:* Glutaraldehyde

CAS 111-30-8; EINECS/ELINCS 203-856-5

UN No. 1760

*Uses:* Microbicide effective against bacteria and fungi present in papermaking systems; slimicide in papermaking process; does not contain formaldehyde

*Use Level:* 0.5-3.0 lbs/ton paper (initial); 0.3-2.0 lbs/ton paper (subsequent treatment)

*Regulatory:* EPA registered

*Properties:* Clear liq.; odorless; complete sol. in water; sp.gr. 1.131; dens. 9.41 lb/gal; vapor pressure 15 mm Hg (20 C); f.p. -21 C; flash pt. (TCC) none; pH 3.1-4.5; 50% act.

*Toxicology:* Causes irreversible eye damage, burns, skin sensitization; harmful if swallowed

*Environmental:* Biodeg.; toxic to fish

*Precaution:* Corrosive

*Storage:* Store @ 0-42 C; store away from heat and keep from freezing; temps. > 42 C may cause separation

**Metasol® 940 [Nalco]**

*Chem. Descrip.:* Sodium bromide (40%)

CAS 7647-15-6; EINECS/ELINCS 231-599-9

*Uses:* Microbicide that supplements conventional chlorination for control of planktonic and sessile in pulp mills and papermaking and wastewater treatment systems; removes existing biofouling; unaffected in presence of ammonia

*Use Level:* 0.004-0.047 gal/1000 gal water in system (initial); 0.001-0.047 gal/1000 gal water in system (subsequent dose)

*Regulatory:* EPA registered

*Properties:* Colorless to pale yel. clear liq.; sl. odor; sp.gr. 1.43; dens. 11.9 lb/gal; f.p. -10 F; pH 6.5-7.5 (10% aq.)

*Toxicology:* May cause eye and skin irritation; harmful if swallowed

*Storage:* Store @ > 0 F in dry, well-ventilated area

**Metasol® CB-220 [Nalco]**

*Chem. Descrip.:* Tripropylene glycol monomethyl ether (80%) and 1,2-dibromo

2,4-dicyanobutane (20% min.)

*Uses:* Silticide for controlling bacteria, fungi, and yeasts in pulp/paper mills; preservative for pigment slurries, adhesives, coatings, latex emulsions, and high visc. suspensions used in mfg. of paper and paperboard; food pkg. adhesives, paper/paperboard

*Use Level:* 0.02-0.1% (slime control); 0.05-0.75% (adhesives); 0.05-0.25% (latex emulsions); 0.05-0.125% (dispersed pigments)

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300

*Properties:* Pale to lt. amber liq.; sp.gr. 1.063 (20 C); flash pt. (Fisher TCC) 200 F

*Toxicology:* Causes eye damage and skin irritation; harmful if swallowed

*Precaution:* Corrosive

*Storage:* Keep tightly closed

**Metasol® CB-225A.D.** [Nalco]

*Chem. Descrip.:* 1,2-Dibromo 2,4-dicyanobutane (25% min.), inert ingreds. (75%)

*Uses:* Silticide for controlling bacteria, fungi, and yeasts in pulp/paper mills; preservative for pigment slurries, adhesives, coatings, latex emulsions, and high visc. suspensions used in mfg. of paper and paperboard

*Use Level:* 0.08-0.4% (slime control); 0.04-1.0% (adhesives, latex emulsions, dispersed pigments)

*Properties:* Wh. to off-wh. disp.; sp.gr. 1.1 (20C); visc. 1800-2400 cps; f.p. 0 C

*Toxicology:* Causes eye damage and skin irritation; harmful if swallowed

*Precaution:* Corrosive

*Storage:* Keep tightly closed

**Metasol® CB-225 L.C.** [Nalco]

*Chem. Descrip.:* 1,2-Dibromo 2,4-dicyanobutane (25% min.)

CAS 35691-65-7; EINECS/ELINCS 252-681-0

*Uses:* Silticide for controlling bacteria, fungi, and yeasts in pulp/paper mills; preservative for pigment slurries, adhesives, coatings, latex emulsions, and high visc. suspensions used in mfg. of paper and paperboard; food pkg. adhesives, coatings, paper/paperboard

*Use Level:* 0.08-0.4% (slime control); 0.04-1.0% (adhesives, latex emulsions, dispersed pigments)

*Regulatory:* FDA 21CFR §175.105, 176.300, 176.170, 176.180 approved

*Properties:* Pale yel. to lt. amber liq.; sp.gr. 1.106 (20 C); flash pt. > 250 F

*Toxicology:* Causes eye damage and skin irritation; harmful if swallowed

*Precaution:* Corrosive

*Storage:* Keep tightly closed @ > 50 C

**Metasol® CMI-150** [Nalco]

*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one (1.15%), 2-methyl-4-isothiazolin-3-one (0.35%), and inert ingreds. (98.5%)

*Uses:* Silticide for controlling bacteria and fungi in pulp/paper mills

*Use Level:* 0.44-1.5 lbs/ton pulp or paper produced

*Properties:* Pale yel. to grn. liq.; mild aromatic odor; sp.gr. 1.02 (20 C); dens. 8.5 lbs/gal; pH 3-5

*Precaution:* Corrosive

*Storage:* 6 mos. shelf life @ 50 C

**Metasol® RB-20** [Nalco]

*Chem. Descrip.:* Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione (21%) CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Bactericide/fungicide for controlling bacteria, fungi, and yeasts in paper mills; food pkg. adhesives, paper/paperboard

*Use Level:* 0.15-0.50 lb/ton of finished prod.

*Regulatory:* FDA 21CFR §175.105, 176.230, 176.300 approved

*Properties:* Pale amber nonvisc. liq.; sp.gr. 1.13-1.18; dens. 9.5-9.8 lb/gal; f.p. 0 F; flash pt. none

*Toxicology:* Causes severe eye burns and possible loss of vision; may burn skin; harmful or fatal if swallowed

*Environmental:* Toxic to fish

*Storage:* Store tightly closed @ < 60 C

**Metasol® T-10WB** [Nalco]

*Chem. Descrip.:* Methylene bithiocyanate (10%)

CAS 6317-18-6

*Uses:* Biocide for pulp/papermaking equip.; silticide in food-contact paper

*Use Level:* 9-90 ppm

*Regulatory:* FDA 21CFR §176.300 approved

*Properties:* Lt. grn.-yel. disp.; dens. 8.8 ± 0.2 lb/gal; visc. 1000-1400 cps; f.p. 0 C; pH 3.0 ± 0.5

*Toxicology:* Causes eye burns and skin irritation; harmful or fatal if swallowed or absorbed thru skin

*Environmental:* Toxic to fish

**Metasol® TK-100 Disp. W** [Nalco]

*Chem. Descrip.:* 2-(4-Thiazoly) benzimidazole disp. with glycol, sodium polymethacrylate, and lecithin

*Uses:* Fungicide for control of mildew on adhesive films, interior/exterior paint films, paper and paperboard prods. (for nonfood use such as soap wrappers), hard surfaces, and natural and syn. fibers such as canvas textiles and nylon carpets; thermally stable

*Use Level:* 0.05-0.3% (adhesives), 0.5-4.0 lb/100 gal (paints)

*Regulatory:* EPA reg. no. 10455-30

*Properties:* Visc. flowable liq.; sp.gr. 1.15; 50% act.

*Toxicology:* Harmful if swallowed

*Storage:* Keep container closed when not in use

**Metso Beads® 2048** [PQ]

*Chem. Descrip.:* Sodium metasilicate (anhyd.)

CAS 6834-92-0; EINECS/ELINCS 229-912-9

*Uses:* Corrosion inhibitor protecting metal surfs. and org. finishes such as paints or ceramic glazes; detergent in hard-surf. cleaners, laundry detergent, dishwasher detergents, fabricated metals cleaning, power-washing, pulp bleaching, paper deinking, desizing textiles, cleaning food processing equip.

*Regulatory:* FDA GRAS, 21CFR §184.1769a; EPA approved for treating drinking water

*Properties:* Wh. free-flowing bead; 93% between 20 and 65 mesh particle size; sol. in water; dens. 1.04 g/cm<sup>3</sup>; m.p. 1087.7 C; 51% Na<sub>2</sub>O, 47% SiO<sub>2</sub>

*Toxicology:* Strongly alkaline

*Storage:* Protect from humidity

**Metso Pentabead® 20** [PQ]

*Chem. Descrip.:* Sodium metasilicate pentahydrate

CAS 10213-79-3; EINECS/ELINCS 229-912-9

*Uses:* Corrosion inhibitor protecting metal surfs. and org. finishes such as paints or ceramic glazes; detergent in hard-surf. cleaners, laundry detergent, dishwasher detergents, fabricated metals cleaning, power-washing, pulp bleaching, paper deinking, desizing textiles, cleaning food processing equip.

*Regulatory:* FDA GRAS, 21CFR §184.1769a; EPA approved for treating drinking water

*Properties:* Free-flowing beads; 94% between 20 and 48 mesh particle size; sol. in water; dens. 0.88 g/cm<sup>3</sup>; m.p. 72.2 C; 29.3% Na<sub>2</sub>O, 28.7% SiO<sub>2</sub>, 41.3% water

*Toxicology:* Strongly alkaline

*Storage:* Protect from humidity

**Mewlon** [Unitika; British Traders & Shippers]

*Chem. Descrip.:* Polyvinyl alcohol fiber and filament

CAS 9002-89-5; EINECS/ELINCS 209-183-3

*Uses:* Reinforcing agent and binder for specialized paper and nonwovens; reinforcing agent for syn. slate, concrete; yarn and thread for specialty textiles and fabrics

**Mhoromer® AM 101** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Ethyl methacrylate

CAS 97-63-2; EINECS/ELINCS 202-597-5

*Uses:* Base material for paint, leather, paper, and textile industries; polymerization/copolymerization in bulk, emulsion, and sol'n.; dental compds.; adhesives; floor care prods.; oil additives; toner resins

*Properties:* APHA 5 max. clear liq.; esterlike odor; sol. 0.77% water in ester, 0.4% ester in water (20 C); m.w. 114.1; sp.gr. 0.912; visc. 0.63 mPa·s (20 C); vapor pressure 21.3 mbar (20 C); b.p. 118.8 C; solid. pt. < -75 C; flash pt. 17.5 C; ref. index 1.415; 99.5% min. purity; 0.04% max. acid; 0.02% max. water

*Toxicology:* LD50 (oral, rat) 14.8 g/kg; mild skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® AM 103H** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* n-Butyl methacrylate

CAS 97-88-1; EINECS/ELINCS 202-615-1

*Uses:* Used in leather, lacquer, paper, and textile industries; base material for coatings, adhesives; oil additives; dental prods.; polymerization and copolymerization in emulsion and sol'n.

*Properties:* Pt-Co 5 max. clear liq.; esterlike odor; sol. 0.51% water in ester, 0.58% ester in water (20 C); m.w. 142.2; sp.gr. 0.896; visc. 1.09 mPa·s (20 C); vapor pressure 2.7 mbar (20 C); b.p. 163.5 C; solid. pt. -75 C; flash

pt. 46 C; ref. index 1.424; 99.5% min. purity; 0.005% max. acid; 0.02% max. water

*Toxicology:* TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® AM 105H** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Isobutyl methacrylate

CAS 97-86-9; EINECS/ELINCS 202-613-0

*Uses:* Used in leather, lacquer, paper, and textile industries; base material for coatings, adhesives; oil additives; dental prods.; floor care prods.; toner resins; polymerization and copolymerization in emulsion and sol'n.

*Properties:* Pt-Co 5 max. clear liq.; esterlike odor; sol. 0.5% water in ester, 0.2% ester in water (20 C); m.w. 142.2; sp.gr. 0.888; visc. 0.9 mPa·s (20 C); vapor pressure 4 mbar (20 C); b.p. 155 C; solid. pt. -37 C; flash pt. 45.5 C; ref. index 1.420; 99.5% min. purity; 0.005% max. acid; 0.02% max. water

*Toxicology:* TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® AM 107** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* n-Hexyl methacrylate with 100 ± 10 ppm MEHQ inhibitor  
CAS 142-09-6; EINECS/ELINCS 205-521-9

*Uses:* Internal plasticizer; copolymerization in emulsion and sol'n.; oil additives; soft component in paint resins, emulsions, adhesives, textile binders, paper

*Properties:* Pt-Co 10 max. clear liq.; esterlike odor; sol. 1.67% water in ester, 0.035% ester in water (20 C); m.w. 170; sp.gr. 0.885; visc. 1.45 mPa·s (20 C); b.p. 204-210 C; solid. pt. -59 to -55 C; flash pt. 80 C; ref. index 1.432; 98% min. purity; 0.05% max. acid; 0.05% max. water

*Toxicology:* LD50 (oral, rat) 20 g/kg; thermoplastics to skin; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® AM 199** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Methacrylic acid with 200 ± 20 ppm MEHQ inhibitor  
CAS 79-41-4; EINECS/ELINCS 201-204-4

*Uses:* Polymerization/copolymerization; thermally crosslinkable paint resin; adhesion promoter; binder for textiles, paper; adhesives; floor care prods.; dental prods.; base material for other methacrylates

*Properties:* Pt-Co 25 max. clear liq.; pungent odor; misc. with water (@ > 24 C); m.w. 86.1; sp.gr. 1.015; visc. 1.38 mPa·s (20 C); vapor pressure 0.8 mbar; b.p. 161 C; solid. pt. 15.8 C; flash pt. 65 C; ref. index 1.432; 99.5% min. purity; 0.02% max. water

*Toxicology:* LD50 (oral, rat) 2.2 g/kg; severe skin irritant; caustic; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 17-25 C max.

**Mhoromer® AM 414** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* 2-Hydroxyethyl acrylate with 250 ± 50 ppm MEHQ/HQ inhibitors

CAS 818-61-1; EINECS/ELINCS 212-454-9

*Uses:* Crosslinkable paint resin; binder for textiles and paper; urethane acrylates; reactive thinners for curing by radiation; comonomer for refinishing paints; adhesion promoter for polymers

*Properties:* Pt-Co 50 max. clear liq.; esterlike sl. yel. odor; misc. with water; m.w. 116.1; sp.gr. 1.11; visc. 9 mPa·s (20 C); vapor pressure 0.1 mbar; b.p. 230 C; solid. pt. -60 C; flash pt. 104 C; ref. index 1.450; 95% min. purity; 0.02% max. water; 0.5% max. acid

*Toxicology:* LD50 (oral, rat) 650 mg/kg; severe skin irritant and sensitizer; caustic; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® AM 438** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Hydroxypropyl acrylate with 250 ± 50 ppm MEHQ inhibi-

tor

CAS 25584-83-2; EINECS/ELINCS 247-118-0

*Uses:* Crosslinkable paint resin; binder for textiles and paper; urethane acrylates; reactive thinners for curing by radiation; comonomer for refinishing paints; adhesion promoter for polymers

*Properties:* Pt-Co 30 max. clear liq.; sl. pungent odor; misc. with water; m.w. 130.1; sp.gr. 1.05; visc. 9.5 mPa·s (20 C); vapor pressure 0.1 mbar; b.p. 230 C; solid. pt. -58 C; flash pt. 96 C; ref. index 1.446; 95% min. purity; 0.02% max. water; 0.5% max. acid

*Toxicology:* LD50 (oral, rat) 250 mg/kg; severe skin irritant; caustic; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 613** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Methacrylamidopropyltrimethylammonium chloride with 600 ± 60 ppm MEHQ inhibitor (50% solids in water)

CAS 51410-72-1; EINECS/ELINCS 257-182-1

*Uses:* Flocculants; paper sizes; ion exchange resins; antistatic finishing; hydrophilic glass fibers; superabsorbents; toner polymers; thickening agents; cement additives; anticorrosives; adhesives; cosmetics

*Properties:* Pt-Co 100 max. yls. liq.; ester-like odor; m.w. 220.5; sp.gr. 1.06; visc. 5-15 cps (20 C); solid. pt. < -22.5 C; ref. index 1.427 (20 C); pH 7-8

*Toxicology:* LD50 (oral, rat) 10 g/kg; not a skin irritant; TSCA listed

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 711** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Cyclohexyl methacrylate with 50 ± 5 ppm MEHQ inhibitor  
CAS 101-43-9; EINECS/ELINCS 202-943-5

*Uses:* Used in leather, lacquer, paper, and textile industries; coatings; adhesives; oil additives; dental prods.; polymerization/copolymerization in emulsion and sol'n.; optical materials

*Properties:* Pt-Co 10 max. liq.; ester-like odor; m.w. 168.2; sp.gr. 0.968; visc. 1.9 mPa·s (20 C); b.p. 210 C; flash pt. 82.5 C; ref. index 1.459 (20 C); 98% min. purity; 0.1% water content; 0.01% max. acid

*Toxicology:* LD50 (oral, rat) > 5 g/kg; not a skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 713** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* 2-Ethylhexyl methacrylate with 50 ± 10 ppm MEHQ inhibitor

CAS 688-84-6; EINECS/ELINCS 211-708-6

*Uses:* Internal plasticizer; copolymerization in emulsion and sol'n.; used in leather, paint, paper, and textile industries; coatings; adhesives; oil additives

*Properties:* Pt-Co 10 max. clear liq.; ester-like odor; sol. 0.2% ester in water, 0.25% water in ester; m.w. 198.3; sp.gr. 0.89; visc. 2.4 mPa·s (20 C); b.p. 218 C; solid. pt. < -50 C; flash pt. 95 C; ref. index 1.439 (20 C); 98% min. purity; 0.05% water content; 0.01% max. acid

*Toxicology:* LD50 (oral, rat) > 5 g/kg; not a skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 731** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Isobornyl methacrylate with 150 ± 30 ppm MEHQ inhibitor  
CAS 7534-94-3; EINECS/ELINCS 231-403-1

*Uses:* Polymerization/copolymerization in emulsion and sol'n.; adhesives; paint resins; leather, paper, and textile industries; hydrophobic; low polymerization shrinkage

*Properties:* Pt-Co 50 max. clear colorless liq.; ester-like odor; insol. in water; m.w. 222.3; sp.gr. 0.98; visc. 8.5 mPa·s (20 C); b.p. 66 C; flash pt. 127 C; ref. index 1.477 (20 C); 98% min. purity; 0.2% max. water; 0.5% max. acid

*Toxicology:* LD50 (oral, rat) 2.4 g/kg; not a skin irritant; TSCA listed

*Precaution:* Avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 903** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* 2-Hydroxyethyl methacrylate with 200 ± 20 ppm MEHQ

inhibitor

CAS 868-77-9; EINECS/ELINCS 212-782-2

*Uses:* Crosslinkable paint resin; binder for textiles/paper adhesives; urethane methacrylates; reactive thinners; grafting of textile fibers; scale inhibitors; adhesion promoter for polymers; hydrophilic polymers; lt.-curing polymer systems; rubber modifiers; contact lenses; photopolymer plates; photore-sists

*Properties:* Pt-Co 30 max. colorless clear liq.; ester-like odor; misc. with water; m.w. 130.1; sp.gr. 1.07 (20 C); visc. 5 mPa·s (30 C); b.p. ≈ 250 C; solid. pt. < -60 C; flash pt. 101 C; ref. index 1.453 (20 C); 97% min. purity; 1.5% max. acid content; 0.10% max. water

*Toxicology:* LD50 (oral, rat) 5.6 g/kg; mild skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 905** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* 2-Hydroxyethyl methacrylate with 200 ± 20 ppm MEHQ inhibitor

CAS 868-77-9; EINECS/ELINCS 212-782-2

*Uses:* Crosslinkable paint resin; binder for textiles/paper adhesives; urethane methacrylates; reactive thinners; grafting of textile fibers; scale inhibitors; adhesion promoter for polymers; hydrophilic polymers; lt.-curing polymer systems; rubber modifiers; contact lenses; photopolymer plates; photore-sists

*Properties:* Pt-Co 30 max. colorless clear liq.; ester-like odor; misc. with water; m.w. 130.1; sp.gr. 1.07 (20 C); visc. 5 mPa·s (30 C); b.p. ≈ 250 C; solid. pt. < -60 C; flash pt. 101 C; ref. index 1.453 (20 C); 98% min. purity; 0.1% max. acid content; 0.1% max. water

*Toxicology:* LD50 (oral, rat) 5.6 g/kg; mild skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 923** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* 2-Hydroxyethyl methacrylate with 10 ± 3 ppm MEHQ inhibitor

CAS 868-77-9; EINECS/ELINCS 212-782-2

*Uses:* Crosslinkable paint resin; binder for textiles/paper adhesives; urethane methacrylates; reactive thinners; grafting of textile fibers; scale inhibitors; adhesion promoter for polymers; hydrophilic polymers; lt.-curing polymer systems; rubber modifiers; contact lenses; photopolymer plates; photore-sists

*Properties:* Pt-Co 30 max. colorless clear liq.; ester-like odor; misc. with water; m.w. 130.1; sp.gr. 1.07 (20 C); visc. 5 mPa·s (30 C); vapor pressure 0.1 mbar (20 C); b.p. ≈ 250 C; solid. pt. < -60 C; flash pt. 101 C; ref. index 1.453 (20 C); 99% min. purity; 0.05% max. acid content; 0.1% max. water

*Toxicology:* LD50 (oral, rat) 5.6 g/kg; mild skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 951** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Hydroxypropyl methacrylate with 200 ± 20 ppm MEHQ inhibitor

CAS 27813-02-1; EINECS/ELINCS 248-666-3

*Uses:* Crosslinkable paint resin; binder for textiles/paper adhesives; urethane methacrylates; reactive thinners; grafting of textile fibers; scale inhibitors; adhesion promoter for polymers; hydrophilic polymers; rubber modifiers; contact lenses; photopolymer plates; photore-sists

*Properties:* Pt-Co 30 max. colorless clear liq.; ester-like odor; sol. 10.7% ester in water, 21% water in ester; m.w. 144.2; sp.gr. 1.03 (20 C); visc. 6.2 mPa·s (30 C); vapor pressure 0.1 mbar (20 C); b.p. ≈ 240 C; solid. pt. -58 C; flash pt. 101 C; ref. 1.448 (20 C); 98% min. purity; 0.1% max. acid content; 0.1% max. water

*Toxicology:* LD50 (oral, rat) 11.2 g/kg; mild skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® BM 955** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Hydroxypropyl methacrylate with 200 ± 20 ppm MEHQ inhibitor

CAS 27813-02-1; EINECS/ELINCS 248-666-3

*Uses:* Crosslinkable paint resin; binder for textiles/paper adhesives; urethane methacrylates; reactive thinners; grafting of textile fibers; scale inhibitors; adhesion promoter for polymers; hydrophilic polymers; rubber modifiers; contact lenses; photopolymer plates; photore-sists

*Properties:* Pt-Co 30 max. colorless clear liq.; ester-like odor; sol. 10.7% ester in water, 21% water in ester; m.w. 144.2; sp.gr. 1.03 (20 C); visc. 6.2 mPa·s (30 C); vapor pressure 0.1 mbar (20 C); b.p. ≈ 240 C; solid. pt. -58 C; flash pt. 101 C; ref. 1.448 (20 C); 97% min. purity; 1.5% max. acid content; 0.1% max. water

*Toxicology:* LD50 (oral, rat) 11.2 g/kg; mild skin irritant; TSCA listed

*Precaution:* Flamm.; avoid contamination with peroxides, azo compds., heavy metal ions, tert. amines, S compds.; polymerization also induced by light

*Storage:* 6 mos shelf life @ 30 C max.

**Mhoromer® MMA** [Röhm Am.; Röhm GmbH]

*Chem. Descrip.:* Methyl methacrylate

CAS 80-62-6; EINECS/ELINCS 201-297-1

*Uses:* Polymerization/copolymerization; plastics, leather, paint, paper, and textile industries; base material for other methacrylic esters; dental prods.

*Properties:* 0.01% max. water; ≤ 0.005% acid

**MHT® 60 S** [Dow]

*Chem. Descrip.:* Magnesium hydroxide, premium grade

CAS 1309-42-8; EINECS/ELINCS 215-170-3

*Uses:* Source of magnesium ion, catalyst, or raw material for high purity magnesium compds.; fuel oil and coal additives; fertilizer; sulfite pulping; water treatment; coatings; glass and ceramics mfg.; oil well industry; rayon mfg.; uranium refining; steel industry

**MHT® 60 XS** [Dow]

*Chem. Descrip.:* Magnesium hydroxide, premium grade

CAS 1309-42-8; EINECS/ELINCS 215-170-3

*Uses:* Source of magnesium ion, catalyst, or raw material for high purity magnesium compds.; fuel oil and coal additives; fertilizer; sulfite pulping; water treatment; coatings; glass and ceramics mfg.; oil well industry; rayon mfg.; uranium refining; steel industry

**Michem® Coat 50 Series** [Michelman]

*Uses:* Water-, oil- and grease-resist. coating for paper; general purpose; cold set and hot melt glueable; repulpable

*Regulatory:* FDA compliance

**Michem® Coat 500 Series** [Michelman]

*Uses:* Water-, oil- and grease-resist. coating for paper; general purpose; matte finish; cold set and hot melt glueable; repulpable

*Regulatory:* FDA compliance

**Micral® 532** [Huber Engineered Materials]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Flame retardant, smoke suppresser, high loading filler for thermoset, thermoplastic, rubber, adhesives, paints, coatings, paper applics.; high in superfines

*Properties:* 9 μ median particle diam.; 99.9% thru 325 mesh; sp.gr. 2.42; bulk dens. 0.65 g/cc (loose); surf. area 4-5 m<sup>2</sup>/g; oil absorp. 27-29; brightness (TAPPI) 89; ref. index 1.57; hardness (Mohs) 2.5-3.5

**Micral® 916** [Huber Engineered Materials]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Smoke suppresser/flame retardant filler for wire and cable insulation, inj.-molded polyolefins, coatings, adhesives, rubber goods, paper filler and coating, PVC, EPDM, EPR, ABS, XLPE, and compr.-molded thermosets; halogen-free

*Properties:* Powd.; 0.8 μ median particle diam.; 100% through 325 mesh; sp.gr. 2.42 g/cm<sup>3</sup>; bulk dens. 0.15 g/cm<sup>3</sup> (loose), 0.35 g/cm<sup>3</sup> (packed); surf. area 13 m<sup>2</sup>/g; oil absorp. 46 ml/100 g; brightness (Photovolt) 97+

**Micral® 932** [Huber Engineered Materials]

*Chem. Descrip.:* Alumina trihydrate

*Chem. Analysis:* Al<sub>2</sub>O<sub>3</sub> (64.9%)

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Smoke suppresser/flame retardant filler for wire/cable insulation, inj.-molded polyolefins, coatings, adhesives, rubber goods, paper filler and

coating, epoxy elec. laminates, FRP elec. laminates, SMC/BMC, flexible/rigid PVC, plastisols, EPR, ABS, XLPE, and compr.-molded thermosets; halogen-free

*Properties:* Ultrafine powd.; 2  $\mu$  median particle diam.; 100% thru 325 mesh; sp.gr. 2.42; bulk dens. 0.35 g/cc (loose), 0.5 g/cc (packed); surf. area 13 m<sup>2</sup>/g; oil absorp. 38; brightness (TAPPI) 95

**Microblanc 1** [Microfill K. Zafranias]

*Chem. Descrip.:* Calcium carbonate (99%); high purity  
CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Opacifier reinforcing hiding power of paints, interior/exterior emulsion paints, powd. coatings, printing inks, paper and board coatings

*Properties:* Extremely wh. very fine rhombohedral crystals; 70% < 2  $\mu$ ; sp.gr. 2.7; bulk dens. 0.9 g/ml (packed); oil absorp. 18/100 g; dry brightness 96.5%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture

**Microblanc 2** [Microfill K. Zafranias]

*Chem. Descrip.:* Calcium carbonate (99%); high purity  
CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Opacifier reinforcing hiding power of interior/exterior emulsion paints, polymer-based plasters, oil and syn. resin systems, adhesives, sealing compds., wallpaper, plastics, paper/board adhesives

*Properties:* Extremely wh. very fine rhombohedral crystals; 25% < 2  $\mu$ ; sp.gr. 2.7; bulk dens. 1.25 g/ml (packed); oil absorp. 15/100 g; dry brightness 95.5%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture

**Microblanc 3** [Microfill K. Zafranias]

*Chem. Descrip.:* Calcium carbonate (99%); high purity  
CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Opacifier reinforcing hiding power of plastics (PVC, PU, polyester, polyolefins), emulsion paints, primers, powd. coatings, paper/board adhesives

*Properties:* Extremely wh. very fine rhombohedral crystals; 40% < 2  $\mu$ ; sp.gr. 2.7; bulk dens. 1 g/ml (packed); oil absorp. 20/100 g; dry brightness 96%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture

**Microblanc 5** [Microfill K. Zafranias]

*Chem. Descrip.:* Calcium carbonate (99%); high purity  
CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Pigment for interior/exterior emulsion paints, polymer-based plasters, oil and syn. resin systems, sealing compds., wallpaper, plastics, powd. coatings, paper/board adhesives

*Properties:* Extremely wh. very fine rhombohedral crystals; 25% < 2  $\mu$ ; sp.gr. 2.7; bulk dens. 1.25 g/ml (packed); oil absorp. 15/100 g; dry brightness 95.5%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture

**Microcat® HT** [Bioscience]

*Chem. Descrip.:* Microbial catalyst

*Uses:* Catalyst in pulp/paper and other process industries; specialized microbes for high temp. applics. (35-45 C)

*Storage:* Long shelf life

**Microcat® XP** [Bioscience]

*Chem. Descrip.:* Microbial catalyst

*Uses:* Specialized microbes and enzymes for degradation of cellulose, lignins, and other pulping and papermaking by-prods.

*Storage:* Long shelf life

**Micro-Cel® T-26** [Celite]

*Chem. Descrip.:* Calcium silicate

*Chem. Analysis:* SiO<sub>2</sub> (47%), CaO (32%), Al<sub>2</sub>O<sub>3</sub> (2.5%), NaO + K<sub>2</sub>O (1.2%)

CAS 1344-95-2; EINECS/ELINCS 215-710-8

*Uses:* Filler, absorbent, adsorbent, inert carrier, conditioner, anticaking agent, diluent, bulking agent for agric., paper/paperboard, polishes, cleaners, rubber, plastic films

*Properties:* Gray powd.; 15  $\mu$  median particle size; 3% on 325 mesh; sp.gr. 2.6; bulk dens. 5.5 lb/ft<sup>3</sup>; surf. area (BET) 90 m<sup>2</sup>/g; water absorp. 495%; oil absorp. 405%; brightness (Photovolt) 60; ref. index 1.55; pH 8.4 (10% aq. slurry)

**Micro-Cel® T-49** [Celite]

*Chem. Descrip.:* Calcium silicate

*Chem. Analysis:* SiO<sub>2</sub> (36%), CaO (33%), moisture (8%)

CAS 1344-95-2; EINECS/ELINCS 215-710-8

*Uses:* Functional filler, absorbent, inert carrier, conditioner, anticaking agent, diluent for chemical, food, cosmetics, agric., paper, rubber, plastic, and other industrial applics.; converts liqs. to dry powds.

*Properties:* Gray powd.; 13.3  $\mu$  median particle size; 10% 325 mesh residue; sp.gr. 2.1; bulk dens. 12 lb/ft<sup>3</sup>; surf. area (BET) 105 m<sup>2</sup>/g; water

absorp. 240%; oil absorp. 190%; brightness (Photovolt) 60; ref. index 1.53; pH 10 (10% aq. slurry)

**Micro Floc™** [InterBio]

*Chem. Descrip.:* Biological prod.

*Uses:* Flocculant for pulp/paper industry; improves settleability; reduces chem. polymer costs

**Microcube™ C** [Hercules]

*Chem. Descrip.:* Refined microcrystalline wax emulsion

CAS 63231-60-7; EINECS/ELINCS 264-038-1

*Uses:* Lubricant in pigmented paper coatings; enhances sheet gloss, ink gloss, and printability; food-contact paper/paperboard; optimizes runnability of the coating

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. opaque liq.; hydrocarbon odor; dens. 8.0 lb/gal; m.p. 180 F; pH 6-7; 67% total linoleic acid, 31% oleic acid; nonionic

*Storage:* Protect from freezing (breaks the emulsion)

**Microcube™ N** [Hercules]

*Chem. Descrip.:* Semirefined paraffin wax emulsion

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Improves water resist., sheet props., calender operation on surface applic. to paper and other materials; for moisture protection in wood coatings

*Properties:* Wh. opaque liq., hydrocarbon odor; dens. 8.0 lb/gal; m.p. 135 F; pH 6-7; 48% total solids; nonionic

*Storage:* Protect from freezing (breaks the emulsion)

**Micronal®** [BASF AG]

*Chem. Descrip.:* Aq microcapsule dispersions

*Uses:* For prod. of the donor face of non-carbon copying papers

**Micro Pro™ DP** [InterBio]

*Uses:* Biological degrader for cooking liquor constituents, cellulose, tall oils, soaps, paper fibers and heavy starch for use in pulp/paper and winery industries

**Microtem 95** [Microfill K. Zafranias]

*Chem. Descrip.:* Calcium carbonate (99.3%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

*Uses:* Filler for rubber, paper coatings, PVC dry blend or compounding, high quality emulsion paints

*Properties:* Microcryst. rhombohedral crystals; 65% < 2  $\mu$ ; sp.gr. 2.7; bulk dens. 0.9 g/ml (packed); oil absorp. 29/100 g; dry brightness 94%; pH 9; ref. index 1.59; hardness (Mohs) 3; < 0.2% moisture

**Microthene® FA 700-00** [EQUISTAR]

*Chem. Descrip.:* HDPE

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive for FRP composites; binder for loose particles/fibers; sintering agent in ceramics, powd. metallurgy; cosmetic filler for soaps/lotions/creams; extender in greases/lubricants; dusting agent, antiblock for rubber; textile/paper/glass/metal coatings; waterproofing heat-seal coatings for fabrics/paper; texturizer, delustering agent for inks/paints/coatings/adhesives; carrier/delivery system for pigments/oils/chems.; processing aid for PVC

*Properties:* Spherical powd.; 20  $\mu$  particle size; melt index 70 g/10 min.; sp.gr. 0.953; peak m.p. 134 C; soften. pt. (Vicat) 125 C; tens. str. 1700 psi (@ break); tens. elong. 400% (@ break); hardness (Shore D) 66

**Microthene® FA 709-00** [EQUISTAR]

*Chem. Descrip.:* HDPE

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Additive for FRP composites; binder for loose particles/fibers; sintering agent; pore former, cosmetic additive for soaps/lotions/creams; extender in grease and lubricant formulations; dusting agent for tacky pellets; dry and liq. coatings for textiles/paper/glass/metal; heat seal coatings for fabrics and paper; additive for inks/paints/coatings/adhesives; additive carrier-delivery system for pigments/oils/chems.; processing aid for PVC, polymer processes

*Properties:* Free-flowing powd.; 20  $\mu$  particle size; sp.gr. 0.953; melt index 70 g/10 min.; peak m.p. 134 C; soften. pt. (Vicat) 125 C; tens. str. 1700 psi (@ break); elong. 400% (@ break); hardness (Shore D) 66

**Microthene® FE 532-00** [EQUISTAR]

*Chem. Descrip.:* EVA copolymer (9% VA)

CAS 24937-78-8

*Uses:* Additive for FRP composites; binder for loose particles/fibers; sintering agent in ceramics, powd. metallurgy; cosmetic filler for soaps/lotions/creams; extender in greases/lubricants; dusting agent, antiblock for rubber; food pkg.; textile/paper/glass/metal coatings; waterproofing heat-seal coatings for fabrics/paper; texturizer, delustering agent for inks/paints/coatings/adhesives;

- carrier/delivery system for pigments/oils/chems.; processing aid for PVC  
*Regulatory:* FDA 21CFR §177.1520 compliant  
*Properties:* Spherical powd.; 20 µ particle size; melt index 9 g/10 min; dens. 0.926 g/cm<sup>3</sup>; peak m.p. 96 C; soften. pt. (Vicat) 75 C; tens. str. 1700 psi (@ break); tens. elong. 675% (@ break); hardness (Shore D) 38
- Microthene® FN 500-00** [Equistar]  
*Chem. Descrip.:* LDPE  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Additive for FRP composites; binder for loose particles/fibers; sintering agent in ceramics, powd. metallurgy; cosmetic filler for soaps/lotions/creams; extender in greases/lubricants; dusting agent, antiblock for rubber; food pkg.; textile/paper/glass/metal coatings; waterproofing heat-seal coatings for fabrics/paper; texturizer, delustering agent for inks/paints/coatings/adhesives; carrier/delivery system for pigments/oils/chems.; processing aid for PVC  
*Regulatory:* FDA 21CFR §177.1520 compliant  
*Properties:* Spherical powd.; 20 µ particle size; melt index 22 g/10 min; dens. 0.915 g/cm<sup>3</sup>; peak m.p. 104 C; soften. pt. (Vicat) 83 C; tens. str. 1600 psi (@ break); tens. elong. 550% (@ break); hardness (Shore D) 52
- Microthene® FN 502-18** [Equistar]  
*Chem. Descrip.:* LDPE  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Additive for FRP composites; binder for loose particles/fibers; sintering agent in ceramics, powd. metallurgy; cosmetic additive for soaps/lotions/creams; extender in greases/lubricants; dusting agent for tacky pellets; food pkg.; coatings for textiles/paper/glass/metal; waterproofing heat seal coatings for fabrics and paper; additive for inks/paints/coatings/adhesives; additive carrier-delivery system for pigments/oils/chems.; processing aid for PVC; mold release agent  
*Regulatory:* FDA 21CFR §177.1520 compliant  
*Properties:* Free-flowing microfine spherical powd.; 20 µ particle size; melt index 70 g/10 min.; sp.gr. 0.912; bulk dens. 25-30 lb/ft<sup>3</sup>; peak m.p. 102 C; soften. pt. (Vicat) 78 C; tens. str. 1000 psi (@ break); elong. 200% (@ break); hardness (Shore D) 51; < 0.1% moisture

- Microtrol 210** [Process Chems. LLC]  
*Chem. Descrip.:* Methylene bithiocyanate  
 CAS 6317-18-6  
*Uses:* Biocide for pulp/paper
- Microtrol 215** [Process Chems. LLC]  
*Chem. Descrip.:* Isothiazoline  
*Uses:* Biocide for pulp/paper
- Microtrol 230** [Process Chems. LLC]  
*Chem. Descrip.:* Carbamate  
*Uses:* Biocide for pulp/paper
- Micro-White® 10 Slurry** [IMERY'S]  
*Chem. Descrip.:* Calcium carbonate  
 CAS 1317-65-3  
*Uses:* Pigment, filler, reinforcing agent in coatings, paper, paints, polymers, food, caulks, etc.; ultrafine; exc. optical props.; low visc., low adhesive demand; good retention as filler  
*Properties:* Slurry, odorless; negligible sol. in water; sp.gr. 2.71; dens. 15.87 lb/gal; visc. 250 cps; surf. area 8 m<sup>2</sup>/g; pH 9-10; nonflamm.; 75% solids  
*Precaution:* Incompat. with acids
- Micro-White® 25 Slurry** [IMERY'S]  
*Chem. Descrip.:* Calcium carbonate

CAS 1317-65-3

*Uses:* Filler pigment, reinforcing agent for paper, paints, polymers, food, caulks, matte or dull coatings; med.-fine wet-ground*Properties:* Slurry, odorless; negligible sol. in water; sp.gr. 2.71; dens. 15.32 lb/gal; visc. 500 cps; surf. area 3.5 m<sup>2</sup>/g; pH 9-10; nonflamm.; 72% solids*Precaution:* Incompat. with acids**Micro-White® Superamide [IMERYs]***Chem. Descrip.:* Calcium carbonate

CAS 1317-65-3

*Uses:* Pigment, opacifier, and gloss aid in paints, coatings, paper; improved physical props. and surf. gloss in plastics and elastomers; extra fine ground*Properties:* Slurry; 1 μ mean particle size; oil absorp. 19-21**Miglo™ [Ciba Spec. Chems./Paper]***Uses:* Chroma value enhancer for paper coloration**Milldride® ODSA [Milliken]***Chem. Descrip.:* Octadecenyl succinic anhydride

CAS 19024-74-9

*Uses:* Curing agent for epoxy resins; corrosion inhibitor for nonaq. lubricating oils; intermediate for prep. of alkyl or unsat. polyester resins; intermediate in chem. reactions; detergent dispersant for lubricating oil; detergent builder; pour pt. depressant, visc. index improver; paper sizing; water repellent compositions*Properties:* Yel.-wh. waxy solid; m.w. 350; sp.gr. 0.9428; visc. 175-250 SUS (210 F); b.p. 251 C (4 mm Hg); solid. pt. 69 C; sapon. no. 320; flash pt. 210 C*Storage:* Avoid moisture during storage; undergoes slow hydrolysis to form corresponding alkenylsuccinic acid**Mill White 5™ [Michelman]***Uses:* Wh. coating for paper; economy-grade; general-purpose; glueable; repulpable*Regulatory:* FDA compliance**Miraclipse™ [Engelhard]***Chem. Descrip.:* Kaolin-based*Uses:* Pigment for papermaking; provides high gloss and runnability while maintaining opacity and other critical sheet parameters**Mirafilm™ [Engelhard]***Chem. Descrip.:* Kaolin-based*Uses:* Pigment, gloss aid for papermaking; promotes exc. runnability for size press operations**Miragloss™ [Engelhard]***Chem. Descrip.:* Hydrous kaolin-based pigments*Uses:* Pigment for papermaking; high solids, high runnability; five grades with props. ranging from high gloss to high brightness**Miramine® CC [Rhodia HPCI]***Chem. Descrip.:* Cocoyl hydroxyethyl imidazoline

CAS 61791-38-6; EINECS/ELINCS 263-170-7

*Uses:* Emulsifier, corrosion inhibitor, softener, antistat for textiles, asphalt, plastics, petrol. industry, cutting oils; water repellent treatment of cement, concrete, and plaster; antifungal agent for wood; tar emulsion breaker; slime control additive in paperboard**Mistofil® [Luzenac Am.]***Chem. Descrip.:* Talc

CAS 14807-96-6; EINECS/ELINCS 238-877-9

*Uses:* Filler for paper applics.**Mistron® 100 [Luzenac Am.]***Chem. Descrip.:* Microcryst. platy talc

CAS 14807-96-6; EINECS/ELINCS 238-877-9

*Uses:* Detackifier for control of pitch, stickies, other contaminants in pulp/paper mills*Properties:* Powd. or compacted; surf. area 13 m<sup>2</sup>/g; brightness (GE) 80**Mistron® 102 [Luzenac Am.]***Chem. Descrip.:* Microcryst. platy talc

CAS 14807-96-6; EINECS/ELINCS 238-877-9

*Uses:* Detackifier for control of pitch, stickies, other contaminants in pulp/paper mills*Properties:* Compacted; surf. area 13 m<sup>2</sup>/g; brightness (GE) 75**Mistron® Slurry [Luzenac Am.]***Chem. Descrip.:* Talc

CAS 14807-96-6; EINECS/ELINCS 238-877-9

*Uses:* Detackifier for pitch and stickies control in all types of pulp/paper mills*Properties:* High solids slurry; surf. area 13 m<sup>2</sup>/g; TAPPI brightness 79**Mistron® Vapor [Luzenac Am.]***Chem. Descrip.:* Talc

CAS 14807-96-6; EINECS/ELINCS 238-877-9

*Uses:* Reinforcing pigment in rubber industry (extruded profiles, cable, proofed goods, complex molded shapes for all elastomers, foam and sponge nucleation); pitch control agent in pulp/paper industry; provides higher extrusion rates, good hot and grn. str., good elec. props., impermeability, fuel swell resist. in rubber*Properties:* Wh. soft ultra-fine platy powd.; 1.7 μ median particle size; sp.gr. 2.75; dens. 20 lb/ft<sup>3</sup> (tapped); surf. area 18 m<sup>2</sup>/g; brightness (GE) 85*Toxicology:* Nontoxic**Modacure® Resin [Solutia]***Chem. Descrip.:* Methylated melamine-formaldehyde modified styrene allyl alcohol resin in ethanol

UN No. 1866

*Uses:* Curing additive for thermoplastic and thermoset coating systems (appliances, automotive, metal furniture, wood furniture, paper, film, foil and container coatings); imparts improved low temperature catalyzed cure response, faster catalyzed cure response, better chemical, water and stain resistance*Regulatory:* DOT regulated; SARA §302, 313 reportable*Properties:* APHA 200 max. color; sharp formaldehyde and solv. odor; sol. in alcohols, ketones, and aromatic hydrocarbons; dens. 8.35-8.65 lb/gal; visc. (Gardner-Holdt) V-Z; flash pt. (PMCC) 19 C; 75-79% solids*Toxicology:* Eye, skin, and respiratory tract irritant; may cause allergic skin reaction; inh. cause coughing, chest tightness, runny nose, chest pain, and burning; ing. no more than sl. toxic; potential cancer hazard; TSCA listed*Precaution:* Flamm. liq. and vapor*Hazardous Decomp. Prods.:* Decomp. may produce formaldehyde, methanol, nitrogenous prods., and CO*Storage:* Keep closed and away from heat, sparks, and open flame**Modaflow® 2100 [Solutia]***Chem. Descrip.:* Ethyl acrylate/2-ethylhexyl acrylate copolymer

CAS 26376-86-3

*Uses:* Flow modifier improving leveling, eliminating craters and fisheyes, reducing pinholes, enhancing substrate wetting in automotive topcoats and high-solids systems; also suitable for coil, wood, water-borne, and conventional solids coatings, and inks; pigment disp. aid; provides high gloss; food pkg. adhesives, paper; compat. with polyester, acrylic, melamine, urethane, and other liq. coating systems*Use Level:* 0.1-2.0% on total resin solids*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; DOT nonregulated; SARA §302 and 313 nonreportable*Properties:* Gardner 2 max. pale yel. low-visc. liq.; odorless; sol. in butyl acetate, butyl alcohol, hexane, MEK, MIBK, propanol, IPA, toluene, xylene; insol. in water; sp.gr. 0.97-1.01; visc. 4000-12,000 cps; flash pt. (PMCC) 137 C; ref. index 1.465-1.466; 100% act.*Toxicology:* May sl. irritate skin and eyes; TSCA listed*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, smoke, and soot*Storage:* 3 yr shelf life stored @ 4-38 C; keep away from sparks and flame**Modaflow® Powder 2000 [Solutia]***Chem. Descrip.:* Ethyl acrylate/2-ethylhexyl acrylate copolymer (65%), amorphous silica (35%)*Uses:* Flow modifier, pigment dispersant for control of surf. cratering and orange peel defects in thermoset powd. coatings; food pkg. adhesives, paper; contains no silicone*Use Level:* 0.35-2.0 phr*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180; DOT nonregulated; SARA §302,313 nonreportable*Properties:* Wh. free-flowing powd.; sl. char. odor; bulk dens. 0.58-0.64 g/cc; flash pt. 179 C; 65% min. act.*Toxicology:* Nonirritating to skin and eyes; TSCA listed*Precaution:* Combustible*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>*Storage:* 3 yr shelf life stored @ 4-38 C; keep away from sparks and flame**Modaflow® Powder III [Solutia]***Chem. Descrip.:* Ethyl acrylate/2-ethylhexyl acrylate copolymer (60-75%), hydrated amorphous silica (30-40%)*Uses:* Flow modifier, leveling agent, substrate wetting agent for control of pinholes, fisheyes, craters, orange peel in thermoset powd. coatings, epoxy-containing powd. coatings, polyester, acrylic urethane, polyester urethane systems; food pkg. adhesives, coatings, paper; enhanced initial adhesion; contains no silicone

- Use Level:* 0.35-2.0 phr  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180; DOT non-regulated; SARA §302.313 nonreportable  
*Properties:* Wh. very fine free-flowing powd.; sl. char. odor; emulsifiable in water; bulk dens. 0.58-0.64 g/cc; vapor pressure < 0.1 mm Hg; flash pt. (COC) 179.4 C; 65% min. act.  
*Toxicology:* Practically nonirritating to skin and eyes; TSCA listed  
*Precaution:* Combustible  
*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>  
*Storage:* 3 yr shelf life stored @ 4-38 C; keep away from sparks and flame
- Modaflow® Resin** [Solutia]  
*Chem. Descrip.:* Ethyl acrylate/2-ethylhexyl acrylate copolymer (≈ 100%)  
*Uses:* Flow modifier, leveling agent eliminating craters and fisheyes, reducing pinholes, enhancing substrate wetting in wood and general industrial coatings, auto topcoat, coil, conventional-, high-solids, and water-borne coatings, inks; pigment dispersant provides high gloss, air release; food pkg. adhesives, coatings, paper; compat. with epoxy, melamine, polyester, alkyd, acrylic, phenolic, urethane, etc.  
*Use Level:* 0.1-2.0% on total resin solids  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180; DOT non-regulated; SARA §313 nonreportable  
*Properties:* Gardner 3 max. pale yel. visc. liq.; odorless; tyl acetate, butyl alcohol, hexane, MEK, MIBK, propanol, IPA, toluene, xylene; insol. in water; sp.gr. 0.99-1.03; visc. 60,000-160,000 cps; b.p. 205 C (10 mm Hg); flash pt. (PMCC) 137 C; ref. index 1.465-1.467; 100% act.  
*Toxicology:* LD50 (oral, rat) > 7940 mg/kg, (skin, rabbit) > 7940 mg/kg; LC50 (inh., rat, 6 h) > 1.4 mg/m<sup>3</sup>; possibly sl. irritating to skin and eyes; sl. toxic if ing.; TSCA listed  
*Environmental:* LC50 (bluegill sunfish, 96 h) > 1000 mg/l, (rainbow trout, 96 h) > 1000 mg/l; practically nontoxic  
*Hazardous Decomp. Prods.:* Decomp. produces CO, CO<sub>2</sub>, smoke, and soot  
*Storage:* 3 yr shelf life stored @ 4-38 C; keep away from sparks and flame
- Modarez® WR** [Synthron SA]  
*Uses:* Water retention aid for paper sticking and coating applics.
- Modical® S** [Cognis/Coatings & Inks]  
*Chem. Descrip.:* Sulfated fatty acid  
*Uses:* Stabilizer for natural and syn. latexes during rubber compding., storage, and applic; stabilizer for printing inks, adhesives, waterborne architectural coatings; food pkg. adhesives; defoamer in food-contact paper coatings; ensures mechanical and chemical stability; prevents premature coagulation during high-speed agitation, acidification, or pigmentation  
*Use Level:* 0.25-1.0% on total wt.  
*Regulatory:* FDA 21CFR §175.105, 176.200  
*Properties:* Dk. reddish-brn. liq.; fatty odor; sol. in water and sol. alcohols; hazy sol'n. in 4% sodium hydroxide, in toluol, and in min. and veg. oils; sp.gr. 1.1; dens. 9.2 lb/gal; visc. 800 cps; pH 7.5 (2%); VOC 2.2% (EPA Method 24); 55% act., 45% water; anionic
- Mogul® L** [Cabot/Special Blacks]  
*Chem. Descrip.:* Carbon black, aftertreated  
 CAS 1333-86-4; EINECS/ELINCS 215-609-9  
*Uses:* Colorant, UV stabilizer for elec. resistivity in plastics, optimum flow in offset inks, carbon paper, and ribbons; good for dry toners  
*Properties:* Fluffy; 24 nm particle size; dens. 15 lb/ft<sup>3</sup>; surf. area 138 m<sup>2</sup>/g; pH 2.5-4.0; 5.0% volatile
- Monafax 1214** [Uniqema]  
*Chem. Descrip.:* Deceth-4 phosphate  
 CAS 52019-36-0  
*Uses:* Surfactant, surf. tens. reducer, wetting agent for mildew removers, tile cleaners, bowl cleaner, tire cleaners, bleaching of paper pulp and textiles, dairy cleaners, hard surf. cleaners; hydrotrope, detergent, wetting agent for lt. to mod. duty alkaline systems; hypochlorite-stable  
*Properties:* Amber clear visc. liq.; sol. @ 10% in water, ethanol, perchlorethylene, ethylene glycol butyl ether; disp. in min. oil, xylene; sp.gr. 1.22; dens. 10.1 lb/gal; acid no. 238 (pH 5); pH 2.0 (10%); 100% act.; anionic
- Monafax 1293** [Uniqema]  
*Chem. Descrip.:* Org. phosphate ester  
*Uses:* Detergent, wetting agent, hydrotrope, coupling agent for nonionics and other detergents which are only slightly sol. in high electrolyte concs.; surfactant, wetting agent, antistat, dispersant for household and industrial hard surf. detergents, metal cleaners, agric., textile, paper/pulp, dry cleaning, emulsion polymerization; agric. adjuvant for pesticides, fertilizers  
*Properties:* Gardner 3 clear liq.; sol. in water, ethanol, trichlorethylene, kero-

sene, toluene, hexane; disp. in min. oil, min. spirits; sp.gr. 1.07; dens. 8.9 lb/gal; acid no. 111 (@ pH 4.5), 185 (@ pH 9.4); pH < 2 (10%); 98% act.; anionic

*Environmental:* Biodeg.

**Monawet MB-45** [Uniqema]

*Chem. Descrip.:* Diisobutyl sodium sulfosuccinate  
 CAS 127-39-9; EINECS/ELINCS 204-839-5

*Uses:* Wetting agent, dispersant, emulsifier, penetrant, and solubilizer in emulsion polymerization of S/B for rug backing, paper coating, water treatment; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA §178.3400; EPA compliance

*Properties:* APHA 25 clear colorless liq.; sol. in water, fairly sol. in polar and nonpolar solvs.; m.w. 332; sp.gr. 1.12; dens. 9.3 lb/gal; cloud pt. 13 C; flash pt. 215 F (PMCC); surf. tens. 54 dynes/cm (0.1%); pH 6.0 (10%); Ross-Miles foam 30 mm (0.1%); 45% act. in water; anionic

**Monawet MM-80** [Uniqema]

*Chem. Descrip.:* Dihexyl sodium sulfosuccinate, 15% water, 5% IPA

*Uses:* Wetting agent, detergent for emulsion and suspension polymerization, rug backing, paper coating, textiles, paint, agric., cosmetic, detergent, mining, water treatment, electroplating baths, and food industries; emulsifier in mfg. of food-contact articles; food pkg. adhesives, paper, closures with sealing gaskets for food containers; electrolyte tolerant; suitable for styrene, S/B, acrylonitrile/vinyl chloride systems

*Regulatory:* FDA §175.105, 176.170, 177.1210, 178.3400; EPA compliance

*Properties:* Colorless clear liq.; sol. 33 g/100 g water, in polar and nonpolar solvs.; m.w. 388; sp.gr. 1.10; dens. 9.2 lb/gal; cloud pt. < 0 C; flash pt. (PMCC) 110 F; pH 6 ± 1 (10%); surf. tens. 46 dynes/cm (0.1%); Ross-Miles foam 60 mm (0.1%); 80% act.; anionic

*Toxicology:* Not a primary skin irritant

**Monawet MO-70** [Uniqema]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, 20% water, 10% diethylene glycol butyl ether

*Uses:* Wetting agent, dispersant, emulsifier, penetrant, and solubilizer in emulsion and suspension polymerization of vinyl acetate for adhesives, paints, textile, fertilizer, mining, water treatment, fire fighting, cosmetic, food industries; food pkg. adhesives, coatings, paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA §175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3400; EPA compliance

*Properties:* Colorless clear liq.; sol. in polar and nonpolar solvs.; m.w. 444; sp.gr. 1.08; dens. 9.0 lb/gal; cloud pt. < -5 C; flash pt. (PMCC) 325 F; pH 6.0 (10%); surf. tens. 29 dynes/cm (0.1%); Ross-Miles foam 225 mm (0.1%); 70% act.; anionic

**Monawet MO-70E** [Uniqema]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, 19% water, 11% ethanol

*Uses:* Wetting agent for industrial applics., emulsion polymerization of VA, adhesives, paints, textiles, agric., cosmetics, glass cleaners, mining, water treatment, wall paper removal, food pkg. plants; food pkg. adhesives, coatings, paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA §175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3400; EPA compliance

*Properties:* Colorless clear liq.; sol. in polar and nonpolar solvs.; m.w. 444; sp.gr. 1.08; dens. 9.0 lb/gal; cloud pt. < -5 C; flash pt. (PMCC) 82 F; pH 6.0 (10%); surf. tens. 29 dynes/cm (0.1%); Ross-Miles foam 220 mm (0.1%); 70% act.; anionic

**Monawet MO-70R** [Uniqema]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, 15% water, 15% propylene glycol

*Uses:* Wetting agent, dispersant, emulsifier, penetrant, and solubilizer for textiles, printing, agric., paints, mining, water treatment, fire fighting, cosmetics, food industries; food pkg. adhesives, coatings, paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA §175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3400; EPA compliance

*Properties:* Colorless clear liq.; sol. in polar and nonpolar solvs.; m.w. 444; sp.gr. 1.06; dens. 8.8 lb/gal; cloud pt. < -5 C; flash pt. (PMCC) 280 F; pH 6.0 (10%); surf. tens. 29 dynes/cm (0.1%); Ross-Miles foam 210 mm (0.1%); 70% act.; anionic

**Monawet MO-70S** [Uniqema]

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, 30% odorless mineral spirits

*Uses:* Wetting agent for dry cleaning soaps, spotting compds; wetting agent and emulsifier for agric., paints, mining, water treatment, cosmetics; food pkg. adhesives, coatings, paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA §175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3400; EPA compliance

*Properties:* APHA 25 clear liq.; oil and solv. sol.; sp.gr. 1.08; dens. 9.0 lb/gal; pH 5.5 (10%); Ross-Miles foam 190 mm (0.1%); 70% conc.; anionic

**Monawet MO-75E [Uniqema]**

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, 18% water, 7% ethanol  
*Uses:* Wetting agent for industrial, agric., paints, mining, water treatment, cosmetics; food pkg. adhesives, coatings, paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA §175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3400; EPA compliance

*Properties:* Colorless clear liq.; sol. in polar and nonpolar solvs.; m.w. 444; sp.gr. 1.08; dens. 9.0 lb/gal; cloud pt. < -5 C; flash pt. (PMCC) 80 F; pH 6.0 (10%); surf. tens. 29 dynes/cm (0.1%); Ross-Miles foam 220 mm (0.1%); 75% act.; anionic

**Monawet MO-84R2W [Uniqema]**

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, 16% propylene glycol

*Uses:* Wetting agent for general use, agric., paints, mining, water treatment, cosmetics; food pkg. adhesives, coatings, paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA §175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3400; EPA compliance

*Properties:* Lt. yel. clear visc. liq.; m.w. 444; sol. in polar and nonpolar solvs.; sp.gr. 1.10; dens. 9.16 lb/gal; b.p. 298 F; cloud pt. < -10 C; flash pt. (PMCC) 223 F; pH 5.5 (10%); surf. tens. 29 dynes/cm (0.1%); Ross-Miles foam 190 mm (0.1%); 84% act.; anionic

*Toxicology:* Severe eye and skin irritant on overexposure

**Monawet MO-85P [Uniqema]**

*Chem. Descrip.:* Dioctyl sodium sulfosuccinate, 15% sodium benzoate

*Uses:* Wetting for wettable powds., pigments, paints, mining, water treatment, cosmetics; food pkg. adhesives, coatings, paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA §175.105, 175.300, 175.320, 176.170, 176.210, 177.1200, 177.2800, 178.3400; EPA compliance

*Properties:* Wh. fine powd.; 0.85% sol. in water; pH 5.5 (10%); surf. tens. 26 dynes/cm (0.1%); Ross-Miles foam 200 mm (0.1%); 85% act.; anionic

**Monawet MT-70 [Uniqema]**

*Chem. Descrip.:* Ditridecyl sodium sulfosuccinate, 12% water, 18% hexylene glycol

*Uses:* Wetting agent, dispersant, emulsifier, penetrant, and solubilizer in emulsion and suspension polymerization of vinyl chloride and styrene for paints, coatings, indirect food additives; food-contact paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA §176.180, 178.3400 compliances

*Properties:* Lt. straw clear liq.; sol. in polar and nonpolar solvs.; m.w. 584; sp.gr. 1.02; dens. 8.5 lb/gal; cloud pt. -2 C; flash pt. (PMCC) 230 F; pH 6.0 (10%); surf. tens. 29 dynes/cm (0.1%); 70% act.; anionic

**Monawet MT-80H2W [Uniqema]**

*Chem. Descrip.:* Ditridecyl sodium sulfosuccinate, 20% hexylene glycol

*Uses:* Wetting agent, dispersant, emulsifier, penetrant, and solubilizer in printing inks; indirect food additive; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.180; EPA compliance

*Properties:* Lt. yel. clear liq.; m.w. 584; sol. in polar and nonpolar solvs.; sp.gr. 1.02; dens. 8.5 lb/gal; cloud pt. < 0 C; flash pt. (PMCC) 225 F; pH 5.5 (10%); surf. tens. 29 dynes/cm (0.1%); 80% act.; anionic

**Monawet SNO-35 [Uniqema]**

*Chem. Descrip.:* Tetrasodium dicarboxyethyl stearyl sulfosuccinamate  
CAS 3401-73-8; EINECS/ELINCS 222-273-7

*Uses:* Wetting agent, solubilizer, emulsifier, dispersant, visc. depressant, mild detergent used in emulsion polymerization of styrene for paints, coatings, textiles, cosmetics, agric. prods.; food pkg. adhesives, paper; emulsifier in mfg. of food-contact articles

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 178.3400; EPA compliance

*Properties:* Lt. amber clear liq.; m.w. 653; sol. in water, high electrolyte salt

sol'ns.; sp.gr. 1.14; dens. 9.5 lb/gal; visc. 16-18 s (#2 Zahn cup); f.p. 45 ± 5 F; acid no. 2.0; iodine no. 0.5; pH 7.5; surf. tens. 43 dynes/cm (0.1%); Draves wetting 232 s (0.25%, 30 C); Ross-Miles foam 185 mm (0.1%); 35% solids; anionic

*Toxicology:* Very low acute oral toxicity; mild eye irritant

*Environmental:* Biodeg.

**Monex® [Uniroyal]**

*Chem. Descrip.:* Tetramethylthiuram monosulfide

CAS 97-74-5

*Uses:* Accelerator for CR, IIR, NR, NBR, SBR, latexes, tire tread, wire insulation, druggist sundries, mech. goods, sponge, footwear; retarder in CR; activator for thiazoles; food pkg. adhesives; defoamer in food-contact paper coatings; delayed action; nondiscoloring, nonstaining; may be used as primary or sec. accelerator with aldehyde amines or guanidines; disperses readily, but masterbatching rec.

*Regulatory:* FDA 21CFR §175.105, 176.200

*Properties:* Yel. nuggets; sp.gr. 1.40; m.p. 104-107 C

*Toxicology:* Repeated minimal contact with skin may cause sensitization; exposure can produce adverse reaction when alcohol is consumed; can affect activity of certain prescription drugs

*Storage:* Exc. storage stability

**Monostearyl Citrate (MSC) [Morflex]**

*Chem. Descrip.:* Monostearyl citrate

CAS 1337-33-3; EINECS/ELINCS 215-654-4

*Uses:* Chelating agent; stabilizer for oils; sequestrant in food and feed applics.; plasticizer or component in food pkg. coatings, paper, closures with sealing gaskets for food containers; in surf. lubricants for mfg. of food-contact metallic articles; synergistic with antioxidants

*Regulatory:* FDA 21CFR §175.300, 175.380, 175.390, 176.170, 177.1210, 178.3910, 181.27, 182.685, 582.6851

*Properties:* Waxy solid; sol. ≈ 1% in olive oil, safflower oil, corn oil, peanut oil, veg. oil; sp.gr. 0.92 (85 C); m.p. 47 C min.; sapon. no. 140-170; neutral. no. 100-125; flash pt. (COC) > 400 F

**Morcryl® 535 [Rohm & Haas]**

*Chem. Descrip.:* Water-based resin sol'n. of Morez 500

*Uses:* Solvent, extender, gloss aid, rewetting agent, pigment dispersant for inks, coatings, overprints, food pkg. adhesives, paper; improves holdout; solv.-free; no VOC

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* Sl. yel. clear liq.; m.w. 3000-5000; dens. 8.8 lb/gal; visc. 2000 cps; acid no. 230; pH 8.5; 0% VOC; 34% solids

**Morez® 500 [Rohm & Haas]**

*Chem. Descrip.:* Water-based polymer resin

*Uses:* Extender, rewetting agent, gloss aid, pigment dispersant for inks, coatings, overprints, food pkg. adhesives, paper; low foam; environmentally safe; solv.-free; no VOC

*Use Level:* 57% (gravure ink)

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180 compliant

*Properties:* Sl. yel. clear solid; m.w. 3000-5000; acid no. 230; pH 8.5; 0% VOC; 100% solids

**Morflex® 190 [Morflex]**

*Chem. Descrip.:* > 90% n-Butyl phthalyl-n-butyl glycolate, < 10% dibutyl phthalate

*Uses:* Vinyl plasticizer in food pkg. coatings/paper, PVC tubing, dental cushions, food-contact resinous/polymeric coatings, food-contact zinc-silicon dioxide matrix coatings

*Regulatory:* FDA 21CFR §175.300, 175.320, 175.380, 175.390, 176.170, 177.1210, 181.27

*Properties:* APHA 50 max. clear liq.; mild, characteristic odor; negligible sol. in water; m.w. 336; sp.gr. 1.095-1.105; dens. 9.16 lb/gal; vapor pressure 3.9 mm Hg (200 C); b.p. 22 C (10 mm Hg); flash pt. (COC) 390 F; ref. index 1.487-1.491; 0.15% max. moisture

*Toxicology:* LD50 (oral, rat) 7 g/kg, (butyl phthalyl butyl glycolate); ACGIH TLV 5 mg/m<sup>3</sup> (dibutyl phthalate); avoid breathing vapors or mist

*Precaution:* Incompat. with water and oxidizing materials; hydrolyzes slowly; combustion will produce CO, CO<sub>2</sub>

*Storage:* Store in well ventilated area in tightly closed containers; protect from moisture

**Morflex® 1129 [Morflex]**

*Chem. Descrip.:* Dimethyl isophthalate

- CAS 1459-93-4; EINECS/ELINCS 215-951-9  
*Uses:* Plasticizer; chemical intermediate in prod. of syn. fibers in no-tear envelopes, wallpaper backing, and polyester bottles
- Moussex® 904 SE** [Synthron SA]  
*Chem. Descrip.:* Silicone emulsion  
*Uses:* Antifoam for mech. pulp, deinking operations; effective at very low levels; very high dispersibility
- Moussex® 3029 HL** [Synthron SA]  
*Chem. Descrip.:* Min. oil-based  
*Uses:* Antifoam for pulp deinking
- Moussex® 9101 GE** [Synthron SA]  
*Uses:* Antifoam, deaerator for wet-end paper mfg.; defoamer in food-contact paper/paperboard  
*Regulatory:* FDA 21CFR§176.210; BGA XXXVI approved  
*Properties:* Aq. emulsion
- MP-12** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Imparts high degree of abrasion resist. and slip to solvent-based flexographic and gravure inks, paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; readily dispersed without need for special processing equip.  
*Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Properties:* 10-12  $\mu$  (mean) particle size; fineness (Hegman) 5.5-6.0; sp.gr. 0.94; m.p. 102-106 C
- MP-22** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* In solvent-based flexographic and gravure inks; in paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; imparts high degree of abrasion resist. and slip; food-contact applics.; readily dispersed without need for special processing equip.  
*Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Regulatory:* FDA 21CFR §175.250  
*Properties:* Powd.; 9-11  $\mu$  (mean) particle size; fineness (Hegman) 5.5-6.0; sp.gr. 0.94; m.p. 102-106 C
- MP-22C** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* In solvent-based flexographic and gravure inks; in paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; imparts high degree of abrasion resist. and slip; readily dispersed without need for special processing equip.  
*Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Properties:* 6-8  $\mu$  (mean) particle size; fineness (Hegman) 6.0-6.5; sp.gr. 0.94; m.p. 102-106 C
- MP-22VF** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* In solvent-based flexographic and gravure inks; in paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; imparts high degree of abrasion resist. and slip; food-contact applics.; readily dispersed without need for special processing equip.  
*Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Regulatory:* FDA 21CFR §175.250  
*Properties:* Powd.; 7-9  $\mu$  (mean) particle size; fineness (Hegman) 6.0-6.5; sp.gr. 0.94; m.p. 102-106 C
- MP-22XF** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* In solvent-based flexographic and gravure inks; in paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; imparts high degree of abrasion resist. and slip; food-contact applics.; readily dispersed without need for special processing equip.
- Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Regulatory:* FDA 21CFR §175.250  
*Properties:* Powd.; 6-6.5  $\mu$  (mean) particle size; fineness (Hegman) 5.0-6.0; sp.gr. 0.94; m.p. 102-106 C
- MP-26** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Imparts high degree of abrasion resist. and slip to solvent-based flexographic and gravure inks, paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; readily dispersed without need for special processing equip.  
*Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Properties:* 9-11  $\mu$  (mean) particle size; fineness (Hegman) 5.5-6.0; sp.gr. 0.95; m.p. 102-106 C
- MP-26VF** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Imparts high degree of abrasion resist. and slip to solvent-based flexographic and gravure inks, paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; readily dispersed without need for special processing equip.  
*Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Properties:* 7-9  $\mu$  (mean) particle size; fineness (Hegman) 6.0-6.5; sp.gr. 0.95; m.p. 102-106 C
- MP-28C** [Micro Powders]  
*Chem. Descrip.:* Micronized synthetic wax  
 CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Imparts high degree of abrasion resist. and slip to solvent-based flexographic and gravure inks, paste inks, paints, coil coatings, paper coatings, and other types of surf. coatings; readily dispersed without need for special processing equip.  
*Use Level:* 0.25%-1.0% (solvent-metal/wood coatings, solv. and UV & EB lacquers); 1-2% (powd. coatings, aq. stains, solv. film/paper inks); 1-3% (solv. stains and heat set/sheet fed offset inks, aq. paper flexo/gravure inks)  
*Properties:* 6-8  $\mu$  (mean) particle size; fineness (Hegman) 6.0-6.5; sp.gr. 0.96; m.p. 104-110 C
- MPD-7** [Songkang Ind. Co.]  
*Chem. Descrip.:* Polyacrylamide  
 CAS 9003-05-8  
*Uses:* Dry str. agent for papermaking; drainage aid for papermaking in the wire and press; fixing agent for rosin size, starch, acid dyes, etc. in papermaking; retention aid for fibers and fillers; exc. performance at neutral pH; high charge density  
*Use Level:* 0.2-1.0% of dry stock  
*Properties:* Visc. < 2000 cps; pH 3-5; 11  $\pm$  1% solids; cationic
- MS-122DF** [Miller-Stephenson]  
*Chem. Descrip.:* Tetrafluoroethylene telomer (1%) with 1,1-dichloro-1-fluoroethane (92-95%), carbon dioxide (2-4%), isopropyl alcohol (2-4%)  
*Uses:* Release agent, dry lubricant for use on cold molds, esp. for epoxy potting/encapsulating, PU, nylon, acrylics, PP, PC phenolics, PS, foams, rubber molding, glass, wood, paper, gears, belts, wire and cable, metals  
*Properties:* Wh. milky liq., faint ethereal odor; negligible sol. in water; dens. 1.23 g/cc; b.p.  $\approx$  40 C; pH neutral; flash pt. none  
*Toxicology:* Mild eye irritant; inh. of high concs. of vapor may be harmful and may cause heart irregularities, unconsciousness, or death; inh. of vapors in presence of tobacco prods. causes polymer fume fever  
*Precaution:* Avoid heat, sparks, flame; incompat. with strong acids and alkalis, finely powd. Al, Mg, Zn, strong oxidizing agents, some desiccants; decomp. prods. incl. CO, CO<sub>2</sub>, HF, HCl; flamm. limits in air 7.4-15.5% by vol.  
*Storage:* Store in clean dry area; do not heat above 125 F; rotate stock to shelf life of 1 yr
- MS-290** [Songkang Ind. Co.]  
*Chem. Descrip.:* Polyacrylamide  
 CAS 9003-05-8  
*Uses:* Dry str. agent for sulfite and sulfuric acid pulp, recycled pulp; retention

aid for fibers and fillers; exc. performance at neutral pH

*Use Level:* 0.5-5.0% of dry stock

*Properties:* Microfloc; visc. < 3000 cps; pH 3-5; 11 ± 0.1% solids; amphoteric

**MSG-329** [Songkang Ind. Co.]

*Chem. Descrip.:* Polyacrylamide

CAS 9003-05-8

*Uses:* Dry str. agent for recycled pulp; retention aid for fibers and fillers; exc. performance at neutral pH; strong crosslinking

*Use Level:* 0.5-5.0% of dry stock

*Properties:* Visc. < 5000 cps; pH 10 ± 1; 15 ± 1% solids; amphoteric

**MT 15-120** [Rohm Tech]

*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate base

*Uses:* Used for nonwovens, textile coatings, and backcoatings, and paper coatings; self-crosslinking firm acrylic

*Properties:* 150 nm particle size; pH 2.0; 45 ± 0.5% solids; nonionic

**MT 1970-D** [Rohm Tech]

*Chem. Descrip.:* Ethyl acrylate, acrylonitrile base

*Uses:* Used for adhesives, textile backcoating, bonding in nonwovens, paper saturation, and coatings; self-crosslinking acrylic; forms med. film

*Properties:* 200 nm particle size; pH 5.0; 55 ± 1.0% solids; anionic

**MT 1971-D** [Rohm Tech]

*Chem. Descrip.:* Ethyl acrylate, methyl methacrylate base

*Uses:* Used for nonwoven, textile and paper applics.; self-crosslinking firm acrylic; exc. lt. and heat stability and wash and dry clean fastness

*Properties:* 170 nm particle size; pH 2.5; 46 ± 0.5% solids; nonionic

**Mulsifan RT 110** [Zschimmer & Schwarz]

*Chem. Descrip.:* Fatty alcohol polyglycol ether

*Uses:* Emulsifier for paraffins, microparaffin waxes for textile, paper, ceramics, cleaning and polishing agents

*Properties:* Wh. wax; sol. in acetone, ethanol, IPA, benzene, toluene, xylene, chlorinated hydrocarbons; disp. in water; dens. 0.94 g/cc; HLB 10.0; cloud pt. 79-84 C (5 g/20 ml of 25% BDG); pH 6 (10%); 100% act., 0.5% water; nonionic

*Storage:* Protect from frost

**Mulsifan RT 258** [Zschimmer & Schwarz]

*Chem. Descrip.:* Fatty alcohol polyglycol ether

*Uses:* Emulsifier for paraffins for textile, paper, and ceramic industries and for polishing agents

*Properties:* Ylsh. wax; disp. in water, cloudy sol. in molten paraffin; dens. 0.94 g/cc; HLB 10.0; pH 6 (10%); 100% act., 0.5% water; nonionic

*Storage:* Protect from frost

**Multiflow® Resin** [Solutia]

*Chem. Descrip.:* Ethyl acrylate/2-ethylhexyl acrylate copolymer (50% in xylene (40%))

UN No. 1866

*Uses:* Flow modifier improving leveling, eliminating craters and fisheyes, reducing pinholes, enhancing substrate wetting in wood and general industrial coatings, auto topcoat, coil, conventional- and high solids coatings, and inks; pigment disp. aid; provides high gloss; defoamer and air release aid; food pkg. adhesives, paper; compat. with epoxy, melamine, polyester, alkyd, acrylic, phenolic, urethane, etc.

*Use Level:* 0.1-2.0% on total resin solids

*Regulatory:* FDA 21CFR §175.105, 176.180; DOT regulated; SARA §313 reportable

*Properties:* Gardner 3 max. lt. yel. liq.; aromatic odor; sol. < 0.1% in water; sol. in higher m.w. alcohols, aromatic, other polar and nonpolar solvs.; sp.gr. 0.93-0.95; visc. < 100 cps; vapor pressure < 20 mm Hg; flash pt. (PMCC) 27 C; ref. index 1.480-1.484; 50% act.

*Toxicology:* Causes eye, skin, and respiratory tract irritation

*Precaution:* Flamm. liq. and vapor

*Storage:* 3 yr shelf life stored @ 4-38 C; keep away from sparks and flame

**Multiwax® ML-445** [Crompton/Witco]

*Chem. Descrip.:* Microcryst. wax NF

CAS 63231-60-7; EINECS/ELINCS 264-038-1

*Uses:* Laminating agent for paper, film, foil; hot-melt adhesives; chewing gum base; elec. insulation; sealants; rustproofing compds.; waterproofing/protective coatings; crayons; dental waxes; candles; paraffin wax modifier; cosmetics and pharmaceuticals; food-contact applics.

*Regulatory:* FDA §172.886, 178.3710

*Properties:* Lt. yel.; misc. with petrol. prods., many essential oils, most animal and veg. fats, oils, and waxes; visc. 14.3-18.0 cSt (99 C); m.p. 77-

82 C; flash pt. (COC) 274 C min.

**Munox® XL Series 1** [Osprey Biotechnics]

*Chem. Descrip.:* Org. degrading mixed bacteria conc., *Pseudomonas putida* and *P. fluorescens*

*Uses:* Environmental bacterial inoculant system for biological removal of stubborn organics in industrial wastewater, incl. waste from carpet/textile mfg., pulp/paper mills, citrus processing, chem. mfg., transportation facilities, restaurants and institutions; bioremediation applics. (crude oil spills, chem./solv. leaks, fuel oil leaks, creosote contamination)

*Properties:* Turbid liq.; no odor; sol. in water; sp.gr. 1.0; vapor pressure 24 mm Hg; b.p. 212 F

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 2g/kg; (inh., rat, 6 hr) 1.2 mg/l, unknown long term effects

*Hazardous Decomp. Prods.:* Does not undergo spontaneous decomp.; typ. combustion prods.: C, CO<sub>2</sub>, N, H<sub>2</sub>O

*Storage:* Shelf life 180 days @ R.T. (liq.)

**Munox® XL Series 2** [Osprey Biotechnics]

*Chem. Descrip.:* Org. degrading mixed bacteria conc., *Pseudomonas putida* and *P. fluorescens*

*Uses:* Environmental bacterial inoculant system for biological removal of stubborn organics in industrial wastewater, incl. waste from carpet/textile mfg., pulp/paper mills, citrus processing, chem. mfg., transportation facilities, restaurants and institutions; bioremediation applics. (crude oil spills, chem./solv. leaks, fuel oil leaks, creosote contamination); rec. for biological removal of citrus-related oils (limonene, linalool, citronellol)

*Properties:* Turbid liq.; no odor; sol. in water; sp.gr. 1.0; vapor pressure 24 mm Hg; b.p. 212 F

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 2g/kg; (inh., rat, 6 hr) 1.2 mg/l, unknown long term effects

*Hazardous Decomp. Prods.:* Does not undergo spontaneous decomp.; typ. combustion prods.: C, CO<sub>2</sub>, N, H<sub>2</sub>O

*Storage:* Shelf life 180 days @ R.T. (liq.)

**Munox® XL Series 5** [Osprey Biotechnics]

*Chem. Descrip.:* Org. degrading mixed bacteria conc., *Pseudomonas putida* and *P. fluorescens*

*Uses:* Environmental bacterial inoculant system for biological removal of stubborn organics in industrial wastewater, incl. waste from carpet/textile mfg., pulp/paper mills, citrus processing, chem. mfg., transportation facilities, restaurants and institutions; bioremediation applics. (crude oil spills, chem./solv. leaks, fuel oil leaks, creosote contamination); rec. for biological removal of phenol and chlorinated aromatic hydrocarbons

*Properties:* Turbid liq.; no odor; sol. in water; sp.gr. 1.0; vapor pressure 24 mm Hg; b.p. 212 F

*Toxicology:* LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 2g/kg; (inh., rat, 6 hr) 1.2 mg/l, unknown long term effects

*Hazardous Decomp. Prods.:* Does not undergo spontaneous decomp.; typ. combustion prods.: C, CO<sub>2</sub>, N, H<sub>2</sub>O

*Storage:* Shelf life 180 days @ R.T. (liq.)

**Myacide®** [Knoll MicroCheck; Economy Polymers & Chems.]

*Chem. Descrip.:* 2-Bromo-2-nitropropane-1,3-diol

CAS 52-51-7; EINECS/ELINCS 200-143-0

*Uses:* Antimicrobial in pulp/paper, oil and gas production, and water-based heat transfer systems; pharmaceutical grade

*Properties:* Wh. crystalline solid; faint char. odor; m.w. 200; m.p. ≈ 130 C; pH 5-7 (1% @ 20 C); < 0.5% 2-methyl-2-nitropropane-1,3-diol

*Precaution:* Decomposes @ 130 C

**Myacide® AS Plus** [ANGUS; Knoll MicroCheck]

*Chem. Descrip.:* 2-Bromo-2-nitropropane-1,3-diol

CAS 52-51-7; EINECS/ELINCS 200-143-0

*Uses:* Antimicrobial, preservative for papermaking, adhesives, coatings, cooling towers, process waters, oil field water-flooding operations, deodorizing, other aq. applics.; water-sol.

*Properties:* Powd.; sol. in water

**Myacide® Pharma® BP** [ANGUS; Knoll MicroCheck]

*Chem. Descrip.:* 2-Bromo-2-nitropropane-1,3-diol

CAS 52-51-7; EINECS/ELINCS 200-143-0

UN No. 3241

*Uses:* Preservative for cosmetics and pharmaceuticals (shampoo, hair conditioners, bath/shower gels, hand creams, body lotions, wet wipes, sun care prods.); food pkg. adhesives; simicide in food-contact paper/paperboard; long-term preservative

*Use Level:* 200 ppm (pharmaceutical applics.)

*Regulatory:* FDA21CFR§175.105, 176.300; BP, EU compliance; registered in France, Germany, India, Australia, Canada, Japan; food contact approved in U.S., France, Germany

*Properties:* Wh. or almost wh. cryst. powd.; faint char. odor; sol. in water, alcohol, glycols, and polyols; m.w. 200; dens. 1.1 g/cm<sup>3</sup>; m.p. 130 C; pH 5-7 (1%, 20 C); 99% min. purity

*Toxicology:* LD50 (oral, male rat) 307 mg/kg, (derma, rat) 1600 mg/kg; conc. sol'ns. are irritating to skin, eyes, respiratory system, harmful if swallowed; nonirritating to skin @ 0.01-0.1%; noncarcinogenic

*Environmental:* Rapidly biodeg.; EC50 (daphnia magna, 48 h) 1.4 ppm; LC50 (rainbow trout, 96 h) 41.2 ppm; very toxic to aquatic organisms

*Precaution:* Corrosive to metals (esp. aluminum) when wet; avoid temps. > 90 C to prevent risk of self-heating and rapid decomp.; decomp. temp. is lowered in presence of bases (esp. sodium hydroxide)

*Hazardous Decomp. Prods.:* Hydrogen bromide and NO<sub>x</sub>

*Storage:* 5 yr min. stability under good storage conditions; store in original container tightly closed

# N

**NACCONOL® 40G** [Stepan; Stepan Canada]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Foaming agent, dispersant, wetting agent, detergent for agric., cement, dyeing, emulsion polymerization, textiles, metal cleaning, metalworking, mining, paper industries

*Properties:* Cream gran. powd.; sol. 2 g/100 ml in water; dens. 35 lb/ft<sup>3</sup>; pH 6.4-7.6 (1% aq.); 38-42% act.; anionic

*Environmental:* Biodeg.

**NACCONOL® 90G** [Stepan; Stepan Canada; Stepan Europe]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate  
 CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Foaming agent, dispersant, wetting agent, detergent for agric., cement, dyeing, emulsion and latex polymerization, textiles, metal cleaning, laundry prods., metalworking, mining, paper industries

*Properties:* Wh. to beige gran.; sol. 15 g/100 ml in water; dens. 30 lb/ft<sup>3</sup>; pH 6.0-7.5 (1% aq.); 90% act.; anionic

*Environmental:* Biodeg.

**Nacrylic X 4280** [Nat'l. Starch & Chem.]

*Chem. Descrip.:* Self-crosslinking acrylic copolymer emulsion  
 CAS 25133-97-5

*Uses:* Imparts fold endurance, tear str., delamination resist., lightfastness, durability, and toughness to paper saturation (tag and label stock); food pkg. adhesives; component of paper/paperboard in contact with dry food; exc. adhesion to nat. and syn. substrates; exc. solv. resist.; firm and flexible; exc. compd. stability and stability in size press, saturation, and spray applics.

*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* 0.2 µ particle size; dens. 8.8 lb/gal; visc. 100 cps; pH 3.5; 50% solids; anionic

**Nacure® 2522** [King Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid  
 CAS 104-15-4; EINECS/ELINCS 203-180-0

*Uses:* Blocked catalyst used in automotive and general industrial applics., electrostatic, paper, and wood coatings; low cure; for fast cure schedule with short dwell times

*Properties:* Gardner 1 color; sol. in alcohols, water, glycols; partially sol. in esters; insol. in ketones, aromatics, and aliphatics; dens. 7.85 lb/gal; pH 3-5; 25% act.

**Nacure® 2530** [King Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid, methanol/isopropanol solv.

*Uses:* Blocked catalyst used in automotive, can, coil, electrostatic, paper, wood, and general industrial coatings; low cure, low tendency to yel. or wrinkle

*Properties:* Gardner 1 color; dens. 7.90 lb/gal; pH 5.75-6.5; 25% act.

**Nacure® 4054** [King Ind.]

*Chem. Descrip.:* Acid phosphate catalyst (50%), isobutanol

*Uses:* Catalyst for high NH/polymeric melamines and phenolic crosslinkers for use in coatings for appliances, automotive, can, coil, general industrial, paper, ink and wood; weak acid catalyst; exc. sol.; good pkg. stability, adhesion, salt spray, and water resist.

*Properties:* Gardner 1 color; dens. 7.49 lb/gal; acid no. 155-165; 50% act.

**Nacure® XC-2211** [King Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid in water

CAS 104-15-4; EINECS/ELINCS 203-180-0

*Uses:* Blocked acid catalyst for waterborne thermosets, overprint varnish, general industrial, paper, wood coatings and inks; offers film hardness, high gloss, cure responses; 80 C min. cure

*Properties:* Gardner 1 color; dens. 9.80 lb/gal; acid no. 7.2-8.5; pH 7.5-8.5; 54% act.

**Nacure® XC-8224** [King Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid

CAS 104-15-4; EINECS/ELINCS 203-180-0

*Uses:* Blocked catalyst used in wood and paper coatings, and laminates; fast cure response and sol. in waterborne coatings; 65 C min. cure

*Properties:* Gardner 1 color; dens. 9.08 lb/gal; acid no. 8-9; 25% act.

**Nacure® XP-386** [King Ind.]

*Chem. Descrip.:* p-Toluene sulfonic acid in water

CAS 104-15-4; EINECS/ELINCS 203-180-0

*Uses:* Blocked acid catalyst for water-borne general industrial, paper, and wood coatings and inks; offers film hardness, high gloss, low temp. cure

*Properties:* PH 6.1-6.4; 47% act.

**Nafol® 10 D** [Condea Vista]

*Chem. Descrip.:* C10 alcohol (90% C10, 10% C8)

CAS 112-30-1; EINECS/ELINCS 203-956-9

*Uses:* Intermediate for mfg. of toiletries, cosmetics, detergents, laundry softeners, lubricating oil additives, plasticizers, plastics additives, textile/leather additives, disinfectants, agrochem., paper defoamers, flotation agents

*Properties:* Hazen 10 max. color; m.w. 155-162; sp.gr. 0.829 (20/4 C); solid. pt. 3 C; b.p. 215-240 C; acid no. 0.05 max.; iodine no. 0.2 max.; hyd. no. 345-365; flash pt. 95 C; 99% min. act.

**Nafol® 20+** [Condea Vista]

*Chem. Descrip.:* C20-24 alcohol (50% C20, 29% C22, 14% C24); EINECS/ELINCS 307-145-1

*Uses:* Intermediate for mfg. of toiletries, cosmetics, detergents, laundry softeners, lubricating oil additives, plasticizers, plastics additives, textile/leather additives, disinfectants, agrochem., paper defoamers, flotation agents

*Properties:* Hazen 1800 max. color; sp.gr. 0.804 (80/4 C); solid. pt. 53-58 C; acid no. 1.0 max.; iodine no. 20 max.; hyd. no. 130-150; flash pt. 210 C; 80% act.

**Nafol® 810 D** [Condea Vista]

*Chem. Descrip.:* C8-10 alcohol (43% C8, 55% C10)

CAS 85566-12-7

*Uses:* Intermediate for mfg. of toiletries, cosmetics, detergents, laundry softeners, lubricating oil additives, plasticizers, plastics additives, textile/leather additives, disinfectants, agrochem., paper defoamers, flotation agents

*Properties:* Hazen 10 max. color; m.w. 143-148; sp.gr. 0.827 (20/4 C); b.p. 195-240 C; acid no. 0.05 max.; iodine no. 0.15 max.; hyd. no. 380-390; pour pt. 11 C; flash pt. 85 C; 99% min. act.

**Nafol® 1014** [Condea Vista]

*Chem. Descrip.:* C10-14 alcohol (15% C10, 47% C12, 38% C14); EINECS/ELINCS 283-066-5

*Uses:* Intermediate for mfg. of toiletries, cosmetics, detergents, laundry softeners, lubricating oil additives, plasticizers, plastics additives, textile/leather additives, disinfectants, agrochem., paper defoamers, flotation agents

*Properties:* Hazen 20 max. color; m.w. 187-193; sp.gr. 0.832 (20/4 C); solid. pt. 14-18 C; b.p. 230-285 C; acid no. 0.05 max.; iodine no. 0.2 max.; hyd. no. 290-300; flash pt. 118 C; 99% min. act.

**Nafol® 1218** [Condea Vista]

*Chem. Descrip.:* C12-18 alcohol (40% C12, 30% C14, 18% C16, 10% C18)

CAS 67762-25-8; EINECS/ELINCS 267-006-5

*Uses:* Intermediate for mfg. of toiletries, cosmetics, detergents, laundry softeners, lubricating oil additives, plasticizers, plastics additives, textile/leather additives, disinfectants, agrochem., paper defoamers, flotation agents

*Properties:* Hazen 30 max. color; m.w. 204-216; sp.gr. 0.823 (40/4 C); solid. pt. 25-28 C; b.p. 270-335 C; acid no. 0.1 max.; iodine no. 0.4 max.; hyd. no. 260-275; flash pt. 145 C; 98.5% min. act.

**Nafol® 1822** [Condea Chemie GmbH; Condea Vista]

*Chem. Descrip.:* 1-Octadecanol, 1-eicosanol, and 1-docosanol

*Uses:* Paper applics.

*Properties:* Colorless solid; char. odor; sl. sol. in water; sp.gr. 0.804 (80 C); visc. 6.8 mPa·s (80 C); vapor pressure < 1.00 mbar; m.p. 58 C; solid. pt. 61 C; flash pt. 202 C

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg

*Environmental:* Biodeg.; do not allow to enter soil, waterways, or wastewater

*Precaution:* Incompat. with oxidizing agents

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>

*Storage:* Store in cool place away from sources of ignition

**Nafol® 1822 B** [Condea Chemie GmbH; Condea Vista]

*Chem. Descrip.:* 1-Octadecanol, 1-eicosanol, and 1-docosanol

*Uses:* Paper applics.

*Properties:* Colorless solid; char. odor; sl. sol. in water; sp.gr. 0.804 (80 C); visc. 7.1 mPa·s (80 C); vapor pressure < 1.00 mbar; m.p. 69 C; solid. pt. 64 C; flash pt. 204 C

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg

*Environmental:* Biodeg.; do not allow to enter soil, waterways, or wastewater

*Precaution:* Incompat. with oxidizing agents

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>

*Storage:* Store in cool place away from sources of ignition

**Nafol® 1822 C** [Condea Chemie GmbH; Condea Vista]

*Chem. Descrip.:* 1-Octadecanol, 1-eicosanol, and 1-docosanol

*Uses:* Paper applics.

*Properties:* Colorless solid; char. odor; sl. sol. in water; sp.gr. 0.804 (80 C); visc. 6.8 mPa·s (80 C); vapor pressure < 1.00 mbar; m.p. 58 C; solid. pt. 61 C; flash pt. 202 C

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg

*Environmental:* Biodeg.; do not allow to enter soil, waterways, or wastewater

*Precaution:* Incompat. with oxidizing agents

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>

*Storage:* Store in cool place away from sources of ignition

**Nagellite® 3050** [Telechemische]

*Chem. Descrip.:* Tosylamide/epoxy resin

*Uses:* Nail enamel resin, gloss aid; plasticizer for nitrocellulose; food-contact paper/paperboard; patented; formaldehyde-free; provides superior clarity, brilliance, gloss, adhesion

*Regulatory:* FDA 21§CFR 175.105, 175.300, 176.170

**Nansa® HS80S** [Albright & Wilson UK]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Formulation of detergents, hard surface and bottle cleaners; metal treatment; paper processing; scouring agent and wetting agent for textiles; grinding agent, foaming agent, and mortar plasticizer in building industry; wetting agent for agric. suspension concs.

*Properties:* Cream powd.; sp.gr. 0.65; pH 9-11 (1%); 80% act.; anionic

**Nansa® HS85/S** [Albright & Wilson UK]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Formulation of detergents, hard surface and bottle cleaners; metal treatment; paper processing; scouring agent and wetting agent for textiles; foaming agent and mortar plasticizer in building industry; rubber/plastics emulsifier; wetting agent for agric. suspension concs.

*Properties:* Cream flake; dens. 0.5 g/cc; pH 9-11 (1%); 85 ± 3% act.; anionic

*Environmental:* Biodeg.

**Natrosol® 250** [Hercules/Aqualon]

*Chem. Descrip.:* Hydroxyethylcellulose

CAS 9004-62-0

*Uses:* Thickener, protective colloid, binder, stabilizer, suspending agent for coatings, cosmetics, pharmaceuticals, textile printing pastes, paints, inks,

adhesives, electroplating, ceramics, textile/paper sizing, acid thickening for acidizing oil wells

*Regulatory:* FDA compliance

*Properties:* Wh. to lt. tan gran. powd.; particle size 90% thru 40 mesh; water-sol.; avail. in various visc. grades; pH 6.0-8.5 (2%); nonionic

**Naugard® 10** [Uniroyal]

*Chem. Descrip.:* Tetrakis [methylene (3,5-di-*t*-butyl-4-hydroxyhydrocinna-mate)] methane

CAS 6683-19-8; EINECS/ELINCS 229-722-6

*Uses:* Antioxidant for polyolefins, styrenics, elastomers, adhesives, lubricants, oils, PP, LDPE, LLDPE, HDPE, HIPS, ABS, polyester, EVA, cellulose, nylon, polyester, PS, PVC, acetal, EPDM, PU; food-contact pressure-sensitive adhesives, coatings, paper, wood preservatives; antioxidant for food-grade polymers; nondiscoloring; effective against thermal oxidative degradation during long term heat aging

*Regulatory:* FDA 21CFR §175.125, 175.300, 175.300(b)(2,3), 175.320(b)(3), 176.170(a)(5), 176.170(b)(2), 176.180, 177.2470 (b), 178.2010, 178.3800, 178.3850

*Properties:* Wh. free-flowing powd. or gran.; sol. (g/100 ml): 100 g acetone, chloroform, benzene; m.w. 1178; sp.gr. 1.05; m.p. 110-125 C; flash pt. 299 C

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; LD50 (dermal, rabbit) > 3160 mg/kg; nonirritating to eyes, skin

*Storage:* 1 yr storage life in sealed containers in cool, dry areas; avoid extended storage at elevated temps.

**Naugex® MBT** [Uniroyal]

*Chem. Descrip.:* 2-Mercaptobenzothiazole

CAS 149-30-4; EINECS/ELINCS 205-736-8

*Uses:* General-purpose accelerator for NR, SR, EPDM, tire treads, carcass, wire insulation, footwear, mech. goods, food-contact rubber articles; food pkg. adhesives; slimicide in food-contact paper/paperboard; retarder for CR cures, esp. G types at all temps.; used in many sulfur-curable elastomers; nondiscoloring, nonstaining; broad curing range; fast curing above 240 F; mod. low activation temp.; may scorch during processing; disperses readily

*Regulatory:* FDA 21CFR §175.105, 176.300, 177.2600

*Properties:* Lt. yel. to tan free-flowing powd.; distinct odor; sol. in acetone and alkaline sol'ns.; sl. sol. in alcohol; insol. in water; sp.gr. 1.50; m.p. 170-180 C

*Toxicology:* Repeated minimal contact with skin may cause sensitization

*Storage:* Exc. storage stability (> 4 yrs when stored in cool, dry place away from direct sources of heat and light)

**N® Clear Sodium Silicate** [PQ]

*Chem. Descrip.:* Sodium silicate

CAS 1344-09-8; EINECS/ELINCS 215-687-4

*Uses:* Corrosion inhibitor for water systems; peroxide bleaching of textiles; detergent, deflocculant, bleaching enhancer, alkalinity agent in deinking paper stock; peroxide stabilizer in repulping and postbleaching; peroxide bleaching textiles

*Properties:* Syrupy liq.; sp.gr. 1.38 (20 C); dens. 11.6 lb/gal; visc. 180 cps; pH 11.3; 28.7% SiO<sub>2</sub>, 8.9% Na<sub>2</sub>O

*Toxicology:* Alkalinity can irritate eyes and skin

*Environmental:* Environmentally friendly

*Storage:* For extended storage, use tightly closed drums, steel containers, or containers of nonreactive materials

**NC Size C-25** [Nicca Chem. Co Ltd]

*Chem. Descrip.:* Styrene-acrylic type copolymer

CAS 9010-92-8

*Uses:* Surf. sizing agent for paper impregnation and coating; outstanding sizing effect compared to that of existing sizing agents

*Use Level:* 5-10 times diluted sol'n. for total of 1-4% per paper

*Properties:* Wh. semi-transparent liq.; pH 5; cationic

**Necco Fire Retardant 2750** [Northern Prods.]

*Chem. Descrip.:* Ammonium sulfamate unmodified sol'n.

CAS 7773-06-0; EINECS/ELINCS 231-871-7

*Uses:* Fire retardant for use on paper, nonwovens, and textile fabrics

*Properties:* Colorless clear to sl. hazy liq.; dilutable with water; sp.gr. 1.263 (30 C); dens. 10.5 lb/gal; pH 5.8; 50% solids

*Storage:* 6 mos stability

**Necco Fire Retardant 2758** [Northern Prods.]

*Chem. Descrip.:* Ammonium sulfamate modified sol'n.

CAS 7773-06-0; EINECS/ELINCS 231-871-7

*Uses:* Fire retardant for use on paper, nonwovens, textile fabrics; modified to

prevent afterglow, to resist discoloration on heating or storage, to have good compat. with latex binders, and to eliminate crystallization of salts on surf. of treated goods

*Properties:* Colorless clear to sl. hazy liq.; dilutable with water; sp.gr. 1.254 (30 C); dens. 10.44 lb/gal; pH 6.2; 50% solids

*Storage:* 6 mos stability

#### Necco Fire Retardant 2762 [Northern Prods.]

*Chem. Descrip.:* Ammonium sulfamate modified sol'n.

CAS 7773-06-0; EINECS/ELINCS 231-871-7

*Uses:* Fire retardant for use on paper, nonwovens, textile fabrics; specifically for use with chrome complex-type water repellents

*Properties:* Colorless clear to sl. hazy liq.; dilutable with water; sp.gr. 1.312 (30 C); dens. 10.93 lb/gal; pH 4.1; 58.5% solids

*Storage:* 6 mos stability

#### Necco Fire Retardant 3000DM [Northern Prods.]

*Uses:* Flame retardant for use on paper, textile, and nonwovens, esp. in decorative crepe or tissue, match board, box board textiles, and nonwovens which do not require permanent fire protection

*Properties:* Clear liq.; water-sol.; sp.gr. 1.28 ± 0.02; dens. 10.4 lb/gal; pH 5.8; 50 ± 1% act.

*Storage:* 6 mos storage stability; keep drums closed; store @ R.T.; some settling or crystallization may occur at freezing temps.; warm to 90 F to restore

#### Necco Fire Retardant K-6 [Northern Prods.]

*Uses:* Fire retardant for use on paper, nonwovens, textile fabrics

*Properties:* Colorless clear to sl. hazy liq.; dilutable with water; sp.gr. 1.318 (30 C); dens. 10.98 lb/gal; pH 6.2; 58.5% solids

*Storage:* 6 mos stability

#### Necco FR 682 [Northern Prods.]

*Uses:* Flame retardant for woven fabrics, paper, and other nonwovens incl. filter media, carpets, tent fabric, fiberfill for insulation, automotive fabric, flocked fabric, sleeping bags, and upholstery; durable; can be used in conjunction with water repellents, fungicides, and pigments for use on natural and syn. substrates; low smoke generation; nonmigrating in most instance

*Properties:* Disp. in water in all proportions; sp.gr. 2.00; dens. 16.6 lb/gal; pH 7.5; 70% solids; nonionic

#### Necco FR 7065D [Northern Prods.]

*Uses:* Flame retardant for industrial fabrics and papers; durable; for use with select water repellents, fungicides, pigments, and polymers

*Properties:* Disp. in water; sp.gr. 1.59; dens. 13.25 lb/gal; pH 7.5 ± 0.5; 66 ± 1% solids; nonionic

#### Necon SOG [Alzo]

*Chem. Descrip.:* Soyamidopropyl dimethylamino glycolate

*Uses:* Surfactant, emulsifier, conditioner with exc. hair substantivity, fly-away control, softening props., and enhanced wet and dry combing; emulsifier for pulp/paper industry

*Properties:* Dk. yel. sl. visc. liq., mild ammoniacal odor; water-sol.; sp.gr. 0.99; pH 7.0; 70% NV in propylene glycol; cationic

#### Necon SOGU [Alzo]

*Chem. Descrip.:* Soyamidopropyl dimethylamino gluconate

*Uses:* Surfactant, emulsifier, conditioner with exc. hair substantivity, fly-away control, softening props., and enhanced wet and dry combing; emulsifier for pulp/paper industry

*Properties:* Dk. amber visc. liq., mild ammoniacal odor; water-sol.; sp.gr. 1.06; pH 7.0; 70% NV in propylene glycol; cationic

#### Necon SOLC [Alzo]

*Chem. Descrip.:* Linoleamido dimethylamino lactate

*Uses:* Surfactant, emulsifier, conditioner with exc. skin and hair substantivity, fly-away control, softening props., and enhanced wet and dry combing; emulsifier for pulp/paper industry

*Properties:* Dk. amber visc. liq., mild ammoniacal odor; water-sol.; sp.gr. 1.00; pH 7.0; 70% NV in propylene glycol; cationic

#### Neobor® [U.S. Borax]

*Chem. Descrip.:* Sodium tetraborate pentahydrate

CAS 12179-04-3; EINECS/ELINCS 215-540-4

*Uses:* Source of boric oxide for insulation fiber glass, textile fiberglass, and borosilicate glasses; flame retardant for cellulose; peptizing agent in adhesives; pH buffer, abrasive in cleaning prods.; wax and oil emulsifier; food pkg. adhesives; food-contact paper; ceramic wares; bleaching agent in laundry powds.; water softener; visc. control; corrosion inhibitor; enzyme stabilizer; lubricant carrier in wire drawing; bonding agent in refractories; metallurgical flux; inc. str., scratch and chem. resist. of ceramic wares

*Regulatory:* FDA 21CFR §175.105, 176.180, 181.30; SARA nonreportable, DOT nonregulated

*Properties:* Wh. cryst. gran. or powd.; odorless; sol. in water, glycols; m.w. 291.35; sp.gr. 1.81; vapor pressure negligible (20 C); m.p. < 200 C; pH 9.3 (3%); nonflamm.; > 99% act.

*Toxicology:* OSHA PEL 10 mg/m<sup>3</sup> total dust; LD50 (oral, rat) 3200-3400 mg/kg; (skin, rabbit) > 2000 mg/kg; LC50 (inh., rat) > 2.0 mg/l; low acute oral and dermal toxicity; inh. @ > 10 mg/m<sup>3</sup> may cause mild irritation to nose and throat; TSCA listed

*Environmental:* EC50 (Daphnia magna, 24 h) 242 mg; lg. amts. can be harmful to plants and other species

*Precaution:* Reacts as weak acid which may cause corrosion of base metals; incompat. with strong reducing agents which will generate hydrogen gas

NFPA: Health 0; Flammability 0; Reactivity 0

*Storage:* Rec. dry indoor storage @ R.T.

#### Neocin™-HSC [Dr. W. Kolb AG]

*Chem. Descrip.:* Sulfuric acid and low-foaming surfactants

*Uses:* Cleaner, dispersant for removal of inorganic deposits with org. constituents in paper processing

*Properties:* Nonionic

#### NeoCryl® A-630 [NeoResins]

*Chem. Descrip.:* Acrylic copolymer

CAS 25133-97-5

*Uses:* Used in high gloss coatings for metal, paper, and plastics; water-borne, air-dry acrylic; can be flow coated, dipped, or sprayed

*Properties:* Dens. 8.6 lb/gal; visc. 600 cps; pH 7.5-8.0; Sward hardness 50 (7 days); 44% NV

#### NeoCryl® B-728 [NeoResins]

*Chem. Descrip.:* Methacrylate homopolymer

*Uses:* Used in lacquers for vinyl films, tiles, fabrics, metals, paper, and wood, barrier coats, inks, adhesives; used with sol'n. vinyls, NC; solid, thermoplastic acrylic; hard and durable film

*Properties:* Beads; sp.gr. 1.19; visc. 1200 cps (35% MEK); R&B soften. pt. > 200 C; Sward hardness 60 (7 days); 98% NV

#### NeoCryl® BT-175 [NeoResins]

*Chem. Descrip.:* Acrylic polymer

CAS 25133-97-5

*Uses:* Used in flexographic and gravure inks for paper, film, foil, and board coatings; grinding vehicle for aq. coatings; water-borne, heat cured acrylic; exc. pigment wetting

*Properties:* Alkali soluble; dens. 8.8 lb/gal; visc. 100 cps; pH 4.0; 40% NV

#### Neodene® 12/14 [Shell]

*Chem. Descrip.:* C12-C14 alpha olefin blend

CAS 64743-02-8; EINECS/ELINCS 272-492-7

*Uses:* Intermediate for biodeg. surfactants and specialty industrial chems.; for lube additives and paper sizing

*Properties:* Liq.; 100% conc.

*Environmental:* Biodeg.

#### Neodene® 14/16 [Shell]

*Chem. Descrip.:* C14-C16 alpha olefin blend

CAS 64743-02-8; EINECS/ELINCS 272-493-2

*Uses:* Intermediate for biodeg. surfactants and specialty industrial chems.; for lube additives and paper sizing

*Properties:* Liq.; 100% conc.

*Environmental:* Biodeg.

#### Neodene® 15/18 [Shell]

*Chem. Descrip.:* Internal olefin

*Uses:* Intermediate for paper sizing, drilling muds

#### Neodene® 16/18 [Shell]

*Chem. Descrip.:* C16-C18 alpha olefin blend

CAS 64743-02-8; EINECS/ELINCS 272-494-8

*Uses:* Intermediate for biodeg. surfactants, specialty industrial chems., lube additives, and paper sizing

*Properties:* Liq.; 100% conc.

*Environmental:* Biodeg.

#### Neodene® 20/22/24 [Shell]

*Chem. Descrip.:* C20-C24 alpha olefin blend

CAS 64743-02-8

*Uses:* Intermediate for biodeg. surfactants, specialty industrial chems., lube additives, and paper sizing

*Properties:* Liq.; 100% conc.

*Environmental:* Biodeg.

**Neonal™-HSC** [Dr. W. Kolb AG]

*Chem. Descrip.:* Soda lye and low-foaming surfactants

*Uses:* Cleaner, dispersant for removal of organic deposits with inorg. constituents in paper processing

*Properties:* Nonionic

**Neoprene Latex 654** [DuPont; DuPont Canada]

*Chem. Descrip.:* Anionic, high solids, colloidal system containing a low-modulus polychloroprene homopolymer

CAS 9010-98-4

*Uses:* For heat activated and laminating adhesives, coatings, impregnated paper, and bonded batts

*Properties:* 59% solids

**Neoprene Latex 735A** [DuPont; DuPont Canada]

*Chem. Descrip.:* Anionic colloidal system containing a low-modulus, slow crystallizing polychloroprene homopolymer

CAS 9010-98-4

*Uses:* For mfg. of cellulose and asbestos paper, blending with other Neoprene latexes to improve wet-gel strength; used for adhesives, bonded batts, coatings, saturants

*Properties:* Visc. 5 cps; pH 11.5; 45% solids; 38.5% chlorine

**Neoprene Latex 842A** [DuPont; DuPont Canada]

*Chem. Descrip.:* Anionic colloidal system containing chloroprene copolymer

CAS 9010-98-4

*Uses:* Used for sat. cellulose paper, coatings, curled hair, laminating adhesives, elasticized aluminous cement, dipped goods; versatile latex

*Properties:* Visc. 15 cps; pH 12.0; 50% solids; 37.5% chlorine

**NeuRoz® 426** [Plasmine Tech.]

*Chem. Descrip.:* Rosin aq. disp.

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for papermaking incl. wh. papers, deep colors, virgin linerboard, and 100% OCC furnishes; component of paper/paperboard in contact with aq./fatty/dry foods; effective at pH 4.0-7.5; cost effective; exc. stability

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Milky wh. disp.; sl. odor; disp. in water; sp.gr. 1.07; dens. 8.9 lb/gal; visc. 50 cps; m.p. 0 C; b.p. 100 C; flash pt. nonflamm.; pH 3.0; 40% total solids; cationic

*Toxicology:* May cause eye irritation and reddening, itching, inflamm. of skin and eyes; prolonged skin contact may cause irritation and dermatitis; inh. may cause respiratory tract irritation, coughing; ing. may irritate digestive tract

*Precaution:* Avoid contact with strong oxidizers

*Hazardous Decomp. Prods.:* CO, CO<sub>2</sub>, trace NO<sub>x</sub>

HMIS: Health 2; Flammability 0; Reactivity 0

*Storage:* 6 mos shelf life; store @ 40-90 F; keep from freezing, but if accidentally frozen, mix thoroughly

**NeuRoz® 540** [Plasmine Tech.]

*Chem. Descrip.:* Rosin aq. emulsion

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for acid papermaking; component of paper/paperboard in contact with aq./fatty/dry foods; effective at pH 4.5-5.5; exc. stability

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Milky wh. emulsion; odorless; disp. in water; sp.gr. 1.05; dens. 8.7 lb/gal; visc. < 100 cps; b.p. 212 F; flash pt. nonflamm.; pH 5.5-6.5; 40% total solids; anionic

*Toxicology:* No health hazards known; avoid skin and eye contact

*Precaution:* Keep away from heat, strong alkali and strong acid

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 6 mos shelf life; store @ 40-90 F; keep from freezing, but if accidentally frozen, mix thoroughly

**NeuRoz® 700** [Plasmine Tech.]

*Chem. Descrip.:* Rosin emulsion

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Internal sizing agent for neutral papermaking incl. recycled fiber; component of paper/paperboard in contact with aq./fatty/dry foods; suitable with and without calcium carbonate; exc. mech. stability

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Milky wh. emulsion; odorless; disp. in water; sp.gr. 1.05; dens. 8.7 lb/gal; visc. < 100 cps; b.p. 212 F; flash pt. nonflamm.; pH 6-7; 40% total solids; anionic

*Toxicology:* No health hazards known; avoid skin and eye contact

*Precaution:* Keep away from heat, strong alkali and strong acid

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 6 mos shelf life; store @ 40-90 F away from heat

**NeuRoz® XC-7** [Plasmine Tech.]

*Chem. Descrip.:* Rosin disp.

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Internal sizing agent for papermaking; component of paper/paperboard in contact with aq./fatty/dry foods; effective from pH 4.5-8.5, with or without CaCO<sub>3</sub> in furnish; exc. stability; patented

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Milky wh. disp.; odorless; disp. in water; sp.gr. 1.05; dens. 8.67 lb/gal; visc. 500 cps; b.p. 212 F; flash pt. nonflamm.; 35% total solids; cationic

*Toxicology:* No health hazards known; avoid skin and eye contact

*Precaution:* Keep away from heat, strong alkali and strong acid

HMIS: Health 1; Flammability 0; Reactivity 0

*Storage:* 6 mos shelf life; store @ 40-90 F; keep from freezing; if accidentally frozen, mix thoroughly

**Neutros®** [Eka Chems.]

*Chem. Descrip.:* Rosin disp., casein-stabilized

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for internal sizing of all kinds of paper and board in pH range of 4-6

*Properties:* Anionic

**Neutros® Extra** [Eka Chems.]

*Chem. Descrip.:* Rosin disp., casein-stabilized

CAS 8050-09-7; EINECS/ELINCS 232-475-7

*Uses:* Sizing agent for internal sizing of all kinds of paper and board; formulated for sizing in neutral or sl. alkaline conditions in presence of CaCO<sub>3</sub> and under elevated stock temps.

*Properties:* Anionic

**Nevchem® 70** [Neville]

*Chem. Descrip.:* Alkylated petrol. hydrocarbon resin

*Uses:* Adhesives (hot-melt pressure-sensitive, mastic); coatings (aluminum, emulsion, industrial, marine, paper, traffic, wire/cable); inks; rubber (cements, mechanical and molded goods, tires); concrete-curing compds.; caulking compds.; processing aid in rubber compds.; food-contact adhesives, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 430; sp.gr. 1.02; soften. pt. (R&B) 72 C; iodine no. (Wijs) 70; flash pt. (COC) 415 F

**Nevchem® 100** [Neville]

*Chem. Descrip.:* Alkylated petrol. hydrocarbon resin

*Uses:* Adhesives (hot-melt pressure-sensitive, mastic); coatings (aluminum, emulsion, industrial, marine, paper, traffic, wire/cable); inks; rubber (cements, mechanical and molded goods, tires); concrete-curing compds.; caulking compds.; plasticizer, softener, processing aid in rubber compds.; food-contact adhesives, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 640; sp.gr. 1.063; soften. pt. (R&B) 103 C; iodine no. (Wijs) 100; flash pt. (COC) 455 F

**Nevchem® 110** [Neville]

*Chem. Descrip.:* Alkylated petrol. hydrocarbon resin

*Uses:* Adhesives (hot melt pressure sensitive, mastic); coatings (aluminum, emulsion, industrial, marine, paper, traffic, wire/cable), inks, rubber (cements, mechanical and molded goods, tires), concrete-curing compds., caulking compds.; processing aid in rubber compds.; food-contact adhesives, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 715; sp.gr. 1.064; soften. pt. (R&B) 110 C; iodine no. (Wijs) 100; flash pt. (COC) 465 F

**Nevchem® 120** [Neville]

*Chem. Descrip.:* Alkylated petrol. hydrocarbon resin

*Uses:* Adhesives (hot melt pressure sensitive, mastic); coatings (aluminum, emulsion, industrial, marine, paper, traffic, wire/cable), inks, rubber (cements, mechanical and molded goods, tires), concrete-curing compds., caulking compds.; processing aid in rubber compds.; food-contact adhesives, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 880; sp.gr. 1.070; soften. pt. (R&B) 120 C; iodine no. (Wijs) 100; flash pt. (COC) 475 F

**Nevchem® 130** [Neville]

*Chem. Descrip.:* Alkylated petrol. hydrocarbon resin

*Uses:* Adhesives (hot melt pressure sensitive, mastic); coatings (aluminum, emulsion, industrial, marine, paper, traffic, wire/cable), inks, rubber (cements, mechanical and molded goods, tires), concrete-curing compds., caulking compds.; processing aid in rubber compds.; food-contact adhesives, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1092; sp.gr. 1.076; soften. pt. (R&B) 130 C; iodine no. (Wijs) 107; flash pt. (COC) 510 F

**Nevchem® 140** [Neville]

*Chem. Descrip.:* Alkylated petrol. hydrocarbon resin

*Uses:* Adhesives (hot melt pressure sensitive, mastic); coatings (aluminum, emulsion, industrial, marine, paper, traffic, wire/cable), inks, rubber (cements, mechanical and molded goods, tires), concrete-curing compds., caulking compds.; processing aid in rubber compds.; food-contact adhesives, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1110; sp.gr. 1.080; soften. pt. (R&B) 140 C; iodine no. (Wijs) 107; flash pt. (COC) 520 F

**Nevchem® 150** [Neville]

*Chem. Descrip.:* Alkylated petrol. hydrocarbon resin

*Uses:* Adhesives (hot melt pressure sensitive, mastic); coatings (aluminum, emulsion, industrial, marine, paper, traffic, wire/cable), inks, rubber (cements, mechanical and molded goods, tires), concrete-curing compds., caulking compds.; processing aid in rubber compds.; food-contact adhesives, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1200; sp.gr. 1.09; soften. pt. (R&B) 150 C; iodine no. (Wijs) 107; flash pt. (COC) 550 F

**Nevex® 100** [Neville]

*Chem. Descrip.:* Modified hydrocarbon resin

*Uses:* Compatibilizer for wax and ethylene-vinyl acetate systems; in adhesives (hot-melt, hot-melt pressure-sensitive, mastic, pressure-sensitive); coatings (can & drum, industrial, paper); rubber (cements, mechanical and molded goods, tires); reinforcing agent, processing aid, dispersant, softener for NR, SBR; food-contact adhesives, coatings, paper, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 12 (50% in toluene) solid, flake; sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 640; sp.gr. 1.120; soften. pt. (R&B) 100 C; acid no. < 1; iodine no. (Wijs) 55; flash pt. (COC) 410 F

**Nevpene® 9500** [Neville]

*Chem. Descrip.:* Modified hydrocarbon resin

*Uses:* Tackifier, plasticizer, softener, process aid for NR, SR, latexes, adhesives (hot-melt, hot-melt pressure-sensitive, mastic, pressure-sensitive), coatings (emulsion, fabric, paper), rubber (cements, mech. goods, molded goods, tires), caulks; food-contact adhesives, coatings, paper, rubber articles, wood preservatives

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Gardner 8 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1040; sp.gr. 1.050; soften. pt. (R&B) 95 C; acid no. < 1; iodine no. (Wijs) 97; flash pt. (COC) 450 F

**Nevtac® 10°** [Neville]

*Chem. Descrip.:* Syn. polyterpene resin

CAS 9003-74-1

*Uses:* Tackifier for PP, PE, NR, SIS block copolymers, EVA, polyisoprene,

and butyl rubber used in solv. and hot-melt adhesives, coatings, rubber prods., concrete-curing compds., and caulking compds.; food pkg. pressure-sensitive adhesives, coatings, paper, rubber articles

*Regulatory:* FDA 21 CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 6 (50% in toluene) liq.; sol. in esters, ethers, ketones (except acetone), aromatic, naphthenic, chlorinated, and terpene hydrocarbons; m.w. 363; sp.gr. 0.99; soften. pt. (R&B) 10 C; flash pt. (COC) 400 F

**Nevtac® 80** [Neville]

*Chem. Descrip.:* Syn. polyterpene resin

CAS 9003-74-1

*Uses:* Tackifier for PP, PE, NR, SIS block copolymers, EVA, polyisoprene, and butyl rubber used in solv. and hot-melt adhesives, coatings, rubber prods., concrete-curing compds., and caulking compds.; food pkg. pressure-sensitive adhesives, coatings, paper, rubber articles

*Regulatory:* FDA 21 CFR §175.125, 175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 5 (50% in toluene) solid; sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1070; sp.gr. 0.97; soften. pt. (R&B) 81 C; flash pt. (COC) 440 F

**Nevtac® 100** [Neville]

*Chem. Descrip.:* Syn. polyterpene resin

CAS 9003-74-1

*Uses:* Tackifier for PP, PE, NR, SIS block copolymers, EVA, polyisoprene, and butyl rubber used in solv. and hot-melt adhesives, coatings, rubber prods., concrete-curing compds., and caulking compds.; food pkg. pressure-sensitive adhesives, coatings, paper, rubber articles

*Regulatory:* FDA 21 CFR §175.125, 175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 3+ (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1215; sp.gr. 0.97; soften. pt. (R&B) 101 C; flash pt. (COC) 450 F

**Nevtac® 115** [Neville]

*Chem. Descrip.:* Syn. polyterpene resin

CAS 9003-74-1

*Uses:* Tackifier for PP, PE, NR, SIS block copolymers, EVA, polyisoprene, and butyl rubber used in solv. and hot-melt adhesives, coatings, rubber prods., concrete-curing compds., and caulking compds.; food pkg. pressure-sensitive adhesives, coatings, paper, rubber articles

*Regulatory:* FDA 21 CFR §175.125, 175.105, 175.300, 175.320, 176.170, 176.180, 177.1210, 177.2600

*Properties:* Gardner 6 (50% in toluene) solid, flakes; sol. in esters, ethers, ketones (except acetone), and chlorinated, aromatic, naphthenic, and terpene hydrocarbons; m.w. 1405; sp.gr. 0.99; soften. pt. (R&B) 114 C; flash pt. (COC) 460 F

**Newpelt-1000** [NOF]

*Chem. Descrip.:* Alkyl ketene dimer

*Uses:* Sizing agent for paper industry; neutral

*Properties:* Lt. yellowish solid

**Newrex Paste H** [NOF]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Detergent for textile scouring, industrial cleaners, food industry; dispersant for pulp/paper, dyestuffs, pigments, petrol. and tar; anticaking agent in agric.; molding additive in ceramics; emulsifier for plastics and rubber; antidust agent for mining industry

*Properties:* Lt. yel. paste; anionic

**Newrex Powd. F** [NOF]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Detergent for textile scouring, industrial cleaners, food industry; dispersant for pulp/paper, petrol. and tar industries; anticaking agent in agric.; molding additive in ceramics; antidust agent for mining industry

*Properties:* Wh. powd.; anionic

**Newrex R** [NOF]

*Chem. Descrip.:* Sodium n-dodecylbenzene sulfonate (soft type)

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Detergent for cosmetic shampoos, textile scouring, industrial cleaners, food industry; dispersant for pulp/paper, petrol. and tar industries; anticaking agent in agric.; molding additive in ceramics; emulsifier for plastics and

- rubber; additive in coal mining  
*Properties:* Lt. yel. paste; anionic
- Niccadine 400** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special polyamide resin  
*Uses:* Drier adhering agent for paper making process for thin papers such as tissues and toilet rolls  
*Use Level:* Mod. diluted sol'n. to riffer, head box, etc. for total of 0.1-0.5% per pulp or spray mod. diluted sol'n. to dryer  
*Properties:* Straw colored transparent liq.; pH 6.5
- Niccasolt FT-1** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Pitch control agent for pulp making process; prevents pitch trouble when applied to continuous washing to felt  
*Properties:* Colorless transparent liq.; pH 6.5 (5%); cationic
- Niccasolt O-2** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Special activator  
*Uses:* Pitch control agent for pulp making process; prevents pitch trouble by removing resins in oxygen bleaching tower  
*Use Level:* > 0.05% to pulp during oxygen mixing  
*Properties:* Yellowish transparent liq.; pH 10 (5%); nonionic
- Niccasolt PTOL** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Acrylic polymer  
*Uses:* Pitch control agent for pulp making process; prevents re-coagulation of pitch and lowers its tackiness; proves effective at low concs., and more so when talc, etc. are jointly used  
*Use Level:* 0.02-0.1% per pulp to mixing chest and machine chest  
*Properties:* Lt. brownish wh. visc. liq.; pH 5 (5%); cationic
- Niccasunclean FP-100** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Nat. extracts, activator  
*Uses:* Felt detergent for papermaking process; of surfactant and nat. solv. type, provides outstanding results used in continuous and intermittent washing  
*Use Level:* Shower 0.03-0.1% diluted sol'n. continuously  
*Properties:* Straw colored limpid visc. liq.; pH 12; nonionic
- Niccasunclean TA** [Nicca Chem. Co Ltd]  
*Chem. Descrip.:* Compd. of inorg. acid, activator  
*Uses:* Felt detergent for papermaking process; of acid type for blended felts, low foaming; provides outstanding results used in continuous washing  
*Use Level:* Shower 0.03-0.1% diluted sol'n. continuously  
*Properties:* Straw colored transparent liq.; pH 2 (1%); nonionic
- Nipabenzyl** [Nipa Inc; Nipa Labs]  
*Chem. Descrip.:* Benzylparaben  
 CAS 94-18-8; EINECS/ELINCS 202-311-9  
*Uses:* Preservative, bactericide, fungicide for pharmaceuticals, cosmetics, foods, medicinal preps., industrial applics.; chemical intermediate; color developing agent for heat-sensitive recording papers  
*Regulatory:* BP, NF, Eur.Ph., FCC compliance  
*Properties:* Wh. fine cryst. powd., odorless, tasteless; sol. (g/100 g solv.) 102 g acetone, 79 g methanol, 72 g ethanol, 60 g lanolin, 42 g ether; m.w. 228.25; m.p. 110-112 C; 99% assay  
*Toxicology:* LD50 (oral, rat) > 5 g/kg; nonirritating to skin, sl. harmful by ingestion, sl. irritating to eyes
- Nipacide® BIT 10** [Nipa Inc]  
*Chem. Descrip.:* 1,2-Benzisothiazolin-3-one sol'n. (9.5%)  
 CAS 2634-33-5; EINECS/ELINCS 220-120-9  
*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions; slimicide for food-contact paper mfg.; glycol-based; effective against yeast; stable to light and at pH 2-12; nonflamm.; nonexplosive  
*Use Level:* 0.2-0.4%  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA reg. no. 49403-26; BGA XIV, XXXVI  
*Properties:* Beige to brn. clear liq.; misc. with water and oil; pH 8-9 (0.1% aq.)  
*Toxicology:* Low toxicity  
*Storage:* Store @ 4-40 C away from direct sunlight
- Nipacide BIT 10A** [Nipa Inc; Nipa Labs]  
*Chem. Descrip.:* 1,2-Benzisothiazolin-3-one  
 CAS 2634-33-5; EINECS/ELINCS 220-120-9  
*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions, fountain sol'n.s., metalworking fluids, and latexes, emulsion paints, water-based adhesives, casein and rosin disp., textile spin-finish sol'n.s., metalworking fluids, fountain sol'n.s., min. slurries, pigment disp., water treatment, textile coatings and sol'n.s., leather applics.; food pkg. adhesives, paper; slimicide in food-contact paper; effective against yeast; stable to light and at pH 2-12; nonflamm.; nonexplosive  
*Use Level:* 0.04-0.09% (latexes), 0.04-0.18% (o/w emulsions), 0.04-0.26% (emulsion paint, in-can preservation), 0.02-0.09% (adhesives), 0.03-0.09% (paper coatings)  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; EPA reg. no. 49403-14; BGA XIV, XXXVI  
*Properties:* Beige to brn. clear or faintly turbid liq.; misc. with water and oil; sp.gr. 1.18; visc. 225 cps; flash pt. (Seta) > 93.3 C; pH 8-9 (0.1% aq.)  
*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; low toxicity; components are known sensitizers; in conc. form may cause chem. burns, skin and eye irritation and/or skin sensitization; harmful if swallowed or absorbed thru skin  
*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate  
*Precaution:* Corrosive  
*Storage:* Store @ 4-40 C away from direct sunlight in dry place in closed containers; do not store @ elevated temps.; keep from freezing
- Nipacide® BIT AS** [Nipa Inc; Nipa Labs]  
*Chem. Descrip.:* 1,2-Benzisothiazolin-3-one (33%) aq. sol'n.  
 CAS 2634-33-5; EINECS/ELINCS 220-120-9  
*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions; slimicide for food-contact paper mfg.; water-based; effective against yeast; stable to light and at pH 2-12; nonflamm.; nonexplosive  
*Use Level:* 0.1-0.2%  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; BGA XIV, XXXVI  
*Properties:* Buff opaque liq.; sol. in water @ 10% (disperses above this level); insol. in oil; pH 6.6-7.5 (0.1% aq.)  
*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; low toxicity; components are known sensitizers  
*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate  
*Precaution:* Corrosive  
*Storage:* Store @ 4-40 C away from direct sunlight
- Nipacide® BKX** [Nipa Inc; Nipa Labs]  
*Chem. Descrip.:* Chlorinated/nonchlorinated isothiazolinones and bromonitropropanediol  
*Uses:* Biocide, bactericide, fungicide for aq. prods. incl. adhesives, polymer emulsions, metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions; slimicide for food-contact paper mfg.; water-based; stable to light and at pH 4-9; nonflamm.; nonexplosive  
*Use Level:* 0.1-0.2%  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; BGA XIV, XXXVI  
*Properties:* Pale yel. clear liq.; misc. with water; insol. in oil; pH 7 (0.1% aq.)  
*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; low toxicity; components are not known sensitizers  
*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate  
*Storage:* Store @ 4-40 C away from direct sunlight

**Nipacide® CBX A** [Nipa Inc]

*Chem. Descrip.:* Benzisothiazolinone, chlormethyl isothiazolinone, and methyl isothiazolinone aq. disp.

*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions; slimicide for food-contact paper mfg.; effective against yeast; stable to light and at pH 4-10; nonflamm.; nonexplosive

*Use Level:* 0.1-0.2%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; BGA XIV, XXXVI

*Properties:* Buff opaque liq.; misc. with water; insol. in oil; pH 7 (0.1% aq.)

*Toxicology:* LD50 (oral, rat) 2000 mg/kg; low toxicity; components are known sensitizers

*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate

*Precaution:* Corrosive

*Storage:* Store @ 4-40 C away from direct sunlight

**Nipacide® CFX2** [Nipa Labs]

*Chem. Descrip.:* Chlorinated and nonchlorinated isothiazolinones plus ethyl glycol bis hemiformal

*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact polymer emulsions; slimicide for food-contact paper mfg.; water-based; effective against yeast; esp. rec. for use at high ambient temps.; stable to light and at pH 4-10; nonflamm.; nonexplosive

*Use Level:* 0.1-0.3%

*Regulatory:* BGA XIV, XXXVI

*Properties:* Yel. clear liq.; misc. with water; insol. in oil; pH 7.5 (0.1% aq.)

*Toxicology:* LD50 (oral, rat) 2531 mg/kg; low toxicity; components are known sensitizers

*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate

*Precaution:* Corrosive

*Storage:* Store @ 4-40 C away from direct sunlight

**Nipacide® CFX3** [Nipa Labs]

*Chem. Descrip.:* Chlorinated and nonchlorinated isothiazolinones plus ethyl glycol bis hemiformal

*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact polymer emulsions; slimicide for food-contact paper mfg.; water-based; effective against yeast; esp. rec. for use at high ambient temps.; stable to light and at pH 4-10; nonflamm.; nonexplosive

*Use Level:* 0.1-0.3%

*Regulatory:* BGA XIV, XXXVI

*Properties:* Yel. clear liq.; misc. with water; insol. in oil; pH 7.5 (0.1% aq.)

*Toxicology:* LD50 (oral, rat) 3965 mg/kg; low toxicity; components are known sensitizers

*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate

*Precaution:* Corrosive

*Storage:* Store @ 4-40 C away from direct sunlight

**Nipacide® CI** [Nipa Inc]

*Chem. Descrip.:* Chlormethyl isothiazolinone and methyl isothiazolinone

*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions; slimicide for food-contact paper mfg.; water-based; effective against yeast; stable to light and at pH 4-9; nonflamm.; nonexplosive

*Use Level:* 0.01-0.03%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; BGA XIV, XXXVI

*Properties:* Yel. clear liq.; misc. with water; insol. in oil; pH 7.5 (0.1% aq.); 14% act.

*Toxicology:* LD50 (oral, rat) 3965 mg/kg; low toxicity; components are known sensitizers

*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate

*Precaution:* Corrosive

*Storage:* Store @ 4-40 C away from direct sunlight

**Nipacide® CI 15** [Nipa Inc]

*Chem. Descrip.:* Chlormethyl isothiazolinone and methyl isothiazolinone, stabilized sol'n.

*Uses:* Industrial biocide, preservative, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions; slimicide for food-contact paper mfg.; water-based; effective against yeast; stable to light and at pH 4-9; nonflamm.; nonexplosive

*Use Level:* 0.1-0.3%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; BGA XIV, XXXVI

*Properties:* Yel. clear liq.; misc. with water; insol. in oil; pH 7.5 (0.1% aq.); 1.5% act.

*Toxicology:* LD50 (oral, rat) 3965 mg/kg; low toxicity; components are known sensitizers

*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate

*Storage:* Store @ 4-40 C away from direct sunlight

**Nipacide® FC** [Nipa Labs]

*Chem. Descrip.:* 1,2-Ethanedithiolbis (oxy) bismethanol conc.

*Uses:* Biocide, bactericide, fungicide for adhesives, polymer emulsions, fountain sol'n.s., metalworking fluids, and paints; preservative for food-contact polymer emulsions; slimicide for food-contact paper mfg.; stable to light and at pH 6-10; nonflamm.; nonexplosive

*Use Level:* 0.1-0.3%

*Regulatory:* BGA XIV, XXXVI

*Properties:* Clear liq.; misc. with water; insol. in oil; pH 7.0 (0.1% aq.)

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; low toxicity; components are not known sensitizers

*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate

*Precaution:* Corrosive

*Storage:* Store @ 4-40 C away from direct sunlight

**Nipacide® OPP** [Nipa Inc]

*Chem. Descrip.:* o-Phenyl phenol

CAS 90-43-7; EINECS/ELINCS 201-993-5

*Uses:* Disinfectant, preservative for detergents, cooling lubricants, textile/leather finishing, adhesives, paper, citrus fruit, polishes, wax emulsions, ceramic glazes, soap sol'n.s.

*Use Level:* 0.15-1.3% (citrus dips); 10-15% (disinfectant concs.), 0.1-0.2% (cooling lubricants), 0.08-2% (adhesives)

*Properties:* Cream to wh. flakes, sl. phenolic odor; sol. (g/100 g): 800 g in methanol, 660 g acetone, 590 g ethanol, 490 g ether, 300 g propylene glycol, 275 g ethylene glycol, 270 g benzene; m.w. 170; bulk dens. 0.60-0.65; m.p. 56-58 C; b.p. 286 C; flash pt. (COC) 138 C; 99.5% min. purity

*Toxicology:* LD50 (rats) 2000 mg/kg; harmful by ingestion; corrosive to skin and eyes

*Storage:* Unlimited shelf life if protected from light and moisture; keep containers tightly closed

**Nipacide® XRP** [Nipa Inc; Nipa Labs]

*Chem. Descrip.:* Chlorinated/nonchlorinated isothiazolinones and bromonitropropanediol

*Uses:* Biocide, bactericide, fungicide for water-based prods. incl. adhesives, polymer emulsions, metalworking fluids, and paints; preservative for food-contact adhesives, paper, polymer emulsions; slimicide for food-contact paper mfg.; water-based; effective against yeast; stable to light and at pH 4-9; nonflamm.; nonexplosive

*Use Level:* 0.1-0.2%

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180, 176.300; BGA XIV, XXXVI

*Properties:* Pale yel. clear liq.; misc. with water; insol. in oil; pH 7.0 (0.1% aq.)

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg; low toxicity; components are not known sensitizers

*Environmental:* Biodeg. when diluted below the min. inhibitory conc.; does not bioaccumulate

*Precaution:* Corrosive

*Storage:* Store @ 4-40 C away from direct sunlight

**Nipolon** [Tosoh]

*Chem. Descrip.:* LDPE

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* For blown film (pkg., heavy-duty bags, agric. film, diaper backings,

stretch film, shrink film), extrusion coating and laminating (kraft papers, milk carton stocks, box liners), blow molding, inj. molding (housewares, artificial flowers); offers superior elasticity, transparency, shock resist., and processing chars.

**Nipolon-L** [Tosoh]

*Chem. Descrip.:* LLDPE  
CAS 9002-88-4

*Uses:* For blown film (pkg., heavy-duty bags, agric. film, diaper backings, stretch film, shrink film), extrusion coating and laminating (kraft papers, milk carton stocks, box liners), blow molding, inj. molding (housewares, artificial flowers); offers superior elasticity, transparency, shock resist., and processing chars.

**Nipolon®-Z** [Tosoh]

*Chem. Descrip.:* LLDPE  
CAS 9002-88-4

*Uses:* For blown film (general purpose pkg., heavy duty bags, agric. film, diaper backings, stretch film, shrink film), extrusion coating and laminating (kraft papers, milk carton stocks, polymeric film, box liners), blow molding (box liners); inj. molding (housewares, artificial flowers)

**Nirez® 7042** [Arizona]

*Chem. Descrip.:* Terpene phenolic resin

*Uses:* Tackifier for food-contact adhesives/pressure-sensitive adhesives/resinous and polymeric coatings/paper/paperboard, and closures with sealing gaskets; environmentally friendly

*Regulatory:* FDA 21CFR §175.105, 175.125, 175.300, 176.170, 176.180, 177.1210

*Properties:* Gardner 5 color; soften. pt. (R&B) 147 C

**Nissan Cation AB** [NOF]

*Chem. Descrip.:* Octadecyl trimethyl ammonium chloride  
CAS 112-03-8; EINECS/ELINCS 203-929-1

*Uses:* Germicide (duckweed killer), dispersant, coagulant in water treatment, petrol., paper, and textile industries; antistat in plastics, pulp/paper industries; pigment coating agent; textile softener; emulsifier in photography; germicide in foods, fermentation

*Properties:* Lt. yel. liq.; 23% min. act.; cationic

**Nissan Cation BB** [NOF]

*Chem. Descrip.:* Dodecyl trimethyl ammonium chloride  
CAS 112-00-5; EINECS/ELINCS 203-927-0

*Uses:* Germicide (duckweed killer) for water treatment, petroleum industry; antistat, softener, germicide for textiles, pulp/paper; plastics antistat; detergent sanitizer; rinse agent; pigment coating agent; germicide for food prep., fermentation; emulsifier for photography

*Properties:* Lt. yel. liq.; 30% min. act.; cationic

**Nissan Cation F2-20R** [NOF]

*Chem. Descrip.:* Coco-alkyl dimethyl benzyl ammonium chloride

*Uses:* Intermediate for cationic surfactants; germicide (duckweed killer) in water treatment, petroleum, textile, and paper industries; antistat in plastics, pulp/paper; germicide in foods and fermentation

*Properties:* Colorless liq.; 19-21% act.; cationic

**Nissan Cation F2-40E** [NOF]

*Chem. Descrip.:* Coco-alkyl dimethyl benzyl ammonium chloride

*Uses:* Intermediate for cationic surfactants; germicide (duckweed killer) in water treatment, petroleum, textile, and paper industries; antistat in plastics, pulp/paper; germicide in foods and fermentation

*Properties:* Colorless liq.; 40-44% min. act.; cationic

**Nissan Cation F2-50** [NOF]

*Chem. Descrip.:* Coco-alkyl dimethyl benzyl ammonium chloride

*Uses:* Intermediate for cationic surfactants; germicide (duckweed killer) in water treatment, petroleum, textile, and paper industries; antistat in plastics, pulp/paper; germicide in foods and fermentation

*Regulatory:* JP compliance

*Properties:* Lt. yel. liq.; 50% min. act.; cationic

**Nissan Cation F2-50E** [NOF]

*Chem. Descrip.:* Coco-alkyl dimethyl benzyl ammonium chloride

*Uses:* Intermediate for cationic surfactants; germicide (duckweed killer) in water treatment, petroleum, textile, and paper industries; antistat in plastics, pulp/paper; germicide in foods and fermentation

*Regulatory:* JP compliance

*Properties:* Colorless liq.; 48-52% min. act.; cationic

**Nissan Cation F2-CONC.** [NOF]

*Chem. Descrip.:* Coco-alkyl dimethyl benzyl ammonium chloride

*Uses:* Intermediate for cationic surfactants; germicide (duckweed killer) in

water treatment, petroleum, textile, and paper industries; antistat in plastics, pulp/paper; germicide in foods and fermentation

*Properties:* Lt. yel. visc. liq.; 93% min. act.; cationic

**Nissan Cation FB** [NOF]

*Chem. Descrip.:* Coco-alkyl trimethyl ammonium chloride

CAS 61789-18-2; EINECS/ELINCS 263-038-9

*Uses:* Germicide (duckweed killer) for water treatment, petroleum industry; antistat, softener, germicide for textiles, pulp/paper; plastics antistat; detergent sanitizer; rinse agent; pigment coating agent; germicide for food prep., fermentation; emulsifier for photography

*Properties:* Lt. yel. liq.; 30% min. act.; cationic

**Nissan Cation M2-100** [NOF]

*Chem. Descrip.:* Tetradecyl dimethyl benzyl ammonium chloride

CAS 139-08-2; EINECS/ELINCS 205-352-0

*Uses:* Intermediate for cationic surfactants; germicide (duckweed killer) in water treatment, petroleum, textile, and paper industries; antistat in plastics, pulp/paper; germicide in foods

*Properties:* Wh. or lt. yel. cryst. powd.; 85% min. act.; cationic

**Nissan Cation MA** [NOF]

*Chem. Descrip.:* Tetradecylamine acetate

*Uses:* Corrosion inhibitor and germicide (duckweed killer) in water treatment and petrol. industries; pigment dispersant in paints; corrosion inhibitor in metals; asphalt emulsifier; antistat, germicide for textiles; powd. coating agent; mold release for rubber; ore flotation; plastics antistat; softener, germicide for pulp/paper

*Properties:* Wh. to lt. yel. flake; solid. pt. 60-72 C; amine no. 195 ± 12; 1% max. moisture; cationic

**Nissan Cation PB-40** [NOF]

*Chem. Descrip.:* Hexadecyl trimethyl ammonium chloride

CAS 112-02-7; EINECS/ELINCS 203-928-6

*Uses:* Germicide (duckweed killer), dispersant, coagulant for water treatment; germicide for petrol. industry, textiles; cosmetic rinses; plastics antistat; antistat, germicide for pulp/paper; emulsifier for photography; germicide for food prep., fermentation

*Properties:* Lt. yel. liq.; 40% min. act.; cationic

**Nissan Cation PB-300** [NOF]

*Chem. Descrip.:* Hexadecyl trimethyl ammonium chloride

CAS 112-02-7; EINECS/ELINCS 203-928-6

*Uses:* Germicide (duckweed killer), dispersant, coagulant for water treatment; germicide for petrol. industry, textiles; cosmetic rinses; plastics antistat; antistat, germicide for pulp/paper; emulsifier for photography; germicide for food prep., fermentation

*Properties:* Lt. yel. liq.; 26-29% act.; cationic

**Nissan Cation S2-100** [NOF]

*Chem. Descrip.:* Octadecyl dimethyl benzyl ammonium chloride

CAS 122-19-0; EINECS/ELINCS 204-527-9

*Uses:* Intermediate for cationic surfactants; germicide (duckweed killer) in water treatment; pigment dispersant in paints; germicide in petrol., textiles; textile softener; cosmetics rinses; antistat in plastics, pulp/paper; germicide in food prep.

*Properties:* Wh. or lt. yel. cryst. powd.; 85% min. act.; cationic

**Nissan Cation SA** [NOF]

*Chem. Descrip.:* Octadecylamine acetate

CAS 2190-04-7

*Uses:* Corrosion inhibitor and germicide (duckweed killer) in water treatment and petrol. industries; pigment dispersant in paints; corrosion inhibitor in metals; asphalt emulsifier; antistat, germicide for textiles; powd. coating agent; mold release for rubber; ore flotation; plastics antistat; softener, germicide for pulp/paper

*Properties:* Wh. to lt. yel. flake; solid. pt. 72-82 C; amine no. 159 ± 9; 1% max. moisture; cationic

**Nissan Cation VB** [NOF]

*Chem. Descrip.:* Docosyl trimethyl ammonium chloride

CAS 17301-53-0; EINECS/ELINCS 241-327-0

*Uses:* Germicide (duckweed killer) for water treatment; germicide for petroleum, textiles, foods, and pulp/paper industries; cosmetics rinse; plastics antistat; softener for textiles

*Properties:* Yellowish paste; 80% min. act.

**Nofluor** [3V/Paper]

*Chem. Descrip.:* Polycationic condensation prod.

*Uses:* Fluorescence quencher for recycled paper, in backwater, or in size-press sol'n.; removes residual fluorescence coming from optical brighteners

*Use Level:* 0.2-0.4%

*Regulatory:* DOT nonregulated; SARA §394.313 nonreportable

*Properties:* Brn. liq.; char. odor; misc. with water; sp.gr. 1.09-1.17; visc. 20-60 mPa·s; vapor pressure 15 mm Hg (20 C); m.p. < 0 C; b.p. ≈ 100 C; flash pt. > 100 C; pH 5.0-6.0

*Toxicology:* Nonirritating to skin/eyes; TSCA listed

*Environmental:* Do not discharge into drains or waterways

*Precaution:* Incompat. with oxidizers

*Hazardous Decomp. Prods.:* On burning, nitrogen and carbon oxides can be produced

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Keep containers tightly closed

#### Nofluor CA [3V/Paper; 3V Sigma]

*Chem. Descrip.:* Polycationic condensation prod.

*Uses:* Fluorescence quencher for recycled paper, or in backwater or size press sol'n.

*Use Level:* 0.25-0.60%

*Regulatory:* DOT nonregulated; SARA nonreportable

*Properties:* Brn. liq.; char. odor; misc. with water; sp.gr. 1.06-1.14; visc. 20-60 cps (20 C); vapor pressure 15 mm Hg (20 C); b.p. 100 C; flash pt. > 100 C; pH 5-6

*Toxicology:* Nonirritating to skin, eyes; TSCA listed

*Environmental:* LC50 (48 h, cararius auratus) 450 mg/l; do not empty into drains, watercourses

*Precaution:* Incompat. with oxidizers

*Hazardous Decomp. Prods.:* On burning, nitrogen and carbon oxides and HCl can form

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Keep tightly closed; freezing may damage prod.

#### Nofluor N [3V/Paper; 3V Sigma]

*Chem. Descrip.:* Polycationic condensation prod.

*Uses:* Fluorescence quencher for recycled paper, or in backwater or size press sol'n.

*Use Level:* 0.2-0.4%

*Regulatory:* DOT nonregulated; SARA nonreportable

*Properties:* Dk. brn. liq.; char. odor; misc. with water; sp.gr. 1.11-1.19; visc. 20-60 cps (20 C); vapor pressure 15 mm Hg (20 C); b.p. 100 C; flash pt. > 100 C; pH 5-6

*Toxicology:* Nonirritating to skin, eyes; TSCA listed

*Environmental:* LC50 (48 h, cararius auratus) 450 mg/l; do not empty into drains, watercourses

*Precaution:* Incompat. with oxidizers

*Hazardous Decomp. Prods.:* On burning, nitrogen and carbon oxides and HCl can form

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Keep tightly closed; freezing may damage prod.

#### Nonatell™ 1052 [Shell]

*Chem. Descrip.:* Proprietary

*Uses:* Deinking surfactant for use on groundwood finish

*Properties:* Liq.; 100% conc.

#### Nonatell™ 1061, 1075, 1088, 1089, 1092 [Shell]

*Chem. Descrip.:* Proprietary

*Uses:* Deinking surfactants

*Properties:* Liqs. (exc. 1075, paste); 100% conc.

#### Nonatell™ 1123 [Shell]

*Chem. Descrip.:* Proprietary

*Uses:* Pulp/paper deinking surfactant for use with newsprint, magazine, and telephone directory furnishes in wash, flotation/wash, and short sequence deinking systems

*Properties:* Liq.; 100% conc.; nonionic

#### Nonionic 1017-R [Lambent Tech.]

*Chem. Descrip.:* Meroxapal 171

CAS 9003-11-6

*Uses:* Surfactant for detergents, textiles, gelatin, wetting agents, antistats, water treatment, antifoams, cosmetics, demulsifiers, pharmaceutical, visc. control, emulsifiers, dedusters, dispersants, pulp/paper, lubricants, agric., dishwashing rinse aids, cutting and grinding oils, paints; low foaming

*Properties:* Colorless clear liq.; sol. in oil; m.w. 1900; sp.gr. 1.02; visc. 300 cP; HLB 2.5; cloud pt. 33 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1025-R [Lambent Tech.]

*Chem. Descrip.:* EO/PO block polymer

CAS 9003-11-6

*Uses:* Surfactant, detergent, antifoam, visc. control agent, dispersant, demulsifier for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, water treatment, rinse aids (dishwashing); low foaming

*Properties:* Colorless clear liq.; sol. in oil; m.w. 2700; sp.gr. 1.02; visc. 460 cP; HLB 2.1; cloud pt. 27 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1035-L [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 105

CAS 9003-11-6

*Uses:* Detergent, antifoam, wetting agent, emulsifier, antistat, demulsifier, visc. modifier, deduster, gellant, dispersant for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints

*Properties:* Liq.; m.w. 1900; sp.gr. 1.06; visc. 375 cP; HLB 18.5; pour pt. 7 C; cloud pt. 77 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1044-L [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 124

CAS 9003-11-6

*Uses:* Detergent, antifoam, wetting agent, emulsifier, antistat, demulsifier, visc. modifier, deduster, gellant, dispersant for metalworking lubricants, personal care prods., paints, paper, pharmaceuticals, agric., etc.

*Properties:* Liq.; m.w. 2200; sp.gr. 1.05; visc. 400 cP; HLB 16.0; pour pt. 16 C; cloud pt. 67 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1061-L [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 181

CAS 9003-11-6

*Uses:* Detergent, antifoam, wetting agent, emulsifier, antistat, demulsifier, visc. modifier, deduster, gellant, dispersant for metalworking lubricants, personal care prods., paints, paper, agric., textiles, etc.

*Properties:* Liq.; m.w. 2000; sp.gr. 1.02; visc. 300 cP; HLB 3.0; pour pt. -29 C; cloud pt. 24 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1062-L [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 182

CAS 9003-11-6

*Uses:* Detergent, antifoam, wetting agent, emulsifier, antistat, demulsifier, visc. modifier, deduster, gellant, dispersant for metalworking lubricants, personal care prods., paints, paper, agric., textiles, etc.

*Properties:* Liq.; m.w. 2500; sp.gr. 1.03; visc. 450 cP; HLB 7.0; pour pt. -4 C; cloud pt. 32 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1064-L [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 184

CAS 9003-11-6

*Uses:* Detergent, antifoam, wetting agent, emulsifier, antistat, demulsifier, visc. modifier, deduster, gellant, dispersant for metalworking lubricants, personal care prods., paints, paper, agric., textiles, etc.

*Properties:* Liq.; m.w. 2900; sp.gr. 1.05; visc. 700 cP; HLB 15.0; pour pt. 16 C; cloud pt. 58 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1068-F [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 188

CAS 9003-11-6

*Uses:* Detergent, antifoam, wetting agent, emulsifier, antistat, demulsifier, visc. modifier, deduster, gellant, dispersant for metalworking lubricants, personal care prods., paints, paper, agric., textiles, etc.

*Properties:* Flake; m.w. 8400; visc. 1000 cP (77 C); HLB 29.0; pour pt. 52 C; cloud pt. > 100 C (1% aq.); 100% conc.; nonionic

#### Nonionic 1077-F [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 217

CAS 9003-11-6

*Uses:* Surfactant for personal care applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives

*Properties:* Flake; m.w. 6600; visc. 480 cP (77 C); HLB 24.5; pour pt. 48 C; cloud pt. > 100 C (1% aq.); nonionic

#### Nonionic 1087-F [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 237

CAS 9003-11-6

*Uses:* Surfactant for personal care applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives

*Properties:* Flake; m.w. 7700; visc. 700 cP (77 C); HLB 24.0; pour pt. 49 C; cloud pt. > 100 C (1% aq.); nonionic

#### Nonionic 1088-F [Lambent Tech.]

*Chem. Descrip.:* Poloxamer 238

CAS 9003-11-6

*Uses:* Detergent, antifoam, wetting agent, emulsifier, antistat, demulsifier,

- visc. modifier, deduster, gellant, dispersant for metalworking lubricants, personal care prods., paints, paper, agric., textiles, etc.  
*Properties:* Flake; m.w. 11,400; visc. 2300 cP (77 C); HLB 28.0; pour pt. 54 C; cloud pt. > 100 C (1% aq.); 100% conc.; nonionic
- Nonionic 1108-F** [Lambent Tech.]  
*Chem. Descrip.:* Poloxamer 338  
 CAS 9003-11-6  
*Uses:* Surfactant for personal care applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Flake; m.w. 14,600; visc. 2800 cP (77 C); HLB 27.0; pour pt. 57 C; cloud pt. > 100 C (1% aq.); nonionic
- Nonionic 1127-F** [Lambent Tech.]  
*Chem. Descrip.:* Poloxamer 407  
 CAS 9003-11-6  
*Uses:* Surfactant for personal care applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Flake; m.w. 12,600; visc. 3100 cP (77 C); HLB 22.0; pour pt. 56 C; cloud pt. > 100 C (1% aq.); nonionic
- Nonionic 2017-R** [Lambent Tech.]  
*Chem. Descrip.:* Meroxapal 172  
 CAS 9003-11-6  
*Uses:* Detergent, antifoam, dispersant, demulsifier, visc. control agent for personal care prods., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, water treatment, dishwashing rinses; low foaming  
*Properties:* Colorless clear liq.; sol. in oil; m.w. 2150; sp.gr. 1.03; visc. 400 cP; HLB 4.1; cloud pt. 38 C (1% aq.); 100% conc.; nonionic
- Nonionic 2025-R** [Lambent Tech.]  
*Chem. Descrip.:* EO/PO block polymer  
 CAS 9003-11-6  
*Uses:* Detergent, antifoam, dispersant, demulsifier, visc. control agent for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, dishwashing rinses  
*Properties:* Liq.; m.w. 3100; sp.gr. 1.04; visc. 680 cP; HLB 3.5; cloud pt. 29 C (1%); 100% conc.; nonionic
- Nonionic 4017-R** [Lambent Tech.]  
*Chem. Descrip.:* EO/PO block polymer  
 CAS 9003-11-6  
*Uses:* Detergent, antifoam, dispersant, demulsifier, visc. control agent for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, dishwashing rinses  
*Properties:* Liq.; m.w. 2650; sp.gr. 1.05; visc. 600 cP; HLB 6.7; cloud pt. 46 C (1%); 100% conc.; nonionic
- Nonionic 4025-R** [Lambent Tech.]  
*Chem. Descrip.:* EO/PO block polymer  
 CAS 9003-11-6  
*Uses:* Detergent, antifoam, dispersant, demulsifier, visc. control agent for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, water treatment, dishwashing rinses  
*Properties:* Colorless clear liq.; sol. in oil; liq.; m.w. 3600; sp.gr. 1.05; visc. 1110 cP; HLB 6.0; cloud pt. 40 C (1% aq.); 100% conc.; nonionic
- Nonionic 5025-R** [Lambent Tech.]  
*Chem. Descrip.:* EO/PO block polymer  
 CAS 9003-11-6  
*Uses:* Detergent, antifoam, dispersant, demulsifier, visc. control agent for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, water treatment, dishwashing rinses  
*Properties:* Paste; sol. in oil; m.w. 4250; sp.gr. 1.04 (60 C); HLB 9.0; cloud pt. 44 C (1% aq.); 100% conc.; nonionic
- Nonionic 8017R** [Lambent Tech.]  
*Chem. Descrip.:* EO/PO block polymer  
 CAS 9003-11-6  
*Uses:* Surfactant for pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, water treatment; low foaming  
*Properties:* Flake; sol. in oil; m.w. 7000; sp.gr. 1.06 (77 C); HLB 13.4; cloud pt. 81 C (1% aq.); nonionic
- Nonionic 8025R** [Lambent Tech.]  
*Chem. Descrip.:* EO/PO block polymer  
 CAS 9003-11-6  
*Uses:* Surfactant for detergents, pulp/paper, cosmetics, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives, water treatment; low foaming  
*Properties:* Flake; sol. in oil; m.w. 8000; sp.gr. 1.06; cloud pt. 45 C (1% aq.); nonionic
- Nonionic GR-25** [Lambent Tech.]  
*Chem. Descrip.:* PEG-25 castor oil  
 CAS 61791-12-6  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Sol. hazy in water; sp.gr. 1.05; dens. 8.6 lb/gal; HLB 13.0; pour pt. 5 C; nonionic
- Nonionic GR-40** [Lambent Tech.]  
*Chem. Descrip.:* PEG-40 castor oil  
 CAS 61791-12-6  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Sol. in water; sp.gr. 1.05; dens. 8.7 lb/gal; HLB 14.5; pour pt. 14 C; cloud pt. 59-64 C (1%); nonionic
- Nonionic GR-52** [Lambent Tech.]  
*Chem. Descrip.:* PEG-52 castor oil  
 CAS 61791-12-6  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Sol. in water; sp.gr. 1.07; dens. 8.9 lb/gal; HLB 16.0; pour pt. 18 C; cloud pt. 72-76 C (1%); nonionic
- Nonionic L-4** [Lambent Tech.]  
*Chem. Descrip.:* Laureth-4  
 CAS 9002-92-0; EINECS/ELINCS 226-097-1  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Disp. in water; sp.gr. 0.94; dens. 7.9 lb/gal; HLB 9.7; pour pt. 12 C; nonionic
- Nonionic L-12** [Lambent Tech.]  
*Chem. Descrip.:* Laureth-12  
 CAS 9002-92-0; EINECS/ELINCS 221-286-5  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Sol. in water; sp.gr. 1.00; dens. 8.3 lb/gal; HLB 14.7; pour pt. 29 C; cloud pt. 65-68 C (1% in 10% NaCl); nonionic
- Nonionic L-23** [Lambent Tech.]  
*Chem. Descrip.:* Laureth-23  
 CAS 9002-92-0  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Sol. in water; sp.gr. 1.05; dens. 8.7 lb/gal; HLB 16.9; pour pt. 33 C; cloud pt. 75-78 C (1% in 10% NaCl); nonionic
- Nonionic S-2** [Lambent Tech.]  
*Chem. Descrip.:* Steareth-2  
 CAS 9005-00-9  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Nondisp. in water; sp.gr. 0.98; dens. 8.1 lb/gal; HLB 4.9; pour pt. 43 C; cloud pt. 55 C (1%); nonionic
- Nonionic S-10** [Lambent Tech.]  
*Chem. Descrip.:* Steareth-10  
 CAS 9005-00-9  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Disp. in water; sp.gr. 1.02; dens. 8.5 lb/gal; HLB 12.4; pour pt. 38 C; cloud pt. 44 C (1%); nonionic
- Nonionic S-20** [Lambent Tech.]  
*Chem. Descrip.:* Steareth-20  
 CAS 9005-00-9  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Sol. hot in water; sp.gr. 1.04; dens. 8.7 lb/gal; HLB 15.3; pour pt. 38 C; cloud pt. 47 C (1%); nonionic
- Nonionic TD-6** [Lambent Tech.]  
*Chem. Descrip.:* Trideceth-6  
 CAS 24938-91-8  
*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives  
*Properties:* Disp. in water; sp.gr. 0.99; dens. 8.1 lb/gal; HLB 11.4; pour pt. 16 C; nonionic

**Nonionic TD-12** [Lambent Tech.]*Chem. Descrip.:* Trideceth-12

CAS 24938-91-8

*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives*Properties:* Sol. in water; sp.gr. 1.02; dens. 8.5 lb/gal; HLB 14.5; pour pt. 13 C; cloud pt. 53-60 C (1% in 10% NaCl); nonionic**Nonionic TD-15** [Lambent Tech.]*Chem. Descrip.:* Trideceth-15

CAS 24938-91-8

*Uses:* Surfactant for industrial and cosmetic applics., pulp/paper, pharmaceuticals, metalworking, lubricants, textiles, agric., paints, adhesives*Properties:* Sol. in water; sp.gr. 1.04; dens. 8.7 lb/gal; HLB 15.4; pour pt. 16 C; cloud pt. 65-70 C (1%); nonionic**Nonipax AAO** [Pax Group]*Chem. Descrip.:* Alkyl phenol ethoxylate*Uses:* Surfactant, detergent, cleaner, degreaser, emulsifier, dispersant, wetting agent, solubilizer, deinking agent in paper/pulp; high HLB; exc. compat.*Properties:* Liq.; water-sol.; 99% act.; nonionic**Nonipax OP 10** [Pax Group]*Chem. Descrip.:* Octoxynol-10

CAS 9002-93-1

*Uses:* Surfactant, detergent, cleaner, degreaser, emulsifier, dispersant, wetting agent, solubilizer, deinking agent in paper/pulp; high HLB; exc. compat.*Properties:* Liq.; water-sol.; 99% act.; nonionic**Nonipax X 100** [Pax Group]*Chem. Descrip.:* Nonoxynol-10

CAS 9016-45-9; EINECS/ELINCS 248-294-1

*Uses:* Surfactant, detergent, cleaner, degreaser, emulsifier, dispersant, wetting agent, solubilizer, deinking agent in paper/pulp; high HLB; exc. compat.*Properties:* Liq.; water-sol.; 99% act.; nonionic**Nonipax X 150** [Pax Group]*Chem. Descrip.:* Nonoxynol-15

CAS 9016-45-9

*Uses:* Surfactant, detergent, cleaner, degreaser, emulsifier, dispersant, wetting agent, solubilizer, deinking agent in paper/pulp; high HLB; exc. compat.*Properties:* Liq.; water-sol.; 99% act.; nonionic**Nopalcol 1-L** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-2 laurate

CAS 9004-81-3; EINECS/ELINCS 205-468-1

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; plasticizer, softener for NR, SR, latexes; latex stabilizer, emulsifier; general purpose*Properties:* Straw to amber-colored liq.; faint odor; sp.gr. 0.96; HLB 6.0; acid no. 8-10; iodine no. 9-11; sapon. no. 170-180; 98% act.; nonionic**Nopalcol 4-C** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-8 cocoate

CAS 61791-29-5

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 13.9; 99% act.; nonionic**Nopalcol 4-CH** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-8 cocoate (hyd.)

CAS 61791-29-5

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 13.9; 99% act.; nonionic**Nopalcol 4-L** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-8 laurate

CAS 9004-81-3; EINECS/ELINCS 253-458-0

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 13.1; 99% act.; nonionic**Nopalcol 4-O** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-8 oleate

CAS 9004-96-0

*Uses:* Emulsifier; dispersant for leather pigments; paper coating defoamer, plasticizer and leveling agent; emulsion polymerization*Properties:* Liq.; HLB 11.7; 95% act.; nonionic**Nopalcol 4-S** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-8 stearate

CAS 9004-99-3

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Paste; HLB 11.3; 99% act.; nonionic**Nopalcol 6-DO** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-12 dioleate

CAS 9005-07-6; EINECS/ELINCS 288-459-5

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 12.7; 98% act.; nonionic**Nopalcol 6-DTW** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-12 ditallowate*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Paste; HLB 11.2; 99% act.; nonionic**Nopalcol 6-L** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-12 laurate

CAS 9004-81-3

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 15.0; 99% act.; nonionic**Nopalcol 6-R** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-12 ricinoleate

CAS 9004-97-1

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 13.9; 99% act.; nonionic**Nopalcol 6-S** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-12 stearate

CAS 9004-99-3

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Paste; HLB 13.2; 99% act.; nonionic**Nopalcol 10-COH** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-20 hydrogenated castor oil

CAS 61788-85-0

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 10.3; 99% act.; nonionic**Nopalcol 12-CO** [Cognis/Chems. Group]*Chem. Descrip.:* PEG 1200 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 11.3; 99% act.; nonionic**Nopalcol 12-COH** [Cognis/Chems. Group]*Chem. Descrip.:* PEG 1200 hydrogenated castor oil

CAS 61788-85-0

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 11.3; 99% act.; nonionic**Nopalcol 19-CO** [Cognis/Chems. Group]*Chem. Descrip.:* PEG 1900 castor oil

CAS 61791-12-6

*Uses:* Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose*Properties:* Liq.; HLB 14.9; 99% conc.; nonionic**Nopalcol 30-TWH** [Cognis/Chems. Group]*Chem. Descrip.:* PEG-60 hydrogenated tallowate

Uses: Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose  
 Properties: Solid; HLB 18.0; 99% act.; nonionic

**Nopalcol 200** [Cognis/Chems. Group]

Chem. Descrip.: PEG 200

CAS 25322-68-3; EINECS/ELINCS 203-989-9

Uses: Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose

Properties: Liq.; 99% act.; nonionic

**Nopalcol 400** [Cognis/Chems. Group]

Chem. Descrip.: PEG 400

CAS 25322-68-3; EINECS/ELINCS 225-856-4

Uses: Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose

Properties: Liq.; 99% act.; nonionic

**Nopalcol 600** [Cognis/Chems. Group]

Chem. Descrip.: PEG 600

CAS 25322-68-3; EINECS/ELINCS 229-859-1

Uses: Emulsifier, plasticizer, lubricant, wetting agent, dispersant, binder, and thickener for emulsion polymerization, dry cleaning, leather, min. oil emulsions, paper industry, wall-tile mastics, solv. emulsions; general purpose

Properties: Paste; 99% act.; nonionic

**Nopco® NDW** [Cognis]

Chem. Descrip.: Proprietary organic mineral oil-based blend

Uses: Defoamer for SBR, PVAc, acrylic, water-sol. resins, architectural paints, adhesives, printing inks, latexes, pigment preps., polymerization, cleaners, wallpaper removers; food pkg. adhesives; defoamer in food-contact coatings; broad-spectrum, general-purpose

Use Level: 0.2-1.0% on total wt.

Regulatory: FDA 21CFR §175.105, 176.200; DOT regulated; SARA §311/312 reportable

Properties: Amber slightly hazy liq.; hydrocarbon odor; easily disp. in aq. systems; disp. in all latex and adhesive systems; sp.gr. 0.90; dens. 7.5 lb/gal; visc. 1100 cps; pH 6.5 (2%); flash pt. (PMCC) 79 C; VOC 27.8% (EPA Method 24); 100% act.

Toxicology: May cause skin, eye, and respiratory tract irritation, central nervous system depression; harmful if swallowed or inhaled; TSCA listed

Precaution: Combustible; avoid strong oxidizing agents

Hazardous Decomp. Prods.: CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 2; Reactivity 0

Storage: Store in dry place away from direct heat; may congeal or stratify if cold; allow to warm to R.T., mix well

**Nopco® NXZ** [Cognis]

Chem. Descrip.: Proprietary organic mineral oil-based blend

Uses: Defoamer for use with latex emulsions, waterborne architectural paints, plasters, adhesives (SBR, PVAc, acrylic, water-sol. resins), coating and latex printing; defoamer in atmospheric dyeing, printing and textile finishing processes; defoamer in food-contact paper coatings; food pkg. adhesives; broad-spectrum

Use Level: 0.2-1.0% on total wt.

Regulatory: FDA 21CFR §175.105, 176.200; SARA §311/312 reportable

Properties: Amber hazy liq.; hydrocarbon odor; forms stable wh. emulsions in water; sp.gr. 0.91; dens. 7.6 lb/gal; visc. 1100 cps; pH 7.0 (10%); flash pt. (PMCC) > 93 C; VOC 46.9% (EPA Method 24); 100% act.

Toxicology: May cause skin and eye irritation; harmful if swallowed or inhaled; TSCA listed

Environmental: BOD<sub>5</sub> 265 mg O<sub>2</sub>/g (5.1 mg/l sol'n.); COD 680 mg O<sub>2</sub>/g

Precaution: Avoid strong oxidizing agents

Hazardous Decomp. Prods.: CO<sub>2</sub>, CO

NFPA: Health 1; Flammability 1; Reactivity 0

Storage: Stratifies @ ambient temps.; mix well

**Nopco® Color-Sperse® 188A** [Cognis/Coatings & Inks; Cognis KGaA/Coatings; Sidobre-Sinnova SA]

Chem. Descrip.: Ethoxylated fatty acid

Uses: Low-foam surfactant/emulsifier, pigment wetting/dispersing agent; color acceptance agent for industrial coating systems, esp. latex paints; also for solvent-borne architectural paints, printing inks, adhesives, latex; food pkg. adhesives; defoamer in food-contact paper coatings; remedies defoamer-induced film defects; suitable for PVAc, acrylics, S/B, PVC/PVdC, alkyds,

HC resins, NC, PU, epoxy, polyesters

Use Level: 0.1-0.4% on total wt.

Regulatory: FDA 21CFR §175.105, 176.200

Properties: Amber clear liq.; dens. 8.3 lb/gal; visc. 100 cps; VOC 0.4% (EPA Method 24); 100% act.; nonionic

**Nopcogen 22-O** [Cognis/Chems. Group]

Chem. Descrip.: Oleyl imidazoline

CAS 95-38-5

Uses: Emulsifier for min. oil, kerosene, acidic systems; wetting agent, corrosion inhibitor used in textiles, asphalt, paper, agric., car wax formulations, acid detergents

Properties: Amber visc. liq.; sol. in water, acetic acid, HCl; misc. with pine oil and min. oil; cloud pt. 0 C; 90% act.; cationic

**Nopcosant® L** [Cognis/Polymer Surf.]

Chem. Descrip.: Sulfated naphthalene

Uses: Dispersant for aq. systems, NR and SR latex, paints, paper coatings, textiles, and leather; nonfoaming; stable to UV light

Properties: Lt. yel. liq., odorless; water-sol.; sp.gr. 1.18; dens. 9.8 lb/gal; pH 9.6 (5%); 25% solids; anionic

**Nopcosperse® 44** [Cognis/Coatings & Inks; Cognis KGaA/Coatings]

Chem. Descrip.: Sodium polyacrylate

CAS 9003-04-7

Uses: Pigment dispersant for aq. industrial paint systems, printing inks, adhesives, latex; dispersant in PVAc, acrylics, S/B, PVC/PVdC systems; defoamer in food-contact paper coatings; food pkg. adhesives; low foaming; effective without aux. wetting aids

Use Level: 0.5-3.0% based on pigment solids

Regulatory: FDA 21CFR §175.105, 176.200

Properties: Lt. amber clear liq.; sol. in water and glycols; dens. 10.3 lb/gal; visc. 90 cps; pH 7.8; VOC 3.5% (EPA Method 24); 35% act., 65% water; anionic

**Nopcote® 1675** [Geo Spec. Chems./Paper]

Chem. Descrip.: Glyoxal-based

Uses: Coating insolubilizer for use in pigmented paper coatings and size press applics.; renders coating binders more hydrophobic, resulting in improved paper surf. str.; allows reduction of starch solids resulting in improved bulk, opacity, smoothness; component of paper/paperboard in contact with dry foods; formaldehyde-free; stable at ambient temps.

Use Level: 2-4% dry resin on dry binder; 5% dry resin on dry binder (syn. binders)

Regulatory: FDA 21CFR §176.180

Properties: Yel. clear liq.; dens. 10.6 lb/gal; visc. 20-50 cps; pH 4-6; 55% solids

Storage: 6 mos shelf life at ambient temps.; store at 4 C min.; keep containers tightly closed when not in use to avoid loss due to evaporation

**Nopcote® 1680** [Geo Spec. Chems./Paper]

Chem. Descrip.: Ammonium zirconium carbonate

CAS 68309-95-5

Uses: Coating insolubilizer for use in pigmented paper coatings and size press applics.; inc. water resist. of finished sheet, resulting in improved paper surf. str.; food pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; formaldehyde-free; esp. effective in coating colors containing natural binders such as protein and casein; stable at ambient temps.; usable @ 5-70 C

Use Level: 6% dry resin on dry protein/casein; 4% dry resin on dry starch/PVOH/gum; 2% dry resin on dry latex

Regulatory: FDA 21CFR §175.105, 176.170, 176.180

Properties: Clear liq.; ammoniacal odor (dissipates on drying); dens. 10.8 lb/gal; visc. 40 cps; pH 9-9.5; 40% solids

Precaution: Avoid copper contg. alloys in storage/delivery systems

Storage: 6 mos shelf life at ambient temps.; protect from freezing which causes serious damage to prod.

**Nopcote® 3560** [Geo Spec. Chems./Paper]

Chem. Descrip.: LDPE emulsion

CAS 9002-88-4; EINECS/ELINCS 200-815-3

Uses: Lubricant for all pigmented paper coatings and nonpigmented surf. applics. such as size press and calender box; gloss aid for paper; reduces picking and blocking; lowers coeff. of friction; component of paper/paperboard in contact with aq./fatty/dry foods; defoamer in food-contact paper coatings, paper/paperboard; thermally and mechanically stable

Use Level: 0.4-1.2% on wt. of dry coating color solids

Regulatory: FDA 21CFR §176.170, 176.180, 176.200, 176.210

*Properties:* Sl. translucent liq.; readily disp. in hot or cold water; dens. 8.8 lb/gal; visc. 700 cps; pH 8.8; 60% solids

*Storage:* Freezing does not damage prod., but if frozen, warm to R.T. and mix well before use

**Nopcote® 6510 Free** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Calcium stearate aq. disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant, flow control agent, leveling agent for pigmented paper coatings; plasticizer for dry paper coatings to promote highest sheet gloss and smoothness after finishing; prevents dusting at supercalenders and during slitting/printing; food-pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; alkyl phenol ethoxylate-free; stable at ambient temps. and at pH 7.0-10.5; usable @ 32-160 F

*Use Level:* 0.5-1.0% on wt. of dry coating color solids

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Off-wh. opaque liq.; 0.005% max. on 325 mesh; water-disp.; dens. 9.3 lb/gal; visc. 25-100 cps; pH 10.5-12.5; 65% solids

*Storage:* 6 mos min. shelf life at ambient temps.; protect from freezing; if freezing occurs, warm to 20 C and mix well before use

**Nopcote C-104** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Calcium stearate aq. disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant, flow control agent, leveling agent for pigmented paper coatings; plasticizer for dry paper coatings to promote highest sheet gloss and smoothness after finishing; prevents dusting at supercalenders and during slitting/printing; food-pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; urea-free; stable at ambient temps. and at pH 7.0-10.5; usable @ 32-160 F

*Use Level:* 0.5-1.5% on wt. of dry coating color solids

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Wh. opaque liq.; 0.005% max. on 325 mesh; water-disp.; dens. 8.4 lb/gal; visc. 100-300 cps; pH 11-12; 50% solids

*Storage:* 6 mos min. shelf life at ambient temps.; protect from freezing

**Nopcote® C-104-HS** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Calcium stearate aq. disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant, flow control agent, leveling agent for pigmented paper coatings; plasticizer for dry paper coatings to promote highest sheet gloss and smoothness after finishing; prevents dusting at supercalenders and during slitting/printing; food-pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; urea-free; stable at ambient temps. and at pH 7.0-10.5; usable @ 32-160 F

*Use Level:* 0.5-1.5% on wt. of dry coating color solids

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Wh. opaque liq.; 0.005% max. on 325 mesh; water-disp.; dens. 8.6 lb/gal; visc. 150-600 cps; pH 11-12; 55% solids

*Storage:* 6 mos min. shelf life at ambient temps.; protect from freezing

**Nopcote® C-104-HS Free** [Geo Spec. Chems./Paper]

*Chem. Descrip.:* Calcium stearate aq. disp.

CAS 1592-23-0; EINECS/ELINCS 216-472-8

*Uses:* Lubricant, flow control agent, leveling agent for pigmented paper coatings; plasticizer for dry paper coatings to promote highest sheet gloss and smoothness after finishing; prevents dusting at supercalenders and during slitting/printing; food-pkg. adhesives; component of paper/paperboard in contact with aq./fatty/dry foods; alkyl phenol ethoxylate-free; urea-free; stable at ambient temps. and at pH 7.0-10.5; usable @ 32-160 F

*Use Level:* 0.5-1.5% on wt. of dry coating color solids

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Wh. opaque liq.; 0.005% max. on 325 mesh; water-disp.; dens. 8.4 lb/gal; visc. 150-600 cps; pH 11-12.5; 55% solids

*Storage:* 6 mos min. shelf life at ambient temps.; protect from freezing

**Nopcote® DC-1153** [Geo Spec. Chems./Paper]

*Uses:* Lubricant for size press or calender stack applics.; corrosion inhibitor for steel rolls; prevents sticking, picking, and blocking of surf. sizing formulations; release agent for Yankee dryers; reduces coeff. of friction (static and dynamic) on all paper and board; component of paper/paperboard in contact with dry foods; defoamer in food-contact paper/paperboard; forms stable emulsions; compat. with all types of starch; for use at neutral to alkaline pH at temps. below 165 F

*Use Level:* 1-10% on dry starch

*Regulatory:* FDA 21CFR §176.180, 176.210

*Properties:* Amber clear liq.; dens. 7.5 lb/gal; visc. 50-100 cps; pH 5-7 (2%

aq.); 98% solids

*Storage:* May congeal or stratify if kept below cloud pt. (32 F) for prolonged periods; warm to R.T. and mix well before use

**Norfox® 90** [Norman, Fox]

*Chem. Descrip.:* Sodium dodecylbenzene sulfonate

CAS 25155-30-0; EINECS/ELINCS 246-680-4

*Uses:* Base for industrial and agric. wetting agents and detergents; also used in paper industry

*Properties:* Flakes, gran.; HLB 20.0; 90% conc.; anionic

**Norfox® 92 Granules** [Norman, Fox]

*Chem. Descrip.:* Sodium tallowate

*Chem. Analysis:* Anhyd. sodium tallowate (92%); moisture (6%)

CAS 8052-48-0; EINECS/ELINCS 232-491-4

*Uses:* Base for high temp. laundry soap and soft water cleaning prods.; emulsifier for textile processing; lubricant base in metal stamping and paper coating

*Properties:* Granules; bulk dens. 26.5 lb/ft<sup>3</sup>

*Environmental:* Biodeg.

**Norfox® C-75** [Norman, Fox]

*Chem. Descrip.:* Sulfated castor oil

CAS 8002-33-3; EINECS/ELINCS 232-306-7

*Uses:* Defoamer for oils, waxes, fats, dyes, and pigments; lubricant for metalworking; textile penetrant and leveling agent; defoamer for paper coatings; plasticizer for starch, glues; emulsifier for insol. org. compds.; in cosmetics; assistant for alizarin dyes

*Use Level:* 0.5-1% (paper coatings); 1-2% (paints); 3% (textiles, milling aid and dispersant for pigments)

*Properties:* Amber clear liq.; sol. in water; dens. 8.8 lb/gal; pH 7.3 (5-10%); 25% moisture; 12-15% free fatty acid; anionic

**Norfox® DCS** [Norman, Fox]

*Chem. Descrip.:* Alkylaryl sulfonate modified coconut oil DEA condensate

CAS 61791-31-9; EINECS/ELINCS 263-163-9

*Uses:* Wetting agent and detergent base for textiles, paper, auto and home care prods., shampoos, bubble bath, liq. dishwash, hand soap, car wash; dye dispersant; demulsifier

*Properties:* Straw-colored visc. liq.; bland odor; sp.gr. 1.05; pour pt. 40 F; pH 9.0 (1-5%); 100% act.; anionic/nonionic

*Environmental:* Biodeg.

**Norfox® Sulfated Castor Oil #75** [Norman, Fox]

*Chem. Descrip.:* Sulfated castor oil

CAS 8002-33-3; EINECS/ELINCS 232-306-7

*Uses:* Textile penetrant/leveling agent; defoamer and leveling agent for paper coatings; fat liquor for suede leather; cosmetics additive; plasticizer for starch, glues, etc.; emulsifier for insol. org. compds.

*Properties:* Straw colored liq.; sol. in water; dens. 8.64 lb/gal; pH 7.3 (10%); moisture (30%); free fatty acid (12%); combined sulfur as sulfur trioxide (5%); anionic

**Norpar® 12** [Exxon]

*Chem. Descrip.:* Normal paraffin hydrocarbon solv.

CAS 64771-72-8

*Uses:* Solvent used in aluminum rolling oils; diluent solvent in carbonless copy paper and in spark erosion machining; as clean fuel in lamp oil and barbecue lighter fluids; in pesticides; cleaning and degreasing formulations; food-contact paper/paperboard, rubber articles; defoamer in food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2600, 178.3570, 178.3620(b); 40CFR §180.1001(c)(e)

*Properties:* Little/no odor; m.w. 163; sp.gr. 0.749 (60/60 F); dens. 6.24 lb/gal (60 F); visc. 1.26 cps; b.p. 192-217 C; flash pt. (ATSM D 93) 73 C; surf. tens. 26.9 dynes/cm; KB value 23; < 0.01% aromatics

*Toxicology:* OEL 300 ppm

*Precaution:* Combustible

**Norpar® 13** [Exxon]

*Chem. Descrip.:* Normal paraffin hydrocarbon solv.

CAS 64771-72-8

*Uses:* Solvent used in aluminum rolling oils; diluent solvent in carbonless copy paper and in spark erosion machining; as clean fuel in lamp oil and barbecue lighter fluids; in pesticides, furniture polishes, cleaning and degreasing formulations; food pkg. rubber articles; defoamer in food-contact paper/paperboard; complies with criteria for LVP solvent

*Regulatory:* FDA 21CFR §176.210, 177.2600, 178.3570, 178.3620(b); 40CFR §180.1001(c)(e)

- Properties:* Little/no odor; m.w. 189; sp.gr. 0.764 (60/60 F); dens. 6.35 lb/gal (60 F); visc. 1.84 cps; b.p. 225-243 C; flash pt. (ATSM D 93) 95 C; surf. tens. 26.7 dynes/cm; KB value 22; < 0.01% aromatics  
*Toxicology:* OEL 300 ppm
- Norpar® 15** [Exxon]  
*Chem. Descrip.:* Normal paraffin hydrocarbon solv.  
CAS 64771-72-8  
*Uses:* Solvent used in aluminum rolling oils; diluent solvent in carbonless copy paper and in spark erosion machining; as clean fuel in lamp oil and barbecue lighter fluids; in pesticides, floor polishes/cleaners, liq. candles, cleaners/degreasers; solv. for waxes; food-contact paper, rubber articles; defoamer in food-contact paper/paperboard; complies with criteria for LVP solvent  
*Regulatory:* FDA 21CFR §176.180, 176.210, 177.2600, 178.3570, 178.3620(b); 40CFR §180.1001(c)(e)  
*Properties:* Little/no odor; m.w. 212; sp.gr. 0.773 (60/60 F); dens. 6.44 lb/gal (60 F); visc. 2.53 cps; b.p. 251-275 C; flash pt. (ATSM D 93) 120 C; surf. tens. 28.9 dynes/cm; KB value 28; 0.01% aromatics  
*Toxicology:* OEL 300 ppm; low acute toxicity
- Norsocryl® 2EHA** [Atofina]  
*Chem. Descrip.:* 2-Ethylhexyl acrylate  
CAS 103-11-7; EINECS/ELINCS 203-080-7  
*Uses:* Copolymer intermediate for resins and dispersions for fabrics, inks, glues, and adhesives; cleaning and waxing prods.; org. synthesis; aq. disp. for nonwoven fabrics, textiles, and paper; additives for fuel oils and lubricants; syn. rubber and latexes; plastics and syn. resins  
*Properties:* APHA 10 max. clear liq.; m.w. 184; sp.gr. 0.880; visc. 1.52 mPa·s; vapor pressure < 1 mbar (20 C); f.p. - 90 C; b.p. 213.5 C (@ 1013 mbar); flash pt. (OC) 92 C; ref. index 1.433  
*Precaution:* Flamm.  
*Storage:* 6 mos storage life when stored inhibited at < 25 C, away from light
- Norsocryl® BA** [Atofina]  
*Chem. Descrip.:* Butyl acrylate  
CAS 141-32-2; EINECS/ELINCS 205-480-7  
*Uses:* Copolymer intermediate for resins and dispersions for paints, varnishes, inks, glues, and adhesives; cleaning and waxing prods.; org. synthesis; aq. disp. for nonwoven fabrics, textiles, paper, and leather; syn. rubber and latexes; plastics and syn. resins  
*Properties:* APHA 10 max. clear liq.; m.w. 128; sp.gr. 0.894; visc. 0.808 mPa·s; vapor pressure 5.3 mbar (20 C); f.p. - 64 C; b.p. 147 C (@ 1013 mbar); flash pt. (OC) 48 C; ref. index 1.416  
*Precaution:* Flamm.  
*Storage:* 6 mos storage life when stored inhibited at < 25 C, away from light
- Norsocryl® MA** [Atofina]  
*Chem. Descrip.:* Methyl acrylate  
CAS 96-33-3; EINECS/ELINCS 202-500-6  
*Uses:* Copolymer intermediate for acrylic and modacrylic fibers; resins and dispersions for paints, varnishes, inks, papers, adhesives, and glues; aq. disp. for nonwoven fabrics, textiles, and paper; cleaning and waxing prods.; plastics and syn. resins; syn. rubber and latexes; org. synthesis  
*Properties:* APHA 10 max. clear liq.; m.w. 86; sp.gr. 0.950; visc. 0.461 mPa·s; vapor pressure 91 mbar (20 C); f.p. - 75 C; b.p. 80 C (@ 1013 mbar); flash pt. (OC) 3 C; ref. index 1.400  
*Precaution:* Highly flamm.  
*Storage:* 3 mos storage life when stored inhibited at < 25 C, away from light
- Noslip®** [Vinings Ind.]  
*Uses:* Antiskid agent providing inc. surf. friction in recycled linerboard and corrugated board
- Noslip® NP** [Vinings Ind.]  
*Uses:* Antiskid agent providing inc. surf. friction in newsprint
- No Stik 806** [ROSS Chem]  
*Chem. Descrip.:* Silicone compd.  
*Uses:* Mold release agent for plastic, paper, and other molded articles in contact with foods  
*Properties:* 35% act.
- NovaBond® 150** [Georgia-Pacific Resins]  
*Uses:* Surf. str. agent improving wet rub and scuff resist. of paper for offset/opaque communication paper grades, uncoated sides of printing papers and boards; enhances wax pick, Z-direction tensile, and internal bond; reduces linting and dusting  
*Properties:* Straw to grn. opaque liq.; visc. 400 cps; pH 7; 15% NV; anionic
- NovaCote™ 1905** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Modified acrylic copolymer  
*Uses:* Surf. sizing agent for bleached fine papers, copy, ink-jet, communication and offset grades, coated and uncoated paper and paperboard, copier toner adhesion, coating holdout; film-former; improved offset printability  
*Properties:* Translucent hazy wh.; visc. 350 cps; pH 7; 20% NV; anionic
- NovaCote™ 1933** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Modified styrene acrylate copolymer  
CAS 9010-92-8  
*Uses:* Surf. sizing agent for bleached fine papers, copy, ink-jet, communication and offset grades, coated and uncoated paper and paperboard, coating holdout, toner adhesion; high efficiency; improved offset printability; high salt tolerance  
*Properties:* Milky wh.; visc. 70 cps; pH 7.8; 30.5% NV; anionic
- NovaCote™ 1936** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Styrene maleic anhydride-based  
CAS 9011-13-6  
*Uses:* Surf. sizing agent for bleached fine papers, copy, ink-jet, communication and offset grades, coated and uncoated paper and paperboard, copier toner adhesion, coating holdout; low visc.; easy-to-handle  
*Properties:* Sl. hazy to milky wh.; visc. 50 cps; pH 10; 10% NV; anionic
- NovaCote™ 2000** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Styrene maleic anhydride-based  
CAS 9011-13-6  
*Uses:* Surf. sizing agent for bleached fine papers, copy, ink-jet, communication and offset grades, coated and uncoated paper and paperboard, copier toner adhesion, coating holdout; high m.w.; low visc.; easy-to-handle  
*Properties:* Sl. hazy to milky wh.; visc. 50 cps; pH 10; 10% NV; anionic
- NovaCote® PC 1906** [Georgia-Pacific Resins]  
*Uses:* Boxboard base coating for 'double-bump' coating operations; waxable; provides a layer to keep the second coat on the surf. for improved appearance (printability, gloss, brightness) of finished board
- NovaCote® PC 1911** [Georgia-Pacific Resins]  
*Uses:* Boxboard high gloss base coating; waxable; provides exc. hot-melt and water-based adhesive gluability and exc. printability  
*Properties:* Wh. liq.; visc. (Zahn #3) 13 s; pH 8.5; 64% NV
- NovaCote® PC 3050** [Georgia-Pacific Resins]  
*Uses:* Boxboard moderate to low gloss base coating; waxable; provides exc. hot-melt and water-based adhesive gluability and exc. printability  
*Properties:* Wh. liq.; visc. (Zahn #3) 13 s; pH 8.5; 64% NV
- NovaCote™ SCD** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Modified styrene copolymer disp.  
*Uses:* Surf. sizing agent for bleached fine papers, copy, ink-jet, communication and offset grades, coated and uncoated paper and paperboard, copier toner adhesion, coating holdout; patented; low visc.; easy-to-handle; low foaming  
*Properties:* Cloudy to milky wh.; visc. 400 cps; pH 10.5; 20% NV; anionic
- NovaFlo® 50** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Pale tall oil rosin sol'n.  
CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent giving water resist. to low to med.-sized bleached and unbleached paper and paperboard, incl. paper in contact with aq./fatty foods; highly efficient; easy-to-handle; ready-to-use; high shear tolerance; stable to hot and freezing temps.; exc. replacement for paste size  
*Regulatory:* FDA 21CFR §176.170(a)(5), 178.3870  
*Properties:* Pale amber translucent liq.; easily diluted in cold water; dens. 9.35 lb/gal; visc. 125 cps; acid no. 0-3; pH 10; 50% NV; anionic  
*Storage:* Indefinite shelf life
- NovaFlo® HW** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Rosin  
CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent for low to med.-sized bleached and unbleached paper and paperboard; highly efficient; easy-to-handle; ready-to-use; exc. replacement for paste size; designed to be used in conjunction with hard water  
*Properties:* Translucent amber liq.; dilutable in hard water; visc. 125 cps; pH 10; 50% NV; anionic
- NovaPlus®** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Neutral rosin size  
CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent for neutral and acid papermaking systems, recycled fine papers; for use with and without CaCO<sub>3</sub>; ready-to-use; wide pH flexibility; highly efficient

- Properties:* Wh. opaque liq.; visc. 10 cps; pH 6.1; 35% NV; anionic
- NovaPlus® HS** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Neutral rosin size  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent for neutral and acid papermaking systems, recycled fine papers; for use with and without CaCO<sub>3</sub>; ready-to-use; wide pH flexibility; highly efficient; high solids
- Properties:* Wh. opaque liq.; visc. 35 cps; pH 6.1; 50% NV; anionic
- Novapol® HD-2100-A** [NOVA Chems.]  
*Chem. Descrip.:* MDPE with antioxidants and processing stabilizers  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Extrusion resin for pipes for pressure and nonpressure service (25 mm-1600 mm), municipal potable water pipe, fuel gas pipe, relining, industrial and mining pipe, and storm and sanitary pipe; food-contact paper, polymers; exc. ESCR, toughness, processability; high str.  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 0.14 g/10 min.; sp.gr. 0.940; m.p. 128 C; tens. str. 20 MPa (@ yield); ultimate elong. 800%; hardness (Shore D) 60; soften. pt. (Vicat) 119 C  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® LC-0522-A** [Nova Ltd; NOVA Chems.]  
*Chem. Descrip.:* LDPE  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Extrusion resin for food pkg., milk cartons, paperboard containers, liq. pkg., woven fabrics, lumber wrap, and heavy duty bags; high stiffness, good barrier  
*Regulatory:* FDA 21CFR §177.1520 compliant  
*Properties:* Melt flow 4.5 g/10 min.; sp.gr. 0.922
- Novapol® LC-0717-A** [Nova Ltd; NOVA Chems.]  
*Chem. Descrip.:* LDPE  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Extrusion resin for sugar pouch stock, popsicle wrap, multi-wall bags, high speed/low coating wt. paper coating, flexible and snack food pkg.; coating of nonporous substrates; exc. adhesion, drawdown, and sealability; high speeds; low coating wts.  
*Regulatory:* FDA 21CFR §177.1520  
*Properties:* Melt index 7.0; dens. 0.917  
*Storage:* Store in clean, dry place @ ambient temps.
- Novapol® LF-0717-A** [NOVA Chems.]  
*Chem. Descrip.:* LDPE  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Extrusion resin for sugar pouch stock, popswall bags, high speed/low coating wt. paper coating, flexible and snack food pkg., coating of nonporous substrates  
*Regulatory:* FDA 21CFR §177.1520 compliant  
*Properties:* Melt flow 7.0 g/10 min.; sp.gr. 0.917  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® PD-2115-A** [NOVA Chems.]  
*Chem. Descrip.:* LLDPE with antioxidants and processing stabilizers  
 CAS 9002-88-4  
*Uses:* Extrusion resin for pipes for pressure and nonpressure service from 12 mm to 100 mm, potable water pipe and tubing, underground sprinkler systems, and irrigation pipe; food-contact paper, polymers; high str. and flexibility; exc. toughness, ESCR, and processability  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 0.8 g/10 min.; sp.gr. 0.922; tens. str. 13 MPa (@ yield); ultimate elong. 890%; hardness (Shore D) 47; soften. pt. (Vicat) 95 C  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® PF-Y821-BP** [NOVA Chems.]  
*Chem. Descrip.:* Butene LLDPE with process stabilizer, process aid, med. slip and antiblock  
 CAS 9002-88-4  
*Uses:* Film resin for general purpose pkg., bags requiring moderate clarity, and bread bags; food-contact paper/paperboard; good stiffness and machinability  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 0.80 g/10 min.; sp.gr. 0.921; Film props.: tens. str. 30 MPa (MD); elong. 660% (MD); tear str. 5.1 g/μm (MD); Dart drop str. 3.7 g/μm  
*Storage:* Store in clean, dry place @ ambient temps.
- Novapol® PF-Y821-CP** [NOVA Chems.]  
*Chem. Descrip.:* Butene LLDPE with antiblock and process aid

- CAS 9002-88-4  
*Uses:* Film resin for industrial pkg. and heavy duty sacks; food-contact paper/paperboard; good stiffness and machinability  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 0.80 g/10 min.; sp.gr. 0.921; Film props.: tens. str. 30 MPa (MD); elong. 660% (MD); tear str. 5.1 g/μm (MD); Dart drop str. 3.7 g/μm  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® TF-Y534-IP** [NOVA Chems.]  
*Chem. Descrip.:* Hexene MDPE with process stabilizer, process aid, slip and antiblock  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Film resin for industrial pkg., overwrap, and narrow die gap extrusion; food-contact paper, polymer; exc. stiffness; high str. and toughness  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 0.50 g/10 min.; sp.gr. 0.934; Film props.: tens. str. 44 MPa (MD); elong. 520% (MD); tear str. 2.0 g/μm (MD); Dart drop str. 2.8 g/μm  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® TF-Y822-BP** [NOVA Chems.]  
*Chem. Descrip.:* Hexene LLDPE with process aid and med. slip and antiblock  
 CAS 9002-88-4  
*Uses:* Film resin for industrial pkg. and high str. liners; food-contact paper, polymer; good stiffness and machinability; exc. toughness  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 0.80 g/10 min.; sp.gr. 0.921; Film props.: tens. str. 32 MPa (MD); elong. 650% (MD); tear str. 13.0 g/μm (MD); Dart drop str. 6.3 g/μm  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® TF-Y822-CP** [NOVA Chems.]  
*Chem. Descrip.:* Hexene LLDPE with antiblock and process aid  
 CAS 9002-88-4  
*Uses:* Film resin for heavy duty sacks and high str. pkg.; food-contact paper, polymer; good stiffness and machinability; exc. toughness  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 0.80 g/10 min.; sp.gr. 0.921; Film props.: tens. str. 32 MPa (MD); elong. 650% (MD); tear str. 13.0 g/μm (MD); Dart drop str. 6.3 g/μm  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® TR-0338-U** [NOVA Chems.]  
*Chem. Descrip.:* MDPE with antioxidants and UV stabilizers  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Rotational molding resin for lg. parts and agric. storage tanks; food-contact paper, polymer; exc. impact and ESCR  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Melt flow 3.5 g/10 min.; sp.gr. 0.938; m.p. 129 C  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® TR-0338-UG** [NOVA Chems.]  
*Chem. Descrip.:* MDPE with antioxidants and UV stabilizers  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Rotational molding resin for lg. parts and agric. storage tanks; food-contact paper, polymer; exc. impact and ESCR  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Ground powd.; melt flow 3.5 g/10 min.; sp.gr. 0.938; m.p. 129 C  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® TR-0535-U** [NOVA Chems.]  
*Chem. Descrip.:* Hexene MDPE with antioxidants and UV stabilizers  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Rotational molding resin for lg. parts and agric. storage tanks; food-contact paper, polymer; exc. impact and ESCR  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Pellet; melt flow 5.0 g/10 min.; sp.gr. 0.935; m.p. 128 C  
*Storage:* Store in clean, dry place @ R.T.
- Novapol® TR-0535-UG** [NOVA Chems.]  
*Chem. Descrip.:* Hexene MDPE with antioxidants and UV stabilizers  
 CAS 9002-88-4; EINECS/ELINCS 200-815-3  
*Uses:* Rotational molding resin for lg. parts and agric. storage tanks; food-contact paper, polymer; exc. impact and ESCR  
*Regulatory:* FDA 21CFR §176.170, 177.1520 compliant  
*Properties:* Ground powd.; melt flow 5.0 g/10 min.; sp.gr. 0.935; bulk dens. 37 g/100 cc; m.p. 128 C  
*Storage:* Store in clean, dry place @ R.T.

- NovaSize® AKD** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Alkyl ketene dimer wax disp.  
*Uses:* Alkaline reactive sizing agent for alkaline papermaking systems, recycled OCC and specialty grades; for use with and without CaCO<sub>3</sub>; ready-to-use; high efficiency  
*Properties:* Wh. opaque liq.; visc. 100 cps; pH 3.5; 30% NV; cationic  
*Storage:* 3 mos shelf life
- NovaSize® ASA** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Alkenyl succinic anhydride  
 CAS 70983-55-0  
*Uses:* Alkaline reactive sizing agent for neutral and alkaline papermaking systems; must be emulsified with a suitable emulsifier, e.g., NovaSize EML; high solids  
*Properties:* Amber liq.; visc. 200 cps; 100% NV  
*Storage:* Extended shelf life
- NovaSize® EML** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Modified aq. carbohydrate emulsion  
*Uses:* Emulsifier for NovaSize ASA for optimal sizing performance in neutral and alkaline papermaking systems  
*Properties:* Opaque liq.; visc. 600 cps; pH 3.0; 15.5% NV; cationic
- NovaSize, Dark Fortified** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Tall oil rosin  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent to give water resistance to paper and paperboard  
*Properties:* USDA N-M color, translucent paste; dens. 9.2 lb/gal (70 C); visc. 2500 cps max. (70 C); acid no. 10-18 (70%), 12-20 (77%); 70 ± 1% and 77 ± 1% solids
- NovaSize, Dark Unfortified** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Tall oil rosin  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent to give water resistance to paper and paperboard  
*Properties:* USDA N-M color, translucent paste; dens. 9.2 lb/gal (70 C); visc. 2500 cps max. (70 C); acid no. 10-18 (70%), 12-20 (77%); 70 ± 1% and 77 ± 1% solids
- NovaSize, Pale Fortified** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Tall oil rosin  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent to give water resistance to paper and paperboard  
*Properties:* USDA N min. color, translucent paste; dens. 9.2 lb/gal (70 C); visc. 2500 cps max. (70 C); acid no. 10-18 (70%), 12-20 (77%); 70 ± 1% and 77 ± 1% solids
- NovaSperser™** [Georgia-Pacific Resins]  
*Chem. Descrip.:* Rosin aq. disp.  
 CAS 8050-09-7; EINECS/ELINCS 232-475-7  
*Uses:* Internal sizing agent to give water resist. to paper/paperboard incl. paper for contact with aq./fatty foods; efficient over wide pH range; exc. mech. stability; heat- and freeze/thaw-stable; not shear sensitive  
*Regulatory:* FDA 21CFR §176.170, 178.3870  
*Properties:* Wh. opaque liq.; dens. 8.6 lb/gal; visc. 20 cps; pH 6.2-6.5; 35 ± 1% solids  
*Storage:* 12 mos shelf life
- Novus™** [Hercules]  
*Chem. Descrip.:* Emulsion polymers  
*Uses:* Clarifier for wastewater, sludge dewatering agent, and air flotation agent for pulp/paper industry  
*Properties:* Cationic
- NP4** [Mosselman NV]  
*Chem. Descrip.:* Nonylphenol ethoxylates  
 CAS 9016-45-9; EINECS/ELINCS 230-770-5  
*Uses:* Surfactant, wetting agent, emulsifier, detergent, dispersant for cleaners and detergents, leather, textiles; emulsifier for emulsion polymerization; wetting agent for paper industry  
*Properties:* Sp.gr. 1.02; visc. 350 mPas; HLB 9; hyd. no. 140; cloud pt. 55 (10% in 25% BDG); pH 7 (1%); nonionic
- NP6** [Mosselman NV]  
*Chem. Descrip.:* Nonylphenol ethoxylates  
 CAS 9016-45-9  
*Uses:* Surfactant, wetting agent, emulsifier, detergent, dispersant for cleaners and detergents, leather, textiles; emulsifier for emulsion polymerization; wetting agent for paper industry  
*Properties:* Sp.gr. 1.04; visc. 350 mPas; HLB 11; hyd. no. 115; cloud pt. 67 (10% in 25% BDG); pH 7 (1%); nonionic
- NP8** [Mosselman NV]  
*Chem. Descrip.:* Nonylphenol ethoxylates  
 CAS 9016-45-9  
*Uses:* Surfactant, wetting agent, emulsifier, detergent, dispersant for cleaners and detergents, leather, textiles; emulsifier for emulsion polymerization; wetting agent for paper industry  
*Properties:* Sp.gr. 1.06; visc. 350 mPas; HLB 12.3; hyd. no. 95; cloud pt. 32 (1% aq.); pH 7 (1%); nonionic
- NP9** [Mosselman NV]  
*Chem. Descrip.:* Nonylphenol ethoxylates  
 CAS 9016-45-9  
*Uses:* Surfactant, wetting agent, emulsifier, detergent, dispersant for cleaners and detergents, leather, textiles; emulsifier for emulsion polymerization; wetting agent for paper industry  
*Properties:* Sp.gr. 1.06; visc. 350 mPas; HLB 12.8; hyd. no. 90; cloud pt. 54 (1% aq.); pH 7 (1%); nonionic
- NP10** [Mosselman NV]  
*Chem. Descrip.:* Nonylphenol ethoxylates  
 CAS 9016-45-9; EINECS/ELINCS 248-294-1  
*Uses:* Surfactant, wetting agent, emulsifier, detergent, dispersant for cleaners and detergents, leather, textiles; emulsifier for emulsion polymerization; wetting agent for paper industry  
*Properties:* Sp.gr. 1.06; visc. 360 mPas; HLB 13.2; hyd. no. 85; cloud pt. 64 (1% aq.); pH 7 (1%); nonionic
- NP12** [Mosselman NV]  
*Chem. Descrip.:* Nonylphenol ethoxylates  
 CAS 9016-45-9  
*Uses:* Surfactant, wetting agent, emulsifier, detergent, dispersant for cleaners and detergents, leather, textiles; emulsifier for emulsion polymerization; wetting agent for paper industry  
*Properties:* Sp.gr. 1.07; visc. 370 mPas; HLB 13.9; hyd. no. 75; cloud pt. 81 (1% aq.); pH 7 (1%); nonionic
- N® Sodium Silicate** [PQ]  
*Chem. Descrip.:* Sodium silicate  
 CAS 1344-09-8; EINECS/ELINCS 215-687-4  
*Uses:* Corrosion inhibitor in cleaning compds.; hardening/waterproofing concrete; binder in cements; deflocculant in ceramics; deflocculant, buffer in liq. detergents; buffer in textile pad-batch dyeing; binder in metal processing; petrol. processing; paper coatings; detergent, deflocculant, bleaching enhancer, alkalinity agent in deinking paper stock; metal deactivator in peroxide or oxygen bleaching of pulp; flocculant, corrosion inhibitor in water treatment; binder in waste treatment  
*Regulatory:* SARA nonreportable  
*Properties:* Nearly clear to opalescent syrupy liq.; odorless; completely sol. in water; sp.gr. 1.38 (20 C); dens. 11.6 lb/gal; visc. 180 cps; pH 11.3; noncombustible; 37.6% solids; 28.7% SiO<sub>2</sub>, 8.9% Na<sub>2</sub>O  
*Toxicology:* CEL 5 mg/m<sup>3</sup>; alkalinity can irritate eyes and skin; inh. irritates respiratory tract; ing. can cause irritation to esophagus and stomach  
*Environmental:* High alkalinity of undiluted or unneutralized material is harmful to aquatic life  
*Precaution:* Incompat. with gels when mixed with acid, metals, e.g., aluminum, tin, lead, zinc (may produce flamm. hydrogen gas); spills are very slippery; dries to glassy film which can cut skin and etch glass  
*Hazardous Decom. Prods.:* Hydrogen  
*Storage:* For extended storage, use tightly closed drums, steel containers, or containers of nonreactive materials
- Nucrel® 0407** [DuPont]  
*Chem. Descrip.:* Ethylene-methacrylic acid copolymer resin  
 CAS 25053-53-6  
*Uses:* For extrusion coating and laminating; applics. incl. foil-containing shampoo, toothpaste, towelette, condiment, and misc. non-food pouches and sachets, snack structures; other foil, metalized film, or paper coatings as heat seal or tie layer; food-contact polymers  
*Regulatory:* FDA 21CFR §177.1330 compliant  
*Properties:* Pellets; sp.gr. 0.93; melt flow 7.0 dg/min; f.p. 84 C; m.p. 109 C; Vicat soften. pt. 90 C; 4% methacrylic acid  
*Precaution:* Do not use in medical applics. involving permanent implantation in human body
- Nucrel® 0609HS** [DuPont]  
*Chem. Descrip.:* Ethylene-methacrylic acid copolymer resin  
 CAS 25053-53-6  
*Uses:* Adhesive and sealant resin for extrusion coating; applics. incl. foil-

containing shampoo, toothpaste, towelette, condiment, and misc. non-food pouches and sachets, medical/pharmaceutical pkg., snack structures, toothpaste tubes; aseptic and hot-filled liq. cartons; other foil, metalized film, or paper coatings as heat seal or tie layer; food-contact polymers; high speed grade

*Regulatory:* FDA 21CFR §177.1330 compliant

*Properties:* Melt flow 9.0 dg/min; f.p. 83 C; m.p. 104 C; Vicat soften. pt. 88 C; 6% methacrylic acid

*Precaution:* Do not use in medical applics. involving permanent implantation in human body

#### Nucrel® 0908HS [DuPont]

*Chem. Descrip.:* Ethylene-methacrylic acid copolymer resin  
CAS 25053-53-6

*Uses:* For extrusion coating; applics. incl. foil-containing shampoo, toothpaste, towelette, condiment, and misc. non-food pouches and sachets, snack structures; other foil, metalized film, or paper coatings as heat seal or tie layer; food-contact polymers

*Regulatory:* FDA 21CFR §177.1330 compliant

*Properties:* Pellets; sp.gr. 0.93; melt flow 8.0 dg/min; f.p. 84 C; m.p. 103 C; Vicat soften. pt. 86 C; 8.7% methacrylic acid

*Precaution:* Do not use in medical applics. involving permanent implantation in human body

#### Nucrel® 0910HS [DuPont]

*Chem. Descrip.:* Ethylene-methacrylic acid copolymer resin  
CAS 25053-53-6

*Uses:* For extrusion coating; applics. incl. foil-containing shampoo, toothpaste, towelette, condiment, and misc. non-food pouches and sachets, snack structures, toothpaste tubes, cable shield wrap, aseptic and hot-filled cartons; other foil, metalized film, or paper coatings as heat seal or tie layer; food-contact polymers

*Regulatory:* FDA 21CFR §177.1330 compliant

*Properties:* Pellets; sp.gr. 0.93; melt flow 10.0 dg/min; f.p. 84 C; m.p. 103 C; Vicat soften. pt. 86 C; 8.7% methacrylic acid

*Precaution:* Do not use in medical applics. involving permanent implantation in human body

#### Nucrel® 1214 [DuPont]

*Chem. Descrip.:* Ethylene-methacrylic acid copolymer resin  
CAS 25053-53-6

*Uses:* Adhesive and sealant resin for extrusion coating; applics. incl. foil-containing shampoo, toothpaste, towelette, condiment, and misc. non-food pouches and sachets, medical/pharmaceutical pkg., snack structures; other foil, metalized film, or paper coatings as heat seal or tie layer; food-contact polymers

*Regulatory:* FDA 21CFR §177.1330 compliant

*Properties:* Melt flow 13.5 dg/min; f.p. 71 C; m.p. 97 C; Vicat soften. pt. 75 C; 12% methacrylic acid

*Precaution:* Do not use in medical applics. involving permanent implantation in human body

#### Nucrel® 3990 [DuPont]

*Chem. Descrip.:* Ethylene-acrylic acid copolymer resin  
CAS 9010-77-9

*Uses:* For extrusion coating; applics. incl. foil-containing shampoo, toothpaste, towelette, condiment, and misc. non-food pouches and sachets, snack structures; other foil, metalized film, or paper coatings as heat seal or tie layer; food-contact polymers

*Regulatory:* FDA 21CFR §177.1330 compliant

*Properties:* Pellets; sp.gr. 0.94; melt flow 10.0 dg/min; f.p. 78 C; m.p. 97 C; Vicat soften. pt. 79 C; 9% acrylic acid

*Precaution:* Do not use in medical applics. involving permanent implantation in human body

#### NuDry™ 30 [Crompton/Witco]

*Chem. Descrip.:* Reactive silicone emulsion

*Uses:* Combining lubricant that enhances durable hydrophobic props. of PP webs; hydrophobic finish for spunbonded PP nonwovens; water-based; exc. bulk and dilution stability; nonyellowing; low VOCs

*Properties:* Milky aq. emulsion; visc. 80-100 cps; pH 9.0-9.5; 50% act.; nonionic

#### Nuosept® 95 [Creanova]

*Chem. Descrip.:* Mix. of bicyclic oxazolidines

*Uses:* Preservative for water-based coatings; food pkg. adhesives, paper; nonyel., exc. compat.

*Use Level:* 0.2-0.3% based on total wt. of coating

*Regulatory:* FDA 21CFR §175.105, 176.180

*Properties:* Liq.; 50% act.

#### Nuosept® 120 [Creanova]

*Chem. Descrip.:* Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione  
CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Preservative for coatings, slurries, and adhesives; recirculating water systems; food pkg. adhesives; slimicide in food-contact paper; dispersed form of Nuosept S

*Use Level:* 0.1-0.5% based on total wt. of coating

*Regulatory:* FDA 21CFR§ 175.105, 176.230, 176.300

*Properties:* Liq. disp.; 20% act.

#### Nuosept® 166 [Creanova]

*Chem. Descrip.:* 4,4-Dimethyloxazolidine (66%)  
CAS 51200-87-4; EINECS/ELINCS 257-048-2

*Uses:* Algicide for high pH water-based applics., paints and coatings, adhesives, caulks and joint compds., cosmetics, drilling muds, inks, metalworking fluids, oil field water treatment, paper coatings, pigment disp., plastics/vinyl, roof coatings, slurries, recirculating water systems, wood preservatives

*Use Level:* 0.2-0.3%

*Properties:* Liq.

#### Nuosept® S [Creanova]

*Chem. Descrip.:* Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione (99%)  
CAS 533-74-4; EINECS/ELINCS 208-576-7

*Uses:* Preservative for coatings, slurries, adhesives, starch- and casein-based systems; recirculating water systems; food pkg. adhesives; slimicide in food-contact paper; esp. effective at pH ≥ 7

*Use Level:* 0.04-0.11% based on total wt. of coating

*Regulatory:* FDA 21CFR §175.105, 176.230, 176.300

*Properties:* Powd.

#### Nyacol® 215 [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.  
EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 4 nm particle size; dens. 1.10 g/cm<sup>3</sup>; visc. 5 mPa·s; pH 11; 15% SiO<sub>2</sub>

#### Nyacol® 830 [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.  
EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 10 nm particle size; dens. 1.22 g/cm<sup>3</sup>; visc. 8 mPa·s; pH 10.5; 30% SiO<sub>2</sub>

#### Nyacol® 1430 [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.  
EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 14 nm particle size; dens. 1.21 g/cm<sup>3</sup>; visc. 7 mPa·s; pH 10.3; 30% SiO<sub>2</sub>

#### Nyacol® 1440 [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.  
EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 14 nm particle size; dens. 1.30 g/cm<sup>3</sup>; visc. 16 mPa·s; pH 10.4; 40% SiO<sub>2</sub>

#### Nyacol® 2034D1 [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.  
EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 20 nm particle size; dens. 1.23 g/cm<sup>3</sup>; visc. 7 mPa·s; pH 3; 34% SiO<sub>2</sub>

#### Nyacol® 2040 [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.  
EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 20 nm particle size; dens. 1.30 g/cm<sup>3</sup>; visc. 13 mPa·s; pH 10; 40% SiO<sub>2</sub>

**Nyacol® 2040NH<sub>4</sub>** [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.

EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 20 nm particle size; dens. 1.30 g/cm<sup>3</sup>; visc. 15 mPa·s; pH 9; 40% SiO<sub>2</sub>

**Nyacol® 2050** [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.

EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from recycled fibers

*Properties:* 20 nm particle size; dens. 1.40 g/cm<sup>3</sup>; visc. 50 mPa·s; pH 10; 50% SiO<sub>2</sub>

**Nyacol® 9950** [Eka Chems.]

*Chem. Descrip.:* Colloidal silica disp.

EINECS/ELINCS 231-545-4

*Uses:* Antiskid agent for paper to frictionize linerboard, esp. that made from

recycled fibers

*Properties:* 100 nm particle size; dens. 1.40 g/cm<sup>3</sup>; visc. 15 mPa·s; pH 9; 50% SiO<sub>2</sub>

**Nyacol® A-1530 [PQ]**

*Chem. Descrip.:* Colloidal disp. of antimony pentoxide in water

CAS 1314-60-9; EINECS/ELINCS 215-237-7

*Uses:* Flame retardant for latex emulsions, FR adhesives; durable flame retardant treatment for fabrics, nonwovens, fiberfill, paper, fiberglass, vinyls

*Properties:* Disp. particle size 15-30 μm; sp.gr. 1.37; visc. 5 cps; 30% antimony pentoxide; anionic

**Nyacol® A-1550 [PQ]**

*Chem. Descrip.:* Colloidal disp. of antimony pentoxide in water

CAS 1314-60-9; EINECS/ELINCS 215-237-7

*Uses:* Flame retardant for latex emulsions, FR adhesives; durable flame retardant treatment for fabrics, nonwovens, fiberfill, paper, fiberglass, vinyls

*Properties:* Disp. particle size 15-30 μm; sp.gr. 1.81; visc. 10 cps; 50% antimony pentoxide; anionic

# O

**Oakite® Defoamant** [Oakite Prods.]

*Chem. Descrip.:* O/w emulsion containing org. esters, alcohols, silicone, hydrocarbons, and stabilizers

*Uses:* Foam control agent for industrial applics., e.g., paper mill stock systems, gas dehydration units, amine scrubbing units, propane deasphalting units

*Properties:* Milky wh. visc. liq., bland odor; sp.gr. 1.002; dens. 8.4 lb/gal; visc. 1000 cps; flash pt. none; pH 9.6

**Oakite® Defoamant RC** [Oakite Prods.]

*Chem. Descrip.:* Silicone/nonionic emulsifiers

*Uses:* Foam control agent for plastic recycling systems, food processing, textile, pulp/paper, other industrial applics.

*Properties:* Milky wh. emulsion, mild odor; disp. in cold or hot water; sp.gr. 1.010; dens. 8.4 lb/gal; flash pt. none; nonionic

**Octomer DOM** [Tiarco]

*Chem. Descrip.:* Dioctyl maleate

CAS 2915-53-9

*Uses:* Intermediate for surfactants and wetting agents; in copolymerization of PVC and vinyl acetates; plasticizer for vinyl resins; internal plasticizer in copolymer films; also in latex paints, paper and textile coatings, adhesives

*Properties:* Colorless clear oily liq.; sp.gr. 0.938-0.942; b.p. 209 C; acid no. < 0.25; flash pt. 360 F; 100% conc.

*Storage:* Keep containers tightly closed when not in use; protect from freezing

**Octospense 662** [Tiarco]

*Chem. Descrip.:* Proprietary mixt.

*Uses:* Antiwebbing agent used in latex dipping and coating compds.; food-contact paper/paperboard

*Use Level:* 0.2-1.6%

*Regulatory:* FDA 21CFR §176.170, 177.2600 approved

*Properties:* Liq. emulsion; dens. 7.7-7.9 lbs/gal; visc. > 3000 cps; pH 8-9.5; 46-50% solids

*Storage:* Keep containers tightly closed; protect from freezing

**Octotint 120** [Tiarco]

*Chem. Descrip.:* Ultramarine blue

CAS 57455-37-5; EINECS/ELINCS 309-928-3

*Uses:* Color dispersion for use in paper and wood coatings, sizing, textile lubrication, and as processing aid in latex foams; strong anti-ozone characteristic; for whitening applics.

*Properties:* 55% solids

**Octotint 138** [Tiarco]

*Chem. Descrip.:* Anatase titanium dioxide

CAS 13463-67-7; EINECS/ELINCS 236-675-5

*Uses:* Color dispersion for use in paper and wood coatings, sizing, textile lubrication, and as processing aid in latex foams; strong anti-ozone characteristic

*Properties:* Wh. dispersion; 65% solids; nonionic

**Octotint 150** [Tiarco]

*Chem. Descrip.:* Diarylide yellow, Pigment yellow 14

CAS 5468-75-7

*Uses:* Color dispersion for use in paper and wood coatings, sizing, textile lubrication, and as processing aid in latex foams; strong anti-ozone characteristic

*Properties:* 25% solids

**Octotint 155** [Tiarco]

*Chem. Descrip.:* Phthalocyanine blue, Pigment blue 15:1

CAS 147-14-8; EINECS/ELINCS 205-685-1

*Uses:* Color dispersion for use in paper and wood coatings, sizing, textile lubrication, and as processing aid in latex foams; strong anti-ozone characteristic

*Properties:* 62% solids

**Octotint 572** [Tiarco]

*Chem. Descrip.:* Ultramarine blue

CAS 57455-37-5; EINECS/ELINCS 309-928-3

*Uses:* Color dispersion for use in paper and wood coatings, sizing, textile lubrication, and as processing aid in latex foams; strong anti-ozone characteristic

*Properties:* 55% solids

**Octotint 601** [Tiarco]

*Chem. Descrip.:* Anatase titanium dioxide

CAS 13463-67-7; EINECS/ELINCS 236-675-5

*Uses:* Color dispersion for use in paper and wood coatings, sizing, textile lubrication, and as processing aid in latex foams; strong anti-ozone characteristic

*Properties:* 70% solids; anionic

**Octotint 825** [Tiarco]

*Chem. Descrip.:* Jute color, iron oxide

CAS 1309-37-1; EINECS/ELINCS 215-168-2

*Uses:* Color dispersion for use in paper and wood coatings, sizing, textile lubrication, and as processing aid in latex foams; strong anti-ozone characteristic

*Properties:* 50% solids

**Octowax 321** [Tiarco]

*Chem. Descrip.:* Refined paraffin wax aq. emulsion

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Wax emulsion for use in paper and wood coating, sizing, textile lubrication; as processing aid in latex foams; antiozonant chars.; modifier improving water resist. and aging chars. in latex compds.; food pkg. adhesives, rubber articles; heat-stable, nondiscoloring

*Use Level:* 1-2% (latex)

*Regulatory:* FDA 21CFR §175.105, 177.2600, 178.3710

*Properties:* Wh. emulsion; visc. 200-1600 cps; m.p. 125-130 F; pH 8.5-9.5; 49-51% solids

*Storage:* Store in tightly closed containers; protect from freezing; stir before use

**Octowax 437** [Tiarco]

*Chem. Descrip.:* Blend of microcrystalline wax and paraffin wax

*Uses:* Processing aid in latex foams; antiozonant in latex rubber; for use in paper and wood coatings, sizing, textile lubrication

*Properties:* Wh. emulsion; m.p. 150 F; pH 8.5-9.5; 52-54% solids

**Octowax 518** [Tiarco]

*Chem. Descrip.:* HDPE emulsion

CAS 9002-88-4; EINECS/ELINCS 200-815-3

*Uses:* Wax emulsion for use in paper and wood coating, sizing, textile lubrication; processing aid in latex foams; antiozonant chars.; improves sewability, tear str. and abrasion resist. of cotton, syn. and blended fibers and fabrics

*Properties:* Lt. tan liq.; dissolves easily in cold water; dens. 8.26 lb/gal; pH 8.5-9.5; 25% conc.; nonionic

**Octowax 695** [Tiarco]

*Chem. Descrip.:* Paraffin wax

- CAS 8002-74-2; EINECS/ELINCS 232-315-6  
*Uses:* Water absorp. barrier used in hardboard, paper sizing and paperboard applics., food-contact adhesives/paper; chem. stability to acids, alkalis, and inorg. salts  
*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180 approved  
*Properties:* Aq. emulsion; visc. < 1000 cps; m.p. 120-130 F; pH 6.5-7.5; 49-51% solids; anionic  
*Storage:* Keep containers tightly closed; protect from freezing
- Octowet 40** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, emulsifier, penetrant for textile washing and dyeing operations, agric., mining, paper, printing  
*Properties:* Colorless liq.; m.w. 444.63; dens. 8.6 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 120 F; pH 5-7; Draves wetting < 5 s (0.075%); 39-41% act. in water, alcohol, glycol; anionic
- Octowet 55** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, emulsifier, penetrant for textile washing and dyeing operations, agric., mining, paper, printing  
*Properties:* Colorless liq.; m.w. 444.63; dens. 8.7 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 120 F; pH 5-7; Draves wetting < 5 s (0.075%); 54-56% act. in water, alcohol, glycol; anionic
- Octowet 60** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, emulsifier, penetrant for textile dyeing and washing operations, agric., mining, paper, printing  
*Properties:* Colorless liq.; m.w. 444.63; dens. 8.8 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 120 F; pH 5-7; Draves wetting < 5 s (0.075%); 59-61% act. in water, alcohol, glycol; anionic
- Octowet 60-I** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, penetrant, emulsifier for coatings, textile finishing, agric., mining, paper, printing; high speed wetting agent effective at low concs.  
*Properties:* Colorless liq.; m.w. 444.63; dens. 8.6 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. < 100 F; pH 5-7; Draves wetting < 5 s (0.075%); 59-61% act. in water, 20% IPA; anionic
- Octowet 65** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, emulsifier, penetrant for textile dyeing and washing operations, agric., mining, paper, printing  
*Properties:* Colorless liq.; m.w. 444.63; dens. 9.0 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 120 F; pH 5-7; Draves wetting < 5 s (0.075%); 64-66% act. in water, alcohol, glycol; anionic
- Octowet 70** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, penetrant, emulsifier for textile dyeing and washing operations, agric., mining, paper, printing, paints and coatings, latex dipped goods, rubber and latex polymerization, industrial applics.  
*Properties:* Colorless liq.; m.w. 444.63; dens. 9.06 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 120 f; pH 4-7; Draves wetting < 5 s (0.075%); 69-71% act. in water, alcohol, glycol; anionic
- Octowet 70A** [Tiarco]  
*Chem. Descrip.:* Ammonium dioctyl sulfosuccinate  
*Uses:* Wetting agent, solubilizer, penetrant for textile processing, agric., mining, paper, printing, paints and coatings, latex dipped goods, rubber and latex polymerization; high speed wetting  
*Properties:* Colorless liq.; pH 7-9; 69-71% act. in water, alcohol, glycol; anionic
- Octowet 70BC** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, penetrant, emulsifier for paints and coatings, polymerization, textiles, agric., mining, paper, printing, and industrial applics.; high speed wetting; effective at low concs.; rec. where high flash is important  
*Properties:* Colorless liq.; m.w. 444.63; dens. 9.08 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 212 F; pH 5-7; Draves wetting < 5 s (0.075%); 69-71% act. in water, butyl Carbitol; anionic
- Octowet 70D** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate in water, glycol, and isopropyl alcohol  
*Uses:* Wetting agent in textile dyeing and washing; penetrant, emulsifier for textiles; food pkg. adhesives; defoamer in food-contact paper/paperboard; food-contact paper, cellophane, textiles; emulsifier in mfg. of food-contact articles; high speed  
*Use Level:* 0.50-1.5%  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.2800, 178.3400 approved  
*Properties:* APHA < 100 liq.; dens. 8.9-9.1 lbs/gal; visc. 200-400 cps; acid no. < 4.0; iodine no. < 0.15; pH 5-7; Draves wetting < 5 sec @ 0.75%; 67-68% act.; anionic  
*Toxicology:* TSCA listed  
*Storage:* Store away from high heat, open flame
- Octowet 70PG** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, emulsifier, penetrant for textile processing, paints, coatings, polymerization, agric., mining, paper, printing, industrial applics.; high speed wetting; rec. where high flash is important  
*Properties:* Colorless liq.; m.w. 444.63; dens. 9.08 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 212 F; pH 5-7; Draves wetting < 5 s (0.075%); 69-71% act. in water, propylene glycol; anionic
- Octowet 75** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, penetrant, emulsifier for textile dyeing and washing operations, agric., mining, paper, printing, paints and coatings, latex dipped goods, rubber and latex polymerization, industrial applics.  
*Properties:* Colorless liq.; m.w. 444.63; dens. 9.18 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; pH 5-7; flash pt. > 105 F; Draves wetting < 5 s (0.075%); 74-76% act. in water, alcohol, glycol; anionic
- Octowet 75E** [Tiarco]  
*Chem. Descrip.:* Sodium dioctyl sulfosuccinate  
 CAS 577-11-7; EINECS/ELINCS 209-406-4  
*Uses:* Wetting agent, emulsifier, penetrant for textile dyeing and washing operations, agric., mining, paper, printing, paints and coatings, latex dipped goods, rubber and latex polymerization, industrial applics.; emulsifier and stabilizer for NR and SR latexes  
*Properties:* Colorless liq.; m.w. 444.63; dens. 9.18 lb/gal; visc. 200-400 cps; acid no. < 2; iodine no. < 0.15; flash pt. > 105 F; pH 5-7; Draves wetting < 5 s (0.075%); 74-76% act. in water, ethanol, glycol; anionic
- ODSA** [Dixie]  
*Chem. Descrip.:* Octadecenylsuccinic anhydride  
 CAS 28777-98-2  
*Uses:* Sizing agent for alkaline paper; ease of handling; suitable in both cationic starch and polymer emulsion systems and in paper mills where hood deposits are a problem  
*Properties:* Amber clear liq.; neutralization no. 305-335; 3% max. residual olefin  
*Toxicology:* Mild primary skin irritant; avoid contact with skin, eyes, clothing  
*Storage:* Store out of contact with moisture to avoid hydrolysis of the anhydride to acid
- Ombrelub® CD** [Münzing Chemie GmbH]  
*Chem. Descrip.:* Calcium stearate  
 CAS 1592-23-0; EINECS/ELINCS 216-472-8  
*Uses:* Release agent for use in coating colors; gloss aid during calendering; food pkg. adhesives, coatings, paper; defoamer in food-contact coatings, paper/paperboard; improves dimensional stability and printability; inc. flexibility and reduces coating brittleness during mfg.; improves smoothness during calendering  
*Use Level:* 1-5%  
*Regulatory:* FDA 21CFR 175.105, 175.300, 176.170, 176.180, 176.200, 176.210; BGA approved  
*Properties:* Wh. disp.; misc. with water; sp.gr. 1.01 (20 C); m.p. 120 C; pH 9 (2%); nonionic  
*Storage:* 6 mos shelf life in closed package @ 15-25 C; sensitive to freezing
- Opacarb® PCC** [Specialty Mins.]  
*Chem. Descrip.:* Precipitated calcium carbonate  
 CAS 471-34-1; EINECS/ELINCS 207-439-9

## Opacimite™

*Uses:* Filler, opacifier, brightener for paper coatings

*Properties:* Acicular shape

### Opacimite™ [IMERYS]

*Chem. Descrip.:* Calcium carbonate

*Chem. Analysis:* CaCO<sub>3</sub> (97.6%), MgCO<sub>3</sub> (1.5%), moisture (0.2% max.)  
CAS 1317-65-3

*Uses:* Pigment, filler, reinforcing agent for use in paper filling and coating; finely ground; engineered particle size distribution

*Properties:* Wh. powd., odorless; 1.1 μ mean particle size; fineness (Hegman) 6-7; negligible sol. in water; sp.gr. 2.71; dens. 32 lb/ft<sup>3</sup> (loose); surf. area 5 m<sup>2</sup>/g; oil absorp. 18-20; pH 9.3-9.9 (5% slurry); nonflamm.

*Toxicology:* TLV/TWA 10 mg/m<sup>3</sup>, considered nuisance dust

*Precaution:* Incompat. with acids

### Opacitex [IMERYS]

*Chem. Descrip.:* Calcined kaolin clay

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Pigment, opacifier for paper coatings and for filling newsprint and other groundwood specialties; imparts improved print props.

*Properties:* Pulverized, slurry; 0.015% 325-mesh residue; 80% finer than 2 μ particle size; sp.gr. 2.72; visc. 500 cps (50% solids); brightness (GE) 80-83; ref. index 1.56; pH 4-7 (20% aq.); hardness (Mohs) 2; 0.5-1.0% moisture (pulverized), 47-51% moisture (slurry)

### Opazil® [Süd-Chemie AG]

*Chem. Descrip.:* Bentonite

CAS 1302-78-9; EINECS/ELINCS 215-108-5

*Uses:* For deinking plants and paper machine retention; clean circulation water, adsorb substances that can cause mfg. problems

### Optiblanc® BRC [3V/Paper]

*Chem. Descrip.:* Stilbene-triazine deriv.

*Uses:* Optical brightener for paper surf. applics.; blue-violet shade allows for production of higher whiteness papers; can substitute for hexasulfonated chems. in certain mill applics.; does not harm internal sizing

*Regulatory:* DOT nonregulated; SARA §304/313 nonreportable

*Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.12-1.16; visc. 60 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. ≈ 100 C; flash pt. none to 100 C; pH 8.0-9.0; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg; nonirritating to skin/eyes; TSCA listed

*Environmental:* Do not discharge into drains or waterways; 20-40% biodeg.

*Precaution:* Incompat. with oxidizers

*Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Store tightly closed @ 5-30 C; avoid freezing

### Optiblanc® BRC 70 [3V/Paper]

*Chem. Descrip.:* Stilbene-triazine deriv.

*Uses:* Optical brightener for paper surf. applics.; blue-violet shade allows for production of higher whiteness papers; can substitute for hexasulfonated chems. in certain mill applics.; does not harm internal sizing

*Regulatory:* DOT nonregulated; SARA nonreportable

*Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.12-1.16; visc. 60 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. ≈ 100 C; flash pt. none to 100 C; pH 8.0-9.0; anionic

*Toxicology:* LD50 (oral, rat) > 2500 mg/kg; nonirritating to skin/eyes; TSCA listed

*Environmental:* Do not discharge into drains or waterways; 20-40% biodeg.

*Precaution:* Incompat. with oxidizers and water-reacting materials

*Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Store tightly closed @ 5-30 C; avoid freezing

### Optiblanc® CL 300 [3V/Paper]

*Chem. Descrip.:* Stilbene-triazine deriv.

*Uses:* Optical brightener for paper coating colors based on all syn. binders; high brightness may be achieved in coating applics.

*Use Level:* 2% on dry pigment

*Regulatory:* DOT nonregulated; SARA §304/313 nonreportable

*Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.16-1.20; visc. 250 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. ≈ 100 C; flash pt. none to 100 C; pH 9-10.5; anionic

*Toxicology:* LD50 (oral, rat) > 10,000 mg/kg; sl. irritant to skin/eyes, mucous membranes; TSCA listed

*Environmental:* Do not discharge into drains or waterways; > 60% biodeg.

*Precaution:* Incompat. with oxidizers, water-reacting materials, and hypochlorites

*Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Very long shelf life in tightly closed containers; protect from frost; store away from light

### Optiblanc® HL 400 [3V/Paper]

*Chem. Descrip.:* Stilbene-triazine deriv.

*Uses:* Optical brightener for paper; high brightness may be achieved in size-press treatments with starch; does not affect alkaline or rosin sizing; good lightfastness

*Use Level:* 2.5-3.0% in size-press sol'n.

*Regulatory:* DOT nonregulated; SARA §304/313 nonreportable

*Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.16-1.20; visc. 45 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. ≈ 100 C; pH 10-11; anionic

*Toxicology:* Irritant to skin, eyes, possible corneal damage; vapors can be irritating; repeated/excessive exposures can damage liver and kidneys; TSCA listed

*Precaution:* Incompat. with oxidizers, strong acids, water-reacting substances; do not use in preparations containing nitration agents as nitrosamines (carcinogens) can form

*Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* Very long shelf life in tightly closed containers; protect from frost; store away from light

### Optiblanc® KLN [3V/Paper]

*Chem. Descrip.:* Stilbene-triazine deriv. in water

*Uses:* Optical brightener for paper; very high sat. pt.; esp. suited for achieving high degree of brightness in pigmented size-press applics. and in coating colors containing nat. and syn. binders; very effective in coating colors containing 100% latex binder systems

*Regulatory:* DOT nonregulated; SARA §304/313 nonreportable

*Properties:* Yel.-brn. liq.; no odor; misc. with water; sp.gr. 1.16-1.20; visc. 300 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. ≈ 100 C; pH 9-10; anionic

*Toxicology:* TSCA listed

*Environmental:* Do not discharge into streams, waterways

*Precaution:* Incompat. with oxidizers

*Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced

NFPA: Health 1; Flammability 1; Reactivity 0

*Storage:* Store in tightly closed containers @ 5-30 C; protect from frost

### Optiblanc® NF 120 [3V/Paper]

*Chem. Descrip.:* Stilbene-triazine deriv.

*Uses:* Optical brightener for many nondemanding paper stock and surf. applics., particularly suitable for paper mills with stringent effluent discharge requirements; low str.; organically stabilized; rec. where low to mod. brightness gains are required

*Regulatory:* DOT nonregulated; SARA §303/313 nonreportable

*Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.11-1.15; visc. 25 mPa·s; vapor pressure 15 mm Hg (20 C); m.p. < -10 C; b.p. 100 C; pH 9-11; anionic

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; irritating to eyes, respiratory system, and skin; harmful by inh.; TSCA listed

*Environmental:* Do not discharge into streams, waterways; < 20% biodeg.

*Precaution:* Incompat. with oxidizers, acids, water-reacting materials, hypochlorites, halogenated org. compds.; do not use in preparations containing nitrosation agents as nitrosamines (carcinogens) may form

*Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced

NFPA: Health 2; Flammability 1; Reactivity 0

*Storage:* Store in tightly closed containers @ 5-30 C; protect from frost

### Optiblanc® NF 140 [3V/Paper]

*Chem. Descrip.:* Stilbene-triazine deriv.

*Uses:* Optical brightener for many paper stock and surf. applics., particularly suitable for paper mills with stringent effluent discharge requirements; low str.; organically stabilized

*Regulatory:* DOT nonregulated; SARA §304/313 nonreportable

- Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.11-1.15; visc. 20 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 9-11; anionic
- Toxicology:* LD50 (oral, rat) 5000 mg/kg; may sl. irritate eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into drains, waterways
- Precaution:* Incompat. with oxidizers, water-reacting materials, hypochlorites
- Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced
- NFPA: Health 2; Flammability 1; Reactivity 0
- Storage:* Store in tightly closed containers @ 5- 30 C; protect from frost
- Optiblanc® NF 200** [3V/Paper]
- Chem. Descrip.:* Stilbene-triazine deriv.
- Uses:* Optical brightener for many paper stock and surf. applics., particularly suitable for paper mills with stringent effluent discharge requirements; conc.; organically stabilized
- Regulatory:* DOT nonregulated; SARA §304/313 nonreportable
- Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.11-1.15; visc. 25 mPa·s; vapor pressure 15 mm Hg (20 C); m.p. < -10 C; b.p. 100 C; pH 9-11; anionic
- Toxicology:* LD50 (oral, rat) > 5000 mg/kg; may sl. irritate eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into streams, waterways; < 20% biodeg.
- Precaution:* Incompat. with oxidizers, acids, water-reacting materials, hypochlorites, halogenated org. compds.; do not use in preparations containing nitrosation agents as nitrosamines (carcinogen) may form
- Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced
- NFPA: Health 2; Flammability 1; Reactivity 0
- Storage:* Store in tightly closed containers @ 5- 30 C; protect from frost
- Optiblanc® NL** [3V/Paper]
- Chem. Descrip.:* Stilbene-triazine deriv. (disodium 2,2'-(1,2-ethenediyl) bis[[4-[bis(2-hydroxyethyl)amino]-6-(phenylamine)-1,3,5-triazin-2-yl]amino] benzenesulfonate and urea)
- Uses:* Optical brightener for alkaline paper stock conditions and for paper coatings based on casein, casein/latex, and all-syn. binders; conc.; suitable for furnishes with unbleached pulp and groundwood
- Regulatory:* DOT nonregulated; SARA §304/313 nonreportable
- Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.17-1.21; visc. 40-80 mPa·s; vapor pressure 15 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 9-10.5; anionic
- Toxicology:* LD50 (oral, rat) > 10,000 mg/kg; may sl. irritate eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into drains, waterways; > 60% biodeg.
- Precaution:* Incompat. with oxidizers
- Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced
- NFPA: Health 1; Flammability 1; Reactivity 0
- Storage:* Very long shelf life in tightly closed containers; store away from light
- Optiblanc® NL 70** [3V/Paper]
- Chem. Descrip.:* Stilbene-triazine deriv.
- Uses:* Optical brightener for alkaline paper stock conditions and for paper coatings based on casein, casein/latex, and all-syn. binders; suitable for furnishes with unbleached pulp and groundwood
- Regulatory:* DOT nonregulated; SARA §304/313 nonreportable
- Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.10-1.14; visc. 25 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 9-10.5; anionic
- Toxicology:* LD50 (oral, rat) > 10,000 mg/kg; may sl. irritate eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into drains, waterways; > 60% biodeg.
- Precaution:* Incompat. with oxidizers, water-reacting materials, hypochlorites
- Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced
- NFPA: Health 1; Flammability 1; Reactivity 0
- Storage:* Very long shelf life in tightly closed containers; store away from light
- Optiblanc® PLC** [3V/Paper]
- Chem. Descrip.:* Benzoxazole
- Uses:* Optical brightener for paper
- Optiblanc® RL 120** [3V/Paper]
- Chem. Descrip.:* Tetrasulfonated stilbene
- Uses:* Optical brightener for paper
- Optiblanc® RL 140** [3V/Paper]
- Chem. Descrip.:* Stilbene-triazine deriv.
- Uses:* Optical brightener for broad range of paper applics., size-press with starch and other prods., and coatings based on latex, starch, CMC, and PVOH
- Regulatory:* DOT nonregulated; SARA §304/313 nonreportable
- Properties:* Brn. liq.; char. odor; misc. with water; sp.gr. 1.10-1.14; visc. 15 mPa·s; vapor pressure 15 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 9.5-10.5; anionic
- Toxicology:* LD50 (oral, rat) 5000 mg/kg; may sl. irritate eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into drains, waterways
- Precaution:* Incompat. with oxidizers, water-reacting materials, hypochlorites
- Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced
- NFPA: Health 2; Flammability 1; Reactivity 0
- Storage:* Very long shelf life in tightly closed containers; store away from light; protect from frost
- Optiblanc® RL 140T** [3V/Paper]
- Chem. Descrip.:* Tetrasulfonated, amine-free stilbene
- Uses:* Optical brightener for paper
- Optiblanc® RL 200** [3V/Paper]
- Chem. Descrip.:* Stilbene-triazine deriv.
- Uses:* Optical brightener for broad range of paper applic., paper stock even at low pH, size-press with starch and other prods., and paper coatings based on latex, starch, CMC, and PVOH; conc.
- Regulatory:* DOT nonregulated; SARA §304/313 nonreportable
- Properties:* Brn. liq.; char. odor; misc. with water; sp.gr. 1.16-1.20; visc. 20 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 9.5-10.5; anionic
- Toxicology:* LD50 (oral, rat) 5000 mg/kg; may sl. irritate eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into drains, waterways
- Precaution:* Incompat. with oxidizers, water-reacting materials, and hypochlorites
- Hazardous Decom. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced
- NFPA: Health 2; Flammability 1; Reactivity 0
- Storage:* Very long shelf life in tightly closed containers; store away from light; protect from frost
- Optiblanc® SL 250** [3V/Paper]
- Chem. Descrip.:* Stilbene-triazine deriv.
- Uses:* Optical brightener for paper coating applics.; high gray point; suitable for coating colors based on latex only or contg. a limited amt. of cobinder; no inc. in visc. when CMC is used in the coating color; good lightfastness
- Regulatory:* DOT nonregulated; SARA §304/313 nonreportable
- Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.14-1.18; visc. 400 cp (20 C); vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 8-9
- Toxicology:* LD50 (oral, rat) 5000 mg/kg; prolonged contact may cause sl. irritation to eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into drains or waterways
- Precaution:* Do not store or mix with oxidizers
- Hazardous Decom. Prods.:* Burning may produce nitrogen, sulfur, and carbon oxides
- NFPA: Health 1; Flammability 1; Reactivity 0
- Storage:* Very long shelf life; stable if stored away from light; keep containers tightly closed; avoid freezing
- Optiblanc® XL 30** [3V/Paper]
- Chem. Descrip.:* Stilbene-triazine deriv.
- Uses:* Optical brightener for paper; esp. suitable for obtaining high degree of brightness by size press treatment, even at low pH and by coating with nat. and syn. binders; does not harm sizing
- Regulatory:* DOT nonregulated; SARA §304/313 nonreportable
- Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.11-1.15; visc. 20 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 9-10 (1%); anionic
- Toxicology:* LD50 (oral, rat) > 10,000 mg/kg; prolonged contact may sl. irritate eyes, skin, and mucous membranes; TSCA listed
- Environmental:* Do not discharge into drains, waterways
- Precaution:* Incompat. with oxidizers, acids, water-reacting materials, and hypochlorites

- Hazardous Decomp. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* Store in tightly closed containers; store away from light; protect from frost
- Optiblanc® XLN** [3V/Paper; 3V Sigma]  
*Chem. Descrip.:* Stilbene-triazine deriv.  
*Uses:* Optical brightener for paper; conc.; very high sat. pt.; esp. suitable for obtaining high degree of brightness by size press treatment and in coatings containing nat. and syn. binders; does not harm internal sizing  
*Regulatory:* DOT nonregulated; SARA §304/313 nonreportable  
*Properties:* Yel.-brn. liq.; char. odor; misc. with water; sp.gr. 1.16-1.20; visc. 20 mPa·s; vapor pressure 20 mm Hg (20 C); m.p. < 10 C; b.p. 100 C; pH 9.5-10.5; anionic  
*Toxicology:* Prolonged contact may sl. irritate eyes, skin, and mucous membranes; TSCA listed  
*Environmental:* Do not discharge into drains, waterways  
*Precaution:* Incompat. with oxidizers; do not use with nitrosation agents as nitrosamines (carcinogens) may form  
*Hazardous Decomp. Prods.:* On burning, nitrogen, sulfur, and carbon oxides can be produced  
 NFPA: Health 2; Flammability 1; Reactivity 0  
*Storage:* Store in tightly closed containers @ 5-30 C; protect from frost
- Opticoll 23** [EPC Papierchemie GmbH]  
*Chem. Descrip.:* Alkyl ketene dimer aq. disp.  
*Uses:* Internal sizing agent for paper, paperboard, cardboard, esp. for sizing of pulp contng. chalk, food pkg. (Germany); rec. for neutral to sl. alkaline pH range (pH 7-8.5)  
*Use Level:* 0.3-2%  
*Regulatory:* BgVV XXXVI compliant  
*Properties:* Wh. disp.; sp.gr. 1.02 g/cc; pH 3.5 ± 1; 22 ± 0.5% act.; cationic  
*Storage:* 3 mos min. shelf life stored at 5-35 C in upright sealed SS tanks
- OptiGuard™** [Hercules]  
*Uses:* Corrosion inhibitor, deposit inhibitor, oxygen control agent, condensate protectant for pulp/paper mill boiler systems; all-in-one program
- OptiSperse™** [Hercules]  
*Uses:* Corrosion inhibitor in papermaking
- Optiwhite®** [Burgess Pigment]  
*Chem. Descrip.:* Aluminum silicate, thermo-optic  
*Chem. Analysis:* SiO<sub>2</sub> (51.0-52.4%), Al<sub>2</sub>O<sub>3</sub> (42.1-44.3%), moisture (0.5% max.)  
 CAS 1327-36-2; EINECS/ELINCS 215-475-1  
*Uses:* Pigment for paper coatings, paints, rubber, and plastics to extend TiO<sub>2</sub> or other costly pigments; reinforcing filler for NR, SR, resins, flooring, molded and extruded goods, heels, soles, wire and cable, sundries, footwear; retains whiteness and hiding when embedded in binders; exc. dispersion, good electricals, high hiding, improved film props.; U.S. patent 3,309,214  
*Properties:* Amorphous particles; 0.15% max. on 325 mesh; sp.gr. 2.2; oil absorp. 57; ref. index 1.62; pH 5.5-6.2
- Organopol®** [Ciba Spec. Chems./Paper]  
*Uses:* Retention aid, drainage aid in mech. furnishes for newsprint, ground-wood specialties, and paperboard; developed for DIP/TMP/CTMP and highly contaminated stock where normal retention aids have no effect
- Orlene® 1340** [Nalco]  
*Chem. Descrip.:* Polyacrylic acid  
 CAS 9003-01-4  
*Uses:* Dispersant that controls pulp/paper mill scale and inorg. deposits; food-contact paper/paperboard; effective over wide pH range and at high temps.  
*Regulatory:* FDA 21CFR §176.170, 176.180 approved  
*Properties:* Wh. to pale yel. liq.; sp.gr. 1.18-1.20; dens. 9.9 lb/gal; visc. < 40 cps; f.p. 32 F; flash pt. > 200 F; pH 2.8-3.2; anionic  
*Toxicology:* Causes eye irritation  
*Storage:* Store @ R.T.
- O® Sodium Silicate** [PQ]  
*Chem. Descrip.:* Sodium silicate aq. sol'n.  
*Chem. Analysis:* Na<sub>2</sub>O (9.1%), SiO<sub>2</sub> (29.5%)  
 CAS 1344-09-8; EINECS/ELINCS 215-687-4  
*Uses:* Buffer, alkali stabilizer for pad-batch dyeing; detergent, deflocculant, bleaching enhancer, alkalinity agent in deinking paper stock; peroxide stabilizer in repulping and postbleaching; hardening/waterproofing concrete; slurry thinner in ceramics; slime control in mining
- Regulatory:* DOT nonregulated  
*Properties:* Syrupy liq.; dens. 11.8 lb/gal (20 C); visc. 400 cps; pH 11.3
- Oxetal 500/85** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol polyglycol ether (5 EO)  
*Uses:* Detergent, dispersant, emulsifier, wetting agent for household and industrial use, textile, paper, ceramic, and leather industries  
*Properties:* Colorless liq.; sol. gives weakly opaque sol'n. in water; sp.gr. 1.0 (20 C); cloud pt. 65-68 C (5 g/20 ml BDG 25%); pH 6 (10%); 85% act. in water; nonionic
- Oxetal 800/85** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Fatty alcohol polyglycol ether (8 EO)  
*Uses:* Basic material for formulation of detergents and cleansers for washing, wetting, rinsing, and cleaning in textile, leather, paper, and ceramic industries  
*Properties:* Colorless liq.; sol. in water; sp.gr. 1.03 (20 C); cloud pt. 66-70 C (1% aq.); pH 6 (10%); 85% act. in water; nonionic
- Oxetal D 104** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Deceth-4  
 CAS 26183-52-8  
*Uses:* Detergent, dispersant, emulsifier, wetting agent for household and industrial use, textile, paper, and leather industries  
*Properties:* Liq.; sol. cloudy @ 10% in DW; cloud pt. 58-61 C (5 g/10 ml butyl diglycol 25%); pH 6 (10%); 100% act.; nonionic
- Oxetal ID 104** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Isodeceth-4  
 CAS 61827-42-7  
*Uses:* Detergent, dispersant, emulsifier, wetting agent for household and industrial use, textile, paper, and leather industries  
*Properties:* Colorless liq.; sol. cloudy @ 10% in DW; cloud pt. 50-53 C (5 g/20 ml butyl diglycol 25%); pH 6 (10%); 100% act.; nonionic  
 Custom prod.
- Oxetal O 108** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Oleth-8  
 CAS 9004-98-2  
*Uses:* Detergent, dispersant, emulsifier, wetting agent for household and industrial use, textile, paper, and leather industries  
*Properties:* Wh. paste; sol. @ 10% in DW; cloud pt. 45-50 C (1% aq.); pH 6 (10%); 100% act.; nonionic
- Oxetal O 112** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Oleth-12  
 CAS 9004-98-2  
*Uses:* Detergent, dispersant, emulsifier, wetting agent for household and industrial use, textile, paper, and leather industries  
*Properties:* Wh. paste; sol. @ 10% in DW; cloud pt. 83-87 C (1% aq.); pH 6 (10%); 100% act.; nonionic
- Oxetal TG 111** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Cetareth-11  
 CAS 68439-49-6  
*Uses:* Detergent, dispersant, emulsifier, wetting agent for household and industrial use, textile, paper, and leather industries  
*Properties:* Wh. wax; sol. cloudy @ 10% in water, clear @ 40 C; cloud pt. 70-75 C (1% aq.); pH 6 (10%); 100% act.; nonionic
- Oxetal TG 118** [Zschimmer & Schwarz]  
*Chem. Descrip.:* Cetareth-18  
 CAS 68439-49-6  
*Uses:* Detergent, dispersant, emulsifier, wetting agent for household and industrial use, textile, paper, and leather industries  
*Properties:* Wh. wax; sol. @ 10% in DW; cloud pt. 72-76 C (1% in 10% NaCl); pH 6 (10%); 100% act.; nonionic
- Oxicol®** [Ciba Spec. Chems./Paper]  
*Chem. Descrip.:* PEO-based  
*Uses:* Retention aid for newsprint and paperboard
- Oxirez®** [Ciba Spec. Chems./Paper]  
*Chem. Descrip.:* PEO resin  
*Uses:* Retention aid for newsprint and paperboard

# P

## PAC-300 [Summit Research Labs]

*Chem. Descrip.:* Polyaluminum chloride sol'n.  
 CAS 1327-41-9; EINECS/ELINCS 215-477-2

*Uses:* Coagulant/flocculant for wastewater and potable water treatment, in pulp/paper industry; particularly low in sulfate, iron, and other trace metal impurities

*Regulatory:* NSF approved up to 250 mg/l

*Properties:* Colorless clear liq.; sp.gr. 1.19-1.21 (15 C); pH 2.3-2.8; 10-11.9% Al<sub>2</sub>O<sub>3</sub>, 5.3-6.3% aluminum

## Pace® 381 [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Vinyl acetate homopolymer made in a polyvinyl alcohol colloidal system

*Uses:* Adhesive base for wood, uncoated paper, corrugated board, cotton cloth, and construction prods.; rec. where low VOC content is required; good wet tack; low residual monomer level (< 0.1%)

*Properties:* 0.2-3.0 µ particle size; dens. 8.8-9.2 lb/gal; visc. 1600-2000 cps; surf. tens. 51-54 dynes/cm; pH 4.0-5.5; 54-56% min. solids

*Storage:* > 180 days shelf life at 72 F; protect from freezing

## Pace® 382 [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Vinyl acetate homopolymer made in a polyvinyl alcohol colloidal system

*Uses:* Adhesive base for wood, uncoated paper, corrugated board, cotton cloth, and construction prods.; rec. where low VOC content is required; good wet tack; low residual monomer level (< 0.1%)

*Properties:* 0.2-3.0 µ particle size; dens. 8.95-9.25 lb/gal; visc. 2000-2600 cps; surf. tens. 51-54 dynes/cm; pH 4.0-5.5; 54-56% min. solids

*Storage:* > 180 days shelf life at 72 F; protect from freezing

## Pace® 383 [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Vinyl acetate homopolymer made in a polyvinyl alcohol colloidal system

*Uses:* Adhesive base for wood, uncoated paper, corrugated board, cotton cloth, and construction prods.; rec. where low VOC content is required; good wet tack; low residual monomer level (< 0.1%)

*Properties:* 0.2-3.0 µ particle size; dens. 8.8-9.2 lb/gal; visc. 2900-3700 cps; surf. tens. 51-54 dynes/cm; pH 4.0-5.5; 54-56% min. solids

*Storage:* > 180 days shelf life at 72 F; protect from freezing

## Pace® 385 [Reichhold/Emulsion Polymers]

*Chem. Descrip.:* Vinyl acetate homopolymer made in a polyvinyl alcohol colloidal system

*Uses:* Adhesive base for adhesives and coatings; rec. where low VOC content is required; good wet tack; low residual monomer levels (< 0.1%)

*Properties:* 0.2-2.5 µ particle size; dens. 9.0-9.2 lb/gal; visc. 800-1200 cps; surf. tens. 47.5-50.5 dynes/cm; pH 4.0-5.5; 54-56% min. solids

*Storage:* > 180 days shelf life at 72 F; protect from freezing

## Pamolyn® 200 [Hercules/Resins]

*Chem. Descrip.:* Linoleic acid  
 CAS 60-33-3; EINECS/ELINCS 200-470-9

*Uses:* For the protective coating industry for prod. of pale, color-retentive, fast-drying alkyds, and epoxy resin ester coatings; for printing ink vehicles and caulking and sealing compds.; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; defoamer in food-contact coatings; highly resist. to discoloration on exposure to heat and light

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.380, 175.390, 176.170b, 176.180, 176.200, 177.1200, 177.1210, 177.2600, 177.2800

*Properties:* Gardner 3+ max., pale oily liq., low odor; sp.gr. 0.9040; dens.

0.90 kg/l; acid no. 193; iodine no. 162; sapon. no. 195; 78% total linoleic acid, 22% oleic acid

## Pamolyn® 240 [Hercules]

*Chem. Descrip.:* Linoleic acid

CAS 60-33-3; EINECS/ELINCS 200-470-9

*Uses:* For the protective coating industry for prod. of pale, color-retentive, fast-drying alkyds, and epoxy resin ester coatings; for printing ink vehicles and caulking and sealing compds.; food pkg. adhesives, coatings, paper, cellophane, rubber articles, textiles; defoamer in food-contact coatings; highly resist. to discoloration on exposure to heat and light

*Regulatory:* FDA 21CFR §175.105, 175.300, 175.320, 175.380, 175.390, 176.170b, 176.180, 176.200, 177.1200, 177.1210, 177.2600, 177.2800

*Properties:* Gardner 3+ max.; low odor; sp.gr. 0.9010; dens. 0.90 kg/l; acid no. 194; iodine no. 148; sapon. no. 195; 67% total linoleic acid, 31% oleic acid

## Papermaker's Alum [Delta]

*Chem. Descrip.:* Aluminum sulfate

CAS 10043-01-3; EINECS/ELINCS 233-135-0

*Uses:* Coagulant, flocculant for drinking water treatment, paper processing

*Regulatory:* NSF certified

## Paper-PAC-N® [Sachtleben Chemie GmbH]

*Chem. Descrip.:* Polyaluminum hydroxide chloride sulfate

CAS 39290-78-3; EINECS/ELINCS 254-400-7

UN No. 3264

*Uses:* Flocculant, fixing agent, alum replacement for neutral sizing process of paper and cardboard mfg.; reduces or eliminates gypsum precipitation

*Properties:* Colorless to yllsh. translucent liq.; unlimited sol. in water; sp.gr. 1.2 (20 C); visc. 20 mPa·s (20 C); vapor pressure 103 hPa (20 C); f.p. -12 C; b.p. > 100 C; flash pt. not applicable; pH 2.7; 33% act.

*Toxicology:* LD50 (oral, rat) > 5000 mg/kg; irritating to eyes and skin

*Environmental:* LC0 (leuciscus idus melonatus, 48 h) 750 mg/l; contains no substances or heavy metals in ecologically critical concs.; sl. harmful to water

*Precaution:* Corrosive; acidic; observe usual precautions for handling weak acids; keep away from acid-sensitive materials

*Storage:* 12 mos storage stability; store dry at < 40 C; acid-resist. materials should be used for storage and dosing equip.

## PAPHEN® PKFE [Phenoxy Assoc.]

*Chem. Descrip.:* Phenoxy resin

*Uses:* Resin for structural adhesives, film extrusion, inj. molding, plastics modifiers, and polymer alloys; food-contact adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Translucent pellets; low odor; m.w. 10-16,000; sp.gr. 1.17-1.19; visc. 535-895 cps; melt index 2-3 g/10 min.; 99% min. NV (2 hrs. @ 135 C + 1 hr. @ 220 C)

*Storage:* Store indefinitely in cool place in sealed container

## PAPHEN® PKHC® [Phenoxy Assoc.]

*Chem. Descrip.:* Phenoxy resin

*Uses:* Resin for adhesives, primers and coatings; food-contact adhesives, coatings, paper, closures with sealing gaskets for food containers; exc. adhesion, chem., and salt-spray resist., impact and abrasion resist., and flexibility; may be used on metal, wood, paper, glass, and polymer substrates; resist. to staining

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Wh. translucent pellets; m.w. 45-60,000; sp.gr. 1.17-1.19; visc. 410-525 cps; 99% min. NV (2 hrs. @ 135 C)

*Storage:* Indefinite shelf life in cool place (50-90 F, 30-70% relative humidity) in sealed containers

**PAPHEN® PKHH** [Phenoxy Assoc.]

*Chem. Descrip.:* Phenoxy resin

*Uses:* Resin for adhesives, primers and coatings for use on metal, wood, paper, glass, and polymer substrates; food-contact adhesives, coatings, paper, closures with sealing gaskets for food containers; exc. adhesion, chem., and salt-spray resist., impact and abrasion resist., and flexibility; resist. to staining

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Wh. translucent pellets; m.w. 45-60,000; sp.gr. 1.17-1.19; visc. 525-715 cps; 99% min. NV (2 hrs. @ 135 C)

*Storage:* Indefinite shelf life in cool place (50-90 F, 30-70% relative humidity) in sealed containers

**PAPHEN® PKHJ** [Phenoxy Assoc.]

*Chem. Descrip.:* Phenoxy resin

*Uses:* Resin for adhesives, primers and coatings; food-contact adhesives, coatings, paper, closures with sealing gaskets for food containers; exc. adhesion, chem., and salt-spray resist., impact and abrasion resist., and flexibility; may be used on metal, wood, paper, glass, and polymer substrates; resist. to staining

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Wh. translucent pellets; m.w. 45-60,000; sp.gr. 1.17-1.19; visc. 600-775 cps; 99% min. NV (2 hrs. @ 135 C)

*Storage:* Indefinite shelf life in cool place (50-90 F, 30-70% relative humidity) in sealed containers

**PAPHEN® PKHM-301** [Phenoxy Assoc.]

*Chem. Descrip.:* Modified phenoxy resin

*Uses:* Resin for coil coating primers; can, coil, and clear coatings; specialty coatings; hot-melt and laminating adhesives; film extrusion; plastics modifiers; epoxy modification; food-contact adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Opaque pellets; sp.gr. 1.15-1.19; visc. 100-300 cps; 99% min. NV (2 hrs. @ 135 C)

*Storage:* Store @ < 75 F to avoid sintering and agglomeration

**PAPHEN® PKHS-40** [Phenoxy Assoc.]

*Chem. Descrip.:* Phenoxy resin (40%) in MEK

*Uses:* Resin for maintenance primers, can and clear coatings, heat-sealable and flexible substrate coatings; adhesive primers; epoxy modification; food-contact adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Straw-colored clear liq.; visc. 4500-7000 cps; f.p. -37 C; b.p. 80 C; flash pt. (TCC) -6 C; 40% total solids; 1% max. water content

*Precaution:* Flamm.; keep away from heat

*Storage:* 1 yr shelf life in tightly closed upright containers @ < 49 C; stir prior to use

**PAPHEN® PKHW-35** [Phenoxy Assoc.]

*Chem. Descrip.:* Amine-neutralized carboxylated phenoxy resin in water (avail. with butoxyethanol (8-10%) or methyl propylene glycol ether as co-solv.)

*Uses:* Resin for general-purpose metal primers; flexible modifier for epoxy and phenolic baking primers; coil/drum/pail/heat sealable/wire/strippable coatings; laminating adhesives; rigid adhesive flexibilizing modifier; food-contact adhesives, coatings, paper, closures with sealing gaskets for food containers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210

*Properties:* Cream colored liq.; 1.5 µ median particle size; dens. 9.0 lb/gal; visc. 1500-4000 cps; pH 7; 30-32% solids; 57% water

*Storage:* > 6 mos shelf life stored @ < 90 F; avoid freezing

**Paracol® 404C** [Hercules]

*Chem. Descrip.:* Refined microcrystalline wax emulsion

CAS 63231-60-7; EINECS/ELINCS 264-038-1

*Uses:* Sizing agent for improving surf. properties of paper/paperboard; detackifier; antiblocking agent; in coatings and printing inks; mold release in rubber and plastics; food-contact paper/paperboard

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Lt. amber emulsion; 1.5 µ particle size; dens. 8.0 lb/gal; m.p. 79 C; 47% solids; sl. anionic

*Storage:* Protect from freezing (breaks the emulsion)

**Paracol® 404G** [Hercules]

*Chem. Descrip.:* Fully refined paraffin wax emulsion

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Sizing agent for paper and paperboard; increases lactic acid resist. in milk cartons, blood resist. in butcher papers, meat trays, picnic plates; moisture barrier for coatings; mold release in rubber and plastics; protective coatings on fruit; food pkg. adhesives, paper/paperboard

*Regulatory:* FDA 21CFR §175.105, 176.170, 176.180

*Properties:* Wh. emulsion, 1.5 µ particle size; dens. 0.96 kg/l; m.p. 61-67 C; 47% total solids; sl. anionic

*Storage:* Protect from freezing (breaks the emulsion)

**Paracol® 802A** [Hercules]

*Chem. Descrip.:* Refined paraffin wax emulsion

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Sizing agent for internal applics. in conjunction with rosin size and for surf.-sizing applics. in food-contact paper/paperboard; economical moisture barrier; antiblocking agent in paper coatings

*Regulatory:* FDA 21CFR §176.170, 176.180

*Properties:* Wh. to lt. amber emulsion; 1.5 µ particle size; dens. 0.96 kg/l; m.p. 49-54 C; 50% total solids; anionic

*Storage:* Protect from freezing (breaks the emulsion)

**Paracol® 802N** [Hercules]

*Chem. Descrip.:* Semirefined paraffin wax emulsion

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Controls water absorp. in insulating board and hardboard and sizing applics. in nonfood-pkg. grades of paper and paperboard; also for moisture protection in wood coatings

*Properties:* Emulsion; < 1 µ avg. particle size; dens. 0.96 kg/l; m.p. 49-57 C; 50% total solids; anionic

*Storage:* Protect from freezing (breaks the emulsion)

**Paracol® 2370** [Hercules]

*Chem. Descrip.:* Semirefined paraffin wax emulsion

CAS 8002-74-2; EINECS/ELINCS 232-315-6

*Uses:* Used for latex-based protective coating systems, wood coatings; internal sizing applics. for wet processing; provides exc. moisture barrier to paper, paperboard, building prods.; acid-breaking emulsion

*Properties:* Lt. amber emulsion; 1.5 µ avg. particle size; dens. 7.6 lb/gal; m.p. 52-57 C; pH 8.8; 58% total solids; sl. anionic

*Storage:* Protect from freezing (breaks the emulsion)

**Paracum® 56** [Dr. W. Kolb AG]

*Uses:* Antifoam for wastewater treatment, paper processing; hydrophobic; spreads quickly over foam surf.; destabilizes and destroys air bubbles; effective over wide temp. range; no VOCs

**Paracum® 66** [Dr. W. Kolb AG]

*Uses:* Antifoam for paper processing; effective over wide range of pH and temps.; exc. entrained air removal

*Properties:* 100% act.

**Paradene® No. 2** [Neville]

*Chem. Descrip.:* Petrol. hydrocarbon resin

*Uses:* Plasticizer, softener, extender for NR, SR; aids processing and filler and pigment disp.; also used for inks, adhesives, coatings, and concrete cures; food-contact adhesives, coatings, paper/paperboard, rubber articles, wood preservatives; suitable for high loadings

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 177.2600, 178.3800

*Properties:* Dk. brn. solid, flakes; m.w. 710; sp.gr. 1.10; R&B soften. pt. 102 C; iodine no. (Wijs) 112; flash pt. (COC) 525 F

**ParCell™ A** [Hercules/Aqualon]

*Chem. Descrip.:* Nitrocellulose

CAS 9004-70-0; EINECS/ELINCS 239-069-9

*Uses:* Film-forming resin for wood and metal coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, polymers

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1200, 177.1210, 177.1630, 181.30

*Properties:* Avail. in various visc. grades; 11.3-11.7% N

**ParCell™ R** [Hercules/Aqualon]

*Chem. Descrip.:* Nitrocellulose

CAS 9004-70-0; EINECS/ELINCS 239-069-9

*Uses:* Film-forming resin for wood and metal coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, polymers; most commonly used type due to its sol. in lean solvs.

- Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1200, 177.1210, 177.1630, 181.30  
*Properties:* Avail. in various visc. grades; 11.7-12.2% N
- ParCell™ S** [Hercules/Aqualon]  
*Chem. Descrip.:* Nitrocellulose  
 CAS 9004-70-0; EINECS/ELINCS 239-069-9  
*Uses:* Film-forming resin for wood and metal coatings; food pkg. adhesives, coatings, paper/paperboard, cellophane, polymers; used when substantial alcohol sol. is required  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1200, 177.1210, 177.1630, 181.30  
*Properties:* Avail. in various visc. grades; 10.9-11.3% N
- Particol®** [DuPont]  
*Chem. Descrip.:* Polysilicic acid  
*Uses:* Retention aid, drainage aid for papermaking; flocculant for water treatment
- Parvan® 127** [Exxon]  
*Chem. Descrip.:* Petroleum hydrocarbon wax  
*Uses:* For food, health, and cosmetic applics.; suited for barbecue lighter bricks, butcher wrap, candles, cheese coating, corrugated paperboard, lumber end coating; fully refined wax with enhanced oxidation resist.  
*Regulatory:* FDA compliance  
*Properties:* Saybolt +30 color; dens. 6.78 lb/gal (60 F); kinematic visc. 3.5 cSt (210 F); m.p. 127 F; flash pt. 420 F  
*Toxicology:* May cause skin irritation on prolonged/repeated contact  
*Precaution:* Trace materials constitute explosive hazard
- Parvan® 131** [Exxon]  
*Chem. Descrip.:* Petroleum hydrocarbon wax  
*Uses:* For food, health, and cosmetic applics.; suited for butcher wrap, corrugated paperboard, cups, drinking straws, shoe polish, wax paper; fully refined wax with enhanced oxidation resist.  
*Regulatory:* FDA compliance  
*Properties:* Saybolt +30 color; dens. 6.79 lb/gal (60 F); kinematic visc. 3.7 cSt (210 F); m.p. 131 F; flash pt. 425 F  
*Toxicology:* May cause skin irritation on prolonged/repeated contact  
*Precaution:* Trace materials constitute explosive hazard
- Parvan® 137** [Exxon]  
*Chem. Descrip.:* Petroleum hydrocarbon wax  
*Uses:* For food, health, and cosmetic applics.; suited for candles, corrugated paperboard, cups, glassine, paste wax, tires, wax paper; fully refined wax with enhanced oxidation resist.  
*Regulatory:* FDA compliance  
*Properties:* Saybolt +30 color; dens. 6.81 lb/gal (60 F); kinematic visc. 4.1 cSt (210 F); m.p. 137 F; flash pt. 440 F  
*Toxicology:* May cause skin irritation on prolonged/repeated contact  
*Precaution:* Trace materials constitute explosive hazard
- Parvan® 154** [Exxon]  
*Chem. Descrip.:* Petroleum hydrocarbon wax  
*Uses:* For food, health, and cosmetic applics.; suited for hot-melt adhesives, candles, paper plates, paste wax, tires; fully refined wax with enhanced oxidation resist.  
*Regulatory:* FDA compliance  
*Properties:* Saybolt +30 color; dens. 6.91 lb/gal (60 F); kinematic visc. 6.6 cSt (210 F); congeal pt. 154 F; flash pt. 500 F  
*Toxicology:* May cause skin irritation on prolonged/repeated contact  
*Precaution:* Trace materials constitute explosive hazard
- Pass®-55** [Handy Chems.]  
*Chem. Descrip.:* Aluminum hydroxide sulfate sol'n.  
 CAS 53810-32-5  
*Uses:* Coagulant used in potable water treatment for removal of Giardia and Crypto; coagulant in industrial wastewater and sewage treatment for BOD, COD and PO<sub>4</sub> reduction and in wet-end papermaking  
*Properties:* Colorless clear liq.; odorless; hydrolyzes in water; sp.gr. 1.26-1.35; f.p. < 0 C; b.p. dec. @ 90 C; pH 2.8-3.8; noncombustible  
*Toxicology:* ACGIH TLVTWA 2 mg/m<sup>3</sup> (Al, sol. salts); LD50 (oral, rat) > 5000 mg/kg; inh. of mist causes respiratory tract irritation; may cause irritation to skin, eyes, mouth, and digestive tracts; chronic exposure may cause dermatitis  
*Precaution:* Avoid strong alkalis, oxidizers, and hydroreactive materials  
*Hazardous Decomp. Prods.:* Sulfur and aluminum oxides when heated above 200 C  
*Storage:* Store @ > 15 C; spills can be slippery
- Pass®-70** [Handy Chems.]  
*Chem. Descrip.:* Aluminum hydroxide sulfate sol'n.  
 CAS 53810-32-5  
*Uses:* Coagulant used in potable water treatment for removal of Giardia and Crypto; coagulant in industrial wastewater and sewage treatment for BOD, COD and PO<sub>4</sub> reduction and in wet-end papermaking  
*Properties:* Colorless clear liq.; odorless; hydrolyzes in water; sp.gr. 1.26-1.35; f.p. < 0 C; b.p. dec. @ 90 C; pH 2.8-3.8; noncombustible  
*Toxicology:* ACGIH TLVTWA 2 mg/m<sup>3</sup> (Al, sol. salts); LD50 (oral, rat) > 5000 mg/kg; inh. of mist causes respiratory tract irritation; may cause irritation to skin, eyes, mouth, and digestive tracts; chronic exposure may cause dermatitis  
*Precaution:* Avoid strong alkalis, oxidizers, and hydroreactive materials  
*Hazardous Decomp. Prods.:* Sulfur and aluminum oxides when heated above 200 C  
*Storage:* Store @ > 15 C; spills can be slippery
- Pass®-80** [Handy Chems.]  
*Chem. Descrip.:* Aluminum hydroxide sulfate sol'n.  
 CAS 53810-32-5  
*Uses:* Coagulant used in potable water treatment for removal of Giardia and Crypto; coagulant in industrial wastewater and sewage treatment for BOD, COD and PO<sub>4</sub> reduction and in wet-end papermaking  
*Properties:* Colorless clear liq.; odorless; hydrolyzes in water; sp.gr. 1.26-1.35; f.p. < 0 C; b.p. dec. @ 90 C; pH 2.8-3.8; noncombustible  
*Toxicology:* ACGIH TLVTWA 2 mg/m<sup>3</sup> (Al, sol. salts); LD50 (oral, rat) > 5000 mg/kg; inh. of mist causes respiratory tract irritation; may cause irritation to skin, eyes, mouth, and digestive tracts; chronic exposure may cause dermatitis  
*Precaution:* Avoid strong alkalis, oxidizers, and hydroreactive materials  
*Hazardous Decomp. Prods.:* Sulfur and aluminum oxides when heated above 200 C  
*Storage:* Store @ > 15 C; spills can be slippery
- PASS®-100** [Handy Chems.]  
*Chem. Descrip.:* Polyaluminum silicate sulfate  
 CAS 53810-32-5  
*Uses:* Coagulant in potable water treatment, wastewater treatment, pulp/papermaking for removal of Giardia and Crypto, industrial wastewater and sewage treatment for BOD, COD and PO<sub>4</sub> reduction; used in all processes requiring conventional cationic metallic salts; extremely effective in cold waters (16 C or less); precipitates faster than alum; works over wide pH range  
*Regulatory:* NSF certified; Health and Welfare Canada approved  
*Properties:* Lt. amber liq.; odorless; hydrolyzes in water; sp.gr. 1.34; visc. 17 cps; f.p. < 0 C; b.p. dec. @ 90 C; pH 3.0; noncombustible; 34% total solids; 10.1% Al<sub>2</sub>O<sub>3</sub>  
*Toxicology:* ACGIH TLVTWA 2 mg/m<sup>3</sup> (Al, sol. salts); LD50 (oral, rat) > 5000 mg/kg; mildly acidic sol'n. which dehydrates skin; inh. of mist causes respiratory tract irritation; may cause irritation to skin, eyes, mouth, and digestive tracts  
*Precaution:* Corrosive; avoid contact with strong alkalis, oxidizers, and hydro-reactive materials; hydrolyzes rapidly @ 90 C  
*Hazardous Decomp. Prods.:* May liberate SO<sub>2</sub> and aluminum oxides when boiled to dryness or heated > 200 C  
*Storage:* Store in PVC @ 10-25 C
- Patcote® 801** [Am. Ingreds./Patco]  
*Chem. Descrip.:* Nonsilicone silica-organic  
*Uses:* Defoamer for use in PVA-acrylic copolymers and terpolymer emulsions for trade sales, urethane and S/B systems; defoamer in food-contact coatings; food pkg. adhesives, coatings, paper  
*Use Level:* 5-10 lb/100 gal  
*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200  
*Properties:* Wh. opaque liq.; fineness (Hegman) ≥ 6; sp.gr. 0.894 ± 0.012; dens. 7.45 ± 0.1 lb/gal; pour pt. -5 F; flash pt. (PMCC) 300 F; VOC < 1.5%; 100% act.  
*Toxicology:* Eye or skin irritant on prolonged contact; do not take internally; TSCA listed  
*Storage:* If stored outside, bring to R.T. before use; prod. does not settle
- Patcote® 806** [Am. Ingreds./Patco]  
*Chem. Descrip.:* Nonsilicone silica-organic  
*Uses:* Defoamer for acrylic and terpolymer emulsions in trade sales and some industrial applics., alkyd, epoxy, PVAc, and urethane systems; food pkg. adhesives, coatings, paper/paperboard

*Use Level:* 5-10 lb/100 gal

*Regulatory:* FDA §175.105, 175.300, 176.170, 176.180

*Properties:* Lt. amber liq.; fineness (Hegman)  $\geq 6$ ; sp.gr. 0.8787; dens. 7.32 lb/gal; pour pt. 5 F; flash pt. (PMCC) > 300 F; 100% act.

*Toxicology:* Eye or skin irritant on prolonged contact; do not take internally  
*Storage:* If stored outside, bring to R.T. before use; prod. settles, stir before use

**Patcote® 814** [Am. Ingreds./Patco]

*Chem. Descrip.:* Nonsilicone silica-organic

*Uses:* Defoamer for acrylic emulsions, PVAc, S/B, terpolymer, alkyd, polyester, and PU systems; food pkg. adhesives, coatings, paper/paperboard; defoamer in food-contact coatings; exc. persistency and color acceptance

*Use Level:* 2-10 lb/100 gal

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200

*Properties:* Amber opaque; fineness (Hegman)  $\geq 6$ ; sp.gr. 0.909  $\pm$  0.012; dens. 7.57  $\pm$  0.1 lb/gal; pour pt. > 30 F; flash pt. (PMCC) > 300 F; VOC < 1.5%; 100% act.

*Toxicology:* Eye or skin irritant on prolonged contact; do not take internally; TSCA listed

*Storage:* If stored outside, bring to R.T. before use; prod. may settle; stir before use

**Patcote® 8060** [Am. Ingreds./Patco]

*Chem. Descrip.:* Nonsilicone silica-organic

*Uses:* Defoamer for use in acrylic, terpolymer, and PVC systems for trade sale and industrial paints, screen printing inks, alkyd, epoxy, polyester, PU, PVAc, and S/B systems; food pkg. adhesives, coatings, paper/paperboard; defoamer in food-contact coatings; exc. persistency and color acceptance

*Use Level:* 3-6 lb/100 gal

*Regulatory:* FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200

*Properties:* Amber opaque.; fineness (Hegman)  $\geq 6$ ; sp.gr. 0.904  $\pm$  0.012; dens. 7.50  $\pm$  0.1 lb/gal; pour pt. -5 F; flash pt. (PMCC) > 300 F; VOC < 1.5%

*Toxicology:* Eye or skin irritant on prolonged contact; do not take internally; TSCA listed

*Storage:* If stored outside, bring to R.T. before use; may show sl. separation on extended storage; stir before use

**Path® 9** [Huber Engineered Materials]

*Chem. Descrip.:* Alumina trihydrate

CAS 21645-51-2; EINECS/ELINCS 244-492-7

*Uses:* Extender/partial replacement for TiO<sub>2</sub> in coating applics.; flame retardant

*Properties:* Wh. free-flowing fine powd.; 100% thru 325 mesh; 2  $\mu$  median particle size; sp.gr. 2.42; dens. 20.19 lb/gal; bulk dens. (loose) 0.35, (packed) 0.5; surf. area 13 m<sup>2</sup>/g; oil absorp. 38; TAPPI brightness 95

**Paxgard BD 20** [Pax Group]

*Chem. Descrip.:* 2-Bromo-2-nitropropane-1,3-diol

CAS 52-51-7; EINECS/ELINCS 200-143-0

*Uses:* Biocide, algicide for complete wet-state preservation of aq. systems; slimicide, fungicide, bactericide for paper/pulp

*Properties:* Liq.; 20% act.

**Paxgard BD 88** [Pax Group]

*Chem. Descrip.:* 2-Bromo-2-nitropropane-1,3-diol

CAS 52-51-7; EINECS/ELINCS 200-143-0

*Uses:* Biocide, algicide for complete wet-state preservation of aq. systems; slimicide, fungicide, bactericide for paper/pulp; microbicide for prod. of industrial biocide formulations; broad spectrum

*Properties:* Powd.; 87% act.

**Paxgard BK 20** [Pax Group]

*Chem. Descrip.:* Alkyl dimethyl benzyl ammonium chloride

*Uses:* Biocide, algicide for formulation of disinfectants, cleansers, sterilants, algicidal washes; preservative, slimicide, fungicide, bactericide, disinfectant, sterilant for paper/pulp

*Properties:* Liq.; 20% act.

*Toxicology:* Low toxicity

**Paxgard BKC** [Pax Group]

*Chem. Descrip.:* Alkyl dimethyl benzyl ammonium chloride

*Uses:* Biocide, algicide for formulation of disinfectants, cleansers, sterilants, fungicidal/algicidal washes; preservative, slimicide, fungicide, bactericide, disinfectant, sterilant for paper/pulp

*Properties:* Liq.; 50% act.

*Toxicology:* Low toxicity

**Paxgard BSL** [Pax Group]

*Chem. Descrip.:* 2-Thiocyanomethylthiobenzothiazole and methylenebis (thiocyanate)

*Uses:* Biocide, fungicide for long-term protection of leather and timber from bacterial and fungal growth; biocide, slimicide, fungicide, bactericide for paper/pulp; good penetration props.

*Properties:* Liq.; 20% act.

**Paxgard BU 30** [Pax Group]

*Chem. Descrip.:* 2-Thiocyanomethylthiobenzothiazole

CAS 21564-17-0

*Uses:* Biocide, fungicide for protection of leather and timber from bacterial and fungal growth; biocide, slimicide, fungicide, bactericide for paper/pulp; phenol-free

*Properties:* Liq.; water-disp.; 30% act.

**Paxgard BU 30 L** [Pax Group]

*Chem. Descrip.:* 2-Thiocyanomethylthiobenzothiazole

CAS 21564-17-0

*Uses:* Biocide, fungicide, algicide for protection of leather and timber from bacterial and fungal growth; biocide, slimicide, fungicide, bactericide for paper/pulp; phenol-free

*Properties:* Liq.; water-disp.; 30% act.

**Paxgard BU 60** [Pax Group]

*Chem. Descrip.:* 2-Thiocyanomethylthiobenzothiazole

CAS 21564-17-0

*Uses:* Biocide, fungicide, algicide for protection of leather and timber from bacterial and fungal growth; biocide, slimicide, fungicide, bactericide for paper/pulp; prod. of various industrial biocide formulations; phenol-free

*Properties:* Liq.; insol. in water; 60% act.

**Paxgard DB 10** [Pax Group]

*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide

CAS 10222-01-2

*Uses:* Biocide, algicide, fungicide, bactericide for paper/pulp; cost-effective; broad spectrum; halogen-releasing

*Properties:* Liq.; 10% act.

**Paxgard DB 20** [Pax Group]

*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide

CAS 10222-01-2

*Uses:* Biocide, algicide, fungicide, bactericide for paper/pulp; cost-effective; broad spectrum; halogen-releasing

*Properties:* Liq.; 20% act.

**Paxgard DB 99** [Pax Group]

*Chem. Descrip.:* 2,2-Dibromo-3-nitropropionamide

CAS 10222-01-2

*Uses:* Biocide, algicide, fungicide, bactericide for paper/pulp; prod. of various industrial biocide formulations; broad spectrum; halogen-releasing

*Properties:* Powd.; 99% act.

**Paxgard EM** [Pax Group]

*Chem. Descrip.:* Hexahydro-1,3,5-tris (2-hydroxyethyl)-s-triazine

CAS 4719-04-4; EINECS/ELINCS 225-208-0

*Uses:* Biocide for wet-state protection of aq. metalworking fluids and other alkaline prods.; biocide, slimicide, fungicide, bactericide, disinfectant, sterilant for paper/pulp

*Properties:* Liq.; 100% act.

**Paxgard GDA** [Pax Group]

*Chem. Descrip.:* Glutaraldehyde

CAS 111-30-8; EINECS/ELINCS 203-856-5

*Uses:* Biocide, fungicide for wet-state protection of aq. formulations; preservative, biocide, bactericide for paper/pulp; prod. of various industrial biocide formulations; wide spectrum; protects against bacteria, yeasts, fungi

*Properties:* Water-sol.

**Paxgard GT 10** [Pax Group]

*Chem. Descrip.:* Glutaraldehyde

CAS 111-30-8; EINECS/ELINCS 203-856-5

*Uses:* Biocide, fungicide for wet-state protection of aq. formulations; preservative, biocide, bactericide for paper/pulp; prod. of various industrial biocide formulations; wide spectrum; protects against bacteria, yeasts, fungi

*Properties:* Water-sol.

**Paxgard GT 20** [Pax Group]

*Chem. Descrip.:* Glutaraldehyde

CAS 111-30-8; EINECS/ELINCS 203-856-5

*Uses:* Biocide, fungicide for wet-state protection of aq. formulations; preservative, biocide, bactericide for paper/pulp; prod. of various industrial biocide

- formulations; wide spectrum; protects against bacteria, yeasts, fungi  
*Properties:* Water-sol.
- Paxgard MB 10** [Pax Group]  
*Chem. Descrip.:* Methylenebisthiocyanate  
 CAS 6317-18-6  
*Uses:* Biocide, fungicide for industrial water systems; biocide, slimicide, fungicide, bactericide for paper/pulp; nonoxidizing; stable in and suited for neutral to acidic conditions; exc. penetration chars.  
*Properties:* Liq.; 10% act.
- Paxgard MBT** [Pax Group]  
*Chem. Descrip.:* Methylenebisthiocyanate  
 CAS 6317-18-6  
*Uses:* Biocide, fungicide, algicide for industrial water systems; biocide, slimicide, fungicide, bactericide, antifoulant for paper/pulp; prod. of various industrial biocide formulations; stable in and suited for neutral to acidic conditions; exc. penetration chars.  
*Properties:* Powd.; 99% act.
- Paxgard PDC** [Pax Group]  
*Chem. Descrip.:* Potassium dimethyldithiocarbamate  
 CAS 128-03-0  
*Uses:* Biocide, fungicide, algicide, bactericide for paper/pulp; low-cost; broad spectrum; halogen- and aldehyde-free; nonfoaming; noncorrosive  
*Properties:* Liq.; 40% act.  
*Storage:* Exc. storage stability
- Paxgard SDC** [Pax Group]  
*Chem. Descrip.:* Sodium dimethyldithiocarbamate  
 CAS 128-04-1; EINECS/ELINCS 204-876-7  
*Uses:* Biocide, fungicide, algicide, bactericide for paper/pulp; low-cost; broad spectrum; halogen- and aldehyde-free; nonfoaming; noncorrosive  
*Properties:* Liq.; 40% act.  
*Storage:* Exc. storage stability
- Paxgard ST** [Pax Group]  
*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one, 2-methyl-4-isothiazolin-3-one, bromonitropropanediol  
*Uses:* Biocide, fungicide for complete wet-state protection of aq. prods.; biocide, slimicide, fungicide, bactericide for paper/pulp; broad spectrum  
*Properties:* Liq.
- Paxgard TC** [Pax Group]  
*Chem. Descrip.:* 2-Thiocyanomethylthiobenzothiazole aq. sol'n.  
 CAS 21564-17-0  
*Uses:* Microbicide, algicide for water treatment, paper mill applics.; biocide, slimicide, fungicide, bactericide for paper/pulp; cost-effective  
*Properties:* Liq.
- Paxgard WT** [Pax Group]  
*Chem. Descrip.:* 5-Chloro-2-methyl-4-isothiazolin-3-one and 2-methyl-4-isothiazolin-3-one  
*Uses:* Biocide, fungicide, bactericide for water treatment, paper mill applics.; formaldehyde-free  
*Properties:* Liq.; 1.5% act.  
*Toxicology:* Low toxicity
- Paxnol ALES** [Pax Group]  
*Chem. Descrip.:* Ammonium lauryl ether sulfate aq. sol'n.  
 CAS 32612-48-9  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foam booster/stabilizer, wetting agent, visc. builder for shampoos, bubble baths, hand soaps, paper/pulp; hydrolytically stable in low pH formulas  
*Properties:* Liq.; 26% act.; anionic
- Paxnol ALS** [Pax Group]  
*Chem. Descrip.:* Ammonium lauryl sulfate aq. sol'n.  
 CAS 2235-54-3; EINECS/ELINCS 218-793-9  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foaming agent, wetting agent, visc. booster in liq. shampoos, bath gels, cleansers, paper/pulp; gives very stable visc. response and consistency  
*Properties:* Liq.; 27% act.; anionic
- Paxnol LES** [Pax Group]  
*Chem. Descrip.:* Sodium lauryl ether sulfate  
 CAS 9004-82-4; EINECS/ELINCS 221-416-0  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foam booster/stabilizer, wetting agent for paper/pulp, other applics.; relatively more stable than sodium lauryl sulfate in electrolytic media; superior hard water tolerance  
*Properties:* Liq.; 27% act.; anionic
- Paxnol PLES** [Pax Group]  
*Chem. Descrip.:* Sodium alkyl ether sulfate  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foam booster/stabilizer, wetting agent for shampoos, detergents, industrial formulations, paper/pulp; low-cost  
*Properties:* Liq.; 27% act.; anionic
- Paxnol PSLs** [Pax Group]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foaming agent, wetting agent for cosmetics, industrial cleaners, paper/pulp; low-cost  
*Properties:* Powd.; 87% act.; anionic
- Paxnol SLS Liq.** [Pax Group]  
*Chem. Descrip.:* Sodium lauryl sulfate aq. sol'n.  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foaming agent, wetting agent for detergents, personal care, paper/pulp  
*Properties:* Liq.; 28% act.; anionic
- Paxnol SLS Powd.** [Pax Group]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foaming agent, wetting agent for shampoos, shaving creams, paper/pulp; high purity  
*Properties:* Powd.; 90% act.; anionic
- Paxnol SLS Pure** [Pax Group]  
*Chem. Descrip.:* Sodium lauryl sulfate  
 CAS 151-21-3; EINECS/ELINCS 205-788-1  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foaming agent, wetting agent for shampoos, shaving creams, dentifrices, paper/pulp; extra pure grade  
*Properties:* Powd.; 95% act.; anionic
- Paxnol TLS** [Pax Group]  
*Chem. Descrip.:* TEA-lauryl sulfate  
 CAS 139-96-8; EINECS/ELINCS 205-388-7  
*Uses:* Surfactant, emulsifier, detergent, degreaser, dispersant, foaming agent, wetting agent for clear formulations, paper/pulp; rec. for prods. requiring low temp. stability and low irritability; gives very fine lathering even in hard water  
*Properties:* Liq.; 40% act.; anionic
- Paxogen COB** [Pax Group]  
*Chem. Descrip.:* Cocobetaine  
 EINECS/ELINCS 270-329-4  
*Uses:* Surfactant, emulsifier, foam booster/stabilizer, visc. builder, anti-irritant in personal care prods.; surfactant, wetting agent, solubilizer, antistat, thickener, conditioner in paper/pulp; cost-effective; exc. foaming in acid, alkali, and electrolyte systems  
*Properties:* Liq.; 34% act.; amphoteric  
*Environmental:* Completely biodeg.
- Paxogen LAO** [Pax Group]  
*Chem. Descrip.:* Alkyl dimethyl amine oxide  
*Uses:* Surfactant, emulsifier, foam booster/stabilizer, dispersant, conditioner, visc. builder in personal care, industrial formulations; surfactant, wetting agent, thickener, antistat, conditioner in paper/pulp  
*Properties:* Liq.; 25% act.; amphoteric
- Paxonic CO 40** [Pax Group]  
*Chem. Descrip.:* Castor oil ethoxylate (36-40 mole EO)  
 CAS 61791-12-6  
*Uses:* Surfactant; dispersant; lubricant; dye leveling agent; emulsion stabilizer in pesticides; surfactant, wetting agent, solubilizer, degreaser, lubricant in paper/pulp; high HLB; forms exc. binary emulsification systems with other nonionic and anionic emulsifiers  
*Properties:* Liq.; 99% act.; nonionic  
*Environmental:* Biodeg.
- Paxonic CO 60** [Pax Group]  
*Chem. Descrip.:* Castor oil ethoxylate (56-60 mole EO)  
 CAS 61791-12-6  
*Uses:* Surfactant; dispersant; lubricant; dye leveling agent; emulsion stabilizer in pesticides; surfactant, wetting agent, solubilizer, degreaser, lubricant in paper/pulp; high HLB; forms exc. binary emulsification systems with other nonionic and anionic emulsifiers  
*Properties:* Paste; 99% act.; nonionic  
*Environmental:* Biodeg.
- Paxsolv PC** [Pax Group]

*Chem. Descrip.:* Dibasic ester

*Uses:* Solvent, solubilizer, leveling agent, plasticizer, lubricant in paper/pulp; very high purity; high b.p. permits VOC-free formulations; replacement for toxic and hazardous chlorinated hydrocarbons

*Properties:* Liq.; 98% act.

*Environmental:* Biodeg.

**Paxsorbate 20** [Pax Group]

*Chem. Descrip.:* Polysorbate-20

CAS 9005-64-5

*Uses:* Solubilizer, emulsifier for industrial applics.; dye leveling agent; surfactant, solubilizer, thickener, antistat, softener, stabilizer, lubricant in paper/pulp; high HLB

*Properties:* Liq.; very good water sol.; 97% act.; nonionic

**Paxsorbate 60** [Pax Group]

*Chem. Descrip.:* Polysorbate-60

CAS 9005-67-8

*Uses:* Solubilizer, emulsifier for industrial applics.; dye leveling agent; surfactant, solubilizer, thickener, antistat, softener, stabilizer, lubricant in paper/pulp; high HLB

*Properties:* Semisolid; very good water sol.; 97% act.; nonionic

**Paxsorbate 80** [Pax Group]

*Chem. Descrip.:* Polysorbate-80

CAS 9005-65-6

*Uses:* Solubilizer, emulsifier for industrial applics.; dye leveling agent; surfactant, solubilizer, thickener, antistat, softener, stabilizer, lubricant in paper/pulp; high HLB

*Properties:* Liq.; very good water sol.; 97% act.; nonionic

**PD-23** [Crompton/Witco]

*Chem. Descrip.:* Deodorized kerosene

CAS 8008-20-6; EINECS/ELINCS 232-366-4

*Uses:* Solvent used as defoamer, dust control agent, quench oil, diluent for fiber lubricants, metal foil and sheet rolling oils, in froth flotation of vegetables, mfg. of paper/paperboard, in waterless hand cleaners, liq. candles, charcoal lighter fluid, polishes, cleaners, cosmetic/pharmaceutical creams and lotions, water treatment, food-contact applics.; pesticide diluent; non-VOC

*Regulatory:* FDA 21CFR §172.884, 178.3650

*Properties:* Colorless clear liq., nearly odorless; sp.gr. 0.800 (60/60 C); visc. 2.6 cSt (40 C); vapor pressure < 0.01 mm Hg (20 C); b.p. 452 F; pour pt. 0 F; flash pt. (COC) 230 F; ref. index 1.442

**PD-25** [Crompton/Witco]

*Chem. Descrip.:* Petroleum distillates

EINECS/ELINCS 232-298-5

*Uses:* Solvent used as defoamer, dust control agent, quench oil, diluent for fiber lubricants, metal foil and sheet rolling oils, in froth flotation of vegetables, mfg. of paper and board, in waterless hand cleaners, liq. candles, charcoal lighter fluid, polishes, cleaners, pharmaceutical creams and lotions, water treatment, food-contact applics.; pesticide diluent; non-VOC

*Regulatory:* FDA 21CFR §172.884, 178.3650

*Properties:* Colorless clear liq., nearly odorless; sp.gr. 0.810 (60/60 C); visc. 3.9 cSt (40 C); vapor pressure < 0.01 mm Hg (20 C); b.p. 510 F; pour pt. 20 F; flash pt. (COC) 260 F; ref. index 1.446

**PD-28** [Crompton/Witco]

*Chem. Descrip.:* Petroleum distillates

EINECS/ELINCS 232-298-5

*Uses:* Solvent used as defoamer, dust control agent, quench oil, diluent for fiber lubricants, metal foil and sheet rolling oils, in froth flotation of vegetables, mfg. of paper and board, in waterless hand cleaners, liq. candles, charcoal lighter fluid, polishes, cleaners, pharmaceutical creams and lotions, water treatment, food-contact applics.; pesticide diluent; non-VOC

*Regulatory:* FDA 21CFR §172.878, 178.3620a

*Properties:* Colorless liq., nearly odorless; sp.gr. 0.820 (60/60 C); visc. 4.6 cSt (40 C); vapor pressure < 0.01 mm Hg (20 C); b.p. 526 F; pour pt. 30 F; flash pt. (COC) 285 F; ref. index 1.450

**Pearl** [Tate & Lyle N. Am.]

*Chem. Descrip.:* Unmodified dent corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Paper aux. for size press and paper coatings

**Pearl AP, R** [Tate & Lyle N. Am.]

*Chem. Descrip.:* Unmodified dent corn starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Paper aux. for size press and paper coatings

**Peerless® No. 1** [R.T. Vanderbilt]

*Chem. Descrip.:* Sec. kaolin clay

*Chem. Analysis:* SiO<sub>2</sub> (43.9%), Al<sub>2</sub>O<sub>3</sub> (40%), TiO<sub>2</sub> (1.2%)

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Filler used in adhesives, wallboard, paints, caulks, paper, fertilizer, roofing gran., crayons, powd. soaps, pharmaceuticals, ceramics, sanitaryware, artware, generalware, floor tile, elec. and chemical porcelain, and special refractories; extender pigment in coatings (traffic paints, barn paints, floor coverings, metal primers), crack fillers, caulking compds.; imparts more plasticity to cast piece; no ozone-depleting substances

*Properties:* Wh. particulate; 0.6 μ median particle size, 99.6% thru -325-mesh screen; dens. 2.6 mg/m<sup>3</sup>, 16 lb/ft<sup>3</sup>; oil absorp. 30; brightness 75; pH 4.6 (10%)

**Peerless® No. 2** [R.T. Vanderbilt]

*Chem. Descrip.:* Sec. kaolin clay

*Chem. Analysis:* SiO<sub>2</sub> (44.6%), Al<sub>2</sub>O<sub>3</sub> (39.5%)

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Filler used in adhesives, wallboard, paints, primers, caulks, paper, fertilizer, roofing gran., crayons, powd. soaps, pharmaceuticals, ceramics, sanitaryware, artware, generalware, floor tile, elec. and chemical porcelain, and special refractories; extender pigment in coatings (traffic paints, barn paints, floor coverings, metal primers), crack fillers, caulking compds.; imparts more plasticity to cast piece; no ozone-depleting substances

*Properties:* Lt. cream particulate; particle size 1.2 μ, 99.6% thru -325 mesh; dens. 2.5 mg/m<sup>3</sup>, 16 lb/ft<sup>3</sup>; oil absorp. 30; brightness 71; pH 4.8

**Peerless® No. 3** [R.T. Vanderbilt]

*Chem. Descrip.:* Sec. kaolin clay

*Chem. Analysis:* SiO<sub>2</sub> (43.9%), Al<sub>2</sub>O<sub>3</sub> (40%), TiO<sub>2</sub> (1.2%)

CAS 1332-58-7; EINECS/ELINCS 296-473-8

*Uses:* Filler used in adhesives, wallboard, paints, primers, caulks, paper, fertilizer, roofing gran., crayons, powd. soaps, pharmaceuticals, ceramics, sanitaryware, artware, generalware, floor tile, elec. and chemical porcelain, and special refractories; extender pigment in coatings (traffic paints, barn paints, floor coverings, metal primers), crack fillers, caulking compds.; imparts more plasticity to cast piece; no ozone-depleting substances

*Properties:* Cream particulate; 0.6 μ median particle size, 99.6% thru -200-mesh screen; dens. 2.6 mg/m<sup>3</sup>, 16 lb/ft<sup>3</sup>; oil absorp. 33; brightness 65; pH 4.6 (10%)

**Pegospense® 100 L** [Lonza]

*Chem. Descrip.:* PEG-2 laurate SE

CAS 141-20-8

*Uses:* Surfactant, w/o or o/w emulsifier for cosmetic creams and lotions, textile spin finishes and lubricants, solv. and solventless coatings, paper defoamer formulations; internal antistat for PP; indirect food additive; self-dispersing

*Regulatory:* FDA approved as indirect food additive

*Properties:* Straw clear liq.; sol. in ethanol, toluol, naphtha, min. oil; disp. in water; sp.gr. 0.97; HLB 7; solid. pt. < 13 C; acid no. < 4; sapon. no. 160-170; pH 9 (5% aq.); 100% conc.; anionic

**Pegospense® 400 DOT** [Lonza]

*Chem. Descrip.:* PEG-8 ditallate

CAS 61791-01-3

*Uses:* Surfactant, emulsifier for paper defoamers, solv. and solventless coatings; emulsifier, dispersant, opacifier, visc. control agent, defoamer for cosmetic, household prods., textiles, paper, water treatment

*Properties:* Yel. liq.; HLB 8; acid no. 16 max.; iodine no. 75-85; sapon. no. 115-125; pH 4 (5%); nonionic

**Pegospense® 400 MS** [Lonza]

*Chem. Descrip.:* PEG-8 stearate

CAS 9004-99-3

*Uses:* Surfactant, o/w emulsifier, thickener, pigment grinding aid in hair, skin, and makeup prods., household polishes, cleaners, silicone-based lubricants; emulsifier, lubricant, and softener for textile processing oils and finishes; component of diamond abrasive pastes; anti-gel agent in starch sol'ns. for paper industry; internal antistat for PS

*Properties:* Wh. soft solid; sol. in methanol, ethanol, acetone, ethyl acetate, toluol, naphtha, min. and veg. oils; disp. in water; sp.gr. 1.0; m.p. 30 C min.; HLB 11; acid no. 3 max.; sapon. no. 83-94; pH 5 (5% aq.); 100% conc.; nonionic

**Pegospense® 600 DO** [Lonza]

*Chem. Descrip.:* PEG-12 dioleate

CAS 9005-07-6; EINECS/ELINCS 288-459-5

*Uses:* Surfactant; emulsifier for paper defoamers, solv. and solventless coat-

- ings; lubricant for textile spin finishes  
*Regulatory:* Avail. as kosher certified  
*Properties:* Yel. liq.; water-sol.; HLB 9; acid no. 7 max.; sapon. no. 90-100; 100% act.; nonionic
- Pegospense® 600 DOT** [Lonza]  
*Chem. Descrip.:* PEG-12 ditallate  
 CAS 61791-01-3  
*Uses:* Emulsifier, dispersant, opacifier, visc. control agent, defoamer for cosmetic, household prods., textiles, paper, coatings, water treatment  
*Properties:* Gardner 10 max. liq.; water-sol.; HLB 9; acid no. 16 max.; sapon. no. 95-105; 0.5% max. moisture; 100% act.; nonionic
- Pencat® Cationic Starches** [Penford Prods.]  
*Chem. Descrip.:* Corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Wet str. agent, retention aid for paper and paperboard; alkaline size emulsion stabilizer  
*Properties:* Cationic
- Pen-cote® Starch** [Penford Prods.]  
*Chem. Descrip.:* Hydroxyethyl starch deriv.  
 CAS 9005-25-8; EINECS/ELINCS 232-686-4  
*Uses:* Provides visc. stability, water retention, and binding power for specialty paper coatings, size press; extremely low visc.; can be cooked at very high solids for use in high solids coating colors; exc. compat. with other coating ingreds.
- PenCP® Binder** [Penford Prods.]  
*Chem. Descrip.:* Starch/latex copolymer  
*Uses:* Binder for coating paper; for use alone or with other binders; no cooking required; ready-to-use liq.  
*Properties:* Liq.
- Penetron OT-30** [Hart Prods.]  
*Chem. Descrip.:* 2-Ethylhexyl sulfosuccinate  
*Uses:* Penetrant, wetting agent, surf. tens. depressant for textiles, paper, paint, plastic, rubber and metal industries  
*Properties:* Liq.; 25-30% conc.; anionic
- PenExcel™ Sizing Agent** [Penford Prods.]  
*Chem. Descrip.:* Carbohydrate-based  
*Uses:* Binder, water absorbent, sizing agent for ink jet printing papers; enhances internal bond development; batch or jet cooked  
*Properties:* Dry powder.
- PenFilm™ Binder** [Penford Prods.]  
*Chem. Descrip.:* Modified starch  
 CAS 9005-25-8; EINECS/ELINCS 232-686-4  
*Uses:* Binder, sizing agent, surf. strengthener for paper and board applics. on size press or as coating additive, incl. food pkg.; reduces total starch usage  
*Regulatory:* FDA compliant
- Penford® Gum** [Penford Prods.]  
*Chem. Descrip.:* Hydroxyethyl ether derivatized corn starch  
 CAS 9005-25-8; EINECS/ELINCS 232-679-6  
*Uses:* Paper additive for use at the size press in clear size and pigmented formulas, coating, and calender stack; uniform visc.; high gloss and ink holdout; flexible water-holding films
- Penreco 2251 Oil** [Penreco]  
*Chem. Descrip.:* Petroleum distillates  
 CAS 64742-14-9; EINECS/ELINCS 232-298-5  
*Uses:* Solvent for carbonless copy paper for office forms, industrial cleaning solvs., waterless hand cleaners, fragrance bases, automotive and furniture polishes, insecticide bases, lamp oils, food processing; defoamers in paper and coatings industries; froth flotation of vegetables, electrostatic discharge machine fluids, magnetic particle inspection fluids; food-contact applics.  
*Regulatory:* FDA 21CFR §172.884, 178.3650, 573.740  
*Properties:* Sp.gr. 0.786 (60/60 F); dens. 6.56 lb/gal (60 F); visc. 1.66 cSt (100 F); i.b.p. 191 C min.; pour pt. -40 C; flash pt. 74 C; KB value 28; < 1% aromatics  
*Precaution:* DOT: combustible liq.
- Penreco 2257 Oil** [Penreco]  
*Chem. Descrip.:* Sat. hydrocarbon  
 CAS 64742-46-7  
*Uses:* Solvent for carbonless copy paper for office forms, industrial cleaning solvs., waterless hand cleaners, fragrance bases, automotive and furniture polishes, insecticide bases, lamp oils, food processing; defoamers in paper and coatings industries; froth flotation of vegetables, electrostatic discharge machine fluids, magnetic particle inspection fluids; food-contact applics.

- Regulatory:* FDA 21CFR §172.884, 178.3650, 573.740  
*Properties:* Sp.gr. 0.795 (60/60 F); dens. 6.64 lb/gal (60 F); visc. 2.18 cSt (100 F); vapor pressure < 0.1 mm Hg; i.b.p. 221 C min.; pour pt. -26 C; flash pt. 99 C; KB value 26.5; < 1% aromatics
- Penreco 2259 Oil** [Penreco]  
*Chem. Descrip.:* Mineral oil  
 CAS 8042-47-5; EINECS/ELINCS 232-384-2  
*Uses:* Solvent for carbonless copy paper for office forms, industrial cleaning solvs., waterless hand cleaners, fragrance bases, automotive and furniture polishes, insecticide bases, lamp oils, defoamers in paper and coatings industries; froth flotation of vegetables, electrostatic discharge machine fluids, magnetic particle inspection fluids; food-contact applics.  
*Regulatory:* FDA 21CFR §172.884, 178.3650, 573.740  
*Properties:* Sp.gr. 0.804 (60/60 F); dens. 6.69 lb/gal (60 F); visc. 2.28 cSt (100 F); vapor pressure < 0.1 mm Hg; i.b.p. 235 C min.; pour pt. -18 C; flash pt. 102 C; KB value 24.5; < 1% aromatics
- Penreco 2260 Oil** [Penreco]  
*Chem. Descrip.:* Mineral oil  
 CAS 8042-47-5; EINECS/ELINCS 232-384-2  
*Uses:* Solvent for carbonless copy paper for office forms, industrial cleaning solvs., waterless hand cleaners, fragrance bases, automotive and furniture polishes, insecticide bases, lamp oils, defoamers in paper and coatings industries; froth flotation of vegetables, electrostatic discharge machine fluids, magnetic particle inspection fluids; food-contact applics.  
*Regulatory:* FDA 21CFR §172.884, 178.3650, 573.740  
*Properties:* Sp.gr. 0.812 (60/60 F); dens. 6.76 lb/gal (60 F); visc. 4.3 cSt (100 F); vapor pressure < 0.1 mm Hg; i.b.p. 266 C min.; pour pt. -4 C; flash pt. 127 C; KB value 22.6; < 1% aromatics
- Penreco 2263 Oil** [Penreco]  
*Chem. Descrip.:* Petroleum distillates  
 CAS 64742-47-8; EINECS/ELINCS 232-298-5  
*Uses:* Solvent for carbonless copy paper for office forms, industrial cleaning solvs., waterless hand cleaners, fragrance bases, automotive and furniture polishes, insecticide bases, lamp oils, defoamers in paper and coatings industries; froth flotation of vegetables, electrostatic discharge machine fluids, magnetic particle inspection fluids; food-contact applics.  
*Regulatory:* FDA 21CFR §172.884, 178.3650, 573.740  
*Properties:* Sp.gr. 0.786 (60/60 F); dens. 6.56 lb/gal (60 F); visc. 1.68 cSt (100 F); i.b.p. 191 C min.; pour pt. -40 C; flash pt. 74 C; KB value 29; < 1% aromatics  
*Precaution:* DOT: combustible liq.
- Penreco Amber** [Penreco]  
*Chem. Descrip.:* Petrolatum USP  
 CAS 8027-32-5; EINECS/ELINCS 232-373-2  
*Uses:* Emollient, base for cosmetic and pharmaceutical preparations; waterproofing agent for butcher paper; lubricant, water repellent, moisture barrier for textile and paper; carrier for modeling clays, soldering paste and flux; pigment carrier for carbon paper; binder and conditioner for crayons; animal feed supplements; fruit/veg. coatings; food pkg. materials; external lube for PVC; rubber processing aid  
*Regulatory:* FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous  
*Properties:* Yel. semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60 F); visc. 68-82 SUS (210 F); m.p. 122-135 F; congeal pt. 123 F; solid. pt. 122 F; flash pt. (COC) 400 F  
*Toxicology:* Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed  
*Precaution:* Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents  
*Storage:* Store in closed containers away from heat, sparks, open flame, oxidizers
- Penreco Blond** [Penreco]  
*Chem. Descrip.:* Petrolatum USP  
 CAS 8027-32-5; EINECS/ELINCS 232-373-2  
*Uses:* Emollient, base for cosmetic and pharmaceutical preparations; lubricant, water repellent, moisture barrier for textile and paper; food additive; food-contact applics.  
*Regulatory:* FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous  
*Properties:* Yel. semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60 F); visc. 68-82 SUS (210 F); m.p. 122-135 F; congeal pt. 123 F; solid. pt. 122

## Penreco Cream

F; flash pt. (COC) 400 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame, oxidizers

## Penreco Cream [Penreco]

**Chem. Descrip.:** Wh. petrolatum USP

CAS 8027-32-5; EINECS/ELINCS 232-373-2

**Uses:** Emollient, base, and carrier for cosmetic and pharmaceutical preparations; lubricant for textile and paper; food additive; food-contact applics.

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Cream visc. semisolid, odorless; sol. in hydrocarbons; insol. in water; sp.gr. 0.87 (60/60 F); visc. 64-75 SUS (210 F); m.p. 122-125 F; b.p. 650 F; congeal pt. 125 F; solid. pt. 122 F; flash pt. (COC) 445 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame, oxidizers

## Penreco Lily [Penreco]

**Chem. Descrip.:** Wh. petrolatum USP

CAS 8027-32-5; EINECS/ELINCS 232-373-2

**Uses:** Emollient, base, and carrier for cosmetic and pharmaceutical preparations; lubricant for textile and paper; food additive; food-contact applics.

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Wh. visc. material, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60/60 F); visc. 64-75 SUS (210 F); m.p. 122-135 F; b.p. 650 F; congeal pt. 124 F; solid. pt. 123 F; flash pt. (COC) 400 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame, oxidizers

## Penreco Red [Penreco]

**Chem. Descrip.:** Tech. petrolatum

CAS 8009-03-8; EINECS/ELINCS 232-373-2

**Uses:** Base and binder for buffing compds., polishes, shoe polishes; rubber processing aids; carbon papers; corrosion preventatives; general-purpose lubricants; printing inks; solder pastes; tech.-grade

**Regulatory:** OSHA nonhazardous; DOT nonhazardous

**Properties:** Red; visc. 70-82 SUS (210 F); m.p. 120-135 F

## Penreco Regent [Penreco]

**Chem. Descrip.:** Wh. petrolatum USP

CAS 8027-32-5; EINECS/ELINCS 232-373-2

**Uses:** Emollient, base, and carrier for cosmetic and pharmaceutical preparations (creams, lotions, petrol. jellies, makeup, absorp. base, ophthalmic and topical ointments, dental adhesives); water repellent, moisture barrier, lubricant for textile and paper; plasticizer and softener for putty; shoe polishes; food additive; food-contact applics.

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Wh. semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60/60 F); visc. 57-70 SUS (210 F); m.p. 125-130 F; b.p. 650 F; congeal pt. 120 F; solid. pt. 119 F; flash pt. (COC) 400 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame, oxidizers

## Penreco Royal [Penreco]

**Chem. Descrip.:** Petrolatum USP

CAS 8027-32-5; EINECS/ELINCS 232-373-2

**Uses:** Emollient, base, and carrier for cosmetic and pharmaceutical preparations; lubricant for textile and paper; food additive; food-contact applics.

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Yel. semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60 F); visc. 57-70 SUS (210 F); m.p. 118-130 F; congeal pt. 118 F; solid. pt. 115 F; flash pt. (COC) 400 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame, oxidizers

## Penreco Snow [Penreco]

**Chem. Descrip.:** Wh. petrolatum USP

CAS 8027-32-5; EINECS/ELINCS 232-373-2

**Uses:** Emollient, base, solvent, and carrier for cosmetic and pharmaceutical preparations (creams, lotions, petrol. jellies, ointments, dental adhesives); foods (animal feed supplement, fruit/veg. coatings); sanitary lubricant in food prod. machinery; rust-preventive coating in food processing equipment; carrier in adhesive tapes and compds.; lubricant for textile, paper, PVC; shoe polishes; food-contact applics.

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Wh. opaque semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60/60 F); visc. 64-75 SUS (210 F); vapor pressure < 1 mm Hg (70 F); m.p. 122-135 F; b.p. 650 F; congeal pt. 123 F; solid. pt. 121 F; flash pt. (COC) 400 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame, oxidizers

## Penreco Super [Penreco]

**Chem. Descrip.:** Wh. petrolatum USP

CAS 8027-32-5; EINECS/ELINCS 232-373-2

**Uses:** Emollient, base, and carrier for cosmetic and pharmaceutical preparations; lubricant for textile and paper; food additive; food-contact applics.

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Wh. opaque semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60/60 F); visc. 60-75 SUS (210 F); m.p. 122-135 F; b.p. 650 F; congeal pt. 125 F; solid. pt. 124 F; flash pt. (COC) 400 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame, oxidizers

## Penreco Ultima [Penreco]

**Chem. Descrip.:** Wh. petrolatum USP

CAS 8027-32-5; EINECS/ELINCS 232-373-2

**Uses:** Emollient, base, and carrier for cosmetic and pharmaceutical preparations (creams, lotions, hair prods., lip prods., lip balms, makeup, absorp. bases, ophthalmic and topical ointments, dental adhesives); foods (fruit/veg. coatings, food pkg.); lubricant for textile and paper

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Wh. opaque semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60/60 F); visc. 60-70 SUS (210 F); m.p. 130-140 F; b.p. 650 F; congeal pt. 130 F; solid. pt. 128 F; flash pt. (COC) 400 F

**Toxicology:** Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m<sup>3</sup> (as oil mist); TSCA listed

**Precaution:** Combustion may produce dense smoke, CO, CO<sub>2</sub>, other oxides; may react with strong oxidizing agents

**Storage:** Store in closed containers away from heat, sparks, open flame,

oxidizers

**Pensize® Binder** [Penford Prods.]*Chem. Descrip.:* Starch styrene/butadiene copolymer*Uses:* Binder for pigmented and clear formulations on conventional and metering size presses; for use alone or with other binders; no cooking required; ready-to-use liq.; readily pumpable*Properties:* Liq.**Pen-sprae® Starch** [Penford Prods.]*Chem. Descrip.:* Starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

*Uses:* Wet str. agent for papermaking; sprayed in uncooked slurry form on already formed sheet; improves lining resist. and plybond**PenStack™ Calender Size** [Penford Prods.]*Uses:* Surf. treatment for recycled board for use in water box formulations to be applied at the calender stack; exc. replacement for polyvinyl alcohol, CMC, and starch prods.; easily batch or jet cooked; provides exc. machine runnability*Properties:* Dry powd.**Pentalyn® 856** [Hercules/Resins]*Chem. Descrip.:* Pentaerythrityl rosinatate, modified

CAS 8050-26-8; EINECS/ELINCS 232-479-9

*Uses:* Thermoplastic resin for modifying compositions based on alcohol- and water-sol. film-formers; replacement or extender for shellac; contributes high gloss, block resistance, fast solv. release, and good adhesion in formulating water-based inks, and paper coatings, adhesives, wax emulsions, and water-reducible paints; food-contact applics.*Properties:* USDA Rosin WG flakes; sol. in aq. sol'n.s. of alkalis, ethanol, and IPA, ethers, alcohol-ethers, esters, ketones, aromatic and chlorinated hydrocarbons, and to 25-39% solids in diethylene glycol; sp.gr. 1.10; dens. 1.09 kg/l; soften pt. 131 C; acid no. 140**Pentalyn® A** [Hercules/Resins]*Chem. Descrip.:* Pentaerythrityl rosinatate

CAS 8050-26-8; EINECS/ELINCS 232-479-9

*Uses:* Tackifier for CR, NR, SBR, NBR, chlorinated rubber, reclaim rubber, and their latexes, paper, cloth, leather laminates, tapes, hot-melt adhesives and coatings, pressure-sensitive adhesives; varnish resin; in enamel applics.; linoleum cements; contributes adhesion, high aliphatic solubility, gloss, solv. release, stability with reactive pigments, and good pigment wetting to printing inks; food-contact use; hard, pale, thermoplastic resin*Properties:* Gardner 9.5 (60% in min. spirits) solid, flakes; sol. in esters, ketones, aromatic and aliphatic hydrocarbons, and higher alcohols; water-insol.; dens. 1.07 kg/l; G-H visc. G (60% in min. spirits); soften pt. 111 C; acid no. 12; ref. index 1.544**Pentalyn® H** [Hercules/Resins]*Chem. Descrip.:* Pentaerythrityl hydrogenated rosinatate

CAS 64365-17-9; EINECS/ELINCS 264-848-5

*Uses:* Tackifier for NR, SBR, CR, NBR, chlorinated rubbers, EVA, reclaim rubber, and their latexes, paper, cloth, leather laminates, adhesives, tapes; food-pkg. and processing operations; hard, thermoplastic resin; contributes improved resist. to oxidation, greater heat stability, better color retention*Properties:* USDA Rosin N flakes; sol. in aromatic and aliphatic hydrocarbons, esters, and ethers; dens. 1.07 kg/l; G-H visc. D (60% in min. spirits); soften. pt. 104 C; acid no. 12**Pentasize 8** [Haltermann GmbH]*Chem. Descrip.:* Octadecenyl succinic anhydride

CAS 28777-98-2; 249-210-6

*Uses:* Neutral sizing agent for paper and board industry; effective @ pH 4-9*Properties:* Amber clear liq.; sapon. no. 300-325; 100% act.; nonionic  
*Storage:* Store @ < 40 C to minimize color degradation; store in very dry place with adequate ventilation; keep away from sparks and flames**Pentasize 68** [Haltermann GmbH]*Chem. Descrip.:* Alkenyl C16/C18 succinic anhydride

CAS 70983-55-0

*Uses:* Neutral sizing agent for paper and board industry; effective at pH 4-9*Properties:* Amber clear liq.; sapon. no. 320-350; 100% act.  
*Storage:* Store @ < 40 C to minimize color degradation; store in very dry place with adequate ventilation; keep away from sparks and flames**Pentastack DO-70PG** [Haltermann GmbH]*Chem. Descrip.:* Sodium dioctyl sulfosuccinate in propylene glycol/water*Uses:* Wetting agent; emulsion polymerization surfactant; wetting agent for pulp/paper; dispersant in oil industry*Properties:* Clear to pale yel. liq.; sp.gr. 1.090-1.110; pH 5-7; 68-72% total

solids; anionic

**Pentex® 99** [Rhodia]*Chem. Descrip.:* Sodium dioctyl sulfosuccinate

CAS 577-11-7; EINECS/ELINCS 209-406-4

*Uses:* Surfactant, wetting agent for adhesives, flexo and gravure inks, paints, high-gloss paints, paper, textiles, emulsion polymerization, agric. sprays; good color acceptance*Properties:* Liq.; 75% conc.; anionic**Pentonium S70** [Haltermann GmbH]*Chem. Descrip.:* 3-Chloro-2-hydroxypropyl trimethyl ammonium chloride aq. sol'n.

CAS 3327-22-8; EINECS/ELINCS 222-048-3

*Uses:* Paper starch cationizing agent*Properties:* Colorless clear liq.; sp.gr. 1.170 (20 C); pH 3-6; 69% min. act.**Perbunan N Latex 2818** [Bayer AG; Bayer/Fiber, Addits., Rubber]*Chem. Descrip.:* NBR latex without reactive groups

CAS 9003-18-3

*Uses:* Used in oil- and petrol-resistant proofings and coatings for fabrics and paper; dipped goods; binders for nonwoven fabric, brake and clutch linings, gasket materials, etc.; nonstaining; similar to corresponding solid grades of Perbunan N*Properties:* Dens. 0.98 g/cc; pH 10-12; 27% ACN content; 45% solids**Perbunan N Latex 3310** [Bayer AG; Bayer/Fiber, Addits., Rubber]*Chem. Descrip.:* NBR latex without reactive groups

CAS 9003-18-3

*Uses:* Used in oil- and petrol-resistant proofings and coatings for fabrics and paper; dipped goods; binders for nonwoven fabric, brake and clutch linings, gasket materials, etc.*Properties:* Dens. 0.99 g/cc; pH 10-12; 32% ACN content; 45% solids**Perbunan N Latex 3415 M** [Bayer AG; Bayer/Fiber, Addits., Rubber]*Chem. Descrip.:* NBR latex with reactive groups

CAS 9003-18-3

*Uses:* Used in oil- and petrol-resistant proofings and coatings for fabrics and paper; dipped goods; binders for nonwoven fabric, brake and clutch linings, gasket materials, etc.; for impregnation of nonwoven fabrics (e.g., in prod. of base materials for syn. leathers)*Properties:* Dens. 0.98 g/cc; pH 5.5-6.5; 33% ACN content; 4% methacrylic acid; 47.5% solids**Perbunan N Latex T** [Bayer AG; Bayer/Fiber, Addits., Rubber]*Chem. Descrip.:* NBR latices with reactive groups

CAS 9003-18-3

*Uses:* Used in oil- and petrol-resistant proofings and coatings for fabrics and paper; dipped goods; binders for nonwoven fabric, brake and clutch linings, gasket materials, etc.; for impregnation of nonwoven fabrics (e.g., in prod. of base materials for syn. leathers), and for dipped goods*Properties:* Dens. 0.98 g/cc; pH 5.5-6.5; 35% ACN content; 2% methacrylic acid; 50% solids**Perbunan N Latex VT** [Bayer AG; Bayer/Fiber, Addits., Rubber]*Chem. Descrip.:* NBR latices with reactive groups

CAS 9003-18-3

*Uses:* Used in oil- and petrol-resistant proofings and coatings for fabrics and paper; dipped goods; binders for nonwoven fabric, brake and clutch linings, gasket materials, etc.*Properties:* Dens. 0.998 g/cc; pH 8.0-9.0; 30% ACN content; 4% methacrylic acid; 45% solids**Percol® 368** [Ciba Spec. Chems./Water Treatment]*Chem. Descrip.:* Acrylamide copolymers*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective at pH 4-9*Properties:* Bead; m.w. 500,000-1,000,000; 100% act.; cationic*Storage:* Dry polymers should be stored in cool, dry place; avoid temps. below 50 F**Percol® 370** [Ciba Spec. Chems./Water Treatment]*Chem. Descrip.:* Acrylamide copolymers*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-9*Properties:* Bead; m.w. 1,000,000-5,000,000; 100% act.; cationic*Storage:* Dry polymers should be stored in cool, dry place; avoid temps.

flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-9

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 775** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-9

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 775 FS25** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-9

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 775 FS40** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-9

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 778** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-10

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 778 FS25** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-9

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 778 FS40** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-9

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 780** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 5-11

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; nonionic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 787** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening,

flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-10

*Properties:* Bead; m.w. 5,000,000-10,000,000; 100% act.; cationic

*Storage:* Dry polymers should be stored in cool, dry place; avoid temps. below 50 F

**Percol® 788N** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 4-10

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 790** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 5-11

*Properties:* Liq. disp.; m.w. 10,000,000-15,000,000; 50% act.; anionic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® 919** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 5-11

*Properties:* Granular solid; m.w. 15,000,000-20,000,000; 100% act.; non-ionic

*Storage:* Dry polymers should be stored in cool, dry place; avoid temps. below 50 F

**Percol® E24** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* Provides primary and secondary sedimentation, sludge thickening, flotation, and dewatering for use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; effective @ pH 5-11

*Properties:* Bead; m.w. 10,000,000-15,000,000; 100% act.; anionic

*Storage:* Dry polymers should be stored in cool, dry place; avoid temps. below 50 F

**Percol® LT22** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* For use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; for potable water clarification; effective @ pH 4-9

*Properties:* Granular solid; m.w. 5,000,000-10,000,000; 100% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® LT22S** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* For use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; for potable water clarification; effective @ pH 4-9

*Properties:* Granular solid; m.w. 15,000,000-20,000,000; 100% act.; cationic

*Storage:* Store in cool location where temp. extremes are avoided; avoid temps. below 50 F

**Percol® LT24** [Ciba Spec. Chems./Water Treatment]

*Chem. Descrip.:* Acrylamide copolymers

*Uses:* For use in water and industrial waste treatment incl. chem., dairy, food, leather, pulp/paper, pharmaceutical, textile, and other industries; for potable water clarification; effective @ pH 4-9

*Properties:* Granular solid; m.w. 1,000,000-5,000,000; 100% act.; cationic

*Storage:* Dry polymers should be stored in cool, dry place; avoid temps. below 50 F

**Peregal® ST** [ISP]

*Chem. Descrip.:* PVP polymer

CAS 9003-39-8; EINECS/ELINCS 201-800-4

*Uses:* Dispersant, stripping assistant, detergent used for dyes; fulling soap additive; rag-stripping assistant in paper industry; detergent and soil-sus-

- pending agent for washing yarns; used in long liquors, pkg. machines, or jigs  
*Properties:* VCS 5 max. liq.; water-sol.; pH 5-7 (5% aq.); 30-32% act.; cationic
- PerForm™** [Hercules]  
*Uses:* Retention aid, drainage aid, clarifier for pulp, paper, and paperboard mfg.
- Pergasol®** [Ciba Spec. Chems./Paper]  
*Uses:* Direct dye for paper and board coloration  
*Properties:* Anionic/cationic
- Perglutin® 204** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent suitable for highly loaded size press circulations; high tolerance of electrolytes and trash; support of optical brightening  
*Properties:* Disp.; 40% act.; amphoteric
- Perglutin® 395** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent suitable for highly loaded press circulations; high tolerance of electrolytes and trash; support of optical brightening  
*Properties:* Disp.; 30% act.; amphoteric
- Perglutin® 450/220** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Internal sizing agent for neutral pH range; good initial sizing; compat. with cationic and anionic processing aids  
*Properties:* 24% act.
- Perglutin® 450/240** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Internal sizing agent for neutral pH range; good initial sizing  
*Properties:* 22% act.
- Perglutin® 450/280** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Internal sizing agent for paper; rec. at neutral pH range
- Perglutin® A 200** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-methacrylate copolymer  
*Uses:* Surf. sizing agent for graphic papers; support for optical brightening; high tolerance of electrolytes  
*Properties:* Liq.; 16% act.; anionic
- Perglutin® A 281** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent suitable for graphic and total office papers, ink jet; very good tolerance of electrolytes; support of optical brightening  
*Properties:* Disp.; 25% act.; anionic
- Perglutin® K 175 EP** [BK Giulini Chemie]  
*Chem. Descrip.:* Acrylate copolymer  
 CAS 25133-97-5  
*Uses:* Surf. sizing agent very effective with all raw papers; very high affinity to fiber  
*Properties:* Liq.; 17% act.; cationic
- Perglutin® K 333** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent for paper; very effective with all raw papers esp. in highly electrolyte-charged size press circuits
- Perglutin® K 418** [BK Giulini Chemie]  
*Chem. Descrip.:* Methacrylate copolymer  
*Uses:* Internal sizing agent for all types of paper; high retention and dewatering  
*Properties:* Liq.; 18% act.; cationic
- Perglutin® K 440** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8  
*Uses:* Surf. sizing agent very effective with all raw papers; very good initial sizing  
*Properties:* Disp.; 25% act.; cationic
- Perglutin® K 485** [BK Giulini Chemie]  
*Chem. Descrip.:* Styrene-acrylate copolymer  
 CAS 9010-92-8
- Uses:* Surf. sizing agent for paper; very effective with all raw papers
- Pergopak M2** [Omya Croxton+Garry]  
*Chem. Descrip.:* Urea-formaldehyde condensation prod.  
 CAS 9011-05-6  
*Uses:* Org. wh. pigment blended with stock during production of paper and board; inc. pore vol. of paper, speeding up drying and reducing chance of strike-through  
*Properties:* Wh. fine powd.; 0.1-0.15 µ particle size; sp.gr. 1.41-1.45; bulk dens. 55-65 g/l; surf. area > 22 m<sup>2</sup>/g; TAPPI whiteness 97 ± 1%
- Pericide® EF** [Vinings Ind.]  
*Chem. Descrip.:* Mixt. of peracetic acid, hydrogen peroxide, acetic acid, and water  
*Uses:* Biocide for pulp/paper controlling growth of bacteria, fungi, fresh water organisms, and spore formers; breaks down to water, oxygen, and acetic acid so the finished paper and effluent streams contain no biocidal residue  
*Environmental:* Environmentally friendly
- Perkacit® DPG** [Flexsys]  
*Chem. Descrip.:* N,N-Di-phenylguanidine  
 CAS 102-06-7; EINECS/ELINCS 203-002-1  
*Uses:* Sec. accelerator in NR and SR for sulfenamide and thiazole accelerators; accelerator in tire and industrial rubber applics.; metal complexing agent for ore flotation; codeveloper in water-resist. security inks; fixing agent in thermal printing inks; stabilizer for methacrylamide copolymer aq. sol'ns.; food-contact rubber articles; good 'green' storage stability; with sulfenamide primary accelerator, gives fast cure rates, good reversion and fatigue resist.  
*Use Level:* 0.1-1.0 phr  
*Regulatory:* FDA 21CFR §177.2600; BgVV XXI compliant  
*Properties:* Cream to lt. pink powd., oil-coated powd., or 2 mm pellets; m.w. 211.3; sp.gr. 1.2; dens. 1180 kg/m<sup>3</sup> (20 C); m.p. 144 C; 96-97% act.  
*Storage:* 12 mos shelf life; store in single-stacked pallets in cool, dry, well-ventilated area away from direct sunlight
- Permanax™ PTBC** [Flexsys]  
*Chem. Descrip.:* Reaction prod. of 6-t-butyl-3-methylphenol and sulfur dichloride  
 CAS 57062-46-1  
*Uses:* Antioxidant for thermoplastic elastomers, urethanes, ABS, PVC, PE, PP, adhesives, caulks, fiber finish nat. and syn. oils; stabilizer, antigellant for drying oils; rec. for applics. requiring heat resist.; provides protection against degradation catalyzed by heavy metals; low volatility; nonstaining; non-discoloring  
*Use Level:* 0.05-0.1% (stabilizer during processing), 0.1-1.5% (stabilizer for end-use), 0.05-5% (antioxidant for fiber finish oils)  
*Properties:* Yel. to med. amber highly visc. liq.; sp.gr. 1060 kg/m<sup>3</sup> (25/15 C)
